The School of Law builds on UCI’s existing strengths in emerging technology, social policy, international business, environmental science and policy, health care, and other fields to produce leaders in law, government, and business for the twenty-first century. UCI Law graduates are encouraged to pursue careers in public service, including non-governmental organizations and philanthropic agencies. The School works aggressively to place students on their chosen career path whether that be with a private law firm, public interest or legal services office, government agency, and/or in a judicial clerkship. A wide array of employers from both the public and private sectors come to interview students on campus for summer positions and externships.

The School of Law has been granted provisional accreditation by the American Bar Association. A student at a provisionally approved law school and an individual who graduates while the school is provisionally approved are entitled to the same recognition given to students and graduates of fully approved law schools. The School was granted full accreditation by the American Bar Association (ABA) on June 6, 2014.

The School of Law seeks to enroll outstanding students who reflect a wide diversity of life experiences. Further information about admission requirements, application deadlines, tuition and fees, and curriculum is updated regularly on the School of Law (http://www.law.uci.edu) website.

Degree

Law
J.D.

In addition, concurrent degree study (J.D./Ph.D. and J.D./Master’s) is available under the auspices of UC Irvine’s Program in Law and Graduate Studies, which is described later in the School of Law section.

Juris Doctor (J.D.) Requirements

Graduation Requirements

To earn the Juris Doctor, students must complete six semesters of study, earn 86 law semester credits, pass all required classes, complete the upper-level writing requirement, and have a minimum 2.0 (C) grade point average.

All students must complete at least 68 credits in regularly scheduled Law School classes.

“Regularly scheduled Law School classes” include

• Law School courses and seminars, including courses cross-listed at the Law School but originating in another school or department at the University;
• Law School clinics and clinical placements approved by the Associate Dean for Clinical Education and Service Learning;
• credits from another ABA-approved law school or from approved study in a foreign exchange program.

“Regularly scheduled Law School classes” do not include

• independent study work;
• non-law classes;
• research tutorials;
• externships (other than those deemed to meet the Law School’s clinical requirement).

No more than 8 units of optional credit/no credit course work will count toward the 86-unit degree requirement.
First-Year Course Work Requirements

Students must pass all UCI Law School first-year courses, or their substantial equivalents, with grades of 1.0 (D) or higher. The Assistant Dean for Student Services will determine whether classes taken at another law school are sufficient for transfer students to meet the UCI Law first-year course work requirement. If not, the student will be notified which courses are needed to complete the requirement.

Upper-Level Academic Requirements

1. Writing Requirement
   Students must complete at least one course where they are required to produce a major writing project with frequent feedback from a faculty member. This might include seminars, independent studies, or other work, so long as it involves substantial original analysis and research, multiple drafts, and is certified by the faculty members as meeting this requirement.
   a. At the completion of the first-year lawyering skills course, students will have a meeting with their professor and receive advice on the type of writing assistance they need and approaches they should consider in meeting the upper-level writing requirement.
   b. Students are strongly encouraged to develop a portfolio over the course of law school that will include all of their major written work and other forms of presentation.

2. Clinical Requirement
   All students are required to complete at least one semester of clinical education, either in a Law School clinic or at a clinical placement that is approved by the Associate Dean of Clinical Education and Service Learning. This shall involve a live client or other real-life practical experience, appropriately supervised and designed to encourage reflection by students on their experiences and on the values and responsibilities of the legal profession, and the development of one’s ability to assess his or her performance and level of competence.

First-Year Curriculum

UCI School of Law has an innovative curriculum designed to prepare students for the practice of law at the highest levels of the profession. Traditional areas of legal doctrine are covered in the first year, but in a novel way that focuses on training students in five methods of legal analysis: statutory, common law, procedural, constitutional, and international. The course on Statutory Analysis, for example, uses criminal law as the vehicle for teaching students to read and interpret statutes.

One of UCI’s signature first-year courses, Legal Profession, exposes students to the economics, sociology, and psychology of a legal career. The course also emphasizes professional ethics. Panels of attorneys from a wide range of practice areas speak to students throughout the year about ethical dilemmas they confront as well as their work and careers.

