University of California, Irvine General Catalogue

VIEW THE 2016-17 GENERAL CATALOGUE
Welcome to the University of California, Irvine. As a UC Irvine student, you have access to resources that extend across our campus, throughout our state, and beyond. This Catalogue will serve as an invaluable guide to enhancing your UCI experience.

UCI is consistently ranked among the nation’s best universities. Achievements in the sciences, arts, humanities, medicine, and management have garnered top 50 national rankings for more than 40 academic programs. Three UCI researchers have won Nobel Prizes—two in chemistry and one in physics. We were the youngest campus ever to be welcomed into the prestigious Association of American Universities. The New York Times, in its College Access Index, ranked UCI as number one in the nation for economic diversity in its student body. And you will be especially glad to hear that Money magazine named UCI the top university for beach lovers.

These are some of the reasons why UCI attracted nearly 98,000 undergraduate applications in 2015 for only 8,500 spots. Our graduate programs are also extremely competitive. You are on this campus because we know you have what it takes to succeed at the highest level.

UCI reaches beyond the classroom and laboratory to help solve societal issues and support human development. We are a hub for stem cell research, a trailblazer in understanding global warming, and a leader in the fight against breast cancer. Our nationally ranked medical center in Orange serves as Orange County’s only Level I trauma center, and our state-of-the-art UC Irvine Douglas Hospital has been ranked among the country’s top 50 hospitals for more than 10 years, providing outstanding care for the region’s citizens. We ranked fourth in the University Global Health Impact Report Card, which evaluates top U.S. and Canadian research universities on their contributions to urgent global health research and access to treatment worldwide. Our law school, the state’s first public law school to open in more than 40 years, graduated its first class in 2012. In July 2012, the Regents established the UC Irvine School of Education from the existing Department of Education in recognition of its national academic profile.

A major intellectual and cultural center, UCI offers numerous public activities and events. The Claire Trevor School of the Arts and the School of Humanities produce engaging and entertaining cultural programs, including the award-winning New Swan Theater, our summertime outdoor Shakespeare Festival. UCI’s Anteater athletes have won more than two dozen national championships.

We are also national leaders in research and practice relating to sustainability and environmental protection. UCI is the most energy-efficient campus in California, with among the most LEED Platinum and Gold certified buildings in the U.S. For the past two years, we have been named the number one “Coolest School” in Sierra magazine’s annual ranking of the nation’s greenest universities.

UCI is benefiting the community and the world in countless ways through its scholarly, scientific, creative, and economic contributions. Orange County’s second largest employer, UCI generates an annual economic impact on the county of $4.8 billion.

I encourage you to take advantage of all that UCI has to offer. I look forward to seeing you on campus and to being a part of this very important time in your life.

Sincerely,

Howard Gillman
Chancellor

The University of California

The University of California (UC) was chartered as the state’s only land grant college in 1868. Today, UC is one of the world’s largest and most renowned centers of higher education and has a combined enrollment of more than 240,000 students on 10 campuses—Berkeley, Davis, Irvine, Los Angeles, Merced, Riverside, San Diego, San Francisco, Santa Barbara, and Santa Cruz. Among the campuses there are six medical schools, a school of veterinary medicine, and professional schools of business administration, education, engineering, law, oceanography, and many others. The collections of the more than 100 UC libraries are surpassed in size on the American continent only by the Library of Congress collection.

The UC faculty is internationally noted for its distinguished academic achievements. UC-affiliated faculty and researchers have won 57 Nobel Prizes and more than 50 National Medals of Science. National Academy of Sciences membership exceeds 350 and Institute of Medicine membership exceeds 160. UC creates an average of four new inventions every day, and for 15 years in a row has developed more patents than any other university in the country.

UC maintains a variety of research facilities, agricultural field stations, and extension centers in more than 100 locations throughout California. Public services include medical and dental clinics, information services for agricultural and urban populations, a broad program of continuing education, museums and art galleries, and more. Detailed information about the University of California’s teaching, research, and public service mission is available at the University of California website (http://www.universityofcalifornia.edu).

The Irvine Campus

Howard Gillman, Chancellor

The University of California, Irvine (UCI) opened in 1965 with 116 faculty and 1,589 students. Since then, UCI programs, faculty and graduates have achieved distinction in virtually every discipline.

Two Nobel Prizes in 1995 for founding faculty F. Sherwood Rowland in Chemistry and Frederick Reines in Physics helped to secure UCI’s position among the leading American research universities. In 2004, Irwin A. Rose, Department of Physiology and Biophysics, became UCI’s third Nobel Laureate (chemistry). UCI has been ranked prominently along with much older universities for excellence in the arts and humanities, Earth system science, management, social sciences, technology, and information systems.

For quality of educational experience and caliber of faculty, UCI consistently ranks among the nation’s best public universities, and among the top research universities in the world. Election to the American Association of Universities (AAU), a group of 62 of the most distinguished research institutions, is another indication of UCI’s stature in the academic community.

As a research university, UCI challenges students at every level, both academically and personally. While research is critical to graduate education, the research environment also opens up new educational experiences for undergraduates. Students have access to faculty at the forefront of their fields, and they also have opportunities to participate directly in faculty research projects. In addition, to empower students for the future in an information-focused society, UCI has integrated computer technology throughout the curriculum and campus life.

UCI is committed to the discovery and transmission of knowledge. It makes available to its 30,056 students (24,489 undergraduate and 5,567 graduate, medical, and credential students) the education, skills, and credentials which provide the basis for lifelong personal and professional growth.

UCI’s education and research missions are fulfilled in its academic units, which are described briefly below, and in its formal research units, which are described in the Office of Research section.
The Claire Trevor School of the Arts teaches the creative as well as the academic and critical dimensions of the arts. The School is concerned with the vitality of the arts in society. Faculty energies are directed toward the refinement, enhancement, and encouragement of students' artistic and creative talents and toward the development of the students’ understanding of related theory and history. The School offers programs which emphasize extensive studio and workshop experiences, essential theoretical and historical background studies, and exercises in criticism. There are 803 students in the School, including 657 undergraduate students and 146 graduate students.

The Francisco J. Ayala School of Biological Sciences is one of the campus’s larger academic units, with 3,537 students (3,249 undergraduate and 288 graduate). Faculty research areas include neural plasticity and behavior (which in part encompasses the development of the nervous system, memory, response to injury, and degenerative brain diseases such as Alzheimer's); the nature of cell-cell interactions; pattern formation; the elucidation of ecological conditions and evolutionary histories that have been the driving forces in organism design and functional diversity; the organization and expression of genes; biomolecular structure; molecular pathogenesis; human mitochondrial genetics; and cell biology.

The Paul Merage School of Business faculty conduct research and teach in the fields of accounting, economics, finance, health care management, information systems, marketing, operations and decision technologies, organization management, public policy, real estate, and strategy. Based on a thematic approach throughout the curriculum, the School focuses on three critical drivers of business growth: strategic innovation, information technology, and analytic decision making. The Merage School enrolls 575 Business Administration and 150 Business Information Management undergraduate students. The Merage School also enrolls 284 students in the M.B.A. and Ph.D. programs, 92 students in Master in Professional Accountancy, and 478 students in the Fully Employed M.B.A., Executive M.B.A., and Health Care Executive M.B.A. programs.

The School of Education offers an undergraduate major in Education Sciences, a minor in Education, a research-focused Ph.D. program, and MAT and credential programs for those becoming teachers. The School integrates the themes of learning, cognition, and development; educational policy and social context; and language, literacy, and technology across its programs. The faculty is multidisciplinary; their scholarly work arises from the common belief that education environments, both in and out of school, are the loci of change in the quality of life and the availability of productive life choices for learners of all ages.

The Henry Samueli School of Engineering, with 4,319 students (3,318 undergraduate, 1,001 graduate), focuses on advancing the frontier of innovative engineering education and pioneering research that will shape the future of the nation and the world. Through an integrative and cross-disciplinary educational experience that blends fundamentals, research, and hands-on experience, the School trains future leaders in the engineering profession. Working in partnership with state and federal agencies and industry, the School promotes the transfer of research to applications that benefit society. The major research disciplines are aerospace, biochemical, biomedical, chemical, civil, computer, computer science, electrical, environmental, materials science, and mechanical engineering. Research areas include biochemical, biomedical, and rehabilitation engineering, earthquake engineering, water resources, transportation, parallel and distributed computer systems, embedded systems, intelligent systems, machine learning, wireless communications and networking, image and signal processing, opto-electronic devices and materials, high-frequency devices and systems, integrated micro and nanoscale systems, green energy, fuel cell technology, fluid mechanics, combustion and jet propulsion, materials processing, robotics, and modern control theory.

The School of Humanities faculty have been repeatedly honored for their teaching and scholarly excellence. Included in the faculty’s more than 100 research specialties are literary criticism, film studies, media studies, philosophical analysis, historical inquiry, art history, and world languages and literatures. The faculty also participate in interdisciplinary programs such as Global Cultures, Global Middle East Studies, Medical Humanities, and Religious Studies. At the core of the educational mission of the humanities is imparting to students tools of analysis that will help them interpret, understand, describe, and explain the world around them. The School has over 1,604 students, approximately 1,326 undergraduate and 278 graduate.

The Donald Bren School of Information and Computer Sciences (ICS) has grown to 2,831 students (2,366 undergraduate and 465 graduate students). ICS faculty members are engaged in research and teaching in computer science, information technology, and statistics. Specific areas of faculty research include: design of algorithms and data structures; computer architecture and embedded computer systems; networked and distributed systems; systems software; social and mobile computing; artificial intelligence, machine learning, and data mining; computer games and virtual worlds; databases and information retrieval; computer graphics and visualization; bioinformatics, computational biology and genomics; computer-supported cooperative work, human-centered computing and human-computer interaction; security and privacy; software engineering; managerial and social aspects of computing technology; and statistics.

Interdisciplinary Studies programs provide students with opportunities to pursue subject areas which derive from the interaction of different disciplines such as Computer Science and Engineering, Civic and Community Engagement, and Transportation Science.

The School of Law had a student body of 334 in academic year 2015-2016. It welcomed its inaugural class of 60 students in August 2009, graduated its first class in May 2012, and received full accreditation by the American Bar Association in June 2014. The School offers the J.D. (Juris Doctor) degree. The curriculum includes traditional areas of legal doctrine taught in an innovative context designed to prepare students for the practice of law in the 21st century. The School’s concurrent degree programs (J.D./M.B.A., J.D./M.A., and J.D./Ph.D.) connect UC Irvine’s legal education with the wide range of academic and professional opportunities at a major research university.

The School of Medicine, with 625 graduate and medical students, and 720 residents and fellows, is dedicated to advancing medical knowledge and clinical practice through scholarly research, physician education, and high-quality care; nurturing the development of medical students, resident physicians, and scholars in the clinical and basic sciences; and supporting the dissemination of research advances for the benefit of society. The UC Irvine Douglas Hospital at UC Irvine Health has modern facilities for conducting medical research and training future and practicing physicians, allowing
more opportunities for researchers and clinicians to collaborate on patient care. A state-of-the-art Medical Education building opened in February 2010 and houses the latest in technology to advance active, small group learning opportunities.

The **Program in Nursing Science** provides a strong research-based academic and professional program to prepare graduates for basic clinical and advanced practice roles, as well as for educational, administrative, and research positions across the healthcare delivery system, and for faculty positions in academic institutions. The Program has 161 undergraduate and 41 graduate students.

The **Department of Pharmaceutical Sciences**, founded in 2007, offers its 669 students interdisciplinary educational programs integrating concepts from fields as diverse as biology, chemistry, cell and molecular biology, chemical engineering, materials science, pharmaceutics, pharmacology, and physiology. Its faculty includes world-renowned scientists encompassing a variety of backgrounds with wide-ranging research programs that cover every facet of pharmaceutical research.

The **School of Physical Sciences** has a student body of 2,280 (1,764 undergraduate and 516 graduate). Researchers in the School are conducting investigations in atmospheric chemistry (including the discovery of the adverse impact of human-made chlorofluorocarbon compounds on the Earth’s ozone layer), biogeochemistry and climate, synthetic chemistry, laser spectroscopy, condensed matter physics, elementary particle physics, plasma physics, and pure and applied mathematics, and mathematical physics.

The **Program in Public Health** provides institutional focus for UC Irvine’s academic strengths in various sub-disciplines of public health and facilitates well-grounded education and innovative research in emerging aspects of the field. Under the Program in Public Health, the Department of Population Health and Disease Prevention advances the collaborative interdisciplinary mission of public health research, education, and translational practice. The Program has 1,542 undergraduate and 60 graduate students.

The **School of Social Ecology**, a multidisciplinary unit established in 1970, is unique to UCI. The School’s central objectives are the application of scientific methods to the analysis and resolution of societal problems, and the development of theory and knowledge pertinent to social, behavioral, environmental, and legal phenomena. Among issues of long-standing interest are crime and justice in society, social influences on human development over the life cycle, urban and community planning, and the effects of the physical environment on health and behavior. There are 3,026 students in the School, including 2,650 undergraduate and 376 graduates.

The **School of Social Sciences**, with 5,483 students (5,075 undergraduate and 408 graduate), is the largest academic unit at UCI. The faculty, many of whom are nationally recognized, have expertise in a wide range of specific social science topics. Research areas include mathematical modeling of perception and cognitive processes; economic analysis of transportation; examination of the impact of society’s political system on its economy; study of social structure and values in different cultures through a rigorous scientific methodology; exploration of authority structures and inequality in society; and globalization and international affairs.

**Academic Goals**

UCI offers programs designed to provide students with a foundation on which to continue developing their intellectual, aesthetic, and moral capacities. Programs and curricula are based on the belief that a student’s collective university experience should provide understanding and insight, which are the basis for an intellectual identity and lifelong learning.

An important aspect of UCI’s educational approach is the emphasis placed on student involvement in research, independent study, and the creative process as complements to classroom study. Independent research in laboratories, field study, participation in writing workshops, and in arts productions are normal elements of the UCI experience. Many departments integrate into the curriculum special programs and courses which involve students in original research and creative activities.

UCI provides an inclusive atmosphere conducive to pursuing creative work and scholarship at all levels, to exploring the accumulated knowledge of humanity, and to developing new knowledge through basic and applied research. Along with these objectives, UCI has a serious commitment to public service. The campus generates research expertise that it applies to regional, national, and global challenges, and engages in humanistic inquiry to address societal problems.

**Academic Structure**

UCI’s instruction and research programs focus on fundamental areas of knowledge, and at the same time provide for interdisciplinary and professional study through the Claire Trevor School of the Arts, Francisco J. Ayala School of Biological Sciences, The Paul Merage School of Business, School of Education, The Henry Samueli School of Engineering, School of Humanities, Donald Bren School of Information and Computer Sciences, Interdisciplinary Studies, School of Law, School of Medicine, Program in Nursing Science, Department of Pharmaceutical Sciences, School of Physical Sciences, Program in Public Health, School of Social Ecology, and School of Social Sciences.

The Office of Academic Affairs has responsibility for all programs of instruction and research. Along with the Graduate Division and the Division of Undergraduate Education, Academic Affairs reports directly to the Provost/Executive Vice Chancellor. Matters of educational policy, courses, and grades are the responsibility of the Irvine Division of the Academic Senate. The Academic Senate and the Office of the Academic Planning oversee academic program reviews and approvals.

UCI Student Affairs (http://studentaffairs.uci.edu) supports the university’s academic mission by enriching the student experience from outreach and orientation all the way through to graduation. Student Affairs offers comprehensive programs and services to advance co-curricular learning; foster
student leadership; provide services that support the physical and mental health and wellness of students; enhance the quality of student life; and promote the general welfare of the campus community.

The Division of Undergraduate Education provides leadership in developing policies and programs for the improvement of undergraduate education in such areas as general education, retention, advising, curricular development, undergraduate scholarship and research activities, international education, academic internship, civic and community engagement, grant proposals, assessment, and improvement of instruction.

The Graduate Division serves as the campuswide advocate for the advancement of graduate education and oversees all master's and doctoral programs, postdoctoral training programs, and the postbaccalaureate teacher credential program. The Graduate Division has a leadership role with UCI's academic units and provides implementation guidelines and procedures related to university policy as it affects the interconnected aspects of graduate student education, including admissions, student financial support and fellowships, enrollment and registration, academic standards, requirements for graduate degree programs, student services, professional development, and diversity programs.

The Division of Undergraduate Education and the Graduate Division also administer programs and services affecting undergraduate and graduate education, respectively, that require campus-level attention and coordination, and that do not come under the direct authority of the heads of academic units or the Irvine Division of the Academic Senate.

Accreditation
UCI is a member of the Western Association of Schools and Colleges (WASC). The campus is accredited by the WASC Senior College and University Commission (WSCUC). This accreditation requires periodic review in accord with WSCUC policies and standards. UCI is pleased to participate in these comprehensive reviews as one way to demonstrate our commitment to 1) student learning and success; 2) quality and improvement; and 3) institutional integrity, sustainability, and accountability. Further information is available at the WSCUC website (http://www.wascsenior.org).

In addition:

- The undergraduate degree program of the Department of Chemistry is accredited by the American Chemical Society.
- The credential programs of the School of Education are approved by the California Commission on Teacher Credentialing (CCTC).
- The undergraduate majors in Aerospace Engineering (AE), Biomedical Engineering (BME), Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Computer Science and Engineering (CSE), Electrical Engineering (EE), Environmental Engineering (EnE), Materials Science Engineering (MSE), and Mechanical Engineering (ME) are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org), http://abet.org; Computer Science and Engineering (CSE) is also accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).
- The M.D. program of the UCI School of Medicine is accredited by the Liaison Committee on Medical Education.
- The M.S. program in Genetic Counseling is accredited by the American Board of Genetic Counseling.
- The M.D. program of the UCI School of Medicine is accredited by the Liaison Committee on Medical Education.
- The School of Law is fully accredited by the American Bar Association (ABA).
- The pre-licensure RN program and the nurse practitioner program are approved by the Board of Registered Nursing; the baccalaureate and master's degrees in Nursing Science at the University of California, Irvine are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation).
- The Program in Public Health, including the Bachelor of Arts and Bachelor of Sciences, the Master of Public Health (M.P.H.), and the Ph.D. in Public Health are accredited by the Council of Public Education for Public Health (CEPH).
- The Program in Public Health, including the Bachelor of Arts and Bachelor of Sciences, the Master of Public Health (M.P.H.), and the Ph.D. in Public Health are accredited by the Council of Public Education for Public Health (CEPH).
- The M.S. program in Genetic Counseling is accredited by the American Board of Genetic Counseling.
- The M.D. program of the UCI School of Medicine is accredited by the Liaison Committee on Medical Education.
- The School of Law is fully accredited by the American Bar Association (ABA).
- The Paul Merage School of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business.
- The Paul Merage School of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business.
- The M.D. program of the UCI School of Medicine is accredited by the Liaison Committee on Medical Education.
- The M.S. program in Genetic Counseling is accredited by the American Board of Genetic Counseling.
- The M.D. program of the UCI School of Medicine is accredited by the Liaison Committee on Medical Education.
- The Program in Public Health, including the Bachelor of Arts and Bachelor of Sciences, the Master of Public Health (M.P.H.), and the Ph.D. in Public Health are accredited by the Council of Public Education for Public Health (CEPH).
- The Master of Urban and Regional Planning program is accredited by the National Planning Accreditation Board.

Office of Equal Opportunity and Diversity
The Office of Equal Opportunity and Diversity (OEOD) provides consultation services and training programs to the UCI campus and the medical center on the interpretation and application of both UCI policies and Federal and State laws regarding sexual harassment, sexual offense, discrimination, equal opportunity, and diversity. It also develops and monitors UCI's Affirmative Action Plan for staff and faculty as required by Federal regulations.

OEOD investigates and provides assistance to UCI students, faculty, and staff in resolving complaints of discrimination, sexual harassment, and sexual offense. OEOD also offers a variety of workshops on diversity, cross-cultural communication, sexual harassment and sexual offense prevention, and conflict resolution in a diverse workplace/community to promote awareness, create organizational change, and provide support for the university's commitment to diversity and advancing inclusive excellence.

OEOD is located in 103 Multipurpose Science and Technology Building; telephone 949-824-5594 (voice), 949-824-7593 (TDD); email: oeod@uci.edu; or visit the Office of Equal Opportunity and Diversity website (http://www.oecd.uci.edu).
addition, the campus and surrounding communities are designed for bicycle traffic, with trails connecting UCI with student housing and the coast. Bus transportation makes travel convenient between the campus, medical center, and major housing areas, shopping centers, and recreation locales. In Orange, 13 miles to the north, the medical center is the primary teaching and research hospital for the UC Irvine School of Medicine.

Strengths in cancer and neuroscience research, much of which takes place at the University of California, Irvine Medical Center. Located in the city of Orange County's only cancer facility designated “comprehensive” by the National Cancer Institute. UCI is noted, in fact, for its and is a major site for the nationwide cancer genetics research network. For its range of services and research, UCI's Chao Family Comprehensive Cancer Center is Orange County’s only cancer facility designated “comprehensive” by the National Cancer Institute. UCI is noted, in fact, for its strengths in cancer and neuroscience research, much of which takes place at the University of California, Irvine Medical Center. Located in the city of Orange, 13 miles to the north, the medical center is the primary teaching and research hospital for the UC Irvine School of Medicine.

Due to the high caliber of UCI faculty and scholarship, the campus is home to national organizations including the National Fuel Cell Research Center and is a major site for the nationwide cancer genetics research network. For its range of services and research, UCI's Chao Family Comprehensive Cancer Center is Orange County’s only cancer facility designated “comprehensive” by the National Cancer Institute. UCI is noted, in fact, for its strengths in cancer and neuroscience research, much of which takes place at the University of California, Irvine Medical Center. Located in the city of Orange, 13 miles to the north, the medical center is the primary teaching and research hospital for the UC Irvine School of Medicine.

Bus transportation makes travel convenient between the campus, medical center, and major housing areas, shopping centers, and recreation locales. In addition, the campus and surrounding communities are designed for bicycle traffic, with trails connecting UCI with student housing and the coast.
Celebrate UCI

One Day, One Campus, Many Options. Come to Celebrate UCI (http://celebrate.uci.edu)! This spring event features an outdoor Festival, Open House, and Car Show. Wayzgoose, UCI’s oldest tradition, is a student-run festival in Aldrich Park filled with live entertainment, food, and games for UCI and the community. Many offices and services are open or available with information for everyone, especially prospective students and their families. Included are academic program information and sessions; campus, housing, and recreation facilities tours; financial aid and admissions information, and much more. Events and parking are free. For information and specific times of events, visit the Celebrate UCI website (http://celebrate.uci.edu).

University Advancement

University Advancement is helping to shape the future of the UC Irvine campus by creating awareness, building relationships, and generating financial support for UC Irvine’s mission of teaching, research, and public service. It is responsible for all philanthropic fundraising, including the legal and fiduciary responsibilities associated with accepting all charitable donations to UC Irvine, through the University of California, Irvine Foundation. Our success is accomplished through the combined efforts of professional staff, academic leaders, and dedicated volunteers. Program areas include community and government relations, office of development, prospect research, gift processing, donor relations, planned giving, corporate and foundation relations, UCI Fund, UCI Medical Center, health advancement, and other research and academic units. Individuals in these areas provide a bridge between the University and the community, thereby promoting a climate of understanding and philanthropic investment. For additional information, contact University Advancement at 949-824-8696 or visit the University Advancement website.

In an era of decreasing state support, UC Irvine relies on private support at a greater level than ever. The Office of Development helps raise charitable donations from individuals, corporations, and foundations. UC Irvine’s development program works hand-in-hand with UC Irvine’s schools, research units and the UCI Medical Center to secure philanthropic gifts that support the mission of the University. In 2015, the campus successfully concluded its $1 billion “Shaping the Future” campaign for this purpose. For additional information, contact the Office of Development at 949-824-0503.

The Office of Community and Government Relations is responsible for enhancing public understanding and support of UC Irvine and the University of California at local, state and federal levels. The program works to ensure that the University’s mission, as well as its legislative and budgetary objectives, are given due consideration by elected officials and the general public through strategic advocacy, civic engagement and awareness activities. Community and Government Relations provides leadership for building effective and enduring relationships with community leaders, public policy makers and other members of the public to increase the visibility and prominence of UC Irvine’s research, teaching and service missions. For additional information, contact Community and Government Relations at 949-824-0061.

The Office of Strategic Planning and Administration is the financial management unit of University Advancement. This office oversees gift processing, strategic planning, human resources, and the financial management of the University of California, Irvine Foundation’s assets. For additional information, contact the Strategic Planning and Administration Office at 949-824-4166.

The Office of Advancement Operations is the operations management unit of University Advancement. This office oversees prospect development, information management, database administration, and donor relations and special events. For additional information, contact the Advancement Operations Office at 949-824-6882.

UC Irvine Alumni

Located in the Newkirk Alumni Center on the corner of University Drive and Mesa Road, the UC Irvine Alumni Association is committed to engaging UC Irvine’s more than 160,000 alumni with the campus. It sponsors many key campus events, including the annual UCI Homecoming; Lauds & Laurels Awards, the distinguished alumni awards ceremony; Anteater Meetups; networking and career events; cap and gown sales; and the senior send-off events. UCI Alumni members receive a range of access and privileges which include discounts on travel, financial and career services, online research library access, and more at the general, annual, and lifetime levels.

UCI Alumni also oversees the Student Alumni Association at UCI, a student group that works to connect students to one another, alumni, and the university. The students help organize UCI Care-a-thon, an annual dance-a-thon that raises money for the neonatal intensive care unit at the UC Irvine Medical Center; Dinners with Anteaters, an event that brings alumni and students together for an evening of dining and networking; Inside the Alumni Studio, an event where alumni are interviewed by students and share valuable professional advice and personal insights into building success after graduation; and Alumni Back 2 Campus, a program in which alumni come back to UC Irvine to experience student life and activities, such as attending athletic and arts events, as well as sitting in on lectures and speaker series.

For additional information, visit the UCI Alumni website (http://www.alumni.uci.edu) or call 949-824-2586.

Strategic Communications

The Office of Strategic Communications advances UC Irvine’s reputation, mission, priorities, and values through an integrated communications approach that includes the following:

- **Brand development and management**: Cultivating an emotional connection and loyalty to the university by articulating the institution's distinctive qualities, encouraging a positive experience, and developing and protecting the university’s identity, marks, and graphic assets.
• **Media relations**: Establishing mutually beneficial relationships with members of the media—from digital publications and social networks to production studios and news organizations—to support the accurate, appropriate, and fair use of university information worldwide.

• **Marketing**: Developing effective tools and services to convey the university’s message, including advertising, presentations, promotional pieces, and events.

• **Publications and digital properties**: Creating magazines, newsletters, websites, and other digital content that advance the university’s mission.

• **Visual communications**: Providing photography, videography, graphic design, and other visual assets that create a compelling story.

• **Internal communications**: Providing outreach assistance and information for UCI’s students, faculty, and staff.

• **Executive communications**: Strengthening the presence and influence of university leaders—globally, regionally, and within the campus—through effective messaging and outreach support.

Strategic Communications is the university’s storyteller, providing information in a way that’s accurate, credible, engaging, and influential. It uses a wide range of platforms to share the university’s story—UCI Magazine, websites and social networks, university news and features in prominent media outlets, advertising and marketing materials, and visual assets such as photography, videography, and graphics—all designed to build connections with multiple constituents.

The office also develops and monitors communication policies, procedures, and standards to ensure a consistent, accurate, and appropriate presence. In addition, it provides strategy, counsel, services, and support to the university’s schools, programs, and units.

For more information, call 949-824-6922 or visit the Strategic Communications website (http://www.communications.uci.edu).

**UCI Libraries**

Lorelei Tanji, University Librarian

949-824-6836

http://www.lib.uci.edu/

Established in 1963 as one of the founding academic units on campus, the UCI Libraries connects users—faculty, researchers, scholars, students, staff, or community members—to information resources, facilitating the creation, preservation, and sharing of knowledge in all disciplines. The Libraries support the research needs of the campus and general community, through the Libraries’ website and at four library facilities: the Langson Library, the Ayala Science Library, and the Libraries Gateway Study Center on the UCI campus, and the Grunigen Medical Library in Orange.

**Langson Library** (http://www.lib.uci.edu/langson): The Langson Library supports research and teaching in the arts, humanities, social sciences, social ecology, education, and business/management.

**Special Collections and Archives** (http://special.lib.uci.edu/): The Department of Special Collections and Archives holds non-circulating collections of rare books, archives, manuscripts, photographs, maps, and pamphlets, emphasizing: the Critical Theory Archive; Southeast Asian Archive; Orange County regional history; the Dance and Performing Arts Collections; the personal papers of distinguished UCI faculty, including Nobel Laureates; and the University Archives.

**Ayala Science Library** (http://www.lib.uci.edu/ayala): The Ayala Science Library supports research and teaching in the sciences, medicine, and technology. The Multimedia Resource Center provides technological tools and services to enhance learning and the creation of knowledge.

**Libraries’ Gateway Study Center** (http://www.lib.uci.edu/gateway-study-center): Located across the plaza from the Langson Library, the Libraries Gateway Study Center provides comfortable individual and group study areas as well as late-night study hours throughout the academic year.

On the lower plaza of the Gateway building, the OC & SEAA Center (Orange County and Southeast Asian Archive Center) holds collections on these topics, has an oral history recording studio, and serves as a resource for the campus and community http://ocseaa.lib.uci.edu.

**Grunigen Medical Library** (http://grunigen.lib.uci.edu/): The Grunigen Medical Library is located at the UCI Medical Center in Orange and serves the research, clinical, and teaching needs of the health sciences programs.
Law Library (http://www.law.uci.edu/library): Located in the Law School, the Law Library supports the research and teaching needs of the law school and others at UCI who need to use material unique to the Law Library’s collection.

ANTPAC (http://antpac.lib.uci.edu/): The ANTPAC online catalog provides access to the UCI Libraries’ premier collections, which include over 3.64 million volumes, over 154,000 serial titles in electronic and print formats, and substantial collections of manuscripts and visual materials.

MELVYL (http://uci.worldcat.org/): The MELVYL® Catalog, on the Libraries’ website, connects users to the vast collections of the University of California library system, and the scholarly resources of the world. Expedited interlibrary loans and digital desktop delivery services help facilitate the exchange of valuable research materials between our users and the UC Libraries.

Subject Librarians (http://www.lib.uci.edu/subject-librarians): Subject Librarians with disciplinary expertise serve each academic department. They select materials for the Libraries’ collection, provide specialized reference assistance to faculty, graduate students, and undergraduates, and are available to meet the research, teaching, learning, and patient care needs of the members of their liaison departments.

Ask A Librarian (http://ask.lib.uci.edu): The UCI Libraries’ Ask A Librarian services provide expert in-person and online research assistance to users. Online reference services are available 24 hours a day, seven days a week. Over 25,000 personalized, one-on-one research consultations were conducted, and over 17,000 students attended library training sessions last year. These sessions develop students’ lifelong learning skills and assist researchers to use rapidly changing information resources and technologies effectively and efficiently.

Subject and Course Guides (http://guides.lib.uci.edu/): Librarians create subject guides that recommend curated resources for each academic discipline and for research intensive courses.

ZotPortal (http://portal.uci.edu) brings together campus tools and services in one easy-to-use, customizable place. Get the status of your courses, finals, grades, and EEE tasks. Look up library hours, search for an available study space, and check the academic calendar for important deadlines. View and pay your ZOTBill, download tax documents, and get the latest financial aid news. Find campus announcements, news, club activities, and much more.

UCI Google Apps (http://www.google.uci.edu) is a collection of services contracted from Google including UCI Gmail and Google Drive. Incoming undergraduate students are given UCI Gmail accounts as their default email service.

The Electronic Educational Environment (EEE) (http://eee.uci.edu) is UCI’s learning management system, offering web-based instructional tools and resources including quizzes, message boards, class websites, and class mailing lists. EEE EaterEvals (https://eaterevals.eee.uci.edu) makes available the student-submitted quantitative results for end-of-term Senate faculty evaluations.

OIT Classroom Technology Support (http://www.classrooms.uci.edu) (CTS) manages, maintains, and refreshes technology in 133 general assignment classrooms and over 20 other spaces, including computers, laptop cables, video decks, projectors, sound systems, and all associated control and switching equipment. OIT CTS runs a classroom help desk for in-room assistance, questions, comments, or to arrange classroom orientations. For assistance call 949-824-8833 or email smartclassrooms@uci.edu.

OIT manages computer labs distributed across campus. Lab computers offer many common applications, including Microsoft Office as well as certain mathematical software and statistics packages. Self-service printing is available in many labs. For additional details on Instructional labs, Drop-in labs, Training labs, the lab printing system, Mobile Printing and PC Availability visit the OIT Computer Labs website (http://www.oit.uci.edu/labs). The Virtual Computer Lab (VCL) (http://www.oit.uci.edu/labs/vcl) allows UCI students, faculty, and staff to access university-licensed computer applications via the Internet.

OIT provides media services including UCI Replay (http://replay.uci.edu), an audio/screen capture service for instructors, staff, and departments to easily record classes, presentations, or instructional vignettes and the campus presence on iTunes U (http://www.oit.uci.edu/itunesu).
Residential Network Services (http://resnet.uci.edu) provides a range of services to student residents including help desk, field support, security, network engineering, and the cable TV system.

Certain software is available at a discount to UCI students through campus-wide contracts. Look for software of interest on the UCI Software License website (http://licenses.oit.uci.edu).

IT Security and Privacy are vital concerns. To protect yourself and your work, find advice and support at the IT Security website (http://security.uci.edu).

OIT offers a variety of additional services, detailed on the OIT website (http://www.oit.uci.edu). The OIT Help Desk offers walk-in support in 115 Aldrich Hall during business hours and 24/7 telephone support at 949-824-2222.

For more information, call 949-824-2222 or email oit@uci.edu.

UCI Ecological Preserve
The 62-acre UCI Ecological Preserve consists of several small hills and surrounding flatlands bearing remnants of coastal sage scrub flora and associated fauna, including the California gnatcatcher (Federally listed as Threatened) and the coastal cactus wren. The Preserve is located on the campus and is set aside for teaching, research, and use by the campus community. Publications and species lists are available at the Natural Reserves and Environmental Facilities website (http://www.bio.uci.edu/research/natural-reserves-and-environmental-facilities). For further information contact Peter Bowler, Faculty Co-Advisor at pabowler@uci.edu and Travis Huxman, Faculty Co-Advisor at thuxman@uci.edu.

Natural Communities Coalition (NCC)
The University of California manages and maintains a system of 39 Reserves that are representative of the State’s habitat and geographic diversity. These serve as outdoor classrooms and laboratories for students, faculty, and staff, and are intended primarily for purposes of education and research. For further information call 949-453-3324 or email info@occonservation.org.

UCI has primary responsibility for three Reserves: the Burns Piñon Ridge Reserve, the San Joaquin Marsh Reserve, and the Steele Burnand Anza-Borrego Desert Research Center. For further information contact Peter Bowler, Faculty Director at pabowler@uci.edu.

Burns Piñon Ridge Reserve
The Burns Piñon Ridge Reserve is located near the town of Yucca Valley in San Bernardino County. It is a 306-acre parcel of high-desert habitat representing an ecotone between montane and desert biota, with mixtures of Joshua tree, piñon pine, and juniper woodland. The Reserve has a dormitory and research station, as well as primitive camping facilities, and is used primarily for overnight field trips and research by faculty and students from the Francisco J. Ayala School of Biological Sciences. For further information, call 949-701-6114 or contact Peter Bowler, Faculty Advisor at pabowler@uci.edu.

San Joaquin Marsh Reserve
The San Joaquin Marsh Reserve, one of the last remaining coastal marshes in Southern California, is a 202-acre wetland adjacent to the UCI campus. The Marsh consists of a series of freshwater ponds and their attendant aquatic flora and fauna, and is especially known for its rich bird life, both resident and migratory. The Reserve also sustains one of the largest Pacific pond turtle populations in Southern California. The Marsh has about 150 acres of cattail wetlands in three large cells, and 11 experimental bulrush-dominated ponds whose water levels can be manipulated for teaching and research purposes. For further information, call 949-701-6114 or contact Peter Bowler, Faculty Advisor at pabowler@uci.edu.

UC Systemwide Natural Reserve System California Ecology and Conservation Course
The Natural Reserve System course, available to all undergraduate students in the UC system, allows students to experience a diversity of ecological experiences through the use of UC Natural Reserve System sites. It provides a tool for students to see first-hand how climate change and other environmental variations in California directly influence plant and animal ecology throughout the state. For further information, visit the Natural Reserve System website (http://www.ucnrs.org). For further information, call 949-701-6114 or contact Peter Bowler, Faculty Advisor at pabowler@uci.edu.

Steele/Burnand Anza-Borrego Desert Research Center
The Steele/Burnand Anza-Borrego Desert Research Center, adjacent to the town of Borrego Springs, includes approximately 80 acres, with a large historic clubhouse that serves as home base for researchers and students. Through a cooperative agreement with California State Parks and the Anza-Borrego Foundation, the Reserve offer access to California’s largest state park. The 615,000-acre Anza-Borrego Desert State Park encompasses native fan palm oases and piñon pine-juniper forests, and is home to the endangered desert bighorn sheep. The Reserve encourages the study of environmental and ecological problems in the region. For further information, visit the UC Natural Reserve System website (http://nrs.ucop.edu).

UCI Arboretum and Herbarium (IRVC)
The UCI Arboretum is a botanical garden developed and managed by the Francisco J. Ayala School of Biological Sciences. It contains areas planted with floras adapted to climates similar to those of Southern California and maintains a large collection of plants native to Southern California and Baja California, as well as South African monocots. The Arboretum provides materials and space for research and teaching needs and its collections are also used as an educational resource for the community at large. The UCI Herbarium (http://arboretum.bio.uci.edu/herbarium.cfm) (IRVC) curates ca.
35,000 vascular plant specimens and is a part of the Arboretum. For further information call 949-824-5833 or contact Rebecca Crowe, Nursery Manager at rcrowe@uci.edu and Peter Bowler, Faculty Advisor at pabowler@uci.edu.

**Laser Microbeam and Medical Program**

The Laser Microbeam and Medical Program (LAMMP) is a Biomedical Technology Research Center supported by the National Institute of Biomedical Imaging and Bioengineering (NIBIB) at the National Institutes of Health. Located within the Beckman Laser Institute and Medical Clinic at UCI, LAMMP is dedicated exclusively to the use of lasers and optics in biology and medicine. LAMMP supports activities in technological research and development, collaborative research, and training/dissemination. LAMMP research and technology development is based on fundamental light-tissue interaction mechanisms. The LAMMP program also emphasizes "translational" research by rapidly moving basic science and technology from "benchtop to bedside." Additional information is available at the Laser Microbeam and Medical Program website (http://lammp.bli.uci.edu) or from the LAMMP Coordinator at 949-824-2251.

**UC Irvine Health**

UC Irvine Health is committed to providing the highest quality healthcare to more than 3 million people in Orange County, western Riverside County, and southeast Los Angeles County.

UC Irvine Medical Center is the county’s only university hospital and features more than 600 specialty and primary care physicians. The medical center offers a full scope of acute- and general-care services including cardiac surgery, cancer, digestive disease, neurosurgery, and trauma. *U.S. News & World Report* consistently lists UC Irvine among “America’s Best Hospitals,” and since 2001, has bestowed national recognition on its programs in urology, gynecology, geriatrics, cancer, digestive disorders, kidney disease, and ear, nose, and throat. It was only the third hospital in California and the first hospital in Orange County to receive Magnet Designation for nursing excellence. It is the county’s first Joint Commission-designated Comprehensive Stroke Center.

Located in the city of Orange, 13 miles from the UC Irvine campus, UC Irvine Medical Center has 411 beds and is the principal teaching hospital for the UC Irvine School of Medicine. As part of its focus on family and preventive health, the medical center has additional patient care locations in Anaheim, Irvine, the UC Irvine campus, Costa Mesa, Tustin, Orange, and Santa Ana.

UC Irvine Medical Center houses a 24-hour emergency department and is designated as Orange County’s only Level I trauma center—the most comprehensive for the treatment of life-threatening injuries—and Level II pediatric trauma center. Specialists are available for the expert management of high-risk pregnancies, and critically ill newborns are cared for in the county’s most sophisticated Level III neonatal care unit.

The hospital is also home to the Chao Family Comprehensive Cancer Center, the only facility in Orange County designated as a comprehensive cancer center by the National Cancer Institute. It offers patients a full range of cancer therapies, including leading edge clinical trials, immunotherapy, radiation oncology, and minimally invasive surgery.

In March 2009, UC Irvine Douglas Hospital opened at UC Irvine Medical Center. A modern facility for the 21st century, the hospital features the latest medical and surgical technology for the delivery of world-class care as well as top training programs for future physicians. The seven-story hospital has 236 beds, 20 operating rooms, a regional burn center, and advanced interventional procedure rooms. Private patient rooms emphasize individualized patient care and permit family members to stay overnight.

For additional information or to schedule an appointment, call toll free 1-877-UCI-DOCS or visit the UC Irvine Health website (http://www.ucirvinehealth.org).

**UCI Center for Occupational and Environmental Health**

In 1980, the University established occupational health centers in Northern and Southern California for the purpose of training occupational health professionals, conducting research on occupational health issues, and providing clinical evaluation and services to employers and workers/patients. During the early 1990s, the mandate was expanded to include environmental health issues. The Centers have strong ties to the UC Schools of Medicine, Nursing, and Public Health.

The Irvine Center is comprised of UCI academic faculty and health professionals. Faculty research is concerned with identification of causal association between disease and occupational or environmental exposures with an emphasis on prevention of occupational and environmental disease and injury. The Center’s primary areas are occupational and environmental medicine, toxicology, epidemiology, and environmental health sciences. The Center includes a consulting clinic in Irvine, a specialty clinic at the UCI Medical Center, facilities for research and teaching in epidemiology and toxicology, and study space for residents in occupational medicine and graduate students in environmental health sciences. For additional information, call 949-824-8641 or visit the Center for Occupational and Environmental Health website.
Additional Facilities

Information about many other UCI research and instructional facilities and programs is available in the academic unit sections and the Office of Research section of this Catalogue, as well as at the Office of Research Centers and Institutes website (http://www.research.uci.edu/centers).

UCI Academic Senate Distinguished Faculty

Robert S. Cohen (http://drama.arts.uci.edu/faculty/robert-cohen)
Distinguished Faculty Award for Research, 2015-16
Professor, Drama

Syed A. Jafar (http://engineering.uci.edu/users/syed-jafar)
Distinguished Mid-Career Faculty Award for Research, 2015-16
Professor, Electrical Engineering and Computer Science

Weian Zhao (http://faculty.sites.uci.edu/zhaolab/weian-zhao)
Distinguished Assistant Professor Award for Research, 2015-16
Assistant Professor, Pharmaceutical Sciences

Peter Navarro (http://merage.uci.edu/Faculty/FacultyDirectory/FacultyProfiles.aspx?FacultyID=1589)
Distinguished Faculty Award for Teaching, 2015-16
Professor, Paul Merage School of Business

Jose Antonio Rodriguez-Lopez (http://www.socsci.uci.edu/~jantonio)
Distinguished Assistant Professor Award for Teaching, 2015-16
Associate Professor, Economics

Jeffrey A. Barrett (http://faculty.sites.uci.edu/jeffreybarrett)
Daniel G. Aldrich, Jr. Distinguished University Service Award, 2015-16
Professor, Logic and Philosophy of Science

Stephen E. Tucker (http://music.arts.uci.edu/faculty/stephen-tucker)
Distinguished Mid-Career Faculty Award for Service, 2015-16
Associate Professor, Music

Judy B. Rosener (http://merage.uci.edu/~rosener/biography.htm)
Distinguished Faculty Award for Mentorship, 2015-16
Senior Lecturer SOE Emerita, Paul Merage School of Business

More information about the Academic Senate Distinguished Faculty is available on the Academic Senate website (http://senate.uci.edu/distinguished-faculty-awards).
Information for Prospective Students

  - Undergraduate Admissions
  - Intersegmental Relations
  - School and College Relations
  - On-Campus Services
  - Transfer Student Services
  - Campus Tours
- How to Use the Catalogue
- Course Listings

Office of Admissions and Relations with Schools

The mission of the Office of Admissions and Relations with Schools (OARS), a division of Student Affairs, is to: (1) optimize UCI’s undergraduate enrollments by implementing Academic Senate, universitywide, and campus policies for the selection and admission of new freshmen and transfer students; and (2) stimulate and advance cooperative educational relationships between UCI and California schools and colleges. OARS works to improve the preparation of prospective students for higher education and to promote their access to and success at UCI.

For additional information about OARS and the services listed below, call 949-824-6703 or visit the OARS website (http://www.admissions.uci.edu).

Undergraduate Admissions

Staff are involved in monitoring applications and admission targets; collecting and evaluating personal and academic data to select and admit new undergraduate students; establishing students’ permanent UCI academic record; and evaluating coursework taken at other colleges and universities by new and continuing students for transfer credit.

Intersegmental Relations

Staff are involved as liaison with regard to curricular articulation between UCI and California Community Colleges as well as various educational organizations designed to facilitate regional cooperation (South Coast Higher Education Council, Southern California Intersegmental Articulation Council).

School and College Relations

Staff: (1) advise prospective students, their parents, teachers, counselors, and school administrators regarding academic programs, admission requirements, and admission selection, and assist them with UC application and enrollment processes; (2) increase public awareness by making presentations to schools, colleges, and the community regarding UCI and the University of California, and by creating publications and communications which explain admissions policies and procedures, academic options, housing, financial aid, and student life opportunities; (3) provide general information on UC admissions and programs for all UC campuses; (4) explain University Admissions policies and procedures specific to undergraduate enrollment to the public; (5) assist prospective transfer students and community college faculty and staff; and (6) participate in activities and projects designed to enhance the academic success of students.

On-Campus Services

Staff: (1) host programs for prospective students and educational groups; (2) offer activities for applicants such as Discover UCI; (3) inform UC and UCI administrators and faculty of developments in California schools and community colleges; and (4) provide consultative services to campus departments wishing to provide programs for schools and colleges or special recruitment for specific majors or programs.

Transfer Student Services

OARS provides advice and guidance to prospective UCI transfer students. Staff regularly visit California Community Colleges throughout the state and meet with prospective transfer students to discuss admission requirements, academic planning and preparation, and UCI lower-division major and general education requirements. Articulation agreements, which identify how community college courses may be used to fulfill lower-division UCI degree requirements, are facilitated through OARS. Articulation agreements are available at the ASSIST website (http://www.assist.org).

Campus Tours

Student-led tours of the campus are conducted Monday through Friday at noon. Tours begin at the UC Irvine Visitor Center, located on the first floor of the Student Center, across from the Student Center parking structure. To confirm tour dates, times, and parking instructions and to arrange tours for school groups of 10 or more during the regular academic year, visit the Campus Tours website (http://www.campustours.uci.edu).
How to Use the Catalogue

Because the UCI General Catalogue must be prepared well in advance of the year it covers, changes in some programs and courses inevitably will occur. The selection of courses to be offered each quarter is subject to change without notice, and some courses are not offered each year. The Schedule of Classes, available on the University Registrar's website (http://www.reg.uci.edu) at shortly before registration begins each quarter, provides current information about course offerings, instructors, hours, and more. Students should consult the appropriate academic unit for even more up-to-date information. (Admission to UCI does not guarantee enrollment in any particular course.)

Presentation of information in the Catalogue is divided into six main concepts:

1. Introduction to UCI,
2. Information for Prospective Students,
3. Information for Admitted Students,
4. Research,
5. Division of Undergraduate Education,
6. Graduate Division, and
7. Academic Programs. Included in the academic program sections are the following kinds of information:
   a. brief descriptions of the areas that are covered in each school or program and a brief statement of the educational philosophy and orientation of the unit;
   b. requirements for undergraduate majors, minors, and graduate degrees;
   c. additional areas of study referred to as concentrations, specializations, or emphases;
   d. advice about planning a program of study, and other information relevant to the academic progress and experience of students majoring in fields within each school or program;
   e. lists of faculty members; and
   f. courses offered.

Course Listings

Undergraduate courses are classified as lower-division (numbered 1–99) and upper-division (numbered 100–199). Courses numbered 200 and above are graduate or professional courses. Lower-division usually refers to freshman-sophomore courses, upper-division to junior-senior courses. However, junior and senior students may take lower-division courses, and freshmen and sophomores may normally take upper-division courses when upper-division standing is not a prerequisite and when any other prerequisites have been met. A course has no prerequisites unless indicated.

Some courses are structured as three-quarter sequences, such as 1A-1B-1C; except as noted, each course in a sequence is prerequisite to the one following. The letter L following a number usually designates a laboratory course. The letter H preceding a number designates an honors course.

The "4 Units" designation following the course title indicates the quarter unit credits toward graduation. Some courses give other than four units of credit; for example, two, five, or a range from one to 12.

When a course is approved for satisfaction of the UCI general education (GE) requirement, the general education category is indicated by a Roman numeral in parentheses at the end of the description. Courses approved to fulfill the upper-division writing requirement are designated with the letter W following the course number and the GE symbol (Ib) following the course description.
Expenses, Tuition, and Fees

Estimated Expenses

The range of estimated nine-month expenses, including projected tuition, fees, books and supplies, room and board, and miscellaneous expenses for California-resident students attending UCI during the 2015-16 academic year are shown in the following chart. Tuition and fees are subject to change without notice, and the university may impose additional fees.

Expenses for students living off campus vary depending upon number of roommates, location of apartment, amenities and other factors. Graduate student expenses assume two students sharing a two-bedroom apartment. All other on- and off-campus estimates are based on two students sharing a bedroom. Figures are based on periodic surveys and are adjusted for inflation for years when surveys are not conducted. These are intended only as a guide in computing average expenses.

1 Student fees shown are based on three quarters of attendance.
2 The exact cost of attending UCI varies by program. Students in the the Full-time M.B.A., J.D., M.D., Master's in Public Health, Master's in Public Policy, M.S. in Biomedical and Translational Sciences, M.S. in Biotechnology Management, M.S. in Engineering Management, M.S. in Genetic Counseling, M.S. in Nursing Science, Executive M.B.A. programs, M.A.S. in Criminology, Law and Society program, and M.P.Ac. program should refer to the tuition and fee information posted on the University Registrar's website (http://www.reg.uci.edu).
3 The nonrefundable eTech fee is $4 per undergraduate lecture course unit, up to a maximum of $60 per quarter or $180 per year.
4 The Undergraduate and Graduate Student Health Insurance Plan fees included in the fee tables are the 2015-16 rates and the fee levels for 2016-17 are subject to change without notice.
5 The mandatory campus-based fees listed above (Associated Students Fee, Student Center Fee, Bren Events Center Fee, Recreation Center Fee, Campus Spirit Fee, Measure S Fee, TGIF Fee, Anteater Express Fee, Measure U Fee, Club Sports Fee, and SOAR Fee) include all currently approved fees.
Payment of Tuition and Fees

Tuition and fees for each quarter are due and payable in advance within deadlines published in the Quarterly Academic Calendar on the University Registrar’s website (http://www.reg.uci.edu). A student will not be officially registered in classes until tuition and fees are paid in full, with the exception of students who are participating in the PACE Plan.

Continuing and returning students are required to pay all outstanding fines and other debts in full before they pay their tuition and fees for an upcoming term.

Information about tuition and fee refunds appears later in this section.

Tuition provides general support for the University’s operating budget, including costs related to instruction, and funds student financial aid. Graduate students studying out of the State may be eligible to pay 15 percent of tuition. M.D. students are required to pay the full tuition for each quarter in which they enroll, including the summer quarter. The summer quarter tuition level for M.D. students will be the same as that of the previous spring quarter.

The Student Services Fee is required of all students regardless of the number of courses taken, unless otherwise noted. This fee is a charge to each student for co-curricular programs, activities, and services which benefit the student and which are complementary to, but not a part of, the instructional programs. A portion of the fee is returned to support student financial aid. No part of this fee is refundable to students who do not use all or any of these services. Graduate students studying out of the State may be eligible to pay 15 percent of the Student Services Fee. M.D. students are required to pay the full Student Services Fee for each fall, winter, and spring quarter, and a reduced Student Services Fee of $80 for each summer quarter.

The Associated Students Fee is administered by the Associated Students of UCI, the Associated Graduate Students, The Merage Student Association, and the Associated Medical Students. These funds provide social activities, lectures, forums, concerts, and other activities at either a reduced charge, or no charge, to UCI students. The fees are required of all students.

The UCI Student Center Fee is required of all students regardless of the number of courses taken. The fee is used to pay the debt service on revenue bonds sold to finance the construction costs, to fund operating costs, and to fund major repairs and maintenance expenses of the UCI Student Center.

The Bren Events Center Fee is required of all students regardless of the number of courses taken or units carried. The fee is used to maintain the Bren Events Center and to pay the debt service on revenue bonds sold to finance the construction costs of the Bren Events Center.

The Recreation Center Fee is required of all students regardless of the number of courses taken or units carried. The fee is used to operate, maintain, and pay the debt service on revenue bonds sold to finance the construction costs of the Student Recreation Center and Athletics facilities improvements.

The Campus Spirit Fee is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to support Athletics and Campus Spirit Programs.

The Measure S Fee is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to support, upgrade, and expand the ASUCI Express Shuttle.

The Green Initiative Fund (TGIF) Fee is required of all undergraduate students for the fall, winter, and spring quarters regardless of the number of courses taken or units carried. The fee is used to support undergraduate student efforts to reduce the campus’s environmental footprint and to promote sustainable educational projects at UCI.

The Anteater Express Fee is required of all undergraduate students regardless of the number of courses taken or units carried. The purpose of the fee is to support the Anteater Express campus shuttle service. The fee revenue is used to fund expenses including, but not limited to, fleet replacement, disability services, and route expansion. This initiative differs from the current Measure S Fee in that the funds may be spent more broadly and the funds are also overseen by a funding board.

The Measure U Fee is required of all undergraduate students for the fall, winter, and spring quarters regardless of the number of courses taken or units carried. The purpose of the fee is to support the New University, the official UCI student newspaper. The fee revenue is used to provide support for the New University operational expenses.

The Club Sports Fee is required of all undergraduate students for the fall, winter, and spring quarters regardless of the number of courses taken or units carried. The purpose of the fee is to provide a permanent source of operating and programming support for the Club Sports Program at UCI. The fee revenue will be used to fund expenses such as, but not limited to, coaching, cost of equipment and uniforms, tournament fees, travel expenses, events facility rentals and basic-level league dues for all clubs in the Club Sports Program.

The SOAR Fee is required of all undergraduate students for the fall, winter, spring, and summer quarters regardless of the number of courses taken or units carried. The purpose of the fee is to provide a permanent source of operating and programming support for the Student Outreach and Retention (SOAR) Center. The fee revenue is used for, but not limited to, funding student-initiated outreach and retention efforts, expanding current services and programs, and providing leadership and development opportunities for students.

The eTech Fee is a nonrefundable per-unit fee, required of all students enrolled in undergraduate lecture courses during the fall, winter, and spring quarters. The fee is used to fund the UC Irvine Educational Technology Initiative maintaining and improving existing educational technology, and providing new educational technology services and capabilities supporting the educational goals of UCI students. The fee is $4 per unit of undergraduate
A lecture course, up to a maximum amount of $60 (or 15 units) per quarter. It will be assessed after the third week of instruction. Further information is available at the eTech website (http://etech.uci.edu).

The Undergraduate Student Health Insurance Plan Fee is charged over three quarters (fall, winter, and spring) to provide 12-month coverage from September through August. The fee is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to provide undergraduate students with health insurance. If students provide evidence of comparable coverage from another source, participation in the mandatory plan may be waived. This fee is subject to change pending the outcome of negotiations with insurance carriers.

The Graduate Student Health Insurance Plan Fee is charged over three quarters (fall, winter, and spring) to provide 12-month coverage from September through August. First-year law and medical students who matriculate prior to September, any returning students not enrolled in the previous spring quarter, and transfer students must also pay a prorated GSHIP premium in addition to the fall premium. The fee is required of all graduate and medical students regardless of the number of courses taken or units carried. The fee is used to provide graduate and medical students with health insurance. If students provide evidence of comparable coverage from another source, participation in the mandatory plan may be waived. This fee is subject to change pending the outcome of negotiations with insurance carriers.

The Medical Student Disability Insurance Fee is required of all medical students. The entire annual fee is charged for the fall quarter.

The Professional Degree Supplemental Tuition is required of all students in the full-time M.B.A., J.D., M.D., Master's in Public Policy, M.S. in Biotechnology Management, M.S. in Engineering Management, M.S. in Genetic Counseling, and M.S. in Nursing Science programs, regardless of the number of units taken.

A $1,500 advance deposit on the Professional Degree Supplemental Tuition is required of all new M.B.A. students upon their acceptance of admission. This deposit is nonrefundable.

</table>

1 Nonrefundable in all cases.
2 The fee entitles an applicant to apply to one UC campus. Applicants who are applying to more than one campus must pay the fee for each campus selected.
3 The Application Fee for The Paul Merage School of Business is $150.
4 The Graduate Readmission Fee is only applicable to students whose status has lapsed during an academic quarter and are trying to be readmitted for the same quarter. Students whose status has lapsed and wish to return in a subsequent quarter must go through the entire application and admission process again and pay the applicable application fee.
5 The Filing Fee is one half of the quarterly Student Services Fee.
6 This fee entitles graduate students on Official Leave of Absence or Filing Fee Status to keep their library privileges.
7 The fee level shown for the Undergraduate Acceptance of Admission Fee is for 2015-16 and is subject to change for 2016-17.

**Special Tuition and Fee Programs, Waivers, and Exemptions**

**PACE Plan**

The PACE Installment Plan allows students to spread the quarterly costs of tuition and fee payment over a three-month period. A fee is charged for this privilege. Information about PACE is available at the Campus Billing Services website (http://www.fs.uci.edu/pace).

**Reduced-Fee Part-Time Study Program**

Part-time study for credit leading to an undergraduate or graduate degree is available in some academic units. To take advantage of reduced tuition and fees for part-time status, quarterly course enrollment is limited to 10 units or fewer for undergraduate students and to eight units or fewer for graduate students. Students enrolled in excess units after Friday of the third week of instruction are liable for full tuition and fees.

The same admissions standards that apply to full-time students apply to part-time students. Under University policy, academic deans (the Dean of the Division of Undergraduate Education, for Undecided/Undeclared students; the Dean of Graduate Studies, for graduate students) may approve Petitions for Part-Time Status only for reasons of occupation, family responsibilities, or health.

Undergraduate and graduate students on approved part-time status pay the full Student Services Fee and one-half of Tuition. Those part-time students who have been determined to be nonresidents of the State of California are assessed one-half the Nonresident Supplemental Tuition, in addition to the full Student Services Fee and one-half of Tuition. Part-time students pursuing a professional degree are assessed one-half the Professional Degree Supplemental Tuition, the full Student Services Fee, and one-half of Tuition.

Part-time status lapses at the end of each academic year; therefore, a student must reapply each year that part-time status is desired. See the University Registrar's website (http://www.reg.uci.edu) for more information.

Undergraduate petitions are available from academic counselors or the University Registrar's Office; graduate students may obtain further information and petitions from the Graduate Division. All students are encouraged to consult with the Office of Financial Aid and Scholarships regarding minimum unit requirements.

**Tuition and Fee Reduction for Staff and Academic Employees**

Students who are career employees at UCI or the University of California, Irvine Medical Center are eligible for a two-thirds reduction of the Student Services Fee, Tuition, and campus-based fees. This applies for up to nine units or three regular session University courses per quarter, whichever is greater. For staff employees, additional information and the Employee Application for Reduced Fees is available from Human Resources. Academic employees should contact the Office of Academic Personnel.

**Exemptions from Nonresident Supplemental Tuition**

See the California Residence and Nonresident Supplemental Tuition section below for information about exemptions from Nonresident Supplemental Tuition.
Exemptions from Tuition and Fees

A student who is a child, spouse, or registered domestic partner of a resident law enforcement officer or fire fighter killed in active duty shall be exempted from nonresident supplemental tuition and mandatory system wide fees in accordance with Section 68120 of the Education Code of the State of California.

In accordance with Section 66025.3 of the Education Code of the State of California, a resident student may be exempted from mandatory system wide tuition and fees if:

1. The student is the child or dependent of a veteran of the United States military who has a service-connected disability or who has been killed in service;
2. The student is the dependent of a member of the California National Guard who, while in active service of the State, has acquired a service-connected disability or has been killed in service; or
3. The student is the surviving spouse (who has not remarried) or registered domestic partner (who has not married or registered as a domestic partner) of a member of the California National Guard who, while in active service of the State, has acquired a service-connected disability or has been killed in service.

A nonresident student who meets the requirements of Section 68130.5 of the Educational Code of the State of California regarding attendance and graduation from a California high school shall be exempt from paying nonresident supplemental tuition.

California Residence and Nonresident Supplemental Tuition

All students who have not lived in California with the intent to make California their permanent home for more than one calendar year prior to the residence determination date for each quarter or semester they propose to attend the University must pay Nonresident Supplemental Tuition. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Laws Governing Residence

The rules regarding residence classification for tuition purposes at the University of California are governed in accordance to the California Educational Code and the Standing Orders of the Regents of the University of California and are implemented through the University of California Residence Policy and Guidelines. UC's Residence Policy and Guidelines are available at the Office of General Counsel website (http://www.ucop.edu/general-counsel).

Who Is a Resident?

Adult students (at least 18 years of age) may establish residence for tuition purposes in California if they are a U.S. citizen, a permanent resident or other immigrant, or a nonimmigrant who is not precluded from establishing a domicile in the U.S. This includes nonimmigrants who hold valid visas of the following types: A, E, H-1, H-4, I, K, L, O-1, O-3, R, T, U, or V.

To establish residence a student must, immediately prior to the residence determination date:

1. Be physically present in California for more than one calendar year, and
2. Must have come to California with the intent to make California the permanent home. For example, physical presence within the state of California solely for educational purposes does not constitute the establishment of California residence regardless of the length of stay.
3. Students under 24 years of age whose parents are not residents of California will be required to meet the Financial Independence requirement in order to be classified as a resident for tuition purposes.

Residence cannot be derived from a spouse.

Requirements for Financial Independence

The financial independence requirement will not be a factor in residence determination if the student meets one of the following criteria:

1. The student's parents upon whom the student is financially dependent, are residents of California.
2. At least 24 years of age by December 31 of the calendar year of the term for which resident classification is requested.
4. A ward of the court or both parents are deceased.
5. Has legal dependents other than a spouse or registered domestic partner.
6. A married or registered domestic partner student, a graduate student, or a professional student who was not claimed as an income tax deduction by parents or any other individual for the tax year immediately preceding the term for which resident classification is requested.
7. Financial independence is not a factor in residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time in the term for which resident classification is requested.
8. An unmarried undergraduate student, not claimed as an income tax deduction by parents or any other individual for the two tax years immediately preceding the term for which resident classification is requested, who can demonstrate self-sufficiency for those years.
9. Reached the age of majority in California while his/her parents were residents of this state and the California resident parents leave the state to establish a residence elsewhere and the student continues to reside in California after the parents’ departure.

Establishing Intent to become a California Resident

Relevant indicia that contribute to the demonstration of a student’s intent to make California the permanent home include, but are not limited to, the following: registering to vote and voting in California elections; designating a California permanent address on all records (i.e., school, employment, military); obtaining a California Driver License or California Identification Card; obtaining a California vehicle registration; paying California income taxes as a resident (including taxes on income earned outside California from the date California residence was established); maintaining a California residence in which personal belongings are kept; licensing for professional practice in California; and the absence of these indicia in places other than California during any period for which residence in California is asserted.

General Rules Applying to Minors

The residence of the parent with whom an unmarried minor (under the age of 18) lives is the residence of the unmarried minor. When the unmarried minor does not live with either parent, the residence of the unmarried minor is that of the parent with whom the unmarried minor last lived. An unmarried minor may establish his or her own residence when both parents are deceased and a legal guardian has not been appointed unless the unmarried minor is a minor non-citizen who is precluded by the Immigration and Nationality Act from establishing domicile in the U.S. The residence of an unmarried minor who has a parent living cannot be changed by the unmarried minor’s own act, by the appointment of a legal guardian, or by the relinquishment of a parent’s right of control.

Specific Rules Applying to Minors

1. Parent of Minor Moves from California. If the California resident parent(s) of an eligible minor moves from California, the minor will be entitled to resident classification as long as the minor enrolls full-time in a California public postsecondary institution within one calendar year of the parent’s departure, and remains physically present in California. This classification will continue until the minor has attained the age of majority and has resided in California for the minimum time required to become a resident. The Financial Independence requirement does not apply to this situation.

2. Self-Supporting Minor. Minor students who are U.S. citizens or eligible non-citizens may be eligible for resident classification if documentation of physical presence, intent to be a California resident, and self-support through the student’s own employment or credit is provided for the entire calendar year prior to the residence determination date.

3. Two-Year Care and Control. Minor students who are U.S. citizens or eligible non-citizens may be eligible for resident classification if they have lived with and been under the continuous care and control of an adult or series of adults other than a parent for not less than two calendar years. The adult or series of adults must have been responsible for care and control for the entire two-year period and must be California residents for 366 days prior to the residence determination date of the term for which resident classification is requested. Contact the Residence Officer for additional criteria necessary to qualify under this provision.

Exemptions from Nonresident Supplemental Tuition

Students for whom any of the following conditions apply may be eligible for an exemption from Nonresident Supplemental Tuition.

1. Member of the Armed Forces, dependent spouse, registered domestic partner, or child. A student on active duty as a member of the Armed Forces of the United States stationed in California, and their spouses or registered domestic partner, and dependent children. An undergraduate who is the natural or adopted child, stepchild, spouse, or registered domestic partner who is the dependent of a member of the U.S. Armed Forces, stationed in California on active duty, may be entitled to an exemption from the nonresident supplemental tuition. Graduate and professional school students are also entitled to this exemption under both state and federal regulations.

2. Child, spouse, or registered domestic partner of a faculty member. The spouse, registered domestic partner, or unmarried, dependent child under age 21 of a member of the University faculty who is a member of the Academic Senate may be eligible for an exemption from nonresident supplemental tuition.

3. University employee or dependent child, spouse, or registered domestic partner of a University employee. A student who is a full-time University employee who is permanently assigned to work outside the State of California or the unmarried, dependent child or the spouse or registered domestic partner of a full-time employee of the University of California who is permanently assigned to work outside the State of California (i.e., Los Alamos National Laboratory).

4. Child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee. A student who is the child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee, who was a California resident and was killed in the course of law enforcement or fire suppression duties.

5. Dependent child of a California resident. A student who has not been an adult resident for more than one year and is the natural or adopted, dependent child of a California resident who has been resident for more than one year immediately prior to the residence determination date. The student must also maintain full-time attendance in a California public postsecondary institution.

6. Graduate of a California school operated by the Federal Bureau of Indian Affairs (B.I.A.). A student who is a graduate of a California school operated by the B.I.A. (i.e., Sherman Indian High School) and who enrolls at the University of California.

7. Employee of California public school district. A student holding a valid credential authorizing service in California public schools and employed by a school district in a full-time certificate position.

8. Student athlete in training at U.S. Olympic Training Center, Chula Vista. An amateur student athlete in training at the U.S. Olympic Training Center in Chula Vista, until the student has resided in California the minimum time necessary to become a resident.
9. Graduate of California high school (AB 540). A student who attended high school in California for three or more years (9th grade included), does not hold a valid nonimmigrant visa, and graduated from California high school (or attained the equivalent).

10. Congressional Medal of Honor recipient. An undergraduate student under age 27 who is the recipient of the Congressional Medal of Honor or a child of a recipient who at the time of his or her death was a California resident.

11. Surviving dependents of 9/11 terrorist attacks. Undergraduate students who are the surviving dependents of a California resident who was killed in the 9/11/01 terrorist attacks of the World Trade Center, the Pentagon Building, or the crash of United Airlines flight 93.

Temporary Absences

If a nonresident student is in the process of establishing a domicile in California and returns to his or her former home during noninstructional periods, the student’s presence in California will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. Students who are in the State of California solely for educational purposes will not be classified as residents for tuition purposes regardless of their length of stay in California.

If a student who has been classified as a resident for tuition purposes leaves California temporarily, the absence could result in the loss of California residence. The burden of proof is on the student to demonstrate through documentation that he or she (or the parents if the student is a minor) did nothing inconsistent with a claim of continuing California residence during a temporary absence. Steps that should be taken to retain California residence include, but are not limited to:

1. Continue to use a California address on all records (educational, employment, military, among others).
2. Continue to satisfy California tax obligations. A student claiming California residence is liable for payment of income taxes on his or her total income from the date he or she begins to establish residence in California, including income earned in another state or country.
3. Retain a California voter’s registration and vote by absentee ballot.
4. Maintain a California Driver License, California Identification Card, and vehicle registration in California. If it is necessary to change the driver’s license or vehicle registration, it must be changed back to California in the time prescribed by law.

Change in Resident Classification

Continuing students who are classified as nonresidents for tuition purposes, and who believe that they will be eligible for resident status for an upcoming quarter, must submit a Petition for Resident Classification to the University Registrar in order to have their residence status changed before they submit their tuition and fee payment for the applicable quarter. Students must initiate all changes of status before the submission deadline of the quarter for which they want to be reclassified. (Specific deadline dates are listed on the University Registrar’s website (http://www.reg.uci.edu)). Students are strongly encouraged to submit their petition at the earliest possible date in order to expedite the review process. As long as submission deadlines are met, students may be allowed a period of time no later than the end of the quarter to provide any additional documentation required for residence determination.

Incorrect Classification

Any student found to be incorrectly classified as a resident is subject to nonresident classification and to payment of all previously unpaid Nonresident Fees. If a student has concealed information or furnished false information, and was classified incorrectly as a result, the student is also subject to University discipline. Resident students who become nonresidents of California must immediately notify the UCI Residence Officer.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the:

University of California, Irvine
Residence Officer
Registrar’s Office
215 Aldrich Hall
Irvine, CA 92697-4975
Telephone 949-824-6129

or to the:

Residence Analyst
Office of the General Counsel
1111 Franklin Street, 8th Floor
Oakland, CA 94607-5200

*No other University personnel are authorized to supply information relative to residence requirements for tuition fee purposes.*

This summary is not a complete explanation of the law regarding residence classification. Additional information is available from the University Registrar. Changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the Residence Officer, may file an application to appeal in writing to the Office of the General Counsel within 30 days of notification of the Residence Officer’s final decision.
Tuition and Fee Refunds

Student Tuition and Fee Refunds

Students who pay tuition and fees for a regular academic term and then decide to withdraw from the University must submit a Withdrawal form, complete with the signature of their academic dean. Undergraduate students must submit the form to the University Registrar; graduate students to the Graduate Division; medical students to the Curricular Affairs Office in the School of Medicine; law students to the Law School Registrar’s Office. This form serves two purposes:

1. A refund of tuition and fees, if applicable; and
2. Withdrawal from classes.

The effective date of withdrawal is used in determining the percentage of tuition and fees to be refunded. This date is normally the date that the student submits the form to the appropriate dean for approval. It is presumed that no University services will be provided to the student after that date. Tuition and fees are refunded as follows.

Prior to and including the first day of instruction, tuition and fees are refunded in full, except for

1. A $10 service charge for continuing and readmitted students, or the $100 Acceptance of Admission Fee for new undergraduate students, or the applicable deposit fee for new health sciences and M.B.A. students, and
2. The Student Health Insurance Fee. (The Student Health Insurance Fee is refunded only if the Withdrawal form is submitted prior to the first day of the quarter.) Students should bear in mind that the “first day of the quarter” often is several days prior to the “first day of instruction.” Refer to the Academic Calendar (http://www.reg.uci.edu/navigation/calendars.html) for exact dates.

A refund of the Medical Student Disability Insurance Fee (if applicable) may be requested.

After the first day of instruction, the tuition and fee refund is prorated as shown (with the exception of the Health Insurance Fee).

Standard Refund Schedule

Financial aid recipients should see the UCI Office of Financial Aid and Scholarships Student Withdrawal Policy, or consult their Policies and Conditions website (http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx).

Claims for a refund of tuition and fees must be presented during the fiscal year (July 1 to June 30) in which the claim is applicable. Refund checks are issued by the Accounting Office approximately three weeks after the official notice of withdrawal is initiated.

Law students follow refund schedules set by the School of Law. Refer to the School of Law website (http://www.law.uci.edu) for further information.

Housing Refunds

Housing refunds are subject to the terms of the applicable housing agreement.
Financial Aid

On This Page:

• Financial Aid
  • Eligibility Requirements for Federal Student Aid
  • UCI Policies on Satisfactory Academic Progress for Financial Aid
  • UCI Office of Financial Aid and Scholarships Student Withdrawal Policy
• Scholarships
  • Entering Freshmen and Transfer Students
  • Regents’ Scholarships
  • Restrictive Scholarships
• Grants
• Loans
• Federal Work-Study
• Additional Aid for Graduate and Medical Students
• Aid for Students with Disabilities
• Student Employment

Lack of funds need not be a barrier to attending UCI; about 75 percent of UCI’s enrolled students are offered some form of financial aid. Students who demonstrate that they need financial assistance in order to attend may be eligible for scholarships, grants, loans, and/or work-study awards through the Office of Financial Aid and Scholarships. In addition to awarding aid on the basis of financial need, some scholarships are awarded on the basis of academic excellence. Information regarding the application process, deadlines, and financial aid programs for undergraduate, graduate, and medical students may be found at the Office of Financial Aid and Scholarships website (http://www.ofas.uci.edu/content).

Free Application for Federal Student Aid (FAFSA/Renewal Application and FAFSA on the Web). To obtain financial aid, new and continuing students must file the FAFSA or FAFSA on the Web (FOTW) and submit the necessary supporting documents each year. FAFSA on the Web is available at fafsa.gov (https://fafsa.ed.gov), and paper forms are available either by completing a PDF FAFSA (https://fafsa.ed.gov/help/ffde44.htm) or by calling 800-4-FED-AID / 800-433-3243. Renewal notifications are mailed to current financial aid recipients starting in mid-January. Students are encouraged to apply as early as possible after January 1. The priority deadline to file the FAFSA/FOTW for loans, work-study, and most grants is March 2. For priority consideration of these funds, all other supporting documentation must be submitted to the Office of Financial Aid and Scholarships by June 19 or the specified due date.

The University expects the student and the parent (or spouse) to contribute toward the educational costs to the extent possible. For dependent students, an analysis of the FAFSA and supporting documents determines the amount a student and the student’s parents can be expected to contribute toward the cost of the student’s education. For independent students, the analysis determines the amount a student and, if applicable, a spouse, can contribute to the cost of the student’s education. Income, assets, size of family, and the number of family members in college (excluding parents) are the major factors considered in the analysis. Assets include, but are not limited to, equity in real estate other than family residence; stocks, bonds and other securities; business equity; and cash, savings and checking accounts. Income includes wages, salaries, interest, dividends, and nontaxable income such as Social Security, Veterans’ benefits, and foreign income.

Special Expenditures. Financial aid recipients who are in need of money for special expenditures (beyond the cost of books and basic supplies associated with certain courses of study) may make an appointment to see a financial aid counselor to explore the possibility of a budget add-on, based on the availability of funds. Examples of such special expenditures include special equipment for students with disabilities and computer purchases.

Eligibility Requirements for Federal Student Aid

Federal financial aid programs are subject to regulations that define the criteria students must meet to qualify and maintain eligibility for those programs. The regulations state that a student must:

1. Be a U.S. citizen or an eligible noncitizen of the U.S.;
2. Be accepted for admission to the University;
3. Be enrolled in good standing at the University; units taken through the University Extension program are not counted toward half- or full-time enrollment;
4. Demonstrate financial need (except for William D. Ford Federal Direct Unsubsidized Loans and Federal PLUS loans); financial need is the difference between the reasonable, approved expenses of attending UCI and all available resources, including the expected contribution from parents, the student, and any outside aid;
5. Maintain satisfactory academic progress for financial aid, as outlined below;
6. Be registered with the Selective Service if the student is a male at least 18 years old, born after December 31, 1960, and not on active duty with the armed forces;
7. Not owe a refund on a federal grant or be in default on a federal educational loan.

Once a student meets the above criteria, disbursement of financial aid funds is made only if the student does not have outstanding debts owed to UCI.

**California Dream Act Application.** Students who qualify for the AB 540 fee exemption and are not able to file a FAFSA can apply for certain types of financial aid by completing the California Dream Act Application.

The California Dream Acts – AB 130 and AB 131 – extend eligibility for privately funded UC scholarships, other UC scholarships and grants, Cal Grants, Middle Class Scholarships and Dream Loans to students, including undocumented students, who qualify for benefits under another California law – AB 540 – which exempts students from paying nonresident supplemental tuition.

Students who think they might be eligible for an AB 540 nonresident tuition exemption should:

1. Submit a California Dream Act Application as soon as possible after it becomes available on January 1, but no later than March 2. Additional information is available at the California Dream Act website (http://www.csac.ca.gov/dream_act.asp).
2. Students who are admitted to the University and intend to enroll should submit a Statement of Legal Residence. Those who receive a nonresident classification from the campus residence deputy should submit a California Nonresident Tuition Exemption Request or a University of California Nonresident Tuition Exemption Application and Affidavit, available at the University Registrar's office or website. Official high school transcripts and proof of high school graduation may be requested.

Once applicants have completed these steps, the University will notify them of any financial aid eligibility.

**UCI Policies on Satisfactory Academic Progress for Financial Aid**

**Undergraduate and Graduate Students**

In defining student eligibility for financial aid, the Higher Education Act Amendments state that a student must maintain “satisfactory progress in the course of study the student is pursuing, according to the standards and practices of the institution at which the student is in attendance.” Federal regulations state that each institution shall establish, publish and apply “reasonable standards” for assuring that every student receiving need-based financial aid should maintain “satisfactory progress in his/her course of study.” Final Federal regulations state that “in order to receive student financial aid under the programs authorized by Title IV of the Higher Education Act, a student must be maintaining satisfactory progress in the course of study he or she is pursuing according to the standards and practices of the institution in which he or she is enrolled.”

The following disclosures on the UCI website provide detailed information about satisfactory academic progress requirements for receiving financial aid at UCI. The Office of Financial and Scholarships will provide a paper copy of this information upon request.

**Undergraduate and Teaching Credential Students:**
[www.ofas.uci.edu/content/pdf/SAPDisclosureForUndergraduates.pdf](http://www.ofas.uci.edu/content/pdf/SAPDisclosureForUndergraduates.pdf)

**Graduate Students:**
[www.ofas.uci.edu/content/pdf/SAPDisclosureForGraduates.pdf](http://www.ofas.uci.edu/content/pdf/SAPDisclosureForGraduates.pdf)

**Graduate Business Students:**
applicant.merage.uci.edu/FinancialAid/AcademicRequirements.aspx

**Medical Students:**
[www.ofas.uci.edu/content/pdf/SAPDisclosureForMedicalStudents.pdf](http://www.ofas.uci.edu/content/pdf/SAPDisclosureForMedicalStudents.pdf)

**Law Students:**

**UCI Office of Financial Aid and Scholarships Student Withdrawal Policy**

Students who withdraw from UCI prior to completing 60 percent of the period for which they received federal financial aid will be subject to both the UC Fee Refund Policy and the Federal Return of Title IV Funds policy. Title IV Funds are federal funds awarded to a student to meet educational expenses. Examples of Title IV Funds include Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), Federal Direct Loans, and Federal Perkins Loans.

**Cancellation of Enrollment.** Students who cancel their registration or have their registration cancelled by the University prior to the first day of classes will be billed for all financial aid disbursed on their behalf.

The full text of this official policy is available on the Office of Financial Aid and Scholarships Policies and Conditions website ([http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx](http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx)).
Any student contemplating withdrawing from the University should contact the Office of Financial Aid and Scholarships to speak with a financial aid counselor concerning the financial ramifications of withdrawing.

Students who are receiving a Cal Grant should also contact the Office of Financial Aid and Scholarships to discuss the ramifications of withdrawing on their Cal Grant status. Students should check with their financial aid counselor on how they may be able to re-establish a quarter of eligibility for their Cal Grant.

Scholarships

Scholarships are awarded on the basis of academic ability, achievement, and promise. They do not require repayment. Although a few honorary scholarships are awarded on the basis of academic excellence alone, many also require that an applicant demonstrate financial need. UCI offers students with proven high academic achievement and leadership potential two top honors awards: Regents’ Scholarships and Alumni Association Scholarships.

Entering Freshmen and Transfer Students

Students entering UCI in the fall must complete the UC Application for Undergraduate Admission and Scholarships and submit the application by November 30. The Office of Financial Aid and Scholarships automatically collects information about applicants’ scholarship qualifications. Applications that meet the requirements are reviewed by the Board on Undergraduate Scholarships, Honors, and Financial Aid. Information about the Alumni Scholarship is available in the UC Application for Undergraduate Admission and Scholarships. However, a separate application is required for the Alumni Scholarship.

Regents’ Scholarships

Regents’ scholarships, among the highest honors conferred upon UC students, are awarded on the basis of academic excellence and exceptional promise. Undergraduate students are eligible upon graduation from high school or transfer from community college. Medical students are eligible upon admission to the School of Medicine. The scholarship may be renewed for an additional one or three years, depending on the year of appointment, provided the student completes an average of 12 units per quarter and maintains a grade point average of at least 3.25. The amount of the scholarship may vary depending on the student’s established financial need.

Restrictive Scholarships

Eligibility requirements for Restrictive Scholarships vary greatly and are restricted in terms of such student characteristics as geographic location, family background, academic major and career goals. For the most part, these scholarship awards are based on the student’s established financial need.

All UCI students will be considered for Restrictive Scholarships based upon information from the UC Application for Undergraduate Admission and Scholarships and their current academic records.

Grants

Grants are awarded on the basis of financial need. There is no repayment requirement. A student’s financial aid award includes grant funds whenever regulations, UCI policies and funding levels permit.

Federal Pell Grant is the largest federally funded grant program and provided up to a maximum of $5,775 for the 2015-16 academic year. To be eligible, applicants must be U.S. citizens or eligible noncitizens, be enrolled as undergraduates, have not previously received a bachelor’s degree, and demonstrate financial need. Students must use the FAFSA to apply for this grant. Students must be enrolled full time (12 units) to receive the full grant, and enrolled at least half time (6 or more units) to receive a prorated amount. The amount of Pell Grant funds students may receive over their lifetime is limited to the equivalent of six years of Pell Grant funding.

Cal Grant A is a state-funded grant program which currently provides awards to be applied to the payment of University tuition and fees. In 2015-16, Cal Grant A awards paid up to $12,240. To be eligible, applicants must be California residents and demonstrate financial need. Students must use the FAFSA and GPA Verification Form to apply for Cal Grant A. The filing deadline for new applicants is March 2 for the following year. Students must be enrolled full time (12 units) to receive the full grant, and enrolled at least half time (6 or more units) to receive a prorated amount.

Cal Grant B is a state-funded grant program which provided awards up to a maximum of $1,656 in 2015-16 during the student's first year and $1,656 plus $12,240 toward tuition and fees during subsequent years. To be eligible, applicants must be California residents, demonstrate financial need, and be entering college or not have completed more than one quarter of college work. Students must use the FAFSA and GPA Verification Form to apply for Cal Grant B. The filing deadline for new applicants is March 2 for the following year. Students must be enrolled full time (12 units) to receive the full grant, and enrolled at least half time (6 or more units) to receive a prorated amount. NOTE: Students may not receive both Cal Grant A and Cal Grant B.

Middle Class Scholarship (MCS) is a state-funded scholarship program which currently provides awards to be applied to the payment of University tuition and fees. To be eligible, applicants must be undergraduate students who are California residents or AB-540 eligible and have a household income no greater than $150,000. Students must use the FAFSA/California Dream Application to apply for this award. The filing deadline for new applicants is March 2 for the following year. Students must be enrolled at least half time (6 units) to receive the scholarship. In 2014-15, Middle Class Scholarship awards paid up to $1,710. Award amounts are determined after a student is awarded any federal and state grants as well as any portion of UC aid which
is specifically designated for system-wide tuition and fees. A student will be awarded a scholarship only if these awards, taken together, do not already exceed the amount that the student is entitled to under the MCS program.

Federal Supplemental Educational Opportunity Grant (FSEOG) provides grant aid for U.S. citizens and eligible noncitizens who are undergraduate students and have demonstrated financial need. These federal grants range from $100 to $4,000 per year, depending upon financial need.

UCI Grant is funded by The Regents of the University of California and by the State of California and provides grant aid for full-time students who demonstrate financial need. The amount awarded depends upon financial need and funding levels.

Loans

Loans are often part of a financial aid award. They provide recipients with an opportunity to defer the cost of their education by borrowing when needed and paying later. However, loan recipients must pay interest on the amount borrowed. The deferment and cancellation provisions for the loans listed below are contained on the promissory note each recipient must sign and may be obtained from the Office of Financial Aid and Scholarships.

A student’s loan responsibility, prior to acceptance of the loan, is to understand the terms of the loan. After accepting the loan, the recipient must repay the loan in accordance with the repayment schedule; advise the Office of Financial Aid and Scholarships upon leaving UCI; participate in an exit interview; and provide the Financial Services Office with a current address after leaving UCI. In case of death or total disability, outstanding loan obligations may be cancelled upon presentation of official confirming documents.

Federal Perkins Loan provides long-term federal loans to undergraduate and teaching credential students who are U.S. citizens and eligible non-citizens. The amounts awarded vary, depending on financial need, but cannot exceed $5,500 annually. Cumulative totals for the full term of college attendance may not exceed $27,500. No interest is charged nor is repayment required while the borrower is enrolled in at least one half of the normal academic load. Interest of five percent a year begins nine months after the borrower ceases to be enrolled or is enrolled less than half time, and repayment must be completed within a 10-year period.

University Loan, funded by The Regents of the University of California, provides long-term loans to undergraduates who are full-time students who demonstrate financial need. The maximum amount for an academic year is $3,000. Interest of five percent a year begins six months after the student ceases to be enrolled at least half time, and repayment must be completed within ten years. Two cosigners are required.

William D. Ford Direct Loan Program

Subsidized William D. Ford Federal Direct Loan, processed through the U.S. Department of Education and UCI, is available to undergraduate and teaching credential students who are U.S. citizens or eligible noncitizens, and who demonstrate financial need. During an academic year, the maximum a student may borrow is $3,500, freshmen; $4,500, sophomores; $5,500, juniors, seniors and teaching credential students. A loan fee will be deducted from the amount of the loan prior to issuing the check.

Interest rate: If a student receives a loan that is first disbursed between July 1, 2012, and July 1, 2015, the student will be responsible for paying any interest that accrues during the grace period. If a student chooses not to pay the interest that accrues during the grace period, the interest will be added to the principal balance.

If a student received a loan prior to July 1, 2012, the federal government pays the interest during the deferment period.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (https://studentaid.ed.gov/types/loans/interest-rates) for current as well as historic loan rates and fees.

For first-time borrowers borrowing on or after July 1, 2013, there is a limit on the maximum period of time (measured in academic years) that you can receive Direct Subsidized Loans. In general, you may not receive Direct Subsidized Loans for more than 150 percent of the published length of your program. For more information, visit: https://studentaid.ed.gov/types/loans/subsidized-unsubsidized#eligibility-time-limit

Unsubsidized Federal Direct Loans have the same terms and conditions as the Federal Direct Loan, including the aggregate loan limits, interest rate and repayment. During an academic year the maximum a dependent student may borrow is $5,500, freshmen; $6,500, sophomores; $7,500, juniors and seniors. Independent students may borrow an annual maximum of: $9,500, freshmen; $10,500, sophomores; $12,500, juniors and seniors; $20,500, graduate/professional; and $32,000, medical students. These maximum amounts include any amount borrowed under the Subsidized William D. Ford Federal Direct Loan program. However, the loan is not based on need. Students may borrow an amount equal to the cost of attendance, less any estimated financial assistance up to the annual loan limits in effect at the time the loan is disbursed. Students must first apply for the Federal Direct Loan prior to consideration for the Unsubsidized Federal Direct Loan. There is no interest subsidy for this loan; students pay the interest charged while enrolled at UCI. Students may receive both subsidized and unsubsidized Federal Direct Loans, but the total may not exceed the loan limits. Borrowers with both types of loans may have a single repayment schedule.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (https://studentaid.ed.gov/types/loans/interest-rates) for current as well as historic loan rates and fees.

Cumulative maximum: Dependent, undergraduate, $23,000; independent, undergraduate, $57,500; graduate and professional students, $138,500 (includes undergraduate loans); medical students, $224,000 (includes undergraduate loans). Deferment period before repayment: six months after ceasing to be enrolled at least half time. Interest accrues immediately and may be paid monthly or quarterly. Students also may request that the lender
add the interest to the principal balance. Repayment of principal begins six months after ceasing to be enrolled at least half-time. Full repayment: Up to 10 years. Minimum payment: $50 per month.

**Graduate PLUS Loans** are available to graduate and professional-level students. Students may borrow up to the cost of education for the academic year, less any estimated financial aid. The loan is limited to students who do not have adverse credit histories as defined by regulation.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (https://studentaid.ed.gov/sa/types/loans/interest-rates) for current as well as historic loan rates and fees.

**Federal Direct Parent Loans for Undergraduate Students (PLUS)** are designed to assist parents of dependent undergraduate students who are unable to demonstrate financial need for campus-based funds. Parents are eligible to borrow up to the cost of education for the academic year, less any estimated financial aid each academic year, on a student’s behalf. The loan is limited to parents who do not have adverse credit histories as defined by regulation.

Interest rate: Visit the Federal Student Aid Interest Rates and Fees website (https://studentaid.ed.gov/sa/types/loans/interest-rates) for current as well as historic loan rates and fees.

Cumulative maximum: None. Deferment period before repayment: 60 days from day of final check disbursement for loan period. Full repayment: Up to 10 years.

**Loans for Disadvantaged Students and Primary Care Loans** are available to medical students. For information, call the School of Medicine Financial Aid Office at 949-824-6476 or visit the School of Medicine Financial Aid Office website. (http://www.ofas.uci.edu/content/medical.aspx)

**Emergency loans** are made from an emergency student loan fund made possible through various philanthropic individuals and organizations.

Undergraduate, graduate and medical students who have experienced unanticipated financial problems of a temporary nature may borrow up to $300 without interest or service charge. Emergency loans must be repaid within 30 days after disbursement or by the end of the academic quarter, whichever occurs first. Applications are available in the Office of Financial Aid and Scholarships or at the School of Medicine Financial Aid Office. This loan is not based on demonstrated financial need.

**Federal Work-Study**

The Federal Work-Study Program offers eligible students who demonstrate need an opportunity to pay for their living and educational expenses as they occur. By participating in the Federal Work-Study Program, students can reduce the amount of the loan to be repaid after leaving school. Students awarded work-study have the choice of obtaining a work-study job either on campus or off campus at an approved nonprofit agency. A variety of work opportunities are available, and such part-time work experience can be a valuable asset when seeking employment after graduation. Specific information regarding the terms and conditions of work-study employment will be available with the award notification.

**Veteran Affairs Work-Study Program** is available only to U.S. military veterans and their eligible dependents, and members of the Selected Reserve and National Guard, while receiving Veteran Affairs Federal Educational Benefits, such as Ch. 30, Post 9/11 GI Bill, or Ch. 35 benefits. Positions are limited.

For applications and detailed information, call the Veteran Services Center at 949-824-3500 or visit the Veteran Services website. (http://veteran.uci.edu)

**Additional Aid for Graduate and Medical Students**

Most graduate fellowship programs are administered by the Graduate Division, 120 Aldrich Hall, telephone 949-824-4611. Medical students should contact the School of Medicine Financial Aid Office, 836 Medical Education Building, telephone 949-824-6476.

**Aid for Students with Disabilities**

All forms of student financial aid are available to eligible students with disabilities. Interested students should follow the regular financial aid application procedures and should notify the Office of Financial Aid and Scholarships of any additional expenses they may incur because of a disability. Supporting documentation must be provided.

**Student Employment**

The UCI Career Center, located in the Student Services I building, assists UCI students in obtaining part- or full-time jobs and internships during the academic year as well as summer. Students may easily access all job and internship listings, including work-study positions, using their student ID number via ZotLink on the UCI Career Center website. (http://www.career.uci.edu)
Choosing a Major

Many students select their University major, the field of study which represents their principal academic interest, at the time they fill out their University of California Undergraduate Application for Admission and Scholarship. Some students, however, are not ready to choose a major at the time they apply, and still others may wish to change to a different major after they have enrolled.

In preparation for choosing a major, students need to familiarize themselves as much as possible with UCI and its academic programs. Entering students are exposed to a wide range of areas of study, and it is not unusual for students to become enthusiastic about academic disciplines previously unfamiliar to them. At UCI, a number of traditionally separate academic disciplines have strong interrelationships, so that the academic environment is influenced by broad interactions among disciplines. As a complement to classroom study, UCI encourages its students to become involved in a variety of educational experiences such as independent study, laboratory research, field study, writing workshops, computing, and arts productions. Such experiences can help students identify additional areas of interest.

The UCI General Catalogue is a good place to find specific information about programs available and requirements. Students are encouraged to talk to academic counselors and faculty advisors and to go to any department to learn more about its programs of study, its requirements for graduation, and possible enrollment limitations. While advisors may not be familiar with all fields, they can suggest ways to investigate other areas of study and be helpful in planning a lower-division program which will keep several options open. Courses and workshops designed to assist students in choosing a major are offered by the UCI Career Center, the Division of Undergraduate Education, and some of the academic units.

All students are required to choose a major by the time they reach junior status. It is important to look well ahead to this decision and to think about it carefully during the freshman and sophomore years. When considering possible majors, students should keep in mind that some major programs require quite specific preliminary study. At the same time, excessive early concentration could reduce a student’s options and could cause the student to need more than four years to obtain the baccalaureate degree. Furthermore, courses required for graduation need to be considered. For these reasons, it is desirable for students to plan their programs carefully and thoughtfully, seeking a balance between exposure to a variety of academic areas and completion of courses which are prerequisite to a major under consideration. A qualified student interested in two areas of study may graduate with a double major by fulfilling the degree requirements of any two programs. Certain restrictions may apply; students should check with their academic advisor.

Each school or program has its own standards for change of major. Once a student selects a major, or decides to change majors, the student should visit the academic advising office for their prospective major to obtain current information about prerequisites, program planning, and policies and
Although many factors ultimately are considered when reviewing applicants for admission, admission committees look carefully at the undergraduate recommended. In addition, some health sciences schools have additional course requirements or recommendations, for example, English and/or a courses required by professional health science schools. In general, the minimum amount of undergraduate preparation required includes one year that major is also required for medical school admission; however, students may major in any academic field as long as they also take the prerequisite preferred major. Many UCI students, who plan to enter the health professions, major in Biological Sciences because much of the basic course work for major is also required for medical school admission; however, students may major in any academic field as long as they also take the prerequisite courses required by professional health science schools. In general, the minimum amount of undergraduate preparation required includes one year each of English writing/composition, physics, biology with laboratory, chemistry (to include inorganic, organic, and biochemistry), and mathematics (especially calculus and statistics). Courses in cell biology, developmental biology, genetics, molecular biology, physiology, and computer science are recommended. In addition, some health sciences schools have additional course requirements or recommendations, for example, English and/or a foreign language, in particular, Spanish.

Although many factors ultimately are considered when reviewing applicants for admission, admission committees look carefully at the undergraduate grade point average and the results of the Medical College Admission Test (MCAT); the student’s personal essay and/or interview; letters of
recommendation; clinical exposure; research experience, especially in a biological, medical, or behavioral science; and extracurricular activities which demonstrate the applicant’s ability to interact successfully with others.

Since medical programs cannot accommodate all qualified applicants and competition for entrance is keen, it is important to keep in mind alternative career opportunities should one not be accepted to a health science school, or should one decide to pursue instead, one of the expanding number of health-related programs now available.

**Business/Management**

The contemporary executive or manager must be a creative thinker, make complex decisions, and have the ability to perceive and participate in the full scope of an enterprise while understanding its role in the economy. Effective management requires leadership ability, strong problem-solving skills, the ability to successfully deploy and manage information technologies, effective oral and written communication skills, analytical skills, an understanding of global economic trends, and a basic knowledge of behavioral processes in organizations.

Although not required for preprofessional school preparation, The Paul Merage School of Business offers a major in Business Administration and a major in Business Information Management with the Donald Bren School of Information and Computer Sciences. The Merage School also offers a minor in Management as well as a minor in Accounting as a supplement to any undergraduate major. The Management minor can provide students with a broad understanding of management theory and practice and may be helpful to students in determining whether they wish to pursue a career in business or management or undertake graduate-level study in management. The Accounting minor prepares students for careers in the accounting field or for graduate-level study.

Students can also supplement their major course work to develop the skills needed for business and management by taking electives such as calculus, statistics, economics, psychology, sociology, computer science, and political science. Also, students are encouraged to take intensive course work in the culture, history, geography, economy, politics, and language of specific foreign countries.

For admission purposes, the majority of graduate schools of business look at five areas: grades, scores on the Graduate Management Admission Test (GMAT), the applicant’s statement of purpose, in-depth letters of recommendation, evidence of leadership in school and community activities, and work experience. Substantive work experience is becoming an increasingly important prerequisite for many programs.

Students from a variety of undergraduate disciplines including liberal arts, social sciences, physical or biological sciences, computer science, and engineering are encouraged to apply to UCI’s Paul Merage School of Business.

**Career Opportunities**

UCI’s academic units which offer undergraduate education leading to the bachelor’s degree provide students with opportunities to explore a wide range of interests leading to a career choice or to further education at the graduate or professional level. The lists which follow show the varied career areas pursued by UCI graduates. Any major can lead to a number of careers. Additional discussions of careers are presented in individual academic unit sections.

**Arts Career Areas**

The exceptionally talented graduates of the Claire Trevor School of the Arts may choose to become professional actors, art historians, artists, dancers, or musicians. However, there are many other careers to explore in numerous arts-related areas, or the graduate may wish to combine part-time professional performance with supplemental work. The field of arts administration is an increasingly important career area, offering opportunities to work with opera and dance companies, repertory theatre companies, museums, state and local arts councils, community arts organizations, and arts festivals.

**Biological Sciences Career Areas**

*Bioanalysis, Biochemistry, Biomedical Engineering, Cell Biology, Chiropractic Medicine, Dentistry, Developmental Biology, Dietetics, Environmental Management, Forestry, Genetic Engineering, Health Administration, Industrial Hygiene, Marine Biology, Medical Technology, Medicine, Microbiology, Nurse Practitioner, Occupational Therapy, Oceanography, Optometry, Osteopathy, Plant Biology, Pharmacology, Pharmacy, Physicians’ Assistant, Physical Therapy, Podiatry, Public Health, Quality Control, Research, Sales, Speech Pathology, Teaching, Technical Writing and Editing, Veterinary Medicine*

The health field is one of the fastest-growing career areas in the country. Work sites may include private corporations, educational institutions, hospitals, health care complexes, private foundations, city and county governments, state agencies, the federal government, and many others.
Education Sciences Career Areas

Graduates of Education Sciences are prepared for careers in the global knowledge economy, with opportunities to apply learning modalities and technologies in multicultural contexts. Graduates may choose from diverse career opportunities in public education, informatics, higher education, and education software development. Employers include government, private industry, and non-profit organizations. Many graduates will pursue advanced degrees leading to instructional certification, academic research, or administrative leadership.

Engineering Career Areas

Graduates with special skills in oral and written communications may look to education software development. Employers include government, private industry, and non-profit organizations. Many graduates will pursue advanced degrees leading to instructional certification, academic research, or administrative leadership.

Information and Computer Science Career Areas

Graduates of the Donald Bren School of Information and Computer Sciences pursue a variety of careers. Many graduates specify, design, and develop a variety of computer-based systems comprised of software and hardware in virtually every application domain, such as aerospace, automotive, biomedical, consumer products, engineering, entertainment, environmental, finance, gaming, investment, law, management, manufacturing, and pharmacology. Bren School graduates also find jobs as members of research and development teams, developing advanced technologies, designing software and hardware systems, and specifying, designing, and maintaining computing infrastructures for a variety of institutions. Some work for established or start-up companies while others work as independent consultants. After a few years in industry, many move into management or advanced technical positions. Some Bren School students also use the undergraduate major as preparation for graduate study in computer science or another field (e.g., medicine, law, engineering, management).

Nursing Science Career Areas

Graduates of Nursing Sciences are prepared for careers in the global knowledge economy, with opportunities to apply learning modalities and technologies in multicultural contexts. Graduates have the choice of Direct Patient Care in Hospitals, Clinics, Communities, and Homes, Advance Primary Care Practice (e.g., Nurse Practitioner), Higher Education (e.g., Nursing Professor), Health-related Research, Health Care Administration, Provider Relations, Policy Analysis, Policy Development, Risk.

Graduates of Nursing Science are prepared for a wide range of unparalleled career opportunities at the frontiers of many emerging and established fields in health care, industry, government, and research and education. Opportunities include working in private corporations, hospitals, medical clinics, health care agencies, pharmaceutical industry, biotechnology industry, local and state government agencies, the federal government, educational providers, court and probation systems, and many others. Graduates can use their education and training to enter a rich variety of graduate programs and to earn professional degrees in related fields.

**Pharmaceutical Sciences Career Areas**

Pharmaceutical Production and Development, Biotechnology, Medicinal Chemistry, Medicine, Pharmacy, Health Promotion, Health Care Delivery Systems, Physical Restoration and Rehabilitation, Program Management and Design, Disease Prevention and Control, Community Health and Outreach, Health Forensics, Health Insurance and Management

Graduates of Pharmaceutical Sciences are prepared for an unparalleled range of career opportunities in emerging and established biomedical fields in industry, government, research institutes, and education. Opportunities include working in private corporations, hospitals, medical clinics, health care agencies, pharmaceutical industry, biotechnology industry, local and state government agencies, the federal government, educational providers, court and probation systems, and many others. Graduates have a rich variety of choices in filling professional positions in any of these settings or first pursuing additional training at the graduate level in pharmaceutics, chemistry, pharmacology, or biological sciences. Earning professional degrees in medicine, dentistry, or pharmacy is yet another popular option.

**Physical Sciences Career Areas**

Graduates of the School of Physical Sciences have backgrounds appropriate to a variety of areas in research, teaching, and management. Career opportunities for physical scientists are found in federal, state, and local government as well as in private industry. Chemists may work in research and development and in jobs dealing with health, pollution, energy, fuel, drugs, and plastics. Water districts, crime labs, and major chemical and oil companies are also good resources for employment. Earth System Science and Environmental Science majors will find employment in areas such as hazardous waste treatment, resource extraction, pollution remediation, and as consultants to government and high-technology fields. Mathematics graduates find employment in both government and the private sector in such technical fields as operations research, computer programming, marketing research, actuarial work, banking, retail management, and scientific research. Physics graduates find professional positions in education, research and development, and in the electronic and aerospace industries. Possible careers include science teaching and writing, computer and electrical engineering, device and instrumentation development, nuclear and reactor physics, environmental and radiological science, laser and microchip development, astronomy, and geophysics.

**Public Health Career Areas**

Increasing human population, diversity, and global mobilization makes a cogent argument for pursuing careers in public health in today’s world. Emerging government policies such as the United States Affordable Care Act emphasize disease prevention and population health. Graduates of the UC Irvine Program in Public Health are prepared for careers in research, teaching, and public health practice in private and public sectors. Challenges in public health require acquisition and ready deployment of fundamental knowledge and practical skills. Employment opportunities exist at city and county health care agencies, state departments of public health, national institutions such as the Centers for Disease Control and Prevention, and international agencies such as the World Health Organization. Private foundations and corporations employ public health graduates, including, for example, the Bill and Melinda Gates Foundation and various health insurance providers. Nonprofit organizations and community service groups also employ public health degree holders. Graduates who are interested in academic career tracks focusing on research and/or teaching will find employment at various units within public and private universities and think-tanks.
Social Ecology Career Areas

Graduates of the School of Social Ecology may hold positions as urban planners, environmental consultants, juvenile probation officers, counselors, elementary and secondary school teachers, legal aides, coordinators of juvenile diversion programs, social workers, mental health workers, special education teachers, architectural consultants, and elected officials, just to cite some examples of career choices. Many School of Social Ecology graduates have used their training to enter graduate programs and obtain advanced degrees in the fields of law; clinical, community, social, developmental, and environmental psychology; public health; public and business administration; environmental studies; urban planning; social welfare; criminology; and the administration of justice.

Social Sciences Career Areas

Business and industry often look to social science graduates to fill positions in management, finance, marketing and advertising, personnel, production supervision, and general administration. In the public sector, a wide variety of opportunities are available in city, county, state, and federal government. Teaching is a frequently chosen career at all levels from elementary school teacher to university professor. In addition, many graduates enter professional practice, becoming lawyers, psychologists, researchers, or consultants in various fields.
Special Programs

On This Page:

- Access UCI and Summer Session Enrollment
- UCI Center for Educational Partnership
- Student Support Services
- Graduate Diversity Programs
- Medical Student Support Programs

Access UCI and Summer Session Enrollment
Exceptional high school students can enroll in UCI classes without formal admission to the University year-round.

During the academic year, concurrent enrollment through UC Irvine Extension’s Access UCI program is ideal for well-prepared high school seniors who have exhausted the curriculum available in high school and who are looking for advanced-level course work, or for students who are seeking an enrichment course or course work not available at their high school. For information, call 949-824-5414, email unex-services@uci.edu, or visit the Access UCI website (http://unex.uci.edu/courses/access_uci).

During the summer, highly-qualified high school students can enroll in UC Irvine Summer Session’s High School Summer Scholar Program. This program provides students with the opportunity to experience college-level course work and preview university life through a combination of academic course work and co-curricular activities. Students may also enroll directly in regular UCI summer courses through UC Irvine Summer Session. For information, contact the UCI Summer Session Office at 949-824-6494, email summer-session@uci.edu, or visit the Summer Session website (http://summer.uci.edu).

Admission and enrollment in courses either through Access UCI or UC Irvine Summer Session does not constitute admission to UCI as an entering freshman student. See the Undergraduate Admissions section of this Catalogue for information about applying to UCI and the formal admission process.

UCI Center for Educational Partnerships
The mission of the UCI Center for Educational Partnerships (CFEP) (http://www.cfep.uci.edu) is to create collaborations that support preparation for and success in higher education. CFEP’s focus is on equity and access for all students in order to achieve the University of California’s goal of academic excellence. CFEP has three guiding principles: (1) diversity among students and faculty enhances the educational experience the University provides and the scholarship it produces; (2) collaboration promotes the exchange of ideas, leverages resources, and drives collective action; and (3) research guides practice, promotes accountability, and advances knowledge.

In order to achieve its mission, CFEP builds lasting partnerships with individuals and institutions committed to improving education; facilitates faculty involvement; engages in K–12 academic preparation; provides teacher professional development; promotes college-going culture; supports undergraduate retention; enhances graduate school preparation; conducts research and evaluation; participates in the national dialogue about educational reform and collaboration; and fosters learning communities to support ongoing professional and intellectual development.

For additional information, call 949-824-7482 or visit the Center for Educational Partnerships website (http://www.cfep.uci.edu).

Student Support Services
Housed within the Division of Undergraduate Education, Student Support Services (SSS) (http://www.sss.uci.edu) is an academic support program dedicated to helping first-generation college, Pell eligible/low-income, and/or disabled students succeed and thrive at UCI. The goal of SSS is to help students successfully transition to UC Irvine and enhance their academic experience. SSS offers drop-in counseling and advising provided by professional staff, faculty, and student peers; organizes weekly workshops on academic and social opportunities at UCI; and coordinates summer academic programs for incoming students. See the Division of Undergraduate Education section of the Catalogue for additional information.

Graduate Diversity Programs
The University of California believes that a diverse student and faculty population is integral to academic excellence. It is critical to promoting the lively intellectual exchange and the variety of ideas and perspectives that are essential to advanced scholarly research. The university remains committed to expanding outreach, recruitment, and retention efforts. Through the Graduate Division’s diversity programs, steps are taken to increase the participation of diverse groups of U.S. citizens and permanent residents who have been disadvantaged in obtaining graduate education in the United States. See the Graduate Division section of the Catalogue for additional information.
Medical Student Support Programs

The School of Medicine's Office of Admissions and Outreach is designed to meet the challenges of California's changing demographics and to contribute to the School's goal of achieving a broad spectrum of diversity in the student population, and ultimately, in the medical profession. The office plays a major role in the recruitment and retention of targeted socioeconomically disadvantaged students who have the potential of service to the medically underserved communities in California. The School's Office of Diversity and Community Engagement (ODCE) augments the recruitment and retention of students from populations underrepresented in medicine and works closely with the Office of Admissions and Outreach. ODCE also serves as a resource for students by providing a supportive learning environment through advising and counseling prospective students and mentoring students following their admission to medical school. See the School of Medicine section for additional information.
Undergraduate Admissions

The UCI Office of Admissions and Relations with Schools (OARS) is responsible for the admission of new undergraduate freshmen and transfer students. Inquiries may be addressed to:

Office of Admissions and Relations with Schools

University of California, Irvine
260 Aldrich Hall
Irvine, CA 92697-1075
http://www.admissions.uci.edu

OARS is open from 8 a.m. to 5 p.m., Monday through Friday; telephone 949-824-6703.

The information on admission to UCI presented below is organized as follows:

Categories of Application
Admission as a Freshman Applicant
Nonresident Freshman Admission Requirements
Admission as a Transfer Applicant
Nonresident Transfer Admission Requirements
Admission for a Second Bachelor's Degree
Admission of International Students
Advanced Placement and International Baccalaureate Credit
Application Procedures

Categories of Application

An undergraduate applicant is a student who wishes to complete a program of study leading to a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science degree.

A freshman applicant is a student who is currently in high school or has graduated from high school but has not enrolled in a regular session at a college or university after high school graduation. Summer sessions immediately following graduation are excluded in the determination of freshman status.

A transfer applicant is a student who has completed high school and who has been a registered student in a regular session at another college or university. Students who meet this definition cannot disregard their college record and apply as freshmen. A student can be considered as a California Community College transfer applicant to UCI if:

1. the student was enrolled at one or more California Community Colleges for at least two terms (excluding summer sessions);
2. the last college the student attended before admission to a UC campus was a California Community College (excluding summer sessions); and
3. the student has completed at least 30 semester (45 quarter) UC transferable units at one or more California Community Colleges.

A nonresident applicant is a student whose legal permanent residence (as determined by the University) is outside of the State of California. Nonresident applicants are generally required to pay Nonresident Supplemental Tuition and must also present a higher grade point average than is required of California residents. Refer to the Nonresident Admission Requirements section for further information.

An applicant for readmission is a student who was formerly registered and enrolled at UCI and who has interrupted the completion of consecutive quarters of enrollment. See Readmission: Undergraduate and Graduate Students.

A second baccalaureate applicant is a college graduate who, because of a change of objective, wishes to obtain a second bachelor’s degree in a major different from that of the first degree.

An international applicant is a student who holds or expects to hold a student, exchange, visitor, or diplomatic visa and who wishes to attend school in the United States.

Admission as a Freshman Applicant

The undergraduate admissions policy of the University of California is guided by the University's commitment to serve the people of California and the world, from every culture and ethnicity and across the economic spectrum.

The University’s admission requirements, described in detail in the Minimum Admission Requirements for Freshmen section, are designed to ensure that students are adequately prepared for University-level work. Meeting admission requirements entitles an applicant to be considered for admission but does not constitute an offer of admission.
In recent years, the number of freshman applicants to UC Irvine has exceeded the number of spaces available. Since the campus cannot admit all eligible applicants, it must use standards that are more demanding than the minimum UC requirements to select students. These standards, which the University calls selection criteria, are used to identify applicants who have demonstrated the highest academic achievement and who have a variety of other qualities that can contribute to the strength and diversity of the campus community.

In the case that UCI is unable to accommodate all qualified applicants in their first-choice major, those students who indicate a valid alternate major may be offered admission in that major. Students who wish to change their major after enrolling at UCI must submit an Undergraduate Petition for Change of Major to the academic counseling office in the school or program of their prospective major.

Admissions Selection
UCI seeks to select students who have a demonstrated record of academic and personal achievement. Academic achievement includes the number of college preparatory courses completed; the level of achievement in these courses, including honors, Advanced Placement, International Baccalaureate, and college courses completed; and the quality of the senior-year program as measured by the type and number of academic courses in progress or planned. Also considered are the high school grade point average (GPA) calculated on UC-specified subjects (UCI uses a maximum of eight honors grade points in determining the UC GPA) and the required standardized national examinations.

The level of performance needed to gain admission varies from year to year depending on the size and the academic quality of the applicant pool and the number of enrollment spaces.

Personal achievement outside the classroom is also considered in UCI’s selection process. A range of pursuits is considered, including academic activities, the creative and performing arts, community service and leadership, athletics, participation in pre-collegiate programs that develop academic ability, and other extracurricular activities. Persistence counts more than scattered involvement, while initiative and curiosity are also important.

The admissions process at UCI is also sensitive to individual circumstances and the effect these may have had on the resources available to and the experiences of applicants. While all applications receive careful consideration, reviewers take note of any extenuating circumstances and/or a variety of cultural and economic situations, including students who are the first in their families to attend college, who have a low family income, or who have worked in support of their family during high school. The emphasis, however, is less on the personal circumstances of the applicant and instead is more focused on how the applicant has responded to challenges while achieving academic success.

Each application is read at least twice. Every attempt is made to become familiar with the unique accomplishments of each applicant.

Students interested in the majors below should be aware of the following provisions.

Dance and Music:
Dance applicants must audition in late January/early February in ballet, modern, and jazz, prior to the fall quarter when entrance is anticipated, and be selected by faculty.

All Music applicants must apply to the B.A. degree program and audition in late January/early February with an instrument or voice, prior to the fall quarter when entrance is anticipated; admission to the B.Mus. degree program is by a second audition after matriculation.

Computer Science and Engineering (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering): Applicants must complete four years of high school mathematics through pre-calculus or math analysis and are advised to have completed one year each of chemistry and physics. One semester of programming coursework is also advised. (This requirement does not apply to other majors offered by the Donald Bren School of Information and Computer Sciences.) That preparation along with honors courses and advanced placement courses is, fundamental to success in the program. The Henry Samueli School of Engineering recommends that freshman applicants in Engineering majors take the Math Level 2 SAT Subject Test.

Nursing Science: Admission to the Nursing Science major is limited and selective. Applicants must complete two years of basic science providing fundamental knowledge in the core disciplines of biology and chemistry. Advanced laboratory science classes that have biology or chemistry as prerequisites and offer substantial additional material may be used to fulfill this requirement. Students must earn grades of C or higher in order to fulfill their subject requirements. Students with the highest combination of overall grade point average, grade point average in science courses, and scores on the SAT or ACT examinations will be given priority. Applicants to the Nursing Science major must submit a supplemental application.

Minimum Admission Requirements for Freshmen
The University defines a freshman applicant as a student who is currently in high school or has graduated from high school but has not enrolled in a regular session at a college or university after high school graduation. Summer sessions are excluded in the determination.

Freshman applicants who are not residents of California should refer to the Nonresident Admission Requirements section.

Applicants who do not meet the requirements for admission at the time of high school graduation may be considered for admission after they meet the requirements for admission as a transfer applicant (see Admission as a Transfer Applicant). Transfer credit will be granted for an acceptable course from an accredited college or university taken while still in high school if reported on a valid transcript issued by the college which conducted the course.
The requirements described below represent the minimum academic standards students must attain to be considered for admission to the University. Meeting minimum admission requirements does not guarantee admission. Admission to UCI and the program of choice often requires students to meet more demanding standards.

**Subject Requirement**

To satisfy the subject requirement, students must complete a minimum of 15 yearlong UC-approved college-preparatory courses with a grade of C or better -- at least 11 of them finished prior to their senior year. These courses are also known as the “a–g” subjects/courses. (A one-year course is equal to one unit; a one-semester course is equal to one-half unit.) A grade point average (GPA) of 3.0 or better must be earned (3.4 if the student is a nonresident) in these courses with no grade lower than a C.

The 15 required “a–g” courses are:

a. **History/Social Science: 2 years required.** Two years of history/social science, including one year of world history, cultures, and geography (may be a single yearlong course or two one-semester courses); and one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government.

b. **English: 4 years required.** Four years of college-preparatory English that include frequent writing, from brainstorming to final paper, as well as reading of classic and modern literature. No more than one year of ESL-type courses can be used to meet this requirement.

c. **Mathematics: 3 years required; 4 years recommended.** Three years of college-preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. Approved integrated math courses may be used to fulfill part or all of this requirement, as may math courses taken in the seventh and eighth grades if the high school accepts them as equivalent to its own courses.

d. **Laboratory Science: 2 years required; 3 years recommended.** Two years of laboratory science providing fundamental knowledge in at least two of these three foundational subjects: biology, chemistry and physics. The final two years of an approved three-year integrated science program that provides rigorous coverage of at least two of the three foundational subjects may be used to fulfill this requirement.

e. **Language Other Than English: 2 years required; 3 recommended.** Two years, or equivalent to the second level of high school instruction, of the same language other than English are required. (Three years/third level of high school instruction recommended.) Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition, and culture. American Sign Language and classical languages, such as Latin and Greek, are acceptable. Courses taken in the seventh and eighth grades may be used to fulfill part or all of this requirement if the high school accepts them as equivalent to its own courses. (Students are strongly encouraged to complete three or four years of one language in preparation for the UCI Language Other Than English and/or the International/Global Issues general education requirements.)

f. **Visual and Performing Arts (VPA): 1 year required.** One yearlong course of visual and performing arts chosen from the following: dance, drama/theatre, music or visual art.

g. **College-Preparatory Elective: 1 year required.** One year (two semesters), in addition to those required in “a–f” above, chosen from the following areas: visual and performing arts (non-introductory-level courses), history, social science, English, advanced mathematics, laboratory science, and language other than English (a third year in the language used for the “e” requirement or two years of another language).

**Courses Satisfying the “g” Requirement**

**History:** All history courses should require extensive reading and writing. Courses should enable students to establish a breadth of understanding of history (for example, world history, political history or economic history) and should provide an understanding of the human past, including its relation to the present. Courses should develop a student’s critical thinking, ability to evaluate historical data, and ability to analyze and synthesize evidence.

**Social Science:** Courses should be in one of the social sciences: anthropology, economics, geography, political science, psychology, or sociology, or, alternatively, courses should be interdisciplinary, drawing knowledge from two or more of these fields. Course objectives should include as many of the following as are applicable to the field: (1) to understand the development and basic features of major societies and cultures; (2) to examine the historic and contemporary ideas that have shaped the world; (3) to understand the fundamentals of how differing political and economic systems function; (4) to examine the nature and principles of individual and group behavior; and (5) to study social science methodologies.

In order to develop a student’s critical thinking, ability to evaluate ideas and information, and ability to analyze and synthesize qualitative and quantitative evidence in the laboratory and in the field, a social science course must include a body of basic knowledge, extensive reading, and written and oral exposition.

Courses which are designed to meet state-mandated social studies graduation requirements are acceptable provided that they meet the above criteria. Courses of an applied, service, or vocational character are not acceptable social science electives.

**English:** All English courses should require substantial reading with frequent and extensive practice in writing which is carefully evaluated and criticized. A course in creative writing, journalism, speech or debate is acceptable if it meets the general requirements in reading and writing stated above. An advanced-level course in English as a Second Language (ESL) or English Language Development (ELD) may be acceptable provided it meets the standards outlined under the “b” requirement.
All students applying for freshman admission must submit the following college admissions test scores: 

- SAT or ACT with Writing. 

Scores earned prior to March 2005 will not be accepted. Students applying for admission for fall quarter should complete their examination requirements during May or June of their junior year or during their senior year, but no later than the December test date. (Typically, this means that students will take either the SAT or the ACT with Writing in October or November.) Scores earned prior to March 2005 will not be accepted. 

**Advanced Mathematics:** Acceptable electives are courses in mathematics with second-year algebra as a prerequisite such as trigonometry, linear algebra, precalculus (analytic geometry and mathematical analysis), calculus, and probability and statistics.

A computer science course is an acceptable mathematics elective if it fulfills the following objectives. The course should enable each student to express algorithms in a standard computer language such as C++, Pascal, Java, BASIC, FORTRAN, or COBOL. By the end of the course, each student should complete substantial programming projects in the language used. The course should also involve the study and mastery of various aspects of computer science: how computers deal with data and instructions, the internal components of a computer, and the underlying computer logic.

**Laboratory Science:** Acceptable courses should cover topics from the biological or physical sciences in which students make their own observations and measurements and analyze these data to obtain further information.

An introductory science course normally offered in the ninth grade, (such as earth science or physical science) is an acceptable science elective provided it is designed to prepare students for laboratory science courses in the tenth grade and beyond. The course must provide an introduction to the fundamental principles of physical and/or biological science. Laboratory activities as defined above shall be included. (A terminal course designed only to meet graduation requirements is not an acceptable science elective.)

**Language Other Than English:** It is recommended that elective courses be in the same language used to satisfy the language other than English “e” subject requirement. Elective courses in this language must have at least two years of the language as a prerequisite. In order for a second language to qualify as an elective, at least two years of this language must be completed.

**Visual and Performing Arts:** Courses in this area consist of instruction in dance, drama/theater, music, and visual arts. Courses should enable students to understand and appreciate artistic expression and, where appropriate, to talk and write with discrimination about the artistic material studied.

Courses devoted to artistic performance and developing creative artistic ability should have prerequisites (either one year of introductory coursework or experience approved by the instructor) and should assume proficiency beyond the introductory level.

Courses must require on average the equivalent of a five-period class per week. Work outside of class must be required; for example, portfolio/performance preparation, reading, writing, research projects and/or critical listening/viewing.

Dance courses offered for physical education credit or under any other departmental arrangement are acceptable provided they include content satisfying the above criteria.

Courses which are primarily athletic or body conditioning are not acceptable visual and performing arts electives.

**College-Preparatory Elective:** The general objectives of the “g” requirement are to improve students’ analytical abilities, promote artistic development, and strengthen oral and written skills. The requirement is intended to encourage prospective University students to fill out their high school programs with courses that: (1) strengthen general study skills, particularly analytical reading, expository writing and oral communication; (2) provide an opportunity to begin work that could lead directly into a major program of study at the University; (3) experience, at some depth, new areas of academic disciplines that might form the basis for future major or minor studies at the University.

Courses that fulfill the “g” requirement should allow students to prepare for college-level work in the subject area, so that the level attained at the end of such courses would be well beyond the introductory or survey level. Courses that have narrow objectives aimed at meeting specific societal or personal lifestyle goals are not acceptable.

**California High School Students.** Courses taken to fulfill the subject requirement must be certified by the University as meeting the requirement and must be included on the UC-certified course list of the school the student attended. The high school counselor or principal will have a copy of this list. In addition, the lists are available at the A-G Course Management Portal (http://www.ucop.edu/agguide).

**Out-of-State High School Students.** The UCI Office of Admissions and Relations with Schools will review and accept courses that meet the requirements for applicants graduating from out-of-state schools.

**Examination Requirement**

All freshman applicants must submit examination scores as described below. Students applying for admission for fall quarter should complete their examination requirements during May or June of their junior year or during their senior year, but no later than the December test date. (Typically, this means that students will take either the SAT or the ACT with Writing in October or November.) Scores earned prior to March 2005 will not be accepted. All students applying for freshman admission must submit the following college admissions test scores:

- The SAT or the ACT with Writing.

- Report ACT and/or SAT scores on the admissions application, then request that an official copy of the scores be sent to UC Irvine from the testing agency. Applicants can have their official score report sent to one UC campus, and all UC campuses they apply to will receive it.

- In the College Board’s Score Choice module, ensure that all scores are sent to UC. UC requires all scores and will use the highest scores from a single administration.

- For the ACT with Writing test, UC will focus on the highest combined score from the same test administration.

- For the SAT, UC will focus on the highest total score from a single test date.
• UC does not require results of tests taken for the purpose of talent programs in middle or junior high school (e.g., Johns Hopkins Center for Talented Youth, the Duke University Talent Identification Program, etc.). Those test scores do not have to be sent to UC.
• UC does not accept test substitutions.
• SAT Subject Test scores are no longer required. However, submission of SAT Subject Test scores may add positively to the review of a student’s application.

More information about these examinations is available online. For the SAT and Subject Tests, visit the College Board website (https://www.collegeboard.org). For the ACT with Writing, visit the ACT website (http://www.actstudent.org).

**Do not use the score choice option to withhold reporting of SAT Subject Test scores.** IMPORTANT: Please note the SAT Subject Test recommendations below.

• The Claire Trevor School of the Arts recommends that freshmen applicants take any SAT Subject Tests that will demonstrate the student’s strengths.
• The Henry Samueli School of Engineering recommends that freshmen applicants in Engineering majors (including the joint Computer Science and Engineering major) take the SAT Subject Test in Math Level 2 and a science test (Biology E/M, Chemistry or Physics) closely related to the applicant’s intended major.
• The Department of Pharmaceutical Sciences recommends that freshmen applicants take the following SAT Subject Tests: Biology M, Chemistry, and/or Math Level 2.
• The School of Physical Sciences recommends that freshmen applicants in Chemistry, Earth System Science, Mathematics, and Physics majors take the SAT Subject Test in Math Level 2.
• The Program in Public Health recommends that freshmen applicants take the following SAT Subject Tests: for the major in Public Health Sciences: Biology E, Biology M, and/or Chemistry; for the major in Public Health Policy: Biology E, Biology M, and/or World History.

**California Students**
State residents who have met the minimum requirements and are not admitted to any UC campus to which they apply will be offered a spot at another campus if space is available, provided:

• The applicant ranks in the top 9 percent of California high school students, according to the UC Admissions Index (http://admission.universityofcalifornia.edu/freshman/california-residents); or
• The applicant ranks in the top 9 percent of his or her graduating class at a participating California high school. UC refers to this as “Eligibility in the Local Context” (ELC).

**Eligibility in the Local Context (ELC)**
An applicant who ranks in the top 9 percent of students in his or her California high school class—and whose high school participates in the ELC program—can qualify for admission to UC.

The top 9 percent of students will be identified on the basis of GPA in UC-approved coursework completed in the tenth and eleventh grades. To be considered for ELC, an applicant must have a minimum GPA of 3.0 and complete the following a–g courses prior to their senior year:

• History/Social Science: 1 year
• English: 2 years
• Mathematics: 2 years
• Laboratory Science: 1 year
• Language Other Than English: 1 year
• College-Preparatory Elective: 4 yearlong courses (chosen from the subjects listed above or another course approved by the University)

**Eligibility By Examination Alone**
Students are no longer guaranteed admission based solely on their examination scores. Nevertheless, students who excel in their examinations yet do not fulfill the admission requirements described in the Minimum Admission Requirements for Freshmen section will still receive a full review of their application. For more information, visit UC Admission by Exam website (http://admission.universityofcalifornia.edu/freshman/requirements/examination).

**Nonresident Freshman Admission Requirements**
Nonresident freshman applicants must meet the same admission requirements as those for residents, except, nonresident applicants must have a 3.4 GPA and do not qualify for ELC. Refer to the Expenses, Tuition, and Fees section of this Catalogue for information regarding residence classification for tuition purposes and the Nonresident Supplemental Tuition.
Admission as a Transfer Applicant

The University defines a transfer applicant as a student who has completed high school and who enrolled in a regular session at a college or university after high school. (Summer sessions do not count.) UCI considers a California Community College transfer applicant as a student who has completed at least 30 semester units/45 quarter UC transferable units at one or more California Community Colleges. A competitive UCI transfer applicant should have a UC transferable GPA of 3.0 or above. A transfer applicant may not disregard the college record and apply for admission as a freshman. (Transfer applicants who are not residents of California should also refer to the section on Nonresident Transfer Admission Requirements.)

Transfer Admission Guarantee: UCI’s Transfer Admission Guarantee (TAG) program offers provisional admission to well-qualified junior-level students from participating California Community Colleges. Although admission to UCI is selective in most majors, through TAG, admission can be guaranteed for transfer students who meet the TAG Eligibility and major prerequisites requirements (see TAG Requirements later in this section).

Selection Criteria

UCI attempts to accommodate as many qualified transfer applicants as possible. Priority consideration for admission of transfer applicants is given to junior-level applicants (with a minimum of 60 semester/90 quarter units of UC transferable credit) from California Community Colleges and is based upon:

1. GPA in transferable courses;
2. depth of preparation toward general education and major requirements; and
3. participation in the TAG (Transfer Admission Guarantee) program, which requires early completion of one transferable English composition course, and one transferable course in mathematical concepts and quantitative reasoning.

TAG Applicants for fall quarter 2017 admission must have completed the first English and one mathematics course by the end of summer 2016. The second English course must be completed by spring 2017. Transfer applicants with the strongest academic performance will be the most competitive for admission. Junior transfers from four-year colleges, including other UC campuses, and lower-division transfers will be considered as space permits.

In the case that UCI is unable to accommodate all qualified applicants in their first-choice major, those students who indicate a valid alternate major may be offered admission in that major. Students who wish to change their major after enrolling at UCI must submit an Undergraduate Petition for Change of Major to the academic counseling office in the school or program of their prospective major. This is of particular importance to those who apply in majors which are subject to additional course prerequisites and/or have a limit placed on the number of applicants admitted into the major. (See the following list.)

UCI’s transfer selection process is also based upon consideration of the academic criteria in conjunction with the following personal achievement criteria: an exceptionally challenging curriculum; outstanding accomplishments relevant to academic aims; hardships or unusual circumstances the applicant has faced, and the ways in which the student has responded to these challenges; a strong, thoughtful match between UCI’s programs and the student’s academic and career objectives, preparation, talents, and skills; and potential contributions to the campus. The level of performance needed to gain admission varies from year to year depending on the size and the academic quality of the applicant pool and the number of enrollment spaces.

Transfer applicants to the majors listed below must complete prerequisite courses for the major as specified.

**Biological Sciences:** Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Biological Sciences major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

**Biology/Education:** Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Biology/Education major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

**Business Administration:** Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0) and who satisfactorily complete lower-division courses equivalent to UCI’s MATH 2A - MATH 2B, ECON 20A - ECON 20B or (MGMT 4A - MGMT 4B), MGMT 7, and MGMT 30A - MGMT 30B will be given preference for admission. MGMT 1 may be completed at UCI. Admission to the major will be competitive due to limited space availability.

**Business Information Management:** Junior-level applicants who satisfactorily complete the following requirements will be given preference for admission:

1. one year of approved college-level math, preferably courses in calculus equivalent to UCI’s MATH 2A - MATH 2B; if not available, two semester courses equivalent to other major-related math courses are acceptable;
2. Completion of one year of transferable computer science courses involving concepts such as those found in Java, Python, C++, data structures, or other object-oriented or high-level programming language.
3. one year of introductory accounting theory and practice equivalent to UCI’s MGMT 30A - MGMT 30B and
4. one year of micro- and macro-economics theory equivalent to UCI’s ECON 20A - ECON 20B.

NOTE: The introductory sequence in Information and Computer Science (ICS) has moved to Python. The Bren School of ICS strongly encourages all participants to become familiar with this programming language prior to matriculation. Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major(s) of interest. Java and C++ are used extensively in the curriculum; therefore, transfer students should plan to learn them by studying on their own or by completing a Java-related programming course prior to their first quarter at UCI.

Additional courses beyond those required for admission must be taken to fulfill the lower-division degree requirements, as many are prerequisites for upper-division courses. For some transfer students, this may mean that it will take longer than two years to complete their degree.

The Computer Science and Engineering (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering): Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer, including one year of approved calculus; one year of calculus-based physics with laboratories (mechanics, electricity and magnetism); one year of transferable computer science courses involving concepts such as those found in Java, Python, C++, data structures, or other object-oriented or high-level programming language; and one additional approved transferable course for the major (an approved math, science, or CSE course).

Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact the Donald Bren School of Information and Computer Sciences at (949) 824-4334 or The Henry Samueli School of Engineering at (949) 824-4334.

Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact the Donald Bren School of Information and Computer Sciences at (949) 824-4334 or The Henry Samueli School of Engineering at (949) 824-4334.

Dance: Applicants must audition in late January/early February in ballet, modern, and jazz, prior to the fall quarter when entrance is anticipated, and be selected by faculty.
Education Sciences: Preference will be given to Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0). It is suggested that prospective transfer students work toward completing coursework to fulfill the UCI general education requirements or IGETC.

Earth System Science: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and either one year of general chemistry with laboratory (preferred) or one year of calculus-based physics with laboratory.

Ecology and Evolutionary Biology: Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Ecology and Evolutionary Biology major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

Economics: Transfer applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the majors in Economics, Business Economics, and Quantitative Economics. All applicants must complete one course in microeconomics, one course in macroeconomics, and two quarters/two semesters of approved first-year calculus.

Engineering: Applicants must select either Aerospace Engineering, Biomedical Engineering, Biomedical Engineering; Premedical, Chemical Engineering, Civil Engineering, Computer Engineering, Computer Science and Engineering, Electrical Engineering, Environmental Engineering, Materials Science Engineering, Mechanical Engineering, or Engineering Undeclared (option for freshmen only) as their major on the application. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), additional courses as specified by the major, and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. See The Henry Samueli School of Engineering section of this Catalogue for information on courses required for each major.

See also the listing for Computer Science and Engineering, a major jointly administered by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering.

Environmental Science: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: either one year of general chemistry with laboratory (preferred), or one year of biology with laboratory. One year of economics or sociology is recommended.

Humanities: Junior-level transfers for all majors within the School of Humanities must have completed the UC Entry Level Writing Requirement, and two semester or two quarter courses of approved lower-division English composition with grades of C or better.

Information and Computer Sciences (ICS): Students are strongly encouraged to follow the transfer preparation guidelines for any of the other Bren ICS majors. Applicants must select either Business Information Management1, Computer Game Science, Computer Science, Computer Science and Engineering2, Data Science, Informatics, or Software Engineering as their major on the application. Junior-level applicants who satisfactorily complete course prerequisites will be given preference for admission. Transfers to all majors (except for Informatics) must complete one year of approved college-level math, preferably courses in calculus equivalent to UCI’s MATH 2A - MATH 2B; if not available, two semester courses equivalent to other major-related math courses are acceptable. Informatics majors must complete one college-level mathematics course. All applicants must complete one year of transferable computer science courses3 involving concepts such as those found in Java, Python, C++, data structures, or other object-oriented or high-level programming language. See the Donald Bren School of Information and Computer Sciences section of this Catalogue for information on preferred courses and specific requirements for transfer applicants to each major.

Addition problems beyond those required for admission must be taken to fulfill the lower-division degree requirements, as many are prerequisites for upper-division courses. For some transfer students, this may mean that it will take longer than two years to complete their degree.

1 See also the listing for Business Information Management, a collaborative major between the Donald Bren School of ICS and The Paul Merage School of Business in the Interdisciplinary section of the Catalogue.

2 Apply at the Interdisciplinary section of the UC application. See also the listing for Computer Science and Engineering, a major jointly administered by the Donald Bren School of ICS and The Henry Samueli School of Engineering in the Interdisciplinary section of the Catalogue.

3 Additional computer science courses beyond the requirement for transfer eligibility are strongly recommended, particularly those that align with the major(s) of interest. Java and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI.

Mathematics: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the required coursework of one year of approved calculus. Additional coursework in multivariable calculus, linear algebra, and differential equations is strongly recommended.

Music: All Music applicants must apply to the B.A. degree program and audition in late January/early February with an instrument or voice, prior to the fall quarter when entrance is anticipated; admission to the B.Mus. degree program is by a second audition after matriculation.

Nursing Science: Admission to the major is limited and selective. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Nursing Science major. The following list of prerequisites is required for transfer
Undergraduate Admissions

students applying for fall 2017 entry. All applicants must complete the following with grades of B or better: one year of general chemistry equivalent to UCI’s CHEM 1A - CHEM 1B - CHEM 1C; one quarter/semester of organic chemistry equivalent to UCI’s CHEM 51A; one quarter/semester of genetics equivalent to UCI’s BIO SCI 97; one quarter/semester of biochemistry equivalent to UCI’s BIO SCI 98; one quarter/semester of human physiology with laboratory equivalent to UCI’s BIO SCI E109 and BIO SCI E112L; one quarter/semester of microbiology with laboratory equivalent to UCI’s BIO SCI M122 and either BIO SCI M118L or BIO SCI M122L; one quarter/semester of human anatomy with laboratory equivalent to UCI’s BIO SCI D170; one quarter/semester of philosophy equivalent to UCI’s PHILOS 4 or PHILOS 5; one quarter/semester of psychology equivalent to UCI’s PSYCH 7A/PSY BEH 9; one quarter/semester of public health equivalent to UCI’s PUBHLTH 1; one quarter/semester of sociology equivalent to UCI’s SOCIOL 1; and one quarter/semester of statistics equivalent to UCI’s STATS 7 or STATS 8. Applicants must have a cumulative GPA of 3.0 or higher to be considered.

Pharmaceutical Sciences: All applicants must have completed the following required courses with a grade of B- or better in all courses: one year of general chemistry courses with laboratory courses equivalent to UCI’s CHEM 1A - CHEM 1B - CHEM 1C and CHEM 1LC - CHEM 1LD and one year of biology courses equivalent to UCI’s BIO SCI 93 and BIO SCI 94. In addition, all applicants must have a cumulative GPA of 3.0 or better. Additional courses that are recommended, but not required: one year of organic chemistry with laboratory; one year of calculus; one year of calculus-based physics with laboratory; and additional articulated lower-division biology requirements.

Physics: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one year of calculus-based physics with laboratory for engineering and physics majors.

Psychology and Social Behavior: Transfer applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the major.

Public Health: Junior-level applicants with the highest grades overall and who satisfactorily complete lower-division requirements will be given preference for admission to the Public Health majors. All applicants to the B.S. degree in Public Health Sciences must have a minimum overall GPA of 3.0 and a minimum GPA of 3.0 in required courses, one year of general chemistry with laboratory, and one year of courses equivalent to UCI’s BIO SCI 93 and BIO SCI 94. All applicants to the B.A. degree in Public Health Policy must have a minimum overall GPA of 3.0 and a minimum GPA of 3.0 in required courses, and complete one year of social science courses in any combination of the following topics: anthropology, economics, sociology, and/or psychology.

Transfer Student Admission Requirements

The University of California requirements for admission as a transfer applicant vary according to the high school record. Transfer applicants who have completed a California Certificate of Proficiency or the equivalent must also meet regular University entrance requirements.

Transfer applicants should also refer to the section on Information for Transfer Students: Fulfilling Requirements for a Bachelor’s Degree.

The transcript submitted from the last college attended must show, as a minimum, that the student was in good standing and had earned a GPA of 2.4 (2.8 for nonresidents) or better in all transferable coursework.

A transfer applicant must also meet one of the following conditions:

1. If a student was eligible for admission to the University when the student graduated from high school — meaning that the student satisfied the Subject, Scholarship, and Examination Requirements or was identified by the University as eligible under the Eligibility in the Local Context (ELC) program and completed the Subject and Examination Requirements in the senior year — the student is eligible to transfer if he or she has a C (2.0) average in transferable college coursework and has met the prerequisites for his or her major.

2. If a student met the Scholarship Requirement in high school but did not satisfy the Subject Requirement, the student must take transferable college courses in the missing subjects, earn a grade of C or better in each of these required courses, and earn an overall C (2.0) average in all transferable college coursework to be eligible to transfer.

3. Students who were not eligible for admission to the University when they graduated from high school because they did not meet the Scholarship Requirement must:
   a. Complete 60 semester (90 quarter) units of UC transferable college credit with a grade point average of at least 2.4 (2.8 for nonresidents). No more than 14 semester (21 quarter) units may be taken Pass/Not Pass; and
   b. Complete the following course pattern requirement, earning a grade of C or better in each course:
      i. Two UC transferable college courses (3 semester or 4–5 quarter units each) in English composition; and
      ii. One UC transferable college course (3 semester or 4–5 quarter units) in mathematical concepts and quantitative reasoning; and
      iii. Four UC transferable college courses (3 semester or 4–5 quarter units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, and the physical and biological sciences.

Each course must be worth at least 3 semester units.

NOTE: For UCI, in fulfilling items i and ii, applicants for fall should complete the courses in English and mathematics no later than the spring term.
Transfer Admission Guarantee (TAG) Requirements

UC Irvine's Transfer Admission Guarantee (TAG) program guarantees admission to highly-qualified students from all California Community Colleges. Admission to most majors at UC Irvine can be guaranteed through TAG for transfer students who meet the eligibility requirements and complete the online TAG application. A TAG Community College applicant is defined as a student:

1. for whom the last college attended before admission to a UC campus was a California Community College, excluding summer sessions; and
2. who has completed at least 30 semester (45 quarter) UC transferable units at one or more California Community Colleges, including Advanced Placement (AP), International Baccalaureate (IB), and A-level credit.

Students may be eligible for admission to UCI through TAG if they will have met all five of the following requirements:

1. completion of 60 UC transferable semester (90 quarter) units by the end of the quarter prior to enrolling at UCI (units must be completed by spring 2017 for fall 2017) and attainment of at least the minimum GPA specified by the major. TAG details are available at the Admissions website (http://www.admissions.uci.edu);
2. completion of the minimum UC transfer eligibility requirements in English (two courses) and transferable mathematics (one course). The first mathematics and English courses must be completed at the time of the TAG submission. The second English course must be completed by spring 2017 for fall 2017;
3. completion of additional requirements for the student’s chosen major at UCI, prior to enrolling at UCI (major requirements to be completed by spring 2017 for fall 2017);
4. completion of the last 30 semester or 45 quarter units at a California Community College by the end of the spring 2017 term; and
5. maintained UC eligibility.

NOTE: The majors in Business Administration, Cognitive Sciences, Dance, Music, and Nursing Science will not participate in the TAG program for fall 2017. For the most current information, visit the Admissions website (http://www.admissions.uci.edu).

Nonresident Transfer Admission Requirements

Nonresident transfer applicants must meet the same minimum admission requirements as those for residents, except, nonresidents must have a grade point average of 2.8 or higher in all transferable college coursework. Refer to the Expenses, Tuition, and Fees section of this Catalogue for information regarding residence classification for tuition purposes and the Nonresident Supplemental Tuition.

Admission for a Second Bachelor’s Degree

A student whose educational objective has changed substantially after receiving the bachelor’s degree may be considered for admission to a program for a second degree. Admission as a candidate for a second bachelor’s degree requires that the applicant be fully eligible for admission to the University and have strong promise of academic success in the new major. All such admissions are subject to the approval of the dean or director of the UCI school or program in which the second degree will be earned.

Students who have not attended UCI as undergraduates during a regular academic quarter should complete the undergraduate application for admission and scholarships, available at the University of California Admissions website (http://admission.universityofcalifornia.edu/how-to-apply/apply-online). Students who have attended UCI as undergraduates during a regular academic quarter should contact the Academic Advising Office of the major of interest to initiate the electronic Second Baccalaureate/Readmission Process. For more information, visit the Registrar's Readmission website (http://www.reg.uci.edu/enrollment/readmission.html).

Admission of International Students

The credentials of an international undergraduate applicant — a student who holds or expects to hold a student, exchange, visitor, or diplomatic visa and who wishes to attend school in the United States — are evaluated in accordance with the general regulations governing admission. The application should be submitted at University of California Admissions website (http://admission.universityofcalifornia.edu/how-to-apply/apply-online) early in the appropriate application filing period. This will allow time for exchange of necessary correspondence and, if the applicant is admitted, will help the student in obtaining the necessary passport visa. Official certificates and detailed transcripts of records should be submitted directly to the UCI Office of Admissions and Relations with Schools only when requested.

International applicants whose native language is not English will be required to demonstrate their English proficiency. This is most often accomplished by achieving a minimum score of 550 (paper-based) or 80 (Internet-based) on the Test of English as a Foreign Language (TOEFL), or with a 6.5 or better band score (academic modules) on the International English Language Testing System (IELTS) examination. Information about these exams is available at most U.S. consulates and overseas U.S. educational advising offices, as well as by mail and online:

**TOEFL Services**
P.O. Box 6151
Princeton, NJ 08541-6151, USA

**IELTS International**
Students must ask the TOEFL Services or IELTS to forward results of their tests to the UCI Office of Admissions and Relations with Schools. These scores must be received no later than January for students applying for the fall term. Completion of two acceptable English composition courses (as determined by the Office of Admissions and Relations with Schools) with a grade of C or better will also clear the English proficiency requirement for international applicants.

Students who wish to improve their English proficiency to meet the TOEFL or IELTS requirement may enroll in the intensive Program in English as a Second Language sponsored by UC Irvine Extension. Information is available from:

International Programs
UC Irvine Extension
P.O. Box 6050
Irvine, CA 92616-6050
949-824-6781
Email: uciesl@uci.edu

In addition to achieving a minimum TOEFL or IELTS score, all international students whose native language is other than English must take an Academic English/English as a Second Language Placement Test upon arrival and prior to registration. Based upon the results of this test, students may be required to improve certain language skills by enrolling in Academic English/English as a Second Language courses during their first year, with other major coursework being adjusted accordingly.

Generally, financial assistance and scholarships from the University are not available to the non-immigrant-visa student. International students must provide proof that sufficient funds will be available to meet their educational commitments while studying in the United States. International undergraduate students are considered as nonresidents of California and are required to pay Nonresident Supplemental Tuition in addition to fees paid by legal residents of California.

Please direct all inquiries regarding the undergraduate admission of international students to the Office of Admissions and Relations with Schools.

**English Language Proficiency of Permanent Resident, Refugee, and International (F-1 Visa) Students: Academic English/English as a Second Language**

Any student (1) whose first or native language is not English, (2) whose verbal scores on the Writing section of the SAT fall below a set level, (3) who has not satisfied the UC Entry Level Writing requirement, and (4) who has received a letter from the AE/ESL Program requiring them to take the AE placement test, or any such student without a verbal SAT score, must take the AE placement test prior to the first quarter of enrollment, regardless of the student’s TOEFL (Test of English as a Foreign Language) score, IELTS (International English Language Testing System) score, or TSWE (Test of Standard Written English) score. Also, any student who is identified as an ESL student through the UC Analytical Writing Placement Examination must take the AE placement test. The test is given prior to the beginning of each quarter, during Welcome Week prior to the beginning of fall quarter instruction, and on dates to be announced. Information is available from the Academic Testing Center, telephone 949-824-6207, and the Academic English/English as a Second Language Program, telephone 949-824-6781.

Based upon the results of the test, students may be required to enroll in AE/ESL courses prior to enrolling in any other required writing courses. Students required to enroll in AE/ESL courses must begin satisfying their AE/ESL requirements within their first or second quarter at UCI. They must take these courses in consecutive quarters. The AE/ESL requirements are to be completed within the first six quarters at UCI. Students who have not satisfied the AE/ESL requirements by the end of their sixth quarter will be ineligible to enroll for a seventh quarter at UCI. The UC Entry Level Writing requirement must be satisfied during the quarter following the completion of AE/ESL requirements. If the AE/ESL requirements are completed during the first quarter of enrollment, the UC Entry Level Writing requirement must be satisfied before the beginning of the fourth quarter of enrollment.

AE/ESL courses, offered by the School of Humanities and listed in the School’s section of this Catalogue, include classes in writing, speaking and listening, and reading and vocabulary development.

**Credit for AE/ESL Coursework**

Students whose first language is not English may receive up to 12 baccalaureate credits for AE/ESL coursework. Students may receive workload credit for courses taken beyond this 12-unit limit but will not receive additional credits applicable to the bachelor’s degree.

**Credit for Native Language**

Students whose first language is not English may receive credit for coursework in their native language and literature, provided such courses were completed at the college level in the country of the vernacular, or at the upper-division or graduate level at UCI or another accredited English-speaking institution. Some restrictions apply; see the School of Humanities section for information.

**Advanced Placement and International Baccalaureate Credit**

**Duplicate Credit.** Students should be aware that AP examinations, IB examinations, and college courses taken prior to or after enrolling at the university may be duplicative. In these cases, the university will award credit for only one of these. Students cannot earn units or grade points at UCI in courses from which they have been exempted on the basis of AP or IB credit. Students who elect to enroll in courses for which they have already received AP or IB credit will have those courses specially coded on their transcript without unit or grade credit. However, some examinations exempt the
student from a greater number of UCI units than the number of AP or IB units earned. In such cases, the student may elect to take the final course in the series for credit.

**Advanced Placement (AP).** Students who earn scores of 3, 4, or 5 on the College Board AP examinations will receive credit toward graduation at UCI. The unit and subject credit allowed toward degree requirements assigned to each test are shown in the accompanying chart.

1. Maximum credit 8 units.
2. Students who wish to enroll in any Chinese, Japanese, or Spanish course at UCI are still required to take the placement examination (and oral interview, if necessary). Students, however, cannot earn units or grade points in courses from which they have been exempted on the basis of Advanced Placement credit, even if placement results require enrollment in such a level.
3. Maximum credit 4 units.
4. Students who take the Calculus BC examination and earn a subscore of 3 or higher on the Calculus AB portion will receive credit for the Calculus AB examination, even if they do not receive a score of 3 or higher on the BC examination.

NOTE: All students should refer to the Duplicate Credit section that appears before the AP chart.

**International Baccalaureate (IB).** Students completing the IB diploma with a score of 30 or above will receive 30 quarter units (20 semester units) total toward their UC undergraduate degree. The University grants 8 quarter units (51/3 semester units) credit for certified IB Higher Level examinations on which a student scores 5, 6, or 7. The University does not grant credit for Standard Level examinations. Some higher-level examinations may be used to fulfill course requirements in lower-division major or general education requirements.

---

1. Course credit satisfies the School of Humanities language other than English requirement for School of Humanities majors; satisfies categories VI and VIII of the UCI GE requirement.
2. History exam credit is only applicable toward GE, not School of Humanities major requirements.
3. Course credit applies toward the School of Humanities language other than English requirement for School of Humanities majors and International Studies; satisfies both categories VI and VIII of the UCI GE requirement.
4. Additional course credit may be awarded toward the major, upon petition. Course credit applies toward the School of Humanities language other than English requirement for School of Humanities majors and International Studies; satisfies both categories VI and VIII of the UCI GE requirement.

* Students who wish to enroll in any Chinese, French, Japanese, Korean or Spanish course at UCI are still required to take the placement exam (and oral interview if necessary). Students, however, cannot earn units or grade points in courses from which they have been exempted on the basis of IB credit, even if placement results require enrollment in such a level.
The units granted for IB examinations are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units a student may accumulate prior to graduation from the University. Students who enter the University with IB credit do not have to declare a major earlier than other students nor are they required to graduate earlier.

Application Procedures

Students may apply to the University of California using the online application at the University of California Admissions website (http://admission.universityofcalifornia.edu/how-to-apply/apply-online).

Applications must be submitted by the last day of the filing period. The nonrefundable application fee is $70 ($80 for international students) for each campus to which the student applies.

When to Apply for Admission

To ensure that applications will be considered for admission by both UCI (or other UC campuses) and the student’s choice of major or program of study, the completed application and the application fee should be submitted during the priority filing period, November 1–30, 2016, for fall quarter 2017. Each campus accepts for consideration all applications it receives during this period. Additionally, students required to fulfill the examination requirements for freshman admission should make arrangements to take the standardized tests early. Completing the examination requirement (SAT or ACT with Writing) no later than the December testing date of the senior year of high school is required for students applying for the fall quarter.

After the priority filing period has ended, campuses will accept applications only if they still have openings for new students. Most campuses are unable to accept applications after the formal filing period closes.

Academic Record. On the application, students must report all high schools and colleges attended, regardless of credit earned or courses completed. All courses taken must also be reported, regardless of grades earned. This includes reporting courses repeated with both the original and repeated grade.

Failure to submit an accurate academic record will result in any admissions offer being rescinded.

Transcripts

The UCI Office of Admissions and Relations with Schools (OARS) requires complete, accurate, and up-to-date information about a student’s academic program and work in progress in order to process and respond to the application in a timely manner. The transcript and other documents submitted as part of the application become the property of the University; they cannot be returned or forwarded in any form to another college or university.

Freshman Applicants. Freshman applicants should not send transcripts unless requested to do so. Applicants will be notified if a preliminary high school transcript is required. Applicants are also responsible for asking testing agencies to report examination scores for either the SAT or ACT Plus Writing to UC. Once students are admitted and decide to enroll at UCI, an official final high school transcript showing an official graduation date must be forwarded to OARS even if a student attends summer session. Official final transcripts are due in OARS by July 1 for those students admitted for fall quarter. [A California Certificate of Proficiency, the results from a proficiency test from any state, or a General Educational Development (GED) Certificate can be accepted in place of a high school diploma.] Delays in receiving official transcripts will disadvantage students in the academic advising process and can affect enrollment in appropriate courses.

Transfer Applicants. Transfer applicants should not send transcripts unless requested to do so. It is essential that applicants accurately complete the self-reported college credit information in the application because it will be used for initial admission screening. Once students are admitted and decide to enroll at UCI, an official transcript from each college attended and the high school from which they graduated must be sent to OARS even if a student attends summer session. Final official transcripts are due in OARS by July 1 for those students admitted for the fall quarter. Summer-session transcripts must be submitted by September 15. Delays in receiving official transcripts will disadvantage students in the academic advising process and can affect enrollment in appropriate courses.

Examination Arrangements

Freshman applicants should make arrangements to take the SAT with the College Board (http://www.collegeboard.org). For the ACT Plus Writing, students should contact ACT (http://www.actstudent.org). (Test fees should be paid to the testing services, not to the University.)

Freshmen applicants must also report ACT Plus Writing or SAT scores on their original UC Application, then request that the testing agency send an official score report sent to one UC campus, and all UC campuses they apply to will receive it. Ensure that all scores are sent to UC. UC will use the highest scores from a single administration.

To prevent confusion or unnecessary delay, it is important to use precisely the same form of the student’s name on both the application for admission and the test materials.

The 2016-17 SAT and SAT Subject Tests schedule is available at College Board website (http://www.collegeboard.org).

The 2016-17 ACT Plus Writing test schedule is available at ACT website (http://www.actstudent.org/regist/dates.html).

Detailed information, including confirmation of test dates, is available from the College Board, ACT, and from most high school counseling offices.
Notification of Admission
Most fall quarter freshmen applicants are notified of their status on a rolling basis between February 1 and March 31. Transfer applicants are usually notified by May 1. In some cases for transfer applicants, complete transcripts of coursework and/or a mid-term progress report are required before a final decision can be made; such records will be requested by OARS. Note that these target dates apply only to those applicants who submitted their applications during the fall priority filing period (November 1–30). Those students who apply after the priority period will be notified as soon as possible after the other applicants.

Statement of Intent to Register
Students who wish to attend UCI must return a Statement of Intent to Register (SIR). The SIR serves to notify UCI of the student’s decision to accept or not accept its offer of admission. Before completing and returning their SIR, students who have applied to more than one campus are advised to take as much time as is appropriate in considering their response to each campus. However, it is essential that students allow enough time to meet the stipulated deadline. Once they have decided which UC campus to attend, students should submit their positive SIR and nonrefundable $100 deposit (if applicable) either electronically or by mail. (This deposit, known as the Undergraduate Acceptance of Admission Fee, is applied to the Student Services Fee when the student enrolls.)

Students must submit their SIR by the following deadline:

Freshmen entering fall 2017: May 1, 2017
Transfers entering fall 2017: June 1, 2017

Electronic Filing: Students are encouraged to return their SIR electronically. Log in to MyAdmission, the UCI admissions portal (http://www.admissions.uci.edu). Students submitting an SIR electronically are required to pay their $100 Acceptance of Admission Fee by credit card.

Filing by Mail: Students who are unable to submit their SIR online may download and print an SIR from the OARS website. Students must return the printed SIR along with the $100 Acceptance of Admission Fee (if requested), made payable to:

UC Regents
Office of Admissions and Relations with Schools
260 Aldrich Hall
University of California
Irvine, CA 92697-1075

Students who are not able to either submit their SIR electronically or download an SIR from the OARS website should contact OARS at the address listed above and/or call 949-824-6703.

Admission to UCI is not an assurance of receiving financial aid nor does it guarantee assignment to University housing. Separate applications are required of applicants desiring financial aid and/or University housing, and receipt of communications from the Office of Financial Aid and Scholarships, the Housing Office, or any office other than the OARS does not imply that eligibility for admission has been established.

Student Records Access and Disclosure
At UCI, an “applicant” becomes a “student” at the time of submission of the SIR. Information regarding access to student records and disclosure of student record information (both public and confidential) may be found in the Appendix.