Throughout both the first-year and upper-level curriculum there is great emphasis on incorporating skills training into traditional classes. The first-year Legal Skills class teaches fact investigation, interviewing, legal writing and analysis, extensive legal research, negotiation and oral advocacy. In addition, all first-year students are assigned a lawyer mentor and are required to spend a specified number of hours observing that lawyer at work.

UCI has an active pro bono program in which students engage in volunteer legal work on behalf of underserved populations as early as their first year.

All first-year students enroll in the courses below. Additional information is available at the School of Law Curriculum (http://www.law.uci.edu/academics/curriculum.html) website.

Common Law Analysis: Contracts (4). This course will focus primarily on the common law of contracts to teach this method of analysis, in which the law is derived from judicial decisions rather than statutes or the Constitution.

Statutory Analysis (3). This course will use criminal law as a basis for teaching students the methods employed in all areas of law for analyzing statutes.

Procedural Analysis (4). This course will use civil procedure as the foundation for teaching students about areas of law in which there are procedural rules, and how analysis and arguments are made in such contexts.

Lawyering Skills I (3). This course, which will be part of both semesters, will focus on teaching skills that all lawyers use, such as fact investigation, interviewing, legal writing and analysis, legal research, negotiation and oral advocacy.

Legal Profession I (2). This course, which will be part of both semesters, is designed to prepare students to chart rewarding and responsible careers in law. Drawing from various disciplines, including economics, history, sociology, and psychology, we will teach students about the variety of practice settings in which lawyers work and the professional opportunities and challenges of each.

Common Law Analysis: Torts (4). This course will use torts as a way of further examining the common law, and how lawyers reason and develop arguments in this area.

Constitutional Analysis (4). This course will teach students basic areas of constitutional law such as separation of powers, federalism, and individual liberties. It will focus on how constitutional arguments are made, and how courts and lawyers analyze constitutional issues.
International Legal Analysis (3). This course will introduce students to international law and the ways that analyses in this area are similar to and different from analysis in other areas of law.

Lawyering Skills II (3). In the spring semester of this two-semester course, all students will gain experience in a legal clinic setting, where they will conduct intake interviews of actual clients at one or more legal services organizations such as: The Learning Rights Center of Los Angeles, the Legal Aid Foundation of Los Angeles, the Legal Aid Society of Orange County, the Public Law Center, the United States Marines Corp Base at Camp Pendleton, and the UCI Consumer Protection Clinic.

Legal Profession II (2). Continuation of fall semester course.

Legal Research (1). This course prepares students to take on varied and challenging research assignments typically encountered at school and in the workplace.

Upper-Level Courses

Below is an overview of the upper-level courses taught at UC Irvine School of Law. Not every course will be offered each year, and additional courses not listed may be offered. Additional information is available at School of Law Curriculum (http://www.law.uci.edu/academics/curriculum.html) website. Course descriptions, content, and requirements are subject to change.

General Courses
- Administrative Law
- Business Associations
- Constitutional Law: First Amendment
- Criminal Procedure
- Evidence
- Federal Courts
- Federal Criminal Law
- Federal Income Taxation
- Property
- Remedies
- The Federal Judge

Business Law
- Accounting and Finance for Lawyers
- Advanced Legal Writing: Business Drafting
- Antitrust
- Antitrust Law & IP Rights
- Bankruptcy Law
- Business and Economics of Law Firm Practice
- Business and Regulation of Fund Investors
- Business Torts
- Commercial Transactions
- Corporate Finance
- Insurance Law and Policy
- Investment Management Regulation
- Law and Theory Relating to the 2008 Financial Crisis
- Mergers and Acquisitions
- Organizations, Operations, and Tax Aspects of Public Charities and Private Foundations
- Public Companies
- Representing Business Clients
- SEC Enforcement Process
- Secured Credit
- Securities Regulation
- Statistics for Lawyers

Colloquium
- Writing for Publication in the Law Review
- Advanced Writing for Publication in the Law Review