1 Degrees: B.A. = Bachelor of Arts; B.F.A. = Bachelor of Fine Arts; B.S. = Bachelor of Science; B.Mus. = Bachelor of Music; J.D. = Juris Doctor; M.A. = Master of Arts; M.A.S. = Master of Advanced Study; M.A.T. = Master of Arts in Teaching; M.B.A. = Master of Business Administration; M.F.A. = Master of Fine Arts; M.H.C.I.D. = Master of Human Computer Interaction and Design; M.L.F.P. = Master of Legal and Forensic Psychology; M.P.Ac. = Master of Professional Accountancy; M.P.H. = Master of Public Health; M.P.P. = Master of Public Policy; M.S. = Master of Science; M.D. = Doctor of Medicine; M.U.R.P. = Master of Urban and Regional Planning; Ph.D. = Doctor of Philosophy. Titles of degrees may not correspond exactly with specific fields of study offered; see the Index and the academic unit sections for information.

2 Emphasis at the graduate level is on the Ph.D. degree; the master’s degree may be awarded to Ph.D. students after fulfillment of the requirements.

3 Admission to this program is no longer available.

4 Emphasis at the graduate level is on the Ph.D. degree; the M.S. degree may be awarded to Ph.D. students after fulfillment of the requirements. However, students may apply directly to the M.S. concentration in Biotechnology and to the M.S. concentration in Ecology and Evolutionary Biology.

5 In addition to the regular M.S. degree program, a program coordinated with the School of Education leads to an M.S. degree and a Teaching Credential.

6 UCI, UCR, and UCSD joint program.

7 UCI and UCSD joint program.

8 Emphasis at the graduate level is on the Ph.D. degree; the M.A. degree may be awarded to Ph.D. students after fulfillment of the requirements. However, an M.A. in Social Science (concentration in Demographic and Social Analysis; Mathematical Behavioral Sciences; or Medicine, Science, and Technology Studies) is available.

• Program in Public Health
• School of Social Ecology
• School of Social Sciences

Undergraduate Majors, Minors, and Associated Areas of Study

Students are urged to become informed of and understand all requirements concerning their intended majors, minors, and associated areas of study. Special restrictions apply to some majors and minors; for example, some minors require formal application or declaration by students, others may be completed without such formalities. Information about the programs listed below may be found in the academic unit sections of the Catalogue.

Undergraduate majors are offered in all of the bachelor's degree programs on the list of degree titles; the degree programs are referred to as majors in the following list. In association with these majors, UCI offers a number of minors, concentrations, specializations, and emphases.

A minor consists of a coordinated set of seven or more courses (28–40 units) which together take a student well beyond the introductory level in an academic field, subject matter, and/or discipline but which are not sufficient to constitute a major. An interdisciplinary minor consists of courses offered by two or more departments, schools, or programs. Generally, all minors are available to all students, with the following exceptions: (1) students may not minor in their major, and (2) students may not complete certain other major/minor combinations that are expressly prohibited, as noted in the Catalogue. Minors are listed on a student's transcript but not on the baccalaureate diploma.

A concentration is a program of interdisciplinary study consisting of courses offered by two or more schools or programs. Concentrations are similar to minors in that they require fewer units of work than majors do, and the area of concentration appears on the student's transcript but not on the baccalaureate diploma. Concentrations are taken in combination with a major in one of the schools or programs offering the concentration.

A specialization is a program of study which enables students to focus on courses in a particular field within a major. The area of specialization pursued appears on the student's transcript but not on the baccalaureate diploma.

An emphasis is a program of study within a major which emphasizes a specific area of the discipline. Emphases usually have a defined course of study and are not listed on the transcript nor on the baccalaureate diploma.

In addition, the Campuswide Honors Program, various major-specific honors programs, and Excellence in Research programs are available. See the Division of Undergraduate Education section for information.

Claire Trevor School of the Arts

Majors
• Art, B.A.
• Dance, B.A.
• Dance, B.F.A.
  • Specializations (B.F.A. only):
    • Choreography
    • Performance
• Drama, B.A.
• Music, B.A.
  • Emphases (B.A. only):
    • Composition
    • Music History
    • Music Theory
• Music - Performance, B.Mus.
  • Specializations (B.Mus. only):
    • Guitar and Lute
    • Woodwinds, Brass, Percussion & Strings
      • Bassoon
      • Clarinet
      • Double Bass
      • Flute
      • Horn
      • Oboe
      • Percussion
• Trombone
• Trumpet
• Tuba
• Viola
• Violin
• Violoncello
• Jazz Studies
  • Bass
  • Percussion
  • Piano
  • Saxophone
  • Trombone
  • Trumpet
• Piano
• Voice
• Music Theatre, B.F.A.

Minor
• Digital Arts
• Digital Filmmaking

Francisco J. Ayala School of Biological Sciences

Majors
• Biochemistry and Molecular Biology, B.S.
• Biological Sciences, B.S.
  • Concentration: Biological Sciences Education
• Biology/Education, B.S.
• Developmental and Cell Biology, B.S.
• Ecology and Evolutionary Biology, B.S.
• Exercise Sciences, B.S.
• Genetics, B.S.
• Human Biology, B.S.
• Microbiology and Immunology, B.S.
  • Specializations:
    • Immunology
    • Microbiology
    • Virology
• Neurobiology, B.S.

Minor
• Biological Sciences

The Paul Merage School of Business

Majors
• Business Administration, B.A.
  • Emphases:
    • Accounting
    • Finance
    • Health Care Management
    • Information Systems
    • Marketing
    • Operations and Decision Technologies
• Organization and Management
  • Business Information Management, B.S. (offered jointly with the Donald Bren School of Information and Computer Sciences)

Minors
• Accounting
• Innovation and Entrepreneurship
• Management

School of Education
Cal Teach Science and Mathematics Program (Secondary Teaching Credential certification combined with a major in the Schools of Biological Sciences or Physical Sciences)

Major
  • Education Sciences, B.A.

Minor
  • Educational Studies

The Henry Samueli School of Engineering

Majors
• Aerospace Engineering, B.S.
• Biomedical Engineering, B.S.
  • Specializations:
    • Biophotonics
    • Micro and Nano Biomedical Engineering
• Biomedical Engineering: Premedical, B.S.
• Chemical Engineering, B.S.
  • Specializations:
    • Biomolecular Engineering
    • Energy and the Environment
    • Materials Science
• Civil Engineering, B.S.
  • Specializations:
    • General Civil Engineering
    • Environmental Hydrology and Water Resources
    • Structural Engineering
    • Transportation Systems Engineering
• Computer Engineering, B.S.
• Computer Science and Engineering, B.S. (offered jointly with the Donald Bren School of Information and Computer Sciences)
• Electrical Engineering, B.S.
  • Specializations:
    • Electronic Circuit Design
    • Semiconductors and Optoelectronics
    • RF, Antennas and Microwaves
    • Digital Signal Processing
    • Communications
• Engineering, B.S.
• Environmental Engineering, B.S.
• Materials Science Engineering, B.S.
  • Specializations:
    • Biomaterials
    • Electronics Processing and Materials
    • Materials and Mechanical Design
• Mechanical Engineering, B.S.
  • Specializations:
    • Aerospace Engineering
    • Energy Systems and Environmental Engineering
    • Flow Physics and Propulsion Systems
    • Design of Mechanical Systems

• Concentration: Engineering and Computer Science in the Global Context (by approval of the Associate Dean, in combination with any major in The Henry Samueli School of Engineering)

**Minors**

• Biomedical Engineering
• Materials Science Engineering

**School of Humanities**

**Majors**

• African American Studies, B.A.
• Art History, B.A.
• Asian American Studies, B.A.
• Chinese Studies, B.A.
  • Emphases:
    • Chinese Culture and Society
    • Chinese Language and Literature
• Classics, B.A.
  • Emphases:
    • Classical Civilization
    • Greek and Latin Language and Literature
    • Latin Language and Literature
• Comparative Literature, B.A.
  • Emphases:
    • Comparative Literature and Critical Theory
    • Cultural Studies
    • World Literature
• East Asian Cultures, B.A.
• English, B.A.
  • Emphasis:
    • Creative Writing
  • Specialization:
    • English for Future Teachers
• European Studies, B.A.
  • Emphases:
    • British Studies
    • Early Modern Europe
    • Encounters with the Non-European World
    • French Studies
    • German Studies
    • Italian Studies
    • Medieval Studies
    • The Mediterranean World: Past and Present
    • Modern Europe (1789–Present)
    • Russian Studies
    • Spanish-Portuguese Studies
  • Film and Media Studies, B.A.
• French, B.A.
• Gender and Sexuality Studies B.A.
• German Studies, B.A.
• Global Cultures, B.A.
  • Emphases:
    • Hispanic, U.S. Latino/Latina, and Luso-Brazilian Culture
    • Africa (Nation, Culture) and Its Diaspora
    • Asia (Nation, Culture) and Its Diaspora
    • Europe and Its Former Colonies
    • Atlantic Rim
    • Pacific Rim
    • Inter-Area Studies
• Global Middle East Studies, B.A.
• History, B.A.
  • Specialization:
    • History for Future Teachers
• Japanese Language and Literature, B.A.
• Korean Literature and Culture, B.A.
• Literary Journalism, B.A.
• Philosophy, B.A.
• Religious Studies, B.A.
  • Emphases:
    • Judaism/Christianity/Islam
    • World Religious Traditions
• Spanish, B.A.
  • Emphases:
    • Cinema: Spain, Latin America, and U.S. Latino
    • Literature and Culture
    • Spanish for Future Teachers

Minors

• African American Studies
• Archaeology
• Art History
• Asian American Studies
• Asian Studies
• Chinese Language and Literature
• Chinese Studies
• Classical Civilization
• Comparative Literature
• English
• European Studies
• Film and Media Studies

• Philosophy
• Queer Studies
• Religious Studies
• Russian Studies
• Spanish

Donald Bren School of Information and Computer Sciences

Majors
• Business Information Management, B.S. (offered jointly with The Paul Merage School of Business)
• Computer Game Science, B.S.
• Computer Science, B.S.
  • Specializations:
    • Algorithms
    • Architecture and Embedded Systems
    • Bioinformatics
    • General Computer Science
    • Information
    • Intelligent Systems
    • Networked Systems
    • Systems and Software
    • Visual Computing
• Computer Science and Engineering, B.S. (offered jointly with The Henry Samueli School of Engineering)
• Data Science, B.S.
• Informatics, B.S.
  • Specializations:
    • Human-Computer Interaction
    • Organizations and Information Technology
• Information and Computer Science, B.S.
• Software Engineering, B.S.
• Concentration: Engineering and Computer Science in the Global Context (by approval of the Associate Dean, in combination with any major in the Bren School of ICS)

Minors
• Bioinformatics
• Digital Information Systems
• Health Informatics
• Informatics
• Information and Computer Science
• Statistics
**Interdisciplinary Studies**

**Majors**
- Business Information Management, B.S. (offered jointly by The Paul Merage School of Business and the Donald Bren School of Information and Computer Sciences)
- Computer Science and Engineering, B.S. (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering)
- Global Middle East Studies, B.A.

**Minors**
- Civic and Community Engagement
- Global Middle East Studies
- Global Sustainability
- History and Philosophy of Science
- Medical Humanities
- Native American Studies

**Program in Nursing Science**

**Major**
- Nursing Science, B.S.

**Department of Pharmaceutical Sciences**

**Major**
- Pharmaceutical Sciences, B.S.

**School of Physical Sciences**

**Majors**
- Applied Physics, B.S.
  - Concentrations:
    - Biomedical Physics
    - Engineering Physics
- Chemistry, B.S.
  - Concentrations:
    - Biochemistry
    - Chemistry Education (with Secondary Teaching Certification option)
- Earth System Science, B.S.
  - Concentration:
    - Geosciences Education with Secondary Teaching Certification
  - Specializations:
    - Atmospheric Science
    - Hydrology and Terrestrial Ecosystems
    - Oceanography
- Environmental Science, B.A.
  - Concentration:
    - Geosciences Education with Secondary Teaching Certification
- Mathematics, B.S.
  - Concentrations:
    - Mathematical Finance
    - Mathematics for Education/Secondary Teaching Certification
  - Specializations:
    - Applied and Computational Mathematics
    - Mathematical Biology
• Mathematics for Education

• Physics, B.S.
  • Concentrations:
    • Applied Physics
    • Biomedical Physics
    • Computational Physics
    • Philosophy of Physics
    • Physics Education (with Secondary Teaching Certification option)
  • Specialization:
    • Astrophysics

Minors

• Earth and Atmospheric Sciences
• Mathematics
• Mathematics for Biology

Program in Public Health

Majors

• Public Health Policy, B.A.
• Public Health Sciences, B.S.

Minor

• Public Health

School of Social Ecology

Majors

• Criminology, Law and Society, B.A.
• Psychology and Social Behavior, B.A.
• Social Ecology, B.A.
• Urban Studies, B.A.

Minors

• Criminology, Law and Society
• Psychology and Social Behavior
• Social Ecology
• Urban and Regional Planning
• Urban Studies

School of Social Sciences

Majors

• Anthropology, B.A.
• Business Economics, B.A.
  • Specialization:
    • International Issues and Economics
• Chicano/Latino Studies, B.A.
• Cognitive Sciences, B.S.
• Economics, B.A.
  • Specialization:
    • International Issues and Economics
• International Studies, B.A.
• Political Science, B.A.
• Psychology, B.A.
• Quantitative Economics, B.A.
  • Specialization:
    • International Issues and Economics

• Social Policy and Public Service, B.A.
• Sociology, B.A.

**Minors**

• Anthropology
• Chicano/Latino Studies
• Conflict Resolution
• Economics
• Hearing and Speech Sciences
• International Studies
• Linguistics
• Medical Anthropology
• Political Science
• Psychology
• Sociology

**Areas of Graduate Study**

For information about any area of graduate or professional study, including the precise title of the degree conferred, consult the Catalogue’s academic unit sections.

**Claire Trevor School of the Arts** ([http://www.arts.uci.edu](http://www.arts.uci.edu))

• Acting
• Art
• Choral Conducting
• Collaborative Piano
• Critical and Curatorial Studies
• Dance
• Design
• Directing
• Drama

12. School of Medicine and The Paul Merage School of Business program.
Information for Admitted Students

On This Page:

- Orientation and Welcome Week
- New Graduate Student Orientation

Orientation

Undergraduate Students

Each May, information about UCI’s Orientation Programs (http://www.orientation.uci.edu), sponsored by Student Life & Leadership (http://www.studentlife.uci.edu), is made available to admitted students who plan to enroll in the fall.

Summer Programs

Student Parent Orientation Program (SPOP). All freshmen are required to attend an orientation program. SPOP provides the opportunity for freshmen and their parents or guardians to attend a comprehensive orientation program. Each two-day, one-night program includes academic advising and registration for fall classes. In addition, information on housing, financial aid, campus resources, student life, and more is included. SPOP is designed for all domestic and international freshmen.

International Student Orientation (ISO) is a mandatory orientation program for all incoming international freshmen who are not able to attend SPOP. ISO is a three-day, two-night program specifically designed to help orient new international freshmen to life at UCI and in the United States. A wealth of important resources for international students is shared, including language support service, getting around Irvine, academic and classroom culture, and student health and wellness.

Transfer Success is a unique one-day program geared to the needs of transfer students. Held in early summer, the program provides information on campus resources, student life and making the transition to academic life at a research university. It also provides a jump-start on getting to know faculty and how to get involved with research as an undergraduate.

Transfer Student Parent Orientation Program (TSPOP) is an optional orientation for transfer students looking for a more comprehensive introduction to life at UCI. This two-day, one-night program coincides with SPOP and offers transfer students a thorough overview of what to expect during their transition to a research university as well as information on housing, financial aid, campus resources, student life, and more.

For more information about all of the orientation programs, visit the Orientation Programs website (http://www.orientation.uci.edu); telephone 949-824-5182; or email orientation@uci.edu.

Welcome Week

Welcome Week is held each fall a few days prior to the beginning of classes. A variety of academic and social activities for new and returning students are held during this time. For more information, visit the Welcome Week website (http://search.dos.uci.edu/welcomeweek).

Graduate Students

Incoming graduate students are strongly encouraged to attend the Campuswide New Graduate Student Orientation, held during the third week of September each fall. This orientation covers all aspects of navigating graduate education at UC Irvine, including graduate student services. It augments school/department-based orientations, and students should attend both. Information about the Campuswide New Graduate Student Orientation is emailed to incoming graduate students the summer prior to the event. Inquiries may be directed to gradorientation@uci.edu, and details are available at the Campuswide New Graduate Student Orientation website (http://www.grad.uci.edu/services/campuswide-orientation/grad-orientation.html).

Academic Advising and Honors Opportunities

Academic Advising

At the time of admission to UCI every undergraduate student is assigned to the school that offers the student’s selected major. Students who have indicated “Undecided/Undeclared” as a major on their UC application for admission and scholarships receive assistance from the Undecided/Undeclared Advising Program until they select an academic major.

Jurisdiction over all questions of academic regulations and academic standing rests with the dean of the school to which a student is assigned or, in the case of undecided/undeclared majors, with the Dean of the Division of Undergraduate Education. Each academic unit provides academic advising for its students and processes requests to add or drop courses, waive or change graduation or other requirements, or change majors. Students are responsible for knowing the governing regulations of the school or program to which they are assigned.
While each academic unit is responsible for maintaining a system that provides academic advising, these systems differ from unit to unit. In some, all of the faculty serve as advisors; in others, only certain members of the faculty are designated as advisors. All advising offices include academic counselors, professionals who assist students in planning their program, selecting a major, and making progress toward a degree. Peer academic advisors (trained upper-division students) assist students in many of the same areas as academic counselors. In addition, they are able to answer questions relating to student life issues, providing a student perspective. Responsibility for informing students of the names of their advisors rests with the dean of the appropriate academic unit. This is normally done by letter; however, students may obtain information by telephone from the office of the appropriate dean. Telephone numbers for academic advising offices are listed in the academic unit sections of the Catalogue.

New students are required to plan their academic programs with an academic counselor shortly after being admitted. The optimum time to initiate contact with an academic counselor is before the student enrolls in classes. The academic counselor can help the student determine whether the classes the student wishes to take are appropriate to the student’s level of preparation, whether the proposed classes fit within the student’s educational goals, and whether the classes will help meet some of the requirements for graduation.

In some schools, consultation between students and their faculty advisors is mandatory. Regardless of whether or not consultation between student and advisor is required, students are responsible for initiating and maintaining periodic contact with their assigned faculty advisor. The actual frequency of these meetings will be determined by the desires of the student, the advisor, and the unit’s governing regulations.

Each quarter, students are encouraged to go to the appropriate academic dean’s office prior to registration for advice concerning class enrollment.

On This Page:
- Honors Recognition
- Honors Opportunities
  - Major-Specific and School Honors Programs
  - Excellence in Research Programs
  - Phi Beta Kappa

Honors Recognition

Students who graduate during the academic year with academic honors, and those who receive special school awards, are honored in school-based ceremonies. Some honors societies may also hold special ceremonies for selected students. Of the graduating seniors, no more than 12 percent will receive academic honors: approximately 1 percent summa cum laude, 3 percent magna cum laude, and 8 percent cum laude. The criteria used in selecting candidates for these honors are available at the counseling office of each school. One general criterion is that students must have completed at least 72 quarter units in residence at a University of California campus. The student’s cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. Students who have on file recorded acts of academic dishonesty, as defined in University of California Policies Applying to Campus Activities, Organizations and Students, may be excluded by the Associate Deans from consideration for academic honors at graduation. For further information contact the academic counseling office of each school.

Honors Opportunities

UC Irvine offers many challenging and enriching honors opportunities to its most accomplished and motivated students. These include a comprehensive Campuswide Honors Program (http://www.honors.uci.edu), which enrolls outstanding students of all majors from the freshman through senior years; a variety of major-specific honors programs at the upper-division level; the Humanities Honors Program, also offered at the upper-division level, but open to all majors on campus; and several Excellence in Research programs.

These programs offer some of the advantages usually associated with selective liberal arts colleges: rigorous, personalized classes and the intellectual exchange that creates a community of scholars. The difference, however, is that UCI’s programs are supported by and benefit from the resources of a major research university, including renowned faculty, research opportunities, and the 38-million-volume University of California Library system.

Honors students are also encouraged to participate in the UC Education Abroad Program (http://uc.eap.ucop.edu), the International Opportunities Program (http://www.studyabroad.uci.edu/prospective/index.shtml), or the UCDC Academic Internship Program (http://capitalinternships.uci.edu). Qualified students are also encouraged to take advantage of resources available in the Scholarship Opportunities Program (SOP) (http://scholars.uci.edu) and the Undergraduate Research Opportunities Program (UROP) (http://www.urop.uci.edu). These programs are also described in other sections of this Catalogue.

Major-Specific and School Honors Programs

Honors programs for qualified junior- and senior-level students also are available to Drama, Music, and Art majors in the Claire Trevor School of the Arts, and to all qualified junior- and senior-level majors in the following Schools: Francisco J. Ayala School of Biological Sciences, Humanities, Donald Bren School of Information and Computer Sciences, Physical Sciences, Social Ecology, and Social Sciences; and to qualified junior- and senior-level majors in the Program in Public Health. The focal point of each of these programs is the development of analytical and research skills through the pursuit of research under faculty supervision. An honors-level thesis or creative project is required by most of the programs. CHP students are encouraged to participate in these programs as well as the Campuswide Honors Program. The honors thesis or creative project that is developed through these
programs also satisfies the CHP research and thesis requirement. Additional information is available in the specific academic unit sections of this Catalogue.

Excellence in Research Programs

The Francisco J. Ayala School of Biological Sciences and the Departments of Cognitive Sciences and of Psychology and Social Behavior offer students the opportunity to pursue research through their Excellence in Research Programs. Students work on their research projects under faculty supervision and have the opportunity to present their results to peers and faculty and, in certain instances, to have their research papers published. Additional information is available in the specific academic unit sections of this Catalogue.

Phi Beta Kappa

Founded in 1776, Phi Beta Kappa is the oldest and most respected undergraduate honor society in the United States. It supports and recognizes academic excellence and scholarly achievement in the liberal arts and sciences, and promotes the principles of freedom of inquiry and liberty of thought and expression. UC Irvine’s Phi Beta Kappa Chapter (Mu of California) was founded in 1974. Phi Beta Kappa is UCI’s most selective honor society, with only 5 percent of graduating seniors and 1 percent of juniors invited to become members each year. An annual initiation ceremony for new members is held in June. For additional information, including selection criteria, visit the Phi Beta Kappa website (http://phibetakappa.uci.edu).

Requirements for a Bachelor’s Degree

On This Page:
• Catalogue Rights
• University Requirements
• UCI Requirements
• General Education (GE) Requirement
• First-Year Integrated Program (FIP)
• School, Departmental, and Major Requirements
• Minor Programs
• Application for Graduation

There are four groups of requirements that must be met to earn a baccalaureate degree from UCI: general UC requirements; UCI requirements, including the General Education (GE) requirement; school or program requirements; and degree-specific requirements.

UC and UCI requirements are described below. School or program and major-specific requirements are described in full in the academic unit sections.

Students with identified learning and/or physical disabilities, including language-acquisition problems, are eligible to receive support through the Disability Services Center; telephone 949-824-7494 (voice), 824-6272 (TTY), email: dsc@uci.edu. Staff can assist students from the time they are admitted to UCI until they graduate.

Catalogue Rights

Students enrolled at UCI from their freshman year may elect to meet as graduation requirements (UC, UCI, school, and major): (1) those in effect at the time of entrance, or (2) those subsequently established after entrance.

A readmitted student who has not been enrolled at UCI for three or more consecutive quarters (excluding summer sessions) must adhere to the graduation requirements: (1) in effect for the quarter in which the student is readmitted; or (2) those subsequently established.

Students transferring from other collegiate institutions may elect to meet as graduation requirements either: (1) those in effect at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at UCI when the student first entered a previous, accredited collegiate institution, provided that the student has been continuously enrolled in a collegiate institution and that entry was not more than four years prior to the time of enrollment at UCI.

A transfer student who has had a break of enrollment of two consecutive semesters or three consecutive quarters (excluding summer sessions) may follow the requirements in effect at UCI: (1) at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at the time of reentry into a previous, accredited collegiate institution, provided that reentry was not more than four years prior to enrollment at UCI.

A transfer student who has been continuously enrolled in college for more than four years prior to transfer may use: (1) the requirements in effect at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at UCI four years prior to enrollment at UCI.

All students, whether enrolled at UCI from their freshman year, readmitted, or transfer, may elect to fulfill general education requirements as specified above, independent of how they choose to meet all other graduation requirements (UC, UCI [with the exception of general education], school, and major).
Students choosing to complete a minor, whether enrolled at UCI from their freshman year, readmitted, or transfer, may elect to fulfill minor requirements as specified above, independent of how they choose to meet all other graduation requirements (UC, UCI, school, and major).

Transfer students who complete one of the following options will be considered to have met the total UCI general education requirement except the upper-division writing requirement: (1) students who transfer from a four-year institution and who have completed the general education requirements of that college, upon approval of petition; (2) students who transfer from another UC campus and provide official documentation that they have met the general education requirements of that campus; (3) students who transfer from another UC campus and are in the process of completing the general education requirements of that campus, upon approval of petition, and who subsequently complete the remaining requirements of that campus at UCI; or (4) California Community College transfer students who have completed the Intersegmental General Education Transfer Curriculum. Transfer students may also elect to complete the UCI general education requirement.

University Requirements

English (UC Entry Level Writing)

Every undergraduate must demonstrate proficiency in writing. The Entry Level Writing Requirement may be satisfied before admission in any of the following ways:

1. Score 3 or higher on the College Board Advanced Placement (AP) Examination in English (Language or Literature); or
2. Score 5 or higher on the International Baccalaureate (IB) Higher Level Examination in English (Language A only), or score 6 or higher on the IB Standard Level Examination in English (Language A only); or
3. Score 680 or higher on the Writing section of the SAT, or score 30 or higher on the ACT Plus Writing test.

The UC Entry Level Writing requirement may be met after admission by one of the following options:

1. Passing the UC Analytical Writing Placement Examination given in mid-May (and on subsequent dates) to all entering freshmen admitted for fall quarter (see Placement Testing). Freshmen admitted to UC will receive detailed information in April about the exam. Freshmen students who are not California residents may take the exam in the fall after they enroll. Transfer students who have not satisfied the UC Entry Level Writing requirement should contact the UCI Composition Program Office, 420 Humanities Instructional Building; telephone 949-824-6717.
2. Prior to enrolling in the University, complete with a grade of C or better a transferable college course in English composition worth four quarter or three semester units. (Once a student enrolls at a UC campus, courses from institutions other than UC may not be used to satisfy the Entry Level Writing Requirement.) Students who meet the University’s basic requirements for minimal transfer eligibility, which include two transferable college courses in English composition, satisfy the Entry Level Writing Requirement.

NOTE: Those students who have not met the requirement before entrance must satisfy the requirement before the beginning of their fourth quarter at UCI. Students who have not satisfied the requirement by that time will be ineligible to enroll for a fourth quarter.

The UC Entry Level Writing requirement may be met after enrollment by one of the following options:

1. Enrolling in Humanities Core writing courses designated “ES.” (NOTE: Students held for UC Entry Level Writing and enrolled in the Humanities Core must enroll in an ES section of the Humanities Core during their first quarter. Successful completion of these writing courses with a letter grade of C or better will satisfy the requirement. Students who do not receive a letter grade of C or better in HUMAN 1AES during the fall quarter and who continue to be held for UC Entry Level Writing must enroll in HUMAN 1BES during the winter quarter and satisfy the requirement by earning a letter grade of C or better.)
2. Taking either WRITING 37 or WRITING 39A and receiving a letter grade of C or better in the course.

Students enrolled in Essentials of Academic Writing (AC ENG 20A, AC ENG 20B, AC ENG 20C, AC ENG 20D) must enroll in WRITING 39A immediately after they are authorized to do so by the Academic English/English as a Second Language Program. Students with a score of 2, 3, or 4 from the UC Analytical Writing Placement Examination are also required to enroll in WRITING 39A; some students with these scores may be required to take the Academic English Placement Test before enrolling in WRITING 39A.

The Pass/Not Pass grade option may not be used to satisfy the UC Entry Level Writing requirement.

Students enrolled at UCI may take only UCI courses to satisfy the UC Entry Level Writing requirement. Continuing UCI students may not take summer courses at another institution to satisfy this requirement.

American History and Institutions

This requirement may be met by one of the following options:

1. Completion in an accredited high school of a one-year course in United States history with a grade of C or better, or a half-year course in United States history and a half-year course in American government with grades of C or better; or
2. Achieving a score of 3, 4, or 5 on the College Board Advanced Placement Examination in United States History; or
3. Achieving a score of 550 or better on the SAT Subject Test in United States history; or
4. Presentation of a certificate of completion of the requirement at another California institution; or
5. Completion at UCI or another U.S. institution of one year of college-level United States history with grades of C or better, or one course in United States history and one in United States government with grades of C or better. Acceptable UCI courses: United States history—HISTORY 40A, HISTORY 40B, HISTORY 40C; United States government—POL SCI 21A.

UCI Requirements

Unit Requirement
Credit for a minimum of 180 quarter units, earned by examination, by other evaluation, or course work is required. A course normally offers four quarter units of credit.

Grade Requirement
A minimum grade average of at least C (2.0) is required (1) overall, (2) in all of the courses required for the major program, and (3) in the upper-division courses required for the major program. Higher averages than this may be required only in honors programs. Students who fail to attain a C (2.0) average in courses required in the major program may, at the option of the major unit, be denied the privilege of pursuing a major program in that unit. In this context, “the courses required in the major program” are defined as the courses required for the major and offered by the program of the student’s major (or programs, in the case of an interdisciplinary or interdepartmental major). A major can include additional courses required for the major in this set, with the approval of the Council on Education Policy. In this case, the list of additional courses is published in the Catalogue with the requirements for the major.

Residence Requirement
At least 36 of the final 45 units completed by a student for the bachelor’s degree must be earned in residence at the UCI campus. Exceptions to this rule may be allowed, with prior departmental approval, to students enrolled in the Education Abroad Program, the UCDC Academic Internship Program, the UC Center Sacramento Scholar Intern Program, or the International Opportunities Program with International Study Advance Contract.

General Education (GE) Requirement
UCI is committed to the values of a liberal education. One component of that commitment is the requirement that all undergraduates complete a set of general education (GE) requirements. General education courses introduce students to a range of ideas and intellectual activities that engage UCI scholars, providing both scope and balance to a University degree beyond the study of a specific major.

The general education requirements are intended to help undergraduates place the specialized study undertaken in the major within a broader context. They are designed to cultivate the skills, knowledge, and understanding that will make students effective contributors to society and the world. The general education requirements should enable UCI undergraduates to apply the abilities developed in their studies to identify significant issues, gather and evaluate available evidence, analyze alternatives, reach conclusions, communicate the results effectively, and take considered actions.

The general education requirement is a graduation requirement and, with the exception of the lower-division writing requirement, need not be satisfied during only the lower-division years. To satisfy the general education requirement, courses are required in each of the following categories:

I. Writing (two lower-division plus one upper-division course)
II. Science and Technology (three courses)
III. Social and Behavioral Sciences (three courses)
IV. Arts and Humanities (three courses)
V. Quantitative, Symbolic, and Computational Reasoning, with subcategories Va and Vb (three courses that may also satisfy another GE category)
VI. Language Other Than English (one course)
VII. Multicultural Studies (one course that may also satisfy another GE category)
VIII. International/Global Issues (one course that may also satisfy another GE category)

The specific courses in each area that students may use to satisfy the requirements are listed below. When a general education course is cross-listed with another course, that course also is available for fulfillment of the requirement. Students should refer to the Catalogue descriptions of the courses to determine which are cross-listed.

A course qualifies for a particular GE category based on its content rather than on the academic unit that offers it. However, to increase students’ exposure to a variety of disciplinary approaches, students are encouraged to choose GE courses from a wide range of schools and departments outside of the student’s major.
NOTE: The following list of courses approved for GE is effective for the 2016-17 academic year only. Because changes occur each year, students should consult the GE list annually to ensure that the courses they enroll in are on the list. GE credit is awarded for a course only if it appears on the list during the academic year when it is taken. To check the GE course offerings in a particular quarter, consult the Schedule of Classes on the University Registrar’s website (http://www.reg.uci.edu/).

General Education Categories

I. Writing

Because of the importance of visual, oral, electronic, and written communication in every academic discipline, in the professions, and in public life, the University is committed to developing a variety of communication abilities in students at all levels and in all areas. The Writing Requirement expresses this broad commitment, but the concern for and attention to rhetorically effective, accurate writing is expected in all courses.

The Writing Requirement consists of two courses at the lower-division level beyond the UC Entry Level Writing requirement and one upper-division course in a discipline.

Except where otherwise noted below, students must satisfy the UC Entry Level Writing requirement prior to fulfilling the UCI writing requirement.

Students who have not completed the lower-division writing requirement before the beginning of their seventh quarter at UCI will be subject to probation.

Students transferring to UCI normally should have satisfied the lower-division writing requirement before entering UCI; if, however, they have not, they must complete it within their first three quarters of enrollment or they will be subject to probation. Academic English/English as a Second Language students must complete the lower-division writing requirement before the beginning of the seventh quarter following the completion of their AE/ESL courses or they will be subject to probation.

The third course must be an upper-division writing course, and it must be taken only after the successful completion of the lower-division requirement.

Students enrolled at UCI may take only UCI courses in satisfaction of the lower-division and upper-division writing requirements. Continuing UCI students may not take summer courses at another institution to satisfy lower-division or upper-division writing requirements.

After completing this GE requirement, successful students should be able to do the following:

Lower-division writing
- demonstrate rhetorically effective, accurate academic writing and communication across a variety of contexts, purposes, audiences, and media using appropriate stance, genre, style, and organization;
- develop flexible strategies for generating, revising, editing, and proofreading texts;
- develop abilities in critical reading across a variety of genres and media;
- and demonstrate information literacy skills by locating, evaluating, and integrating information gathered from multiple sources into a research project.

Upper-division writing
- demonstrate rhetorically effective, discipline-specific writing for appropriate academic, professional, and public audiences;
- demonstrate, at an advanced level of competence, use of discipline-specific research methods, genres, modes of development, and formal conventions;
- and demonstrate advanced information literacy skills by locating, evaluating, and integrating information gathered from multiple sources into discipline-specific writing.

Ia. Lower-Division Requirement

The two courses taken to fulfill the lower-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). Students may select from the courses specified below:

1. WRITING 39B Critical Reading and Rhetoric and WRITING 39C Argument and Research.
2. WRITING 37 Intensive Writing and WRITING 39C Argument and Research. Recommended students only.
3. Completion of the writing component of Humanities Core with a grade of C or better in (HUMAN 1AS or HUMAN H1AS or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES), and in HUMAN 1CS or HUMAN H1CS.
4. Students who complete WRITING 37 or WRITING 39B with a grade of B (3.0) or better may substitute as the second course of the lower-division writing requirement one of the following courses in creative writing: WRITING 30 or WRITING 31.
5. WRITING 39B and completion of a First-Year Integrated Program (FIP) sequence, with a grade of C (or Pass) or better in the third quarter of the sequence.

Ib. Upper-Division Requirement

The two courses taken to fulfill the upper-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). Students may select from the courses specified below:

1. WRITING 39B Critical Reading and Rhetoric and WRITING 39C Argument and Research.
2. WRITING 37 Intensive Writing and WRITING 39C Argument and Research: Recommended students only.
3. Completion of the writing component of Humanities Core with a grade of C or better in (HUMAN 1AS or HUMAN H1AS or HUMAN 1BS or HUMAN H1BS or HUMAN 1BES), and in HUMAN 1CS or HUMAN H1CS.
4. Students who complete WRITING 37 or WRITING 39B with a grade of B (3.0) or better may substitute as the second course of the lower-division writing requirement one of the following courses in creative writing: WRITING 30 or WRITING 31.
5. WRITING 39B and completion of a First-Year Integrated Program (FIP) sequence, with a grade of C (or Pass) or better in the third quarter of the sequence.

Il. Upper-Division Requirement

The course taken to fulfill the upper-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). The requirement may be satisfied by completing one of the following options:

1. An upper-division course designated on a list of approved courses in the quarterly Schedule of Classes on the University Registrar’s website (http://www.reg.uci.edu/). NOTE: All courses approved to fulfill the upper-division writing requirement should have a “W” suffix. Students are encouraged
to consult the Schedule of Classes or their advisor to determine the current upper-division writing requirement course offerings. If a course on the approved list is offered without the “W” suffix, it does not satisfy the upper-division writing requirement.

2. Majors in the School of Biological Sciences, Physics majors, and Pharmaceutical Sciences majors satisfy the upper-division writing requirement in the manner specified in those academic unit sections of the Catalogue.

Students who fail to attain the required grades in the courses taken in fulfillment of the writing requirement should refer to the Academic Regulations and Procedures section for further information.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

- WRITING 101W: Undergraduate Seminar: Applications in Literary Theory and Criticism for Creative Writing
- WRITING 139W: Advanced Expository Writing
- WRITING 179W: Advanced Composition for Teachers
II. Science and Technology

Understanding the nature of scientific inquiry and the operation of the biological, physical, and technological world is essential for making personal and public policy decisions in a technological society.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate a broad understanding of the fundamental laws of science, the principles underlying the design and operation of technology, and the interrelations among science and technology disciplines;
- demonstrate a broad understanding of various natural phenomena that surround and influence our lives;
- describe how scientists approach and solve problems;
- solve problems and draw conclusions based on scientific information and models, using critical thinking and qualitative and quantitative analysis of data and concepts;
- and explain the scope and limitations of scientific inquiry and the scientific method.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

Students must complete three courses from the following list:

### Biological Sciences (BIO SCI)

- PHYSICS 14: Energy and the Environment
- PHYSICS 15: Physics of Music
- PHYSICS 17: Physics of Athletics
- PHYSICS 18: How Things Work
- PHYSICS 20A: Introduction to Astronomy
- PHYSICS 20B: Cosmology: Humanity's Place in the Universe
- PHYSICS 20C: Observational Astronomy
- PHYSICS 20D: Space Science
- PHYSICS 20E: Life in the Universe
- PHYSICS 21: Special Topics in Physics
- PHYSICS H80: Impact of World War I on Science
- PHYSICS H90: The Idiom and Practice of Science

### Public Health (PUBHLTH)

- PUBHLTH 30: Human Environments
- PUBHLTH 60: Environmental Quality and Health
- PUBHLTH 80: AIDS Fundamentals
- PUBHLTH 90: Natural Disasters

### Social Science (SOC SCI)

- SOC SCI 11A: Barter to Bitcoin: Society, Technology and the Future of Money

### University Studies (UNI STU)

- UNI STU 13A: Introduction to Global Sustainability I
- UNI STU 13B: Introduction to Global Sustainability II
- UNI STU 17C: Water III

### III. Social and Behavioral Sciences

Courses will focus on principles, sources, and interpretations of human behavior and on how people organize, govern, understand, and explain social life. This category includes the analysis of human behavior at all levels, from the individual to collective social, economic, and political life, and on the scientific methods used in the acquisition of knowledge and the testing of competing theories.

After completing this GE requirement, successful students should be able to do the following:
• demonstrate knowledge and understanding of principles, sources, and interpretations of human behavior and how people organize, govern, understand, and explain social life;
• demonstrate an understanding of contemporary and historical perspectives on human behavior;
• understand and explain the scientific methods used in the acquisition of knowledge and the testing of competing theories in the social and behavioral sciences;
• and critically evaluate methods, findings, and conclusions in the research literature on human behavior.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

Students must complete three courses from the following list:

### III. Social and Behavioral Sciences

#### African American Studies (AFAM)
- AFAM 40A: African American Studies I
- AFAM 40B: African American Studies II
- AFAM 40C: African American Studies III

#### Anthropology (ANTHRO)
- ANTHRO 2A: Introduction to Sociocultural Anthropology
- ANTHRO 2B: Introduction to Biological Anthropology
- ANTHRO 2C: Introduction to Archaeology
- ANTHRO 2D: Introduction to Language and Culture
- ANTHRO 41A: Global Cultures and Society
- ANTHRO 125C: Environmental Anthropology

#### Art (ART)
- ART 12C: Intelligences of Arts

#### Asian American Studies (ASIANAM)
- ASIANAM 50: Asian American Histories
- ASIANAM 51: The U.S. and Asia
- ASIANAM 52: Asian American Communities
- ASIANAM 53: Asian Americans and Comparative Race Relations

#### Chicano/Latino Studies (CHC/LAT)
- CHC/LAT 61: Introduction to Chicano/Latino Studies I
- CHC/LAT 62: Introduction to Chicano/Latino Studies II
- CHC/LAT 63: Introduction to Chicano/Latino Studies III
- CHC/LAT 64: Introduction to Race and Ethnicity in Political Science
- CHC/LAT 66: Anthropology of Food
- CHC/LAT H80: Latina/o Childhoods: Comparative Approaches to the Study of Children and Youth

#### Criminology, Law and Society (CRM/LAW)
- CRM/LAW C7: Introduction to Criminology, Law and Society
- CRM/LAW C10: Fundamentals of Criminology, Law and Society
- CRM/LAW C40: Forms of Criminal Behavior

#### Economics (ECON)
- ECON 1: Introduction to Economics
- ECON 11: The Internet and Public Policy
- ECON 13: Global Economy
- ECON 17: An Economic Approach to Religion
- ECON 20A: Basic Economics I
- ECON 20B: Basic Economics II
- ECON 23: Basic Economics for Engineers

#### Education (EDUC)
- EDUC 10: Educational Research Design
- EDUC 30: 21st Century Literacies
- EDUC 40: Theories of Development and Learning Applied to Education

IV. Arts and Humanities

Study of the Arts and Humanities expands the student’s sense of diverse forms of cultural expression, past and present. Students develop their critical capacity as they discover how meaning is created and experience variously interpreted.

After completing this GE requirement, successful students should be able to do the following:

• demonstrate knowledge and understanding of how visual and verbal communication is used in literature and film, art and music, and philosophy and history;
• communicate an understanding and appreciation of diverse forms of cultural expression, past and present;
• understand and explain the research methods used in the acquisition of knowledge and the testing of competing theories in the arts and humanities;
• and think critically about how meaning is created and how experience is variously interpreted.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

Students must complete three courses from the following list:

V. Quantitative, Symbolic, and Computational Reasoning

This category consists of two subcategories. Students are required to take one course in each of the subcategories and an additional course from either subcategory, for a total of three courses. A course approved for the GE requirement in category V and also approved for the GE requirement in a category other than V may be used to satisfy the requirements of both categories simultaneously. However, courses approved for both subcategories in category V may only be used once to satisfy one of the subcategories. The two subcategories are indicated as Va and Vb.

Va. Quantitative Literacy

Courses in this category focus on the quantitative description, evaluation, and assessment of events occurring in nature or in human social and political systems. This includes quantitative measurements made or data collected to study such events, analysis of the data, and implications of the analysis for our understanding of the events.

After taking a course in category Va, successful students will be able to do all of the following:

- identify appropriate tools for quantitative analysis of processes or events;
- have a basic familiarity with fundamental principles underlying quantitative descriptions of natural or social processes;
- and be able to do one or more of the following:
  - evaluate studies and reports that assess risk and probability in everyday life;
  - use models of natural phenomena to make quantitative predictions of future behavior or events;
  - use models of economic and social structures to make quantitative predictions of future behavior or events.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

Vb. Formal Reasoning

Courses in this category focus on aspects of formal reasoning including symbolic logic, mathematical modeling, and algorithmic reasoning.

After taking a course in category Vb, successful students will be able to do all of the following:

- understand the concept and purpose of formal languages such as propositional and first-order logic, simple programming languages, mathematical models or linguistic formalisms;
- possess an elementary grasp of the power and limits of formal methods; and be able to do one or both of the following:
  - apply formal tools of logic or mathematics to the analysis and evaluation of everyday and/or scientific arguments, texts, and communicative situations;
  - apply basic algorithms for the generation of logical deductions, linguistic structures, or computational processes.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

VI. Language Other Than English
Study of a language other than English expands students' horizons by encouraging understanding of another culture through its language and heightens awareness of one's own language through the investigation of another linguistic system.

After completing this GE requirement, successful students should be able to do the following:

• demonstrate competency in reading, writing, speaking, and listening in a non-English language;
• demonstrate an understanding of another (non-English speaking) culture through its language;
• and demonstrate an understanding of one's own language through the investigation of another, non-English linguistic system.

Students must demonstrate competency in a language other than English (includes American Sign Language) by completing one of the following six options:

• College-level course work equivalent to UCI's third quarter of study in a language other than English. UCI courses approved to satisfy this requirement are:

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

For information on UCI's prerequisites, course placement policies, and the grade required to advance to the next level of instruction, consult the School of Humanities (Language Other Than English Placement and Progression) section in this Catalogue.

- Credit for three years of high school study or its equivalent in a single language other than English with a C average or better in the third year.
- A score of 3, 4, or 5 on a College Board Advanced Placement Examination in a language other than English. NOTE: Students who earn a 3, 4, or 5 on the AP Chinese Examination must take the UCI Chinese placement examination to determine course credit.
• A score of 570 or better on a College Board SAT Subject Test in a language other than English, with the exception of the test in Modern Hebrew for which a score of 500 or better is required.
• Completion of an approved course of study through the UC Education Abroad Program (EAP). Careful planning is required to ensure that this requirement is fulfilled. Check with an EAP counselor at the Study Abroad Center to determine the programs in countries that fulfill this requirement.
• The equivalent as determined by an appropriate and available means of evaluation. For information on availability of such examinations and testing schedules, consult the Academic Testing Center, 949-824-6207. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, of one year of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English will meet the requirement. Appropriate documentation must be presented to substantiate that the course work was completed.

VII. Multicultural Studies

This requirement develops students’ awareness and appreciation of the history, society, and/or culture of one or more underrepresented groups in California and the United States.

After completing this GE requirement, successful students should be able to do one of the following:

• demonstrate knowledge of one or more historically underrepresented groups’ culture, history, and development in California and the United States;
• demonstrate an awareness and appreciation of cultural differences and inequities;
• and demonstrate an understanding that cooperation and mutual understanding among all cultural groups is needed to interact successfully in a culturally diverse society.

Students must complete one course from the following list. In fulfilling category VII, students are encouraged to use courses that are also being used in fulfillment of other GE categories. For example, HUMAN 1C simultaneously satisfies category VII and a portion of category IV.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

VIII. International/Global Issues

Courses in this category focus on significant cultural, economic, geographical, historical, political, and/or sociological aspects of one or more countries other than the United States.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate specific knowledge of the cultural, historical, social, economic, scientific, and political aspects of one or more foreign countries, and the connections among these aspects;
- develop a broader understanding of the formation of different cultures and countries through the world;
- and be prepared to engage in positive interaction with peoples of different cultures and nationalities.

Students must complete one course from the following list. In fulfilling category VIII, students are encouraged to use courses that are also being used in fulfillment of other GE categories. In addition, category VIII may be satisfied by one quarter’s participation in the UC Education Abroad Program (EAP) or one quarter’s participation in an International Opportunities Program (IOP) with an approved IOP Credit Contract. Summer study abroad on an EAP or IOP (with approved IOP Credit Contract) satisfies this requirement when the program is at least five weeks long and the student completes at least one course worth at least four quarter units.

Courses with an asterisk (*) can meet one or more GE requirement. Click on the course for more information.

Or, students may complete one of the following fourth-quarter language options:

1. Credit for four years of high school study or its equivalent in a single language other than English with a C average or better in the fourth year.
2. A score of 4 or 5 on a College Board Advanced Placement Examination in a language other than English. NOTE: Students who earn a 3, 4, or 5 on the AP Chinese Examination must take the UCI Chinese placement examination to determine course credit.
3. A score of 620 or better on a College Board SAT Subject Test in a language other than English, with the exception of the test in Modern Hebrew for which a score of 540 or better is required.
4. The equivalent as determined by an appropriate and available means of evaluation. For information on availability of such examinations and testing schedules, consult the Academic Testing Center, 949-824-6207. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, of two years of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English will meet the requirement. Appropriate documentation must be presented to substantiate that the course work was completed.

First-Year Integrated Program (FIP)

University Studies 13–17 are three-quarter multidisciplinary sequences for freshmen or lower-division students only. These integrated courses are designed to introduce students to the ways different disciplines approach similar problems and to provide a freshman learning community experience. Successful completion of all three quarters will satisfy several courses toward partial fulfillment of different general education (GE) requirement categories. Additional information is available in the First-Year Integrated Program section of this Catalogue.

School, Departmental, and Major Requirements

In addition to the University and UCI requirements listed above, each undergraduate student must satisfy the degree requirements for the major and, if applicable, the minor or concentration selected. UCI, school, and departmental or major and minor requirements may overlap; courses taken to fulfill a school or departmental requirement may also help fulfill the UCI general education requirement. Students are urged to make sure that they understand how many courses are permitted to satisfy more than one requirement. Information on specific degree requirements and courses is available in the academic unit sections of this Catalogue.

Students must declare a major by the time they reach junior status (90 units excluding college work completed prior to high school graduation), and should make certain that the background and the preparation prerequisite to junior and senior work in the major have been accomplished. Transfer students should read the section on Information for Transfer Students: Filling Requirements for a Bachelor's Degree.

Students should note that with the exception of courses designated Pass/Not Pass Only, courses taken Pass/Not Pass may not be used to satisfy specific course requirements of the student's school and major, unless authorized by the appropriate dean. Additional information on grading is located in the Academic Regulations and Procedures section.

Minor Programs

For certification in a minor, a student must obtain a minimum overall grade point average of at least C (2.0) in all courses required for the minor program. No more than two courses applied to a minor may be taken Pass/Not Pass. Completion of the minor is noted on a student's transcript. (Students are not required to minor in a program in order to graduate from UCI.)

Application for Graduation

In order to receive a degree, an undergraduate student must submit an online Application for Graduation via the Student Access link at the University Registrar's Office website (http://www.reg.uci.edu) no later than the published deadline. Specific deadline dates for filing are established quarterly so that candidates' academic records can be reviewed to verify that all graduation requirements have been met. These dates vary among academic units. Students should contact their academic counseling office for deadline and degree audit information.
Information for Transfer Students: Fulfilling Requirements for a Bachelor’s Degree

On This Page:

• Transfer Students: Completion of the UCI General Education Requirement
• Intersegmental General Education Transfer Curriculum
• Transferability of Credit
  • Unit Credit for Work Taken Elsewhere
  • Limitations on Transfer Credit
• Community Colleges
• Four-Year Institutions
• University of California Extension
• Course Credit for Work Taken Elsewhere

This section provides a guide for transfer students in understanding how their coursework from another collegiate institution applies to fulfilling UCI degree requirements. Transfer students should use this information in conjunction with the Requirements for a Bachelor’s Degree. Transfer students are required to meet University, general education, school, department, and major requirements described in the Catalogue. The courses and descriptions in this Catalogue may be used by prospective transfer students as a guide for selecting courses of similar content and purpose in their own institutions. No student who has taken a course which is accepted for credit by the Office of Admissions and Relations with Schools (OARS) and which has been mutually determined with a community college as being acceptable toward completion of the UCI general education requirement shall incur any loss of credit in satisfaction of the requirement.

Transfer students are strongly advised to check with the academic counselor in their prospective major or the UCI Office of Admissions and Relations with Schools about courses that may be used to satisfy UCI requirements.

Transfer Students: Completion of the UCI General Education Requirement

Students transferring to UCI must satisfy the UCI general education (GE) requirement by completing either:

1. The current UCI GE requirement;
2. one of the options listed in the Catalogue Rights section; or
3. the Intersegmental General Education Transfer Curriculum.

Transfer students should not feel that the UCI GE requirement must be completed prior to matriculating to UCI. The GE requirement, which must be completed prior to graduation, may be satisfied by college-level courses appropriate to UCI offerings and may be met at any time during the undergraduate years, except in the case of the lower-division writing requirement, which must be completed within the first three quarters of residency at UCI.

NOTE: Transfer students should be aware that UCI is on the quarter system. For the purpose of counting courses for the UCI GE requirement, one semester course is equivalent to one quarter course, and two semester courses are equivalent to three quarter courses.

Intersegmental General Education Transfer Curriculum

California Community College transfer students may receive credit for the UCI GE requirement by completing the Intersegmental General Education Transfer Curriculum (IGETC). The IGETC consists of a series of subject areas and types of courses which will satisfy the general education requirements at any campus of the University of California. Fulfillment of the IGETC does not satisfy the UCI upper-division writing requirement.

Students who do not complete IGETC prior to transfer may be eligible for partial certification from their community college. Partial certification is defined as completing all but two (2) courses on the IGETC pattern. Warning: Students need to meet minimum UC transfer admission requirements. Therefore, partial certification that acknowledges a deficiency in Area 1 and/or Area 2 may also indicate a student does not meet minimum transfer requirements.

Please note:

1. IGETC must be completed in total or partial IGETC certification must be completed prior to enrolling at UCI;
2. students are responsible for requesting IGETC certification from their community college; and
3. the IGETC certification should be submitted to the UCI Office of Admissions and Relations with Schools no later than the end of the first quarter of UCI enrollment.

Courses used to fulfill the IGETC must be completed with a grade of C or better. (Courses may also be taken on a Pass/No Pass basis provided Pass is equal to a letter grade of C or better.)
Lists of specific approved courses which may be taken in fulfillment of the IGETC are available from California Community Colleges and at the ASSIST website (http://www.assist.org/web-assist/welcome.html).

Intersegmental General Education Transfer Curriculum

Area 1. English Communication: One course in English composition and one course in critical thinking/English composition.

Area 2. Mathematical Concepts and Quantitative Reasoning: One course in mathematics or mathematical statistics which has a prerequisite of intermediate algebra.

Area 3. Arts and Humanities: At least three courses with at least one from the arts and one from the humanities.

Area 4. Social and Behavioral Sciences: At least three courses from at least two different disciplines.

Area 5. Physical and Biological Sciences: At least two courses, with one from the physical sciences and one from the biological sciences; one course must include a laboratory.

Area 6. Language Other Than English: Proficiency equivalent to two years of high school courses in the same language.

Transferability of Credit

The University is committed to serve as fully as possible the educational needs of students who transfer from other California collegiate institutions. The principles covering transferability of unit credit and course credit are explained below and, unless otherwise indicated, are much the same whether transfer is from a two-year or a four-year institution.

Duplicate Credit is Prohibited. Students may not receive unit credit or earn grade points for college courses in which the content duplicates material of a previously completed course or examination for which the student has been granted college credit. Exceptions related to Advanced Placement and International Baccalaureate credit and repeat of deficient grades can be found in their respective sections.

Unit Credit for Work Taken Elsewhere

The University of California grants unit credit for courses completed at other accredited colleges and universities when such courses are consistent with the functions of the University as set forth in the Master Plan for Higher Education in California. Equivalent advanced standing credit from institutions on the semester calendar may be determined at a ratio of one semester unit to one and one-half quarter units. (To graduate from UCI a minimum of 180 quarter units, equivalent to approximately 45 UCI quarter courses, are needed.)

Limitations on Transfer Credit

Students will be granted up to 70 semester/105 quarter units of credit for lower-division coursework completed at any institution or combination of institutions. For units beyond the maximum, subject credit for appropriate coursework taken in excess of this unit limitation will be granted and may be used to satisfy requirements.

Please note:

1. Units earned through Advanced Placement, International Baccalaureate, and/or A-Level examinations are not included in the limitation and do not put applicants at risk of being denied admission.

2. Lower- or upper-division units earned at any University of California campus (including regular academic year enrollment, summer session enrollment, extension courses, cross/concurrent enrollment, and the UC Education Abroad Program) are not included in the limitation, but are added to the maximum transfer credit allowed. Excessive units may put applicants at risk of being denied admission.

In addition, there is a limit to the number of units for which UC grants credit in the following areas:

- English as a Second Language courses: a maximum of 8 semester (12 quarter) units
- Physical Education activity courses: a maximum of 4 semester (6 quarter) units

Community Colleges

Students anticipating transfer to UCI are urged to consult with their community college counselors. The counselors, with the aid of that college’s UC Transfer Course Agreement (UCTCA), can advise students about California Community College courses and units which will transfer to the University. In addition, staff in the UCI Office of Admissions and Relations with Schools can advise students about the transferability of courses. UCTCAs for all California Community Colleges are available at the ASSIST (http://www.assist.org) website (http://www.assist.org).

Four-Year Institutions

Unit credit is granted for courses consistent with the University of California’s functions and which have been completed in colleges or universities accredited by the appropriate agencies. Limitations of credit may be imposed in certain subject areas. No defined maximum number of units which can be earned toward the degree is set for students transferring from four-year institutions. However, see the Residence Requirement in the UCI Requirements section.
University of California Extension

Extension courses prefixed by XB, XD, XI, XR, XSB, and XSD are granted unit credit on the same basis as courses taken in residence at any accredited collegiate institution.

Students intending to transfer Extension course credit for a degree at another college or university should verify acceptance of the course with that institution. Resident students of the University of California must obtain the consent of the dean of their school or college prior to enrolling for credit in an Extension course. Extension courses are not accepted as part of the residence requirements of the University. Grades earned at University Extension may, though not in all instances, be calculated as part of the University GPA.

Decisions regarding the acceptability of extension courses taken in institutions other than the University of California rest with the UCI Office of Admissions and Relations with Schools. Decisions regarding the applicability of such courses toward specific degrees and majors rest with the student’s academic dean.

Course Credit for Work Taken Elsewhere

The policies above refer only to the unit transferability of courses and are uniformly implemented on all UC campuses. Thus, courses which are determined by the University of California to be transferable are assured only of being granted elective course credit. The application of transfer work to specific course and major requirements is determined by the student’s academic dean.

The Irvine campus makes every effort to eliminate all barriers to orderly progress from California Community Colleges into UCI’s programs. To this end, courses from many California Community Colleges have been reviewed by UCI faculty and approved as acceptable toward meeting lower-division major or general education requirements. Although course equivalencies for the general education requirement may be liberally interpreted for purposes of transfer, courses to be applied toward school and departmental major requirements must be more precisely equated with UCI courses in unit value and in content.

All California Community Colleges have entered into articulation agreements with UCI so that the specific application of their courses to UCI’s general education, school, and/or departmental major requirements may be readily communicated to prospective transfer students. By careful selection of courses, it is possible for students to satisfy some or all of the lower-division requirements of their intended program or school prior to transfer. It is recommended that transfer students complete as much of the lower-division general education, school, and major requirements as possible prior to transferring to UCI. Articulation agreements are available at the ASSIST website. (http://www.assist.org/web-assist/welcome.html)

Students are urged to consult community college counselors or the UCI Office of Admissions and Relations with Schools for information on planning a program for transfer. Prospective transfer students with specific questions about coursework in their major should contact the respective school or department at UCI.

Registration and Other Procedures

On This Page:

- Schedule of Classes and Registration Information
- Registration Procedures
  - Enrolling in Classes
  - Payment of Tuition and Fees
  - Late Registration
  - Change of Class Enrollment
  - Withdrawal from the University
  - Lapse of Status
  - Enrollment at Other Institutions
  - Enrollment in UC Irvine Extension
- Change of Major
- Transcripts and Verifications
  - Retention of Student Records
  - Transcript of Records
  - Verification of Student Status
- Readmission
  - Undergraduate Student Readmission
  - Graduate Student Readmission
- Commencement
Except where noted, all information applies to both undergraduate and graduate students. Additional information concerning registration and academic policies applying only to graduate students is presented in the Graduate Division section of the Catalogue.

Schedule of Classes and Registration Information

The Schedule of Classes contains current class offerings including time, room, instructor, capacity, number of enrolled students, number of students on the waitlist, Web links, status (open, waitlisted, full), and more. Access the Schedule of Classes on the University Registrar's website (http://www.reg.uci.edu). The Schedule of Classes is available just prior to the beginning of each quarter's registration period (six weeks before the end of the current quarter).

The University Registrar's website (http://www.reg.uci.edu) also includes registration and related information such as quarterly academic calendars, final examination schedules, and the Academic Honesty policy. The University Registrar's website (http://www.reg.uci.edu) is the most timely source of information on new or changed policies, procedures, tuition and fees that could not be included in the Catalogue because of the latter's annual publication schedule.

Registration Procedures

To receive academic credit for regular courses and other supervised instruction or research, a student must be officially registered prior to undertaking such activities. The registration process consists of two steps: payment of tuition and fees, and enrollment in classes.

A Quarterly Academic Calendar of dates for enrollment and payment of tuition and fees is available on the University Registrar's website (http://www.reg.uci.edu).

The general procedures for registration are:

1. Consult the appropriate academic advisor to develop an approved program of study. Secure necessary authorizations for courses that require special approval. New undergraduate students entering in the fall should attend one of the Student-Parent Orientation Program (SPOP) (http://www.orientation.uci.edu/schedules.php?type=spop) sessions during the summer for academic advising and enrollment.
2. Enroll in classes during the published registration period.
3. Pay required tuition and fees online or to the Central Cashier on or before the published deadline. Other outstanding obligations must be satisfied at this time also.

Enrolling in Classes

Using WebReg, students may add and drop classes, inquire about open sections, change their grading option or unit value for a variable unit course, put themselves on an official waiting list, and list their confirmed class schedule. Immediate feedback on the availability of a class and a student's eligibility to enroll is provided. This includes course restrictions that may be placed or removed at any time throughout the enrollment periods by the department offering the course. Complete information about WebReg is available on the University Registrar’s website (http://www.reg.uci.edu).

Students must enroll in classes before the end of the second week of instruction. Students enrolled in zero (0) units at the close of business at the end of the second week of instruction are assessed a $50 late enrollment charge.

Payment of Tuition and Fees

Tuition and fees are assessed quarterly and appear on ZOT Account Online (https://zotaccount.uci.edu). Students who do not pay all required tuition and fees online or to the Central Cashier by the published fee payment deadline are subject to a $50 late payment charge.

Late Registration

The student is subject to both late charges if tuition and fees are not paid online or to the Central Cashier and the student does not enroll in classes by the registration deadlines, published in the Quarterly Academic Calendar on the University Registrar’s website (http://www.reg.uci.edu).

Students who have not paid tuition and fees and/or have not enrolled in classes by 4 p.m. at the end of the third week of instruction will lose their student status. Visit the University Registrar’s website (http://www.reg.uci.edu) for more information on the loss of student status.

To avoid the expense and inconvenience of late registration, students are urged to enroll and pay tuition and fees well before the published registration deadlines. Students with financial need should make advance arrangements with the Office of Financial Aid and Scholarships, or another source, to have funds available when tuition and fees are due.

Late registration (payment of tuition and fees and/or enrollment in classes) is permitted only in exceptional circumstances with the authorization of the student’s dean. A student who is allowed to apply late and, as a result, must pay tuition and fees and enroll late, is required to pay both late charges.

Change of Class Enrollment

Once instruction begins, a student may add or drop classes, change the unit value of a variable unit course, or change the grading option via WebReg. Generally, an undergraduate student may not enroll in more than 20 units or fewer than 12 units of course work during a given quarter without the permission of the student’s academic dean or, for undecided/undeclared students, the Dean of the Division of Undergraduate Education. However,
during initial enrollment, undergraduate enrollment will be limited to 18 units. The maximum returns to 20 units during Open Enrollment. Changes to Pass/Not Pass grading must not cause the student to exceed the limitations to Pass/Not Pass enrollment. See the Pass/Not Pass section.

Graduate students may not enroll in more than 16 or fewer than eight units of graduate or upper-division credit without prior approval of the departmental graduate advisor.

Students may add courses through the end of the second week of instruction via WebReg. After the second week of instruction, an Enrollment Exception request is required.

Students may drop courses through the end of the second week of instruction via WebReg. After the second week of instruction through the end of the sixth week of instruction, an Enrollment Exception request is required.

Beginning the seventh week of instruction through the end of instruction, withdrawing from a course will result in the student receiving a W grade. W grades carry no grade points and are not calculated in the UC GPA.

Students may change the grading option and/or unit value of a course through the end of the second week of instruction via WebReg. After the second week of instruction through the end of the sixth week of instruction, an Enrollment Exception request is required.

An Enrollment Exception request requires the authorization of the dean or equivalent of the school or academic unit offering the course and the dean or equivalent of the student’s major. The authorization of the instructor may also be required when adding a course or changing the unit value of a variable unit course. Detailed information on Enrollment Exception requests is available on the University Registrar’s website (http://www.reg.uci.edu).

Individual courses may occasionally have unique deadlines due to course impaction or instructional needs. Students should refer to the Schedule of Classes for information on specific courses.

Students are responsible for their enrollments. They must officially drop or withdraw from classes they have ceased attending. Students cannot simply discontinue attendance in a class. Adds, withdrawals, and changes to class enrollment are not permitted after the last day of instruction.

Withdrawal from the University

Undergraduate students who pay tuition and fees for a regular academic quarter and then decide to withdraw from the University must submit a Withdrawal form to the University Registrar’s Office after obtaining the signatures of their academic dean (or the Dean of the Division of Undergraduate Education, for undecided/undeclared students). Medical students must submit the form to the Curricular Affairs Office in the School of Medicine. Law students must visit the School of Law Registrar’s Office to obtain and submit the withdrawal form. This form serves two purposes: (1) a refund of tuition and fees, if applicable (see the Tuition and Fee Refund section); and (2) automatic withdrawal from classes.

The effective date of withdrawal is used in determining the percentage of tuition and fees to be refunded. This date is normally the date that the student submits the form to the appropriate dean for approval.

A W grade, indicating “withdrawal,” will be recorded for each course in which enrollment is withdrawn, if the student’s effective date of withdrawal is after the end of the sixth week of classes. (See W grade in the Grading System section.)

A graduate student in good academic standing who wishes to withdraw and intends to return within one year should submit both the Withdrawal form and an application for a Leave of Absence. Further information appears in the Graduate Division section.

New undergraduate students are encouraged to seek advice from their admissions or academic counselor to understand the consequences of withdrawal and their eligibility to return.

If an undergraduate student plans to leave the University after completing all academic work for the latest quarter of enrollment and has not paid tuition and fees for the next quarter, a formal notice of withdrawal is not necessary.

Lapse of Status

A student’s status may lapse for the following reasons: Failure to pay required tuition and fees by the prescribed deadline; failure to respond to official notices; failure to settle financial obligations when due or to make satisfactory arrangements with Campus Billing Services; failure to complete the admission health requirements; or failure to comply with admission conditions.

Each student who becomes subject to lapse of status is given advance notice and ample time to deal with the situation. However, if the student fails to respond to initial notices, action will be taken without further notice. A “hold” will be placed on all of the student’s records and the student will be entitled to no further services of the University except assistance toward clearing the hold. A student must satisfy the conditions which caused the lapse of status before the hold can be cleared.

Enrollment at Other Institutions

Various programs exist that enable currently registered UCI students in good standing to take courses at other UC campuses, as well as at California State University and California Community College campuses. More information is available on the University Registrar’s website (http://www.reg.uci.edu) and from the academic advising offices.
Enrollment in UC Irvine Extension (ACCESS UCI)

If a UCI student wishes to enroll in a UC Irvine Extension course concurrently with enrollment in regular courses, the entire program of study must be approved in advance by the dean of the student’s school (the Dean of the Division of Undergraduate Education, for undecided/undeclared students; the Dean of the Graduate Division, for graduate students). Fee information is available from the UC Irvine Extension Registration Office.

Change of Major

Each School or program has its own standards for change of major. Once a student selects a major, or decides to change majors, the student should visit the academic advising office for their prospective major to obtain current information about prerequisites, program planning, and policies and procedures. For most majors, students may request a change of major by submitting an online application through StudentAccess. Further information and a list of excluded majors is available on the University Registrar’s website (http://www.reg.uci.edu).

All Schools with exceptional requirements have major-change criteria approved by the Academic Senate and published on the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu). Students changing majors may meet the approved major-change criteria of the unit they wish to enter that are in place at the time of their change of major or those in effect up to one year before.

Transcripts and Verifications

Retention of Student Records

The University Registrar’s Office maintains a permanent record of academic work completed by each student. Support documents for the academic record are kept for one year.

Students are strongly advised to carefully check their academic record quarterly. (Student copies of the academic record are available from the University Registrar’s Office shortly after the close of each quarter.) Discrepancies in the academic record should be reported to the University Registrar immediately. After one year, it is assumed that the student accepts the accuracy of their academic record, and supporting source documents are destroyed.

Student academic records may not be changed after one year or, in some cases, in less than one year if Academic Senate regulations specify a shorter time limit. For example, the notation “NR,” which means that no grade has been reported, must be removed within one quarter of subsequent enrollment or it will automatically be converted to the grade “F” (Fail), “NP” (Not Pass), or “U” (Unsatisfactory), whichever is appropriate. Similarly, an “I” grade (Incomplete) will convert to either an “F” (Fail), “NP” (Not Pass), or “U” (Unsatisfactory), whichever is appropriate, after remaining on the student’s record for 12 months. Both policies are defined under Senate Regulation IR A345.

Transcript of Records

The official transcript of a student’s academic record will be released only upon receipt of a signed request from the student authorizing the release. All outstanding debts to the University (with the exception of long-term financial aid loans not yet due and payable) must be paid in full before a transcript will be released. There is a $17 fee for each official transcript. See the instructions on the University Registrar’s website (http://www.reg.uci.edu).

Requests for transcripts by anyone other than the student whose transcript is being sought can be honored only (1) if the request is accompanied by a written authorization signed by the student whose transcript is sought; and (2) upon approval of the University Registrar.

Unofficial transcripts are available, free of charge, at the University Registrar’s Office, to students who present photo identification. Currently enrolled students can view their unofficial transcript in StudentAccess at the University Registrar’s website (http://www.reg.uci.edu).

Verification of Student Status

The University Registrar’s Office provides verifications of student status. Verifications may be needed for reference checks, bank loans, applications for good-student-driver insurance rates, and Social Security payments. There is a $17 fee for each verification, however verifications for the purpose of student loan deferments are free of charge. Instructions are available on the University Registrar’s website (http://www.reg.uci.edu). For verification purposes, enrollment in 12 units or more in regular sessions is considered full-time status; enrollment in 6.0–11.9 units is considered half-time status; enrollment in 5.9 units or less is considered less than half-time status. Enrollment in six units between all three summer sessions will be considered full-time.

Readmission

Undergraduate Student Readmission

Students are strongly urged to consider the readmission policy in formulating plans for leaving or returning to UCI. Every effort will be made to readmit UCI students who were in good academic standing at the time they ceased attending and who have filed readmission applications by the deadline.

Former UCI students seeking readmission must contact the academic advising office of the School or program which offers their intended major to initiate an electronic readmission application. A nonrefundable $70 Application Fee will be applied to the student’s ZOTBill.

Readmission is subject to dean’s approval and campus deadlines (Aug. 1 for fall quarter, Nov. 1 for winter quarter, and Feb. 1 for spring quarter).
New undergraduate students who cancel registration prior to the first day of the quarter must reapply to UCI; they are not eligible to file for readmission as described above.

If a student has been academically disqualified from the University or has left the University while on probation or is subject to disqualification, or has lost their student status, the student must apply for readmission.

Transcripts for courses taken at other institutions must be submitted to both the Office of Admissions and the academic advising office of the School or program which offers the intended major of the student applying for readmission.

**Graduate Student Readmission**

A graduate student who withdraws and has not been granted a leave of absence approved by the Dean of the Graduate Division is considered to have lapsed student status (i.e., no longer has student status). A student whose status has lapsed must re-apply to a graduate program and can resume graduate study only if readmitted; readmission is not guaranteed. The online Application for Graduate Study, including the nonrefundable application fee, must be submitted by the published deadline for graduate admission applications. Refer to the statement on readmission which appears in the Graduate Division section for additional information.

**Commencement**

UCI Commencement (http://www.commencement.uci.edu) ceremonies are held each June for all students who graduate any quarter of that academic year. The School of Law ceremony is held in May. The School of Medicine ceremony is held on the Saturday following Memorial Day. Additional information is available on the Commencement Office website (http://www.commencement.uci.edu/#).

**Application for Graduation.** In order to receive a degree, an undergraduate student must submit an online Application for Graduation via the StudentAccess link on the University Registrar’s Office website (http://www.reg.uci.edu) no later than the published deadline. Specific deadline dates for filing the application are established quarterly so that candidates’ academic records can be reviewed to verify that all graduation requirements have been met. Students should contact their academic advising office for deadline and degree audit information.

**Graduation in Absentia.** Undergraduate students planning to graduate after a period of absence from the University must graduate in absentia. To graduate in absentia, the student must apply to graduate through StudentAccess. Upon degree certification, which takes place six weeks after the end of the quarter, a Graduation in Absentia filing will be submitted on behalf of the student. The student will not be subject to tuition and fees. The student will be required to pay the readmission fee only if the period of absence was for more than one certifying term.

**Graduate Hooding Ceremony.** Students completing a Ph.D. or M.F.A. are eligible to walk in the Graduate Hooding Ceremony. Students are required to meet all filing deadlines (http://www.grad.uci.edu/academics/filing%20deadlines) and satisfy degree requirements in order to participate in the ceremony. Registration for eligible students opens in March.

**Diplomas.** Students are advised by email when their diplomas are available, which is typically three months after the quarter in which the student graduated ends. Students may pick up their diplomas at the University Registrar’s Office or authorize the University Registrar to send their diplomas by USPS certified mail to domestic addresses, or USPS registered mail to addresses outside the United States. All outstanding debts due to the University, with the exception of long-term financial aid loans, must be paid in full before a student’s diploma will be released.

### Grading System

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent (4.0 grade points per unit)</td>
</tr>
<tr>
<td>B</td>
<td>Good (3.0 grade points per unit)</td>
</tr>
<tr>
<td>C</td>
<td>Average (2.0 grade points per unit)</td>
</tr>
<tr>
<td>D</td>
<td>Lowest passing grade (1.0 grade point per unit)</td>
</tr>
<tr>
<td>F</td>
<td>Not passing (no grade points)</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>P</td>
<td>Pass (equal to grade C or better)</td>
</tr>
<tr>
<td>NP</td>
<td>Not Pass (equal to grade C- or below)</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory (equal to grade B or better; graduate students only in courses designated by the Graduate Council)</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory (graduate students only in courses so designated by the Graduate Council)</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress (restricted to certain sequential courses, so designated by the Subcommittee on Courses or Graduate Council, for which the final quarter grade of a multiquarter course is assigned to the previous quarter(s) of the sequence)</td>
</tr>
<tr>
<td>NR</td>
<td>No Report (given when an instructor does not submit final grades for a class or individual grades for students whose names appear on the official class roster; NR becomes an “F” (Fail), “NP” (Not Pass), or “U” (Unsatisfactory), whichever is appropriate, after one quarter of subsequent enrollment or at the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor may replace an NR with a grade within one quarter of subsequent enrollment or may authorize the student to drop the class, which would result in the NR becoming a W)</td>
</tr>
<tr>
<td>UR</td>
<td>Unauthorized Repeat. A UR notation is recorded for the grade when a student already has a passing grade for a nonrepeatable course and has taken it again.</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawal. A W grade is recorded on a student’s permanent record for each course a student drops after the end of the sixth week of instruction in a quarter. Courses in which a W has been entered on a student’s record carry no grade points, are not calculated in the UC GPA, and will not be considered as courses attempted in assessing the student’s satisfaction of the normal progress requirement.</td>
</tr>
</tbody>
</table>

1 Plus and minus suffixes may be attached to the grades A, B, C, and D.

The academic record may not be altered except in those cases where a documented procedural or clerical error has occurred.
Grade Points and Grade Point Average

Grade points are assigned on a four point basis:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4 points per unit</td>
</tr>
<tr>
<td>B</td>
<td>3 points per unit</td>
</tr>
<tr>
<td>C</td>
<td>2 points per unit</td>
</tr>
<tr>
<td>D</td>
<td>1 point per unit</td>
</tr>
<tr>
<td>F and I</td>
<td>0 points per unit</td>
</tr>
</tbody>
</table>

Plus or minus suffixes modify the above by plus or minus 0.3 grade point per unit, with the exception of the A+ grade which is assigned 4 points per unit.

Requirements for a bachelor’s degree include the accumulation of baccalaureate credit for a minimum of 180 quarter units with an average of at least C (grade point average of at least 2.0). A course at UCI normally offers four quarter units of credit, and, in the following text, the term “course” may be understood to carry four units. The grade point average is the sum of all accumulated grade points (grade points earned in a course taken for a letter grade times the unit value of the course) divided by the sum of all units attempted. P, NP, S, U, NR, IP, and I grades, as well as workload credit, are excluded in computing grade point average.

Baccalaureate credit counts toward degree requirements and is used to compute the grade point average. Workload credit is used to determine full-time status for financial aid, housing, student loans, and other purposes. For most courses at UCI, baccalaureate credit and workload credit are identical. Courses differing in this credit or “workload credit only” courses are identified in the course description.

It should be noted that final grades as reported by instructors are normally permanent and final. An instructor may not change a final grade except to correct a clerical or procedural error. Clerical or procedural errors should be corrected within one regular academic quarter after the grade is assigned. No grade may be revised by reexamination or, with the exception of I and IP grades, by completing additional work. If a student is dissatisfied with a grade, the student should review their work with the instructor and receive an explanation of the grade assigned. A grade may be appealed on any reasonable grounds to the instructor, the chair of the department, and the dean of the School. If the matter is not resolved, the student may go for counseling to the Office of the University Ombudsman.

Under circumstances explained in The Manual of the Irvine Division of the Academic Senate (Appendix II: Student Academic Grievance Procedures Relating to Nondiscrimination), a grade may be changed if the Academic Grievance Panel has determined that the grade was assigned on the basis of discrimination.

Incomplete Grades

The grade Incomplete (I) is assigned when a student’s work is of passing quality but is incomplete for good cause. The I grade may be replaced by a permanent grade, provided the student completes the course work in a way authorized by the instructor and within the time limits expressed. During the time allowed for replacing an I grade, the I grade will not be used in computation of a student’s grade point average.

Beginning fall 2010, students assigned an I grade must complete the course work within the period set by the instructor, or within 12 months following the quarter in which the I grade was originally awarded, or prior to the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor is not obligated to allow the maximum time period. The student must consult with the instructor to determine how the Incomplete may be made up. It is strongly recommended that the student and the instructor prepare a written agreement specifying how the Incomplete can be made up and the deadline for doing so. Once the work is completed within the time agreed upon by the instructor, the student should ask the instructor to submit an Academic Record Change Request to the advising office of the School in which the course was offered. The student should not re-enroll in the course to make up the Incomplete. If the incomplete course work is not completed in the manner authorized by the instructor within the time limits stated above, the I grade shall automatically be replaced with the permanent grade of F (Fail), NP (Not Pass), or U (Unsatisfactory), as appropriate in accordance to the grading option selected when the student enrolled in the course, and will be used in computation of the student’s grade point average.

Students who have been assigned an I grade prior to fall 2010 have a maximum of 12 months following the quarter in which the grade Incomplete was originally assigned to complete the course work. However, in exceptional individual cases involving the student’s prolonged inability to pursue a course of study, extensions of up to two additional years may be granted by the instructor with the approval of the dean of the unit offering the course; students must petition for such an extension within 12 months following award of the I grade. The I grade assigned prior to fall 2010 will remain permanently on the student’s record if the required course work is not completed in the manner authorized by the instructor and within the time limits stated above.

Pass/Not Pass

The Pass/Not Pass option is available to encourage students to enroll in courses outside their major field. Courses graded Pass/Not Pass are not included in computation of the grade point average which appears on a student’s permanent record. However, if a student receives a Pass in a class, course and unit credit for the class is received, except as provided below. If a Not Pass is received, the student receives no credit for the class.

Some courses are designated by academic units as Pass/Not Pass Only. Students do not have the option of taking these courses for a letter grade.

The use of Pass/Not Pass is governed by all of the following provisions:
1. A student in good standing may take up to an average of four units per quarter on a Pass/Not Pass basis.
2. In addition, students may count a total of 12 units of courses designated Pass/Not Pass Only toward their graduation requirements.
3. A student who earns a grade of C (2.0) or better will have a Pass/Not Pass grade recorded as Pass. If the student earns a grade of C- or below, the grade will be recorded as a Not Pass, and no unit credit will be received for the course. In both cases, the student’s grade will not be computed into the grade point average.
4. Courses taken under the Pass/Not Pass option may count toward the unit requirement for the bachelor’s degree and toward the general education requirement. With the exception of courses designated Pass/Not Pass Only, courses taken Pass/Not Pass may not be used to satisfy specific course requirements of the student’s School and major, unless authorized by the appropriate dean. No more than two courses applied to a minor may be taken Pass/Not Pass.

Graduate students may take one course (up to four units) per quarter on a Pass/Not Pass basis. However, such courses are not considered part of the student’s graduate program, may not be applied to the requirements for an advanced degree, and do not count toward the minimum number of units for which a graduate student must enroll.

5. Changes to or from the Pass/Not Pass option can be made during the enrollment period. No changes can be made after the first two weeks of classes without the approval of the dean of the student’s School. No changes in the Pass/Not Pass option can be made after the last day of instruction of the quarter.
6. A student on academic probation may not enroll in a course with the Pass/Not Pass option unless the course is offered on that basis only.

**Satisfactory/Unsatisfactory Grades (Graduate Students Only)**

Satisfactory/Unsatisfactory grading, unlike Pass/Not Pass, is not a student option. With the consent of the academic units involved, and upon approval of the Graduate Council, individual study and research or other individual graduate work undertaken by a graduate student may be evaluated by means of the grades S or U. Also, with the approval of the Graduate Council, certain graduate courses are graded S/U Only. Additionally, the grade S or U may be assigned provisionally in each but the last quarter of a graduate course extending over more than one quarter. Upon completion of the last quarter, letter grades (A to F) replace such provisional grades. When a grade of S or U has been assigned on a provisional basis and the student does not complete all quarters of the course sequence, the instructor may assign a final letter grade or the grade of I to replace the S or U, or let the grade of S or U stand as a final grade. The grade S is defined as equivalent to a grade of B (3.0) or better. No credit will be allowed for work graded Unsatisfactory.

**Grades Not Reported**

A No Report (NR) is assigned when the student’s name was on the official class roster but the instructor did not submit a final grade. A student who receives an NR must immediately contact the instructor and arrange for the removal or replacement of the NR. An NR becomes an “F” (Fail), “NP” (Not Pass), or “U” (Unsatisfactory), whichever is appropriate, after one quarter of subsequent enrollment or at the end of the quarter immediately preceding award of the degree, whichever comes first. NR transcript notations are not included in computations of the grade point average and do not contribute to the number of quarter units completed.

**Grades In Progress**

IP is a transcript notation, restricted to sequential courses which extend over two or more quarters, indicating that the final grade for the individual quarters will not be assigned until the last quarter of the sequence is completed. The grade for the final quarter is then assigned for all of the previous quarters of the sequence. No credit is given until the student has completed the entire sequence. IP notations may be given only for courses designated by the Academic Senate Subcommittee on Courses or Graduate Council for use of this notation. IP notations are not included in computations of the student’s grade point average and do not contribute to the number of quarter units completed.

**Repetition of Courses**

Undergraduate. Repetition of courses by undergraduate students not authorized by the Subcommittee on Courses to be taken more than once for credit is subject to the following provisions. Undergraduates may repeat courses only when grades of C-, D+, D, D-, F, or NP were received. (A C- earned before fall quarter, 1984, is not repeatable.) Unit credit for courses so repeated will be given only once, but the grade assigned at each enrollment shall be permanently recorded. In computing the grade point average of an undergraduate with repeated courses in which a C-, D+, D, D-, F, or NP (if repeated for a letter grade) was received, only the most recently received grades and grade points shall be used for the first 16 units repeated. In case of further repetitions, the grade point average shall be based on all additional grades assigned. Repetition of a course more than once requires approval in all instances of the School (or equivalent) in which the student is enrolled.

All courses which were originally taken for a letter grade must be repeated for a letter grade. Courses originally taken on a Pass/Not Pass basis may be repeated for a Pass/Not Pass, or for a letter grade if the course is so offered.

Information regarding the repetition of language other than English courses is available in the School of Humanities section.
Graduate. A graduate student may repeat a course only once in which a grade below B or a grade of U was received. Only the most recently earned grade shall be used in computing the student's grade point average for the first eight units of repeated work; thereafter, both the earlier and the later grades will be used.

Duplicate Credit Prohibited. Other than the exceptions related to the repeat of deficient grades as noted above, and the exceptions related to Advanced Placement and International Baccalaureate Credit, undergraduate and graduate students may not receive unit credit or earn grade points for college courses in which the content duplicates material of a previously completed course or examination for which the student has been granted college credit.

If a student repeats a course for which a passing grade has already been received and the course is not approved as repeatable for credit, the student will receive a UR and no credit will be given.

Satisfaction of the Writing Requirement

Students enrolled at UCI may take only UCI courses in satisfaction of the lower-division and upper-division writing requirements. Continuing UCI students may not take summer courses at another institution to satisfy lower-division or upper-division writing requirements. The two courses taken to fulfill the lower-division writing requirement must be completed with a grade of C or better (or a Pass or Credit grade equivalent to C).

1. Students who fail to attain a letter grade of C or better in WRITING 37 must repeat the course or enroll in the equivalent. It is recommended that these students enroll in WRITING 39A - WRITING 39B - WRITING 39C to assure completion of this requirement. Students who fail to attain a grade of C or better in WRITING 39C must repeat the course.
2. Students who fail to attain a grade of C or better in one or both courses of the WRITING 39B - WRITING 39C sequence must repeat the course or courses in question.
3. Students who fail to attain a grade of C or better in at least two quarters of the writing component of the Humanities Core Course after satisfying the UC Entry Level Writing requirement by attaining a grade of C or better in HUMAN 1AES, should substitute WRITING 39C if they need one quarter of additional work to complete the requirement, or WRITING 39B - WRITING 39C if they need two quarters to complete the requirement. Students who fail to attain a grade of C or better in HUMAN 1AES, enroll in HUMAN 1BES and attain a grade of C or better, but fail to attain a grade of C or better in the writing component of HUMAN 1C, should substitute WRITING 39C to complete the requirement.
4. Students who fail to attain a grade of C or better in either HUMAN 1AES or HUMAN 1BES, should substitute WRITING 39A - WRITING 39B - WRITING 39C to complete the requirement.
5. Students who fail to attain a grade of C (or Pass) or better in each quarter of a First-Year Integrated Program (FIP) sequence should see their academic counselor.

The course taken to fulfill the upper-division writing requirement must be completed with a grade of C or better (or a Pass or Credit grade equivalent to C). See the UCI Requirements section for further information. Majors in the School of Biological Sciences, Physics majors, and Pharmaceutical Sciences majors who fail to attain a grade of C or better in each of the courses taken to satisfy upper-division writing should see their academic counselor.

Students who have not completed the lower-division writing requirement before the beginning of their seventh quarter at UCI will be subject to probation. Students transferring to UCI normally should have satisfied the lower-division writing requirement before entering UCI; if, however, they have not, they must complete it within their first three quarters of enrollment or they will be subject to probation. Academic English/English as a Second Language students must complete the lower-division writing requirement before the beginning of the seventh quarter following the completion of their AE/ESL courses or they will be subject to probation.

Credit by Examination

An enrolled student may obtain credit for course material previously mastered by taking a special examination administered by a faculty member who normally teaches that course. Detailed procedures for obtaining credit by examination may be obtained from the advising office of the School which offers the course. Approval of any petition for credit by examination must be obtained from the dean or designee of that School before the examination can be administered. After the dean has signed the petition, the student must have it validated by paying a $5 Credit by Examination service charge at the Cashier's Office.

The instructor giving the examination retains the prerogative: (1) to decide whether the course can be taken by examination, (2) to determine the form such an examination may take, and (3) to stipulate whether the grade will be reported as Pass/Not Pass or as a letter grade (e.g., A, B, C, etc.).

A student may take the examination for a particular course only one time. After receiving the grade, the student may accept it or reject it. If the student is not satisfied with the grade received on the examination, the student may choose not to receive credit or a grade. If the student does choose to accept the results of the examination, grades and grade points (if applicable) will be entered on the record in the same manner as those for regular courses of instruction.

Final Examinations

Final examinations, or their equivalent, are obligatory in all undergraduate courses except laboratory and studio courses, as individually determined by the Subcommittee on Courses. Normally each such examination shall be conducted in writing and must be completed by all participants by the time
scheduled by the University Registrar for the quarter in question. These examinations may not exceed three hours’ duration. Special arrangements may be made for disabled students.

Examinations normally are not required in laboratory and studio courses. At its option, the department concerned may require a final examination subject to prior announcement in the Schedule of Classes for the term.

Final grades from professors are due in the University Registrar’s Office within 72 hours after the final examination.

**Independent Study: Undergraduates Only**

A unique class option is available primarily to upper-division students at UCI. The independent-study option allows the student to plan with the instructor a course having a clear relationship to the student’s academic program. The plan for the course will include a reading list, a group of assignments, examinations, papers, or similar evidence of intellectual achievement on which academic credit will be based. A description of the course and of its requirements must be approved by the instructor responsible for it and by the department chair or dean.

**Student Copies of Quarterly Grades**

After each quarter, a complimentary copy of the student’s permanent record is available from the University Registrar’s Office. On the copy, the student will find grades for all the quarters taken at UCI, a computation of grade point average at the University of California, and a list of the University requirements completed (UC Entry Level Writing, American History and Institutions).

**Declaration of Major**

All students are required to declare a major by the time they reach junior status (90 units, excluding college work completed prior to high school graduation) or they will become subject to disqualification from further registration in the University.

**Undergraduate Scholarship Requirements**

Requirements for a bachelor’s degree include the accumulation of credit for a minimum of 180 quarter units with an average of at least C (grade point average of at least 2.0).

**Class Level**

Undergraduate students are classified as freshman, sophomore, junior, or senior students, based on the total number of units completed, as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Units Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 - 44.9</td>
</tr>
<tr>
<td>Sophomore</td>
<td>45.0 - 89.9</td>
</tr>
<tr>
<td>Junior</td>
<td>90.0 - 134.9</td>
</tr>
<tr>
<td>Senior</td>
<td>135+</td>
</tr>
</tbody>
</table>

**Course Load Limits**

An undergraduate may enroll in as few as 12 units or as many as 20 units. To enroll for more than 20 units or fewer than 12 units, students must obtain the authorization of their dean or, for undecided/undeclared students, the Dean of the Division of Undergraduate Education. Information about the Reduced-Fee Part-Time Study Program is available in the Expenses, Tuition, and Fees section of the Catalogue.

**Academic Standing**

To remain in good academic standing a student must maintain a grade point average of at least 2.0 and make progress toward the degree at a satisfactory rate.

An undergraduate student normally is subject to academic probation if at the end of any quarter the grade point average for that quarter, or the cumulative grade point average, is less than 2.0.

A student whose grade point average falls below a 1.5 for any quarter, or who after two consecutive quarters on probation has not achieved a cumulative grade point average of 2.0 or a satisfactory rate of progress, is subject to disqualification.

**Normal Progress Requirement**

Regular undergraduate students will become subject to probation or to disqualification from further registration in the University if they fail to make normal progress toward the baccalaureate degree, if they fail to declare a major by the time they reach junior status (90 units, excluding college work completed prior to high school graduation), or after declaring a major, if they fail to follow the program of study required by the academic unit of their major. Students who have selected undeclared status within a School may be subject to probation or to disqualification if they fail to follow a program of study leading to completion of lower-division School requirements.
A. Normal progress for all regular undergraduate students is defined in the following table, in terms of quarter units completed at the end of quarters enrolled.

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Normal Progress</th>
<th>Subject to Probation</th>
<th>Subject to Disqualification</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

B. Status Determination:

1. Undeclared students who have completed the number of units specified in the given quarter of their enrollment, as shown in the table above, and are following a course of study prescribed by their School are making “Normal Progress.”

2. Students who have declared a major must follow the program of study required for their major, as well as complete the units specified in the given quarter of their enrollment, as shown in the table above, in order to make “Normal Progress.” Students must declare a major by the time they reach junior status (90 units, excluding college work completed prior to high school graduation).

3. Students who fail to make "Normal Progress" as defined in (1) or (2) above are subject to being placed on probation by the faculty of their academic unit or its designated agent, or for first-year undecided/undeclared students, by the Faculty Board for Undecided/Undeclared Students or its designated agent.

C. Students who have completed two consecutive quarters on academic probation without having achieved at the end of that period at least the normal rate of progress specified under (A) and (B) above are subject to disqualification.

D. For purposes of calculating “Normal Progress,” “Subject to Probation,” and “Subject to Disqualification,” students admitted to the University with advanced standing will be classified with respect to quarter of enrollment at entrance in accordance with the following table:

<table>
<thead>
<tr>
<th>Quarter at Entrance</th>
<th>Advanced Standing Quarter Units at Entrance</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>0-14</td>
</tr>
<tr>

<tr>
<td>9</td>
<td>120-134</td>
</tr>
<tr>
<td>10</td>
<td>135-149</td>
</tr>
</tbody>
</table>

E. Units earned under the following two circumstances are not to be counted toward determination of the quarter at entrance under (D) above: (1) Advanced Placement Examination; (2) concurrent enrollment in college courses while in high school.

F. UCI students will have the units and grade points of courses taken through Access UCI transferred to their record when they have been admitted or readmitted to regular student status. Units taken through Access UCI will not be counted toward determination of Advanced Standing Quarter Units at Entrance if they are taken under the circumstances cited in sub-section E.

G. The quarter of enrollment at entrance of students (including baccalaureate degree candidates who already hold a baccalaureate degree) seeking admission to the University with 150 or more advanced standing units will be determined by the faculty offering the curriculum in which such students seek to enroll. This determination will be made consistent with the program required for such students to obtain the desired degree and with University residence requirements.
H. For purposes of this regulation students will be understood to have declared a major when they have been formally accepted by the faculty of a degree-granting program or its designated agent to pursue a defined course of study leading to a baccalaureate degree.

I. All undergraduate students are expected to graduate when they have completed the baccalaureate requirements of their declared major or majors.

The Normal Progress requirement described above is not to be confused with the Normal Academic Progress requirement for Financial Aid. The former has to do with academic standing, the latter with receipt of financial aid.

Probation is not a necessary step before disqualification. If a student becomes subject to disqualification, the complete record of grades and other accomplishments will be carefully reviewed by the responsible faculty authorities of the student's School or, for undecided/undeclared students, by a faculty authority designated by the Faculty Board for Undecided/Undeclared Students. If the record indicates little probability that the student will be able to meet the academic standards of the University of California, the student will be disqualified from further enrollment. Faculties of undergraduate degree-granting units and the Faculty Board for Undecided/Undeclared Students are obliged by Academic Senate regulations to maintain a procedure under which a student may contest disqualification actions.

In order to transfer from one campus to another in the University of California or from one UCI School to another, a student who has been disqualified or who is on academic probation must obtain the approval of the appropriate faculty, or its designated agent, into whose jurisdiction the student seeks to transfer.

Credit Hour Unit Limit (Undergraduate)

A maximum of 216 units is permitted for all students in non-Engineering majors after their 12th quarter of study at UCI. For students in Engineering majors, the maximum number may not exceed 236 units after their 12th quarter of study at UCI. Students with Advanced Placement (AP) or International Baccalaureate (IB) credit may exceed the unit maximum by the amount of that credit.

After completing the maximum number of units, students may not normally continue their enrollment. Students wishing to exceed their unit or quarter maximums, including students pursuing multiple majors, may petition the associate deans of the impacted units (or their delegates) to continue work required to complete their degree.

Full-time transfer students admitted at the junior level are allowed no more than the equivalent of nine quarters (10 quarters for Engineering majors), regardless of units.

Individual Schools may impose additional requirements.

The maximum number of units or quarters does not include units completed at another institution prior to matriculation. After matriculation, work completed over the summer at any institution counts toward the specified unit limit but not the specified quarter count.

This regulation is effective for students who matriculate fall 2011.

Honors (Undergraduate)

Information about honors opportunities at UCI is found in the Division of Undergraduate Education section, the Information for Admitted Students section, and the academic unit sections.

Quarterly Undergraduate Honors

Quarterly undergraduate honors are awarded in each School to students who achieve a quarterly grade point average of 3.5 or better in a minimum of 12 graded units.

Honors at Graduation

Of the graduating seniors, no more than 12 percent will receive academic honors: approximately 1 percent summa cum laude, 3 percent magna cum laude, and 8 percent cum laude. The criteria used by each School in selecting candidates for these honors are included in each School's section of the Catalogue. A general criterion is that students must have completed at least 72 units in residence at a University of California campus. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors.

Graduate Scholarship Requirements

For a graduate student, only the grades A+, A-, A, B+, B, and S represent satisfactory scholarship and are accepted toward the graduate degree. Students are expected to maintain satisfactory academic progress at all times. Information concerning graduate student course load requirements and satisfactory academic progress is given in the Graduate Division section.
Credits From Other Institutions or University Extension: Undergraduate Students

UCI undergraduate students who plan to enroll in courses at another institution or University Extension in either a summer or regular session, and to use such courses to satisfy any UCI requirements, should first consult with and secure prior approval from the academic dean or chair of their major who will determine if the credits are applicable to major and general education requirements.

UCI undergraduate students must submit an official transcript of all course work earned at another institution or college to the Office of Admissions and Relations with Schools (http://www.admissions.uci.edu). If such courses are determined by the Office of Admissions and Relations with Schools to be transferable, do not duplicate other credit granted, and do not exceed limitations of credit, then the units earned may be applied toward the total required for graduation.

As of winter 2009, matriculated UCI undergraduate students can elect to have the full course record included on their academic transcript for all courses taken through UCI Extension. The full course record contains course title, academic department, course number, grade, and grade points earned. This option also pertains to Access UCI courses (Concurrent Enrollment) taken by students who are applying for readmission. The full course record can be transferred to their academic record when they have been admitted or readmitted to regular student status.

Credits From Other Institutions or University Extension: Graduate Students

In accordance with UC Academic Senate policy, graduate students may be granted unit credit (not grade credit) toward a master’s degree for a limited number of acceptable graduate-level courses completed at another institution or through University Extension before enrollment in graduate study at UCI. To receive such credit, the student must submit a formal petition, including an original transcript, after enrollment in graduate study. Approval of the student’s graduate advisor and the Dean of the Graduate Division is required. The petition may be downloaded at the Graduate Division website (http://www.grad.uci.edu/cascade/forms).

While enrolled at UCI, a graduate student may receive unit credit for graduate-level courses completed at another institution or through UCI Extension only with the prior approval of the student’s graduate advisor and the Dean of the Graduate Division.

See the Graduate Division section for further information about graduate transfer credit and the University’s Intercampus Exchange Program.

Supplementary Educational Programs

Summer Session and UC Irvine Extension

Gary W. Matkin, Dean of Continuing Education, Distance Learning, and Summer Session

Summer Session

Several summer sessions are held on the Irvine campus. The summer 2016 schedule is: Session I, June 20–July 27; Session II, August 1–September 7; overlapping 10-week session, June 20–August 26. Summer Session offers more than 800 courses and annually enrolls more than 12,000 students, most of whom are UCI matriculated students. Those who enroll in these sessions and take an academic program equivalent to a regular quarter may accelerate their progress toward a degree.

Courses offered include a wide variety from the regular session, supplemented by offerings available only during the summer, including an increasing number of online courses. Admission is open to all university students, high school graduates, qualified high school students who have completed their sophomore year by summer 2016, and community members. Admission to Summer Session does not constitute admission to a regular session of the University.
Freshman Edge
Incoming first-year students are invited to take part in Freshman Edge. Students begin college during the summer when the campus is more accessible and relaxed. They will be part of a small, highly motivated group of incoming students and have an opportunity to become familiar with the academic rigor and social scene of UCI under ideal conditions of maximum opportunity and support. The program includes special workshops and sessions on various aspects of collegiate life, as well as the lecture series, INSIDE UCI, which provides an introduction to research projects and faculty. For more information, including Freshman Edge fees and schedules, call 949-824-7649; email: summer-freshman@uci.edu; http://summer.uci.edu/freshman.

Transfer Edge
Transfer students can begin their experience in the summer by taking part in Transfer Edge, an innovative, experiential opportunity that provides a small community of transfer students with a rich academic, social, and personal foundation. Special workshops and sessions that help students adjust to the academic rigor and social scene of the university include networking with faculty, career planning, leadership development, public speaking, and writing. The lecture series, INSIDE UCI, provides an introduction to research projects and faculty. For more information, including Transfer Edge fees and schedules, call 949-824-7649; email: summer-transfer@uci.edu; http://summer.uci.edu/transfer.

Visiting International Students
International students are welcomed to Summer Session, which is offered on an “open enrollment” basis. International students will need to demonstrate English proficiency with a TOEFL score of 213 computer-based, 550 paper-based, or 79 Internet-based (Summer Session also accepts the equivalent for the IELTS and TOEIC). Inexpensive on-campus housing is available to Summer Session students, as well as a full infrastructure dedicated to helping students succeed with their academic studies. Summer Session also offers students a full range of social activities to broaden and deepen their study abroad experience, and their awareness and understanding of the Orange County area and American culture. For more information, call 949-824-4270; email: internationalsummer@uci.edu; http://summer.uci.edu/international.

High School Students
Highly qualified high school students have two summer options to get an early start on college. Students who have completed their sophomore year of high school by summer 2016 and have an unweighted high school GPA of 3.0 or higher in college preparatory classes can apply to the High School Summer Scholar Program (http://summit.uci.edu/programs/highschool). This program provides students with the opportunity to experience college-level course work and preview university life through a combination of academic course work and co-curricular activities. Alternatively, students meeting the same GPA requirements above can choose to enroll in any lower-division course (numbered 1–99) that does not have a special prerequisite. The grades and units earned in a Summer Session course will be calculated in the UC grade point average if the student should later be formally admitted to the University. For more information, call 949-824-7649; email: summer-scholars@uci.edu; http://summer.uci.edu/highschool.

UC Irvine Extension
UC Irvine Extension serves the continuing education needs of the community by providing more than 3,500 credit and noncredit courses, certificate programs, specialized studies, seminars, workshops, and lecture programs annually to more than 14,000 students. For program information, class lists, scheduling and fee details, visit the Extension website (http://extension.uci.edu), or call the University Extension Student Services office at 949-824-5414. A free quarterly catalogue is also available.

Individual courses promote career advancement and lifelong learning, while certificate programs offer the opportunity for a distinctive achievement in a wide range of fields. Certificate programs are a sequence of courses designed to develop in-depth expertise to improve career opportunities. Extension offers more than 60 certificate and specialized studies programs in fields as diverse as information technologies, engineering, business, management, teacher education, medical product development, finance and investor relations, and paralegal. Classes are provided both online and on campus.

Customized Employee Education Programs
UC Irvine Extension’s certificate and specialized studies programs are offered for the professional development needs of organizations and their employees. The Corporate Training unit of UC Irvine Extension engages with employers in Orange County, nationwide and globally, providing classes on site and online. Programs are developed following a free consultative intake process and needs assessment. For more information, visit Corporate Training website (http://unex.uci.edu/corporate) or call 949-824-1847.

Concurrent Enrollment: Access UCI
The general public also has an opportunity to take regular UCI courses without formal admission to the University, through Extension’s Access UCI program (http://unex.uci.edu/courses/access_uci/general.aspx) (also known as concurrent enrollment). Courses are available on a space-available basis with the approval of the course instructor and/or academic department. Call 949-824-5414 for more information.

Osher Lifelong Learning Institute
UC Irvine Extension supports programs of the Osher Lifelong Learning Institute (OLLI), which offers a wide variety of educational and cultural programs for the retired or semi-retired intellectually active adult, all for one annual membership fee. UC Irvine Extension OLLI members are also eligible for a 30 percent discount on most Extension courses on a space-available basis. For more information, visit Osher Lifelong Learning Institute website (https://unex.uci.edu/ollii) or call 949-451-1403.
Open Educational Initiatives

UC Irvine is a leading member of the OpenCourseWare Consortium (OCW), committed to making higher education content freely available. UCI is one of a growing list of prestigious U.S. and international institutions supporting the open education movement, offering learning materials through a variety of emerging channels including OpenCourseWare. UC Irvine’s participation in these initiatives is consistent with its public and land-grant missions and its desire to play a significant role in contributing to the social welfare of the state, the nation, and the world. UCI’s participation in open education showcases the University’s top instructional efforts and makes course materials free for everyone in the world. Availability of the learning assets and course materials is significant for educators, students, and self-learners. For more information, visit the OpenCourseWare website (http://ocw.uci.edu).

International Programs

International Programs offered through UC Irvine Extension prepare international students to pursue their educational objectives in U.S. colleges and universities, as well as provide opportunities for professional development. A full-time, intensive English program, offered four quarters per year, delivers courses in speaking & listening, writing & grammar, and reading & vocabulary development. Topics in these courses include conversation and discussion strategies, note-taking, pronunciation, paragraph & essay writing, and public speaking. Elective courses such as TOEFL test preparation, business English, and idioms also are available. In addition, English language and business English courses are also delivered full-time in four-week sessions, as well as part-time in the evenings.

To prepare international students intending to apply for admission to UCI’s undergraduate or graduate programs, International Programs offers an International Undergraduate Preparation Program and International Graduate Studies Preparation Program. These successful programs provide international students with intensive English language assistance, academic test preparation, application assistance to UCI and other top U.S. universities, the opportunity to enroll in credit-bearing university courses or professional certificate programs, and much more.

Professional certificate programs for international students and professionals are offered in an accelerated full-time format. The fast-paced educational format helps individuals become more effective in their English communication skills and increases their career potential in today’s competitive global business environment.

More information can be found at the International Programs website (http://ip.extension.uci.edu) or by contacting International Programs, UC Irvine Extension, P.O. Box 6050, Irvine, CA 92616-6050; telephone 949-824-5991; email uciesl@uci.edu.

An Academic English/ESL program is offered by the School of Humanities to students who are enrolled in degree programs at UCI. Refer to the section on Admission of International Students in this Catalogue for information.

On This Page:
- Air Force Reserve Officers Training Corps
- Army ROTC

ROTC

Qualified UCI students may participate in the Air Force Reserve Officers Training Corps (AFROTC) or the Army Reserve Officers Training Corps (Army ROTC). Additional information is available from the ROTC offices listed below, as well as from the UCI Office of Admissions and Relations with Schools and the UCI Division of Undergraduate Education.

Air Force Reserve Officers Training Corps (AFROTC)

Air Force Reserve Officer Training Corps (AFROTC) is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as "cadets") who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Classes are offered at California State University, San Bernardino and the University of California, Los Angeles; however, UCI students may enroll using our cross-town agreement. For more information on the AFROTC program, please contact the Department of Aerospace Studies at UCLA at 310-825-1742 or contact California State University, San Bernardino at 909-537-5440 or visit http://afrotc.csusb.edu/.

Army ROTC

The UCI Army ROTC program offices are located on the third floor of Natural Sciences I, room numbers 3122–3129; telephone 949-824-8538 and -7581; or visit the ROTC website (http://ucirotc.com).

Army ROTC classes are taught at UCI. Physical training and field training are conducted at UCI and other local training areas. Two-, three-, and four-year Army ROTC programs are available to all qualified UCI students. Successful completion of the ROTC program leads to a commission as a Second Lieutenant in the U.S. Army (Active, Reserve, or National Guard). Two-, three-, and four-year competitive scholarships provide payment for tuition or
room and board. Fee payments at UCI, payments for books, and stipends ranging from $350–$500 per month are also available. Qualified students currently serving in any Reserve or National Guard unit may transfer to the Army ROTC program to complete their commissioning requirements.

ROTC courses are on the courses tab under the Division of Undergraduate Education listing elsewhere in this catalogue. These courses provide workload credit only, not baccalaureate credit.

Courses

**ROTC 10L. Military Science-Basic Leadership Laboratory. 1 Workload Unit.**
Provides hands-on and practical military science material covered in the corresponding military science courses.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ROTC 11. Military Science-Personal Development. 1 Workload Unit.**
Focuses on life skills such as physical fitness, nutrition, and time management while providing an introduction to military knowledge, customs, and skills.

**ROTC 12. Military Science-Leadership I. 1 Workload Unit.**
Focuses on the fundamentals of leadership, Army leadership values, ethics, and counseling techniques.

**ROTC 13. Military Science-Tactical Leadership I. 1 Workload Unit.**
Focuses on leadership at the tactical level and includes instruction in fundamental military skills such as map reading, land navigation, squad and platoon operations, and resource planning techniques.

**ROTC 21. Military Science-Team Leadership I. 2 Workload Units.**
Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

**ROTC 22. Military Science-Team Leadership II. 2 Workload Units.**
Explores team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

**ROTC 23. Military Science-Tactical Leadership II. 2 Workload Units.**
Examines the challenges of leading tactical teams in the OE. Highlights dimensions of terrain analysis, patrolling, and operation orders.

**ROTC 100L. Military Science-Advanced Leadership Laboratory. 1 Workload Unit.**
Provides hands-on and practical exercises for the military science material covered in the corresponding military science courses as well as leader training through practical application of the Leadership Development Program.

Corequisite: ROTC 131 or ROTC 132 or ROTC 133 or ROTC 141 or ROTC 142 or ROTC 143 or ROTC 197.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ROTC 131. Military Science-Leadership II. 3 Workload Units.**
Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specified feedback on their leadership attributes and core leader competencies.

Corequisite: ROTC 100L.
Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

**ROTC 132. Military Science-Team Leadership III. 3 Workload Units.**
Provides cadets systematic and specific feedback on their leadership attributes and core leader competencies. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

Corequisite: ROTC 100L.
Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

**ROTC 133. Military Science-Tactical Leadership III. 3 Workload Units.**
Uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when "under fire" are explored, evaluated, and developed.

Corequisite: ROTC 100L.
Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.
ROTC 141. Military Science-Leadership III. 3 Workload Units.
Transitions the focus of student learning from being trained, mentored, and evaluated as a cadet to learning how to train, mentor, and evaluate cadets. Cadets begin to learn the duties and responsibilities of an Army staff officer.

Corequisite: ROTC 100L.
Prerequisite: ROTC 131 and ROTC 132 and ROTC 133.

ROTC 142. Military Science-Leadership IV. 3 Workload Units.
Requires students to continue to train, mentor, and evaluate underclass cadets. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process and the Comprehensive Soldier Fitness (CSF) program.

Corequisite: ROTC 100L.
Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141.

ROTC 143. Military Science-Officership. 3 Workload Units.
Explores the dynamics of leading in the complex situations of current military operations in the OE. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism.

Corequisite: ROTC 100L.
Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141 and ROTC 142.

ROTC 151. United States Military History-1607 to 1865. 3 Workload Units.
Examines the creation of the American military establishment and traces its evolution in the context of the changing nature of warfare, the progression of military professionalism, and social, political, economic, and technological developments through the Civil War.

ROTC 152. United States Military History-1865 to 1945. 3 Workload Units.
Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the end of the Civil War through World War II.

ROTC 153. United States Military History-1945 to 2001. 3 Workload Units.
Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the Cold War to the War on Terrorism.

ROTC 197. Military Science Independent Studies. 2-4 Workload Units.
Provides intensive, individual study with scheduled meetings to be arranged between Cadre and student. Assigned reading and tangible evidence of mastery of subject matter required.

Repeatability: May be taken for credit for 12 units.

Student Life & Leadership

Student Life & Leadership offers diverse programs and services to students which complement and enrich the educational and out-of-class life of UCI students. This is achieved through a comprehensive range of cultural, social, and intellectual opportunities that promote student learning and development. For additional information contact 949-824-5182, sl@uci.edu (studentlife@uci.edu), or visit the Student Life & Leadership website (http://www.studentlife.uci.edu).

Central Offices

The central office of Student Life & Leadership (G308 Student Center) houses a number of services including the Office of Campus Organizations, Greek Life, Office of Student Conduct, and New Student & Leadership Programs.

The Office of Campus Organizations enriches the involvement of students through outreach, education, support, and providing opportunities for volunteer and community service engagement. Campus Organizations works with over 600 Registered Campus Organizations with a combined membership exceeding 18,000 students. The organizations address a wide range of interests including academic, environmental, faculty/staff, international, multicultural, political, recreational, religious, service, social, performance/entertainment, and sports. In addition, students can create new organizations to fulfill a campus need. Students can learn about organization fundamentals by attending CORE (Campus Organizations Resources and Education) workshops, or visiting the CORE Office at Student Center G306. Campus Organizations also sponsors campuswide traditional events like the Anteater Involvement Fair and the Anteater Awards. Students serve as peer consultants through the CORE Consultant and CORE Intern programs. In addition to providing campus organization support, the Office of Campus Organizations also serves as the hub for student activities related to community service and volunteer projects. The service initiatives include Alternative Break, where students engage in a week of service during their winter and/or spring break, the Community & Public Service Fair, MLK Jr. Day of Service, and the Get Connected volunteer management system for the UCI community. For additional information, follow CORE on Facebook (https://www.facebook.com/ucicampusorgs) or visit the Campus Organizations website (http://www.campusorgs.uci.edu).

The Fraternity/Sorority (Greek) community at UCI Irvine is a diverse population comprised of over 48 fraternities and sororities that strive to uphold the oaths, values, and principles they were founded upon. Over 2,300 undergraduate students, 10 percent of the undergraduate enrollment, make up the Greek population on campus and are active members in the UC Irvine and Greek communities. Three governing councils — Interfraternity Council, Panhellenic Association, and Multicultural Greek Council — represent the fraternities and sororities to the UCI campus and surrounding community. Fraternity and sorority members strive for high academic achievement and are honored by one of three Greek honor/leadership societies: Gamma Sigma Alpha, Rho Lambda, and Order of Omega. Students who join fraternities and sororities gain experience and skills in leadership development, communication, project management, and leading change. Throughout the year fraternity and sorority members raise money for philanthropic organizations and volunteer their time for service organizations. For 36 years, the largest philanthropic event is Greek Songfest. It is a yearlong fundraising effort that culminates into fraternities and sororities paired together to perform 12-minute renditions of a Broadway musical complete with sets, costumes, complex choreography, and lighting design. Recent benefactors of Greek Songfest have been the Child Abuse Prevention Center, Make-A-Wish, Down Syndrome Foundation of Orange County, and Never Ever Give Up Foundation. Greek life is a great way to be involved, get engaged on campus, and make life-long friends. Membership in the fraternity or sorority lasts a lifetime. For additional information, visit the Greek Life website (http://www.greeklife.uci.edu).

To assist students in becoming more effective leaders, Student Life & Leadership offers a variety of leadership programs and opportunities. The All-University Leadership Conference is the cornerstone of UCI's leadership offerings bringing together students, faculty, staff, and administrators. This annual weekend conference involves more than 220 emerging and established student leaders representing the full diversity of campus interest groups. The Student Regent Recruitment Luncheon is held during the winter quarter, prior to the application deadline. The current Student Regent informs interested candidates of the issues of the day and is available for questions and answers. The application for the Student Regent position is available at UC Board of Regents website (http://regents.universityofcalifornia.edu). Information about leadership development programs is available from Student Life & Leadership and at the Leadership Programs website (http://www.studentlife.uci.edu/leadership).

The Administrative Intern Program provides participating students with administrative and leadership experience designed to develop personal and professional skills as well as to increase their knowledge of complex organizational structures. Approximately 25 students annually are selected to participate and are assigned to campus departments where they develop programs and projects. Academic credit is earned through participation in a weekly seminar (MGMT 198A-MGMT 198B-MGMT 198C; 4 units per quarter for a maximum of 12 units). For additional information contact 949-824-5182 or visit the Administrative Intern Program website (http://www.studentlife.uci.edu/admin_intern).
The **Passport to Leadership Program** serves the entire student body with one of the most comprehensive leadership experiences on campus. The Passport program is geared toward giving students the one-stop shop for leadership education and experience. The Passport program includes leadership certificates which are awarded by Student Life & Leadership to participants who attend seven workshops. For additional information visit the Passport to Leadership Program (http://search.dos.uci.edu/leadership/passport) and Leadership Train websites (http://www.studentlife.uci.edu/leadership/train).

The **University Affairs for Credit Course** (UNI AFF 1A-UNI AFF 1B-UNI AFF 1C) offers students an opportunity to work on campus projects with a University department to enrich their academic growth and development as well as the academic growth and development of UCI. Each student spends a minimum of 30 hours per quarter working on a proposed project under the supervision of a designated faculty or staff member. Students are required to write a three to five page paper at the end of the course addressing the following: (1) description of the experience or project; (2) the impact of the experience or project upon the campus; and (3) the effectiveness (personally and externally) of the experience or project. Students may enroll in University Affairs for Credit for a maximum of three times (or 3.9 units), and the course is graded Pass/Not Pass only.

**New Student Programs** provides assistance and information to students who are in the process of transitioning to UCI from high school or transferring from another college, and coordinates a variety of orientation programs. The New Student Handbook (http://www.newstudents.uci.edu), a handy online resource guide to UCI, is available at the New Students website (http://www.newstudents.uci.edu). New Student Programs is located in Student Life & Leadership Office, 949-824-5182.

The Office of the Dean of Students (http://www.dos.uci.edu) also is responsible for the campuswide administration of **student conduct** for both graduate and undergraduate students. Information is provided in the **University of California Policies Applying to Campus Activities, Organizations, and Students** (http://ucop.edu/student-affairs/policies/student-life-policies/pacaos.html), available from the Office of Student Conduct (http://dos.uci.edu/conduct), 949-824-5181, conduct@uci.edu.

For additional information contact 949-824-5181 or visit the Student Life & Leadership website (http://www.studentlife.uci.edu).

### Resource Centers

**Student Life & Leadership** provides support for a number of campus resource centers.

#### Cross-Cultural Center

The **Cross-Cultural Center (CCC)**, established at UCI in 1974, was the first multicultural center instituted at any of the UC campuses. The CCC offers a friendly atmosphere and supportive environment for UCI’s diverse student body. It provides meeting space and serves as a “home” for over 40 registered student organizations. Center facilities include two conference rooms and an executive boardroom for group meetings, lounges for socializing, a study room, and a computer lab. The four programmatic areas of the CCC – Diversity & Social Justice Education, Cultural Wellness & Personal Development, Multicultural & Leadership Programs, and Women & Gender Initiatives – recognize and reinforce UCI’s commitment to cultural diversity and social justice. The CCC also coordinates several series of programs such as its Social Justice in Action Series, its Critical Consciousness Speaker Series, and Its Cultural Wellness for Advocates and Allies Series. Other multicultural leadership opportunities include the Reaffirming Ethnic Awareness and Community Harmony (R.E.A.C.H.) Program, the Internship Program, the Volunteer Program, Real Talk, Across the Bridge, the Summer Multicultural Leadership Institute, and various multicultural leadership classes. For additional information contact 949-824-7215 or visit the Cross-Cultural Center website (http://www.ccc.uci.edu).

#### International Center

The **International Center** contributes to the development of campus diversity and internationalization by providing services and programs to the UCI international population and the campus community. Core functions of the International Center include the following: provide expert immigration services, including visa documentation, interpreting immigration regulations and related advising, and SEVIS and immigration compliance; advising services to academic departments on issues related to the enrollment and visa selection for the employment of international students and scholars; serve as advocates for international students and scholars and as their liaison with institutional, local, state, and federal agencies; and provide pre-arrival advising, orientation, and adjustment assistance for international students and scholars and their families.

International Center strives to provide all UCI students, scholars, staff, and faculty the opportunity to engage in programs, events, and services surrounding international education and intercultural learning. Throughout the academic year the International Center hosts welcome and orientation sessions to provide an overview of immigration requirements and UCI resources to international students, scholars, and spouses. The International Center offers programs, workshops, and activities to assist international students and scholars, and to bring together international with domestic students.

International students and scholars at UCI on F-1 and J-1 visas and UCI-sponsored employment visas are required to complete the check-in process upon arrival. The check-in process requires the reporting of a valid address of residence in the United States. Failure to complete the check-in process puts the student’s or scholar’s visa status in jeopardy. All international students and scholars must be informed on the specific visa status requirements and responsibility of maintaining valid visa status. Immigration regulations require that students and scholars maintain updated records at the International Center and follow all visa status requirements. These include submitting copies of visa documents to the International Center; maintaining valid I-20 or DS-2019, passport, and I-94 at all times while in the U.S; reporting changes in name, address, and major to the International Center; and reporting early completion of the program or when the student is planning to withdraw or otherwise no longer will be enrolled at UCI.
Lesbian Gay Bisexual Transgender Resource Center
The UCI Lesbian Gay Bisexual Transgender Resource Center provides a wide range of education and advocacy services supporting intersectional identity development. We foster community, wellness, an open and inclusive environment for lesbian, gay, bisexual, intersex, transgender, queer, asexual, ally, and questioning students, faculty, staff, and the larger campus community. We strive to develop an atmosphere of acceptance and well-being in which the campus community can support the academic mission of the university.

LGBTRC sponsors campuswide events, student activities, student volunteer and leadership opportunities, ally development programs, workshops and seminars for campus courses and organizations, and consultation regarding matters of policy related to sexual orientation and gender identity.

The LGBTRC is open Monday through Friday, 9 a.m. to 5 p.m., and is located in G301 UCI Student Center; 949-824-3277; email: lgbtrc@uci.edu; or visit the Lesbian Gay Bisexual Transgender Resource Center website (http://www.lgbtrc.uci.edu).

Veteran Services Center
The Veteran Services Center provides support services to veteran students, reservists, active duty service members, and eligible dependents of veterans. Assistance includes benefit certification, work-study, orientation, transition assistance, and outreach programs. Specialized services for veterans, reservists (including National Guard), and active duty service members include priority registration and guaranteed/priority housing. Students seeking these benefits must provide appropriate documentation, such as a DD214, contract, or military orders.

The Veteran Services Center is open Monday through Friday, 9 a.m. to 5 p.m., and is located at G304 UCI Student Center; 949-824-3500; email: veteran@uci.edu; or visit the Veteran Services Center website (http://www.veteran.uci.edu).

• Readmission due to military orders. If a student is called on military orders, the readmission fee will be waived. When readmitting, students should meet with their academic counselor to initiate the process and submit proof of their orders.

• Procedures and Policies Pertaining to Students Receiving the California Veteran College Fee Waiver for Dependent of Veterans. Dependents of veterans eligible for the California Veteran Fee Waiver may submit their eligibility letter from a County Veteran Service Office to the UCI Veteran Services Center. Once the letter is submitted, the student’s tuition (including professional school fees) and the student services fee will be waived; all remaining UCI fees are the responsibility of the student. This benefit does not apply to self-supporting programs, such as the MAS Criminology, Law & Society and the part-time MBA programs. Eligibility must be re-established for each subsequent academic year. The student must meet California residency requirements of UCI in order to receive these benefits.

• Procedures and Policies Pertaining to Students Receiving Federal Education Benefits from the Department of Veterans Affairs. Students eligible for Federal Education Benefits from the Department of Veteran Affairs are required to register with the Veteran Services Center, which includes providing their Certificate of Eligibility in order to initiate the process to receive those benefits through UCI. All veterans, reservists, active duty service members, and dependents of veterans who receive these education benefits must be aware of their responsibility to register with this center and submit a Veteran Intake Form and Quarterly Certification Form. Additionally, these students must communicate any changes of unit, enrollment status, or the receipt of non-punitive grades to the Veteran Services Center in order to be in compliance with VA regulations.

• Veterans Affairs Academic Standing Requirement. All students receiving U.S. Department of Veterans Affairs educational benefits must be in good academic standing. An undergraduate student with a cumulative GPA below 2.0 or a graduate student with a cumulative GPA below 3.0 for two consecutive academic quarters will have their VA benefits terminated. Benefits will be reinstated if and when the undergraduate student’s cumulative GPA is 2.0 or above or the graduate student’s cumulative GPA is 3.0 or above. (This policy is separate and distinct from the UCI Normal Progress Requirement and the UCI Academic Standing Requirement. The Veterans Affairs Academic Standing Requirement has to do with the receipt of VA benefits.)

• Readmission for Disqualified Graduate Students. Graduate students who are academically disqualified may be readmitted to the University with a recommendation from their academic unit and the Dean of the Graduate Division. See “Academic Disqualification” in the Graduate Division section of this Catalogue for more information.

• Procedures and Policies Specific to Students Receiving the Post 9/11 GI Bill. Students must submit the Quarterly Certification Form prior to the first of the month that tuition and fees are due. Failure to do so may not allow enough time for UCI to place a Financial Aid award for the student’s percent (%) entitlement of benefits while waiting for the VA payment. This is currently a courtesy award and is subject to change at any time. If at any time the VA fails to pay any portion of the estimated amount placed into the student’s account, the student will be held liable for the unpaid portion.

UCI’s Department of Campus Recreation (http://www.campusrec.uci.edu) provides programs and facilities for students, faculty, and staff to maintain a healthy lifestyle. Campus Recreation is comprised of seven department areas including Facilities, Fitness & Wellness, Intramural Sports, Club Sports, Recreation Activity Classes, Team Challenge, and Outdoor Adventure & Boating.

The Anteater Recreation Center (ARC) (http://www.campusrec.uci.edu/arc) is a 115,000 square foot sports and fitness facility featuring 20,000 square feet of strength and cardio space with 282 cardiovascular and weight machines, and more than 30 tons of free weights. In addition, there is a three-
court gym, a rounded corner multi-use gym, an elevated running track, three racquetball courts, a rock climbing wall, lap and leisure pool, exercise testing, five multipurpose rooms, and a demonstration kitchen and classroom. The ARC Sports Field Complex includes 21 acres of lighted fields that accommodate softball, soccer, and flag football. There are six lighted tennis courts, two outdoor lighted basketball courts, and a roller rink available for Campus Recreation programs and drop-in use.

**Fitness and Wellness** (http://www.campusrec.uci.edu/fitness) encompasses programs for participants to begin or improve their personal fitness levels including group exercise classes such as yoga and aerobics as well as comprehensive health services such as personal training, fitness testing, and massage therapy. Campus Recreation staff are available to provide assistance with gym equipment and fitness goals in the strength and cardio rooms.

**Intramural Sports** (http://www.campusrec.uci.edu/im/index2.asp) are structured leagues which are designed for the “everyday athlete.” All activities feature skill and competitiveness. Sports leagues include basketball, bowling, dodgeball, flag football, floor hockey, indoor and outdoor soccer, softball, volleyball, and many more. Special events and tournaments range from badminton, racquetball, and swimming to table tennis, tennis, track, and wrestling.

**UCI Club Sports** (http://www.campusrec.uci.edu/club) comprise a wide variety of student-managed competitive sports. Clubs travel to compete against other universities across the local area, and some travel nationally. Currently UCI Clubs Sports teams include: Archery, Badminton, Basketball, Biking, Climbing, Crew, Cricket, Dragon Boat, Fencing, Figure Skating, Lacrosse, Brazilian Jiu Jitsu, Japanese Karate, Kendo, Taekwondo, Wushu, Powerlifting, Roller Hockey, Rugby, Running, Sailing, Soccer, Softball, Swimming, Table Tennis, Tennis, Triathlon, Ultimate, Volleyball, Water Polo, and Wrestling.

**Recreation Activity Classes** (http://www.campusrec.uci.edu/classes) consist of non-credit activity classes for students and the UCI community. Classes range from sports clinics to the more unique styles of martial arts like Jiu Jitsu and Muay Thai. An array of dance classes such as hip hop, salsa, and ballroom are also available. Cooking classes held at the ARC Kitchen classroom are also part of the Recreation Activity Classes department area. Students can also earn their CPR or SCUBA certification.

**Team Challenge** (http://www.campusrec.uci.edu/teamup) is a team building and leadership program. Program participants can experience the Odyssey, a high ropes challenge course located at the ARC fields. Customized and facilitated team programs are available on a reservation basis. Team Up! programs led by trained facilitators teach communication, trust, and teamwork while providing students with the chance to test their limits and have fun as a unit.

**Outdoor Adventure & Boating** (http://www.campusrec.uci.edu/outdoor) includes a mixture of outdoor activities and water sports like sailing, kayaking, paddleboarding, rock climbing, and outdoor adventure trips. The sailing program includes both classes and club activities. Classes range from beginner to advanced and are offered quarterly. The sailing club gives members individual access to UCI’s fleet. The rock climbing programs take place on the 35 foot indoor rock climbing wall at the ARC and include classes and climbing memberships. Boating activities take place at UCI’s Crew Base in the Newport Back Bay as well as within Newport Harbor. Annual outdoor adventure trips include a summer Yosemite backpacking trip and the Spring Break Service trip.

**CARE (Campus Assault Resources & Education)**

UCI CARE provides direct services and campus education for issues related to sexual assault, intimate partner violence, relationship health, stalking, and personal safety. The office provides consultation, individual and group counseling, and advocacy through legal and medical processes. CARE staff also provide awareness and prevention education through workshops and trainings, peer education programs, campuswide events, and passive educational campaigns. Annual events include Take Back the Night, Denim Day California, couples retreats, Yoga for Healing, and the Clothesline Project.

CARE is located at G320 Student Center. All services are confidential and free of charge. For more information call 949-824-7273 or visit the CARE website (http://www.care.uci.edu).

**UCI Career Center**

The UCI Career Center assists undergraduate and graduate students with career exploration, internships, job search strategies, and the process of applying for graduate or professional school. Through individual counseling appointments and daily drop-in hours, the Career Center staff helps students to identify skills and interests and learn how to apply them to future careers.

The Career Center provides opportunities for students to connect with employers, alumni, and professionals through workshops, career programs, and career and graduate fairs. UCI students can utilize ZotLink (http://career.uci.edu/students/zotlink) (the Career Center’s job listing service) to find internships, part-time or full-time jobs, and campus jobs. The On-Campus Interview (OCI) program provides an opportunity for students to interview for internship and full-time positions in the Career Center interview rooms. Students can access all job listings and OCI listings at the Career Center website. (http://www.career.uci.edu)
Students are encouraged to get career-related work experience to gain new skills, an edge in the job search and, in many cases, income. The Career Center sponsors the non-academic UCDC and Sacramento Internship Programs where students can apply to be part of a summer internship experience in Washington, D.C. or Sacramento.

The Career Center is located on the Ring Mall across from the Student Center and is open Monday through Friday from 8 a.m. to 5 p.m. Typically, drop-in hours are 11 a.m. to 3 p.m., but hours may vary due to campus holidays and Career Center events. For additional information contact 949-824-6881; or visit the Career Center website (http://www.career.uci.edu).

Center for Student Wellness & Health Promotion

The Center for Student Wellness & Health Promotion (CSWHP) strives to be a leader in collegiate health promotion by focusing on the unique and relevant health needs and concerns of UCI students to support their academic success. CSWHP staff educate and empower students to make informed decisions that support their individual health, as well as support and maintain a healthy campus environment.

CSWHP staff promote healthy choices and behaviors by identifying the specific health needs of the campus; utilizing evidence-based wellness and health promotion strategies; disseminating current and accurate health information; facilitating student development and leadership opportunities; and offering innovative campus programming. The CSWHP employs several staff and has trained peer educators, advises/supports health-related student organizations, and supervises students participating in field study/practicum hours.

CSWHP staff and students present workshops, conduct trainings and classes, and consult with students on their health needs and concerns. Services also include anonymous HIV testing, a lactation station for nursing mothers, a gender-neutral restroom, and a wellness lounge. For additional information visit the CSWHP website. (http://www.studentwellness.uci.edu)

Child Care Services

Child Care Services includes six centers offering programs for children from three months to 12 years of age. The programs are open to children of UCI students, faculty, and staff, with priority enrollment and tuition subsidy available to qualifying students at three of the centers. For information contact 949-824-2100; or visit the Child Care Services website. (http://www.childcare.uci.edu)

Counseling Center

The Counseling Center is committed to helping students achieve optimal mental health and academic success, personal growth, and increased capacity to cope with the stresses of being a university student. In addition, the Counseling Center strives to contribute to the overall excellence and wellbeing of the UC Irvine community. The services offered by the Counseling Center fall into four categories: time-limited clinical treatment, prevention and outreach programs including workshops and courses; mental health consultation; and mental health and professional training. Services are primarily directed to enrolled UC Irvine students, though our mission includes delivery of services and interaction with faculty and staff in the campus community and students' family members. In order to optimally serve all of the campus community, our Center operates from a time-limited contemporary counseling model. The Counseling Center is proud to have a multicultural diverse and interdisciplinary staff which includes psychologists, psychiatrists, social workers, post-doctoral fellows, doctoral interns and student volunteers who serve as peer educators and mentors. The Counseling Center's services are free of charge to currently registered students. Students with chronic and severe mental health issues needing long-term and extensive services are referred to other appropriate community providers. The Counseling Center is located on the second floor of Student Services I, and the Counseling Center Annex is located in the Student Center; 949-824-6457; or visit the Counseling Center website (http://www.counseling.uci.edu).

Disability Services Center

The Disability Services Center (DSC) determines, provides and coordinates disability related accommodations to ensure access for all UCI students with disabilities. Students with varying disabilities – including those with mobility, visual, hearing, learning, and chronic and mental health conditions – may be eligible for disability-related accommodations, academic adjustments, and auxiliary services through this resource center. Staff assists students from the point of their admission to UCI through graduation. Specialized services may include testing accommodations, priority registration, document conversion, adaptive equipment, assistive technology, notes, interpreters, real time captioning, liaisons with faculty and campus departments, and information regarding disability advocacy in the university setting. The DSC provides assistive/adaptive computer technology and training. There is no cost to the student for the services or accommodations provided by the DSC. Students are responsible for acquainting themselves with the procedures for use of accommodations. These procedures are available on the Disability Services Center website (http://www.disability.uci.edu).

Students with disabilities may qualify for reasonable accommodations based on disability-related needs. Students must provide appropriate documentation about their disabilities to the Disability Services Center. Documentation provided to the DSC is confidential. It is the responsibility of the applicant or student to provide this documentation and, if necessary, to cover the cost for such documentation. This includes the cost for learning disability and attention deficit disorder assessments and mental health evaluations. Contact the Disability Services Center or visit the website for more information about disability documentation requirements or to download documentation forms. In most cases there is need for recent documentation about the disability and/or periodic documentation updates. UCI reserves the right to determine the most effective and timely accommodations after consultation with the student about the disability and previous use of accommodations. The provision or use of a disability accommodation does not
guarantee or ensure a certain level of achievement for the student. Students with disabilities must meet the same academic standards as all other students. Some academic adjustments or accommodations require approval of the chair or dean of the student’s academic unit.

Students with disabilities who need accommodations (in particular, reading assistance, textbook conversion including e-text and Braille, American Sign Language interpreting services, real-time captioning services, and adaptive computing technology in campus laboratories) that must be planned or arranged in advance of the start of classes should contact the Disability Services Center as quickly as possible after admission to UCI. Failure to do so may delay or in some cases preclude the DSC’s ability to provide certain accommodations. This advance notice also allows the DSC to document needs, discuss service procedures and student responsibilities, and determine the appropriate accommodations.

Additional information is available from the Disability Services Center: 949-824-7494 (voice), email: dsc@uci.edu; or visit the Disability Services Center website. (http://www.disability.uci.edu)

The Hill

The Hill, bringing you “books...everything UCI and more,” is UCI’s campus store, owned and operated by the University of California. It has been serving students and the wider UCI community since 1981. Located in the UCI Student Center, The Hill stocks all required and recommended textbooks including new, used, rental and digital options, supplies, and examination materials. The Hill also houses UCI authors and general books of interest. To supplement the educational experience of the UCI community, The Hill hosts an ongoing Author Series. This series attracts authors of local and national stature and supports the academic mission of the University by offering a venue for undergraduate and graduate students and faculty to read and discuss their works.

UCI Anteater apparel and gifts are featured in extensive varieties to boost school spirit and pride. The TechHub, The Hill's computer department, carries an extensive line of computers, software, and accessories. AmTech, The Hill's technical services center, offers Apple Certified Mac Technicians who service Macs and PCs for customers' hardware and software support needs.

The Hill is open Monday through Friday from 8 a.m. to 7 p.m., and Saturday from 11 a.m. to 5 p.m. For additional information contact 949-UCI-Hill (824-4455); email: weborder@uci.edu; or visit The Hill website (http://book.uci.edu).

UCI Hospitality & Dining

From a quick bite to eat to an elegantly served catered meal, UCI Hospitality & Dining Services is here to serve the campus community’s dining needs, offering a variety of locations to fit one’s palette.

Locations are conveniently situated throughout the campus to serve your dining needs. At the Student Center dining options include Subway, Wendy’s, Panda Express, Jamba Juice, Bene Great Pasta, Topio’s Pizza, Organic Greens-to-Go, and Wahoo’s Fish Tacos. Starbucks and Zot-N-Go convenience store are located just outside the Student Center, and the C3 Express convenience store is located by Social Sciences Lecture Hall. BC’s Cavern Food Court and Subway are located at Biological Sciences adjacent to Aldrich Park. Cyber A Café can be found in the Claire Trevor School of the Arts neighborhood. Café Med and Med Ed Café are located by the School of Medicine, 20/20 Café at the Gavin Herbert Eye Institute, and a mini convenience at Gottschalk Medical Plaza. Java City is located at Engineering Quad, and Espresso Yourself coffee cart is located in the Berkeley Place courtyard. In the Paul Merage School of Business building, we feature an Au Bon Pain and Starbucks.

Residential Dining commons include Pippin, The Anteatery, and Brandywine. All three locations have theme nights, award-winning chefs, made-to-order meals, and vegetarian and vegan options. The Anteatery and Brandywine offer a late night menu Monday through Thursday. In addition, Pippin Commons features a mini convenience store inside to accommodate students’ last minute needs or cravings.

UCI Catering provides a comprehensive list of menu items to choose from or the option to design your own menu; both can be designed to fit your budget or needs. To view the menus, visit the UCI Catering website (https://ucicatering.catertrax.com) or call 949-824-1423.

UCI Hospitality & Dining Services is located in G318 Student Center; 949-824-4182; or visit the UCI Hospitality & Dining Services website (http://www.food.uci.edu).

Student Housing

On-Campus Housing

Housing Administrative Services coordinates application procedures and contracts for on-campus housing. Approximately 45 percent of UCI’s student body is housed on campus. For more information, including housing rates for the 2016-17 academic year, visit the Student Housing website (http://www.housing.uci.edu).

Undergraduate Housing

Residence Halls. In fall 2016, UCI will open three new residence halls, increasing the total number of beds to approximately 4,500 in two residence hall communities – Mesa Court and Middle Earth – which are within walking distance from the center of campus. Each community houses single undergraduates who are primarily freshmen between 17 and 20 years of age. The communities are composed of clusters of small, mostly coed buildings
housing roughly 48-95 residents in suite-style layouts. Student rooms feature cable television and Internet connections. Each hall has group study rooms, a living room for meetings or informal gatherings, a small kitchen, and card-operated laundry facilities. Both communities offer recreation rooms with video games, TV, and game tables; volleyball and basketball courts; and staffed computer labs.

Mesa Court and Middle Earth have complete food service and dining commons. Students who live in the residence halls participate in a prepaid meal plan. Meals are served three times daily on weekdays (with limited late night hours) and twice daily (brunch and dinner) on weekends. Menus offer a wide selection of foods served cafeteria style at self-serve cereal, deli, and salad bars, and at cook-to-order serving stations featuring cuisines from all over the world. For more information about meal plan options, visit the UCI Dining website (http://ucidanish.com). The halls close during the winter recess, and, although they remain open during the Thanksgiving holiday and the spring recess, no meals are served.

Both Mesa Court and Middle Earth maintain a comprehensive residence life program, designed to help freshmen transition to college. Each hall has a live-in Resident Advisor who provides resources and support to freshmen residents. In each community, special interest halls or hall clusters provide educational programs and informal opportunities to get together with other students who hold similar interests. Community-wide social programs are also offered.

Rates for the 2015-16 academic year (late September through mid-June) were $15,305-$15,710 for a single room; $13,376-$13,781 for a double room; and $11,648-$12,053 for a triple room. (Rates include room and board and vary by the meal plan selected.) Charges are paid in quarterly payments. Rates for 2016-17 will reflect an increase.

Campus Village is an apartment community located in the campus core, next to the Ayala Science Library. Campus Village serves both undergraduate and graduate students, in separate sections of the community. Undergraduate residents must be single under the age of 25, and graduate student residents (including medical and law students, and excluding medical residents and interns) must also be single (and without children). Each two-bedroom apartment is shared by either four undergraduate students or two graduate students. Most units are furnished; all include a bathroom, carpeting, draperies, a stove, and a refrigerator. All apartments provide cable television and Internet connections. The Campus Village Community Center offers a variety of facilities and programs including a fitness center, recreation rooms, study rooms, and a computer lab with Internet access. Rates for the 2015-16 year-round undergraduate contract (June – June), including utilities, were $7,868 per student for a furnished apartment, and $7,022 per student for an unfurnished apartment. Rates for 2016-17 will reflect an increase.

No meal plan is included in the housing contract, however students may purchase a voluntary meal plan through the UCI Dining website (http://ucidanish.com). These rates also include utilities and reservation fees.

Arroyo Vista is a community of 42 sponsored academic theme, fraternity and sorority chapter houses for single undergraduates under the age of 25. Each house contains 8, 12, or 16 furnished double-occupancy rooms (bed, desk, and wardrobe closet for each resident). Residents share bathroom facilities on each floor, a spacious living room with fireplace, a study room, a fully equipped kitchen with dishwasher and microwaves, and laundry facilities. Some houses also offer a two-person suite with a private bathroom. All bedrooms in Arroyo Vista feature cable television and Internet connections. No meal plan is included in the housing contract. Students make their own meal arrangements, choosing to cook for themselves or to purchase a voluntary meal plan through the UCI Dining website (http://ucidanish.com).

More than two-thirds of the houses are designated Academic Theme Houses, some of which are sponsored by academic programs. Theme houses offer educational programs that advance both a student’s academic interests and overall University experience. The remaining houses are available to fraternity and sorority chapter organizations; consult individual Greek chapters for information. The rate for the 2015-16 academic year was $6,200 for a double-occupancy room and $7,748 for the two-person suite. Rates for 2016-17 will reflect an increase.

Graduate/Family Housing

Two on-campus apartment communities serve full-time graduate and medical students, and students with families (married, in a domestic partnership, and/or with custody of minor children). Both of those communities also serve undergraduates with families or who are single and 25 years of age or older. Single graduate students without children may also live in Campus Village apartments. Rental rates in all three communities tend to be lower than for comparable units in the local rental market.

Verano Place offers 852 one-, two-, and three-bedroom apartments. All have carpeting, draperies, a stove and a refrigerator, and provide cable television and Internet connections. They are attractive and considerably lower in rent than comparable units in the local communities. Monthly rents for 2015-16 ranged from $375-$760 for single students sharing an apartment, and from $963-$1,520 for families. Rates for 2016-17 will reflect an increase.

Palo Verde offers 652 apartments for full-time graduate students (single students, students who are married or in a domestic partnership, and those with families). All apartments have carpeting, draperies, a stove and a refrigerator, and provide cable television and Internet connections. Monthly rents for 2015-16 ranged from $644-$1,082 for single students sharing an apartment, and from $821-$1,977 for families. Rates for 2016-17 will reflect an increase.

Campus Village is a mixed community serving both graduate and undergraduate students who are single (and without children). Refer to the Campus Village section above for more details. The 2015-16 monthly rental rate for graduate students living in Campus Village was $745. Rates for 2016-17 will reflect an increase.
To Apply
Housing information and application instructions are available at the Student Housing website (http://www.housing.uci.edu). Undergraduates apply for housing online via the UCI Admissions website (http://www.admissions.uci.edu) after receiving admissions notification and submitting their Intent to Register (SIR). Graduate applicants can also find housing information and a link to the online application on the UCI Student Housing website. A $20 nonrefundable processing fee must accompany the housing application when it is submitted.

Two years of on-campus housing are guaranteed to all freshmen, and one year of on-campus housing is guaranteed to transfer undergraduate students who are single, under the age of 25, enrolling for fall quarter, and who meet the housing application and contract deadlines. To qualify for this guarantee, students must apply for housing and submit their Statement of Intent to Register (SIR) by the stated deadlines: May 1, 2016 for freshmen, and June 1, 2016 for transfer students. Applications received after these dates will be handled in the order received, as space becomes available.

The University of California, Irvine guarantees an offer of on-campus housing to newly admitted fall 2016 Ph.D., M.F.A. and J.D. students. Housing offers will be for one of six graduate housing communities and must be accepted prior to the first day of classes. Guaranteed housing extends until a student’s normative time to degree for their academic program. Newly admitted students must submit their Statement of Intent to Register (SIR) 24 hours before they apply for housing online (beginning March 1, 2016). Guaranteed students must apply by 4:30 p.m., May 1, 2016, and will be notified of their housing community assignment by mid-May. Non-guaranteed students can apply at any time to get on the housing wait-list.

Students who are eligible service members, reservists, and veterans are guaranteed an offer of on-campus housing. Visit the UCI Veteran Services Center website (http://www.veteran.uci.edu) for information or call 949-824-3500.

Alternative Housing on the UCI Campus
Vista del Campo, Vista del Campo Norte, Camino del Sol and Puerta del Sol Apartments – four on-campus privately owned complexes managed by American Campus Communities – offer furnished apartments with individual leases for UCI students who are single or married/domestic partners without children. Vista del Campo, Vista del Campo Norte, and Puerta del Sol house both undergraduate and graduate students. Camino del Sol is an undergraduate community. Community information can be found at the Vista del Campo website (http://www.vistadelcampoliving.com/student-apartments/ca/irvine/vista-del-campo) or call for information: Vista del Campo, 949-854-0900; Vista del Campo Norte, 949-856-4600; Camino del Sol, 949-737-7000; or Puerta del Sol, 949-737-7017.

Housing Administrative Services
Services are available to assist students during the application and contracting process, as well as those looking for off-campus housing. The Anteater Housing Network, an online housing and roommate finder, provides easy access to listings of local rental properties as well as message boards to find roommates, sublets, buy/sell furniture, and more. Students must log in with their UCI NetID and password to view listings. The Living Around UCI Guide contains a wealth of information for first-time renters and those new to the area, including a local directory for shopping, banking, utility companies, and other services. For more information, contact a Housing Advisor at 949-824-6811, send email to housing@uci.edu, or visit the Off Campus Housing Services website (http://www.housing.uci.edu/och).

UCI Student Center & Event Services
The UCI Student Center serves as a hub for campus life and community engagement. With over 340,000 square feet of space, the Student Center is home to two food courts, a pub, a games room, a computer lab, a convenience store, study space, The Global Viewpoint Lounge, The Hill (UCI’s bookstore), The UPS Store, UCIMC blood donor center, banking institutions, and a Conference Center with a wide variety of flexible venue spaces and a state of the art audio/visual system. In addition, the Student Center houses campus offices and services including Associated Students (Student Government & Student Media), Student Life & Leadership, Housing Administrative Services, Center for Student Wellness & Health Promotion, Hospitality & Dining Services, the Blackstone LaunchPad Entrepreneur Center, CARE, the Lesbian Gay Bisexual Transgender Resource Center, the International Center, and the Veteran Services Center.

The Event Services department, which consists of a team of Certified Meeting Professionals and an experienced operations crew, coordinates approximately 70,000 events each year that are sponsored by student organizations, campus departments and public groups, and are attended by members of the campus and surrounding community. An ACCED-I certified One-Stop-Shop, Event Services assists internal and external clients in coordinating all event production services while having one contract, one contact, and one bill.

For more information visit the Student Center & Event Services website (http://www.studentcenter.uci.edu).

Student Government
Associated Students (ASUCI)
All UCI undergraduate students are members of the Associated Students, UC Irvine (ASUCI). ASUCI is the student representative body that advocates to and is liaison between the UCI administration, faculty, and staff.

ASUCI is comprised of three branches of government: the Executive Branch (five elected members and over 60 appointed officer positions), Legislative Council (21 elected members), and the Judicial Board (seven appointed members). Guided by their constitution and by-laws, these student
representatives manage the $18 per student quarterly fee (less summer) that supports student life activities, advocacy programs, academic programs, publications/communication, and professional support staff as well as essential campus services. For more information contact the Student Government & Student Media offices at 949-824-2400; asuci@uci.edu; or visit the Associated Students, UC Irvine (ASUCI) website (http://www.asuci.uci.edu).

**ASUCI Student Life Activities** include annual events such as Shocktoberfest, Homecoming, Wayzgoose, Soulstice, and Summerlands. Ongoing events include such programs as major concerts, “Rally Alley” spirit events before athletic games, Defend the Bren, spirit days, and weekly movie screenings. This organization also sponsors student educational programs such as the Visions Leadership class (1.3 units), Speakers & Debate series, UTeach, and the Anteater Mentorship Program.

**ASUCI Advocacy programs** include Elections (campus and local), Undergraduate Senate, External Affairs and the Lobby core seminar course (1.3 units), where students travel to Sacramento to represent student issues. The ASUCI Legislative Council nominates undergraduate students for positions on UCI administrative, Academic Senate, and ad hoc committees, and ensures graduate students have a voice in policy and decision-making on the UCI campus.

**ASUCI Services** include the following:

**Club and Organization Accounting:** The ASUCI Business Office provides banking and accounting services to registered campus organizations.

**Anteater Express:** The Anteater Express shuttle program provides alternative transportation service to all students, staff, and affiliated members of the UCI community, with fixed shuttle routes to 60 designated stops on and off campus. The Express Shuttle carried more than two million passengers last year and facilitates campuswide efforts to reduce traffic and improve air quality while helping the UCI community access the services available on campus. For detailed information regarding services, routes, and schedules, visit the Anteater Express website (http://www.shuttle.uci.edu).

**Vendor Fair:** The Vendor Fair program is a student-run and managed program where students select local vendors and invite them to the UCI campus for one week approximately four times each year.

**The Green Initiative Fund (T.G.I.F.):** The Green Initiative Fund (T.G.I.F.) is a funding board that allocates money toward sustainable projects and educational programs on campus. Students voted to enact a $3.50 per quarter T.G.I.F. fee to support this program in spring 2009.

**The Student Programming Funding Board (S.P.F.B):** The goal of this board is to provide funding to campuswide programs coordinated by registered undergraduate organizations that enhance the quality of life, encourage school spirit, and promote social, cultural, and educational development.

**Discount Ticket Program:** ASUCI offers discount tickets to local attractions which include AMC theaters, Edwards/Regal cinema, Disneyland, Universal Studios, Magic Mountain, Knott’s Berry Farm and more. The program is located in the Student Government & Student Media offices near the Zot Zone and is open Monday through Friday from 8 a.m. to 5 p.m.; telephone 949-824-7555. Tickets can also be purchased online 24-7 at the ASUCI Discount Tickets website (https://www.asuci.uci.edu/tickets), including Disneyland, Legoland, and Universal Studios.

**Associated Graduate Students**

All graduate and professional school students are members of the Associated Graduate Students (AGS). AGS works to improve the graduate student quality of life and functions as a liaison between graduate students and the UCI administration, faculty, and staff by addressing concerns and working to resolve grievances.

AGS also provides graduate students with numerous social and cultural events of benefit to the graduate community. In addition to hosting quarterly social events designed to create a sense of community, the organization allocates funds toward graduate student development and special projects.

The AGS Council nominates graduate students for positions on UCI administrative, Academic Senate, and ad hoc committees, and ensures graduate students have a voice in policy and decision-making on the UCI campus. AGS also works on systemwide issues affecting graduate and professional students by membership in the UC Student Association (UCSA).

For more information, visit the Associated Graduate Students website (http://www.ags.uci.edu).

**Associated Medical Students**

The Associated Medical Students (AMS) Council, along with the AGS Council, represents the medical student body in all matters relating to the UCI campus, the UC Office of the President, and the community. Medical students are members of AGS and have access to those services. In addition, AMS utilizes a portion of the quarterly AGS fee to provide funding for medical student activities that benefit the School of Medicine community.

**The Paul Merage School of Business Student Association**

The School’s Council, along with the AGS Council, represents the graduate Business student body in all matters relating to the UCI campus, the UC Office of the President, and the community. Graduate Business students are members of AGS and have access to those services. In addition, the School’s Council uses a portion of the quarterly AGS fee to provide funding for student activities that benefit The Paul Merage School of Business community.
The Student Bar Association

All UCI Law students are members of the Student Bar Association (http://www.law.uci.edu/campus-life/student-organizations/orgs/sba.html) at the University of California, Irvine School of Law. The Student Bar Association serves as a primary conduit for students to deliver concerns and contribute ideas to the administration. The Student Bar Association distributes funds to student groups to help members pursue their passions within the study of law. As the students, faculty, and administration work to build the law school of the 21st century, the Student Bar Association works to ensure that all students have the support and resources they need to excel.

Student Health Center and the UC Student Health Insurance Plan

All students registered in a degree program are eligible to access services at the Student Health Center (SHC), located at the corner of East Peltason and Pereira Drive. The SHC is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC). SHC also administers the UC Student Health Insurance Plan (UC SHIP).

Facilities and services at the Student Health Center include outpatient clinics staffed by board certified and/or licensed medical, nursing, and dental professionals; a clinical laboratory; radiology; pharmacy; and insurance office. The SHC is open from 8 a.m. to 5 p.m., Monday through Friday. Extended hours may be available during the academic year and, if so, they will be posted on the Student Health Center website (http://www.shs.uci.edu).

General medical services are offered at the SHC by appointment only and include primary care, women's health, and men's health. Urgent conditions are triaged and, if an appointment is available, care is provided immediately. If an appointment is unavailable for an urgent condition, the student would be referred to a local urgent care center. Specialty services are also available by appointment and include psychiatry, dermatology, gynecology, gastroenterology, orthopedics, sports medicine, ear/nose/throat, chiropractic services, nutrition therapy services, and minor surgery. The Nurse Clinic provides immunizations, health screening, travel consultation, and basic health education. The Dental Clinic offers basic dental examination, routine dental cleaning, restorative procedures (fillings and crowns), and selected specialty services.

Full primary health care and ancillary services are available throughout the academic year. Certain specialty care services may be reduced during the summer and, if so, the SHC will provide a referral to a community specialist, if necessary. At the Student Health Center, fees are generally lower than those of comparable services in the community. Students not enrolled in the University of California Student Health Insurance Plan (UC SHIP) will pay fees for services through their ZotAccount (Campus Billing System) and may submit a claim to their insurance plans for reimbursement. Students who are enrolled in UC SHIP will pay any required co-pays through their ZotAccount (Campus Billing System). Students enrolled in UC SHIP will pay any required co-pays through their ZotAccount (Campus Billing System).

Although not required, all students are encouraged to have an updated physical examination to screen for health problems. The examination may be performed by the student's own physician or performed at the Student Health Center for a fee. Students enrolled in UC SHIP are covered 100% for this service when performed at the SHC or by a PPO provider. Students transferring from another UC campus where their medical records are on file should have the records transferred to the UCI Student Health Center.

For the most up-to-date information about the Student Health Center and the UC Student Health Insurance Plan, visit www.shs.uci.edu.

Student-Produced Media

UCI students manage five Student Media products on campus, including the weekly campus newspaper entitled the New University (http://www.newuniversity.org), which is distributed every Tuesday in over 80 locations on campus; operate a radio station, KUCI (http://www.kuci.org) (88.9 FM); produce Anthology (http://www.yearbook.uci.edu), the award-winning UCI yearbook; operate Anteater TV; and produce several Alternative Media newsletters and magazines.

Intercollegiate Athletics

UCI Intercollegiate Athletics Program

UCI's Intercollegiate Athletics Program features 18 sports, with nine men's teams and nine women's teams. Men's sports include baseball, basketball, cross country, golf, soccer, tennis, outdoor track and field, volleyball, and water polo. UCI's men's teams compete in the National Collegiate Athletic Association (NCAA) Division I, and the University is a member of the Big West Conference. UCI also competes in the Mountain Pacific Sports Federation (MPSF) in men's volleyball and water polo. The UCI women's teams also are members of NCAA Division I and the Big West Conference,
competing in basketball, cross country, golf, soccer, tennis, outdoor track and field, volleyball, and water polo. Women’s indoor track and field competes in the MPSF.

UCI, since opening in 1965, has captured 28 national team championships in nine different sports, including men's volleyball in 2012 and 2013, with 64 individuals winning national titles and over 500 earning All-American honors. In the last nine years, 44 Anteater teams have finished in the nation’s Top 25 final national rankings and UCI has won 84 conference championships since 1977.

Each spring, the UCI Intercollegiate Athletics Program presents Scholar-Athlete recognition to those student-athletes who maintained a 3.0 GPA over the previous three quarters. In the last 33 years, 4,040 UCI student-athletes have earned the award, including 151 in 2014-15.

In eight of the past nine years, UCI has finished in the nation’s top five of the Division I-AAA All-Sports Trophy competition (recognizing NCAA postseason athletic achievement among the nation’s Division I non-football schools). UCI finished first in 2007 and has been ranked second in three of the past six years.

The mission of UCI Intercollegiate Athletics is to facilitate and enrich the education and personal growth of its students through their participation in competitive NCAA Division I athletics. Intercollegiate Athletics is committed to the welfare of student-athletes and staff, and advocates an environment that promotes excellence in athletic and academic performance, sportsmanship, diversity, and gender equity. Intercollegiate Athletics also supports the University of California’s mission of public service and serves to generate a unifying spirit among students, faculty, staff, and alumni that transcends communities, cultures, and generations.

The Intercollegiate Athletic offices are located in the Intercollegiate Athletics Building (IAB); UC Irvine Sports website (http://www.ucirvinesports.com); telephone 949-824-6931.

**Athletic Facilities**

On-campus facilities include the Bren Events Center, which seats 5,000 for intercollegiate basketball and volleyball. The Crawford Hall complex also includes the Santora Elite Training Center, Al Irwin Academic Center, and sports medicine. Crawford Court gymnasium has 760 chair-back seats for volleyball. Outdoor facilities include Anteater Stadium, a 2,500-seat facility for soccer and track; the 500-seat Anteater Tennis Stadium; Cicerone Field at Anteater Ballpark, home to the baseball program; and a five-acre multipurpose field complex.

UCI’s Anteater Aquatics Complex houses the intercollegiate water polo teams. This 64-meter aquatics facility is designed with a movable bulkhead and is large enough to accommodate multiple activities simultaneously.

Office of Research

James W. Hicks, Interim Vice Chancellor for Research

The mission of the Office of Research (http://www.research.uci.edu) (OR) is to support and enhance the creative and scholarly activities of UCI faculty. OR provides central campus administrative support for UCI’s research programs. It includes Research Administration, University Laboratory Animal Resources (ULAR), Research Development, Administrative Operations and Planning, and the Office of the Vice Chancellor. Each of these units contributes to the overall objective of facilitating campus research activities. Additionally, the Office of Research oversees the operation of many research centers and institutes.

Below is a comprehensive list of centers and institutes that report (directly or indirectly) to the Vice Chancellor for Research.

Special Research Programs

Special Research Programs (SRPs) exist at UC Irvine to provide a structure for collaborative research activities that do not fit the definition and purpose of an Organized Research Unit, a Campus Center, or a School Center.

Beckman Laser Institute

The Beckman Laser Institute (BLI) was established in 1982 by Dr. Arnold O. Beckman and Dr. Michael W. Berns as an interdisciplinary center for the development and application of optical technologies in biology and medicine. Since the opening in 1986, Beckman Laser Institute has grown to include 18 faculty and their 130 affiliated students, postdoctoral fellows, technical staff, and administrative support. BLI is one of five national Beckman Institutes.
supported by the Arnold and Mabel Beckman Foundation. BLI is dedicated to cutting-edge interdisciplinary research and the interface of physical science, engineering, and biology. Because BLI also houses a medical clinic, it is unique in its capacity for conducting translational research that moves basic technologies rapidly from “benchtop to bedside.” For more information visit the Beckman Laser Institute website (http://www.bli.uci.edu).

California Institute for Telecommunications and Information Technology (Calit2)
Calit2 is a two-campus multidisciplinary research institute established by the State of California in 2000. One of four University of California Institutes for Science and Innovation, Calit2 is a partnership between academia and the business community. The Institute’s unique research approach integrates academic intellectual capital across a wide range of disciplines with industry expertise. In collaboration with its sister division at UC San Diego, Calit2@UCI seeks innovative IT approaches that will benefit society and ignite economic development in the state and throughout the country.

More than 150 UCI faculty, 250 students, and 100 industry partners are actively engaged in Calit2 research areas that include the environment, transportation, emergency management, health care, education, and entertainment.

Calit2 also strives to prepare students for successful careers after graduation; the Institute’s programs include SURF-iT, a summer undergraduate opportunity that immerses students in hands-on research, as well as a graduate fellows program that helps fund a select group of students doing multidisciplinary, IT-focused graduate work. For more information visit the Calit2 website (http://www.calit2.net).

Institute for Clinical and Translational Science
The Institute for Clinical and Translational Science (ICTS) in the Office of Research is a uniquely transformative, novel, and integrative academic home for clinical and translational science with the resources to train and advance a cadre of well-trained multi- and interdisciplinary investigators and research teams. The Institute facilitates access to innovative research tools and information technologies to promote the application of new knowledge and techniques to patient care. ICTS assists basic, translational, and clinical investigators, community clinicians, clinical practices, networks, professional societies, and industry to develop new professional interactions, programs, and research projects. ICTS fosters a new discipline of clinical and translational science that is much broader and deeper than their separate components. The faculty members associated with ICTS are instrumental in supporting students in related advanced degree programs via their grants and other sources of financial support. ICTS consists of several units: Pilot and Collaborative Translational and Clinical Studies; Translational Technologies and Resources; Development of Novel Clinical and Translational Methodologies; Biomedical Informatics (including the Center for Medical Informatics); Design, Biostatistics, and Clinical Research Ethics; Regulatory Knowledge and Support; Participant and Clinical Interactions Resources; Community Engagement; and Research Education, Training, and Career Development. More information is available at the ICTS website (http://www.icts.uci.edu).

The Intel Science and Technology Center (ISTC) for Social Computing
Launched in June 2012, the Intel Center for Social Computing was established to conduct foundational research into the relationship between information technology and society. Centered at UCI, it brings together an interdisciplinary group of researchers from leading universities across the United States, including experts in social media, digital culture, user interfaces, cultural computing, and participatory design. Learn more at the ISTC website (http://isr.uci.edu/content/uci-home-intel-science-and-technology-center-social-computing).

Sue and Bill Gross Stem Cell Research Center
The vision of UCI's Sue and Bill Gross Stem Cell Research Center (SCRC) is to progress the understanding and therapeutic potential of stem cell science toward the improvement and relief of human disease. Development of SCRC is built upon the campus’s long-standing strengths in neuroscience, developmental biology, and pharmacology, and benefits from faculty collaborations with other UCI Organized Research Units and Centers. Sue and Bill Gross Hall: A CIRM Institute was dedicated in May 2010 and is one of 12 buildings in the state funded by taxpayer support through the California Institute for Regenerative Medicine. “Gross Hall” is home to UCI’s world-class faculty, clinicians, and training fellows in stem cell research, and will include a “federal-free” core lab facility outfitted with state-of-the-art equipment critical to human embryonic stem cell research. For more information visit the SCRC website (http://stemcell.uci.edu).

Thesaurus Linguae Graecae®
The Thesaurus Linguae Graecae (TLG)® is a research project that was established at UCI in 1972, thanks to a gift by UCI alumna Marianne McDonald. Its goals are to create a comprehensive digital library of Greek literature from antiquity to the present era; to conduct literary research using collected texts; and to apply technological innovation in these endeavors. The TLG® corpus currently contains more than 105 million words of Greek text from Homer (8 c. B.C) to the fall of Byzantium in A.D. 1453 and beyond.

TLG® research activities combine the traditional concerns and methodologies of philological and literary study with the most advanced features of computer technology. Included among current research foci are the identification of ancient Greek literary and documentary materials from various literary-historical periods; the conversion of these materials into digital form using modern methods of text encoding; the enhancement of automated text-correction routines; and the formulation of criteria for the lexical analysis and categorization of the texts in the corpus. The full corpus is available to more than 2,000 subscribing institutions and thousands of individuals in 58 countries worldwide.

TLG®’s library holdings enhance those of the UCI Langson Library, and TLG® conferences and scholarly visits afford faculty and students contact with eminent scholars in related fields. The Thesaurus Linguae Graecae® has made UCI a major source of Classics research activity. For more information visit the TLG website (http://www.tlg.uci.edu).
University of California Humanities Research Institute

The University of California Humanities Research Institute (UCHRI) is a multicampus research program of the University of California, serving all 10 campuses in the UC system. Founded in 1987 and headquartered at the UC Irvine campus, the Institute promotes collaborative work representing different fields and institutions both within and beyond the University of California. UCHRI addresses topics in traditional humanities disciplines, as well as in new areas intersecting with social and natural sciences, technology, art, medicine, and the professions. Stressing interdisciplinary collaborative research, UCHRI bridges gaps between disciplines across the humanities and human sciences and seeks to overcome the intellectual and institutional barriers that can separate the humanities from other fields.

The Institute is also an integral part of the newly funded system-wide UC Humanities Networking Initiative. In this role, UCHRI provides support for the Society of Fellows in the Humanities and the Consortium of Humanities Centers. UCHRI is a founding member of HASTAC, the Humanities, Arts, Science and Technology Advanced Collaboratory, a consortium of humanists, artists, social scientists, scientists, and engineers committed to new forms of collaboration across communities and disciplines fostered by creative uses of technology.

UCHRI also administers the UC Consortium in California Studies; the Andrew Vincent White and Florence Wales White Graduate Student Scholarship supporting dissertation research in the humanities or theoretical social sciences and medicine; the UC-University Utrecht faculty collaborative research grants; and the annual summer Seminar in Experimental Critical Theory.

UCHRI, in partnership with Duke University, administers the Digital Media and Learning Competition, a $2-million annual program funded by the MacArthur Foundation to award emerging leaders who use digital technologies to envision the future of learning.

For additional information, contact the University of California Humanities Research Institute, 4000 Humanities Gateway, Irvine, CA 92697-3350; 949-824-8180; uchri@uci.edu; or visit the UCHRI website (http://uchri.org).

Organized Research Units

Organized Research Units (ORUs) normally consist of an interdisciplinary group of faculty, students, and other researchers engaged in a continuing program of multidisciplinary or interdisciplinary research, supported by both University and extramural funding. The work of some ORUs is directed toward the solution of complex contemporary problems, while others conduct basic research essential to the understanding of natural or social phenomena or of humanistic ideas and expressions. The following ORUs have been established on the Irvine campus.

AirUCI

AirUCI is a research team based at UCI focused on probing a new type of chemistry that occurs in the atmosphere at the interface between air and water. Funded by the National Science Foundation (Divisions of Chemistry and Atmospheric Sciences), AirUCI began in August 2002 as a Collaborative Research in Chemistry (CRC) group and was accepted as an ORU in July 2008.

Chemical reactions that play key roles in the formation of smog, acid rain, and in global climate change are known to occur between gases, as well as inside liquid droplets that are present in the atmosphere in the form of airborne particles, fogs, and clouds. Only recently has it been apparent that chemical reactions also occur right at the interface between air and these atmospheric droplets. Both the speed with which these interface reactions occur and the manner in which they take place may be quite different from reactions in either the gas or liquid. AirUCI’s scientific team combines theory, experiments, and computer modeling of air quality to provide new insights into how this chemistry at interfaces impacts the atmosphere. More information is available at the AirUCI website (http://airuci.uci.edu).

Cancer Research Institute

The UCI Cancer Research Institute (CRI) is an Organized Research Unit dedicated to basic cancer research. The CRI has 55 faculty affiliates from departments in the Schools of Biological Sciences, Engineering, Medicine, and Physical Sciences. The CRI supports faculty research, organizes cancer-related training, and functions as the basic sciences arm of the UCI Chao Family Comprehensive Cancer Center. The CRI offices are located in Sprague Hall on the UCI main campus; Sprague Hall is a facility dedicated to research in cancer and genetics. Additional information is available at the CRI website (http://cri.bio.uci.edu).

Center for Complex Biological Systems

The UCI Center for Complex Biological Systems (CCBS) promotes research and education in the area of systems biology broadly defined, which includes aspects of synthetic biology, genomics and functional genomics, computational biology, mathematical biology, biophysics, bioengineering and molecular biology. The goal is to develop a more comprehensive and accurate understanding of complex biological systems and their behaviors. The basic approach is to facilitate the formation of multidisciplinary research teams to address the most critical questions.

Major support for CCBS is provided by a grant (P50-GM076516) from the National Institute of General Medical Sciences (NIGMS), as part of the National Centers for Systems Biology program (http://systemscenters.org). Additional funding for CCBS educational activities is provided by the National Institute of Biomedical Imaging and Bioengineering and the Eunice Kennedy Shriver National Institute of Child Health and Human Development. Additional information is available on the CCBS website (http://ccbs.uci.edu).

Center for Embedded Computer Systems

The Center for Embedded Computer Systems, established as an informal center in 1998, was recognized as an ORU in 2001. The Center provides the organizational and administrative structure for researchers at UCI, UCR, and UCSD to conduct leading-edge interdisciplinary research in embedded
systems, develop innovative design methodologies, and promote technology and knowledge transfer for the benefit of the individual and society. The research program focuses on three application domains: (1) Communications, including infotainment, information appliances, multimedia, personal imaging, and wireless; (2) Automotive, including collision avoidance, control/sensors, entertainment, and emergency services; and (3) Medical, including diagnosis, drug delivery, imaging, implanted devices, and monitoring. Additional information is available on the CECS website (http://www.cecs.uci.edu).

Center for Research on International Migration
The purpose of the UCI Center for Research on International Migration (CRIM) is to foster and conduct basic and policy-relevant research on international migration, with a main focus on U.S. immigration. In order to encourage multi-investigator, multi-disciplinary, and interdisciplinary research projects, the Center organizes informal discussions of ideas for future research projects, “brainstorming” sessions about research funding opportunities, “brown-bag” presentations of research findings, and workshops and conferences. Much of the Center’s research focuses on the multi-generational incorporation experiences of immigrant groups in the United States, especially those occurring in diverse contexts such as Southern California. More information is available at the CRIM website. (http://www.immigrationresearch.uci.edu)

Center for Virus Research
The Center for Virus Research (CVR) seeks to foster interdisciplinary scholarship, training, and research among virologists and other faculty. Research on viruses provides a biological and technological foundation from which much has been discovered concerning the basic molecular processes of organisms. Viruses supply some of the most useful experimental models for disease, cancer, immunity, and genetic systems of gene control. In addition, viral-based technology is being vigorously pursued and developed in the context of gene therapy and is teaching us much about the control of cellular processes. With the growing worldwide threat of emerging viral diseases, interest in virus research at all levels has intensified and has taken on a new global perspective. Previously separate disciplines such as molecular biology, pathogenesis, evolutionary biology, neurology, and radiological sciences can now be readily linked by virus research.

The CVR is also committed to advanced post-graduate training. In addition to shared facilities and the seminar and symposia series, the CVR oversees two training grants. Since graduate training in virology encompasses six departments in three schools, the CVR has also become the focus and administrative point for the organization of graduate virology courses and the virology track of the interdisciplinary graduate program in Cellular and Molecular Biosciences (CMB). For more information visit the Center for Virus Research website (http://cvr.bio.uci.edu).

Genetic Epidemiology Research Institute
The Genetic Epidemiology Research Institute (GERI) was established in 2004 and brings together scientists from epidemiology, developmental and cell biology, molecular biology and biochemistry, evolutionary biology, genetics, immunology, statistics, bioinformatics, and environmental and behavioral sciences to answer complex questions that can best be explored through an interdisciplinary approach. GERI (1) combines epidemiologic approaches with basic science methods to test hypotheses related to genetic bases of the etiology and progression of disease; (2) facilitates research to apply newly discovered molecular biological processes and genetic characteristics in health and disease in well-characterized human populations; (3) provides epidemiological information that will influence the understanding of the basic processes leading to disease, such as environmental and lifestyle factors, and to test their effect as modifiers of genetic predisposition, thus providing the foundation for disease prevention; and (4) uses advances in information sciences and communication technology to allow for efficient data mining and pattern recognition for genetic epidemiological data. For more information visit the GERI website (http://www.geri.uci.edu).

Health Policy Research Institute
The Health Policy Research Institute (HPRI) is an interdisciplinary faculty research organization dedicated to improving the quality of care and reducing the disparities in health care. Through research, its faculty and associates translate scientific findings into practice by uniting clinical sciences with the social and behavioral science fields of economics, psychology, anthropology, sociology, and business. This unique platform provides the basis for HPRI’s research results to directly effect health policy and the health of the local community and the public.

HPRI is committed to building the center into a nationally recognized focal point for health care research. HPRI has four principal functions: (1) to produce high-level health policy research in the areas of quality of chronic disease care (i.e., diabetes, cancer, nursing home care) and reduce health disparities and improve quality of care for ethnic minorities; (2) to disseminate research findings to UCI’s faculty and students through seminar series, meetings, and publications; (3) to serve as the research center for UCI graduate and undergraduate students who have health interests; and (4) to support improvements in patient health and safety and organizational improvements in the UCI health care system.

HPRI’s achievement of these goals begins with its faculty—an interdisciplinary group of national leaders representing health services research, health economics, clinical epidemiology, psychometrics, and behavioral sciences in medicine. The current research led by HPRI’s members and its campuswide collaborators enhance UCI as one of the best research universities in the country. For more information visit the HPRI website (http://www.healthpolicy.uci.edu).

Institute for Genomics and Bioinformatics
The Institute for Genomics and Bioinformatics (IGB) provides an organizational structure for interdisciplinary research and training in genomics, proteomics, bioinformatics, chemoinformatics, and computational biology—emerging scientific disciplines that are revolutionizing biology, medicine, and society. IGB computational and life scientists are working together to pioneer fundamental processes for reverse engineering gene and protein networks to understand complex biological systems. Through these interdisciplinary collaborations, IGB scientists are creating new theoretical, algorithmic, and software advances in storing, retrieving, networking, processing, modeling, analyzing, navigating, and visualizing biological information. In turn, their computational and computer science accomplishments are providing methods, predictions, and new hypotheses that are driving biological research in
previously unanticipated ways. This scientific cross-fertilization is enriching both fields and will continue to do so in the coming decades. More complete descriptions of the Institute's research and training programs are available at the IGB website (http://www.igb.uci.edu).

Institute for Immunology
The UCI Institute for Immunology currently comprises 33 faculty members from the Francisco J. Ayala School of Biological Sciences and the School of Medicine, whose research and instructional efforts are in immunology. It integrates the immunological research and educational activities of multiple departments, including Molecular Biology and Biochemistry, Microbiology and Molecular Genetics, Physiology and Biophysics, Pathology, Medicine, and Neurology. The activities of the Institute extend to synergize with allied areas of research including biomedical engineering, public health, and physical rehabilitation. The major mandate of the Institute for Immunology is to consolidate and further the research and training/instructional efforts in immunology at UCI, thereby promoting the rapid development of world-class research and outstanding graduate and medical training programs in immunology. For more information visit the UCI Institute for Immunology website (http://www.immunology.uci.edu).

Institute for Mathematical Behavioral Sciences
The Institute for Mathematical Behavioral Sciences fosters research in the application of mathematical models and methods to describe and to better understand human behavior, both individual and social. Mimicking the successful interaction between mathematics and the physical sciences, a goal of the Institute is to generate successful interactions between mathematics and the behavioral and social sciences. The Institute sponsors specialized seminars and colloquia, a visiting scholars program, workshops, and focused research groups of faculty, students, and visitors, and it maintains a Technical Report Series. Participants include faculty from the Departments of Anthropology, Cognitive Sciences, Economics, Logic and Philosophy of Science, Political Science, and Sociology in the School of Social Sciences; the Department of Mathematics in the School of Physical Sciences; the Department of Electrical Engineering and Computer Science in the Henry Samueli School of Engineering; the Donald Bren School of Information and Computer Sciences; and The Paul Merage School of Business. Additional information is available at the Institute for Mathematical Behavioral Sciences website (http://www.imbs.uci.edu).

Institute for Memory Impairments and Neurological Disorders (UCI MIND)
The Institute is an Organized Research Unit dedicated to investigating the causes of Alzheimer's disease and related dementias and to improving the quality of life and promoting successful aging. The vision for The Institute for Memory Impairments and Neurological Disorders is to develop approaches for lessening the impact of memory-related disorders. Tackling these complex issues requires a multidisciplinary approach, which is reflected in the diversity of the Institute’s faculty, who have primary appointments in the Schools of Biological Sciences, Information and Computer Sciences, Engineering, Medicine, and Social Sciences, and the Program in Nursing Science.

The Institute is one of 29 Alzheimer’s Disease Research Centers (ADRC) supported by the National Institute for Aging, a branch of the National Institutes of Health, and is one of 10 Alzheimer’s Disease clinical centers (ADC) funded by the California Department of Public Health. The mission of the ADC is to diagnose the needs of Orange County. For more information visit the UCI MIND website (http://www.mind.uci.edu).

Institute for Software Research
The mission of the Institute for Software Research (ISR) is to advance software and information technology through research partnerships. ISR is dedicated to fostering innovative basic and applied research in software and information technologies. To achieve this goal, ISR works with established companies, start-ups, government agencies, and standards bodies to develop and transition technologies to widespread and practical application. The Institute also focuses on educating the next generation of software researchers and practitioners in advanced software technologies. It supports the public service mission of the University of California in developing the economic basis of the State of California.

Technical emphases of the Institute include software architecture, decentralized development and applications, event-based systems, open-source software development, game culture and technology, software processes, computer-supported cooperative work, human-computer interaction, user interface software, information visualization, privacy and security, ubiquitous computing, software understanding, requirements engineering, analysis and testing, extensible systems, configuration management, configurable distributed systems, Internet protocols and standards, and software engineering education.

Faculty members are drawn from throughout the University of California. Graduate research assistants, professional research staff, and visiting researchers complete the Institute’s research body.

ISR supports research projects, sponsors professional meetings, and develops technology. To further its research agenda, the Institute sponsors a distinguished speaker series, technical roundtables, workshops, symposia, and special events. Effective partnerships with industry are essential for ISR to achieve its goals of technology development and transition. Corporate and institutional sponsorships support ISR’s research, activities, and professional meetings. Additional information is available at the ISR website (http://isr.uci.edu).

Institute for Virtual Environments and Computer Games
The Institute for Virtual Environments and Computer Games (IVECG) seeks to advance UC Irvine’s strengths as a national leader in research and education activities that are revolutionizing how we teach and learn, conduct business and commerce, provide health care, and interact and behave in society.
The power of virtual environments and computer games cannot be understated in its ability to inspire, attract and empower. Virtual environments and computer games comprise the primary manifestation of digital technology in the lives of millions of people: This is how many learn, communicate, understand, relax and even give meaning to their lives. Learn more about the cutting-edge research at the IVECG website (http://ivecg.uci.edu).

**Institute of Transportation Studies**

The Institute of Transportation Studies (ITS), a University of California Organized Research Unit with branches at Irvine, Davis, and Berkeley, was established to foster research, education, and training in the field of transportation.

ITS research at the University of California, Irvine (UCI) involves faculty and students from The Henry Samueli School of Engineering, the School of Social Sciences, the School of Social Ecology, The Paul Merage School of Business, and the Bren School of Information and Computer Sciences. The Institute also hosts visiting scholars from the U.S. and abroad to facilitate cooperative research and information exchange, and sponsors conferences and colloquia to disseminate research results. ITS has a long and rich history of providing both direct and indirect support to the UCI transportation graduate programs. It provides office and research space to virtually all of the students enrolled in UCI's four graduate transportation programs—the interdisciplinary Program in Transportation Science; the graduate concentration in Transportation Economics; the Transportation Planning option in the Department of Planning, Policy, and Design; and the Transportation Systems Engineering graduate focus in the Department of Civil and Environmental Engineering. ITS provides extensive computing resources to all of these students, together with state-of-the-art simulation and laboratory facilities. ITS subscribes to the major transportation research journals and offers a variety of computer-based information retrieval services. More information can be found at the ITS website (http://www.its.uci.edu).

**Jack W. Peltason Center for the Study of Democracy**

The Jack W. Peltason Center for the Study of Democracy (CSD) fosters academic research and education to provide a better understanding of the democratic process, and the steps that may strengthen democracy at home and abroad. The faculty and students of the Center study both democratizing nations and the expansion of the democratic process in the United States and other Western democracies. The Center hosts research conferences, sponsors faculty research, publishes a research paper series, and facilitates research and teaching on democratic themes.

In 1995, the National Science Foundation selected UCI to establish a Graduate Research Traineeship on Democratization and Democratic Politics. University, foundation, and philanthropic support has continued this graduate education through the Democracy Fellows program. The formal course work and faculty mentorship of the training program draw upon faculty of the Center and build upon its present research and educational activities. In addition, graduate fellows in the training program participate in the research activities of the Center. For more information visit the CSD website (http://www.democracy.uci.edu).

**Reeve-Irvine Research Center**

The Reeve-Irvine Research Center (RIRC) is devoted to studying cellular and molecular mechanisms that underlie the response of the nervous system to injury, exploring innate and therapeutic regenerative capabilities, and developing treatments for spinal cord injury. RIRC has four principal investigators whose laboratories are located in the Center and whose research focuses on the use of rodent models (rats and mice) and related cell culture systems to study how the spinal cord responds to injury. A major focus is on enhancing the regeneration of damaged nerve fibers (axon regeneration) and on the use of stem cells for cellular replacement therapy. There are also 23 associate investigators whose laboratories are located elsewhere in the University who study the response to injury, neural repair, regeneration, and stem cell biology. Some of the associate investigators also carry out human-subjects research focusing on advanced functional imaging techniques, novel rehabilitative strategies including the use of robotics, advanced prosthetics, and associated devices that are capable of recording signals from the nervous system.

There are a number of potential targets for therapy for spinal cord injury, and RIRC scientists address many of these. Importantly, some of the most promising strategies, and the ones that are closest to clinical application, involve interventions during the acute post-injury period (days to weeks after the injury). However promising these strategies are, the Center is committed to the long-term goal of developing treatments to promote nerve regeneration and repair for individuals with chronic injuries, and this is reflected in the research programs of each investigator. More information is available at the RIRC website (http://www.reeve.uci.edu).

**Campus Centers**

A Campus Center provides a group of researchers with use of the “Center” title and a structure for its collaborative activities. The rationale for establishing a Campus Center may include attracting greater recognition and extramural support for a research program at UCI and/or providing an infrastructure that promotes synergistic interactions between a group of researchers within a school or across schools. Directors of campus centers typically report to the Dean of their respective schools. More information about the following centers may be found at the Campus Centers website (http://www.research.uci.edu/centers-institutes/CC-centers-and-institutes.html).

- Center for Asian Studies (http://www.asian-studies.uci.edu)
- Center for Demographic and Social Analysis (C-DASA) (http://www.cdasas.socsci.uci.edu)
- Center for Ethnography (http://www.socsci.uci.edu/~ethnog)
- Center for Global Peace and Conflict Studies (CGPACS) (http://www.cgpacs.uci.edu)
- Center for Hearing Research (CHR) (http://hearing.uci.edu)
- Center for Learning in the Arts, Sciences (CLAS) (http://sites.uci.edu/class)
- Center for Organizational Research (COR) (http://cor.web.uci.edu)
- Center for Unconventional Security Affairs (CUSA) (http://www.cusa.uci.edu)
Other Research Centers and Institutes at UCI

“Other” research units do not fit the definition of an Organized Research Unit (ORU), Special Research Program (SRP), or Campus Center, but are similarly interdisciplinary. These units may have been designated as Centers by a sponsoring agency such as the National Science Foundation (NSF) or the National Institutes of Health (NIH), or they may be part of an intercampus-consortium, such as Centers funded by the UC Multicampus Research Programs and Initiatives (MRPI) competition. More information about the following centers may be found at the Centers & Institutes website (http://www.research.uci.edu/centers-institutes).

California Center for Antiviral Drug Discovery (http://faculty.sites.uci.edu/ccadd/news)
Chao Family Comprehensive Cancer Center (http://www.cancer.uci.edu)
Conte Center for Brain Programming in Adolescent Vulnerabilities (http://contecenter.uci.edu)
Digital Media and Learning Research Hub (http://www.dmlcentral.net)
Gavin Herbert Eye Center (https://www.ghei.uci.edu)
Institute for Complex Adaptive Matter (ICAM) (http://icam-i2cam.org)
National Fuel Cell Research Center (http://www.nfcrc.uci.edu)
Network for Experimental Research on Evolution (NERE) (http://nerelitb.uci.edu)
Pacific Southwest Regional Center of Excellence for Biodefense and Emerging Infectious Diseases (PSWRCE) (http://www.pswrce.uci.edu/index.shtml)
Southern California Center for Galaxy Evolution (http://www.cge.uci.edu)
Sustainable Transport: Technology, Mobility, Infrastructure (http://www.its.uci.edu)
Sustainable Transportation Consortium (http://www.research.uci.edu/centers-institutes/All-centers-and-institutes.html)
UC Center for Hydrologic Modeling (http://www.ucchm.org)
UC-Cuba Academic Initiative (http://www.ucscsi.uci.edu/uc-cuba)
UC Humanities Network (http://uchumanitiesnetwork.org)
UC Irvine Health Diabetes Center (http://www.ucirvinehealth.org/medical-services/diabetes)
UCI Neuroscience Imaging Center (http://www.research.uci.edu/facilities-services/nic)
Division of Undergraduate Education

Michael Dennin, Dean  
Dean’s Office  
611 Aldrich Hall  
949-824-3291  
http://www.due.uci.edu

The core mission of the Division of Undergraduate Education is to support and enrich the academic experiences of undergraduate students so that they succeed and thrive. The Division provides campus leadership, programs, and services that enhance the quality of undergraduate education at UCI. An advocate and steward for educational excellence, the Division works with all academic units, programs, and members of the UCI community to foster a climate of learning, discovery, and engagement for every undergraduate student. Through its diverse and innovative programs and services, the Division provides support for student academic achievement, for a rich and coherent curriculum, and for outstanding teaching through the integration of teaching and research activities and the facilitation of effective pedagogy.

The Division also supports excellence in undergraduate education through assessment of student learning outcomes and a comprehensive program of research and evaluation conducted by its Center for Assessment and Applied Research. This center coordinates the campus approach to educational assessment and provides data and information on undergraduate students, programs, and policies for use in decision-making by the Dean of the Division and other campus leaders. It also provides consultation and technical advice for faculty and staff on assessment of student learning, program evaluation, survey research, statistical analyses of student data, and development of new undergraduate majors and minors with a view to enhance undergraduate education at UCI. For further information visit the Center (http://www.assessment.uci.edu) for Assessment and Applied Research website (http://assessment.uci.edu).

DUE Program Faculty Directors

- Blum Center for Poverty Alleviation - Richard Matthew, Professor of Planning, Policy & Design and Political Science
- Campuswide Honors Program - Charles E. (Ted) Wright, Associate Professor of Cognitive Sciences
- Capital Internship Programs - Matthew Beckmann, Associate Professor of Political Science
- Center for Excellence in Writing and Communication - Jonathan Alexander, Professor of English, Education, and Gender & Sexuality Studies
- Civic and Community Engagement - Gillian Hayes, Associate Professor of Informatics
- Student Support Services - Anita Casavantes Bradford, Associate Professor of Chicano/Latino Studies
- Study Abroad Center - Daniel Brunstetter, Associate Professor of Political Science
- Undergraduate Research Opportunities Program - Shahram Lotfipour, MD, MPH, Professor of Clinical EM & Public Health
- Uteach - David Kay, Senior Lecturer with Security of Employment, Informatics and Computer Science

On This Page:

The Division of Undergraduate Education is responsible for the following student programs and services:

- Academic Testing Center
- ANTrepreneur Center - Blackstone Launchpad
- Blum Center for Poverty Alleviation
- Campuswide Honors Program
- Capital Internship Programs
  - UCDC Academic Internship Program
  - UC Sacramento Scholar Intern Program
- Center for Excellence in Writing and Communication
- Civic and Community Engagement Minor
- First-Year Integrated Program
- Freshman Seminar Program
- International Students Excellence Program
- Learning and Academic Resource Center
- Peer Academic Advising Program
- Scholarship Opportunities Program
• Student Support Services
• Study Abroad Center
  • Education Abroad Program
  • International Opportunities Program
• Transfer Student Center
• Undergraduate/Undeclared Advising Program
• Undergraduate Research Opportunities Program
• UTeach

These programs and services are described in detail below.

---

**Academic Testing Center**
3040 Anteater Instructional Research Building (AIRB)
949-824-6207
http://testingcenter.uci.edu

**Placement Testing**

UCI's Academic Testing Center (ATC) administers placement tests to new and continuing students to ensure correct placement in selected introductory courses and to help students assess their readiness for University-level work. These tests are selected or developed by UCI faculty who also determine the grading criteria for each test. Results from placement tests are used by students and their academic counselors to create a plan of study which is best suited to the students' learning needs and career goals and to determine enrollment in introductory courses. Additional information, such as entrance examination scores, Advanced Placement (AP) scores, and high school work, also may be used to determine course placement.

Placement tests are given in the areas of Physics, Calculus, Arabic, Chinese, French, German, Hebrew, Japanese, Korean, Persian, Russian, Spanish, Vietnamese, and Academic English/English as a Second Language. Detailed information about who needs to take which test is available on the Academic Testing Center website (http://www.testingcenter.uci.edu/which%20tests%20to%20take.html).

All newly admitted freshmen will be directed to information about summer orientation, placement testing, and registering for courses in late spring. Participation in summer orientation and advising is required of new freshmen. Freshmen will register for their fall quarter courses at orientation. Students are strongly advised, therefore, to take any required placement tests before their orientation program.

The Academic Testing Center also administers other language tests for exemptions from general education categories VI and VIII. More information is available at the Language Testing Program website (http://www.testingcenter.uci.edu/Language%20Testing%20Program.html).

For further information on placement testing and summer testing dates, visit the Academic Testing Center website (http://www.testingcenter.uci.edu) or call the center's office.

**UC Analytical Writing Placement Examination**

The Academic Testing Center is responsible for the campus-based administration of the UC Analytical Writing Placement Examination.

Results from the UC Analytical Writing Placement Examination are used to place students in UCI writing courses. There is a nonrefundable administrative fee associated with the examination. The fee payment process and waiver information are explained in materials students receive in April from the University of California Office of the President. Students who receive admission application fee waivers will automatically have this examination fee waived. Refer to the section on Requirements for a Bachelor's Degree for complete information on the UC Analytical Writing Placement Examination and the UC Entry Level Writing requirement. Important information about the examination is also available here (http://www.testingcenter.uci.edu/analyticalWriting.html).

**ANTrepreneur Center - Blackstone Launchpad**

G202A Student Center
949-824-6407
http://blackstonelaunchpad.uci.edu/ 
blackstonelaunchpad@uci.edu

Blackstone Launchpad is an experiential educational program open to any undergraduate, from any major, who has an idea about a possible entrepreneurial venture. The program seeks to convey to students that being an entrepreneur is a viable career and provides free, confidential coaching customized to students' needs, whether they are pursuing for-profit or non-profit ventures. The program is student-focused and student-paced, and committed to teaching students to ask the right questions rather than giving them the answers.

For more information visit the Blackstone Launchpad website (https://blackstonelaunchpad.org/campus-page/uci).
Blum Center for Poverty Alleviation
CalIT2 Building, Suite 3300
949-824-6307
http://blumcenter.uci.edu
blumcenter@uci.edu (blumcenter@uci.edu)

The mission of the Blum Center for Poverty Alleviation is to stimulate interest, deepen commitment, and find creative ways to bring the extensive resources of the campus to bear on the complex challenge of sustainable poverty alleviation. The critical components of the Center are education, community engagement, and research.

Campuswide Honors Program
1200 Student Services II
949-824-5461
http://honors.uci.edu
honors@uci.edu

Founded in 1988, the Campuswide Honors Program (CHP) is available to selected high-achieving undergraduates in all academic majors and years of study. It maintains an active roster of approximately 750 students. Many CHP students continue their studies after graduation from UCI at the most prestigious graduate and professional schools in the country.

The CHP provides talented and successful UCI students with a special honors curriculum consisting of core courses designed especially for CHP students, an honors community of highly dedicated students, and mentorship by UCI’s top faculty, who teach honors classes and supervise student research. Enhanced academic advising provides students with assistance in planning a path to success, including course selection and preparation for graduate and professional schools, prestigious scholarships, and study abroad. Completion of the Campuswide Honors Program is noted on the student’s transcript and baccalaureate diploma.

Admission. Admission to the program as an incoming UCI freshman is by invitation; all eligible candidates are reviewed and selected by faculty representatives from each academic unit. Transfer students may be eligible for special admissions programs offered through the Office of Admissions and Relations with Schools to students who have completed approved community college honors programs. Current UCI students are eligible to apply for admission to the CHP after completion of at least one quarter at UCI with 12 or more graded units and a grade point average of 3.5 or better. Current students may submit their applications until the end of week 5 of winter quarter of their second year. Transfer students may submit applications in the summer before enrolling at UCI, or until the end of week 5 of winter quarter of their first year at UCI. The CHP seeks to admit students who have a demonstrated passion for learning, a willingness to explore and be challenged, and an interest in pursuing academic excellence in a range of disciplines outside of their major area. Successful completion of the program requires that students complete specified honors courses, engage in faculty mentored research that culminates in an honors thesis or project, and fulfill the program’s GPA requirements.

For details about curriculum, extracurricular activities, on-campus honors housing and other benefits of the CHP, see the CHP website (http://honors.uci.edu). For information on other honors opportunities such as school and major honors programs and honors at graduation, see the “Honors Opportunities” section of this Catalogue.

Capital Internship Programs
1100 Student Services II
949-824-5400
http://capitalinternships.uci.edu/ (Washington DC Program)
http://uccs.ucdavis.edu/ (Sacramento Program)
dccenter@uci.edu (both programs)

UCDC Academic Internship Program

The UCDC Academic Internship Program supervises and supports students who pursue internships, elective courses, research, and creative activities in the nation’s capital. This UC systemwide program, situated in the exciting environment of Washington DC, is open to students in all majors. Students may enroll for fall, winter, or spring quarter. While living in Washington DC, students are enrolled at UCI and earn 12–16 units of credit. Financial aid eligibility is maintained and is adjusted to cover the total cost of the program. Students live in the UC Washington Center building together with students from all of the participating UC campuses, which provides a social and intellectual community throughout the quarter. Internship opportunities are available in almost any setting including Capitol Hill, the White House, government agencies, nonprofit organizations, think tanks, art museums, educational institutions, media outlets, and scientific organizations, just to name a few. Interested students with strong academic records are encouraged to apply.

UC Center Sacramento Scholar Intern Program

The UC Center Sacramento (UCCS) Scholar Intern Program supervises and supports students who pursue internships, elective courses, research, and creative activities in the state capital. This UC systemwide program is open to students in all majors, and is currently available for the fall, winter, spring, or summer terms. While living in Sacramento, students are enrolled at UC and earn 12–16 units of credit. Financial aid eligibility is maintained. Internship
opportunities are available for students in many different settings including the offices of Assembly Members, Senators, and the Governor, as well as with State agencies, nonprofit organizations, and lobbying organizations. Interested students with strong academic records are encouraged to apply.

**Center for Excellence in Writing and Communication**

193 Ayala Science Library  
949-824-8949  
http://writingcenter.uci.edu  
writing-center@uci.edu

The UCI Center for Excellence in Writing and Communication offers free writing support to all enrolled UCI undergraduate students; we strive to make better writers, not just better writing. Our services include individual writing consultations (http://www.writingcenter.uci.edu/appointments), online tutorials (http://www.writingcenter.uci.edu/online-help), peer tutoring (http://www.writingcenter.uci.edu/peer-tutors), workshops (http://www.writingcenter.uci.edu/events-workshops) about writing for different occasions and needs, and assistance with developing research skills.

The Writing Center, in conjunction with the Campus Writing Coordinator and the Division of Undergraduate Education, also conducts research (http://writing.uci.edu/research) about best practices (http://writing.uci.edu/assessment) in the teaching of writing, and is the central campus hub for developing a culture of writing and communication at UCI.

**Civic and Community Engagement Minor**

3020 Anteater Research and Instructional Building (AIRB)  
949-824-1227  
http://engage.uci.edu/  
CCEMinor@uci.edu

The Minor in Civic and Community Engagement is an interdisciplinary program that provides students with the knowledge, skills, attitudes, and values to engage as citizens and active community members in the 21st century. It provides a theoretical and empirical framework to increase students’ understanding of public problems (environmental, social, and other) from multiple disciplinary perspectives. Students learn about strategies to address public problems, including through public policy; through the involvement of community-based and nonprofit organizations; and through the cultivation of leadership. The minor helps students build on their major programs of study to make connections between public problems and issues of equity and social justice. It is open to students of all majors and is distinguished both by what students learn, and by how they learn it: through a combination of coursework, research and service.

Additional information is available at the Interdisciplinary section of the Catalogue.

**First-Year Integrated Program**

611C Aldrich Hall  
949-824-1955  
http://fip.uci.edu/  
FIP@uci.edu

University Studies 13–17 are three-quarter multidisciplinary sequences for freshmen or lower-division students only. These integrated courses are designed to introduce students to the ways different disciplines approach similar problems and to provide a freshman learning community experience. Successful completion of all three quarters will satisfy several courses toward partial fulfillment of different general education (GE) requirement categories. These courses (with the exception of UNI STU 13A, UNI STU 13B, UNI STU 13C) are designed to have a capstone research writing component in the third quarter that will satisfy the second quarter of the lower-division writing requirement—one of the four courses toward partial fulfillment of GE categories. To satisfy the second quarter of the lower-division writing requirement with a FIP sequence, students must concurrently enroll in WRITING 39B either the fall or winter quarter and pass it with a grade of C or better, and also complete the FIP sequence with a grade of C (or Pass) or better in the third quarter of the sequence.

Freshman Seminar Program

611C Aldrich Hall
949-824-1955
http://freshmanseminar.uci.edu/ (Freshmen)
seminars@uci.edu

Small seminars are offered to new Freshmen students to introduce them to the academic culture of UC Irvine. Faculty from a broad range of disciplines teach about topics of current interest in sections of up to 15 students. These seminars are a great way for new students to learn about a variety of academic fields, meet a faculty member who can serve as a mentor, get to know other new students with similar interests, and take a small class as one of their first courses on campus.

Freshman Seminars (UNI STU 3 courses) are offered all three quarters, with priority given to new students who can enroll in a maximum of three sections during their time at UCI. Details of each quarter’s offerings are available on the program website and in the Schedule of Classes.

International Students Excellence Program

3020 Anteater Research and Instructional Building (AIRB)
949-824-6776
http://internationalpeergroup.uci.edu/
ahmedz@uci.edu

The International Students Excellence Program’s (ISEP) mission is to assist UCI’s international freshmen in making a smooth transition into university life. ISEP provides both academic excellence and social support in order to engage international students in UCI’s vibrant campus life and help them create solid relationships in their new environment. It is based on strong mentor/mentee relationships that encourage cultural exploration as well as academic and personal success. In addition to individual mentoring, ISEP offers small group meetings and larger group events during Welcome Week and throughout the year. Students with questions or who do not yet have a mentor should contact the office.

Learning and Academic Resource Center

284 Rowland Hall
949-824-6451
http://larc.uci.edu
larc@uci.edu

The Learning and Academic Resource Center (LARC) provides academic support programs for undergraduate students. These include course-specific tutorials, as well as Academic Learning Skills workshops on specific study skills (e.g. time management, academic reading, preparing for exams, etc.) that can be applied to all courses. Tutorials are regularly-scheduled, informal review sessions in which 12-15 students enrolled in the same lecture compare notes, discuss readings, develop organizational tools, and predict test items in two, 50-minute LARC Sessions per week. The primary goal of the LARC program is to facilitate student collaboration among peers to increase understanding and retention of course-specific material for academic success. By working together, students learn how to integrate course content and learning skills to become independent, successful learners.

Peer Academic Advising Program

256 Aldrich Hall
949-824-3559
http://peeradvisor.uci.edu

The Peer Academic Advising Program provides valuable services for all UCI undergraduate students. It is the source of student-to-student academic counseling based not only on academic, but also personal experiences of UCI students. Peer academic advisors (PAAs) are juniors and seniors who rigorously train in academic counseling before beginning work as PAAs. They are found in the offices of various academic units all over campus. PAA training prepares them to manage issues related to academic counseling and enables them to obtain a wide knowledge of campus resources available to students, such as the Career Center, Office of Disability Services, Financial Aid, Housing, and the Learning and the Academic Resource Center (LARC). The information PAAs provide students also comes from their personal experience as successful UCI undergraduates.
During the academic year, PAAs maintain regular office hours in their respective academic units. They assist students in selecting courses to best fit their college and career paths, planning quarterly programs of study, learning about the various majors and minors, obtaining information about UCI’s resources and opportunities, and simply adjusting to life as UCI undergraduates.

**Scholarship Opportunities Program**

193 Ayala Science Library  
949-824-0189  
http://scholars.uci.edu  
sklrship@uci.edu (sklrshp@uci.edu)

UCI encourages high-achieving undergraduates to compete successfully for the most prestigious scholarships, grants, and graduate fellowships available, and to begin learning about the process as early as possible. The Scholarship Opportunities Program (SOP) organizes and disseminates information on a select group of prestigious awards that are national and international in scope; including opportunities for funded research and study at both the undergraduate and graduate levels. The SOP also facilitates UCI’s processes for evaluating applications and endorsing candidates for awards requiring University nomination. Additionally, staff provide individual and group counseling, present workshops, assist students with curriculum vitae (CVs), and edit Statements of Purpose and research/project proposals.

**Student Support Services**

2100 Student Services II  
949-824-6234  
http://sss.uci.edu  
oss@uci.edu

Student Support Services (SSS) is an academic support program dedicated to helping first-generation college, low-income, and/or students from disadvantaged backgrounds/circumstances succeed and thrive at UCI. The goal of SSS is to help students successfully transition to UC Irvine and enhance their academic experience. SSS supports the academic progress of its students and provides resources to help students achieve their academic goals. SSS offers drop-in counseling and advising provided by professional staff, faculty, and student peers; organizes weekly workshops on academic and social opportunities at UCI; and coordinates summer academic programs for incoming students. In an effort to best advocate for and assist students, professional staff maintain liaison relationships with academic departments and provide referrals to other campus support services as needed. In addition to weekly workshops, SSS provides graduate school preparatory resources for those students interested in graduate study.

SSS administers and oversees the Summer Bridge Program at UCI for eligible students who are committed to starting their academic careers in the summer in order to achieve their full academic potential. Summer Bridge is designed to provide opportunities for students to earn academic credit, make a successful academic and social transition to the University, build relationships with peers, and engage with UCI faculty and staff.

Students are encouraged to visit SSS and meet our staff. Appointments can be made with the SSS staff by phone or email. Additional information is available on the SSS website (http://sss.uci.edu).

**Study Abroad Center**

1100 Student Services II  
949-824-6343  
http://studyabroad.uci.edu  
studyabroad@uci.edu

The Study Abroad Center is a comprehensive resource and counseling center that helps students take advantage of the many worldwide opportunities that exist for study, work, internship, volunteering, research, and non-credentialed teaching that relates to their degree programs at UCI.

Studying abroad is an important resource for achieving the skills, knowledge, and understanding that will make today’s undergraduates effective citizens and leaders in local, national, and global affairs once they depart the University. In today’s political and business environment, college graduates must be informed decision-makers with a capacity to reflect on their own values while understanding the complex identities, histories, and cultures of others. Studying abroad provides students with the language skills and cultural competence necessary to meet the current demands of business, government, and educational institutions.

Professional staff and peer advisors, who have returned from experiences abroad, are available to guide students in making appropriate choices of international programs for their educational goals. Advising is available when UCI is in session. Participants are provided with pre-departure and reentry orientations.

Students are advised to plan early in their academic career in order to best match studying abroad with their major to graduate on time. Programs are available for students in every major. The wide variety of programs includes those offering general curriculum, intensive language study, and programs focusing on a specific academic subject area. Preliminary guidance is available at the Study Abroad Academic Planning website. (http://www.studyabroad.uci.edu/academics/academicplanning.html) Students are encouraged to combine undergraduate research and studying abroad. Coordinated advising between the Undergraduate Research Opportunities Program (http://www.urop.uci.edu) and the Study Abroad Center facilitates
this option. Participation in study abroad satisfies category VIII, international/global issues, of the UCI general education requirement. Students are encouraged to study abroad as a sophomore or junior, allowing the opportunity to incorporate their international learning into their final year at UCI.

The cost of studying abroad is often comparable to the cost of studying at UCI, while some options cost more and some cost less. Financial aid (http://www.studyabroad.uci.edu/prospective/finaid.shtml) remains available while students study abroad and scholarships (http://www.studyabroad.uci.edu/scholarships.html) are also available.

Students may participate in the University of California Education Abroad Program (UCEAP) offering more than 300 programs in 40 countries for UC students; UC summer programs offered by other UC campuses; and hundreds of programs through UCI's International Opportunities Program (IOP), which is the link between UCI students and any international educational experience that occurs outside the boundaries of the U.S. and is not a part of UCEAP nor a UC campus summer program.

Transfer Student Center
2200 Student Services II
949-824-1142
http://transfercenter.uci.edu
transfer@uci.edu

The Transfer Student Center (TSC) works with new and continuing transfer students to facilitate their transition and overall success at UCI by providing innovative programs, organizing weekly workshops, providing formal and informal coaching and mentoring, connecting students to appropriate campus programs and services, and offering a space for study. The Transfer Student Center fosters a sense of community among UCI's transfer students and advocates for transfer students to enhance their academic and social experience. The Transfer Student Center works closely with transfer students interested in campus leadership, and advises transfer organizations including Tau Sigma National Honor Society who work to advocate and support transfer students at UCI.

Students are encouraged to visit TSC and meet with the staff. TSC staff can be reached in person, by telephone or via email. Additional information is available on the TSC website (http://transfercenter.uci.edu).

Undergraduate Research Opportunities Program
2300 Student Services II
949-824-4189
http://urop.uci.edu
urop@uci.edu

The Undergraduate Research Opportunities Program (UROP), encourages and facilitates research and creative activities by undergraduates. Research opportunities are available not only from every discipline, interdisciplinary programs, and schools, but also from many outside agencies, including national laboratories, industrial partners, and other universities. UROP offers assistance to students and faculty through all phases of the research activity: proposal writing, developing research plans, resource support, conducting the research and analyzing data, and presenting results of the research at the annual spring UCI Undergraduate Research Symposium. Calls for proposals are issued in the fall and spring quarters. Projects supported by UROP may be done at any time during the academic year and/or summer, and the research performed must meet established academic standards and emphasize interaction between the student and the faculty supervisor. In addition, all students participating in faculty-guided research activities are welcome to submit their research papers for faculty review and possible publication in the annual UCI Undergraduate Research Journal.

UROP also sponsors the following programs:

- Biophotonic Summer Undergraduate Research Program (B-SURP)
- Edwards Life Sciences Summer Undergraduate Research Program (E-SURP)
- Integrated Micro/Nano Summer Undergraduate Research Experience (IM-SURE)
- Inter-Disciplinary Summer Undergraduate Research Experience (ID-SURE)
- Multidisciplinary Design Program (MDP)
- Summer Undergraduate Research Fellowship in Information Technology (SURF-IT)
- Summer Undergraduate Research Program (SURP)

Complete information on current UROP programs can be found on the UROP website (http://www.urop.uci.edu). For additional questions, contact UROP in person, telephone or by email.

Undergraduate/Undeclared Advising Program
256 Aldrich Hall
949-824-6987
http://uu.uci.edu

Students who enter the University as freshmen or sophomores may be uncertain about which major they should choose and may not feel ready to declare their major or even to identify their interests with a particular school. Such students participate in the Undergraduate/Undeclared Advising
Program, which is administered by the Division of Undergraduate Education. The goal of the Undergraduate/Undeclared Advising Program is to help students make the best informed choice of a major that is possible to meet their academic goals. All students at UCI are required to choose their major by the time they reach junior status.

To make a good decision about which major to declare, students should know the range of programs UCI offers and have some experience with them, have a good knowledge of their own abilities and interests, have clear educational goals, and have a sense of their vocational goals and of the academic programs at UCI that will provide appropriate preparation. Students in the Undergraduate/Undeclared Advising Program meet with faculty and receive quarterly individualized staff counseling that helps them explore the variety of course offerings on campus, become more aware of their own interests and abilities, formulate sound educational goals, and learn how to prepare for graduate education and/or possible careers.

To assist students in choosing a major, the program offers a course designed to expose Undeclared students to a variety of opportunities and resources available to them and to introduce students to the schools and majors offered. In addition, students learn about research and career opportunities within different disciplines.

**UTeach**

611C Aldrich Hall  
949-824-1955  
http://sites.uci.edu/uteach/  
uci.uteach@gmail.com

The UTeach program enables upper-division UCI undergraduates to design, develop, and deliver their own lower-division seminar classes. This provides an opportunity to integrate research, teaching, and learning, as contemplated by UC’s mission.

Candidate student-instructors (prospective “UTeachers”) apply for the program in the spring quarter, describing their proposed course and designating a faculty mentor to supervise their research and development. Applications are reviewed near the end of the quarter by the UTeach Student-Faculty Advisory Board (for more information, see the UTeach website [http://sites.uci.edu/uteach](http://sites.uci.edu/uteach)).

During the summer and fall, prospective UTeachers are expected to conduct research with their faculty mentor. They enroll in an independent study course (UNI STU 197A) with their mentor in the fall, producing a draft syllabus and course plan. The Advisory Board reviews these documents at the end of fall quarter. UTeachers whose courses pass the review enroll in a pedagogy seminar (UNI STU 197B) in the winter quarter; this seminar focuses on presentation skills, classroom management, active learning, and discussion of each other’s teaching presentations. After final approval of the syllabus and course plan, UTeachers deliver their seminars in the spring quarter and attend a weekly seminar (UNI STU 197C) that addresses practical teaching issues that have come up in the UTeachers’ classes.

The UTeach seminars (sections of UNI STU 7) are offered for one unit of P/NP credit in spring quarter. In their entire time at UCI, students may enroll for credit in at most two sections of UNI STU 7.

**Reserve Officers’ Training Corps Courses**

**ROTC 10L. Military Science-Basic Leadership Laboratory.** 1 Workload Unit.  
Provides hands-on and practical military science material covered in the corresponding military science courses.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

**ROTC 11. Military Science-Personal Development.** 1 Workload Unit.  
Focuses on life skills such as physical fitness, nutrition, and time management while providing an introduction to military knowledge, customs, and skills.

**ROTC 12. Military Science-Leadership I.** 1 Workload Unit.  
Focuses on the fundamentals of leadership, Army leadership values, ethics, and counseling techniques.

**ROTC 13. Military Science-Tactical Leadership I.** 1 Workload Unit.  
Focuses on leadership at the tactical level and includes instruction in fundamental military skills such as map reading, land navigation, squad and platoon operations, and resource planning techniques.

**ROTC 21. Military Science-Team Leadership I.** 2 Workload Units.  
Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

**ROTC 22. Military Science-Team Leadership II.** 2 Workload Units.  
Explores team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

**ROTC 23. Military Science-Tactical Leadership II.** 2 Workload Units.  
Examines the challenges of leading tactical teams in the OE. Highlights dimensions of terrain analysis, patrolling, and operation orders.
ROTC 100L. Military Science-Advanced Leadership Laboratory. 1 Workload Unit.
 Provides hands-on and practical exercises for the military science material covered in the corresponding military science courses as well as leader training through practical application of the Leadership Development Program.

Corequisite: ROTC 131 or ROTC 132 or ROTC 133 or ROTC 141 or ROTC 142 or ROTC 143 or ROTC 197.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

ROTC 131. Military Science-Leadership II. 3 Workload Units.
 Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specified feedback on their leadership attributes and core leader competencies.

Corequisite: ROTC 100L.
Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

ROTC 132. Military Science-Team Leadership III. 3 Workload Units.
 Provides cadets systematic and specific feedback on their leadership attributes and core leader competencies. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

Corequisite: ROTC 100L.
Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

ROTC 133. Military Science-Tactical Leadership III. 3 Workload Units.
 Uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when "under fire" are explored, evaluated, and developed.

Corequisite: ROTC 100L.
Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

ROTC 141. Military Science-Leadership III. 3 Workload Units.
 Transitions the focus of student learning from being trained, mentored, and evaluated as a cadet to learning how to train, mentor, and evaluate cadets. Cadets begin to learn the duties and responsibilities of an Army staff officer.

Corequisite: ROTC 100L.
Prerequisite: ROTC 131 and ROTC 132 and ROTC 133.

ROTC 142. Military Science-Leadership IV. 3 Workload Units.
 Requires students to continue to train, mentor, and evaluate underclass cadets. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process and the Comprehensive Soldier Fitness (CSF) program.

Corequisite: ROTC 100L.
Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141.

ROTC 143. Military Science-Officership. 3 Workload Units.
 Explores the dynamics of leading in the complex situations of current military operations in the OE. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism.

Corequisite: ROTC 100L.
Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141 and ROTC 142.

ROTC 151. United States Military History-1607 to 1865. 3 Workload Units.
 Examines the creation of the American military establishment and traces its evolution in the context of the changing nature of warfare, the progression of military professionalism, and social, political, economic, and technological developments through the Civil War.

ROTC 152. United States Military History-1865 to 1945. 3 Workload Units.
 Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the end of the Civil War through World War II.

ROTC 153. United States Military History-1945 to 2001. 3 Workload Units.
 Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the Cold War to the War on Terrorism.
ROTC 197. Military Science Independent Studies. 2-4 Workload Units.
Provides intensive, individual study with scheduled meetings to be arranged between Cadre and student. Assigned reading and tangible evidence of mastery of subject matter required.

Repeatability: May be taken for credit for 12 units.

UC Washington DC Courses

UCDC 170. Washington DC Internship. 4-8 Units.
Supervised internship (20-40 hours per week) in Washington DC government, nonprofit, or private institution consistent with student's interest.

Corequisite: UCDC 180.
Prerequisite: Selected for Washington DC Center Program.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

UCDC 180. Washington Themed Seminar. 4 Units.
UCDC Core course (multiple topics offered each quarter). Enhances students' experiential learning and imparts knowledge and skills to help them transition into public service/private sector positions. One Core course per quarter mandatory for all participants in Washington DC Center Program.

Corequisite: UCDC 170 or SOCECOL 195 or PUBHLTH 195W.
Prerequisite: Selected for Washington DC Center Program.

Repeatability: May be taken for credit 3 times as topics vary.

UCDC 190. Washington DC Elective. 4 Units.
Studies in selected areas related to the UC Washington, DC Center Program (UCDC). All courses taught in Washington, DC. Topics addressed vary each quarter.

Prerequisite: Selected for Washington DC Center Program.

Repeatability: May be taken for credit 3 times as topics vary.

University Affairs Courses

UNI AFF 1A. Student Participation. 1.3 Unit.
Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: Project must be approved by a Student Affairs Department head and the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

UNI AFF 1B. Student Participation. 1.3 Unit.
Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: UNI AFF 1A.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

UNI AFF 1C. Student Participation. 1.3 Unit.
Campus projects with a University department to enrich academic growth and development as well as academic growth and development of UCI. Includes 30 hours per quarter working on proposed project under faculty/staff supervision. Paper required.

Prerequisite: UNI AFF 1B.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.
University Studies Courses

UNI STU 1. Freshman Experience. 2 Units.
An introduction to the freshman experience provides an overview of the University’s aims and resources and exploration of developmental theories and skills necessary for academic success. Attention is also paid to questions of personal development and major choice. Materials fee.

Grading Option: Pass/no pass only.

UNI STU 2. UCI-Majors. 2 Workload Units.
A systematic exploration of UCI’s undergraduate majors.

Grading Option: Pass/no pass only.

UNI STU 3. Mini-Seminars . 1 Unit.
Designed primarily for freshmen as introduction to scholarly inquiry. Each section is taught by a faculty member from one of the academic disciplines and presents interesting and challenging topics representing the instructor’s interest. Students participate in discussions, presentations, and projects.

Repeatability: May be taken for credit 3 times as topics vary.

UNI STU 4. Transfer Student Seminars. 1 Unit.
Designed primarily for transfer students during their first year at UCI. Each section is taught by a faculty member from one of the academic disciplines as introduction to scholarly inquiry in their discipline. Students participate in discussions, presentations, and projects.

Repeatability: May be taken for credit 2 times.

Restriction: New students only. Upper-division only until first week of classes.

UNI STU 6. University Studies International Village Seminar. 1 Unit.
Seminars held in International Village that are specifically designed to either (a) introduce visiting international students to the U.S. and/or local area and institutions or (b) engage both international and U.S. students in discussion of topics of international interest.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

UNI STU 7. UTeach: Student-Taught Seminar. 1 Unit.
Student-taught seminar courses on selected topics. Topics vary each year according to the interest of the students teaching the classes.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

UNI STU 10. Introduction to Civic and Community Engagement. 4 Units.
Provides a foundation for understanding the role of public scholarship, civic engagement, and social action, and the relationship between service learning and engaged citizenship. Introduces key theoretical and research methodologies on the traditions and innovations of civic and community engagement.

UNI STU 13A. Introduction to Global Sustainability I. 4 Units.
Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Restriction: Lower-division students only.

UNI STU 13B. Introduction to Global Sustainability II. 4 Units.
Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.

Prerequisite: UNI STU 13A.
UNI STU 13C. Introduction to Global Sustainability III. 4 Units.
Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use.
Prerequisite: UNI STU 13B.

(III)

UNI STU 15A. Consciousness I. 5 Units.
Introduces students to the theory of consciousness in the disciplines of cognitive science, philosophy, literature, psychoanalysis, and fine arts as represented in the genres of poetry, fiction, and film.
Prerequisite: Satisfaction of the UC Entry Level Writing requirement.
Restriction: Freshmen only

UNI STU 15B. Consciousness II. 5 Units.
Introduces students to the theory of consciousness in the disciplines of cognitive science, philosophy, literature, psychoanalysis, and fine arts as represented in the genres of poetry, fiction, and film.
Prerequisite: UNI STU 15A. Prerequisite or corequisite: WRITING 39B. WRITING 39B with a grade of C or better.
Restriction: Freshmen only.

(IV)

UNI STU 15C. Consciousness III. 5 Units.
Introduces students to the theory of consciousness in the disciplines of cognitive science, philosophy, literature, psychoanalysis, and fine arts as represented in the genres of poetry, fiction, and film.
Prerequisite: UNI STU 15B and WRITING 39B. WRITING 39B with a grade of C or better.
Restriction: Freshmen only.

(Ia, III, IV)

UNI STU 16A. How Race Is Made I. 5 Units.
Introduces students to an examination of how race is "made" in America and the consequences of this construction through a variety of lenses: historical, legal, anthropological, sociological, and pop culture.
Prerequisite: Satisfaction of the UC Entry Level Writing requirement.
Restriction: Freshmen only.

UNI STU 16B. How Race Is Made II. 5 Units.
Introduces students to an examination of how race is "made" in America and the consequences of this construction through a variety of lenses: historical, legal, anthropological, sociological, and pop culture.
Prerequisite: UNI STU 16A. Prerequisite or corequisite: WRITING 39B. WRITING 39B with a grade of C or better.
Restriction: Freshmen only.

(IV)

UNI STU 16C. How Race Is Made III. 5 Units.
Introduces students to an examination of how race is "made" in America and the consequences of this construction through a variety of lenses: historical, legal, anthropological, sociological, and pop culture.
Prerequisite: UNI STU 16B and WRITING 39B. WRITING 39B with a grade of C or better.
Restriction: Freshmen only.

(Ia, III, IV, VII)
UNI STU 17A. Water I. 5 Units.
Introduces students to water as a global and contested resource across space, time, and peoples from a scientific, historical and policy perspective. Wherever possible, examples are drawn from the local environment.

Prerequisite: Satisfaction of the UC Entry Level Writing requirement.

Restriction: Freshmen only.

UNI STU 17B. Water II. 5 Units.
Introduces students to water as a global and contested resource across space, time, and peoples from a scientific, historical and policy perspective. Wherever possible, examples are drawn from the local environment.

Prerequisite: UNI STU 17A. Prerequisite or corequisite: WRITING 39B or HUMAN 1B. WRITING 39B with a grade of C or better. HUMAN 1B with a grade of C or better.

Restriction: Freshmen only.

UNI STU 17C. Water III. 5 Units.
Introduces students to water as a global and contested resource across space, time, and peoples from a scientific, historical and policy perspective. Wherever possible, examples are drawn from the local environment.

Prerequisite: UNI STU 17B and (WRITING 39B or HUMAN 1B). WRITING 39B with a grade of C or better. HUMAN 1B with a grade of C or better.

UNI STU 41. Global Village Seminar. 1 Workload Unit.
Issue-oriented course to engage students in examining perspectives and narratives surrounding current global issues.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

UNI STU 42. Sankofa Project. 2 Workload Units.
The purpose of this course is to strengthen intercultural understanding and cooperation among UCI students.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

UNI STU 43. Topics in Illuminations. 1 Unit.
This course connects students to Illuminations, the Chancellor’s Arts and Culture Initiative. Students will attend five Illuminations-sponsored events and engage in brief preparatory and reflective activities in response to these events.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times as topics vary.

UNI STU 45. Graduate School Opportunities and Preparation. 1 Unit.
Explores the opportunities associated with graduate school by considering a wide range of disciplines and career paths. Reviews professional and academic paths in graduate school and the ways to prepare for a chosen path.

UNI STU 83. Pathways to University Success. 2 Units.
Helps first-year students transition to UC Irvine and promotes a successful University experience. Students learn about academic resources and programs that support acclimation to the campus and enhance academic development through lectures, discussions, and a range of co-curricular activities.

Overlaps with UNI STU 84.

UNI STU 84. Bridges to University Success. 4 Units.
Helps first-year students transition to UC Irvine and promotes a successful University experience. Students learn about academic resources/programs that support acclimation to the campus and enhance academic development through lectures, writing laboratories, discussions, and a range of co-curricular activities.

Overlaps with UNI STU 83.
UNI STU 93. Strategies for Success. 2 Workload Units.
Designed to develop good study skills in technical fields and the participation of students as active learners in their education. Topics include time management, analytical thinking, text analysis, academic survival strategies, and goal setting.

Grading Option: Pass/no pass only.

UNI STU 100. Doing Research in the Community. 4 Units.
Critically reimagines the research endeavor and its participants/outcomes. Grapples with methods, values, and relationships involved in research. Explores alternative conceptions of research; focus is community-based. Students work in teams on real-world community research projects with faculty mentors and community partners.

Prerequisite: UNI STU 10.

UNI STU 108. Introduction to Research. 4 Workload Units.
Introduces new transfer students to research culture of the University. Students learn about the importance of research and creative activities as they are framed in a broad range of disciplines and are introduced to general research methods and approaches.

Grading Option: Pass/no pass only.

Restriction: Transfer Summer Bridge Program students only.

UNI STU 170. Advanced Internship in Undergraduate Education. 1-2 Workload Units.
Advanced interns have a year's internship experience and return to contribute to Undergraduate Education programs in a leadership position. Students work three-five hours per week in a DUE office to coordinate or lead less-experienced interns and/or events.

Prerequisite: UNI AFF 1A and UNI AFF 1B and UNI AFF 1C.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 6 units.

UNI STU 175. Methods and Application in Small Group Instruction. 2 Workload Units.
Explores various theories and methods of learning and development and their practical application in small group settings. Peer tutors receive instruction in the design, implementation, and evaluation of an effective learning environment for undergraduate students.

Grading Option: Pass/no pass only.

Restriction: Learning and Academic Resource Center employed tutors only.

UNI STU H176A. Campuswide Honors Thesis Seminar. 2 Units.
Supports the honors thesis research activities of Campuswide Honors Program students. Students set research goals, discuss, and develop their research interests.

Corequisite: Students must sign up separately for 8 units of independent study with faculty mentors.

Grading Option: Pass/no pass only.

Restriction: Students in the Campuswide Honors Program not enrolled in a School/Departmental honors program.

UNI STU H176C. Campuswide Honors Thesis Seminar. 2 Units.
Supports the honors thesis research activities of Campuswide Honors Program students. Students work with each other to improve both written and spoken presentations of their results.

Corequisite: Students must sign up separately for 8 units of independent study with faculty mentors.
Prerequisite: UNI STU H176A.

Grading Option: Pass/no pass only.

Restriction: Students in the Campuswide Honors Program not enrolled in a School/Departmental honors program.
UNI STU 181. Internship in Civic and Community Engagement. 2-4 Workload Units.
Provides an opportunity to extend learning into a community-based setting addressing important social, environmental, and public issues. The internship project has a creative and scholarly component where students initiate their own action or inquiry experience.

Prerequisite: UNI STU 10.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

UNI STU 190. Teaching Seminar: Theory and Practice. 2 Units.
For students selected to be discussion leaders for University Studies 2. Models of teaching, developmental theory applied to college freshmen, curriculum development. Practice of teaching techniques and group management skills.

Repeatability: May be taken for credit 2 times.

UNI STU 192. Group Project for Discussion Leaders. 4 Units.
For discussion leaders for University Studies 2. Weekly discussion group training for leading effective groups in addition to evaluations of weekly discussion sections and completion of a special project on issues of freshman development. Materials fee.

Repeatability: May be taken for credit 4 times.

Restriction: Discussion leaders only.

UNI STU 195A. Engaged Leadership. 4 Units.
Three-quarter series on civic education theory, the civic mission of higher education, and community-based action research methods. Provides students with a solid grounding in civic education theory while also creating opportunities for students to practice civic habits.

UNI STU 195B. Engaged Leadership. 4 Units.
Three-quarter series on civic education theory, the civic mission of higher education, and community-based action research methods. Provides students with a solid grounding in civic education theory while also creating opportunities for students to practice civic habits.

Prerequisite: UNI STU 195A.

UNI STU 195C. Engaged Leadership. 4 Units.
Three-quarter series on civic education theory, the civic mission of higher education, and community-based action research methods. Provides students with a solid grounding in civic education theory while also creating opportunities for students to practice civic habits.

Prerequisite: UNI STU 195B.

UNI STU 196. Directed Studies in Undergraduate Education. 1-4 Units.
Students do directed study (research, readings, etc.) on a topic related to Undergraduate Education under the supervision of one of the faculty who serve as Deans or Faculty Directors in the Division of Undergraduate Education.

Repeatability: May be taken for credit for 12 units.

UNI STU 197A. UTeach Special Study. 2 Units.
Students accepted to teach a UTeach course in spring quarter enroll in Special or Independent Study with their faculty mentor during the preceding fall quarter to develop their detailed course syllabus.

Repeatability: Unlimited as topics vary.

Restriction: UTeach Program students only.

UNI STU 197B. UTeach: Teaching Theory and Practice. 2 Units.
Students accepted to teach a UTeach course in spring quarter enroll during the winter to develop their teaching skills in preparation for teaching the following quarter.

Prerequisite: UNI STU 197A.

Grading Option: Pass/no pass only.

Restriction: UTeach Program students only.
UNI STU 197C. UTeach: Teaching Practicum. 2 Units.
Students selected to teach in the UTeach Program teach their courses and meet weekly in a seminar to continue to develop and enhance their teaching skills.

Prerequisite: UNI STU 197B.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: UTeach Program students only.

UNI STU 197D. Study Abroad Experiential Learning. 1 Unit.
Study abroad on an approved program. Complete critical reflection (written paper, blog, etc.) submitted no later than the end of the quarter following the completion of the study abroad program. Enroll while studying abroad or the quarter immediately following return.

Grading Option: Pass/no pass only.

UNI STU 197E. Reflections While Abroad. 1 Unit.
For students while they are studying abroad; maximizing learning outcomes by critically reflecting on learning experiences while abroad. Topics include cultural observations, professional issues, cultural competence, etc. Participants are located in different countries around the world. Course may be offered online.

Grading Option: Pass/no pass only.

UNI STU 296. Graduate Legal Studies . 0.3 Units.
Monthly faculty/student colloquium to present and discuss socio-legal related research/issues. Course convened by Law School faculty with other faculty participation. Required for PLGS students enrolled in Law portion of degree.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students and Law students only.

UNI STU 297. California Community College Internship. 2-8 Units.
The California Community College Internship offers graduate students the opportunity to learn about faculty life, governance, and teaching at local community colleges. Structures fieldwork for students to participate in and reflect on the educational mission of community colleges.

Prerequisite: Teaching experience.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 10 units.

Restriction: MFA or Doctoral students who have advanced to candidacy.

UNI STU 390A. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.
Introduction to principles of good course design and instructional development. Students design and implement an integrated curriculum in the context of the fall TA Professional Development Program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Pedagogical Fellow with the TLTC.

UNI STU 390B. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.
Introduction to the Scholarship of Teaching and Learning literature within the students’ respective disciplines. Students select or create several teaching methods stated or implied by the literature and translate these findings into workshops for other TAs.

Prerequisite: UNI STU 390A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Pedagogical Fellow with the TLTC.
UNI STU 390C. Advanced Pedagogy and Academic Job Preparation. 2-4 Units.
Prepares students for their future roles as faculty members and the academic job search. Covers job search skills; creation of CV, cover letters, statement of teaching philosophy; job interview and negotiation skills; types of higher educational institutions and professorial responsibilities.

Prerequisite: UNI STU 390B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Pedagogical Fellow with the TLTC.
Graduate Division

Frances M. Leslie, Vice Provost for Graduate Education and Dean of the Graduate Division

Overview

With the exception of programs conducted by the School of Medicine for the training of physicians, and the J.D. program in the School of Law, the Vice Provost for Graduate Education, and Dean of the Graduate Division administers graduate education in accordance with academic policies established by the University of California, the Irvine Division of the Academic Senate, and the UCI Graduate Council, a standing committee of the Irvine Division of the Academic Senate. Graduate education includes those students engaged in the pursuit of a master's degree, a doctoral degree, or a teaching credential, as well as individuals engaged in postdoctoral training at UCI. There is no separate graduate faculty at UCI; all graduate work is supervised by academic units and faculty members who have concurrent responsibility for undergraduate education.

Information about graduate education at UCI is published here in the UCI General Catalogue, on the Graduate Division website, and in individual graduate program publications. The staff of the Graduate Division and departmental academic advisors are prepared to answer questions about admission, academic policies and procedures, graduate programs and degrees, financial assistance, student services, and other matters of concern to applicants or graduate students. The Graduate Division is located in 120 Aldrich Hall; 949-824-4611; or visit the Graduate Division website (http://www.grad.uci.edu).

The University of California believes that a diverse student and faculty population is integral to the advancement of academic excellence and is critical to promoting the lively intellectual exchange and the variety of ideas and perspectives that are essential to advanced scholarly research and debate. The University is committed to expand student outreach, recruitment, and retention efforts. Through the Graduate Division's diversity programs, steps are taken to increase the participation of diverse groups of U.S. citizens and permanent residents who have been educationally or socioeconomically disadvantaged.

It is the goal of UCI's Graduate Division to award fellowships to many admitted students based upon merit or financial need. In addition, diversity fellowships for new and continuing Ph.D. and M.F.A. students are based on demonstrated scholastic achievement, full-time status, U.S. citizenship or permanent residency, and socioeconomic and educational limitations. Each academic department identifies those students whose scholarship, background, and life experiences can best enhance the level of diversity within a department or discipline.

Admission to Graduate Standing

Applicants for admission to graduate study at UCI must apply for acceptance into a specific graduate program to work toward a specific advanced degree. A general requirement for admission is that the applicant hold the degree of Bachelor of Arts, Letters, Philosophy, or Science (or an acceptable equivalent) from an accredited academic institution with degree standards equivalent to those of the University of California. A minimum undergraduate grade point average of at least B (3.0 on a 4.0 scale) is required.

Each applicant's file is comprehensively evaluated by the faculty admissions committee of the applicant's specific graduate program on the basis of such factors as academic subject preparation, scholarship, letters of recommendation, test scores, and examples of previous work. One critical evaluative question is whether the applicant's academic objectives can reasonably be satisfied by a particular graduate program on this campus. Please note that the University of California does not have the capacity to accommodate/admit all applicants who meet the minimum admission requirements.
Application Procedures

How to Apply

Prospective students should apply online using the Application for Graduate Study available at Graduate Division website (http://www.grad.uci.edu). Detailed instructions are included in the electronic application. For additional information, send email to grad@uci.edu or call 949-824-4611.

The mandatory application fee is $105 ($125 for international students) and is not refundable under any circumstances. (Please note, however, that the application fee for M.B.A. programs offered by The Paul Merage School of Business is $150.) Payment instructions are provided in the electronic application as well as on the Graduate Division website (http://www.grad.uci.edu). Diversity program and/or financial-need-based application fee waivers may be available for a few domestic (U.S. Citizen or U.S. Permanent Resident) applicants.

When to Apply

For all graduate programs, applications should be completed and submitted by the respective program’s stated deadline. Some programs have deadlines as early as December 1; others have deadlines of January 15, and still others may accept applications until March or thereafter. In order to process applications in time for the applicant to receive full consideration, letters of recommendation, official transcripts, and official test scores must be received before the published deadlines. Some schools and departments have earlier or later deadlines for filing the application. Applicants should consult their prospective department or school for more detailed information. Contact information for the schools and departments may be obtained by visiting their individual websites or via the list of department and school contacts on the Graduate Division website (http://www.grad.uci.edu/academics/degree-programs).

Required Supporting Documents

Letters of Recommendation

Applicants should arrange to have three letters of recommendation forwarded directly to their prospective academic department or program. Recommendation forms are available for downloading at the Graduate Division website (http://www.grad.uci.edu). Only one set of three recommendation letters needs to be submitted in support of an application for admission and fellowship or assistantship consideration. It is important that letters of recommendation be completed primarily by professors or instructors in disciplines related to the proposed course of study who are in a position to analyze an applicant’s abilities and academic promise.

Graduate Record Examination (GRE) Scores

All applicants are required to take the Graduate Record Examination (GRE) General Test, with the following exception: The Paul Merage School of Business requires that M.B.A. applicants take either the Graduate Management Admission Test (GMAT) or the GRE. Executive M.B.A. and Health Care Executive M.B.A. applicants are exempt from the test requirement. The M.S. Program in Nursing, the online program in Criminology, Law and Society, the California Education Credential, and programs leading to the Master in Fine Arts degree do not require the GRE. Several programs also require, or strongly recommend, that an applicant report the score of a GRE Subject Test. There is no minimum GRE score. Applicants should register for either the October or December test dates to ensure the timely receipt of their score results for admission consideration. The GRE is administered by the Educational Testing Service (http://www.ets.org). GRE scores that are more than five years old are not acceptable.

Domestic Academic Records

Domestic applicants should request that the official transcript be forwarded directly to their prospective academic department or program. One complete set of official records covering all postsecondary academic work attempted, regardless of length of attendance, is required. One official set of transcripts must also be submitted by applicants who attended or graduated from any University of California campus, including UC Irvine. Applicants with academic work in progress must expect to complete their undergraduate degree programs before the intended date of enrollment at UCI and must submit evidence of degree conferral before officially enrolling.

Foreign Academic Records

Official records from overseas institutions should be sent directly to the prospective academic department or program at UCI. Records of academic study from foreign institutions must be official, bearing the original signature of the registrar and the seal of the issuing institution. Applicants should not send the original of an academic record which cannot be replaced; they should obtain instead properly certified copies. Unless academic records and diplomas are issued in English by the institution, the official records in their original language must be submitted with an authorized, complete, and exact English translation. Foreign academic records must be in duplicate and include all subjects or courses taken on a yearly basis, together with the units of credit or time allotted to each subject each term or year and the marks or ratings in each subject or examination passed. In all cases the institutional grading scale or other standard of evaluation, including maximal passing and failing marks and definition of grades between them, should appear on official records or as an official attachment. Official evidence of degree conferral must also be supplied, together with evidence of rank in class if available.

Demonstration of English Language Proficiency for Admission

Applicants whose primary language is not English are required to demonstrate proficiency in English for admission consideration. A student may receive a waiver to the Test of English as a Foreign Language (TOEFL or TOEFL iBT) requirement for purposes of admission to a UCI graduate program if the student completed all of the requirements for their high school diploma, bachelor’s degree, or an advanced degree in a country where the primary and/or dominant language is English, and where English was the language of instruction of the school where the requirements were completed. The TOEFL/TOEFL iBT requirement may be waived for admissions purposes only. In addition, this policy pertains to the minimum UCI campus admission policy.
for English Language proficiency. Individual departments may have stricter requirements than the minimum campus standard. Applicants should always consult the department in which they are interested for specific requirements.

Proficiency in English may be demonstrated by passing one of two standardized, internationally administered tests: TOEFL (the Test of English as a Foreign Language), or IELTS (International English Language Testing System). The applicant should take one of these tests at the earliest available date to ensure that the scores are reported in time to meet application deadlines. Applicants will not be admitted provisionally if they lack an acceptable proficiency score or have not yet taken an acceptable proficiency examination.

The TOEFL is administered by Educational Testing Service (http://www.ets.org) (ETS). The minimum score required for admissions consideration is 550 for the paper-based test; for the TOEFL iBT, the minimum required overall score for admissions consideration is 80. TOEFL and TOEFL iBT scores that are two years old or older are not acceptable. Results of institutional (non-ETS) administrations of the TOEFL or TOEFL iBT are not acceptable.

English language proficiency may also be demonstrated by passing the Academic Modules of the International English Language Testing System (http://www.ielts.org) (IELTS) examination. The minimum requirements for admissions consideration are an overall score of 7, with a score of no less than 6 on any individual module. IELTS test scores that are two years old or older are not acceptable.

**Demonstration of Oral English Proficiency for International Teaching Assistant/Associate Employment**

Many UCI degree programs require students to serve as a Teaching Assistant for training purposes and as a graduation requirement. UCI encourages (and some individual graduate programs require) prospective students to take and pass one of the accepted oral English proficiency examinations prior to application/admission. International and U.S. Permanent Resident graduate students who are not citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council, who wish to be considered for appointment as a Teaching Assistant/Associate, must pass one of the following English proficiency examinations: Test of English as a Foreign Language Internet-based Test (TOEFL iBT), International English Language Testing System (IELTS), or UCI campus Speaking Proficiency English Assessment Kit (SPEAK) test. TOEFL iBT is administered by the Educational Testing Service (ETS). IELTS, on the other hand, is administered through the partnership of the British Council, IDP: IELTS Australia and the University of Cambridge ESOL Examinations. Once a student is admitted to UCI, the SPEAK test, which is administered by the UCI Humanities Instructional Resource Center (HIRC), is an option to satisfy this requirement. Achieving a minimum score of 26 on the speaking portion of the TOEFL iBT, a score of 8 on the speaking module of the IELTS, or a score of 50 on the SPEAK test satisfies the oral proficiency requirement and may establish eligibility for a Teaching Assistant/Associate appointment. Graduate students are responsible for ensuring that the UCI Graduate Division is notified directly of their scores by the testing centers. There is no exception to this requirement.

A full discussion of English proficiency options and links to the agency sites offering these examinations are available at the Graduate Division’s English Proficiency website (http://www.grad.uci.edu/admissions/applying-to-uci/english-proficiency.html).

Students who are citizens of the United States (regardless of country of origin) and citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council are exempt from the requirement of taking and passing the English language proficiency examinations. Non-U.S. citizens who are U.S. Permanent Residents or hold other non-citizen status and are residing in the United States, who have completed their undergraduate education in the United States, or have attended American schools abroad are still required to pass one of the English language proficiency examinations noted above in order to be eligible for an appointment as a Teaching Assistant/Associate. International and U.S. Permanent Resident graduate students whose native language is not English, who have completed all years of their high school education in the United States, are eligible to request an exemption by submitting a request and official high school transcripts to the Graduate Student Employment Analyst in the Graduate Division. No student is permitted to begin an appointment as a Teaching Assistant/Associate until the exemption has been approved in writing.

**Special Note to Foreign Applicants**

If admitted, foreign applicants will be required to certify that they possess sufficient funds to cover all tuition, fees, transportation, and living expenses for the first year of their studies at UCI. A Visa Request Form which contains a section for verification of financial resources will be forwarded to foreign applicants upon admission to graduate study. The required financial verification must be provided before a visa can be issued.

- Admission and Registration
- Campuswide New Graduate Student Orientations
- Academic Advising

---

**Admission and Registration**

A formal notice of the admission decision is sent to each applicant as soon as possible after the application and complete records are received, and after the department has made a recommendation. The official notification will be mailed well in advance of the beginning of the quarter for which application has been made.

Admission to graduate standing does not constitute registration for classes. A student is not officially registered for classes until the entire registration procedure is completed each quarter, including payment of Tuition, Student Services Fee, and other University fees, and enrollment in courses.
Information on registration dates and procedures will be mailed to newly admitted students prior to the registration cycle. Extensive information for newly admitted students is available at the New Graduate Students website (http://www.grad.uci.edu/new-students).

If an applicant wishes to defer admission to a later academic quarter (up to a maximum of three quarters after the original quarter of admission), the Graduate Division must be notified of the request in writing. After formal admission has been offered, the request for deferral must also be approved by the academic program to which the applicant was admitted.

Campuswide New Graduate Student Orientations

Incoming graduate students are strongly encouraged to attend the Campuswide New Graduate Student Orientation, and all international students are encouraged to also attend the International Graduate Student Orientation, both held during the third week of September each fall. The Campuswide New Graduate Student Orientation covers all aspects of navigating graduate education at UC Irvine, including graduate student services. It augments school/department-based orientations, and students should attend both. The International Graduate Student Orientation covers unique aspects of the international graduate student experience, and provides information on campus support services; international students are encouraged to attend both campuswide orientation events. Information about the Campuswide New Graduate Student Orientation is e-mailed to incoming graduate students the summer prior to the event; information about the International Graduate Student orientation is also provided at that time to incoming international students. Inquiries may be directed to gradorientation@uci.edu, and details are available at the New Graduate Student Orientations website (http://www.grad.uci.edu/services/campuswide-orientation).

Academic Advising

In each academic unit with an advanced degree program, there is at least one formally appointed faculty graduate advisor or director of graduate studies. The graduate program advisor is a regular faculty member responsible for supervising graduate study in that unit, for monitoring the academic progress of graduate students, and for seeing that each graduate student is assigned a faculty advisor. The graduate student’s faculty research advisor is responsible for mentoring the student, which includes meeting with the student at least once during each quarter of enrollment and providing an annual assessment of each student’s timely academic progress. The graduate program advisor plays a key role in the academic lives of graduate students, advising students and other faculty members about program requirements and the academic policies pertaining to graduate students, approving study lists, and evaluating academic petitions. In many academic units the graduate program advisor is instrumental in the nomination of students for fellowship support, the selection of students for assistantships and fellowship appointments, and in the supervision of graduate student teachers. In most schools there also is an associate dean for graduate studies who coordinates many of the functions which affect graduate students within that school. Both graduate advisors as well as deans are important links between the student and the Dean of the Graduate Division.

Most graduate students also will have an individual faculty advisor or advising committee after the first year of graduate study and in order to progress to the Ph.D. degree a student must work with an advisor. When a student is advanced to candidacy for the Ph.D., the doctoral committee becomes the primary source of academic guidance; however, student academic petitions still must be approved by the faculty graduate program advisor.

• Leave of Absence
• Readmission
• Intercampus Exchange Program
• Transfer of Credit

Academic Policies

The academic policies described here apply to students enrolled in study leading to graduate degrees and California education credentials. Other regulations and procedures are covered in the Academic Regulations and Procedures sections, and in the description of each graduate program.
Academic Honesty

It is essential that all members of the academic community subscribe to the ideal of academic honesty and integrity and accept individual responsibility for their work. Students are urged to become familiar with the UCI Academic Senate Policies on Academic Honesty, available at the Academic Senate website (http://www.senate.uci.edu/senateweb/default2.asp?active_page_id=754) and in the Catalogue’s Appendix. The policies apply equally to electronic media and print, and involve text, images, and ideas.

Scholastic Requirements

A graduate student is expected to make satisfactory progress toward an approved academic objective, as defined by the faculty of the program in accordance with policies of the Graduate Council, to maintain a satisfactory grade point average for all work undertaken while enrolled in graduate study, and to maintain academic progress within the required time to degree as established by the respective academic program. Satisfactory progress is determined on the basis of both the recent academic record and overall performance. A graduate student normally is expected to complete satisfactorily at least eight units of academic credit applicable to the graduate program in each regular academic session (unless on an approved leave of absence), and satisfy all requirements of the academic program according to an approved schedule. For a graduate student, only the grades A+, A, A-, B+, B, and S represent satisfactory scholarship and may be applied toward advanced degree requirements. However, a UCI course in which a grade of B- is earned may be accepted one time only, via a formal petition process, in partial satisfaction of the degree requirements if the student has a grade point average of at least 3.0 in all courses applicable to the degree. Graduate students may not apply courses graded Pass/Not Pass toward any degree or satisfactory progress requirements. A grade point average below the B level (3.0 on a 4.0 scale) is not satisfactory, and a student whose grade point average is below that level is subject to academic disqualification.

A student’s academic progress ordinarily is evaluated on the basis of the academic record, time-to-degree, and the professional judgment of the faculty. A few weeks after the end of a quarter, an updated copy of each enrolled student’s permanent academic record is available from the Registrar. This record lists all UCI courses for which a graduate student was enrolled (including courses taken through the Intercampus Exchange Program), the grades assigned, and the cumulative grade point average. This record also includes formal candidacy for an advanced degree, degrees conferred, certain examinations passed, unit credit accepted from other institutions, and other important academic information.

A graduate student who has not demonstrated satisfactory academic progress is not eligible for any academic appointment such as Reader, Tutor, Graduate Student Researcher, Teaching Associate, or Teaching Assistant, and may not hold a fellowship or other award which is based upon academic merit.

Satisfaction of Degree Requirements

To graduate, students must satisfy the degree requirements outlined in the Catalogue that is in effect for the quarter in which they are registering for a graduate program. If the degree requirements are subsequently revised, the academic unit may, where appropriate, give students the option to meet the new requirements instead. If degree requirements are revised between the time a student is admitted and the time a student registers, the unit should notify the student of the modifications in writing. A student who withdraws from a program, or loses student status for other reasons for one or more quarters, will be bound by the degree requirements in effect at the time of readmission unless otherwise stipulated and agreed to in writing by the academic unit and approved by the Dean of the Graduate Division. A student who defers admission or who changes to another program will be held to the requirements in effect at the time of first registration.

Grading

With the consent of the academic units involved, and upon approval by the Graduate Council, individual study and research courses at the graduate level may be graded Satisfactory or Unsatisfactory (S/U). Also, with the approval of the Graduate Council certain graduate courses are graded S/U only. A grade of S is assumed equivalent to a grade of B (3.0) or better. No course credit is given to a student for a course in which a grade of U is received.

Graduate students may take one undergraduate course (up to four units) per quarter on a Pass/Not Pass basis. However, such courses are not considered part of the student’s graduate program and are not applied toward the requirements for an advanced degree.

The grade Incomplete (I) is assigned when a student’s work is of passing quality but is incomplete for good cause. The I grade may be replaced by a permanent grade, provided the student completes the course work in a way authorized by the instructor and within the time limits expressed. The student must complete the course work within the period set by the instructor, or within 12 months following the quarter in which the grade Incomplete was originally awarded, or prior to the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor is not obligated to allow the maximum time period. When the course work is completed within the time allowed, the student must ask the instructor of the course to submit an Academic Record Change Request to the Dean of the School in which the course is taught. During the time allowed for replacing an I grade, the I grade will not be used in computation of a student’s grade point average. However, if the incomplete course work is not completed in the manner authorized by the instructor and within the time limits stated above, the I grade shall automatically be replaced with the permanent grade of F, NP, or U, as appropriate in accordance to the grading option selected when the student enrolled in the course, and will be used in computation of the student’s grade point average. Graduate students who have not been continuously enrolled should contact their graduate advisor for information about completion of incomplete grades.

IP (In Progress) is a transcript notation restricted to sequential courses extending over two or more quarters for which use of the IP notation has been approved. When the last quarter of the sequence is completed, the grade for the final quarter is assigned for all quarters of the sequence. No credit is given until the student has completed the entire sequence.
A student who received an NR (No Report) transcript notation must immediately contact the instructor and arrange for the removal or replacement of the NR. If no action is taken by the end of the first quarter following the quarter in which the NR was assigned, or by the end of the quarter immediately preceding award of the degree, whichever comes first, the NR becomes an F, U, or NP and will remain permanently on the student’s record.

A graduate student may repeat once a course in which a grade below B (3.0) or a grade of U was received. Only the most recently earned grade is used in computing the student’s grade point average for the first eight units of repeated work; thereafter both the earlier and the later grades are used. Additional information about grading may be found in the Academic Regulations section.

Language Policy for Examinations and Theses/Dissertations

English is the language of instruction and examination for graduate courses at UCI, unless the subject matter includes foreign language content. Similarly, examinations that satisfy specific degree requirements, such as preliminary, comprehensive, qualifying/candidacy examinations and thesis/dissertation defenses shall be conducted in English, except for the portions of the examination where the subject matter makes a different language specifically appropriate. (Examples include foreign language literature, linguistics, and others.)

Students must seek permission to write their thesis/dissertation in a language other than English. To do so, immediately after advancement to candidacy, the candidate must submit to the Dean of the Graduate Division a letter approved by the thesis/dissertation chair, committee, and department chair. All members of the candidate’s thesis/dissertation committee must have a reading knowledge of the language presented in the thesis/dissertation. There must be legitimate reasons for substituting English with a foreign language such as subject matter, special primary audience, publication arrangements, academic position in a foreign country, historical or literary value, or principal language(s) used in the documents to be analyzed and interpreted. **Inability to write in English is not a valid reason.** If the thesis or dissertation is approved to be written in a foreign language, the candidate must submit two abstracts. One must be in English. The other must be written in the language of the thesis or dissertation. Moreover, the thesis/dissertation defense will be conducted in English, except as determined by subject matter. See the UCI Thesis and Dissertation Manual (http://special.lib.uci.edu/dissertations/uci_td.html) for information about the preparation of manuscripts.

Academic Disqualification

After consultation with the student’s academic unit, the Dean of the Graduate Division may disqualify a student for academic reasons, including, but not limited to, having a grade point average in graduate and upper-division courses below 3.0 for two or more successive quarters; or failing to pass (or not taking) a required examination or course within the time specified for that graduate program; or not maintaining satisfactory academic progress toward completion of an approved program of study. Beginning with students entering in fall 2010, the Graduate Dean will not permit students to enroll past their programs’ maximum time to degree (MTTD). Any exception request must be made in writing directly to the Graduate Dean and will be considered in cases involving extenuating circumstances beyond the student’s control. The exception request must include a plan and timeline for completion of the degree, must be signed by the student’s program advisor and Associate Dean, and must be submitted at least one quarter in advance of maximum time to degree. Note that leaves of absence of up to three quarters and time allotted for parental leave are not counted toward a student’s normative or maximum time to degree.

Unsatisfactory academic progress may be determined on the basis of explicit requirements (as described above), but the professional judgment of the faculty upon review of all graduate work undertaken by the student is paramount and the faculty of a particular academic unit may establish more restrictive criteria for satisfactory academic progress. Unsatisfactory progress will also result when a Ph.D. student is unable to secure a faculty advisor or if the student’s advisor/advisee relationship is terminated and the student is unable to secure a new faculty advisor within a specified period of time. Ordinarily, a student whose work does not meet academic standards may be given written notice and a reasonable period of time in which to make up all deficiencies.

Prior to taking final action to disqualify, the Dean of the Graduate Division ordinarily will notify a student who is subject to academic disqualification and will provide reasonable opportunity for the student to correct erroneous or outdated academic records, and to submit other information or comments in writing to be included in the Dean’s review.

Upon final written notice of academic disqualification by the Dean of the Graduate Division, disqualification will be noted on the formal academic record of that student.

Academic Residence

A graduate student is considered to be in residence during an academic quarter if at least four units of academic credit are earned in regular upper-division or graduate courses. Credit for one academic quarter of residence may also be earned by completing at least two units of credit in approved courses in each of two six-week summer sessions, or four units of credit in an eight- or ten-week summer session. In the case of Ph.D. students, these must be consecutive sessions.

Enrollment Policy

Full-time academic enrollment is expected of graduate students at the University of California. Study for the Ph.D. requires a full-time commitment from the doctoral student. Full-time study is defined as enrollment in at least 12 units of upper-division or graduate academic credit per quarter, including credit for supervised research or teaching. Graduate students may enroll in lower-division courses with the approval of their academic advisors, but such courses are not considered to be part of any graduate program.
Graduate students ordinarily may not receive credit for more than 12 units per quarter in graduate courses, or 16 units in upper-division courses, or a proportionate number in combination. Course loads in excess of 16 units must be approved in advance by the student’s Graduate Advisor.

Although in most instances completion of an advanced degree at UCI requires full-time study, the University recognizes the legitimate need for part-time study opportunities and is committed to providing those opportunities wherever possible. Graduate degree programs may be opened to part-time students wherever good educational reasons exist for so doing. In general, part-time status is available in master’s and credential programs where part-time study has been judged academically feasible by faculty and approved by the Graduate Council. However, on the recommendation of the academic unit, students admitted to a Ph.D. program may be approved by the Dean of the Graduate Division for part-time status on an ad hoc basis. Under this policy, part-time enrollment at the graduate level is defined as enrollment for eight units or less. Within the guidelines and limitations noted on the application form available on the Graduate Division website (http://www.grad.uci.edu), graduate students may petition for part-time status for a maximum of three consecutive quarters and, if the petition is approved, shall pay the full Student Services Fee and student activities fees, one-half the Tuition, and if applicable, one-half the Nonresident Supplemental Tuition and one-half the Professional Degree Supplemental Tuition. Part-time enrollment and the corresponding fee reduction are generally not available to students enrolled in self-supporting programs in which they pay a program fee.

Continuous Registration

A graduate student is expected to register for each regular academic session (fall, winter, and spring quarters) until all requirements for an advanced degree or credential have been completed, including final examinations and the submission of an approved thesis or dissertation. Registration is not official or complete until all required tuition and fees have been paid and the student has enrolled in classes. Students are responsible for ensuring that their course enrollment is correct and that their fees and tuition have been paid by the applicable deadlines.

A student engaged in study or research outside the state of California for an entire quarter ordinarily will be required to register in absentia. Unless an official leave of absence has been granted, or a petition to pay the Filing Fee in lieu of registration has been approved by the Dean of the Graduate Division, a student who does not register by the final deadline for any regular quarter will lose graduate standing (i.e., the individual’s status as a graduate student will lapse), and candidacy for any advanced degree will lapse. Prior to resuming graduate study in the University, a former student must successfully apply for readmission. If readmitted, the student must satisfy the academic requirements in effect at the time of readmission and may be required to satisfy certain requirements a second time, including those for formal advancement to candidacy. A readmitted student must register and then be advanced to candidacy at least one quarter before receiving an advanced degree. A degree cannot be conferred earlier than the second quarter following readmission. Students must be registered or on approved Filing Fee status for the academic term in which the degree is conferred.

A graduate student who decides to leave the University after enrolling and paying tuition and fees for a quarter must file an official Withdrawal form with the Dean of the Graduate Division. A graduate student in good academic standing who wishes to withdraw temporarily from graduate study and intends to return within one year may submit an application for a leave of absence. A graduate student who wishes to apply for a leave of absence after enrolling and paying tuition and fees for a quarter must file both a Withdrawal form and an application for a leave of absence. If the leave is approved, the student remains in good standing and need not apply for readmission in order to enroll at the expiration of the leave period. Students who file a withdrawal for any reason, including leave of absence, after enrolling and paying tuition and fees are subject to the Schedule of Refunds policy (http://www.reg.uci.edu/enrollment/withdrawals/#refunds).

In Absentia

In absentia status is a form of registration available to academic and professional degree graduate students undertaking necessary course work or research related to their degree programs outside of California. The Fee Policy for Graduate Student in Absentia Registration promotes continuous enrollment of graduate and professional degree students by providing an appropriate enrollment incentive. Research leaves for work outside of the state of California have been eliminated. Students registered in absentia are assessed 15 percent of the Student Services Fee and Tuition, the full health insurance fees, and the Associated Graduate Students fee. If applicable, students are also assessed nonresident supplemental tuition and/or professional degree supplemental tuition. All students pursuing doctoral or master’s degrees in academic disciplines as well as those pursuing professional master’s or doctoral degrees are eligible for the fee reduction. Students must be enrolled full-time in regular University of California units to be eligible for the reduced in absentia fee. Students in self-supporting graduate programs, exchange programs, or programs paying only a program fee are not covered by this policy and are not eligible for in absentia registration.

The research or course work must be directly related to the student’s degree program as evidenced by UC faculty approval; must be of a nature that makes it necessary to be completed outside of California for at least one full academic term; must involve only indirect supervision appropriate to evaluating the student’s academic progress and performance by UC faculty during the in absentia period; must involve no significant studying or in-person collaboration with UC faculty during the in absentia period. Under no circumstances can students participate in coursework, exams or research at UC Irvine for any part of a term in which the student is on in-absentia status. Students should be advanced to candidacy before applying for in-absentia status.

Students who will be engaged in necessary degree-related course work or research off campus but within the state of California may be eligible to apply for in-absentia status by exception, depending on the location of their research.
**Leave of Absence**

A graduate student who withdraws from the University with the intention of returning within one year and wishes to avoid a lapse of student status should request a leave of absence. A leave of absence of up to one year’s duration may be granted by the Dean of the Graduate Division upon the recommendation of the student’s academic unit, subject to the following guidelines:

1. The student must have **completed** satisfactorily at least one quarter in residence and be in good academic standing. The leave must be consistent with the student’s academic objectives.
2. Leave ordinarily is approved in cases of serious illness or other temporary disability, or temporary interruption of the student’s academic program for other appropriate reasons.
3. A student on leave is not eligible for assistance from a University fellowship, research grant, or financial aid program, and may not hold an academic appointment or be employed by the University in any capacity. During a period of leave, a student may not take comprehensive or qualifying examinations or earn academic credit (except by a transfer of credit from another institution approved in advance by the Dean of the Graduate Division). University resources and facilities, including housing, are ordinarily unavailable to students on leave.
4. A student failing to register for the next regular academic session following the expiration of leave will lose graduate standing and will be subject to the following readmission policy.

**Readmission**

A student who previously withdrew from the University, or whose student status has lapsed, may request readmission to graduate study by submitting online a new Application for Graduate Study with the nonrefundable $105 fee ($125 for international students). The Dean of the Graduate Division may grant readmission when recommended by the academic unit. If readmitted, a student’s previous academic work will be applied toward the requirements for an advanced degree only with the approval of the graduate advisor and the Dean of the Graduate Division. A readmitted student must satisfy the academic requirements in effect at the time of readmission and may be required to satisfy certain requirements a second time, including those for formal advancement to candidacy. A readmitted student must register and then be advanced or reinstated to candidacy at least one quarter before receiving an advanced degree, which will be conferred no earlier than the second quarter following readmission. In exceptional circumstances, a student who has not registered by the end of the third week of classes may file a Readmission Petition with the Graduate Division during that academic term upon approval of the student’s department chair and the respective school’s associate dean, and payment of a $105 readmission fee.

**Intercampus Exchange Program**

A graduate student in good standing who wishes to take advantage of educational opportunities available only at another campus of the University of California may do so through the Intercampus Exchange Program. Ordinarily, an exchange student will have demonstrated a high level of scholarship during at least one quarter of graduate study at the home campus and will have well-defined academic objectives. Approval of the faculty advisor, the host department(s), and the respective Deans of Graduate Studies is required. Direct arrangements between faculty members on the two campuses are encouraged so as to ensure that courses, seminars, or facilities will be available to meet the participating student’s needs. Students may take courses on more than one campus of the University in the same academic session.

The exchange student enrolls and pays tuition and fees on the home campus and then enrolls at the host campus, following the procedures of that Registrar’s Office. A report of academic work completed will be transferred to the student’s academic record on the home campus after the term has ended. Although eligible for all normal student services, the exchange student is a visitor and is not formally admitted to graduate study at the host campus. Application forms for the Intercampus Exchange Program may be downloaded from the Graduate Division website (http://www.grad.uci.edu/forms) and should be filed with the Office at least four weeks before the beginning of the quarter in order to avoid penalties.

**Transfers of Credit**

At least one-half of the course requirement for a master’s degree must be completed while in residence as a graduate student at UCI. Credit for up to one-fifth of the minimum number of units required for a master’s degree may be allowed for graduate-level work completed at another institution or through University Extension prior to first graduate enrollment at UCI. Such courses do not count toward the required number of units in 200-series courses. Up to one-half the units required may be accepted from another graduate division of the University of California. After enrollment, the student must initiate a formal petition for such credit and submit an original transcript. The acceptance of unit credit earned in another program must be recommended by the academic unit to which the student has been admitted and be approved by the Dean of the Graduate Division. No units of transfer credit will be given for any course in which a grade below B (3.0) or equivalent was assigned. Under no circumstances will grade credit be transferred.

A student currently enrolled in a master’s degree program or on a leave of absence may receive unit credit (not grade credit) for graduate-level work completed at another institution or through University Extension only with the prior approval of the departmental graduate advisor and the Dean of the Graduate Division. No transfer credit will be given for any course in which a grade below B or equivalent is received.

A student who begins graduate study at UCI in the fall quarter will receive appropriate credit for courses taken in preceding UCI summer sessions, provided that the formal date of admission precedes summer session enrollment. Continuing graduate students will receive credit for courses taken in intervening UCI summer sessions.
Graduate Degrees

Master’s Degrees

The master’s degree is conferred at the end of the academic quarter in which all requirements have been satisfied, subject to the final approval of the Graduate Council. The student must be advanced to candidacy for the degree prior to the beginning of the final quarter of enrollment. Therefore, an application for advancement to candidacy, initiated by the student and approved by the academic unit, should be submitted to the Dean of the Graduate Division at least 30 days before the opening of the quarter in which the degree is expected.

The Master of Arts (M.A.) or Master of Science (M.S.) degree normally is attained by one of two routes: Plan I, the thesis option; or Plan II, the comprehensive examination option. Both require a minimum of one year in residence, satisfactory completion of prescribed course work, and an appropriate demonstration of achievement. Plan I includes a minimum of seven courses (28 units), 20 units or more of which must be at the graduate level; a thesis; and a general examination. Plan II requires at least nine courses (36 units), including 24 units or more at the graduate level, and a comprehensive examination covering a broad range of subject matter in the discipline. Only approved 200-series courses completed while in residence at the University satisfy the minimum graduate course requirement. Some programs will have course requirements exceeding the minimums cited above and may have additional or alternative degree requirements. Please refer to the description of the specific program for more information.

Master of Fine Arts (M.F.A.) degrees are awarded by the Claire Trevor School of the Arts (M.F.A. in Dance, Drama, Fine Arts, or Music) and by the Program in Creative Writing (M.F.A. in English) upon successful completion of the equivalent of two years or more of full-time study with an emphasis upon creative expression and professional development. Special thesis or comprehensive examination requirements are established for these programs.

Master of Arts in Teaching (M.A.T.) degrees are awarded by The Paul Merage School of Business upon successful completion of the equivalent of two years of full-time study in the development of professional managerial skills.

Master of Advanced Study (M.A.S.) degrees are awarded by the School of Social Ecology in Criminology, Law and Society upon successful completion of 52 units of course work in the broad areas of criminal justice, including corrections, probation, criminal prosecution, defense, and civil law. The program is fully online with the exception of a required one-week in-residence course during the first fall quarter.

The Master of Legal and Forensic Psychology (M.L.F.P.) degrees are awarded by the School of Social Ecology upon successful completion of 52 units of course work in a broad area that integrates facets of psychology, forensics and the law, and the intersection of psychology and legal issues. The program is a two-year professional degree program that is fully online with the exception of a one-week, in-residence course prior to the first fall quarter of instruction.

Master of Professional Accountancy (M.P.Ac.) degrees are awarded by The Paul Merage School of Business upon successful completion of 44 units of course work including core courses and electives.

Master of Public Health (M.P.H.) degrees are awarded by the Program in Public Health upon successful completion of 60 units of course work including core courses, electives, and courses in the student’s emphasis.

Master of Public Policy (M.P.P.) degrees are awarded by the School of Social Ecology upon successful completion of 72 units of course work including core courses and electives. Students also participate in a policy-relevant internship in an appropriate government, business, or nonprofit setting.

Master of Science (M.S.) in Nursing Science degrees are awarded by the Program in Nursing Science upon successful completion of 68–71 units of course work, depending on the student’s chosen area of specialization, as well as 720 hours of clinical practice in the student’s area of emphasis to be eligible for certification.

Master of Urban and Regional Planning (M.U.R.P.) degrees are awarded by the School of Social Ecology upon successful completion of the equivalent of two years of full-time study in contemporary methods of planning and policy analysis.

Doctor of Philosophy Degree

The Doctor of Philosophy (Ph.D.) degree is awarded on the basis of evidence that the recipient possesses knowledge of a broad field of learning and expert mastery of a particular area of concentration within it. The research dissertation is expected to demonstrate critical judgment, intellectual synthesis, creativity, and skill in written communication.
Students are required to advance to candidacy for the doctorate, and to complete all requirements for the doctoral degree, within the normative time specified by the individual graduate program. Students who fail to complete the degree within the normative time limit for their program shall be deemed as not making satisfactory academic progress, and may be ineligible to continue to receive non-instructional University resources (e.g., financial aid, teaching assistantships, student housing). Normative time-to-degree parameters for each doctoral program are indicated in the academic unit sections of this Catalogue. Students who fail to complete the degree within the maximum time-to-degree limit for their program shall not be permitted to enroll. For details see the section on Academic Disqualification.

The candidate for the Ph.D. is expected to be in full-time residence for at least six regular academic quarters. Four to six years of full-time academic work beyond the bachelor’s degree typically is required to complete the degree. At the end of the first year or so of full-time study, many programs administer a preliminary examination on the student’s mastery of fundamental knowledge in the discipline. Upon successfully demonstrating a high level of scholarship on this examination and after further study, the student will continue to a series of qualifying examinations which lead to formal advancement to candidacy for the Ph.D.

Graduate students ordinarily attain candidacy status for the Ph.D. degree when all preparatory work has been completed, when qualifying examinations have been passed, and when they are ready for the dissertation phase. Students are recommended for advancement to candidacy by unanimous vote of the candidacy committee nominated by the academic unit and appointed by the Dean of the Graduate Division on behalf of the Graduate Council. The Report of the Ph.D. Candidacy Committee (Form I) must be signed by the committee at the time the candidacy examination is concluded and submitted to the Dean of the Graduate Division. Following a unanimous favorable vote of the committee, the student will be advanced to candidacy upon payment of the $90 Candidacy Fee. Candidacy for the Ph.D. will lapse automatically if the student loses graduate standing by academic disqualification or failure to comply with the University policy on continuous registration. A readmitted student who was a candidate for the Ph.D. must again advance to candidacy and thereafter enroll as a candidate for at least one academic quarter before the Ph.D. may be conferred.

Following advancement to candidacy for the Ph.D., a doctoral committee nominated by the academic unit chair and appointed by the Dean of the Graduate Division on behalf of the Graduate Council, supervises the student’s program, approves the dissertation, and conducts the final oral examination if required. The chair of the doctoral committee is the member of the faculty responsible for providing primary guidance of the student’s dissertation. Ordinarily, the final examination will be given just prior to completion of the dissertation and while the student is in residence during a regular academic session. The final examination, or defense, is open to all members of the academic community. All student committees must conform to policy approved by the Graduate Council in effect at the time of examination. Ph.D. degrees are conferred, subject to the final approval of the Graduate Council, as of the last day of the regular academic quarter in which all requirements have been satisfied.

Theses and Dissertations

Candidates for the Ph.D., Ed.D., and certain master’s degrees must conduct an extensive research project and submit a dissertation or thesis in order to fulfill degree requirements. Research expenses are not supported by the University, and the cost of preparing the dissertation or thesis ordinarily ranges from $200 to $1,000, but may be considerably more.

After approval by the doctoral or thesis committee appointed for each candidate by the Dean of the Graduate Division, on behalf of the Graduate Council, doctoral and master’s students must file their dissertation or thesis with the UC Irvine Library Special Collections and Archives, via the electronic dissertation or thesis submission process (a paper process is also available). Generally, dissertations and theses are made available for public access unless an embargo has been requested for a specific period of time. The final copy must meet the University’s requirements for style, format, and appearance before the degree can be conferred. See the UCI Thesis and Dissertation Manual (http://special.lib.uci.edu/dissertations/uci_td.html) for information about the preparation of manuscripts. All doctoral students are required to submit an Exit Survey and a Survey of Earned Doctorates prior to the awarding of their degree.

Dissertations and theses must be filed by the deadline published on the Graduate Division website (http://www.grad.uci.edu/academics/filing %20deadlines) in order for them to be reviewed and accepted in time for the degree to be conferred in that quarter.

Those students who complete requirements and submit theses/dissertations after the end of the tenth week of classes and prior to the start of the subsequent quarter will earn a degree for the following quarter, but will not be required to pay tuition and fees for that quarter. Please note that in order to avoid payment of tuition and fees, manuscripts, all forms, and degree paperwork must be submitted prior to the first day of the quarter in which the degree is to be earned. Students should note that this does not apply if the thesis/dissertation is submitted after the deadline for spring quarter degrees. Students who submit after the spring deadline are required to either enroll in Summer Session or pay the Filing Fee if they have not done so previously.

The Filing Fee

Under certain circumstances, a student who has advanced to candidacy for a graduate degree may be eligible to pay a Filing Fee equal to half of the Student Services Fee in lieu of registration for any academic term including summer, subject to the approval of the Dean of the Graduate Division. International students who wish to go on Filing Fee status must, in addition, secure approval to do so from UCI’s International Center. In general, all requirements for a degree must have been satisfied prior to the start of the quarter, except for the submission of the final version of the dissertation or thesis, or the completion of a final oral or comprehensive examination. A student on Filing Fee status may not make use of any University resource, hold any academic appointment, receive any fellowship, or receive any student service for which official registration and payment of regular tuition and fees is a requirement. A Filing Fee will not be accepted immediately following readmission nor immediately following a leave of absence. The date for payment of the Filing Fee is the same as that for the payment of other student fees. If all degree requirements are not completed during the academic term in which the Filing Fee is paid, the student must subsequently register and pay all applicable tuition and fees. Students may only utilize the filing fee
option for one academic quarter during their graduate studies. Additional quarters are not allowed regardless of whether the student changes academic programs.

Nonresident Supplemental Tuition

Nonresident doctoral students who have advanced to candidacy are eligible for a 100 percent reduction in the annual Nonresident Supplemental Tuition for a maximum of three consecutive calendar years including time on leave of absence. Reduced Nonresident Supplemental Tuition begins with the first academic term following advancement to candidacy. Any nonresident student who continues to be enrolled, or who re-enrolls following the three-year maximum allowance, will be charged the full Nonresident Supplemental Tuition rate that is in effect at that time of enrollment.

Conferral of Graduate Degrees

Prior to the beginning of the quarter in which an advanced degree is to be conferred, the student must have advanced to candidacy for that degree and should have received formal notice confirming candidacy from the Dean of the Graduate Division. The student should consult the departmental faculty graduate advisor to determine which degree requirements, if any, have not yet been satisfied.

Students are advised by mail when their diplomas are available, which is approximately six months after the quarter in which the degrees are awarded.

Graduate Hooding Ceremony. Students completing a Ph.D. or M.F.A. are eligible to walk in the Graduate Hooding Ceremony. Students are required to meet all filing deadlines (http://www.grad.uci.edu/academics/filing%20deadlines) and satisfy degree requirements (http://www.grad.uci.edu/academics/degree-completion) in order to participate in the ceremony. Registration for eligible students opens in February. Inquiries about and details regarding the Graduate Hooding Ceremony may be directed to the Commencement Office (http://www.grad.uci.edu/academics/commencement).

Financial Assistance for Graduate Students

Several types of financial assistance are available to graduate students at UCI. These include fellowships, teaching and research assistantships, tuition fellowships for nonresident students, grants-in-aid, and student loans. Financial support in the form of fellowships or assistantships is typically only offered to students admitted to the Ph.D., however, some programs may offer such support to students pursuing the master's degree at their discretion.

All domestic graduate students are encouraged to submit the Free Application for Federal Student Aid (FAFSA) each year to access state and federal grants and loans. It is available at the FASFA website (https://fafsa.ed.gov) or in the Office of Financial Aid and Scholarships after January 1, with a submission deadline of March 2 each year. The Financial Aid section in this Catalogue and the Office of Financial Aid and Scholarships website (http://www.ofas.uci.edu/content) contain information about assistance based upon financial need that is administered by the Office of Financial Aid and Scholarships.

Applicants interested in assistantships or fellowships should so indicate on their application when applying for admission. Many graduate programs have a deadline for completed graduate applications of January 15; however, many graduate programs have earlier, or later, deadlines. Students should contact the academic program to which they are applying for accurate deadlines, particularly to receive full consideration for fellowship and assistantship awards. Continuing students interested in an assistantship or fellowship should contact the graduate advisor for their academic program. The awarding of fellowships to incoming students for the following academic year begins in the winter quarter.

UCI subscribes to the agreement of the Council of Graduate Schools of the United States, under which successful applicants for awards of financial support are given until April 15 to accept or decline such awards. An award accepted from one of the member universities may be resigned at any time through April 15. However, an acceptance given or left in force after that date commits the student to not accepting another appointment without first obtaining formal release for that purpose from the awarding institution.

Regents', UCI Chancellor's Fellowships, and other merit-based fellowships are awarded by some schools to a number of promising students entering graduate study at UCI leading to the Doctor of Philosophy or Master of Fine Arts degree. Awards may include a stipend, all required tuition and student fees, and, if applicable, Nonresident Supplemental Tuition. Other fellowships are offered, including tuition awards for outstanding applicants who are not residents of California. In many cases, fellowship stipends may be supplemented by partial assistantship appointments. Fellowship awards are typically made by the student's academic unit.

Entering or continuing graduate students may be awarded research or teaching assistantships for all or part of the academic year. The types of assistantships, number available, and required duties vary according to the activities of the academic unit. A graduate assistant who is not a California resident also may receive a tuition fellowship. While enrolled as a graduate student at UCI, students are limited in their employment with the University to no more than 50 percent time during each academic quarter. Fellowship support as well as research or teaching assistantships all require students to maintain satisfactory academic progress as defined by UC and UCI policy as well as by their academic units.

Through the Graduate Division's diversity programs, a number of diversity fellowships are awarded to entering and continuing domestic graduate students who may have been disadvantaged in higher education. Departments nominate candidates on the basis of their merit and contribution to the diversity of the department or discipline, as well as demonstrated scholastic achievement, full-time status, and U.S. citizenship or permanent residency. Individuals from diverse cultural, geographic, and socioeconomic backgrounds are especially encouraged to apply to UCI's graduate programs. In conformance with State law, applicants may not be given preferential treatment on the basis of race, ethnicity, gender, religion, or national origin.

http://www.arts.uci.edu/

Overview

The Claire Trevor School of the Arts is one of the nation’s most acclaimed and innovative centers for the creation, performance, and study of the arts within the context of their history and theory. The School consists of four departments, including Art, Dance, Drama, and Music, offering undergraduate B.A., B.F.A., and B.M. degrees, and M.F.A. degrees in all four disciplines. The Drama Department offers a doctorate in Drama and Theatre, jointly with UC San Diego. The Music Department offers a doctorate in Integrated Composition, Improvisation, and Technology (ICIT). The Art Department also offers minors in Digital Arts and Digital Filmmaking.

The School’s departments are located near each other in the Arts Plaza, providing possibilities for daily interaction among students and faculty in all Arts disciplines. Facilities in the School include studios and technologically enhanced classrooms, four theatres, a theatre/concert hall, the University Art Gallery, the Donald R. and Joan F. Beall Center for Art and Technology, the Gassman Electronic Music Studio, the Motion Capture Studio, the Arts Media Center, the Arts Computing Laboratory, the Digital Arts Teaching and Research Laboratories, a television studio, professionally managed and staffed production shops, and publicity and box offices supporting the School’s extensive production, performance, and exhibition schedule.

The Steven Ehrlich-designed Contemporary Arts Center, the latest major expansion of the School, provides 59,000 new square feet of technology-driven instructional and research spaces, as well as a new 4,000-square-foot gallery and a “black-box” performance space. Along with its new motion-capture studio, these facilities enhance the School’s and UCI’s place at the forefront of these fields.

Arts students regularly participate in dance and drama productions, choirs, instrumental ensembles, and art exhibitions. Students from other academic areas are also eligible to participate in many of these activities and are encouraged to do so. Some of the School’s productions take place in the Irvine Barclay Theatre located on the UCI campus.

The artists, performers, and scholars of the Arts faculty are regularly augmented by distinguished artist/teachers featured in numerous School activities.

Students receive assistance with program planning and a variety of other services from the professional and student-support staff in the School’s Office of Student Affairs; the staff also provide academic counseling to Arts students.

Change of Major

Students wishing to change to an Arts major should contact the Arts Student Affairs Office for information about change-of-major requirements, procedures, and policies. Additionally, students should refer to the Change of Major Criteria website (http://www.changeofmajor.uci.edu) for more information.
Special Programs of Study

Minor in Religious Studies

The interdisciplinary minor in Religious Studies focuses on the comparative study of religions in various cultural settings around the world. The curriculum seeks to provide a wide-ranging academic understanding and knowledge of the religious experience in society through study in the Schools of Humanities, Social Science, Social Ecology, and the Arts. See the School of Humanities section for additional information.

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campus-wide Honors Program, 1200 Student Services II; 949-824-5461; honors@uci.edu; or visit the Campuswide Honors Program website (http://honors.uci.edu).

UC Education Abroad Program

Upper-division and, in some cases, graduate students have the opportunity to experience a different culture while making progress toward degree objectives through the University’s Education Abroad Program (UCEAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. For additional information, visit the Study Abroad Center website (http://www.studyabroad.uci.edu).

Honors

Students who have distinguished themselves academically will be considered for honors at graduation. General criteria are that students must have completed at least 72 units in residence at a University of California campus and must have a cumulative grade point average of 3.5 or better, including the grades from the final quarter. In keeping with the Academic Senate Resolution, no more than 12 percent of the graduating seniors may receive such academic honors. For additional information, visit the Honors Recognition page. Individual departments may offer other special honors to students who have excelled in their major subject.

Creative Connections Opportunities

Arts Outreach at the Claire Trevor School of the Arts partners with local school districts, arts organizations, and community centers to share the School’s talents and knowledge beyond the UCI campus. One such outreach program is Creative Connections, which provides exceptional opportunities for School of the Arts students to earn valuable practical experience in K–12 classrooms and in community settings. Projects range from integrating arts into core curriculum in K–6, to workshops in the arts for middle and high schools, to college application mentorship for high school juniors and seniors interested in arts majors. One to four units of independent study credit are available, and in some cases stipends may be available. All Claire Trevor School of the Arts students who hold a minimum 3.0 GPA may apply for these programs.

Scholarships

The Claire Trevor School of the Arts has some scholarship monies available to incoming and to continuing students on both the undergraduate and graduate levels.

Edna Helen Beach Scholarship: Provides $1,000 per year for two years for an incoming freshman student, and $1,000 for one year for an incoming transfer student. Recipient must be gifted and talented, and will be selected from eligible students with special emphasis on those from underprivileged backgrounds who would not otherwise be able to attend a major research institution.

Steven Criqui Memorial Scholarship: Up to $2,375 awarded to outstanding undergraduate students majoring in Art or Art History with financial need.

Kris and Linda Elftmann Scholarship: Up to $3,000 awarded to an outstanding student.

Leo Freedman Graduate Fellowship: For outstanding applicants from Orange County, California, preferably from Anaheim; two fellowships of approximately $7,000 each for the academic year.

William J. Gillespie Foundation Scholarships: Several scholarships in varying amounts, awarded to outstanding Dance majors with an emphasis in ballet.

William C. Holmes Fellowship: For graduate students studying Music.

Cloud Hsueh Foundation Scholarship: Up to $3,000 awarded to outstanding undergraduate students.

Alice Lowell Memorial Scholarship: For students majoring in Music.

Steve Lyle Memorial Scholarship: $2,000 awarded to continuing students in Drama; selected by application and recommendation.

Norma Barnard MacLeod Scholarship: For Music students studying Guitar or Lute.

Margie McDade Memorial Scholarship: For students majoring in Music and studying piano.

Medici Circle Scholarship: Up to $1,425 awarded to students participating in research, exhibitions, festivals, or conferences.
Gregory Browne Osborne Memorial Scholarship: Several scholarships in varying amounts, awarded to outstanding Dance majors with an emphasis in ballet.

Shiela K. and James J. Peterson Community Spirit Scholarships: $1,500–$3,000 awarded to students with financial need and who have contributed to community services.

Marjorie and Robert Rawlins Scholarship: For full-time students majoring in Music and studying piano, violin, viola, or cello.

Frederick & Sylvia Reines Music Scholarship: For undergraduate and graduate students studying Music.

Sylvia Reines Dance Scholarship: $1,000 awarded to graduate and undergraduate students in Dance.

Harry and Marjorie Ann Slim Memorial Scholarship: For students majoring in Music.

Winifred W. Smith Scholarship: For students majoring in Music and studying cello, violin, or piano (preferably cello).

Elizabeth and Thomas Tierney Scholarship: Up to $3,000 awarded annually to an outstanding student.

UCI Town and Gown Music Scholarships: For students majoring in Music.

Phyllis Kovach Vacca Memorial Scholarship: For students majoring in Music and studying cello, piano, or violin.

Bette and Steven Warner Scholarship: For outstanding students in the Music Department’s voice program and the Drama Department.

H.B. and Isabelle Yolen Memorial Scholarship: Up to $2,000 awarded to students majoring in Art or Drama with financial need.

Undergraduate Programs

The following majors are offered:
- Art, B.A.
- Dance, B.A.
- Dance, B.F.A.
- Drama, B.A.
- Music, B.A.
- Music - Performance, B.Mus.
- Music Theatre, B.F.A.

The following minors are offered:
- Digital Arts
- Digital Filmmaking

Graduate Program

Degrees
- Art - M.F.A.
- Dance - M.F.A.
- Drama - M.F.A.
- Drama and Theatre - Ph.D.
- Integrated Composition, Improvisation, and Technology - M.A., Ph.D.
- Music - M.F.A.

Overview
The primary endeavor of the Claire Trevor School of the Arts is the creative act. Research activities are pursued both as an end in themselves and as a source that can inform both performance and the studio experience. The intellectual activity of theoretical, literary, and historical courses complements the practical work in studio workshops and performance. The aim of the M.F.A. programs in Art, Dance, Drama, and Music is, thus, to produce artists literate in both traditional and digital media who are disciplined, responsive to intellectual stimuli, and capable of integrating existing knowledge into creative projects. The UCI-UCSD joint doctoral program in Drama and Theatre provides opportunity for significant crossover research and teaching between the two campuses in a wide range of areas in drama and the theatre. The M.A. and Ph.D. program in Integrated Composition Improvisation and Technology (ICIT) is taught by a core faculty whose work embraces diverse forms of music making, challenging conventional distinctions between
classical composition, computer music, improvisation, and jazz. It is the strong belief of the UCI Claire Trevor School of the Arts that intellectual integrity and creative excellence cannot exist without each other.

Refer to the Departments of Art, Dance, Drama, and Music for detailed information about the graduate programs.

**Admission to the Program**

Applications are accepted for fall quarter admission only, and ordinarily must be completed by January 15 for the Ph.D. in Drama and Theatre, the M.F.A. in Art, the M.F.A. in Dance, and the M.F.A. in Music, and by March 1 for the M.F.A. in Art with a concentration in Critical and Curatorial Studies. Applications for the M.A. and Ph.D. in ICIT must be submitted by December 1. The number of graduate students that can be admitted to the Claire Trevor School of the Arts is limited. Applicants are advised to arrange for auditions, interviews, and the submission of portfolios, compositions, and dossiers by the appropriate deadlines. Students applying for scholarships and fellowships should do so by January 15, and are also encouraged to apply for financial assistance through the Office of Financial Aid and Scholarships. The Claire Trevor School of the Arts has a modest number of teaching assistantships available in all areas, and all candidates are automatically reviewed for teaching assistantship positions; the School informs successful candidates by June 1 for the following academic year.

Upon admission to the program the student is assigned an advisor. Students should discuss with their advisor the scope of undergraduate preparation to determine any areas which may need strengthening if full benefit from graduate study is to be derived.

**Faculty**

Kei Akagi, B.A. International Christian University, *Professor of Music; Asian American Studies*

Lonnie R. Alcaraz, M.F.A. University of California, Irvine, *Professor of Drama* (lighting design, digital imaging)

David Allan, Choreographer/Former Soloist, National Ballet of Canada; Choreographer, ballet companies, operas, film, and television, *Professor Emeritus of Dance* (ballet, pas de deux, choreography)

Rhea Anastas, Ph.D. The Graduate Center of The City University of New York, *Associate Professor of Art* (20th century experimentalism in the visual arts, critical theory, cultural theory)

Kevin H. Appel, M.F.A. University of California, Los Angeles, *Department Chair and Professor of Art* (painting)

Stephen F. Barker, Ph.D. University of Arizona, *Interim Dean of the Claire Trevor School of the Arts and Professor of Drama* (post-modern theatre, Beckett, critical theory)

Cynthia M. Bassham, M.F.A. American Conservatory Theatre, *Lecturer with Security of Employment of Drama* (voice, speech for actors, acting)

Amy M. Bauer, Ph.D. Yale University, *Associate Professor of Music*

Haroutune Bedelian, M.A. Royal Academy of Arts, *Professor of Music*

Lorna Griffitt Bedelian, D.M.A. Indiana University, *Senior Lecturer with Security of Employment of Music*

Frances L. Bennett, B.F.A. University of California, Irvine, *Lecturer of Music*

Anna J. Bosler, D.M.A. University of Southern California, *Lecturer of Music*

Shaun D. Boyle, M.A. Trinity Laban Conservatoire of Music and Dance, *Assistant Professor of Dance* (ballet, repertory, choreography)

Richard A. Brestoff, M.F.A. New York University, *Head of Acting and Professor of Drama* (film and television acting)

David Brodbeck, Ph.D. University of Pennsylvania, *Professor of Music*

Robin T. Buck, M.M. University of Southern California, *Professor of Drama; Music*

Daniel Gary Busby, D.M.A. University of California, Los Angeles, *Department Chair and Associate Professor of Drama* (music theatre, singing, conducting)

Juli C. Carson, Ph.D. Massachusetts Institute of Technology, *Artistic Director of the University Art Galleries and Professor of Art* (art history, critical theory, curatorial practice)

Dennis R. Castellano, M.F.A. University of California, Irvine, *Head of Music Theatre and Senior Lecturer with Security of Employment of Drama* (music theatre)

Ellie Choate, M.A. California State University, Long Beach, *Lecturer of Music*

Patricia C. Cloud, M.M. University of Southern California, *Lecturer of Music*
Robert S. Cohen, D.F.A. Yale University, *Professor Emeritus of Drama* (acting theory, acting, directing)

Miles C. Coolidge, M.F.A. California Institute of the Arts, *Professor of Art* (photography)

Mary E. Corey, M.A. University of California, Riverside; Certified Professional Labanotator, *Professor of Dance* (dance history, dance notation and reconstruction)

John L. Crawford, Media Artist and Software Designer, *Graduate Advisor and Associate Professor of Dance; Informatics* (dance film, interactive media, telematic performance, motion capture, digital arts)

Jonathan D. Davis, D.M.A. Juilliard School, *Lecturer of Music*

Myrona L. DeLaney, M.F.A. University of California, Irvine, *Lecturer with Security of Employment of Drama* (music theatre, singing, acting)

Tony Delap, Claremont Graduate University, *Professor Emeritus of Art*

Michael Dessen, Ph.D. University of California, San Diego, *Robert and Marjorie Rawlins Chair in Music and Associate Professor of Music*

Theresa A. Dimond, D.M.A. University of Southern California, *Lecturer of Music*

John Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music; Informatics*

Holly Durbin, M.F.A. University of California, Los Angeles, *Professor of Drama* (costume design)

Clifford L. Faulkner, M.A. California State University, Long Beach, *Senior Lecturer with Security of Employment - Emeritus of Drama* (scenery design, history of design, gay theatre)

Nohema Fernandez, D.M.A. Stanford University, *Professor Emerita of Music*

Jennifer J. Fisher, Ph.D. University of California, Riverside; Decade diversity mentor, founder and editor of Dance Major Journal, *Associate Professor of Dance* (dance history and theory)

Keith Fowler, D.F.A. Yale University, *Professor Emeritus of Drama* (directing, acting)

Israel Gabriel, Bat-Dor Dance Company; Former Assistant Artistic Director, *Lecturer with Security of Employment Emeritus of Dance* (ballet, modern, pas de deux, repertory)

Clayton Garrison, Ph.D. Stanford University, *Professor Emeritus of Drama* (opera, musical theatre, movement, dramatic literature)

Michel Gervais, , *Lecturer of Dance*

Martha Gever, Ph.D. City College of the City University of New York, *Professor Emerita of Art* (history and criticism: video, media studies, popular culture)

Douglas S. Goheen, Ph.D. University of Denver, *Professor Emeritus of Drama* (scenery design, digital imaging)

Frederick W. Greene, B.M. University of Southern California, *Lecturer of Music*

Charlotte Griffin, M.F.A. University of Texas, Austin, *Assistant Professor of Dance* (choreography, modern, screen dance)

Chad M. Hall, M.F.A. Ohio State University; Pilates Mat Certified, *Assistant Professor of Dance* (modern dance, choreography, improvisation)

Matthew Hare, D.M.A. University of Iowa, *Lecturer of Music*

Jason Harnell, *Lecturer of Music*

George C. Harvey, M.F.A. University of California, Irvine, *Professor Emeritus of Drama* (artistic direction, producing, lighting design)

Robert Hickok, B.M. Yale University, *Professor Emeritus of Music*

Donald D. Hill, M.F.A. University of Southern California; Associate Producer, *Head of Stage Management and Senior Lecturer with Security of Employment of Drama* (stage management, directing, acting)

Michael K. Hooker, M.F.A. California Institute of the Arts, *Professor of Drama* (sound design)

Seth Houston, D.M.A. University of Southern California, *Director of Choral Activities and Lecturer with Potential Security of Employment of Music*
Joseph B. Huszti, MM Northwestern University, **Professor Emeritus of Music**

Bryan Jackson, M.F.A. University of California, Los Angeles, **Lecturer of Art** (digital filmmaking)

Jesse C. Jackson, M.A. University of Toronto, **Director of the Minor in Digital Arts and Assistant Professor of Art; Informatics**

Ulysses S. Jenkins, M.F.A. Otis Art Institute, **Professor of Art** (video art production, performance art)

Ketu H. Katrak, Ph.D. Bryn Mawr College, **Professor of Drama; Comparative Literature** (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Jerzy S. Kosmala, D.M. Indiana University, **Lecturer of Music**

Madeline Kozlowski, M.F.A. Brandeis University, **Professor Emerita of Drama** (costume design)

Anthony James Kubiak, Ph.D. University of Wisconsin-Madison, **Professor of Drama** (American and modern drama, modern poetry, critical theory, philosophy)

Antoinette Lafarge, M.F.A. School of Visual Arts, **Professor of Art** (digital media)

Daphne Pi-Wei Lei, Ph.D. Tufts University, **Head of Doctoral Studies and Professor of Drama; Asian American Studies** (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Simon Leung, B.A. University of California, Los Angeles, **Professor of Art; Asian American Studies** (new genres, critical theory, contemporary art history, performance)

Joseph S. Lewis, M.F.A. Maryland Institute College of Art, **Professor of Art** (public art)

Lukas Ligeti, **Assistant Professor of Music**

Loretta Livingston, B.F.A. California Institute of the Arts; Certified Laban Movement Analyst; former principal with Bella Lewitzky Dance Company, **Graduate Advisor and Associate Professor of Dance** (modern dance, choreography, improvisation, Laban movement analysis, teaching of dance)

Sandra T. Loh, B.S. California Institute of Technology, **Associate Adjunct Professor of Drama** (personal theatre making, artistic entrepreneurship)

Mara Jane Lonner, M.F.A. California Institute of the Arts, **Lecturer with Security of Employment of Art** (drawing, painting, 3D design)

Catherine B. Lord, M.F.A. State University of New York at Buffalo, **Professor Emerita of Art** (queer theory, feminism, photography)

Annie M. Loui, **Professor of Drama** (movement, directing, acting)

Molly L. Lynch, M.F.A. University of California, Irvine; Pilates Certified; Choreographer/Artistic Director of the National Choreographers Initiative, **Associate Professor of Dance** (ballet, pointe, repertory, partnering, arts management)

Monica Majoli, M.F.A. University of California, Los Angeles, **Professor of Art** (painting)

Mihai Maniutiu, Ph.D. Caragiale Academy of Theatrical Arts and Cinematography, **UCI Distinguished Professor of Drama** (directing)

Daniel J. Martinez, B.F.A. California Institute of the Arts, **Claire Trevor Professor and Professor of Art** (public art, sculpture, installation, performance)

David J. McDonald, Ph.D. Stanford University, **Professor Emeritus of Drama** (dramatic theory, Irish drama, theatre history, playwriting)

Donald McKayle, Choreographer/Director, **Claire Trevor Professor and Professor Emeritus of Dance** (choreography, modern dance)

Kevin McKeown, M.A. University of California, Los Angeles, **Lecturer of Music**

Yong Soon Min, M.F.A. University of California, Berkeley, **Professor Emerita of Art; Asian American Studies; Culture and Theory** (minority, diasporic, and third cinemas; media, nationalism, and globalization; race, sexuality, and popular culture)

Nicole M. Mitchell, M.M. Northern Illinois University, **Professor of Music**

Elliott Moreau, M.M. University of Southern California, **Lecturer of Music**

Ian Andrew Munro, Ph.D. Harvard University, **Associate Professor of Drama** (European drama and performance, early modern popular culture, theatrical performance of wit)

Margaret K. Murata, Ph.D. University of Chicago, **Professor Emerita of Music**

Gifford C. Myers, M.F.A. University of California, Irvine, **Professor of Art** (ceramics)
Lisa Marie Naugle, Ph.D. New York University, Department Chair and Professor of Dance (modern dance, choreography, dance and digital technology, improvisation, teaching of dance)

Dariusz Oleszkiewicz, B.A. California Institute of the Arts, Lecturer of Music

Deborah Oliver, M.F.A. California Institute of the Arts, Lecturer of Art (performance art, new genres)

Vincent Olivieri, M.F.A. Yale University, Head of Design and Associate Dean of Graduate Affairs and Associate Professor of Drama (sound design)

Hossein Omoumi, Ph.D. University of Florence, Maseeh Professor in Persian Performing Arts and Professor of Music

Jane M. Page, M.F.A. Indiana University, Head of Directing and Assistant Professor of Drama (directing, acting)

Andrew A. Palermo, B.F.A. University of Cincinnati, College-Conservatory of Music, Assistant Professor of Drama (music theatre choreography)

Jennifer Pastor, M.F.A. University of California, Los Angeles, Professor of Art (sculpture)

Simon G. Penny, M.F.A. Hong Kong University of Science and Technology, Professor of Art; Informatics (informatics, robotic sculpture, interactive environments, electronic media)

James W. Penrod, M.F.A. University of California, Irvine; C.M.A. Laban Institute of Movement Studies, Professor Emeritus of Dance (ballet, modern, dance notation, choreography, movement analysis)

Litia T. Perta, Ph.D. University of California, Berkeley, Assistant Professor of Art (art writing)

Gerald Pinter, B.A. University of North Texas, Lecturer of Music

Janice G. Plastino, Ph.D. University of Southern California, Professor Emerita of Dance (kinesiology/anatomy, research methods, choreography, dance science/medicine)

Yvonne Rainer, Claire Trevor Professor and Professor Emerita of Art (performance, dance, video)

Colleen A. Reardon, Ph.D. University of California, Los Angeles, Professor of Music

Janelle Reinelt, Ph.D. Stanford University, Professor Emerita of Drama (British theatre, political theory, performance)

Bryan R. Reynolds, Ph.D. Harvard University, (Shakespeare, Renaissance drama, critical theory, feminist theory, performance theory, cultural studies)

William S. Roberts, M.F.A. California Institute of the Arts, Lecturer with Security of Employment of Art (photography)

Bobby Rodriguez, D.M.A. University of California, Los Angeles, Lecturer of Music

Nancy L. Ruyter, Ph.D. Claremont Graduate University, Professor Emerita of Dance (dance history, Spanish dance, bibliography and research)

Constance J. Samaras, M.F.A. Eastern Michigan University, Professor of Art; Culture and Theory (photography, intermedia, cultural criticism)

John H. Schneiderman, M.F.A. University of California, Irvine, Senior Lecturer with Security of Employment of Music

Nina Scolnik, B.M. Oberlin College, Senior Lecturer with Security of Employment of Music

Kelli Sharp, DPT Chapman University, Assistant Professor of Dance (somatic practices, dance science, kinesiology, physical therapy)

Eli Simon, M.F.A. Brandeis University, UCI Chancellor's Professor and Professor of Drama (acting, directing)

H. Colin Slim, Ph.D. Harvard University, Professor Emeritus of Music

Jaymi Smith, B.F.A. DePaul University, Associate Professor of Drama (lighting design)

David B. Stetson, B.M. University of Southern California, Lecturer of Music

Darryl G. Taylor, D.M.A. University of Michigan, Professor of Music; African American Studies

Alan Terricciano, M.A. Eastman School of Music, Professor of Dance; Music

Philip D. Thompson, M.F.A. University of California, Irvine, Head of Acting and Professor of Drama (voice, speech for actors, acting)

David K. Trend, Ph.D. Miami University, Department Chair and Executive Director of the University Art Galleries and Professor of Art (visual culture)

Richard J. Triplett, M.A. Otis Art Institute, Professor Emeritus of Drama (scenery and costume design, history of design)
Stephen E. Tucker, D.M.A. University of California, Los Angeles, Associate Professor of Music

Kojiro Umezaki, M.A. Dartmouth College, Associate Professor of Music; Computer Science

Joel R. Veenstra, M.F.A. University of California, Irvine, Lecturer with Potential Security of Employment of Drama (stage management, acting)

Amanda Jane Walker, M.F.A. University of California, Los Angeles, Lecturer of Music

Tong Wang, M.F.A. University of Utah; Principal dancer with the Shanghai Ballet, Tulsa Ballet Theatre, Dayton Ballet, Ballet West, Assistant Professor of Dance (ballet, choreography, men's ballet)

David W. Washburn, M.A. New England Conservatory Music, Lecturer of Music

Robert K. Weimann, Ph.D. Humboldt State University, Professor Emeritus of Drama (theory, criticism, literature)

Frank B. Wilderson III, Ph.D. University of California, Berkeley, Professor of African American Studies; Culture and Theory; Drama (Afro-Pessimism, film theory, Marxism, dramaturgy, narratology.)

Sheron C. Wray, M.A. Middlesex University, Associate Professor of Dance; African American Studies (jazz, choreography, improvisation)

Bruce N. Yonemoto, M.F.A. Otis Art Institute, Professor of Art (video, experimental media, film theory)

**Arts Courses**

**ARTS 1. ArtsCore. 4 Units.**
An introduction to the arts in general, and to the arts at UCI. Concentration on (1) the interdisciplinary nature of the arts, and (2) the content of particular arts disciplines.

(IV)

**ARTS 75. Digital Media: Exhibition. 4 Units.**
A discussion and critique course in all media arts. Includes a review of key media arts concepts and the preparation of an end-of-quarter exhibition.

Prerequisite: (ARTS 11 and ARTS 12 and ARTS 50 and ARTS 60) and proposal submission.

**ARTS 173. Athletics Bands. 1-2 Units.**
Bands support athletics events. Includes Pep Band: Rehearsal and performance of band standards; Marching Band: Exercises and performance involving marching fundamentals, formations, and half-time pageantry; and, Drumline: Study and rehearsal of rudiments, cadences, and arrangements.

Repeatability: Unlimited as topics vary.

**ARTS 199. Independent Study. 1-4 Units.**
Individual study or directed projects as arranged with faculty member.

Repeatability: May be repeated for credit unlimited times.

**Art Courses**

**ART 1A. Art in Context: History, Theory, and Practice. 4 Units.**
First in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practices in relation to their twentieth-century cultural and historical antecedents. ART 1A deals specifically with contemporary painting and photography.

Restriction: Art majors have first consideration for enrollment.

(IV)

**ART 1B. Art in Context: History, Theory, and Practice. 4 Units.**
Deals with film/video/performance. Concerned with the development of modern/contemporary film, video, and performance, with a focus on experimental and avant-garde production from the early twentieth-century to today.

Restriction: Art majors have first consideration for enrollment.

(IV)
ART 1C. Art in Context: History, Theory, and Practice. 4 Units.
Third in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practice in relation to their twentieth-century cultural and historical antecedents. Deals specifically with space and cyberspace.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9A. Visual Culture: Media, Art, and Technology. 4 Units.
Examines creative activities in all spheres of life, including the "artistic" impulses that dwell in the individual. Culture is addressed in broad terms of the many institutions and cultural forces that shape everyday activities of listening, seeing, doing.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9B. Visual Culture: A Culture Divided. 4 Units.
Throughout the 1980s and 1990s controversies flourished in the mainstream media over purportedly obscene art, anti-American writing, and moral decay, among other issues. Examines these new conflicts as they manifest themselves in public life and everyday experience.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9C. Visual Culture: Thematic Investigations. 4 Units.
Considers a broad range of concerns and questions raised by various acts of appropriation in contemporary art and visual culture, such as originality, authenticity, authorship, translation, audience and aesthetics, temporal dimensions of a work, and context.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 11A. Topics in History of Contemporary Art. 4 Units.
Surveys mid-nineteenth and twentieth-century art production, from modernity through post-modernity, in a historical and cultural context.

Prerequisite: ART 9A.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Art majors only.

ART 11B. Media Art and Design History. 4 Units.
Survey of the roots of modern techno-media arts in both the history of visual arts and the history of devices such as automata, animatronics, robots, miniature theatres, optical machines, communications technologies, calculators, and computers.

Restriction: Art majors only.

ART 12A. Art, Design, and Electronic Culture. 4 Units.
Introduction to historical and theoretical foundations of digital media art, tracing how information technologies seeded growth of new expressive medium. Considers how today's pervasive digital culture evolved through interdisciplinary collaborations between artists, engineers, scientists, scholars. Course may be offered online.

(IV)

ART 12B. Art, Science and Society: Steam to Steampunk. 4 Units.
An overview of current practice and research in digital media art. Examines the effects of recent technological, scientific, cultural, and political developments. Addresses the increasing overlap of artistic and scientific practices and issues related to new and emerging technologies.

(IV)

ART 12C. Intelligences of Arts. 4 Units.
Introduces contemporary neuroscience and new approaches to cognition – embodied, enactive, extended, situated, distributed. Reviews the history of related ethological, biological, psychological, technological, and philosophical traditions. Considers arts and cultural practices from these and other perspectives, and considers case studies.

(III)
ART 20A. Basic Drawing I. 4 Units.
Encourages an investigation of the premises and limits of drawing, primarily, but not inevitably, as a two-dimensional medium. Includes slide presentations and discussions of the historical uses of a wide range of drawing.

Restriction: Art majors have first consideration for enrollment.

ART 20B. Basic Drawing II. 4 Units.
Continuation of the investigation initiated in ART 20A, with an emphasis on experimentation, personal investigation, and development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized.

Prerequisite: ART 20A or ART 20.

Restriction: Art majors have first consideration for enrollment.

ART 30A. Basic Painting I. 4 Units.
Examination of the fundamental components of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work.

Restriction: Art majors have first consideration for enrollment.

ART 30B. Basic Painting II. 4 Units.
Further examinations of the essential qualities of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work.

Prerequisite: ART 30A.

Restriction: Art majors have first consideration for enrollment.

ART 40. Basic Sculpture. 4 Units.
The practice of sculpture in the contemporary arts; inclusion of spatial interventions, site-specific and environmental design, appropriation of found materials; techniques in cutting joining, and assembly of wood, metals, and plastics. May include casting, welding, and ceramics. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 50A. Matter and Media . 4 Units.
A project-based introduction to tools and approaches for creating and sharing digital media content within Internet-mediated social environments, with a particular emphasis on art-making and personal expression. Includes an overview of basic user experience and interaction design principles.

ART 50B. Interaction and Experience. 4 Units.
An overview of digital video and audio production for the Web, emphasizing art-making and personal expression. Includes digital media aesthetics and conceptual design, basic audio and video recording, and fundamentals of desktop video, audio, and Web authoring software applications.

Prerequisite: ART 50A.

ART 50C. Digital Media: Interaction Design. 4 Units.
Principles and practices of interaction design for interactive digital media systems that provide for active involvement of the participant. Students gain experience with interaction design issues through a series of media art projects, emphasizing art-making and personal expression.

Prerequisite: (ARTS 11 or ART 12A) and (ARTS 12 or ART 12B) and (ARTS 50 or ART 50A) and (ARTS 60 or ART 50B).

ART 51. Basic Ceramic Sculpture. 4 Units.
Exploration of use of clay as sculptural basis with an emphasis on development of an idea and its relation to contemporary and experimental art practice. Hand-building, glazing, finishing processes, and use of other structural materials. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 65A. Foundations in Media Design. 4 Units.
Provides an overview of media design in the digital age, covering principles of design for different media (2D, time-based, interactive); history of relationship between art and design; and practice in working with different design approaches. Materials fee.

Restriction: Art majors have first consideration for enrollment.
ART 65B. Foundations in Internet Art and Design. 4 Units.
Introduction to creating art for the Internet, covering history and structure of networks; key types of net-based interactivity; basics of Web design and scripting. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art majors have first consideration for enrollment.

ART 65C. Gizmology and Kinetics. 4 Units.
Provides students with basic skills in materials, construction and design applicable to making machines, musical instruments and things with moving parts enabling work in kinetic sculpture, custom interactive systems, Mechatronics, Robotics, and Maker/DIY culture. Materials fee.

ART 65E. Mechatronic Art I. 4 Units.
Introduces the practice and theory of analog electronics, emphasizing the design and development of simple interactive systems and the integration of such systems into real-world contexts of performance, installation, sculpture, and automated artifacts. Materials fee.

ART 71A. Introduction to Photography I. 4 Units.
Introduction to technical underpinnings emphasizing photography as a contemporary art practice. Topics include 35mm non-automatic camera operation, exposure and lighting, black and white printing, introduction to digital photography, discussion of critical and historical issues. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 71B. Introduction to Photography II. 4 Units.
Techniques covered include medium and large format cameras, digital photography, studio lighting, digital and analog color printing, mural room. Conceptual direction is developed through critiques, critical readings, discussions, slide lectures. Materials fee.

Prerequisite: ART 71A.

Restriction: Art majors have first consideration for enrollment.

ART 81A. Digital Filmmaking Production I. 4 Units.
Introduction to three production stages of video making. Study of the narrative structure of cinema and acquisition of video production skills in camera, lighting, sound, and editing. Production work, readings, and screenings outside of class are assigned. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 81B. Digital Filmmaking Production II. 4 Units.
Focuses on video stage production, technical skills including camera operation, stage lighting, sound recording, and construction of basic scenic elements. Emphasis is placed on the function and responsibilities of the production crew and proper working and safety procedures. Materials fee.

Prerequisite: ART 81A.

Restriction: Art majors have first consideration for enrollment.

ART 91. Basic Performance Art. 4 Units.
Exploration of objects, gesture, action, text, image, and media to create narrative or non-narrative works. Elements of theory and history of performance art are discussed to illustrate techniques and styles to understand, identify, and articulate artistic vision and voice.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors have first consideration for enrollment.

ART 95. SPECIAL TOPICS IN BASIC MEDIA. 4 Units.
Basic instruction in media or disciplines not otherwise represented in the regular curriculum. Topics vary according to the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Art majors have first consideration for enrollment.

ART 100. Special Topics in Art. 4 Units.
Materials fee, topic dependent.

Prerequisite: ART 9A. Lower-division writing strongly recommended.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Art majors only.
ART 101W. Artists as Writers. 4 Units. 
Contemporary art practice involves text, as final form or an integral element. Many contemporary artists consider writing as essential to their practice. Covers historical and contemporary uses of text and image as well as artists' writing.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the lower-division writing requirement.

Restriction: Art majors only.

ART 103. Intermediate Painting. 4 Units. 
Continuation of the investigation initiated in basic painting, with an emphasis on experimentation, personal investigation, development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 30A and ART 30B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 104. Intermediate Sculpture. 4 Units. 
Investigation of three-dimensional space, including the construction of objects and the manipulation of the environment. Students define personal projects and translate personal, social, and political experience into visual meaning. Range of artists' works introduced. Group discussion and critiques.

Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 40.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 105. Intermediate Ceramic Sculpture. 4 Units. 
Further investigation of the use of clay as a medium, with an emphasis on experimental practice and the relationship to contemporary visual art. Emphasizes discussion of ideas, and provides information on clay body, fabrication, glazing, and firing. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 51.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 106A. Programming for Artists. 4 Units. 
Programming as a means to create interactive artworks with an emphasis on the integration of video, sound, text, and stills. Topics include basic concepts in programming, understanding the limits of code, working with video and audio files, interface design. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 106B. Game Studies. 4 Units. 
Critical analysis of various genres of computer games and gaming theory and practice through playing, writing, and discussion. The focus is on creating a Design Document for the student's own gaming environment using gaming metaphors, design principles, and technologies. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art majors only.
ART 106C. Design for Print. 4 Units.
Investigates the use of print for communication as an artist. Covers the fundamentals of print design and output using digital media. Materials fee.
Prerequisite: ART 65A. Recommended: ART 11B.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 107. Intermediate Projects in Photography. 4 Units.
Students begin learning how to develop photographic projects of their own making. Focuses on employing and expanding upon previously learned technical and critical skills specific to students' individual interests and ideas. Critiques, readings, lectures, labs. Materials fee.
Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 108. Digital Filmmaking Project I. 4 Units.
Students learn to conceive, develop, and produce original video works building directly upon previously learned skills. Use of video stage and post-production editing facilities. Lectures on video/film subjects, production strategies, readings, screening, field trips, and group critiques. Materials fee.
Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 109. Performance and the Camera. 4 Units.
Surveys the development of contemporary artists who use performance strategies in the making of videos and films. Students analyze the artist's conceptual approach to performative gestures, actions, and landscapes created for their video or film art.
Prerequisite: ART 1B or ART 81A or ART 91 or ART 128.
Restriction: Art majors only.

ART 110B. Mechatronic Art II. 4 Units.
Introduces the practice and theory of embedded microcontrollers, digital electronics, coding, sensor interfacing, motor control and output stages along with mechanical and electromechanical design and construction, emphasizing the integration of such systems into real-world contexts of performance, installation, and art-making. Materials fee.
Prerequisite: ART 65E.

ART 110C. Mechatronic Art III. 4 Units.
As the capstone to the Mechatronic Art series, this course permits students to develop major projects utilizing electronics, microcontrollers, sensors, and electromechanical devices, in a methodical and supervised context, with technical, design, and aesthetic advice and critique. Materials fee.
Prerequisite: ART 65E.

ART 111. 3D Methods and Materials. 4 Units.
Presents a wide variety of concepts, materials, tools, and fabrication techniques vital to art production. Wood tools, clay, castable rubber, urethane foam, fiberglass, plaster, steel, and welding are introduced. Projects are based on conceptual problems incorporating these materials. Materials fee.
Prerequisite: ART 1A and ART 1B and ART 1C.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 117. Issues in Popular Culture. 4 Units.
In-depth investigation of the relationship between visual art practices and popular culture.
Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.
Repeatability: Unlimited as topics vary.
Restriction: Art majors only.
ART 119. Issues in Contemporary Painting. 4 Units.
Investigation of issues in modern and contemporary art work and criticism, wherein an assessment of Modernist influences is followed by the examination of contemporary painting as a cross-disciplinary practice employing popular culture, “high art,” theory, and new technology.
Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 119A. Issues in Contemporary Drawing. 4 Units.
Investigation of drawing as a primary practice rather than a developmental tool. Explores the relationship between Conceptualism, process and content, and considers the historical changes in method, presentation, and theory, from past to present.
Prerequisite: ART 9A.

ART 120. Issues in Narrative. 4 Units.
Emphasizes the construction of narratives in different media--painting, photography, sculpture, video. Particular attention paid to the development of personal and community histories as a working base.
Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 121A. Afro-Futurism I. 4 Units.
First of a two-part course on the futuristic artistic vision of Black film, video, and cyberspace. Deals with critical analyses of the Black image in Western Art history, and its association to contemporary Hip Hop culture, art, and music.
Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.
Restriction: Art majors only.

ART 121B. Afro-Futurism II. 4 Units.
Second of a two-part course on the futuristic artistic visions of Black film, video, and cyberspace. Deals with modern techno-culture, digital activism, and designing technology based on African aesthetic principles of contemporary Hip Hop International Culture.
Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.
Restriction: Art majors only.

ART 125. Issues in Photography. 4 Units.
Rigorous investigation of photographic practices and critical writings, the relationship of photography to the construction and maintenance of cultural institutions, the circulation of photographic ideas in society, and photography and technology.
Prerequisite: ART 1A or ART 71A or ART 71B or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 190B. Recommended: Satisfactory completion of the Upper-Division Writing requirement.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 126. Issues in Media and Migration: Asia. 4 Units.
Media and migration are profound, twinned influences on contemporary globalized experience. A discourse on Asian cultural production and of its transnational dimensions. Students will explore migration in its multiple facets to include migrations of people, ideas, and technologies.
Prerequisite: ART 9A.