Criminal Law
- Advanced Criminal Law, Practice, & Procedure
- Memory & The Law
Documents and Artifacts in Socio-Legal Research
Topics in White Collar Crime

**Employment Law**
Employment Discrimination Law
Employment Law
Labor Law

**Entertainment Law**
Entertainment Law
Sports Law

**Family Law**
Children and the Law
Community Property
Family Law
Gifts, Wills, and Trusts
Advocating for Vulnerable Children: From Foster Care to Juvenile Justice

**Intellectual Property**
Copyright Law
Digital Copyright Law
Cross-Border Trade in IP
Intellectual Property Law
Patent Law
Technical Protection of Author's Rights
Trademark and Unfair Competition Law

**International and Comparative Law**
China Law
Comparative Law
International Business Transactions
International Contracts
International Environmental Law
International Human Rights Law
International Trade Law
Islamic Law
Japanese Law
Jewish Law
Korean Law

**Law and Medicine**
Biomedical Ethics
Drug Discovery, Development & Commercialization
Health Care Law
Reproductive Technologies

**Perspective Courses**
American Legal History
Cause Lawyering
Spanish for Lawyers
Conflict of Laws
Critical Race Theory
Feminist Jurisprudence and the Law
Human Rights & Protest in 20th and 21st Century China
Jurisprudence
Law and Economics
Law and Literature
Law and Social Movements
Race and the Law
Sexual Orientation and the Law

**Procedural Courses**
- Arbitration
- Civil Rights Litigation
- Complex Litigation
- Conflicts of Law
- Dispute Resolution
- Negotiations and Mediation

**Public Law**
- Animal Law
- Civil Rights Law
- Education Law
- Election Law
- Federal Public Land and Natural Resources Law
- Race and the Law
- Environmental Law
- Immigration Law
- Land Use and Development Control Law
- Legislation
- Local Government Law
- Organizations, Operations and Tax Aspects of Public Charities and Private Foundations
- Media Law
- National Security Law
- Natural Resources Law
- Poverty Law
- Regulatory Design and Innovation
- White Collar Crime

**Real Estate Law**
- Land Use Law
- Real Estate Transactions

**Skills Courses**
- Advanced Legal Research
- Advanced Legal Writing
- Global Justice Summit
- Appellate Litigation
- Appellate Advocacy
- Negotiations
- Spanish for Lawyers
- Trial Advocacy

**Tax Law**
- Basic Tax
- Corporate Tax
- Estate and Gift Taxation
- Partnership & LLC Taxation
- Taxation of Business Enterprises

**Clinical/Externships**
- Appellate Litigation Clinic
- Advanced Community & Economic Development Clinic
- Advanced Environmental Law Clinic
- Advanced International Human Rights Clinic
- Advanced Immigration Rights Clinic
- Advanced Consumer Protection Clinic
- Community & Economic Development Clinic
- Consumer Protection Clinic
- Family Violence Clinic
Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in cognate disciplines are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master’s or Ph.D. degree from any of the graduate professional or research degree programs at UCI that have been approved for this concurrent degree program. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a graduate degree in less time than would be required to acquire both degrees separately. The normative time for completion of the program is four years for J.D./Master’s combinations and seven years for J.D./Ph.D. combinations. Additional information is available from the PLGS Program Director’s Office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Program (http://www.law.uci.edu/plgs) website.

UC Irvine’s PLGS program is well suited to students interested in professional or academic careers focused on the interdisciplinary or multidisciplinary study of law and legal institutions, policy analysis, and/or applied research in law-related fields (for example, criminal justice and criminology, urban planning and environmental issues, discrimination, human rights, urban planning, environmental protection, and intellectual property). UC Irvine is nationally known for its graduate programs in such fields as Criminology, Law and Society; Psychology and Social Behavior; Anthropology; Management and Business; Literature; History; Performing Arts; and others.