ART 126B. Issues in Techno-Arts. 4 Units.
Addresses issues related to artmaking practices that emerge in tandem with new technologies. Topics include sociopolitical contexts of techno-art; utopic/dystopic framings; key moments in the history of techno-arts.
Prerequisite: ART 9A. Recommended: ART 11B.
Restriction: Art majors only.
ART 127A. Issues in Video History and Criticism. 4 Units.
Investigation of historical development of video as artistic practice. Topics include relationships between art and video technology, critiques of television, experimentation with image processing/synthesis, performances designed for video, experiments in documentary representation, video installation. Readings and screenings assigned. Materials fee.

Prerequisite: ART 9A.
Restriction: Art majors only.

ART 127B. Issues in Experimental Film History. 4 Units.
A critical study of experimental film/video art genres and production techniques considering their narrative, structural, iconographic, and cultural aspects. Hollywood narrative, Nouvelle Vague, American Independent, and Video Art compared in terms of production innovation, design, and conceptual content. Materials fee.

Prerequisite: ART 9A.

ART 128. Issues in New Genres. 4 Units.
Investigates issues in post-studio practices, including concepts of time, relational aesthetics, site-specificity, institutional critique, and the post-medium condition.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: Unlimited as topics vary.
Restriction: Art majors only.

ART 130B. Topics in Game Design. 4 Units.
Investigates interaction paradigms, game mechanics, game development processes, and methods for analysis and critique of games; and provides opportunities for experimental game design.

Prerequisite: ART 106B.
Restriction: Art majors only.

ART 131. Projects in Installation. 4 Units.
Investigates interior installation in particular spaces. Working in teams, students install, discuss, and remove projects. Technical information and hands-on experience with various media is provided. Materials fee.

Prerequisite: Art 40.

Repeatability: May be repeated for credit unlimited times.

ART 132A. Digital Filmmaking Pre-Production. 4 Units.
Examines the preparatory and planning stages of video production, including script writing, story boarding, location scouting, script breakdown, and budgeting. Projects may encompass one or more of these stages which will be explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 132B. Digital Filmmaking Post-Production. 4 Units.
Examines procedures and techniques utilized in video production after principal shooting is completed, including effects processing, composting, sound design, and DVD authoring. Projects focus on these processes, and are explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 133. The Graphic Novel. 4 Units.
An intensive workshop during which students will create a short graphic novel, taking the process all the way from concept to publication. Course work will focus on understanding how narrative emerges from a combination of visual and textual elements.

Prerequisite: ART 65A. Strongly recommended: ART 106C.
ART 138. Place Making and Public Art. 4 Units.
How do art interventions in public spaces inform our definition of “place” and develop culturally informed audiences? Students will engage in class projects and group investigations that question the traditional and institutional conceptual boundaries of exhibition/distribution.
Prerequisite: ART 40 and ART 9A.
Restriction: Art majors only.

ART 141. Digital Filmmaking Advanced Project I. 4 Units.
Incorporating narrative structures in a multi-screen context. Students design and produce an active space in which activities will move from one screen to another. Materials fee.
Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 143. Projects in Computer Painting. 4 Units.
Study and utilization of the computer as a digital sketchbook and design tool for the creation of paintings. Discussion of the issues related to benefits and limitations of new technology in the art-making process.
Prerequisite: ART 1A and ART 1B and ART 1C and ART 30A and ART 30B.
Restriction: Art majors only.

ART 144. Artist Books as Objects. 4 Units.
Are artist books still relevant in the contemporary creative community? Focusing on intellectual content and raw physicality, students will explore this question and image/text relationships by creating handmade one-of-a-kind or edition book projects utilizing various mechanical reproduction techniques.
Prerequisite: (ART 20A or ART 30A or ART 40 or ART 51 or ART 65A or ART 71A or ART 81A or ART 91) and ART 9A.

ART 146. The Artist Archives. 4 Units.
Addresses ways in which artistic production and archival practice intermingle and overlap. Examines critical works on the nature of knowledge and the archive, and uncovers methodologies of knowledge production and how these inform what we think of as art.
Prerequisite: ART 1A and ART 1B and ART 1C and ART 9A and ART 11A.
Restriction: Art majors only.

ART 150. Advanced Studio Topics--Painting. 4 Units.
Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.
Prerequisite: ART 30B.
Repeatability: Unlimited as topics vary.
Restriction: Art majors only.

ART 150C. Advanced Drawing . 4 Units.
Advanced studio problems in visual exploration. Students pursue individual solutions to self-defined and presubscribed projects. Techniques/materials are individual choice. Continual analysis of the personal process.
Prerequisite: ART 20B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 150F. Advanced Figure Drawing. 4 Units.
Students develop technical skills in rendering the figure. Live model sessions and an introduction to anatomy. Investigates use of the figure in contemporary art. Materials fee.
Prerequisite: ART 20B.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.
ART 151. Advanced Studio Topics--Sculpture. 4 Units.
Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.
Prerequisite: ART 40.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152A. Advanced Studio Topics: Photography. 4 Units.
Focused investigation of a range of issues in photographic practice, with an emphasis on developing individual student projects, refining critical thinking, and conceptual framing. Technical topics covered as required. Readings, lectures, critiques, labs. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152B. Documentary Photography. 4 Units.
Documentary practice is examined through the realization of photo-based projects. Thematic focus of student's choosing will be refined through lectures, discussion, technical demonstrations, field trips, labs, and individual meetings. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152C. The Public Image. 4 Units.
Strategies for artistic intervention in the public circulation of images are examined alongside the role images play in constructing public identity. Individual or collaborative student projects will be directed around course themes. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152D. The Photographic Tableau. 4 Units.
Examines and develops photographic projects intended for traditional artistic venues (i.e., galleries and museums). In addition to exploring appropriate techniques and presentation strategies, students consider the interdependency between construction of images and semantic shaping of traditional art venues. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152E. The Constructed Image. 4 Units.
A studio investigation of theoretical ideas, critical possibilities, historical precedents, and various techniques involving the production of fabricated images. Techniques may include montage, digital, chemical and in-camera manipulations, studio constructions, appropriations, performance, and projected images. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.
ART 152F. Seminar Production Component. 4 Units.
Photographic and/or inter-media production course tied to a specific Issues course (for example, Issues in Photography, Issues in Feminism, Issues in New Genres). Critiques, labs, field trips, discussion, demonstrations. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 153. Digital Filmmaking Advanced Project II. 4 Units.
Directed to the production of individual or collaborative videotapes, using studio, portable camera, editing facilities, and sound and computer elements. Emphasis will be on individually initiated projects. Readings and screenings are assigned. Materials fee.
Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 154. Advanced Studio Topics: Performance. 4 Units.
An intensive investigation of the practice of performance art, with an emphasis on the development of individual projects, and the refinement of various technical skills, as well as audiences, spaces, and cultural connections.
Prerequisite: ART 91 or ART 109.
Repeatability: May be taken for credit 3 times.
Restriction: Art majors only.

ART 156. Advanced Studio Topics: Ceramic Sculpture. 4 Units.
Discussion of ideas, techniques, and personal control of form. Clay body, fabrication, glazing, and firing. Emphasis on development of personal direction.
Prerequisite: ART 51.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 166A. Digital Filmmaking Web Series. 4 Units.
Original video projects produced in collaborative teams combining advanced video students with students from other areas, including Dance, Drama, and Music. Shoots may be carried out on the video stage as well as field locations. Materials fee.
Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 170. Advanced Projects. 4 Units.
Students working in different mediums will focus on ambitious research, planning, development, and experimentation, leading to a single work or focused series that is large in scope. The project will be exhibited and documented at the end of the quarter.
Prerequisite: ART 150 or ART 150C or ART 151 or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 152F or ART 153 or ART 166A or ART 190 or ART 190B or ART 190C.
Restriction: Art majors only.

ART 189. Critical Aesthetics. 4 Units.
Surveys critical thought that has influenced twentieth-century art production, preparing the student to engage contemporary art with a critical eye, specifically addressing aesthetic and political debates of the historical avant-garde, the neo-avant garde, and postmodern culture.
Prerequisite: ART 1A and ART 1B and ART 1C.
Restriction: Upper-division students only. Art majors only.
ART 190. Senior Project and Critique. 4 Units.
Directed-study critique class in preparation for final project and life after graduation; documentation and portfolio preparation for graduate school. Investigation of exhibition spaces and funding opportunities, participation in artists' communities outside the university, and artists' rights issues.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art majors only.

ART 190B. Senior Projects and Critique in Photography. 4 Units.
Directed group study focused on production of photographic projects of significant scope and ambition. Emphasis on preparation for continued study and/or practice in photography in advanced settings beyond the undergraduate university experience. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art majors only.

ART 190C. Senior Projects and Critique in Video. 4 Units.
Directed group study focused on production and exhibition of individual video projects of significant scope and ambition. Emphasis is placed on critical evaluation. Assignments include work documentation, graduate school preparation, and investigation for future opportunities outside the University. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Seniors only. Art majors only.

ART 197. Art Internship. 1-4 Units.
Under faculty supervision, students participate directly in a variety of art institution settings, including museums, galleries, and nonprofit organizations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Juniors only.

ART 198. Honors Exhibition. 4 Units.
Preparation, installation, and participation in the annual honors exhibition. Materials fee.

Grading Option: Pass/no pass only.

Restriction: Juniors or seniors only. Art Honors students only.

ART 199. Independent Study. 1-4 Units.
Individual study or directed creative projects as arranged with faculty member. Materials fee.

Repeatability: May be repeated for credit unlimited times.

ART 210. First-Year Graduate Seminar. 4 Units.
Introductory theory class to contemporary art: intellectual history, theoretical antecedents, and current critical concerns.

Restriction: Graduate students only.

ART 211. Methods and Materials Workshop. 4 Units.
Comprised of a series of workshops introducing graduates to production and facilities in photography, video, digital media, and sculpture.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.
ART 215. Graduate Seminar Topics. 4 Units.
In-depth discussion of contemporary art production in relation to a variety of theoretical, cultural, and historical topics. Material is determined by the given instructor’s current research interest. Topics vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 220. Graduate Seminar: Issues in Contemporary Art. 4 Units.
Classroom interaction with artists, curators, critics, lecturers from fields outside of the arts or from cross-disciplines. Includes recommended readings, discussions, panel participation, writing assignments.

Prerequisite: ART 210.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

ART 230. Graduate Group Critique. 4 Units.
Focus on studio production. Students are expected to help foster and develop an environment in which serious and sophisticated peer critique can take place.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only.

ART 236. Graduate Topics in Studio Production. 4 Units.
Graduate group study of a specific medium or art practice (e.g., painting; video, installation, photography, sculpture/3D, performance, digital media, public art, sound art; film). Includes consideration of technical, theoretical, historical, and/or formal issues.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 240. Interdisciplinary Projects. 4 Units.
Intensive faculty-led discussion of in-progress graduate studio projects—can be discipline driven or working across fields in a rigorous interdisciplinary studio environment where students meet with the professor both individually and in small groups.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 250. Directed Reading and Research. 4 Units.
Independent study with a supervising faculty member to direct academic research, develop bibliographies, and discuss assigned readings.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 251. Special Topics Seminar. 4 Units.
Directed reading and/or study group on a given research topic. Agreed-upon meeting structure may be flexible in order to accommodate off-campus field trips and travel.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 255. Graduate Interdisciplinary and Collaborative Projects. 4 Units.
For graduate students working collaboratively across the School of the Arts or cross-university. May be team taught with one of the faculty members based in the Department of Art.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
ART 261. Graduate Thesis Writing Seminar. 4 Units.
Seminar for writing as a component of the thesis. Different models of writing, text, and spoken word will be discussed. Required second year.

Corequisite: ART 262.
Prerequisite: ART 210 and ART 215 and ART 220.

Restriction: Graduate students only.

ART 262. Graduate Thesis Independent Study. 1-4 Units.
Tutorials and directed study in thesis writing, research and/or studio production with thesis committee chair and/or thesis committee members to be taken during final quarters of study.

Corequisite: ART 261.
Prerequisite: ART 210 and ART 215 and ART 220.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 263. Graduate Thesis, Exhibition Critique. 4 Units.
Group critique required for matriculating M.F.A. students during the quarter in which their thesis exhibitions are scheduled. Public presentation/lecture on student's work required.

Prerequisite: ART 210 and ART 215 and ART 220 and ART 230 and ART 240 and ART 261 and ART 262.

Restriction: Graduate students only.

ART 264. Critical and Curatorial Thesis Exhibition. 8 Units.
Intensive tutorial geared toward execution of professional gallery exhibition, which is one half of the degree requirement for the M.F.A. concentration in Critical and Curatorial Studies. Must be taken under direction of Committee Chair.

ART 280. Contemporary Exhibition Systems. 4 Units.
Investigates contemporary case studies of curatorial practice. Sometimes taught in collaboration with a host institution. The history, theory and criticism or curatorial practice are tested through the explication of real exhibitions.

Prerequisite: ART 280A.

Repeatability: May be taken for credit 4 times.

ART 280A. Introduction to Exhibition Systems. 4 Units.
Introduces the basics of curating, covering the fundamentals of collection, research, fundraising, publicity, and installation. Also introduces the related categories of public programming and art criticism.

Restriction: M.F.A. students only.

ART 399. University Teaching. 4 Units.
Limited to Teaching Associates working under the active guidance and supervision of a regular rank faculty member responsible for curriculum and instruction at the University.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

Dance Courses

DANCE 2. Dance Health and Injury Prevention. 4 Units.
An overview of factors that affect the health of dancers. Includes evaluation of general health measures and prevention and management of common dance injuries.

Restriction: Dance majors only.

DANCE 3. Scientific Concepts of Health. 4 Units.
Introduction to the scientific foundations of health, emphasizing those pertaining to success in college and lifetime wellness. Includes principles of cardiorespiratory, musculoskeletal, flexibility, and nutritional fitness. A variety of learning experiences will be offered to apply science to real life.

(II)
DANCE 4. Introduction to Quantitative Research in Exercise Science. 4 Units.
Introduction to quantitative scientific inquiry as it pertains to exercise science and related fields. Includes evaluation of primary scientific research literature, research design, data collection and analysis, and research communication.

(I)

DANCE 12A. Studio Workshop in Spanish Dance. 2 Units.
Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.
Repeatability: May be taken for credit 3 times.

DANCE 12B. Studio Workshop in Spanish Dance. 2 Units.
Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.
Prerequisite: DANCE 12A.
Repeatability: May be taken for credit 3 times.

DANCE 12C. Studio Workshop in Spanish Dance. 2 Units.
Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.
Prerequisite: DANCE 12B.
Repeatability: May be taken for credit 3 times.

DANCE 14. Social Dance. 2 Units.
Contemporary and historical forms. Current ballroom, disco, and Western square dance forms; Latin ballroom dances; dances from the 20s, 30s, and 40s.
Grading Option: Pass/no pass only.

DANCE 21A. Music for Dancers. 4 Units.
Emphasis on the development of musical skills most pertinent to the dancer: vocabulary, notational literacy, rhythmic and melodic acuity, score reading, and fundamental analysis; working with live accompaniment.
Restriction: Dance majors only.

DANCE 30A. Studio Workshop in Ballet I. 2 Units.
Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.

DANCE 30B. Studio Workshop in Ballet I. 2 Units.
Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 30A.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.

DANCE 30C. Studio Workshop in Ballet I. 2 Units.
Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 30A and DANCE 30B.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.

DANCE 34. Men's Studio Workshop in Ballet. 2 Units.
Emphasis on men's traditional ballet, techniques, and movements.
Prerequisite: DANCE 30A and DANCE 30B and DANCE 30C.
Repeatability: May be repeated for credit unlimited times.
DANCE 40A. Studio Workshop in Modern I. 2 Units.
Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 40B. Studio Workshop in Modern I. 2 Units.
Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 40C. Studio Workshop in Modern I. 2 Units.
Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50A. Studio Workshop on Jazz I. 2 Units.
Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50B. Studio Workshop on Jazz I. 2 Units.
Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50A.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50C. Studio Workshop on Jazz I. 2 Units.
Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50B.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 52A. Workshop in Tap I. 2 Units.
Beginning tap: principles of rhythm and basic tap steps.

Repeatability: May be taken for credit 2 times.

DANCE 52B. Workshop in Tap I. 2 Units.
Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52A.

Repeatability: May be taken for credit 2 times.

DANCE 52C. Workshop in Tap I. 2 Units.
Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52B.

Repeatability: May be taken for credit 2 times.
DANCE 60A. Choreography. 4 Units.
Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Restriction: Dance Majors only.

DANCE 60B. Choreography. 4 Units.
Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A.

Restriction: Dance majors only.

DANCE 60C. Choreography. 4 Units.
Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A and DANCE 60B.

Restriction: Dance majors only.

DANCE 80. Introduction to Ballet and Modern Dance. 4 Units.
Survey of nineteenth and twentieth-century ballet, modern dance, and theatre dance.

Overlaps with DANCE 90B, DANCE 90C, DANCE 90A.

Restriction: Non-major only.

DANCE 81. American Ballet and Modern Dance since 1900. 4 Units.
A survey of American ballet and modern dance in the twentieth and twenty-first centuries. Lectures are supplemented by video.

Overlaps with DANCE 90C.

Restriction: Non-major only. Dance 81 and Dance 90C may not both be taken for credit.

DANCE 82. Topics in World Dance. 4 Units.
Various topics in world dance studies focusing on historical, social, and cultural contexts.

Repeatability: May be repeated for credit unlimited times.

DANCE 83. Dance in Feature Film. 4 Units.
Dance in film musicals and commercial dance films, concentrating especially on films from the 1930s through the 1970s.

DANCE 85. Gender, Meaning, and Culture in Ballet. 4 Units.
Explores the way ballet as an art form and as a practice reflects culture, as well as embodying new ideas that read counter to conventional narratives.

DANCE 90A. Dance History 1A. 4 Units.
Global perspectives. Topics and histories of dance and movement practices from various parts of the world.

Overlaps with DANCE 80.

Restriction: Dance majors have first consideration for enrollment.
DANCE 90B. Dance History 1B. 4 Units.
The history of dance in the western tradition from the Renaissance through the nineteenth century.
Prerequisite: DANCE 90A
Overlaps with DANCE 80.
Restriction: Dance majors have first consideration for enrollment.

DANCE 90C. Dance History 1C. 4 Units.
The history of dance in the western tradition: the twentieth and twenty-first centuries.
Prerequisite: DANCE 90B
Overlaps with DANCE 80, DANCE 81.
Restriction: Dance majors have first consideration for enrollment.

DANCE 100. Kinesiology for Dance. 4 Units.
The study of the production of dance movement by the musculoskeletal system. Anatomical and dynamic analysis of dance movement.
Restriction: Dance majors only.

DANCE 103. Pilates. 2 Units.
Basics of technique emphasizing alignment, breath control, correction of muscular imbalances.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 104. Pilates Reformer. 2 Units.
Utilizes the Universal Reformer apparatus, aiding the student in core stabilization, correcting muscular imbalances, increasing flexibility, and improving strength.
Prerequisite: DANCE 103.
Restriction: Dance majors only.

DANCE 110. World Dance . 2 Units.
Studio workshop of dances and movement sources of specified countries or areas.
Repeatability: May be taken for credit 6 times as topics vary.

DANCE 125A. Teaching of Dance. 4 Units.
Pedagogy. The methods and theory of teaching dance forms.
Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C.
Restriction: Dance majors only. Upper-division students only.

DANCE 127A. Costume Design for Dance. 4 Units.
Costume design and construction specific to the body in motion. Theoretical study and practical execution.
Restriction: Dance majors only.

DANCE 130A. Pointe Class. 2 Units.
Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 132A and DANCE 132B and DANCE 132C.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.
DANCE 132A. Studio Workshop in Ballet II. 2 Units.
Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: (DANCE 30A and DANCE 30B and DANCE 30C) or audition. Prerequisites are for non-Dance majors only.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 132B. Studio Workshop in Ballet II. 2 Units.
Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 132A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 132C. Studio Workshop in Ballet II. 2 Units.
Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 132A and DANCE 132B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 133A. Advanced Studio Workshop in Ballet III. 2 Units.
Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: (DANCE 132A and DANCE 132B and DANCE 132C) or audition.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 133B. Advanced Studio Workshop in Ballet III. 2 Units.
Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 133A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 133C. Advanced Studio Workshop in Ballet III. 2 Units.
Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 133A and DANCE 133B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 134A. Advanced Studio Workshop in Ballet IV. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.
Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or audition. DANCE 133C with a grade of B+ or better.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.
DANCE 134B. Advanced Studio Workshop in Ballet IV. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.

DANCE 134C. Advanced Studio Workshop in Ballet IV. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.

DANCE 135A. Advanced Studio Workshop in Ballet V. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: (DANCE 134A and DANCE 134B and DANCE 134C) or audition. DANCE 134C with a grade of B+ or better.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.

DANCE 135B. Advanced Studio Workshop in Ballet V. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.

DANCE 135C. Advanced Studio Workshop in Ballet V. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A and DANCE 135B.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.

DANCE 137. Repertory . 2 Units.
Rehearsal and performance of repertoire from established ballet, modern, or jazz choreographers.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or (DANCE 143A and DANCE 143B and DANCE 143C).
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.

DANCE 139. Partnering. 2 Units.
Principles of partnering techniques in various dance performance styles.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C.
Repeatability: May be taken for credit 4 times.
Restriction: Dance majors only.
DANCE 142A. Studio Workshop in Modern II. 2 Units.
Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.
Prerequisite: DANCE 40A and DANCE 40B and DANCE 40C. Prerequisites are for non-Dance majors only.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 142B. Studio Workshop in Modern II. 2 Units.
Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.
Prerequisite: DANCE 142A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 142C. Studio Workshop in Modern II. 2 Units.
Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.
Prerequisite: DANCE 142A and DANCE 142B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 143A. Advanced Studio Workshop in Modern III. 2 Units.
Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.
Prerequisite: DANCE 142A and DANCE 142B and DANCE 142C.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 143B. Advanced Studio Workshop in Modern III. 2 Units.
Builds on the fundamentals of Dance 142A-DANCE 142B-DANCE 142C and introduces performance techniques.
Prerequisite: DANCE 143A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 143C. Advanced Studio Workshop in Modern III. 2 Units.
Builds on fundamentals of Dance 142A-DANCE 142B-DANCE 142C and introduces performance techniques.
Prerequisite: DANCE 143A and DANCE 143B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 144A. Advanced Studio Workshop in Modern IV. 2 Units.
Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.
Prerequisite: DANCE 143A and DANCE 143B and DANCE 143C.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.
DANCE 144B. Advanced Studio Workshop in Modern IV. 2 Units.
Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 144C. Advanced Studio Workshop in Modern IV. 2 Units.
Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A and DANCE 144B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 152A. Intermediate Studio Workshop in Jazz II. 2 Units.
Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 50A and DANCE 50B and DANCE 50C. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 152B. Intermediate Studio Workshop in Jazz II. 2 Units.
Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 152C. Intermediate Studio Workshop in Jazz II. 2 Units.
Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 153A. Advanced Studio Workshop in Jazz III. 2 Units.
Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 153B. Advanced Studio Workshop in Jazz III. 2 Units.
Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.
DANCE 153C. Advanced Studio Workshop in Jazz III. 2 Units.
Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A and DANCE 153B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 154A. Advanced Jazz: Performance Techniques IV. 2 Units.
Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 153A and DANCE 153B and DANCE 153C.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 154B. Advanced Jazz: Performance Techniques IV. 2 Units.
Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 154C. Advanced Jazz: Performance Techniques IV. 2 Units.
Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A and DANCE 154B.
Repeatability: May be taken for credit 2 times.
Restriction: Prerequisite required and Dance majors only

DANCE 160. Improvisation. 2 Units.
Structured and experiential improvisation to heighten the personal intuitive processes, the kinesthetic sense, spatial and temporal awareness, and to encourage insights into the potential movement resources of the individual for performance and choreography. Course encourages freedom of exploration.

Repeatability: May be taken for credit 2 times.

DANCE 162A. Choreography II. 4 Units.
Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 60A and DANCE 60B and DANCE 60C. Audition required.
Restriction: Dance majors only.

DANCE 162B. Choreography II. 4 Units.
Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A. Audition required.
Restriction: Dance majors only.

DANCE 162C. Choreography II. 4 Units.
Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A and DANCE 162B. Audition required.
Restriction: Dance majors only.
DANCE 163. Dance and Video Technology. 4 Units.
Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

Prerequisite: DANCE 60A.
Restriction: Dance majors only.

DANCE 164. Screendance. 4 Units.
Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 163.
Restriction: Dance majors only.

DANCE 165. Choreographic Projects. 1-4 Units.
Supervised choreographic projects for workshop productions.

Prerequisite: Audition required.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 170. Dance Performance. 1-4 Units.
Rehearsal and performance in a faculty-choreographed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

DANCE 171. Dance Workshop. 1-4 Units.
Rehearsal and performance in a student-choreographed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

DANCE 172. Master of Fine Arts Concert. 1-4 Units.
Rehearsal and performance in a graduate student-choreographed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

DANCE 174. UCI Dance Ensemble Performance. 1-4 Units.
Performance with the UCI Dance Ensemble.

Repeatability: May be taken for credit 6 times.
Restriction: Sophomores, juniors, and seniors only.

DANCE 176. UCI Jazz Dance Ensemble. 2-4 Units.
Rehearsal and performance in theatrical jazz dance, designed to provide an experience in assimilating various styles of jazz dance and in refining dance performance techniques. Students will master aspects of dance company promotion.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C.
Repeatability: May be taken for credit 6 times.
Restriction: Sophomores, juniors, and seniors only.

DANCE 177. UCI Spanish Dance Ensemble. 1-4 Units.
Rehearsal and performance with the UCI Spanish Dance Ensemble. Flamenco and other Spanish dance genres are presented throughout the year for campus and off-campus events.

Repeatability: May be taken for credit 12 times.
DANCE 179. UCI Etude Ensemble. 4 Units.
Repertoire and performances by undergraduate Dance majors. Concert presentations on and off campus. Faculty directed, student/faculty choreographed.

Prerequisite: Audition required.

Repeatability: May be taken for credit 9 times.

Restriction: Sophomores, juniors, and seniors only.

DANCE 180A. Laban Studies. 4 Units.
Elementary Labanotation and motif writing.

Prerequisite: DANCE 21A and DANCE 180C.

Restriction: Dance majors only.

DANCE 180C. Laban Studies. 4 Units.
Laban movement analysis.

Prerequisite: DANCE 21A.

Restriction: Dance majors only.

DANCE 185. Critical Issues in Dance. 4 Units.
Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world. Course may be offered online.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance majors only.

DANCE 185W. Critical Issues in Dance. 4 Units.
Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world. Course may be offered online.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance majors only.

DANCE 193. Selected Topics in Dance. 1-4 Units.
Directed group studies of topics in dance.

Repeatability: May be taken for credit 3 times as topics vary.

DANCE 194. Topics Vary. 4 Units.
Seminar in Dance Studies. Variable topics related to gender, race, politics, and dance writing, and criticism, with attention to linking dance practices to the wider world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C.

Repeatability: Unlimited as topics vary.

DANCE 195. Arts Management. 4 Units.
Designed for students interested in the developmental and management of nonprofit arts organizations. Examines the organizational structure and areas of operation such as marketing, fundraising, budgeting, production, and administration.

Repeatability: May be taken for credit 2 times.

DANCE 197. Independent Study. 1-4 Units.
Individual independent projects in experimental laboratory, library, field, performance, under instructor’s direction. Students can receive conceptual, creative, and theoretical instruction in the successful completion of a written report or performance.

Repeatability: May be repeated for credit unlimited times.
DANCE 199. Senior Thesis. 4 Units.
Directed research or creative activity for senior Dance majors. Research consists of a substantial essay on dance history, research in dance science, or the creation of original or reconstructed choreography.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance majors only.

DANCE 201. Seminar in Kinesiology for Dance. 4 Units.
Introduction to the anatomical, biomechanical, and physiological principles of dance movement.

Prerequisite: DANCE 100.

DANCE 210. Graduate Studio: World Dance. 2 Units.
Principles, techniques, and styles of selected genres of world dance such as those of Mexico, Spain, Japan, or other cultures.

Repeatability: May be taken for credit 6 times.

Restriction: Dance grad students only and consent of instructor to enroll.

DANCE 222. Musical Resources. 4 Units.
Detailed study of music as it relates to dance. Historical overview of musical form, style, and other elements. Analysis of various affinities between music and dance. Practical applications.

DANCE 225. Seminar in the Teaching of Dance Techniques. 4 Units.
Principles and theories of teaching dance techniques. Supervised presentation and teaching of technique class.

DANCE 231A. Graduate Studio: Ballet. 2 Units.
Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 231B. Graduate Studio: Ballet. 2 Units.
Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 231C. Graduate Studio: Ballet. 2 Units.
Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241A. Graduate Studio: Modern. 2 Units.
Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241B. Graduate Studio: Modern. 2 Units.
Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.
DANCE 241C. Graduate Studio: Modern. 2 Units.
Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.
Prerequisite: DANCE 241B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 251A. Graduate Studio: Jazz. 2 Units.
Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 251B. Graduate Studio: Jazz. 2 Units.
Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.
Prerequisite: DANCE 251A.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 251C. Graduate Studio: Jazz. 2 Units.
Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.
Prerequisite: DANCE 251B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 252A. Graduate Studio: Tap. 2 Units.
An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.
Repeatability: May be taken for credit 4 times.

DANCE 252B. Graduate Studio: Tap. 2 Units.
An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.
Prerequisite: DANCE 252A.
Repeatability: May be taken for credit 4 times.

DANCE 252C. Graduate Studio: Tap. 2 Units.
An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.
Prerequisite: DANCE 252B.
Repeatability: May be taken for credit 4 times.

DANCE 261A. Graduate Studio in Choreography. 4 Units.
Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.
Repeatability: May be repeated for credit unlimited times.

DANCE 261B. Graduate Studio in Choreography. 4 Units.
Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.
Prerequisite: DANCE 261A.
Repeatability: May be repeated for credit unlimited times.
DANCE 264. Screendance. 4 Units.
Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 281.

DANCE 265. Performance Capture. 4 Units.
Projects in performance capture, motion capture, motion tracking, and computer animation. Introduction to techniques for sensing and recording human movement and transforming the result into digital representations using computer technology. Discussion of aesthetic issues related to movement representation. Choreographic projects.

Prerequisite: DANCE 264 and DANCE 281.

DANCE 281. Dance and Video Technology. 4 Units.
Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

DANCE 282. Seminar in Movement Analysis. 4 Units.
Theories of movement analysis and nonverbal communication applied to dance.

DANCE 283. Critical Issues in Dance. 4 Units.
Reading, writing, discussing, and presenting key issues that relate to dance studies. Basics of dance analysis and criticism. Special emphasis on effective ways of defining, clarifying, and arguing for points of view.

Prerequisite: DANCE 284.

DANCE 284. Bibliography and Research. 4 Units.
Understanding the field of dance studies, available resources, research methods, and academic formats in preparation for thesis writing.

DANCE 285. Graduate Projects. 4 Units.
Projects may be educational, choreographic, scientific, historical, or philosophical in scope and must have faculty advisor approval.

Repeatability: May be taken for credit 6 times.

DANCE 286. Thesis. 4 Units.
Substantial research in a topic approved by the student's graduate committee. Results of the research must be written in approved thesis style.

Repeatability: May be taken for credit 6 times.

DANCE 287. Graduate Lectures in Dance. 1-4 Units.
A series of lectures and discussions of announced topics in dance. Content may be from history, ethnology, notation, medicine, music, or other areas in the field.

Repeatability: Unlimited as topics vary.

DANCE 296. Proseminar in Dance History. 4 Units.
Discussion seminar with emphasis on reading and thinking about problems in dance history; presentation of oral and written reports.

Repeatability: May be taken for credit 2 times as topics vary.

DANCE 297. Directed Reading. 1-4 Units.
Topic to be approved by instructor. Paper required.

Repeatability: May be repeated for credit unlimited times.

DANCE 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance graduate students only.
Drama Courses

**DRAMA 10. Introduction to Theatre. 4 Units.**
An interactive introduction to the world of theatre that serves to develop an appreciation of theatrical arts, to establish an awareness of landmarks within the performance history, and to create an understanding of the collaborative roles and departments that exist.

(IV)

**DRAMA 11. The Rock and Roll Spectacle Show. 4 Units.**
A thorough overview to the development and cultural significance of the Rock 'n' Roll Spectacle show. Focus on historical and recent developments of the spectacle show, trends in the aesthetics of the field, and various sub-genres.

(IV)

**DRAMA 14. Performing Rock 'N' Roll. 4 Units.**
Explores major movements in the history of rock 'n' roll in terms of performance, not virtuosity necessarily of the performers as musicians, rather as performances of aesthetics in modes of embodied ideology, iconoclastic spectacle, mixed media fashion, and subcultural formation.

**DRAMA 15. Performance Now. 4 Units.**
Exposes students to what is most current in the world of performance and theatre. Begins with a series of lectures on the idea of performance, and the various theories that frame it.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV)

**DRAMA 16. Performing Culture. 4 Units.**
Culture, aesthetics, and ideology (combined in the concept "subculture") work to fashion social identities. Using theories and methodologies of performance studies, with an emphasis on American culture, this course explores why and how culture is reinforced through performance.

(IV)

**DRAMA 20A. Culture in Performance. 4 Units.**
A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20B. Culture in Performance. 4 Units.**
A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 20C. Culture in Performance. 4 Units.**
A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

**DRAMA 30A. Acting. 4 Units.**
A one-year course in basic acting technique and discipline. Stage technique and stage discipline. Freeing vocal and physical movement and liberating emotional power. Elementary stage movement and voice. Elimination of regionalisms in speech. Overcoming stage fright. Readings in acting theory.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

**DRAMA 30B. Acting. 4 Units.**
A one-year course in basic acting technique and discipline. Improvisations and scenes. Rehearsal and presentation of at least two scenes with different partners. Developing stage contact with tactics in a “play” situation.

Prerequisite: DRAMA 30A.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.
DRAMA 30C. Acting. 4 Units.

Prerequisite: DRAMA 30A and DRAMA 30B.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre students have the first consideration for enrollment.

DRAMA 34. Movement for Actors. 4 Units.
A studio course in fundamentals of stretch, strength, and alignment; exploring spatial awareness and physical control through mime isolations, techniques, and related improvisation.

Repeatability: May be taken for credit 3 times.

DRAMA 35. Speech for the Theatre. 4 Units.
A course aimed at (1) improving natural, clear, unaffected speech and (2) eliminating negative habits and regional accents: exercises for physical tension, vocal support, tone production, vocal quality, and articulation.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 40A. Development of Drama. 4 Units.
The development of Western Drama, concentrating on the drama’s intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Greek Drama through Shakespeare.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 40B. Development of Drama. 4 Units.
The development of Western Drama, concentrating on the drama’s intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Restoration Drama through Ibsen.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 40C. Development of Drama. 4 Units.
The development of Western Drama, concentrating on the drama’s intellectual, social, and artistic foundations. About 10 plays and supplementary material are read each quarter. Contemporary Drama. Post Naturalistic theatre.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 50A. Introduction to Costume Design. 4 Units.
Introduction to the process and procedures employed by the costume designer for the theatre. The elements of design are discussed in the context of character development, historical period, and style. Exercises extend to drawing, rendering, and investigation of human proportions.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.
DRAMA 50B. Introduction to Scenic Design. 4 Units.
Introduction to the principles and practice of scenic design. Weekly problems include research into various periods and styles of production with an emphasis on the conceptual idea. Perspective drawing, rendering, and model building are covered in studio exercises and assignments.

Prerequisite: Prerequisite or corequisite: DRAMA 10.
Restriction: Drama and Music Theatre majors only.

DRAMA 50C. Introduction to Lighting Design. 4 Units.
Introduction to the principles, theories, and equipment employed by the lighting designer for the stage. Areas of investigation include history, technology, and script analysis. Detailed studio attention is given to the theory and practice of design.

Prerequisite: Prerequisite or corequisite: DRAMA 10.
Restriction: Drama and Music Theatre majors only.

DRAMA 50D. Introduction to Sound Design. 4 Units.
Principles, theories, equipment use, and terminology employed by the sound designer for the stage. Areas of study include history, technology, and script analysis. Focuses on the theory and practice of design.

Prerequisite: Prerequisite or corequisite: DRAMA 10.
Restriction: Drama and Music Theatre majors only.

DRAMA 50E. Introduction to Stage Management. 4 Units.
A basic study of theatrical, dance, and opera stage management practices, forms, and methods, from first script reading to closing night. Opportunity to observe professionals at work in regional and touring situations as available.

Prerequisite: Prerequisite or corequisite: DRAMA 10.
Restriction: Drama and Music Theatre majors only.

DRAMA 50F. History and Theories of Scenography. 4 Units.
Explores the aesthetics of the stage and the evolution of scenery and costume in live performance as inspiration for today’s theatre analysts. Topics include shared vocabulary, historical trends, shifts in approaches, and focus briefs on leaders in the field.

Prerequisite: Prerequisite or corequisite: DRAMA 10.
Restriction: Drama and Music Theatre majors only.

DRAMA 60. Topics in Advanced Stage Management. 4 Units.
Nurtures a greater appreciation for the stage manager and his or her process, and supports students who are interested in pursuing a career in professional stage management.

Repeatability: May be taken for credit 3 times as topics vary.

DRAMA 65. Music Theatre Workshop I. 2 Units.
Basic vocal technique and characterization of musical theatre repertoire explored.

Prerequisite: Audition required.
Repeatability: May be taken for credit 2 times.

DRAMA 80. Directing I. 4 Units.
Introduction to comprehensive directing process from pre-production to opening. Focus on fundamental skills: analysis, staging, action, actor coaching, and elements of design. Skills applied to scripted theatrical material. Develop a language for commenting on theatrical production. Attending and critiquing productions.

Prerequisite: DRAMA 30A and DRAMA 30B.

DRAMA 100. University Theatre. 4 Units.
Rehearsal and performance in a faculty-directed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.
DRAMA 101A. Theatre Production: Costume. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.
Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101B. Theatre Production: Scenic. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.
Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101C. Theatre Production: Lighting. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.
Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101D. Theatre Production: Stage Management. 1-8 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit 24 times.
Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101E. Theatre Production: Audio. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.
Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101S. Theatre Production: Theatre Management. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.
Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 103. Lectures in Dramatic Literature. 4 Units.
Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 103W. Lectures in Dramatic Literature. 4 Units.
Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth-Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.
DRAMA 109. Special Topics in Theory and Criticism. 4 Units.
Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 109W. Special Topics in Theory and Criticism. 4 Units.
Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 110. Special Topics in Classical Dramas . 4 Units.
Designed to introduce students to various classical traditions—early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.
Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 110W. Special Topics in Classical Dramas. 4 Units.
Designed to introduce students to various classical traditions—early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.
Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 112. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.
Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 112W. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.
Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

(Ib)
DRAMA 116. Special Topics in Nineteenth-Century Dramas. 4 Units.
Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the
culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 116W. Special Topics in Nineteenth-Century Dramas. 4 Units.
Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the
culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 118. Special Topics in Modern and Contemporary Drama. 4 Units.
An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the
historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 118W. Special Topics in Modern and Contemporary Drama. 4 Units.
An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the
historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 121. Introduction to Asian Theatre. 4 Units.
An introduction to some of the major traditional theatrical forms and dramatic texts from India, China, and Japan. Other than dramatic texts (in English
translation), attention is also paid to theory, history, and performance styles of traditional Asian theatre.

Restriction: Drama and Music Theatre majors only.

DRAMA 122. Asian American Theatre. 4 Units.
An introduction to the history and development of Asian American theatre and drama. Besides play analysis, special attention is also paid to the history
and politics of Asian American identity and experience, as well as to aspects of theatrical performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.

Restriction: Drama and Music Theatre majors only.

DRAMA 123. Multicultural Theatres. 4 Units.
A study of the history, culture, aesthetics, and literature of various traditional performing arts and their connections to the contemporary multicultural
society.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.
DRAMA 126. African American Film and Drama. 4 Units.
A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Restriction: Drama and Music Theatre majors only.

DRAMA 126W. African American Film and Drama. 4 Units.
A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Restriction: Drama and Music Theatre majors only.

DRAMA 129. Advanced Topics in Performance. 4 Units.
Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 129W. Advanced Topics in Performance. 4 Units.
Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.

DRAMA 130. Intermediate Acting. 4 Units.
Rehearsal and presentation of scenes from contemporary material. Focus on connection with scene partner, playing actions, and text analysis. Introduction to the credibility and theatricality of characterization and style.
Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C with an average grade of B or better. For transfer students: one year of beginning acting with an average grade of B or better.
Repeatability: May be taken for credit 2 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 132A. Writing for Performance. 4 Units.
Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 132AW. Writing for Performance. 4 Units.
Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.
DRAMA 134. Studio for Advanced Movement for Actors. 4 Units.
Studio course in conditioning and partnering techniques to the practice of contact improvisation. Contact improvisation is explored and applied in scene study.
Prerequisite: DRAMA 34. DRAMA 34 with a grade of B or better.
Repeatability: May be taken for credit 3 times.

DRAMA 135. Master Classes in Acting. 1-4 Units.
Advanced acting in specialized areas including acting for the camera: situation comedy, commercials; auditioning and industry preparation; Shakespeare; Molière; Chekov; improvisation; advanced movement and voice and speech for the actor; self-starting; stage combat; repertory acting, singing; comedy; clowning; and masks.
Prerequisite: DRAMA 130. DRAMA 130 with a grade of B or better.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 136. Music Theatre Acting. 4 Units.
An acting class exclusive to the students in the B.F.A. in Music Theatre program.
Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C.
Restriction: Music Theatre majors only.

DRAMA 142. Music Theatre Workshop II. 4 Units.
A workshop in audition technique and song interpretation.
Prerequisite: Audition required.
Repeatability: May be taken for credit 4 times.

DRAMA 143A. Music Theatre Workshop I. 4 Units.
Scene study and song repertoire examined by era for the advanced Music Theatre student. 1800's-1940.
Prerequisite: DRAMA 142. Audition required.

DRAMA 143B. Music Theatre Workshop II. 4 Units.
Scene study and song repertoire examined by era for the advanced Music Theatre student. 1940's-1970's.
Prerequisite: DRAMA 142. Audition required.

DRAMA 143C. Music Theatre Workshop III. 4 Units.
Scene study and song repertoire examined by era for the advanced Music Theatre student. 1970's-present.
Prerequisite: DRAMA 142. Audition required.

DRAMA 144. Music Theatre Workshop IV. 4 Units.
A performance class concentrating on role building. Work culminates with in-class performances of abbreviated versions of musicals.
Prerequisite: For B.F.A. students: DRAMA 143A, DRAMA 143B, DRAMA 143C, and audition. For Drama graduate students: audition required.
Repeatability: May be taken for credit 4 times.
Restriction: Music Theatre majors and Drama graduate students only.

DRAMA 145. Music Theatre Singing. 1 Unit.
Private weekly voice lessons for the advanced Music Theatre student.
Corequisite: DRAMA 143A or DRAMA 144.
Repeatability: May be taken for credit 9 times.
Restriction: Music Theatre majors only.
DRAMA 146. NYSP-Preparation. 4 Units.
Class preparation for the New York Satellite Program (NYSP) - an immersion experience in New York City for the musical theatre performer.

Prerequisite: Admission is by audition and the following prerequisites: DRAMA 30C and two quarters of DRAMA 148A, DRAMA 148B, or DRAMA 148C (if the 148 prerequisite is not complete at the time of auditions, student must enroll during the fall and winter quarters in the same year as the trip to New York); senior Drama majors must have successfully completed DRAMA 40C and DRAMA 120C; non-Drama majors must have sophomore standing or higher and must carefully plan their course schedule as many spring quarter classes cannot be taken while part of the NYSP.

Repeatability: May be taken for credit 2 times.

DRAMA 148A. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Drama and Music Theatre majors only.

Concurrent with DRAMA 248A.

DRAMA 148B. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Drama and Music Theatre majors only.

Concurrent with DRAMA 248B.

DRAMA 148C. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1970s to present day.

Restriction: Drama and Music Theatre majors only.

Concurrent with DRAMA 248C.

DRAMA 149. Music Proficiency for Actors. 2 Units.
A musicianship class introducing basic musical terminology, theory, and sight singing skills.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 150. Costume Production Techniques. 4 Units.
Studio instruction in pattern making, draping, millinery, and construction techniques.

Prerequisite: DRAMA 50A.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 157. Lighting Composition. 4 Units.
Provides an opportunity for students to pursue stage lighting composition in a studio atmosphere. Laboratory practice includes weekly exercises in style and genre. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 158. Topics in Theatre Design. 4 Units.
Examines the various functions of scenery and costume: locale, historical period, mood, and atmosphere, with special assignments in each area. Discussion of problems in scenic metaphors and visualization, emphasizing techniques of planning and presentation (e.g., floor plans, models, and rendering).

Prerequisite: DRAMA 50A OR DRAMA 50B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama or Music Theatre majors only.
DRAMA 159. Proseminar in Theatre Design. 4 Units.
Topics in theatre design.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 160. Light Plotting Techniques. 4 Units.
A study of the development of theatrical lighting plots from initial conceptualization through final documentation. Areas of emphasis include script analysis, visual approaches, equipment selection, and compositional qualities of light.
Prerequisite: DRAMA 50C and DRAMA 157.
Restriction: Drama and Music Theatre majors only.

DRAMA 164A. History of Costume. 4 Units.
A study of the development of dress and the influence of cultural factors on clothing from the time of Egyptians to Early Baroque.
Prerequisite: DRAMA 50A.
Restriction: Drama and Music Theatre majors only.

DRAMA 164B. History of Costume. 4 Units.
A study of the development of dress and the influence of cultural factors on clothing from late Baroque to World War I.
Prerequisite: DRAMA 50A.
Restriction: Drama and Music Theatre majors only.

DRAMA 167. Fabric Modification Techniques. 4 Units.
Exploration of various dying, printing, painting, and texture modification techniques.
Prerequisite: DRAMA 50A.
Restriction: Drama and Music Theatre majors only.

DRAMA 168. Theatrical Mask Techniques. 4 Units.
Design and construction of theatrical masks including paper mache, leather, plastics, and latex. Projects employ traditional and contemporary techniques.
Prerequisite: DRAMA 50A.
Restriction: Drama and Music Theatre majors only.

DRAMA 169. Costume Rendering Techniques. 4 Units.
Development of costume rendering skills and techniques. Explores collage, pastel, and ink and emphasizes watercolor.
Prerequisite: DRAMA 50A.
Repeatability: May be taken for credit 2 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 176. Script and Score. 4 Units.
A form and analysis seminar discussing the libretto and score of landmark musicals.
Prerequisite: Two courses from DRAMA 148A or DRAMA 148B or DRAMA 148C.
Restriction: Drama and Music Theatre majors only.

DRAMA 177. Song Repertoire. 2 Units.
A song coaching class culminating in a song recital or showcase. Each quarter will feature a different composer, lyricist, or musical style.
Repeatability: May be taken for credit 6 times.
Restriction: Music Theatre majors only.
DRAMA 179. Intermediate Sound Design. 4 Units.
A project-based analysis of the principles of sound design for the theatre. Projects are executed in the sound design studio and may include sound manipulation and recording. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50D.

Restriction: Drama and Music Theatre majors only.

DRAMA 180. Contemporary Dramatic Criticism and Theory. 4 Units.
Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 180W. Contemporary Dramatic Criticism and Theory. 4 Units.
Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 181. Acting Theory. 4 Units.
A study of the theory of acting, with readings in Plato, Aristotle, Quintilian, Shakespeare, Diderot, Stanislavsky, Brecht, Strasberg, Meisner, Grotowski, and other theorists, ancient to contemporary.

Prerequisite: DRAMA 130.

Restriction: Drama and Music Theatre majors only. Juniors only.

Concurrent with DRAMA 224.

DRAMA 182A. Dance Technique, Level I. 4 Units.
Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 182B. Dance Technique, Level I. 4 Units.
Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 182A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 183A. Dance Technique, Level II. 4 Units.
Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Drama and Music Theatre majors only.
DRAMA 183B. Dance Technique, Level II. 4 Units.
Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 183A. Audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 184. Directing II. 4 Units.
The principles of stage directing, covering the director's functions in the areas of interpretation, composition, coaching, and styling a theatrical production. Directing exercises and projects; the final project is the preparation of a hypothetical proposal for a play production.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C and DRAMA 40A and DRAMA 40B and DRAMA 40C.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theater majors only.

DRAMA 185. Advanced Directing. 4 Units.
A seminar in directorial organization and research. Student prepares a textual and dramaturgical analysis, a production timetable, and a hypothetical production book of an assigned play.

Prerequisite: DRAMA 184.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 190. NYSP-Acting. 1-4 Units.
New York Satellite Program acting classes taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 191. NYSP - Dance. 4 Units.
New York Satellite Program dance classes in ballet, tap, jazz, and musical theatre styles taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 192. NYSP - Singing. 4 Units.
New York Satellite Program private and group lessons in musical theatre singing taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 193. NYSP - Performance. 4 Units.
New York Satellite Program rehearsals and public, staged readings of original musicals in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 194. NYSP-UCI Residency. 4 Units.
New York Satellite Program follow-up classes and performances back on Irvine campus upon the return from New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.
DRAMA 195. Music Theatre Dance - Special Topics. 1-4 Units.
Advanced dance classes in specialized areas including the dance styles of a choreographer (de Mille, Fosse, Robbins, Tune, Stromer), genre (tap, ballroom, jazz, swing, hip-hop), or in musical theatre choreography.

Prerequisite: DRAMA 182A or DRAMA 182B or DRAMA 182C or DRAMA 183A or DRAMA 183B or DRAMA 183C. Audition required.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 198. Director Class Project. 1-8 Units.
For students who are involved in the Director Class Projects at UCI as actors, directors, designers, stage managers and their assistants. M.F.A. Directors and the Head of Directing (HoD) supervise the projects.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

DRAMA H198. Honors Director Class Project. 1-4 Units.
For graduate student actors and undergraduate directors who are candidates for Honors in Directing and involved in the Director Class Projects. The Head of Directing (HoD) supervises these students.

Repeatability: Unlimited as topics vary.

DRAMA 199. Project in Theatre. 1-4 Units.
Independent theatre projects with Drama faculty.

Repeatability: Unlimited as topics vary.

DRAMA 200. Graduate Studio: Acting. 4 Units.
Work in graduate studio taken in tandem with graduate studios in stage voice (DRAMA 201), stage speech (DRAMA 202), and stage movement (DRAMA 203).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 201. Graduate Studio: Voice. 1 Unit.
Graduate studio in vocal production for actors.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 202. Graduate Studio: Speech. 1 Unit.
Graduate studio in speech for actors.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 203. Graduate Studio: Movement. 2 Units.
Work in graduate studio: stage movement taken in tandem with nine graduate studios in acting (DRAMA 200), voice (DRAMA 201), speech (DRAMA 202), and voice/movement dynamics (DRAMA 206).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 206. Graduate Studio: Voice/Movement Dynamics. 2 Units.
Daily conditioning exercises.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.
DRAMA 211. Graduate Studio: Directing. 4 Units.
Graduate studio in directing.
Repeatability: Unlimited as topics vary.
Restriction: Drama graduate students only.

DRAMA 212. Graduate Studio: Playwriting. 4 Units.
Completion of a full-length play or its equivalent and production of a staged reading of the play at the end of the spring quarter. Discussion of relevant literary texts and student writings.
Repeatability: May be repeated for credit unlimited times.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 219. Graduate Master Class. 1-4 Units.
Various topics such as Shakespeare, comedy, Molière, improvisation, Kabuki, television acting.
Repeatability: May be repeated for credit unlimited times.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 220. Seminar in Dramatic Literature. 4 Units.
Topics in Dramatic Literature.
Repeatability: Unlimited as topics vary.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 221. Seminar in Criticism. 4 Units.
Topics in criticism.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

DRAMA 225. Seminar on Theatre Pedagogy. 4 Units.
A seminar on the major teaching systems in the dramatic arts with particular attention to professional arts training. Required prior to applying for Teaching Assistantships in studio areas.
Restriction: Drama graduate students only.

DRAMA 227. Communication Skills for Graduate Students. 2 Units.
Teaches basic public speaking techniques to graduate students, aids students in presenting persuasively for audiences large and small.
Grading Option: Satisfactory/unsatisfactory only.

DRAMA 240. Graduate Projects . 1-4 Units.
Various projects depending on student’s concentration (acting, design, musical theatre, directing).
Repeatability: May be repeated for credit unlimited times.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 241. Singing Pedagogy . 2 Units.
Learning how to teach voice lessons and coach musical theatre singing. Experiences include both private voice lessons and observing the lessons given to the B.F.A./Music Theatre students.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate Music Direction students only.
DRAMA 242. Conducting. 2 Units.
Private conducting instruction to develop freedom of movement/expression, baton technique, ear training, and tempo memory for both rehearsal and performance situations in musical theatre.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate Music Directors only.

DRAMA 243. Script and Score. 4 Units.
A form and analysis seminar discussing the libretto and score of landmark musicals.

Restriction: M.F.A. in Music Direction students only.

Concurrent with DRAMA 176.

DRAMA 244. Dramaturgy: Theory and Methods. 4 Units.
Examines the practice, place, and theory of dramaturgy. Explores plays in terms of how they work: dramatic form and structure, historical context, and more. Study includes dramaturgy as a theatrical practice.

Restriction: Drama M.F.A. and Ph.D. students only.

DRAMA 246A. Musical Scene Study I. 4 Units.
Musically directing scenes from musicals of various time periods. Features works from the late 19th and early 20th centuries, including songwriters Gilbert and Sullivan, Irving Berlin, George Gershwin, Rodgers and Hart, and Cole Porter.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Director students only.

DRAMA 246B. Musical Scene Study II. 4 Units.
Musically directing scenes from musicals of various time periods. Features works from the middle of the 20th century including songwriters Rodgers and Hammerstein, Lerner and Loewe, Julie Styne, Kander and Ebb, and Jerry Herman.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

DRAMA 246C. Musical Scene Study III. 4 Units.
Musically directing scenes from musicals of various time periods. Features works from the late 20th and early 21st centuries including songwriters Stephen Sondheim, Andrew Lloyd Webber, Stephen Schwartz, Flaherty and Ahrens, and Jeanine Tesori.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

DRAMA 247. Musicals Abridged. 4 Units.
Musically directing abridged versions of musicals from various time periods and genres.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.

DRAMA 248A. History of American Music Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Graduate only.

Concurrent with DRAMA 148A.

DRAMA 248B. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Graduate only.

Concurrent with DRAMA 148B.
DRAMA 248C. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1970s to present day.

Concurrent with DRAMA 148C.

DRAMA 249. Graduate Music Direction. 4 Units.
Various musical direction activities including the vocal direction, accompanying, and conducting of musical theatre performances.

Repeatability: May be taken for credit 9 times.

Restriction: M.F.A. in Music Direction students only.

DRAMA 251A. Foundations of Theatre. 4 Units.
Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

DRAMA 251B. Foundations of Theatre. 4 Units.
Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

DRAMA 251C. Foundations of Theatre. 4 Units.
Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

DRAMA 254. Graduate Stage Management. 4 Units.
Studio exercises and projects in stage management.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Stage Management emphasis.

DRAMA 255. Graduate Design Seminar. 4 Units.
Projects, lectures, and critical discussion in costume, scenery, lighting, and sound design.

Restriction: Open only to Drama graduate students pursuing Design emphasis.

DRAMA 256. Survival and Professional Practice in Design. 4 Units.
Provides an in-depth examination of business skills needed to survive as a theatrical designer. Required 'Bridge' course in the Design MFA programs, relevant to all disciplines.

Restriction: Drama graduate students only.

DRAMA 257A. Costume Thesis Project. 4 Units.
Development of thesis project with focus on organization, research, timeline, and execution.

Prerequisite: DRAMA 240.

Restriction: Drama graduate students only.

DRAMA 257B. Scenic Thesis Project. 4 Units.
Development of thesis project with focus on organization, research, timeline, and execution.

DRAMA 257E. Thesis Writing Project-Stage Management. 4 Units.
Development of thesis topic with focus on organization, research, timeline, and execution.

Prerequisite: 12 units of DRAMA 254.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Drama graduate students only.
DRAMA 258. Drawing for Designers. 2 Units.
A multi-skill level course in drawing technique focusing on skills essential to stage designers including line, proportion, perspective and creating dynamic compositions. Focus will primarily be in figure drawing but may include still-life, landscape, and architectural drawings. Materials fee.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 9 times.

DRAMA 259. Theatre Colloquium. 1 Unit.
Exposes students to a wider range of theatrical practitioners, theories, and topics through guest lecturers, special projects, and cross-disciplinary dialogue.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 260A. Digital Costume Rendering. 4 Units.
A studio course in costume rendering for the theatre using computer image manipulation. Instruction in compositing and painting techniques and performance design conventions.

DRAMA 260B. Digital Textile Design and Printing. 4 Units.
A studio course in textile design using digital printing and embossing techniques. Instruction in state-of-the-art software and output manipulation for artistic expression.

DRAMA 261. Digital Design: Drawing/Painting/Rendering. 4 Units.
A studio course in scenic or costume rendering for the theatre using the computer for drawing/painting through the use of the digital pen/tablet.

Repeatability: May be taken for credit 2 times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 262. Digital Design: 2D/3D Modeling. 4 Units.
A studio course in CAD’s 2D drafting and 3D modeling capabilities for theatrical design. Instruction in state-of-the-art software for 2D and 3D object creation and theatrical presentation conventions.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 263. Digital Design: 3D Rendering. 4 Units.
A studio course in theatrical design through 3d modeling on computer and use of state-of-the-art rendering software. Instruction emphasizes collaborative design process through the use of scenic designer/lighting designer teams for all projects.

Prerequisite: DRAMA 262.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 264. Lighting Graphics. 4 Units.
A studio course in the various graphic methods employed by lighting designers in the theatre. Projects include manual and CAD techniques for Light Plot and Paperwork creation.

Prerequisite: DRAMA 262.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 265. Digital Design: 2D CAD. 4 Units.
A studio course in theatrical design and architectural lighting design on the computer. Instruction in state-of-the-art software for 2D object creation. Theatrical and architectural standards implemented in performance design.

Prerequisite: DRAMA 262.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 266. Digital Design: Digital Audio Systems. 4 Units.
Comprehensive tutorial on digital audio including hard disk recording, editing, data compression, and ethernet audio distribution. Focus is on recording, editing, and delivery of audio as used by the sound designer in the digital domain.

Restriction: Drama graduate students only.
DRAMA 267. Digital Design: Creating Sounds from Scratch. 4 Units.
The process of analyzing sounds for their core timbral components and using that data to create new sounds - from realistic to fantastic - by means of digital manipulation.
Prerequisite: DRAMA 266.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 271. Conceptual Sound Design. 4 Units.
An intensive, project-based seminar for exploring relationships between sound and sight. Synesthesia, creative intent vs. audience perception, and sound/movement are typical of the many topics to be explored. A series of creative projects are assigned and critiqued in peer review.
Prerequisite: DRAMA 266.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 272. Musical Theatre Sound/Concert Sound. 4 Units.
A concept-to-opening study of the process of designing sound systems for musicals and live/touring sound. Special attention given to the paperwork and documentation required to package, build, and mix these shows.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 277. Critical Listening. 4 Units.
Exploration of the many variables that affect (and effect) the audio chain. Perceiving and understanding these parameters unlocks the art of controlling sound and stylizing cues. Also includes the process of equalizing/aligning sound systems and the art of audio mastering.
Prerequisite: DRAMA 266.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 279. Advanced Sound Design. 4 Units.
An in-depth investigation into sound design for the theatre. Special emphasis is placed on text analysis, design conception, content creation, content delivery, and design organization. Class projects include creating paper designs and paperwork for different texts.

DRAMA 280A. Techniques in Costume Design. 4 Units.
Student exercises in the techniques and implementation of costume design.
Repeatability: Unlimited as topics vary.
Restriction: Open only to Drama graduate students pursuing Costume Design emphasis.

DRAMA 280B. Techniques in Scenery Design. 4 Units.
Student exercises in the techniques and implementation of scenic design.
Repeatability: Unlimited as topics vary.
Restriction: Open only to Drama graduate students pursuing Scenic Design emphasis.

DRAMA 280C. Techniques in Lighting Design. 4 Units.
Student exercises in the techniques and implementation of lighting design.
Repeatability: Unlimited as topics vary.
Restriction: Open only to Drama graduate students pursuing Lighting Design emphasis.

DRAMA 280D. Techniques in Sound Design. 4 Units.
Student exercises in the techniques and implementation of sound design.
Repeatability: Unlimited as topics vary.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 282. Stage Electronics/Introduction to Show Control. 4 Units.
Using computers and dedicated hardware to cue, control or automate sound, scenery, and lighting for live performance and themed entertainment applications.
Restriction: Drama graduate students and Drama and Theatre graduate students only.
DRAMA 290. Dramatic Literature and Theatre History Prior to 1900. 4 Units.
Studies in selected areas of dramatic literature and theatre history prior to 1900. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 291. Dramatic Literature and Theatre History, 1900 to Present. 4 Units.
Studies in selected areas of dramatic literature and theatre history, 1900 to present. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 292. Cultural and Critical Theory. 4 Units.
Studies in selected areas of cultural and critical theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 293. Directed Studies. 4-12 Units.
Directed study with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

DRAMA 294. Dissertation Research. 4-12 Units.
Dissertation research with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DRAMA 295. Professional Internship. 1-12 Units.
An arranged internship at the South Coast Repertory Theatre, or other equity theatre company, for qualifying M.F.A. students. A stipend and equity points are provided by the theatre company.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students only.

DRAMA 297. Dramaturgy Practicum. 4 Units.
Requires doctoral students to identify two plays from the Drama Department’s season to work as dramaturges. Students write a Dramaturgy Booklet recording their research and interactions with director, actors, and the design team. Students will work with doctoral faculty.

Restriction: Drama doctoral students only.

DRAMA 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

Music Courses

MUSIC 3. Introduction to Music. 4 Units.
Introduction to musical concepts and active listening skills. Students develop musical understanding through critical readings, selected repertoire, fundamental concepts related to rhythm, pitch, and genre. Students apply those concepts to music from a wide range of historical and cultural origins. Course may be offered online.

(IV)

MUSIC 4. Introduction to Opera. 4 Units.
Introduces students with no musical background to the dramatic and performance conventions of opera, and suggests ways of developing a critical stance vis-a-vis the social, political, gender-related and moral conflicts that are presented by composers and librettists.

(IV)
MUSIC 8. The Beatles and the Sixties. 4 Units.
Through a study of the music of the Beatles, students are introduced to selected broader historical and cultural themes (e.g., race and music, gender and music, music and the counterculture) while developing an understanding of the basic elements of music.

(IV)

MUSIC 9. Rock: The Early Years. 4 Units.
Surveys the social and cultural fabric of the post-World War II United States (from the late 1940s through the early 1970s) as seen through the prism of music - rock and roll music.

(IV)

MUSIC 10. Piano for Majors. 1 Unit.
For Music majors with little or no piano experience. Provides the necessary background for realizing keyboard exercises required in the theory and harmony courses, and develops skills to play and sight-read simple music from different periods.

Repeatability: May be taken for credit 3 times.

Restriction: Music and Music Performance majors only.

MUSIC 14A. European and American Music 1700 - Twentieth Century. 4 Units.
Survey of European and American music from the Baroque period through the twentieth century. Baroque and Classical music with adequate attention given to the Medieval and Renaissance periods. May be taken in any order.

(IV)

MUSIC 14B. European and American Music 1700 - Twentieth Century. 4 Units.
Survey of European and American music from the Baroque period through the 20th century. The nineteenth and twentieth centuries. May be taken in any order.

(IV)

MUSIC 14C. European and American Music 1700 - Twentieth Century. 4 Units.
Survey of European and American music from the Baroque period through the twentieth century. Selected topics in American music. May be taken in any order.

(IV)

MUSIC 15A. Musicianship I. 2 Units.
Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16A.

Restriction: Music and Music Performance majors only.

MUSIC 15B. Musicianship II. 2 Units.
Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16B.
Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 15C. Musicianship III. 2 Units.
Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16C.
Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better.

Restriction: Prerequisite required and Music and Music Performance majors only.

MUSIC 16A. Music Theory. 4 Units.
Review of music fundamentals. Triad and seventh chords, musical texture, chord spacing, embellishing tones, and introduction to diatonic harmony. Part-writing and model composition with tonic, dominant seventh, and subdominant harmonies.

Corequisite: MUSIC 15A.

Restriction: Music and Music Performance majors only.
MUSIC 16B. Music Theory. 4 Units.
Introduction to phrase structure. Part-writing and harmonization with predominants, linear dominants, 6/4 embellishing chords, leading-tone and other diatonic seventh chords. Advanced meters and rhythmic-metric dissonance. Diatonic sequence. Introduction to tonicization and modulation through motion to V and III.

Corequisite: MUSIC 15B.
Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 16C. Music Theory. 4 Units.
Tonicization and modulation to closely related keys. Simple binary and ternary forms. Voice-leading reductions and simple forms. Diatonic sequence with seventh chords. Introduction to chromatic harmony I: modal exchange and mixture chords, the Neapolitan and augmented sixth chords.

Corequisite: MUSIC 15C.
Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 16D. Theory/Musicianship. 4 Units.
Extended homophonic and contrapuntal formal designs (continuous variations, rondo form, sonata form, invention, fugue). Embellishing chromatic chords, dominant prolongation, modulations to foreign keys, extended harmonies, chromatic sequence, chromatic voice-leading and symmetrical divisions of the octave.

Prerequisite: MUSIC 15C and MUSIC 16C. MUSIC 15C with a grade of C- or better. MUSIC 16C with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 21A. Keyboard Skills. 1 Unit.
Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 21B. Keyboard Skills. 1 Unit.
Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 21C. Keyboard Skills. 1 Unit.
Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 25. Music Fundamentals. 4 Units.
Basic concepts and materials. Major and minor scales, intervals between pitches, key signatures, elements of rhythm, diatonic chords in root position and inversion. Simple and compound meters. Formerly Music 25A.

MUSIC 40B. History of European Music: From the Renaissance through the Baroque. 4 Units.
An introduction to the analysis of musical styles and forms, to the sources for constructing music history and reconstructing historical music, and to J.S. Bach.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better.

Restriction: Music and Music Performance majors have first consideration for enrollment.

(IV, VIII)
MUSIC 40C. History of European Music: Hasse to Mahler. 4 Units.
An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to Richard Wagner.
Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. MUSIC 16D recommended.
Restriction: Music and Music Performance majors have first consideration for enrollment.
(IV, VIII)

MUSIC 40D. 20th Century Music. 4 Units.
Survey of principal composers, movements, and compositional techniques of Western art music of the modern era.
Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better.
Restriction: Music and Music Performance majors have first consideration for enrollment.
(IV, VIII)

MUSIC 41. Major Composer. 4 Units.
Study of the works of an important composer with emphasis on their significance in historical and social contexts. Composers selected represent a wide variety of historical periods, nationalities, and stylistic orientations.
Repeatability: May be taken for credit 2 times as topics vary.
(IV)

MUSIC 42. Music and Gender. 4 Units.
Explores various intersections between music and gender. Examines ways in which gender and sexuality have played a vital role in the creation, dissemination, and consumption of music ranging from medieval Christian mysticism to contemporary hip-hop artists.
(IV, VIII)

MUSIC 44. Classical Music in Society. 4 Units.
Examines some ways in which classical music has played an integral role in aspects of society. Studies pieces from different cultural, political, and historical contexts in order to understand how musical meaning is created and interpreted.
(IV, VIII)

MUSIC 45. History of Film Music. 4 Units.
Course provides an overview of film music history. Special emphasis will be placed on developing an analytic vocabulary for musical elements and cultivating an understanding of how music can function within a film. Materials fee.
(IV)

MUSIC 49A. Asian in Western Music. 4 Units.
Traces and critiques western musical representations of Far East culture and figures, reviewing the reception and significance of these works by present-day Asian consumers of western culture.
Prerequisite: Satisfactory completion of the lower-division writing requirement recommended.
(VIII)

MUSIC 51. Music Technology and Computers. 4 Units.
A study of the influence of technology on the musical culture and aesthetics from the 20th century to the present, with particular emphasis on the role of the computer. Work includes lectures, readings, listenings, discussions, demonstrations, writing, and experimentation. Course may be offered online.
(IV)

MUSIC 65. Piano for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.
MUSIC 66. Strings for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 67. Winds for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 68. Voice for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music majors only.

MUSIC 69. Percussion for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 70. Guitar, Lute, and Other Plucked Instruments for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music majors only.

MUSIC 78. History of Jazz. 4 Units.
Development of jazz from African and African American folk origins through blues, early jazz, swing, bebop, "cool" jazz, fusion, free jazz, and contemporary trends.
Overlaps with MUSIC 78A, MUSIC 78B.
(IV, VII)

MUSIC 82A. Pish Radif: Introduction to Classical Persian Music. 4 Units.
Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Mahur.
Repeatability: May be repeated for credit unlimited times.

MUSIC 82B. Pish Radif: Introduction to Classical Persian Music. 4 Units.
Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Homayun.
Repeatability: May be repeated for credit unlimited times.

MUSIC 82C. Pish Radif: Introduction to Classical Persian Music. 4 Units.
Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Shur.
Repeatability: May be repeated for credit unlimited times.

MUSIC 122A. Piano Literature. 2 Units.
Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.
Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.
Restriction: Music and Music Performance majors only. Upper-division students only.
MUSIC 122B. Piano Literature. 2 Units.
Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 122C. Piano Literature. 2 Units.
Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 126. Piano Pedagogy. 2 Units.
The materials and methods of piano instruction are examined and evaluated.

Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 131. Post-Tonal Theory. 4 Units.
Significant harmonic, rhythmic, and structural practices since 1900. Analysis and written work exploring free atonality and serialism; neo-tonal practices such as use of extended tertian harmonies, modalism, pandiatonicism, and non-tertian harmonies; structural principles such as aleatory, metric modulation and minimalism.

Prerequisite: MUSIC 16D.
Restriction: Music and Music Performance majors only.

MUSIC 132. Jazz Theory. 4 Units.
Study of jazz harmony and melody construction in improvisation. Covered topics include terminology, chord symbols, notation, voicings, and scales as commonly used in jazz and popular music. Issues regarding tonality and ramifications of the blue scale are also examined.

Prerequisite: MUSIC 16D.
Restriction: Music and Music Performance majors only.

MUSIC 136. Instrumentation. 4 Units.
Ranges and capabilities of modern orchestral instruments. Exercise in writing for various combinations of wind, string, and percussion instruments and for full orchestra.

Prerequisite: MUSIC 16C.
Restriction: Music and Music Performance majors only.

MUSIC 140. Studies in Medieval Music. 4 Units.
Topics in Medieval Music.

Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 141. Studies in Renaissance Music. 4 Units.
Topics in Renaissance Music.

Prerequisite: MUSIC 40B.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.
MUSIC 142. Studies in Baroque Music. 4 Units.
Topics in Baroque Music.

Prerequisite: MUSIC 40B.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 142W. Studies in Baroque Music. 4 Units.
Topics in Baroque Music.

Prerequisite: MUSIC 40B. Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only.

MUSIC 143. Studies in Classical Music. 4 Units.
Topics in Classical Music.

Prerequisite: MUSIC 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 143W. Studies in Classical Music. 4 Units.
Topics in Classical Music.

Prerequisite: MUSIC 40C or equivalent. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only.

MUSIC 144. Studies in Romantic Music. 4 Units.
Topics in Romantic Music.

Prerequisite: MUSIC 40C.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 144W. Studies in Romantic Music. 4 Units.
Topics in Romantic Music.

Prerequisite: MUSIC 40C or equivalent.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only.

MUSIC 145. Studies in Twentieth-Century Music. 4 Units.
Topics in Twentieth-Century Music.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only. Upper-division majors only.
MUSIC 145W. Studies in Twentieth-Century Music. 4 Units.
Topics in Twentieth-Century Music.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music and Music Performance majors only. Upper-division only.

MUSIC 146. Studies in Jazz Music. 4 Units.
Topics in Jazz Music.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 147. Studies in Music Technology. 4 Units.
Specialized topics in electronic music, computer-aided music, and other aspects of music technology.
Repeatability: May be taken for credit 2 times as topics vary.

MUSIC 148. Studies in Ethnomusicology. 4 Units.
Topics in Ethnomusicology.
Repeatability: May be taken for credit 2 times.
Restriction: Music majors and Music Performance majors only.

MUSIC 149. Studies in Music History. 4 Units.
Specialized topics in musical genres; culture and social issues; performance practices; and interrelated arts.
Prerequisite: MUSIC 40B and MUSIC 40C and MUSIC 40D. Satisfactory completion of the lower-division writing requirement.
Repeatability: May be taken for credit 3 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 150. Composition. 4 Units.
Exercises and projects for diverse instrumental-vocal combinations; contemporary techniques and problems. Participation in the improvisation ensemble and working with electronic media.
Prerequisite: MUSIC 16C.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors only.

MUSIC 151. Computer Music Composition. 4 Units.
Exercises in the composition of music uniquely possible by computer, including digital signal processing, computer control of synthesizers and processors, and algorithmic composition. Demonstrations and musical analyses in class; considerable studio work outside class.
Prerequisite: MUSIC 51.

MUSIC 152. Interactive Arts Programming. 4 Units.
Study of artistic issues and programming techniques involved in the development of interactive computer art and music. Theoretical background, basic tenets of programming, and practical exercises in programming interactive computer multimedia art.
Prerequisite: MUSIC 51 or ART 65A or DANCE 163.

MUSIC 155. Analysis. 4 Units.
Methods of formal analysis applicable to all Western musical styles: additive, continuous, transformational, and hierarchic forms; rhythm, texture, and sonority as form and process.
Prerequisite: MUSIC 16D.
Restriction: Music and Music Performance majors only.
MUSIC 156A. Song Literature. 2 Units.
A survey of song literature. Designed as an overview of the song repertoire, German Lieder.
Restriction: Music and Music Performance majors only.

MUSIC 156B. Song Literature. 2 Units.
A survey of song literature. Designed as an overview of the song repertoire, French mélodie.
Restriction: Music and Music Performance majors only.

MUSIC 157. Advanced Study in Composition. 4 Units.
Individual weekly lessons in composition.
Prerequisite: MUSIC 150.
Repeatability: May be taken for credit 6 times.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 158A. Diction. 2 Units.
In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. Introduction to IPA and Italian Diction.
Restriction: Music and Music Performance majors only.

MUSIC 158B. Diction. 2 Units.
In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. German Diction.
Prerequisite: MUSIC 158A.
Restriction: Music and Music Performance majors only.

MUSIC 158C. Diction. 2 Units.
In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. French Diction.
Prerequisite: MUSIC 158A and MUSIC 158B.
Restriction: Music and Music Performance majors only.

MUSIC 159. Vocal Pedagogy. 2 Units.
Survey about the physical structure of the singing mechanism, science and philosophy of studio instruction.
Restriction: Music and Music Performance majors only.

MUSIC 160. University Orchestra. 2 Units.
Study and performance of standard orchestral repertory and works by contemporary composers. Membership is open to all qualified students by audition only.
Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

MUSIC 161. Wind Ensemble. 2 Units.
Study and performance of works written for varying combinations of wind and percussion instruments. Membership is open to all qualified students by audition only.
Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

MUSIC 162. University Chorus. 2 Units.
Make-up of the ensembles varies and may include University Chorus, Chamber Choir, Madrigal Singers, Women's Chorus, and Reading Choir. Membership is open to all qualified students by audition only.
Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.
MUSIC 162L. Basic Voice Lab. 1 Unit.
Vocal technique and musicianship for selected singers in UCI’s choral organizations.
Corequisite: MUSIC 162.
Repeatability: May be repeated for credit unlimited times.
Restriction: Not open to Music majors.

MUSIC 162P. University Chorus: Accompanying. 2 Units.
Keyboard accompanying for one of the UCI choral organizations, with individual coaching in sight reading, score reading, and other accompanying skills.
Repeatability: May be taken for credit 12 times.

MUSIC 164. Opera Workshop. 2-4 Units.
Preparation and performance of operatic repertoire, including arias, scenes, and fully staged operas, and/or stage training and role analysis.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors only.

MUSIC 164P. Opera Workshop: Accompanying. 2-4 Units.
Training in techniques and operatic repertory for keyboard players.
Repeatability: May be repeated for credit unlimited times.

MUSIC 165. Piano for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 166. Strings for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 166P. String Accompaniment. 2 Units.
Chamber ensemble experience with the solo string repertory for keyboard, participation in the weekly string master class, performance in public recitals.
Repeatability: May be taken for credit 3 times.

MUSIC 167. Winds for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 168. Voice for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 169. Percussion for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.
MUSIC 170. Guitar, Lute, and Other Plucked Instruments for Music Performance Majors. 4 Units.
Private weekly lessons and a weekly master class/workshop for the discussion of solo repertory and performance practice, including special topics such as historical notational systems, traditional American guitar styles, and demonstrations of period plucked instruments. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 171. Chamber Singers. 2 Units.
A select ensemble specializing in vocal chamber music from all periods. Frequent performances on and off campus. Membership is open to all singers by audition.
Repeatability: May be repeated for credit unlimited times.

MUSIC 172. Men in Blaque. 2 Units.
Men's chamber choir studying and performing music in original SATB and TTBB voicing. Gregorian chant, Renaissance motets and masses, part-songs from the Romantic era by Schubert and Schumann, folksongs, spirituals, jazz and contemporary literature comprises majority of repertoire.
Repeatability: May be taken for credit 12 times.

MUSIC 176. Chamber Ensembles. 2 Units.
Make-up of the ensembles varies and may include various Classical ensembles, Latin Jazz Ensemble, Small Jazz Combos, Percussion Ensemble, and Guitar Ensemble. Membership is open to all qualified students by audition only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors have first consideration for enrollment.

MUSIC 180. Music Criticism. 4 Units.
Topics in Music Criticism.
Repeatability: Unlimited as topics vary.
Restriction: Music and Music Performance majors only.

MUSIC 180A. Music and Material Culture. 4 Units.
Examines the cultural value of secular music objects such as scores, musical instruments, and cassette tapes beyond the period of their use. "Biographies" of not-sounding musical objects trace the changing social contexts in which they survived.
Prerequisite: Satisfactory completion of the lower-division writing requirement.

MUSIC 180AW. Music and Material Culture. 4 Units.
Examines the cultural value of secular music objects such as scores, musical instruments, and cassette tapes beyond the period of their use. "Biographies" of not-sounding musical objects trace the changing social contexts in which they survived.
Prerequisite: Satisfactory completion of the lower-division writing requirement.

MUSIC 180W. Music Criticism. 4 Units.
Topics in Music Criticism.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Music and Music Performance majors only.
MUSIC 181. Improvisation. 4 Units.
Improvisation has been central to all music traditions. Course explores real-time music-making in a variety of non-notated contexts. Different improvisational styles are presented, including jazz, Asian improvisation, and experimental modern music. Emphasis on actual classroom performance.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 182. Advanced Jazz Combo. 2 Units.
Small-group jazz ensemble and improvisational workshop. Range of music covered encompasses the full traditional jazz from improvised ragtime up through the most current avant-garde musical techniques.

Repeatability: May be repeated for credit unlimited times.

MUSIC 183A. Jazz Composition. 4 Units.
Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Cyclical forms, modal compositions, blues-oriented compositions, ballad writing.

Prerequisite: MUSIC 78 and MUSIC 132.

Restriction: Music and Music Performance majors only.

MUSIC 183B. Jazz Composition. 4 Units.
Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Non-functional harmony, contemporary forms, free-bop, and current trends.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A.

Restriction: Music and Music Performance majors only.

MUSIC 183C. Jazz Composition. 4 Units.
Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Study of modern tonal-center compositions, intervallic compositions, and alternate rhythms.

Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A and MUSIC 183B.

Restriction: Music and Music Performance majors only.

MUSIC 189. Accompanying for Plucked Strings: Continuo and Changes. 2 Units.
Students apply theory to their instruments as they learn the basics of pre-1800 continuo playing and post-1900 jazz charts. Includes discussions of appropriate repertory, treatment of harmonic progressions, and finer points of style and technique.

Prerequisite: MUSIC 16C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 191. Tutorial in Music. 1-4 Units.
Independent supplemental instruction related to student’s area of study.

Repeatability: May be repeated for credit unlimited times.

MUSIC 193. Conducting. 4 Units.
Introduces students to the basic techniques employed in the practice of conducting and includes score study and development of leadership skills.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C.

Restriction: Music and Music Performance majors only.
MUSIC 195A. Senior Thesis. 2 Units.
With consultation in regularly scheduled meetings, students identify and study relevant texts and materials and prepare a prospectus for an original thesis.

Prerequisite: Senior standing in the Honors Program in Music and Culture.

Grading Option: In progress only.

Restriction: Music and Music Performance majors only.

MUSIC 195B. Senior Thesis. 2 Units.
Students submit an outline and preliminary drafts of section of their thesis to the instructor, on a schedule supervised by the instructor. The final version will address the instructor's comments and criticisms.

Prerequisite: MUSIC 195A.

Restriction: Music and Music Performance majors only.

MUSIC 197. Word and Music. 2 Units.
Performance class for advanced singers and pianists with emphasis on collaborative approach to vocal literature.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 199. Independent Study. 2 Units.
Research, writing, or composition work, under the guidance of a faculty member.

Repeatability: May be taken for credit 2 times.

Restriction: Music and Music Performance majors only.

MUSIC 200. Bibliography and Research. 4 Units.
Required of all entering students. A systematic introduction to the bibliographical tools both in the general field of music and in the student's areas of specialization.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 201. Topics in Analysis. 4 Units.
Seminar focusing on different analytical methods, modal, tonal, and post-tonal, and their applications to repertories drawn from various historical periods through to the present day.

Prerequisite: Placement into MUSIC 201.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 203. Music Thesis. 4 Units.
Intensive work dedicated to researching and writing a Master's thesis under the supervision of a faculty advisor.

Prerequisite: MUSIC 200.

Repeatability: May be repeated for credit unlimited times.

Restriction: M.F.A. students in Musicology only.

MUSIC 209. Seminar in Creative Practices. 4 Units.
Core first-year seminar required for graduate students in the Integrated Composition, Improvisation, and Technology emphasis of the M.A. and Ph.D. programs. Composition and presentation of original student works, lecture, and discussion.

Repeatability: May be taken for credit 3 times.

Restriction: Music graduate students only.
MUSIC 210. Choral Conducting . 4 Units.
Intensive private instruction and study of the various choral literatures.
Repeatability: May be taken for credit 6 times.
Restriction: Music graduate students only.

MUSIC 211. Performance . 4 Units.
Contents vary according to the student's major instrument. Intensive private instruction and study of the various literatures.
Repeatability: May be taken for credit 6 times.
Restriction: Music graduate students only.

MUSIC 212. Composition. 4 Units.
Intensive work in composition geared to each student's level of competence.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music graduate students only.

MUSIC 213. Orchestral Conducting. 4 Units.
Intensive private instruction in instrumental conducting.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music graduate students only.

MUSIC 214. Graduate Recital.
Performance of public recital.
Repeatability: May be taken for credit 2 times.
Restriction: Music graduate students only.

MUSIC 215A. Computer Music Composition and Production. 4 Units.
Study of the composition and production of music made uniquely possible by the computer, including usage of prevalent digital music technology, techniques of digital signal processing, and computer control of synthesizers and audio processors.
Restriction: Music graduate students only.

MUSIC 215B. Computer Music Programming. 4 Units.
Study of the artistic issues and programming techniques involved in the development of original applications for computer music composition and interactive performance.
Restriction: Music graduate students only.

MUSIC 220. Seminar in Music History. 4 Units.
Topics in Music History.
Repeatability: Unlimited as topics vary.
Restriction: Music graduate students only.

MUSIC 230. Seminar in Contemporary Music. 4 Units.
Special seminar projects dealing with contemporary music with emphasis on analytical techniques and style criticism.
Repeatability: Unlimited as topics vary.
Restriction: Music graduate students only.

MUSIC 231. Improvisation. 4 Units.
Introduces the practice and history of improvisation in diverse fields of Western music since 1950. Performance projects and group critiques, weekly reading and listening assignments, participation in a class concert, and a research paper.
Restriction: Music graduate students only.
MUSIC 235. Critical Studies in Music. 4 Units.
A critical examination of Western music traditions, institutions, and aesthetics, employing new scholarship in music and new critical studies in other disciplines.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 236. Theoretical ICIT Seminar. 4 Units.
Seminar studying new genres and topics that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 237. Practical ICIT Seminar. 4 Units.
Study of new practices and techniques that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 239. Thesis Colloquium. 1-2 Units.
ICIT students present their thesis work-in-progress for discussion and criticism. Faculty and visiting artists/scholars also present their current work.

Repeatability: May be taken for credit for 8 units.

Restriction: Music graduate students only.

MUSIC 240. Graduate Projects . 4 Units.
Substantial projects in performance, conducting, or composition (other than those specifically required for the degree), accompanied by a summary paper.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 250. Directed Reading. 4 Units.
Individual research projects, resulting in the writing of a substantial paper pertaining to the principal area of concentration.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 276. Graduate Ensemble . 2 Units.
Chamber ensemble for the performance of contemporary music, including newly composed and improvised forms.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Art

Kevin Appel, Department Chair
3229 Art, Culture and Technology Building
949-824-6648
http://art.arts.uci.edu/
Overview

The Department of Art in the Claire Trevor School of the Arts takes a wide-ranging, interdisciplinary view of contemporary art practice. With an emphasis on experimentation and innovation, the Department of Art is viewed as a leader in genres addressing cultural identity and emerging technologies. The Department provides students a solid theoretical and technical foundation from which to approach art making as both process and product. Each student is encouraged to develop an individual, disciplined direction approach to media, materials, and techniques. To this end, the curriculum provides studio experiences in drawing, painting, sculpture, photography, digital imaging, video, performance art, and new media. Visiting artists, theorists, curators, and other arts professionals are an integral part of the program.

Requirements for the B.A. Degree in Art

All students must meet the University Requirements.

School Requirements: None.

Departmental Requirements for the Major in Art

A. Complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 1A</td>
<td>Art in Context: History, Theory, and Practice</td>
</tr>
<tr>
<td>ART 1B</td>
<td>Art in Context: History, Theory, and Practice</td>

Additional Information

Honors in Art

The Honors in Art program gives qualifying students a more rigorous course of study in contemporary art practices, thus challenging superior students beyond the scholarly requirements demanded of the Art major. This program is designed to further develop students’ critical, analytical, research, and technical skills. It is particularly suited to those wishing to go on to graduate school and/or exhibition careers.

Eligibility Requirements

1. One year in good standing as an Art major;
2. An overall GPA of 3.2 or higher with a GPA of at least 3.4 in ART courses.
3. Completion of:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 1A</td>
<td>Art in Context: History, Theory, and Practice</td>
</tr>
<tr>
<td>ART 1B</td>
<td>Art in Context: History, Theory, and Practice</td>
</tr>
<tr>
<td>ART 1C</td>
<td>Art in Context: History, Theory, and Practice</td>
</tr>
<tr>
<td>Four lower-division courses selected from ART 20–99</td>
<td></td>
</tr>
<tr>
<td>One Art History course from either the ART HIS 40 or 42 series.</td>
<td></td>
</tr>
</tbody>
</table>

**Application Deadline**
The annual application deadline is May 15. Late applications will not be accepted.

**Application Requirements**
All applicants must upload the following at https://ctsa.slideroom.com. There is a fee associated with submission of materials via Slideroom.

1. A portfolio of up to 10 images and/or other media samples. Images/media samples must include title of the work, size, year, medium, description, and duration of the work, if time-based.
2. A brief statement (250 words maximum) of research and career goals; and
3. UCI transcript (downloadable from StudentAccess).

The applicant's name, UCI student ID number, and email address must be printed legibly on all submitted materials.

All applicants will be notified of their application status no later than the end of spring quarter finals week.

Students accepted to the program will share the Catherine Lord Undergraduate Honors Studio for the entire academic year. Students accepted to the program must actively participate in programmatic activities. Students must follow the Department's studio occupancy guidelines in order to maintain their studios. GPAs will be reviewed each quarter to ensure programmatic requirements.

Beyond fulfilling regular courses for the Art major, honors students must take the following:

Select two additional courses from the following: ART 100–191, 199;
Select one ART HIST course of the student's choosing; and
Complete ART 198.

Honors Exhibition ART 198 (this course will prepare students for a mandatory, group interdisciplinary honors gallery exhibition to take place during either winter or spring quarter of the student's matriculating year, at which time students will defend their thesis work to faculty on the Undergraduate Committee).

Non-compliance with any of the requirements will result in dismissal from the program.

NOTE: Students may be assessed a course materials fee for certain courses. Consult the online Schedule of Classes on the University Registrar's website (http://www.reg.uci.edu) for the most up-to-date information about which courses require a materials fee and the amount of the fee.

**Careers for the Art Major**
Departmental faculty and the range of artists whose work is represented in the University Art Gallery exhibitions provide diverse career models. Some graduates go on to careers as exhibiting artists or teachers; others work in arts-related activities in museums, galleries, and artists' organizations. A bachelor's degree in Art is usually required as preparation for graduate-level study in Art.

**Minor in Digital Arts**
Jesse C. Jackson, Director

The minor in Digital Arts provides opportunities to explore creativity through digital media arts. This program is open to students from all areas of UCI who want to acquire a working knowledge of how digital media content is conceived, constructed, and performed. In the studio, students receive hands-on experience with current software tools, creating and sharing digital media art projects, developing an appreciation of digital media aesthetics and conceptual design, and learning the fundamentals of desktop video, audio, and Web authoring software applications. Lectures and discussions examine how today's pervasive digital culture evolves through interdisciplinary collaborations among artists, engineers, scientists, and scholars. Course work considers relationships between digital media practices, touching on such areas as social networking, video/audio podcasting, interface design, digital music, telematic performance, intelligent agents, virtual realities, artificial life, and ubiquitous computing. The program investigates critical issues related to emerging technologies and the arts, and surveys recent works by leading digital media artists.
Prospective students should have basic proficiency with Web, email, word processing, and presentation software. It is highly recommended that students have their own computer. Further information is available at the Digital Arts Minor website (http://sites.uci.edu/elad/minor).

Requirements for the Minor in Digital Arts
The minor in Digital Arts consists of a minimum of eight courses which fall into two categories: A. Required and B. Elective.

A. Complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 1</td>
<td>ArtsCore</td>
</tr>
<tr>
<td>ART 12A</td>
<td>Art, Design, and Electronic Culture</td>
</tr>
<tr>
<td>ART 12B</td>
<td>Art, Science and Society: Steam to Steampunk</td>
</tr>
<tr>
<td>ART 50A</td>
<td>Matter and Media</td>
</tr>
<tr>
<td>ART 50B</td>
<td>Interaction and Experience</td>
</tr>
<tr>
<td>ART 50C</td>
<td>Digital Media: Interaction Design</td>
</tr>
</tbody>
</table>

B. Select two of the following

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ART 65A</td>
<td>Foundations in Media Design</td>
</tr>
<tr>
<td>ART 65B</td>
<td>Foundations in Internet Art and Design</td>
</tr>
<tr>
<td>ART 81A</td>
<td>Digital Filmmaking Production I</td>
</tr>
<tr>
<td>ART 81B</td>
<td>Digital Filmmaking Production II</td>
</tr>
<tr>
<td>ART 100</td>
<td>Special Topics in Art</td>
</tr>
<tr>
<td>ART 106A</td>
<td>Programming for Artists</td>
</tr>
<tr>
<td>ART 106B</td>
<td>Game Studies</td>
</tr>
<tr>
<td>ART 106C</td>
<td>Design for Print</td>
</tr>
<tr>
<td>ART 143</td>
<td>Projects in Computer Painting</td>
</tr>
<tr>
<td>ARTS 75</td>
<td>Digital Media: Exhibition</td>
</tr>
<tr>
<td>DANCE 163</td>
<td>Dance and Video Technology</td>
</tr>
<tr>
<td>DANCE 164</td>
<td>Screendance</td>
</tr>
<tr>
<td>MUSIC 51</td>
<td>Music Technology and Computers</td>
</tr>
<tr>
<td>MUSIC 147</td>
<td>Studies in Music Technology</td>
</tr>
<tr>
<td>MUSIC 151</td>
<td>Computer Music Composition</td>
</tr>
<tr>
<td>MUSIC 152</td>
<td>Interactive Arts Programming</td>
</tr>
</tbody>
</table>

Each of these courses may be taken one time only for credit toward the minor (with the exception of topics vary courses, e.g., ART 100). No course in the requirements for the minor may be taken Pass/Not Pass.

Minor in Digital Filmmaking
Bruce Yonemoto, Director

The minor in Digital Filmmaking in the Claire Trevor School of the Arts provides opportunities to explore creative digital film production techniques and structures basic to the creation of new film works. Undergraduate students from all areas of UCI will have the opportunity to produce digital film works with content that contributes to the future of film as an art form.

Through the minor in Digital Filmmaking students will learn how traditional production techniques create content through form. Theories of studio production and art film history will inform the production of new narrative, documentary, fictional, and experimental film works. Students will learn to produce films which will lend themselves to emerging distribution platforms. The future of film as an art form depends on students to learn traditional as well as experimental components of structure and content. In the studio, students will acquire advanced skills in camera, lighting, sound, re-production, and post-production. Through issues and projects courses the program investigates experimental techniques developed by historical and contemporary film artists.

Application
Application to the Minor in Digital Filmmaking is open to all undergraduate UCI students. There are no restrictions based on major or level. Admission is on a competitive basis and students must submit an online application with a statement of purpose and links to online work samples. A limited number of students are admitted to the minor on a quarterly basis. The quarterly deadline is Friday, Week 3 by 5:00 p.m. Applicants that meet the deadline will be notified of their admission status via email by Week 7. Interested students are encouraged to obtain further information from the Digital Filmmaking website (http://digifilmuci.com). Course Materials fees are required for all courses in the Minor.

Master of Fine Arts Program

General Information and General Degree Requirements

The program is designed to provide intensive professional training for independently motivated students wishing to pursue careers in the field of contemporary art. The overall emphasis in the program is on studio production. Experimental and interdisciplinary approaches to art making are emphasized. Students undergo a rigorous course of study combining seminar classes, intensive critique courses, and independent study.

Topic-based seminars cover a range of critical issues dealing with the relationship of culture to contemporary art and are designed for students interested in positioning their art practices within an interdisciplinary discursive framework. All incoming students must take the First-Year Graduate Seminar in preparation for further course work. As students progress in the program, they are required to take a series of additional seminars aimed at training them to develop research skills and a written component augmenting their culminating thesis exhibitions. Various approaches to developing text and word are considered, and students are encouraged to approach developing the thesis textual component following a path best suited to their postgraduate interests (e.g., critical writing, spoken word/performance, critical memoir, digital narrative structures).

Throughout a three-year residence, students take a series of critique seminars in which work-in-progress is intensively discussed within a group context. Each quarter, students also meet, on an independent basis, with faculty of their choice. Students are encouraged to work with a range of faculty members. Towards the end of the second year, students select a thesis committee with whom they will work closely on the development of a thesis exhibition in their third year. After selecting a thesis committee, a student may continue to work with a range of faculty, either independently or in a critique seminar, to continue to explore a diversity of ideas and differing approaches to both studio production and art distribution systems.

During the first two years, students are required to take courses from a structured curriculum totaling a minimum of 12 units each quarter. Beyond that, students can select additional course work from any sector of the department or University including approved upper-division undergraduate courses. The third year is structured so that students can individualize their course of study through a wide selection of classes. For example, students wishing to focus primarily on studio production can do so through a combination of independent studies and critique classes, or students can design their third year to focus on both studio production and acquire additional course work in a given research area or graduate emphasis.

In addition to the graduate degree in Art, several emphases offered by the University are available to M.F.A. students. They include, but are not limited to, emphases in Visual Studies, Critical Theory, Feminist Studies, and Asian American Studies (refer to the Visual Studies, Critical Theory Emphasis, Department of Gender and Sexuality Studies, or the Department of Asian American Studies sections of the Catalogue for information).

Throughout the first two years, students must also undergo a series of progress checks including open studio reviews and a second-year exhibition where they are evaluated by faculty committees. Satisfactory opinion by these committees, coupled with both satisfactory independent study evaluations and grades of at least a B or above, will allow the student to progress to candidacy for the degree. During the third year, candidates must
mount a thesis exhibition. In tandem with the final thesis exhibition, students are required to do a presentation on their work as part of the final defense before their thesis committee. The normal time to degree for students in the M.F.A. program is three years. Residence is required.

Each M.F.A. candidate is provided with an individual or shared studio space. Facilities include photography laboratories (analog and digital), video production studios, data laboratories, and sculpture laboratories for work in wood and metal. There are also facilities to support work in digital media, painting, performance, drawing, and ceramics. Students have regular opportunities to exhibit in three galleries.

Various programs of visiting artists and lecturers are an integral part of the student experience. Visiting artists, curators, critics, and gallerists are invited to give lectures and conduct studio visits with graduate students. Some Art faculty, in addition to their departmental appointment, are affiliated with other UCI and UC programs, e.g., Asian American Studies, African American Studies, Gender and Sexuality Studies, Engineering, Information and Computer Science, Critical Theory Emphasis, Visual Studies, Calit2 Gaming Studies Initiative, Center for Law, Society and Culture, Center for Asian Studies, Center for Global Peace and Conflict Studies, and the UC Institute for Research in the Arts (UCIRA).

**Admission**

Applicants for admission to the M.F.A. program must meet the general requirements for admission to graduate study, hold a B.A. or B.F.A. in Art, have completed one year of Twentieth-Century Art History (students who have not completed this will be required to do so as part of their graduate studies).

**HOW TO APPLY**

1. Complete the Online Application for Graduate Admissions (http://www.grad.uci.edu), which includes submission of a **Statement of Purpose** and three (3) **letters of recommendations** (recommenders must submit letters via online application).

2. Submit a **portfolio** of 20 images and/or other media samples, to be uploaded at https://ctsa.slideroom.com. Images must include title of the work, size, year, medium, description, and duration of the work, if time-based. Slideroom will ask for a “student number;” please enter the application number given to you when you apply online,

3. One copy of **transcripts** from the Undergraduate institution(s) attended by the applicant. Undergraduate institutions must send transcripts directly to:

   **University of California, Irvine**
   Art Department
   3229 Art Culture and Technology
   Irvine, CA 92697-2775
   Attn: Graduate Application

**ALL PARTS OF THE APPLICATION MUST BE SUBMITTED BY JANUARY 15; THERE IS NO GRACE PERIOD.**

**Specific Degree Requirements**

One hundred and eight units over a three-year course of study are required. Residency is required. Students must take a minimum of 12 units per quarter.

Two courses selected from the following:
Master of Fine Arts with a Concentration in Critical and Curatorial Studies Program

The M.F.A. in Art with a concentration in Critical and Curatorial Studies trains the student to enter the interdisciplinary field of contemporary art. Upon graduating, the student will be well versed in debates that define art and visual culture from modernism to the present, capable of conceiving new models of contemporary exhibition and criticism, and expertly trained to execute professional, innovative projects in the field. The University Art Gallery plays a prominent role in the curriculum, serving as a “laboratory” for cultural research conducted by the Critical and Curatorial students. This concentration has a core faculty in the Departments of Art, Art History, Film and Media Studies, Comparative Literature, and the program in Visual Studies, who advise the student in the research and production of their final M.F.A. exhibition and accompanying publication. A written Master’s thesis is also required.

Admission

Applicants for admission to the M.F.A. program must meet the general requirements for admission to graduate study, hold a B.A. or B.F.A., and have completed one year of Twentieth-Century Art History (students who have not completed this will be required to do so as part of their graduate studies).

HOW TO APPLY

1. Complete the Online Application for Graduate Admissions (http://www.grad.uci.edu).

2. In addition, applications to the M.F.A. in Art with a Concentration in Critical & Curatorial Studies must include the following:

   - Letter of Intent (sent directly to the Department). The Letter of Intent should address the seriousness of applicants’ intentions, experience, and motivation to enter the Critical & Curatorial Studies program. Applicants must clearly state what they want to study and what their research focus will be. Applicants must further summarize their college and/or professional experience, and conclude with what intellectual and professional contributions they wish to make in their fields of study upon completion of the degree. Length: 1000 words.

   - Writing Sample (sent directly to the Department). The Writing Sample allows the admissions committee to access applicants’ ability to craft an argument that is founded upon thorough research of a given topic. It may be a publication; a college paper that reflects excellence in applicants’ field of study is also acceptable. Length: variable.

   - Proposed project (sent directly to the Department). Applicants should imagine what a final project might be in their final year of study in the program.

   - Three (3) letters of recommendation (via online application)

   - Transcripts (sent directly to the Department from the institution attended by the applicant).

All materials sent should include the applicant’s name and address. Materials that must be sent via mail directly to the Department, should be mailed to:

University of California, Irvine
Art Department
3229 Art Culture and Technology
Irvine, CA 92697-2775
Attn: Critical & Curatorial Application

ALL PARTS OF THE APPLICATION MUST BE SUBMITTED BY JANUARY 15; NO GRACE PERIOD.

NOTE: Students may be assessed a course materials fee for certain courses. Consult the online Schedule of Classes on the University Registrar’s website (http://www.reg.uci.edu) at for the most up-to-date information about which courses require a materials fee and the amount of the fee.

Faculty

Rhea Anastas, Ph.D. The Graduate Center of The City University of New York, Associate Professor of Art (20th century experimentalism in the visual arts, critical theory, cultural theory)

Kevin H. Appel, M.F.A. University of California, Los Angeles, Department Chair and Professor of Art (painting)

Juli C. Carson, Ph.D. Massachusetts Institute of Technology, Artistic Director of the University Art Galleries and Professor of Art (art history, critical theory, curatorial practice)

Miles C. Coolidge, M.F.A. California Institute of the Arts, Professor of Art (photography)

Tony Delap, Claremont Graduate University, Professor Emeritus of Art

Martha Gever, Ph.D. City College of the City University of New York, Professor Emerita of Art (history and criticism: video, media studies, popular culture)

Bryan Jackson, M.F.A. University of California, Los Angeles, Lecturer of Art (digital filmmaking)

Jesse C. Jackson, M.A. University of Toronto, Director of the Minor in Digital Arts and Assistant Professor of Art; Informatics

Ulysses S. Jenkins, M.F.A. Otis Art Institute, Professor of Art (video art production, performance art)

Antoinette Lafarge, M.F.A. School of Visual Arts, Professor of Art (digital media)

Simon Leung, B.A. University of California, Los Angeles, Professor of Art; Asian American Studies (new genres, critical theory, contemporary art history, performance)

Joseph S. Lewis, M.F.A. Maryland Institute College of Art, Professor of Art (public art)

Mara Jane Lonner, M.F.A. California Institute of the Arts, Lecturer with Security of Employment of Art (drawing, painting, 3D design)

Catherine B. Lord, M.F.A. State University of New York at Buffalo, Professor Emerita of Art (queer theory, feminism, photography)

Monica Majoli, M.F.A. University of California, Los Angeles, Professor of Art (painting)

Daniel J. Martinez, B.F.A. California Institute of the Arts, Claire Trevor Professor and Professor of Art (public art, sculpture, installation, performance)

Yong Soon Min, M.F.A. University of California, Berkeley, Professor Emerita of Art; Asian American Studies; Culture and Theory (minority, diasporic, and third cinemas; media, nationalism, and globalization; race, sexuality, and popular culture)

Gifford C. Myers, M.F.A. University of California, Irvine, Professor of Art (ceramics)

Deborah Oliver, M.F.A. California Institute of the Arts, Lecturer of Art (performance art, new genres)
Jennifer Pastor, M.F.A. University of California, Los Angeles, Professor of Art (sculpture)

Simon G. Penny, M.F.A. Hong Kong University of Science and Technology, Professor of Art: Informatics (informatics, robotic sculpture, interactive environments, electronic media)

Lita T. Perta, Ph.D. University of California, Berkeley, Assistant Professor of Art (art writing)

Yvonne Rainer, Claire Trevor Professor and Professor Emerita of Art (performance, dance, video)

William S. Roberts, M.F.A. California Institute of the Arts, Lecturer with Security of Employment of Art (photography)

Constance J. Samaras, M.F.A. Eastern Michigan University, Professor of Art; Culture and Theory (photography, intermedia, cultural criticism)

David K. Trend, Ph.D. Miami University, Department Chair and Executive Director of the University Art Galleries and Professor of Art (visual culture)

Bruce N. Yonemoto, M.F.A. Otis Art Institute, Professor of Art (video, experimental media, film theory)

Courses

ART 1A. Art in Context: History, Theory, and Practice. 4 Units.
First in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practices in relation to their twentieth-century cultural and historical antecedents. ART 1A deals specifically with contemporary painting and photography.
Restriction: Art majors have first consideration for enrollment.

(IV)

ART 1B. Art in Context: History, Theory, and Practice. 4 Units.
Deals with film/video/performance. Concerned with the development of modern/contemporary film, video, and performance, with a focus on experimental and avant-garde production from the early twentieth-century to today.
Restriction: Art majors have first consideration for enrollment.

(IV)

ART 1C. Art in Context: History, Theory, and Practice. 4 Units.
Third in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practice in relation to their twentieth-century cultural and historical antecedents. Deals specifically with space and cyberspace.
Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9A. Visual Culture: Media, Art, and Technology. 4 Units.
Examines creative activities in all spheres of life, including the “artistic” impulses that dwell in the individual. Culture is addressed in broad terms of the many institutions and cultural forces that shape everyday activities of listening, seeing, doing.
Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9B. Visual Culture: A Culture Divided. 4 Units.
Throughout the 1980s and 1990s controversies flourished in the mainstream media over purportedly obscene art, anti-American writing, and moral decay, among other issues. Examines these new conflicts as they manifest themselves in public life and everyday experience.
Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9C. Visual Culture: Thematic Investigations. 4 Units.
Considers a broad range of concerns and questions raised by various acts of appropriation in contemporary art and visual culture, such as originality, authenticity, authorship, translation, audience and aesthetics, temporal dimensions of a work, and context.
Restriction: Art majors have first consideration for enrollment.

(IV)
ART 11A. Topics in History of Contemporary Art. 4 Units.
Surveys mid-nineteenth and twentieth-century art production, from modernity through post-modernity, in a historical and cultural context.

Prerequisite: ART 9A.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Art majors only.

ART 11B. Media Art and Design History. 4 Units.
Survey of the roots of modern techno-media arts in both the history of visual arts and the history of devices such as automata, animatronics, robots, miniature theatres, optical machines, communications technologies, calculators, and computers.

Restriction: Art majors only.

ART 12A. Art, Design, and Electronic Culture. 4 Units.
Introduction to historical and theoretical foundations of digital media art, tracing how information technologies seeded growth of new expressive medium. Considers how today's pervasive digital culture evolved through interdisciplinary collaborations between artists, engineers, scientists, scholars. Course may be offered online.

(IV)

ART 12B. Art, Science and Society: Steam to Steampunk. 4 Units.
An overview of current practice and research in digital media art. Examines the effects of recent technological, scientific, cultural, and political developments. Addresses the increasing overlap of artistic and scientific practices and issues related to new and emerging technologies.

(IV)

ART 12C. Intelligences of Arts. 4 Units.
Introduces contemporary neuroscience and new approaches to cognition – embodied, enactive, extended, situated, distributed. Reviews the history of related ethological, biological, psychological, technological, and philosophical traditions. Considers arts and cultural practices from these and other perspectives, and considers case studies.

(III)

ART 20A. Basic Drawing I. 4 Units.
Encourages an investigation of the premises and limits of drawing, primarily, but not inevitably, as a two-dimensional medium. Includes slide presentations and discussions of the historical uses of a wide range of drawing.

Restriction: Art majors have first consideration for enrollment.

ART 20B. Basic Drawing II. 4 Units.
Continuation of the investigation initiated in ART 20A, with an emphasis on experimentation, personal investigation, and development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized.

Prerequisite: ART 20A or ART 20.

Restriction: Art majors have first consideration for enrollment.

ART 30A. Basic Painting I. 4 Units.
Examination of the fundamental components of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work.

Restriction: Art majors have first consideration for enrollment.

ART 30B. Basic Painting II. 4 Units.
Further examinations of the essential qualities of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work.

Prerequisite: ART 30A.

Restriction: Art majors have first consideration for enrollment.
ART 40. Basic Sculpture. 4 Units.
The practice of sculpture in the contemporary arts; inclusion of spatial interventions, site-specific and environmental design, appropriation of found materials; techniques in cutting joining, and assembly of wood, metals, and plastics. May include casting, welding, and ceramics. Materials fee.
Restriction: Art majors have first consideration for enrollment.

ART 50A. Matter and Media . 4 Units.
A project-based introduction to tools and approaches for creating and sharing digital media content within Internet-mediated social environments, with a particular emphasis on art-making and personal expression. Includes an overview of basic user experience and interaction design principles.

ART 50B. Interaction and Experience. 4 Units.
An overview of digital video and audio production for the Web, emphasizing art-making and personal expression. Includes digital media aesthetics and conceptual design, basic audio and video recording, and fundamentals of desktop video, audio, and Web authoring software applications.
Prerequisite: ART 50A.

ART 50C. Digital Media: Interaction Design. 4 Units.
Principles and practices of interaction design for interactive digital media systems that provide for active involvement of the participant. Students gain experience with interaction design issues through a series of media art projects, emphasizing art-making and personal expression.
Prerequisite: (ARTS 11 or ART 12A) and (ARTS 12 or ART 12B) and (ARTS 50 or ART 50A) and (ARTS 60 or ART 50B).

ART 51. Basic Ceramic Sculpture. 4 Units.
Exploration of use of clay as sculptural basis with an emphasis on development of an idea and its relation to contemporary and experimental art practice. Hand-building, glazing, finishing processes, and use of other structural materials. Materials fee.
Restriction: Art majors have first consideration for enrollment.

ART 65A. Foundations in Media Design. 4 Units.
Provides an overview of media design in the digital age, covering principles of design for different media (2D, time-based, interactive); history of relationship between art and design; and practice in working with different design approaches. Materials fee.
Restriction: Art majors have first consideration for enrollment.

ART 65B. Foundations in Internet Art and Design. 4 Units.
Introduction to creating art for the Internet, covering history and structure of networks; key types of net-based interactivity; basics of Web design and scripting. Materials fee.
Prerequisite: ART 65A. Recommended: ART 11B.
Restriction: Art majors have first consideration for enrollment.

ART 65C. Gizmology and Kinetics. 4 Units.
Provides students with basic skills in materials, construction and design applicable to making machines, musical instruments and things with moving parts enabling work in kinetic sculpture, custom interactive systems, Mechatronics, Robotics, and Maker/DIY culture. Materials fee.

ART 65E. Mechatronic Art I. 4 Units.
Introduces the practice and theory of analog electronics, emphasizing the design and development of simple interactive systems and the integration of such systems into real-world contexts of performance, installation, sculpture, and automated artifacts. Materials fee.

ART 71A. Introduction to Photography I. 4 Units.
Introduction to technical underpinnings emphasizing photography as a contemporary art practice. Topics include 35mm non-automatic camera operation, exposure and lighting, black and white printing, introduction to digital photography, discussion of critical and historical issues. Materials fee.
Restriction: Art majors have first consideration for enrollment.

ART 71B. Introduction to Photography II. 4 Units.
Techniques covered include medium and large format cameras, digital photography, studio lighting, digital and analog color printing, mural room. Conceptual direction is developed through critiques, critical readings, discussions, slide lectures. Materials fee.
Prerequisite: ART 71A.
Restriction: Art majors have first consideration for enrollment.
ART 81A. Digital Filmmaking Production I. 4 Units.
Introduction to three production stages of video making. Study of the narrative structure of cinema and acquisition of video production skills in camera, lighting, sound, and editing. Production work, readings, and screenings outside of class are assigned. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 81B. Digital Filmmaking Production II. 4 Units.
Focuses on video stage production, technical skills including camera operation, stage lighting, sound recording, and construction of basic scenic elements. Emphasis is placed on the function and responsibilities of the production crew and proper working and safety procedures. Materials fee.

Prerequisite: ART 81A.
Restriction: Art majors have first consideration for enrollment.

ART 91. Basic Performance Art. 4 Units.
Exploration of objects, gesture, action, text, image, and media to create narrative or non-narrative works. Elements of theory and history of performance art are discussed to illustrate techniques and styles to understand, identify, and articulate artistic vision and voice.

Repeatability: May be taken for credit 2 times.
Restriction: Art majors have first consideration for enrollment.

ART 95. SPECIAL TOPICS IN BASIC MEDIA. 4 Units.
Basic instruction in media or disciplines not otherwise represented in the regular curriculum. Topics vary according to the instructor.

Repeatability: Unlimited as topics vary.
Restriction: Art majors have first consideration for enrollment.

ART 100. Special Topics in Art. 4 Units.
Materials fee, topic dependent.
Prerequisite: ART 9A. Lower-division writing strongly recommended.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Art majors only.

ART 101W. Artists as Writers. 4 Units.
Contemporary art practice involves text, as final form or an integral element. Many contemporary artists consider writing as essential to their practice. Covers historical and contemporary uses of text and image as well as artists' writing.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the lower-division writing requirement.
Restriction: Art majors only.

ART 103. Intermediate Painting. 4 Units.
Continuation of the investigation initiated in basic painting, with an emphasis on experimentation, personal investigation, development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 30A and ART 30B.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 104. Intermediate Sculpture. 4 Units.
Investigation of three-dimensional space, including the construction of objects and the manipulation of the environment. Students define personal projects and translate personal, social, and political experience into visual meaning. Range of artists' works introduced. Group discussion and critiques. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 40.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.
ART 105. Intermediate Ceramic Sculpture. 4 Units.
Further investigation of the use of clay as a medium, with an emphasis on experimental practice and the relationship to contemporary visual art. Emphasizes discussion of ideas, and provides information on clay body, fabrication, glazing, and firing. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 51.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 106A. Programming for Artists. 4 Units.
Programming as a means to create interactive artworks with an emphasis on the integration of video, sound, text, and stills. Topics include basic concepts in programming, understanding the limits of code, working with video and audio files, interface design. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 106B. Game Studies. 4 Units.
Critical analysis of various genres of computer games and gaming theory and practice through playing, writing, and discussion. The focus is on creating a Design Document for the student's own gaming environment using gaming metaphors, design principles, and technologies. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art majors only.

ART 106C. Design for Print. 4 Units.
Investigates the use of print for communication as an artist. Covers the fundamentals of print design and output using digital media. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 107. Intermediate Projects in Photography. 4 Units.
Students begin learning how to develop photographic projects of their own making. Focuses on employing and expanding upon previously learned technical and critical skills specific to students’ individual interests and ideas. Critiques, readings, lectures, labs. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 108. Digital Filmmaking Project I. 4 Units.
Students learn to conceive, develop, and produce original video works building directly upon previously learned skills. Use of video stage and post-production editing facilities. Lectures on video/film subjects, production strategies, readings, screening, field trips, and group critiques. Materials fee.

Prerequisite: ART 81A and ART 81B.

Restriction: Art majors only.

ART 109. Performance and the Camera. 4 Units.
Surveys the development of contemporary artists who use performance strategies in the making of videos and films. Students analyze the artist's conceptual approach to performative gestures, actions, and landscapes created for their video or film art.

Prerequisite: ART 1B or ART 81A or ART 91 or ART 128.

Restriction: Art majors only.
ART 110B. Mechatronic Art II. 4 Units.
Introduces the practice and theory of embedded microcontrollers, digital electronics, coding, sensor interfacing, motor control and output stages along with mechanical and electromechanical design and construction, emphasizing the integration of such systems into real-world contexts of performance, installation, and art-making. Materials fee.
Prerequisite: ART 65E.

ART 110C. Mechatronic Art III. 4 Units.
As the capstone to the Mechatronic Art series, this course permits students to develop major projects utilizing electronics, microcontrollers, sensors, and electromechanical devices, in a methodical and supervised context, with technical, design, and aesthetic advice and critique. Materials fee.
Prerequisite: ART 65E.

ART 111. 3D Methods and Materials. 4 Units.
Presents a wide variety of concepts, materials, tools, and fabrication techniques vital to art production. Wood tools, clay, castable rubber, urethane foam, fiberglass, plaster, steel, and welding are introduced. Projects are based on conceptual problems incorporating these materials. Materials fee.
Prerequisite: ART 1A and ART 1B and ART 1C.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 117. Issues in Popular Culture. 4 Units.
In-depth investigation of the relationship between visual art practices and popular culture.
Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.
Repeatability: Unlimited as topics vary.
Restriction: Art majors only.

ART 119. Issues in Contemporary Painting. 4 Units.
Investigation of issues in modern and contemporary art work and criticism, wherein an assessment of Modernist influences is followed by the examination of contemporary painting as a cross-disciplinary practice employing popular culture, "high art," theory, and new technology.
Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 119A. Issues in Contemporary Drawing. 4 Units.
Investigation of drawing as a primary practice rather than a developmental tool. Explores the relationship between Conceptualism, process and content, and considers the historical changes in method, presentation, and theory, from past to present.
Prerequisite: ART 9A.

ART 120. Issues in Narrative. 4 Units.
Emphasizes the construction of narratives in different media--painting, photography, sculpture, video. Particular attention paid to the development of personal and community histories as a working base.
Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 121A. Afro-Futurism I. 4 Units.
First of a two-part course on the futuristic artistic vision of Black film, video, and cyberspace. Deals with critical analyses of the Black image in Western Art history, and its association to contemporary Hip Hop culture, art, and music.
Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.
Restriction: Art majors only.
ART 121B. Afro-Futurism II. 4 Units.
Second of a two-part course on the futuristic artistic visions of Black film, video, and cyberspace. Deals with modern techno-culture, digital activism, and designing technology based on African aesthetic principles of contemporary Hip Hop International Culture.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art majors only.

ART 125. Issues in Photography. 4 Units.
Rigorous investigation of photographic practices and critical writings, the relationship of photography to the construction and maintenance of cultural institutions, the circulation of photographic ideas in society, and photography and technology.

Prerequisite: ART 1A or ART 71A or ART 71B or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 190B. Recommended: satisfactory completion of the Upper-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 126. Issues in Media and Migration: Asia. 4 Units.
Media and migration are profound, twinned influences on contemporary globalized experience. A discourse on Asian cultural production and of its transnational dimensions. Students will explore migration in its multiple facets to include migrations of people, ideas, and technologies.

Prerequisite: ART 9A.

ART 126B. Issues in Techno-Arts. 4 Units.
Addresses issues related to artmaking practices that emerge in tandem with new technologies. Topics include sociopolitical contexts of techno-art; utopic/dystopic framings; key moments in the history of techno-arts.

Prerequisite: ART 9A. Recommended: ART 11B.

Restriction: Art majors only.

ART 127A. Issues in Video History and Criticism. 4 Units.
Investigation of historical development of video as artistic practice. Topics include relationships between art and video technology, critiques of television, experimentation with image processing/synthesis, performances designed for video, experiments in documentary representation, video installation. Readings and screenings assigned. Materials fee.

Prerequisite: ART 9A.

Restriction: Art majors only.

ART 127B. Issues in Experimental Film History. 4 Units.
A critical study of experimental film/video art genres and production techniques considering their narrative, structural, iconographic, and cultural aspects. Hollywood narrative, Nouvelle Vague, American Independent, and Video Art compared in terms of production innovation, design, and conceptual content. Materials fee.

Prerequisite: ART 9A.

Restriction: Art majors only.

ART 128. Issues in New Genres. 4 Units.
Investigates issues in post-studio practices, including concepts of time, relational aesthetics, site-specificity, institutional critique, and the post-medium condition.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 130B. Topics in Game Design. 4 Units.
Investigates interaction paradigms, game mechanics, game development processes, and methods for analysis and critique of games; and provides opportunities for experimental game design.

Prerequisite: ART 106B.

Restriction: Art majors only.
ART 131. Projects in Installation. 4 Units.
Investigates interior installation in particular spaces. Working in teams, students install, discuss, and remove projects. Technical information and hands-on experience with various media is provided. Materials fee.

Prerequisite: Art 40.

Repeatability: May be repeated for credit unlimited times.

ART 132A. Digital Filmmaking Pre-Production. 4 Units.
Examines the preparatory and planning stages of video production, including script writing, storyboarding, location scouting, script breakdown, and budgeting. Projects may encompass one or more of these stages which will be explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B.

Restriction: Art majors only.

ART 132B. Digital Filmmaking Post-Production. 4 Units.
Examines procedures and techniques utilized in video production after principal shooting is completed, including effects processing, composting, sound design, and DVD authoring. Projects focus on these processes, and are explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B.

Restriction: Art majors only.

ART 133. The Graphic Novel. 4 Units.
An intensive workshop during which students will create a short graphic novel, taking the process all the way from concept to publication. Course work will focus on understanding how narrative emerges from a combination of visual and textual elements.

Prerequisite: ART 65A. Strongly recommended: ART 106C.

ART 138. Place Making and Public Art. 4 Units.
How do art interventions in public spaces inform our definition of "place" and develop culturally informed audiences? Students will engage in class projects and group investigations that question the traditional and institutional conceptual boundaries of exhibition/distribution.

Prerequisite: ART 40 and ART 9A.

Restriction: Art majors only.

ART 141. Digital Filmmaking Advanced Project I. 4 Units.
Incorporating narrative structures in a multi-screen context. Students design and produce an active space in which activities will move from one screen to another. Materials fee.

Prerequisite: ART 81A and ART 81B.

Restriction: Art majors only.

ART 143. Projects in Computer Painting. 4 Units.
Study and utilization of the computer as a digital sketchbook and design tool for the creation of paintings. Discussion of the issues related to benefits and limitations of new technology in the art-making process.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 30A and ART 30B.

Restriction: Art majors only.

ART 144. Artist Books as Objects. 4 Units.
Are artist books still relevant in the contemporary creative community? Focusing on intellectual content and raw physicality, students will explore this question and image/text relationships by creating handmade one-of-a-kind or edition book projects utilizing various mechanical reproduction techniques.

Prerequisite: (ART 20A or ART 30A or ART 40 or ART 51 or ART 65A or ART 71A or ART 81A or ART 91) and ART 9A.

ART 146. The Artist Archives. 4 Units.
Addresses ways in which artistic production and archival practice intermingle and overlap. Examines critical works on the nature of knowledge and the archive, and uncovers methodologies of knowledge production and how these inform what we think of as art.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 9A and ART 11A.

Restriction: Art majors only.
ART 150. Advanced Studio Topics--Painting. 4 Units.
Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.
Prerequisite: ART 30B.
Repeatability: Unlimited as topics vary.
Restriction: Art majors only.

ART 150C. Advanced Drawing . 4 Units.
Advanced studio problems in visual exploration. Students pursue individual solutions to self-defined and presubscribed projects. Techniques/materials are individual choice. Continual analysis of the personal process.
Prerequisite: ART 20B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 150F. Advanced Figure Drawing. 4 Units.
Students develop technical skills in rendering the figure. Live model sessions and an introduction to anatomy. Investigates use of the figure in contemporary art. Materials fee.
Prerequisite: ART 20B.
Repeatability: May be taken for credit 2 times.
Restriction: Art majors only.

ART 151. Advanced Studio Topics--Sculpture. 4 Units.
Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.
Prerequisite: ART 40.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152A. Advanced Studio Topics: Photography. 4 Units.
Focused investigation of a range of issues in photographic practice, with an emphasis on developing individual student projects, refining critical thinking, and conceptual framing. Technical topics covered as required. Readings, lectures, critiques, labs. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152B. Documentary Photography. 4 Units.
Documentary practice is examined through the realization of photo-based projects. Thematic focus of student's choosing will be refined through lectures, discussion, technical demonstrations, field trips, labs, and individual meetings. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152C. The Public Image. 4 Units.
Strategies for artistic intervention in the public circulation of images are examined alongside the role images play in constructing public identity. Individual or collaborative student projects will be directed around course themes. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.
ART 152D. The Photographic Tableau. 4 Units.
Examines and develops photographic projects intended for traditional artistic venues (i.e., galleries and museums). In addition to exploring appropriate techniques and presentation strategies, students consider the interdependency between construction of images and semantic shaping of traditional art venues. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152E. The Constructed Image. 4 Units.
A studio investigation of theoretical ideas, critical possibilities, historical precedents, and various techniques involving the production of fabricated images. Techniques may include montage, digital, chemical and in-camera manipulations, studio constructions, appropriations, performance, and projected images. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 152F. Seminar Production Component. 4 Units.
Photographic and/or inter-media production course tied to a specific Issues course (for example, Issues in Photography, Issues in Feminism, Issues in New Genres). Critiques, labs, field trips, discussion, demonstrations. Materials fee.
Prerequisite: ART 71B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 153. Digital Filmmaking Advanced Project II. 4 Units.
Directed to the production of individual or collaborative videotapes, using studio, portable camera, editing facilities, and sound and computer elements. Emphasis will be on individually initiated projects. Readings and screenings are assigned. Materials fee.
Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.

ART 154. Advanced Studio Topics: Performance. 4 Units.
An intensive investigation of the practice of performance art, with an emphasis on the development of individual projects, and the refinement of various technical skills, as well as audiences, spaces, and cultural connections.
Prerequisite: ART 91 or ART 109.
Repeatability: May be taken for credit 3 times.
Restriction: Art majors only.

ART 156. Advanced Studio Topics: Ceramic Sculpture. 4 Units.
Discussion of ideas, techniques, and personal control of form. Clay body, fabrication, glazing, and firing. Emphasis on development of personal direction. Materials fee.
Prerequisite: ART 51.
Repeatability: May be repeated for credit unlimited times.
Restriction: Art majors only.

ART 166A. Digital Filmmaking Web Series. 4 Units.
Original video projects produced in collaborative teams combining advanced video students with students from other areas, including Dance, Drama, and Music. Shoots may be carried out on the video stage as well as field locations. Materials fee.
Prerequisite: ART 81A and ART 81B.
Restriction: Art majors only.
ART 170. Advanced Projects. 4 Units.
Students working in different mediums will focus on ambitious research, planning, development, and experimentation, leading to a single work or focused series that is large in scope. The project will be exhibited and documented at the end of the quarter.

Prerequisite: ART 150 or ART 150C or ART 151 or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 152F or ART 153 or ART 166A or ART 190 or ART 190B or ART 190C.

Restriction: Art majors only.

ART 189. Critical Aesthetics . 4 Units.
Surveys critical thought that has influenced twentieth-century art production, preparing the student to engage contemporary art with a critical eye, specifically addressing aesthetic and political debates of the historical avant-garde, the neo-avant garde, and postmodern culture.

Prerequisite: ART 1A and ART 1B and ART 1C.

Restriction: Upper-division students only. Art majors only.

ART 190. Senior Project and Critique. 4 Units.
Directed-study critique class in preparation for final project and life after graduation; documentation and portfolio preparation for graduate school. Investigation of exhibition spaces and funding opportunities, participation in artists' communities outside the university, and artists' rights issues.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art majors only.

ART 190B. Senior Projects and Critique in Photography. 4 Units.
Directed group study focused on production of photographic projects of significant scope and ambition. Emphasis on preparation for continued study and/or practice in photography in advanced settings beyond the undergraduate university experience. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art majors only.

ART 190C. Senior Projects and Critique in Video. 4 Units.
Directed group study focused on production and exhibition of individual video projects of significant scope and ambition. Emphasis is placed on critical evaluation. Assignments include work documentation, graduate school preparation, and investigation for future opportunities outside the University. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Seniors only. Art majors only.

ART 197. Art Internship. 1-4 Units.
Under faculty supervision, students participate directly in a variety of art institution settings, including museums, galleries, and nonprofit organizations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Juniors only.

ART 198. Honors Exhibition. 4 Units.
Preparation, installation, and participation in the annual honors exhibition. Materials fee.

Grading Option: Pass/no pass only.

Restriction: Juniors or seniors only. Art Honors students only.

ART 199. Independent Study. 1-4 Units.
Individual study or directed creative projects as arranged with faculty member. Materials fee.

Repeatability: May be repeated for credit unlimited times.
ART 210. First-Year Graduate Seminar. 4 Units.
Introductory theory class to contemporary art: intellectual history, theoretical antecedents, and current critical concerns.

Restriction: Graduate students only.

ART 211. Methods and Materials Workshop. 4 Units.
Comprised of a series of workshops introducing graduates to production and facilities in photography, video, digital media, and sculpture.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

ART 215. Graduate Seminar Topics. 4 Units.
In-depth discussion of contemporary art production in relation to a variety of theoretical, cultural, and historical topics. Material is determined by the given instructor's current research interest. Topics vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 220. Graduate Seminar: Issues in Contemporary Art. 4 Units.
Classroom interaction with artists, curators, critics, lecturers from fields outside of the arts or from cross-disciplines. Includes recommended readings, discussions, panel participation, writing assignments.

Prerequisite: ART 210.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

ART 230. Graduate Group Critique. 4 Units.
Focus on studio production. Students are expected to help foster and develop an environment in which serious and sophisticated peer critique can take place.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only.

ART 236. Graduate Topics in Studio Production. 4 Units.
Graduate group study of a specific medium or art practice (e.g., painting; video, installation, photography, sculpture/3D, performance, digital media, public art, sound art; film). Includes consideration of technical, theoretical, historical, and/or formal issues.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 240. Interdisciplinary Projects. 4 Units.
Intensive faculty-led discussion of in-progress graduate studio projects--can be discipline driven or working across fields in a rigorous interdisciplinary studio environment where students meet with the professor both individually and in small groups.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 250. Directed Reading and Research. 4 Units.
Independent study with a supervising faculty member to direct academic research, develop bibliographies, and discuss assigned readings.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 251. Special Topics Seminar. 4 Units.
Directed reading and/or study group on a given research topic. Agreed-upon meeting structure may be flexible in order to accommodate off-campus field trips and travel.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
ART 255. Graduate Interdisciplinary and Collaborative Projects. 4 Units.
For graduate students working collaboratively across the School of the Arts or cross-university. May be team taught with one of the faculty members based in the Department of Art.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 261. Graduate Thesis Writing Seminar. 4 Units.
Seminar for writing as a component of the thesis. Different models of writing, text, and spoken word will be discussed. Required second year.

Corequisite: ART 262.
Prerequisite: ART 210 and ART 215 and ART 220.

Restriction: Graduate students only.

ART 262. Graduate Thesis Independent Study. 1-4 Units.
Tutorials and directed study in thesis writing, research and/or studio production with thesis committee chair and/or thesis committee members to be taken during final quarters of study.

Corequisite: ART 261.
Prerequisite: ART 210 and ART 215 and ART 220.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 263. Graduate Thesis, Exhibition Critique. 4 Units.
Group critique required for matriculating M.F.A. students during the quarter in which their thesis exhibitions are scheduled. Public presentation/lecture on student's work required.

Prerequisite: ART 210 and ART 215 and ART 220 and ART 230 and ART 240 and ART 261 and ART 262.

Restriction: Graduate students only.

ART 264. Critical and Curatorial Thesis Exhibition. 8 Units.
Intensive tutorial geared toward execution of professional gallery exhibition, which is one half of the degree requirement for the M.F.A. concentration in Critical and Curatorial Studies. Must be taken under direction of Committee Chair.

ART 280. Contemporary Exhibition Systems. 4 Units.
Investigates contemporary case studies of curatorial practice. Sometimes taught in collaboration with a host institution. The history, theory and criticism or curatorial practice are tested through the explication of real exhibitions.

Prerequisite: ART 280A.

Repeatability: May be taken for credit 4 times.

ART 280A. Introduction to Exhibition Systems. 4 Units.
Introduces the basics of curating, covering the fundamentals of collection, research, fundraising, publicity, and installation. Also introduces the related categories of public programming and art criticism.

Restriction: M.F.A. students only.

ART 399. University Teaching. 4 Units.
Limited to Teaching Associates working under the active guidance and supervision of a regular rank faculty member responsible for curriculum and instruction at the University.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

Department of Dance

Lisa Naugle, Department Chair
300 Mesa Arts Building
949-824-7283
Overview
The Department of Dance fosters an educational environment in which performance opportunities, creative projects, and theoretical studies complement and reinforce each other, providing a foundation for careers in dance. The program focuses on the dance techniques of ballet, modern, jazz, tap, world dance, and dance and technology. Theoretical studies include dance history and theory; dance writing; Laban studies; dance pedagogy; dance ethnography; dance science; and aesthetics of digital media. Creative opportunities bridge the studio and theoretical work through performance and choreography for multiple contexts; creative applications of animation, motion capture, audio and video technologies; lecture demonstration; and critical, historical, ethnographical, and scientific writing.

The objective of studio work is to develop kinesthetic resources, precision, flexibility, creativity, and freedom in a coordinated and intelligently responsive dancer. The techniques of classical ballet, modern dance, and jazz constitute crafts and styles for the dancer that serve not only as a basis for the training of the body, but also as a basic language of movement for the choreographer.

The theoretical, historical, and scientific courses are designed both to broaden the perspective of those students whose first interest is performance or choreography, and to provide a foundation for those students who plan to pursue careers in the academic, scientific, technological, or administrative fields of dance.

The dance archives in the UCI Langson Library Special Collections offer a rich source of research materials which enhance the Dance program. Among other special holdings, the archives include the extensive Ruth Clark Lert collection of dance books, journals, photographs, original costume sketches, and memorabilia of dance in Europe and the United States from pre-World War I to the present.

The Undergraduate Program
The Bachelor of Arts (B.A.) is designed for those who wish to obtain a broad undergraduate background as preparation for careers or graduate work and related fields. It offers students a dance education that stresses performance and choreography, and, at the same time, intellectual depth and scope. In addition to the core, 12 units of elective Dance courses are required. The remaining elective units required for graduation may be chosen from Dance or other disciplines in relation to a student's individual interest. While the program of study in Dance stresses technical proficiency and academic understanding in dance, the B.A. degree program also enables students to pursue elective subjects in their special areas of interest in other academic disciplines.

The Bachelor of Fine Arts (B.F.A.) degree program with specializations in Performance and Choreography, is designed for students who wish to prepare intensively for careers in those areas. The courses required in addition to the core are primarily in Dance. The B.F.A. program allows for a few free electives in other areas. Admission to the B.F.A. program with a specialization in Choreography is by faculty approval only.

The B.F.A. program with a specialization in Performance does not require additional faculty approval beyond the required audition for admission to the Dance major; students should declare their intention to pursue this specialization during spring quarter of their sophomore year.

Proficiency Levels
In addition to meeting the general requirements for admission to UCI, applicants must demonstrate technical and creative promise. The Department holds annual entrance auditions for potential freshmen and transfer students during the winter quarter prior to the fall quarter when entrance is anticipated. First-year students wishing to major in Dance must be at technique level II in at least one of the three major genres (ballet, modern, jazz).

Placement auditions for admitted students are held during Welcome Week to determine levels of technical ability for placement in courses. It is suggested that transfer students wishing to pursue a B.A. degree in Dance complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, and one course in music for dancers prior to transfer to UCI.

Transfer students wishing to pursue the B.F.A. degree must declare their intention in writing at the time of their entrance audition and demonstrate technique and/or choreography levels appropriate to their year. It is suggested that transfer students complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, one course in music for dancers, and one course in dance performance prior to transfer to UCI.

Students deficient in level of performance or academic preparation should be prepared to extend their studies beyond the normal four-year program in order to meet the requirements for graduation.

Requirements for the B.A. Degree in Dance
All students must meet the University Requirements.
School Requirements: None.
Departmental Requirements: None.
A. Complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE 2</td>
<td>Dance Health and Injury Prevention</td>
</tr>
<tr>
<td>DANCE 21A</td>
<td>Music for Dancers</td>
</tr>
<tr>
<td>Course Code</td>
<td>Course Title</td>
</tr>
<tr>
<td>-------------</td>
<td>------------------------------------</td>
</tr>
<tr>
<td>DANCE 60A</td>
<td>Choreography</td>
</tr>
<tr>
<td>DANCE 90A</td>
<td>Dance History 1A</td>
</tr>
<tr>
<td>DANCE 90B</td>
<td>Dance History 1B</td>
</tr>
<tr>
<td>DANCE 90C</td>
<td>Dance History 1C</td>
</tr>
<tr>
<td>DANCE 100</td>
<td>Kinesiology for Dance</td>
</tr>
<tr>
<td>DANCE 180C</td>
<td>Laban Studies</td>
</tr>
<tr>
<td>DANCE 185</td>
<td>Critical Issues in Dance</td>
</tr>
</tbody>
</table>

B. Complete one four-unit course from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE 125A</td>
<td>Teaching of Dance</td>
</tr>
<tr>
<td>DANCE 127A</td>
<td>Costume Design for Dance</td>
</tr>
<tr>
<td>DANCE 162A</td>
<td>Choreography II</td>
</tr>
<tr>
<td>DANCE 163</td>
<td>Dance and Video Technology</td>
</tr>
<tr>
<td>DANCE 164</td>
<td>Screendance</td>
</tr>
<tr>
<td>DANCE 180A</td>
<td>Laban Studies</td>
</tr>
<tr>
<td>DANCE 194</td>
<td>Topics Vary</td>
</tr>
<tr>
<td>DANCE 195</td>
<td>Arts Management</td>
</tr>
</tbody>
</table>

C. Technique: Students must complete at least one Dance technique course (ballet, modern dance, jazz, Spanish, world dance, pointe, social dance, tap, or repertory) each quarter in residence. At a minimum, students must complete level II in Ballet, Modern, and Jazz (DANCE 132A-DANCE 132B-DANCE 132C, DANCE 142A-DANCE 142B-DANCE 142C, and DANCE 152A-DANCE 152B-DANCE 152C) and level III in either Ballet or Modern (DANCE 133A-DANCE 133B-DANCE 133C or DANCE 143A-DANCE 143B-DANCE 143C). Students who place above level II in any technique must take a year of that technique at the level in which they are placed. All students must also complete one course chosen from DANCE 12A, DANCE 12B, DANCE 12C (Spanish Dance), DANCE 14 (Social Dance), DANCE 52A, DANCE 52B, DANCE 52C (Tap I) or DANCE 110 (World Dance). NOTE: Units earned in ballet, jazz, and modern technique courses beyond the required amount do not count toward departmental elective requirements but may count toward University requirements.

D. Performance:

Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE 170</td>
<td>Dance Performance</td>
</tr>
<tr>
<td>DANCE 171</td>
<td>Dance Workshop</td>
</tr>
<tr>
<td>DANCE 172</td>
<td>Master of Fine Arts Concert</td>
</tr>
</tbody>
</table>

E. Four units of DRAMA 101 (Theater Production) must be taken during the first year in residence.

F. Electives: 12 units of electives must be completed within the major.

**Requirements for the B.F.A. Degree in Dance**

All students must meet the University Requirements.

School Requirements: None.

Departmental Requirements for the Major

Students must complete the departmental requirements as listed for the B.A. degree in Dance. In addition, B.F.A. students must complete the requirements for either the specialization in Choreography or Performance.

Choreography Specialization:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE 60B</td>
<td>Choreography</td>
</tr>
<tr>
<td>DANCE 60C</td>
<td>Choreography</td>
</tr>
<tr>
<td>DANCE 127A</td>
<td>Costume Design for Dance</td>
</tr>
<tr>
<td>DRAMA 30A</td>
<td>Acting</td>
</tr>
<tr>
<td>DRAMA 50C</td>
<td>Introduction to Lighting Design</td>
</tr>
</tbody>
</table>

Any three quarters of courses chosen from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DANCE 162A</td>
<td>Choreography II (and Choreography II and Choreography II)</td>
</tr>
<tr>
<td>DANCE 164</td>
<td>Screendance</td>
</tr>
</tbody>
</table>

Select two courses in DANCE 165

Four units (one or two courses) in Art History, Music, Studio Art, or Drama (in addition to DRAMA 30A, DRAMA 50C, and DRAMA 101 requirements).

Performance Specialization:
Technique: At a minimum, students must complete level III in Ballet, Modern, and Jazz (DANCE 133A, DANCE 133B, DANCE 133C, DANCE 143A, DANCE 143B, DANCE 143C, and DANCE 153A, DANCE 153B, DANCE 153C) and level IV in either Ballet or Modern (DANCE 134A-DANCE 134B-DANCE 134C or DANCE 144A-DANCE 144B-DANCE 144C). Students who place above level III in any technique must take a year of that technique at the level in which they are placed.

<table>
<thead>
<tr>

<tbody>
<tr>
<td>DRAMA 30A</td>
<td>Acting</td>
</tr>
</tbody>
</table>

or a fourth additional performance in the DANCE 170 series.

1. Choreographic Projects—one original choreographic work, approved by the faculty, must be presented in both the junior and senior years.
2. DANCE 170 series: must be in three additional performances beyond the B.A. requirements, one of which must be DANCE 170, DANCE 171, DANCE 172, or DANCE 174. DANCE 171 and DANCE 172 may be repeated for credit. Students must demonstrate proficiency in at least two dance genres in these performances.

Additional Information

Careers for the Dance Major

Careers in dance require excellent training and extraordinary discipline, tenacity, and dedication. Graduates of the Department have an excellent record of placement in the many fields of dance. Some have become professional dancers in ballet companies (including the Metropolitan Opera Ballet, San Francisco Ballet, Nashville Ballet, and Joffrey); in modern dance companies (including Hubbard Street Dance Company, MOMIX, and Martha Graham Dance Ensemble); in touring companies (including The Lion King, Fame: The Musical, Carousel, and Cirque du Soleil); and in films, television, and theatre.

In addition to training for professional dance performance and choreography, the major in dance serves as a basis for graduate study or job opportunities in fields such as dance history, dance science, dance pedagogy, dance reconstruction, dance criticism, dance video, and technology. Related fields, such as arts administration, law in relation to the arts, arts therapies, design and production, and music also offer positions for graduates. Students who are interested in a career in athletic training, physical therapy, or dance science will find a major in Dance, with related course work in chemistry, physics, biology, and mathematics, to be excellent preparation for further study.

Master of Fine Arts Program

Degree Offered

M.F.A. in Dance.
General Information

The M.F.A. program is an intensive program requiring a core of courses in studio and academic areas. The student’s individual area of interest is explored through the thesis project in the second year. Projects or written theses may be pursued in choreography, video choreography, dance training, dance history and theory, ethnography, dance science, dance reconstruction, and dance and digital technology.

Admission

Applicants for admission to the degree program must meet the general requirements for admission to graduate study and hold a B.A. or B.F.A. in Dance or the equivalent. Candidates must meet the minimum requirements for the B.A. degree in Dance at UCI. Proposals for three choreographic works that could be completed in the graduate program must be submitted. An audition in ballet and modern technique is required for admission and is held in winter quarter. At this audition, applicants must also present a prepared five-minute choreographed piece, which may be a solo performed by the applicant, or a videotape of the applicant’s choreography. Interviews with faculty are conducted following the audition, and applicants are given a short writing exercise.

Teaching Assistantships

Graduate students are encouraged to apply for teaching assistantships in areas such as notation, dance science, history, music for dancers, choreography, world dance, dance video, critical issues, and all technique classes. Students with expertise in any of these areas are given special consideration.

General Degree Requirements

Normally two years of residence are required. Each candidate must enroll for three courses each quarter for six quarters, exclusive of summer sessions.

In the second year, satisfactory attainment must be demonstrated by a major thesis; in choreography this consists of the composition and production of a choreographic work; in other areas, such as dance history, dance training, or dance science, this consists of a written thesis or a comprehensive project in a chosen area of study. All theses must be defended in a one-hour oral examination which may also test the candidate’s general knowledge in the area.

The normative time to degree for students in the M.F.A. program is two years. Residence is required. The normative time to degree can be extended to three years only when a student requests extra time for more involved thesis research through a petition to the Chair of the Department. The maximum time to degree is three years. Students who do not complete the degree in three years will be dropped from the program.

Specific Degree Requirements

Seventy-two quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course. No more than 20 units in upper-division courses may count toward the degree. Fulfillment of the technique course requirements must be approved by the faculty advisor.

A. Complete the following:

<table>

Also required: Six courses chosen from any graduate or upper-division dance technique course.

By the end of their first year, students will choose their area of study for their thesis. Students who wish to produce a choreographic thesis must apply to the graduate choreography advisor during winter of their first year. The faculty will review the applications and will consider the quality of the student’s work in Dance 261, as well as the choreographic proposal, in making their selection.

Faculty

David Allan, Choreographer/Former Soloist, National Ballet of Canada; Choreographer, ballet companies, operas, film, and television, Professor Emeritus of Dance (ballet, pas de deux, choreography)

Shaun D. Boyle, M.A. Trinity Laban Conservatoire of Music and Dance, Assistant Professor of Dance (ballet, repertory, choreography)
Mary E. Corey, M.A. University of California, Riverside; Certified Professional Labanotator, Professor of Dance (dance history, dance notation and reconstruction)

John L. Crawford, Media Artist and Software Designer, Graduate Advisor and Associate Professor of Dance; Informatics (dance film, interactive media, telematic performance, motion capture, digital arts)

Diane L. Diefenderfer, Former Soloist, Los Angeles Ballet, Eglevsky Ballet Company, Frankfurt Ballet Company, Director of Pilates Program for Dance Wellness, Lecturer with Security of Employment of Dance (ballet, pointe, repertory)

Jennifer J. Fisher, Ph.D. University of California, Riverside; Decade diversity mentor, founder and editor of Dance Major Journal, Associate Professor of Dance (dance history and theory)

Israel Gabriel, Bat-Dor Dance Company; Former Assistant Artistic Director, Lecturer with Security of Employment Emeritus of Dance (ballet, modern, pas de deux, repertory)

Michel Gervais, Lecturer of Dance

Charlotte Griffin, M.F.A. University of Texas, Austin, Assistant Professor of Dance (choreography, modern, screen dance)

Chad M. Hall, M.F.A. Ohio State University; Pilates Mat Certified, Assistant Professor of Dance (modern dance, choreography, improvisation)

Loretta Livingston, B.F.A. California Institute of the Arts; Certified Laban Movement Analyst; former principal with Bella Lewitzky Dance Company, Graduate Advisor and Associate Professor of Dance (modern dance, choreography, improvisation, Laban movement analysis, teaching of dance)

Molly L. Lynch, M.F.A. University of California, Irvine; Pilates Certified; Choreographer/Artistic Director of the National Choreographers Initiative, Associate Professor of Dance (ballet, pointe, repertory, partnering, arts management)

Donald McKayle, Choreographer/Director, Claire Trevor Professor and Professor Emeritus of Dance (choreography, modern dance)

Lisa Marie Naugle, Ph.D. New York University, Department Chair and Professor of Dance (modern dance, choreography, dance and digital technology, improvisation, teaching of dance)

James W. Penrod, M.F.A. University of California, Irvine; C.M.A. Laban Institute of Movement Studies, Professor Emeritus of Dance (ballet, modern, dance notation, choreography, movement analysis)

Janice G. Plastino, Ph.D. University of Southern California, Professor Emerita of Dance (kinesiology/anatomy, research methods, choreography, dance science/medicine)

Nancy L. Ruyter, Ph.D. Claremont Graduate University, Professor Emerita of Dance (dance history, Spanish dance, bibliography and research)

Kelli Sharp, DPT Chapman University, Assistant Professor of Dance (somatic practices, dance science, kinesiology, physical therapy)

Alan Terricciano, M.A. Eastman School of Music, Professor of Dance; Music

Tong Wang, M.F.A. University of Utah; Principal dancer with the Shanghai Ballet, Tulsa Ballet Theatre, Dayton Ballet, Ballet West, Assistant Professor of Dance (ballet, choreography, men's ballet)

Sheron C. Wray, M.A. Middlesex University, Associate Professor of Dance; African American Studies (jazz, choreography, improvisation)

Courses

DANCE 2. Dance Health and Injury Prevention. 4 Units.
An overview of factors that affect the health of dancers. Includes evaluation of general health measures and prevention and management of common dance injuries.

Restriction: Dance majors only.

DANCE 3. Scientific Concepts of Health. 4 Units.
Introduction to the scientific foundations of health, emphasizing those pertaining to success in college and lifetime wellness. Includes principles of cardiorespiratory, musculoskeletal, flexibility, and nutritional fitness. A variety of learning experiences will be offered to apply science to real life.

DANCE 4. Introduction to Quantitative Research in Exercise Science. 4 Units.
Introduction to quantitative scientific inquiry as it pertains to exercise science and related fields. Includes evaluation of primary scientific research literature, research design, data collection and analysis, and research communication.
DANCE 12A. Studio Workshop in Spanish Dance. 2 Units.  
Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.  
Repeatability: May be taken for credit 3 times.

DANCE 12B. Studio Workshop in Spanish Dance. 2 Units.  
Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.  
Prerequisite: DANCE 12A.  
Repeatability: May be taken for credit 3 times.

DANCE 12C. Studio Workshop in Spanish Dance. 2 Units.  
Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.  
Prerequisite: DANCE 12B.  
Repeatability: May be taken for credit 3 times.

DANCE 14. Social Dance. 2 Units.  
Contemporary and historical forms. Current ballroom, disco, and Western square dance forms; Latin ballroom dances; dances from the 20s, 30s, and 40s.  
Grading Option: Pass/no pass only.

DANCE 21A. Music for Dancers. 4 Units.  
Emphasis on the development of musical skills most pertinent to the dancer: vocabulary, notational literacy, rhythmic and melodic acuity, score reading, and fundamental analysis; working with live accompaniment.  
Restriction: Dance majors only.

DANCE 30A. Studio Workshop in Ballet I. 2 Units.  
Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.  
Grading Option: Pass/no pass only.  
Repeatability: May be taken for credit 2 times.

DANCE 30B. Studio Workshop in Ballet I. 2 Units.  
Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.  
Prerequisite: DANCE 30A.  
Grading Option: Pass/no pass only.  
Repeatability: May be taken for credit 2 times.

DANCE 30C. Studio Workshop in Ballet I. 2 Units.  
Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.  
Prerequisite: DANCE 30A and DANCE 30B.  
Grading Option: Pass/no pass only.  
Repeatability: May be taken for credit 2 times.

DANCE 34. Men's Studio Workshop in Ballet. 2 Units.  
Emphasis on men's traditional ballet, techniques, and movements.  
Prerequisite: DANCE 30A and DANCE 30B and DANCE 30C.  
Repeatability: May be repeated for credit unlimited times.

DANCE 40A. Studio Workshop in Modern I. 2 Units.  
Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.  
Grading Option: Pass/no pass only.  
Repeatability: May be taken for credit 2 times.
DANCE 40B. Studio Workshop in Modern I. 2 Units.
Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 40C. Studio Workshop in Modern I. 2 Units.
Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50A. Studio Workshop on Jazz I. 2 Units.
Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50B. Studio Workshop on Jazz I. 2 Units.
Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50A.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50C. Studio Workshop on Jazz I. 2 Units.
Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50B.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 52A. Workshop in Tap I. 2 Units.
Beginning tap: principles of rhythm and basic tap steps.

Repeatability: May be taken for credit 2 times.

DANCE 52B. Workshop in Tap I. 2 Units.
Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52A.

Repeatability: May be taken for credit 2 times.

DANCE 52C. Workshop in Tap I. 2 Units.
Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52B.

Repeatability: May be taken for credit 2 times.

DANCE 60A. Choreography. 4 Units.
Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Restriction: Dance Majors only.
DANCE 60B. Choreography. 4 Units.
Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.
Prerequisite: DANCE 60A.
Restriction: Dance majors only.

DANCE 60C. Choreography. 4 Units.
Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.
Prerequisite: DANCE 60A and DANCE 60B.
Restriction: Dance majors only.

DANCE 80. Introduction to Ballet and Modern Dance. 4 Units.
Survey of nineteenth and twentieth-century ballet, modern dance, and theatre dance.
Overlaps with DANCE 90B, DANCE 90C, DANCE 90A.
Restriction: Non-major only.

DANCE 81. American Ballet and Modern Dance since 1900. 4 Units.
A survey of American ballet and modern dance in the twentieth and twenty-first centuries. Lectures are supplemented by video.
Overlaps with DANCE 90C.
Restriction: Non-major only. Dance 81 and Dance 90C may not both be taken for credit.

DANCE 82. Topics in World Dance. 4 Units.
Various topics in world dance studies focusing on historical, social, and cultural contexts.
Repeatability: May be repeated for credit unlimited times.

DANCE 83. Dance in Feature Film. 4 Units.
Dance in film musicals and commercial dance films, concentrating especially on films from the 1930s through the 1970s.

DANCE 85. Gender, Meaning, and Culture in Ballet. 4 Units.
Explores the way ballet as an art form and as a practice reflects culture, as well as embodying new ideas that read counter to conventional narratives.

DANCE 90A. Dance History 1A. 4 Units.
Global perspectives. Topics and histories of dance and movement practices from various parts of the world.
Overlaps with DANCE 80.
Restriction: Dance majors have first consideration for enrollment.
DANCE 90B. Dance History 1B. 4 Units.
The history of dance in the western tradition from the Renaissance through the nineteenth century.
Prerequisite: DANCE 90A
Overlaps with DANCE 80.
Restriction: Dance majors have first consideration for enrollment.

DANCE 90C. Dance History 1C. 4 Units.
The history of dance in the western tradition: the twentieth and twenty-first centuries.
Prerequisite: DANCE 90B
Overlaps with DANCE 80, DANCE 81.
Restriction: Dance majors have first consideration for enrollment.

DANCE 100. Kinesiology for Dance. 4 Units.
The study of the production of dance movement by the musculoskeletal system. Anatomical and dynamic analysis of dance movement.
Restriction: Dance majors only.

DANCE 103. Pilates. 2 Units.
Basics of technique emphasizing alignment, breath control, correction of muscular imbalances.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 104. Pilates Reformer. 2 Units.
Utilizes the Universal Reformer apparatus, aiding the student in core stabilization, correcting muscular imbalances, increasing flexibility, and improving strength.
Prerequisite: DANCE 103.
Restriction: Dance majors only.

DANCE 110. World Dance . 2 Units.
Studio workshop of dances and movement sources of specified countries or areas.
Repeatability: May be taken for credit 6 times as topics vary.

DANCE 125A. Teaching of Dance. 4 Units.
Pedagogy. The methods and theory of teaching dance forms.
Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C.
Restriction: Dance majors only. Upper-division students only.

DANCE 127A. Costume Design for Dance. 4 Units.
Costume design and construction specific to the body in motion. Theoretical study and practical execution.
Restriction: Dance majors only.

DANCE 130A. Pointe Class. 2 Units.
Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.
Prerequisite: DANCE 132A and DANCE 132B and DANCE 132C.
Repeatability: May be taken for credit 3 times.
Restriction: Dance majors only.
DANCE 132A. Studio Workshop in Ballet II. 2 Units.
Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 30A and DANCE 30B and DANCE 30C) or audition. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 132B. Studio Workshop in Ballet II. 2 Units.
Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 132C. Studio Workshop in Ballet II. 2 Units.
Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 133A. Advanced Studio Workshop in Ballet III. 2 Units.
Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 132A and DANCE 132B and DANCE 132C) or audition.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 133B. Advanced Studio Workshop in Ballet III. 2 Units.
Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 133C. Advanced Studio Workshop in Ballet III. 2 Units.
Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A and DANCE 133B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 134A. Advanced Studio Workshop in Ballet IV. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or audition. DANCE 133C with a grade of B+ or better.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.
DANCE 134B. Advanced Studio Workshop in Ballet IV. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 134C. Advanced Studio Workshop in Ballet IV. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 135A. Advanced Studio Workshop in Ballet V. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: (DANCE 134A and DANCE 134B and DANCE 134C) or audition. DANCE 134C with a grade of B+ or better.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 135B. Advanced Studio Workshop in Ballet V. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 135C. Advanced Studio Workshop in Ballet V. 4 Units.
Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A and DANCE 135B.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 137. Repertory. 2 Units.
Rehearsal and performance of repertoire from established ballet, modern, or jazz choreographers.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or (DANCE 143A and DANCE 143B and DANCE 143C).

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 139. Partnering. 2 Units.
Principles of partnering techniques in various dance performance styles.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C.

Repeatability: May be taken for credit 4 times.

Restriction: Dance majors only.
DANCE 142A. Studio Workshop in Modern II. 2 Units.
Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.
Prerequisite: DANCE 40A and DANCE 40B and DANCE 40C. Prerequisites are for non-Dance majors only.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 142B. Studio Workshop in Modern II. 2 Units.
Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.
Prerequisite: DANCE 142A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 142C. Studio Workshop in Modern II. 2 Units.
Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.
Prerequisite: DANCE 142A and DANCE 142B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors have first consideration for enrollment.