Applicants must submit separate applications for admission to the School of Law and to the graduate program of their choice. Once admitted for study into both components of their program, concurrent degree students will work with the PLGS director and the director of their graduate program to develop a program of study that will permit efficient pursuit of both degrees. Ordinarily, students will commence their studies in their chosen graduate program and begin their first year of law instruction after one or more years of graduate program study. Upon completion of the first year of law instruction, students will pursue a coordinated curriculum of upper-level law study and graduate program study and research. Concurrent degree students’ law enrollments will include a required “Graduate Legal Studies” colloquium and a 3-unit “Interdisciplinary Perspectives on Law” course or its equivalent. Concurrent degree students will be eligible for financial support through their chosen graduate program while pursuing graduate degree studies, and through the law school while pursuing law studies.

**Required Colloquium**

**University Studies 296 Graduate Legal Studies (.3).** Monthly faculty/student colloquium to present and discuss socio-legal related research/issues. Course convened by Law School faculty with other faculty participation. Open to graduate students and Law students; required for PLGS students enrolled in Law portion of degree. Satisfactory/Unsatisfactory only. May be repeated for credit as topics vary.

**Law 5655 Interdisciplinary Perspectives on Law.** This course is a reading and discussion seminar. Students will read a book each week. For the first class, students will read the book and come to class prepared to discuss it. For the second class each student will write a 750-word critique (analytic precis) of the book; discussion of the book will continue in that class. The seminar will be organized into four roughly equal segments. The first will present four quite distinct accounts of law—law as education, as ideology, as politics, and as organized activism. The second will consider several distinct scholarly perspectives on law—cultural, rhetorical, sociological. The third will examine applications of interdisciplinarity to legal studies—of property, recording media, citizenship, and emergency politics. The fourth will continue "applications" and conclude the course by comparing two rather different studies of law and death.

**Faculty**

L. Song Richardson, J.D. Yale Law School, *Professor of School of Law*

Peter Afrasiabi, J.D. University of Southern California, *Lecturer of School of Law*

Daniel Alexander, J.D. University of California, Los Angeles, *Lecturer of School of Law*

Olufunmilayo B. Arewa, J.D. Harvard University, *Professor of School of Law; Anthropology*

Sameer M. Ashar, J.D. Harvard University, *Senior Lecturer of School of Law*
Jessica Karp Bansal, J.D. Columbia University, Lecturer of School of Law

Mario Barnes, LL.M. University of Wisconsin-Madison, Professor of School of Law; Criminology, Law and Society (criminal law, constitutional law, critical race theory)

William W. Bedsworth, J.D. University of California, Berkeley, Lecturer of School of Law

Avery R. Brown, J.D. University of California, Los Angeles, Lecturer of School of Law

Dan L. Burk, J.D. Arizona State University, UCI Chancellor's Professor of School of Law

Kevin Calcagnie, J.D. Western State University, Lecturer of School of Law

Alejandro E. Camacho, LL.M. Georgetown University, Professor of School of Law; Political Science

Catherine Carlisle, J.D. Northwestern University, Lecturer of School of Law

Cormac J. Carney, J.D. Harvard University, Lecturer of School of Law

Elizabeth E. Cauffman, Ph.D. Temple University, UCI Chancellor's Fellow and Professor of Psychology and Social Behavior; Education; Psychology and Social Behavior; School of Law (adolescent development, mental health, juvenile justice, legal and social policy)

Richard Ceballos, J.D. Loyola Marymount University, Lecturer of School of Law

Jennifer M. Chacon, J.D. Yale University, Professor of School of Law

Erwin Chemerinsky, J.D. Harvard University, Dean of the School of Law, Raymond Pryke Endowed Chair in First Amendment Law and Professor of School of Law; Political Science

Stephen D. Cooke, J.D. University of California, Los Angeles, Lecturer of Paul Merage School of Business; School of Law

Rachel E. Croskery-Roberts, J.D. University of Michigan, Senior Lecturer of School of Law

Patricia Cyr, J.D. Georgetown University, Lecturer of School of Law

Kathryn Davis, J.D. Hastings College of Law, Lecturer of School of Law

R. Seth Davis, J.D. Columbia Law School, Acting Professor of School of Law

Joseph Di Mento, Ph.D. University of Michigan, Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Planning, Policy, and Design (planning, land use and environmental law, use of social science in policy making, legal control of corporate behavior)