DANCE 143A. Advanced Studio Workshop in Modern III. 2 Units.
Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.
Prerequisite: DANCE 142A and DANCE 142B and DANCE 142C.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 143B. Advanced Studio Workshop in Modern III. 2 Units.
Builds on the fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.
Prerequisite: DANCE 143A.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 143C. Advanced Studio Workshop in Modern III. 2 Units.
Builds on fundamentals of DANCE 142A-DANCE 142B-DANCE 142C and introduces performance techniques.
Prerequisite: DANCE 143A and DANCE 143B.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 144A. Advanced Studio Workshop in Modern IV. 2 Units.
Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.
Prerequisite: DANCE 143A and DANCE 143B and DANCE 143C.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.
DANCE 144B. Advanced Studio Workshop in Modern IV. 2 Units.
Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 144C. Advanced Studio Workshop in Modern IV. 2 Units.
Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A and DANCE 144B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 152A. Intermediate Studio Workshop in Jazz II. 2 Units.
Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 50A and DANCE 50B and DANCE 50C. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 152B. Intermediate Studio Workshop in Jazz II. 2 Units.
Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 152C. Intermediate Studio Workshop in Jazz II. 2 Units.
Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 153A. Advanced Studio Workshop in Jazz III. 2 Units.
Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 153B. Advanced Studio Workshop in Jazz III. 2 Units.
Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.
DANCE 153C. Advanced Studio Workshop in Jazz III. 2 Units.
Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A and DANCE 153B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 154A. Advanced Jazz: Performance Techniques IV. 2 Units.
Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 153A and DANCE 153B and DANCE 153C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 154B. Advanced Jazz: Performance Techniques IV. 2 Units.
Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 154C. Advanced Jazz: Performance Techniques IV. 2 Units.
Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A and DANCE 154B.

Repeatability: May be taken for credit 2 times.

Restriction: Prerequisite required and Dance majors only

DANCE 160. Improvisation. 2 Units.
Structured and experiential improvisation to heighten the personal intuitive processes, the kinesthetic sense, spatial and temporal awareness, and to encourage insights into the potential movement resources of the individual for performance and choreography. Course encourages freedom of exploration.

Repeatability: May be taken for credit 2 times.

DANCE 162A. Choreography II. 4 Units.
Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 60A and DANCE 60B and DANCE 60C. Audition required.

Restriction: Dance majors only.

DANCE 162B. Choreography II. 4 Units.
Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A. Audition required.

Restriction: Dance majors only.

DANCE 162C. Choreography II. 4 Units.
Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A and DANCE 162B. Audition required.

Restriction: Dance majors only.
DANCE 163. Dance and Video Technology. 4 Units.
Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

Prerequisite: DANCE 60A.
Restriction: Dance majors only.

DANCE 164. Screendance. 4 Units.
Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 163.
Restriction: Dance majors only.

DANCE 165. Choreographic Projects. 1-4 Units.
Supervised choreographic projects for workshop productions.

Prerequisite: Audition required.
Repeatability: May be taken for credit 2 times.
Restriction: Dance majors only.

DANCE 170. Dance Performance. 1-4 Units.
Rehearsal and performance in a faculty-choreographed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

DANCE 171. Dance Workshop. 1-4 Units.
Rehearsal and performance in a student-choreographed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

DANCE 172. Master of Fine Arts Concert. 1-4 Units.
Rehearsal and performance in a graduate student-choreographed production.

Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

DANCE 174. UCI Dance Ensemble Performance. 1-4 Units.
Performance with the UCI Dance Ensemble.

Repeatability: May be taken for credit 6 times.
Restriction: Sophomores, juniors, and seniors only.

DANCE 176. UCI Jazz Dance Ensemble. 2-4 Units.
Rehearsal and performance in theatrical jazz dance, designed to provide an experience in assimilating various styles of jazz dance and in refining dance performance techniques. Students will master aspects of dance company promotion.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C.
Repeatability: May be taken for credit 6 times.
Restriction: Sophomores, juniors, and seniors only.

DANCE 177. UCI Spanish Dance Ensemble. 1-4 Units.
Rehearsal and performance with the UCI Spanish Dance Ensemble. Flamenco and other Spanish dance genres are presented throughout the year for campus and off-campus events.

Repeatability: May be taken for credit 12 times.
DANCE 179. UCI Etude Ensemble. 4 Units.
Repertory and performances by undergraduate Dance majors. Concert presentations on and off campus. Faculty directed, student/faculty choreographed.

Prerequisite: Audition required.

Repeatability: May be taken for credit 9 times.

Restriction: Sophomores, juniors, and seniors only.

DANCE 180A. Laban Studies. 4 Units.
Elementary Labanotation and motif writing.

Prerequisite: DANCE 21A and DANCE 180C.

Restriction: Dance majors only.

DANCE 180C. Laban Studies. 4 Units.
Laban movement analysis.

Prerequisite: DANCE 21A.

Restriction: Dance majors only.

DANCE 185. Critical Issues in Dance. 4 Units.
Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world. Course may be offered online.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance majors only.

DANCE 185W. Critical Issues in Dance. 4 Units.
Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world. Course may be offered online.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance majors only.

(Ib)

DANCE 193. Selected Topics in Dance. 1-4 Units.
Directed group studies of topics in dance.

Repeatability: May be taken for credit 3 times as topics vary.

DANCE 194. Topics Vary. 4 Units.
Seminar in Dance Studies. Variable topics related to gender, race, politics, and dance writing, and criticism, with attention to linking dance practices to the wider world.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C.

Repeatability: Unlimited as topics vary.

DANCE 195. Arts Management. 4 Units.
Designed for students interested in the developmental and management of nonprofit arts organizations. Examines the organizational structure and areas of operation such as marketing, fundraising, budgeting, production, and administration.

Repeatability: May be taken for credit 2 times.

DANCE 197. Independent Study. 1-4 Units.
Individual independent projects in experimental laboratory, library, field, performance, under instructor's direction. Students can receive conceptual, creative, and theoretical instruction in the successful completion of a written report or performance.

Repeatability: May be repeated for credit unlimited times.
DANCE 199. Senior Thesis. 4 Units.
Directed research or creative activity for senior Dance majors. Research consists of a substantial essay on dance history, research in dance science, or the creation of original or reconstructed choreography.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance majors only.

DANCE 201. Seminar in Kinesiology for Dance. 4 Units.
Introduction to the anatomical, biomechanical, and physiological principles of dance movement.

Prerequisite: DANCE 100.

DANCE 210. Graduate Studio: World Dance. 2 Units.
Principles, techniques, and styles of selected genres of world dance such as those of Mexico, Spain, Japan, or other cultures.

Repeatability: May be taken for credit 6 times.

Restriction: Dance grad students only and consent of instructor to enroll.

DANCE 222. Musical Resources. 4 Units.
Detailed study of music as it relates to dance. Historical overview of musical form, style, and other elements. Analysis of various affinities between music and dance. Practical applications.

DANCE 225. Seminar in the Teaching of Dance Techniques. 4 Units.
Principles and theories of teaching dance techniques. Supervised presentation and teaching of technique class.

DANCE 231A. Graduate Studio: Ballet. 2 Units.
Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 231B. Graduate Studio: Ballet. 2 Units.
Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 231C. Graduate Studio: Ballet. 2 Units.
Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241A. Graduate Studio: Modern. 2 Units.
Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241B. Graduate Studio: Modern. 2 Units.
Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.
DANCE 241C. Graduate Studio: Modern. 2 Units.
Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 251A. Graduate Studio: Jazz. 2 Units.
Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 251B. Graduate Studio: Jazz. 2 Units.
Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251A.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 251C. Graduate Studio: Jazz. 2 Units.
Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Audition required.

DANCE 252A. Graduate Studio: Tap. 2 Units.
An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Repeatability: May be taken for credit 4 times.

DANCE 252B. Graduate Studio: Tap. 2 Units.
An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252A.
Repeatability: May be taken for credit 4 times.

DANCE 252C. Graduate Studio: Tap. 2 Units.
An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252B.
Repeatability: May be taken for credit 4 times.

DANCE 261A. Graduate Studio in Choreography. 4 Units.
Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Repeatability: May be repeated for credit unlimited times.

DANCE 261B. Graduate Studio in Choreography. 4 Units.
Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Prerequisite: DANCE 261A.
Repeatability: May be repeated for credit unlimited times.
DANCE 264. Screendance. 4 Units.
Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.
Prerequisite: DANCE 281.

DANCE 265. Performance Capture. 4 Units.
Projects in performance capture, motion capture, motion tracking, and computer animation. Introduction to techniques for sensing and recording human movement and transforming the result into digital representations using computer technology. Discussion of aesthetic issues related to movement representation. Choreographic projects.
Prerequisite: DANCE 264 and DANCE 281.

DANCE 281. Dance and Video Technology. 4 Units.
Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

DANCE 282. Seminar in Movement Analysis. 4 Units.
Theories of movement analysis and nonverbal communication applied to dance.

DANCE 283. Critical Issues in Dance. 4 Units.
Reading, writing, discussing, and presenting key issues that relate to dance studies. Basics of dance analysis and criticism. Special emphasis on effective ways of defining, clarifying, and arguing for points of view.
Prerequisite: DANCE 284.

DANCE 284. Bibliography and Research. 4 Units.
Understanding the field of dance studies, available resources, research methods, and academic formats in preparation for thesis writing.

DANCE 285. Graduate Projects. 4 Units.
Projects may be educational, choreographic, scientific, historical, or philosophical in scope and must have faculty advisor approval.
Repeatability: May be taken for credit 6 times.

DANCE 286. Thesis. 4 Units.
Substantial research in a topic approved by the student's graduate committee. Results of the research must be written in approved thesis style.
Repeatability: May be taken for credit 6 times.

DANCE 287. Graduate Lectures in Dance. 1-4 Units.
A series of lectures and discussions of announced topics in dance. Content may be from history, ethnology, notation, medicine, music, or other areas in the field.
Repeatability: Unlimited as topics vary.

DANCE 296. Proseminar in Dance History. 4 Units.
Discussion seminar with emphasis on reading and thinking about problems in dance history; presentation of oral and written reports.
Repeatability: May be taken for credit 2 times as topics vary.

DANCE 297. Directed Reading. 1-4 Units.
Topic to be approved by instructor. Paper required.
Repeatability: May be repeated for credit unlimited times.

DANCE 399. University Teaching. 4 Units.
Limited to Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Dance graduate students only.

Department of Drama

Daniel Gary Busby, Department Chair
249 Drama Building
Overview

The Department of Drama, widely recognized and ranked as one of the top ten training programs in the country, combines broad liberal study and comprehensive training in several sub-disciplines of drama. The Department of Drama produces a full season of plays, musicals, and world premieres with varying dimensions and audience/actor relationships.

The vision of the Department of Drama’s founding faculty was “to produce students who combine a critical intelligence with disciplined theatrical experience.” To this end, the Department fosters an environment of creativity and in-depth learning of both performance and scholarly activity. The Department’s rare combination of distinguished permanent faculty, high profile guest master class teachers, an interactive student population, and excellent facilities allows it to offer a program that is creatively robust and intellectually rigorous. The current faculty includes active and highly regarded individuals in their fields of practice, and so remains able to impart current, relevant knowledge to drama students.

The Department’s facilities include the following theatre spaces:

- Irvine Barclay Theatre - 760-seat proscenium stage
- Claire Trevor Theatre - 290-seat proscenium stage
- Winifred Smith Hall - 230-seat thrust platform stage
- Robert Cohen Theatre - 80-seat “black box” stage
- Little Theatre - 165-seat proscenium stage
- Nixon Theatre - 60-seat laboratory and cabaret stage

Productions have been mounted in the school’s six theatre spaces, University Art Gallery, Motion Capture Studio, Beall Center for Art and Technology, Experimental Media Performance Lab (xMPL), Maya Lin designed Arts Plaza, Jerzy Grotowski-inspired UCI Barn and Yurt, and the New Swan Theatre (featuring a buildable Elizabethan theatre).

Career Opportunities

Graduates from the Department of Drama perform, stage manage, or design on Broadway, in national tours, regional and summer theatres, in films and on television. UC Irvine’s Drama alumni serve as artistic directors, business managers, designers, art directors, and performers at more than 100 theatre companies, and are faculty at more than 75 institutions of higher learning.

A degree in Drama may or may not lead to professional employment in theatre or film. While some alumni may pursue careers as professional theatre artists, many may use the skills learned from their degree and embark upon careers in law, business, arts management, advertising, and teaching. Others may pursue further study at UC Irvine or other notable institutions.

Requirements for the B.A. Degree in Drama

All students must meet the University Requirements.

School Requirements: None.

Departmental Requirements for the Major in Drama

A. Complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 10</td>
<td>Introduction to Theatre</td>
</tr>
</tbody>
</table>

B. Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 15</td>
<td>Performance Now</td>
</tr>
<tr>
<td>DRAMA 20A</td>
<td>Culture in Performance</td>
</tr>
<tr>
<td>DRAMA 20B</td>
<td>Culture in Performance</td>
</tr>
<tr>
<td>DRAMA 20C</td>
<td>Culture in Performance</td>
</tr>
</tbody>
</table>

C. Complete one year in acting:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 30A</td>
<td>Acting</td>
</tr>
<tr>
<td>DRAMA 30B</td>
<td>Acting</td>
</tr>
<tr>
<td>DRAMA 30C</td>
<td>Acting</td>
</tr>
</tbody>
</table>

D. Complete one year survey in the development of drama:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 40A-40B-40C</td>
<td>Development of Drama and Development of Drama</td>
</tr>
</tbody>
</table>

E. Select three of the following, of which at least one must be DRAMA 50C, DRAMA 50D, or DRAMA 50E:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 50A</td>
<td></td>
</tr>
<tr>
<td>DRAMA 50B</td>
<td></td>
</tr>
<tr>
<td>DRAMA 50C</td>
<td></td>
</tr>
<tr>
<td>DRAMA 50D</td>
<td></td>
</tr>
<tr>
<td>DRAMA 50E</td>
<td></td>
</tr>
</tbody>
</table>
DRAMA 50A  Introduction to Costume Design
DRAMA 50B  Introduction to Scenic Design
DRAMA 50C  Introduction to Lighting Design
DRAMA 50D  Introduction to Sound Design
DRAMA 50E  Introduction to Stage Management
DRAMA 50F  History and Theories of Scenography

F. Select seven upper-division courses, which must include three dramatic literature courses from DRAMA 103–129, or 180 (excluding DRAMA 101, 198, and 199).

**Theatre Production (DRAMA 101) requirements:**

- Freshmen—eight units, of which four units must be completed during the first year of residency at UCI;
- Transfer Students: Sophomores—six units, of which four units must be completed during the first year of residency at UCI; Juniors and Seniors—four units, which must be completed during the first year of residency at UCI.

1. Students are required to take DRAMA 40A, DRAMA 40B, DRAMA 40C in their sophomore year, after completion of the lower-division writing requirement.

2. Students entering the Department as freshman must complete the requirement of three courses chosen from DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D, DRAMA 50E, DRAMA 50F by the end of their junior year. All other students must complete these courses within one year of entering the major.

**Sample Program for Freshmen**

<table>

**Requirements for the B.F.A. Degree in Music Theatre**

All students must meet the University Requirements.

**School Requirements:** None.

**Department Requirements for the Major in Music Theatre**

A. Complete the following:
- DRAMA 10  Introduction to Theatre

B. Select one of the following:
- DRAMA 15  Performance Now
- DRAMA 20A  Culture in Performance
- DRAMA 20B  Culture in Performance
- DRAMA 20C  Culture in Performance
- DRAMA 30A-30B-30C  Acting and Acting and Acting
- DRAMA 40A-40B-40C  Development of Drama and Development of Drama

C. Select one of the following design courses:
- DRAMA 50A  Introduction to Costume Design
- DRAMA 50B  Introduction to Scenic Design
- DRAMA 50C  Introduction to Lighting Design
- DRAMA 50D  Introduction to Sound Design
- DRAMA 50E  Introduction to Stage Management
- DRAMA 50F  History and Theories of Scenography
- DRAMA 100  University Theatre
- DRAMA 136  Music Theatre Acting
- DRAMA 142  Music Theatre Workshop II
DRAMA 143A-143B-143C  Music Theatre Workshop I
and Music Theatre Workshop II
and Music Theatre Workshop III

DRAMA 144  Music Theatre Workshop IV

DRAMA 145  Music Theatre Singing (taken three times)

DRAMA 146  NYSP - Preparation

and History of American Musical Theatre
and History of American Musical Theatre

DRAMA 149  Music Proficiency for Actors

DRAMA 176  Script and Score

DRAMA 177  Song Repertoire

D. Complete the following:

DRAMA 182A-182B  Dance Technique, Level I
and Dance Technique, Level I

or

DRAMA 183A-183B  Dance Technique, Level II
and Dance Technique, Level II

E. Select one Dramatic Literature course from DRAMA 103-129 or 180.

Theatre Production (DRAMA 101) requirements:

Freshmen—eight units, of which four units must be completed during the first year of residency at UCI.

Transfer Students: Sophomores—six units, of which four units must be completed during the first year of residency at UCI; Juniors and Seniors—four units, which must be completed during the first year of residency at UCI.

Plus each of the following courses when in residence in the New York Satellite Program:

DRAMA 190  NYSP - Acting

DRAMA 191  NYSP - Dance

DRAMA 192  NYSP - Singing

DRAMA 193  NYSP - Performance

DRAMA 194  NYSP - UCI Residency

Also complete two ballet classes, one tap class, and one jazz class in Dance.

Application Process to Declare the Major

Drama majors may audition for the program upon acceptance into the Music Theatre Workshop, Level III (DRAMA 143A, DRAMA 143B, or DRAMA 143C). B.F.A. auditions are held three times per year: during Welcome Week and finals week of the fall and winter quarters. A grade point average of 3.0 in music theatre courses completed prior to the B.F.A. audition is required.

Departmental Honors Programs

Honors in Acting Program

Admission to the Honors in Acting Program requires both eligibility and a special audition. The eligibility requirements for sophomore-level transfer students and native UCI students are (1) at least one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 and at least one section of either DRAMA 135 or DRAMA 142, all at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) performance in at least three official UCI Drama productions; (5) completion of six units of Drama 101 (Production/Crew); and (6) completion of the eligibility form.

The eligibility requirements for junior-level transfer students are (1) one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) completed performance in at least one official UCI Drama production; (5) completion of four units of Drama 101; and (6) completion of eligibility form.

A student’s audition will determine final admission to the Honors in Acting program. Only truly exceptional students, no more than 10 to 20 percent of those eligible, will be admitted. The Honors auditions, for eligible candidates only, are held at the end of fall quarter and by special arrangement. Auditions will consist of a standard presentation: one classical and one modern monologue, totaling no more than three minutes.

Honors in Acting Program students receive (1) the “Honors in Acting” notation on their official transcript at graduation; and (2) nomination and recommendation for national University/Resident Theatre Association (U/RTA) auditions. Honors in Acting students may also be eligible to join M.F.A. Acting students in on-campus auditions for professional theatres and attend M.F.A. Actors’ “Dynamics” classes.
Honors in Design/Technology Program

The Honors in Design/Technology Program provides the opportunity for Drama majors to concentrate on the study and practice of scenery, costume, lighting, sound design, or technology. Honors in Design/Technology students study basic and advanced design and production techniques, participate in classes with graduate design students, and may serve as an assistant to a graduate student or faculty designer, or design a production at UCI.

Eligibility requirements are (1) at least one year in good standing at UCI as a Drama major; (2) completion of DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D for Scenic or Costume designers; or completion of DRAMA 50C, DRAMA 50D and two of DRAMA 50A, DRAMA 50B, or DRAMA 50F for Sound or Lighting designers (3) completion of at least two courses selected from DRAMA 50E, upper-division studio courses (DRAMA 150–162, 167–169, 171, or 179), or graduate-level design courses, including at least one from the design area in which the student is applying for honors; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all design and production technique courses; (5) completion of four out of eight units of Drama 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Design/Technology Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year. Upon completion of eligibility requirements, the student will schedule an informal portfolio review with a member of the design faculty appropriate to the student's specialty area(s).

Only truly exceptional students will be admitted to Honors in Design/Technology as determined by the Design faculty.

If the faculty mentor determines that the student is a good candidate for the Honors in Design/Technology Program, the mentor will present the student’s portfolio to the Design Faculty. The Design Faculty, led by the Head of Design, will then decide if the student shall be admitted to the Honors in Design Program.

Honors in Design/Technology students receive (1) the “Honors in Design/Technology” notation on their official transcript at graduation; (2) an assistant designer assignment with a graduate student or faculty designer; (3) special consideration to design a budgeted and technically supported production; and (4) Honors in Design students may also receive nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

Honors in Design/Technology students are expected to maintain a high level of performance and commitment to their work and the Drama Department. Honors students meet with their faculty mentor at the beginning of every quarter to evaluate their progress and check that all grade, course, and production requirements are being satisfied.

Once admitted into the Honors in Design/Technology Program, students are expected to:

1. Maintain an overall GPA of a least 3.2, with a GPA of at least 3.4 in all design and production technique courses.
2. Remain in good standing as a Drama major.
3. Satisfy any provisional conditions for acceptance into the Honors in Design/Technology program.
4. Complete production assignments as assigned by the faculty mentor.
5. Continue to take at least two courses (as enumerated in the eligibility section) or independent studies per year, at least half of which must come from the area of design in which the student is applying for honors.
6. Complete any safety and auxiliary training commensurate with M.F.A. students in a particular discipline.
7. Maintain the Drama Department’s CORE values (http://drama.arts.uci.edu/graduate-programs/directing/mfa-directing).

Should a student, having been previously admitted to the Honors in Design Program, fail to meet expectations, the Design Faculty will meet to evaluate the situation; the student may lose their Honors in Design status and have to re-apply to the Program.

For more information contact the Head of Design in Drama or Area Head of design discipline.

Honors in Directing Program

The Honors in Directing Program provides the opportunity for Drama majors to concentrate on the study and practice of stage direction. Honors in Directing students study basic and advanced directing techniques, participate in the directing studio classes with graduate Directing students, and direct two full plays in the Director Class Projects series. Honors students also have the opportunity to receive credit as the assistant director to a Drama Department main season show, or as a production internship with a professional theatre company.

Admission to the Honors in Directing Program is competitive. Candidates must first complete DRAMA 184 (Directing) and receive instructor approval to enroll in DRAMA 185 (Advanced Directing). Candidates must apply, as a director, for DRAMA 198 (Director Class Project) by submitting a proposal to direct a play in the Director Class Project. If the proposal is accepted, the candidate must declare to the Head of Directing that the production is to be counted as an audition for admission to the Honors in Directing Program. A committee of three Drama faculty members, including the Head of Directing, will then see and evaluate the production for clarity of interpretation, unity of style, strength of acting, and ensemble performance, and will examine the candidate’s self-evaluation and the evaluations of the director by members of the cast. The Head of Directing will inform the candidate of the committee’s decision as to whether or not the candidate is admitted to the Honors Program.
Undergraduate Drama majors can be admitted into the program as early as the winter quarter of their freshman year but no later than the spring quarter of their junior year. Students may be admitted to the program retroactively if all the requirements for Directing Honors have been met by their final year, but only if a faculty committee of three has seen their workshops and agrees to admit the candidate.

To achieve the Honors in Directing distinction, students must fulfill all the courses required of the regular Drama major, with an overall GPA of 3.2 or higher. In addition, students must complete the following courses with a GPA of 3.4 or higher:

1. DRAMA 184 (Directing).
2. Two courses in DRAMA 185 (Advanced Directing). In this course, undergraduate Directing students present work in the Directing Laboratory along with graduate Directing students.
3. Two Director Class projects, one of which must be taken as DRAMA 198 (Director Class Project) with the candidate serving as director. The candidate must stage a second Director Class Project as DRAMA H198 (Honors Director Class Project), for which a letter grade is earned.
4. Four additional units to be satisfied by any of the following: DRAMA 199 (as a summer internship, approved by the Head of Directing, with the candidate serving a professional theatre company as director, assistant director, or production assistant); DRAMA 199 (as a production/directing project for Playwright’s Workshop); DRAMA 100 (as assistant director to a faculty director); or DRAMA 199 (as assistant director to a graduate director’s thesis production).

Honors candidates meet with the Head of Directing at the beginning of every quarter to evaluate their progress and to check that all grade and course requirements are being satisfied. Successful graduating seniors will receive the “Honors in Directing” notation on their official transcript and will receive a nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

NOTE: All of the above courses are open to all students even though they may not qualify for the Honors Program.

**Honors in Dramatic Literature, History, and Theory Program**

The Honors in Dramatic Literature, History, and Theory Program is designed to challenge superior students beyond the scholarly requirements of the Drama major. It provides them with the opportunity to advance their knowledge of dramatic literature, history, and theory and to further develop their writing, analytical, and research skills. An additional purpose of the program is to better prepare students for graduate study in not only dramatic literature, history, and theory, but in all fields in the humanities and social sciences, as well as in law.

Eligibility requirements are (1) completion of DRAMA 40A, DRAMA 40B, DRAMA 40C and two courses selected from DRAMA 103–129 (for upper-division writing credit), or equivalents to these courses from other institutions; (2) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all dramatic literature, history, and theory courses; and (3) completion of the eligibility form.

Admission to the Honors in Dramatic Literature, History, and Theory Program is competitive. Students must apply to the program prior to the spring quarter of their junior year. Upon completion of eligibility requirements, applicants must submit at least two critical essays, most likely written previously for courses, totaling no more than 30 pages. These essays will be used by the Honors Committee (comprised of the Head of Dramatic Literature, History, and Theory and two additional members of the Drama faculty) to determine admission. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted.

Beyond fulfilling the regular requirements of the Drama major, honors students must take three additional upper-division courses in dramatic literature, history, and/or theory, one of which must be focused on theory. Upper-division courses in other departments may be used to fulfill these requirements, as long as the Honors Committee approves them.

Honors students must also write an honors thesis, a 30–40 page research paper written under the supervision of a faculty member on a topic chosen by the student. In consultation with the student, the adviser for this project is selected before the end of the fall quarter of the student’s senior year. Students develop their projects until the spring quarter when they enter the writing phase. It is only during the spring quarter that students achieve full course credit for their work on the thesis, in the form of an independent study course with their advisor. This independent study is the final course of the program.

Successful graduating seniors will receive the “Honors in Dramatic Literature, History, and Theory” notation on their official transcript.

**Honors in Music Theatre**

Successful graduating seniors in both the B.A. in Drama and the B.F.A. in Music Theatre can achieve Honors in Music Theatre. An overall GPA of 3.2 or higher is required along with an overall GPA of 3.4 in all music theatre courses. B.F.A. students need to complete all course work listed under “Departmental Requirements for the B.F.A. Major” while B.A. students need to complete the following additional music theatre courses:

A. Complete the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 142</td>
<td>Music Theatre Workshop II</td>
</tr>
<tr>
<td>DRAMA 143A-143B-143C</td>
<td>Music Theatre Workshop I and Music Theatre Workshop II and Music Theatre Workshop III</td>
</tr>
<tr>
<td>DRAMA 145</td>
<td>Music Theatre Singing (taken three times)</td>
</tr>
<tr>
<td>DRAMA 146</td>
<td>NYSP-Preparation</td>
</tr>
</tbody>
</table>
DRAMA 148A- 148B- 148C
History of American Musical Theatre
and History of American Musical Theatre
and History of American Musical Theatre

DRAMA 149
Music Proficiency for Actors

DRAMA 176
Script and Score

B. Select one of the following in any combination:

DRAMA 182A- 182B
Dance Technique, Level I
and Dance Technique, Level I

DRAMA 183A- 183B
Dance Technique, Level II
and Dance Technique, Level II

DRAMA 190
NYSP-Acting

DRAMA 191
NYSP - Dance

DRAMA 192
NYSP - Singing

DRAMA 193
NYSP - Performance

DRAMA 194
NYSP-UCI Residency

Two ballet classes in Dance.

One tap class in Dance.

One jazz class in Dance.

At graduation, successful Honors students receive the “Honors in Music Theatre” notation on their transcripts.

Honors in Stage Management Program

The Honors in Stage Management Program provides the opportunity for Drama majors to concentrate on the study and practice of stage management. Honors students study basic and advanced stage management techniques, participate in classes with graduate stage managers, work as assistant stage managers with the graduate stage managers on graduate student-directed and faculty-directed productions, and stage manage a graduate student-directed or faculty-directed production at UCI.

Eligibility requirements are (1) minimum one year in good standing at UCI as a Drama major; (2) completion of three of the following: DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D, DRAMA 50F or equivalent courses; (3) completion of DRAMA 50E; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all stage management and production courses; (5) completion of eight units of Drama 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Stage Management Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year but no later than the spring quarter of their junior year. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted to the program as determined by the Honors Committee. Upon completion of eligibility requirements, the student will submit to the Honors Committee: (1) two prompt books; (2) a resume including all stage management and production experience; (3) letters of reference from two directors with whom the student has worked; and (4) a written paper on the subject of stage management.

Students receive the “Honors in Stage Management” notation on their final transcript; nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews; assistant stage manager assignments working with graduate stage managers; and a stage management assignment on a graduate student-directed or faculty-directed production.

Honors candidates meet with the Head of Stage Management at the beginning of every quarter to evaluate their progress.

Degree Offered

M.F.A. in Drama, with emphasis in Acting, Directing, Design, Music Direction, or Stage Management.

A graduate emphasis in Feminist Studies also is available. Refer to the Department of Gender and Sexuality Studies section of the Catalogue for information.

Admission

Applicants for admission to the degree program must meet the general requirements for admission to graduate study and hold a B.A., B.F.A., or higher degree.

Applicants must submit dossiers of biographical information and theatrical experience, together with photographs, essays, reviews, production books, and portfolios, as appropriate.

Normally an audition is required for all applicants who intend to follow the curriculum in Acting. UCI coordinates its auditions with the University/Resident Theatre Association (U/RTA), and conducts auditions, both for U/RTA finalists and UCI applicants, in New York, Chicago, San Francisco, and Irvine during January and February. Other U/RTA audition sites may be considered. Interviews for applicants in Directing, in Design, in Music Direction, and in Stage Management also are required.

General Degree Requirements

Normally three years of residence is required. Each candidate must enroll for three courses each quarter for nine quarters, exclusive of summer sessions.

The normative time to degree for students in the M.F.A. program is three years. Residence is required. The maximum time to degree can be extended to four years only through petition to the Head of the Program for extenuating circumstances. Students who do not complete the degree in four years will be recommended for academic disqualification.

During the first year of residence each candidate will prepare, for credit, two graduate projects, in acting, directing, design, music direction, stage management, theatrical research, or a combination of two of these. Satisfactory completion of these projects, as determined by the faculty, is prerequisite to entering the second year of the program.

The required thesis normally consists of directing, designing, musically directing, stage managing, or playing a principal role in a major production, and collecting in essay form the evidences of research, analysis, and judgments which formed a part of the production experience.

Each graduate student is expected to participate in productions throughout residence at UCI.

Specific course requirements must be satisfied in one of the following four areas:

Acting Requirements

A. Select nine graduate studios in acting:

<table>
<thead>
<tr>
<th>DRAMA 200</th>
<th>Graduate Studio: Acting</th>
</tr>
</thead>
</table>

B. Select, in tandem, nine graduate studios in:

<table>
<thead>
<tr>
<th>DRAMA 201</th>
<th>Graduate Studio: Voice</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRAMA 202</td>
<td>Graduate Studio: Speech</td>
</tr>
<tr>
<td>DRAMA 203</td>
<td>Graduate Studio: Movement</td>
</tr>
<tr>
<td>DRAMA 206</td>
<td>Graduate Studio: Voice/Movement Dynamics</td>
</tr>
</tbody>
</table>

C. Select three master classes in acting from various topics offered in DRAMA 219.

D. Complete the following:

<table>
<thead>
<tr>
<th>DRAMA 251A</th>
<th>Foundations of Theatre</th>
</tr>
</thead>
</table>
E. Select one seminar in dramatic literature, performance theory, criticism, history of theatre, or contemporary theatre from the following:

| DRAMA 220–225 |

F. Select six graduate projects, of which two may be the following professional internships:

| DRAMA 240 | Graduate Projects |
| or DRAMA 295 | Professional Internship |

A total of 110 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

**Design Requirements**

A. Select seven graduate studios in design seminars:

| DRAMA 255 | Graduate Design Seminar |

B. Select six courses in graduate projects (one of which may be a professional internship: DRAMA 295):

| DRAMA 240 | Graduate Projects |

C. Select two elective courses from courses numbered 100 and above.

D. Select four courses in dramatic literature, performance theory, criticism, or history of theater from the following:

| DRAMA 220 | Seminar in Dramatic Literature |
| DRAMA 221 | Seminar in Criticism |

| DRAMA 164A | History of Costume |
| DRAMA 164B | History of Costume |

or other substitutions as approved by mentor.

E. Select three courses in design techniques from the following:

| DRAMA 258–282 |

F. Complete three foundation courses taken during the first year of study:

| DRAMA 251A-251B-251C | Foundations of Theatre and Foundations of Theatre |

G. Select eight Colloquium courses:

| DRAMA 259 | Theatre Colloquium |

H. Complete the following:

| DRAMA 256 | Survival and Professional Practice in Design |

A total of 112 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

**Directing Requirements**

A. Select nine graduate studios in directing:

| DRAMA 211 | Graduate Studio: Directing (one of which is the creation of a thesis portfolio and resume) |

B. Complete two courses in Foundations:

| DRAMA 251A-251C | Foundations of Theatre and Foundations of Theatre |

C. Select one course in Multiculturalism:

| DRAMA 220 | Seminar in Dramatic Literature |

D. Select two courses as professional internships:

| DRAMA 295 | Professional Internship |

E. Select two courses in acting:

| DRAMA 200 | Graduate Studio: Acting (may include movement, voice classes approved by the Head of Directing) |

F. Select two seminars in dramatic literature, performance theory, criticism, theatre history

| DRAMA 199 | Project in Theatre |
| DRAMA 221 | Seminar in Criticism |
DRAMA 248A, 248B, 248C
History of American Music Theatre and History of American Musical Theatre

G. Select six projects:
DRAMA 240
Graduate Projects (of which one is the thesis and one is an off-site production)

H. Select two design or stage management courses (approved by the Head of Directing)
DRAMA 157
Lighting Composition
DRAMA 159
Proseminar in Theatre Design
DRAMA 199
Project in Theatre
DRAMA 254
Graduate Stage Management
DRAMA 255
Graduate Design Seminar

I. And a minimum of three electives.

A total of 116 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Music Direction Requirements
A. Select three projects in theatre:
DRAMA 199
Project in Theatre

B. Complete three courses in singing:
DRAMA 241
Singing Pedagogy

C. Complete nine courses in conducting:
DRAMA 242
Conducting

D. Complete one course in form and analysis:
DRAMA 243
Script and Score

E. Complete three courses in scene study:
DRAMA 246A
Musical Scene Study I
DRAMA 246B
Musical Scene Study II
DRAMA 246C
Musical Scene Study III

F. Complete three quarters in abbreviated musicals:
DRAMA 247
Musicals Abridged

G. Complete three courses in American Musical Theatre History:
DRAMA 248A
History of American Music Theatre
DRAMA 248B
History of American Musical Theatre
DRAMA 248C
History of American Musical Theatre

H. Complete nine quarters in musical direction projects:
DRAMA 249
Graduate Music Direction

I. Complete two courses in foundations of theatre:
DRAMA 251A
Foundations of Theatre
DRAMA 251C
Foundations of Theatre

J. Complete one course in orchestration:
MUSIC 136
Instrumentation

K. Complete one elective

A total of 128 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Stage Management Requirements
A. Select seven graduate studios in stage management:
DRAMA 254
Graduate Stage Management

B. Complete one thesis project course:
DRAMA 257E
Thesis Writing Project-Stage Management

C. Select seven courses in graduate projects:
DRAMA 240
Graduate Projects

D. Complete one professional internship course:
DRAMA 295  Professional Internship

E. Select three electives as approved by the faculty advisor from the following:

- graduate-level (DRAMA 200+)
- upper-division (DRAMA 100–199)

F. Complete three courses in foundations in theatre:

- DRAMA 251A- 251B- 251C  Foundations of Theatre and Foundations of Theatre and Foundations of Theatre

G. Select two courses in production techniques from the following:

H. Select one course in dramatic literature, criticism, contemporary theatre, or history of music theatre from the following:

- DRAMA 220  Seminar in Dramatic Literature
- DRAMA 221  Seminar in Criticism

A total of 112 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Doctoral Degree Program

Degree Offered

Ph.D. in Drama and Theatre.

This is a joint program offered by the UCI Department of Drama and the UCSD Department of Theatre and Dance.

Preparation

Students with a B.A. (minimum GPA of 3.5), M.A., or M.F.A. degree in Drama and Theatre are eligible for admission to the doctoral program. Students with training in literature (or another area in the humanities) will also be considered, provided they can demonstrate a background in drama or theatre. Experience in one of the creative activities of theatre (acting, directing, playwriting, design, dramaturgy) enhances a student’s chances of admission.

All applicants are required to take the Graduate Record Examination and to submit samples of their critical writing.

While not required for admission, a working knowledge of a second language is highly desirable (see Language Requirement).

Course of Study

Students are required to take a minimum of 144 units, which is equivalent to four years of full-time study (full-time students must enroll for a minimum of 12 units each quarter). Forty of these units are taken in required seminars; the balance is made up of elective seminars, independent study and research projects (including preparing the three qualifying papers), and dissertation research. Students must take a minimum of one seminar per year in the UCSD Department of Theatre and Dance. The program of study makes it possible for students to take a significant number of elective courses and independent studies both with faculty in Drama and Theatre and in other departments.

Required Courses

Students must take a minimum of 12 units (three seminars) each of DRAMA 290 Dramatic Literature and Theatre History Prior to 1900 and DRAMA 291 Dramatic Literature and Theatre History, 1900 to Present, and 16 units (four seminars) of DRAMA 292 Cultural and Critical Theory.

All graduate courses may be repeated when the topic varies. Descriptions of the topics to be treated in a given academic year are published by the Department in the fall. Enrollment in each course requires the consent of the instructor. The courses are limited to registered doctoral students.

These 10 required seminars must be completed by all students, including those who have an M.A. or an M.F.A. degree, before the end of the third year. In addition, students must pass comprehensive examinations at the end of their first and second years.

DRAMA 293 Directed Studies and DRAMA 294 Dissertation Research are also required.

Graduate Emphasis in Dramaturgy (Elective):

This Emphasis may be taken at any time during a graduate student's doctoral work, preferably during the first 4 years of graduate study, prior to the dissertation. The Emphasis includes 3 courses: DRAMA 244 Dramaturgy; Theory and Methods; DRAMA 297 Dramaturgy Practicum; DRAMA 290 Dramatic Literature and Theatre History Prior to 1900 or DRAMA 291 Dramatic Literature and Theatre History, 1900 to Present, with a research component on dramaturgy in consultation with the Instructor.
Comprehensive Examinations

In the first year, students prepare for the Written Comprehensive Examination, which is based on a reading list of approximately 150 titles ranging from the Ancient Greeks to the present. Students take this examination at the beginning of the fall quarter of their second year. (Comprehensive examinations are scheduled at the beginning of fall quarter in order to allow students the summer to prepare.) Students who fail the Written Comprehensive may retake it no later than the first week of winter quarter of their second year. Students who fail the Written Comprehensive for a second time are dismissed from the program.

In their second year, students prepare for the Oral Comprehensive Examination. The reading list for this examination is designed to permit students to acquire a knowledge of their dissertation subject area, broadly conceived. The reading list is compiled by the student and the dissertation advisor, in consultation with other members of the faculty, as appropriate; the reading list must be established by the end of winter quarter of the second year. Students take the Oral Comprehensive at the beginning of the fall quarter of their third year. Students also submit a dissertation prospectus (approximately five pages) when they take this examination. Students who fail the Oral Comprehensive may retake it no later than the first week of winter quarter of their third year. Students who fail the Oral Comprehensive for a second time are dismissed from the program.

Advancement to Candidacy: Three Qualifying Papers

Students normally select a dissertation advisor during their second year and must do so before the end of spring quarter of that year. In consultation with the dissertation advisor and other faculty members, students develop topics for three qualifying papers, which are written during their third year. The three qualifying papers—one long (approximately 50 pages) and two short (approximately 30 pages each)—must be completed by the end of the third year; these completed papers provide the basis for the Oral Qualifying Examination. Students write the long paper under the direction of their dissertation advisor; it is understood that the long paper is preparatory to the dissertation. The short papers deal with other related topics, subject to the approval of the student’s advisors; the two short papers are understood as engaging in exploring the larger contexts of the dissertation. The normative time for students to pass the Qualifying Examination and advance to candidacy is at the end of their third year; students must advance to candidacy no later than the end of fall quarter of their fourth year. Once advanced to candidacy, students write their dissertation which, upon completion, is defended in a final oral examination.

Students may select a dissertation advisor from either the UCI Department of Drama or the UCSD Department of Theatre and Dance. All UCI doctoral dissertation committees must include at least one faculty member from UCSD.

Language Requirement

Students are required to complete an advanced research project using primary and secondary material in a second language (materials may include live and/or recorded performance; interviews with artists, critics, and scholars; and other non-documentary sources, as well as more conventional textual sources). This requirement may be satisfied by writing a seminar paper or a qualifying paper (see Advancement to Candidacy above) that makes extensive use of materials in a second language. The second-language requirement must be satisfied before the end of the third year. This requirement will not be waived for students who are bi- or multilingual; all students are required to do research-level work in more than one language.

It is assumed that students will have acquired a second language before entering the doctoral program, although second-language proficiency is not a requirement for admission. While students may study one or more second languages while at UCI or UCSD, language courses may not be counted toward doctoral program requirements.

Teaching

Students are required to teach a minimum of four quarters. No more than eight units of apprentice teaching may be counted toward the required 144 units.

Departmental Ph.D. Time-Limit Policies

Students must advance to candidacy by the end of the fall quarter of their fourth year. Departmental normative time for completion of the degree is five years; total registered time in the Ph.D. program at UCI or UCSD cannot exceed seven years.

Financial Support

Ph.D. students entering the program with a B.A. may be supported (either by teaching assignments or fellowships) for five years. Students who have an M.A. and have been given transfer credit may be supported for four years. Such support depends upon the funds available, the number of students eligible, and the student’s rate of progress.

Faculty

Lonnie R. Alcaraz, M.F.A. University of California, Irvine, Professor of Drama (lighting design, digital imaging)

Stephen F. Barker, Ph.D. University of Arizona, Interim Dean of the Claire Trevor School of the Arts and Professor of Drama (post-modern theatre, Beckett, critical theory)

Cynthia M. Bassham, M.F.A. American Conservatory Theatre, Lecturer with Security of Employment of Drama (voice, speech for actors, acting)

Richard A. Brestoff, M.F.A. New York University, Head of Acting and Professor of Drama (film and television acting)
Robin T. Buck, M.M. University of Southern California, **Professor of Drama; Music**

Daniel Gary Busby, D.M.A. University of California, Los Angeles, **Department Chair and Associate Professor of Drama** (music theatre, singing, conducting)

Dennis R. Castellano, M.F.A. University of California, Irvine, **Head of Music Theatre and Senior Lecturer with Security of Employment of Drama** (music theatre)

Robert S. Cohen, D.F.A. Yale University, **Professor Emeritus of Drama** (acting theory, acting, directing)

Myron L. DeLaney, M.F.A. University of California, Irvine, **Lecturer with Security of Employment of Drama** (music theatre, singing, acting)

Holly Durbin, M.F.A. University of California, Los Angeles, **Professor of Drama** (costume design)

Keith Fowler, D.F.A. Yale University, **Professor Emeritus of Drama** (directing, acting)

Clayton Garrison, Ph.D. Stanford University, **Professor Emeritus of Drama** (opera, musical theatre, movement, dramatic literature)

Douglas S. Goheen, Ph.D. University of Denver, **Professor Emeritus of Drama** (scenery design, digital imaging)

George C. Harvey, M.F.A. University of California, Irvine, **Professor Emeritus of Drama** (artistic direction, producing, lighting design)

Donald D. Hill, M.F.A. University of Southern California; Associate Producer, **Head of Stage Management and Senior Lecturer with Security of Employment of Drama** (stage management, directing, acting)

Michael K. Hooker, M.F.A. California Institute of the Arts, **Professor of Drama** (sound design)

Ketu H. Katrak, Ph.D. Bryn Mawr College, **Professor of Drama; Comparative Literature** (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Madeline Kozlowski, M.F.A. Brandeis University, **Professor Emerita of Drama** (costume design)

Anthony James Kubiak, Ph.D. University of Wisconsin-Madison, **Professor of Drama** (American and modern drama, modern poetry, critical theory, philosophy)

Daphne Pi-Wei Lei, Ph.D. Tufts University, **Head of Doctoral Studies and Professor of Drama; Asian American Studies** (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Sandra T. Loh, B.S. California Institute of Technology, **Associate Adjunct Professor of Drama** (personal theatre making, artistic entrepreneurship)

Annie M. Loui, **Professor of Drama** (movement, directing, acting)

Mihai Maniutiu, Ph.D. Caragiale Academy of Theatrical Arts and Cinematography, **UCI Distinguished Professor of Drama** (directing)

David J. McDonald, Ph.D. Stanford University, **Professor Emeritus of Drama** (dramatic theory, Irish drama, theatre history, playwriting)

Ian Andrew Munro, Ph.D. Harvard University, **Associate Professor of Drama** (European drama and performance, early modern popular culture, theatrical performance of wit)

Vincent Olivieri, M.F.A. Yale University, **Head of Design and Associate Dean of Graduate Affairs and Associate Professor of Drama** (sound design)

Jane M. Page, M.F.A. Indiana University, **Head of Directing and Assistant Professor of Drama** (directing, acting)

Andrew A. Palermo, B.F.A. University of Cincinnati, College-Conservatory of Music, **Assistant Professor of Drama** (music theatre choreography)

Janelle Reinelt, Ph.D. Stanford University, **Professor Emerita of Drama** (British theatre, political theory, performance)

Bryan R. Reynolds, Ph.D. Harvard University, (Shakespeare, Renaissance drama, critical theory, feminist theory, performance theory, cultural studies)

Eli Simon, M.F.A. Brandeis University, **UCI Chancellor's Professor and Professor of Drama** (acting, directing)

Eli Simon, M.F.A. Brandeis University, **UCI Chancellor's Professor and Professor of Drama** (acting, directing)

Eli Simon, M.F.A. Brandeis University, **UCI Chancellor's Professor and Professor of Drama** (acting, directing)

Eli Simon, M.F.A. Brandeis University, **UCI Chancellor's Professor and Professor of Drama** (acting, directing)

Jaymi Smith, B.F.A. DePaul University, **Associate Professor of Drama** (lighting design)

Philip D. Thompson, M.F.A. University of California, Irvine, **Head of Acting and Professor of Drama** (voice, speech for actors, acting)

Richard J. Triplett, M.A. Otis Art Institute, **Professor Emeritus of Drama** (scenery and costume design, history of design)
Joel R. Veenstra, M.F.A. University of California, Irvine, *Lecturer with Potential Security of Employment of Drama* (stage management, acting)

Robert K. Weimann, Ph.D. Humboldt State University, *Professor Emeritus of Drama* (theory, criticism, literature)

Frank B. Wilderson III, Ph.D. University of California, Berkeley, *Professor of African American Studies; Culture and Theory; Drama* (Afro-Pessimism, film theory, Marxism, dramaturgy, narratology.)

**Courses**

**DRAMA 10. Introduction to Theatre. 4 Units.**
An interactive introduction to the world of theatre that serves to develop an appreciation of theatrical arts, to establish an awareness of landmarks within the performance history, and to create an understanding of the collaborative roles and departments that exist.

**(IV)**

**DRAMA 11. The Rock and Roll Spectacle Show. 4 Units.**
A thorough overview to the development and cultural significance of the Rock ’n’ Roll Spectacle show. Focus on historical and recent developments of the spectacle show, trends in the aesthetics of the field, and various sub-genres.

**(IV)**

**DRAMA 14. Performing Rock ’N’ Roll. 4 Units.**
Explores major movements in the history of rock ’n’ roll in terms of performance, not virtuosity necessarily of the performers as musicians, rather as performances of aesthetics in modes of embodied ideology, iconoclastic spectacle, mixed media fashion, and subcultural formation.

**DRAMA 15. Performance Now. 4 Units.**
Exposes students to what is most current in the world of performance and theatre. Begins with a series of lectures on the idea of performance, and the various theories that frame it.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

**(IV)**

**DRAMA 16. Performing Culture. 4 Units.**
Culture, aesthetics, and ideology (combined in the concept "subculture") work to fashion social identities. Using theories and methodologies of performance studies, with an emphasis on American culture, this course explores why and how culture is reinforced through performance.

**(IV)**

**DRAMA 20A. Culture in Performance. 4 Units.**
A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

**(IV)**

**DRAMA 20B. Culture in Performance. 4 Units.**
A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

**(IV)**

**DRAMA 20C. Culture in Performance. 4 Units.**
A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

**(IV)**

**DRAMA 30A. Acting. 4 Units.**
A one-year course in basic acting technique and discipline. Stage technique and stage discipline. Freeing vocal and physical movement and liberating emotional power. Elementary stage movement and voice. Elimination of regionalisms in speech. Overcoming stage fright. Readings in acting theory.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.
DRAMA 30B. Acting. 4 Units.
A one-year course in basic acting technique and discipline. Improvisations and scenes. Rehearsal and presentation of at least two scenes with different partners. Developing stage contact with tactics in a “play” situation.

Prerequisite: DRAMA 30A.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

DRAMA 30C. Acting. 4 Units.

Prerequisite: DRAMA 30A and DRAMA 30B.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre students have the first consideration for enrollment.

DRAMA 34. Movement for Actors. 4 Units.
A studio course in fundamentals of stretch, strength, and alignment; exploring spatial awareness and physical control through mime isolations, techniques, and related improvisation.

Repeatability: May be taken for credit 3 times.

DRAMA 35. Speech for the Theatre. 4 Units.
A course aimed at (1) improving natural, clear, unaffected speech and (2) eliminating negative habits and regional accents: exercises for physical tension, vocal support, tone production, vocal quality, and articulation.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 40A. Development of Drama. 4 Units.
The development of Western Drama, concentrating on the drama’s intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Greek Drama through Shakespeare.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 40B. Development of Drama. 4 Units.
The development of Western Drama, concentrating on the drama’s intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Restoration Drama through Ibsen.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 40C. Development of Drama. 4 Units.
The development of Western Drama, concentrating on the drama’s intellectual, social, and artistic foundations. About 10 plays and supplementary material are read each quarter. Contemporary Drama. Post Naturalistic theatre.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)
DRAMA 50A. Introduction to Costume Design. 4 Units.
Introduction to the process and procedures employed by the costume designer for the theatre. The elements of design are discussed in the context of character development, historical period, and style. Exercises extend to drawing, rendering, and investigation of human proportions.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 50B. Introduction to Scenic Design. 4 Units.
Introduction to the principles and practice of scenic design. Weekly problems include research into various periods and styles of production with an emphasis on the conceptual idea. Perspective drawing, rendering, and model building are covered in studio exercises and assignments.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 50C. Introduction to Lighting Design. 4 Units.
Introduction to the principles, theories, and equipment employed by the lighting designer for the stage. Areas of investigation include history, technology, and script analysis. Detailed studio attention is given to the theory and practice of design.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 50D. Introduction to Sound Design. 4 Units.
Principles, theories, equipment use, and terminology employed by the sound designer for the stage. Areas of study include history, technology, and script analysis. Focuses on the theory and practice of design.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 50E. Introduction to Stage Management. 4 Units.
A basic study of theatrical, dance, and opera stage management practices, forms, and methods, from first script reading to closing night. Opportunity to observe professionals at work in regional and touring situations as available.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 50F. History and Theories of Scenography. 4 Units.
Explores the aesthetics of the stage and the evolution of scenery and costume in live performance as inspiration for today’s theatre analysts. Topics include shared vocabulary, historical trends, shifts in approaches, and focus briefs on leaders in the field.

Prerequisite: Prerequisite or corequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 60. Topics in Advanced Stage Management. 4 Units.
Nurture a greater appreciation for the stage manager and his or her process, and supports students who are interested in pursuing a career in professional stage management.

Repeatability: May be taken for credit 3 times as topics vary.

DRAMA 65. Music Theatre Workshop I. 2 Units.
Basic vocal technique and characterization of musical theatre repertoire explored.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

DRAMA 80. Directing I. 4 Units.
Introduction to comprehensive directing process from pre-production to opening. Focus on fundamental skills: analysis, staging, action, actor coaching, and elements of design. Skills applied to scripted theatrical material. Develop a language for commenting on theatrical production. Attending and critiquing productions.

Prerequisite: DRAMA 30A and DRAMA 30B.
DRAMA 100. University Theatre . 4 Units.
Rehearsal and performance in a faculty-directed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

DRAMA 101A. Theatre Production: Costume. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101B. Theatre Production: Scenic. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101C. Theatre Production: Lighting. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101D. Theatre Production: Stage Management. 1-8 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit 24 times.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101E. Theatre Production: Audio. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101S. Theatre Production: Theatre Management. 1-6 Units.
The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 103. Lectures in Dramatic Literature. 4 Units.
Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.
DRAMA 103W. Lectures in Dramatic Literature. 4 Units.
Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth-Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 109. Special Topics in Theory and Criticism. 4 Units.
Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 109W. Special Topics in Theory and Criticism. 4 Units.
Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 110. Special Topics in Classical Dramas . 4 Units.
Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.
Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 110W. Special Topics in Classical Dramas. 4 Units.
Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.
Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.

DRAMA 112. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.
Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.
DRAMA 112W. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.
Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 116. Special Topics in Nineteenth-Century Dramas. 4 Units.
Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 116W. Special Topics in Nineteenth-Century Dramas. 4 Units.
Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 118. Special Topics in Modern and Contemporary Drama. 4 Units.
An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 118W. Special Topics in Modern and Contemporary Drama. 4 Units.
An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 121. Introduction to Asian Theatre. 4 Units.
An introduction to some of the major traditional theatrical forms and dramatic texts from India, China, and Japan. Other than dramatic texts (in English translation), attention is also paid to theory, history, and performance styles of traditional Asian theatre.

Restriction: Drama and Music Theatre majors only.
DRAMA 122. Asian American Theatre. 4 Units.
An introduction to the history and development of Asian American theatre and drama. Besides play analysis, special attention is also paid to the history and politics of Asian American identity and experience, as well as to aspects of theatrical performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.

Restriction: Drama and Music Theatre majors only.

DRAMA 123. Multicultural Theatres. 4 Units.
A study of the history, culture, aesthetics, and literature of various traditional performing arts and their connections to the contemporary multicultural society.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 126. African American Film and Drama. 4 Units.
A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Drama and Music Theatre majors only.

DRAMA 126W. African American Film and Drama. 4 Units.
A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Drama and Music Theatre majors only.

DRAMA 129. Advanced Topics in Performance. 4 Units.
Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 129W. Advanced Topics in Performance. 4 Units.
Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

DRAMA 130. Intermediate Acting. 4 Units.
Rehearsal and presentation of scenes from contemporary material. Focus on connection with scene partner, playing actions, and text analysis. Introduction to the credibility and theatricality of characterization and style.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C with an average grade of B or better. For transfer students: one year of beginning acting with an average grade of B or better.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.
DRAMA 132A. Writing for Performance. 4 Units.
Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 132AW. Writing for Performance. 4 Units.
Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 134. Studio for Advanced Movement for Actors. 4 Units.
Studio course in conditioning and partnering techniques to the practice of contact improvisation. Contact improvisation is explored and applied in scene study.

Prerequisite: DRAMA 34. DRAMA 34 with a grade of B or better.

Repeatability: May be taken for credit 3 times.

DRAMA 135. Master Classes in Acting. 1-4 Units.
Advanced acting in specialized areas including acting for the camera: situation comedy, commercials; auditioning and industry preparation; Shakespeare; Molière; Chekov; improvisation; advanced movement and voice and speech for the actor; self-starting; stage combat; repertory acting, singing; comedy; clowning; and masks.

Prerequisite: DRAMA 130. DRAMA 130 with a grade of B or better.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 136. Music Theatre Acting. 4 Units.
An acting class exclusive to the students in the B.F.A. in Music Theatre program.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C.

Restriction: Music Theatre majors only.

DRAMA 142. Music Theatre Workshop II. 4 Units.
A workshop in audition technique and song interpretation.

Prerequisite: Audition required.

Repeatability: May be taken for credit 4 times.

DRAMA 143A. Music Theatre Workshop I. 4 Units.
Scene study and song repertoire examined by era for the advanced Music Theatre student. 1800's-1940.

Prerequisite: DRAMA 142. Audition required.

DRAMA 143B. Music Theatre Workshop II. 4 Units.
Scene study and song repertoire examined by era for the advanced Music Theatre student. 1940's-1970's.

Prerequisite: DRAMA 142. Audition required.

DRAMA 143C. Music Theatre Workshop III. 4 Units.
Scene study and song repertoire examined by era for the advanced Music Theatre student. 1970's-present.

Prerequisite: DRAMA 142. Audition required.
DRAMA 144. Music Theatre Workshop IV. 4 Units.
A performance class concentrating on role building. Work culminates with in-class performances of abbreviated versions of musicals.
Prerequisite: For B.F.A. students: DRAMA 143A, DRAMA 143B, DRAMA 143C, and audition. For Drama graduate students: audition required.
Repeatability: May be taken for credit 4 times.
Restriction: Music Theatre majors and Drama graduate students only.

DRAMA 145. Music Theatre Singing. 1 Unit.
Private weekly voice lessons for the advanced Music Theatre student.
Corequisite: DRAMA 143A or DRAMA 144.
Repeatability: May be taken for credit 9 times.
Restriction: Music Theatre majors only.

DRAMA 146. NYSP-Preparation. 4 Units.
Class preparation for the New York Satellite Program (NYSP) - an immersion experience in New York City for the musical theatre performer.
Prerequisite: Admission is by audition and the following prerequisites: DRAMA 30C and two quarters of DRAMA 148A, DRAMA 148B, or DRAMA 148C (if the 148 prerequisite is not complete at the time of auditions, student must enroll during the fall and winter quarters in the same year as the trip to New York); senior Drama majors must have successfully completed DRAMA 40C and DRAMA 120C; non-Drama majors must have sophomore standing or higher and must carefully plan their course schedule as many spring quarter classes cannot be taken while part of the NYSP.
Repeatability: May be taken for credit 2 times.

DRAMA 148A. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.
Restriction: Drama and Music Theatre majors only.
Concurrent with DRAMA 248A.

DRAMA 148B. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1940s-1970s.
Restriction: Drama and Music Theatre majors only.
Concurrent with DRAMA 248B.

DRAMA 148C. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1970s to present day.
Restriction: Drama and Music Theatre majors only.
Concurrent with DRAMA 248C.

DRAMA 149. Music Proficiency for Actors. 2 Units.
A musicianship class introducing basic musical terminology, theory, and sight singing skills.
Repeatability: May be taken for credit 2 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 150. Costume Production Techniques. 4 Units.
Studio instruction in pattern making, draping, millinery, and construction techniques.
Prerequisite: DRAMA 50A.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theatre majors only.
DRAMA 157. Lighting Composition. 4 Units.
Provides an opportunity for students to pursue stage lighting composition in a studio atmosphere. Laboratory practice includes weekly exercises in style and genre. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 158. Topics in Theatre Design. 4 Units.
Examines the various functions of scenery and costume: locale, historical period, mood, and atmosphere, with special assignments in each area. Discussion of problems in scenic metaphors and visualization, emphasizing techniques of planning and presentation (e.g., floor plans, models, and rendering).

Prerequisite: DRAMA 50A OR DRAMA 50B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama or Music Theatre majors only.

DRAMA 159. Proseminar in Theatre Design. 4 Units.
Topics in theatre design.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 160. Light Plotting Techniques. 4 Units.
A study of the development of theatrical lighting plots from initial conceptualization through final documentation. Areas of emphasis include script analysis, visual approaches, equipment selection, and compositional qualities of light.

Prerequisite: DRAMA 50C and DRAMA 157.

Restriction: Drama and Music Theatre majors only.

DRAMA 164A. History of Costume. 4 Units.
A study of the development of dress and the influence of cultural factors on clothing from the time of Egyptians to Early Baroque.

Prerequisite: DRAMA 50A.

Restriction: Drama and Music Theatre majors only.

DRAMA 164B. History of Costume. 4 Units.
A study of the development of dress and the influence of cultural factors on clothing from late Baroque to World War I.

Prerequisite: DRAMA 50A.

Restriction: Drama and Music Theatre majors only.

DRAMA 167. Fabric Modification Techniques. 4 Units.
Exploration of various dying, printing, painting, and texture modification techniques.

Prerequisite: DRAMA 50A.

Restriction: Drama and Music Theatre majors only.

DRAMA 168. Theatrical Mask Techniques. 4 Units.
Design and construction of theatrical masks including paper mache, leather, plastics, and latex. Projects employ traditional and contemporary techniques.

Prerequisite: DRAMA 50A.

Restriction: Drama and Music Theatre majors only.
DRAMA 169. Costume Rendering Techniques. 4 Units.
Development of costume rendering skills and techniques. Explores collage, pastel, and ink and emphasizes watercolor.

Prerequisite: DRAMA 50A.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 176. Script and Score. 4 Units.
A form and analysis seminar discussing the libretto and score of landmark musicals.

Prerequisite: Two courses from DRAMA 148A or DRAMA 148B or DRAMA 148C.

Restriction: Drama and Music Theatre majors only.

DRAMA 177. Song Repertoire. 2 Units.
A song coaching class culminating in a song recital or showcase. Each quarter will feature a different composer, lyricist, or musical style.

Repeatability: May be taken for credit 6 times.

Restriction: Music Theatre majors only.

DRAMA 179. Intermediate Sound Design. 4 Units.
A project-based analysis of the principles of sound design for the theatre. Projects are executed in the sound design studio and may include sound manipulation and recording. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50D.

Restriction: Drama and Music Theatre majors only.

DRAMA 180. Contemporary Dramatic Criticism and Theory. 4 Units.
Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 180W. Contemporary Dramatic Criticism and Theory. 4 Units.
Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Drama 181. Acting Theory. 4 Units.
A study of the theory of acting, with readings in Plato, Aristotle, Quintilian, Shakespeare, Diderot, Stanislavsky, Brecht, Strasberg, Meisner, Grotowski, and other theorists, ancient to contemporary.

Prerequisite: DRAMA 130.

Restriction: Drama and Music Theatre majors only. Juniors only.

Concurrent with DRAMA 224.
DRAMA 182A. Dance Technique, Level I. 4 Units.
Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.
Repeatability: May be taken for credit 4 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 182B. Dance Technique, Level I. 4 Units.
Advanced beginner and intermediate dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 182A. Audition required.
Repeatability: May be taken for credit 4 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 183A. Dance Technique, Level II. 4 Units.
Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.
Repeatability: May be taken for credit 4 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 183B. Dance Technique, Level II. 4 Units.
Intermediate and advanced dance training including musical theatre, ballet, jazz and contemporary modern techniques and repertoire. Body conditioning is also a major component of the course.

Prerequisite: (DRAMA 65 or DRAMA 142) and DRAMA 183A. Audition required.
Repeatability: May be taken for credit 4 times.
Restriction: Drama and Music Theatre majors only.

DRAMA 184. Directing II. 4 Units.
The principles of stage directing, covering the director's functions in the areas of interpretation, composition, coaching, and styling a theatrical production. Directing exercises and projects; the final project is the preparation of a hypothetical proposal for a play production.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C and DRAMA 40A and DRAMA 40B and DRAMA 40C.
Repeatability: Unlimited as topics vary.
Restriction: Drama and Music Theater majors only.

DRAMA 185. Advanced Directing. 4 Units.
A seminar in directorial organization and research. Student prepares a textual and dramaturgical analysis, a production timetable, and a hypothetical production book of an assigned play.

Prerequisite: DRAMA 184.
Repeatability: May be repeated for credit unlimited times.
Restriction: Drama and Music Theatre majors only.

DRAMA 190. NYSP-Acting. 1-4 Units.
New York Satellite Program acting classes taught by guest faculty in New York.

Prerequisite: DRAMA 146.
Repeatability: May be taken for credit 2 times.
DRAMA 191. NYSP - Dance. 4 Units.
New York Satellite Program dance classes in ballet, tap, jazz, and musical theatre styles taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 192. NYSP - Singing. 4 Units.
New York Satellite Program private and group lessons in musical theatre singing taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 193. NYSP - Performance. 4 Units.
New York Satellite Program rehearsals and public, staged readings of original musicals in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 194. NYSP-UCI Residency. 4 Units.
New York Satellite Program follow-up classes and performances back on Irvine campus upon the return from New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 195. Music Theatre Dance - Special Topics. 1-4 Units.
Advanced dance classes in specialized areas including the dance styles of a choreographer (de Mille, Fosse, Robbins, Tune, Stroman), genre (tap, ballroom, jazz, swing, hip-hop), or in musical theatre choreography.

Prerequisite: DRAMA 182A or DRAMA 182B or DRAMA 182C or DRAMA 183A or DRAMA 183B or DRAMA 183C. Audition required.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 198. Director Class Project. 1-8 Units.
For students who are involved in the Director Class Projects at UCI as actors, directors, designers, stage managers and their assistants. M.F.A. Directors and the Head of Directing (HoD) supervise the projects.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

DRAMA H198. Honors Director Class Project. 1-4 Units.
For graduate student actors and undergraduate directors who are candidates for Honors in Directing and involved in the Director Class Projects. The Head of Directing (HoD) supervises these students.

Repeatability: Unlimited as topics vary.

DRAMA 199. Project in Theatre. 1-4 Units.
Independent theatre projects with Drama faculty.

Repeatability: Unlimited as topics vary.

DRAMA 200. Graduate Studio: Acting. 4 Units.
Work in graduate studio taken in tandem with graduate studios in stage voice (DRAMA 201), stage speech (DRAMA 202), and stage movement (DRAMA 203).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.
DRAMA 201. Graduate Studio: Voice. 1 Unit.
Graduate studio in vocal production for actors.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 202. Graduate Studio: Speech. 1 Unit.
Graduate studio in speech for actors.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 203. Graduate Studio: Movement. 2 Units.
Work in graduate studio: stage movement taken in tandem with nine graduate studios in acting (DRAMA 200), voice (DRAMA 201), speech (DRAMA 202), and voice/movement dynamics (DRAMA 206).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 206. Graduate Studio: Voice/Movement Dynamics. 2 Units.
Daily conditioning exercises.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 211. Graduate Studio: Directing. 4 Units.
Graduate studio in directing.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students only.

DRAMA 212. Graduate Studio: Playwriting. 4 Units.
Completion of a full-length play or its equivalent and production of a staged reading of the play at the end of the spring quarter. Discussion of relevant literary texts and student writings.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 219. Graduate Master Class. 1-4 Units.
Various topics such as Shakespeare, comedy, Molière, improvisation, Kabuki, television acting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 220. Seminar in Dramatic Literature. 4 Units.
Topics in Dramatic Literature.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 221. Seminar in Criticism. 4 Units.
Topics in criticism.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.
DRAMA 225. Seminar on Theatre Pedagogy. 4 Units.
A seminar on the major teaching systems in the dramatic arts with particular attention to professional arts training. Required prior to applying for Teaching Assistantships in studio areas.

Restriction: Drama graduate students only.

DRAMA 227. Communication Skills for Graduate Students. 2 Units.
Teaches basic public speaking techniques to graduate students, aids students in presenting persuasively for audiences large and small.

Grading Option: Satisfactory/unsatisfactory only.

DRAMA 240. Graduate Projects . 1-4 Units.
Various projects depending on student's concentration (acting, design, musical theatre, directing).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 241. Singing Pedagogy . 2 Units.
Learning how to teach voice lessons and coach musical theatre singing. Experiences include both private voice lessons and observing the lessons given to the B.F.A./Music Theatre students.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Direction students only.

DRAMA 242. Conducting . 2 Units.
Private conducting instruction to develop freedom of movement/expression, baton technique, ear training, and tempo memory for both rehearsal and performance situations in musical theatre.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate Music Directors only.

DRAMA 243. Script and Score . 4 Units.
A form and analysis seminar discussing the libretto and score of landmark musicals.

Restriction: M.F.A. in Music Direction students only.

Concurrent with DRAMA 176.

DRAMA 244. Dramaturgy: Theory and Methods. 4 Units.
Examines the practice, place, and theory of dramaturgy. Explores plays in terms of how they work: dramatic form and structure, historical context, and more. Study includes dramaturgy as a theatrical practice.

Restriction: Drama M.F.A. and Ph.D. students only.

DRAMA 246A. Musical Scene Study I. 4 Units.
Musically directing scenes from musicals of various time periods. Features works from the late 19th and early 20th centuries, including songwriters Gilbert and Sullivan, Irving Berlin, George Gershwin, Rodgers and Hart, and Cole Porter.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Director students only.

DRAMA 246B. Musical Scene Study II. 4 Units.
Musically directing scenes from musicals of various time periods. Features works from the middle of the 20th century including songwriters Rodgers and Hammerstein, Lerner and Loewe, Julie Styne, Kander and Ebb, and Jerry Herman.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate Music Directors only.
DRAMA 246C. Musical Scene Study III. 4 Units.
Musically directing scenes from musicals of various time periods. Features works from the late 20th and early 21st centuries including songwriters Stephen Sondheim, Andrew Lloyd Webber, Stephen Schwartz, Flaherty and Ahrens, and Jeanine Tesori.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate Music Directors only.

DRAMA 247. Musicals Abridged . 4 Units.
Musically directing abridged versions of musicals from various time periods and genres.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate Music Directors only.

DRAMA 248A. History of American Music Theatre. 4 Units.
A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.
Restriction: Graduate only.
Concurrent with DRAMA 148A.

DRAMA 248B. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1940s-1970s.
Restriction: Graduate only.
Concurrent with DRAMA 148B.

DRAMA 248C. History of American Musical Theatre. 4 Units.
A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1970s to present day.
Concurrent with DRAMA 148C.

DRAMA 249. Graduate Music Direction. 4 Units.
Various musical direction activities including the vocal direction, accompanying, and conducting of musical theatre performances.
Repeatability: May be taken for credit 9 times.
Restriction: M.F.A. in Music Direction students only.

DRAMA 251A. Foundations of Theatre. 4 Units.
Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.
Restriction: Drama graduate students only.

DRAMA 251B. Foundations of Theatre. 4 Units.
Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.
Restriction: Drama graduate students only.

DRAMA 251C. Foundations of Theatre. 4 Units.
Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.
Restriction: Drama graduate students only.

DRAMA 254. Graduate Stage Management. 4 Units.
Studio exercises and projects in stage management.
Repeatability: Unlimited as topics vary.
Restriction: Open only to Drama graduate students pursuing Stage Management emphasis.
DRAMA 255. Graduate Design Seminar. 4 Units.
Projects, lectures, and critical discussion in costume, scenery, lighting, and sound design.
Restriction: Open only to Drama graduate students pursuing Design emphasis.

DRAMA 256. Survival and Professional Practice in Design. 4 Units.
Provides an in-depth examination of business skills needed to survive as a theatrical designer. Required 'Bridge' course in the Design MFA programs, relevant to all disciplines.
Restriction: Drama graduate students only.

DRAMA 257A. Costume Thesis Project. 4 Units.
Development of thesis project with focus on organization, research, timeline, and execution.
Prerequisite: DRAMA 240.
Restriction: Drama graduate students only.

DRAMA 257B. Scenic Thesis Project. 4 Units.
Development of thesis project with focus on organization, research, timeline, and execution.

DRAMA 257E. Thesis Writing Project-Stage Management. 4 Units.
Development of thesis topic with focus on organization, research, timeline, and execution.
Prerequisite: 12 units of DRAMA 254.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Drama graduate students only.

DRAMA 258. Drawing for Designers. 2 Units.
A multi-skill level course in drawing technique focusing on skills essential to stage designers including line, proportion, perspective and creating dynamic compositions. Focus will primarily be in figure drawing but may include still-life, landscape, and architectural drawings. Materials fee.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 9 times.

DRAMA 259. Theatre Colloquium. 1 Unit.
Exposes students to a wider range of theatrical practitioners, theories, and topics through guest lecturers, special projects, and cross-disciplinary dialogue.
Repeatability: May be repeated for credit unlimited times.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 260A. Digital Costume Rendering. 4 Units.
A studio course in costume rendering for the theatre using computer image manipulation. Instruction in compositing and painting techniques and performance design conventions.

DRAMA 260B. Digital Textile Design and Printing. 4 Units.
A studio course in textile design using digital printing and embossing techniques. Instruction in state-of-the-art software and output manipulation for artistic expression.

DRAMA 261. Digital Design: Drawing/Painting/Rendering. 4 Units.
A studio course in scenic or costume rendering for the theatre using the computer for drawing/painting through the use of the digital pen/tablet.
Repeatability: May be taken for credit 2 times.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 262. Digital Design: 2D/3D Modeling. 4 Units.
A studio course in CAD's 2D drafting and 3D modeling capabilities for theatrical design. Instruction in state-of-the-art software for 2D and 3D object creation and theatrical presentation conventions.
Restriction: Drama graduate students and Drama and Theatre graduate students only.
DRAMA 263. Digital Design: 3D Rendering. 4 Units.
A studio course in theatrical design through 3d modeling on computer and use of state-of-the-art rendering software. Instruction emphasizes collaborative design process through the use of scenic designer/lighting designer teams for all projects.

Prerequisite: DRAMA 262.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 264. Lighting Graphics. 4 Units.
A studio course in the various graphic methods employed by lighting designers in the theatre. Projects include manual and CAD techniques for Light Plot and Paperwork creation.

Prerequisite: DRAMA 262.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 265. Digital Design: 2D CAD. 4 Units.
A studio course in theatrical design and architectural lighting design on the computer. Instruction in state-of-the-art software for 2D object creation. Theatrical and architectural standards implemented in performance design.

Prerequisite: DRAMA 262.
Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 266. Digital Design: Digital Audio Systems. 4 Units.
Comprehensive tutorial on digital audio including hard disk recording, editing, data compression, and ethernet audio distribution. Focus is on recording, editing, and delivery of audio as used by the sound designer in the digital domain.

Restriction: Drama graduate students only.

DRAMA 267. Digital Design: Creating Sounds from Scratch. 4 Units.
The process of analyzing sounds for their core timbral components and using that data to create new sounds - from realistic to fantastic - by means of digital manipulation.

Prerequisite: DRAMA 266.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 271. Conceptual Sound Design. 4 Units.
An intensive, project-based seminar for exploring relationships between sound and sight. Synesthesia, creative intent vs. audience perception, and sound/movement are typical of the many topics to be explored. A series of creative projects are assigned and critiqued in peer review.

Prerequisite: DRAMA 266.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 272. Musical Theatre Sound/Concert Sound. 4 Units.
A concept-to-opening study of the process of designing sound systems for musicals and live/touring sound. Special attention given to the paperwork and documentation required to package, build, and mix these shows.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 277. Critical Listening. 4 Units.
Exploration of the many variables that affect (and effect) the audio chain. Perceiving and understanding these parameters unlocks the art of controlling sound and stylizing cues. Also includes the process of equalizing-aligning sound systems and the art of audio mastering.

Prerequisite: DRAMA 266.
Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 279. Advanced Sound Design. 4 Units.
An in-depth investigation into sound design for the theatre. Special emphasis is placed on text analysis, design conception, content creation, content delivery, and design organization. Class projects include creating paper designs and paperwork for different texts.
DRAMA 280A. Techniques in Costume Design. 4 Units.
Student exercises in the techniques and implementation of costume design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Costume Design emphasis.

DRAMA 280B. Techniques in Scenery Design. 4 Units.
Student exercises in the techniques and implementation of scenic design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Scenic Design emphasis.

DRAMA 280C. Techniques in Lighting Design. 4 Units.
Student exercises in the techniques and implementation of lighting design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Lighting Design emphasis.

DRAMA 280D. Techniques in Sound Design. 4 Units.
Student exercises in the techniques and implementation of sound design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 282. Stage Electronics/Introduction to Show Control. 4 Units.
Using computers and dedicated hardware to cue, control or automate sound, scenery, and lighting for live performance and themed entertainment applications.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 290. Dramatic Literature and Theatre History Prior to 1900. 4 Units.
Studies in selected areas of dramatic literature and theatre history prior to 1900. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 291. Dramatic Literature and Theatre History, 1900 to Present. 4 Units.
Studies in selected areas of dramatic literature and theatre history, 1900 to present. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 292. Cultural and Critical Theory. 4 Units.
Studies in selected areas of cultural and critical theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 293. Directed Studies. 4-12 Units.
Directed study with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

DRAMA 294. Dissertation Research. 4-12 Units.
Dissertation research with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
DRAMA 295. Professional Internship. 1-12 Units.
An arranged internship at the South Coast Repertory Theatre, or other equity theatre company, for qualifying M.F.A. students. A stipend and equity points are provided by the theatre company.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students only.

DRAMA 297. Dramaturgy Practicum. 4 Units.
Requires doctoral students to identify two plays from the Drama Department’s season to work as dramaturges. Students write a Dramaturgy Booklet recording their research and interactions with director, actors, and the design team. Students will work with doctoral faculty.

Restriction: Drama doctoral students only.

DRAMA 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

Department of Music

Michael Dessen, Department Chair
303 Music and Media Building
949-824-6615
http://music.arts.uci.edu/

Overview
The curricular philosophy of the Department of Music is based on the ideals of the conservatory within the academy. The faculty are concerned with the performance and creation of music within the context of the highest standards of historical, aesthetic, and theoretical inquiry.

The faculty includes composers, musicologists and music theorists, conductors, and performers. All members of the faculty are highly active in their fields as publishing scholars, concert and recording artists, and well-known composers. Many of the instrumental instructors are drawn from the ranks of the Los Angeles Philharmonic, the Los Angeles Chamber Orchestra, the Pacific Symphony, and other orchestras in Southern California. The department also presents frequent performances and master classes by renowned guest artists, and houses several state of the art music technology facilities.

Career Opportunities
Musicians develop a wide range of transferable skills during their undergraduate career. Musicians learn how to think, to write, to present themselves in public, and to work collaboratively in different kinds of teams. They also demonstrate over the long term a determination and commitment, and a desire to succeed. With a degree in Music, students will find that many career paths lie before them, both within and beyond the diverse field of music.

B.A. Degree in Music

Requirements for the Bachelor’s Degree in Music
All students must meet University Requirements.

School Requirements: None.

Departmental Requirements—Common Curriculum: All courses must be completed with a grade of C- or higher, with an exception listed below.*

A student who does not receive a passing grade in the departmental Common Curriculum may retake the course one additional time. If the student does not pass the course on the second attempt, they will be dismissed from the music major.

The Bachelor of Arts (B.A.) degree program enables students to study music history, music theory, composition, or performance within a curriculum that is flexible enough to allow for a second major, study abroad, and other curricular options. A senior thesis or project is required.

All applicants, regardless of their degree objective, apply to the B.A. program and must demonstrate appropriate vocal or instrumental proficiency, as determined by the results of the Department’s required entrance audition (typically scheduled on campus in late January or early February). For the most up-to-date audition information, visit the Music Department website (http://music.arts.uci.edu).

A. Complete the following:

| MUSIC 15A- 15B- 15C | Musicianship I
| and Musicianship II | and Musicianship III |
### MUSIC 16A-16B-16C
Music Theory and Music Theory and Music Theory

### MUSIC 16D
Theory/Musicianship

### MUSIC 40B-40C
History of European Music: From the Renaissance through the Baroque and History of European Music: Hasse to Mahler

### MUSIC 40D
20th Century Music

*Exception: MUSIC 40B, MUSIC 40C, MUSIC 40D must be completed with a grade of D or higher.

B. Select six quarters of instrumental or vocal instruction for Music majors from the following:

**MUSIC 65-70**

## Additional Requirements for the Bachelor of Arts Degree

In addition to completing the common curriculum, students in the B.A. program must pass the departmental piano proficiency examination or take three quarters of MUSIC 10 (Piano for Majors) with a grade of C or better and complete the following course requirements:

### A. Select three courses in Theory, Composition, and Technology from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 51</td>
<td>Music Technology and Computers</td>

MUSIC 178  Jazz Orchestra  
MUSIC 182  Advanced Jazz Combo  
MUSIC 193  Conducting  
MUSIC 197  Word and Music  

D. Depending upon the student’s area of emphasis, one of the following senior projects (which may develop work originally completed in meeting the requirements of another course) must be completed:  
(1) a formal lecture or lecture/performance lasting a minimum of 20 minutes  
(2) a composition or portfolio of compositions of appropriate length growing out of work done in MUSIC 157  
(3) a thesis of at least 20 double-spaced pages on an appropriate musical subject  

Proposed projects, along with the name of the Senate faculty member who has agreed to supervise it, must be submitted to the undergraduate faculty advisor by November 1 of the academic year in which graduation is expected. Upon approval of the project proposal the student may register for up to two quarters of independent study (MUSIC 199) in which to complete the project.  

NOTE: In order to cover the extra costs generated by private lesson instruction, the Claire Trevor School of the Arts charges a laboratory fee for students enrolled in such courses (MUSIC 65-70, MUSIC 165-170).  

B.Mus. Degree Program  
The Bachelor of Music (B.Mus.) degree program offers students the opportunity in their junior and senior years to specialize in piano performance, vocal performance, instrumental performance (flute, oboe, clarinet, bassoon, horn, trumpet, trombone, tuba, percussion, violin, viola, violoncello, double bass, and harp), jazz studies (piano, saxophone, trumpet, trombone, bass, and percussion), and guitar and lute performance. Students in this program receive weekly private instrumental or vocal instruction, and present a public solo recital during their senior year.  

Admission to the B.Mus. degree program is by a second audition (the B.Mus. audition), typically taken in the spring quarter of the second year (for most students) or, in certain circumstances, in the first year (for third-year transfers only). The B.Mus. audition is evaluated by at least two members of the faculty. No student will be allowed to begin the B.Mus. program before having completed MUSIC 15A, MUSIC 15B, MUSIC 15C and MUSIC 16A, MUSIC 16B, MUSIC 16C (or their equivalents at another institution).  

Additional Requirements for the Bachelor of Music Degree  
In addition to completing the common curriculum, students in the B.Mus. program must pass the departmental piano proficiency examination, perform a senior recital (and, for voice students only, a junior recital), and complete the following course requirements:  
A. Select three courses in Theory, Composition, and Technology from the following:  
MUSIC 155  Analysis  
and select two others from the following:
<table>
<thead>
<tr>
<th>COURSE</th>
<th>Title</th>

MUSIC 122C  Piano Literature  
MUSIC 126  Piano Pedagogy  
MUSIC 176  Chamber Ensembles (six quarters, as assigned by the Department)  
Select three quarters of the following as assigned by the Department:  
  MUSIC 162P  University Chorus: Accompanying  
  or MUSIC 164P  Opera Workshop: Accompanying  
  or MUSIC 166P  String Accompaniment  
  or MUSIC 197  Word and Music  
Transfer students must complete six quarters of chamber ensembles and/or accompanying in residence.  
Voice:  
  MUSIC 156A  Song Literature  
  MUSIC 156B  Song Literature  
  MUSIC 158A  Diction  
  MUSIC 158B  Diction  
  MUSIC 158C  Diction  
  MUSIC 164  Opera Workshop (two quarters)  
Select nine quarters of choral ensembles (minimum of three quarters for junior transfers; minimum of six quarters for sophomore transfers) from the following:  
  MUSIC 162  University Chorus  
  MUSIC 171  Chamber Singers  
Woodwinds, Brass, Percussion, and Strings:  
  MUSIC 160  University Orchestra (or MUSIC 161 Wind Ensemble, every quarter in residence)  
  MUSIC 176  Chamber Ensembles (every quarter in residence)  

**NOTE:** In order to cover the extra costs generated by private lesson instruction, the Claire Trevor School of the Arts charges a laboratory fee for students enrolled in such courses (MUSIC 65-70, MUSIC 165-170).

**Honors**

**Departmental Honors Program in Music and Culture**

The Honors Program in Music and Culture is designed to challenge superior students in the B.A. or B.Mus. program beyond the academic requirements of the Music major. It provides them with the opportunity to advance their knowledge in the scholarly fields of music while developing their writing, analytical, and research skills. The honors program is ideally suited for students who wish to study music at the graduate level, but not in performance, and who may be preparing for graduate work in arts criticism, the humanities, the social sciences, and the law.

Eligibility requirements are (1) completion of the core requirements for the major; (2) an overall GPA of 3.5 or higher; and (3) completion of the eligibility form (available for download through the Departmental Web site).

Admission to the Honors Program in Music and Culture is competitive. Students must apply no later than the spring quarter of their junior year. The application should be accompanied by two substantial writing samples. These may represent work done for courses at UCI. Only truly exceptional students may undertake Honors projects.

Students who are admitted to the Honors Program, regardless of whether they are in the B.A. or B.Mus. program, are required to complete three additional courses in categories 1 and 2 under Additional Requirements for the Bachelor of Arts Degree beyond those taken in fulfillment of the core requirement; all three must be upper-division courses (numbered 100 or higher). Relevant upper-division courses in other departments may be taken to fulfill this requirement by approval of the Department Honors Committee.

The capstone project is a senior thesis, an extended original research project prepared under the supervision of the faculty advisor on a topic chosen by the student in consultation with that advisor. The thesis topic must be approved by the Departmental Honors Committee prior to the end of the fall quarter of the senior year. Students develop their topic during an ensuing two-quarter sequence of Senior Thesis (MUSIC 195A-MUSIC 195B). Upon successful completion of the thesis, a single grade is applied for both quarters and 4 units (total) are posted to the student’s record (2 units each for and MUSIC 195B).

- Master of Arts and Doctor of Philosophy Program
  - Degree Offered
  - Admission
Master of Arts and Doctor of Philosophy Program

Degree Offered
M.A. and Ph.D. in Music, with emphasis in Integrated Composition, Improvisation, and Technology (ICIT).

Admission
In addition to meeting all general requirements for admission to graduate study, applicants should normally hold a B.A. in Music or a B.Mus. Applicants must demonstrate proficiency in vocal or instrumental performance commensurate with at least two years of individual undergraduate instruction, including exposure to improvisation and non-notated music.

The online application must be submitted and all supporting materials must be received by December 1. Supporting materials must include the following: Composition portfolio; Academic writing sample; Performance audition (live or video); Personal statement; and Curriculum vitae.

Applicants are expected to have good general knowledge of music history and music theory and competence in basic musicianship skills. Entering students will be given diagnostic tests in these areas prior to the beginning of classes and will be expected to remedy any evident deficiencies during the first year in residence.

Required Courses
For students entering at the Masters level, the normative time to degree is six quarters (two years) for the Master’s Degree, and an additional six quarters (two years) for the Ph.D. program. For students who enter at the Ph.D. level with a master’s degree from another institution, normative time for advancement to candidacy is 5 quarters, and normative time for completion of the degree is 8 quarters.

Required courses for the M.A.:
- Bibliography and Research (MUSIC 200), one quarter for 4 units
- Seminar in Creative Practices (MUSIC 209), two quarters for 4 units each
- Computer Music Composition and Production (MUSIC 215A), one quarter for 4 units
- Computer Music Programming (MUSIC 215B), one quarter for 4 units
- Critical Studies in Music (MUSIC 235), one quarter for 4 units
- Theoretical ICIT Seminar (MUSIC 236), two quarters for 4 units each; May satisfy one quarter (4 units) with a seminar chosen from the 201, 220, or 230 series or an approved comparable graduate seminar in another department
- Practical ICIT Seminars (MUSIC 237), two quarters for 4 units each
- Graduate Ensemble (MUSIC 276), two quarters for 2 units each
- Composition (MUSIC 212), two quarters for 4 units each
- Thesis Colloquium (MUSIC 239), two quarters for 1 unit each

Required courses for the Ph.D. (for continuing ICIT students)
- Composition (MUSIC 212) two quarters for 4 units each
- Theoretical ICIT Seminar (MUSIC 236), two quarters for 4 units each; May satisfy one quarter (4 units) with a seminar chosen from the 201, 220, or 230 series or an approved comparable graduate seminar in another department
- Practical ICIT Seminars (MUSIC 237), one quarter for 4 units
- Graduate Ensemble (MUSIC 276), one quarter for 2 units each
• Directed Reading (MUSIC 250), one quarter for 4 units
• Thesis Colloquium (MUSIC 239), one quarter for 2 units

Required courses for the Ph.D. (for students entering with a non-ICIT Masters degree)

• Bibliography and Research (MUSIC 200), one quarter for 4 units
• Computer Music Composition and Production (MUSIC 215A), one quarter for 4 units
• Computer Music Programming (MUSIC 215B), one quarter for 4 units
• Critical Studies in Music (MUSIC 235), one quarter for 4 units
• Theoretical ICIT Seminar (MUSIC 236), two quarters for 4 units each; May satisfy one quarter (4 units) with a seminar chosen from the 201, 220, or 230 series or comparable approved graduate seminar in another department
• Practical Seminars (MUSIC 237), two quarters for 4 units each
• Composition (MUSIC 212), two quarters for 4 units each*. One quarter may be replaced by Seminar in Creative Practices (MUSIC 209), at the discretion of the faculty.
• Graduate Ensemble (MUSIC 276), one quarter for 2 units each*
• Directed Reading (MUSIC 250), one quarter for 4 units*
• Thesis Colloquium (MUSIC 239), one quarter for 2 units*

* Not eligible for equivalency from another institution

Language Requirement

Before advancing to candidacy, Ph.D. students must demonstrate a reading knowledge of a language other than English, at a level sufficient to conduct research in that language. This requirement may be met either by attaining a passing score in a translation examination administered by the department or by earning a grade of B or higher in level 2C (representing ability equivalent to two full years) of an approved undergraduate language course.

Advancement to Candidacy

Candidacy Committee chairs are assigned in the spring quarter of the first year of Ph.D. study. When nearly finished with coursework, the student signs up for Qualifying Exam Study with the Candidacy Committee chair, designates the remaining four committee members, and submits to the chair a dissertation prospectus. The candidacy exam consists of a response of roughly 20 pages to a set of questions provided by the committee, followed by an oral examination with the Candidacy Committee.

Dissertation

The dissertation committee is chaired by a member of the core ICIT faculty and must include at least one other member of the Senate faculty in Music. A third committee member must be a UC Senate faculty from outside the UCI Music Department, and a fourth member must be a qualified faculty from any department including Music.

The Ph.D. dissertation in ICIT combines innovative creative activity with scholarly research. The goal of the dissertation is to address a major intellectual issue in the integration of composition, improvisation, and technology, and to make an original contribution to existing knowledge of that issue through research and new artistic work. The tangible product will be a written dissertation that presents and contextualizes substantial innovative work in integrated composition/improvisation/technology, and music of significant scope that clearly demonstrates that work.

Master of Fine Arts Program

Degree Offered

M.F.A. in Music, with emphasis in Choral Conducting, Collaborative Piano, Guitar/Lute Performance, Instrumental Performance, Musicology, Piano Performance, and Vocal Arts.

Admission (in all emphases except Musicology)

In addition to meeting all general requirements for admission to graduate study, applicants should hold a B.A. in Music, a B.Mus., or the equivalent.

The online application must be submitted and all supporting materials must be received by January 15. Late applications cannot be considered. Supporting materials must include at least one substantial writing sample, preferably on a musical subject. This requirement may be fulfilled by the submission of an undergraduate paper of appropriate scope, preferably on a musical topic.

Applicants must audition for members of the Music faculty by February 1. In exceptional cases (as approved in advance by the departmental graduate advisor), a recently recorded performance may be accepted in lieu of a live audition. Applicants in composition must, in addition, submit a representative sample of scores and recordings of their works.

Applicants are expected to have good general knowledge of music history and music theory, competence in basic musicianship skills, including sight-singing, written and keyboard harmony, dictation, and basic keyboard facility (including sight-reading). Entering students will be given diagnostic tests
music theory prior to the beginning of classes and will be advised to remedy any evident deficiencies during the first year in residence by registering for the appropriate undergraduate courses or through other appropriate means. Credit earned in such courses cannot be counted toward fulfillment of any degree requirement.

Admission (Emphasis in Musicology)
In addition to meeting all general requirements for admission to graduate study, applicants should hold a B.A. degree in Music, a B.Mus. degree, or their equivalent. Applications, including all supporting materials must be submitted online by January 15 for fellowship consideration. Applications submitted after this date but before the application deadline of February 1 will be considered for admission without fellowship support. Required supporting materials include (1) a statement of purpose outlining background of study and reasons for pursuing the degree, (2) three letters of recommendation from former teachers or others in position to address the merits of the application, (3) at least two writing samples that demonstrate promise for successful graduate study in music, and (4) the GRE general test score (institutional code: 4859). Applicants whose primary language is not English are required to demonstrate proficiency in English for admission through the results of the TOEFL or IETS exam.

Applicants are expected to have good general knowledge of music history and music theory, competence in basic musicianship skills, including sight-singing, written and keyboard harmony, dictation, and basic keyboard facility (including sight-reading). Entering students will be given diagnostic tests in music theory prior to the beginning of classes and will be advised to remedy any evident deficiencies during the first year in residence by registering for the appropriate undergraduate courses or through other appropriate means. Credit earned in such courses cannot be counted toward fulfillment of any degree requirement.

General Degree Requirements
Course requirements may be fulfilled only by graduate courses (numbered 200 and higher) and upper-division undergraduate courses (numbered 100 and higher), and only by those courses in which a grade of B or higher has been earned.

All students except those in the ICIT emphasis must complete the graduate core curriculum in bibliography (MUSIC 200) and music analysis (MUSIC 201). All students except for those in Musicology must register for tutorial study in the major field (MUSIC 210, MUSIC 211, or MUSIC 212) during every quarter in residence. Students in the emphasis in Instrumental Performance must enroll in an approved large ensemble during every quarter in residence.

Students enrolled in the emphasis in Choral Conducting, Collaborative Piano, Musicology, Piano Performance, and Vocal Arts must fulfill a foreign language requirement, as described in the individual emphasis descriptions below. This requirement may be met either by attaining a passing score in the departmental examination or by earning a grade of B or higher in level 2A of an approved undergraduate language course.

All students except for those in Musicology must pass the Comprehensive Examination (normally taken during the fifth quarter in residence) and perform one or more public recitals. Details are found in the individual emphasis descriptions below. In lieu of a Comprehensive Examination students in Musicology will write a Master's Thesis.

The normative time to degree for students in the M.F.A. program is two years. Residence is required. The normative time to degree can be extended to three years only through a petition to the Chair of the Department. The maximum time to degree is three years. Students who do not complete the degree in three years will be dropped from the program.

Individual Emphasis Requirements

Choral Conducting
Languages: Reading knowledge of French, German, or Italian.

Course Work:

A. Complete the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 131</td>
<td>Post-Tonal Theory</td>
</tr>
<tr>
<td>MUSIC 158A-158B-158C</td>
<td>Diction and Diction 1</td>
</tr>
<tr>
<td>MUSIC 200</td>
<td>Bibliography and Research</td>
</tr>
<tr>
<td>MUSIC 201</td>
<td>Topics in Analysis</td>
</tr>
<tr>
<td>MUSIC 210</td>
<td>Choral Conducting (every quarter in residence, maximum 24 units)</td>
</tr>
</tbody>
</table>

B. Select three seminars from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 220</td>
<td>Seminar in Music History</td>
</tr>
<tr>
<td>MUSIC 230</td>
<td>Seminar in Contemporary Music</td>
</tr>
<tr>
<td>MUSIC 235</td>
<td>Critical Studies in Music</td>
</tr>
<tr>
<td>MUSIC 236</td>
<td>Theoretical ICIT Seminar</td>
</tr>
</tbody>
</table>

C. Twelve units of electives, selected with advisor.
MUSIC 214  Graduate Recital

1 Note: This requirement is waived for students who demonstrate competence in this area by passing a diagnostic exam, in which case these 6 units are taken as electives.

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee’s questions.

Collaborative Piano

Languages: Reading knowledge of French, German, Italian, or Spanish.

Course Work:

A. Complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 131</td>
<td>Post-Tonal Theory</td>
</tr>
<tr>
<td>MUSIC 156A-156B</td>
<td>Song Literature and Song Literature</td>
</tr>
<tr>
<td>MUSIC 158A-158B-158C</td>
<td>Diction and Diction 1</td>
</tr>
<tr>
<td>MUSIC 176</td>
<td>Chamber Ensembles (6 units)</td>
</tr>
<tr>
<td>MUSIC 200</td>
<td>Bibliography and Research</td>
</tr>
<tr>
<td>MUSIC 201</td>
<td>Topics in Analysis</td>
</tr>
<tr>
<td>MUSIC 211</td>
<td>Performance (every quarter in residence, maximum 24 units)</td>
</tr>
</tbody>
</table>

B. Select one seminar from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 220</td>
<td>Seminar in Music History</td>
</tr>
<tr>
<td>MUSIC 230</td>
<td>Seminar in Contemporary Music</td>
</tr>
<tr>
<td>MUSIC 235</td>
<td>Critical Studies in Music</td>
</tr>
<tr>
<td>MUSIC 236</td>
<td>Theoretical ICIT Seminar</td>
</tr>
</tbody>
</table>

C. Two Graduate Recitals:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 214</td>
<td>Graduate Recital (one instrumental and one vocal)</td>
</tr>
</tbody>
</table>

1 Note: This requirement is waived for students who demonstrate competence in this area by passing a diagnostic exam, in which case these 6 units are taken as electives.

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recitals. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee’s questions.

Guitar/Lute Performance

Course Work:

A. Complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 131</td>
<td>Post-Tonal Theory</td>
</tr>
<tr>
<td>MUSIC 176</td>
<td>Chamber Ensembles (6 units)</td>
</tr>
<tr>
<td>MUSIC 189</td>
<td>Accompanying for Plucked Strings: Continuo and Changes (taken three times)</td>
</tr>
<tr>
<td>MUSIC 200</td>
<td>Bibliography and Research</td>
</tr>
<tr>
<td>MUSIC 201</td>
<td>Topics in Analysis</td>
</tr>
<tr>
<td>MUSIC 211</td>
<td>Performance (every quarter in residence, maximum of 24 units)</td>
</tr>
<tr>
<td>MUSIC 214</td>
<td>Graduate Recital 1</td>
</tr>
<tr>
<td>MUSIC 240</td>
<td>Graduate Projects</td>
</tr>
</tbody>
</table>

B. Select two seminars from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 220</td>
<td>Seminar in Music History</td>
</tr>
<tr>
<td>MUSIC 230</td>
<td>Seminar in Contemporary Music</td>
</tr>
<tr>
<td>MUSIC 235</td>
<td>Critical Studies in Music</td>
</tr>
</tbody>
</table>
MUSIC 236  Theoretical ICIT Seminar

1 Note: The recital is supported by a written essay, presented in advance of the Comprehensive Examination.

**Comprehensive Examination:** This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee’s questions.

**Instrumental Performance**

**Course Work:**

A. Complete the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 131</td>
<td>Post-Tonal Theory</td>
</tr>
<tr>
<td>MUSIC 160</td>
<td>University Orchestra (taken every quarter in residence, maximum of 12 units)</td>
</tr>
<tr>
<td>or MUSIC 161</td>
<td>Wind Ensemble</td>
</tr>
<tr>
<td>MUSIC 176</td>
<td>Chamber Ensembles (6 units)</td>
</tr>
<tr>
<td>MUSIC 200</td>
<td>Bibliography and Research</td>
</tr>
<tr>
<td>MUSIC 201</td>
<td>Topics in Analysis</td>
</tr>
<tr>
<td>MUSIC 211</td>
<td>Performance (every quarter in residence, maximum of 24 units)</td>
</tr>
<tr>
<td>MUSIC 214</td>
<td>Graduate Recital</td>
</tr>
</tbody>
</table>

B. Select two seminars from the following:

<table>
<thead>
<tr>

</tr>
<tr>
<td>MUSIC 235</td>
<td>Critical Studies in Music</td>
</tr>
</tbody>
</table>

C. Twelve units of electives, selected with advisor (upper-division or graduate, Music or non-Music).

**Thesis:** All students must complete a thesis in English of approximately fifty pages on a topic approved by their graduate advisor, with appropriate bibliography, and with illustrative appendices, if warranted (e.g. musical examples, musical transcriptions, documents). All students must present the results of their research in a formal oral defense of 30 minutes before their committee and the entire Musicology faculty; after the presentation, they should be prepared to field questions from committee members and other Musicology faculty. Completion of thesis and oral defense take place during the six quarter of residence, no later than Week 8.

**Piano Performance**

**Languages:** Reading knowledge of French, German, Italian, or Spanish.

**Course Work:**

A. Complete the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 131</td>
<td>Post-Tonal Theory</td>
</tr>
</tbody>
</table>
MUSIC 176  Chamber Ensembles (6 units)
MUSIC 200  Bibliography and Research
MUSIC 201  Topics in Analysis
MUSIC 211  Performance (every quarter in residence, maximum of 24 units)
MUSIC 214  Graduate Recital (twice)

B. Select two seminars from the following:
MUSIC 220  Seminar in Music History
MUSIC 230  Seminar in Contemporary Music
MUSIC 235  Critical Studies in Music
MUSIC 236  Theoretical ICIT Seminar

C. Four units of electives, selected with advisor (upper-division or graduate, Music or non-Music).

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recitals. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee’s questions.

Vocal Arts

Languages: Reading knowledge of French, German, Italian, or Spanish.

Course Work:

A. Complete the following:
MUSIC 131  Post-Tonal Theory
MUSIC 164  Opera Workshop (4 units)
MUSIC 200  Bibliography and Research
MUSIC 201  Topics in Analysis
MUSIC 211  Performance (every quarter in residence, maximum of 24 units)
MUSIC 214  Graduate Recital

B. Select two seminars from the following:
MUSIC 220  Seminar in Music History
MUSIC 230  Seminar in Contemporary Music
MUSIC 235  Critical Studies in Music
MUSIC 236  Theoretical ICIT Seminar

C. Ten units of electives, selected with advisor (upper-division or graduate, Music or non-Music).

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee’s questions.

Faculty

Kei Akagi, B.A. International Christian University, Professor of Music; Asian American Studies

Amy M. Bauer, Ph.D. Yale University, Associate Professor of Music

Haroutune Bedelian, M.A. Royal Academy of Arts, Professor of Music

Lorna Griffitt Bedelian, D.M.A. Indiana University, Senior Lecturer with Security of Employment of Music

Frances L. Bennett, B.F.A. University of California, Irvine, Lecturer of Music

Anna J. Bosler, D.M.A. University of Southern California, Lecturer of Music

David Brodbeck, Ph.D. University of Pennsylvania, Professor of Music

Robin T. Buck, M.M. University of Southern California, Professor of Drama; Music

Ellie Choate, M.A. California State University, Long Beach, Lecturer of Music

Patricia C. Cloud, M.M. University of Southern California, Lecturer of Music
Jonathan D. Davis, D.M.A. Juilliard School, Lecturer of Music

Michael Dessen, Ph.D. University of California, San Diego, Robert and Marjorie Rawlins Chair in Music and Associate Professor of Music

Theresa A. Dimond, D.M.A. University of Southern California, Lecturer of Music

John Christopher Dobrian, Ph.D. University of California, San Diego, Professor of Music; Informatics

Nohema Fernandez, D.M.A. Stanford University, Professor Emerita of Music

Frederick W. Greene, B.M. University of Southern California, Lecturer of Music

Matthew Hare, D.M.A. University of Iowa, Lecturer of Music

Jason Harnell, Lecturer of Music

Robert Hickok, B.M. Yale University, Professor Emeritus of Music

Seth Houston, D.M.A. University of Southern California, Director of Choral Activities and Lecturer with Potential Security of Employment of Music

Joseph B. Huszti, MM Northwestern University, Professor Emeritus of Music

Jerzy S. Kosmala, D.M. Indiana University, Lecturer of Music

Lukas Ligeti, Assistant Professor of Music

Kevin McKeown, M.A. University of California, Los Angeles, Lecturer of Music

Nicole M. Mitchell, M.M. Northern Illinois University, Professor of Music

Elliott Moreau, M.M. University of Southern California, Lecturer of Music

Margaret K. Murata, Ph.D. University of Chicago, Professor Emerita of Music

Dariusz Oleszkiewicz, B.A. California Institute of the Arts, Lecturer of Music

Hossein Omoumi, Ph.D. University of Florence, Maseeh Professor in Persian Performing Arts and Professor of Music

Gerald Pinter, B.A. University of North Texas, Lecturer of Music

Colleen A. Reardon, Ph.D. University of California, Los Angeles, Professor of Music

Bobby Rodriguez, D.M.A. University of California, Los Angeles, Lecturer of Music

John H. Schneiderman, M.F.A. University of California, Irvine, Senior Lecturer with Security of Employment of Music

Nina Scolnik, B.M. Oberlin College, Senior Lecturer with Security of Employment of Music

H. Colin Slim, Ph.D. Harvard University, Professor Emeritus of Music

David B. Stetson, B.M. University of Southern California, Lecturer of Music

Darryl G. Taylor, D.M.A. University of Michigan, Professor of Music; African American Studies

Alan Terricciano, M.A. Eastman School of Music, Professor of Dance; Music

Stephen E. Tucker, D.M.A. University of California, Los Angeles, Associate Professor of Music

Kojiro Umezaki, M.A. Dartmouth College, Associate Professor of Music; Computer Science

Amanda Jane Walker, M.F.A. University of California, Los Angeles, Lecturer of Music

David W. Washburn, M.A. New England Conservatory Music, Lecturer of Music
Courses

MUSIC 3. Introduction to Music. 4 Units.
Introduction to musical concepts and active listening skills. Students develop musical understanding through critical readings, selected repertoire, fundamental concepts related to rhythm, pitch, and genre. Students apply those concepts to music from a wide range of historical and cultural origins. Course may be offered online.

(MIV)

MUSIC 4. Introduction to Opera. 4 Units.
Introduces students with no musical background to the dramatic and performance conventions of opera, and suggests ways of developing a critical stance vis-a-vis the social, political, gender-related and moral conflicts that are presented by composers and librettists.

(MIV)

MUSIC 8. The Beatles and the Sixties. 4 Units.
Through a study of the music of the Beatles, students are introduced to selected broader historical and cultural themes (e.g., race and music, gender and music, music and the counterculture) while developing an understanding of the basic elements of music.

(MIV)

MUSIC 9. Rock: The Early Years. 4 Units.
Surveys the social and cultural fabric of the post-World War II United States (from the late 1940s through the early 1970s) as seen through the prism of music - rock and roll music.

(MIV)

MUSIC 10. Piano for Majors. 1 Unit.
For Music majors with little or no piano experience. Provides the necessary background for realizing keyboard exercises required in the theory and harmony courses, and develops skills to play and sight-read simple music from different periods.

Repeatable: May be taken for credit 3 times.
Restriction: Music and Music Performance majors only.

MUSIC 14A. European and American Music 1700 - Twentieth Century. 4 Units.
Survey of European and American music from the Baroque period through the twentieth century. Baroque and Classical music with adequate attention given to the Medieval and Renaissance periods. May be taken in any order.

(MIV)

MUSIC 14B. European and American Music 1700 - Twentieth Century. 4 Units.
Survey of European and American music from the Baroque period through the 20th century. The nineteenth and twentieth centuries. May be taken in any order.

(MIV)

MUSIC 14C. European and American Music 1700 - Twentieth Century. 4 Units.
Survey of European and American music from the Baroque period through the twentieth century. Selected topics in American music. May be taken in any order.

(MIV)

MUSIC 15A. Musicianship I. 2 Units.
Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16A.
Restriction: Music and Music Performance majors only.

MUSIC 15B. Musicianship II. 2 Units.
Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16B.
Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better.
Restriction: Music and Music Performance majors only.
MUSIC 15C. Musicianship III. 2 Units.
Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16C.
Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better.

Restriction: Prerequisite required and Music and Music Performance majors only.

MUSIC 16A. Music Theory. 4 Units.
Review of music fundamentals. Triad and seventh chords, musical texture, chord spacing, embellishing tones, and introduction to diatonic harmony. Part-writing and model composition with tonic, dominant seventh, and subdominant harmonies.

Corequisite: MUSIC 15A.

Restriction: Music and Music Performance majors only.

MUSIC 16B. Music Theory. 4 Units.
Introduction to phrase structure. Part-writing and harmonization with predominants, linear dominants, 6/4 embellishing chords, leading-tone and other diatonic seventh chords. Advanced meters and rhythmic-metric dissonance. Diatonic sequence. Introduction to tonicization and modulation through motion to V and III.

Corequisite: MUSIC 15B.
Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 16C. Music Theory. 4 Units.
Tonicization and modulation to closely related keys. Simple binary and ternary forms. Voice-leading reductions and simple forms. Diatonic sequence with seventh chords. Introduction to chromatic harmony I: modal exchange and mixture chords, the Neapolitan and augmented sixth chords.

Corequisite: MUSIC 15C.
Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 16D. Theory/Musicianship. 4 Units.
Extended homophonic and contrapuntal formal designs (continuous variations, rondo form, sonata form, invention, fugue). Embellishing chromatic chords, dominant prolongation, modulations to foreign keys, extended harmonies, chromatic sequence, chromatic voice-leading and symmetrical divisions of the octave.

Prerequisite: MUSIC 15C and MUSIC 16C. MUSIC 15C with a grade of C- or better. MUSIC 16C with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 21A. Keyboard Skills. 1 Unit.
Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 21B. Keyboard Skills. 1 Unit.
Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 21C. Keyboard Skills. 1 Unit.
Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 25. Music Fundamentals. 4 Units.
Basic concepts and materials. Major and minor scales, intervals between pitches, key signatures, elements of rhythm, diatonic chords in root position and inversion. Simple and compound meters. Formerly Music 25A.
MUSIC 40B. History of European Music: From the Renaissance through the Baroque. 4 Units.
An introduction to the analysis of musical styles and forms, to the sources for constructing music history and reconstructing historical music, and to J.S. Bach.
Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better.
Restriction: Music and Music Performance majors have first consideration for enrollment.
(IV, VIII)

MUSIC 40C. History of European Music: Hasse to Mahler. 4 Units.
An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to Richard Wagner.
Prerequisite: MUSIC 40B. MUSIC 40B with a grade of D or better. MUSIC 16D recommended.
Restriction: Music and Music Performance majors have first consideration for enrollment.
(IV, VIII)

MUSIC 40D. 20th Century Music. 4 Units.
Survey of principal composers, movements, and compositional techniques of Western art music of the modern era.
Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better.
Restriction: Music and Music Performance majors have first consideration for enrollment.
(IV, VIII)

MUSIC 41. Major Composer. 4 Units.
Study of the works of an important composer with emphasis on their significance in historical and social contexts. Composers selected represent a wide variety of historical periods, nationalities, and stylistic orientations.
Repeatability: May be taken for credit 2 times as topics vary.
(IV)

MUSIC 42. Music and Gender. 4 Units.
Explores various intersections between music and gender. Examines ways in which gender and sexuality have played a vital role in the creation, dissemination, and consumption of music ranging from medieval Christian mysticism to contemporary hip-hop artists.
(IV, VIII)

MUSIC 44. Classical Music in Society. 4 Units.
Examines some ways in which classical music has played an integral role in aspects of society. Studies pieces from different cultural, political, and historical contexts in order to understand how musical meaning is created and interpreted.
(IV, VIII)

MUSIC 45. History of Film Music. 4 Units.
Course provides an overview of film music history. Special emphasis will be placed on developing an analytic vocabulary for musical elements and cultivating an understanding of how music can function within a film. Materials fee.
(IV)

MUSIC 49A. Asian in Western Music. 4 Units.
Traces and critiques western musical representations of Far East culture and figures, reviewing the reception and significance of these works by present-day Asian consumers of western culture.
Prerequisite: Satisfactory completion of the lower-division writing requirement recommended.
(VIII)

MUSIC 51. Music Technology and Computers. 4 Units.
A study of the influence of technology on the musical culture and aesthetics from the 20th century to the present, with particular emphasis on the role of the computer. Work includes lectures, readings, listenings, discussions, demonstrations, writing, and experimentation. Course may be offered online.
(IV)
MUSIC 65. Piano for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 66. Strings for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 67. Winds for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 68. Voice for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music majors only.

MUSIC 69. Percussion for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times as topics vary.
Restriction: Music majors only.

MUSIC 70. Guitar, Lute, and Other Plucked Instruments for Music Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music majors only.

MUSIC 78. History of Jazz. 4 Units.
Development of jazz from African and African American folk origins through blues, early jazz, swing, bebop, "cool" jazz, fusion, free jazz, and contemporary trends.
Overlaps with MUSIC 78A, MUSIC 78B.

(IV, VII)

MUSIC 82A. Pish Radif: Introduction to Classical Persian Music. 4 Units.
Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Mahur.
Repeatability: May be repeated for credit unlimited times.

MUSIC 82B. Pish Radif: Introduction to Classical Persian Music. 4 Units.
Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Homayun.
Repeatability: May be repeated for credit unlimited times.

MUSIC 82C. Pish Radif: Introduction to Classical Persian Music. 4 Units.
Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Shur.
Repeatability: May be repeated for credit unlimited times.
MUSIC 122A. Piano Literature. 2 Units.
Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.
Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 122B. Piano Literature. 2 Units.
Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.
Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 122C. Piano Literature. 2 Units.
Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.
Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 126. Piano Pedagogy. 2 Units.
The materials and methods of piano instruction are examined and evaluated.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 131. Post-Tonal Theory. 4 Units.
Significant harmonic, rhythmic, and structural practices since 1900. Analysis and written work exploring free atonality and serialism; neo-tonal practices such as use of extended tertian harmonies, modalism, pandiatonicism, and non-tertian harmonies; structural principles such as aleatory, metric modulation and minimalism.
Prerequisite: MUSIC 16D.
Restriction: Music and Music Performance majors only.

MUSIC 132. Jazz Theory. 4 Units.
Study of jazz harmony and melody construction in improvisation. Covered topics include terminology, chord symbols, notation, voicings, and scales as commonly used in jazz and popular music. Issues regarding tonality and ramifications of the blue scale are also examined.
Prerequisite: MUSIC 16D.
Restriction: Music and Music Performance majors only.

MUSIC 136. Instrumentation. 4 Units.
Ranges and capabilities of modern orchestral instruments. Exercise in writing for various combinations of wind, string, and percussion instruments and for full orchestra.
Prerequisite: MUSIC 16C.
Restriction: Music and Music Performance majors only.

MUSIC 140. Studies in Medieval Music. 4 Units.
Topics in Medieval Music.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.
MUSIC 141. Studies in Renaissance Music. 4 Units.
Topics in Renaissance Music.
Prerequisite: MUSIC 40B.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 142. Studies in Baroque Music. 4 Units.
Topics in Baroque Music.
Prerequisite: MUSIC 40B.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 142W. Studies in Baroque Music. 4 Units.
Topics in Baroque Music.
Prerequisite: MUSIC 40B. Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music and Music Performance majors only.

MUSIC 143. Studies in Classical Music. 4 Units.
Topics in Classical Music.
Prerequisite: MUSIC 40C. Satisfactory completion of the lower-division writing requirement.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 143W. Studies in Classical Music. 4 Units.
Topics in Classical Music.
Prerequisite: MUSIC 40C or equivalent. Satisfactory completion of the lower-division writing requirement.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music and Music Performance majors only.

MUSIC 144. Studies in Romantic Music. 4 Units.
Topics in Romantic Music.
Prerequisite: MUSIC 40C.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 144W. Studies in Romantic Music. 4 Units.
Topics in Romantic Music.
Prerequisite: MUSIC 40C or equivalent.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music and Music Performance majors only.
MUSIC 145. Studies in Twentieth-Century Music. 4 Units.
Topics in Twentieth-Century Music.
Prerequisite: Satisfactory completion of the Lower-Division writing requirement.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only. Upper-division majors only.

MUSIC 145W. Studies in Twentieth-Century Music. 4 Units.
Topics in Twentieth-Century Music.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music and Music Performance majors only. Upper-division only.

MUSIC 146. Studies in Jazz Music. 4 Units.
Topics in Jazz Music.
Repeatability: May be taken for credit 2 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 147. Studies in Music Technology. 4 Units.
Specialized topics in electronic music, computer-aided music, and other aspects of music technology.
Repeatability: May be taken for credit 2 times as topics vary.

MUSIC 148. Studies in Ethnomusicology. 4 Units.
Topics in Ethnomusicology.
Repeatability: May be taken for credit 2 times.
Restriction: Music majors and Music Performance majors only.

MUSIC 149. Studies in Music History. 4 Units.
Specialized topics in musical genres; culture and social issues; performance practices; and interrelated arts.
Prerequisite: MUSIC 40B and MUSIC 40C and MUSIC 40D. Satisfactory completion of the lower-division writing requirement.
Repeatability: May be taken for credit 3 times as topics vary.
Restriction: Music majors and Music Performance majors only.

MUSIC 150. Composition. 4 Units.
Exercises and projects for diverse instrumental-vocal combinations; contemporary techniques and problems. Participation in the improvisation ensemble and working with electronic media.
Prerequisite: MUSIC 16C.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors only.

MUSIC 151. Computer Music Composition. 4 Units.
Exercises in the composition of music uniquely possible by computer, including digital signal processing, computer control of synthesizers and processors, and algorithmic composition. Demonstrations and musical analyses in class; considerable studio work outside class.
Prerequisite: MUSIC 51.

MUSIC 152. Interactive Arts Programming. 4 Units.
Study of artistic issues and programming techniques involved in the development of interactive computer art and music. Theoretical background, basic tenets of programming, and practical exercises in programming interactive computer multimedia art.
Prerequisite: MUSIC 51 or ART 65A or DANCE 163.
MUSIC 155. Analysis. 4 Units.
Methods of formal analysis applicable to all Western musical styles: additive, continuous, transformational, and hierarchic forms; rhythm, texture, and sonority as form and process.
Prerequisite: MUSIC 16D.
Restriction: Music and Music Performance majors only.

MUSIC 156A. Song Literature. 2 Units.
A survey of song literature. Designed as an overview of the song repertoire, German Lieder.
Restriction: Music and Music Performance majors only.

MUSIC 156B. Song Literature. 2 Units.
A survey of song literature. Designed as an overview of the song repertoire, French mélodie.
Restriction: Music and Music Performance majors only.

MUSIC 157. Advanced Study in Composition. 4 Units.
Individual weekly lessons in composition.
Prerequisite: MUSIC 150.
Repeatability: May be taken for credit 6 times.
Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 158A. Diction. 2 Units.
In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. Introduction to IPA and Italian Diction.
Restriction: Music and Music Performance majors only.

MUSIC 158B. Diction. 2 Units.
In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. German Diction.
Prerequisite: MUSIC 158A.
Restriction: Music and Music Performance majors only.

MUSIC 158C. Diction. 2 Units.
In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. French Diction.
Prerequisite: MUSIC 158A and MUSIC 158B.
Restriction: Music and Music Performance majors only.

MUSIC 159. Vocal Pedagogy. 2 Units.
Survey about the physical structure of the singing mechanism, science and philosophy of studio instruction.
Restriction: Music and Music Performance majors only.

MUSIC 160. University Orchestra. 2 Units.
Study and performance of standard orchestral repertory and works by contemporary composers. Membership is open to all qualified students by audition only.
Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.

MUSIC 161. Wind Ensemble. 2 Units.
Study and performance of works written for varying combinations of wind and percussion instruments. Membership is open to all qualified students by audition only.
Prerequisite: Audition required.
Repeatability: May be repeated for credit unlimited times.
MUSIC 162. University Chorus. 2 Units.
Make-up of the ensembles varies and may include University Chorus, Chamber Choir, Madrigal Singers, Women’s Chorus, and Reading Choir. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

MUSIC 162L. Basic Voice Lab. 1 Unit.
Vocal technique and musicianship for selected singers in UCI's choral organizations.

Corequisite: MUSIC 162.

Repeatability: May be repeated for credit unlimited times.

Restriction: Not open to Music majors.

MUSIC 162P. University Chorus: Accompanying. 2 Units.
Keyboard accompanying for one of the UCI choral organizations, with individual coaching in sight reading, score reading, and other accompanying skills.

Repeatability: May be taken for credit 12 times.

MUSIC 164. Opera Workshop. 2-4 Units.
Preparation and performance of operatic repertoire, including arias, scenes, and fully staged operas, and/or stage training and role analysis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 164P. Opera Workshop: Accompanying. 2-4 Units.
Training in techniques and operatic repertory for keyboard players.

Repeatability: May be repeated for credit unlimited times.

MUSIC 165. Piano for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 166. Strings for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 166P. String Accompaniment. 2 Units.
Chamber ensemble experience with the solo string repertory for keyboard, participation in the weekly string master class, performance in public recitals.

Repeatability: May be taken for credit 3 times.

MUSIC 167. Winds for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 168. Voice for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.
MUSIC 169. Percussion for Music Performance Majors. 4 Units.
Private weekly lessons. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 170. Guitar, Lute, and Other Plucked Instruments for Music Performance Majors. 4 Units.
Private weekly lessons and a weekly master class/workshop for the discussion of solo repertory and performance practice, including special topics such as historical notational systems, traditional American guitar styles, and demonstrations of period plucked instruments. Materials fee.
Repeatability: May be taken for credit 6 times.
Restriction: Music Performance majors only.

MUSIC 171. Chamber Singers. 2 Units.
A select ensemble specializing in vocal chamber music from all periods. Frequent performances on and off campus. Membership is open to all singers by audition.
Repeatability: May be repeated for credit unlimited times.

MUSIC 172. Men in Blaque. 2 Units.
Men's chamber choir studying and performing music in original SATB and TTBB voicing. Gregorian chant, Renaissance motets and masses, part-songs from the Romantic era by Schubert and Schumann, folksongs, spirituals, jazz and contemporary literature comprises majority of repertoire.
Repeatability: May be taken for credit 12 times.

MUSIC 176. Chamber Ensembles . 2 Units.
Make-up of the ensembles varies and may include various Classical ensembles, Latin Jazz Ensemble, Small Jazz Combos, Percussion Ensemble, and Guitar Ensemble. Membership is open to all qualified students by audition only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors have first consideration for enrollment.

MUSIC 178. Jazz Orchestra. 2 Units.
Rehearsal and performance of literature written for large jazz ensemble with emphasis on methods and materials. Laboratory setting for new arrangers and/or composers of modern jazz pieces.
Repeatability: May be repeated for credit unlimited times.

MUSIC 180. Music Criticism . 4 Units.
Topics in Music Criticism.
Repeatability: Unlimited as topics vary.
Restriction: Music and Music Performance majors only.

MUSIC 180A. Music and Material Culture. 4 Units.
Examines the cultural value of secular music objects such as scores, musical instruments, and cassette tapes beyond the period of their use. "Biographies" of not-sounding musical objects trace the changing social contexts in which they survived.
Prerequisite: Satisfactory completion of the lower-division writing requirement.

MUSIC 180AW. Music and Material Culture. 4 Units.
Examines the cultural value of secular music objects such as scores, musical instruments, and cassette tapes beyond the period of their use. "Biographies" of not-sounding musical objects trace the changing social contexts in which they survived.
Prerequisite: Satisfactory completion of the lower-division writing requirement.
MUSIC 180W. Music Criticism . 4 Units.
Topics in Music Criticism.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Music and Music Performance majors only.

MUSIC 181. Improvisation. 4 Units.
Improvisation has been central to all music traditions. Course explores real-time music-making in a variety of non-notated contexts. Different improvisational styles are presented, including jazz, Asian improvisation, and experimental modern music. Emphasis on actual classroom performance.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors only.

MUSIC 182. Advanced Jazz Combo. 2 Units.
Small-group jazz ensemble and improvisational workshop. Range of music covered encompasses the full traditional jazz from improvised ragtime up through the most current avant-garde musical techniques.
Repeatability: May be repeated for credit unlimited times.

MUSIC 183A. Jazz Composition. 4 Units.
Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Cyclical forms, modal compositions, blues-oriented compositions, ballad writing.
Prerequisite: MUSIC 78 and MUSIC 132.
Restriction: Music and Music Performance majors only.

MUSIC 183B. Jazz Composition. 4 Units.
Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Non-functional harmony, contemporary forms, free-bop, and current trends.
Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A.
Restriction: Music and Music Performance majors only.

MUSIC 183C. Jazz Composition. 4 Units.
Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Study of modern tonal-center compositions, intervallic compositions, and alternate rhythms.
Prerequisite: MUSIC 78 and MUSIC 132 and MUSIC 183A and MUSIC 183B.
Restriction: Music and Music Performance majors only.

MUSIC 189. Accompanying for Plucked Strings: Continuo and Changes. 2 Units.
Students apply theory to their instruments as they learn the basics of pre-1800 continuo playing and post-1900 jazz charts. Includes discussions of appropriate repertory, treatment of harmonic progressions, and finer points of style and technique.
Prerequisite: MUSIC 16C.
Repeatability: May be repeated for credit unlimited times.
Restriction: Music and Music Performance majors only.

MUSIC 191. Tutorial in Music. 1-4 Units.
Independent supplemental instruction related to student's area of study.
Repeatability: May be repeated for credit unlimited times.
MUSIC 193. Conducting. 4 Units.
Introduces students to the basic techniques employed in the practice of conducting and includes score study and development of leadership skills.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C.

Restriction: Music and Music Performance majors only.

MUSIC 195A. Senior Thesis. 2 Units.
With consultation in regularly scheduled meetings, students identify and study relevant texts and materials and prepare a prospectus for an original thesis.

Prerequisite: Senior standing in the Honors Program in Music and Culture.

Grading Option: In progress only.

Restriction: Music and Music Performance majors only.

MUSIC 195B. Senior Thesis. 2 Units.
Students submit an outline and preliminary drafts of section of their thesis to the instructor, on a schedule supervised by the instructor. The final version will address the instructor's comments and criticisms.

Prerequisite: MUSIC 195A.

Restriction: Music and Music Performance majors only.

MUSIC 197. Word and Music. 2 Units.
Performance class for advanced singers and pianists with emphasis on collaborative approach to vocal literature.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 199. Independent Study. 2 Units.
Research, writing, or composition work, under the guidance of a faculty member.

Repeatability: May be taken for credit 2 times.

Restriction: Music and Music Performance majors only.

MUSIC 200. Bibliography and Research. 4 Units.
Required of all entering students. A systematic introduction to the bibliographical tools both in the general field of music and in the student's areas of specialization.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 201. Topics in Analysis . 4 Units.
Seminar focusing on different analytical methods, modal, tonal, and post-tonal, and their applications to repertories drawn from various historical periods through to the present day.

Prerequisite: Placement into MUSIC 201.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 203. Music Thesis . 4 Units.
Intensive work dedicated to researching and writing a Master's thesis under the supervision of a faculty advisor.

Prerequisite: MUSIC 200.

Repeatability: May be repeated for credit unlimited times.

Restriction: M.F.A. students in Musicology only.
MUSIC 209. Seminar in Creative Practices. 4 Units.
Core first-year seminar required for graduate students in the Integrated Composition, Improvisation, and Technology emphasis of the M.A. and Ph.D. programs. Composition and presentation of original student works, lecture, and discussion.

Repeatability: May be taken for credit 3 times.
Restriction: Music graduate students only.

MUSIC 210. Choral Conducting. 4 Units.
Intensive private instruction and study of the various choral literatures.

Repeatability: May be taken for credit 6 times.
Restriction: Music graduate students only.

MUSIC 211. Performance. 4 Units.
Contents vary according to the student's major instrument. Intensive private instruction and study of the various literatures.

Repeatability: May be taken for credit 6 times.
Restriction: Music graduate students only.

MUSIC 212. Composition. 4 Units.
Intensive work in composition geared to each student's level of competence.

Repeatability: May be repeated for credit unlimited times.
Restriction: Music graduate students only.

MUSIC 213. Orchestral Conducting. 4 Units.
Intensive private instruction in instrumental conducting.

Repeatability: May be repeated for credit unlimited times.
Restriction: Music graduate students only.

MUSIC 214. Graduate Recital.
Performance of public recital.

Repeatability: May be taken for credit 2 times.
Restriction: Music graduate students only.

MUSIC 215A. Computer Music Composition and Production. 4 Units.
Study of the composition and production of music made uniquely possible by the computer, including usage of prevalent digital music technology, techniques of digital signal processing, and computer control of synthesizers and audio processors.

Restriction: Music graduate students only.

MUSIC 215B. Computer Music Programming. 4 Units.
Study of the artistic issues and programming techniques involved in the development of original applications for computer music composition and interactive performance.

Restriction: Music graduate students only.

MUSIC 220. Seminar in Music History. 4 Units.
Topics in Music History.

Repeatability: Unlimited as topics vary.
Restriction: Music graduate students only.

MUSIC 230. Seminar in Contemporary Music. 4 Units.
Special seminar projects dealing with contemporary music with emphasis on analytical techniques and style criticism.

Repeatability: Unlimited as topics vary.
Restriction: Music graduate students only.
MUSIC 231. Improvisation. 4 Units.
Introduces the practice and history of improvisation in diverse fields of Western music since 1950. Performance projects and group critiques, weekly reading and listening assignments, participation in a class concert, and a research paper.

Restriction: Music graduate students only.

MUSIC 235. Critical Studies in Music. 4 Units.
A critical examination of Western music traditions, institutions, and aesthetics, employing new scholarship in music and new critical studies in other disciplines.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 236. Theoretical ICIT Seminar. 4 Units.
Seminar studying new genres and topics that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 237. Practical ICIT Seminar. 4 Units.
Study of new practices and techniques that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 239. Thesis Colloquium. 1-2 Units.
ICIT students present their thesis work-in-progress for discussion and criticism. Faculty and visiting artists/scholars also present their current work.

Repeatability: May be taken for credit for 8 units.

Restriction: Music graduate students only.

MUSIC 240. Graduate Projects . 4 Units.
Substantial projects in performance, conducting, or composition (other than those specifically required for the degree), accompanied by a summary paper.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 250. Directed Reading. 4 Units.
Individual research projects, resulting in the writing of a substantial paper pertaining to the principal area of concentration.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 276. Graduate Ensemble . 2 Units.
Chamber ensemble for the performance of contemporary music, including newly composed and improvised forms.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Undergraduate Counseling: 949-824-5318
Graduate Programs: contact individual departments
Department of Developmental and Cell Biology: 949-824-1969
Department of Ecology and Evolutionary Biology: 949-824-4743
Department of Molecular Biology and Biochemistry: 949-824-6034
Department of Neurobiology and Behavior: 949-824-8519

Overview

This is the ideal time to be studying biology. We are solving problems today whose solutions were unimaginable even a few years ago, and implications for our society, our health, and our environment are profound. The Francisco J. Ayala School of Biological Sciences is dedicated to providing students with a unique course of study that fosters a deep appreciation for the exciting facts and concepts in the field, an education that allows graduates to excel in their chosen careers.

The School has recently redesigned the curriculum to remain on the cutting edge of biological education. All first-year students are introduced to basic concepts in ecology and evolutionary biology, as well as cellular and molecular biology. The core set of courses in biology continues into the second year, featuring genetics, biochemistry, and molecular biology, followed in the third and fourth year by a choice of advanced courses in biology. Since biology is a laboratory discipline, students complete a series of laboratory courses in which they learn both the techniques and approaches needed to solve problems in biology.

Finally, the faculty expect that most students will engage in cutting-edge research in one of more than 250 laboratories and medical clinics in the Francisco J. Ayala School of Biological Sciences and the UCI School of Medicine. It is in these situations that faculty train students to think in a sophisticated way about real-world problems. There is also no feeling of excitement greater than finding out something about the world that no one has ever known before, a feeling afforded in biology only by participation in research. The Excellence in Research Program allows students to present their work and be recognized for their performance with a series of awards and publication of their reports in the School’s online Journal of Undergraduate Research. The set of core classes that instructs students in the concepts of biology, the advanced classes that allow a deep understanding of specialized aspects of biology, the laboratory courses that convey the practical aspects of problem-solving in biology, and the research experiences that engage students in the real excitement in revealing new information about biology, come together to provide an extraordinary experience for students. The Honors Program in the Francisco J. Ayala School of Biological Sciences further enhances the educational experience for the best students.

Biology students have the option of specializing in areas of biology that best fit their interests, completing courses for degree programs in Biochemistry and Molecular Biology, Biology/Education, Developmental and Cell Biology, Ecology and Evolutionary Biology, Exercise Sciences, Genetics, Human Biology, Microbiology and Immunology, or Neurobiology.

Those students who wish to receive a broader education in the area can opt to complete a major in Biological Sciences. Completion of any of these majors forms an excellent basis for application to either graduate or professional studies such as medical school, and graduates of the Francisco J. Ayala School of Biological Sciences are routinely accepted to the most prestigious programs in the country.

The quality of the faculty in the Francisco J. Ayala School of Biological Sciences has remained high while increasing steadily in number over the past few years, giving students a remarkable range of expertise in biology and with it, a large number of different advanced courses and research
opportunities. In addition, their efforts have brought several high-impact research units to the campus, such as the Center for the Neurobiology of Learning and Memory, the Center for Virus Research, the Beckman Laser Institute, the Cancer Research Institute, the Developmental Biology Center, the Center for Immunology, the Institute for Memory Impairments and Neurological Disorders, the Macromolecular Structure Research Unit, the Organized Research Unit in Molecular and Mitochondrial Medicine and Genetics, the Institute for Genomics and Bioinformatics, and the Reeve-Irvine Research Center, all of which are accessible to undergraduates. The Francisco J. Ayala School of Biological Sciences also has close research and teaching collaborations with faculty in the Schools of Medicine, Physical Sciences, Social Ecology, and Social Sciences; the Donald Bren School of Information and Computer Sciences; and The Henry Samueli School of Engineering.

In addition to the regular University requirements for admission, students interested in the biological sciences should include in their high school curriculum, in addition to a course in biology, four years of mathematics, as well as courses in chemistry and physics, which are now an integral part of most contemporary biological work.

The School’s professional counseling staff is always available for consultation to students regarding the many decisions in their academic program. They also are trained to provide guidance in the application process to both professional and graduate schools, a real advantage to the high proportion of students in the Francisco J. Ayala School of Biological Sciences who go on to pursue advanced degrees.

Opportunities are available at the graduate level to specialize in Developmental and Cell Biology, Ecology and Evolutionary Biology, Molecular Biology and Biochemistry, and Neurobiology and Behavior.

### Honors

#### Honors Program in the Francisco J. Ayala School of Biological Sciences

The Honors Program in the Francisco J. Ayala School of Biological Sciences provides an opportunity for outstanding majors in the School to pursue advanced work in independent research via participation in the Excellence in Biological Sciences Research Program and earn Honors in Biological Sciences upon graduation. Admission to the program is based on an application to participate in the Excellence in Biological Sciences Research program filed during the middle part of the fall quarter of the year of the student’s participation. Additionally, students must have a minimum overall 3.5 grade point average and a minimum 3.5 grade point average in all required Biological Sciences courses. The Program requires enrollment in research (BIO SCI 199) including successful completion of BIO SCI H195 and the Excellence in Biological Sciences Research program.

#### Graduation with Honors

Of the graduating seniors, no more than 12 percent will receive Latin honors: approximately 1 percent summa cum laude, 3 percent magna cum laude, and 8 percent cum laude. The selection for these awards is based on spring quarter rank-ordered grade point averages. To be eligible for honors at graduation, the student must, by the end of spring quarter of the senior year, be officially declared a Biological Sciences major; submit an Application to Graduate by the end of winter quarter of the senior year; have completed at least 72 units in residence at a UC campus by the end of the spring quarter of the academic year in which they graduate; have all corrections to the academic record processed by the University Registrar’s Office by the end of spring quarter; if completing the Language Other Than English general education requirement with a language exemption test, pass the test by the end of spring quarter; and be able to verify completion of all course work by the end of the spring quarter of the senior year. Other important factors are considered visit at Honors Recognition.

#### Excellence in Research Program

The Francisco J. Ayala School of Biological Sciences believes that successful participation in creative research is one of the highest academic goals its undergraduates can attain. Students enrolled in Undergraduate Research (BIO SCI 199) and who meet the eligibility requirements have an opportunity to present the results of their research endeavors to peers and faculty. Those students awarded with “Excellence in Research” will then have their papers published in the School’s online Journal of Undergraduate Research in the Biological Sciences.
The program begins each fall with a mandatory instructional workshop and continues through spring with students completing a scientific paper, poster presentation, and scientific talk. Contact the Biological Sciences Student Affairs Office, room 1011 Biological Sciences III, or visit the Excellence in Research website (https://www.bio.uci.edu/undergraduates/research/excellence-in-research) for additional information.

**Campuswide Honors Program**

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campus-wide Honors Program, 1200 Student Services II; 949-824-5461; honors@uci.edu; or visit the Campuswide Honors Program website (http://honors.uci.edu).

**Dean's Honor List.** The quarterly Dean’s Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

**Biological Sciences Honors, Scholarships, Prizes, and Awards**

The following honors, scholarships, prizes, and awards are presented at the annual Biological Sciences Honors Convocation held in June.

- **Excellence in Research Award.** Undergraduates who have successfully completed the requirements for this program are presented with Excellence in Research certificates.
- **Brian Atwood Scholarship.** The Brian Atwood Scholarship is awarded to junior Biological Sciences majors who demonstrate outstanding achievement in both scholarship and service to the UCI community.
- **Robert H. Avnet Memorial Scholarship.** The Robert H. Avnet Memorial Scholarship has been established to assist a student interested in becoming a physician. The student must be a Biological Sciences major and demonstrate financial need.
- **Carol Becker McGaugh Award.** This award is given to a junior with outstanding research in the area of neurobiology of learning and memory.
- **Robert Ernst Prize for Excellence in Research in the Biological Sciences.** This prize is awarded to a student for meritorious research conducted in the field of biology.
- **Robert Ernst Prize for Excellence in Student Research in Plant Biology.** This prize is awarded to a student for meritorious research conducted in plant biology.
- **Kyle Farol Memorial Award.** The Kyle Farol Memorial Award is presented to an outstanding undergraduate Biological Sciences major who has dedicated their time as a volunteer in a clinical setting.
- **M. Marlene Godoy Award.** This award is given to support a graduating senior in the Biological Sciences who is pre-medical or pre-dental. The recipient is one who is actively involved with philanthropic community service, University service, and in undergraduate research.
- **Dr. William F. Holcomb Scholarship.** The intent of the Dr. William F. Holcomb Scholarship is to support biomedical or marine biological studies. The Scholarship is to be used to support continuing academic work over a specific period.
- **Laurence J. Mehlmann Prize.** The Laurence J. Mehlmann Prize is awarded to an undergraduate student in the Francisco J. Ayala School of Biological Sciences who has demonstrated outstanding achievement in both scholarship and service to the School.
- **Edward Mittelman Memorial Fund Scholarship.** The Edward Mittelman Memorial Fund Scholarship is presented to an outstanding Biological Sciences student who will pursue a career in the medical field.
- **Edward A. Steinhaus Memorial Award.** The Edward A. Steinhaus Memorial Award is given to outstanding Biological Sciences graduate student teaching assistants who demonstrate promise as future educators.
- **Joseph H. Stephens Award for Outstanding Research in Ecology and Conservation.** This award is granted to a graduate student who has demonstrated outstanding research in ecology and conservation.
- **Joseph H. Stephens Award for Outstanding Research in Biochemistry and Molecular Biology.** This award is granted to a graduate student who has demonstrated outstanding research in biochemistry and molecular biology.
- **Jayne Unzelman Scholarship.** The Jayne Unzelman Scholarship is presented to an undergraduate student who has shown academic excellence and been of service to the Francisco J. Ayala School of Biological Sciences and/or the University, and to the community.

**Special Programs and Courses**

**Biological Sciences 199**

The (BIO SCI 199) Undergraduate Research Training Program provides students the opportunity to pursue independent research. Students conduct experimental laboratory, field, or clinical research as an apprentice scientist under the supervision of a professor in the Francisco J. Ayala School of Biological Sciences or the School of Medicine. BIO SCI 199 research students experience the challenge and excitement of the world of science. Students develop new scientific skills and knowledge while training with professors who are on the cutting edge of research and discovery in the
biological and medical sciences. The research training may commence as early as the sophomore year or, in the case of exceptional students, in the freshman year.

To participate in this unique research training program, students must be in good academic standing, and completion of both BIO SCI 94 From Organisms to Ecosystems and BIO SCI 194S Safety and Ethics for Research are mandatory prior to enrollment. Students are encouraged to investigate the possibilities for research early to assure that all requirements and deadlines are met. It is recommended that students contact a faculty sponsor at least one quarter in advance for (BIO SCI 199) enrollment. Once a faculty sponsor is acquired, the student must submit the enrollment packet to the Biological Sciences Student Affairs Office, 1011 Biological Sciences III. At the end of each quarter a Summary Report is required.

Students cannot participate in research involving human blood, body fluids, or tissue, unless special approval is granted. The faculty sponsor must submit a request for exception to the Biological Sciences Student Affairs Office.

Students conducting research directly with patients or other human subjects must comply with special enrollment procedures and the additional safety training required at the clinical site. The (BIO SCI 199) Undergraduate Research Training Program standards, procedures, enrollment packets, and announcements are available at the Biological Sciences Undergraduate Research website (https://www.bio.uci.edu/undergraduates/research/bio-199).

The (BIO SCI 199) Undergraduate Research Training Program can provide experience that is beneficial for the future pursuit of graduate school. Information regarding research careers in the biological sciences is best obtained from a faculty research mentor.

Students should be aware that for any one quarter, a maximum of five units of independent study courses (BIO SCI 197, BIO SCI 198 or BIO SCI 199) may be taken within the Francisco J. Ayala School of Biological Sciences.

Minority Sciences Programs in Biological Sciences

The Minority Sciences Programs (MSP) in Biological Sciences is a UCI umbrella program that provides infrastructure and orchestration for the operation of minority research training grants supported by the National Institutes of Health (NIH) and other agencies. MSP seeks to increase the number of U.S. underrepresented groups in biomedical research careers. MSP participants benefit from early exposure, continuous research training, and faculty mentoring. Support is also provided through paid summer and year-round research internships, early research exposure, tutoring, academic advising, scientific writing, and participation at national conferences. Furthermore, MSP has established a campuswide, regional, national, and international network of committed faculty and resource programs to facilitate the transition from high school through community college, baccalaureate, and master’s degrees to Ph.D. careers in biomedical research and related fields. Additional information is available from the MSP office, 1104 Biological Sciences III; 949-824-2589; or visit the Minority Sciences website (http://port.bio.uci.edu).

Biological Sciences Tutoring Program

The Tutoring Program provides free tutoring for most Biological Sciences courses and is available to all students in any major. Weekly small group tutoring sessions, reviews for midterms and finals, and a growing online database of worksheets and review materials are provided. In the Tutoring Program, UCI students tutor other UCI students. For the student tutor, this program provides opportunities to develop their teaching abilities, to meet and interact with faculty, and to perform a worthwhile and necessary service. Tutors also receive academic credit. For more information, contact the Biological Sciences Student Affairs Office in 1011 Biological Sciences III or visit the Bio Sci Peer Tutoring website (https://sites.google.com/a/uci.edu/biotutor).

UC Education Abroad Program

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University’s Education Abroad Program (UCEAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Specifically, Biology majors should consider the UCEAP programs in the United Kingdom, Canada, Sweden, Australia, Denmark, and Costa Rica. Visit the Study Abroad Center website (http://www.studyabroad.uci.edu) for additional information.

Students may wish to participate in the UCEAP Tropical Biology Quarter which is for undergraduates with at least one year of introductory biology, one quarter of upper-division biology, and a serious interest in biological studies. The program includes lectures, field laboratories, and independent research, with an emphasis on direct field experience. Students also take a course in Spanish language and Latin American culture.

Master of Science with a Concentration in Biotechnology

The Francisco J. Ayala School of Biological Sciences offers a master’s program with a concentration in Biotechnology designed to train students to enter the field of biotechnology as skilled laboratory practitioners. The upper-division course requirements for admission into the program are extensive. Students interested in applying for admission to the Biotechnology program should plan to complete the necessary courses during their junior and senior years. Click on the Graduate tab above for more information.

Special Research Resources

Special research resources include the Beckman Laser Institute and Medical Clinic, a research, training, and service facility in the area of laser microbeam technology; the School of Biological Sciences Biohazard (P-3) Facility, which provides laboratory facilities for working with biological agents or biological molecules such as recombinant DNA which would be hazardous when used in open laboratories; the Developmental Biology Center, dedicated to analyzing the cellular and genetic mechanisms underlying growth, development, and regeneration; the Center for the Neurobiology of Learning and Memory, a research center for studies of the brain mechanisms underlying learning and memory; the Institute for Memory Impairments and Neurological Disorders; the Center for Virus Research, which includes the Viral Vector Design research group; the Conservation Biology Project; the
Cancer Research Institute; the Center for Immunology; the Macromolecular Structure Research Unit; the UCI Arboretum, a botanical garden facility; the San Joaquin Marsh Reserve, which supports controlled marsh biota; the Burns Piñon Ridge Reserve, a high-desert habitat in San Bernardino County; and the UCI Ecological Preserve, which includes coastal hills on the campus, once under heavy grazing, but now returning to a more natural state. It is important to note that the Francisco J. Ayala School of Biological Sciences collaborates with the School of Medicine, thereby providing an opportunity for the sharing of both teaching and research activities. These collaborative efforts include the Institute for Genomics and Bioinformatics; the Reeve-Irvine Research Center; and the Bio-Imaging Interest Group.

Advising: Academic, Career, Health Sciences

1011 Biological Sciences III
http://www.bio.uci.edu/students/undergraduates/contact-us/

Academic Advising

The Biological Sciences Student Affairs Office coordinates the advising program and provides academic counseling as well as special services particularly in the area of preprofessional career counseling. Undergraduate Biological Sciences students should consult the Biological Sciences Student Affairs Office for information on academic requirements for the degree, career opportunities, the BIO SCI 199 Research Program, available tutoring for Biological Sciences courses, Biological Sciences student organizations, and scholarship information. Students can also come to the Biological Sciences Student Affairs Office to change their major, apply for graduation, or for any other help they might need related to their academic career at UCI.

Peer Academic Advisors. The Peer Academic Advisors are upper-division Biological Sciences majors who bring with them valuable academic and social experiences. Their functions include counseling students in matters of major selection, program planning, petitioning, tutoring, learning skills problems, and participation in co-curricular and extracurricular activities.

The Peer Advisors are located in the Biological Sciences Student Affairs Office. Office hours are posted at the beginning of each quarter.

Career Advising

Information on graduate and professional schools in the health sciences can be obtained from the Biological Sciences Student Affairs Office. The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Career Center section for additional information.

Areas of opportunity open to those with a Bachelor of Science degree include laboratory technology, publishing, technical editing, pharmaceutical sales, and training programs in county, state, and federal agencies. The bachelor’s degree is necessary to pursue studies leading to the M.S. and Ph.D. degrees.

The B.S. degree, plus short training periods, may prepare students for employment in education, medical technology (usually one year), allied health positions, and various other areas.

Education (community colleges, state colleges, or private schools), medical illustration, and public health (which includes hospital administration, biostatistics, epidemiology, environmental health sciences, social work, public health education, maternal and child health, and infectious and tropical diseases) are fields in which opportunities are available upon completion of a master’s program.

The Ph.D. degree may lead to research in many areas, among them biochemistry, biometeorology, botany, cytology, ecology, fishery biology, genetics, home economics, microbiology, molecular biology, pathology, physiology, psychobiology, public health, range management, soil conservation, and zoology.

Other areas where advanced degrees are necessary include medicine, dentistry, law, optometry, podiatry, osteopathy, physical therapy, and veterinary medicine.

Health Sciences Advising

Advising for careers in the health sciences is a specialty of the Biological Sciences Student Affairs Office. Students desiring to enter the health sciences should have their programs checked in the Office and should plan to enroll in BIO SCI 3A. Admissions tests for medical, dental, pharmacy, and graduate schools should be taken in the spring, a year and one-half before the student plans to enter.

Leaders in nearly all health professional schools recommend that students preparing to seek admission to their schools plan to obtain a bachelor’s degree. Students who plan to enter a school of dentistry, medicine, or other areas of the health sciences may receive the required preprofessional training at UCI. This preprofessional training may be accomplished by (1) completing the major in Biological Sciences or (2) majoring in any school or department and fulfilling concurrently the specific course requirements of the dental, medical, or other professional school the student expects to attend.

Students interested in the health sciences should choose electives in the social sciences, possibly a foreign language, physical chemistry, or other specific courses required or recommended by graduate schools. See the Pre-Health Professional Advising website (https://www.bio.uci.edu/undergraduates/careers) for additional information.

Student Participation

A wide variety of student associations, clubs, and groups provide opportunities for Francisco J. Ayala School of Biological Sciences students to participate in different types of activities and events. The groups are wide ranging and include nationally recognized honors societies such as Alpha...
Epsilon Delta, volunteer service organizations such as the Flying Sams, specialized groups such as the UCI Sports Medicine Club, and more. Detailed information about the numerous options is available at Biological Sciences Student Involvement Opportunities (https://www.bio.uci.edu/undergraduates/events-deadlines).

**Requirements for the Bachelor’s Degree**

All School of Biological Sciences students must complete the following requirements.

**All students must meet the University Requirements.**

**All students must meet the School Requirements, as shown below:**

<table>
<thead>
<tr>
<th>Complete:</th>
<th>Freshman Seminar</th>

</tbody>
</table>

Prerequisites for all Biological Sciences Core courses are rigorously enforced. Students must have a 2.0 cumulative grade point average in the Biological Sciences Core Curriculum, four upper-division elective courses, and three upper-division laboratories.

**Upper-Division Writing Requirement**

Students in the Francisco J. Ayala School of Biological Sciences have the option to satisfy the upper-division writing requirement by completing BIO SCI 100 with a grade of Pass, followed by the completion of three upper-division laboratories selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D111L</td>
<td>Developmental and Cell Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E106L</td>
<td>Habitats and Organisms</td>
</tr>
<tr>
<td>BIO SCI E112L</td>
<td>Physiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E115L</td>
<td>Evolution Laboratory</td>
</tr>
<tr>
<td>BIO SCI E131L</td>
<td>Image Analysis in Biological Research</td>

</tr>
<tr>
<td>BIO SCI N113L</td>
<td>Neurobiology Laboratory</td>
</tr>
</tbody>
</table>

Students must earn a grade of C or better in each of the three laboratories selected. Completion of the Excellence in Research in Biological Sciences program may count as one of the three-upper division labs.

**School Residence Requirement**

After matriculation, all courses required for the major must be successfully completed at UCI. Students must be a major in the Francisco J. Ayala School of Biological Sciences for the 3 academic quarters (excluding summer session) immediately preceding degree certification. The Francisco J. Ayala School of Biological Sciences strictly enforces the UCI residence requirement. At least 36 of the final 45 units completed by a student for the bachelor’s degree must be earned in residence at the UCI campus. (The School considers courses taken in the UC Education Abroad Program to be in-residence courses.)

**Undergraduate Programs**

The following majors are offered:

- Biological Sciences
- Biology/Education
- Biochemistry and Molecular Biology
Developmental and Cell Biology
Ecology and Evolutionary Biology
Exercise Sciences
Genetics
Human Biology
Microbiology and Immunology
Neurobiology

The following minors are offered:
Biological Sciences

Admission to the Major in Biological Sciences
In the event that the number of students who elect Biological Sciences as a major exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

Freshmen: Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions section of this Catalogue.

Transfer students: Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with laboratory with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

No student may enter as a double major, but Biological Sciences students interested in other areas may apply to become double majors after the first quarter, if the second school or program approves. A strong academic performance in the second area is requisite for acceptance as a double major.

Change of Major
Students who wish to declare any major within the Francisco J. Ayala School of Biological Sciences should contact the Biological Sciences Student Affairs Office in 1011 Biological Sciences III for information about change-of-major requirements, procedures, and policies. Information can also be found at UC Irvine Change of Major Criteria website (http://www.changeofmajor.uci.edu). Change of Major requests are accepted and reviewed by the School throughout the year.

Undergraduate Major in Biological Sciences
The Biological Sciences major presents a unified, in-depth study of modern biology. The Biological Sciences Core is a five-quarter series of courses ranging from ecology and evolutionary biology, to genetics, biochemistry, and molecular biology. Important laboratory techniques and methodology are presented in upper-division laboratories. Advanced elective courses provide an opportunity to continue to diversify students' exposure to the biological sciences or to gain a much more in-depth study of a particular area of the biological sciences.

NOTE: Biological Sciences majors who successfully complete their second year of study may elect to apply for a change of major to one of the following: Biochemistry and Molecular Biology, Developmental and Cell Biology, Exercise Sciences, Genetics, Human Biology, Microbiology and Immunology, or Neurobiology. Students may apply directly to the Biology/Education major or the Ecology and Evolutionary Biology major when they apply for admission to UCI. Contact the Biological Sciences Student Affairs Office for more information.

Requirements for the B.S. Degree in Biological Sciences
All students must meet the University Requirements.
All students must meet the School Requirements.
Major Requirements
A. Required Major Courses:
Select three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103</td>
<td>Cell Biology</td>
</tr>
<tr>
<td>BIO SCI D104</td>
<td>Developmental Biology</td>
</tr>
<tr>
<td>BIO SCI D105</td>
<td>Cell, Developmental, and Molecular Biology of Plants</td>
</tr>
<tr>
<td>BIO SCI E106</td>
<td>Processes in Ecology and Evolution</td>
</tr>
<tr>
<td>BIO SCI E109</td>
<td>Human Physiology</td>
</tr>
<tr>
<td>BIO SCI N110</td>
<td>Neurobiology and Behavior</td>
</tr>
</tbody>
</table>

B. Upper-Division Laboratories:
Select three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D111L</td>
<td>Developmental and Cell Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E106L</td>
<td>Habitats and Organisms</td>
</tr>
</tbody>
</table>
### Upper-Division Biology Electives:

Select four upper-division, four-unit courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103–D190, E106–E190, M114–M190, N110–N190</td>
<td>Molecular Pharmacology I</td>
</tr>
<tr>
<td>PHRMSCI 170A</td>
<td>Molecular Pharmacology II</td>
</tr>
<tr>
<td>PHRMSCI 170B</td>
<td>Physical Biochemistry</td>
</tr>
<tr>
<td>PHRMSCI 171</td>
<td>Pharmacotherapy</td>
</tr>
<tr>
<td>PHRMSCI 173</td>
<td>Biopharmaceutics and Nanomedicine</td>
</tr>
<tr>
<td>PHRMSCI 174</td>
<td>Medicinal Chemistry</td>
</tr>
<tr>
<td>PHRMSCI 177</td>
<td>Quantum Principles and Molecular Structure</td>
</tr>
<tr>
<td>CHEM 131A-131B-131C</td>
<td>and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics</td>
</tr>
<tr>
<td>PHYSICS 147A-147B</td>
<td>Principles of Imaging and Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging</td>
</tr>
</tbody>
</table>

The following courses can be used to partially satisfy the Upper-Division Biology Elective Requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 131A-131B-131C</td>
<td>Quantum Principles and Molecular Structure and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics</td>
</tr>
</tbody>
</table>

Additionally, Psychology/Biological Sciences double majors may also use PSYCH 112A-PSYCH 112B-PSYCH 112C to partially satisfy the Upper-Division Biology Elective Requirement.

**NOTE:** Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

1. BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

### Concentration in Biological Sciences Education

The optional concentration in Biological Sciences Education requires seven courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 14</td>
<td>California Teach 1: Introduction to Science and Mathematics Teaching</td>
</tr>
<tr>
<td>BIO SCI 101</td>
<td>California Teach 2: Middle School Science and Mathematics Teaching</td>
</tr>
<tr>
<td>EARTHSS 1</td>
<td>Introduction to Earth System Science</td>
</tr>
<tr>
<td>EARTHSS 7</td>
<td>Physical Geology</td>
</tr>
<tr>
<td>PHYSICS 20A</td>
<td>Introduction to Astronomy</td>
</tr>
<tr>
<td>PHYSICS 20B</td>
<td>Cosmology: Humanity’s Place in the Universe</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 108</td>
<td>Adolescent Development and Education</td>
</tr>
<tr>
<td>EDUC 124</td>
<td>Multicultural Education in K-12 Schools</td>
</tr>
<tr>
<td>EDUC 128</td>
<td>Exceptional Learners</td>
</tr>
</tbody>
</table>
The requirements for a general Biological Sciences B.S. degree for students in this concentration will be reduced by one upper-division laboratory course (major requirement B) and two upper-division biology electives (major requirement C). Students pursuing other majors within the Francisco J. Ayala School of Biological Sciences will need specific departmental approval for the reduction of degree requirements when completing this concentration.

Planning a Program of Study

Since biological sciences courses are built upon a base of the physical sciences, it is very important for students to take their required physical sciences early, particularly general and organic chemistry. Students who have not completed high school chemistry are well advised to complete a preparatory chemistry course before entering UCI. The academic program shown below is only a suggested program. Students should consult the Biological Sciences Student Affairs Office for individual academic planning.

Planning a Program of Study

Freshmen will normally take HUMAN 1A and HUMAN 1AS or lower-division writing courses, CHEM 1A, BIO SCI 93, and a freshman seminar (BIO SCI 2A) during the fall quarter. Students will then continue with BIO SCI 94, complete their general chemistry requirement, and continue with Humanities or lower-division writing during the remaining winter and spring quarters.

Sophomores begin organic chemistry (CHEM 51A or CHEM H52A) and continue the Biological Sciences Core with BIO SCI 97, BIO SCI 98, BIO SCI 99. Sophomores often begin taking courses in other disciplines to meet the UCI general education requirement and fulfill their mathematics requirement if they have not done so as freshmen.

During their junior year, most majors continue with the Biological Sciences electives and take physics. Students who intend to double major in Chemistry will be required to take PHYSICS 7C-PHYSICS 7D-PHYSICS 7E in place of PHYSICS 3A-PHYSICS 3B-PHYSICS 3C. Juniors may complete their general education requirements and usually start their research and their upper-division biology laboratory courses.

Finally, during their senior year, students continue their research and complete their remaining major requirements.

Students in the Biological Sciences major are required to make progress toward their degree, and their progress will be monitored. If normal academic progress toward the degree in Biological Sciences is not being met, students will be subject to probation.

1 Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.
Undergraduate Major in Biology/Education

Majors in Biology/Education earn their bachelor’s degree concurrently with a California Preliminary Single Subject Teaching Credential. Individuals who hold this credential are authorized to teach biology and general science in a middle school or high school.

Requirements for the B.S. Degree in Biology/Education

All students must meet the University Requirements.

All students must meet the School Requirements.

School requirement variation: BIO SCI 100, CHEM 51C, and CHEM 51LC are not required of Biology/Education majors.

Major Requirements for the B.S. in Biology/Education

A. Required Major Courses:

Select three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103</td>
<td>Cell Biology</td>
</tr>
<tr>
<td>BIO SCI D104</td>
<td>Developmental Biology</td>
</tr>
<tr>
<td>BIO SCI D105</td>
<td>Cell, Developmental, and Molecular Biology of Plants</td>
</tr>
<tr>
<td>BIO SCI E106</td>
<td>Processes in Ecology and Evolution</td>
</tr>
<tr>
<td>BIO SCI E109</td>
<td>Human Physiology</td>
</tr>
<tr>
<td>BIO SCI N110</td>
<td>Neurobiology and Behavior</td>
</tr>
</tbody>
</table>

B. Upper-Division Laboratories:

Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Laboratory Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D111L</td>
<td>Developmental and Cell Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E106L</td>
<td>Habitats and Organisms</td>
</tr>
<tr>
<td>BIO SCI E112L</td>
<td>Physiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E115L</td>
<td>Evolution Laboratory</td>
</tr>
<tr>
<td>BIO SCI E131L</td>
<td>Image Analysis in Biological Research</td>
</tr>
<tr>
<td>BIO SCI E140L</td>
<td>Evolution and the Environment Laboratory</td>
</tr>
<tr>
<td>BIO SCI E161L</td>
<td>Biology of Birds Lab</td>
</tr>
<tr>
<td>BIO SCI E166L</td>
<td>Field Biology</td>
</tr>
<tr>
<td>BIO SCI E179L</td>
<td>Field Freshwater Ecology</td>
</tr>
<tr>
<td>BIO SCI M114L</td>
<td>Biochemistry Laboratory</td>
</tr>
<tr>
<td>BIO SCI M116L</td>
<td>Molecular Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M118L</td>
<td>Experimental Microbiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M121L</td>
<td>Advanced Immunology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M122L</td>
<td>Advanced Microbiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M124L</td>
<td>Virus Engineering Laboratory</td>
</tr>
<tr>
<td>BIO SCI M127L</td>
<td>Virology and Immunology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M130L</td>
<td>Advanced Molecular Lab Techniques</td>
</tr>
<tr>
<td>BIO SCI N113L</td>
<td>Neurobiology Laboratory</td>
</tr>
</tbody>
</table>

One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.

C. Upper-Division Biology Electives:

Select two, four-unit courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103–D190</td>
<td>Molecular Pharmacology I</td>
</tr>
<tr>
<td>BIO SCI D106–E190</td>
<td>Molecular Pharmacology II</td>
</tr>
<tr>
<td>BIO SCI M114–M190</td>
<td>Physical Biochemistry</td>
</tr>
<tr>
<td>BIO SCI N110–N190</td>
<td>Pharmacotherapy</td>
</tr>
<tr>
<td>CHEM 177</td>
<td>Medicinal Chemistry</td>
</tr>
</tbody>
</table>

The following courses can be used to partially satisfy the Upper-Division Biology Elective Requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 131A- 131B- 131C</td>
<td>Quantum Principles and Molecular Structure and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics</td>
</tr>
</tbody>
</table>
### PHYSICS 147A-147B
Principles of Imaging and Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging

Additionally, Psychology/Biological Sciences double majors may also use PSYCH 112A-PSYCH 112B-PSYCH 112C to partially satisfy the Upper-Division Biology Elective Requirement.

### D. Science Teaching Courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 14</td>
<td>California Teach 1: Introduction to Science and Mathematics Teaching</td>
</tr>
<tr>
<td>BIO SCI 101</td>
<td>California Teach 2: Middle School Science and Mathematics Teaching</td>
</tr>
<tr>
<td>BIO SCI 108</td>
<td>Research Methods</td>
</tr>
<tr>
<td>EDUC 55</td>
<td>Knowing and Learning in Mathematics and Science</td>
</tr>
<tr>
<td>EDUC 109</td>
<td>Reading and Writing in Secondary Mathematics and Science Classrooms</td>
</tr>
<tr>
<td>EDUC 143AW</td>
<td>Classroom Interactions I</td>
</tr>
<tr>
<td>EDUC 143BW</td>
<td>Classroom Interactions II</td>
</tr>
<tr>
<td>EDUC 148</td>
<td>Complex Pedagogical Design</td>
</tr>
<tr>
<td>EDUC 158</td>
<td>Student Teaching Mathematics and Science in Middle/High School (two quarters)</td>
</tr>
<tr>
<td>LPS/HISTORY 60</td>
<td>The Making of Modern Science</td>
</tr>
</tbody>
</table>

1. BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

NOTE: Double majors within the Francisco J. Ayala School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

### Requirements for the Teaching Credential

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 14</td>
<td>California Teach 1: Introduction to Science and Mathematics Teaching</td>
</tr>
<tr>
<td>BIO SCI 101</td>
<td>California Teach 2: Middle School Science and Mathematics Teaching</td>
</tr>
<tr>
<td>BIO SCI 108</td>
<td>Research Methods</td>
</tr>
<tr>
<td>EDUC 55</td>
<td>Knowing and Learning in Mathematics and Science</td>
</tr>
<tr>
<td>EDUC 109</td>
<td>Reading and Writing in Secondary Mathematics and Science Classrooms</td>
</tr>
<tr>
<td>EDUC 143AW</td>
<td>Classroom Interactions I</td>
</tr>
<tr>
<td>EDUC 143BW</td>
<td>Classroom Interactions II</td>
</tr>
<tr>
<td>EDUC 148</td>
<td>Complex Pedagogical Design</td>
</tr>
<tr>
<td>EDUC 158</td>
<td>Student Teaching Mathematics and Science in Middle/High School (two quarters)</td>
</tr>
<tr>
<td>LPS 60</td>
<td>The Making of Modern Science</td>
</tr>
</tbody>
</table>

Beyond course work, some additional requirements for teacher certification are described below. With careful, early planning, it is possible for students to complete their bachelor’s degree and teacher certification in four years. This is a more time-efficient and cost-effective route than the traditional five-year teacher preparation model, which usually involves a full academic year of teacher education courses and clinical teaching experience after completion of a bachelor’s degree.

After the Francisco J. Ayala School of Biological Sciences verifies the completion of all requirements for the bachelor’s degree, students are awarded their degree from UC Irvine. By contrast, the Preliminary Single Subject Teaching Credential is awarded by the California Commission on Teacher Credentialing (CTC) upon completion of a bachelor’s degree and the state-approved UCI teacher education program, which combines course work, student teaching, and a teaching performance assessment. The UCI School of Education must verify completion of all requirements for the teaching credential and then recommend that the credential be awarded to a candidate by the CTC.

### Additional Requirements for Teacher Certification

In addition to the required course work for a California Preliminary Single Subject Teaching Credential, some additional requirements must be satisfied:

1. The Francisco J. Ayala School of Biological Sciences requires a cumulative GPA of 2.0 (C) to graduate with the bachelor’s degree.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 101</td>
<td>California Teach 2: Middle School Science and Mathematics Teaching</td>

</tr>
</tbody>
</table>
EDUC 158  
Student Teaching Mathematics and Science in Middle/High School

a. However, students must earn a grade of C or better in the following courses in order to be recommended for the Preliminary Single Subject Credential:

b. In the final phase of teaching preparation, students enrolled in EDUC 158 gain teaching experience as a “student teacher” at a local middle school or high school, while also attending a weekly student teaching seminar at UCI. Each student teacher is paired with a highly qualified science teacher who acts as a mentor while the student teacher gradually takes on full responsibility for daily lesson planning, instruction, and assessment. Cal Teach program instructors select the mentor teachers and match them with student teachers. During the winter and spring quarters when students are enrolled in EDUC 158, they should expect to spend a minimum of four hours per day (typically mornings), five days per week, in their student teaching assignment at a middle school or high school.

2. The following must be completed and verified prior to the start of student teaching in EDUC 158:
   a. Pass the California Basic Education Skills Test (CBEST), a basic mathematics and literacy skills test. For more information, see http://www.ctcexams.nesinc.com/test_info_CBEST.asp.
   b. Pass the California Subject Exam for Teachers (CSET) in science: biology/life science. Although secondary teachers are only required to pass the CSET exam in one discipline, those who pass the CSET exam in more than one disciplinary field (e.g. biology/life science and chemistry) can be authorized to teach classes in each of those disciplines. For more information about the CSET exam, see http://www.ctcexams.nesinc.com/tests.asp.
   c. Secondary school science teachers in California are expected to have a broad range of general science knowledge in addition to their discipline of specialization, because their Single Subject Teaching Credential in one of the sciences also authorizes them to teach classes in general or integrated science. The general science subtests of the CSET exam cover foundational topics in astronomy, geodynamics, Earth resources, ecology, genetics and evolution, molecular biology and biochemistry, cellular and organismal biology, waves, forces and motion, electricity and magnetism, heat transfer and thermodynamics, and structure and properties of matter. Although students can prepare for the CSET exam’s general science subtests through independent study, Biological Sciences students can also prepare by taking lower-division courses that cover the content. Here are some suggested courses for Biology/Education majors:

<table>
<thead>
<tr>
<th>EARTHSS 1</th>
<th>Introduction to Earth System Science</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 7</td>
<td>Physical Geology</td>
</tr>
<tr>
<td>PHYSICS 20A</td>
<td>Introduction to Astronomy</td>
</tr>
</tbody>
</table>

d. Obtain a Certificate of Clearance from the State of California.

e. Obtain a TB test with negative results.

f. Demonstrate readiness for student teaching responsibilities as evidenced in course work and satisfactory observations of a candidate during the following required courses:

| BIO SCI 101     | California Teach 2: Middle School Science and Mathematics Teaching |
| EDUC 143AW      | Classroom Interactions I            |
| EDUC 148        | Complex Pedagogical Design          |

3. The following must be completed and verified before the School of Education is able to recommend an individual for the Preliminary Single Subject Credential:
   a. Pass a state-approved teacher performance assessment, which is completed concurrently with student teaching in EDUC 158.
   b. Complete a college-level course or pass an examination on the U.S. Constitution. POL SCI 21A satisfies this requirement. Contact the UCI School of Education Student Affairs Office for information about the exam.
   c. Obtain a CPR certificate in adult, child, or infant training.

Declaring Intention to Complete the Biology/Education Major and Teacher Certification. Prospective teachers who want to complete their degree and a teaching credential in four years are encouraged to start planning early by reviewing the sample program for the Biology/Education major, and consulting with an academic counselor. Interested students are encouraged to get started on the suggested first- and second-year credentialing coursework, including BIO SCI 14 and BIO SCI 101, and can do so without officially declaring their intention to complete the credential. However, students must declare their intention to complete requirements for the Biology/Education major and requirements for the Preliminary Single Subject Teaching Credential prior to enrolling in EDUC 55, which they would typically take in fall of their third year. Forms for declaring an intention to complete the teaching credential are available in the Biological Sciences Student Affairs Office or in the Cal Teach Science and Mathematics Resource and Advising Center (137 Biological Sciences Administration).

Undergraduate Major in Exercise Sciences

 Virtually every organism is dependent on movement (both intracellular and extracellular) in one form or another. With respect to humans, physical activity imposes unique stresses on a broad spectrum of cell types, tissues, and organ systems. In so doing, physical activity plays a key role in shaping fundamental biological processes necessary for maintaining health and preventing disease. While both human and nonhuman species exhibit many common biological phenomenon, there are also many unique aspects of their physiology. This major will also highlight some of the unique physiological traits of nonhuman species and how such unique phenomenon may provide important insights into human health. Upper-division courses in this major are designed to integrate fundamental principles of biology, chemistry, and physics into a coherent understanding of how physical activity/inactivity impacts human health under healthy and diseased states.

Requirements for the B.S. Degree in Exercise Sciences

All students must meet the University Requirements.

All students must meet the School Requirements.

Major Requirements for the B.S. Degree in Exercise Sciences

A. Required Major Courses:

<table>
<thead>

</tr>
</tbody>
</table>

Application Process to Declare the Major: The major in Exercise Sciences is open to junior- and senior-level students only. Applications to declare the major can be submitted during the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Exercise Science Faculty Board is completed at the end of the sophomore year. Information can also be found at UCI Change of Major Criteria website.

¹ Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

Undergraduate Major in Human Biology

Understanding normal and disordered human function both require a broad integration of human physiology, behavior, and culture that is provided in this major. Students in this major will receive a unified, in-depth study of modern biology that includes ecology, evolutionary biology, genetics, biochemistry, molecular biology, cell biology, human physiology, neurobiology, and behavior. In addition, the skills and concepts needed to pursue this field are presented in upper-division laboratories. Advanced elective courses provide an opportunity to diversify exposure to the biological sciences. Additional courses in the humanities and social sciences focus on the relevance of these areas to the human condition. Given the focus on human biology, this major will serve as an ideal preparation for the health science professions.

Requirements for the B.S. Degree in Human Biology

All students must meet the University Requirements.
All students must meet the School Requirements.
Major Requirements for the B.S. Degree in Human Biology

A. Required Major Courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
<tr>
<td>BIO SCI E131L</td>
<td>Image Analysis in Biological Research</td>
</tr>
<tr>
<td>BIO SCI E140L</td>
<td>Evolution and the Environment Laboratory</td>
</tr>
</tbody>
</table>
One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.

C. Upper-Division Biology Electives:

Select four upper-division, four-unit courses from the following:

- Biological Sciences D103-D190, E106-E190, M114-M190, N110-N190

- PHRMSCI 170A Molecular Pharmacology I
- PHRMSCI 170B Molecular Pharmacology II
- PHRMSCI 171 Physical Biochemistry
- PHRMSCI 173 Pharmacotherapy
- PHRMSCI 174 Biopharmaceutics and Nanomedicine
- PHRMSCI 177 Medicinal Chemistry

The following courses can be used to partially satisfy the Upper-Division Biology Elective Requirement:

- CHEM 131A-131B-131C Quantum Principles and Molecular Structure and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics

or

- PHYSICS 147A-147B Principles of Imaging and Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging

Additionally, Psychology/Biological Sciences double majors may also use PSYCH 112A-PSYCH 112B-PSYCH 112C to partially satisfy the Upper-Division Biology Elective Requirement.

D. Behavioral Science Courses (choose 1 option):

Option 1

- ANTHRO 2A Introduction to Sociocultural Anthropology
- PSYCH 7A Introduction to Psychology
- SOCIOL 1 Introduction to Sociology

Option 2

- SOC SCI H1E-H1F-H1G Honors: Critical Issues on the Social Sciences

E. HUMAN 1A-HUMAN 1AS-HUMAN 1B-HUMAN 1BS-HUMAN 1C-HUMAN 1CS.

F. BIO SCI 3A.

One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.

1 BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

Application Process to Declare the Major: The major in Human Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Human Biology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu). Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

## Undergraduate Minor in Biological Sciences

### Requirements for the Minor in Biological Sciences

Nine courses are required, no more than two of which may be taken on a Pass/Not Pass basis:

A. Select three of the following: ¹

- BIO SCI 93  From DNA to Organisms
- BIO SCI 94  From Organisms to Ecosystems
- BIO SCI 97  Genetics
- BIO SCI 98  Biochemistry
- BIO SCI 99  Molecular Biology

B. Select six of the following: ²

- Three- or four-unit courses selected from BIO SCI 5–H90 (excluding 14 and 46), 93–99, and D103–D190, E106–E190, M114–M190, N110–N190.

¹  Prerequisites are strictly enforced. Exceptions may be made for some majors that accept the above courses for degree requirements. Consult with the Biological Sciences Student Affairs Office or the academic counseling office of the major.

²  Three courses must be upper-division. Prerequisites are strictly enforced. (Courses used to satisfy group A may not also be used to satisfy group B.)

### Residence requirement for the minor:

A minimum of six courses required for the minor must be completed at UCI. Approved courses taken in the Education Abroad Program are considered to be in-residence courses.

### NOTE:

Students in any of the majors within the Francisco J. Ayala School of Biological Sciences or students majoring in Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences may not minor in Biological Sciences.

### On This Page:

- Graduate Study in Biological Sciences
  - Master of Science
  - Doctor of Philosophy
  - Master of Science with a Concentration in Biotechnology
Graduate Study in Biological Sciences

The Francisco J. Ayala School of Biological Sciences offers graduate study in a wide variety of fields ranging across the spectrum of the biological sciences. The four Departments of the Francisco J. Ayala School of Biological Sciences (Developmental and Cell Biology, Ecology and Evolutionary Biology, Molecular Biology and Biochemistry, and Neurobiology and Behavior) offer concentrations of study under the Ph.D. degree administered by the Francisco J. Ayala School of Biological Sciences. Most graduate students are admitted to the Doctor of Philosophy (Ph.D.) degree program. Additionally, the master’s program in Biotechnology (M.S. degree in Biological Sciences), the M.S. degree in Biological Sciences and Educational Media Design, the M.S. degree in Biotechnology Management, and the master’s program in any of the four departments (M.S. degree in Biological Sciences) are offered. Each department has a graduate advisor whom students may consult for additional details of the individual programs. Several interdisciplinary graduate programs are also available: Graduate Program in Cellular and Molecular Biosciences, Graduate Program in Mathematical and Computational Biology, and Interdepartmental Neuroscience Program.

The department or program evaluates applications for admission to graduate study based on letters of recommendation, Graduate Record Examination scores, grades, research experience, and other relevant qualifications of the applicant. Candidates for graduate admission are urged to consult the particular department or program whose faculty and expertise best fit their interests and background.

Master of Science and Doctor of Philosophy in the Biological Sciences

The Francisco J. Ayala School of Biological Sciences offers both the Master of Science and Doctor of Philosophy, although emphasis at the graduate level is placed on the Ph.D. programs. Most training takes place within one of the departments, although full facilities and curricular offerings are available to all graduate students in all departments of the Biological Sciences. Interdisciplinary study and research are encouraged.

Students are expected to maintain a B average at all times. The normative time to degree is two years for the master’s degree and five years for the doctoral degree. A master’s degree is not a prerequisite for the Ph.D. degree.

Students plan their academic program in consultation with the graduate advisor or a faculty committee. Faculty advisors may be changed to meet the needs and interests of the student. In addition, it is possible for students to transfer to another program in the School, subject to the approval of the dean of Graduate Studies, and acceptance into that program. Students are encouraged to consult with faculty members with regard to their research and academic interests.

During their graduate training, all doctoral students are required to serve at least two quarters as a 50-percent teaching assistant under the direction of laboratory coordinators or faculty. Advanced graduate students may work closely with faculty in the planning and execution of the teaching program. The amount and nature of the teaching experience varies with the department.

Master of Science

The Master of Science degree may be completed by submission of a research thesis (plan I) or by course work and a comprehensive examination (plan II).

Plan I: Thesis Plan. The student is required to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional eight units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a thesis to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S. degree.

Plan II: Comprehensive Examination Plan. The plan II M.S. degree is awarded based on completion of at least 36 units of course work and satisfactory completion of a comprehensive examination. The student is required to complete at least 16 units (four courses) of didactic graduate course work offered by the department. In addition, the student will take up to 12 units of research. An additional eight units or more of elective course work will be completed from other graduate courses offered by the department. A maximum of four units of upper-division undergraduate courses may be included in the program with the approval of the associate dean for Graduate Studies. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The comprehensive exam will be administered by a committee of at least three departmental faculty, and may include written and oral sections. The comprehensive examination format will include presentation of research or a capstone project and may include additional sections such as a research proposal, presentation of a project, critical analysis, or other components. The normative time to degree is two years for the M.S. degree by comprehensive examination.
Doctor of Philosophy

Comprehensive Examination-First Year. Some departments and graduate programs require a comprehensive examination that is generally taken at the end of the first year of graduate study.

Advancement to Candidacy Exam. The advancement to candidacy examination is taken in the third year of graduate study. The student will prepare a written research proposal based on a federal granting agency format, and the proposal will be submitted to the advancement committee. The student will present the research proposal to a committee of five faculty members. At the time of advancement to candidacy, the student is expected to have identified an important and tractable dissertation topic, and to have demonstrated the technical and intellectual skills to complete doctoral thesis research.

Once the advancement to candidacy examination is completed, the student is expected to complete the doctoral degree within three years. The student must submit a dissertation on their research and defend the thesis in an oral examination during the final year of graduate study. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate student status or consent of instructor is a prerequisite for all 200–299 courses.

Master of Science with a Concentration in Biotechnology

Department of Molecular Biology and Biochemistry

Michael G. Cumsky, Director
3205 McGaugh Hall
949-824-6034
http://www.bio.uci.edu/
morgano@uci.edu

The field of biotechnology has developed explosively since the discovery of gene cloning and sequencing methods in the mid-1970s. The field is now represented by many active and successful companies who share an intense demand for well-trained people with up-to-date research skills in the manipulation of nucleic acids, proteins, immunological reagents, and pathogenic organisms. The program in Biotechnology features two tracks leading to an M.S. degree in Biological Sciences. The first is the traditional program, and the second, which takes advantage of a defined area of campus research strength, provides an emphasis in stem cell biology. Both tracks incorporate extensive training from both teaching laboratories and actual research settings (individual faculty laboratories). Focus is placed on techniques relevant to industry and seminar exposure to the nature of industry. It is designed to train students to enter the field of biotechnology as skilled laboratory practitioners. Emphasis is placed on learning state-of-the-art technology in protein isolation and characterization, animal and microbial cell culture, virology, immunology, and/or stem cell biology. Students are trained in experimental rationales for solving actual research problems and are encouraged to take summer internships in industry between the first and second year of their studies.

The Department of Molecular Biology and Biochemistry evaluates applicants to the program on the basis of grades, letters of recommendation, GRE scores, and other relevant qualifications. Applicants should have successfully completed a B.S. degree or equivalent. Courses should include general chemistry with laboratory, calculus, physics, organic chemistry, genetics, biochemistry, molecular biology, microbiology, immunology, and virology, as well as laboratory courses in biochemistry, molecular biology, microbiology, and either animal virology or immunology. Enrollment in the stem cell biology emphasis is limited to eight continuing students per year. Biotechnology graduate students interested in this track apply for admission during the winter quarter of their first year in the program.

The traditional program emphasizes training in laboratory and research environments. First-year students are required to enroll in a series of laboratory courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MOL BIO 250L</td>
<td>Biotechnology Laboratory - Nucleic Acids</td>
</tr>
<tr>
<td>MOL BIO 251L</td>
<td>Biotechnology Laboratory - Protein Purification and Characterization</td>
</tr>
<tr>
<td>MOL BIO 221L</td>
<td>Advanced Immunology Laboratory (if offered)</td>
</tr>
<tr>
<td>MOL BIO 227L</td>
<td>Virology and Immunology Laboratory (if 221L or 224 are not offered)</td>
</tr>
</tbody>
</table>

These courses are designed to teach techniques in recombinant DNA methodology, protein isolation and characterization, proteomics, animal and microbial cell culture, immunology, and virology. In addition, students are trained rigorously in data recording and presentation as the laboratory notebooks are reviewed and graded by laboratory course instructors. Students are taught formal course work in nucleic acids, proteins, genetic engineering, and molecular/cellular biology. Emphasis during the second year is devoted exclusively to research projects in faculty laboratories, with the exception of one elective course each quarter from an approved list or by consent of the Director. The program concludes with a formal presentation of the student’s research at the end of the second year.

Students enrolled in the stem cell biology emphasis take the same number of laboratory and lecture courses as those in the traditional track. However, in the spring quarter of their first year they must enroll in the stem cell laboratory (taught at the Stem Cell Research Core Facility), and their electives must include the following courses, if offered: Stem Cell Policy (M&MG 230), Stem Cell Biology (DEV BIO 245), and Clinical Aspects of Stem Cells (DEV BIO 203B, when offered). In addition, their individual research must be conducted in the laboratory of a faculty member utilizing stem cells.
While the Biotechnology program is designed to produce skilled laboratory practitioners for industrial positions, some students may wish to continue in a Ph.D. degree program. The Department of Molecular Biology and Biochemistry is a member of the interdisciplinary graduate program in Cellular and Molecular Biosciences, a program which offers the Ph.D. degree in Biological Sciences. Biotechnology program students who wish to enter the interdisciplinary graduate program upon completion of the M.S. degree should apply for admission during their second year.

Master of Science in Biotechnology Management (MSBTM)

Michael G. Cumsky, Director
Department of Molecular Biology and Biochemistry
3205 McGaugh Hall
949 824-6034
http://www.bio.uci.edu/
morgano@uci.edu;

The M.S. in Biotechnology Management is a joint graduate degree that will prepare scientists for leadership roles in biotechnology, science, and engineering-based companies through a curriculum comprised of courses from the Department of Molecular Biology and Biochemistry (MB&B) in the Francisco J. Ayala School of Biological Sciences, the Department of Biomedical Engineering in The Henry Samueli School of Engineering, and The Paul Merage School of Business. Students will receive advanced training in biotechnology through course work, a teaching laboratory, and two quarters of independent research in a faculty laboratory of their choosing. They will also learn to think as a business manager by solving product development challenges through consulting projects, creating business plans, and by exposure to current issues within the biotechnology sector. Students will develop quantitative and qualitative skills along with business communication skills. Students will learn about business from the biotechnology perspective and biotechnology from the business perspective, and will be taught to think about their work through the lens of innovation, a crucial view for their careers. Importantly, the MSBTM program is fully interdisciplinary, as students are immersed in the campus cultures of both science and business. They take their science courses with M.S. and Ph.D. students from several campus graduate programs, and they take their business/management courses with students in the full-time M.B.A. or FEMBA programs.

Some of the distinctive features of the MSBTM program include the following:

- Advanced training in biotechnology through course work and an eight-unit teaching laboratory;
- A research component whereby students will engage in research with a faculty member in either the Francisco J. Ayala School of Biological Sciences Sciences or the Department of Biomedical Engineering (requests to perform research in labs outside of Biological Sciences or Biomedical Engineering will be considered on a case-by-case basis). This research component is considered to be important for careers in the biotechnology industry and makes this program unique worldwide;
- An Intensive course, Responding to Dynamic Times: Thinking Strategically in Business (MGMTMBA 200), which presents fundamental concepts, tools, and solutions from management to initiate students into the concrete challenges that managers in high-performing organizations typically confront. Students will be introduced to the pedagogical methods of case analysis, group problem solving, and group presentations as a means of developing the skills and strategies associated with effective managerial action. The course is structured as a full-time, in-residence intensive;
- An experiential learning component wherein student teams, under the guidance of The Paul Merage School of Business and Department of Molecular Biology and Biochemistry professors, act as a consulting team which works with managers of biotechnology or biological science-based companies on innovative solutions to current problems faced by the companies;
- A business plan component wherein students from biosciences and management prepare a formal business plan for an Entrepreneurship or New Venture Management course;
- A new capstone course taught in the spring quarter of the second year by faculty in both Biological Sciences and The Paul Merage School of Business. The cross-listed course, Biotech Management (MOL BIO 253)/Biotech Management (MGMTMBA 293) will integrate the program’s two-year curriculum and provide a format for the required comprehensive exam. The curriculum will address a number of management issues in the biotech industry including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics. Guest lecturers from the biotech industry will also be invited to talk about both the scientific and management sides of their companies;
- “Proseminar” courses in the first year that provides students with information and practical skills for success in the program and career planning.

Admissions

Applicants will apply directly to the Graduate Division for the MSBTM program beginning each fall. The program uses rolling admission deadlines. The priority deadline is January 15; applications received by this date are read first, and we begin filling next fall’s class from this group. March 15 is the normal deadline; the remainder of the class is filled from these applicants. If the class is not full after review of the March 15 applicants, we will accept additional applications until June 1. Prerequisite requirements will be the same as those for the Graduate Program in Biotechnology, which include a B.A. or B.S. degree in biological sciences or related discipline and several specific elective and laboratory courses. Admission to graduate standing in MB&B is generally accorded to those possessing a B.S. degree in biological sciences or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if such work is completed at the stipulated academic level, the applicant will be considered for admission. Those admitted from an allied field may be required to take supplementary upper-division courses in basic engineering subjects. The Graduate Record Examination (GRE) General Test is required of all applicants.

Foreign students will be required to submit a TOEFL score and occasionally a TSE score. Applicants from India must submit one of the following in order to be eligible for graduate studies consideration: a continuous four-year degree from an accredited university, college, or institution, or a completed
three-year bachelor’s accompanied with a completed two-year master’s degree. The combination of 3+2 would be the equivalent of the U.S. bachelor’s degree. The MSBTM program does not accept a straight three-year bachelor’s degree, nor does it accept a one-year completion of the two-year master’s degree in the 3+2 combination.

Applicants will be evaluated on their prior academic record and their potential for management and leadership as demonstrated in the submitted application materials (university’s transcripts, GRE test scores, letters of recommendation, applicable work experience, a Statement of Purpose, and an essay). In addition, there will be an interview by admissions counselors from The Paul Merage School of Business.

Course Work and Examination Requirements

M.S. Plan II: Seventeen required courses, a minimum of 77 units, a zero-unit Proseminar sequence in the first year (defined below), and a comprehensive examination which will be administered during the jointly taught capstone course in the spring quarter of the second year.

Required and Recommended Courses, Business: A total of nine courses adding up to 36 units. These include the Intensive Responding to Dynamic Times: Thinking Strategically in Business (MGMTMBA 200), Experiential Learning (MGMTMBA 298), or New Venture Management (MGMTMBA 213), and at least six courses from the Paul Merage School of Business, of which:

- Three courses must be selected from the following five courses: Management Science (MGMTMBA 201B), Organizational Behavior for Management (MGMTMBA 202), Financial Reporting for Management (MGMTMBA 203A), Marketing Management (MGMTMBA 205), Managerial Finance (MGMTMBA 209A), and categorized as required courses;
- Two courses must be selected from the following three courses: US Health Policy (MGMTMBA 264), Supply Chain Management (MGMTMBA 285), Business Law (MGMTMBA 292), and categorized as restricted elective courses; and
- One additional elective course of the student’s choosing.

Required and Recommended Courses, Biotechnology: A total of seven courses adding up to 36 units. These include:

- Two core biological science courses, Nucleic Acid Structure and Function (MOL BIO 203) and Protein Structure and Function (MOL BIO 204);
- Two additional graduate-level elective courses in biological sciences or biomedical engineering;
- One teaching laboratory course focusing on essential methods in biotechnology, Biotechnology Management Laboratory (MOL BIO 252L); and
- Two quarters of research (four units in winter quarter of the second year and eight units in spring quarter of the second year) whereby students will engage in independent research with a faculty member of their choosing in the School of Biological Sciences or Department of Biomedical Engineering (requests to perform research in labs outside of Biological Sciences or Biomedical Engineering will be considered on a case by case basis).

Proseminar Course (Year One)

This three-quarter course, MBA Proseminar (MGMTMBA 211), provides students with information and practical skills for success in the program and for career planning. The goal is to help clarify goals and develop skills and techniques to successfully manage the job search process for employment upon graduation and throughout one's career. This will be accomplished through workshops, presentations, webinars, and meetings with career counselors. Topics include resume writing, job interview coaching, company hiring practices, and meetings with career counselors.

Capstone Course (Year Two)

(Biotech Management (MOL BIO 253)/Biotech Management (MGMTMBA 293), five units), jointly taught by Biological Sciences and Business School faculty, is designed to integrate the program’s two-year curriculum and provide a format for the required comprehensive exam. The curriculum will address a number of management issues in the biotech industry including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics. Guest lecturers from the biotech industry will also be invited to talk about both the scientific and management sides of their companies.

Master of Science in Biological Sciences and Educational Media Design

Brad Hughes, Director
301 Steinhaus Hall
949-824-2359
bhughes@uci.edu

Program Objectives and Student Eligibility

To meet the increasingly complex challenges facing science and education, highly trained professionals with advanced scientific knowledge and pedagogical techniques coupled with state-of-the-art media design skills will be the science education leaders of the future. The Master of Science in Biological Sciences and Educational Media Design establishes an intensive pathway for training those innovative leaders. The program can be completed flexibly within one or two years of study, in as little as nine months of full-time study, or over two years of part-time study. In order to make the program accessible to working professionals, courses will be available during the academic year in the early evening and during the regular summer session. With the convenience of evening and summer course schedules, the program is tailored to suit working science educators.
Program candidates will typically possess the qualifications of a teaching credential and a B.S. in Biological Sciences or comparable degree, and have obtained a 3.0 or better GPA. Students with degrees in other areas will be considered if they have substantial course work in biology, chemistry, mathematics, and physics that is comparable to the degree requirements for a B.S. in Biological Sciences from UCI. Applicants possessing different prerequisite qualifications may potentially be considered for admission by approval of the program director with consideration of experience and/or additional course work, on an individual case basis.

Curriculum Description
The program offers an integrative interdisciplinary structure with a curriculum that includes advanced academic biological sciences course work electives, individually selected from upper-division and graduate-level schoolwide offerings. Students also choose from external field experience, research lab experience, or a graduate course in the School of Education. A special graduate-level integrative biological science course, Experimental Evolution in Biology and Education, is part of the required core courses. The four additional core courses comprise a blend of advanced training in the field of science education and leadership, media production technologies, and educational media design. The biological and educational course work are integrated through the productive synthesis of pedagogical methods, science content, and media design, culminating in a capstone project of biological science educational media that is presented and defended in the final quarter of study. Students are encouraged to serve as teaching assistants during their program; however, course units earned for University Teaching (399) will not count as units for degree completion.

Required and Elective Course Work
The M.S. program requires a minimum of 36 quarter units in approved courses, at least 24 of which must be from graduate-level courses in the 200 series or higher. Four quarter-unit core course work (16 units) in science education media design are required for the M.S. degree including the following:

1. Advanced Pedagogical Design and Educational Science Media Production (four units, fall, lecture);
2. Directed Research Specialization and Project Development (four units, fall, lab);
3. Directed Educational Media Project Production (four units, winter, lab); and
4. Project Presentations and Science Education Leadership (four units, spring, lecture/seminar).

Three academic courses (12 units) in biological sciences are also required, including the required core graduate course Experimental Evolution in Biology and Education (four units, winter, lecture/seminar). The remaining eight academic course units may include graduate-level courses offered by the School of Biological Sciences (lecture or lab, approval of the departmental instructor and the program director are required), or upper-division undergraduate courses offered by the School of Biological Sciences (lecture or lab, approval of the program director is required).

Another eight units of electives from any of the following options must also be completed (approval of the program director is required), including:

1. Independent laboratory research (up to eight units, e.g., DEV BIO 200A);
2. Independent field research (up to eight units, e.g., ECO EVO 200A);
3. Graduate course work in the School of Education (maximum of four units);
4. Upper-division courses offered by the School of Biological Sciences (maximum of four units, lecture or lab); and
5. Graduate-level courses offered by the School of Biological Sciences (up to eight units, lecture or lab).

Capstone Project for Degree Completion
The written documentation, multimedia product, and oral presentation of the educational media capstone project will serve as the comprehensive examination for completion of the M.S. degree in Biological Sciences and Educational Media Design. The centerpiece of the capstone project is the educational media product, which uses modern multimedia tools to provide compelling educational content that links conceptually to the biological science course work content. The methodological design of the educational media demonstrates the student’s pedagogical skills, as well as technical facility with media development tools. The scope of the project is set to a reasonable size and challenge range, both worthy of the master’s degree and also realistically attainable. Projects may be developed using a modular production design in consultation with the program director, so that various elements are functional, while others are descriptively simulated, to efficiently showcase the educational media product design effectively without unreasonably high production efforts.

The educational media products are accompanied by a well-written documentation package. A requirement list and format for the project documentation package is provided early in the program, and includes such elements as pedagogical rationale for product design referenced to pedagogical course work, California State content standards addressed, lesson plans, bibliographic references, background content information referenced to biological science course work, user manual instructions, assessment tools, media overview linked to media design and production course work, and advertisement of product features. All projects will be required to address National or State standards, except by approval of the program director, for projects that deal with higher education or public educational foci.

Presentations of the projects occur during class sessions via multimedia colloquia style talks for instructor and peer review. Presentations emulate in-service training for end users, including comprehensive integrated descriptions of the project’s educational media features and documentation package.
This constructive process includes extensive peer evaluation, revisionary responses, and discussion participation. Exemplary capstone projects may be exhibited/presented at the annual UCI Media Arts in Science Symposia (MASS), currently in development.

Interdisciplinary Graduate Programs

The School is structured in a manner that encourages an interdisciplinary approach to scientific problems. Interaction and cooperative efforts across traditional institutional boundaries are especially evident in the School’s participation in various organized research units (described in the Office of Research section) and in the interdepartmental/interschool graduate programs described below.

Graduate Program in Cellular and Molecular Biosciences

Melanie Cocco, Director
Administrative Contact Information: Renee Frigo
4141 Natural Sciences II
949-824-8145
http://cmb.uci.edu

The combined graduate program in Cellular and Molecular Biosciences (CMB) provides the first year of instruction for graduate students entering Ph.D. programs in six departments within the Francisco J. Ayala School of Biological Sciences and the School of Medicine. Applicants should have significant laboratory experience and be well prepared in biochemistry, molecular biology, cell biology, and genetics with appropriate course work in organic chemistry, calculus, and physics.

During the first year, students will select one of five focus areas: “Immunology and Microbiology,” Cancer and Cell Biology, “Structural Biology, Biochemistry, and Biophysics,” “Developmental and Stem Cell Biology,” or “Genetics, Epigenetics and Genomics.” Students will select three didactic courses, one each quarter, from a menu of course options recommended for their focus area. Students with more general interests will be allowed to substitute courses to gain knowledge in different areas of biomedical science. Furthermore, any student may switch focus areas during the first year. Changes to course work or Focus Area can be achieved by simple petition to the CMB director. During the first year the students also complete three required 2-unit S/U courses (Ph.D. Fundamentals, Biomedical Research Methods, and Responsible Conduct of Research) that develop knowledge and skills not necessarily covered in the didactic courses. Students may take additional elective courses relevant to their area of specialization although this is not encouraged. Each Focus Area recommends elective courses for students in years two or later, to be taken after transfer to a departmental Ph.D. program.

The students also undertake introductory research in at least two laboratories during their first year. Students can select a laboratory rotation from over 100 faculty laboratories in the departments of Biological Chemistry, Developmental and Cell Biology, Microbiology and Molecular Genetics, Molecular Biology and Biochemistry, Pathology and Laboratory Medicine, and Physiology and Biophysics. Each faculty member’s area of research is described on the department websites. Faculty also are associated with research areas that span departments, as shown on the CMB website (http://cmb.uci.edu). The year culminates in a comprehensive preliminary examination and evaluation.

At the end of the first academic year, students will select a thesis advisor in one of the departments. Students who select a thesis advisor in the Francisco J. Ayala School of Biological Sciences (Department of Developmental and Cell Biology or Molecular Biology and Biochemistry) will complete the doctoral degree in Biological Sciences. Students who select a thesis advisor in the School of Medicine (Departments of Biological Chemistry, Microbiology and Molecular Genetics, Pathology and Laboratory Medicine, and Physiology and Biophysics) will complete the doctoral degree in Biomedical Sciences.

During the second year and beyond, students participate in the departmental doctoral program. Students are required to meet all doctoral degree requirements associated with the thesis advisor’s department or program, and may be required to take additional course work, and participate in journal club and seminar series. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Further information is available in the Catalogue sections of the participating departments and through the CMB program office.

Graduate Program in Mathematical, Computational, and Systems Biology

The graduate program in Mathematical, Computational, and Systems Biology (MCSB) is designed to meet the interdisciplinary training challenges of modern biology and to function in concert with existing departmental programs or as an individually tailored program leading to an M.S. or Ph.D. degree. Detailed information is available at the Mathematical, Computational, and Systems Biology website (http://mcsb.uci.edu) and in the Interdisciplinary Studies section of the Catalogue.
Interdepartmental Neuroscience Program
Karina S. Cramer, Director
4145 Natural Sciences II
949-824-6226
http://www.inp.uci.edu;
gary.roman@uci.edu (gary.roman@uci.edu)

The Interdepartmental Neuroscience Program (INP) is a first-year graduate program that brings together more than 90 faculty from the Francisco J. Ayala School of Biological Sciences and the School of Medicine, including participation from the Departments of Anatomy and Neurobiology, Developmental and Cell Biology, Molecular Biology and Biochemistry, Neurobiology and Behavior, Pharmacology, and Physiology and Biophysics. INP faculty have broad research interests in behavioral neuroscience, brain aging, developmental neurobiology, genetics, learning and memory, molecular neurobiology, cellular neurobiology, neural injury/disorders/repair, neuropharmacology, plasticity, and sensory neuroscience. Neuroscience as a discipline requires scientists to have a detailed understanding of at least one field, and a broad understanding of many other fields. INP provides breadth early on, followed by specialization in years two through five of predoctoral training.

INP organizes and coordinates a core curriculum that provides a foundation in neuroscience and forms the basis of future specialized instruction in a participating departmental degree-granting program. This curriculum includes course work and laboratory rotations. Each trainee is individually mentored in tailoring an appropriate course of study based on academic background, interests, and research foci. After successfully completing the academic requirements of the program, students identify a thesis advisor who is willing to accept them into their laboratory, and the student will transfer to the doctoral program in their advisor’s home department. In this way, INP serves not as a degree-granting program, but as a gateway to further graduate training. Students are required to meet all doctoral degree requirements associated with the thesis advisor’s department or program.

In particular, the program provides trainees with an opportunity: (1) to begin training in neuroscience with a broad academic introduction, (2) to receive individualized attention to curricular needs, (3) to conduct initial research projects with a large and diverse group of faculty in a wide variety of departments, and (4) to conduct dissertation research in any of a large and diverse group of laboratories in a wide variety of departments.

In the first year of study, students must successfully complete one course from each of the molecular, systems, and cellular neuroscience categories. All trainees also participate in a two-unit course called Foundations of Neuroscience (NEURBIO 202A-NEURBIO 202B). This mandatory course meets in the fall and winter quarters and is intended to expose students to research in neuroscience and critical reading and analysis of the primary literature. Students are encouraged to carry out three laboratory rotations of 10 weeks each. With permission from the director and the dean, students may carry out fewer rotations. Rotations are graded on a Satisfactory/Unsatisfactory Only scale. Trainees are judged as having successfully completed the program provided that they have: (1) achieved at least a B+ (3.3) average in the core courses, (2) achieved a satisfactory grade in each quarter of Foundations of Neuroscience, (3) achieved satisfactory grades in all rotations, and (4) identified a participating faculty member who has agreed to serve as their thesis advisor.

The ideal INP candidate will have had a substantial subset of the following courses: biology, chemistry, physics, calculus, neuroscience, psychology, biochemistry, and genetics. Preference will be given to applicants who have had laboratory research experience.

Following completion of the INP and selection of a thesis mentor, students will become members of the faculty member’s participating department. In addition to the INP course work requirements, each department has specific requirements to be fulfilled, indicated below. Students who select a thesis advisor in the Francisco J. Ayala School of Biological Sciences (Department of Developmental and Cell Biology, Molecular Biology and Biochemistry, or Neurobiology and Behavior) will complete the doctoral degree in Biological Sciences. Students who select an advisor in the School of Medicine (Department of Anatomy and Neurobiology, Pharmacology, or Physiology and Biophysics) will complete the doctoral degree in Biomedical Sciences.

Developmental and Cell Biology (Francisco J. Ayala School of Biological Sciences): Students entering the Developmental and Cell Biology program are required to enroll in and attend the weekly Department seminar series (DEV BIO 290A-DEV BIO 290B-DEV BIO 290C) and Developmental and Cell Biology journal club (DEV BIO 206A-DEV BIO 206B-DEV BIO 206C). Two quarters of teaching under the supervision of Departmental faculty are required. Student training will also be individually assessed for possible courses with an emphasis in molecular, developmental biology, or genetics as deemed necessary for successful completion of the thesis research project.

Molecular Biology and Biochemistry (Francisco J. Ayala School of Biological Sciences): Students entering the Molecular Biology and Biochemistry program are required to enroll in and attend the weekly Department seminar series (MOL BIO 201A-MOL BIO 201B-MOL BIO 201C) and the Research in Progress Seminar (MOL BIO 229), where they will present their own work annually. Students will enroll in University Teaching (DEV BIO 399) and teach (TA) beginning in their second year for at least two quarters. Student training will also be individually assessed to include at least one formal graduate course in each of the second through fifth years with an emphasis in molecular biology or biochemistry as deemed necessary for successful completion of the thesis research project. Necessary courses will include two core classes (MOL BIO 203-MOL BIO 204).

Neurobiology and Behavior (Francisco J. Ayala School of Biological Sciences): Neurobiology and Behavior accepts any of the INP core courses toward the requirement of one each from Cellular, Molecular, Systems, and Behavioral categories. INP students who enter Neurobiology and Behavior in their second year must complete the fourth category if they only fulfilled three as INP students. In addition, they will fulfill the requirements met by all continuing students, including teaching (TA) beginning in their second year for at least two quarters, advancing to candidacy in their third year, annual meetings with an advisory committee, and completing four advanced courses prior to defending their dissertation in their fifth year. They also participate in the regular Department colloquium series. Students also present their research annually in the graduate student NeuroBlitz colloquium series.
Anatomy and Neurobiology (School of Medicine): Students entering the Anatomy and Neurobiology program are required to participate in the Current Topics in Neuroscience journal club (ANATOMY 227A-ANATOMY 227B-ANATOMY 227C) and attend all Department-sponsored seminars. They are also required to meet once each year with an advisory committee to monitor their progress and present their research at the annual “Grad Day” meeting. Individual advisors may require students to take other courses depending on their interests and research program.

Pharmacology (School of Medicine): Students entering the Pharmacological Sciences program through the INP are required to complete Statistics (PHARM 256) and Ethics (PHARM 257) during the summer. They will also fulfill the requirements met by all continuing students including the seminar series (PHARM 298) and graduate research (PHARM 299). The seminar series includes a journal club and research presentation component. Students will also have the opportunity to present their research at an annual Departmental Research Symposium. Students are expected to advance to candidacy by year three and to meet with their thesis committee annually.

Physiology and Biophysics (School of Medicine): Students entering the Physiology program through the INP are required to enroll each quarter in Topics in Physiology (PHYSIO 290), which is graded by attendance and participation, and to attend all meetings of the Physiology and Biophysics journal club, all Physiology and Biophysics Departmental seminars and lunch meetings with the seminar speaker, and the Research in Progress seminars. All students are required to present their research once a year at the Research in Progress program. Students are encouraged, but not required, to enroll in Physiology of Ion Channels (PHYSIO 232) and Proteomics (PHYSIO 252). All students are required to hold meetings with their thesis committee annually, beginning in their second year. The Department has no formal teaching requirements, but students who wish to gain experience as Teaching Assistants (TA) can make arrangements to do so in coordination with the director of Graduate Studies for the Department of Physiology and Biophysics.

Faculty
Dritan Agalliu, Ph.D. Columbia University, Assistant Professor of Developmental and Cell Biology (molecular, cellular, and genetic analysis of mammalian blood-brain barrier development, the role of the barrier in disease pathogenesis)

Nancy M. Aguilar-Roca, Ph.D. University of California, San Diego, Lecturer with Potential Security of Employment of Ecology and Evolutionary Biology

Steven D. Allison, Ph.D. Stanford University, Associate Professor of Ecology and Evolutionary Biology; Earth System Science

Joseph Arndt, Ph.D. University of Southern California, Professor Emeritus of Developmental and Cell Biology (developmental physiology of orchids)

Kavita Arora, Ph.D. University of Bombay, Professor of Developmental and Cell Biology (Drosophila development; TGF-ß signal transduction; cell signaling)

Dana W. Aswad, Ph.D. University of California, Berkeley, Professor of Molecular Biology and Biochemistry

Peter R. Atsatt, Ph.D. University of California, Los Angeles, Professor Emeritus of Ecology and Evolutionary Biology

Scott Atwood, Ph.D. University of Oregon, Assistant Professor of Developmental and Cell Biology

John C. Avise, Ph.D. University of California, Davis, UCI Distinguished Professor of Ecology and Evolutionary Biology

Francisco J. Ayala, Ph.D. Columbia University, Donald Bren Professor and University Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Manny Azizi, Ph.D. University of Massachusetts, Assistant Professor of Ecology and Evolutionary Biology

Pierre F. Baldi, Ph.D. California Institute of Technology, UCI Chancellor’s Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology (bioinformatics, computational biology)

Alan G. Barbour, M.D. Tufts University, Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine

Lee Bardwell, Ph.D. Stanford University, Professor of Developmental and Cell Biology (intracellular signaling in development and disease)

Claudia Benavente, Ph.D. University of Arizona, Assistant Professor of Pharmaceutical Sciences; Developmental and Cell Biology (genetics, epigenetics, cancer, pediatric cancer, retinoblastoma, osteosarcoma)

Albert F. Bennett, Ph.D. University of Michigan, Professor Emeritus of Ecology and Evolutionary Biology

Rudi C. Berkelhammer, Ph.D. University of California, Berkeley, Senior Lecturer Emerita of Ecology and Evolutionary Biology

Hans-Ulrich Bernard, Ph.D. University of Goettingen, Professor Emeritus of Molecular Biology and Biochemistry; Program in Public Health

Michael W. Berns, Ph.D. Cornell University, Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology (photomedicine, laser microscopy, biomedical devices)
Bruce Blumberg, Ph.D. University of California, Los Angeles, Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Mathew M. Blurton-Jones, Ph.D. University of California, San Diego, Assistant Professor of Neurobiology and Behavior

Hans R. Bode, Ph.D. Yale University, Professor Emeritus of Developmental and Cell Biology (molecular basis of pattern formation in Hydra)

Alexander D. Boiko, Ph.D. University of Illinois at Urbana-Champaign, Assistant Professor of Molecular Biology and Biochemistry

Peter A. Bowler, Ph.D. University of California, Irvine, Senior Lecturer of Ecology and Evolutionary Biology

Matthew E. Bracken, Ph.D. Oregon State University, Associate Professor of Ecology and Evolutionary Biology

Timothy J. Bradley, Ph.D. University of British Columbia, Professor of Ecology and Evolutionary Biology

Timothy Breddy, Ph.D McGill University, Assistant Professor of Neurobiology and Behavior

Adriana D. Briscoe, Ph.D. Harvard University, Professor of Ecology and Evolutionary Biology

Peter J. Bryant, Ph.D. University of Sussex, Research Professor and Professor Emeritus of Developmental and Cell Biology (tumor-suppressor genes of Drosophila and humans)

Susan V. Bryant, Ph.D. University of London, Professor Emerita of Developmental and Cell Biology (molecular basis of limb development and regeneration)

Michael J. Buchmeier, Ph.D. McMaster University, Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry

Nancy T. Burley, Ph.D. University of Texas at Austin, Professor of Ecology and Evolutionary Biology

Jorge A. Busciglio, Ph.D. Universidad Nacional de Córdoba, Professor of Neurobiology and Behavior

Robin M. Bush, Ph.D. University of Michigan, Associate Professor of Ecology and Evolutionary Biology

Lawrence F. Cahill, Ph.D. University of California, Irvine, Professor of Neurobiology and Behavior (neural mechanisms of emotionally influenced behavior, sex differences in brain)

Anne L. Calof, Ph.D. University of California, San Francisco, Professor of Anatomy and Neurobiology; Developmental and Cell Biology (neurogenesis and neuronal differentiation)

Diane R. Campbell, Ph.D. Duke University, Professor of Ecology and Evolutionary Biology

Richard D. Campbell, Ph.D. The Rockefeller University, Professor Emeritus of Developmental and Cell Biology (Morphogenesis; biology of Hydra; fractal geometry of biological forms)

F. Lynn Carpenter, Ph.D. University of California, Berkeley, Professor Emerita of Ecology and Evolutionary Biology

Ken W. Cho, Ph.D. University of Pennsylvania, Professor of Developmental and Cell Biology (TGF-β signaling, gene regulatory networks in development)

Olivier Cinquin, Ph.D. University College London, Assistant Professor of Developmental and Cell Biology (mathematical modeling of networks, systems biology)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, Department Chair and Eric L. and Lila D. Nelson Chair in Neuropharmacology and Professor of Pharmacology; Developmental and Cell Biology; Pharmaceutical Sciences (novel neuroactive molecules)

Michael T. Clegg, Ph.D. University of California, Davis, Donald Bren Professor and Professor Emeritus of Ecology and Evolutionary Biology

Melanie Cocco, Ph.D. Pennsylvania State University, Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences

Susana Cohen-Cory, Ph.D. The Rockefeller University, Professor of Neurobiology and Behavior

Carl W. Cotman, Ph.D. Indiana University, Professor of Neurology; Biomedical Engineering; Neurobiology and Behavior (Alzheimer's disease, apoptosis, successful aging, dementia)

Karina S. Cramer, Ph.D. California Institute of Technology, Professor of Neurobiology and Behavior

Michael G. Cumsky, Ph.D. University of California, Berkeley, Senior Lecturer of Molecular Biology and Biochemistry
Michelle Digman, Ph.D. University of Illinois at Chicago, Assistant Professor of Biomedical Engineering; Chemical Engineering and Materials Science; Developmental and Cell Biology (quantitative imaging techniques to study spatial-temporal dynamics of signaling protein networks in live cells and tissues)

Peter J. Donovan, Ph.D. University College London, Professor of Biological Chemistry; Developmental and Cell Biology (stem cell biology)

Aimee Lara Edinger, Ph.D. University of Pennsylvania, Associate Professor of Developmental and Cell Biology (cancer biology and metabolism, growth control, protein trafficking)

James J. Emerson, Ph.D. University of Chicago, Assistant Professor of Ecology and Evolutionary Biology

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, Associate Professor of Mathematics; Developmental and Cell Biology (applied and computational mathematics, mathematical and computational biology)

Hung Y. Fan, Ph.D. Massachusetts Institute of Technology, Professor Emeritus of Molecular Biology and Biochemistry

Howard J. Federoff, M.D. Ph.D. Albert Einstein College of Medicine, Vice Chancellor for Health Affairs and Professor of Neurobiology and Behavior

Norbert Fortin, Ph.D. Boston University, Associate Professor of Neurobiology and Behavior

Donald E. Fosket, Ph.D. University of Idaho, Professor Emeritus of Developmental and Cell Biology (regulation of cytoskeleton formation and function)

Christie Fowler, Ph.D. Florida State University, Assistant Professor of Neurobiology and Behavior

Steven A. Frank, Ph.D. University of Michigan, Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Ron D. Frostig, Ph.D. University of California, Los Angeles, Professor of Neurobiology and Behavior; Biomedical Engineering

David A. Fruman, Ph.D. Harvard University, Professor of Molecular Biology and Biochemistry

Christine M. Gall, Ph.D. University of California, Irvine, Department Chair and Professor of Anatomy and Neurobiology; Neurobiology and Behavior

Sunil P. Gandhi, Ph.D. University of California, San Diego, Assistant Professor of Neurobiology and Behavior

David M. Gardiner, Ph.D. University of California, San Diego, Professor of Developmental and Cell Biology (limb development and regeneration)

Brandon S. Gaut, Ph.D. University of California, Riverside, Professor of Ecology and Evolutionary Biology

Donovan German, Ph.D. University of Florida, Assistant Professor of Ecology and Evolutionary Biology

Paul David Gershon, Ph.D. University of Liverpool, Professor of Molecular Biology and Biochemistry

Charles Glabe, Ph.D. University of California, Davis, Professor of Molecular Biology and Biochemistry

Michael L. Goulden, Ph.D. Stanford University, Professor of Earth System Science; Ecology and Evolutionary Biology

Celia Goulding, Ph.D. King’s College London, Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences

Gale A. Granger, Ph.D. University of Washington, Professor Emeritus of Molecular Biology and Biochemistry

Enrico Gratton, Ph.D. University of Rome, Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Kim Green, Ph.D. University of Leeds, Assistant Professor of Neurobiology and Behavior

Michael T. Green, Ph.D. University of Chicago, Professor of Molecular Biology and Biochemistry; Chemistry (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)

Steven P. Gross, Ph.D. University of Texas at Austin, Professor of Developmental and Cell Biology; Biomedical Engineering; Physics and Astronomy (force generation by molecular motors in living cells)

John F. Guzowski, Ph.D. University of California, Irvine, Director in the Neurobiology of Learning and Memory and Associate Professor of Neurobiology and Behavior

Barbara A. Hamkalo, Ph.D. University of Massachusetts, Professor Emerita of Molecular Biology and Biochemistry

Bradford A. Hawkins, Ph.D. University of California, Riverside, Professor of Ecology and Evolutionary Biology

University of California, Irvine 2016-2017
Patrick L. Healey, Ph.D. University of California, Berkeley, *Professor Emeritus of Developmental and Cell Biology* (plant cellular differentiation and morphogenesis, ultrastructure and histochemistry of secretory systems, early reproductive development)

L. R. Herman, B.S. University of California, Irvine, *Academic Coordinator of Biological Sciences*

James W. Hicks, Ph.D. University of New Mexico, *Professor of Ecology and Evolutionary Biology*

Franz J. Hoffmann, Ph.D. University of Hohenheim, *Senior Lecturer with Security of Employment Emeritus of Developmental and Cell Biology* (regeneration of cultured plant cells, somatic cell genetics)

Yilin Hu, Ph.D. Loma Linda University, *Assistant Professor of Molecular Biology and Biochemistry*

Bradley S. Hughes, Ph.D. University of California, Irvine, *Lecturer with Security of Employment of Ecology and Evolutionary Biology*

Christopher C. Hughes, Ph.D. University of London, *Francisco J. Ayala Chair and Interim Director of Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Molecular Biology and Biochemistry*; *Biomedical Engineering* (tissue engineering, growth and patterning of blood vessels)

George L. Hunt, Jr., Ph.D. Harvard University, *Professor Emeritus of Ecology and Evolutionary Biology*

Matthew Inlay, Ph.D. University of California, San Diego, *Assistant Professor of Molecular Biology and Biochemistry*

Mahtab F. Jafari, Ph.D. University of California, San Francisco, *Vice Chair of the Undergraduate Program in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences*; *Ecology and Evolutionary Biology*; *Pharmacology*

Anthony A. James, Ph.D. University of California, Irvine, *UCI Distinguished Professor of Microbiology and Molecular Genetics*; *Molecular Biology and Biochemistry*

Pavan Kadandale, Ph.D. Rutgers, The State University of New Jersey, *Lecturer with Potential Security of Employment of Molecular Biology and Biochemistry*

Claudia H. Kawas, M.D. University of Louisville, *Nichols Term Chair in Neuroscience and Professor of Neurology*; *Neurobiology and Behavior*

Daniel J. Knauer, Ph.D. University of Nebraska, *Professor Emeritus of Developmental and Cell Biology* (human antithrombins and related serine protease inhibitors)

Natalia Komarova, Ph.D. University of Arizona, *Professor of Mathematics*; *Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Harold Koopowitz, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Stuart M. Krassner, SCE Johns Hopkins University, *Professor Emeritus of Developmental and Cell Biology* (developmental transitions of hemoflagellates)

Young Jik Kwon, Ph.D. University of Southern California, *Professor of Pharmaceutical Sciences*; *Biomedical Engineering*; *Chemical Engineering and Materials Science*; *Molecular Biology and Biochemistry* (gene therapy, drug delivery, cancer-targeted therapeutics, combined molecular imaging and therapy, cancer vaccine)

Frank M. Laferla, Ph.D. University of Minnesota, *Dean of the Francisco J. Ayala School of Biological Sciences and Professor of Neurobiology and Behavior*; *Neurology*

Arthur D. Lander, Ph.D. University of California, San Francisco, *Donald Bren Professor and Professor of Developmental and Cell Biology*; *Biomedical Engineering*; *Logic and Philosophy of Science*; *Pharmacology* (systems biology of development, pattern formation, growth control)

Michael Leon, Ph.D. University of Chicago, *Professor of Neurobiology and Behavior*

Shin Lin, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology* (combined use of biochemistry, cell biology, molecular biology, molecular biophysics to study the structure and function of proteins involved in cytoskeletal/contractile functions and signal transduction in muscle and nonmuscle cells)

Melissa Lodoen, Ph.D. University of California, San Francisco, *Assistant Professor of Molecular Biology and Biochemistry*

Anthony D. Long, Ph.D. McMaster University, *Professor of Ecology and Evolutionary Biology*; *Pharmaceutical Sciences*

Catherine Loudon, Ph.D. Duke University, *Senior Lecturer of Ecology and Evolutionary Biology*
Ulrike Luderer, M.D., Ph.D. Northwestern University, Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health (reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity, ovarian cancer)

Hartmut Luecke, Ph.D. William Marsh Rice University, Professor of Molecular Biology and Biochemistry; Physiology and Biophysics

Ray Luo, Ph.D. University of Maryland, College Park, Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical Engineering and Materials Science (protein structure, noncovalent associations involving proteins)

Andrej Lupat, Ph.D. Yale University, Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry (chemical biology)

Grant R. MacGregor, Ph.D. University of Sussex, Professor of Developmental and Cell Biology (mouse reproduction, development, homeostasis)

Richard E. MacMillen, Ph.D. University of California, Los Angeles, Professor Emeritus of Ecology and Evolutionary Biology

Stephen V. Mahler, Ph.D. University of Michigan, Assistant Professor of Neurobiology and Behavior

J. Lawrence Marsh, Ph.D. University of Washington, Professor of Developmental and Cell Biology (mechanisms of neurodegeneration and molecular genetics of development)

John F. Marshall, Ph.D. University of Pennsylvania, Professor Emeritus of Neurobiology and Behavior

Rachel Martin, Ph.D. Yale University, Associate Professor of Chemistry; Molecular Biology and Biochemistry (analytical, chemical biology, physical chemistry and chemical physics)

Adam Martiny, Ph.D. Technical University of Denmark, Associate Professor of Earth System Science; Ecology and Evolutionary Biology

J. Lawrence Marsh, Ph.D. University of Washington, Professor of Developmental and Cell Biology; Logic and Philosophy of Science

Maria J. Massimelli, Ph.D., Lecturer with Potential Security of Employment of Molecular Biology and Biochemistry

Debra K. Mauzy-Melitz, Ph.D. Marquette University, Lecturer with Potential Security of Employment of Developmental and Cell Biology (role of writing in scientific teaching)

R. Michael Mulligan, Ph.D. Michigan State University, Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology (RNA editing in plant mitochondria and chloroplasts)
Edward L. Nelson, M.D. University of Oregon, Associate Professor of Medicine; Molecular Biology and Biochemistry

Andrea C. Nicholas, Ph.D. University of Chicago, Lecturer with Potential Security of Employment of Neurobiology and Behavior

Diane K. O'Dowd, Ph.D. University of California, San Diego, Professor of Developmental and Cell Biology; Anatomy and Neurobiology (regulation of activity in developing and adult nervous systems)

Ian Parker, Ph.D. University College London, Professor of Neurobiology and Behavior; Physiology and Biophysics

Irene Pedersen, Ph.D. University of California, San Diego, Assistant Professor of Molecular Biology and Biochemistry

Maksim Plikus, Ph.D. University of Southern California, Assistant Professor of Developmental and Cell Biology (mechanisms of regeneration, stem cell control)

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Jessica Pratt, Ph.D. University of California, Irvine, Lecturer with Potential Security of Employment of Ecology and Evolutionary Biology

Jennifer A. Prescher, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences (chemical biology, organic and synthetic)

Susanne M. Rafelski, Ph.D. Stanford University, Assistant Professor of Developmental and Cell Biology; Biomedical Engineering (control of mitochondrial network size, topology and function in budding yeast cells)

James T. Randerson, Ph.D. Stanford University, UCI Chancellor's Professor of Earth System Science; Ecology and Evolutionary Biology

Jose Mari Ranz Navalpotro, Ph.D. Universidad Autónoma de Madrid, Associate Professor of Ecology and Evolutionary Biology

Olga Razorenova, Ph.D. Institute of Molecular Genetics, Assistant Professor of Molecular Biology and Biochemistry

Elizabeth L. Read, Ph.D. University of California, Berkeley, Assistant Professor of Chemical Engineering and Materials Science; Molecular Biology and Biochemistry (dynamics of complex biochemical systems, regulation of immune responses)

Markus W. Ribbe, Ph.D. University of Bayreuth, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry (chemical biology, inorganic and organometallic)

Michael R. Rose, Ph.D. University of Sussex, Professor of Ecology and Evolutionary Biology

Ann K. Sakai, Ph.D. University of Michigan, Professor of Ecology and Evolutionary Biology

Brian Sato, Ph.D. University of California, San Diego, Lecturer with Security of Employment of Molecular Biology and Biochemistry

Thomas F. Schilling, Ph.D. University of Oregon, Department Chair and Professor of Developmental and Cell Biology (zebrafish development, vertebrate genetics, craniofacial development)

Donald F. Senear, Ph.D. University of Washington, Professor of Molecular Biology and Biochemistry

Justin F. Shaffer, Ph.D. University of Washington, Lecturer with Potential Security of Employment of Developmental and Cell Biology (improving teaching and learning in college science classes)

Steven L. Small, M.D. University of Rochester, Dr. Stanley van den Noort Endowed Chair and Professor of Neurology; Cognitive Sciences; Neurobiology and Behavior

Cascade J. Sorte, Ph.D. University of California, Davis, Assistant Professor of Ecology and Evolutionary Biology

George Sperling, Ph.D. Harvard University, UCI Distinguished Professor of Cognitive Sciences; Neurobiology and Behavior (empirical studies of human information processing: short-term visual memory systems, attention, visual perception, 3-D object recognition; mathematical, computational, and neural models of visual processes: light adaptation, temporal sensitivity, contrast-D)

Craig Stark, Ph.D. Carnegie Mellon University, James L. Mc Gaugh Chair in the Neurobiology of Learning and Memory and Professor of Neurobiology and Behavior

Oswald Steward, Ph.D. University of California, Irvine, Reeve-Irvine Chair in Spinal Cord Injury Research and Professor of Anatomy and Neurobiology; Neurobiology and Behavior

Georg F. Striedter, Ph.D. University of California, San Diego, Professor of Neurobiology and Behavior
Christine Suetterlin, Ph.D. University of Basel, Associate Professor of Developmental and Cell Biology (centrosome and cilia regulation, Golgi, host-pathogen interaction)

Katumi Sumikawa, Ph.D. Imperial College London, Professor of Neurobiology and Behavior

Sha Sun, Ph.D. University of Chicago, Assistant Professor of Developmental and Cell Biology (long noncoding RNAs in epigenetic programming)

Richard Symanski, Ph.D. Syracuse University, Senior Lecturer of Ecology and Evolutionary Biology

Andrea Tenner, Ph.D. University of California, San Diego, Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior

Krishna K. Tewari, Ph.D. University of Lucknow, Professor Emeritus of Molecular Biology and Biochemistry

Leslie M. Thompson, Ph.D. University of California, Irvine, Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior

Kevin Thornton, Ph.D. University of Chicago, Associate Professor of Ecology and Evolutionary Biology

Kathleen K. Treseder, Ph.D. Stanford University, Department Vice Chair and UCI Chancellor’s Fellow and Professor of Ecology and Evolutionary Biology

Luis P. Villarreal, Ph.D. University of California, San Diego, Professor Emeritus of Molecular Biology and Biochemistry

Craig Walsh, Ph.D. University of California, Los Angeles, Professor of Molecular Biology and Biochemistry

Rahul Warrior, Ph.D. Yale University, Associate Professor of Developmental and Cell Biology (developmental genetics of transcription and proteoglycan synthesis)

Arthur Weis, Ph.D. University of Illinois at Urbana-Champaign, Professor Emeritus of Ecology and Evolutionary Biology

Gregory A. Weiss, Ph.D. Harvard University, Professor of Chemistry; Molecular Biology and Biochemistry (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Stephen G. Weller, Ph.D. University of California, Berkeley, Professor of Ecology and Evolutionary Biology

Katrine Whiteson, Ph.D. University of Chicago, Assistant Professor of Molecular Biology and Biochemistry

Dominik Franz X. Wodarz, Ph.D. Oxford University, Professor of Ecology and Evolutionary Biology; Mathematics

Marcelo A. Wood, Ph.D. Princeton University, UCI Chancellor’s Fellow and Department Chair and Professor of Neurobiology and Behavior

Clifford A. Woolfolk, Ph.D. University of Washington, Professor Emeritus of Molecular Biology and Biochemistry

Zeba Wunderlich, Ph.D. Harvard University, Assistant Professor of Developmental and Cell Biology (understanding the organization of regulatory information in the genome)

Xaiohui Xie, Ph.D. Massachusetts Institute of Technology, Associate Professor of Computer Science; Developmental and Cell Biology (computational biology, bioinformatics, genomics, neural computation, machine learning)

Guixiong Yan, Ph.D. University of Vermont, Professor of Program in Public Health; Ecology and Evolutionary Biology; Program in Public Health

Michael Yassa, Ph.D. University of California, Irvine, Assistant Professor of Neurobiology and Behavior

Biological Sciences Courses

BIO SCI 1A. Life Sciences, 4 Units.
Designed to introduce nonmajors to the basic concepts of modern biology. Discussion of evolutionary biology, ecology, molecular biology, and genetics.

Restriction: Non-School of Biological Sciences majors only.

(II)
BIO SCI 2A. Freshman Seminar. 2 Units.
Weekly meetings consisting of presentations by faculty, professional staff, and Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, learning skills, and special programs/opportunities.
Grading Option: Pass/no pass only.
Restriction: Freshmen only. Biological Sciences majors only.

BIO SCI 2B. Freshman Seminar. 1 Unit.
Faculty presentations and readings focused on the structure, function, opportunities, and current issues in the biological sciences.
Grading Option: Pass/no pass only.
Restriction: Biological Sciences majors only. Freshman only.

BIO SCI 2C. Solutions in Science. 1 Unit.
Students will be introduced to approaches that can be used to solve scientific problems. These methods can be utilized in introductory to advanced classes and will allow students to become independent thinkers.

BIO SCI 3A. Career Decision Making. 1 Workload Unit.
An introductory course designed to facilitate the career decision-making process. Decision-making processes, values, and standardized tests of aptitudes, interests, and values are utilized with non-test data in appraising biological sciences career options.
Grading Option: Pass/no pass only.

BIO SCI 3B. Non-Health Sciences Career Exploration. 1 Workload Unit.
A survey course designed to assist students in exploring non-health science career options. Lectures by professionals in various fields.
Grading Option: Pass/no pass only.

BIO SCI 6. Tropical Biology: Race to Save the Tropics. 4 Units.
Population growth combines with tropical resource consumption by industrialized nations to cause high rates of deforestation, pollution, habitat fragmentation, and extinction of species. Discusses tropical biomes, their population, community, and ecosystem processes, and possible means of conservation of biodiversity.

BIO SCI 9A. Nutrition Science. 4 Units.
An introduction to nutrition science, integrating concepts from biology, biochemistry, microbiology, physiology, and psychology to explain the interaction between nutrients and the human body. Biological basis of nutrient standards is analyzed. Effects of nutrition, behavior, exercises on health/disease.

BIO SCI 9B. Biology and Chemistry of Food and Cooking. 4 Units.
The kitchen is used as a laboratory to introduce fundamental principles of biology, chemistry, and physics. A molecular/cellular analysis of cooking, including concepts such as protein structure, browning reactions, colloids, emulsions, carbohydrate metabolism, and development of flavor/texture through biochemical transformations.
Restriction: Non-Bio Sci majors only.

BIO SCI 9D. Diseases of the Twenty-First Century. 4 Units.
Why do we get sick? An introduction to the biological basis of human disease, including diseases of the cardiovascular, respiratory, nervous, and reproductive systems. Case studies present diagnosis, treatment, and prevention protocols. Inheritable and infectious diseases also discussed.
Overlaps with BIO SCI 10, BIO SCI 12D.

BIO SCI 9E. Horticulture Science. 4 Units.
Scientific principles of horticulture at the UCI Arboretum. Taxonomy, plant life history strategies; experiments with seed dormancy; morphological adaptations for specialized sexual and clonal reproduction; basics of plant propagation and ecological restoration. Materials fee.
**BIO SCI 9G. Way Your Body Works. 4 Units.**
An introduction to the basic mechanisms that control the organ systems of the human body, including the nervous, cardiovascular, immune, and reproductive systems. Emphasis is on how the body works normally, but includes how these processes fail in disease.

Restriction: Non-Biological Sciences majors only.

**(II)**

**BIO SCI 9J. Biology of Oriental Medicine. 4 Units.**
With lectures, demonstrations, and hands-on learning, the theory and practice of herbal medicine, acupuncture, qigong, and manipulative therapies are explained in Western biomedical terms. The latest basic and clinical research advances in each area are also described.

Overlaps with BIO SCI 9N, BIO SCI D124.

**(II)**

**BIO SCI 9K. Global-Change Biology. 4 Units.**
Addresses ways in which humans are altering the global environment, with consequences for the ecology of animals, plants, and microbes. Discussion on how these biologically oriented questions relate to human society, politics, and the economy.

Same as EARTHSS 13.

**(II)**

**BIO SCI 10. The Biology of Human Diseases. 4 Units.**

Overlaps with BIO SCI 9D, BIO SCI 12D.

**(II)**

**BIO SCI 11. Topics in Biological Sciences. 4 Units.**
Studies in selected areas of biological sciences.

Repeatability: May be taken for credit 3 times.

**(II)**

**BIO SCI 14. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.**
First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as PHY SCI 5.

Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

**BIO SCI 23. Sustainable Landscaping: Design and Practices. 4 Units.**
Through lectures and hands-on work, students learn how to design habitats around dwellings, within cities, and in rural environments. These include traditional/sustainable landscaping, restoration, stormwater/wastewater treatment, xeriscaping, and low impact development design. Sustainable landscape plant materials emphasized.

**(II)**

**BIO SCI 25. Biology of Cancer. 4 Units.**
Biological, clinical, and psychosocial nature of cancer through the perspectives of medical researchers, biologists, physicians, and health educators. For students of all majors, designed so that each can increase personal awareness of the biology of cancer.

Restriction: BIO SCI 25 may not be taken for credit if taken after BIO SCI M125.

**(II)**
BIO SCI 35. The Brain and Behavior. 4 Units.
Introduction to how the brain works. Biological processes underlying perception, movement, sleep-wake cycles, motivation, language, learning, and memory. Changes in the brain associated with sex differences, drug use, aging, seasons, and time of day. Fundamental properties of the nervous system.

Restriction: Non-Biological Sciences majors only.

BIO SCI 36. Drugs and the Brain. 4 Units.

Restriction: Non-Biological Sciences majors only.

BIO SCI 37. Brain Dysfunction and Repair. 4 Units.
Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

Restriction: Non-Biological Sciences majors only.

BIO SCI 38. Mind, Memory, Amnesia, and the Brain. 4 Units.
Introduction to neural mechanisms underlying learning and memory. Emphasis on molecular changes that mediate memory as well as structures involved in different forms of memory. Additionally, examines the biology of memory phenomena, from extraordinary memory to false memory to amnesia.

Restriction: Non-Biological Sciences majors only.

BIO SCI 41. Aspects of Mood Disorder. 4 Units.
There are significant differences in response to psychiatric illness across cultures. Delves into the neuroscience underlying mood disorder, investigating current pharmacological treatments and sociocultural influences on treatment outcomes.

Restriction: Non-School of Biological Sciences majors only.

BIO SCI 42. Origin of Life. 4 Units.
Biochemical explanations for the origin of life are presented. Topics include definitions of life, the first replicating molecules, the first catalyzed biosynthesis and metabolism, the origin of cells (compartmentalization) and the origins of information and the genetic code.

BIO SCI 43. Media on the Mind. 4 Units.
Surveys an ever-increasing collection of research, suggesting modern technology and social media are changing in the way our brains function.

Restriction: Non-Biological Sciences majors only.

BIO SCI 44. Stem Cells and Brain Repair. 4 Units.
Students introduced to the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Discussion of opportunities, challenges, and implications of this research.

Overlaps with BIO SCI N172.

Restriction: Non-Biological Sciences majors only.
**BIO SCI 45. AIDS Fundamentals. 4 Units.**
Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as PUBHLTH 80.

(II)

**BIO SCI 46. Discussion and Literature Research in AIDS. 2-4 Units.**
Students carry out two activities: (1) leading discussions about HIV/AIDS (predominantly regarding sociological and personal reactions) among students taking the AIDS Fundamentals course and (2) literature research about biomedical aspects of AIDS.

Prerequisite: BIO SCI 45 or PUBHLTH 80.

**BIO SCI 47. Stress. 4 Units.**
Investigates stress at a psychological, physiological, and molecular level, and provides a current overview of the field of stress research.

Restriction: Non-Biological Sciences majors only.

(II)

**BIO SCI 55. Introduction to Ecology. 4 Units.**
Principles of ecology; application to populations, communities, ecosystems, and humans.

Restriction: Non-Biological Sciences majors only. BIO SCI 55 may not be taken for credit if taken after BIO SCI 96 or BIO SCI E106.

(II)

**BIO SCI 56. Life Sciening from Aristotle to Venter. 4 Units.**
History of biology from Aristotle through to the scientific revolutions precipitated by Darwin, geneticists, molecular biologists, and now genomics. Introduces the practices and achievements of biological research to both beginning biology students and non-majors.

Overlaps with BIO SCI H90, BIO SCI H90B.

(II)

**BIO SCI 75. Human Development: Conception to Birth. 4 Units.**
Processes leading to the birth of a healthy child and the avoidance of birth defects. Male and female reproductive systems, hormonal control of egg-sperm formations, sexual intercourse, contraception, venereal diseases, fertilization, cell division, embryonic development, fetal physiology.

Restriction: Non-Biological Science majors only.

(II)

**BIO SCI H90. The Idiom and Practice of Science. 4 Units.**
The importance of biological sciences in our world is discussed. Topics may include brain and behavior, health and disease, genetics and society, and conservation biology. Primary goal is to encourage students to understand better the world in which they live.

Restriction: Campuswide Honors Program students only.

(II)

**BIO SCI 92. Curriculum. 1-4 Units.**
Initiation, planning, and coordination of student-run courses.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 12 times.

Restriction: Biological Sciences majors only.

**BIO SCI 93. From DNA to Organisms. 4 Units.**
Cell biology, biochemistry, genetics, and the biology of organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring). Course may be offered online.

Restriction: BIO SCI 93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.
**BIO SCI H93. Honors From DNA to Organisms. 4 Units.**
Cell biology, biochemistry, genetics, and the biology or organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring).

Restriction: BIO SCI H93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.

(I)

**BIO SCI 94. From Organisms to Ecosystems. 4 Units.**
Patterns of diversity, ecology, and evolutionary biology. Emphasis is on the Tree of Life and how its members are distributed and interact. Course may be offered online.

Prerequisite: BIO SCI 93.

Restriction: BIO SCI 1A may not be taken for credit if taken after BIO SCI 94.

(I)

**BIO SCI 97. Genetics. 4 Units.**
Introduction to genetics. Basic features of replication and expression of DNA, cell division, and gene transmission. Recombination and mutation in diploid organisms.

Prerequisite: BIO SCI 94.

Restriction: Biological Sciences, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, and Nursing Science majors have first consideration for enrollment.

**BIO SCI 98. Biochemistry. 4 Units.**
Structure and properties of proteins; major biochemical pathways and mechanisms for their control. Course may be offered online.

Prerequisite: BIO SCI 97. Prerequisite or corequisite: CHEM 51B.

Restriction: Biological Sciences, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, and Nursing Science majors have first consideration for enrollment.

**BIO SCI 99. Molecular Biology. 4 Units.**
Biochemistry and replication of nucleic acids; molecular genetics; protein biosynthesis; genetic code; regulation of expression of genetic information; biochemical evolution.

Prerequisite: BIO SCI 98.

Restriction: Biological Sciences, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, and Nursing Science majors have first consideration for enrollment.

**BIO SCI 100. Scientific Writing. 3 Units.**
Designed to give an overview of the basic aspects of scientific writing relevant to reporting research in the Biological Sciences.

Prerequisite: BIO SCI 99. Prerequisite or corequisite: BIO SCI 194S. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Biological Sciences, Pharmaceutical Sciences, and Biomedical Engineering: Premedical majors have first consideration for enrollment.

**BIO SCI 101. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.**
Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5.

Same as PHY SCI 105.

Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.
**BIO SCI D103. Cell Biology. 4 Units.**
Analysis of the basic structure and function of animal cells, with an emphasis on the regulation of cellular processes. The basic features of membranes, cellular compartmentalization, protein trafficking, vesicular transport, cytoskeleton, adhesion, signal transduction, and cell cycle are covered.

Prerequisite: BIO SCI 99.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D104. Developmental Biology. 4 Units.**
Cellular and molecular analysis of how a fertilized egg develops into an organism consisting of complex structures such as the eye, arms, and brain. Emphasis is on the key concepts of developmental processes underlying pattern formation, growth, and regeneration.

Prerequisite: BIO SCI 99.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI D105. Cell, Developmental, and Molecular Biology of Plants . 4 Units.**
Emphasizes the special features of plant cells and plant development as compared to animals. Two central topics: Plants' ability to fuel our planet through photosynthesis, and the interactions of plants with microorganisms in making nitrogen available to other life forms.

Prerequisite: BIO SCI 99.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI E106. Processes in Ecology and Evolution. 4 Units.**
An in-depth study of the mechanisms that drive evolution and ecology including: natural selection, mutation, genetic drift, speciation, extinction, life history patterns, population dynamics, ecosystem and community structure, predator-prey and host pathogen interactions, and social behavior.

Prerequisite: BIO SCI 94.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

**BIO SCI E106L. Habitats and Organisms. 4 Units.**
Introduces students to local habitats and organisms through required field trips and applies ecological and evolutionary principles from BIO SCI E106. Students also explore related literature.

Prerequisite: BIO SCI 100 and BIO SCI 194S and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: BIO SCI E106L may not be taken for credit concurrently with or after taking BIO SCI E166. Students who require this lab for completion of their degree have first consideration for enrollment.

**(Ib)**

**BIO SCI E107. Seminar in Ecology and Evolutionary Biology. 2 Units.**
Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Pass/no pass only.

Restriction: Ecology and Evolutionary Biology majors only. Upper-division students only.

**BIO SCI 108. Research Methods. 4 Units.**
Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5.

Same as PHYSICS 193, CHEM 193.

**BIO SCI E109. Human Physiology. 4 Units.**
Functional features of the major organ systems in the human body. Emphasis on homeostasis and the interactions of organ systems in health and disease. (Discussion of behavior and brain function deferred to BIO SCI N110.)

Prerequisite: BIO SCI 99.

Overlaps with PHRMSCI 120.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.
BIO SCI N110. Neurobiology and Behavior. 4 Units.
Consideration of the evolution of behavior, including ethological and psychological aspects and analysis of neuroanatomical, neurochemical, neurophysiological, and neuroendocrine systems underlying basic behavioral processes.

Prerequisite: Prerequisite or corequisite: BIO SCI 99.

Restriction: Students who require this class for completion of their degree have first consideration for enrollment.

BIO SCI D111L. Developmental and Cell Biology Laboratory. 4 Units.
Students study the division of cells, isolate cellular organelles (chloroplasts, mitochondria, nuclei), and follow changes in cells undergoing programmed cell death. Development is demonstrated in experiments showing cooperation of individual cells in forming a multicellular organism. Materials fee.

Corequisite: BIO SCI D103 or BIO SCI D104 or BIO SCI D105.
Prerequisite: BIO SCI 194S and BIO SCI 100. Prerequisite or corequisite: BIO SCI D103 or BIO SCI D104 or BIO SCI D105.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI E112L. Physiology Laboratory. 4 Units.
Laboratory with a focus on the whole organism and its organ systems. Examples of structure-function relationships will be drawn from both animal and human physiology. Cellular and molecular aspects will be introduced as required. Materials fee.

Prerequisite: BIO SCI 194S and BIO SCI 100 and (BIO SCI E109 or (BME 120 and BME 121)).
Overlaps with PHRMSCI 120L.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI D113. Genetics Majors Seminar. 1 Unit.
Genetics majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Repeatability: May be taken for credit 2 times.

Restriction: Genetics majors only.

BIO SCI N113L. Neurobiology Laboratory. 3 Units.
Nature and actions of genes/gene products that regulate the functioning of the nervous system and its interaction with muscles. Topics include: neural control of gene expression; genetics and molecular biology of neural and neuromuscular diseases; gene therapies for neural disorders. Materials fee.

Prerequisite: BIO SCI 100 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI N110.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI D114. Developmental and Cell Biology Majors Seminar. 1 Unit.
Developmental and Cell Biology majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Developmental and Cell Biology majors only.

BIO SCI M114. Advanced Biochemistry. 4 Units.

Prerequisite: BIO SCI 99.
BIO SCI M114L. Biochemistry Laboratory. 5 Units.
Properties of enzymes and the culture and isolation of mutants of microorganisms. Materials fee.

Prerequisite: BIO SCI 99 and BIO SCI 100 and BIO SCI 194S.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI E115L. Evolution Laboratory. 4 Units.
Students perform experiments which illustrate important concepts in evolutionary biology such as natural selection, random genetic drift, inbreeding, age-specific selection, sexual selection, and phylogenetic reconstruction. Materials fee.

Corequisite:
Prerequisite: BIO SCI 100 and BIO SCI 194S and BIO SCI E106. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI N115A. Advanced Neurobiology I. 4 Units.
In-depth coverage of neurobiology, ranging from molecular neurobiology to functional brain imaging. Discussion of molecular, cellular, and developmental neurobiology.

Prerequisite: BIO SCI N110.

Restriction: Neurobiology Majors.

BIO SCI N115B. Advanced Neurobiology II. 4 Units.
In-depth coverage of neurobiology, ranging from molecular neurobiology to functional brain imaging. Discussion of systems and behavioral neurobiology.

Prerequisite: BIO SCI N115A.

Restriction: Neurobiology majors only.

BIO SCI M116. Advanced Molecular Biology. 4 Units.
Mechanisms of gene expression; special emphasis on regulatory events that occur in Eukaryotic organisms other than initiation of transcription. Chromatin structure and rearrangement, RNA polymerases, cis- and trans-acting elements, RNA processing, transport and stability, protein synthesis, trafficking, and turnover.

Prerequisite: BIO SCI 99 and (BIO SCI M114L or BIO SCI M116L).

BIO SCI M116L. Molecular Biology Laboratory. 5 Units.
Students perform experiments which illustrate the chemical and biological properties of nucleic acids. Emphasis is placed on recent techniques in recombinant DNA technology including gene isolation and characterization. Materials fee.

Prerequisite: BIO SCI 99 and BIO SCI 100 and BIO SCI 194S.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI D117. Movement and Health. 4 Units.
Mechanisms of movements of molecules within and across cell membranes, cytoskeleton and cell motility, muscle contraction, and physical exercises and mind-body practices. Chemical, electromagnetic, and vital energy, and regulatory pathways in such processes. Relevance to health, diseases, and integrative medicine.

Prerequisite: BIO SCI 99.

BIO SCI E117A. Exercise Sciences Seminar. 3 Units.
Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183.
BIO SCI E117B. Exercise Sciences Seminar. 3 Units.
Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.
Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183.

BIO SCI E117C. Exercise Sciences Seminar. 3 Units.
Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.
Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183.

BIO SCI E118. Ecosystem Ecology. 4 Units.
A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.
Prerequisite: BIO SCI E106 or EARTHSS 51 or EARTHSS 60A or CHEM 51C.
Same as EARTHSS 164.
Restriction: Earth System Science, Environmental Science, and Ecology and Evolutionary Biology majors have first consideration for enrollment.
Concurrent with EARTHSS 264.

BIO SCI M118L. Experimental Microbiology Laboratory. 5 Units.
Introductory general microbiology designed for preprofessional biology majors. Includes microscopy, cultivation of bacteria, morphological and biochemical characterization of bacteria, microbial metabolism, growth and genetics, microorganisms and human disease, and interactions of microorganisms with the environment. Materials fee.
Prerequisite: BIO SCI 99 and BIO SCI 100 and BIO SCI 194S.
Overlaps with BIO SCI M122L.
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI M119. Advanced Topics in Immunology. 4 Units.
Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.
Prerequisite: BIO SCI M121.
Restriction: Microbiology and Immunology majors have first consideration for enrollment.

BIO SCI N119. History of Neuroscience. 4 Units.
An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.
Prerequisite: BIO SCI 35 or BIO SCI N110 or PSY BEH P115D or (PSYCH 9A and PSYCH 9B and PSYCH 9C).
Restriction: Upper-division students only.
Concurrent with NEURBIO 255.

BIO SCI E120. Marine Biology. 4 Units.
Examines the biotic and abiotic factors influencing the physiology, distribution, abundances, interactions, and evolution of marine organisms and the roles of those organisms in mediating ecosystem services and functions. A field trip is required. Materials fee.
Prerequisite: BIO SCI 94.

BIO SCI M120. Signal Transduction in Mammalian Cells. 4 Units.
Introduction to major biochemical pathways that transmit information from extracellular cues into changes in cell behavior. Focuses on kinases, phosphatases, G proteins, second messengers, and protein-protein interactions. Includes discussion of primary research articles and experimental techniques.
Prerequisite: BIO SCI D103.
BIO SCI N120. Human Biology. 4 Units.
Human Biology provides an in-depth look at cutting edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99.
Restriction: Human Biology majors only.

BIO SCI D121. Stem Cell Biology. 4 Units.
Introduces upper-level undergraduate students to stem cell biology. Include the basic biology of stem cells, potential applications of stem cells, and the ethical, legal, and moral issues associated with human stem cell research.

Prerequisite: BIO SCI D103 and BIO SCI D104.

BIO SCI M121. Immunology with Hematology. 4 Units.
Antibodies, antigens, antigen-antibody reactions, cells and tissues of lymphoreticular and hematopoietic systems, and individual and collective components of cell-mediated and humoral immune response.

Prerequisite: BIO SCI 98.

BIO SCI M121L. Advanced Immunology Laboratory. 4 Units.
Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays. Materials fee.

Prerequisite: BIO SCI M116L and BIO SCI M121 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100.
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

Concurrent with MOL BIO 221L.

(Ib)

BIO SCI M122. General Microbiology. 4 Units.
Comparative metabolism of small molecules and cell structure and relationship to microbial classification. Macromolecule synthesis and regulation, sporulation, cell division, growth, and effect of antibiotics.

Prerequisite: BIO SCI 98.

BIO SCI M122L. Advanced Microbiology Laboratory. 4 Units.
Advanced course featuring selective isolation of a wide variety of microbial types. Identification and characterization of organisms by morphological, nutritional, and biochemical approaches. Medical, industrial, and research applications. Materials fee.

Prerequisite: BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100 and (BIO SCI M122 or BIO SCI M132).
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI M123. Introduction to Computational Biology. 4 Units.

Prerequisite: MATH 2D or MATH 2J or STATS 7 or STATS 8.
Same as COMPSCI 183.

Concurrent with MOL BIO 223.

BIO SCI D124. Biology of Integrative Medicine. 4 Units.
Presentation of biological principles and the latest clinical and basic research on complementary and alternative therapies (e.g., mind-body medicine, energy medicine, herbal medicine, acupuncture, manipulative therapies) and their integration with Western medicine. Lectures supplemented by demonstrations and hands-on learning sessions.

Overlaps with BIO SCI 9J, BIO SCI 9N.
BIO SCI E124. Infectious Disease Dynamics. 4 Units.
Discusses how the dynamical interactions between pathogens and the immune system can give rise to a variety of outcomes which include clearance of infection, persistent infection, escape from immune responses, and pathology.
Prerequisite: BIO SCI 96 or BIO SCI 97 or BIO SCI E106.

BIO SCI M124A. Virology. 4 Units.
Replication of viruses in populations, animals, and the host cell. The effects of viral infection on populations, individuals, and specific molecular effects on the target cell. Role of viral infections in cancer and degenerative diseases.
Prerequisite: BIO SCI 99.
Restriction: Biological Sciences majors only.

BIO SCI M124B. Viral Pathogenesis and Immunity. 4 Units.
The mechanisms of viral pathogenesis and of host resistance to viruses are explored in detail. HIV-1 and Influenza-A are used as examples. In each case, viral replication, cytopathic effects, immune response, and viral evasion are discussed.
Prerequisite: BIO SCI M121 or BIO SCI M124A. Recommended: BIO SCI M122.

BIO SCI M124L. Virus Engineering Laboratory. 4 Units.
An advanced laboratory for undergraduates who have completed a virology lecture class. Students learn to engineer recombinant viruses and express genes in mouse tissue.
Prerequisite: BIO SCI 194S and BIO SCI M116L and (BIO SCI M124A or BIO SCI M124B). Prerequisite or corequisite: BIO SCI 100.
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI M125. Molecular Biology of Cancer. 4 Units.
Molecular mechanisms of carcinogenesis. Consideration of transformation by DNA tumor viruses, RNA tumor viruses, and chemical carcinogens.
Prerequisite: BIO SCI 99.

BIO SCI M126. Learning to Read Primary Literature in Biochemistry and Molecular Biology. 4 Units.
An introduction to primary literature focusing on methods to approach, understand, and analyze scientific papers.
Prerequisite: BIO SCI 99.

BIO SCI E127. Physiological Plant Ecology. 4 Units.
An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.
Prerequisite: (EARTHSS 51) or (EARTHSS 60A and EARTHSS 60C) or (BIO SCI E106).
Same as EARTHSS 168.
Restriction: Earth System Science and Environmental Science and Biological Sciences majors have first consideration for enrollment.

BIO SCI M127L. Virology and Immunology Laboratory. 5 Units.
Introductory laboratory course in virology and immunology designed for biology majors. Curriculum includes plasmid preparation, plasmid characterization, microscopy, cell culture, transfection and infection of cells, cell counting, plaque assays, ELISA, Western blot, mixed lymphocyte reactions. Materials fee.
Corequisite: BIO SCI M121 or BIO SCI M124A.
Prerequisite: BIO SCI 99 and BIO SCI 194S and BIO SCI 100 and BIO SCI M116L.
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI D129. Biotechnology and Plant Breeding. 4 Units.
Conventional plant breeding techniques, their limitations, and supplementations through modern biotechnology. Includes cloning, cell transformation (genetic engineering), and cell fusion. Crop improvement, state of the art in animal and human systems, and the impact of gene technology of society.
Prerequisite: BIO SCI 94.
**BIO SCI M129. Discovery of the New RNA World. 4 Units.**
Focus is on RNAs role in catalysis and regulation. Topics include non-coding RNAs function in normal cells (regulation of cell homeostasis, development, and differentiation) and in disease (cancer, viral infection).

Prerequisite: BIO SCI 99 and (BIO SCI D103 or BIO SCI D104).

**BIO SCI D130. Photomedicine. 4 Units.**
Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

(Design units: 0)

Prerequisite: PHYSICS 3C or PHYSICS 7D.

Same as BME 135.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

**BIO SCI E130. Forensic Genetics. 4 Units.**
Covers techniques currently used for forensic identification and paternity testing. Topics include STR, Y-STR and mitochondrial DNA tests, database searches, mixtures, allelic drop out, likelihood ratios, laboratory errors and the interaction of science and the legal system.

Prerequisite: BIO SCI 93 and BIO SCI 94.

**BIO SCI M130L. Advanced Molecular Lab Techniques. 6 Units.**
Discovery-driven experimentation in the fields of molecular biology, biochemistry, and cell biology. Also involves other aspects of the lab experience including group discussion of results, scientific paper analysis, and student presentations. Materials fee.

Prerequisite: BIO SCI 100 and BIO SCI 194S and (BIO SCI D111L or BIO SCI M114L or BIO SCI M116L or BIO SCI M118L).

Repeatability: May be taken for credit 3 times.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

**BIO SCI E131L. Image Analysis in Biological Research. 4 Units.**
Introduction to scientific image analysis including techniques such as high-speed, time-lapse, thermal imaging, and flow visualization. Students make movies using cameras, edit and analyze images using computers, and do a writing project. Course may be offered online.

Prerequisite: (BIO SCI E106 or BIO SCI E109) and BIO SCI 100 and BIO SCI 194S.

(Ib)

**BIO SCI M131. Innate Immunity, Infection, and Pathogenesis. 4 Units.**
Role of the innate immune system in health and disease. Molecular pathways of innate immune recognition, expression and regulation of immune receptors, signal transduction, pathogen sensors, and detection of microbial ligands. Lecture and discussion of primary research articles.

Prerequisite: BIO SCI M121 and BIO SCI M122.

**BIO SCI N131. Human Neurodegenerative Diseases. 4 Units.**
Clinical and epidemiological aspects of neurodegenerative diseases causing dementia will be reviewed, including Alzheimer’s disease, Parkinson’s disease, Huntington’s disease, and Frontotemporal Dementia. Seminar format includes student presentation and group discussion.

Prerequisite: BIO SCI N110.

**BIO SCI D132. Introduction to Personalized Medicine. 4 Units.**
Introduction to the use of genomic techniques for the study of individual genomes and transcriptomes in healthy and diseased samples. Covers GWAS, current sequencing techniques, cancer genomics, and biomarker discovery.

Prerequisite: BIO SCI 99.
**BIO SCI D133. Advances in Regenerative Medicine. 4 Units.**
Introduces the rapidly growing field of regenerative medicine. New developments in stem cell research are discussed. Cellular, molecular, and engineering aspects of stem cell-based organ replacement strategies are examined, with emphasis on specific regenerative therapies.

Prerequisite: BIO SCI D103.

Overlaps with BIO SCI N172.

**BIO SCI M133. High-Resolution Structures: NMR and X-ray. 4 Units.**
Basic principles of magnetic resonance and X-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B or MATH 5B.

Restriction: Upper-division students only.

Concurrent with MOL BIO 211.

**BIO SCI N134. Cognitive Neuroepigenetics. 4 Units.**
Current topics in the emerging field of cognitive neuroepigenetics focusing on understanding the underlying epigenetic mechanisms of memory formation and persistence. Primary literature will be used to explore these processes.

Prerequisite: BIO SCI N110.

**BIO SCI D135. Cell Biology of Human Disease. 4 Units.**
Builds on prior biology courses about the underlying cell biological mechanisms and recent treatment advances of several model diseases. Emphasizes literature searches, reading primary literature, and student group work.

Prerequisite: BIO SCI D103.

**BIO SCI D136. Human Anatomy. 4 Units.**
Presents a systems approach to the analysis of human structure. Molecular, cellular, tissue, organ, and organ system levels of structure and organization are integrated throughout. Course may be offered online.

Prerequisite: BIO SCI 99.

Overlaps with BIO SCI D170.

**BIO SCI E136. The Physiology of Human Nutrition. 4 Units.**
Examines the biochemical basis of energy metabolism, physiological processes in digestion and uptake, and the biochemical transformation of carbohydrates, fats, and proteins in the human body. The emphasis is on expanding the students' understanding of physiology.

Prerequisite: BIO SCI 98 and BIO SCI E109.

Overlaps with BIO SCI M150.

**BIO SCI D137. Eukaryotic and Human Genetics. 4 Units.**
Structure and function of genes in eukaryotes with emphasis on special problems of genetic studies in humans. Molecular methods of genetic analysis and gene transfer are discussed. Practical applications and ethical and social issues raised by genetic studies are addressed.

Prerequisite: BIO SCI 97. Recommended: BIO SCI 99.

**BIO SCI M137. Microbial Genetics. 4 Units.**
Basic principles of microbial genetics are presented as lectures for the first half of the course. The second half is devoted to applications of these principles and requires reading review and original research papers and interactions with guest lecturers.

Corequisite: Recommended: BIO SCI 99.

Prerequisite: BIO SCI 97 and BIO SCI 98.

**BIO SCI D138. Critical Thinking in Cell Biology. 4 Units.**
Builds on prior biology courses about cell biology, and works to develop a deeper understanding of experimental techniques and interpretation of experiments. A key focus will be the question of how one moves from specific examples to general.

Prerequisite: BIO SCI 99.

**BIO SCI E138. Comparative Animal Physiology. 4 Units.**
Maintenance aspects of physiology: water balance; feeding and digestion; metabolism; respiration and circulation.

Prerequisite: BIO SCI E109.
BIO SCI N138. Sex Differences in the Brain. 4 Units.
Explores the neural bases of sex influences on brain function.
Prerequisite: BIO SCI N110.

BIO SCI E139. Animal Sensing and Motion. 4 Units.
Explores how animals sense and respond to their environment. Includes a consideration of sensory systems, muscle physiology, and biomechanics to understand the mechanistic basis of animal behavior.
Prerequisite: BIO SCI E109.

BIO SCI D140. How to Read a Science Paper. 4 Units.
Provides junior and senior undergraduates currently involved or interested in pursuing research exposure to current scientific literature and training on how to read and critically evaluate primary research articles in preparation for research-oriented.
Corequisite: BIO SCI 199.
Prerequisite: BIO SCI 99.
Restriction: Upper-division students only.

BIO SCI E140L. Evolution and the Environment Laboratory. 4 Units.
Explores basic topics in ecology and evolutionary biology and applications to agriculture, conservation, environmental issues, and public health. Format involves lab activities and discussion of scientific journal articles, with focus on learning to evaluate scientific evidence.
Prerequisite: BIO SCI 100 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI E106.
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI E142W. Writing/Philosophy of Biology. 4 Units.
Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as LPS 142W, PHILOS 142W.
Restriction: Juniors only.

BIO SCI M143. Human Parasitology. 4 Units.
Introduction to human animal-parasitic diseases including worms and protozoan infections.
Prerequisite: BIO SCI 99.

BIO SCI M144. Cell Organelles and Membranes. 4 Units.
Structure, function, and biogenesis of biological membranes and membrane-bound organelles; protein trafficking and transmembrane signaling.
Prerequisite: BIO SCI D103.

BIO SCI D145. Genomics, Development, and Medicine. 4 Units.
Focuses on the applications of genomics and proteomics to problems in genetics, cell, and developmental biology. Students will gain a comprehensive understanding of the techniques currently used for genomics analysis and how best to apply these tools to solve problems.
Prerequisite: BIO SCI 99.

BIO SCI E145. Animal Coloration and Vision. 4 Units.
Physiological and behavioral mechanisms of color production and vision including crypsis, mimicry, aposematism, masquerade, sexual dimorphism, and predator-prey interactions through the lens of signals, receivers, and receptors; color and polarization vision in mate choice and visual adaptations to aquatic environments.
Prerequisite: Prerequisite or corequisite: BIO SCI E106.
BIO SCI N147. Hearing and the Brain. 4 Units.
An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI N110.

Same as PSYCH 161H.

Restriction: Cognitive Sciences, Psychology, and Biological Sciences majors have first consideration for enrollment.

BIO SCI D148. Development and Disease. 4 Units.
Development of animal embryos from a fertilized egg to a functioning organism. Topics include reproduction, body-axis formation, growth and differentiation of embryonic cells, and organogenesis, with an emphasis on congenital birth defects and diseases that disrupt these processes.

Prerequisite: BIO SCI D103 or BIO SCI D104.

BIO SCI E150. Conservation Biology. 4 Units.
Genetic and ecological issues in conservation biology, including effects of human population growth, the value of biodiversity, conservation genetics, demography, metapopulation dynamics, community and ecosystem processes, species invasions, global climate change, and reserve design and management.

Prerequisite: BIO SCI E106.

BIO SCI M150. Nutritional Biochemistry. 4 Units.
Metabolic processes of sugar and fat that lead to an understanding of diabetes, cancer, obesity and other disease states will be the focus of this course. Nutritional supplements, analysis of metabolites and mechanisms of metabolic enzymes will be covered.

Prerequisite: BIO SCI 98.

Overlaps with BIO SCI E136.

BIO SCI N150. Brain Dysfunction and Repair. 4 Units.
Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

Prerequisite: BIO SCI N110.

Restriction: Neurobiology majors only.

BIO SCI E151. Population Dynamics in Ecology, Epidemiology, and Medicine. 4 Units.
Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Prerequisite: BIO SCI 94 or BIO SCI E106.

Concurrent with ECO EVO 251.

BIO SCI N151. Neurobiology of Aging. 4 Units.
Multidisciplinary overview of the functional capacity of the aging brain, its structural changes and the mechanisms underlying function and structure. Emphasis will be on successful brain aging and those mechanisms which lead to the development of Alzheimer's disease.

Prerequisite: BIO SCI N110.

BIO SCI N152. Developmental Neurobiology. 4 Units.
The development of the nervous system is discussed with emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Topics include neural induction, specification, migration and death; axon growth, and neural circuit formation.

Prerequisite: BIO SCI 93.

BIO SCI D153. Molecular and Cellular Basis of Disease. 4 Units.
Provides students with examples of how human disease is usually manifested at the cellular level. The roles of specific molecules and organelles are discussed where their roles in the disease process are understood.

Prerequisite: BIO SCI D103.
BIO SCI E153. Functional and Structural Evolutionary Genomics. 4 Units.
Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.
Prerequisite: BIO SCI 97. Recommended: BIO SCI E135 or BIO SCI E168 and (BIO SCI 7 or STATS 7 or MATH 7).
Concurrent with ECO EVO 253.

BIO SCI N153. Neuropharmacology. 4 Units.
Survey of neurotransmitter systems, focusing on how transmitters are made, how they interact with their receptors, and how drugs can influence these processes to alter neural function and behavior.
Prerequisite: BIO SCI N110.

BIO SCI E154. Genetics and Human History. 4 Units.
Explores topics in human health/history from an evolutionary perspective, with emphasis on genetics. Topics include the relationship between genetics and human disease as an evolutionary question, and how modern genetic techniques are used to study the history of human populations.
Prerequisite: Prerequisite or corequisite: BIO SCI E106.

BIO SCI N154. Molecular Neurobiology. 4 Units.
Nature and actions of genes/gene products that regulate the functioning of the nervous system and its interaction with muscles. Topics include: neural control of gene expression; genetics and molecular biology of neural and neuromuscular diseases; gene therapies for neural disorders.
Prerequisite: BIO SCI N110.

BIO SCI E155. Physiology in Extreme Environments. 4 Units.
An in-depth look at the physiological mechanisms that allow animals, including humans, to be physically active and survive in extreme environments. Physiological responses to high altitude, diving, microgravity, deserts, and extreme cold are examined.
Prerequisite: BIO SCI 94.

BIO SCI N155. Wiring the Developing Brain. 4 Units.
The development of the nervous system is discussed with particular emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Basic neurodevelopmental processes are discussed and correlated with normal brain function/dysfunction.
Prerequisite: BIO SCI N110 or BIO SCI N152.

BIO SCI N156. Molecular Mechanisms of Memory. 4 Units.
Current topics focused on understanding the molecular mechanisms that contribute to synaptic plasticity, learning, and memory. Primary literature is used to explore the variety of molecular mechanisms underlying these processes.
Prerequisite: BIO SCI N110.

BIO SCI E157. Comparative Vertebrate Anatomy. 4 Units.
Structure and evolution of the major organ systems in vertebrates, from fish to mammals. Materials fee.
Prerequisite: BIO SCI 94.

BIO SCI N158. Neurobiology of Learning and Memory. 4 Units.
How the brain and behavior change as a result of experience, with an emphasis on identifying the neurochemical processes through which memory is stored and the parts of the brain that are involved.
Prerequisite: BIO SCI 35 or BIO SCI N110.

BIO SCI N159. Animal Behavior. 4 Units.
Explores why animals behave the way they do from evolutionary/mechanistic perspectives. Considers selective pressures and evolutionary constraints that shape animal behavior and the underlying neural and hormonal mechanisms by using examples such as why dogs bark, why some birds migrate.
Prerequisite: BIO SCI N110.

BIO SCI E160. Biology of Birds. 4 Units.
A thorough introduction to the biology of birds, covering topics ranging from avian anatomy and physiology to behavior, natural history, ecology, genetics, evolution, systematics, and conservation. Examples from both local and global avifauna.
Corequisite: BIO SCI E161L.
Prerequisite: BIO SCI 94.
**BIO SCI M160. Structure-Function Relationships of Integral Membrane Proteins. 4 Units.**
Integral membrane proteins such as voltage and ligand-gated ion channels, water channels, pumps, cotransporters, and receptors (e.g., GPCRs). The emphasis is on the relationship between atomic structure and the functional properties of these proteins.

Prerequisite: BIO SCI 98 and BIO SCI 99. BIO SCI 98 with a grade of B or better. BIO SCI 99 with a grade of B or better.

Concurrent with MOL BIO 255.

**BIO SCI N160. Language and the Brain . 4 Units.**
Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: (PSYCH 7A or PSY BEH 9) or (PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.

Same as PSYCH 161, LINGUIS 158.

Restriction: Cognitive Sciences, Psychology, and Biological Sciences majors have first consideration for enrollment.

**BIO SCI E161L. Biology of Birds Lab. 4 Units.**
The companion to Biology of Birds (E160). Consists primarily of field trips to identify local birds and study avian natural history. Students must provide their own transportation to field sites, some with entrance fees. Students must have field binoculars.

Corequisite: BIO SCI E160.
Prerequisite: BIO SCI 100 and BIO SCI 194S.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

**BIO SCI E163. Environmental Microbiology. 4 Units.**
Establishes a fundamental understanding of microbes living in the environment, including their distribution, diversity, and biochemistry, and discusses how they attribute to global biogeochemical cycles.

Prerequisite: (EARTHSS 53) or (EARTHSS 60A and EARTHSS 60C) or (BIO SCI E106 and BIO SCI M122).

Same as EARTHSS 170.

Concurrent with EARTHSS 270.

**BIO SCI N164. Functional Neuroanatomy. 4 Units.**
How neuroscience uses tools of many disciplines, from imaging to behavior, to develop and test hypotheses about functions of specific parts of the brain. Basic organization of nerve cells/vertebrate nervous system; methods of visualizing nerve cells; neural connections/activity patterns.

Prerequisite: BIO SCI N110.

**BIO SCI N165. Brain Disorders and Behavior. 4 Units.**
Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory, and decision-making.

Prerequisite: (PSYCH 7A or PSY BEH 9) or ((PSYCH 9A or PSY BEH 11A) and (PSYCH 9B or PSY BEH 11B)) or BIO SCI 35 or BIO SCI N110.

Same as PSYCH 160D.

Restriction: Cognitive Sciences, Psychology, and Biological Sciences majors have first consideration for enrollment.

**BIO SCI E166L. Field Biology. 4 Units.**
Conducting group and independent studies in Southern California ecosystems, this course covers the fundamentals of experimental design, statistical analysis, communicating scientific findings (orally, visually, in writing), and other skills necessary for the scientific investigation of biological processes in the field. Materials fee.

Prerequisite: BIO SCI 100 and BIO SCI E106 and BIO SCI 194S. Satisfactory completion of the Lower-Division Writing Requirement.

(Ib)
BIO SCI N166. Introduction to Cognitive Neuroscience. 4 Units.
Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.

BIO SCI E168. Evolution. 4 Units.
An integrative treatment of evolutionary biology that covers evolutionary processes, basic research methods, and the history of life.
Prerequisite: BIO SCI E106.

BIO SCI D170. Applied Human Anatomy. 6 Units.
Systems approach to analyze the form and function of the human body with an emphasis on applying anatomical concepts to evaluate clinical cases. The laboratory will use human models and a simulated cadaver dissection for structure. Materials fee.
Prerequisite: BIO SCI E109 or PHRMSCI 120. BIO SCI E109 with a grade of C or better. PHRMSCI 120 with a grade of C or better.
Overlaps with BIO SCI D136.

BIO SCI E170. Mechanical Physiology. 4 Units.
Explores the mechanics of animal physiology. Basic biomechanical principles are introduced and illustrated in a variety of physiological systems. Topics include the fluid and structural mechanics of muscles, skeletons, circulation, insect flight, biomaterials, and fish swimming.
Prerequisite: BIO SCI E109.

BIO SCI E172. Plant Diversity in a Changing World. 4 Units.
Investigation of planet diversity in California and throughout the world, including basic systematic concepts, an introduction to major groups of flowering plants, and the effects of global biological change on plant diversity.
Prerequisite: BIO SCI E106.
Concurrent with ECO EVO 272.

BIO SCI N172. Regenerative Neurobiology. 4 Units.
Explores the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Opportunities, challenges, and implications of this research also discussed.
Prerequisite: BIO SCI N110.
Overlaps with BIO SCI 44, BIO SCI D133.

BIO SCI N173. Human Neuropsychology. 4 Units.
A survey of human brain disorders using a clinical case study approach to illustrate fundamental issues in studying brain and behavior. Topics include sensory deficits, attentional neglect, amnesia, cortical organization, clinical psychopathology, and more.
Prerequisite: BIO SCI N110 OR PSYCH 9A OR PSY BEH 11A.
Same as PSY BEH 163C, PSYCH 162N.
Restriction: School of Biological Sciences majors, Cognitive Sciences, Psychology, and Psychology and Social Behavior majors have first consideration for enrollment.

BIO SCI N174. Principles of Neural Computation. 4 Units.
Introduction to the theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, and how they compute adaptive responses to external inputs.
Prerequisite: BIO SCI N110.

BIO SCI E175. Restoration Ecology. 4 Units.
Prerequisite: Prerequisite or corequisite: BIO SCI E106.
BIO SCI E176. Evolution of Infectious Disease. 4 Units.
Introduction to the major human pathogens, and the ecological and evolutionary processes affecting their impact on public health. Topics include the evolution of drug resistance, problems in vaccine development, diseases emerging from animals, and bioterrorism.
Prerequisite: BIO SCI 94.

BIO SCI N176. Cerebral Cortex: Structure, Function, and Plasticity. 4 Units.
The cerebral cortex is highly developed in mammals and is responsible for higher perceptual and cognitive functions. The course explores some amazing aspects of cortical structure, function, and plasticity emphasizing primary literature.
Prerequisite: BIO SCI N110.

BIO SCI E179. Limnology and Freshwater Biology. 4 Units.
Biology of freshwater environments: lakes, ponds, rivers, their biota, and the factors which influence distribution of organisms.
Prerequisite: BIO SCI 94.

BIO SCI E179L. Field Freshwater Ecology. 4 Units.
Analytical techniques for common water-quality variables of lakes, streams, rivers. Benthic fauna, vertebrates and invertebrates, algae, and aquatic plants. Emphasis on field methods with an experimental approach; laboratory exercises. Field trips to marshes, vernal pools, rivers and streams. Materials fee.
Corequisite: BIO SCI E179.
Prerequisite: BIO SCI 100 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI E179.
Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

BIO SCI M180. Biotechnological Applications of Energy and Environmental Research. 4 Units.
Covers microbiological and biochemical background related to current biotechnological applications, case studies of biotech-companies, and basic information related to patents and start-up companies. Topics include biofuel, bioremediation, agricultural and environmental applications.
Prerequisite: BIO SCI M122.

BIO SCI E181. Conservation in the American West. 4 Units.
Critical examination of contemporary conservation issues in the American West, with particular attention to water in California, grazing on public lands, and species decline and extinctions.
Prerequisite: BIO SCI E106.

BIO SCI E182. Mediterranean Ecosystems: Biodiversity and Conservation. 4 Units.
Biodiversity, history of human impacts, and conservation efforts are examined in the five Mediterranean-type ecosystems. Remaining natural habitat, approaches to ecological habitat restoration, control of exotic species, and predicted consequences of global climate change are described. Field trip required.
Prerequisite: BIO SCI 94.

BIO SCI N182. Vision. 4 Units.
Visual perception and the anatomy and physiology of the visual system. Topics include the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.
Same as PSYCH 131A.
Overlaps with PSYCH 130A.
Restriction: Upper-division students only. Psychology, Cognitive Sciences, and Biological Sciences majors have first consideration for enrollment.

BIO SCI E183. Exercise Physiology. 4 Units.
Focus upon critical topics in the area of exercise biology using the comparative physiological approach. Specifically examine the physiological factors that limit the capacity of an organism to sustain high levels of aerobic metabolism.
Prerequisite: BIO SCI 98 and BIO SCI E109.
BIO SCI E184. Ecology and Diversity of Insects. 4 Units.
Insects—representing two-thirds of all species—play fundamental roles in human health, agriculture, and natural ecosystems. Topics include insect morphology, development, physiology, taxonomy, ecology, and insects in human affairs. Lecture includes interactive demonstrations and an optional weekend trip. Materials fee.
Prerequisite: BIO SCI E106.

BIO SCI E186. Population and Community Ecology. 4 Units.
Population structure, function, development, and evolution. Topics include population structure, population growth and regulation, metapopulations, predation, competition, species diversity, ecosystem function, macroecology, and island biogeography. Offered every other Winter.
Prerequisite: BIO SCI E106.

BIO SCI E188. Introduction to Insect Physiology. 4 Units.
Physiology of insects. Insect respiration, digestion, excretion, and neurobiology, including sensory systems and effectors.
Prerequisite: BIO SCI E109.

BIO SCI E189. Environmental Ethics. 4 Units.
History of evolution of environmental ethics in America. Management problems in national parks, wilderness areas, wild and scenic rivers, national forests. Contemporary and historical aspects/contributors to the field. Mitigation, endangered species, habitat restoration, biodiversity, and environmental activism. Field trips required.
Restriction: Upper-division students only.

BIO SCI 190. Transfer Student Seminar. 1 Unit.
Weekly meetings consisting of presentations by faculty, professional staff, and New Student Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, and special programs/opportunities.
Grading Option: Pass/no pass only.
Restriction: New transfer students only.

BIO SCI D190. Topics in Developmental and Cell Biology. 2-4 Units.
Studies in selected areas of developmental and cell biology.
Prerequisite: BIO SCI D103.
Repeatability: May be taken for credit 3 times as topics vary.
Restriction: School of Biological Sciences majors only. Upper-division students only.

BIO SCI E190. Topics in Ecology and Evolutionary Biology. 2-4 Units.
Studies in selected areas of ecology and evolutionary biology.
Prerequisite: BIO SCI E106.
Repeatability: May be taken for credit 3 times as topics vary.

BIO SCI M190. Topics in Molecular Biology and Biochemistry. 2-4 Units.
Studies in selected areas of Molecular Biology and Biochemistry.
Prerequisite: BIO SCI 98.
Repeatability: May be taken for credit 3 times as topics vary.

BIO SCI N190. Topics in Neurobiology and Behavior. 2-4 Units.
Studies in selected areas of neurobiology and behavior.
Prerequisite: BIO SCI N110.
Repeatability: May be taken for credit 3 times as topics vary.
BIO SCI 191A. Senior Seminar on Global Sustainability I. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare bibliography.
Same as SOCECOL 186A, EARTHSS 190A.
Restriction: Seniors only. Global Sustainability minors have first consideration for enrollment.

BIO SCI 191B. Senior Seminar on Global Sustainability II. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum is also required. Seminar utilized to analyze forum presentations. Prepare research proposal.
Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A.
Same as SOCECOL 186B, EARTHSS 190B.
Restriction: Seniors only.

BIO SCI 191CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.
Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.
Same as EARTHSS 190CW, SOCECOL 186CW.
Restriction: Seniors only.

BIO SCI 192. Tutoring in Biology. 2 Units.
Tutoring program with Biological Sciences student peers.
Repeatability: May be taken for credit 6 times.
Restriction: Biological Sciences Peer Tutoring Program students only.

BIO SCI 194. Current Topics in Biology. 1 Unit.
A seminar designed to discuss recent research findings and experimental issues in biology.
Corequisite: BIO SCI 199.
Grading Option: Pass/no pass only.
Repeatability: Unlimited as topics vary.

BIO SCI 194S. Safety and Ethics for Research. 1 Unit.
Introduces students to the concepts, techniques, and ethics involved in biological sciences laboratory work. Course may be offered online.
Grading Option: Pass/no pass only.

BIO SCI H195. Honors Topics in Biological Sciences. 4 Units.
Varied course topics in Biological Sciences designed for students in Honors in Biological Sciences.
Repeatability: May be taken for credit 2 times.
Restriction: Acceptance to the Biological Sciences Honors Program.

BIO SCI 197. Special Study in Biological Sciences. 1-5 Units.
Individualized instruction dealing with conceptual or theoretical problems in the biological sciences, rather than technical problems.
Prerequisite: BIO SCI 94 and BIO SCI 194S.
Repeatability: May be repeated for credit unlimited times.
Restriction: Maximum of 5 units (per quarter) between BIO SCI 197, BIO SCI 198, and BIO SCI 199.
BIO SCI 198. Directed Group Studies. 1-5 Units.
Small group experimental laboratory or field work performed under the direction of a faculty member.
Prerequisite: BIO SCI 94 and BIO SCI 194S.
Repeatability: May be repeated for credit unlimited times.

BIO SCI 199. Independent Study in Biological Sciences Research. 1-5 Units.
Individual experimental laboratory or field research under a professor's direction. Required for participation in the Excellence in Research Program.
Prerequisite: BIO SCI 194S and BIO SCI 94.
Repeatability: Unlimited as topics vary.

Developmental and Cell Biology Courses

DEV BIO 200A. Research in Developmental and Cell Biology. 2-12 Units.
Independent research with Developmental and Cell Biology faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 200B. Research in Developmental and Cell Biology. 2-12 Units.
Independent research with Developmental and Cell Biology faculty.
Prerequisite: DEV BIO 200A.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 200C. Research in Developmental and Cell Biology. 2-12 Units.
Independent research with Developmental and Cell Biology faculty.
Prerequisite: DEV BIO 200B.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in the Department of Developmental and Cell Biology for first-year Ph.D. students.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.

DEV BIO 203A. Graduate Tutorial in Developmental and Cell Biology. 4 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 203B. Graduate Tutorial in Developmental and Cell Biology. 4 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.
Prerequisite: DEV BIO 203A.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
DEV BIO 203C. Graduate Tutorial in Developmental and Cell Biology. 4 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.
Prerequisite: DEV BIO 203B.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 206A. Developmental and Cell Biology Journal Club. 2 Units.
Advanced study of various topics in cell biology.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

DEV BIO 206B. Developmental and Cell Biology Journal Club. 2 Units.
Advanced study of various topics in cell biology.
Prerequisite: DEV BIO 206A.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

DEV BIO 206C. Developmental and Cell Biology Journal Club. 2 Units.
Advanced study of various topics in cell biology.
Prerequisite: DEV BIO 206B.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

DEV BIO 207. Mouse Developmental Genetics. 4 Units.
Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.
Same as BIOCHEM 215.
Restriction: Graduate students only.

DEV BIO 208. Balancing the Academic Workload. 2 Units.
Students receive formal training in pedagogy and balancing graduate-level biology research with concurrent teaching commitment. Recommended for graduate students who have an active research program and are teaching in the same quarter.

DEV BIO 210. Advanced Developmental Genetics. 4 Units.
Focuses on discussion of critical concepts in developmental biology and regeneration, with emphasis on model organisms such as Drosophila, Zebrafish, and murine systems. Molecular mechanisms underlying key developmental decisions also discussed.
Repeatability: May be taken for credit 2 times.
Restriction: Graduate students only.

DEV BIO 212. Topics in Systems Biology. 2 Units.
Studies in selected areas of Systems Biology.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
DEV BIO 213. Scientific Skills. 2 Units.
Addresses and promotes the development of essential skills required in scientific and research careers, including scientific writing, effective presentation and communication, and mentoring skills.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

DEV BIO 214. Principles of Genomics. 4 Units.
A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Restriction: Graduate students only.

DEV BIO 231B. Cell Biology. 4 Units.
A broadly based course including topics in extracellular matrix, cytoskeleton, organelle biogenesis, receptor-mediated endocytosis, signal transduction, cell cycle, and developmental biology.

Concurrent with BIO SCI D154.

DEV BIO 232. Systems Cell and Developmental Biology. 4 Units.
Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as BME 213.

Restriction: Graduate students only.

DEV BIO 245. Stem Cell Biology. 4 Units.
The basic characteristics and development roles of embryonic, adult, and cancer stem cells in the human body and in model systems and the use of experimental and genetic methods to analyze and manipulate their properties.

Restriction: Graduate students only.

DEV BIO 290A. Colloquium in Developmental and Cell Biology. 2 Units.
Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Restriction: Graduate students only.

DEV BIO 290B. Colloquium in Developmental and Cell Biology. 2 Units.
Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290A.

Restriction: Graduate students only.

DEV BIO 290C. Colloquium in Developmental and Cell Biology. 2 Units.
Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290B.

Restriction: Graduate students only.

DEV BIO 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
DEV BIO 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Prerequisite: DEV BIO 292B.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

DEV BIO 293. Seminar in Interactive Teaching in Biology. 2 Units.
Students receive formal training in use and assessment of interactive teaching strategies in university-level biology classes. Additional aspects of course design and implementation are covered. Recommended for graduate students who have or will be teaching discussion sections.
Repeatability: May be taken for credit 2 times.

DEV BIO 299. University Teaching. 4 Units.
Limited to Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Ecology and Evolutionary Biology Courses

ECO EVO 200A. Research in Ecology and Evolutionary Biology. 2-12 Units.
Individual research with Ecology and Evolutionary Biological faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 200B. Research in Ecology and Evolutionary Biology. 2-12 Units.
Individual research with Ecology and Evolutionary Biological faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 200C. Research in Ecology and Evolutionary Biology. 2-12 Units.
Individual research with Ecology and Evolutionary Biological faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 201. Seminar in Ecology and Evolutionary Biology. 2 Units.
Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Concurrent with BIO SCI E107.

ECO EVO 203A. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
ECO EVO 203B. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 203C. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 204. Writing Grant Proposals. 4 Units.
Provides students with hands-on experience writing proposals in the research areas of ecology, evolution, or physiology.
Restriction: Graduate students only.

ECO EVO 205. Special Topics in Ecology. 4 Units.
Survey of special topics in Ecology.
Restriction: Graduate students only.

ECO EVO 206. Special Topics in Evolution. 4 Units.
Extensive introduction to the primary literature of evolutionary biology. Topics include population genetics, quantitative genetics, neutralism, molecular evolution, evolution of genetic systems, genetic architecture of fitness, speciation, and macroevolution.
Restriction: Graduate students only.

ECO EVO 207. Quantitative Methods in Ecology and Evolutionary Biology. 4 Units.
Statistics for ecologists and evolutionary biologists. Emphasis on specific applications and underlying assumptions rather than on methods of calculation. Topics include experimental design, parametric and nonparametric methods, analysis of variance and covariance, and multiple regression.
Prerequisite: Completion of at least one quarter of statistics including regression and analysis of variance.
Restriction: Graduate students only.

ECO EVO 208. Ecological and Evolutionary Physiology. 4 Units.
A summary of information in organismal biology, comparative and ecological physiology, and the biophysical basis of organismal function. Course offered every other fall.
Restriction: Graduate students only.

ECO EVO 210. Foundations of Physiology. 4 Units.
Physical and functional principles common to many living forms. Course forms a basis for subsequent specialization in any of the subdisciplines of physiology. Course offered in even years.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 218. Advanced Topics in Evolutionary Biology. 4 Units.
Content and instructor will vary from quarter to quarter. Possible topics include quantitative genetics, experimental methods of evolutionary studies, mathematical modeling in evolutionary studies, and the evolution of genetic systems.
Repeatability: May be repeated for credit unlimited times.

ECO EVO 219. Advanced Topics in Ecological Genetics. 4 Units.
Content and instructor will vary from year to year. Possible topics include coevolution, sex-ratio evolution, evolution senescence, plant population biology, and density-dependent selection.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
ECO EVO 221. Advanced Topics in Ecology. 2-4 Units.
Weekly discussion of current topics in ecology at the graduate level.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.

ECO EVO 227. Plant Physiological Ecology. 4 Units.
Provides a summary of information on plant organismal biology, comparative and ecological physiology, and functional ecology. Offered every other fall.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 228. Seminar in Conservation Biology. 2 Units.
Devoted to the application of basic ecological principles to the understanding and resolution of environmental problems of both local and global natures. Current problems approached through a combination of readings, group discussions, and visiting speakers.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 230. Topics in Microbial Ecology. 2-4 Units.
Weekly discussion of current topics in ecology, biogeochemistry, evolution, and physiology of microbial organisms.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

ECO EVO 235. Experimental Evolution. 2 Units.
Explores experimental evolution, which is now a well-established part of evolutionary biology. With the advent of genomics, it is now one of the most powerful tools for studying the genetic foundations of biology.
Prerequisite: BIO SCI E106.
Repeatability: May be repeated for credit unlimited times.
Restriction: Biological Sciences graduate students only.

ECO EVO 246. Seminar in Ecology and Evolution Education. 2 Units.
Weekly discussion of teaching techniques and challenges that are specific to courses in ecology and evolutionary biology. Emphasis will be on using evidence-based pedagogy techniques. There will be a combination of readings, group discussions and speakers.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 251. Population Dynamics in Ecology, Epidemiology, and Medicine. 4 Units.
Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.
Restriction: Graduate students only.
Concurrent with BIO SCI E151.

ECO EVO 272. Plant Diversity in a Changing World. 4 Units.
Investigation of plant diversity in California and throughout the world, including basic systematic concepts, introduction to major groups of flowering plants, and the effects of global biological change on plant diversity. Students carry out a phylogenetic analysis using appropriate software.
Concurrent with BIO SCI E172.

ECO EVO 273. Plant Systematics Laboratory. 4 Units.
Diversity of flowering plants is investigated in the laboratory and field. Familiarity with flowering plant families, particularly those prominent in the California flora, is emphasized.
Concurrent with BIO SCI E172L.
ECO EVO 282. Fundamentals of Informatics for Biologists. 4 Units.
Students learn the fundamentals of bioinformatics and the unix operating system (including the shell and Sun Grid Engine) in order to assemble a eukaryotic genome.

Restriction: Graduate students only.

ECO EVO 283. Advanced Informatics for Biologists. 4 Units.
Students learn advanced informatics including the analysis of: Poolseq, RNAseq, ATACseq, and ChiPseq datasets using programs such as bwa, tophat, cufflinks, DEseq, Trinity, Agustus, etc., in a unix high-performance computing environment. Statistical tests carried out and publication quality.

Prerequisite: ECO EVO 282.
Restriction: Graduate students only.

ECO EVO 285. Topics in Evolutionary Genetics. 2 Units.
Weekly discussion of recent research on evolutionary genetics.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 287. Communicating Research Through Video. 4 Units.
Students explore videography to develop basic production skills through practice with high interest special topics, such as laboratory experimental evolution and educational interdisciplinary field events, and then develop media to communicate their own research or other topics of interest.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 288. Documenting Research Through Cinematic Production. 4 Units.
Students gain advanced media expertise by conceptualizing investigative research into publicly engaging video projects. Popularly accessible research topics will be adapted into documentary, television, or cinematic pieces that provide opportunities for developing professionally marketable skills in educationally effective media production.

Prerequisite: ECO EVO 287.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 299. Independent Study. 1-4 Units.
Individual research or investigation under the direction of an individual faculty.

Grading Option: Satisfactory/unsatisfactory only.

ECO EVO 323. Curriculum and Methods for Elementary School Science. 4 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 323.

ECO EVO 341. Teaching Science in Secondary School. 4 Units.
Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 341.
Restriction: Teacher Credential Program students only.

ECO EVO 398. Teaching Assistant Seminar. 2 Units.
Readings, lectures, workshops, and student presentations designed to help develop teaching skills of graduate students teaching university-level biology classes. Topics vary and may include: course organization, presentation styles, exam design, grading, motivating students, and commonly encountered problems.

Repeatability: May be repeated for credit unlimited times.
ECO EVO 399. University Teaching. 4 Units.
Mandatory course for Ecology and Evolutionary Biology Teaching Assistants, required in each quarter in which student has a Teaching Assistant position. Limited to Teaching Assistants.
Repeatability: May be repeated for credit unlimited times.

Molecular Biology and Biochemistry Courses

MOL BIO 200A. Research in Molecular Biology and Biochemistry. 2-12 Units.
Individual research with Molecular Biology and Biochemistry faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

MOL BIO 200B. Research in Molecular Biology and Biochemistry. 2-12 Units.
Individual research with Molecular Biology and Biochemistry faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

MOL BIO 200C. Research in Molecular Biology and Biochemistry. 2-12 Units.
Individual research with Molecular Biology and Biochemistry faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

MOL BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in the Department of Molecular Biology and Biochemistry for first-year Ph.D. students.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.

MOL BIO 201A. Seminars in Molecular Biology & Biochemistry. 2 Units.
Presentation of research from department laboratories or, when pertinent, of other recent developments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 201B. Seminars in Molecular Biology & Biochemistry. 2 Units.
Presentation of research from department laboratories or, when pertinent, of other recent developments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 201C. Seminars in Molecular Biology & Biochemistry. 2 Units.
Presentation of research from department laboratories or, when pertinent, of other recent developments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 202A. Tutorial in Molecular Biology and Biochemistry. 2 Units.
Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.
Repeatability: Unlimited as topics vary.

MOL BIO 202B. Tutorial in Molecular Biology and Biochemistry. 2 Units.
Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.
Repeatability: Unlimited as topics vary.
MOL BIO 202C. Tutorial in Molecular Biology and Biochemistry. 2 Units.
Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

MOL BIO 203. Nucleic Acid Structure and Function. 4 Units.
Structure and chemistry of nucleic acids. Relationship between these properties and the mechanisms of fundamental processes such as replication and repair, RNA-mediated catalysis, formation and regulation of higher order chromatin structure and recombination.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51A and CHEM 51B and CHEM 51C.

MOL BIO 204. Protein Structure and Function. 4 Units.
The structure and properties of proteins, enzymes, and their kinetic properties.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51C.

MOL BIO 205. Molecular Virology. 4 Units.
Primary research data on the major DNA and RNA viruses emphasizing strategies of regulation of gene expression. Utilization of viruses as molecular biological tools. Graduate-level knowledge of the biochemistry and molecular biology of macromolecules is required.

Prerequisite: MOL BIO 203 and MOL BIO 204.
Restriction: Graduate students only.

MOL BIO 211. High-Resolution Structures: NMR and X-ray. 4 Units.
Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B.
Restriction: Graduate students only.
Concurrent with BIO SCI M133.

MOL BIO 213. Literature in Nucleic Acid Structure and Function. 2 Units.
Exploration and critical analysis of recent primary scientific literature in structure, properties, and biological mechanisms involving nucleic acids.
Corequisite: MOL BIO 203.
Grading Option: Satisfactory/unsatisfactory only.

MOL BIO 214. Literature in Protein Structure and Function. 2 Units.
Exploration and critical analysis of recent primary scientific literature in structure and properties of proteins, enzymes, and their kinetic properties.
Corequisite: MOL BIO 204.
Grading Option: Satisfactory/unsatisfactory only.

MOL BIO 215. Integrative Immunology. 4 Units.
Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as M&MG 215.

MOL BIO 217A. Principles of Cancer Biology I. 4 Units.
Oncogenes and tumor suppressor genes are studied from molecular viewpoints. Also studies their role in cancer; viral carcinogenesis. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204.
Restriction: Graduate students only.

MOL BIO 217B. Principles of Cancer Biology II. 4 Units.
Topics include cancer cell growth and metastasis, chemical carcinogenesis, and cancer genetics and epidemiology. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204.
Restriction: Graduate students only.
MOL BIO 218. Clinical Cancer. 3 Units.
Designed to acquaint students in basic life science with clinical cancer.
Restriction: Graduate students and Postdocs only.

MOL BIO 220. Structure & Synthesis of Biological Macromolecules Journal Club. 2 Units.
Advanced topics in macromolecular structure and synthesis as related to biological problems.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

MOL BIO 221. Advanced Topics in Immunology. 4 Units.
Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.
Prerequisite: M&MG 215.
Restriction: Graduate students only.

MOL BIO 221L. Advanced Immunology Laboratory. 4 Units.
An advanced course in immunology for graduate students enrolled in the Biotechnology master's program. Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.
Restriction: Graduate students only.
Concurrent with BIO SCI M121L.

MOL BIO 223. Introduction to Computational Biology. 4 Units.
Same as BME 232.
Restriction: Graduate students only.
Concurrent with BIO SCI M123 and COMPSCI 183 and BME 132.

MOL BIO 227. Immunology Journal Club. 2 Units.
Advanced topics in immunology as related to an understanding of human disease.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 15 times.
Restriction: Graduate students only.

MOL BIO 227L. Virology and Immunology Laboratory. 5 Units.
Introductory laboratory course in virology and immunology designed for Biological Sciences graduate students. Curriculum includes plasmid preparation, plasmid characterization, microscopy, cell culture, transfection and infection of cells, cell counting, plaque assays, ELISA, Western blot, mixed lymphocyte reactions.
Restriction: Graduate students only.

MOL BIO 229. Research-in-Progress Seminars. 1 Unit.
Two half-hour presentations by graduate students and postdoctorals to the department on their current research projects.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 15 times.
Restriction: Graduate students only.
MOL BIO 250. Advanced Topics in Biotechnology - Nucleic Acids. 2 Units.
Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 250L.

Restriction: Biotechnology graduate students only.

MOL BIO 250L. Biotechnology Laboratory - Nucleic Acids. 8 Units.
Nucleic acid techniques and recombinant DNA technology. Extraction and purification of nucleic acids, cloning and subcloning, PCR, site-directed mutagenesis, nucleic acid hybridization, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 250.

Restriction: Biotechnology graduate students only.

MOL BIO 251. Advanced Topics in Biotechnology - Protein Purification and Characterization. 2 Units.
Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 251L.
Prerequisite: MOL BIO 250L and MOL BIO 250.

Restriction: Biotechnology graduate students only.

MOL BIO 251L. Biotechnology Laboratory - Protein Purification and Characterization. 8 Units.
Major techniques of handling proteins and antibodies. Protein engineering, expression and large-scale purification of recombinant proteins from bacteria, HPLC, antibody purification, western blotting, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 251.
Prerequisite: MOL BIO 250L and MOL BIO 250.

Restriction: Biotechnology graduate students only.

MOL BIO 252L. Biotechnology Management Laboratory. 8 Units.
Overview of current methods in biotechnology, designed specifically for biotechnology graduate students. Organized into four distinct sections (nucleic acids, proteins, virology, and immunology). Students must demonstrate accurate documentation of data (laboratory notebooks) detailing experience and results.

Restriction: Biotechnology graduate students only.

MOL BIO 253. Biotech Management . 5 Units.
Taught jointly by Biological Sciences and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MGMTMBA 293.

Restriction: Master's Program in Biotechnology Management students only.

MOL BIO 253L. Stem Cell Laboratory. 4 Units.
Designed to prepare M.S. Biotechnology program students for a career in stem cell research. Laboratory training utilizes tissue culture, mouse and human embryonic stem cells, and is enhanced with didactic material and discussion.

Prerequisite: MOL BIO 250L and MOL BIO 251L.

Restriction: Biotechnology graduate students only.

MOL BIO 270. Science Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.
MOL BIO 291. Graduate School Fundamentals. 2 Units.
Lectures and discussions providing basic skills needed for success in Ph.D. graduate studies. Topics include formulating a hypothesis, experimental design, literature review, grant writing, oral communication, biostatistics, time management, and professional development.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: First-year students in the Cellular and Molecular Biosciences gateway Ph.D. program.

MOL BIO 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 293A. Cancer Biology Journal Club. 1 Unit.
Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

MOL BIO 293B. Cancer Biology Journal Club. 1 Unit.
Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

MOL BIO 293C. Cancer Biology Journal Club. 1 Unit.
Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

MOL BIO 295. Biomedical Research Methods. 2 Units.
Lectures and interactive discussions of research methods in modern biomedical science. Each week will focus on a different class of techniques, including molecular, biochemical, immunological, genomic, bioinformatics, microscopy, cancer biology, genome editing. One hour per week, grading based on attendance.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Enrollment restricted to 1st year students in the Cellular & Molecular Biosciences gateway Ph.D. program. Other Ph.D. candidates may audit.

MOL BIO 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Restriction: Graduate students only.
Neurobiology and Behavior Courses

**NEURBIO 200A. Research in Neurobiology and Behavior. 2-12 Units.**
Individual research with Neurobiology and Behavior faculty.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

**NEURBIO 200B. Research in Neurobiology and Behavior. 2-12 Units.**
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200A.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

**NEURBIO 200C. Research in Neurobiology and Behavior. 2-12 Units.**
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200B.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

**NEURBIO 201A. Research in Neurobiology and Behavior. 2-12 Units.**
Individual research with Neurobiology and Behavior faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

**NEURBIO 201B. Research in Neurobiology and Behavior. 2-12 Units.**
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

**NEURBIO 201C. Research in Neurobiology and Behavior. 2-12 Units.**
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

**NEURBIO 202A. Foundations of Neuroscience. 2 Units.**
Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Grading Option: Satisfactory/unsatisfactory only.
NEURBIO 202B. Foundations of Neuroscience. 2 Units.
Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202A.
Grading Option: Satisfactory/unsatisfactory only.

NEURBIO 206. Molecular Neuroscience. 5 Units.
Surveys molecular and cellular mechanisms involved in neuronal function, including control of gene expression, post-transcriptional and post-translational processing, RNA and protein targeting, cell death mechanisms, and molecular genetic basis of neurological disorders. Overview of the molecular aspects of developmental neurobiology.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 207. Cellular Neuroscience. 5 Units.
Neurophysiological and neurochemical mechanisms of electrical and chemical signaling in neurons. Topics include generation of resting- and action-potentials, voltage- and ligand-gated ion channels, second messenger systems, and synaptic transmission and integration.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 207L. Cellular Neuroscience Laboratory. 2 Units.
Intensive hands-on laboratory experience of contemporary techniques for studying ion channels and synaptic function. Experiments include microelectrode recording, patch clamp, quantal analysis of synaptic transmission, heterologous expression of genes for channels and receptors, brain slice, and fluorescence calcium imaging.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 208A. Systems Neuroscience. 5 Units.
Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210A.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 208B. Systems Neuroscience. 5 Units.
Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Prerequisite: NEURBIO 208A.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210B.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 209. Behavioral Neuroscience. 5 Units.
Overview of fundamental conceptual and experimental issues in the neurobiology of learning and memory. The approach is a cross-level integration of research in molecular-genetic, cellular, circuit, systems, and behavioral analyses.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 220. Neural Coding, Computation, and Dynamics. 4 Units.
Theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, compute adaptive responses to external inputs, and how knowledge is extracted from experience to generate an internal model of the world.

Prerequisite: NEURBIO 209.
NEURBIO 230. Chromatin Structure and Function. 4 Units.
Focuses on the role of chromatin/nuclear structure organization in eukaryotic genome regulation. The effects of histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization on gene regulation, DNA replication, and repair are discussed.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEUROBIO 206.

Same as BIOCHEM 225.

Restriction: Graduate students only.

NEURBIO 231. Clinical and Epidemiological Aspects of Neurodegenerative Diseases. 4 Units.
Clinical and epidemiological aspects of neurodegenerative disorders causing dementia will be reviewed, including AD, PD, FTD, HD and cerebrovascular disease. Seminar format will include student presentations and group discussion.

Restriction: Graduate students only.

NEURBIO 232. Regenerative Neurobiology. 4 Units.
Surveys the latest research on regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders will be examined.

NEURBIO 234. Cognitive Neuroepigenetics. 4 Units.
Covers current topics in the emerging field of cognitive neuroepigenetics, focusing on understanding the underlying epigenetic mechanisms of memory formation and persistence. Primary literature will be used to explore these processes.

Repeatability: May be repeated for credit unlimited times.

NEURBIO 235. Balancing Research and Teaching. 1 Unit.
The goal of this course is to offer graduate students who have commitments outside of their research program (such as teaching) an opportunity to learn to balance these commitments.

NEURBIO 236. Cortex: Structure, Function, and Plasticity. 4 Units.
Structured to include lectures and presentation of papers about cortex with emphasis on sensory-motor cortex. Both historical and current perspectives on cortical structure-function relationship will be critically evaluated.

NEURBIO 237. Neurobiology of Brain Aging. 4 Units.
Outlines some of the significant changes that occur in the aging brain, with a special emphasis on risk factors and protective strategies that promote successful brain aging. Topics include changes in synaptic plasticity, neurotrophic factors, and molecular mechanisms in aging.

Prerequisite: NEURBIO 209.

NEURBIO 238. Neurobiology of Memory as a Multidisciplinary Science. 4 Units.
The study of memory is a highly multidisciplinary science ranging from molecular and cellular studies in reduced studies in reduced preparations to functional imaging studies in humans. The focus is to integrate across approaches and levels of analysis to better understand how the hippocampus, and its constituent elements, subserves memory. Emphasis on the challenges of this multidisciplinary field.

Restriction: Majors only

NEURBIO 239. Functional Imaging of the Nervous System. 4 Units.
Overview of technical and applied aspects of imaging techniques available for studying the nervous system. The areas emphasized are cellular and subcellular imaging of neural function, systems-level imaging of brain function, and imaging of the human brain.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 240. Advanced Analysis of Learning and Memory. 4 Units.
Advanced analysis of contemporary research concerning the nature and neurobiological bases of learning and memory. Special emphasis is given to time-dependent processes involved in memory storage.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 247. Programming for Neuroscience Research. 4 Units.
A neuroscience-specific introduction to programming and data analysis using either MATLAB or Scientific PYTHON. Students will learn general programming skills and effective use of programming for data management, statistical analysis, and image analysis.

Overlaps with PSYCH 205A.
NEURBIO 248. Topics in Neurobiology and Behavior. 4 Units.
Studies in selected areas of Neurobiology and Behavior. Topics addressed vary each quarter.
Repeatability: May be taken for credit 3 times.

NEURBIO 249. Electronics for Biologists. 4 Units.
Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.
Same as PHYSIO 205.

NEURBIO 254. Molecular Neurobiology. 4 Units.
The application of genetic and recombinant DNA technology to neurobiology. Topics include the study of neuronal proteins which play important roles in the formation of synapses and synaptic transmission.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 255. History of Neuroscience. 4 Units.
An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.
Repeatability: May be taken for credit 2 times.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 257. Statistics for Neurobiologists. 4 Units.
Introduction to common methods for statistical analysis used in neurobiology. Topics covered include t-tests, ANOVAs, correlations and regressions, general linear model, power analysis, and non-parametric tests.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 260. Auditory Neuroscience. 4 Units.
Multidisciplinary overview of brain mechanisms of hearing. Emphasizes breath of auditory function and research: single neurons to psychoacoustics, the cochlea to the cortex, and basic science to clinic.

NEURBIO 290. Colloquium in Neurobiology and Behavior. 1.3 Unit.
Presentation of contemporary research problems in neurobiology and behavior and related areas by invited speakers.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 292. Scientific Communication. 4 Units.
Students learn how to effectively communicate scientific ideas and results. Activities include learning how to effectively write a scientific manuscript, how to perform a coherent slide presentation, and how to run-through a poster presentation.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Department of Developmental and Cell Biology

Thomas Schilling, Department Chair
Kavita Arora, Department Vice Chair
2212 Biological Sciences III
949-824-2458
http://devcell.bio.uci.edu/
Overview

Research programs of the Department of Developmental and Cell Biology focus on molecular aspects of the development of eukaryotic organisms, on the molecular interaction of cells in tissue differentiation, and expression and function of genes related to the biogenesis of organelles and cellular constituents. The main emphasis of research training is in the molecular aspects of cells and development, and the utilization of biotechnology. The Department maintains facilities for research that include genetic, molecular, and biochemical techniques and also has facilities in advanced electron optics, microsurgery, microinjection, and neurophysiology.

The Department offers graduate study in conjunction with the program in Cellular and Molecular Biosciences (CMB), the Interdepartmental Neuroscience Program (INP), and the program in Mathematical and Computational Biology (MCB). Students admitted into the combined program who select a research advisor in the Department begin following the Departmental requirements for the Ph.D. at the beginning of their second year. Students participate in the Developmental or Cell Biology Journal Club and the Departmental seminar series, which meet weekly during the academic year. Students must complete the advancement-to-candidacy examination by the end of the third year of graduate study by presenting and defending a proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Undergraduate Major in Developmental and Cell Biology

The Developmental and Cell Biology major is intended to provide students with intensive training in cutting edge approaches to understanding the structure and function of cells and how they interact to produce a complex organism, starting with a fertilized egg. The focus of the B.S. in Developmental and Cell Biology is to provide students with intensive training aimed at preparing them for graduate programs in modern Developmental and Cell Biology or other biomedical sciences. In-depth training in the molecular basis of cell and developmental biology will be coupled with integrating knowledge obtained from the recent explosive advances in genomic technology to provide a strong working understanding of how to approach problems in basic research.

The major has distinctive features. The first is a reduction in the number of required courses, allowing students the opportunity to focus more deeply on training in Developmental and Cell Biology. The second is the implementation of a new course in Genomic and Proteomic analysis that is closely tied to problems in genetics, developmental, and cell biology. Understanding the connections among these disciplines and how to apply the appropriate tools for defining and answering fundamental questions in biomedical research is a critical tool for success in research. Another distinctive feature of the major is the opportunity to replace two upper-division laboratory courses with mentored BIO SCI 199 individual research in faculty laboratories. This offers students the opportunity to apply the tools they have acquired during formal course work to current problems at the frontiers of research. Lastly, students majoring in Developmental and Cell Biology have faculty advisors with whom they meet at least quarterly. The faculty advisors help students plan their curriculum, select appropriate 199 projects and sponsoring labs, and as a group grant petitions and certify the degree. The combination of new upper-division courses, more flexibility in the curriculum, the option for mentored research, and close interaction with faculty advisors will help the Developmental and Cell Biology majors to develop an appreciation of the nature of research and establish a strong foundation for future success in graduate or professional schools.

Requirements for the B.S. Degree in Developmental and Cell Biology

All students must meet the University Requirements.
All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

NOTE: No course may be used to satisfy more than one requirement.

Students may petition to substitute Excellence in Research (BIO SCI 199) for two upper-division laboratories (other than BIO SCI D111L); 199 research is strongly encouraged. The 199 laboratory must be approved by the Department, and Excellence in Research must be successfully completed. Final approval is given by the Department.

Application Process to Declare the Major: The major in Developmental and Cell Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time. Information can also be found at the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu). Double majors within the Francisco J. Ayala School of Biological Sciences or with Public Health Sciences, Biomedical Engineering; Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

\(^3\) Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

Undergraduate Major in Genetics

Genetics pervades every aspect of modern society, from newspaper articles to talk shows, from discussions on health care to discussions on cloning. With the sequencing of the human genome, it is more important than ever for biology students to have a broad background in the study of heredity and evolution. The Genetics major is designed to benefit motivated undergraduates who have a particular interest in learning about developmental genetics, evolutionary genetics, and molecular genetics and to allow them to explore how our knowledge of genetic mechanisms contributes to our understanding of human development and disease. The Genetics major will accommodate students interested in the study of inheritance either as a basic discipline or in terms of its applied aspects in biotechnology, medicine, and agriculture, but will be especially attractive to those students desiring focused study and preparation for graduate training.

Genetics majors begin their study in the junior year with three required major courses (BIO SCI D103, BIO SCI D104) and (BIO SCI D113. In addition to these required major courses, students will choose six additional upper-division Biology Elective courses. Certain courses are designed to give students an understanding of genetic mechanisms and teach them how to define and answer fundamental questions in biomedical research. Additionally, students choose at least two electives that deal with topics such as the molecular biology of cancer, human genetic diseases, developmental genetics, and the genetics of aging. Finally, Genetics majors are encouraged to explore laboratory research by enrolling in BIO SCI 199. Laboratory research not only expands a student’s technical skills, but is also designed to allow faculty members to mentor Genetics majors. All students majoring in Genetics have a faculty advisor with whom they meet at least quarterly. The faculty advisor helps students plan their curriculum and select appropriate Biological Sciences 199 research projects. Genetics majors also have an opportunity to meet with other Genetics majors on a regular basis and participate in research talks.

The Genetics major provides graduates with advanced training in the skills necessary to pursue graduate degrees in biomedical research. These include Ph.D. graduate programs, teacher-training programs, medical school, and veterinary school. Genetics graduates may also use their backgrounds effectively in planning careers in law, business, education, and public affairs.

Requirements for the B.S. Degree in Genetics

All students must meet the University Requirements.

All students must meet the School Requirements.

Major Requirements

1 Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

Faculty

Dritan Agalliu, Ph.D. Columbia University, Assistant Professor of Developmental and Cell Biology (molecular, cellular, and genetic analysis of mammalian blood-brain barrier development, the role of the barrier in disease pathogenesis)

Joseph Arditti, Ph.D. University of Southern California, Professor Emeritus of Developmental and Cell Biology (developmental physiology of orchids)

Kavita Arora, Ph.D. University of Bombay, Professor of Developmental and Cell Biology (Drosophila development; TGF-ß signal transduction; cell signaling)

Scott Atwood, Ph.D. University of Oregon, Assistant Professor of Developmental and Cell Biology

Pierre F. Baldi, Ph.D. California Institute of Technology, UCI Chancellor's Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology (bioinformatics, computational biology)

Lee Bardwell, Ph.D. Stanford University, Professor of Developmental and Cell Biology (intracellular signaling in development and disease)

Claudia Benavente, Ph.D. University of Arizona, Assistant Professor of Pharmaceutical Sciences; Developmental and Cell Biology (genetics, epigenetics, cancer, pediatric cancer, retinoblastoma, osteosarcoma)

Michael W. Berns, Ph.D. Cornell University, Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology (photomedicine, laser microscopy, biomedical devices)
Bruce Blumberg, Ph.D. University of California, Los Angeles, Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Hans R. Bode, Ph.D. Yale University, Professor Emeritus of Developmental and Cell Biology (molecular basis of pattern formation in Hydra)

Peter J. Bryant, Ph.D. University of Sussex, Research Professor and Professor Emeritus of Developmental and Cell Biology (tumor-suppressor genes of Drosophila and humans)

Susan V. Bryant, Ph.D. University of London, Professor Emerita of Developmental and Cell Biology (molecular basis of limb development and regeneration)

Anne L. Calof, Ph.D. University of California, San Francisco, Professor of Anatomy and Neurobiology; Developmental and Cell Biology (neurogenesis and neuronal differentiation)

Richard D. Campbell, Ph.D. The Rockefeller University, Professor Emeritus of Developmental and Cell Biology (Morphogenesis; biology of Hydra; fractal geometry of biological forms)

Ken W. Cho, Ph.D. University of Pennsylvania, Professor of Developmental and Cell Biology (TGF-β signaling, gene regulatory networks in development)

Olivier Cinquin, Ph.D. University College London, Assistant Professor of Developmental and Cell Biology (mathematical modeling of networks, systems biology)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, Department Chair and Eric L. and Lila D. Nelson Chair in Neuropharmacology and Professor of Pharmacology; Developmental and Cell Biology; Pharmaceutical Sciences (novel neuroactive molecules)

Michelle Digman, Ph.D. University of Illinois at Chicago, Assistant Professor of Biomedical Engineering; Chemical Engineering and Materials Science; Developmental and Cell Biology (quantitative imaging techniques to study spatial-temporal dynamics of signaling protein networks in live cells and tissues)

Peter J. Donovan, Ph.D. University College London, Professor of Biological Chemistry; Developmental and Cell Biology (stem cell biology)

Aimee Lara Edinger, Ph.D. University of Pennsylvania, Associate Professor of Developmental and Cell Biology (cancer biology and metabolism, growth control, protein trafficking)

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, Associate Professor of Mathematics; Developmental and Cell Biology (applied and computational mathematics, mathematical and computational biology)

Donald E. Fosket, Ph.D. University of Idaho, Professor Emeritus of Developmental and Cell Biology (regulation of cytoskeleton formation and function)

David M. Gardiner, Ph.D. University of California, San Diego, Professor of Developmental and Cell Biology (limb development and regeneration)

Enrico Gratton, Ph.D. University of Rome, Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Steven P. Gross, Ph.D. University of Texas at Austin, Professor of Developmental and Cell Biology; Biomedical Engineering; Physics and Astronomy (force generation by molecular motors in living cells)

Patrick L. Healey, Ph.D. University of California, Berkeley, Professor Emeritus of Developmental and Cell Biology (plant cellular differentiation and morphogenesis, ultrastructure and histochemistry of secretory systems, early reproductive development)

Franz J. Hoffmann, Ph.D. University of Hohenheim, Senior Lecturer with Security of Employment Emeritus of Developmental and Cell Biology (regeneration of cultured plant cells, somatic cell genetics)

Daniel J. Knauer, Ph.D. University of Nebraska, Professor Emeritus of Developmental and Cell Biology (human antithrombins and related serine protease inhibitors)

Stuart M. Krassner, SCE Johns Hopkins University, Professor Emeritus of Developmental and Cell Biology (developmental transitions of hemoflagellates)

Arthur D. Lander, Ph.D. University of California, San Francisco, Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science; Pharmacology (systems biology of development, pattern formation, growth control)

Shin Lin, Ph.D. University of California, Los Angeles, Professor of Developmental and Cell Biology (combined use of biochemistry, cell biology, molecular biology, molecular biophysics to study the structure and function of proteins involved in cytoskeletal/contractile functions and signal transduction in muscle and nonmuscle cells)
Ulrike Luderer, M.D., Ph.D. Northwestern University, Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health (reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity, ovarian cancer)

Grant R. MacGregor, Ph.D. University of Sussex, Professor of Developmental and Cell Biology (mouse reproduction, development, homeostasis)

J. Lawrence Marsh, Ph.D. University of Washington, Professor of Developmental and Cell Biology (mechanisms of neurodegeneration and molecular genetics of development)

Debra K. Mauzy-Melitz, Ph.D. Marquette University, Lecturer with Potential Security of Employment of Developmental and Cell Biology (role of writing in scientific teaching)

Ronald L. Meyer, Ph.D. California Institute of Technology, Professor Emeritus of Developmental and Cell Biology (development of nerve connections, nerve injury, and regeneration)

Edwin S. Monuki, M.D. Ph.D. University of California, San Diego, Department Chair and Associate Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology (cerebral cortex, choroid plexus development, translation)

Seyed Ali Mortazavi, Ph.D. California Institute of Technology, Assistant Professor of Developmental and Cell Biology (functional genomics to study transcriptional regulation in development)

R. Michael Mulligan, Ph.D. Michigan State University, Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology (RNA editing in plant mitochondria and chloroplasts)

Diane K. O'Dowd, Ph.D. University of California, San Diego, Professor of Developmental and Cell Biology; Anatomy and Neurobiology (regulation of activity in developing and adult nervous systems)

Maksim Plikus, Ph.D. University of Southern California, Assistant Professor of Developmental and Cell Biology (mechanisms of regeneration, stem cell control)

Susanne M. Rafelski, Ph.D. Stanford University, Assistant Professor of Developmental and Cell Biology; Biomedical Engineering (control of mitochondrial network size, topology and function in budding yeast cells)

Thomas F. Schilling, Ph.D. University of Oregon, Department Chair and Professor of Developmental and Cell Biology (zebrafish development, vertebrate genetics, craniofacial development)

Justin F. Shaffer, Ph.D. University of Washington, Lecturer with Potential Security of Employment of Developmental and Cell Biology (improving teaching and learning in college science classes)

Christine Suetterlin, Ph.D. University of Basel, Associate Professor of Developmental and Cell Biology (centrosome and cilia regulation, Golgi, host-pathogen interaction)

Sha Sun, Ph.D. University of Chicago, Assistant Professor of Developmental and Cell Biology (long noncoding RNAs in epigenetic programming)

Rahul Warrior, Ph.D. Yale University, Associate Professor of Developmental and Cell Biology (developmental genetics of transcription and proteoglycan synthesis)

Zeba Wunderlich, Ph.D. Harvard University, Assistant Professor of Developmental and Cell Biology (understanding the organization of regulatory information in the genome)

Xiaohui Xie, Ph.D. Massachusetts Institute of Technology, Associate Professor of Computer Science; Developmental and Cell Biology (computational biology, bioinformatics, genomics, neural computation, machine learning)

Courses

DEV BIO 200A. Research in Developmental and Cell Biology. 2-12 Units.