David Fischer, J.D. University of California, Los Angeles, Lecturer of School of Law

Catherine Fisk, J.D. University of California, Berkeley, UCI Chancellor's Professor of School of Law; Criminology, Law and Society; History (labor and employment law, civil rights)

Douglas K. Freeman, J.D. University of California, Los Angeles, Lecturer of School of Law

Laura C. Fry, J.D. University of Southern California, Lecturer of School of Law

Bryant G. Garth, J.D. Stanford University, UCI Chancellor's Professor of School of Law

Howard A. Gillman, Ph.D. University of California, Los Angeles, Provost and Interim Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law

Jonathan D. Glater, J.D. Yale University, Acting Professor of School of Law

Karlene Goller, J.D. Suffolk University, Lecturer of School of Law

Michele B. Goodwin, J.D. Boston College, Professor of School of Law

Daniel A. Green, J.D. , Lecturer of School of Law

Andrew J. Guilford, J.D. University of California, Los Angeles, Lecturer of School of Law

Kaaryn Gustafson, Ph.D. University of California, Berkeley, Professor of School of Law

Richard L. Hasen, J.D. University of California, Los Angeles, UCI Chancellor's Professor of School of Law; Political Science
Jeffrey S. Helmreich, Ph.D. University of California, Los Angeles, Assistant Professor of Philosophy; School of Law

Carrie Hempel, J.D. Yale University, Senior Lecturer of School of Law

Paul L. Hoffman, J.D. New York University, Adjunct Professor of School of Law

Robert Holmen, J.D. University of California, Berkeley, Lecturer of School of Law

Lon Hurwitz, J.D. Southwestern University, Lecturer of School of Law

Jon M. Ichinaga, J.D. Southwestern Law School, Senior Lecturer of School of Law

Jean-Paul Jassy, J.D. University of Southern California, Lecturer of School of Law

Linda Cohen Jennings, Ph.D. California Institute of Technology, Professor of Economics; School of Law

David A. Kaye, J.D. University of California, Berkeley, Senior Lecturer with Potential Security of Employment of School of Law

Christopher M. Klein, J.D. University of Chicago, Lecturer of School of Law

Gerald Klein, J.D. University of California, Los Angeles, Lecturer of School of Law

Nicholas La Terza, J.D. University of Toledo, Lecturer of School of Law

Anne Lai, J.D. New York University, Lecturer with Potential Security of Employment of School of Law

Ellen Lawsky, M.S. University of California, Davis, Lecturer of School of Law

Sarah B. Lawsky, J.D. Yale University, Professor of School of Law

Thong Le, J.D. University of California, Berkeley, Lecturer of School of Law

Stephen Lee, J.D. University of California, Berkeley, Professor of School of Law; Asian American Studies

Jack I. Lerner, J.D. Harvard University, Senior Lecturer with Potential Security of Employment of School of Law

Christopher R. Leslie, J.D. University of California, Berkeley, Dean of Graduate Division and Professor of School of Law

Elizabeth F. Loftus, Ph.D. Stanford University, UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law (cognitive psychology, human memory, psychology and law)

Mona Lynch, Ph.D. University of California, Santa Cruz, Professor of Criminology, Law and Society; School of Law (law and society, psychology and law, punishment and society, race and criminal justice)

Thomas R. Malcolm, LLB University of California, Berkeley, Lecturer of School of Law

William M. Marticorena, J.D. Harvard University, Lecturer of School of Law

William M. Maurer, Ph.D. Stanford University, Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; Culture and Theory; School of Law (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Carrie Menkel-Meadow, J.D. University of Pennsylvania, UCI Chancellor's Professor of Political Science; School of Law

Judith Meyer, J.D. Pepperdine University School of Law, Lecturer of School of Law