Independent research with Developmental and Cell Biology faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
DEV BIO 200B. Research in Developmental and Cell Biology. 2-12 Units.
Independent research with Developmental and Cell Biology faculty.
Prerequisite: DEV BIO 200A.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 200C. Research in Developmental and Cell Biology. 2-12 Units.
Independent research with Developmental and Cell Biology faculty.
Prerequisite: DEV BIO 200B.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in the Department of Developmental and Cell Biology for first-year Ph.D. students.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.

DEV BIO 203A. Graduate Tutorial in Developmental and Cell Biology. 4 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 203B. Graduate Tutorial in Developmental and Cell Biology. 4 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.
Prerequisite: DEV BIO 203A.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 203C. Graduate Tutorial in Developmental and Cell Biology. 4 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.
Prerequisite: DEV BIO 203B.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

DEV BIO 206A. Developmental and Cell Biology Journal Club. 2 Units.
Advanced study of various topics in cell biology.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

DEV BIO 206B. Developmental and Cell Biology Journal Club. 2 Units.
Advanced study of various topics in cell biology.
Prerequisite: DEV BIO 206A.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
DEV BIO 206C. Developmental and Cell Biology Journal Club. 2 Units.
Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 207. Mouse Developmental Genetics. 4 Units.
Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as BIOCHEM 215.

Restriction: Graduate students only.

DEV BIO 208. Balancing the Academic Workload. 2 Units.
Students receive formal training in pedagogy and balancing graduate-level biology research with concurrent teaching commitment. Recommended for graduate students who have an active research program and are teaching in the same quarter.

DEV BIO 210. Advanced Developmental Genetics. 4 Units.
Focuses on discussion of critical concepts in developmental biology and regeneration, with emphasis on model organisms such as Drosophila, Zebrafish, and murine systems. Molecular mechanisms underlying key developmental decisions also discussed.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

DEV BIO 212. Topics in Systems Biology. 2 Units.
Studies in selected areas of Systems Biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

DEV BIO 213. Scientific Skills. 2 Units.
Addresses and promotes the development of essential skills required in scientific and research careers, including scientific writing, effective presentation and communication, and mentoring skills.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

DEV BIO 214. Principles of Genomics. 4 Units.
A survey course of the principal subfields of genomics and their applications to biological and health sciences that will cover genome assembly and annotation, genome structure, comparative genomics, population genomics, functional genomics, and medical genomics.

Restriction: Graduate students only.

DEV BIO 231B. Cell Biology. 4 Units.
A broadly based course including topics in extracellular matrix, cytoskeleton, organelle biogenesis, receptor-mediated endocytosis, signal transduction, cell cycle, and developmental biology.

Concurrent with BIO SCI D154.

DEV BIO 232. Systems Cell and Developmental Biology. 4 Units.
Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as BME 213.

Restriction: Graduate students only.
DEV BIO 245. Stem Cell Biology. 4 Units.
The basic characteristics and development roles of embryonic, adult, and cancer stem cells in the human body and in model systems and the use of experimental and genetic methods to analyze and manipulate their properties.

Restriction: Graduate students only.

DEV BIO 290A. Colloquium in Developmental and Cell Biology. 2 Units.
Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Restriction: Graduate students only.

DEV BIO 290B. Colloquium in Developmental and Cell Biology. 2 Units.
Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290A.

Restriction: Graduate students only.

DEV BIO 290C. Colloquium in Developmental and Cell Biology. 2 Units.
Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290B.

Restriction: Graduate students only.

DEV BIO 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 293. Seminar in Interactive Teaching in Biology. 2 Units.
Students receive formal training in use and assessment of interactive teaching strategies in university-level biology classes. Additional aspects of course design and implementation are covered. Recommended for graduate students who have or will be teaching discussion sections.

Repeatability: May be taken for credit 2 times.

DEV BIO 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Ecology and Evolutionary Biology

Laurence D. Mueller, Department Chair
321 Steinhaus Hall
Overview

Ecology and evolutionary biology deals with the establishment of adaptations over evolutionary time and with the organismal function in ecological time. Faculty in the Department of Ecology and Evolutionary Biology study questions pertinent at a variety of levels of biological organization, from molecular aspects of evolution, to organismal structure and performance, to the ecology of ocean ecosystems. Research is conducted in both the laboratory and field and includes work on a variety of organisms from phages and bacteria, to higher plants and animals. Primary attention is given to evolutionary, ecological, and functional questions rather than to particular habitats or taxa. Faculty and graduate student research is often collaborative and interdisciplinary in approach. Departmental research activities include physiological ecology energetics, plant-herbivore and plant-pollinator interactions, microbial ecology and coevolution, quantitative genetics, life history evolution, population and reproductive ecology, community ecology and biogeography. These research endeavors provide a balance between empirical and theoretical approaches to evolutionary, organismal, and ecological problems.

Undergraduate Major in Ecology and Evolutionary Biology

In the 21st century, biologists in fields ranging from medicine to global change biology increasingly incorporate ecological and evolutionary ideas in their research. The major in Ecology and Evolutionary Biology encourages students to understand and appreciate important linkages between biological disciplines. The major is very broad, including components of evolutionary biology, ecology, and physiology. Faculty interests are also broad and include the evolution of aging, conservation biology, restoration ecology, biogeography, plant and animal population and community ecology, the evolution of infectious disease, evolutionary physiology, behavioral ecology, host-disease interactions, evolutionary genetics, genetics of invasive species, and plant population biology. Following graduation, students will be especially well prepared to enter graduate programs in either ecology or evolution for advanced study. The major also provides the foundation to pursue careers in governmental and non-governmental environmental organizations, as well as professional schools. The Department considers undergraduate experience in research an integral component of a scientific education, and majors are encouraged to participate in BIO SCI 199, in which they will be mentored by an individual faculty member within the Department.

Requirements for the B.S. Degree in Ecology and Evolutionary Biology

All students must meet the University Requirements.

All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI E106</td>
<td>Processes in Ecology and Evolution</td>
</tr>
<tr>
<td>BIO SCI E107</td>
<td>Seminar in Ecology and Evolutionary Biology</td>
</tr>
<tr>
<td>STATS 8</td>
<td>Introduction to Biological Statistics</td>
</tr>
</tbody>
</table>

B. Upper-Division Laboratories:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI E116L</td>
<td>Evolution Laboratory</td>
</tr>
<tr>
<td>BIO SCI E166L</td>
<td>Field Biology</td>
</tr>
</tbody>
</table>

and select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI E111L</td>
<td>Developmental and Cell Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E106L</td>
<td>Habitats and Organisms</td>
</tr>
<tr>
<td>BIO SCI E112L</td>
<td>Physiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E131L</td>
<td>Image Analysis in Biological Research</td>
</tr>
<tr>
<td>BIO SCI E140L</td>
<td>Evolution and the Environment Laboratory</td>
</tr>
<tr>
<td>BIO SCI E161L</td>
<td>Biology of Birds Lab</td>
</tr>
<tr>
<td>BIO SCI E179L</td>
<td>Field Freshwater Ecology</td>
</tr>
<tr>
<td>BIO SCI M114L</td>
<td>Biochemistry Laboratory</td>
</tr>
<tr>
<td>BIO SCI M116L</td>
<td>Molecular Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M118L</td>
<td>Experimental Microbiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M121L</td>
<td>Advanced Immunology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M122L</td>
<td>Advanced Microbiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M124L</td>
<td>Virus Engineering Laboratory</td>
</tr>
<tr>
<td>BIO SCI M127L</td>
<td>Virology and Immunology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M130L</td>
<td>Advanced Molecular Lab Techniques</td>
</tr>
<tr>
<td>BIO SCI N113L</td>
<td>Neurobiology Laboratory</td>
</tr>
</tbody>
</table>

One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.

C. Upper-Division Biology Electives:
Select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103</td>
<td>Cell Biology</td>
</tr>
<tr>
<td>BIO SCI D104</td>
<td>Developmental Biology</td>
</tr>
<tr>
<td>BIO SCI D105</td>
<td>Cell, Developmental, and Molecular Biology of Plants</td>
</tr>
<tr>
<td>BIO SCI E109</td>
<td>Human Physiology</td>
</tr>
<tr>
<td>BIO SCI N110</td>
<td>Neurobiology and Behavior</td>
</tr>
</tbody>
</table>

and select three four-unit courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI E118–E190</td>
<td></td>
</tr>
</tbody>
</table>

Double majors within the Francisco J. Ayala School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

**Sample Program — Ecology and Evolutionary Biology**

**Freshman**

1 Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

2 BIO SCI E106 is offered in all three quarters, is a prerequisite for many upper-division courses and may be taken at any time after completion of BIO SCI 94.

**Graduate Program in Ecology and Evolutionary Biology**

The graduate program offers both the Plan I M.S. and the Ph.D. in Biological Sciences.

Students are required to complete a minimum of five core courses during their first six academic quarters. Two of those courses are required graduate-level courses that all students must take:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO EVO 204</td>
<td>Writing Grant Proposals (typically in the second year)</td>
</tr>
<tr>
<td>ECO EVO 207</td>
<td>Quantitative Methods in Ecology and Evolutionary Biology (typically in the first year)</td>
</tr>
</tbody>
</table>

In addition students must take one course each in the areas of Physiology (P), Ecology (EC), and Evolution (EV). Although all three courses can be taken at the graduate level (G), one of the three courses may be taken as an upper-division undergraduate course (U). The list of acceptable courses is currently limited to:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO EVO 208</td>
<td>Ecological and Evolutionary Physiology (GP)</td>
</tr>
<tr>
<td>ECO EVO 227</td>
<td>Plant Physiological Ecology (GP)</td>
</tr>
<tr>
<td>PHYSIO 206A</td>
<td>Introduction to Medical Physiology (GP)</td>
</tr>
<tr>
<td>PHYSIO 206B</td>
<td>Introduction to Medical Physiology (GP)</td>
</tr>
<tr>
<td>Course Code</td>
<td>Course Title</td>
</tr>
<tr>
<td>-------------</td>
<td>--------------------------------------------------</td>
</tr>
<tr>
<td>ANATOMY 201</td>
<td>Human Gross Anatomy (GP)</td>
</tr>
<tr>
<td>BIO SCI E109</td>
<td>Human Physiology (UP)</td>
</tr>
<tr>
<td>BIO SCI E127</td>
<td>Physiological Plant Ecology (UP)</td>
</tr>
<tr>
<td>BIO SCI E138</td>
<td>Comparative Animal Physiology (UP)</td>
</tr>
<tr>
<td>BIO SCI E139</td>
<td>Animal Sensing and Motion (UP)</td>
</tr>
<tr>
<td>BIO SCI E145</td>
<td>Animal Coloration and Vision (UP)</td>
</tr>
<tr>
<td>BIO SCI E170</td>
<td>Mechanical Physiology (UP)</td>
</tr>
<tr>
<td>BIO SCI E183</td>
<td>Exercise Physiology (UP)</td>
</tr>
<tr>
<td>BIO SCI E188</td>
<td>Introduction to Insect Physiology (UP)</td>
</tr>
<tr>
<td>ECO EVO 205</td>
<td>Special Topics in Ecology (GEC)</td>
</tr>
<tr>
<td>ECO EVO 251</td>
<td>Population Dynamics in Ecology, Epidemiology, and Medicine (GEC)</td>
</tr>
<tr>
<td>BIO SCI E118</td>
<td>Ecosystem Ecology (UEC)</td>
</tr>
<tr>
<td>BIO SCI E151</td>
<td>Population Dynamics in Ecology, Epidemiology, and Medicine (UEC)</td>
</tr>
<tr>
<td>BIO SCI E166L</td>
<td>Field Biology (UEC)</td>
</tr>
<tr>
<td>BIO SCI E186</td>
<td>Population and Community Ecology (UEC)</td>
</tr>
<tr>
<td>ECO EVO 206</td>
<td>Special Topics in Evolution (GEV)</td>
</tr>
<tr>
<td>BIO SCI E153</td>
<td>Functional and Structural Evolutionary Genomics (UEV)</td>
</tr>
<tr>
<td>BIO SCI E154</td>
<td>Genetics and Human History (UEV)</td>
</tr>
<tr>
<td>BIO SCI E168</td>
<td>Evolution (UEV)</td>
</tr>
</tbody>
</table>

If a student wishes to request an exception (an exemption or a substitution), the student must submit a written request justifying the reason to the Graduate Advisor. The Graduate Advisor and the student’s Advisory Committee (or prior to the formation of the Advisory Committee, the Prescription Committee) will decide whether to grant the request.

Students who enter the program through the Gateway Program are required to take ECO EVO 204 and one additional course at either the undergraduate or graduate level in the dissertation topic area. The student and his/her thesis advisor should decide which particular course would be most appropriate.

Students are required to maintain a grade point average of B or greater in the five core courses required for that student. The grade of B- is not considered a passing grade for a graduate student. Students must pass the five core courses by the end of their second academic year. Students failing to meet this requirement may be asked to leave the program. In the event a student receives an Incomplete in any of the core courses, the deficiency must be cleared by the deadline specified by the Graduate Advisor. Any extensions of this deadline require approval by the Graduate Advisor.

To ensure that all students gain teaching experience, all students are required to serve as Teaching Assistants for a minimum of one quarter for M.S. students and three quarters for Ph.D. students. These are minima, and students may teach additional quarters during their program.

Each entering graduate student chooses a faculty advisor and a three-person advisory committee for guidance, with whom the student meets at least twice each year. All students are encouraged to submit a research proposal to their advisory committee during their first year of residency. A comprehensive proposal is required before the end of the first year for M.S. students and before advancement to candidacy for Ph.D. students. The progress of each student is reviewed by the student’s advisory committee, together with the Graduate Advisor, twice each academic year.

Doctoral students who Advance to Candidacy meet the M.S. degree requirements, and can receive the M.S. degree by submitting the M.S. degree advancement to candidacy paperwork, and then submitting the M.S. degree completion paperwork in a subsequent quarter.

The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. All requirements for the M.S. degree should be completed within two years, with a maximum of three years allowed for completion of the program. Advancement to doctoral candidacy by an oral examination is expected during the third year for students entering with a B.A. or B.S. or during the second year for those entering with an M.A. or M.S.

Applicants for this program should have a solid undergraduate program in biology and ecology, emphasizing both research and fieldwork. In addition, course work in statistics, mathematics, and physical and chemical sciences is expected. All applicants are required to submit GRE scores. The deadline for application is December 1.

**Faculty**

Nancy M. Aguilar-Roca, Ph.D. University of California, San Diego, *Lecturer with Potential Security of Employment of Ecology and Evolutionary Biology*

Steven D. Allison, Ph.D. Stanford University, *Associate Professor of Ecology and Evolutionary Biology; Earth System Science*

Peter R. Atsatt, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*
John C. Avise, Ph.D. University of California, Davis, UCI Distinguished Professor of Ecology and Evolutionary Biology

Francisco J. Ayala, Ph.D. Columbia University, Donald Bren Professor and University Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Manny Azizi, Ph.D. University of Massachusetts, Assistant Professor of Ecology and Evolutionary Biology

Alan G. Barbour, M.D. Tufts University, Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine

Albert F. Bennett, Ph.D. University of Michigan, Professor Emeritus of Ecology and Evolutionary Biology

Rudi C. Berkelhammer, Ph.D. University of California, Berkeley, Senior Lecturer Emerita of Ecology and Evolutionary Biology

Peter A. Bowler, Ph.D. University of California, Irvine, Senior Lecturer of Ecology and Evolutionary Biology

Matthew E. Bracken, Ph.D. Oregon State University, Associate Professor of Ecology and Evolutionary Biology

Timothy J. Bradley, Ph.D. University of British Columbia, Professor of Ecology and Evolutionary Biology

Adriana D. Briscoe, Ph.D. Harvard University, Professor of Ecology and Evolutionary Biology

Nancy T. Burley, Ph.D. University of Texas at Austin, Professor of Ecology and Evolutionary Biology

Robin M. Bush, Ph.D. University of Michigan, Associate Professor of Ecology and Evolutionary Biology

Diane R. Campbell, Ph.D. Duke University, Professor of Ecology and Evolutionary Biology

F. Lynn Carpenter, Ph.D. University of California, Berkeley, Professor Emerita of Ecology and Evolutionary Biology

Michael T. Clegg, Ph.D. University of California, Davis, Donald Bren Professor and Professor Emeritus of Ecology and Evolutionary Biology

James J. Emerson, Ph.D. University of Chicago, Assistant Professor of Ecology and Evolutionary Biology

Steven A. Frank, Ph.D. University of Michigan, Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Brandon S. Gaut, Ph.D. University of California, Riverside, Professor of Ecology and Evolutionary Biology

Donovan German, Ph.D. University of Florida, Assistant Professor of Ecology and Evolutionary Biology

Michael L. Goulden, Ph.D. Stanford University, Professor of Earth System Science; Ecology and Evolutionary Biology

Bradford A. Hawkins, Ph.D. University of California, Riverside, Professor of Ecology and Evolutionary Biology

James W. Hicks, Ph.D. University of New Mexico, Professor of Ecology and Evolutionary Biology

Bradley S. Hughes, Ph.D. University of California, Irvine, Lecturer with Security of Employment of Ecology and Evolutionary Biology; Education

George L. Hunt, Jr., Ph.D. Harvard University, Professor Emeritus of Ecology and Evolutionary Biology

Travis E. Huxman, Ph.D. University of Nevada, Professor of Ecology and Evolutionary Biology

Mahtab F. Jafari, Ph.D. University of California, San Francisco, Vice Chair of the Undergraduate Program in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology; Pharmacology

Natalia Komarova, Ph.D. University of Arizona, Professor of Mathematics; Ecology and Evolutionary Biology (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Harold Koopowitz, Ph.D. University of California, Los Angeles, Professor Emeritus of Ecology and Evolutionary Biology

Anthony D. Long, Ph.D. McMaster University, Professor of Ecology and Evolutionary Biology; Pharmaceutical Sciences

Catherine Loudon, Ph.D. Duke University, Senior Lecturer of Ecology and Evolutionary Biology

Richard E. MacMillen, Ph.D. University of California, Los Angeles, Professor Emeritus of Ecology and Evolutionary Biology

Adam Martiny, Ph.D. Technical University of Denmark, Associate Professor of Earth System Science; Ecology and Evolutionary Biology

Jennifer Martiny, Ph.D. Stanford University, Professor of Ecology and Evolutionary Biology

Matthew J. McHenry, Ph.D. University of California, Berkeley, Associate Professor of Ecology and Evolutionary Biology
Kailen Mooney, Ph.D. University of Colorado Boulder, Associate Professor of Ecology and Evolutionary Biology

Laurence D. Mueller, Ph.D. University of California, Davis, Department Chair and Professor of Ecology and Evolutionary Biology

R. Michael Mulligan, Ph.D. Michigan State University, Biological Sciences Associate Dean of Graduate Studies and Professor of Developmental and Cell Biology; Ecology and Evolutionary Biology (RNA editing in plant mitochondria and chloroplasts)

Jessica Pratt, Ph.D. University of California, Irvine, Lecturer with Potential Security of Employment of Ecology and Evolutionary Biology

James T. Randerson, Ph.D. Stanford University, UCI Chancellor's Professor of Earth System Science; Ecology and Evolutionary Biology

Jose Mari Ranz Navalpotro, Ph.D. Universidad Autónoma de Madrid, Associate Professor of Ecology and Evolutionary Biology

Michael R. Rose, Ph.D. University of Sussex, Professor of Ecology and Evolutionary Biology

Ann K. Sakai, Ph.D. University of Michigan, Professor of Ecology and Evolutionary Biology

Cascade J. Sorte, Ph.D. University of California, Davis, Assistant Professor of Ecology and Evolutionary Biology

Richard Symanski, Ph.D. Syracuse University, Senior Lecturer of Ecology and Evolutionary Biology

Kevin Thornton, Ph.D. University of Chicago, Associate Professor of Ecology and Evolutionary Biology

Kathleen K. Treseder, Ph.D. Stanford University, Department Vice Chair and UCI Chancellor's Fellow and Professor of Ecology and Evolutionary Biology

Arthur Weis, Ph.D. University of Illinois at Urbana-Champaign, Professor Emeritus of Ecology and Evolutionary Biology

Stephen G. Weller, Ph.D. University of California, Berkeley, Professor of Ecology and Evolutionary Biology

Dominik Franz X. Wodarz, Ph.D. Oxford University, Professor of Ecology and Evolutionary Biology; Mathematics

Guiyun Yan, Ph.D. University of Vermont, Professor of Program in Public Health; Ecology and Evolutionary Biology; Program in Public Health

Courses

ECO EVO 200A. Research in Ecology and Evolutionary Biology. 2-12 Units.
Individual research with Ecology and Evolutionary Biological faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 200B. Research in Ecology and Evolutionary Biology. 2-12 Units.
Individual research with Ecology and Evolutionary Biological faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 200C. Research in Ecology and Evolutionary Biology. 2-12 Units.
Individual research with Ecology and Evolutionary Biological faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 201. Seminar in Ecology and Evolutionary Biology. 2 Units.
Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Concurrent with BIO SCI E107.
ECO EVO 203A. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 203B. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 203C. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.
Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

ECO EVO 204. Writing Grant Proposals. 4 Units.
Provides students with hands-on experience writing proposals in the research areas of ecology, evolution, or physiology.
Restriction: Graduate students only.

ECO EVO 205. Special Topics in Ecology. 4 Units.
Survey of special topics in Ecology.
Restriction: Graduate students only.

ECO EVO 206. Special Topics in Evolution. 4 Units.
Extensive introduction to the primary literature of evolutionary biology. Topics include population genetics, quantitative genetics, neutralism, molecular evolution, evolution of genetic systems, genetic architecture of fitness, speciation, and macroevolution.
Restriction: Graduate students only.

ECO EVO 207. Quantitative Methods in Ecology and Evolutionary Biology. 4 Units.
Statistics for ecologists and evolutionary biologists. Emphasis on specific applications and underlying assumptions rather than on methods of calculation. Topics include experimental design, parametric and nonparametric methods, analysis of variance and covariance, and multiple regression.
Prerequisite: Completion of at least one quarter of statistics including regression and analysis of variance.
Restriction: Graduate students only.

ECO EVO 208. Ecological and Evolutionary Physiology. 4 Units.
A summary of information in organismal biology, comparative and ecological physiology, and the biophysical basis of organismal function. Course offered every other fall.
Restriction: Graduate students only.

ECO EVO 210. Foundations of Physiology. 4 Units.
Physical and functional principles common to many living forms. Course forms a basis for subsequent specialization in any of the subdisciplines of physiology. Course offered in even years.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 218. Advanced Topics in Evolutionary Biology. 4 Units.
Content and instructor will vary from quarter to quarter. Possible topics include quantitative genetics, experimental methods of evolutionary studies, mathematical modeling in evolutionary studies, and the evolution of genetic systems.
Repeatability: May be repeated for credit unlimited times.
ECO EVO 219. Advanced Topics in Ecological Genetics. 4 Units.
Content and instructor will vary from year to year. Possible topics include coevolution, sex-ratio evolution, evolution senescence, plant population biology, and density-dependent selection.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 221. Advanced Topics in Ecology. 2-4 Units.
Weekly discussion of current topics in ecology at the graduate level.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

ECO EVO 227. Plant Physiological Ecology. 4 Units.
Provides a summary of information on plant organismal biology, comparative and ecological physiology, and functional ecology. Offered every other fall.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 228. Seminar in Conservation Biology. 2 Units.
Devoted to the application of basic ecological principles to the understanding and resolution of environmental problems of both local and global natures. Current problems approached through a combination of readings, group discussions, and visiting speakers.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 230. Topics in Microbial Ecology. 2-4 Units.
Weekly discussion of current topics in ecology, biogeochemistry, evolution, and physiology of microbial organisms.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

ECO EVO 235. Experimental Evolution. 2 Units.
Explores experimental evolution, which is now a well-established part of evolutionary biology. With the advent of genomics, it is now one of the most powerful tools for studying the genetic foundations of biology.

Prerequisite: BIO SCI E106.

Repeatability: May be repeated for credit unlimited times.

Restriction: Biological Sciences graduate students only.

ECO EVO 246. Seminar in Ecology and Evolution Education. 2 Units.
Weekly discussion of teaching techniques and challenges that are specific to courses in ecology and evolutionary biology. Emphasis will be on using evidence-based pedagogy techniques. There will be a combination of readings, group discussions and speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 251. Population Dynamics in Ecology, Epidemiology, and Medicine. 4 Units.
Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Restriction: Graduate students only.

Concurrent with BIO SCI E151.
ECO EVO 272. Plant Diversity in a Changing World. 4 Units.
Investigation of plant diversity in California and throughout the world, including basic systematic concepts, introduction to major groups of flowering plants, and the effects of global biological change on plant diversity. Students carry out a phylogenetic analysis using appropriate software.
Concurrent with BIO SCI E172.

ECO EVO 273. Plant Systematics Laboratory. 4 Units.
Diversity of flowering plants is investigated in the laboratory and field. Familiarity with flowering plant families, particularly those prominent in the California flora, is emphasized.
Concurrent with BIO SCI E172L.

ECO EVO 282. Fundamentals of Informatics for Biologists. 4 Units.
Students learn the fundamentals of bioinformatics and the unix operating system (including the shell and Sun Grid Engine) in order to assemble a eukaryotic genome.
Restriction: Graduate students only.

ECO EVO 283. Advanced Informatics for Biologists. 4 Units.
Students learn advanced informatics including the analysis of: Poolseq, RNAseq, ATACseq, and ChiPseq datasets using programs such as bwa, tophat, cufflinks, DEseq, Trinity, Agustus, etc., in a unix high-performance computing environment. Statistical tests carried out and publication quality.
Prerequisite: ECO EVO 282.
Restriction: Graduate students only.

ECO EVO 285. Topics in Evolutionary Genetics. 2 Units.
Weekly discussion of recent research on evolutionary genetics.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 287. Communicating Research Through Video. 4 Units.
Students explore videography to develop basic production skills through practice with high interest special topics, such as laboratory experimental evolution and educational interdisciplinary field events, and then develop media to communicate their own research or other topics of interest.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 288. Documenting Research Through Cinematic Production. 4 Units.
Students gain advanced media expertise by conceptualizing investigative research into publicly engaging video projects. Popularly accessible research topics will be adapted into documentary, television, or cinematic pieces that provide opportunities for developing professionally marketable skills in educationally effective media production.
Prerequisite: ECO EVO 287.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECO EVO 299. Independent Study. 1-4 Units.
Individual research or investigation under the direction of an individual faculty.
Grading Option: Satisfactory/unsatisfactory only.

ECO EVO 323. Curriculum and Methods for Elementary School Science. 4 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.
Same as EDUC 323.
ECO EVO 341. Teaching Science in Secondary School. 4 Units.
Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 341.

Restriction: Teacher Credential Program students only.

ECO EVO 398. Teaching Assistant Seminar. 2 Units.
Readings, lectures, workshops, and student presentations designed to help develop teaching skills of graduate students teaching university-level biology classes. Topics vary and may include: course organization, presentation styles, exam design, grading, motivating students, and commonly encountered problems.

Repeatability: May be repeated for credit unlimited times.

ECO EVO 399. University Teaching. 4 Units.
Mandatory course for Ecology and Evolutionary Biology Teaching Assistants, required in each quarter in which student has a Teaching Assistant position. Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Department of Molecular Biology and Biochemistry

Christopher C.W. Hughes, Department Chair
Donald F. Senear, Department Vice Chair
3205 McGaugh Hall
949-824-4915
http://mbb.bio.uci.edu/

Overview
The research interests of faculty in the Department of Molecular Biology and Biochemistry include structure and synthesis of nucleic acids and proteins, regulation, virology, biochemical genetics, gene organization, nucleic acids and proteins, cell and developmental biology, molecular genetics, biomedical genetics, and immunology.

The Department offers graduate study in conjunction with the program in Cellular and Molecular Biosciences (CMB) and the Interdepartmental Neuroscience Program (INP). Students admitted into a combined program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year. Participation in an advanced topics seminar series and completion of at least one course per year for three years are expected of all students. Students must advance to candidacy in their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP). The one-year MCP graduate gateway program is designed to function in concert with selected graduate programs, including the Ph.D. in Biological Sciences. Detailed information is available on the Pharmaceutical Sciences website (http://www.cohs.uci.edu/pharm.shtml).

Undergraduate Major in Biochemistry and Molecular Biology

Few areas of Biological Sciences remain that are not impacted by studies at the chemical and molecular level. The major in Biochemistry and Molecular Biology is designed to provide a comprehensive background in this modern, conceptual understanding of biology. Students who wish to begin in-depth study of the molecular basis in any of a variety of fields, including development, gene expression, immunology, pathogenesis, disease, virology, and evolution, can do so through this major. This program will be especially attractive to those students who intend to pursue an advanced degree in biological or medical sciences.

The Biochemistry and Molecular Biology major is based upon required courses in Advanced Biochemistry and Advanced Molecular Biology (BIO SCI M114 and BIO SCI M116). These courses, together with a wide variety of elective course offerings, provide majors the choice to either explore the breadth of the field or follow a more in-depth study of any of its subdisciplines. For students interested in the interface between biology and chemistry, this program articulates well with a second major in Chemistry.

The program of study emphasizes laboratory experience and its integration with basic theory. This is accomplished in three ways: first, through coordination between the advanced courses in Biochemistry (BIO SCI M114) and Molecular Biology (BIO SCI M116), and laboratory courses in Biochemistry (BIO SCI M114L) and Molecular Biology (BIO SCI M116L) which provide students with the basic laboratory skills and an appreciation for the experimental foundations of the field; second, through advanced laboratories in Immunology (BIO SCI M121L) and Virology (BIO SCI M127L) which provide students with the opportunity to develop cutting edge research skills; and third, by emphasizing independent research sponsored by a participating faculty member. The program encourages the research interests of students in subdisciplines other than immunology or virology by offering the opportunity to substitute one year of independent research for the advanced laboratory.
The major in Biochemistry and Molecular Biology is designed to provide students with the appropriate tools and training to successfully pursue graduate degrees that emphasize basic scientific research, including Ph.D. and M.S. training as well as combined M.D./Ph.D. programs. In addition, and particularly with the explosive growth in biotechnology and its significant influence in everyday life, graduates could use their backgrounds very effectively to pursue careers in business, education, law, and public affairs.

Requirements for the B.S. Degree in Biochemistry and Molecular Biology

All students must meet the University Requirements.

All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>

</tr>
</tbody>
</table>

No course may be used to satisfy more than one requirement.

Application Process to Declare the Major: The major in Biochemistry and Molecular Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Biochemistry and Molecular Biology Faculty Board is completed during the summer. Information can also be found at the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu). Double majors within the Francisco J. Ayala School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

Undergraduate Major in Microbiology and Immunology

Microbiology and Immunology are well-established disciplines within the life sciences. Microbiology addresses the biology of bacteria, viruses, and unicellular eukaryotes such as fungi and protozoa. Studies of microorganisms reveal basic information about processes in evolution, genetics, biochemistry, molecular biology, cell biology, structural biology, and ecology. Many bacteria, viruses, and protozoa cause disease in plants and animals. Hence, major areas of medicine and public health focus on these microorganisms.

Immunology encompasses efforts to understand how multicellular organisms have evolved to survive a variety of challenges to health and survival, including threats by pathogens and cancer cells. Basic questions of how immunity functions are intertwined with a fundamental understanding of the consequences of microbial infection. Immunology also refers to the study of autoimmunity, the attack of the host by its own immune system.

The study of viruses (virology) is an important branch of microbiology that has contributed to our understanding of most of the fundamental processes in eukaryotic molecular biology, including the discovery of oncogenes. Viruses provide an excellent tool for the study of disease, cancer, and mechanisms of gene control. With the growing threat of emerging diseases and the potential for viral-based biological weapons, the study of virology was recently intensified and gained new perspectives.

The major is designed primarily for students who are serious about pursuing careers in microbiology and immunology and is intended to provide its graduates with the appropriate tools and training to successfully pursue professional and graduate degrees emphasizing these disciplines. These include Ph.D., M.D., and combined M.D./Ph.D. programs. Majoring in Microbiology and Immunology will also provide resources for serious students wishing to use a solid background in these disciplines for career goals in business, law, public and environmental policy, education, and other pursuits.

Requirements for the B.S. Degree in Microbiology and Immunology

1 Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.
Faculty

Dana W. Aswad, Ph.D. University of California, Berkeley, Professor of Molecular Biology and Biochemistry

Hans-Ulrich Bernard, Ph.D. University of Goettingen, Professor Emeritus of Molecular Biology and Biochemistry; Program in Public Health

Alexander D. Boiko, Ph.D. University of Illinois at Urbana–Champaign, Assistant Professor of Molecular Biology and Biochemistry

Michael J. Buchmeier, Ph.D. McMaster University, Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry

Melanie Cocco, Ph.D. Pennsylvania State University, Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences

Michael G. Cumsky, Ph.D. University of California, Berkeley, Senior Lecturer of Molecular Biology and Biochemistry

Hung Y. Fan, Ph.D. Massachusetts Institute of Technology, Professor Emeritus of Molecular Biology and Biochemistry

David A. Fruman, Ph.D. Harvard University, Professor of Molecular Biology and Biochemistry

Paul David Gershon, Ph.D. University of Liverpool, Professor of Molecular Biology and Biochemistry

Charles Glabe, Ph.D. University of California, Davis, Professor of Molecular Biology and Biochemistry

Celia Goulding, Ph.D. King’s College London, Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences

Gale A. Granger, Ph.D. University of Washington, Professor Emeritus of Molecular Biology and Biochemistry

Michael T. Green, Ph.D. University of Chicago, Professor of Molecular Biology and Biochemistry; Chemistry (chemical, biology, inorganic and organometallic, physical chemistry and chemical physics, theoretical and computational)

Barbara A. Hamkalo, Ph.D. University of Massachusetts, Professor Emerita of Molecular Biology and Biochemistry

Yilin Hu, Ph.D. Loma Linda University, Assistant Professor of Molecular Biology and Biochemistry

Christopher C. Hughes, Ph.D. University of London, Francisco J. Ayala Chair and Interim Director of Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Molecular Biology and Biochemistry; Biomedical Engineering (tissue engineering, growth and patterning of blood vessels)

Matthew Inlay, Ph.D. University of California, San Diego, Assistant Professor of Molecular Biology and Biochemistry

Anthony A. James, Ph.D. University of California, Irvine, UCI Distinguished Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry

Pavan Kadandale, Ph.D. Rutgers, The State University of New Jersey, Lecturer with Potential Security of Employment of Molecular Biology and Biochemistry

Young Jik Kwon, Ph.D. University of Southern California, Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical Engineering and Materials Science; Molecular Biology and Biochemistry (gene therapy, drug delivery, cancer-targeted therapeutics, combined molecular imaging and therapy, cancer vaccine)

Melissa Lodoen, Ph.D. University of California, San Francisco, Assistant Professor of Molecular Biology and Biochemistry

Hartmut Luecke, Ph.D. William Marsh Rice University, Professor of Molecular Biology and Biochemistry; Physiology and Biophysics

Ray Luo, Ph.D. University of Maryland, College Park, Professor of Molecular Biology and Biochemistry; Biomedical Engineering; Chemical Engineering and Materials Science (protein structure, noncovalent associations involving proteins)

Andrej Luptak, Ph.D. Yale University, Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry (chemical biology)

Jerry E. Manning, Ph.D. University of Utah, Professor Emeritus of Molecular Biology and Biochemistry

Rachel Martin, Ph.D. Yale University, Associate Professor of Chemistry; Molecular Biology and Biochemistry (analytical, chemical biology, physical chemistry and chemical physics)

Maria J. Massimelli, Ph.D., Lecturer with Potential Security of Employment of Molecular Biology and Biochemistry

Alexander McPherson, Ph.D. Purdue University, Professor of Molecular Biology and Biochemistry

Naomi Morrissette, Ph.D. University of Pennsylvania, Associate Professor of Molecular Biology and Biochemistry
Edward L. Nelson, M.D. University of Oregon, Associate Professor of Medicine; Molecular Biology and Biochemistry

Irene Pedersen, Ph.D. University of California, San Diego, Assistant Professor of Molecular Biology and Biochemistry

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Jennifer A. Prescher, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences (chemical biology, organic and synthetic)

Olga Razorenova, Ph.D. Institute of Molecular Genetics, Assistant Professor of Molecular Biology and Biochemistry

Elizabeth L. Read, Ph.D. University of California, Berkeley, Assistant Professor of Chemical Engineering and Materials Science; Molecular Biology and Biochemistry (dynamics of complex biochemical systems, regulation of immune responses)

Markus W. Ribbe, Ph.D. University of Bayreuth, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry (chemical biology, inorganic and organometallic)

Brian Sato, Ph.D. University of California, San Diego, Lecturer with Security of Employment of Molecular Biology and Biochemistry

Donald F. Senear, Ph.D. University of Washington, Professor of Molecular Biology and Biochemistry

Andrea Tenner, Ph.D. University of California, San Diego, Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior

Krishna K. Tewari, Ph.D. University of Lucknow, Professor Emeritus of Molecular Biology and Biochemistry

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences

Luis P. Villarreal, Ph.D. University of California, San Diego, Professor Emeritus of Molecular Biology and Biochemistry

Craig Walsh, Ph.D. University of California, Los Angeles, Professor of Molecular Biology and Biochemistry

Gregory A. Weiss, Ph.D. Harvard University, Professor of Chemistry; Molecular Biology and Biochemistry (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Katrine Whiteson, Ph.D. University of Chicago, Assistant Professor of Molecular Biology and Biochemistry

Clifford A. Woolfolk, Ph.D. University of Washington, Professor Emeritus of Molecular Biology and Biochemistry

Courses

MOL BIO 200A. Research in Molecular Biology and Biochemistry. 2-12 Units.
Individual research with Molecular Biology and Biochemistry faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

MOL BIO 200B. Research in Molecular Biology and Biochemistry. 2-12 Units.
Individual research with Molecular Biology and Biochemistry faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

MOL BIO 200C. Research in Molecular Biology and Biochemistry. 2-12 Units.
Individual research with Molecular Biology and Biochemistry faculty.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
MOL BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in the Department of Molecular Biology and Biochemistry for first-year Ph.D. students.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.

MOL BIO 201A. Seminars in Molecular Biology & Biochemistry. 2 Units.
Presentation of research from department laboratories or, when pertinent, of other recent developments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 201B. Seminars in Molecular Biology & Biochemistry. 2 Units.
Presentation of research from department laboratories or, when pertinent, of other recent developments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 201C. Seminars in Molecular Biology & Biochemistry. 2 Units.
Presentation of research from department laboratories or, when pertinent, of other recent developments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 202A. Tutorial in Molecular Biology and Biochemistry. 2 Units.
Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.
Repeatability: Unlimited as topics vary.

MOL BIO 202B. Tutorial in Molecular Biology and Biochemistry. 2 Units.
Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.
Repeatability: Unlimited as topics vary.

MOL BIO 202C. Tutorial in Molecular Biology and Biochemistry. 2 Units.
Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.
Repeatability: Unlimited as topics vary.

MOL BIO 203. Nucleic Acid Structure and Function. 4 Units.
Structure and chemistry of nucleic acids. Relationship between these properties and the mechanisms of fundamental processes such as replication and repair, RNA-mediated catalysis, formation and regulation of higher order chromatin structure and recombination.
Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51A and CHEM 51B and CHEM 51C.

MOL BIO 204. Protein Structure and Function. 4 Units.
The structure and properties of proteins, enzymes, and their kinetic properties.
Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51C.

MOL BIO 205. Molecular Virology. 4 Units.
Primary research data on the major DNA and RNA viruses emphasizing strategies of regulation of gene expression. Utilization of viruses as molecular biological tools. Graduate-level knowledge of the biochemistry and molecular biology of macromolecules is required.
Prerequisite: MOL BIO 203 and MOL BIO 204.
Restriction: Graduate students only.
MOL BIO 211. High-Resolution Structures: NMR and X-ray. 4 Units.
Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B.

Restriction: Graduate students only.

Concurrent with BIO SCI M133.

MOL BIO 213. Literature in Nucleic Acid Structure and Function. 2 Units.
Exploration and critical analysis of recent primary scientific literature in structure, properties, and biological mechanisms involving nucleic acids.

Corequisite: MOL BIO 203.

Grading Option: Satisfactory/unsatisfactory only.

MOL BIO 214. Literature in Protein Structure and Function. 2 Units.
Exploration and critical analysis of recent primary scientific literature in structure and properties of proteins, enzymes, and their kinetic properties.

Corequisite: MOL BIO 204.

Grading Option: Satisfactory/unsatisfactory only.

MOL BIO 215. Integrative Immunology. 4 Units.
Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as M&MG 215.

MOL BIO 217A. Principles of Cancer Biology I. 4 Units.
Oncogenes and tumor suppressor genes are studied from molecular viewpoints. Also studies their role in cancer; viral carcinogenesis. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204.

Restriction: Graduate students only.

MOL BIO 217B. Principles of Cancer Biology II. 4 Units.
Topics include cancer cell growth and metastasis, chemical carcinogenesis, and cancer genetics and epidemiology. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204.

Restriction: Graduate students only.

MOL BIO 218. Clinical Cancer. 3 Units.
Designed to acquaint students in basic life science with clinical cancer.

Restriction: Graduate students and Postdocs only.

MOL BIO 220. Structure & Synthesis of Biological Macromolecules Journal Club. 2 Units.
Advanced topics in macromolecular structure and synthesis as related to biological problems.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

MOL BIO 221. Advanced Topics in Immunology. 4 Units.
Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: M&MG 215.

Restriction: Graduate students only.
MOL BIO 221L. Advanced Immunology Laboratory. 4 Units.
An advanced course in immunology for graduate students enrolled in the Biotechnology master's program. Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.
Restriction: Graduate students only.
Concurrent with BIO SCI M121L.

MOL BIO 223. Introduction to Computational Biology. 4 Units.
Same as BME 232.
Restriction: Graduate students only.
Concurrent with BIO SCI M123 and COMPSCI 183 and BME 132.

MOL BIO 227. Immunology Journal Club. 2 Units.
Advanced topics in immunology as related to an understanding of human disease.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 15 times.
Restriction: Graduate students only.

MOL BIO 227L. Virology and Immunology Laboratory. 5 Units.
Introductory laboratory course in virology and immunology designed for Biological Sciences graduate students. Curriculum includes plasmid preparation, plasmid characterization, microscopy, cell culture, transfection and infection of cells, cell counting, plaque assays, ELISA, Western blot, mixed lymphocyte reactions.
Restriction: Graduate students only.

MOL BIO 229. Research-in-Progress Seminars. 1 Unit.
Two half-hour presentations by graduate students and postdoctorals to the department on their current research projects.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 15 times.
Restriction: Graduate students only.

MOL BIO 250. Advanced Topics in Biotechnology - Nucleic Acids. 2 Units.
Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.
Corequisite: MOL BIO 250L.
Restriction: Biotechnology graduate students only.

MOL BIO 250L. Biotechnology Laboratory - Nucleic Acids. 8 Units.
Nucleic acid techniques and recombinant DNA technology. Extraction and purification of nucleic acids, cloning and subcloning, PCR, site-directed mutagenesis, nucleic acid hybridization, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.
Corequisite: MOL BIO 250.
Restriction: Biotechnology graduate students only.

MOL BIO 251. Advanced Topics in Biotechnology - Protein Purification and Characterization. 2 Units.
Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.
Corequisite: MOL BIO 251L.
Prerequisite: MOL BIO 250L and MOL BIO 250.
Restriction: Biotechnology graduate students only.
MOL BIO 251L. Biotechnology Laboratory - Protein Purification and Characterization. 8 Units.
Major techniques of handling proteins and antibodies. Protein engineering, expression and large-scale purification of recombinant proteins from bacteria, HPLC, antibody purification, western blotting, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 251.
Prerequisite: MOL BIO 250L and MOL BIO 250.
Restriction: Biotechnology graduate students only.

MOL BIO 252L. Biotechnology Management Laboratory. 8 Units.
Overview of current methods in biotechnology, designed specifically for biotechnology graduate students. Organized into four distinct sections (nucleic acids, proteins, virology, and immunology). Students must demonstrate accurate documentation of data (laboratory notebooks) detailing experience and results.

Restriction: Biotechnology graduate students only.

MOL BIO 253. Biotech Management . 5 Units.
Taught jointly by Biological Sciences and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MGMTMBA 293.
Restriction: Master's Program in Biotechnology Management students only.

MOL BIO 253L. Stem Cell Laboratory. 4 Units.
Designed to prepare M.S. Biotechnology program students for a career in stem cell research. Laboratory training utilizes tissue culture, mouse and human embryonic stem cells, and is enhanced with didactic material and discussion.

Prerequisite: MOL BIO 250L and MOL BIO 251L.
Restriction: Biotechnology graduate students only.

MOL BIO 270. Science Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

MOL BIO 291. Graduate School Fundamentals. 2 Units.
Lectures and discussions providing basic skills needed for success in Ph.D. graduate studies. Topics include formulating a hypothesis, experimental design, literature review, grant writing, oral communication, biostatistics, time management, and professional development.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: First-year students in the Cellular and Molecular Biosciences gateway Ph.D. program.

MOL BIO 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MOL BIO 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
MOL BIO 293A. Cancer Biology Journal Club. 1 Unit.
Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

MOL BIO 293B. Cancer Biology Journal Club. 1 Unit.
Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

MOL BIO 293C. Cancer Biology Journal Club. 1 Unit.
Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

MOL BIO 295. Biomedical Research Methods. 2 Units.
Lectures and interactive discussions of research methods in modern biomedical science. Each week will focus on a different class of techniques, including molecular, biochemical, immunological, genomic, bioinformatics, microscopy, cancer biology, genome editing. One hour per week, grading based on attendance.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Enrollment restricted to 1st year students in the Cellular & Molecular Biosciences gateway Ph.D. program. Other Ph.D. candidates may audit.

MOL BIO 399. University Teaching. 4 Units.
Limited to Teaching Assistants.
Restriction: Graduate students only.

Department of Neurobiology and Behavior

Marcelo Wood, Department Chair
Raju Metherate, Department Vice Chair
2205 McGaugh Hall
949-824-8519
http://neurobiology.uci.edu/

Overview
The Department of Neurobiology and Behavior programs provide a broad foundation in neuroscience combined with proficiency in a specific area of research. Faculty members in the Department address questions in neuroscience at the molecular, cellular, systems, and behavioral levels. Research focuses on a range of topics including learning and memory, neurodegenerative disorders, addiction, sensory neurobiology, developmental neurobiology, and neural plasticity.

The Department of Neurobiology and Behavior also participates in the Interdepartmental Neuroscience Program (http://www.inp.uci.edu).

The Department of Neurobiology and Behavior offers the Ph.D. degree in Biological Sciences. Graduate students must complete a sequence of core courses (lectures and laboratories) during their first year, and maintain an overall GPA of 3.3 or better. They also must take a minimum of four advanced courses before graduation and participate in directed research each year and a minimum of two quarters of teaching by their fourth year. Students will advance to candidacy for the Ph.D. at the end of their third year by means of a written critical review of the literature in the area in which they plan to do their dissertation, a research proposal, and an oral examination. Graduation depends on successful preparation and oral defense of a dissertation based on the student’s research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Ideally, applicants for this program should have taken undergraduate courses in biology (one introductory year plus some advanced work), and/or psychology (experimental, physiological), chemistry through biochemistry, introductory physics, calculus, and statistics. They also must submit GRE Aptitude test scores. Because graduate training emphasizes research, preference is given to applicants having laboratory research experience.
Applicants with substantial outside commitments that would curtail laboratory research or prolong the time to degree are not accepted. The deadline for application is December 2.

**Undergraduate Major in Neurobiology**

The Neurobiology major is designed to teach students how neurobiologists apply cellular, molecular, systems, and behavioral analyses in understanding how the nervous system works. The hallmark of the major is a year-long, in-depth exploration of the intellectual tools used to create, advance, and disseminate knowledge about the nervous system. Through neurobiology satellite courses, students acquire advanced factual knowledge about neurobiology. In addition, Neurobiology majors may choose to participate in research through BIO SCI 199, where they will learn technical skills and receive mentoring from faculty members.

Students completing the Neurobiology major will be well qualified for admission to graduate or professional schools in preparation for careers in biological research, medicine, dentistry, veterinary medicine, nursing, and other related fields. Even without additional education, they will be competitive for positions in the pharmaceutical industry, the health care delivery industry, or in medically or biologically related technologies. The major also provides valuable preparation for students interested in entering other disciplines that increasingly interface with biology and biotechnology, such as law, business administration, and government policy. Additionally, the major provides excellent preparation for students who wish to become high school science teachers.

**Requirements for the B.S. Degree in Neurobiology**

All students must meet the University Requirements.

All students must meet the School Requirements.

**Major Requirements**

A. Upper-Division Core:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI N110</td>
<td>Neurobiology and Behavior</td>
</tr>
</tbody>
</table>

and select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103</td>
<td>Cell Biology</td>
</tr>
<tr>
<td>BIO SCI D104</td>
<td>Developmental Biology</td>
</tr>
<tr>
<td>BIO SCI E109</td>
<td>Human Physiology</td>
</tr>
</tbody>
</table>

B. Required Major Courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI N115A- N115B</td>
<td>Advanced Neurobiology I</td>
</tr>
<tr>
<td></td>
<td>and Advanced Neurobiology II</td>
</tr>
</tbody>
</table>

C. Upper-Division Laboratories:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI N113L</td>
<td>Neurobiology Laboratory</td>
</tr>
</tbody>
</table>

and select two of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D111L</td>
<td>Developmental and Cell Biology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E106L</td>
<td>Habitats and Organisms</td>
</tr>
<tr>
<td>BIO SCI E112L</td>
<td>Physiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI E115L</td>
<td>Evolution Laboratory</td>
</tr>
<tr>
<td>BIO SCI E131L</td>
<td>Image Analysis in Biological Research</td>

<tr>
<td>BIO SCI M118L</td>
<td>Experimental Microbiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M121L</td>
<td>Advanced Immunology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M122L</td>
<td>Advanced Microbiology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M124L</td>
<td>Virus Engineering Laboratory</td>
</tr>
<tr>
<td>BIO SCI M127L</td>
<td>Virology and Immunology Laboratory</td>
</tr>
<tr>
<td>BIO SCI M130L</td>
<td>Advanced Molecular Lab Techniques</td>
</tr>
</tbody>
</table>

One of these two laboratories can be satisfied by completion of Excellence in Research in the Biological Sciences.

D. Upper-Division Biology Electives:

Select three of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI N119–N190</td>
<td></td>
</tr>
</tbody>
</table>
and select one four-unit course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103–D190, E106–E190, M114–M190, N110–N190</td>
<td>Quantum Principles</td>
</tr>
<tr>
<td>CHEM 131A</td>
<td>Molecular Structure and Elementary Statistical Mechanics</td>
</tr>
<tr>
<td>CHEM 131B</td>
<td>Thermodynamics and Chemical Dynamics</td>
</tr>
<tr>
<td>PHYSICS 147A</td>
<td>Principles of Imaging</td>
</tr>
</tbody>
</table>

No course may be used to satisfy more than one requirement.

E. Honors Track of the Neurobiology Major: BIO SCI H195 in the area of neurobiology and Excellence in Research in the Biological Sciences - presenting neurobiology related research. ¹

¹ Requirements to enter the Honors Track: A 3.3 or better average GPA in BIO SCI N115A-BIO SCI N115B and a 3.0 or better average GPA in all required biology courses.

If the number of eligible students who apply for the Honors Track exceeds the number that can be accommodated in the neurobiology related H195, the department will try to open an additional section. If this is not feasible, the Neurobiology Major Faculty Advisory Committee will select the top applicants, based mainly on the students’ BIO SCI N115A-BIO SCI N115B grades and biology GPA.

Application Process to Declare the Major: The major in Neurobiology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Neurobiology Faculty Board is completed during the summer. Information can also be found at the http://www.changeofmajor.uci.edu. Double majors within the Francisco J. Ayala School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

¹ Students have the option of taking HUMAN 1AS, HUMAN 1BS, HUMAN 1CS or WRITING 39A, WRITING 39B, WRITING 39C in order to fulfill the lower-division writing requirement.

Faculty

Mathew M. Blurton-Jones, Ph.D. University of California, San Diego, Assistant Professor of Neurobiology and Behavior

Timothy Bredy, Ph.D McGill University, Assistant Professor of Neurobiology and Behavior

Jorge A. Busciglio, Ph.D. Universidad Nacional de Córdoba, Professor of Neurobiology and Behavior

Lawrence F. Cahill, Ph.D. University of California, Irvine, Professor of Neurobiology and Behavior (neural mechanisms of emotionally influenced behavior, sex differences in brain)
Susana Cohen-Cory, Ph.D. The Rockefeller University, *Professor of Neurobiology and Behavior*

Carl W. Cotman, Ph.D. Indiana University, *Professor of Neurology; Biomedical Engineering; Neurobiology and Behavior* (Alzheimer's disease, apoptosis, successful aging, dementia)

Karina S. Cramer, Ph.D. California Institute of Technology, *Professor of Neurobiology and Behavior*

Howard J. Federoff, M.D. Ph.D. Albert Einstein College of Medicine, *Vice Chancellor for Health Affairs and Professor of Neurobiology and Behavior*

Norbert Fortin, Ph.D. Boston University, *Associate Professor of Neurobiology and Behavior*

Christie Fowler, Ph.D. Florida State University, *Assistant Professor of Neurobiology and Behavior*

Ron D. Frostig, Ph.D. University of California, Los Angeles, *Professor of Neurobiology and Behavior; Biomedical Engineering*

Christine M. Gall, Ph.D. University of California, Irvine, *Department Chair and Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Sunil P. Gandhi, Ph.D. University of California, San Diego, *Assistant Professor of Neurobiology and Behavior*

Kim Green, Ph.D. University of Leeds, *Assistant Professor of Neurobiology and Behavior*

John F. Guzowski, Ph.D. University of Pennsylvania, *Professor Emeritus of Neurobiology and Behavior*

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Bruce L. McNaughton, Ph.D. Carleton University, *UCI Distinguished Professor of Neurobiology and Behavior*

Raju Metherate, Ph.D. McGill University, *Professor of Neurobiology and Behavior*

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior* (hearing research, neurophysiology, psychophysics, auditory prosthesis, computational neuroscience)

Ricardo Miledi, M.D. Universidad Nacional Autonoma De Mexico, *Professor Emeritus of Neurobiology and Behavior*

Andrea C. Nicholas, Ph.D. University of Chicago, *Lecturer with Potential Security of Employment of Neurobiology and Behavior*

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

Georges Sperling, Ph.D. Harvard University, *UCI Distinguished Professor of Cognitive Sciences; Neurobiology and Behavior* (empirical studies of human information processing: short-term visual memory systems, attention, visual perception, 3-D object recognition; mathematical, computational, and neural models of visual processes: light adaptation, temporal sensitivity, contrast-D)

Craig Stark, Ph.D. Carnegie Mellon University, *James L. McGaugh Chair in the Neurobiology of Learning and Memory and Professor of Neurobiology and Behavior*

Oswald Steward, Ph.D. University of California, Irvine, *Reeve-Irvine Chair in Spinal Cord Injury Research and Professor of Anatomy and Neurobiology; Neurobiology and Behavior*

Georg F. Striedter, Ph.D. University of California, San Diego, *Professor of Neurobiology and Behavior*

Katsumi Sumikawa, Ph.D. Imperial College London, *Professor of Neurobiology and Behavior*

Andrea Tenner, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry; Neurobiology and Behavior*
Courses

NEURBIO 200A. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 200B. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200A.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 200C. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200B.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 201A. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 201B. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 201C. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.
NEURBIO 202A. Foundations of Neuroscience. 2 Units.
Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Grading Option: Satisfactory/unsatisfactory only.

NEURBIO 202B. Foundations of Neuroscience. 2 Units.
Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202A.
Grading Option: Satisfactory/unsatisfactory only.

NEURBIO 206. Molecular Neuroscience. 5 Units.
Surveys molecular and cellular mechanisms involved in neuronal function, including control of gene expression, post-transcriptional and post-translational processing, RNA and protein targeting, cell death mechanisms, and molecular genetic basis of neurological disorders. Overview of the molecular aspects of developmental neurobiology.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 207. Cellular Neuroscience. 5 Units.
Neurophysiological and neurochemical mechanisms of electrical and chemical signaling in neurons. Topics include generation of resting- and action-potentials, voltage- and ligand-gated ion channels, second messenger systems, and synaptic transmission and integration.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 207L. Cellular Neuroscience Laboratory. 2 Units.
Intensive hands-on laboratory experience of contemporary techniques for studying ion channels and synaptic function. Experiments include microelectrode recording, patch clamp, quantal analysis of synaptic transmission, heterologous expression of genes for channels and receptors, brain slice, and fluorescence calcium imaging.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 208A. Systems Neuroscience. 5 Units.
Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.
Same as ANATOMY 210A.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 208B. Systems Neuroscience. 5 Units.
Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Prerequisite: NEURBIO 208A.
Repeatability: May be taken for credit 2 times.
Same as ANATOMY 210B.
Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 209. Behavioral Neuroscience. 5 Units.
Overview of fundamental conceptual and experimental issues in the neurobiology of learning and memory. The approach is a cross-level integration of research in molecular-genetic, cellular, circuit, systems, and behavioral analyses.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 220. Neural Coding, Computation, and Dynamics. 4 Units.
Theoretical principles and biological mechanisms underlying how brains acquire, assimilate, store, and retrieve information, compute adaptive responses to external inputs, and how knowledge is extracted from experience to generate an internal model of the world.

Prerequisite: NEURBIO 209.
NEURBIO 230. Chromatin Structure and Function. 4 Units.
Focuses on the role of chromatin/nuclear structure organization in eukaryotic genome regulation. The effects of histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization on gene regulation, DNA replication, and repair are discussed.

Prerequisite: MOL BIO 203 or MOL BIO 204 or NEURBIO 206.

Same as BIOCHEM 225.

Restriction: Graduate students only.

NEURBIO 231. Clinical and Epidemiological Aspects of Neurodegenerative Diseases. 4 Units.
Clinical and epidemiological aspects of neurodegenerative disorders causing dementia will be reviewed, including AD, PD, FTD, HD and cerebrovascular disease. Seminar format will include student presentations and group discussion.

Restriction: Graduate students only.

NEURBIO 232. Regenerative Neurobiology. 4 Units.
Surveys the latest research on regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders will be examined.

NEURBIO 234. Cognitive Neuroepigenetics. 4 Units.
Covers current topics in the emerging field of cognitive neuroepigenetics, focusing on understanding the underlying epigenetic mechanisms of memory formation and persistence. Primary literature will be used to explore these processes.

Repeatability: May be repeated for credit unlimited times.

NEURBIO 235. Balancing Research and Teaching. 1 Unit.
The goal of this course is to offer graduate students who have commitments outside of their research program (such as teaching) an opportunity to learn to balance these commitments.

NEURBIO 236. Cortex: Structure, Function, and Plasticity. 4 Units.
Structured to include lectures and presentation of papers about cortex with emphasis on sensory-motor cortex. Both historical and current perspectives on cortical structure-function relationship will be critically evaluated.

NEURBIO 237. Neurobiology of Brain Aging. 4 Units.
Outlines some of the significant changes that occur in the aging brain, with a special emphasis on risk factors and protective strategies that promote successful brain aging. Topics include changes in synaptic plasticity, neurotrophic factors, and molecular mechanisms in aging.

Prerequisite: NEURBIO 209.

NEURBIO 238. Neurobiology of Memory as a Multidisciplinary Science. 4 Units.
The study of memory is a highly multidisciplinary science ranging from molecular and cellular studies in reduced preparations to functional imaging studies in humans. The focus is to integrate across approaches and levels of analysis to better understand how the hippocampus, and its constituent elements, subserves memory. Emphasis on the challenges of this multidisciplinary field.

Restriction: Majors only

NEURBIO 239. Functional Imaging of the Nervous System. 4 Units.
Overview of technical and applied aspects of imaging techniques available for studying the nervous system. The areas emphasized are cellular and subcellular imaging of neural function, systems-level imaging of brain function, and imaging of the human brain.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 240. Advanced Analysis of Learning and Memory. 4 Units.
Advanced analysis of contemporary research concerning the nature and neurobiological bases of learning and memory. Special emphasis is given to time-dependent processes involved in memory storage.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 247. Programming for Neuroscience Research. 4 Units.
A neuroscience-specific introduction to programming and data analysis using either MATLAB or Scientific PYTHON. Students will learn general programming skills and effective use of programming for data management, statistical analysis, and image analysis.

Overlaps with PSYCH 205A.
NEURBIO 248. Topics in Neurobiology and Behavior. 4 Units.
Studies in selected areas of Neurobiology and Behavior. Topics addressed vary each quarter.

Repeatability: May be taken for credit 3 times.

NEURBIO 249. Electronics for Biologists. 4 Units.
Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as PHYSIO 205.

NEURBIO 254. Molecular Neurobiology. 4 Units.
The application of genetic and recombinant DNA technology to neurobiology. Topics include the study of neuronal proteins which play important roles in the formation of synapses and synaptic transmission.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 255. History of Neuroscience. 4 Units.
An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Repeatability: May be taken for credit 2 times.

Restriction: Neurobiology and Behavior graduate students only.

Concurrent with BIO SCI N119.

NEURBIO 257. Statistics for Neurobiologists. 4 Units.
Introduction to common methods for statistical analysis used in neurobiology. Topics covered include t-tests, ANOVAs, correlations and regressions, general linear model, power analysis, and non-parametric tests.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 260. Auditory Neuroscience. 4 Units.
Multidisciplinary overview of brain mechanisms of hearing. Emphasizes breath of auditory function and research: single neurons to psychoacoustics, the cochlea to the cortex, and basic science to clinic.

NEURBIO 290. Colloquium in Neurobiology and Behavior. 1.3 Unit.
Presentation of contemporary research problems in neurobiology and behavior and related areas by invited speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 292. Scientific Communication. 4 Units.
Students learn how to effectively communicate scientific ideas and results. Activities include learning how to effectively write a scientific manuscript, how to perform a coherent slide presentation, and how to run-through a poster presentation.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 299. University Teaching. 1-4 Units.
Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Overview
The Paul Merage School of Business (http://merage.uci.edu) offers the B.A. degree in Business Administration, the B.S. degree in Business Information Management (offered jointly with the Donald Bren School of Information and Computer Sciences), the M.B.A. (Master of Business Administration) degree, the MPAc degree in Accounting, the M.S. degree in Biotechnology Management (offered jointly with the Francisco J. Ayala School of Biological Sciences and The Henry Samueli School of Engineering), the M.S. degree in Engineering Management (offered jointly with The Henry Samueli School of Engineering), the Ph.D. degree in Management, and undergraduate minors in Management, Accounting, and Innovation and Entrepreneurship. The Master’s degree is professional in nature and is intended to provide future managers with a firm foundation in the basic disciplines and in management tools and techniques; the Ph.D. in Management is for those who wish to pursue a career in scholarly research. The undergraduate minor in Management is designed for those who wish to gain some insight into issues of modern management, as well as those who anticipate future graduate work in management. In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective. The Minor in Innovation and Entrepreneurship provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies) and intrapreneurs (innovating within existing companies).

\(^1\) Offered jointly with the Department of Molecular Biology and Biochemistry (MB&B) in the Francisco J. Ayala School of Biological Sciences and the Department of Biomedical Engineering in The Henry Samueli School of Engineering.

\(^2\) Offered jointly with the Donald Bren School of Information and Computer Sciences.

\(^3\) Offered jointly with The Henry Samueli School of Engineering.
Honors

Graduation with Honors. Honors at graduation, e.g., *cum laude, magna cum laude, summa cum laude*, are awarded to approximately the top 12 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at the University of California. The student’s cumulative record at the end of the final quarter is the basis for consideration for awarding Latin honors. Other important factors are considered visit at Honors Recognition.

Faculty

Dennis Aigner, Ph.D. University of California, Berkeley, *Professor Emeritus of Paul Merage School of Business*

Abby Alpert, Ph.D. University of Maryland, College Park, *Assistant Professor of Paul Merage School of Business*

Alpesh N. Amin, M.D. Northwestern University, *Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business* (hospital medicine, quality/safety, new technologies in healthcare)

Christopher Bauman, Ph.D. University of Illinois at Chicago, *Assistant Professor of Paul Merage School of Business*

David Blake, Ph.D. Rutgers, The State University of New Jersey, *Professor Emeritus of Paul Merage School of Business*

Philip Bromiley, Ph.D. Carnegie Mellon University, *Professor of Paul Merage School of Business*

Nai-Fu Chen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Paul Merage School of Business*

Vidyand Choudhary, Ph.D. Purdue University, *Associate Professor of Paul Merage School of Business*

Imran Currim, Ph.D. Stanford University, *UCI Chancellor's Professor of Paul Merage School of Business*

Sanjeev Dewan, Ph.D. University of Rochester, *Professor of Paul Merage School of Business*

Joseph DiMento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Planning, Policy, and Design* (planning, land use and environmental law, use of social science in policy making, legal control of corporate behavior)

Martha S. Feldman, Ph.D. Stanford University, *Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Planning, Policy, and Design; Paul Merage School of Business; Political Science; Sociology* (organization theory and behavior, stability and change in organizations, decision-making and information processing, public management, qualitative research methods)

Paul Feldstein, Ph.D. University of Chicago, *Professor Emeritus of Paul Merage School of Business; Economics*

Mary Gilly Graham, Ph.D. University of Houston, *Professor of Paul Merage School of Business*

John Graham, Ph.D. University of California, Berkeley, *Professor Emeritus of Paul Merage School of Business*

Luyi Gui, Ph.D. Georgia Institute of Technology, *Assistant Professor of Paul Merage School of Business*

Vijay Gurbaxani, Ph.D. University of Rochester, *Taco Bell Chair in Information Technology Management and Professor of Paul Merage School of Business; Informatics* (economics of information systems management, impact of information technology on organization and market structure)

David Hirshleifer, Ph.D. University of Chicago, *Paul Merage Chair in Business Growth and Professor of Paul Merage School of Business; Economics*

Siew Hong Toeh Hirshleifer, Ph.D. University of Chicago, *Professor of Paul Merage School of Business*

Joanna Ho, Ph.D. University of Texas at Austin, *Professor of Paul Merage School of Business*

Chong Huang, Ph.D. University of Pennsylvania, *Assistant Professor of Paul Merage School of Business*

Mireille Jacobson, Ph.D. Harvard University, *Associate Professor of Paul Merage School of Business; Economics*

Philippe Jorion, Ph.D. University of Chicago, *Professor of Paul Merage School of Business; Economics*

John Joseph, Ph.D. Northwestern University, *Assistant Professor of Paul Merage School of Business*

Lynn Robin Keller, Ph.D. University of California, Los Angeles, *Professor of Paul Merage School of Business*

Sreya Kolay, Ph.D. University of Rochester, *Assistant Professor of Paul Merage School of Business*

Sharon Koppman, Ph.D. University of Arizona, *Assistant Professor of Paul Merage School of Business; Sociology* (work and occupations, sociology of culture, creative industries)
Kenneth Kraemer, Ph.D. University of Southern California, Research Professor and Professor Emeritus of Paul Merage School of Business

Lorraine Lau, Ph.D. University of California, Los Angeles, Associate Professor of Paul Merage School of Business

Ben Lourie, Ph.D. University of California, Los Angeles, Assistant Professor of Paul Merage School of Business

Radhika Lunawat, Ph.D. University of Minnesota, Assistant Professor of Paul Merage School of Business; Economics

Newton Margulies, Ph.D. University of California, Los Angeles, Professor Emeritus of Paul Merage School of Business

Joseph McGuire, Ph.D. Columbia University, Professor Emeritus of Paul Merage School of Business

Peter Navarro, Ph.D. Harvard University, Professor of Paul Merage School of Business

David Neumark, Ph.D. Harvard University, UCI Chancellor's Professor of Economics; Paul Merage School of Business

Tingting Nian, Ph.D. New York University, Assistant Professor of Paul Merage School of Business

Gerardo Okhuysen, Ph.D. Stanford University, Professor of Paul Merage School of Business

Judith Olson, Ph.D. University of Michigan, Donald Bren Professor of Information & Computer Sciences and Professor of Informatics; Paul Merage School of Business; Planning, Policy, and Design (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Jone Pearce, Ph.D. Yale University, Professor of Paul Merage School of Business

Cornelia Pechmann, Ph.D. Vanderbilt University, Professor of Paul Merage School of Business

Morton Pincus, Ph.D. Washington University, Professor of Paul Merage School of Business

Andrew Policano, Ph.D. Brown University, Director of Center for Investment and Wealth Management and Dean's Leadership Circle Endowed Professorship and Professor of Paul Merage School of Business; Economics

Judy Rosener, Ph.D. Claremont Graduate University, Senior Lecturer with Security of Employment Emerita of Paul Merage School of Business

Claudia Schoonhoven, Ph.D. Stanford University, Professor Emerita of Paul Merage School of Business

Christopher Schwarz, Ph.D. University of Massachusetts, Associate Professor of Paul Merage School of Business

Carlton Scott, Ph.D. University of New South Wales, Professor of Paul Merage School of Business

Devin Shanthikumar, Ph.D. Stanford University, Assistant Professor of Paul Merage School of Business

Terrence Shevlin, Ph.D. Stanford University, Paul Merage Chair in Business Growth and Professor of Paul Merage School of Business

Kut So, Ph.D. Stanford University, Professor of Paul Merage School of Business

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business (sensory cues in the retail environment and the effects of self-prediction on behavior)

Zheng Sun, Ph.D. New York University, Associate Professor of Paul Merage School of Business

Eli Talmor, Ph.D. University of North Carolina at Chapel Hill, Professor Emeritus of Paul Merage School of Business

John Turner, Ph.D. Carnegie Mellon University, Assistant Professor of Paul Merage School of Business

Rajeev Tyagi, Ph.D. University of Pennsylvania, Walter B. Gerken Chair in Enterprise and Society and Professor of Paul Merage School of Business

Kerry Vandeell, Ph.D. Massachusetts Institute of Technology, Professor of Paul Merage School of Business; Planning, Policy, and Design; School of Law

Alladi Venkatesh, Ph.D. Syracuse University, Professor of Paul Merage School of Business; Informatics (social impacts of information technology, Internet and the New Economy, Smart Home technologies, children and multimedia)

Libby Weber, Ph.D. University of Southern California, Assistant Professor of Paul Merage School of Business

Patricia A. Wellmeyer, M.S. California State University, Fullerton, Lecturer of Paul Merage School of Business

Margarethe Wiersema, Ph.D. University of Michigan, Professor of Paul Merage School of Business

Mingdi Xin, Ph.D. New York University, Assistant Professor of Paul Merage School of Business
Merage School Undergraduate Programs

Overview
The Paul Merage School of Business (http://merage.uci.edu) offers the B.A. degree in Business Administration, the B.S. degree in Business Information Management (offered jointly with the Donald Bren School of Information and Computer Sciences), and undergraduate minors in Management, Accounting, and Innovation and Entrepreneurship. The undergraduate minor in Management is designed for those who wish to gain some insight into issues of modern management, as well as those who anticipate future graduate work in management. In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective. The Minor in Innovation and Entrepreneurship provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies) and intrapreneurs (innovating within existing companies).

Bachelor of Arts in Business Administration
The undergraduate Business Administration program at The Paul Merage School of Business educates students to understand and apply the theories and concepts of effective business and management and prepares students for a wide variety of careers and life experiences. Business Administration majors can pursue careers in the for-profit and not-for-profit sectors or can proceed on to graduate school in several disciplines including business, economics, and law. The program provides a broad learning experience in a multidisciplinary and global context and focuses on the development of essential managerial skills, especially critical thinking, quantitative and qualitative analysis, and effective communication skills.

The Business Administration major at The Paul Merage School of Business offers a traditional business curriculum similar to those at other top business schools in the country. The major is broad, drawing on the social sciences more generally to study organizations, interpersonal communication skills, individual and group behavior, leadership, strategy, financial and accounting issues, ethics, information technology, marketing, and a variety of other topics in the context of a rapidly changing global environment.

The faculty strongly encourages majors to create an educational program composed of courses within and outside the Merage School that provide substance and focus to their careers and enable them to pursue their own personal interests. While preparing students for careers in management, the Merage School, through academic advising, will help students fashion an undergraduate program that they can tailor to their own unique career objectives. Examples of programs of study that allow Business Administration majors to blend management education with specific industry areas include (but are not limited to) bioscience business, government service, international commerce, arts management, entrepreneurship in computer gaming, and other combinations. Through appropriate choice of courses, students can prepare to pursue a law degree, a master’s degree in a variety of areas including accounting, or a doctoral program in business or related disciplines.

Students are required to complete 10 business courses that provide a foundation in essential core business competencies, followed by a minimum of 10 business electives to include one emphasis. Students select a minimum of one of seven emphases in Accounting, Finance, Health Care Management, Information Systems, Marketing, Operations and Decision Technologies, or Organization and Management. This program of study enables students to develop areas of focus as they pursue the Business Administration major. Because much business is conducted on a global scale, students are required to either participate in the University’s Education Abroad Program or to take one of a number of designated courses that stresses the international dimension of a business area. Students interested in learning more about the full array of requirements for professional licensing in Accounting are encouraged to visit the California Board of Accountancy (http://www.dca.ca.gov/cba) and American Institute of CPAs (http://www.aicpa.org/BecomeACPA/CPAExam/Pages/CPAExam.aspx) websites.

While academic course content is crucial to an undergraduate business major, auxiliary noncurricular programs also are important to students’ academic experience. The Merage School incorporates a cocurricular element into the classroom experience. Drawing from Merage School and University resources, students are exposed to opportunities to enhance communication and presentations skills, attend formal speaker events, and engage in mentoring. The Merage faculty is committed to ensuring that undergraduate majors have ample opportunity to enhance their writing and presentation skills through class assignments and a business communication course.

Students are strongly encouraged to become involved with the Merage Undergraduate Student Association and with the many affiliated business clubs. These high-profile student groups promote interaction between students and the surrounding business community through their Corporate Speaker Series, social activities, and student/employer receptions. Students with an entrepreneurial interest are invited to participate in the annual Merage School Business Plan Competition offered by the Don Beall Center for Innovation and Entrepreneurship.

Work experience is an important way to learn about business and management. UCI’s Internship Program, sponsored by the Career Center, can assist students in finding opportunities to work in either voluntary or paid positions in business, nonprofit, or industrial settings. Students who plan to enter
business or apply to a graduate school of business or management in the future will find it necessary to supplement their academic work with a variety of practical experiences.

Another opportunity is UCI's Undergraduate Administrative Intern Program, which offers selected students the opportunity to assume one-year positions under the guidance of University administrators. Students can choose from a range of offices in which they will be asked to undertake special projects specifically related to the management and administration of UCI and higher education in general. These internships are supplemented by a two-quarter management seminar and by field trips to administrative conferences such as meetings of The Regents of the University of California.

Admission to the Major in Business Administration

In the event that the number of students who elect Business Administration as a major exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

Freshmen: Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions section of the Catalogue.

Transfer students: Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0) and who satisfactorily complete lower-division courses equivalent to UCI's calculus (MATH 2A-MATH 2B), economics (ECON 20A-ECON 20B or MGMT 4A-MGMT 4B), and statistics and accounting (MGMT 7, MGMT 30A, MGMT 30B) will be given preference for admission. MGMT 1 may be completed at UCI. Admission to the major will be competitive due to limited space availability.

Change of Major

Students who wish to declare the Business Administration major should contact The Paul Merage School of Business Undergraduate Programs Office (http://merage.uci.edu/undergrad), SB2 202, for information about change-of-major requirements, procedures, and policies. Students should carefully review criteria for each major they are considering on the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu). Review of applications and selection to the major is governed by the Undergraduate Programs Committee. Admission to the major is very competitive due to limited space availability. Completion of the prerequisite courses does not guarantee admission into the major.

Requirements for the B.A. Degree in Business Administration

All students must meet the University Requirements.

Business Administration Major Requirements

A. Lower-Division:

<table>
<thead>
<tr>
<th>Course</th>

<tbody>
<tr>
<td>MGMT 141</td>
<td>Investments</td>
</tr>
</tbody>
</table>
and select two of the following:

- MGMT 144: Multinational Finance
- MGMT 147: Applied Financial Valuation
- MGMT 149: Derivatives

Emphasis in Health Care Management:
Select three of the following:

- MGMT 160: Introduction to Business and Government
- MGMT 165: U.S. Healthcare Systems
- MGMT 166: Business of Medicine
- MGMT 167: Business of Science

Emphasis in Information Systems:
Select three of the following:

- MGMT 171: Social Media
- MGMT 173: Business Intelligence for Analytical Decisions
- MGMT 174: Database Management and Applications
- MGMT 178: Management of Information Technology

Emphasis in Marketing:
Select three of the following:

- MGMT 150: Consumer Behavior
- MGMT 151: Marketing Research
- MGMT 152: New Product Development
- MGMT 153: Integrated Marketing Communication
- MGMT 154: Global Marketing
- MGMT 155: Brand Management
- MGMT 157: Marketing on the Internet
- MGMT 158: Micromarketing
- MGMT 159: Design Management

Emphasis in Operations and Decision Technologies:
Select three of the following:

- MGMT 189: Operations Management

and select two of the following:

- MGMT 180: Business Forecasting
- MGMT 182: Supply Chain Management
- MGMT 196: Decision Analysis

Emphasis in Organization and Management:
Select three of the following:

- MGMT 122: Communication in Organizations
- MGMT 125: Negotiations
- MGMT 126: Foundations of Teams
- MGMT 128: International Management
- MGMT 129: Leadership

D. International Business Requirement: Fulfillment of the International Business requirement by:

1. Selecting one of the following (which may also be used for specified category C requirements above): ¹

- MGMT 119: Global Strategies
- MGMT 128: International Management
- MGMT 144: Multinational Finance
- MGMT 154: Global Marketing

2. or, participating in select UC Education Abroad Program options, with prior approval of the Associate Dean.

¹ By exception, students may petition the Associate Dean to accept an upper-division elective that has business content equivalent to a stated Merage elective.

NOTE: Students majoring in Business Administration may not minor in either Management or Accounting or double major in Business Information Management. Students may pursue more than one Merage School emphasis via the Business Electives in the category C requirements above. Students are strongly advised to work closely with faculty, staff, and career advisors to tailor a course of study optimal for their educational and career plans. Pairing of particular emphases could be beneficial; examples include Accounting and Finance, Marketing and Information Systems, Operations and
Decision Technologies and Information Systems, or Health Care Management and Organization and Management. Students are permitted to pursue additional courses within an area of emphasis to exceed the required three.

**Bachelor of Science in Business Information Management**

As the business environment becomes increasingly global and information-centric, the need has increased for graduates who understand and can use technology that gathers and provides information, who are able to distill and recognize patterns in that information, and who can apply those analyses to achieve business objectives.

The undergraduate Business Information Management major administered by the Donald Bren School of Information and Computer Sciences is a collaborative, interdisciplinary degree program between the Bren School and The Paul Merage School of Business. The program seeks to educate students to understand and then apply the theories and concepts of a broad, integrated curriculum covering computing, informatics, business fundamentals, and analytical decision-making. The major prepares students for a wide variety of careers and life experiences. Business Information Management majors can pursue careers in the for-profit and not-for-profit sectors or can proceed to graduate school in several disciplines, including information systems, computing, economics, business, and law.

The curriculum is presented across three general academic areas: Computing (computer science, informatics, and software); Business Foundations (accounting, finance, marketing, strategy, and operations); and Analytical Methods (mathematics, statistics, economics, management science, and decision analysis). The fundamentals of information and computer science, including the rudiments of software design and construction with an emphasis on data management, provide the foundation for understanding, describing, and evaluating the technology through which most business information is gathered and presented. The business fundamentals, covering all the functional areas in the Merage School, provide a background and context in which information and its analysis will be applied.

For complete information about the major, see the Interdisciplinary Studies section of the Catalogue.

**Undergraduate Minor in Accounting**

The Paul Merage School of Business faculty offers an undergraduate minor in Accounting consisting of seven upper-division courses. In addition, two lower-division introductory accounting courses, one lower-division microeconomics course, and one lower-division single variable calculus course are prerequisites to the minor program.

In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective.

Students are eligible to apply for the minor in Accounting if they have upper-division standing and have completed MGMT 30A and MGMT 30B with a grade no lower than B (3.0) and all other prerequisite courses with a grade no lower than C (2.0). Completion of the prerequisite courses does not guarantee admission to the minor in Accounting. Admission is on a competitive basis, and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (http://merage.uci.edu/undergrad).

**Prerequisite Courses**

The following are prerequisites for enrolling in the upper-division undergraduate minor courses:

- **ECON 20A** Basic Economics I
- **MATH 2A** Single-Variable Calculus
- **MGMT 30A** Principles of Accounting I
- **MGMT 30B** Principles of Accounting II

Transfer students should check with their college counselor for established equivalencies for these prerequisite courses. Students not taking MGMT 30A and MGMT 30B at UCI during regular session or summer session must complete MGMT 131A with a minimum grade of B.

**NOTE:** Individual courses that students may select within the minor may require additional prerequisites.

**Requirements for the Undergraduate Minor in Accounting**

Completion of seven courses:

A. Three core accounting courses:

- **MGMT 131A** Intermediate Accounting I
- **MGMT 131B** Intermediate Accounting II
- **MGMT 132A** Individual Taxation

B. Select two accounting elective courses from the following:

- **MGMT 133** Corporate and Partnership Taxation
MGMT 136  Accounting Information Systems & Spreadsheets  
MGMT 137  Advanced Accounting  
MGMT 138  Auditing  
MGMT 194  Financial Statement Analysis  
MGMT 195  Strategic Cost Management and Management Control  

C. Select two additional courses from the following: an upper-division accounting elective course list above  

MGMT 1  Introduction to Business and Management  
MGMT 101  Management Science  
MGMT 102  Managing Organizational Behavior  
MGMT 105  Introduction to Marketing  
MGMT 107  Introduction to Management Information Systems  
MGMT 109  Introduction to Managerial Finance  
MGMT 113–129, 141–184  
MGMT 189  Operations Management  
MGMT 192  Business Law  
MGMT 193  The Ethical Environment of Business  
MGMT 196  Decision Analysis  
MGMT 197  Probability Models in Management  
MGMT 190  Special Topics in Management (provided topics have not been covered in other accounting courses)  

With Merage School faculty approval, a student may substitute a maximum of one minor course.  

NOTE: Students may not receive both the minor in Accounting and the minor in Management.  

Undergraduate Minor in Management  

The Paul Merage School of Business faculty offers an undergraduate minor in Management which consists of seven courses. In addition, prerequisites include one lower-division microeconomics course and one course or one sequence selected from the statistics courses outlined below. MGMT 1 serves as a prerequisite and also counts as one of the seven courses required for the minor.  

In establishing the undergraduate minor, the faculty anticipated three types of students to be drawn to courses in administration: (1) students who wish to learn about the management of organizations as a way of preparing for a career in business, (2) students preparing for careers in other fields that require some knowledge of management, and (3) students who expect to go on to graduate work in management who wish early guidance and undergraduate work appropriate to this career objective.  

Students are eligible to apply for the minor in Management if they have completed all prerequisite courses (including MGMT 1) with a grade no lower than C (2.0) and have upper-division standing. Completion of the prerequisite courses does not guarantee admission to the minor in Management. Admission is on a competitive basis, and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (http://merage.uci.edu/undergrad).  

Prerequisite Courses  

The following are prerequisites for enrolling in the upper-division undergraduate minor courses:  

MGMT 1  Introduction to Business and Management  
ECON 20A  Basic Economics I  

and one course or one sequence selected from:  

ANTHRO 10A-10B-10C  Probability and Statistics and Probability and Statistics  
ENGRCEE 11  Methods II: Probability and Statistics  
MGMT 7  Statistics for Business Decision Making  
STATS 7  Basic Statistics  
STATS 8  Introduction to Biological Statistics
Transfer students should check with their college counselor for established equivalencies for these prerequisite courses.

NOTE: Individual courses that students may select within the minor may require additional prerequisites, including MATH 2A.

**Requirements for the Undergraduate Minor in Management**

Completion of seven courses:

A. One lower-division core course:

MGMT 1  
Introduction to Business and Management

B. Select four core courses from the following:

MGMT 30A  
Principles of Accounting I

MGMT 101  
Management Science

MGMT 102  
Managing Organizational Behavior

MGMT 105  
Introduction to Marketing

MGMT 107  
Introduction to Management Information Systems

MGMT 109  
Introduction to Managerial Finance

C. Select two of the following:

- a course from the core course list above
- MGMT 113–129, 141–184
- MGMT 189  
Operations Management
- MGMT 192  
Business Law
- MGMT 193  
The Ethical Environment of Business
- MGMT 196  
Decision Analysis
- MGMT 197  
Probability Models in Management
- MGMT 190  
Special Topics in Management (provided specific topics have not been covered in other courses)

With Merage School faculty approval, a student may substitute a maximum of one course. Students participating in the UC Education Abroad Program may substitute a maximum of two courses, with Merage School faculty approval.

NOTE: Students may not receive both the minor in Management and the minor in Accounting.

**Undergraduate Minor in Innovation and Entrepreneurship**

The Minor in Innovation and Entrepreneurship provides extensive academic and practical training for students to embark on careers as entrepreneurs (innovating to form new companies) and intrapreneurs (innovating within existing companies).

The program provides students with knowledge and practical experience on certain core topics on the process of innovation and entrepreneurship, i.e., planning a new venture, lean startup methodology, venture capital, private equity, etc. Students are strongly encouraged to apply the associated business skills in the Business Plan Competition and in internships.

Students will be eligible to apply for the minor in Innovation and Entrepreneurship if they have completed MGMT 1 with a grade no lower than “C” (2.0) and will have junior status upon entry. Elective offerings in the minor may have additional prerequisites. Completion of the prerequisite course does not guarantee admission to the minor in Innovation and Entrepreneurship. Admission is on a competitive basis and students must submit an application,
transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, SB2 202; or visit the Undergraduate Programs website (http://merage.uci.edu/undergrad).

Requirements for the Minor in Innovation and Entrepreneurship

A. Complete the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 1</td>
<td>Introduction to Business and Management</td>
</tr>
<tr>
<td>MGMT 113</td>
<td>New Ventures: A Course in Entrepreneurship</td>
</tr>
<tr>
<td>MGMT 115</td>
<td>Lean Startup</td>
</tr>
</tbody>
</table>

B. Select at least four electives from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT 30A</td>
<td>Principles of Accounting I</td>
</tr>
<tr>
<td>MGMT 102</td>

<td>Marketing on the Internet</td>
</tr>
<tr>
<td>MGMT 192</td>
<td>Business Law</td>
</tr>
</tbody>
</table>

With Merage School faculty approval, a student may substitute a maximum of one minor course.

NOTE: Students may not receive both the minor in Management and the minor in Innovation and Entrepreneurship. Students in the B.A. in Business Administration and B.S. in Information Management Programs are not eligible to minor in Innovation and Entrepreneurship.

Courses

MGMT 1. Introduction to Business and Management. 4 Units.
Rigorous overview of major business functions and management topics. Addresses the global and fast-changing environment in which modern business enterprises operate as well as the challenges posed by concerns about sustainable growth, ethics, and social responsibility. Course may be offered online.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 4A. Basic Economics for Managers I. 4 Units.
Microeconomic principles for managers. Useful applications of basic economic principles to situations in business as well as in various professions. Course may be offered online. Materials fee.

Overlaps with ECON 23, ECON 20A.

Restriction: Business Administration majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4A may not be used as a substitute for ECON 20A.

(III)

MGMT 4B. Basic Economics for Managers II. 4 Units.
Macroeconomic principles for managers. Useful applications of basic economic principles to situations in business as well as in various professions. Course may be offered online.

Prerequisite: MGMT 4A or ECON 20A.

Overlaps with ECON 20B.

Restriction: Business Administration majors have first consideration for enrollment. For School of Social Sciences majors, MGMT 4B may not be used as a substitute for ECON 20B.

(III)
MGMT 5. Management of Contemporary Organizations. 4 Units.
Equips students with working knowledge of several major subject areas within the context of business and society studies. Topics include: role of management in organizations, corporate social responsibility and responsiveness, ethics and values in business, government regulation, and international business.

MGMT 7. Statistics for Business Decision Making. 4 Units.
Basics of data analysis and the fundamental notion of statistical inference emphasizing applications to administrative and management decision problems. Classical estimation and hypotheses testing, regression, correlation, analysis of variance, nonparametric methods, and statistical probability. Course may be offered online.

Overlap with STATS 7, STATS 8, ECON 15A, ECON 15B.
Restriction: Business Administration majors have first consideration for enrollment. MGMT 7 may not be taken for credit if taken after ECON 15A-B. MGMT 7 may not be used to substitute for ECON 15A-B.

(Va)

MGMT 10. Business Management in the World Today. 4 Units.
Accounting scandals, e-commerce, and globalization are only a few examples that show the profound impact of business practices on individuals and on society at large. Provides students with a broad overview of business functions and management practices.

MGMT 30A. Principles of Accounting I. 4 Units.
First in a two course introductory series. Emphasis on financial accounting concepts and practices essential to the administration of business enterprises; including recording and valuation of financial transactions, and preparation, analysis, and interpretation of financial statements. Course may be offered online.

Overlap with ECON 25.
Restriction: Business Administration majors have first consideration for enrollment.

MGMT 30B. Principles of Accounting II. 4 Units.
Second in a two course introductory series. Emphasis on the introduction of managerial accounting concepts and techniques as tools to aid management in carrying out the primary internal functions of planning, control, and decision-making. Course may be offered online.

Prerequisite: MGMT 30A.

Overlap with ECON 26A.
Restriction: Business Administration majors have first consideration for enrollment.

MGMT 90. Special Topics in Management. 1 Unit.
Studies in selected areas of management. Topics addressed vary each quarter. Course may be offered online.

Repeatability: Unlimited as topics vary.

MGMT 101. Management Science. 4 Units.
Concepts and methods of management science, which applies mathematical modeling and analysis to management problems. Topics include linear and integer programming, project scheduling, inventory management, queuing analysis, decision analysis, and simulation. Course may be offered online.

Prerequisite: MGMT 7.

Restriction: Business Administration majors have first consideration for enrollment. Upper-division students only.

MGMT 102. Managing Organizational Behavior. 4 Units.
Basic theory and concepts which provide the manager with tools for understanding behavior of people in organizations. Areas such as individual, group, and organizational determinants of attitudes, turnover, and job performance. Course may be offered online.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 105. Introduction to Marketing. 4 Units.
Basic marketing concepts; discussion of the role marketing plays in modern society. Topics include industrial and consumer marketing, promotion, distribution, and pricing theory. Course may be offered online.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 107. Introduction to Management Information Systems. 4 Units.
Information Technology (IT) continues to drive rapid productivity growth and structural changes in the economy. Topics include what IT is, and how companies can use IT to improve business processes, enhance customer services, and gain competitive advantage over rivals. Course may be offered online.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 109. Introduction to Managerial Finance. 4 Units.
Basics of financial administration. Capital budgeting, cost of capital, cash budgeting, working capital management, and long-term sources of funds. Provides a basic understanding of issues and techniques involved in financial decision making. Course may be offered online.

Prerequisite: MATH 2B and MGMT 30A.

Overlaps with ECON 134A.

Restriction: Upper-division students only. Business Administration majors have first consideration for enrollment.

MGMT 110. Strategic Management. 4 Units.
Addresses management of the entire business. Role of the general manager in organizations, industry analysis, core competencies, growth through vertical integration, innovation, acquisition and diversification, globalization, strategy implementation, and the ethical and moral responsibility of a manager.

Prerequisite: MGMT 102 and MGMT 105 and MGMT 109.

Overlaps with ECON 147B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 111. China and the Global Order. 4 Units.
Introduces students to China’s economic and military relations with the world, assessment of likelihood for conflict, and how to strategically manage business risk from regional conflict. Includes an original documentary series and engaging discussion. Course may be offered online.

(VIII)

MGMT 113. New Ventures: A Course in Entrepreneurship. 4 Units.
Introduction to the survival and growth of new ventures. Methods include analysis of live cases, guest speakers, discussion, and field projects with contemporary new ventures to learn about new venture management and surviving the liabilities of newness.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 115. Lean Startup. 4 Units.
Based on the well-known Lean Launchpad course currently used by a growing segment of the startup world. Students work in teams to ideate, develop a Business Model Canvas, and gather customer/market feedback.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 119. Global Strategies. 4 Units.
Examines the phenomena of technology and globalization and the impact on global business strategy. Macro approach considers implications for development of flexible yet focused business strategy and creative and agile execution of policies. Class discussions are stimulated by case analyses.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 122. Communication in Organizations. 4 Units.
Addressing communication at three levels - interpersonal, group or meeting, and organizational. Focuses on dealing with conflict, interpersonal problems, being effective in meetings, and getting your message heard. Experiential course.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 123. Critical Thinking and Creativity in Organizational Problem Solving. 4 Units.
Learn about your own thinking process; develop the ability to think both logically and creatively and to understand how emotions affect your thinking. Class sessions involve discussion and experiential exercises. Business problems and issues are used for discussion and exercises.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 124. Human Resources Management. 4 Units.
Theory and practice of managing human resources. Students will identify and analyze HR dilemmas, apply labor law, and design systems and processes to develop the human resources needed to help organizations achieve their goals.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 125. Negotiations. 4 Units.
The objective is to assist students in developing an understanding of different theoretical perspectives and develop their skills in negotiating. Exploration of feelings and beliefs about negotiation, negotiation skills, and putting theory into action by practicing new negotiation skills.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 126. Foundations of Teams. 4 Units.
Social and psychological processes that detract from effective teamwork and collaboration. Tools to understand how to be a better team member are introduced. Provides the foundation for students to become effective team leaders and to manage difficult team situations.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 128. International Management. 4 Units.
Impact of different cultures and political/economic systems on assumptions, expectations, and organizational practices relevant to conducting business in different national settings. Understanding of the challenges of cross-national management and resources utilized to work and conduct business outside the United States.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 129. Leadership. 4 Units.
Case analyses, free-form discussion, and written assignments designed to develop critical thinking skills, as well as knowledge of approaches to differing leadership challenges. Experiential exercises encourage students to develop their ability to innovate, foster collaboration, manage conflict, and value diversity.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 131A. Intermediate Accounting I. 4 Units.
First course in a series of two intermediate-level courses in financial accounting theory and practice. Concepts include the measurement, valuation and reporting of current and long-term assets, current liabilities, and revenue recognition issues.

Prerequisite: MGMT 30A and MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 131B. Intermediate Accounting II. 4 Units.

Prerequisite: MGMT 131A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 132A. Individual Taxation. 4 Units.
Fundamentals of federal income taxation pertaining to individuals. Topics include income, deductions, credits, property transactions, and the impact of taxes on business and investment decisions.

Prerequisite: MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 133. Corporate and Partnership Taxation. 4 Units.
Fundamentals of federal income taxation pertaining to partnerships and corporations, including subchapter S corporations. Emphasis on the tax issues associated with formation, operation, and termination of these entities.

Prerequisite: MGMT 132A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 136. Accounting Information Systems & Spreadsheets. 4 Units.
Fundamentals of accounting information systems including internal controls and transaction processing cycles. Development of efficient spreadsheets as applied to financial and managerial accounting concepts.

Prerequisite: MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 137. Advanced Accounting. 4 Units.
A course covering advanced concepts in accounting theory and practice. Topics include business combinations, consolidated financial statements, foreign exchange transactions, international and governmental/nonprofit accounting standards.

Prerequisite: MGMT 131B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 138. Auditing. 4 Units.
An introduction to auditing practice with emphasis on the verification of financial statements and related information. Topics include professional ethics, assessment of audit risk, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting.

Prerequisite: MGMT 131B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 141. Investments. 4 Units.
Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT 109.

Overlaps with ECON 132A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 144. Multinational Finance. 4 Units.
Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Introduction to investments and financing decisions in international capital markets.

Prerequisite: MGMT 109 and ECON 20A and ECON 20B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 146A. Introduction to the Real Estate Process. 4 Units.
Introductory survey course providing a working knowledge of the real estate market, both residential and commercial. Topics include real estate economics, appraisal, feasibility, investment, tax considerations, financing, and development. Lectures and cases, with supplemental presentations by real estate professionals.

Restriction: Upper-division students only. Business Administration majors have first consideration for enrollment.

MGMT 147. Applied Financial Valuation. 4 Units.
Case study course designed to confront students with real-world financial valuation problems. Situations are chosen to enhance students’ understanding of the application of finance theory. The principal focus is on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMT 109 and MGMT 141.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 149. Derivatives. 4 Units.
Introduction to financial derivatives. Covers forward contracts, futures, swaps, and options. Applications of these instruments, including pricing and risk management, are emphasized.

Prerequisite: MGMT 109.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 150. Consumer Behavior. 4 Units.
Application of the behavioral sciences to understanding buyer behavior. Topics include perception, memory, affect, learning, persuasion, motivation, behavioral decision theory, social and culture influences, and managerial implications.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 151. Marketing Research. 4 Units.
Research to aid managerial decisions for products and services; problem formulation, research design, data collection, sampling, statistical analyses, managerial recommendations, and implementation in several real-world settings.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 152. New Product Development. 4 Units.
Identifying markets, developing product ideas, measuring consumer preferences, positioning and designing products, and forecasting their sales. Hands-on experience with software to conduct various analyses useful in new product development, such as cluster analysis, factor analysis, and conjoint analysis.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 153. Integrated Marketing Communication. 4 Units.
Management of the communication aspect of marketing strategy. Emphasis on emotional experiences, persuasive appeals, sales promotion, public relations, and direct marketing. Topics include setting communications objectives and budgets, media selection, creative strategy, and sales promotion techniques.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 154. Global Marketing. 4 Units.
Students are exposed to the challenges and opportunities facing marketers in the international marketplace. Special attention is given to the management of cultural differences in product development, distribution systems, pricing, and promotion.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 155. Brand Management. 4 Units.
Introduction to issues in planning, implementing, and evaluating brand strategies, relevant theories, models, and tools for the making of brand decisions; application of these principles.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 156. Pricing Strategy. 4 Units.
Provides a framework for designing and analyzing pricing strategies. Emphasizes role of pricing in the marketing-mix decisions and broader marketing strategy of a firm. Incorporates study of various economic, psychological, competitive, and organizational foundations that enter into effective pricing decisions.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 157. Marketing on the Internet. 4 Units.
Recent developments in interactive technologies indicate that "Marketing on the Internet" is becoming a serious business activity, with exponential growth. How to do marketing on the Internet and identify the key issues pertaining to the marketing process.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 158. Micromarketing. 4 Units.
Develop marketing plans for specific retail locations and neighborhoods based on past purchases and demographics. Retail site selection, product category management, promotion management, shelf space allocation, targeted advertising. Hands-on experience with Retail Sales Analysis and Geographic Information Systems software.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 159. Design Management. 4 Units.
Design of products and services, particularly in consumer- and technology-oriented industries where design is viewed as a strategic resource. User-oriented design, design as a strategic tool, the role of design aesthetics, and the management of design.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 160. Introduction to Business and Government. 4 Units.
Introduces undergraduate students to the study of public administration. Designed for those expecting to take further courses in the field or considering a public service career.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 165. U.S. Healthcare Systems. 4 Units.
Providers, suppliers, payers, consumers, and the unique market dynamics among these players. Structure, organization, and financing of health care. The health care industry's relationship to the overall economy will be explored.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 166. Business of Medicine. 4 Units.
In order to improve the quality and efficiency of health care delivery one must understand the design and management of health care operations. Opportunities for innovation and changes needed to design a simple, accessible, fair, and effective health care system.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 167. Business of Science. 4 Units.
Business acumen and strategic planning are determining success. Billions spent on advertising, and the lack of effectiveness of drugs are generally ignored. Considering this is a matter of life and death for many, should there be a “Business” of Science.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 168. Economics of Strategy. 4 Units.
Applies key concepts of game theory to the analysis of the strategic behavior of profit-maximizing firms. Simultaneous move games, sequential games, credibility and commitment, repeated games, pure and mixed strategies, signaling, and screening. Lecture and problem sets. Group projects.

Prerequisite: ECON 20A and ECON 20B.

Overlaps with ECON 147B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 169. Applied Econometrics for Business. 4 Units.
Bridge between an introductory statistics course and a course in econometrics. Oriented toward the ways in which economists use data to motivate and test economic theories. How to locate economics data, analyze, and appropriately interpret these data.

Prerequisite: ECON 20A and ECON 20B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 170. Technologies for Business. 4 Units.
Introductory course that include hands-on exposure to powerful, high-level tools for using computers in business situations more effectively. Next-generation graphical user interfaces, Internet applications, client/server technology, information security, and wireless.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 171. Social Media. 4 Units.
Covers theoretical aspects and business applications of social media tools including blogs, wikis, social networking platforms, immersive environments, and other social computing technologies. Also covers business value of social-media-enabled processes.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 173. Business Intelligence for Analytical Decisions. 4 Units.
BI from both managerial and technical perspectives. Learn to apply a variety of data mining techniques to learn business intelligence embedded in data, and apply that intelligence to run your business more efficiently. These techniques are useful in different areas.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 174. Database Management and Applications. 4 Units.
Query, manipulate, and understand data and learn about leading edge applications for databases. Database fundamentals including entity relationship design, creating database tables, normalization, and data querying. Contemporary applications of database using case studies. Applications include data warehousing, data mining.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 175. Information Technology (IT) and Strategy. 4 Units.
Strategic and competitive uses of IT and the Internet. Globalization and firm competition; alignment of IT with business strategy; business value of IT; business transformations with IT; implications of offshoring and outsourcing; strategy and IT in the Internet era.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 178. Management of Information Technology. 4 Units.
Strategic use and impact of information technology (IT) in organizations. Covers what IT is, and how it works, business value of IT, and IT strategies that organizations can employ to create value.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 180. Business Forecasting. 4 Units.
Forecasts are critical inputs into the wide range of business decision making. Users include accountants, financial experts, human resource managers, production managers, and marketing people. Methodologies used to support business decision making. Computer-oriented approach.

Prerequisite: MGMT 101.

Overlaps with ECON 125.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 182. Supply Chain Management. 4 Units.
Flows of materials and information among all of the firms that contribute to a product or service. Forecasting, demand management, logistical networks, inventory management, supplier contracting, sourcing, information technology, flexibility, globalization, and performance management.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 184. Optimization in Management. 4 Units.
Firms attempt to maximize profit or minimize cost. Linear, integer, and nonlinear programming models in functional areas of business such as finance, marketing, and operations. Solutions via computer and interpretation of output in a managerially significant way.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 189. Operations Management. 4 Units.
Managing the productive resources, from which raw materials as inputs are being transformed into useful outputs of final products and services. Explanation of issues pertaining to both manufacturing and services-oriented systems.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 190. Special Topics in Management.
Studies in selected areas of management. Topics addressed vary each quarter. Course may be offered online.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 191W. Business Communication. 4 Units.
Provides students with a solid foundation in business communication. Emphasis is placed on improving students' written and oral communication skills to help them succeed in (1) upper division Business Administration courses, (2) graduate school, and (3) work and career activities.

Prerequisite: Satisfactory completion of the lower-division Writing requirement.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 192. Business Law. 4 Units.
A study of the legal environment of business. Topics include contracts, agency, partnerships, corporations, and other basic principles of law as they relate to business transactions.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 193. The Ethical Environment of Business. 4 Units.
The political, social, and ethical environment of business. Topics include the historical development of American business, competitiveness problems, corporate social responsibility, corporate governance, and government regulation of business.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 194. Financial Statement Analysis. 4 Units.
Study of financial statements and their related footnotes; tools and procedures common to financial statement analysis; relationships among business transactions, environmental forces (political, economic, social), and reported financial statement information; how financial statement information can help solve certain business problems.

Prerequisite: MGMT 30A and MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 195. Strategic Cost Management and Management Control. 4 Units.
Study of cost management to strengthen an organization's strategic position; preparation and use of relevant information for management decision making; management control systems design and performance evaluation.

Prerequisite: MGMT 30A and MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.
MGMT 196. Decision Analysis. 4 Units.
Making good decisions fast is important in a world where information is ubiquitous and technologies change at incredible paces. Conceptual framework and information technology tools to approach situations with clarity and confidence and improve both professional and personal decision-making skills.
Prerequisite: MGMT 101.
Restriction: Business Administration majors have first consideration for enrollment.

MGMT 197. Probability Models in Management. 4 Units.
Probability models that characterize random phenomena in real-world applications. Applications of these probability models to business disciplines including operations management and finance. Discrete-time Markov chains, Poison processes, birth and death processes, queuing models, and random walk.
Prerequisite: MGMT 101.
Restriction: Business Administration majors have first consideration for enrollment.

MGMT 198A. Administrative Internship. 4 Units.
Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.

MGMT 198B. Administrative Internship. 4 Units.
Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.

MGMT 198C. Administrative Internship. 4 Units.
Selected undergraduates serve as managers within administrative units on campus with a three-quarter course which complements the intern experience. Topics include management ethics, study of non- and for-profit institutions, career management, and the changing nature of the workforce.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.

MGMT 199. Independent Study. 1-4 Units.
Individual study under the direction of a selected faculty member.
Repeatability: May be repeated for credit unlimited times.

Educational Objectives
The Paul Merage School of Business offers a generalist M.B.A. degree and a learning experience that prepares graduates for a lifetime of professional and personal growth with increasingly important enterprise-wide responsibilities. The rigorous curriculum, combined with extensive professional and
The School offers the Ph.D. in Management to students with backgrounds in a variety of disciplines. While a master’s degree is preferred, students may be admitted to the doctoral program directly from the baccalaureate degree. There are many appropriate undergraduate majors, including (but not limited to) psychology, political science, business or public administration, mathematics, computer sciences, economics, sociology, and so forth. Students with academic strengths in disciplines not usually considered as precursors for management (e.g., natural sciences, humanities, and the arts) are encouraged to apply. The Ph.D. program is designed to prepare students for academic careers in a number of the fields of management, e.g., organization and management, strategy, operations and decision technologies, management information systems, finance, accounting, and marketing. Requirements of the Ph.D. program include a broad knowledge of core management disciplines. In addition, the Ph.D. student must qualify as a skilled researcher and must complete a dissertation demonstrating these skills.

The Ph.D. program is divided into two phases: qualification and dissertation. In the qualification phase the student prepares for dissertation research in an area of specialization. This phase is completed when an oral qualifying examination is passed and the candidacy committee recommends advancement to candidacy for the Ph.D. The normative time for advancement to candidacy is three years. The dissertation phase involves a significant original research project which demonstrates the Ph.D. student’s creativity and ability to launch and sustain a career of research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is six years.

Master's Degree Programs

The Paul Merage School of Business offers a variety of programs leading to the M.B.A. (Master of Business Administration) degree. These include a two-year, Full-Time M.B.A. program and three part-time M.B.A. programs including: a 21-month Executive M.B.A. program, a 21-month Health Care Executive M.B.A. program, and a 27-33 month Fully Employed M.B.A. program. Additionally, a four-year concurrent J.D./M.B.A. program is offered in conjunction with the School of Law and a five-year M.D./M.B.A. program is offered in conjunction with the School of Medicine.

The MPAc (Master of Professional Accountancy) program is offered by the Merage School. A full description of the program is listed below.

The M.S. in Engineering Management is offered jointly with The Henry Samueli School of Engineering.

The M.S. in Biotechnology Management is offered jointly with the Department of Molecular Biology and Biochemistry (MB&B) in the Francisco J. Ayala School of Biological Sciences and the Department of Biomedical Engineering in The Henry Samueli School of Engineering.

Full-Time M.B.A. Program (http://merage.uci.edu/FulltimeMBA)

The Paul Merage School of Business admits students to the two-year, Full-Time M.B.A. program in the fall quarter. Students from a variety of undergraduate disciplines, including liberal arts, social sciences, physical or biological sciences, computer science, and engineering, are encouraged to apply. The final deadline for completion of all phases of the application procedure is generally around April 1. However, since admissions are received on a rolling basis, applicants are encouraged to check with the M.B.A. Admissions Office regarding application submission. In addition to the general University rules governing admission to graduate study, the School normally requires the completion of the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). There are no specific prerequisite requirements for the Full-Time M.B.A. program. However, the Admissions Committee does look for evidence of quantitative proficiency in all applicants.

The evaluation of an applicant’s file for admission consists of an integrated assessment of all materials submitted including test scores, transcripts of previous academic work, work experience, essays, and letters of recommendation. The M.B.A. program at The Paul Merage School of Business is distinctive for its focus on providing students the capabilities and skills to succeed in the technology-rich Innovation Economy. Students develop a sophisticated understanding of the new requirements for success in the School's curriculum that emphasizes the critical drivers of the Innovation Economy: Strategic Innovation, Information Technology, Analytical Decision Making, and Collaborative Execution.

This understanding is advanced through experiential learning course work in which teams of students work on challenging assignments for leading companies. Another distinctive feature of the program is the “Edge” capstone course on the future of business where students explore specific industries and companies and discover what actions must be taken today to reap the benefit from long-term trends in technologies, geopolitics, demographics, and macroeconomics.

The Full-Time M.B.A. program requires a minimum of 92 units with a minimum grade point average of 3.0 in the core curriculum and overall. The curriculum consists of courses divided into two groups designed to achieve specific educational objectives. Ten required Common Core Courses (40 units) and 52 units of elective courses which students select to emphasize career goals and educational interests. A thesis is not required.

International Requirement. Students must fulfill the requirement in one of the following ways: completion of a Paul Merage School of Business international elective in a functional area; participation in a Paul Merage School of Business international exchange program; or completion of an upper-division or graduate international course offered by another UC school, with the approval of The Paul Merage School of Business Associate Dean.
Electives. In addition to the core courses, 52 more units of elective courses are required. The major emphasis in the elective courses is to develop additional depth in a discipline or interdisciplinary area or specialized competence in the use of a particular set of technical tools and methods. Students select their electives in light of their educational and career goals and interests.

J.D./M.B.A. Degree Program [http://merage.uci.edu/FullTimeMBA/Content/Dual-Degree-Programs/21]

Highly qualified students interested in combining the study of law with professional qualifications in business are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students approved for this concurrent degree program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with an M.B.A. degree from The Paul Merage School of Business. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a business degree in less time than would be required to acquire both degrees separately. The normative time for completion of the J.D./M.B.A. program is four years.

UC Irvine’s PLGS program is well suited to students interested in professional or academic careers focused on the interdisciplinary or multidisciplinary study of law and legal institutions, policy analysis, and/or applied research in law-related fields (for example, taxation, corporate reporting and governance, regulation and compliance, discrimination, securities, property, real estate, and intellectual property).

Applicants must submit separate applications for admission to the School of Law and to the Merage School. Once admitted for study into both components of the program, concurrent degree students will work with the PLGS director and the director of the Full-Time M.B.A. program to develop a program of study that will permit efficient pursuit of both degrees. Concurrent degree students’ law enrollments will include a required 1-unit “Graduate Legal Studies” colloquium and a 3-unit “Interdisciplinary Perspectives on Law” course. Concurrent degree students will be eligible to apply for financial support through the Merege School while pursuing their M.B.A. and through the School of Law while pursuing law studies.

Program Structure. Students in the program complete a four-year combined curriculum leading to a J.D. degree from the UCI School of Law and an M.B.A. degree from the The Paul Merage School of Business.

Program Overview. The School of Law requires students to complete 86 law semester units of study for the J.D., 68 of which must be classroom units of law instruction. The remaining 18 law units can be completed outside the School of Law, at the student’s discretion, and with approval of the School’s Dean of Students. Ten of these 18 law units of non-law instruction can be obtained in courses undertaken in the concurrent degree department. The remaining eight law units are typically spent in non-classroom clinical practice.

The Full-Time M.B.A. program operates on a quarter system and J.D./M.B.A. students are required to complete a minimum of 76 M.B.A. units. The curriculum consists of courses divided into two groups designed to achieve specific educational objectives. The courses are divided as follows: 10 required Common Core Courses (40 M.B.A. units) and 36 M.B.A. units of elective courses which students select to emphasize career goals and educational interests. A maximum number of 120 hours of classroom instruction, or 16 M.B.A. units (normally four 4-unit quarter courses), may be utilized toward the M.B.A. degree, total, from sources outside of UCI’s Merege School. This includes any “non-Merage course approvals” taken in other UCI units, intercampus exchange courses, etc.

The M.B.A. component of the J.D./M.B.A. requires that the 16 M.B.A. units of electives permitted from outside the Merage School may be (but are not restricted to be) taken from among appropriate School of Law electives but may not be counted simultaneously toward satisfying concurrent degree requirements in the School of Law.

Detailed information about J.D./M.B.A curriculum paths is available online at the Dual Degree Program website [http://merage.uci.edu/FullTimeMBA/Content/Dual-Degree-Programs/21].

M.D./M.B.A. Degree Program [http://www.mededu.uci.edu/mdmba]

The M.D./M.B.A. program requires five or six years for completion. It is aimed at individuals who are exceptional in ability and motivation and who seek a career as physicians with major responsibility for administration and management in health care organizations and institutions. Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and an M.B.A. degree from The Paul Merage School of Business.

Students must be currently enrolled in the M.D. program and in good academic standing in order to apply to the combined M.D./M.B.A. program. During their second or third year of medical school, interested students submit an application to The Paul Merage School of Business Admissions Committee, after review by the School of Medicine. Final acceptance to the program is granted by The Paul Merage School of Business, and M.B.A. course work begins following completion of the student’s third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the M.B.A. program.

The total number of units required to graduate for each program separately are satisfied in the M.D./M.B.A. program. The Full-Time M.B.A. program operates on a quarter system and M.D./M.B.A. students are required to complete a minimum of 76 M.B.A. units.

For more information about the M.D./M.B.A. program, contact the School of Medicine’s admissions office by phone at 949-824-5388 or by email at medadmit@uci.edu (medadmit@uci.edu).

M.S. in Engineering Management Degree Program

The Master of Science in Engineering Management is a graduate degree offered jointly by The Paul Merage School of Business and The Henry Samueli School of Engineering that will prepare engineers for leadership roles in technology, science, government, and engineering-based companies and organizations. The curriculum includes courses in engineering from The Henry Samueli School of Engineering and courses in business administration.
from The Paul Merage School of Business. Students will learn to think in innovative ways as business and engineering project managers to solve complex engineering product development challenges through consulting projects, business plans and exposure to current issues within the engineering sector. Students will develop quantitative and qualitative skills along with business communication skills.

In this competitive program, students will learn about business from the engineering perspective and engineering from the business perspective. Students will be taught to think about their work through the lens of innovation and to develop a crucial view to enhance their careers.

For more information about the program, see the Francisco J. Ayala School of Biological Sciences section of the Catalogue.

M.S. in Biotechnology Management Degree Program

The M.S. in Biotechnology Management is a joint graduate degree that will prepare scientists for leadership roles in biotechnology, science, and engineering-based companies through a curriculum comprised of courses from the Department of Molecular Biology and Biochemistry (MB&B) in the Francisco J. Ayala School of Biological Sciences, the Department of Biomedical Engineering in The Henry Samuel School of Engineering, and The Paul Merage School of Business. Students will receive advanced training in biotechnology through course work, a teaching laboratory, and two quarters of independent research in a faculty laboratory of their choosing. They will also learn to think as a business manager by solving product development challenges through consulting projects, creating business plans, and by exposure to current issues within the biotechnology sector. Students will develop quantitative and qualitative skills along with business communication skills. Students will learn about business from the biotechnology perspective and biotechnology from the business perspective and will be taught to think about their work through the lens of innovation, a crucial view for their careers.

For more information about the program, see the Francisco J. Ayala School of Biological Sciences section of the Catalogue.

Special Opportunities

The Paul Merage School of Business offers course work in health care management within the M.B.A. program. The courses provide training not only in health care and related issues but also expose students to professionals in the areas of management, finance, marketing, and strategic planning.

In today’s interconnected global business world, it has become increasingly important for management students to learn to operate in an international environment. M.B.A. students in the full-time program can gain first-hand knowledge of the culture and management practices of other industrialized countries by participating in an academic exchange with universities located abroad. This experience, combined with course work in international management, prepares students for the demands and complexities of the growing global economic environment. Currently, The Paul Merage School of Business has exchange relationships with: Bocconi University, Milan, Italy; China Europe International Business School (CEIBS), Shanghai, China; Chinese University of Hong Kong (CUHK), Hong Kong; Corvinus University of Budapest, Hungary; ESSEC Graduate School of Management, France; Fudan University, Shanghai, China; Hong Kong University of Science & Technology, Hong Kong; Maastricht University, Netherlands; National University of Singapore (NUS), Singapore; Pontificia Universidad Catolica de Chile (PUC), Santiago, Chile; Vienna University of Economics and Business Administration, Vienna, Austria; and Yonsei University, Seoul, Korea.

For our Fully Employed and Executive M.B.A. students, we offer week-long global residential courses to immerse students in key areas related to global development, operations, management, and leadership. Past global residential have taken place in: Brazil and Argentina; China and Vietnam; Thailand and Myanmar; and Russia and Germany.

Centers of Excellence

Founded in 2007, The Beall Center for Innovation & Entrepreneurship (http://merage.uci.edu/ResearchAndCenters/Beall) provides thought leadership in the fields of entrepreneurship education and innovation research to both the students and faculty of The Paul Merage School of Business and the greater worldwide academic community. Through the Center and its activities, a campus-wide community of involvement for students and researchers passionate about innovation and entrepreneurship has been organized around a nexus of active volunteers, board members, and alumni who provide world-class programs, resources, and relationships to the University in the area of entrepreneurship and new venture creation.

The Center for Global Leadership is an important resource for UC Irvine and The Paul Merage School of Business students. This Center seeks to inspire global leadership by being the best place to learn, study, and develop ideas to improve socially responsible global leadership. We will do this by enabling collaboration among leading scholars, students, and the global leadership community to generate innovative ideas and best practices to address the current and future challenges of an increasingly integrated world. The center works with experienced leaders to identify practical global leadership knowledge needs and then develops systematic research on these questions, sharing that knowledge through conferences and our Research Translations (free on our web page). We use this knowledge to develop co-curricular programs for students such as the Executive Mentoring Program and the Social Responsibility Initiative that connect students with community leaders.

The Center for Real Estate at The Paul Merage School of Business is an integral and indispensable component of the program in Real Estate and Urban Development at UC Irvine. In addition to offering eight real estate elective courses, it provides students with a network of connections to the business community, including members of its Advisory Board, industry leaders, and alumni. The Center offers fellowships, extracurricular activities, and resources that enhance the M.B.A. learning experience.

The Center for Health Care Management and Policy at The Paul Merage School of Business advances knowledge through research and education while providing forums for dialogue on crucial challenges and concerns facing the nation’s health care system today. This interdisciplinary research institute brings together health care scholars, policy experts, and industry professionals to share vital information and a range of perspectives on such fundamental issues as quality of care, cost, and access. A wide range of programs contribute to the debate on national health care policy and help
leaders in government, business, and nonprofit organizations make better-informed decisions. The Center’s activities build on the Merage School’s health care-oriented educational programs, including its nationally acclaimed Health Care Executive M.B.A. program and its M.D./M.B.A. joint degree program.

The Center for Digital Transformation (CDT) generates and disseminates knowledge that helps businesses, governments, and society adapt to and leverage the possibilities enabled by emerging digital technologies. Research themes include Digital Economics, Digital Business Models and Processes, Digital Services Delivery, and Big Data & Analytics. CDT serves as an interdisciplinary research institute, drawing on economists, behavioral scientists, sociologists, and computer scientists. The Center deploys an open innovation model, partnering with companies, nonprofits, experts, and the community at large to identify and address critical research questions. CDT hosts several outreach initiatives which support and educate students, as well as connects them to key industry professionals.

The Center for Investment and Wealth Management is dedicated to the mission of educating Merage School M.B.A. students in the area of investment and wealth management. The Center seeks to enhance students’ educational experience and help them to advance their professional expertise and growth at the same time. The education that the Center provides is a collaborative effort between UC Irvine’s expert faculty and seasoned professionals dedicated to sharing their experience and knowledge. The concept is to create cutting-edge curriculum with the flexibility to teach students topics in real time. This year, a number of the Center’s board members have participated as distinguished lecturers. They are prominently known in the wealth management community and speak to students about their career path, the industry, and ways to achieve success. They are from a wide array of backgrounds including financial institutions, investment companies, law firms, accounting firms, and wealth management companies in Orange County and beyond.

The John S. and Marilyn Long U.S.-China Institute for Business and Law at UC Irvine is a premier research entity established to facilitate and further develop legal and commercial relationships between the United States and China. The Long Institute is a collaborative effort between The Paul Merage School of Business and the School of Law at UC Irvine and will involve chaired professors with extensive expertise in the areas of both business and law as it relates to the U.S and China. The Institute serves to promote a bilateral understanding and engagement between the two economic superpowers and will feature events and research involving both scholars and practitioners from various industries engaging in U.S.-China trade. Students and faculty can also be involved by participating in exchange programs with major Chinese universities.

M.B.A. Career Center

The M.B.A. Career Center, located within the Merage School, assists M.B.A. students with taking the next steps in their professional career. The Center has two main functions: (1) helping students develop lifelong career management skills through career and professional development activities, job search training, and personalized coaching services and (2) facilitating connections with organizations that hire for internships and full-time jobs. The relatively small size of the M.B.A. program allows students to develop a close working relationship with the M.B.A. Career Center staff.

Fully Employed M.B.A. (http://merage.uci.edu/fullyemployedmba)

The Fully Employed M.B.A. (FEMBA) program gives emerging managers an opportunity to earn an M.B.A. degree with minimal disruption to their professional lives. Students attend classes on weeknights and/or Saturdays during the program. The FEMBA Program admits new students for enrollment in spring or fall. Students beginning the program in spring attend classes nine consecutive quarters and complete the program within 27 months. Students beginning the program in fall attend classes nine non-consecutive quarters and complete the program within 33 months. Students also have the opportunity to accelerate their program to graduate in 21 months.

The program consists of both core courses and electives, allowing students to establish a solid foundation of traditional business skills and then customize their education based on personal interests and goals. The curriculum provides constant interaction between information presented in the classroom and what is being used on the job, reinforcing and enhancing the student’s learning experience.

In addition to classroom work, students attend two residential courses including one abroad focusing on global markets. In this concentrated setting, students and faculty have an opportunity to explore in depth a variety of business challenges and how those challenges can best be met using contemporary management tools.

Further information may be obtained by contacting the University of California, Irvine, Fully Employed M.B.A. Program Office, The Paul Merage School of Business, SB1 4200, Irvine, CA 92697-3125; 949-824-4565; or visit the Fully Employed MBA website (http://merage.uci.edu/fullyemployedmba).

Executive M.B.A. Program (http://merage.uci.edu/executivemba)

The Executive M.B.A. (EMBA) program presents a challenging 21-month course of study specifically designed for executives, senior managers, professionals, entrepreneurs, and technical experts throughout Southern California. Participants have an average of 15 years work experience (with a minimum of eight years), demonstrated leadership abilities, and a proven track record of success. Commencing each fall, students meet for seven consecutive quarters on alternate weekends (Friday and Saturday) at The Paul Merage School of Business. Class size allows students the opportunity to actively participate in class discussions and interact closely with their peers.

The program offers an applications-oriented curriculum with an international focus designed to give the working professional contemporary management tools for successfully doing business in a global environment. The EMBA program is a 92-unit program and offers a maximum amount of core and elective course material presented in an accelerated timetable and is delivered to students using a lock-step curricular model.
In addition to the two, week-long residential courses, students participate in an in-depth academic, week-long global residential course abroad. This provides a unique opportunity to experience global business firsthand from a corporate, academic, and cultural standpoint.

Further information may be obtained by contacting the University of California, Irvine, Executive M.B.A. Programs, The Paul Merage School of Business, SB1 4200, CA 92697-3125; 949-824-4565; or visit the Executive MBA website (http://merage.uci.edu/ExecutiveMBA).

Health Care Executive M.B.A. Program (http://merage.uci.edu/healthcareexecutivemba)
The Health Care Executive M.B.A. (HCEMBA) program is a comprehensive academic experience for professionals and clinicians working in the health care industry. This unique program is designed for professionals who want to expand their business expertise and gain the fundamentals of management as well as develop a better understanding of the economic, political, and social dynamics which shape the global health care industry.

Students come from the intersecting industries of pharmaceuticals, medical device, managed care, insurance, health care services, and health care policy. Participants have significant relevant work experience, demonstrated leadership abilities, and a proven track record of success. This 21-month program begins each fall. Classes meet one weekend a month, starting Thursday evening and continuing until noon on Sunday. Classes meet for seven consecutive quarters at The Paul Merage School of Business.

The curriculum is a carefully structured program that assures each student's exposure to the full range of disciplines which are essential components of a management education. The core and elective courses are specifically customized for application to a health care professional's daily challenges.

In addition to two, week-long residential courses, students participate in an in-depth academic, week-long course in Washington, D.C. where they meet health care industry leaders to better understand legislative and regulatory processes that affect health care.

Further information may be obtained by contacting the University of California, Irvine, Executive M.B.A. Programs, The Paul Merage School of Business, SB1 4200, CA 92697-3125; 949-824-4565; or visit the Health Care Executive MBA website (http://merage.uci.edu/HealthcareExecutiveMBA).

Master of Professional Accountancy (MPAc)
The Master of Professional Accountancy (MPAc) program provides an intensive, focused level of training that will prepare graduates for entering positions within an accounting firm, private company, or public/nonprofit organization. Combined with undergraduate preparation in accounting, the MPAc program will enable students to meet the State of California Board of Accountancy educational standards for licensure as a certified public accountant in California. The program is a one-year, self-supporting terminal master's degree and includes the opportunity for a one-quarter internship.

Students who complete this program will possess the necessary knowledge to solve fundamental and strategic issues in accounting. They will learn to apply both critical thinking and established accounting processes to issues crucial to the audit and accountability of an organization. The coursework will have a pedagogical underpinning of ethical behavior and professional conduct. The underlying philosophy in the program's framework is intended to develop a foundational understanding of key accounting principles and concepts while also offering a breadth of broader issues and topics relevant to the discipline.

Admissions
Applicants may apply directly to The Paul Merage School of Business. Applicants to the fall class must meet all prerequisite requirements at the time of matriculation into the program. Specifically, an applicant must have satisfactorily completed the following prerequisite courses (or their equivalent) in accounting (although students lacking up to two upper-division undergraduate accounting courses will be permitted to petition to enroll in those courses as an additional part of the MPAc program): introductory financial and managerial accounting (two courses) and at least six of the following eight upper-division U.S. accounting-based courses: intermediate accounting I, intermediate accounting II, international accounting, advanced accounting, individual taxation, corporate and partnership taxation, accounting information systems, and auditing. At the discretion of the Admissions Committee, "provisional admission status" will be offered to highly qualified candidates who have met most, but not all, of the prerequisite requirements and will satisfy the requirements prior to matriculation.

Other highly qualified applicants who do not meet the entrance requirements to begin the program in the fall quarter will be offered an opportunity to enroll in an intensive summer pre-session at The Paul Merage School of Business. The pre-session will be required of those who possess an excellent undergraduate record of achievement, strong letters of recommendation, and a clear focus relative to a career in accounting; and, who need specific prerequisite coursework in accounting and business. The summer pre-session will include four courses. Students must successfully complete all of the pre-session coursework to meet the course prerequisites of the MPAc program in order to enter the program in the fall quarter. Pre-session coursework will be done over the two designated Summer Sessions. Students will enroll in a curriculum of two courses in Summer Session I and two courses in Summer Session II. The courses are as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MPAC 200A</td>
<td>Intermediate Accounting Intensive I</td>
</tr>
<tr>
<td>MPAC 200B</td>
<td>Foundations of Taxation Intensive</td>
</tr>
<tr>
<td>MPAC 200C</td>
<td>Intermediate Accounting Intensive II and Special Topics</td>
</tr>
<tr>
<td>MPAC 200D</td>
<td>Auditing Intensive</td>
</tr>
</tbody>
</table>

Admission to graduate standing in The Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing. Applicants for admission will be evaluated on their academic record and potential for leadership as demonstrated in submitted application materials. These materials will include official university transcripts and resume.
Management Admission Test (GMAT) or Graduate Record Examination (GRE) test scores*, two letters of recommendation, a Statement of Purpose, and an essay. A personal interview, by invitation only, will be part of the admission process. Those students educated from a country where English is not the primary language will be required to possess a minimum score on the Test of English for Foreign Language (TOEFL) of 600 for the paper-based test and 80 for the Internet-based test. Further, international applicants may also take the Pearson Test of English (PTE). The minimum required score for admission is 53. Scores are valid for two years.

*The GRE and GMAT test scores can be waived for all domestic applicants who have a GPA of 3.2 or above.

Requirements
The program requires students to complete no less than 11 courses and a minimum of 44 units. Of the minimum of 11 courses needed to complete the program, students must satisfactorily complete seven required courses. The required courses are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MPAC 230</td>
<td>Accounting Proseminar: Career and Professional Development (Students must enroll in both Proseminar courses.)</td>

<td>Professional Research and Communication</td>
</tr>
</tbody>
</table>

Students will be expected to enroll in and successfully complete at least 16 units of elective work as part of the program requirements. Students will be permitted to enroll in M.B.A. or MPAC level courses if the student has met the prerequisites and there is space allowed in the course. Further, students will be encouraged to pursue a formal internship experience in the winter and/or spring quarters by enrolling in MPAC 241 Accounting Internship, a 2-4 unit course.

Executive MBA Courses

**MGMT EP 200. Responding to Dynamic Times: Thinking Strategically for Executives. 7 Units.**
Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm’s management and frames them according to Merage’s strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Executive M.B.A. students only.

**MGMT EP 201A. Statistics for Executives. 5 Units.**
Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting. Course may be offered online.

Restriction: Executive M.B.A. students only.

**MGMT EP 202. Organizational Behavior for Executives. 5 Units.**
Develops a better understanding of individual and group behavior in and across organizations, and the frameworks by which to analyze and understand behavior in complex organizations. Enhances the skills required to manage collaboration and lead. Every other weekend course.

Restriction: Executive M.B.A. students only.

**MGMT EP 203A. Financial Reporting for Executives. 5 Units.**
Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Every other weekend course format.

Restriction: Executive M.B.A. students only.

**MGMT EP 203B. Managerial Accounting for Executives. 5 Units.**
Involves developing and using internal financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions. Every other weekend course format.

Prerequisite: MGMT EP 203A.

Restriction: Executive M.B.A. students only.
MGMT EP 204A. Microeconomics for Executives. 5 Units.
Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory. Every other weekend course format.

Restriction: Executive M.B.A. students only.

MGMT EP 204B. Macroeconomics for Executives. 5 Units.
Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. "Business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures. Every other weekend course format.

Prerequisite: MGMT EP 204A.

Restriction: Executive M.B.A. students only.

MGMT EP 205. Marketing for Executives. 5 Units.
Introduction to marketing. Topics include developing familiarity with fundamental marketing concepts, theories, and techniques; acquainting students with the type of decisions made by executives, including customer targeting, product, pricing, place, promotion, and research. Every other weekend course format.

Restriction: Executive M.B.A. students only.

MGMT EP 207. Information Technology for Executives. 5 Units.
Focuses on how information technology is used to create value in organizations through product, process, and strategy innovation. Aims to help managers understand the strategic role of key information technologies in managing organizations. Every other weekend course format.

Restriction: Executive M.B.A. students only.

MGMT EP 208. Operations Management for Executives. 5 Units.
Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, just-in-time manufacturing, and quality management. Every other weekend course format.

Restriction: Executive M.B.A. students only.

MGMT EP 209A. Managerial Finance for Executives. 5 Units.
Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, and capital structure choice. Every other weekend course format.

Restriction: Executive M.B.A. students only.

MGMT EP 210. Strategic Management for Executives. 5 Units.
Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis/discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations. Every other weekend course format.

Restriction: Executive M.B.A. students only.

MGMT EP 219. Practice of General Management for Executives. 5 Units.
Designed to teach the graduating MBA how the best managers actually manage. Students will develop a toolkit of proven concepts and practices that will help them succeed as managers at any level.

Restriction: Master of Business Administration students only.

MGMT EP 225. Negotiations For Executives. 5 Units.
Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Every other weekend course format.

Restriction: Master of Business Administration students only.
MGMT EP 290. Special Topics in Business. 2-5 Units.
Studies in selected areas of business. Topics addressed vary each quarter.
Repeatability: May be repeated for credit unlimited times.
Restriction: Masters of Business Administration students only.

MGMT EP 295A. Global Business I for Executives. 5 Units.
Fundamentals of global strategy, economics, and financial issues. Topics include global manager’s environment, global strategy, impact of national
culture on business systems, strategies and practices, foreign direct investment, corporate governance, human resources, and international marketing.
Every other weekend course format.
Restriction: Executive M.B.A students only.

MGMT EP 295B. Global Business II for Executives. 8 Units.
Emphasizes and reinforces international perspectives contained in the M.B.A. curriculum by providing a week-long intensive seminar abroad in the
second year. Scholars and business people from the host country instruct Executive M.B.A. students in designed class sessions and company visits.
Restriction: Executive M.B.A students only.

MGMT EP 296. Executive Leadership. 7 Units.
Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual
personal assessment and diagnosis. Every other weekend course format.
Prerequisite: Admission to the Executive MBA program.
Restriction: Executive M.B.A students only.

MGMT EP 299. Individual Study. 1-8 Units.
Individual Study under the direction of a selected faculty member.
Repeatability: May be repeated for credit unlimited times.
Restriction: Masters of Business Administration students only.

Fully Employed MBA Courses

MGMT FE 200. Responding to Dynamic Times: Thinking Strategically in Organizations. 6 Units.
Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm’s management and frames them according
to Merage’s strategic emphasis on analytical decision making, innovation, and information technology.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Fully Employed M.B.A. students only.

MGMT FE 201A. Statistics for Managers. 4 Units.
Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation,
hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting. Evening or weekend course format. Course may be
offered online.
Restriction: Fully Employed M.B.A. students only.

MGMT FE 202. Organizational Behavior for Managers. 4 Units.
Develops a better understanding of individual and group behavior in and across organizations; the frameworks by which to analyze and understand
behavior in complex organizations; and enhances the skills required to manage collaboration and lead. Evening or weekend course format. Course may be
offered online.
Restriction: Fully Employed M.B.A. students only.

MGMT FE 203A. Financial Reporting for Managers. 4 Units.
Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement
and valuation issues in decision-making problems and cases. Evening or weekend course format. Course may be offered online.
Restriction: Fully Employed M.B.A. students only.
MGMT FE 203B. Driving Profitability Through Managerial Accounting. 4 Units.
Teaches skills for making vital strategic and tactical decisions (e.g., outsourcing; adding/dropping product lines), to maximize profitability while managing risk. Also covers managerial tools (e.g., budgeting, cost-volume-profit analysis) to drive strategy implementation and incentivize employees. Taught in an evening/weekend format.

Restriction: Master of Business Administration students only.

MGMT FE 204A. Microeconomics for Managers. 4 Units.
Provides basic tools for analyzing economic decisions, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory. Evening and weekend course format. Course may be offered online.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 204B. Macroeconomics for Managers. 4 Units.
Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. “Business cycle-sensitive” management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures. Evening and weekend course format. Course may be offered online.

Prerequisite: MGMT FE 204A.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 205. Marketing for Managers. 4 Units.
Introduction to marketing. Develops familiarity with fundamental concepts, theories, and techniques in marketing and acquaints students with the type of decisions made by marketing managers including customer targeting, product, pricing, placement, promotion, and research. Evening or weekend course format.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 206. Business and Government for Managers. 4 Units.
Introduces students to the many non-market issues that affect today’s managers, such as environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy, and law. Evening and weekend course.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 207. Information Technology for Managers. 4 Units.
Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines how technology can be used to execute an organization’s business strategy and to enable new, innovative business strategies. Evening or weekend course format.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 208. Operations Management for Managers. 4 Units.
Introduction to strategic and tactical issues in production and operations management. Blend of quantitative and qualitative considerations. Topics include product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management. Evening or weekend course format.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 209A. Managerial Finance for Managers. 4 Units.
Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, and capital structure choice. Evening or weekend course format.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 209B. Investments for Managers. 4 Units.
Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, and valuation models for equities, bonds, and options. Emphasis on practical applications, including optimal investment strategies. Evening or weekend course format.

Prerequisite: MGMT FE 209A.

Restriction: Masters of Business Administration students only.
MGMT FE 210. Strategic Management for Managers. 4 Units.
Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations. Evening or weekend course format.

Prerequisite: MGMT FE 200 and MGMT FE 202 and MGMT FE 205 and MGMT FE 209A.

Restriction: Fully Employed M.B.A. students only.

MGMT FE 212. Business Growth Strategies for Managers. 4 Units.
Focuses on management of growth opportunities in industries where applied innovation, usually in the form of technology, people, or processes, creates distinct competitive advantages.

Restriction: Master of Business Administration students only.

MGMT FE 213. New Venture Management. 4 Units.
Teaches students how to launch and manage new businesses. Provides an overview of the start-up process, including how to identify new business opportunities and develop sound operating models, value new ventures, and understand capital financing. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 214. Entrepreneurship. 4 Units.
A project course in which student teams develop a business plan to launch a new venture. Drafts of sections of the plan are due throughout the course. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 216. Strategic Innovation for Managers. 4 Units.
Examines how innovations are created inside and outside the firm and are diffused to the market. Focuses on competition in technology-based industries, but also considers how innovation can transform established industries, for better or for worse.

Prerequisite: MGMT FE 210.

Restriction: Masters of Business Administration students only.

MGMT FE 217. Competitive Intelligence for Managers. 4 Units.
Focuses on how to design a competitive intelligence program, which is a core foundation upon which competitive strategies and execution tactics are developed, assessed, and modified. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 219. Practice of General Management. 4 Units.
Designed to teach the graduating M.B.A. students how the best managers actually manage. Students will develop a toolkit of proven concepts and practices that will help them succeed as managers at any level.

Restriction: Master of Business Administration students only.

MGMT FE 220. Organizational Change for Managers. 4 Units.
Focuses on the implementation of change. Identifies the features of successful changes in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change. Evening or weekend course format.

Prerequisite: MGMT FE 202.

Restriction: Master of Business Administration students only.

MGMT FE 225. Negotiations For Managers. 4 Units.
Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Evening or weekend course format.

Restriction: Master of Business Administration students only.
MGMT FE 231A. FSA-Earnings Quality and Asset Analysis for Managers . 4 Units.
Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.
Prerequisite: MGMT FE 203A.
Restriction: Masters of Business Administration students only.

MGMT FE 231B. Liability and Equity Analysis for Managers . 4 Units.
Focuses on the financial statement analysis of liabilities and stockholders’ equity. Topics include forecasting financial statements, earnings-based valuation models, accounting analysis of mergers and acquisitions, leases, bankruptcy prediction, and derivatives. Evening or weekend course format.
Prerequisite: MGMT FE 203A.
Restriction: Masters of Business Administration students only.

MGMT FE 246A. Introduction to the Real Estate Process. 4 Units.
Introductory survey course providing an understanding of the real estate market. Topics include real estate economics, valuation, feasibility, investment, tax considerations, financing, development, and corporate real estate asset management. Hands-on lectures, with guest lectures by real estate professionals.
Restriction: Master of Business Administration students only.

MGMT FE 246B. International Real Estate. 4 Units.
Survey of international real estate investment opportunities. Topics include size and breadth; opportunities and challenges (tax treatment, currency/ political/market risks, transaction costs, lack of local knowledge); ownership vehicles (REITs, joint ventures, equity funds, etc.). Global cast of guest lecturers supplements lectures.
Restriction: Master of Business Administration graduate students only.

MGMT FE 246C. Real Estate Capital Markets. 4 Units.
Understanding the four sectors of real estate capital markets: public debt, private debt, public equity, private equity; estate investment, key players, investment types drive capital solutions, underwriting strategies, and vehicle structuring, debt versus equity source characteristics and implications for returns.

MGMT FE 246D. The Real Estate Development Process. 4 Units.
Nature and composition of development community and development process. Emphasis on role of conflicting interests, values and goals, and market uncertainty. Special attention paid to deal structuring and risk management. Lectures, guest lecturers, team projects evaluating actual development project.
Restriction: Master of Business Administration students only.

MGMT FE 246E. Mortgage-Backed Securities and Structured Debt. 4 Units.
Theory and operation of the mortgage-backed security market. Historical introduction, technical analysis, examination of operations of residential/commercial mortgage-backed securities markets (RMBS, CMBS), evaluations of the “buy side,” mezzanine financing, CDOs, related vehicles. Guest lecturers from industry supplement lectures.
Restriction: Master of Business Administration students only.

MGMT FE 246F. Seminar in Management of the Real Estate Enterprise. 4 Units.
Beyond “The Deal” to management of the real estate enterprise itself. Explores aspects of decision-making focused upon strategic objectives: goal setting, legal/tax structures, family-owned firms, going public, corporate ethics, capital structure, diversification, core competencies, technology. Guest professionals.
Restriction: Master of Business Administration students only.

MGMT FE 246G. Applied Real Estate Security Analysis and Portfolio Management. 4 Units.
Provides an understanding of the public real estate investment trust (REIT) market and its place in modern investment strategies, presents methods for analyzing and valuing companies, and introduces basic concepts for constructing and managing a real estate investment portfolio.
Restriction: Master of Business Administration graduate students only.
MGMT FE 248. Corporate Valuation for Managers. 4 Units.
Studies cases that expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings. Evening or weekend course format.

Prerequisite: MGMT FE 209A and MGMT FE 209B.

Restriction: Masters of Business Administration students only.

MGMT FE 249. Derivatives for Managers. 4 Units.
Studies financial derivatives instruments, including forward contracts, futures, swaps, and options. Advanced applications of these instruments, including pricing and risk management, are emphasized. Evening or weekend course format.

Prerequisite: MGMT FE 209A.

Restriction: Master of Business Administration students only.

MGMT FE 250. Consumer Behavior for Managers. 4 Units.
Examines consumer decision-making processes with emphasis on application of concepts and research findings from behavioral sciences for solution of marketing problems. Includes models of consumer decision-making, information processing theories, and sociological influences on consumer decision-making. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 251A. Marketing Research for Managers. 4 Units.
Qualitative and quantitative marketing techniques that generate customer insights. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 252A. Managing Advertising and Communications. 4 Units.
Integrated marketing communications, including advertising, sale promotions, public relations, and direct mail. Exposure to elements of a communications plan; marketing research, including copy testing and tracking; creating brand value; media strategies; metrics. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 252D. New Product Development for Managers. 4 Units.
Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products as well as test them prior to launch. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 253. Micromarketing. 4 Units.
Develop marketing plans for retailers and neighborhoods based on past purchases and demographics. Covers retail site selection, category management, promotion management, shelf space allocation, pricing, promotions, targeted advertising, consumer segmentation, media selection, list management, and GIS software.

Restriction: Master of Business Administration students only.

MGMT FE 257. Marketing on the Internet for Managers. 4 Units.
Examines impact of the Internet on traditional methods of marketing. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness. Evening or weekend course format.

Restriction: Master of Business Administration students only.

MGMT FE 258. Marketing Strategies for High Technology for Managers. 4 Units.
Framework and tools for managing technology-intensive businesses. Product and pricing policies; network externalities; compatibility concerns; systems competitions; technological and market uncertainty; technology licensing strategies; contracting in high-tech markets; product line design; product bundling strategies; usage-based pricing; pricing of networks; auctions.

Restriction: Master of Business Administration students only.
MGMT FE 259. Strategic Brand Management for Managers. 4 Units.
Addresses important branding decisions faced by organizations. A computer simulation allows students hands-on experience in making decisions about their brand and seeing the results of those decisions. Evening or weekend course format.

Prerequisite: MGMT FE 205.

Restriction: Masters of Business Administration students only.

MGMT FE 272. Critical IT Decisions for Business Managers. 4 Units.
Develops frameworks to help business executives make critical IT decisions. Examples include how much to invest in IT, how to maximize return on IT investment, sourcing and business process outsourcing, strategies for digital environments. Evening or weekend course format.

Prerequisite: MGMT FE 207.

Restriction: Masters of Business Administration graduate students only.

MGMT FE 273. Business Intelligence for Analytical Decisions for Managers. 4 Units.
Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation; association rules to discover relationships between different purchase decisions; Naive-Bayes classification techniques for decision making using decision-trees. Evening or weekend format. Course may be offered online.

Restriction: Masters of Business Administration students only.

MGMT FE 279. Digital Strategies and Markets. 4 Units.
Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Masters of Business Administration students only.

MGMT FE 280. Forecasting for Managers. 4 Units.
Basic theory and techniques used to forecast future activities in technological, economic, social, and political arenas. Impact of forecasting on managerial decision making. Evening or weekend course format.

Restriction: Masters of Business Administration students only.

MGMT FE 281. Analytical Decision Models for Managers. 4 Units.
An introduction of analytics tools for decision making. Topics include linear and non-linear optimization and simulation models. Excel Solver will be used as the optimization tool and Risk Solver Platform will be used as the simulation tool. Evening or weekend.

Restriction: Master of Business Administration students only.

MGMT FE 283. Decision Analysis for Managers. 4 Units.
Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making. Evening or weekend course format.

Restriction: Masters of Business Administration students only.

MGMT FE 285. Managing Supply Chains. 4 Units.
Introduces students to the tools and strategies to effectively match supply and demand. Focuses on the coordination of material and information flows in supply chains. Recent innovations are also discussed, including globalization, the impact of electronic commerce, and sustainability issues.

Restriction: Masters of Business Administration students only.

MGMT FE 287. Project Management. 4 Units.
Examines the fundamental components of project management and its role in the modern corporation. Emphasis is on how to initiate, implement, control, and terminate a project. Use of computer package for project management. Evening or weekend course format.

Restriction: Masters of Business Administration students only.

MGMT FE 290. Special Topics in Business. 2-4 Units.
Studies in selected areas of Business. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Masters of Business Administration students only.
MGMT FE 292. Business Law for Managers. 4 Units.
Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages. Evening or weekend course format.
Restriction: Masters of Business Administration students only.

MGMT FE 294. EDGE for Managers. 4 Units.
Explores the crucial roles of external forces: globalization, technology, shifting demographics - as transformative catalysts for change - opening markets, erasing boundaries, and transforming industries. This course prepares future business leaders to innovate and successfully compete.
Restriction: Master of Business Administration graduate students only.

MGMT FE 295A. Global Business I for Managers. 4 Units.
Fundamentals of global strategy, economics, and financial issues. Topics include global manager’s environment, global strategy, impact of national culture on business systems, strategies and practices, foreign direct investment, corporate governance, human resources, and international marketing.
Evening and weekend course format.
Restriction: Fully Employed M.B.A. students only.

MGMT FE 295B. Global Business II for Managers. 8 Units.
Emphasizes and reinforces international perspectives contained in the FEMBA curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct FEMBA students in specially designed class sessions and company visits.
Prerequisite: MGMT FE 295A.
Restriction: Fully Employed M.B.A. students only.

MGMT FE 296. Executive Leadership. 6 Units.
Provides perspectives on leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader? Evening or weekend course format.
Restriction: Masters of Business Administration students only.

MGMT FE 298. Experiential Learning. 4 Units.
Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the MBA program. Seminars augment internship experiences with analyses of relevant administrative issues.
Restriction: Masters of Business Administration students only.

MGMT FE 299. Individual Directed Study. 1-8 Units.
Individual study under the direction of a selected faculty member.
Restriction: Master of Business Administration students only.

Health Care MBA Courses

MGMT HC 200. Responding to Dynamic Times: Thinking Strategically for Healthcare Executives. 7 Units.
Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm’s management and frames them according to Merage’s strategic emphasis on analytical decision making, innovation, and information technology.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Health Care Executive M.B.A. students only.

MGMT HC 201A. Statistics for Healthcare Executives . 5 Units.
Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics include classical estimation, hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting. Course may be offered online.
Restriction: Health Care Executive M.B.A. students only.

MGMT HC 201B. Operations Analytics for Healthcare Executives. 5 Units.
An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages. Once a month weekend course format.
Restriction: Health Care Executive M.B.A. students only.
MGMT HC 202. Organizational Behavior for Healthcare Executives. 5 Units.
Develops a better understanding of individual and group behavior in and across organizations, the frameworks by which to analyze and understand behavior in complex organizations; enhances the skills required to manage collaboration and lead. Once a month weekend course format.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 203A. Financial Reporting for Healthcare Executives. 5 Units.
Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes. Emphasis on measurement and valuation issues in decision-making problems and cases. Once a month weekend course format.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 203B. Managerial Accounting for Healthcare Executives. 5 Units.
Involves developing and using internal financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions. Once a month weekend course format.

Prerequisite: MGMT HC 203A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 204A. Microeconomics for Healthcare Executives. 5 Units.
Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures, and introductory game theory. Once a month weekend course format.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 204B. Macroeconomics for Healthcare Executives. 5 Units.
Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. "Business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisitions, and capital financing and expenditures. Once a month weekend course format.

Prerequisite: MGMT HC 204A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 205. Marketing for Healthcare Executives. 5 Units.
Introduction to marketing. Develops familiarity with fundamental marketing concepts, theories, and techniques, and acquainting students with the type of decisions made by marketing managers, including customer targeting, product, pricing, place, promotion, and research. Once a month weekend course format.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 206. Business and Government for Healthcare Executives. 2 Units.
Introduces students to the many non-market issues that affect today's managers: environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy, and law. Once a month weekend course format.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 207. Information Technology for Healthcare Executives. 5 Units.
Focuses on how information technology is used to create value in healthcare-related organizations through product, process, and strategy innovation. Aims to help managers and healthcare professionals understand the strategic role of technology. Every other weekend course format.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 209A. Managerial Finance for Healthcare Executives. 5 Units.
Introduces students to financial theory and concepts. Topics include time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice. Once a month weekend course format.

Prerequisite: MGMT HC 201A and MGMT HC 203A and MGMT HC 204A.

Restriction: Health Care Executive M.B.A. students only.
MGMT HC 209B. Investments for Healthcare Executives. 3 Units.
Prerequisite: MGMT HC 209A.
Restriction: Health Care Executive M.B.A. students only.

MGMT HC 210. Strategic Management for Healthcare Executives. 5 Units.
Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps students improve analytical and strategic thinking by which to assess, evaluate, and respond to different business situations. Once a month weekend course format.
Prerequisite: MGMT HC 200 and MGMT HC 202 and MGMT HC 205 and MGMT HC 209A.
Restriction: Health Care Executive M.B.A. students only.

MGMT HC 214. Entrepreneurship for Healthcare Executives. 2-5 Units.
A project course in which student teams develop a business plan to launch a new venture. Drafts of sections of the plan are due throughout the course. Once a month weekend course format.
Restriction: Master of Business Administration graduate students only.

MGMT HC 225. Negotiations For Healthcare Executives. 5 Units.
Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts. Once a month weekend course format.
Restriction: Master of Business Administration students only.

MGMT HC 267. Understanding Managed Care. 2-5 Units.
This course is designed to increase understanding of the various concepts of managed health care with an emphasis on the organizational processes required to make it work, and explore the economics and financial pressures these organizations face.
Restriction: Masters of Business Administration graduate students only.

MGMT HC 290. Special Topics in Business. 2-5 Units.
Studies in selected areas of business. Topics addressed vary each quarter.
Repeatability: May be repeated for credit unlimited times.
Restriction: Masters of Business Administration students only.

MGMT HC 292. Business Law for Healthcare Executives. 2-5 Units.
Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.
Repeatability: May be repeated for credit unlimited times.
Restriction: Masters of Business Administration graduate students only.

MGMT HC 295. Federal Policy in Health Care. 8 Units.
National/international one-week residential course exploring political analysis as related to management of health care organizations. Topics include political environment of management, concepts, and processes central to political analysis, bureaucratic politics, politics, and the manager.
Restriction: Health Care Executive M.B.A. students only.

MGMT HC 296. Leadership for Healthcare Executives. 7 Units.
Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis. Once a month weekend course format.
Restriction: Healthcare Executive M.B.A. students only.

MGMT HC 299. Individual Study. 1-8 Units.
Individual study under the direction of a selected faculty member.
Repeatability: May be repeated for credit unlimited times.
Restriction: Master of Business Administration students only.
Management MBA Courses

MGMTMBA 200. Responding to Dynamic Times: Thinking Strategically in Business. 4 Units.
Focuses on the strategic and organizational challenges that a rapidly changing environment poses to the firm’s management and frames them according to Merage’s strategic emphasis on analytical decision making, innovation, and information technology.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Full-time Master of Business Administration graduate students only.

MGMTMBA 201A. Statistics for Management. 4 Units.
Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics: classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Prerequisite: Courses in basic statistics with probability.

Restriction: Full-time Master of Business Administration graduate students only.

MGMTMBA 201B. Management Science. 2 Units.
An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages.

Restriction: Full-time Master of Business Administration graduate students only.

MGMTMBA 202. Organizational Behavior for Management. 4 Units.
Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Restriction: Full-time Master of Business Administration graduate students only.

MGMTMBA 203A. Financial Reporting for Management. 4 Units.
Involves the development, analysis, and interpretation of financial accounting information for external reporting purposes.

Restriction: Full-Time Masters of Business Administration graduate students only.