David K. Min, J.D. Harvard University, Acting Professor of School of Law

Douglas G. Nejaime, J.D. Harvard University, Professor of School of Law

Grace A. Nguyen, J.D. Loyola Marymount University, Lecturer of School of Law

Ramin Pejan, LL.M. McGill University, Lecturer of School of Law

Katherine M. Porter, J.D. Harvard University, Professor of School of Law

R. Anthony Reese, J.D. Stanford University, UCI Chancellor's Professor of School of Law

Keramet A. Reiter, Ph.D. University of California, Berkeley, Assistant Professor of Criminology, Law and Society; School of Law (prisons, legal history, criminal justice policy, criminal and civil rights law, law and society)
School of Law

Mark Robinson, J.D. Loyola School of Law, Lecturer of School of Law
Michael J. Robinson-Dorn, J.D. Cornell University, Senior Lecturer of School of Law
Trilby Robinson-Dorn, J.D. Tulane University, Senior Lecturer with Potential Security of Employment of School of Law
Ezra A. Ross, J.D. Harvard University, Senior Lecturer with Potential Security of Employment of School of Law
Peter Schneider, J.D. University of San Diego, Senior Lecturer of School of Law
Tam Nomoto Schumann, J.D. University of California, Berkeley, Lecturer of Criminology, Law and Society; School of Law
Michael D. Seplow, J.D. University of California, Los Angeles, Lecturer of School of Law
Carroll S. Seron, Ph.D. New York University, Professor of Criminology, Law and Society; School of Law; Sociology (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)
Gregory Shaffer, J.D. Stanford University, Professor of School of Law
Darryl C. Sheetz, J.D. Villanova University School of Law, Lecturer of School of Law
Crystal Sims, J.D. University of San Diego, Lecturer of School of Law
Robert A. Solomon, J.D. George Washington University, Senior Lecturer of School of Law
Ann Southworth, J.D. Stanford University, Professor of School of Law; Criminology, Law and Society
Jane K. Stoever, J.D. Harvard University, Senior Lecturer with Potential Security of Employment of School of Law
Mary-Christine Sungaila, J.D. University of California, Los Angeles, Lecturer of School of Law
Catherine Sweetser, J.D. New York University, Lecturer of School of Law
Shauhin A. Talesh, J.D. University of Connecticut, Acting Professor of School of Law; Criminology, Law and Society; Sociology (civil procedure, consumer law, insurance, business organizations, empirical legal studies, law and society)
William B. Tate, J.D. Stanford University, Lecturer of School of Law
William C. Thompson, Ph.D. Stanford University, Professor of Criminology, Law and Society; Psychology and Social Behavior; School of Law (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)
Beatrice Tice, J.D. Stanford University, Senior Lecturer of School of Law
Christopher L. Tomlins, Ph.D. Johns Hopkins University, UCI Chancellor’s Professor of School of Law; Criminology, Law and Society (law and humanities, law and society, legal history)
Grace Tonner, J.D. Loyola Marymount University, Senior Lecturer of School of Law
Benjamin van Rooij, Ph.D., John S. and Marilyn Long Chair in U.S.-China Business and Law and Professor of Criminology, Law and Society; School of Law
Kerry Vandell, Ph.D. Massachusetts Institute of Technology, Professor of Paul Merage School of Business; Planning, Policy, and Design; School of Law
James C. Wald, J.D. University of Southern California, Lecturer of School of Law
Jeffrey N. Wasserstrom, Ph.D. University of California, Berkeley, UCI Chancellor’s Professor of History; History; School of Law
Henry Weinstein, J.D. University of California, Berkeley, Senior Lecturer of School of Law; English
Ray Weston, J.D. University of Oklahoma, Lecturer of School of Law
Christopher A. Whytock, J.D. Georgetown University, Professor of School of Law; Political Science
Jessica L. Wimer, J.D. Indiana University, Associate Librarian, Public Services of School of Law
Marc Winthrop, J.D. University of California, Los Angeles, Lecturer of School of Law
Ralph Zarefsky, J.D. Stanford Law School, Lecturer of School of Law

School of Medicine Overview

The UCI School of Medicine became part of the University of California in 1965. Prior to this time it was known as the California College of Medicine which traces its roots to a private institution founded in 1896.