MGMTMBA 203B. Driving Profitability Through Management Accounting. 4 Units.
Teaches core skills for making vital strategic and tactical decisions (e.g., outsourcing; adding/dropping product lines), to maximize profitability while managing risk. Also covers operational and managerial tools (e.g., budgeting, planning, cost-volume-profit analysis) to drive strategy implementation and incentivize employees.

Prerequisite: MGMTMBA 203A

Restriction: Master of Business Administration graduate students only.

MGMTMBA 204A. Microeconomics for Management. 4 Units.
Provides basic tools for analyzing economic decisions of consumers and firms. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, market failures and introductory game theory.

Restriction: Full-time Master of Business Administration graduate students only.

MGMTMBA 204B. Macroeconomics for Management. 4 Units.
Introduces use of macroeconomic analysis to manage the business cycle for competitive advantage. Such “business cycle-sensitive” management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMTMBA 204A.

Restriction: Full-time Master of Business Administration graduate students only.

MGMTMBA 205. Marketing Management. 4 Units.
Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing, and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Full-time Master of Business Administration graduate students only.
MGMT MBA 206. Business and Government. 4 Units.
Introduces students to the many non-market issues that affect today's managers, such as: environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy and law.

Restriction: Full-time Master of Business Administration graduate students only.

MGMT MBA 207. Information Technology for Management. 4 Units.
Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy and to enable new, innovative business strategies.

Restriction: Full-time Master of Business Administration graduate students only.

MGMT MBA 208. Operations Management. 4 Units.
Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics: product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

Restriction: Full-time Master of Business Administration graduate students only.

MGMT MBA 209A. Managerial Finance. 4 Units.
Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMT MBA 201A and MGMT MBA 203A and MGMT MBA 204A.

Restriction: Full-time Master of Business Administration graduate students only.

MGMT MBA 209B. Investments. 4 Units.
Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT MBA 209A.

Restriction: Masters of Business Administration graduate students only.

MGMT MBA 210. Strategic Management. 4 Units.
Provides conceptual frameworks and techniques to analyze and develop firm strategies. Through case analysis and discussion, helps improve strategic thinking by developing frameworks by which to assess, evaluate, and respond to different business situations.

Prerequisite: MGMT MBA 200, MGMT MBA 202, MGMT MBA 205 and MGMT MBA 209A.

Restriction: Full-time Master of Business Administration graduate students only.

MGMT MBA 211. MBA Proseminar.
Provides students in the Merage School Full-time MBA Program with information and practical skills for success in the MBA program, and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Administration graduate students only.

MGMT MBA 213. New Venture Management. 4 Units.
Teaches students how to launch and manage a new business by providing an overview of the start-up process, including how to identify new business opportunities and how to develop a sound operating model, value new ventures, and understand capital financing.

Restriction: Master of Business Administration graduate students only.

MGMT MBA 214. Entrepreneurship: Planning the New Venture. 4 Units.
Project course in which student teams develop a business plan to launch a new venture. The final business plan is presented to an expert panel.

Prerequisite: MGMT MBA 202 and MGMT MBA 205 and MGMT MBA 210.

Restriction: Master of Business Administration graduate students only.
MGMTMBA 215. Global Competitive Strategy. 4 Units.
Explores advanced topics in managing the geographic scope of the firm: locating activities in the right places, which markets to penetrate, horizontal integration across countries, and multinational partnering.

Restriction: Masters of Business Administration graduate students only.

MGMTMBA 217. Competitive Intelligence. 4 Units.
The course focuses on how to design a competitive intelligence program which is a core foundation upon which competitive strategies and execution tactics are developed, assessed, and modified.

Restriction: Master of Business Administration students only.

MGMTMBA 218. Business Dynamics. 4 Units.
Enhances students' analytical skills by analyzing complex challenges that businesses face and to quickly implement a winning response.

Prerequisite: MGMTMBA 210.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 220. Organizational Change. 4 Units.
Focuses on the implementation of change, including identifying the features of successful change in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change.

Prerequisite: MGMTMBA 202.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 225. Negotiations. 4 Units.
Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Restriction: Master of Business Administration students only.

MGMTMBA 228. International Management. 4 Units.
Introduction to the effects of different national cultures, political and economic systems on the assumptions, expectations, organizational practices, and organizational forms needed to conduct cross-national organizational work.

Prerequisite: MGMTMBA 202.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 229. Leadership Strategies. 4 Units.
Provides insight/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader. Materials fee.

Prerequisite: MGMTMBA 202.

Restriction: Master of Business Administration students only.

MGMTMBA 231A. FSA-Earnings Quality and Asset Analysis. 4 Units.
Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMTMBA 203A.

Restriction: Master of Business Administration students only.

MGMTMBA 231B. FSA-Liability and Equity Analysis. 4 Units.
Focuses on the financial statement analysis of liabilities and stockholders’ equity. Covers topics such as forecasting financial statements, earnings-based valuation models, accounting analysis of mergers and acquisitions, leases, bankruptcy prediction, and derivatives.

Prerequisite: MGMTMBA 203A.

Restriction: Master of Business Administration students only.
MGMTMBA 242. Portfolio Management. 4 Units.
Advanced portfolio decision-making. Topics include index models, portfolio performance measures, bond portfolio management and interest
immunization, stock market anomalies, and market efficiency.
Prerequisite: MGMTMBA 209A and MGMTMBA 209B.
Restriction: Master of Business Administration graduate students only.

MGMTMBA 243. Bonds and Fixed Income. 4 Units.
Fixed-income markets include treasury bonds, corporate bonds, and asset-backed securities. Focuses on techniques and methodologies for valuing
different types of debt as well as their uses.
Prerequisite: MGMTMBA 209A and MGMTMBA 209B.
Restriction: Masters of Business Administration graduate students only.

MGMTMBA 244. Multinational Finance. 4 Units.
Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Other topics
include investments and financing decisions in international capital markets.
Prerequisite: MGMTMBA 209A.
Restriction: Master of Business Administration graduate students only.

MGMTMBA 246A. Introduction to Real Estate Process. 4 Units.
Introductory survey course providing a working knowledge of the real estate market. Topics include real estate economics, valuation, feasibility,
investment, tax considerations, financing, development, and corporate real estate asset management. Lectures and cases, with supplemental
presentations by real estate professionals.

MGMTMBA 246B. International Real Estate. 4 Units.
Survey of international real estate investment opportunities. Topics include size and breadth; opportunities and challenges (tax treatment, currency/
political/market risks, transaction costs, lack of local knowledge); ownership vehicles (REITs, joint ventures, equity funds, etc.). Global cast of guest
lecturers supplements lectures.
Restriction: Master of Business Administration graduate students only.

MGMTMBA 246C. Real Estate Capital Markets. 4 Units.
Understanding the four sectors of real estate capital markets: public debt, private debt, public equity, private equity; fundamental drivers of real estate
investment; key players; investment types; underwriting strategies; debt vs. equity source characteristics and implications for returns.
Restriction: Master of Business Administration graduate students only.

MGMTMBA 246D. The Real Estate Development Process. 4 Units.
Nature and composition of development community and development process. Emphasis on role of conflicting interests, values and goals, and market
uncertainty. Special attention paid to deal structuring and risk management. Lectures, guest lecturers, team projects evaluating actual development
project.
Restriction: Master of Business Administration graduate students only.

MGMTMBA 246E. Mortgage-Backed Securities and Structured Finance. 4 Units.
Theory and operation of the residential and commercial mortgage-backed securities markets. Historical introduction, pricing and technical analysis, the
securitization process and roles of individual players, investment characteristics, structured finance and derivatives, recent policy issues. Guest lecturers
from industry supplement lectures.
Restriction: Master of Business Administration graduate students only.

MGMTMBA 246F. Seminar in Management of the Real Estate Enterprise. 4 Units.
Capstone seminar. Looks beyond "The Deal" to management of the real estate enterprise itself. Explores aspects of decision-making focused upon
strategic objectives: goal setting, legal/tax structures, public vs. closely-held entities, corporate ethics, capital structure, managing growth, diversification,
technology. Guest professionals.
Restriction: Master of Business Administration graduate students only.
MGMTMBA 246G. Applied Real Estate Security Analysis and Portfolio Management. 4 Units.
Provides an understanding of the public real estate investment trust (REIT) market and its place in modern investment strategies, presents methods for analyzing and valuing companies, and introduces basic concepts for constructing and managing a real estate investment portfolio.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 248. Corporate Valuation. 4 Units.
Studies cases that expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMTMBA 209A and MGMTMBA 209B.

Restriction: Master of Business Administration students only.

MGMTMBA 249. Derivatives. 4 Units.
Studies financial derivatives instruments, including forward contracts, futures, swaps, and options. Advanced applications of these instruments, including pricing and risk management, are emphasized.

Prerequisite: MGMTMBA 209A.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 250. Consumer Behavior. 4 Units.
Examines the consumer decision-making process with an emphasis on application of concepts and research findings from behavioral sciences for solution of marketing problems. Includes models of consumer decision-making, information processing theories, and sociological influences on consumer decision-making.

Restriction: Master of Business Administration students only.

MGMTMBA 251A. Marketing Research. 4 Units.
Covers conducting marketing research to generate consumer insights that will drive sales, market share, and profitability and/or realize other quantitative objectives. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies.

Restriction: Master of Business Administration students only.

MGMTMBA 252D. New Product Development. 4 Units.
Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products, as well as test them prior to launch. Analytical thinking and techniques are emphasized.

Restriction: Master of Business Administration students only.

MGMTMBA 254. International Marketing. 4 Units.
Provides an understanding of the problems and perspectives of marketing across national boundaries, and develops analytical abilities for structuring and controlling marketing programs related to overseas business. Financial, legal, and cultural barriers to international marketing are emphasized.

Restriction: Master of Business Administration students only.

MGMTMBA 256. Design Management and Innovation. 4 Units.
Presents a design-driven approach, from design as organizational vision to strategic innovation to managing the design process. Students are exposed to design fundamentals and work in teams that involve creativity workshops and real-world projects.

Restriction: Master of Business Administration students only.

MGMTMBA 257. Marketing on the Internet. 4 Units.
Examines the impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness. Course may be offered online.

Restriction: Master of Business Administration students only.

MGMTMBA 258. Marketing Strategies for High Technology. 4 Units.
Framework and tools for managing technology-intensive businesses. Product and pricing policies; network externalities; compatibility concerns; systems competition; technological and market uncertainty; technology licensing strategies; contracting in high-tech markets; product line design; product bundling strategies; usage-based pricing; pricing of networks.

Restriction: Master of Business Administration students only.
MGMTMBA 259. Strategic Brand Management. 4 Units.
Addresses important branding decisions faced by organizations. A computer simulation allows students hands-on experience in making decisions about their brand and seeing the results of those decisions.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 261A. Physicians, Executives, and Healthcare Law. 4 Units.
Elective course offered alternating years, for UCI MBA students. Designed to bring major healthcare law issues to the classroom.

Prerequisite: MGMTMBA 201A.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 261B. Physicians, Executives, and Health Leadership. 4 Units.
Elective course offered alternating years, for the UCI MBA students. Designed to bring to the classroom major healthcare leadership and management issues from both the executive and physician perspective.

Prerequisite: MGMTMBA 201A.

Restriction: Master of Business Administration students only.

MGMTMBA 262. Managing Nonprofits. 4 Units.
Focuses on the similarities and differences between for-profit and nonprofit organizations, with emphasis on the management of nonprofits. Topics include: marketing, fundraising, staffing, management/director relationships, use of volunteers, and emerging career opportunities.

Restriction: Master of Business Administration students only.

MGMTMBA 264. US Health Policy. 4 Units.
Provides an overview of US health policy with a particular emphasis on current policy developments and debates. Students will be introduced to the basic tools of policy analysis and will apply them to health policy issues.

Restriction: Master of Business Administration students only.

MGMTMBA 273. Business Intelligence for Analytical. 4 Units.
Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation, association rules to discover relationships between different purchase decisions, Naive-Bayes classification techniques for decision making using decision-trees.

Restriction: Master of Business Administration students only.

MGMTMBA 279. Digital Strategies and Markets. 4 Units.
Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Master of Business Administration students only.

MGMTMBA 280. Forecasting. 4 Units.
Basic theory and techniques used to forecast future activities in technological, economic, social, and political arenas. Impact of forecasting on managerial decision making.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 282. Revenue Management. 4 Units.
Students learn to apply advanced analytics to earn incremental revenue through the efficient use of resources and science-based pricing methods. Statistics and optimization (using Excel and Excel Solver). Industry-specific implementation issues.

Restriction: Master of Business Administration students only.

MGMTMBA 283. Decision Analysis. 4 Units.
Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making.

Restriction: Master of Business Administration students only.
MGMTMBA 285. Supply Chain Management. 4 Units.
Introduces students to the tools and strategies to effectively match supply and demand. Focuses on the coordination of material and information flows in supply chains. Recent innovations are also discussed, including globalization, the impact of electronic commerce, and sustainability issues.

Restriction: Masters of Business Administration graduate students only.

MGMTMBA 287. Project Management. 4 Units.
Examines the fundamental components of project management and its role in the modern corporation. Emphasis on how to initiate, implement, control, and terminate a project. Use of computer package for project management.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 289. Field Studies in Management. 2-4 Units.
Each quarter a number of special topic seminars are offered in the 290 series. Examples of possible topics include Communication in Organizations, Power and Authority in Organizations, International Management, Health Care Administration, Real Estate Development.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 292. Business Law. 4 Units.
Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 293. Biotech Management. 5 Units.
Taught jointly by Biological Sciences and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MOL BIO 253.

Restriction: Master's Program in Biotechnology Management students only.

MGMTMBA 294. Edge. 4 Units.
Edge explores the crucial roles of external forces - globalization, technology, shifting demographics - as transformative catalysts for change - opening markets, erasing boundaries, and transforming industries. This course prepares future business leaders to innovate and compete successfully.

Restriction: Master of Business Administration graduate students only.

MGMTMBA 295B. Micromarketing Lab. 2 Units.
Develop marketing plans for retail locations and neighborhoods based on past purchases and demographics. Topics include retail site selection, targeted advertising, promotion management, and category management. Gain experience with Geographic Information System (GIS) software and retail sales (POS) analysis.

Corequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 298. Experiential Learning. 4 Units.
Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the M.B.A. program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Second-year MBA students only.

MGMTMBA 299. Individual Study. 1-12 Units.
Individual study under the direction of the selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.
Management PhD Courses

MGMTPHD 291. Ph.D. Special Topics Seminar. 2-12 Units.
Each quarter a number of special topic seminars are offered in the 291 series for Ph.D. students. Examples include topics such as methods seminar, experimental design, qualitative research, structural equation modeling.

Repeatability: Unlimited as topics vary.

MGMTPHD 297A. Doctoral Proseminar. 2 Units.
Analysis of the central theories and theoretical controversies in the field of management. Examination of the formal education for managerial careers and exploration of issues relating to professional careers in research and scholarship in the field of management.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

MGMTPHD 297B. University Teaching.
Designed to prepare students for teaching career; incorporates seminars addressing topics of classroom dynamics, syllabus preparation, teaching techniques; establishes mentor relationship with faculty member in student’s teaching area, provides classroom experience and includes option of videotape analysis of teaching style.

Restriction: Graduate students only.

MGMTPHD 297D. Philosophy of Science. 4 Units.
Provides exposure to fundamental issues regarding how knowledge is created, defended, and replaced both in the natural and social sciences. Covers current debates on the meaning of the term “scientific” and the validity of the scientific method.

Restriction: Graduate students only.

MGMTPHD 297F. Doctoral Research Methods. 4 Units.
An introduction to the fundamentals of social science research: theory development, research design, methods, data management, and writing for scholarly publications; for doctoral students intending scholarly research careers. Involves hands-on practice in formulating hypotheses, designing research, and conducting journal reviews.

Restriction: Management Ph.D. students only.

MGMTPHD 297G. Qualitative Research. 4 Units.
Focuses on qualitative research techniques for management. A hands-on course that includes in-depth/long interviews, visual research methods, participant/non-participant observation, verbal protocols, constructing field notes, multi-media approaches for data gathering and analyses.

Restriction: Graduate students only.

MGMTPHD 297H. Experimental Design. 4 Units.
Advanced course provides experience in planning and implementing an experiment or quasi-experiment, including choice of topic, study design, data analysis, and manuscript preparation. Data analysis topics include ANOVA, ANCOVA, repeated measures, logistic regression, chi-square, and tests of mediation.

Restriction: Graduate students only.

MGMTPHD 297I. Applied Multivariate Statistics. 2-4 Units.
Provides an overview of the most common techniques for multivariate analysis: principal component analysis, factor analysis, cluster analysis, MANOVA, regression with continuous variables, and regression with discrete variables.

Restriction: Graduate students only.

MGMTPHD 297K. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Student must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze.

Same as POL SCI 273A, PP&D 213.

Restriction: Grad students only

MGMTPHD 297L. Writing for Scholarly Publication. 4 Units.
Introduces methods for planning and carrying out scholarly writing.

Restriction: Graduate students only.
MGMTPHD 297M. SAS Boot Camp. 2 Units.
Teaches basics of SAS programming for empirical research. No prior knowledge of SAS or other computer programming language is required. Provides knowledge and tools to replicate an empirical study and learn how to perform very advanced data procedures.

Restriction: Graduate students only.

MGMTPHD 297Q. Game-Theoretic Models for Management Research. 4 Units.
Introduces some classic game-theoretic models for management research. It is about modeling strategic interactions between business competitors and/or partners in an analytical framework. Various applications will be discussed, e.g., pricing strategies, business alliances, e-commerce, negotiations, and contracts, etc.

Restriction: Graduate students only.

MGMTPHD 297R. Theories of Power and Empowerment. 4 Units.
Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as POL SCI 223A, PP&D 279.

Restriction: Ph.D. students only.

MGMTPHD 297T. Decision Theory. 2-4 Units.
Decision theories and preference models: How models are elicited or theories are experimentally tested, relevance to different management research areas, alternative theories, applications in management practice, and interpretations for the general public.

Restriction: Graduate students only.

MGMTPHD 297U. Foundational Theories of Organizations. 4 Units.
Covers major economic and sociological perspectives guiding the study of organizations (i.e., transaction cost economics, agency theory, institutional theories, organizational ecology, network and diffusion theories, behavioral theories, resource dependence), and examines how different theoretical perspectives are tested.

Restriction: Graduate students only.

MGMTPHD 297V. Information, Psychology, and Social Processes. 4 Units.
In the marketplace for ideas, which succeed and which fail? How do ideas and information spread between individuals, and how do populations of ideas evolve? This course reviews recent research on these issues and applications to business.

Restriction: Graduate students only.

MGMTPHD 299. Individual Directed Study. 1-12 Units.
Individual study under the direction of a selected faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

Master of Professional Accountancy Courses

MPAC 200A. Intermediate Accounting Intensive I. 4 Units.
Designed to provide students with technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Professional Accountancy students only.

MPAC 200B. Foundations of Taxation Intensive. 4 Units.
Provides students with the basic concepts of federal income taxation applicable to all taxpayers. Specifically, principles of taxation for individuals, corporations, and partnerships are discussed.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Professional Accountancy students only.
MPAC 200C. Intermediate Accounting Intensive II and Special Topics. 4 Units.
Designed to provide students with the technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.
Restriction: Master of Professional Accountancy students only.

MPAC 200D. Auditing Intensive. 4 Units.
Designed to provide students with an understanding of the fundamental principles, processes, and ethical considerations involved in the performance of a financial statement audit under U.S. auditing standards.

Repeatability: May be taken for credit 2 times.
Restriction: Master of Professional Accountancy students only.

MPAC 230. Accounting Proseminar: Career and Professional Development. 2 Units.
Provides students with information and practical skills for success in the program and for professional accounting and business career planning, and with discussions of current issues confronting the accounting profession.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 2 times.
Restriction: Master of Professional Accountancy students only.

MPAC 231A. Financial Statement Analysis and Forecasting. 4 Units.
Develops skills to analyze corporate financial reports. Topics include profitability, risk analysis, cash flow analysis, revenue and asset recognition, and forecasting. The skills are useful for students to evaluate financial reporting quality, detect earnings management, and predict firms' financial performance.

Prerequisite: Intermediate accounting.
Restriction: Master of Professional Accountancy students only.

MPAC 231B. Financial Statement Analysis and Valuation II. 4 Units.
Develops skills to analyze corporate financial reports with a focus on liabilities, stockholders’ equity, and valuation. Some topics include forecasting financial statements, cash flows- and earnings-based equity, and valuation models, accounting analysis of mergers and acquisitions, lease pensions, and derivatives.

Restriction: Master of Professional Accountancy students only.

MPAC 232. Taxes and Business Strategy. 4 Units.
Develops a student’s ability to identify, understand, and evaluate tax-planning opportunities. The focus is on tax planning concepts and the effects of taxes on business decisions rather than on detailed tax rules, compliance, or legal research.

Restriction: Master of Professional Accountancy students only.

MPAC 233. Non-for-Profit Accounting. 2 Units.
Elective course focuses on the accounting and reporting for governmental and non-for-profit entities. Topics include preparation of fund basis financial statements and related reporting and auditing issues. Use of non-financial performance measures for non-for-profit entities will also be discussed.

Restriction: Master of Professional Accountancy students only.

MPAC 234. Accounting Policy and Research. 2 Units.
Considers issues in contemporary accounting standard setting and regulation by examining academic accounting research of the various issues. Enables students to develop their knowledge and better appreciate current debates in accounting.

Restriction: Master of Professional Accountancy students only.

MPAC 235. Advanced Managerial Accounting. 4 Units.
Design of cost information and systems used to plan and control organizational activities; procedures used to account for unit, process, and program costs; cybernetic evaluation of costing procedures; cost estimation, analysis, and accounting via computers.

Prerequisite:
Restriction: Master of Professional Accountancy students only.
MPAC 236. Forensic Accounting. 2 Units.
Elective course focuses on the principles, and application of forensic accounting. Topics include the identification, detection, and prevention of fraud, valuations, damage calculations, and litigation support. The role of forensic accountants in the legal system will also be discussed.

Restriction: Master of Professional Accountancy students only.

MPAC 237. International Accounting. 4 Units.
An online course. A comprehensive study of differences between US GAAP and International Financial Reporting Standards (IFRS). Course may be offered online.

Prerequisite: Intermediate accounting.

Restriction: Master of Professional Accountancy students only.

MPAC 238. Advanced Auditing and Assurance Services. 4 Units.
Designed to provide advanced coverage of topics and emerging issues in auditing and assurance services. Provides a deeper understanding of the fundamental concepts of auditing, assurance services, and developing hot-topics within the auditing profession.

Prerequisite: Intermediate accounting and basic auditing.

Restriction: Master of Professional Accountancy students only.

MPAC 239. Ethics in Accounting and Business. 4 Units.
Designed to introduce students to the intellectual principles of ethical decision making by emphasizing the theories of ethics and their application in the business, and specifically, accounting professions. MPAC capstone course with a final comprehensive exam for the program.

Restriction: Master of Professional Accountancy students only.

MPAC 241. Accounting Internship. 2-4 Units.
Provides students with the opportunity to apply accounting knowledge through actual work experiences. The internship experience will provide students with knowledge of career opportunities, an understanding of how accounting plays in today’s business environment, and prepare students for success.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Professional Accountancy students only.

MPAC 290. Special Topic Seminars. 2-4 Units.
Studies in selected area of Accounting. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Professional Accountancy students only.

MPAC 291. Professional Research and Communication. 4 Units.
Combines research of the professional accounting literature on a range of technical topics with a written communication and oral presentations of the findings.

Restriction: Master of Professional Accountancy students only.

MPAC 299. Individual Study. 1-4 Units.
Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Professional Accountancy students only.
Overview

The School of Education is a unique interdisciplinary academic unit committed to promoting educational success in and out of school for ethnically and economically diverse learners from preschool through college through collective research, teaching, and service activities. The multidisciplinary faculty includes scholars in psychology, sociology, economics, linguistics, language and literacy, policy, race and ethnicity, and the achievement gap. Their research addresses core issues in contemporary education: (1) equity of opportunity for ethnically, linguistically, and economically diverse learners; (2) teaching and learning in science and math; (3) language and literacy development; (4) early childhood education and development; (5) out-of-school learning; and (6) effective interfaces between technology and education.

The School integrates the themes of Learning, Cognition, and Development; Educational Policy and Social Context; and Language, Literacy, and Technology across its programs, including the minor in Education, the B.A. in Education Sciences, the Ph.D. in Education, the Master of Arts in Teaching, and the Teacher Credential program. Scholarly work arises from the common belief that education environments, both in and out of school, are the sites of change in the quality of life and the availability of productive life choices for learners of all ages.

Degrees

| Education                                      | M.A., Ph.D. |
| Education Sciences                            | B.A.       |
| Elementary and Secondary Education            | M.A.T.     |

Honors

Graduation with Honors. Honors at graduation, e.g., *cum laude, magna cum laude, summa cum laude*, are awarded to approximately the top 12 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at the University of California. The student’s cumulative record at the end of the final quarter is the basis for consideration for awarding Latin honors. Other important factors are considered at Honors Recognition.

Bachelor of Arts in Education Sciences

The major in Education Sciences provides a foundation for the study of education, focused on four domains. These include (a) human development, learning, and cognition, (b) societal and policy contexts affecting education, (c) media and communication systems for learning, and (d) educational research and evaluation. Students in the major have the option of completing a specialization in: Early Childhood Learning and Development; Children’s Learning and Development; Afterschool and Summer Learning and Development; Digital Media and Learning; English Language Learning; and Educational Research and Evaluation. With advanced planning, students in the major can complete a minor or second major in another discipline.

The B.A. in Education Sciences includes content from applied linguistics, cognitive science, developmental psychology, economics, informatics, media studies, policy analytics, social neuroscience, and sociology. Graduates are prepared for careers in the global knowledge economy, with opportunities to apply learning modalities and technologies in multicultural contexts. Graduates may choose from career opportunities in public education, informatics, higher education, and education software development. Many graduates will pursue advanced degrees leading to instructional credentialing or administrative leadership.

The B.A. in Education Sciences is not a professional degree. However, graduates are well prepared to pursue teacher training (see UC Irvine School of Education M.A.T. program). Students interested in teaching elementary grades will benefit from completing the major with a specialization in Early Childhood Learning and Development, or Children’s Learning and Development. Students interested in teaching middle or high school are encouraged to meet with a Student Affairs Officer to combine the major with a minor or second major, aiming for proficiency in the subject they plan to teach. All students in the Education Sciences major are required to complete a minimum of 40 fieldwork hours in an educational setting.

Admission

Freshmen: Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions section of the Catalogue.

Transfer students: Preference will be given to Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0). It is suggested that prospective transfer students work toward completing coursework to fulfill the UCI general education requirements or IGETC.
Change of Major. Students who wish to change their major to Education Sciences should contact the Education Student Affairs Office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu).

Requirements for the B.A. Degree in Education Sciences (Specializations also listed)

All students must meet the University Requirements.

Grade Requirement. A minimum grade average of at least C (2.0) is required (1) overall, (2) in all of the courses required for the major program, and (3) in the upper-division courses required for the major program. All courses for the major must be taken for a letter grade unless the grade option for the course is pass/no pass only.

Overlap Restrictions

Double Majors. In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between two majors.

Major and Minor Requirements. Students may not receive both the major in Education Sciences and the minor in Educational Studies. In fulfilling requirements for a minor, a maximum of two courses may overlap between a major in Education Sciences and a minor from another department.

Major Requirements

Students must complete twelve courses (48 units) and a practicum as specified below:

Lower-Division requirements (20 units total).
A. Five Lower-Division courses (20 units):
   - EDUC 10  Educational Research Design ¹
   - EDUC 15  Statistics for Education Research ²
   - EDUC 30  21st Century Literacies
   - EDUC 40  Theories of Development and Learning Applied to Education
   - EDUC 50  Origins, Purposes, and Central Issues in K-12 Education

Upper-Division Requirements (28 units total).
B. Select one development course (4 units):
   - EDUC 106  Introduction to Early Childhood Education
   - EDUC 107  Child Development in Education
   - EDUC 108  Adolescent Development and Education
   - EDUC 185  Social Development in Education
C. Select one learning course (4 units):
   - EDUC 128  Exceptional Learners
   - EDUC 160  Foundations of Out-of-School Learning
   - EDUC 173  Cognition and Learning in Educational Settings
   - EDUC 176  Psychology of Learning, Abilities, and Intelligence
D. Select one educational policy and social context course (4 units):
   - EDUC 124  Multicultural Education in K-12 Schools
   - EDUC 126  Ethics and Education
   - EDUC 145  Theories and Pedagogies of Race in Education
   - EDUC 149  Family, School, and Community in Early Childhood
   - EDUC 150  Changing the High School Experience
   - EDUC 175  Foundations of Education
E. Select one communications and media course (4 units):
   - EDUC 104E  Multimedia and the Arts in the Multicultural Classroom
   - EDUC 125  Children, Schools, and Cinema
   - EDUC 130  Children’s Learning and Media
   - EDUC 131  Educational Technology
   - EDUC 134  Teaching English Internationally
   - EDUC 151  Language and Literacy
F. Three additional elective Education courses (12 units). At least 8 units must be upper-division (numbered 100-199). ³

The additional electives do not include the following professional education courses: EDUC 109, EDUC 143AW, EDUC 143BW, EDUC 148, EDUC 158. A maximum of 8 units for any repeatable Education course (e.g., EDUC 198, EDUC 199) may be used to satisfy this elective requirement.
G. Practicum Requirement (40 hours total):
A minimum of 40 hours of field experience or research in an education setting, satisfied in one or two ways.

1. Complete 40 hours of field experience or research completed in conjunction with one or more approved UCI courses that include a practicum. Consult the Education Student Affairs Office or School of Education website for Undergraduate Academic Programs for a current list of approved practicum courses.

2. Submit a petition to the Education Student Affairs Office for approval of verifiable hours from courses that are not on the approved practicum course list or hours from educational fieldwork that is not linked to a UCI course (e.g., tutoring experience, instructional experience in a summer program for children, etc.).

1 The following course is an approved alternative for EDUC 10: SOCECOL 10
2 The following statistics courses are approved alternatives for EDUC 15: SOCECOL 13, STATS 7, ANTHRO 10B, POL SCI 10B, PSYCH 10B, SOC SCI 9B, SOC SCI 10B, or SOCIOL 10B.
3 8 units of non-Education courses may be used to satisfy the major’s elective requirement if the courses are also required for a student’s selected specialization.

Specializations
Six optional specializations are offered to students who are completing a B.A. in Education Sciences. Specializations usually include a blend of lower and upper-division courses that also satisfy requirements for the major. In most cases where students select only Education courses to fulfill specialization requirements, they will be able to satisfy requirements for the major and requirements for a specialization concurrently, without exceeding the twelve courses (48 units) needed for the major.

Students in the major may complete more than one specialization; however, a particular course may satisfy requirements for no more than two specializations, and no more than two courses may overlap between two specializations. Students in the major are limited to two specializations.

Except where noted otherwise in specialization requirements, students may petition to apply up to 4 units of EDUC 198 or EDUC 199 courses or up to 4 units for courses from other departments to meet any of the specialization requirements when they address the topic of the specialization.

Specialization in Early Childhood Learning and Development
Select four courses (16 units) and a practicum as specified below:

Lower-Division Requirements (4 units total)
A. One lower-division course:
EDUC 40 Theories of Development and Learning Applied to Education

Upper-Division Requirements (12 units total)
B. Three upper-division courses:
EDUC 106 Introduction to Early Childhood Education
EDUC 107 Child Development in Education
EDUC 149 Family, School, and Community in Early Childhood

C. Practicum Requirement (40 hours total):
A minimum of 40 hours of field experience in an early childhood setting (pre-K) can be satisfied by taking EDUC 193 or otherwise completing verifiable fieldwork. The 40 hours of fieldwork for this specialization will concurrently satisfy the required 40-hour practicum for the major.

Students should consult the Education Student Affairs Office for information about courses that satisfy state requirements for Child Development Permits needed to teach in an early childhood setting.

Specialization in Afterschool and Summer Learning and Development
Select six courses (24 units) and a practicum as specified below:

Upper-Division Requirements (24 units total)
A. One foundations course (4 units):
EDUC 160 Foundations of Out-of-School Learning

B. Select one development and learning course (4 units) from:
EDUC 107 Child Development in Education
EDUC 108 Adolescent Development and Education
EDUC 124 Multicultural Education in K-12 Schools
EDUC 128 Exceptional Learners

C. Select one course (4 units) from one of the following curricula themes:
Literacy
EDUC 132 Reading and Writing Enrichment for After-School Programs
### Specialization in Children's Learning and Development

Select six courses (24 units) and a practicum as specified below:

#### Lower-Division Requirements (4 units total)

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</tbody>
</table>

#### D. Practicum Requirement (40 hours total):

A minimum of 40 hours of field experience in a children's education setting (e.g., ages 5 through 12) can be satisfied in one of two ways. The 40 hours of fieldwork for this specialization will concurrently satisfy the required 40-hour practicum for the major.
1. Complete 40 hours of relevant field experience in conjunction with one or more approved UCI courses that include a practicum in a children’s education setting. Consult the Education Student Affairs Office or School of Education website for Undergraduate Academic Programs for a current list of approved UCI courses.

or

2. Submit a petition to the Education Student Affairs Office for approval of verifiable hours from courses that are not on the approved practicum course list or hours from educational fieldwork that is not linked to a UCI course (e.g., tutoring experience, instructional experience in a summer program for children, etc.).

Students should consult the Education Student Affairs Office for information about several courses that offer an early start on requirements for the UCI post-baccalaureate Multiple Subject (elementary) Teaching Credential Program.

**Specialization in Digital Media and Learning**

Select four courses (16 units) as specified below:

<table>
<thead>
<tr>
<th>Lower-Division and Upper-Division Requirements (16 units total)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Select four courses (16 units) from:</td>

<tr>
<td>LINGUIS 121</td>
</tr>
<tr>
<td>LINGUIS 155</td>
</tr>
</tbody>
</table>

A maximum of 8 units can be for Linguistics courses.
D. Practicum Requirement (40 hours total): A minimum of 40 hours of field experience in an English language learning setting can be satisfied in one of two ways. The 40 hours of fieldwork for this specialization will concurrently satisfy the required 40-hour practicum for the major.

A minimum of 40 hours of field experience in an English language learning setting can be satisfied in one of two ways. The 40 hours of fieldwork for this specialization will concurrently satisfy the required 40-hour practicum for the major.

1. Complete 40 hours of relevant field experience in conjunction with one or more approved UCI courses that include a practicum in an English language learning setting. Consult the Education Student Affairs Office or School of Education website for Undergraduate Academic Programs for a current list of approved UCI courses.

or

2. Submit a petition to the Education Student Affairs Office for approval of verifiable hours from courses that are not on the approved practicum course list or hours from educational fieldwork that is not linked to a UCI course (e.g., tutoring experience, instructional experience in a language learning context, etc.).

Specialization in Research and Evaluation

Select five courses (20 units) as specified below:

Lower-Division Requirements (8 units total)
A. Two lower-division courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 10</td>
<td>Educational Research Design</td>
</tr>
<tr>
<td>EDUC 15</td>
<td>Statistics for Education Research</td>
</tr>
</tbody>
</table>

Upper-Division Requirements (12 units total)
B. Select three upper-division courses from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 156</td>
<td>Introduction to Field Methods in Education</td>
</tr>
<tr>
<td>EDUC 157</td>

Undergraduate Minor in Educational Studies

The minor in Educational Studies is designed to facilitate exploration of a broad range of issues in the field of education. Graduates with the Educational Studies minor may be employed in schools, government, private industry, and non-profit organizations. Many graduates will pursue advanced training leading to teaching careers or administrative leadership.

Requirements for the Minor in Educational Studies

The minor requires completion of a minimum of seven courses (three core courses and four electives) totaling 28 units. At least five courses must be upper-division. Students must also complete a minimum of 40 hours of verifiable field experience or research in an educational setting. No more than two non-Education courses (up to 8 units) from the student’s major area of study may be used to satisfy the minor requirements. A maximum of 8 units may be used to satisfy minor requirements with any repeatable course.

Core Courses

Select three core courses (12 units) of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 50</td>
<td>Origins, Purposes, and Central Issues in K-12 Education</td>
</tr>
<tr>
<td>EDUC 107</td>
<td>Child Development in Education</td>
</tr>
<tr>
<td>EDUC 108</td>
<td>Adolescent Development and Education</td>
</tr>
<tr>
<td>EDUC 124</td>
<td>Multicultural Education in K-12 Schools</td>
</tr>
<tr>
<td>EDUC 160</td>
<td>Foundations of Out-of-School Learning</td>
</tr>
<tr>
<td>EDUC 173</td>
<td>Cognition and Learning in Educational Settings</td>
</tr>
<tr>
<td>EDUC 175</td>
<td>Foundations of Education</td>
</tr>
<tr>
<td>EDUC 176</td>
<td>Psychology of Learning, Abilities, and Intelligence</td>
</tr>
</tbody>
</table>

Elective Courses

Select four elective courses (16 units) of the following:

A. Education courses numbered 1–199. A course selected to satisfy the minor core requirement cannot also be used to satisfy the elective requirement.

B. Up to 4 units allowed for an approved course offered by another department. The course must appear on the list below, or the student may petition approval of a course that is not on the list. Petition forms are available on the School’s website. The following are approved elective courses offered by other departments:

<table>
<thead>
<tr>
<th>Course</th>

<td>UTeach: Teaching Theory and Practice</td>
</tr>
<tr>
<td>UNI STU 197C</td>
<td>UTeach: Teaching Practicum</td>
</tr>
</tbody>
</table>

Practicum

A minimum of 40 hours of verifiable field experience or research in an educational setting. This requirement may be satisfied in any combination of the following to reach a total of 40 hours:

A. Complete field experience hours that satisfy requirements for UCI courses. The number of fieldwork hours in a course must be verified by the course syllabus or by a fieldwork verification form signed by the instructor.

B. Complete education-related research in conjunction with EDUC 198.

C. Get approval by petition for fieldwork hours completed during a student’s tenure at UCI that are independent of any courses (e.g., tutoring experience, instructional experience in a summer program or after-school program for children). When fieldwork approval by petition is needed, students submit a fieldwork verification form to the School of Education Student Affairs Office. Forms are available on the School’s website.

The School of Education Student Affairs Office can provide up-to-date information about courses that include fieldwork. Before enrolling in a course with the intent of satisfying the minor practicum requirement, students are advised to check with the instructor or the course syllabus to verify the exact number of hours. The following is a list of Education courses that usually include 10 hours or more of fieldwork:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 100</td>
<td>Educational Strategies for Tutoring and Teacher Aiding</td>
</tr>
<tr>
<td>EDUC 104D</td>
<td>Preparation for Teaching Fine Arts in K-12 Schools</td>
</tr>
</tbody>
</table>
EDUC 131  Educational Technology
EDUC 132  Reading and Writing Enrichment for After-School Programs
EDUC 137  Art in the Elementary School
EDUC 141A/PSYCH 141J  Jumpstart I: Early Language, Literacy, and Social Development
EDUC 141B/PSYCH 141K  Jumpstart I: Early Language, Literacy, and Social Development
EDUC 141C/PSYCH 141L  Jumpstart I: Early Language, Literacy, and Social Development
EDUC 153B  Urban Youth and the Development of Literacy through the Arts II
EDUC 160  Foundations of Out-of-School Learning
EDUC 161  Discovering Science in Out-of-School Hours
EDUC 191  Advanced Fieldwork in After-School Education
EDUC 193  Directed Studies in Early Childhood Education
EDUC 198  Directed Research in Education

Residence Requirement. At least four upper-division courses must be successfully completed at UCI.

Statement of Intent. A Statement of Intent is required of all students wishing to enroll in this minor; forms are available at the School of Education website. (http://www.education.uci.edu)

GPA Requirement. For certification in the minor, a student must obtain a minimum overall grade point average of at least C (2.0) in all courses required for the minor program. A maximum of 8 units of Pass/No Pass courses may be taken for the minor.

Other Courses. Students should consult a School of Education Student Affairs counselor about UCI 300-level Education courses that are open to undergraduates or courses from other colleges or universities that can satisfy minor in Educational Studies requirements.

Minor and Major. Students may not receive both the minor in Educational Studies and the major in Education Sciences.

Minor Courses That Also Provide an Early Start Toward a Teaching Credential. (Note: The Multiple Subject Teacher Credential Program and the Single Subject Teacher Credential Program will not be accepting applications for the 2016-17 or 2017-18 academic years.) The following courses may satisfy some requirements for the UCI Master of Arts in Teaching with Teacher Credential program when the student earns a grade of B or better (may not be taken Pass/Not Pass). Aspiring K-12 teachers should consult a counselor in the School of Education Student Affairs Office about selecting courses that are best suited to particular teaching credentials and to discuss eligibility for the UCI Master of Arts in Teaching with Teacher Credential program. The following courses provide an early start:

EDUC 104D  Preparation for Teaching Fine Arts in K-12 Schools
EDUC 107  Child Development in Education (combined with EDUC 124)  
EDUC 108  Adolescent Development and Education  
EDUC 124  Multicultural Education in K-12 Schools  
EDUC 128  Exceptional Learners
EDUC 131  Educational Technology  
EDUC 137  Art in the Elementary School  
EDUC 173  Cognition and Learning in Educational Settings
EDUC 176  Psychology of Learning, Abilities, and Intelligence
EDUC 190  Principles and Practices of K–6 After School Sports and Fitness
POL SCI 21A  Introduction to American Government

1  Satisfies a requirement in the UCI Multiple Subjects Credential program only.
2  Satisfies a requirement in the UCI Single Subject Credential program only.
3  Students satisfy an educational technologies requirement in the UCI Single Subject Credential program by completing EDUC 131.

Undergraduate Programs for Future Teachers Offered by Other Departments. Undergraduates who are completing a minor in Educational Studies and who are considering a teaching career may also be interested in the following programs offered by other departments.

- School of Humanities: English Major with a Specialization in English for Future Teachers; History Major with a Specialization in History for Future Teachers; Spanish Major with an Emphasis in Spanish for Future Teachers
- Francisco J. Ayala School of Biological Sciences: Major in Biological Sciences with Concentration in Biological Sciences Education
- School of Physical Sciences: Chemistry Major with a Concentration in Chemistry Education; Math Major with a Specialization in Mathematics for Education; Physics Major with a Concentration in Physics Education.
Additionally, the School of Education, School of Physical Sciences, and Francisco J. Ayala School of Biological Science jointly sponsor an undergraduate teacher credential program for math and science majors.

On This Page:
- Multiple Subject Teaching Credential
- Single Subject Teaching Credential
- Requirements for the Undergraduate Cal Teach Science and Mathematics Single Subject Credential Program
- Administrative Services Credential

Teaching and Service Credential Programs

The School of Education is authorized by the Commission on Teacher Credentialing to offer teacher and school administrator professional preparation programs for California teaching and service credentials. The School offers programs for multiple and single subject credentials. Also, in partnership with the Francisco J. Ayala School of Biological Sciences and the School of Physical Sciences, the School of Education offers the Cal Teach Science and Mathematics Program, an undergraduate Student Teacher Credential program for aspiring science or mathematics teachers. Additionally, in cooperation with University Extension, the School offers Administrative Services Credential programs and a Reading Certificate program.

Multiple Subject Teaching Credential

The Multiple Subject Teacher Credential Program will not be accepting applications for the 2016-17 or 2017-18 academic years. Individuals interested in earning a multiple subject teaching credential are encouraged to apply to the UCI Master of Arts in Teaching/Credential Program.

Single Subject Teaching Credential

The Single Subject Teacher Credential Program will not be accepting applications for the 2016-17 or 2017-18 academic years. Individuals interested in earning a single subject teaching credential are encouraged to apply to the UCI Master of Arts in Teaching/Credential Program.

Requirements for the Undergraduate Cal Teach Science and Mathematics Single Subject Credential Program

The following academic units offer undergraduates an option to earn a bachelor’s degree in mathematics or a science discipline while concurrently satisfying requirements for a Single Subject Teaching Credential: Departments of Chemistry, Earth System Sciences, Mathematics, Physics and Astronomy, and the Francisco J. Ayala School of Biological Sciences. Interested students should consult degree program options described in this Catalogue or talk with a counselor in the School of Physical Sciences Student Affairs Office or the Francisco J. Ayala School of Biological Sciences Student Affairs Office. With careful, early planning, it is possible for students to complete their bachelor’s degree and teacher certification in four years.

Prior to Entry in the Cal Teach Single Subject Credential Program:
- Declare a major and, if applicable, a concentration in secondary education in one of the departments offering a Cal Teach Science and Mathematics credentialing option;
- Complete a Cal Teach Program enrollment form, indicating intent to complete requirements for the Single Subject Teaching Credential for mathematics or one of the science disciplines. This must be done by the end of an undergraduate’s second year at the latest, and prior to enrolling in EDUC 55, which would typically be completed in fall of the third year. Enrollment forms are available in the School of Physical Sciences Student Affairs Office (134 Rowland Hall), the Francisco J. Ayala School of Biological Sciences Student Affairs Office (third floor, Biological Sciences III), and the Cal Teach Science and Mathematics Resource and Advising Center (137 Bison Modular).

Prior to the Start of Student Teaching:
- Pass the California Basic Education Skills Test (CBEST);
- Pass the California Subject Exam for Teachers (CSET) or complete a subject-matter preparation program (available for Mathematics only);
- Hold a current Certificate of Clearance from the State of California;
- Hold a current TB test with negative results.

Course and Fieldwork

Candidates who enroll in the undergraduate Cal Teach Single Subject Teacher Credential program at UCI are generally required to take the following courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY SCI 5/BIO SCI 14</td>

</tr>
</tbody>
</table>
or MATH 184 & 184L
EDUC 55 Knowing and Learning in Mathematics and Science
EDUC 109 Reading and Writing in Secondary Mathematics and Science Classrooms
EDUC 143AW Classroom Interactions I
EDUC 143BW Classroom Interactions II
EDUC 148 Complex Pedagogical Design
EDUC 158 Student Teaching Mathematics and Science in Middle/High School

1 In order to be recommended for the Preliminary Single Subject Credential, a grade of C or better is required in the following Cal Teach teacher credential program courses: PHY SCI 105/BIO SCI 101; EDUC 55, EDUC 109, EDUC 143AW, EDUC 143BW, and EDUC 148. A grade of C or better is required for all sections of EDUC 158 (a repeatable course) that students complete, including all EDUC 158 sections with a student teaching requirement.

Student teaching for Single Subject candidates in the undergraduate Cal Teach program is defined as a minimum of four hours per day, five days per week for at least one full public school semester in an appropriate classroom setting in middle or high school.

Readiness for student teaching shall be determined by, but not be limited to, the candidate’s academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

Applying for a California Credential
In addition to fulfilling all of the above requirements, an applicant must:

• Show evidence of a college-level course, or pass an approved examination on the U.S. Constitution;
• Obtain a CPR certificate in Adult, Child, and Infant resuscitation training;
• Pass the Teacher Performance Assessment
• Official UCI transcript must show that bachelor’s degree has been awarded.

If competence has been demonstrated by the conclusion of the student teaching program, and all other CTC and Departmental requirements are met, the undergraduate candidate is eligible for a preliminary credential through UCI.

Supplementary and Additional Teaching Authorizations. After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

Administrative Services Credential
The School of Education sponsors a program through University Extension leading to the Administrative Services Credential. The Preliminary Administrative Services Credential is obtained by completing the approved program of 36 quarter units and a comprehensive examination. This credential also requires a valid basic credential, five years of full-time teaching or services experience, and passage of the CBEST.

The Professional Clear Administrative Services Credential begins when an administrative position is obtained. The UCI Professional Clear Administrative Services program requires the successful completion of two years of full-time school administrative experience, the Preliminary Administrative Services Credential, and six (6) quarter units (Induction and Final Evaluation, Education 398A-B) which provide structured mentoring, self-assessment, and formative/summative evaluation of the candidate. Those interested in these credentials should visit the University Extension website (http://unex.uci.edu) or call 949-824-5414.

Faculty
Jonathan Alexander, Ph.D. Louisiana State University, Campus Writing Coordinator and Professor of English; Culture and Theory; Education; Gender and Sexuality Studies (writing studies, sexuality studies, queer theory, new media studies)

Richard Arum, Ph.D. University of California, Berkeley, Dean of the School of Education and Professor of Education; Sociology

Drew Bailey, Ph.D. University of Missouri, Assistant Professor of Education

Rachel Baker, Ph.D. Stanford University, Assistant Professor of Education

Bruce Baron, M.S. Pepperdine University, Lecturer of Education

Frank D. Bean, Ph.D. Duke University, UCI Distinguished Professor of Sociology; Economics; Education (international migration, demography, Mexican immigration, racial and ethnic relations, economic sociology, family)

Robert J. Beck, Ph.D. University of Chicago, Senate Emeritus of Education
Henry J. Becker, Ph.D. Johns Hopkins University, Professor Emeritus of Education

Liane R. Brouillette, Ph.D. University of Colorado Boulder, Associate Professor of Education (educational policy, arts-based learning)

Chuansheng Chen, Ph.D. University of Michigan, UCI Chancellor's Professor of Psychology and Social Behavior; Education (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Penelope R. Collins, Ph.D. University of Toronto, Associate Professor of Education

Gilberto Q. Conchas, Ph.D. University of Michigan, Professor of Education; Sociology (urban education, sociology of education, comparative race and ethnicity)

AnneMarie M. Conley, Ph.D. University of Michigan, Assistant Professor of Education

Carol McDonald Connor, Ph.D. University of Michigan, Chancellor's Professor of Education

Kevin Dempsey, M.S. California State University, Fullerton, Lecturer of Education

Greg Duncan, Ph.D. University of Michigan, UCI Distinguished Professor of Education; Economics; Psychology and Social Behavior (economics of education, program evaluation, child development)

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, UCI Distinguished Professor of Education; Psychology and Social Behavior (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

Dennis Evans, Ed.D. University of Southern California, Non-Senate Academic Emeritus of Education

George Farkas, Ph.D. Cornell University, Professor of Education; Sociology (social ethnic minority education, cognition, behavior)

Cynthia Feliciano, Ph.D. University of California, Los Angeles, Associate Professor of Sociology; Chicano/Latino Studies; Education (race/ethnicity/ minority relations, migration and immigration, education)

David John Frank, Ph.D. Stanford University, Professor of Sociology; Education; Political Science (globalization, sexuality, the natural environment, higher education)

Wendy A. Goldberg, Ph.D. University of Michigan, Professor of Psychology and Social Behavior; Education (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Jody Guarino, Ed.D. Azusa Pacific University, Lecturer and Supervisor of Teacher of Education

Susan Guilfoyle, M.S. University of Southern California, Lecturer of Education (reading, language and literacy)

Gillian Hayes, Ph.D. Georgia Institute of Technology, Professor of Informatics; Education (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work, educational technology, ubiquitous computing)

Marie-Charlotte Henderson, M.A. University of California, Irvine, Lecturer of Education

Alan R. Hoffer, Ph.D. University of Michigan, Professor Emeritus of Education

Jeffrey J. Hruby, M.A. University of Southern California, Fullerton, Lecturer of Education

Bradley S. Hughes, Ph.D. University of California, Irvine, Lecturer with Security of Employment of Ecology and Evolutionary Biology; Education

Karajean Hyde, M.A. Vanguard University, Lecturer of Education (mathematics education)

Mizuko Ito, Ph.D. Stanford University, John D. and Catherine T. MacArthur Foundation Chair in Digital Media and Learning and Professor in Residence of Anthropology; Education; Informatics (ethnography, game studies, youth culture, learning sciences, online communities)

Susanne M. Jaeggi, Ph.D. University of Bern, Associate Professor of Education

Susan C. Jarratt, Ph.D. University of Texas at Austin, Professor of Comparative Literature; Culture and Theory; Education (histories and theories of rhetoric, ancient Greek rhetoric, writing studies)

Jade Marcus Jenkins, Ph.D. University of North Carolina at Chapel Hill, Assistant Professor of Education

Jeffrey M. Johnston, M.A. University of Southern California, Lecturer of Education

Hosun Kang, Ph.D. Michigan State University, Assistant Professor of Education

Joshua F. Lawrence, Ed.D. Boston University, Assistant Professor of Education
Glenn S. Levine, Ph.D. University of Texas at Austin, *German Language Program Director and Professor of German; Education* (applied linguistics, foreign language pedagogy, German-Jewish culture and history, Yiddish language and culture, European culinary history)

Julia R. Lupton, Ph.D. Yale University, *Associate Dean for Research and Professor of English; Comparative Literature; Education* (Renaissance literature, literature and psychology)

Virginia Mann, Ph.D. Massachusetts Institute of Technology, *Professor of Cognitive Sciences; Education; Linguistics* (reading ability: phenome awareness, developmental dyslexia, phonological skills, early intervention, precocious readers; speech perception: context effects, cross-linguistic comparisons)

Jack R. McCullough, Ph.D. United States International University, *Lecturer with Security of Employment Emeritus of Education*

Carol Booth Olson, Ph.D. University of California, Los Angeles, *Associate Professor of Education*

Rita W. Peterson, Ph.D. University of California, Berkeley, *Senior Lecturer with Security of Employment Emerita of Education*

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education; Informatics; Psychology and Social Behavior* (child development, parenting, peer interactions, media, program evaluation)

Maria F. Rosales Rueda, Ph.D. University of Chicago, *Assistant Professor of Education; Economics*

Ruben G. Rumbaut, Ph.D. Brandeis University, *Distinguished Professor of Sociology; Criminology, Law and Society; Education* (international migration, immigration laws, criminalization, incarceration, social inequality and mobility, race and ethnicity)

Judith Haymore Sandholtz, Ph.D. Stanford University, *Professor of Education*

Rossella Santagata, Ph.D. University of California, Los Angeles, *Associate Professor of Education*

Robin C. Scarcella, Ph.D. University of Southern California, *Professor of Academic English/English as a Second Language; Education*

Tesha Sengupta-Irving, Ph.D. Stanford University, *Assistant Professor of Education*

Therese B. Shanahan, Ed.D. University of Southern California, *Lecturer of Education*

Sandra Simpkins, Ph.D. University of California, Riverside, *Associate Professor of Education* (organized after-school activities, motivation, family influences, diversity and equity, immigration and culture, STEM)

Jeanne M. Stone, M.A. California State University, Long Beach, *Lecturer of Education*

Timothy M. Tift, M.A. Pepperdine University, *Lecturer with Security of Employment Emeritus of Education*

William M. Tomlinson, Ph.D. Massachusetts Institute of Technology, *Professor of Informatics; Education* (environmental informatics, educational technology, computer graphics/visualization/digital arts)

Deborah Lowe Vandell, Ph.D. Boston University, *Professor of Education; Criminology, Law and Society; Psychology and Social Behavior* (longitudinal studies of development, early childhood education, after-school programs, summer learning, child development, adolescent development)

Brad W. Vanpatten, M.A. California State University, Long Beach, *Lecturer of Education*

Mark J. Warschauer, Ph.D. University of Hawaii at Manoa, *Professor of Education; Informatics* (language, literacy, technology)

Di Xu, Ph.D. Colombia University, *Assistant Professor of Education*

Elizabeth van Es, Ph.D. Northwestern University, *Associate Professor of Education*

**Courses**

**EDUC 10. Educational Research Design. 4 Units.**

Designed to help students become intelligent consumers of research and independent researchers, this course provides an introduction to the basic principles of educational research. Topics include research questions, literature reviews, and qualitative and quantitative research designs.

(III)
EDUC 15. Statistics for Education Research. 4 Units.
Provides an introduction to the use of statistics in educational research. Focuses on testing and measurement, and provides basic tools to read, interpret, and draw conclusions from quantitative educational research.
Prerequisite: EDUC 10.
Overlaps with SOCECOL 13.
(Va)

EDUC 30. 21st Century Literacies. 4 Units.
Provides an overview of literacies required for academic and career success in the 21st century. Issues addressed include reading, writing, academic language, research skills, media and technology skills, scientific literacy, critical thinking, communication, collaboration, and creativity. Course may be offered online.
(III)

EDUC 40. Theories of Development and Learning Applied to Education. 4 Units.
Provides an introductory examination of central theories of human development and learning in their application to contemporary educational settings. Course may be offered online.
(III)

EDUC 50. Origins, Purposes, and Central Issues in K-12 Education. 4 Units.
An introduction to the role of education in U.S. society and to central issues in K–12 education. Education is studied from four different perspectives: social, historical, philosophical, and political. Course may be offered online.

EDUC 55. Knowing and Learning in Mathematics and Science. 5 Units.
Multidisciplinary study of knowing and learning in secondary school mathematics and science. Topics include standards for knowing, scientific epistemologies, mental representations, problem solving, expert-novice studies, assessment, and domain-specific thinking, learning, and teaching. Applied analysis of learning through clinical interviews.
Prerequisite: PHY SCI 5 or BIO SCI 14.
(III)

EDUC 100. Educational Strategies for Tutoring and Teacher Aiding. 4 Units.
Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.
Same as ENGR 197A.

EDUC 104D. Preparation for Teaching Fine Arts in K-12 Schools. 4 Units.
Arts education, theory, curriculum and methods for university students specializing in studio art, digital arts, dance, music, and/or drama. Includes lesson planning and teaching strategies based on California and national frameworks and content standards, and fieldwork in K–12 settings.

EDUC 104E. Multimedia and the Arts in the Multicultural Classroom. 4 Units.
Multiculturalism and under-represented U.S. minorities and the visual and performing arts: perspectives in artistic perception, creative expression, historical and cultural context, aesthetic valuing, and media literacy in the interpretation and production of multimedia arts products and applications for K-12 classrooms.

EDUC 106. Introduction to Early Childhood Education. 4 Units.
Designed to provide an introductory survey of the nature, needs, and education of young children. Explores questions such as "What should we teach young children?" and "How should we teach?".

EDUC 107. Child Development in Education. 4 Units.
Explores the pathways of normally developing children's growth and change over time. In particular, focuses on how cognitive and social development impact and are driven by educational contexts.

EDUC 108. Adolescent Development and Education. 4 Units.
Explores the physical, cognitive, emotional, and social development of adolescents, with an emphasis on the practical implications of developmental theory and research findings for teachers and other professionals who work with adolescents in middle or high school contexts.
EDUC 109. Reading and Writing in Secondary Mathematics and Science Classrooms. 4 Units.
Emphasis is placed on understanding the literacy processes (listening, speaking, viewing, thinking, reading, and writing) as they relate to middle and high school mathematics and science. Students integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.
Corequisite: EDUC 158.

EDUC 122A. Foundations of Elementary School Mathematics I. 4 Units.
Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.
Prerequisite: EDUC 122A.

EDUC 122B. Foundations of Elementary School Mathematics II. 4 Units.
Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.
Prerequisite: EDUC 122B.

EDUC 122C. Foundations of Elementary School Mathematics III. 4 Units.
Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.
Prerequisite: EDUC 122B.

EDUC 124. Multicultural Education in K-12 Schools. 4 Units.
Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S.-born minority student populations in an increasingly diverse and changing society. Same as CHC/LAT 183.

EDUC 125. Children, Schools, and Cinema. 4 Units.
Through popular films, analyzes aspects of school dynamics and interaction of schools with students, teachers, and public. Melding educational studies and film studies provides deeper understanding of methods used to transmit information and attitudes about schools to the lay public.

EDUC 126. Ethics and Education. 4 Units.
Ethics in education and how ethicists frame moral problems. Presents major ethical themes that affect education. Analysis of models for dealing with ethical goals and developing morality for K–12 students. Models for solving ethical dilemmas within an educational context.
Prerequisite: EDUC 50.

EDUC 128. Exceptional Learners. 4 Units.
An introductory survey of the nature, needs, and education of K–12 children with exceptionalities. Covers the categories and characteristics of exceptionalities, relevant state and federal legislation, and the role of general education teachers in special education.

EDUC 130. Children’s Learning and Media. 4 Units.
Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

EDUC 131. Educational Technology. 4 Units.
Presents an overview of the types and uses of educational technology to support and enhance the K–12 learning experience. Familiarizes students with lesson planning, instructional design, learning theory, and integrating technology into the curriculum. Course may be offered online.

EDUC 132. Reading and Writing Enrichment for After-School Programs. 4 Units.
Examines literacy development and the implementation of research-based practices to enrich learners’ reading and writing skills in after-school programs. A minimum of 20 hours of after-school program fieldwork is required in order to design and implement literacy enrichment activities.

EDUC 134. Teaching English Internationally. 4 Units.
Covers methods of teaching English as a foreign language, basic language knowledge for English teachers, the social context of English language teaching around the world, and essential information about securing international employment as an English teacher.
EDUC 137. Art in the Elementary School. 4 Units.
Theory and practice in art education for the elementary school classroom. Includes content and pedagogy for future teachers and others interested in the relationship between child development and the production of visual art. Materials fee.

EDUC 138. Children's Literature in the Elementary Classroom. 4 Units.
Explores the wealth of children's literature that can be integrated into the elementary classroom. Surveys traditional literature, fiction, nonfiction, and poetry that make curriculum accessible to all students. Focuses on literary elements for both reading and creating text.

EDUC 141A. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141J.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141B. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141K.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141C. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lecture, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141L.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141D. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141M.

EDUC 141E. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141N.

EDUC 141F. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141O.

EDUC 141G. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141P.
EDUC 141H. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141Q.

EDUC 141I. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141R.

EDUC 143AW. Classroom Interactions I. 4 Units.
Focuses on research-based instructional strategies for enhancing the learning of secondary mathematics and science. Students learn about adolescent and second-language development to assist them in developing analyzing, teaching, and critiquing lessons for secondary classrooms.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

EDUC 143BW. Classroom Interactions II. 4 Units.
Focuses on equity and multicultural education research, special education, and research-based instructional and assessment strategies to assist students in designing, teaching, and assessing lessons that meet the needs of all secondary mathematics and science students.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 148. Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VII)

EDUC 145. Theories and Pedagogies of Race in Education. 4 Units.
Introduces theoretical frameworks to examine the role of race in American education. Emphasis is placed on introducing students to different race and ethnicity paradigms.

EDUC 148. Complex Pedagogical Design. 6 Units.
In this Cal Teach capstone course, students design lesson plans and complex instructional units, using approaches such as mathematics and science integration, problem-based instruction, project-based learning, technology, representations, scientific and mathematical analysis/modeling, authentic assessment, contextualization, and designing equitable learning environments.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW.

EDUC 149. Family, School, and Community in Early Childhood. 4 Units.
Focuses on the many socializing aspects of young children's social worlds. Through the use of ecological perspectives, explores the role of families, schools, and communities on children's social development, especially in early childhood.

EDUC 150. Changing the High School Experience. 4 Units.
Analysis of problems in high school education (e.g., student disengagement and underachievement of disadvantaged) and proposals for changing curriculum, instruction, and school organization. Students suggest own reforms and analyze effective/ineffective school practices.

Prerequisite: Recommended: 1 unit of EDUC 199.

EDUC 151. Language and Literacy. 4 Units.
Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as PSY BEH 192V.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 153A. Urban Youth and the Development of Literacy through the Arts I. 4 Units.
Brings together research and practice on innovative instructional strategies for developing urban-student literacy through visual, communicative, and performing arts. UCI students are involved in an intervention at a local school.
EDUC 153B. Urban Youth and the Development of Literacy through the Arts II. 4 Units.
Building on knowledge gained in Education 153A, focuses on practices for developing urban-student literacy. Students are required to complete 40 hours of fieldwork, participating in an actual intervention at a local school.
Prerequisite: EDUC 153A.

EDUC 156. Introduction to Field Methods in Education. 4 Units.
Introduces students to methods for studying human behavior in context. It prepares students for conducting applied educational research, including designing needs assessments; conducting observations, interviews and focus groups; organizing and analyzing data; and synthesizing and presenting research findings.
Prerequisite: EDUC 10.

EDUC 157. Educational Research and Evaluation. 4 Units.
Covers qualitative and quantitative research methods relevant for the evaluation of educational programs. Students will have the opportunity to plan, execute, and write-up a small evaluation project.
Prerequisite: EDUC 10 and EDUC 15.

EDUC 158. Student Teaching Mathematics and Science in Middle/High School. 6 Units.
Student teaching includes orientation, seminars, preparation, and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar. Five days/week and a minimum four hours/day over two quarters.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148.

EDUC 158F. Advanced Fieldwork in Middle/High School Math and Science. 3 Units.
Advanced fieldwork for math and science teacher credential candidates over two quarters, prior to starting a fall student teaching assignment. Requires a minimum of 40 hours per quarter of fieldwork in a K-12 classroom and attendance at weekly seminars.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148.
Repeatability: May be taken for credit for 6 units.

EDUC 159. Experimental Research Methods. 4 Units.
Designed to help students to develop the ability to think critically about research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement a research study.
Prerequisite: EDUC 10 and EDUC 15.

EDUC 160. Foundations of Out-of-School Learning. 4 Units.
Provides an overview of child and adolescent learning through participation in out-of-school activities and settings. Recognizes the importance of matching out-of-school experiences with the interests, needs, and development level of students. Observation-based fieldwork included. Course may be offered online.
Repeatability: May be taken for credit 2 times.
Restriction: May be taken a second time if student is a candidate for Certificate in After-School Education, and the first time was prior to Fall 2008.

EDUC 160L. After-school Programs Fieldwork. 1-2 Units.
Supervised fieldwork at an after-school program. Fieldwork is under the direction of an Education faculty member and an after-school program supervisor.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 4 units.

EDUC 161. Discovering Science in Out-of-School Hours. 4 Units.
Examines the design principles and teaching techniques that science museums and other out-of-school science programs use to motivate children and youth to learn science through discovery. Includes field experience at a science learning center or after-school program. Materials fee.
EDUC 173. Cognition and Learning in Educational Settings. 4 Units.
Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as PSY BEH 192T.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 175. Foundations of Education. 4 Units.
Foundational questions of education are viewed from newly emerging developmental perspectives which treat cognition as embodied action and learning as cultural recapitulation. Historical, sociological, psychological, and philosophical implications of views toward aspects of teaching, learning, curriculum, and pedagogy are considered.

EDUC 176. Psychology of Learning, Abilities, and Intelligence. 4 Units.
Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYCH 7A or PSY BEH 9.

Same as PSY BEH 192U.

Restriction: Psychology and Social Behavior, Social Ecology, and Education majors have first consideration for enrollment.

EDUC 179W. Advanced Composition for Teachers. 4 Units.
Principles of formal composition and problems of teaching. Selecting handbooks and ancillary reading, marking papers, making assignments, and conducting workshops and tutorials.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as WRITING 179W.

Restriction: Upper-division students only.

(Ib)

EDUC 180. Interdisciplinary Topics in Education. 4 Units.
Analysis of issues in education from interdisciplinary perspectives. Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

EDUC 181A. Principles and Practices of Coaching Sports I. 4 Units.
Focuses on foundational theories and instructional practices in coaching sports from fourth grade to the collegiate level. Prepares students for the coach's mandatory state certification examination for high school sports in California.

EDUC 185. Social Development in Education. 4 Units.
Examination of contextual, psychosocial, and biological factors contributing to the social development of children and adolescents. Theoretical perspectives, empirical findings, and methodological issues are emphasized. Implications of the scientific evidence for practical and policy decision-making surrounding development are discussed.

EDUC 190. Principles and Practices of K–6 After School Sports and Fitness. 4 Units.
Focuses on foundational theories and instructional practices in after-school sports and fitness for K–6 students. Includes a 20-hour field experience in an after-school setting.

EDUC 191. Advanced Fieldwork in After-School Education. 4 Units.
Capstone fieldwork experience for students seeking to earn the Department of Education-sponsored Certificate in After-School Education. Students are required to complete 50 or more hours of fieldwork and related assignments at an instructor-approved after-school program.

Prerequisite: EDUC 160.

EDUC 193. Directed Studies in Early Childhood Education. 2-4 Units.
Advanced study of early childhood education under the direction of a faculty member, coupled with a community-based practicum.

Repeatability: May be repeated for credit unlimited times.
EDUC 198. Directed Research in Education. 2-8 Units.
Individually or in small groups, students are exposed to or participate in work related to a faculty member’s research. Students also attend a weekly seminar and complete a research paper or comparable project.

Repeatability: May be taken for credit for 12 units.

Restriction: Sophomore only or Juniors only or Seniors only.

EDUC 199. Individual Study. 1-4 Units.
Intensified advanced study in areas in which a student has considerable background, under the direction of a faculty member who will guide and evaluate the study.

EDUC 201. Teachers’ Lives and Policy Environment of Teaching. 4 Units.
Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom level.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 202. Outcomes of Schooling/Student Assessment. 4 Units.
Focuses on establishment of learning goals and assessment tools that are valid for all students, inform educational decisions, and promote educational success. Provides critical examination of different forms of assessment used in K–12 schools, including developmental assessments and appropriate interventions.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 203. Advanced Concepts in Learning and Cognition. 4 Units.
Theories of cognition and their application to thinking and learning in school settings. Topics include memory, information processing, knowledge representation, problem solving, meta-cognition, and intelligence.

Prerequisite: EDUC 173.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 205. Critical Assessment of Teaching Practice and Learning. 4 Units.
Student articulates a problem in instructional practice and uses research on cognition, assessment, and other tools to understand the problem. Capstone course emphasizes practices of teacher inquiry, reflection, and professional collaboration. Student’s written analyses are evaluated as program’s Comprehensive Examination.

Restriction: Master of Arts in Teaching Program students only.

EDUC 206. Design of Learning Environments for Teachers in Secondary School Subjects. 4 Units.
Research on comprehension, conceptual understanding, reasoning, critical thinking, and problem solving with applications to pedagogy in secondary school subjects. Required for M.A.T. single subject students, unless substitution of Education 207 is authorized.

EDUC 207. Cognition and Pedagogy in Quantitative Literacy. 4 Units.
Reviews research on cognition in elementary mathematics, including numeracy, fractions, probability, proportionality, measurement, geometry, algebra. Emphasizes instructional approaches consistent with this research knowledge. Required for M.A.T. multiple subjects students, unless substitution of Education 206 is authorized by the Department.

EDUC 208. Reading Development. 4 Units.
Course will focus on the language and literacy development of typically-developing native English-speaking students in the U.S. Students will learn about seminal and recent research in the field of reading development.

Restriction: Graduate students only.

EDUC 210. Language, Literacy, and Discourse. 4 Units.
Introduces students to the interdisciplinary study of language, literacy, and discourse across historical and educational contexts. Addresses theories of how people learn, interact, and make meaning through a variety of semiotic resources, including oral communication, print, and digital media.

Restriction: Graduate students only.

EDUC 211. Writing Theory and Practice. 4 Units.
Offers an overview of histories, theories, and research in the field of composition studies from 1950 to the present. Addresses the influences of theory and research on teaching practice at K–12 and college levels.

Restriction: Graduate students only.
EDUC 212. Literacy and Technology. 4 Units.
Examines theoretical, historical, and contemporary relationships of technology and literacy. Topics include online communication, multimodality, video games, the use of technology for literacy instruction in schools, and research approaches for investigating literacy development with technology.
Restriction: Graduate students only.

EDUC 218. Special Topics in Language, Literacy, and Technology. 4 Units.
Advanced seminar designed to engage students in highly interactive examination of current issues in language, literacy, and technology. Topics and content will vary by quarter, depending upon research interests of the faculty and students.
Repeatability: May be taken for credit 10 times as topics vary.
Restriction: Graduate students only.

EDUC 220. Developing Adolescent Literacy. 4 Units.
Examines how adolescents leverage vocabulary knowledge, word-reading skills, background understanding, and knowledge of content-specific text features to master an increasing range of texts both independently and for subject-area learning.
Restriction: Graduate students only.

EDUC 222. Research Epistemologies and Methodologies. 4 Units.
Introduction to epistemological underpinnings of educational research and to a range of research methodologies in education. Includes examination of quantitative and qualitative studies through reading and analyzing contemporary research. Critique of selected research studies pertinent to educational practice and policy.
Restriction: Ed.D. Program students only.

EDUC 225. Learning, Development, and Culture. 4 Units.
Explores issues of learning and development through a cultural lens. The interplay between culture and learning and culture and development is analyzed through the discussion of relevant readings from both psychological and anthropological research traditions.
Restriction: Graduate students only.

EDUC 229. Theories of Human Development. 4 Units.
Examines developmental theory as a guide for research and practice in education. The evolution of classical development theories and the emergence of new theoretical models are considered. Theoretical perspectives include ecological systems, life course, psychobiology, attachment, and social-cognitive theories.
Restriction: Graduate students only.

EDUC 230. The History and Culture of Schooling in the United States. 4 Units.
Considers the historical, cultural, and structural processes that contextualize American schooling. In particular, examines the roles of race, class, and gender in the context of public education in the United States.
Restriction: Master of Arts in Teaching students only.

EDUC 235. Psychology of Reading Acquisition. 4 Units.
Surveys theory and empirical evidence concerning acquisition, cognitive processes, and consequences of skilled reading. Explores psychological models of skilled reading, how children acquire reading and writing skills in their home and second languages, cognitive consequences of acquiring literacy skills.
Restriction: Graduate students only.

EDUC 238. Special Topics in Learning, Cognition, and Development. 4 Units.
An advanced seminar designed to engage students in highly interactive examination of current issues in learning, cognition, and development. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.
Restriction: Graduate students only.

EDUC 240. Instructional Design and Education Technology. 4 Units.
Design of high-quality instructional units consistent with current theory and research in cognitive psychology and constructivist-compatible instructional practice and infused with appropriate uses of computer and video technologies. Students design a complete instructional unit using these principles.
Restriction: Master of Arts in Teaching Program students only.
EDUC 241. Children’s Sense Making in Science. 2 Units.
Investigates elementary students as individuals who construct understanding of concepts through their interactions with others and the world around them. Observations of children in informal settings to analyze learning in context.

Restriction: Teacher Credential Program students only.

EDUC 243. The Policy Environment of Teaching. 2 Units.
Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom level.

EDUC 245. Learning Inside and Outside of School. 2 Units.
A field-based course focused on observing adolescents in out-of-school contexts to examine adolescent learning and development in a range of contexts, how out-of-school contexts motivate learning and development, and consider the implications for teaching.

Restriction: Teacher Credential Program students only.

EDUC 246. Teaching Investigations: Identifying Dilemmas of Practice. 4 Units.
Focuses on identifying problems of teaching practice that arise in student teaching, examining the theoretical foundations that underlie problems of practice, and developing approaches for inquiring into strategies to systematically address instructional challenges.

Restriction: Teacher Credential Program students only.

EDUC 247. Teaching Investigations: Exploring Dilemmas of Practice. 4 Units.
Focuses on exploring problems of teaching practice that arise in student teaching, drawing on research to examine the theoretical foundations that underlie problems of practice, and to propose courses of action to address and study educational interventions.

Prerequisite: EDUC 246.

Restriction: Master of Arts in Teaching with Teacher Credential Program students only.

EDUC 248. Understanding Teacher Agency. 4 Units.
Course considers how teachers can become agents of change within their school contexts, through their participation in professional organizations, and via social media. Candidates will experiment with using different avenues for sharing images of practice and action research.

Prerequisite: EDUC 246.

Restriction: Teacher Credential Program students only.

EDUC 251. Educational Policy and Politics. 4 Units.
An in-depth study of topics relevant to educational reform and policy-making. Topics include: the policy-making process, the role of values and interest groups, policy analysis, equality of educational opportunity, systemic reform, implementation, and politics at the school site.

Restriction: Graduate students only.

EDUC 254. College Access and Persistence. 4 Units.
Introduction to how social, political, and economic forces impact college access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research and the link between K–12 schooling and postsecondary stratification.

Restriction: Graduate students only.

EDUC 255. Immigration and the New Second Generation. 4 Units.
Focuses on Asian, Latino, and Black children of immigrants. Investigates how today’s second generation adapts, incorporates into the U.S. social structure, transforms the social and economic landscape. Explores assimilation, immigrant families/communities, language, racial/ethnic identities, gender, education, changing U.S. racial structure.

Restriction: Graduate students only.

EDUC 256. Critical Case Studies in Education. 4 Units.
Examines single and multiple case studies as a method for investigating educational theory, practice, and policy. Explores types of questions that can be answered with case study research and designs, data analysis techniques, format, and style of writing case studies.

Restriction: Graduate students only.
EDUC 258. Special Topics in Educational Policy and Social Context. 4 Units.
An advanced seminar designed to engage students in highly interactive examination of current issues in educational policy and social context. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

EDUC 259. Community Research and Action. 4 Units.
Introduces the theoretical underpinnings and research approaches of the field of Community Psychology. Project-based course focused on research and action in communities, organizations, and other extra-individual units (e.g., schools).

Restriction: Graduate students only.

EDUC 261. Social and Cultural Foundations of Education. 4 Units.
Provides a critical understanding of the social and cultural foundations of education through reproduction theory. Explores the unique ways in which culture and power intersect within schools and schooling systems to reproduce and resist educational inequality.

Restriction: Graduate students only.

EDUC 264. Economic Foundations of Education and Social Policy. 4 Units.
Beginning/intermediate microeconomics course provides students with an introduction to how economists think about household decision-making, markets, benefit-cost analysis, social policy issues in general and education policy in particular.

Restriction: Graduate students only.

EDUC 265. Applied Regression Analysis for Education and Social Research. 4 Units.
Provides students with a working knowledge of multiple regression and the statistical analysis of longitudinal data. Topics include a review of the OLS regression model, event-history methods, and various other techniques for analyzing longitudinal data.

Prerequisite: EDUC 288B.

Restriction: Graduate students only.

EDUC 267. Classroom Research Methods. 4 Units.
Uses students’ research problems as the basis for exploring methods—teacher and student observation, interview, case studies, think alouds. Intended for doctoral students with a specific research question and very good grounding in the literature related to their question.

Restriction: Graduate students only.

EDUC 274. Studies of Professional and Staff Development. 2-4 Units.
Research and theory of effective strategies for professional and staff development. Topics include: adult learning as related to professional growth of teachers, staff development as vehicle for systemic reform, reforms to enhance teacher professionalization and empowerment.

Restriction: Doctoral students only.

EDUC 278. Experimental Designs in Educational Research. 4 Units.
Designed to enable students to think critically about experimental research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement an experimental research study.

Prerequisite: EDUC 222.

Restriction: Graduate students only.

EDUC 280. Research Methods. 2-8 Units.
Provides practitioners at advanced degree level with insight and leadership skills for working with increasingly diverse school populations. Content varies with interest of students and instructors. May focus on populations or broader content area such as education reform in California.

Repeatability: May be taken for credit 3 times.

Restriction: Doctoral Degree candidates only.

EDUC 282. Graduate Seminar in the History of the Philosophy of Education. 4 Units.
Draws upon results in the historical development of the philosophy of education from Plato, Quintillian, Augustine, Locke, Rousseau, to more contemporary thinkers such as Dewey, Freire, Egan, and Rorty.

Repeatability: May be repeated for credit unlimited times.
EDUC 283A. Qualitative Research Methods in Education I. 4 Units.
Introduces students to qualitative research methodologies and methods and explores strengths and challenges of this research tradition. Topics include logistical and ethical issues, reliability, validity and generalizability, and the role of reflexivity. Students will also engage in fieldwork.

Prerequisite: EDUC 222.

Restriction: Graduate students only.

EDUC 283B. Qualitative Research Methods in Education II. 4 Units.
Provides methods for conducting and analyzing qualitative research in educational settings. Topics include data collection, coding, representing qualitative data, and using software for qualitative data analysis.

Prerequisite: EDUC 283A.

Restriction: Graduate students only.

EDUC 285. Theories of Learning Cognition. 4 Units.
Overview of theories applicable to learning in schools and extracurricular contexts. Cognitive, psychometric, behavioral, and neuroscience perspectives are applied to such topics as memory, knowledge structures, problem solving, motivation, self-referent beliefs, expertise, assessment, and cognitive abilities, including intelligence.

Restriction: Graduate students only.

EDUC 287. Quantitative Data Analysis in Education Research and Evaluation. 4 Units.
Covers statistical aspects of survey-based evaluations and quantitative research in education. Includes sampling, coding open-ended information, data management, scale construction, statistical analysis, and presentation of findings. Students analyze data sets—a district-based evaluation and a national survey—using SPSS.

Prerequisite: EDUC 281.

EDUC 288A. Educational, Social, and Behavioral Statistics. 4 Units.
Designed for graduate students with previous course work in statistics, including experience with statistical software such as SPSS. The emphasis is on regression analysis and the general linear model. Students learn to analyze real data using Stata software.

Prerequisite: Prior coursework in statistics, and experience with statistical software such as SPSS.

Restriction: Graduate students only.

EDUC 288B. Structural Equation Modeling for Educ, Soc & Behavioral Analysis. 4 Units.
Rigorous introduction to structural equation modeling for students with strong prior course work in statistics. Topics include path diagrams, SEM with observed variables, factor analysis, SEM with latent variables. Maximum likelihood estimating, goodness-of-fit measures, nested models, related topics.

Prerequisite: EDUC 288A.

Restriction: Graduate students only.

EDUC 289. Use of Video in Educational Research. 4 Units.
Provides students with conceptual and methodological tools for using video in educational research. Students work with their own video data or with publicly accessible databases.

Restriction: Graduate students only.

EDUC 295. Pre-Dissertation Research. 1-12 Units.
Independent study course taken under the direction of a faculty member who guides the student's research. May include guidance on data collection, methodology, human subjects protocol, conference presentation, scholarly publication, program benchmark activities.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

EDUC 296A. Professional Writing in Educational Research I. 2 Units.
First of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 296B. Professional Writing in Educational Research II. 2 Units.
Second of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.
EDUC 298. Independent Study. 1-8 Units.
Independent research on topics related to education.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

EDUC 299. Dissertation Research. 1-12 Units.
Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Doctoral students only.

EDUC 301. Directed Elementary Field Experiences in Diverse Schools. 2 Units.
Fieldwork experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the state-mandated Teaching Performance Assessment.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Teacher Credential Program students only.

EDUC 302. Directed Secondary Field Experiences. 2 Units.
Field work experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the State-mandated Teaching Performance Assessment.

Restriction: Teacher Credential Program student only.

EDUC 304. Student Teaching in the Elementary Schools. 4-12 Units.
Student teaching seminars prepare candidates for assumption of classroom instructional responsibilities in accordance with State credentialing requirements. Four full days a week of student teaching in public school elementary classrooms in winter quarter and five full days in spring quarter.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 305. Learning to Learn from Teaching in Secondary Schools. 4 Units.
Analytic tools for (1) observing and reflecting on observed instruction; (2) examining student thinking and the relationship between teaching and learning; (3) understanding particular components of the teaching/learning process; and (4) planning effective instruction including innovative teaching practices.

Restriction: Teacher Credential Program students only.

EDUC 306. Supervised Teaching in Bilingual Education, Elementary. 4-12 Units.
Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teacher Credential Program students only.

EDUC 307. Student Teaching in Intermediate/Secondary School. 2-16 Units.
Student teaching includes orientation, seminars, and preparation for and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with public school calendar. Five full days a week in both winter and spring quarters.

Repeatability: May be taken for credit for 20 units.

Restriction: Teacher Credential Program students only.
EDUC 308. Performance Assessment for California Teachers, Multiple Subjects. 1 Unit.
Preparation and technical support for multiple subjects teacher candidates to complete State-required Teaching Performance Assessment for the California preliminary credential. Includes assistance in planning, teaching/videotaping, assessment and reflection, and document production.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 2 times.
Restriction: Teacher Credential Program students only.

EDUC 310. Performance Assessment for California Teachers. 1 Unit.
Preparation and technical support for teacher candidates to complete the required Teaching Performance Assessment for California credential licensure. Structured support for planning, videotaping, and document production occurs in meetings scheduled to coincide with the timeline for the project.

Repeatability: May be taken for credit 2 times.
Restriction: Teacher Credential Program students only.

EDUC 320. Teaching Physical and Health Education in Elementary School. 4 Units.
Methods of teaching physical education for the elementary classroom teacher. Through an interactive environment, students experience the California Physical Education and Health content standards with appropriate pedagogy. Concepts address motor skills, physical fitness, and personal responsibility for lifelong health.

Grading Option: Satisfactory/unsatisfactory only.

EDUC 322A. Curriculum and Methods for Elementary School Mathematics I. 4 Units.
Scope, sequence, and methods of teaching mathematics at all levels of elementary school. Presented through lectures, discussions, demonstrations, and exploration of a variety of materials. Covers how to plan lessons, motivate students, diagnose difficulties, and evaluate learning in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 322B. Curriculum and Methods for Elementary School Mathematics II. 4 Units.
Part two of a course addressing pedagogical methods for elementary mathematics. Lectures, discussions, and exploration of instructional strategies and materials will support preservice teacher development in the critical areas of planning, instruction, and assessment for conceptual understanding in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 323. Curriculum and Methods for Elementary School Science. 4 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 323.

EDUC 323A. Curriculum Methods in Elementary Science. 2 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, and criteria for selecting science curriculum materials.

EDUC 323B. Curriculum Methods in Elementary Science. 2 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Prerequisite: EDUC 323A.

EDUC 324. Curriculum and Methods for Elementary School Language Arts Integrated with Social Studies. 4 Units.
An integrated approach to language arts and social studies instruction at the K–6 level based on California State English/Language Arts and Social Studies Frameworks and Standards. Focus on teaching content through literature and writing and providing access for all learners.

Restriction: Teacher Credential Program students only.
EDUC 325. Teaching the Visual and Performing Arts in Elementary School. 2 Units.
Introduction to the issues and practices, including student diversity, academic literacy, and interdisciplinary content, involved in integrating the California visual and performing arts curriculum framework and academic content standards with developmentally appropriate teaching strategies for the elementary classroom.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 326. Curriculum and Methods for Elementary School Reading. 4 Units.
Teaching an integrated reading/language arts program in the elementary classroom. Implementing theories, principles, and methods which are research and reality-based. Creating a child-centered, language-rich program to meet needs of children in multicultural/multilingual settings.

Restriction: Teacher Credential Program students only.

EDUC 329. Theories and Methods of English Language Development Applied to Elementary Students. 4 Units.
Theories and methods of English language development and instruction of English language learners, with focus on elementary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades K–6 English language learners.

Restriction: Teacher Credential Program students only.

Grading Option: Satisfactory/unsatisfactory only.

EDUC 334. Literacy and Technology in the Secondary Classroom. 2 Units.
A view of literacy expanded beyond typological print, students learn: (1) strategies for incorporating, (2) tools for evaluating and selecting, and (3) learning theories for understanding how information and communication technologies and online resources contribute to general and disciplinary literacy.

Prerequisite: Limited to students accepted into the Teacher Credential Program

Restriction: Teacher Credential Program students only.

EDUC 336. Methods of Teaching Languages other than English in Secondary Schools. 4 Units.
Prepares future teachers of foreign language or primary/home language. Emphasizes hands-on, practical strategies for communication-based instruction and authentic assessment, in reading, writing, listening, speaking, and culture.

Restriction: Teacher Credential Program students only.

EDUC 337. Methods of Teaching Social Science in the Secondary School. 4 Units.
Theories, strategies, and methodologies related to the teaching of history and social science in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the History-Social Science Framework for California.

Restriction: Teacher Credential Program students only.

EDUC 338. Methods of Teaching English in the Secondary School. 2-4 Units.
Introduction to teaching reading, writing, and speaking skills in secondary school. Emphasis upon integrative approach to teaching literature, composition, and grammar consistent with the California State Framework. Practice in the design of lesson plans that are both integrated and cumulative.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 339. Methods of Teaching Visual & Performing Arts in Secondary Schools. 4 Units.
Theory, curriculum, and strategies for teaching visual and performing arts in the secondary school. Emphasis on the planning, delivery, and assessment of lessons consistent with California State Framework and content standards.

Restriction: Teacher Credential program or M.A.T. program students only.
EDUC 340. Methods of Teaching Mathematics in Secondary School. 2-4 Units.
Theories, strategies, and methodologies related to the teaching of mathematics in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the Mathematics Framework for California and the recommendations of professional organizations.

Repeatability: May be taken for credit for 4 units.
Restriction: Teacher Credential Program students only.

EDUC 341. Teaching Science in Secondary School. 4 Units.
Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 341.
Restriction: Teacher Credential Program students only.

EDUC 342. Applied Instructional Strategies in Secondary Schools. 4 Units.
Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.
Overlaps with EDUC 342A, EDUC 342B.
Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342A. Applied Instructional Strategies in Secondary. 2 Units.
Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.
Overlaps with EDUC 342.
Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342B. Applied Instructional Strategies in Secondary. 2 Units.
Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.
Overlaps with EDUC 342.
Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 345. Child Development and Educational Equity. 4 Units.
Explores theories of child development applied to teaching and learning in elementary schools. Attention is given to role of cultural norms in defining goals for child development and for educational practices and in creating equal learning opportunities for all children.

Restriction: Teacher Credential Program students only.

EDUC 346. Reading and Writing in Middle School and High School Classrooms. 4 Units.
Emphasis is placed upon understanding the literacy processes (listening, speaking, viewing, reading, and writing) as they relate to all Single Subject areas. Teachers are guided to integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Restriction: Teacher Credential Program students only.

EDUC 347. Culture, Diversity, and Educational Equity. 4 Units.
Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Prerequisite: Limited to students accepted into the Teacher Credential Program.
EDUC 347A. Culture, Diversity, and Educational Equity. 2 Units.
Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 347B. Culture, Diversity, and Educational Equity. 2 Units.
Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 348. Educational Equity and the Exceptional Learner. 2 Units.
Knowledge, skills, and strategies to teach exceptional learners in the general education classroom. Legislation pertaining to the education of exceptional learners. Role of general education teacher in the special education process. Inclusive curriculum to provide equal access to content.

Restriction: Teacher Credential Program students only.

EDUC 349. Theories and Methods of English Language Development Applied to Secondary Students. 4 Units.
Theories and methods of English language development and instruction of English language learners, with focus on secondary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades 7–12 English language learners.

Restriction: Teacher Credential Program students and M.A.T. students only.

EDUC 350. Adolescent Development in Education. 4 Units.
Secondary teachers must understand adolescent physical, cognitive, emotional, and social development, particularly how educators can promote healthy adjustment in their students. Focuses on why and how changes occur in each of these areas as children grow older.

Restriction: Teacher Credential Program students only.

EDUC 352. Creating a Supportive & Healthy Environment for Student Learning in Secondary Classrooms. 2 Units.
Creation of healthy environments for student learning in secondary classrooms. Personal, family, school, community, environmental factors. Academic, physical, emotional, social well-being of students. Legal responsibilities of teachers related to student health, safety. Communication with family and use of community resources. Course may be offered online.

Restriction: Teaching Credential Program students only.

EDUC 358. Media and Information Literacy in the Secondary Classroom. 2 Units.
A focus on how teachers can help their students to become critical, ethical, and effective users of technological resources in the secondary classroom. Students learn tools for evaluating selecting, and incorporating appropriate learning technologies into the secondary classroom.

Restriction: Teacher Credential Program students only.

EDUC 359. Curriculum and Methods for Elementary Social Science and Information Literacy. 4 Units.
Methods of instruction for Social Science at the K–6 level. Includes integration of the use of technology, development of content literacy, and use of evidence to construct arguments.

EDUC 361. The Adolescent Learner . 4 Units.
Issues of adolescent development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focus on how adolescents learn and what motivates them to learn, and how schools and teachers contribute to adolescents' growth.

Restriction: Teacher Credential Program students only.

EDUC 362. Curriculum and Methods for Elementary Language Arts and English Language Development. 4 Units.
Methods, instructional practices, and assessment strategies for teaching English-Language Arts, with a focus on instructional practices for supporting English Language Learners. Focuses on core language arts topics, including composition of persuasive, expository, and narrative texts; speaking; and listening.

EDUC 363. Methods for Integrating Visual & Performing Arts throughout Elementary School Curriculum. 2 Units.
Methods for using visual and performing arts content and processes across the curriculum with an emphasis on building literacy skills with English Language Learners (ELL).
EDUC 364. Instructional Design and Education Technology for the Elementary Classroom. 2 Units.
A focus on how teachers can effectively integrate educational technologies for teaching and learning in the elementary school classroom. Students learn tools for evaluating, selecting, and incorporating appropriate technologies into their classroom activities.

Restriction: Teacher Credential Program students only.

EDUC 373. Cognition and Learning in Educational Settings . 4 Units.
Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Restriction: Teacher Credential Program students only.

EDUC 374. Learning and Child Development . 4 Units.
Issues of child development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focus on how young children learn and develop, how schools and teachers contribute to children’s growth, and implications for instruction.

Restriction: Teacher Credential Program students only.

EDUC 398. Special Topics. 3 Units.
Meets induction and program planning requirements for students enrolled in Professional Administrative Services Credential. Also serves as final course in program, wherein the candidate, the University instructor, and a representative of the involved school district assess and evaluate candidate competency.

Repeatability: May be taken for credit 2 times.

Restriction: Professional Administrative Services Credential students only.

EDUC 399. University Teaching. 1-4 Units.
Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Graduate Degree Programs in Education

On This Page:
- Master of Arts in Teaching in Elementary and Secondary Education
  - Admission to the Program
  - Prior to the Start of the Program
  - Program of Study
  - Applying for a California Credential
- Doctor of Philosophy in Education
  - Master of Arts in Education

Master of Arts in Teaching in Elementary and Secondary Education

The School of Education offers a 14-month Master of Arts degree program in Elementary and Secondary Education. The M.A.T. with Single Subject Credential prepares candidates to teach mathematics, social science, English language arts, sciences, art, music, or world languages at the middle or high school level. The M.A.T. with Multiple Subject Credential prepares students to teach all grade levels and content areas within the elementary school curriculum. The M.A.T. program provides a rich theoretical and practical framework with a focus on Learning to Learn from Teaching, or continuously studying the impact of one’s teaching on student learning.

Admission to the Program

Selection is based on the graduate admission requirements of the UCI Graduate Division, which include the strength of the undergraduate academic record, GRE scores, statement of purpose, and letters of recommendation.

Submit an application through the Graduate Division.

Evidence of Academic Achievement—Official Transcripts from all post-secondary institutions. Completion of a baccalaureate degree from an accredited institution and a minimum grade point average of 3.0 will support admission to the credential programs. Undergraduates who enroll in courses leading to a credential are not guaranteed admission to the program; admission through the regular graduate admissions process is required.
NOTE: Applicants in the following categories must verify subject matter competence and basic skills (see below) as a condition of admission.

1. If GPA is less than 3.0.
2. If you have not completed a major, a minor, or a significant number of college-level courses in the single subject discipline for which you are applying (e.g., mathematics, English, science).

Written Recommendations. Three letters of recommendation, including at least one from an academic source, from individuals who are familiar with the applicant’s (1) ability to pursue graduate study, (2) capacity to work with children, and/or (3) demonstrated fitness for the professional environment of teaching.

Prior to the Start of the Program
- Pass the California Basic Educational Skills Test;
- Pass the required California Subject Matter Tests or complete an approved subject-matter preparation program in the content area;
- Hold a current Certificate of Clearance or Substitute Teaching Permit from the State of California;
- Hold a current TB test with negative results.

A comprehensive examination is completed by M.A.T. candidates during the second summer. The examination is an action research project embedded in EDUC 248 Understanding Teacher Agency.

A grade of B or better is required in all courses and in student teaching for successful completion of the program.

Student teaching for Multiple Subject candidates (grades K–6) is defined as a full day, four days per week during the first quarter of student teaching and a full day, five days per week during the second quarter of student teaching. Assignments will include two grade levels within the K–6 range in elementary schools.

Student teaching for Single Subject candidates (grades 7–12) in the post-baccalaureate program is defined as a full day, five days per week for one public school semester in an appropriate classroom setting in a middle or high school.
Readiness for student teaching shall be determined by, but not be limited to, academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

**Applying for a California Credential**

In addition to fulfilling all of the above requirements:

- Show evidence a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training;
- Pass the Teaching Performance Assessment

**Adding Teaching Authorizations.** After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

**Doctor of Philosophy in Education**

The School of Education offers a Ph.D. degree in Education. The program seeks applicants from varied backgrounds and experiences who have the potential to become outstanding scholars and researchers in the field of education. The program currently offers three specializations: (1) Learning, Cognition, and Development; (2) Educational Policy and Social Context; and (3) Language, Literacy, and Technology. Students enrolling in the program choose among the specializations based on their research interests. Course work for the program ordinarily takes two to three years to complete and involves a number of core courses, methodology courses, elective courses, and a directed research sequence. Students should advance to candidacy in their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Program length may be shorter for students who enter the program with a prior master’s degree in an area closely related to their doctoral research.

Students are admitted to the program once per year to begin each fall quarter. Applicants must have completed a bachelor’s degree with a grade point average of at least 3.0 and have prior course work or background related to the specialization for which they express interest. Applicants are required to submit a UCI application, transcripts, a statement of purpose, a personal statement, CV or resume, a writing sample, three letters of reference, and general GRE scores completed within the past five years. Students whose primary language is not English and who did not graduate from a U.S. college or university are also required to submit scores from either the TOEFL examination or the Academic Modules of the International English Language Testing System (IELTS).

Financial support will be offered on a competitive basis in the form of teaching or research assistantships. Students who are not citizens of countries where English is the primary or dominant language who wish to apply for a teaching assistantship will be required to fulfill an English proficiency requirement.

Further information regarding the Ph.D. program, courses, and application requirements is available at the School of Education website (http://www.education.uci.edu).

**Master of Arts in Education**

The School of Education offers an M.A. degree in Education as an option exclusively for students who are admitted to the Ph.D. in Education program. Separate applications for the M.A. in Education will not be accepted. Further information regarding the requirements for the M.A. in Education for students enrolled in the Ph.D. program is available at the School of Education website (http://www.education.uci.edu).

**Courses**

**EDUC 10. Educational Research Design. 4 Units.**

Designed to help students become intelligent consumers of research and independent researchers, this course provides an introduction to the basic principles of educational research. Topics include research questions, literature reviews, and qualitative and quantitative research designs.

**(III)**

**EDUC 15. Statistics for Education Research. 4 Units.**

Provides an introduction to the use of statistics in educational research. Focuses on testing and measurement, and provides basic tools to read, interpret, and draw conclusions from quantitative educational research.

Prerequisite: EDUC 10.

Overlaps with SOCECOL 13.

**(Va)**
EDUC 30. 21st Century Literacies. 4 Units.
Provides an overview of literacies required for academic and career success in the 21st century. Issues addressed include reading, writing, academic language, research skills, media and technology skills, scientific literacy, critical thinking, communication, collaboration, and creativity. Course may be offered online.

(III)

EDUC 40. Theories of Development and Learning Applied to Education. 4 Units.
Provides an introductory examination of central theories of human development and learning in their application to contemporary educational settings. Course may be offered online.

(III)

EDUC 50. Origins, Purposes, and Central Issues in K-12 Education. 4 Units.
An introduction to the role of education in U.S. society and to central issues in K–12 education. Education is studied from four different perspectives: social, historical, philosophical, and political. Course may be offered online.

EDUC 55. Knowing and Learning in Mathematics and Science. 5 Units.
Multidisciplinary study of knowing and learning in secondary school mathematics and science. Topics include standards for knowing, scientific epistemologies, mental representations, problem solving, expert-novice studies, assessment, and domain-specific thinking, learning, and teaching. Applied analysis of learning through clinical interviews.

Prerequisite: PHY SCI 5 or BIO SCI 14.

(III)

EDUC 100. Educational Strategies for Tutoring and Teacher Aiding. 4 Units.
Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Same as ENGR 197A.

EDUC 104D. Preparation for Teaching Fine Arts in K-12 Schools. 4 Units.
Arts education, theory, curriculum and methods for university students specializing in studio art, digital arts, dance, music, and/or drama. Includes lesson planning and teaching strategies based on California and national frameworks and content standards, and fieldwork in K–12 settings.

EDUC 104E. Multimedia and the Arts in the Multicultural Classroom. 4 Units.
Multiculturalism and under-represented U.S. minorities and the visual and performing arts: perspectives in artistic perception, creative expression, historical and cultural context, aesthetic valuing, and media literacy in the interpretation and production of multimedia arts products and applications for K-12 classrooms.

EDUC 106. Introduction to Early Childhood Education. 4 Units.
Designed to provide an introductory survey of the nature, needs, and education of young children. Explores questions such as "What should we teach young children?" and "How should we teach?".

EDUC 107. Child Development in Education. 4 Units.
Explores the pathways of normally developing children’s growth and change over time. In particular, focuses on how cognitive and social development impact and are driven by educational contexts.

EDUC 108. Adolescent Development and Education. 4 Units.
Explores the physical, cognitive, emotional, and social development of adolescents, with an emphasis on the practical implications of developmental theory and research findings for teachers and other professionals who work with adolescents in middle or high school contexts.

EDUC 109. Reading and Writing in Secondary Mathematics and Science Classrooms. 4 Units.
Emphasis is placed on understanding the literacy processes (listening, speaking, viewing, thinking, reading, and writing) as they relate to middle and high school mathematics and science. Students integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Corequisite: EDUC 158.
EDUC 122A. Foundations of Elementary School Mathematics I. 4 Units.
Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

EDUC 122B. Foundations of Elementary School Mathematics II. 4 Units.
Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122A.

EDUC 122C. Foundations of Elementary School Mathematics III. 4 Units.
Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122B.

EDUC 124. Multicultural Education in K-12 Schools. 4 Units.
Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S.-born minority student populations in an increasingly diverse and changing society.

Same as CHC/LAT 183.

(VII)

EDUC 125. Children, Schools, and Cinema. 4 Units.
Through popular films, analyzes aspects of school dynamics and interaction of schools with students, teachers, and public. Melding educational studies and film studies provides deeper understanding of methods used to transmit information and attitudes about schools to the lay public.

EDUC 126. Ethics and Education. 4 Units.
Ethics in education and how ethicists frame moral problems. Presents major ethical themes that affect education. Analysis of models for dealing with ethical goals and developing morality for K–12 students. Models for solving ethical dilemmas within an educational context.

Prerequisite: EDUC 50.

EDUC 128. Exceptional Learners. 4 Units.
An introductory survey of the nature, needs, and education of K–12 children with exceptionalities. Covers the categories and characteristics of exceptionalities, relevant state and federal legislation, and the role of general education teachers in special education.

EDUC 130. Children’s Learning and Media. 4 Units.
Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

EDUC 131. Educational Technology. 4 Units.
Presents an overview of the types and uses of educational technology to support and enhance the K–12 learning experience. Familiarizes students with lesson planning, instructional design, learning theory, and integrating technology into the curriculum. Course may be offered online.

EDUC 132. Reading and Writing Enrichment for After-School Programs. 4 Units.
Examines literacy development and the implementation of research-based practices to enrich learners’ reading and writing skills in after-school programs. A minimum of 20 hours of after-school program fieldwork is required in order to design and implement literacy enrichment activities.

EDUC 134. Teaching English Internationally. 4 Units.
Covers methods of teaching English as a foreign language, basic language knowledge for English teachers, the social context of English language teaching around the world, and essential information about securing international employment as an English teacher.

EDUC 137. Art in the Elementary School. 4 Units.
Theory and practice in art education for the elementary school classroom. Includes content and pedagogy for future teachers and others interested in the relationship between child development and the production of visual art. Materials fee.

EDUC 138. Children’s Literature in the Elementary Classroom. 4 Units.
Explores the wealth of children’s literature that can be integrated into the elementary classroom. Surveys traditional literature, fiction, nonfiction, and poetry that make curriculum accessible to all students. Focuses on literary elements for both reading and creating text.
EDUC 141A. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141J.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141B. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141K.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141C. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lecture, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141L.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141D. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141M.

EDUC 141E. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141N.

EDUC 141F. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141O.

EDUC 141G. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141P.

EDUC 141H. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141Q.
EDUC 141I. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.
Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).
Same as PSYCH 141R.

EDUC 143AW. Classroom Interactions I. 4 Units.
Focuses on research-based instructional strategies for enhancing the learning of secondary mathematics and science. Students learn about adolescent and second-language development to assist them in developing analyzing, teaching, and critiquing lessons for secondary classrooms.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55. Satisfactory completion of the Lower-Division Writing requirement.

EDUC 143BW. Classroom Interactions II. 4 Units.
Focuses on equity and multicultural education research, special education, and research-based instructional and assessment strategies to assist students in designing, teaching, and assessing lessons that meet the needs of all secondary mathematics and science students.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 148. Satisfactory completion of the Lower-Division Writing requirement.

EDUC 145. Theories and Pedagogies of Race in Education. 4 Units.
Introduces theoretical frameworks to examine the role of race in American education. Emphasis is placed on introducing students to different race and ethnicity paradigms.

EDUC 148. Complex Pedagogical Design. 6 Units.
In this Cal Teach capstone course, students design lesson plans and complex instructional units, using approaches such as mathematics and science integration, problem-based instruction, project-based learning, technology, representations, scientific and mathematical analysis/modeling, authentic assessment, contextualization, and designing equitable learning environments.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW.

EDUC 149. Family, School, and Community in Early Childhood. 4 Units.
Focuses on the many socializing aspects of young children's social worlds. Through the use of ecological perspectives, explores the role of families, schools, and communities on children's social development, especially in early childhood.

EDUC 150. Changing the High School Experience. 4 Units.
Analysis of problems in high school education (e.g., student disengagement and underachievement of disadvantaged) and proposals for changing curriculum, instruction, and school organization. Students suggest own reforms and analyze effective/ineffective school practices.
Prerequisite: Recommended: 1 unit of EDUC 199.

EDUC 151. Language and Literacy. 4 Units.
Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.
Same as PSY BEH 192V.
Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 153A. Urban Youth and the Development of Literacy through the Arts I. 4 Units.
Brings together research and practice on innovative instructional strategies for developing urban-student literacy through visual, communicative, and performing arts. UCI students are involved in an intervention at a local school.

EDUC 153B. Urban Youth and the Development of Literacy through the Arts II. 4 Units.
Building on knowledge gained in Education 153A, focuses on practices for developing urban-student literacy. Students are required to complete 40 hours of fieldwork, participating in an actual intervention at a local school.
Prerequisite: EDUC 153A.
EDUC 156. Introduction to Field Methods in Education. 4 Units.
Introduces students to methods for studying human behavior in context. It prepares students for conducting applied educational research, including designing needs assessments; conducting observations, interviews and focus groups; organizing and analyzing data; and synthesizing and presenting research findings.
Prerequisite: EDUC 10.

EDUC 157. Educational Research and Evaluation. 4 Units.
Covers qualitative and quantitative research methods relevant for the evaluation of educational programs. Students will have the opportunity to plan, execute, and write-up a small evaluation project.
Prerequisite: EDUC 10 and EDUC 15.

EDUC 158. Student Teaching Mathematics and Science in Middle/High School. 6 Units.
Student teaching includes orientation, seminars, preparation, and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar. Five days/week and a minimum four hours/day over two quarters.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148.

EDUC 158F. Advanced Fieldwork in Middle/High School Math and Science. 3 Units.
Advanced fieldwork for math and science teacher credential candidates over two quarters, prior to starting a fall student teaching assignment. Requires a minimum of 40 hours per quarter of fieldwork in a K-12 classroom and attendance at weekly seminars.
Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148.
Repeatability: May be taken for credit for 6 units.

EDUC 159. Experimental Research Methods. 4 Units.
Designed to help students to develop the ability to think critically about research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement a research study.
Prerequisite: EDUC 10 and EDUC 15.

EDUC 160. Foundations of Out-of-School Learning. 4 Units.
Provides an overview of child and adolescent learning through participation in out-of-school activities and settings. Recognizes the importance of matching out-of-school experiences with the interests, needs, and development level of students. Observation-based fieldwork included. Course may be offered online.
Repeatability: May be taken for credit 2 times.
Restriction: May be taken a second time if student is a candidate for Certificate in After-School Education, and the first time was prior to Fall 2008.

EDUC 160L. After-school Programs Fieldwork. 1-2 Units.
Supervised fieldwork at an after-school program. Fieldwork is under the direction of an Education faculty member and an after-school program supervisor.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 4 units.

EDUC 161. Discovering Science in Out-of-School Hours. 4 Units.
Examines the design principles and teaching techniques that science museums and other out-of-school science programs use to motivate children and youth to learn science through discovery. Includes field experience at a science learning center or after-school program. Materials fee.

EDUC 173. Cognition and Learning in Educational Settings. 4 Units.
Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.
Same as PSY BEH 192T.
Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 175. Foundations of Education. 4 Units.
Foundational questions of education are viewed from newly emerging developmental perspectives which treat cognition as embodied action and learning as cultural recapitulation. Historical, sociological, psychological, and philosophical implications of views toward aspects of teaching, learning, curriculum, and pedagogy are considered.
EDUC 176. Psychology of Learning, Abilities, and Intelligence. 4 Units.
Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYCH 7A or PSY BEH 9.

Same as PSY BEH 192U.

Restriction: Psychology and Social Behavior, Social Ecology, and Education majors have first consideration for enrollment.

EDUC 179W. Advanced Composition for Teachers. 4 Units.
Principles of formal composition and problems of teaching. Selecting handbooks and ancillary reading, marking papers, making assignments, and conducting workshops and tutorials.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as WRITING 179W.

Restriction: Upper-division students only.

(lb)

EDUC 180. Interdisciplinary Topics in Education. 4 Units.
Analysis of issues in education from interdisciplinary perspectives. Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

EDUC 181A. Principles and Practices of Coaching Sports I. 4 Units.
Focuses on foundational theories and instructional practices in coaching sports from fourth grade to the collegiate level. Prepares students for the coach's mandatory state certification examination for high school sports in California.

EDUC 185. Social Development in Education. 4 Units.
Examination of contextual, psychosocial, and biological factors contributing to the social development of children and adolescents. Theoretical perspectives, empirical findings, and methodological issues are emphasized. Implications of the scientific evidence for practical and policy decision-making surrounding development are discussed.

EDUC 190. Principles and Practices of K–6 After School Sports and Fitness. 4 Units.
Focuses on foundational theories and instructional practices in after-school sports and fitness for K–6 students. Includes a 20-hour field experience in an after-school setting.

EDUC 191. Advanced Fieldwork in After-School Education. 4 Units.
Capstone fieldwork experience for students seeking to earn the Department of Education-sponsored Certificate in After-School Education. Students are required to complete 50 or more hours of fieldwork and related assignments at an instructor-approved after-school program.

Prerequisite: EDUC 160.

EDUC 193. Directed Studies in Early Childhood Education. 2-4 Units.
Advanced study of early childhood education under the direction of a faculty member, coupled with a community-based practicum.

Repeatability: May be repeated for credit unlimited times.

EDUC 198. Directed Research in Education. 2-8 Units.
Individually or in small groups, students are exposed to or participate in work related to a faculty member's research. Students also attend a weekly seminar and complete a research paper or comparable project.

Repeatability: May be taken for credit for 12 units.

Restriction: Sophomore only or Juniors only or Seniors only.

EDUC 199. Individual Study. 1-4 Units.
Intensified advanced study in areas in which a student has considerable background, under the direction of a faculty member who will guide and evaluate the study.
EDUC 201. Teachers' Lives and Policy Environment of Teaching. 4 Units.
Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom level.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 202. Outcomes of Schooling/Student Assessment. 4 Units.
Focuses on establishment of learning goals and assessment tools that are valid for all students, inform educational decisions, and promote educational success. Provides critical examination of different forms of assessment used in K–12 schools, including developmental assessments and appropriate interventions.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 203. Advanced Concepts in Learning and Cognition. 4 Units.
Theories of cognition and their application to thinking and learning in school settings. Topics include memory, information processing, knowledge representation, problem solving, meta-cognition, and intelligence.

Prerequisite: EDUC 173.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 205. Critical Assessment of Teaching Practice and Learning. 4 Units.
Student articulates a problem in instructional practice and uses research on cognition, assessment, and other tools to understand the problem. Capstone course emphasizes practices of teacher inquiry, reflection, and professional collaboration. Student's written analyses are evaluated as program's Comprehensive Examination.

Restriction: Master of Arts in Teaching Program students only.

EDUC 206. Design of Learning Environments for Teachers in Secondary School Subjects. 4 Units.
Research on comprehension, conceptual understanding, reasoning, critical thinking, and problem solving with applications to pedagogy in secondary school subjects. Required for M.A.T. single subject students, unless substitution of Education 207 is authorized.

EDUC 207. Cognition and Pedagogy in Quantitative Literacy. 4 Units.
Reviews research on cognition in elementary mathematics, including numeracy, fractions, probability, proportionality, measurement, geometry, algebra. Emphasizes instructional approaches consistent with this research knowledge. Required for M.A.T. multiple subjects students, unless substitution of Education 206 is authorized by the Department.

EDUC 208. Reading Development . 4 Units.
Course will focus on the language and literacy development of typically-developing native English-speaking students in the U.S. Students will learn about seminal and recent research in the field of reading development.

Restriction: Graduate students only.

EDUC 210. Language, Literacy, and Discourse. 4 Units.
Introduces students to the interdisciplinary study of language, literacy, and discourse across historical and educational contexts. Addresses theories of how people learn, interact, and make meaning through a variety of semiotic resources, including oral communication, print, and digital media.

Restriction: Graduate students only.

EDUC 211. Writing Theory and Practice. 4 Units.
Offers an overview of histories, theories, and research in the field of composition studies from 1950 to the present. Addresses the influences of theory and research on teaching practice at K–12 and college levels.

Restriction: Graduate students only.

EDUC 212. Literacy and Technology. 4 Units.
Examines theoretical, historical, and contemporary relationships of technology and literacy. Topics include online communication, multimodality, video games, the use of technology for literacy instruction in schools, and research approaches for investigating literacy development with technology.

Restriction: Graduate students only.
EDUC 218. Special Topics in Language, Literacy, and Technology. 4 Units.
Advanced seminar designed to engage students in highly interactive examination of current issues in language, literacy, and technology. Topics and content will vary by quarter, depending upon research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

EDUC 220. Developing Adolescent Literacy. 4 Units.
Examines how Adolescents leverage vocabulary knowledge, word-reading skills, background understanding, and knowledge of content-specific text features to master an increasing range of texts both independently and for subject-area learning.

Restriction: Graduate students only.

EDUC 222. Research Epistemologies and Methodologies. 4 Units.
Introduction to epistemological underpinnings of educational research and to a range of research methodologies in education. Includes examination of quantitative and qualitative studies through reading and analyzing contemporary research. Critique of selected research studies pertinent to educational practice and policy.

Restriction: Ed.D. Program students only.

EDUC 225. Learning, Development, and Culture. 4 Units.
Explores issues of learning and development through a cultural lens. The interplay between culture and learning and culture and development is analyzed through the discussion of relevant readings from both psychological and anthropological research traditions.

Restriction: Graduate students only.

EDUC 229. Theories of Human Development. 4 Units.
Examines developmental theory as a guide for research and practice in education. The evolution of classical development theories and the emergence of new theoretical models are considered. Theoretical perspectives include ecological systems, life course, psychobiology, attachment, and social-cognitive theories.

Restriction: Graduate students only.

EDUC 230. The History and Culture of Schooling in the United States. 4 Units.
Considers the historical, cultural, and structural processes that contextualize American schooling. In particular, examines the roles of race, class, and gender in the context of public education in the United States.

Restriction: Master of Arts in Teaching students only.

EDUC 235. Psychology of Reading Acquisition. 4 Units.
Surveys theory and empirical evidence concerning acquisition, cognitive processes, and consequences of skilled reading. Explores psychological models of skilled reading, how children acquire reading and writing skills in their home and second languages, cognitive consequences of acquiring literacy skills.

Restriction: Graduate students only.

EDUC 238. Special Topics in Learning, Cognition, and Development. 4 Units.
An advanced seminar designed to engage students in highly interactive examination of current issues in learning, cognition, and development. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Restriction: Graduate students only.

EDUC 240. Instructional Design and Education Technology. 4 Units.
Design of high-quality instructional units consistent with current theory and research in cognitive psychology and constructivist-compatible instructional practice and infused with appropriate uses of computer and video technologies. Students design a complete instructional unit using these principles.

Restriction: Master of Arts in Teaching Program students only.

EDUC 241. Children’s Sense Making in Science. 2 Units.
Investigates elementary students as individuals who construct understanding of concepts through their interactions with others and the world around them. Observations of children in informal settings to analyze learning in context.

Restriction: Teacher Credential Program students only.
EDUC 243. The Policy Environment of Teaching. 2 Units.
Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom level.

EDUC 245. Learning Inside and Outside of School. 2 Units.
A field-based course focused on observing adolescents in out-of-school contexts to examine adolescent learning and development in a range of contexts, how out-of-school contexts motivate learning and development, and consider the implications for teaching.

Restriction: Teacher Credential Program students only.

EDUC 246. Teaching Investigations: Identifying Dilemmas of Practice. 4 Units.
Focuses on identifying problems of teaching practice that arise in student teaching, examining the theoretical foundations that underlie problems of practice, and developing approaches for inquiring into strategies to systematically address instructional challenges.

Restriction: Teacher Credential Program students only.

EDUC 247. Teaching Investigations: Exploring Dilemmas of Practice. 4 Units.
Focuses on exploring problems of teaching practice that arise in student teaching, drawing on research to examine the theoretical foundations that underlie problems of practice, and to propose courses of action to address and study educational interventions.

Prerequisite: EDUC 246.

Restriction: Master of Arts in Teaching with Teacher Credential Program students only.

EDUC 248. Understanding Teacher Agency. 4 Units.
Course considers how teachers can become agents of change within their school contexts, through their participation in professional organizations, and via social media. Candidates will experiment with using different avenues for sharing images of practice and action research.

Prerequisite: EDUC 246.

Restriction: Teacher Credential Program students only.

EDUC 251. Educational Policy and Politics. 4 Units.
An in-depth study of topics relevant to educational reform and policy-making. Topics include: the policy-making process, the role of values and interest groups, policy analysis, equality of educational opportunity, systemic reform, implementation, and politics at the school site.

Restriction: Graduate students only.

EDUC 254. College Access and Persistence. 4 Units.
Introduction to how social, political, and economic forces impact college access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research and the link between K–12 schooling and postsecondary stratification.

Restriction: Graduate students only.

EDUC 255. Immigration and the New Second Generation. 4 Units.
Focuses on Asian, Latino, and Black children of immigrants. Investigates how today's second generation adapts, incorporates into the U.S. social structure, transforms the social and economic landscape. Explores assimilation, immigrant families/communities, language, racial/ethnic identities, gender, education, changing U.S. racial structure.

Restriction: Graduate students only.

EDUC 256. Critical Case Studies in Education. 4 Units.
Examines single and multiple case studies as a method for investigating educational theory, practice, and policy. Explores types of questions that can be answered with case study research and designs, data analysis techniques, format, and style of writing case studies.

Restriction: Graduate students only.

EDUC 258. Special Topics in Educational Policy and Social Context. 4 Units.
An advanced seminar designed to engage students in highly interactive examination of current issues in educational policy and social context. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.
EDUC 259. Community Research and Action. 4 Units.
Introduces the theoretical underpinnings and research approaches of the field of Community Psychology. Project-based course focused on research and action in communities, organizations, and other extra-individual units (e.g., schools).
Restriction: Graduate students only.

EDUC 261. Social and Cultural Foundations of Education. 4 Units.
Provides a critical understanding of the social and cultural foundations of education through reproduction theory. Explores the unique ways in which culture and power intersect within schools and schooling systems to reproduce and resist educational inequality.
Restriction: Graduate students only.

EDUC 264. Economic Foundations of Education and Social Policy. 4 Units.
Beginning/intermediate microeconomics course provides students with an introduction to how economists think about household decision-making, markets, benefit-cost analysis, social policy issues in general and education policy in particular.
Restriction: Graduate students only.

EDUC 265. Applied Regression Analysis for Education and Social Research. 4 Units.
Provides students with a working knowledge of multiple regression and the statistical analysis of longitudinal data. Topics include a review of the OLS regression model, event-history methods, and various other techniques for analyzing longitudinal data.
Prerequisite: EDUC 288B.
Restriction: Graduate students only.

EDUC 267. Classroom Research Methods. 4 Units.
Uses students' research problems as the basis for exploring methods—teacher and student observation, interview, case studies, think alouds. Intended for doctoral students with a specific research question and very good grounding in the literature related to their question.
Restriction: Graduate students only.

EDUC 274. Studies of Professional and Staff Development. 2-4 Units.
Research and theory of effective strategies for professional and staff development. Topics include: adult learning as related to professional growth of teachers, staff development as vehicle for systemic reform, reforms to enhance teacher professionalization and empowerment.
Restriction: Doctoral students only.

EDUC 278. Experimental Designs in Educational Research. 4 Units.
Designed to enable students to think critically about experimental research, and to develop an understanding of how to design and conduct experiments. The overall goal is to prepare students to independently plan and implement an experimental research study.
Prerequisite: EDUC 222.
Restriction: Graduate students only.

EDUC 280. Research Methods. 2-8 Units.
Provides practitioners at advanced degree level with insight and leadership skills for working with increasingly diverse school populations. Content varies with interest of students and instructors. May focus on populations or broader content area such as education reform in California.
Repeatability: May be taken for credit 3 times.
Restriction: Doctoral Degree candidates only.

EDUC 282. Graduate Seminar in the History of the Philosophy of Education. 4 Units.
Draws upon results in the historical development of the philosophy of education from Plato, Quintillian, Augustine, Locke, Rousseau, to more contemporary thinkers such as Dewey, Freire, Egan, and Rorty.
Repeatability: May be repeated for credit unlimited times.

EDUC 283A. Qualitative Research Methods in Education I. 4 Units.
Introduces students to qualitative research methodologies and methods and explores strengths and challenges of this research tradition. Topics include logistical and ethical issues, reliability, validity and generalizability, and the role of reflexivity. Students will also engage in fieldwork.
Prerequisite: EDUC 222.
Restriction: Graduate students only.
EDUC 283B. Qualitative Research Methods in Education II. 4 Units.
Provides methods for conducting and analyzing qualitative research in educational settings. Topics include data collection, coding, representing qualitative data, and using software for qualitative data analysis.
Prerequisite: EDUC 283A.
Restriction: Graduate students only.

EDUC 285. Theories of Learning Cognition. 4 Units.
Overview of theories applicable to learning in schools and extracurricular contexts. Cognitive, psychometric, behavioral, and neuroscience perspectives are applied to such topics as memory, knowledge structures, problem solving, motivation, self-referent beliefs, expertise, assessment, and cognitive abilities, including intelligence.
Restriction: Graduate students only.

EDUC 287. Quantitative Data Analysis in Education Research and Evaluation. 4 Units.
Covers statistical aspects of survey-based evaluations and quantitative research in education. Includes sampling, coding open-ended information, data management, scale construction, statistical analysis, and presentation of findings. Students analyze data sets—a district-based evaluation and a national survey—using SPSS.
Prerequisite: EDUC 281.

EDUC 288A. Educational, Social, and Behavioral Statistics. 4 Units.
Designed for graduate students with previous course work in statistics, including experience with statistical software such as SPSS. The emphasis is on regression analysis and the general linear model. Students learn to analyze real data using Stata software.
Prerequisite: Prior coursework in statistics, and experience with statistical software such as SPSS.
Restriction: Graduate students only.

EDUC 288B. Structural Equation Modeling for Educ, Soc & Behavioral Analysis. 4 Units.
Rigorous introduction to structural equation modeling for students with strong prior course work in statistics. Topics include path diagrams, SEM with observed variables, factor analysis, SEM with latent variables. Maximum likelihood estimating, goodness-of-fit measures, nested models, related topics.
Prerequisite: EDUC 288A.
Restriction: Graduate students only.

EDUC 289. Use of Video in Educational Research. 4 Units.
Provides students with conceptual and methodological tools for using video in educational research. Students work with their own video data or with publicly accessible databases.
Restriction: Graduate students only.

EDUC 295. Pre-Dissertation Research. 1-12 Units.
Independent study course taken under the direction of a faculty member who guides the student's research. May include guidance on data collection, methodology, human subjects protocol, conference presentation, scholarly publication, program benchmark activities.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

EDUC 296A. Professional Writing in Educational Research I. 2 Units.
First of a two-course series designed to extend students’ knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 296B. Professional Writing in Educational Research II. 2 Units.
Second of a two-course series designed to extend students’ knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 298. Independent Study. 1-8 Units.
Independent research on topics related to education.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
EDUC 299. Dissertation Research. 1-12 Units.
Specifically designed for students researching and writing their dissertations.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Doctoral students only.

EDUC 301. Directed Elementary Field Experiences in Diverse Schools. 2 Units.
Fieldwork experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the state-mandated Teaching Performance Assessment.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Teacher Credential Program students only.

EDUC 302. Directed Secondary Field Experiences. 2 Units.
Fieldwork experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the State-mandated Teaching Performance Assessment.
Restriction: Teacher Credential Program student only.

EDUC 304. Student Teaching in the Elementary Schools. 4-12 Units.
Student teaching seminars prepare candidates for assumption of classroom instructional responsibilities in accordance with State credentialing requirements. Four full days a week of student teaching in public school elementary classrooms in winter quarter and five full days in spring quarter.
Repeatability: May be taken for credit 2 times.
Restriction: Teacher Credential Program students only.

EDUC 305. Learning to Learn from Teaching in Secondary Schools. 4 Units.
Analytic tools for (1) observing and reflecting on observed instruction; (2) examining student thinking and the relationship between teaching and learning; (3) understanding particular components of the teaching/learning process; and (4) planning effective instruction including innovative teaching practices.
Restriction: Teacher Credential Program students only.

EDUC 306. Supervised Teaching in Bilingual Education, Elementary. 4-12 Units.
Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Teacher Credential Program students only.

EDUC 307. Student Teaching in Intermediate/Secondary School. 2-16 Units.
Student teaching includes orientation, seminars, and preparation for and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with public school calendar. Five full days a week in both winter and spring quarters.
Repeatability: May be taken for credit for 20 units.
Restriction: Teacher Credential Program students only.

EDUC 308. Performance Assessment for California Teachers, Multiple Subjects. 1 Unit.
Preparation and technical support for multiple subjects teacher candidates to complete State-required Teaching Performance Assessment for the California preliminary credential. Includes assistance in planning, teaching/videotaping, assessment and reflection, and document production.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 2 times.
Restriction: Teacher Credential Program students only.
EDUC 310. Performance Assessment for California Teachers. 1 Unit.
Preparation and technical support for teacher candidates to complete the required Teaching Performance Assessment for California credential licensure. Structured support for planning, videotaping, and document production occurs in meetings scheduled to coincide with the timeline for the project.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 320. Teaching Physical and Health Education in Elementary School. 4 Units.
Methods of teaching physical education for the elementary classroom teacher. Through an interactive environment, students experience the California Physical Education and Health content standards with appropriate pedagogy. Concepts address motor skills, physical fitness, and personal responsibility for lifelong health.

Grading Option: Satisfactory/unsatisfactory only.

EDUC 322A. Curriculum and Methods for Elementary School Mathematics I. 4 Units.
Scope, sequence, and methods of teaching mathematics at all levels of elementary school. Presented through lectures, discussions, demonstrations, and exploration of a variety of materials. Covers how to plan lessons, motivate students, diagnose difficulties, and evaluate learning in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 322B. Curriculum and Methods for Elementary School Mathematics II. 4 Units.
Part two of a course addressing pedagogical methods for elementary mathematics. Lectures, discussions, and exploration of instructional strategies and materials will support preservice teacher development in the critical areas of planning, instruction, and assessment for conceptual understanding in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 323. Curriculum and Methods for Elementary School Science. 4 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 323.

EDUC 323A. Curriculum Methods in Elementary Science. 2 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, and criteria for selecting science curriculum materials.

EDUC 323B. Curriculum Methods in Elementary Science. 2 Units.
Prospective elementary teachers learn how to teach science in grades K-8. Covers state science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Prerequisite: EDUC 323A.

EDUC 324. Curriculum and Methods for Elementary School Language Arts Integrated with Social Studies. 4 Units.
An integrated approach to language arts and social studies instruction at the K–6 level based on California State English/Language Arts and Social Studies Frameworks and Standards. Focus on teaching content through literature and writing and providing access for all learners.

Restriction: Teacher Credential Program students only.

EDUC 325. Teaching the Visual and Performing Arts in Elementary School. 2 Units.
Introduction to the issues and practices, including student diversity, academic literacy, and interdisciplinary content, involved in integrating the California visual and performing arts curriculum framework and academic content standards with developmentally appropriate teaching strategies for the elementary classroom.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 326. Curriculum and Methods for Elementary School Reading. 4 Units.
Teaching an integrated reading/language arts program in the elementary classroom. Implementing theories, principles, and methods which are research and reality-based. Creating a child-centered, language-rich program to meet needs of children in multicultural/multilingual settings.

Restriction: Teacher Credential Program students only.
EDUC 329. Theories and Methods of English Language Development Applied to Elementary Students. 4 Units.
Theories and methods of English language development and instruction of English language learners, with focus on elementary students. Includes
language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades K–6 English language
learners.

Restriction: Teacher Credential Program students only.

Methods for creating healthy environments for student learning in elementary schools. Introduction of California content standards and frameworks with
appropriate pedagogy. Personal, family, school, community factors, and legal responsibilities of teachers. Academic, physical, emotional, and social
well-being.

Grading Option: Satisfactory/unsatisfactory only.

EDUC 334. Literacy and Technology in the Secondary Classroom. 2 Units.
A view of literacy expanded beyond typological print, students learn: (1) strategies for incorporating, (2) tools for evaluating and selecting, and (3)
learning theories for understanding how information and communication technologies and online resources contribute to general and disciplinary literacy.

Prerequisite: Limited to students accepted into the Teacher Credential Program

Restriction: Teacher Credential Program students only.

EDUC 336. Methods of Teaching Languages other than English in Secondary Schools. 4 Units.
Prepares future teachers of foreign language or primary/home language. Emphasizes hands-on, practical strategies for communication-based instruction
and authentic assessment, in reading, writing, listening, speaking, and culture.

Restriction: Teacher Credential Program students only.

EDUC 337. Methods of Teaching Social Science in the Secondary School. 4 Units.
Theories, strategies, and methodologies related to the teaching of history and social science in the secondary school. Emphasis on the planning,
delivery, and assessment of lessons reflecting an understanding of the History-Social Science Framework for California.

Restriction: Teacher Credential Program students only.

EDUC 338. Methods of Teaching English in the Secondary School. 2-4 Units.
Introduction to teaching reading, writing, and speaking skills in secondary school. Emphasis upon integrative approach to teaching literature,
composition, and grammar consistent with the California State Framework. Practice in the design of lesson plans that are both integrated and
cumulative.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 339. Methods of Teaching Visual & Performing Arts in Secondary Schools. 4 Units.
Theory, curriculum, and strategies for teaching visual and performing arts in the secondary school. Emphasis on the planning, delivery, and assessment
of lessons consistent with California State Framework and content standards.

Restriction: Teacher Credential program or M.A.T. program students only.

EDUC 340. Methods of Teaching Mathematics in Secondary School. 2-4 Units.
Theories, strategies, and methodologies related to the teaching of mathematics in the secondary school. Emphasis on the planning, delivery,
and assessment of lessons reflecting an understanding of the Mathematics Framework for California and the recommendations of professional
organizations.

Repeatability: May be taken for credit for 4 units.

Restriction: Teacher Credential Program students only.

EDUC 341. Teaching Science in Secondary School. 4 Units.
Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods,
criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 341.

Restriction: Teacher Credential Program students only.
EDUC 342. Applied Instructional Strategies in Secondary Schools. 4 Units.
Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342A, EDUC 342B.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342A. Applied Instructional Strategies in Secondary. 2 Units.
Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342B. Applied Instructional Strategies in Secondary. 2 Units.
Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 345. Child Development and Educational Equity. 4 Units.
Explores theories of child development applied to teaching and learning in elementary schools. Attention is given to role of cultural norms in defining goals for child development and for educational practices and in creating equal learning opportunities for all children.

Restriction: Teacher Credential Program students only.

EDUC 346. Reading and Writing in Middle School and High School Classrooms. 4 Units.
Emphasis is placed upon understanding the literacy processes (listening, speaking, viewing, reading, and writing) as they relate to all Single Subject areas. Teachers are guided to integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Restriction: Teacher Credential Program students only.

EDUC 347. Culture, Diversity, and Educational Equity. 4 Units.
Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Prerequisite: Limited to students accepted into the Teacher Credential Program.

EDUC 347A. Culture, Diversity, and Educational Equity. 2 Units.
Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 347B. Culture, Diversity, and Educational Equity. 2 Units.
Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 348. Educational Equity and the Exceptional Learner. 2 Units.
Knowledge, skills, and strategies to teach exceptional learners in the general education classroom. Legislation pertaining to the education of exceptional learners. Role of general education teacher in the special education process. Inclusive curriculum to provide equal access to content.

Restriction: Teacher Credential Program students only.
EDUC 349. Theories and Methods of English Language Development Applied to Secondary Students. 4 Units.
Theories and methods of English language development and instruction of English language learners, with focus on secondary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades 7–12 English language learners.
Restriction: Teacher Credential Program students and M.A.T. students only.

EDUC 350. Adolescent Development in Education. 4 Units.
Secondary teachers must understand adolescent physical, cognitive, emotional, and social development, particularly how educators can promote healthy adjustment in their students. Focuses on why and how changes occur in each of these areas as children grow older.
Restriction: Teacher Credential Program students only.

EDUC 352. Creating a Supportive & Healthy Environment for Student Learning in Secondary Classrooms. 2 Units.
Creation of healthy environments for student learning in secondary classrooms. Personal, family, school, community, environmental factors. Academic, physical, emotional, social well-being of students. Legal responsibilities of teachers related to student health, safety. Communication with family and use of community resources. Course may be offered online.
Restriction: Teaching Credential Program students only.

EDUC 358. Media and Information Literacy in the Secondary Classroom. 2 Units.
A focus on how teachers can help their students to become critical, ethical, and effective users of technological resources in the secondary classroom. Students learn tools for evaluating selecting, and incorporating appropriate learning technologies into the secondary classroom.
Restriction: Teacher Credential Program students only.

EDUC 359. Curriculum and Methods for Elementary Social Science and Information Literacy. 4 Units.
Methods of instruction for Social Science at the K–6 level. Includes integration of the use of technology, development of content literacy, and use of evidence to construct arguments.

EDUC 361. The Adolescent Learner . 4 Units.
Issues of adolescent development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focus on how adolescents learn and what motivates them to learn, and how schools and teachers contribute to adolescents’ growth.
Restriction: Teacher Credential Program students only.

EDUC 362. Curriculum and Methods for Elementary Language Arts and English Language Development. 4 Units.
Methods, instructional practices, and assessment strategies for teaching English-Language Arts, with a focus on instructional practices for supporting English Language Learners. Focuses on core language arts topics, including composition of persuasive, expository, and narrative texts; speaking; and listening.

EDUC 363. Methods for Integrating Visual & Performing Arts throughout Elementary School Curriculum. 2 Units.
Methods for using visual and performing arts content and processes across the curriculum with an emphasis on building literacy skills with English Language Learners (ELL).

EDUC 364. Instructional Design and Education Technology for the Elementary Classroom. 2 Units.
A focus on how teachers can effectively integrate educational technologies for teaching and learning in the elementary school classroom. Students learn tools for evaluating, selecting, and incorporating appropriate technologies into their classroom activities.
Restriction: Teacher Credential Program students only.

EDUC 373. Cognition and Learning in Educational Settings . 4 Units.
Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.
Restriction: Teacher Credential Program students only.

EDUC 374. Learning and Child Development . 4 Units.
Issues of child development and learning in family, school, and community contexts from biological, psychological, cognitive, and social perspectives. Focus on how young children learn and develop, how schools and teachers contribute to children’s growth, and implications for instruction.
Restriction: Teacher Credential Program students only.
EDUC 398. Special Topics. 3 Units.
Meets induction and program planning requirements for students enrolled in Professional Administrative Services Credential. Also serves as final course in program, wherein the candidate, the University instructor, and a representative of the involved school district assess and evaluate candidate competency.

Repeatability: May be taken for credit 2 times.

Restriction: Professional Administrative Services Credential students only.

EDUC 399. University Teaching. 1-4 Units.
Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
The Henry Samueli School of Engineering

Gregory Washington, Dean
5200 Engineering Hall
Undergraduate Counseling: 949-824-4334
Graduate Counseling: 949-824-8090
http://www.eng.uci.edu/

Overview

The academic mission of The Henry Samueli School of Engineering has been developed to be consistent with the missions and goals set for it by the State of California, the University of California, and the University of California, Irvine (UCI) campus. Specifically, the academic mission of the School is to educate students, at all levels, to be the best engineers and leaders in the nation and world by engaging them in a stimulating community dedicated to the discovery of knowledge, creation of new technologies, and service to society.

The individual engineering and related programs have published program objectives that are consistent with the missions and goals of the University of California, UCI, and The Henry Samueli School of Engineering.

The School offers undergraduate majors in Aerospace Engineering (AE), Biomedical Engineering (BME), Biomedical Engineering: Premedical (BMEP), Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Computer Science and Engineering (CSE, a jointly administered program with the Donald Bren School of Information and Computer Sciences), Electrical Engineering (EE), Engineering (a general program, GE), Environmental Engineering (EnE), Materials Science Engineering (MSE), and Mechanical Engineering (ME). The undergraduate majors in Aerospace, Biomedical, Chemical, Civil, Computer, Computer Science and Engineering, Electrical, Environmental, Materials Science, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org), http://www.abet.org; Computer Science and Engineering (CSE) is also accredited by the Computing Accreditation Commission of ABET (http://www.abet.org), http://www.abet.org. The undergraduate major in Biomedical Engineering: Premedical (BMEP) is not designed to be accredited, therefore is not accredited by ABET.

Aerospace Engineering considers the flight characteristics, performance, and design of aircraft and spacecraft. An upper-division series of courses in aerodynamics, propulsion, structures, and control follows a common core with Mechanical Engineering. The skills acquired in those courses are integrated in the capstone aerospace design course. The intent of the program is to produce highly proficient engineers who can tackle the aerospace engineering challenges of the future.

Biomedical Engineering applies engineering principles to solve complex medical problems and focuses at improving the quality of health care by advancing technology and reducing costs. Examples include advanced biomedical imaging systems, the design of microscale diagnostic systems, drug delivery systems, and tissue engineering. Specializations are available that focus student's technical expertise on biophotonics or biomems.

Biomedical Engineering: Premedical shares introductory engineering courses with Biomedical Engineering, but replaces senior engineering laboratories and design courses with biology and organic chemistry courses required by medical schools for admission. The intent of the program is to produce students with a basic engineering background who are qualified to enter medical school.

Chemical Engineering applies the knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, the environment, food, textiles, shelter, semiconductors, and homeland security. Employment opportunities exist in various industries such as chemical, petroleum, polymer, pharmaceutical, food, textile, fuel, consumer products, and semiconductor, as well as in local, state, and federal governments.

Civil Engineering addresses the challenges of large-scale engineering projects of importance to society as a whole, such as water distribution, transportation, and building design. Specializations are provided in General Civil Engineering, Environmental Hydrology and Water Resources, Structural Engineering, and Transportation Systems Engineering.

Computer Engineering addresses the design and analysis of digital computers, including both software and hardware. Computer design includes topics such as computer architecture, VLSI circuits, data base, software engineering, design automation, system software, and data structures and algorithms. Courses include programming in high-level languages such as Python, Java, C, C++; use of software packages for analysis and design; design of system software such as operating systems and hardware/software interfaces; application of computers in solving engineering problems, and laboratories in both hardware and software experiences.

Computer Science and Engineering is designed to provide students with the fundamentals of computer science, both hardware and software, and the application of engineering concepts, techniques, and methods to both computer systems engineering and software system design. The program gives students access to multidisciplinary problems in engineering with a focus on total systems engineering. Students learn the computer science principles that are critical to development of software, hardware, and networking of computer systems. From that background, engineering concepts and methods are added to give students exposure to circuit design, network design, and digital signal processing. Elements of engineering practice include systems view, manufacturing and economic issues, and multidisciplinary engineering applications. The program is administered jointly by the Department of Electrical Engineering and Computer Science in The Henry Samueli School of Engineering and by the Department of Computer Science in the Donald Bren School of Information and Computer Sciences.
Electrical Engineering is one of the major contributors to the modernization of our society. Many of the most basic and pervasive products and services are either based on or related to the scientific and engineering principles taught at the Department of Electrical Engineering and Computer Science. Students specialize in Electronic Circuit Design; Semiconductors and Optoelectronics; RF, Antennas and Microwaves; Digital Signal Processing; or Communications.

The major in Engineering is a special program of study for upper-division students who wish to combine the study of engineering principles with other areas such as the physical and biological sciences, social and behavioral science, humanities, and arts. Students may construct their own specialization. Click on the "Undergraduate Study" tab above for information about this major.

Environmental Engineering concerns the development of strategies to control and minimize pollutant emissions, to treat waste, and to remediate polluted natural systems. Emphasis areas include air quality and combustion, water quality, and water resources engineering.

Materials Science Engineering is concerned with the generation and application of knowledge relating the composition, structure, and synthesis of materials to their properties and applications. During the past two decades, Materials Science Engineering has become an indispensable component of modern engineering education, partly because of the crucial role materials play in national defense, the quality of life, and the economic security and competitiveness of the nation; and partly because the selection of materials has increasingly become an integral part of almost every modern engineering design. Emphasis in the Materials Science Engineering curriculum is placed on the synthesis, characterization, and properties of advanced functional materials; analysis, selection, and design related to the use of materials; the application of computers to materials problems; and the presence of an interdisciplinary theme that allows a qualified student to combine any engineering major with the Materials Science Engineering major.

Mechanical Engineering considers the design, control, and motive power of fluid, thermal, and mechanical systems ranging from microelectronics to spacecraft to the human body. Specializations allow students to focus their technical electives in the areas of Aerospace Engineering, Energy Systems and Environmental Engineering, Flow Physics and Propulsion Systems, and Design of Mechanical Systems.

The School offers M.S. and Ph.D. degrees in Biomedical Engineering; Chemical and Biochemical Engineering; Civil Engineering; Electrical and Computer Engineering, with concentrations in Computer Engineering and Electrical Engineering; Engineering, with concentrations in Environmental Engineering, and Materials and Manufacturing Technology; Materials Science and Engineering; and Mechanical and Aerospace Engineering. Specialized research opportunities are available within each of these programs. In Biomedical Engineering, areas of research include micro/nanoscale biomedical devices for diagnostics and therapeutics, biophotonics, systems/synthetic bioengineering, tissue/organ engineering, cardiovascular engineering, cancer biotechnology, and neuroengineering. Bioreaction and bioreactor engineering, recombinant cell technology, and bioseparation processes are research areas in Biochemical Engineering. In Civil Engineering, research opportunities are provided in structural/earthquake engineering, reliability engineering, transportation systems engineering, environmental engineering, and water resources. Research opportunities in Electrical and Computer Engineering are available in the areas of parallel and distributed computer systems, VLSI design, computer architecture, image and signal processing, communications, control systems, and optical and solid-state devices. Research in combustion and propulsion sciences, laser diagnostics, supersonic flow, direct numerical simulation, computer-aided design, robotics, control theory, parameter identification, material processing, electron microscopy, and ceramic engineering are all available in Mechanical and Aerospace Engineering. The School also offers the M.S. degree in Engineering Management, a joint degree program with the Paul Merage School of Business; and the M.S. degree in Biotechnology Management, a joint degree program with the Francisco J. Ayala School of Biological Sciences and The Paul Merage School of Business.

Additional publications describing undergraduate and graduate academic study and research opportunities are available through The Henry Samueli School of Engineering, the Departments of Biomedical Engineering, Chemical Engineering and Materials Science, Civil and Environmental Engineering, Electrical Engineering and Computer Science, and Mechanical and Aerospace Engineering.

Mechanical and Aerospace Engineering  M.S., Ph.D.
Mechanical Engineering  B.S.
Networked Systems  M.S., Ph.D.

1 Offered jointly with Francisco J. Ayala School of Biological Sciences and The Paul Merage School of Business. See Francisco J. Ayala School of Biological Sciences section of the Catalogue for information.
2 Offered jointly with the Donald Bren School of Information and Computer Sciences. See the Interdisciplinary Studies section of the Catalogue for information.
3 Offered jointly with The Paul Merage School of Business.

Requirements for the Bachelor’s Degree
All students in The Henry Samueli School of Engineering must fulfill the following requirements.

All students must meet the University Requirements.
All students must meet the School Requirements:
The following are minimum subject-matter requirements for graduation:

Mathematics and Basic Science Courses: Students must complete a minimum of 48 units of college-level mathematics and basic sciences.

Engineering Topics Courses: Students must complete a minimum of 72 units of engineering topics. Engineering topics are defined as courses with applied content relevant to the field of engineering.

Design Units: All undergraduate Engineering courses indicate both a total and a design unit value. Design unit values are listed at the end of the course description. Each student is responsible for the inclusion of courses whose design units total that required by the program of study.

The Academic Plan and Advising Requirements to remain affiliated with The Henry Samueli School of Engineering: All students enrolled in The Henry Samueli School of Engineering are required to meet annually with their designated faculty for advising and mentoring and to have an academic plan on file with the Student Affairs Office which has been approved by their academic counselor. Students who do not have a plan on file, or deviate from this plan without approval from an academic counselor will be subject to probation. Students on probation for two consecutive quarters who do not have a plan on file, or deviate from this plan without approval from an academic counselor will be subject to disqualification. Students who fail to meet with a faculty advisor each year will be subject to disqualification.

Duplication of Subject Material: Students who take courses which involve considerable duplication of subject material may not receive full graduation credit for all units thus completed.

Residence Requirement: In addition to the University residence requirement, at least 36 upper-division engineering units specified by each major must be completed successfully at the University of California.

Variations: Variations from the general School degree requirements may be made subject to the approval of the faculty of the School. Students wishing to obtain variances should submit petitions to the School’s Student Affairs Office.

Undergraduate Study

John LaRue, Associate Dean for Undergraduate Student Affairs
Student Affairs Office
305 Rockwell Engineering Center
949-824-4334

- Admissions
- General Undergraduate Major in Engineering

Planning a Program of Study

Advising
Academic advising is available from academic counselors and peer advisors in the School’s Student Affairs Office, 305 Rockwell Engineering Center, and from faculty advisors. Students must realize, however, that ultimately they alone are responsible for the planning of their own program and for satisfactory completion of the graduation requirements. Students are encouraged to consult with the academic counselors in the Engineering Student Affairs Office whenever they desire to change their program of study. All Engineering majors are required to meet with their faculty advisor at least once each year.
Some engineering students will need more than four years to obtain their B.S. degree, particularly if part-time employment or extracurricular activities make heavy demands on their time. Normally, such students can stay on track, and are encouraged to do so, by enrolling in summer sessions at UCI or at other institutions when a petition has been approved in advance.

High-achieving students may declare a second major. Early consultation with the School is advisable.

Required courses may be replaced by other courses of equivalent content if the student substantiates the merits of the courses in the program of study and obtains prior approval from faculty in the School.

Students should be aware that most Engineering courses require the completion of prerequisites. The sample programs shown in each departmental description constitute preferred sequences which take into account all prerequisites.

School policy does not permit the deletion of Engineering courses after the second week or addition of Engineering courses after the third week of the quarter without the Associate Dean’s approval.

Undergraduate students who have high academic standing, who have completed the necessary prerequisites, and who have obtained permission from the School may qualify to take certain graduate-level courses.

Students are required to complete UCI’s lower-division writing requirement (see the Requirements for a Bachelor’s Degree section) during the first two years. Thereafter, proficiency in writing and computing (using a higher-level language such as Python, C, C++, Java, or MATLAB) is expected in all Engineering courses.

The Pass/Not Pass option is available to encourage students to enroll in courses outside their major field. Pass/Not Pass option cannot be used to satisfy specific course requirements of the students’ school and major. Students must take courses to fulfill the UC Entry Level Writing requirement for a grade. For more complete information, see the Academic Regulations and Procedures section of this Catalogue.

Admissions

The sequential nature of the Engineering program and the fact that many courses are offered only once a year make it beneficial for students to begin their studies in the fall quarter. Applicants wishing to be admitted for the fall quarter, 2017, must have submitted their completed application forms during the priority filing period (August 1 - November 30, 2016).

High school students wishing to enter the UCI Engineering program must have completed four years of mathematics through pre-calculus or math analysis and are advised to have completed one year each of physics and chemistry. That preparation, along with honors courses and advanced placement courses, is fundamental to success in the Engineering program and is vital to receiving first consideration for admittance to an Engineering major during periods of restricted enrollments. Students applying for admission for fall quarter should complete their examination requirements during May or June of their junior year or during their senior year, but no later than the December test date. (Typically, this means that students will take the SAT or the ACT Plus Writing Test in October or November. Applicants are strongly encouraged to take a math or science AP or SAT exam. Applicants should favor the Math Level 2 SAT Subject Test over the Math Level 1 Test. Applicants must apply for admission to a specific Engineering major or Engineering Undeclared.

If enrollment limitations make it necessary, unaccommodated Engineering applicants may be offered alternative majors at UCI.

Transfer students may be admitted to The Henry Samueli School of Engineering either from another major at UCI or from another college or university. A student seeking admission to The Henry Samueli School of Engineering from colleges and schools other than UCI must satisfy University requirements for admission with advanced standing and should complete appropriate prerequisites for their major of choice. Applicants should prioritize completing subject requirements (math, science, engineering) over completion of IGETC or UCI general education and lower-division requirements prior to transfer. IGETC is not considered in transfer selection while subject requirements contribute directly to reducing time to graduate. Since requirements vary from major to major, those contemplating admission with advanced standing to the School should consult each Department’s Catalogue section and the UCI Office of Admissions and Relations with Schools, 949-824-6703, for the specific requirements of each program. All transfer students should arrange for early consultation with The Henry Samueli School of Engineering Student Affairs Office at 949-824-4334.

Change of Major: Students who wish to change their major to one offered by the School should contact the Engineering Student Affairs Office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of Major Criteria website (http://www.changeofmajor.uci.edu).

Proficiency Examinations

A student may take a course by examination with the approval of the faculty member in charge of the course and the Dean of the School. Normally, ability will be demonstrated by a written or oral examination; if a portion of the capability involves laboratory exercises, the student may be required to perform experiments as well. The proficiency examination is not available for any course a student has completed at UCI.

Concentration: Engineering and Computer Science in the Global Context

The globalization of the marketplace for information technology services and products makes it likely that The Henry Samueli School of Engineering graduates will work in multicultural settings or be employed by companies with extensive international operations, or customer bases. The goal of the
concentration is to help students develop and integrate knowledge of the history, language, and culture of a country or geographic region outside the United States, through course work both at UCI and an international host campus, followed by a technology-related internship in the host country.

All of The Henry Samueli School of Engineering majors in good standing may propose an academic plan that demonstrates the ability to complete the concentration (a minimum of eight courses) and other requirements for graduation in a reasonable time frame. It is expected that a student’s proposal will reflect a high degree of planning that includes the guidance of academic counselors and those at the UCI Study Abroad Center regarding course selection, as well as considerations related to internship opportunities, housing, and financial aid. Each student’s proposed program of study must be approved by the Associate Dean for Student Affairs in The Henry Samueli School of Engineering. The Associate Dean will be available to assist qualified students with the development of a satisfactory academic plan, as needed.

The concentration consists of the following components:

1. A minimum of eight courses at UCI or at the international campus with an emphasis on the culture, language (if applicable and necessary), history, literature of the country that corresponds to the international portion of the program, international law, international labor policy, global issues, global institutions, global conflict and negotiation, and global economics;
2. A one- or two-semester sequence of technical courses related to the major and, possibly, culture, history, and literature courses taken at an international university;
3. A two-month or longer technical internship experience in the same country as the international educational experience.

More information about the requirements for the concentration is available in The Henry Samueli School of Engineering Student Affairs Office.

The concentration in Engineering and Computer Science in the Global Context is open to students in Aerospace Engineering, Biomedical Engineering, Biomedical Engineering: Premedical, Chemical Engineering, Civil Engineering, Computer Engineering, Engineering (General), Electrical Engineering, Environmental Engineering, Materials Science Engineering, and Mechanical Engineering.

Engineering Gateway Freshman-Year Curriculum

Students who know that they want to major in engineering but who are unsure of the specific major should apply for the Engineering Gateway Curriculum and follow the Sample Engineering Gateway Curriculum. Students following the Engineering Gateway Curriculum are required to meet with an academic advisor every quarter and are strongly encouraged to declare a major as soon as possible and then follow the appropriate sample program of study for that major.

1. Students who choose to major in Biomedical Engineering or Biomedical Engineering: Premedical should enroll in BME 1 in the fall quarter of the sophomore year. Students who choose to major in Computer Engineering should enroll in EECS 20 by the spring or summer quarter preceding their sophomore year.

2. Students who are considering the Computer Science and Engineering major should enroll in CSE 42.

Students who choose certain majors during the first year may replace Chemistry courses with required major courses.

Students should choose a major by the end of the spring quarter of their freshman year or earlier. Some modification in the program of study might be appropriate if the student chooses a major before the end of the freshman year. In any case, when the major is chosen, the student must meet immediately with an academic counselor to plan the program of study.

Undergraduate Programs

Specific information about courses fulfilling School and major requirements can be found in the department sections. Note that some majors require more units than the School requirements.

Minors of Interest to Engineers

Minor in Earth and Atmospheric Sciences
The minor in Earth and Atmospheric Sciences focuses on the application of physical, chemical, and biological principles to understanding the complex interactions of the atmosphere, ocean, and land through climate and biogeochemical cycles. See the Department of Earth System Science in the School of Physical Sciences section of this Catalogue for more information.

Minor in Global Sustainability
The interdisciplinary minor in Global Sustainability trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See the Interdisciplinary Studies section of this Catalogue for more information.

Career Advising
The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Career Center section for additional information. In addition, special career planning events are held throughout the year including an annual Career Fair. Individual career counseling is available, and students have access to the Career Library which contains information on graduate and professional schools in engineering, as well as general career information.

Honors
Graduation with Honors. Undergraduate honors at graduation in The Henry Samueli School of Engineering are computed by using 50 percent of the overall UCI GPA and 50 percent of the upper-division Engineering GPA. (Engineering E190 is not used in the calculation of the upper-division GPA.) A general criterion is that students must have completed at least 72 units in residence at a University of California campus. Approximately 1 percent of the graduating class shall be awarded summa cum laude, 3 percent magna cum laude, and 8 percent cum laude, with no more than 12 percent being awarded honors. Other important factors are considered visit at Honors Recognition.

Dean’s Honor List. The quarterly Dean’s Honor List is composed of students who have received a 3.5 GPA while carrying a minimum of 12 graded units.

Gregory Bogaczyk Memorial Scholarship. This scholarship was established in memory of Gregory Bogaczyk, a former UCI Mechanical Engineering student, and is contributed by the Bogaczyk family and friends. An award is given each year to a junior or senior Mechanical Engineering student.

Haggai Memorial Endowed Scholarship. This memorial fund was established in honor of Ted Haggai, an electrical engineer. This scholarship is awarded to an outstanding senior electrical engineering student and member of Tau Beta Pi. Primary consideration will be given to members of Tau Beta Pi who have contributed outstanding service to both UCI and The Henry Samueli School of Engineering.

Christine Jones Memorial Scholarship. This scholarship was established in memory of Christine Jones, an Electrical Engineering graduate, Class of 1989. The primary focus of this scholarship is to provide financial support to a female undergraduate student in The Henry Samueli School of Engineering.

Deborah and Peter Pardoen Memorial Scholarship. This scholarship is awarded each year to a graduating senior in Mechanical Engineering or in Aerospace Engineering. The scholarship is based on outstanding service to The Henry Samueli School of Engineering and the community.

Henry Samueli Endowed Scholarship. This premier scholarship, established by Henry Samueli, is awarded to outstanding freshmen and transfer students in The Henry Samueli School of Engineering. Recipients are chosen by the School based on their academic excellence. The award is renewable up to four years for freshmen and up to two years for transfer students.

Additional awards in other categories are made throughout the academic year.

Center for Opportunities and Diversity in Engineering
305 Rockwell Engineering Center; 949-824-4334
Robin Jeffers, Director
The Center for Opportunities and Diversity in Engineering (CODE) houses a comprehensive recruitment, retention, and placement program in The Henry Samueli School of Engineering which attempts to provide academic support and professional development to students from backgrounds which have traditionally had limited access to the engineering profession. Services provided include advisement, tutoring, study rooms, notification of research opportunities, fellowships, guest speakers, and employment opportunities. At the core of its activity is the focus on community building, and students are encouraged to bond around their common interests and goals.

Special Programs and Courses

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; 949-824-5461; honors@uci.edu; or visit the Campuswide Honors Program website (http://www.honors.uci.edu).

Engineering 199

Every undergraduate student in The Henry Samueli School of Engineering has the opportunity to pursue independent research under the direct supervision of a professor in the School. Interested students should consult with a faculty member to discuss the proposed research project. If the project is agreed upon, the student must fill out a 199 Proposal Form and submit it to the Engineering Student Affairs Office.

Undergraduate Research Opportunities Program