Mission Statement

The mission of the University of California, Irvine, School of Medicine is to promote biomedical sciences and medicine in Orange County, California, and beyond, through excellence in research, patient care, education, and community service. This mission is achieved through programs of excellence in the following:

Education: The School of Medicine is committed to provide educational programs of the highest quality to medical students, M.D./Ph.D. and M.D./M.B.A. students, residents, fellows, allied health, graduate academic students, practicing physicians and other health care professionals. Educational programs are offered along the continuum of medical education with programs in undergraduate, graduate, and continuing medical education. These programs emphasize the most current knowledge in the health sciences and reflect the changing practice of medicine. Further, the School of Medicine’s educational programs are designed to stimulate life-long self-learning and critical inquiry and to exemplify those human values necessary to fulfill the professional commitments of a career in the health sciences.

Research: Excellence in research is an essential feature of the School of Medicine. Therefore, the School is committed to develop and maintain research programs in the health sciences which seek to advance basic scientific knowledge and the prevention, diagnosis, and treatment of human illness.

Clinical Care: Recognizing its responsibility to meet the educational needs of students and the diverse needs of the patient community, the School of Medicine is committed to programs of clinical excellence across the spectrum of patient care disciplines.

Service to the Public: As a publicly assisted institution, the School of Medicine is committed to serve the community as a vital resource of expertise and knowledge. The School further serves the public through the training of health professionals whose backgrounds reflect California’s ethnic and cultural diversity and whose professional careers address California’s health care needs.

1 The School of Medicine’s basic medical science departments of Anatomy and Neurobiology, Biological Chemistry, Microbiology and Molecular Genetics, Pathology and Laboratory Medicine, and Physiology and Biophysics offer graduate instruction leading to the M.S. and Ph.D. degrees in Biomedical Sciences.

2 Offered in conjunction with the Department of Pharmaceutical Sciences.

The School of Medicine also offers the Medical Scientist Training Program (M.D./Ph.D.), the Program in Medical Education for the Latino Community (PRIME-LC), an M.D./M.B.A. program in cooperation with The Paul Merage School of Business, medical residency programs, and continuing medical education for physicians and other health care professionals.

Vision Statement

The University of California, Irvine, School of Medicine will achieve preeminence through the creation, application, and dissemination of new knowledge in the biomedical sciences and medicine. This will be accomplished through international leadership in biomedical research, development of new therapies, delivery of state-of-the-art medical care, and innovative biomedical education.
Health Sciences Complex

The Health Sciences Complex is a 121-acre site that houses UCI’s medical school facilities. Twenty-nine acres have been developed to provide space for teaching, research, and patient care as well as offices for departmental administration.

The School’s basic science instructional programs are located in modern, well-equipped, medical sciences buildings. These units provide space for first- and second-year classes, lecture halls (including the Dr. S. Jerome and Judith D. Tamkin Student Lecture Hall), offices and laboratories for various basic and clinical departments. Other buildings house the School’s administration and laboratories.

The Medical Education building symbolizes the University’s ongoing commitment to high-quality medical education and innovation. The $40-million, 65,000-square-foot building serves as the hub for nearly all non-hospital related educational activities for UC Irvine medical students, and incorporates the latest technology to help prepare tomorrow’s doctors for healthcare in the digital age. The School of Medicine Educational Affairs Office is located in the Medical Education building, as well as the innovative Program in Medical Education for the Latino Community (PRIME-LC), an acclaimed program to improve healthcare for the Latino community by training medical students to care for this underserved population in a linguistically competent, culturally sensitive way.

The Medical Education building’s telemedicine center includes a 60-seat interactive televideo auditorium where students watch UC Irvine physicians provide expert care over the Internet to patients in rural or other remote locations. Located on the second floor, the Clinical Skills Center is a cutting-edge facility for teaching and assessment of clinical skills, communication, and professionalism. The Center includes 17 fully equipped patient exam rooms, a central control room for exam administration and recording of all activities, and a computer software system that focuses on the capture, debriefing, and assessment of medical training. The building also features an advanced simulation learning center. The Simulation Lab is a four-suite lab that utilizes high-fidelity human patient simulators with physiologically accurate responses to stimuli to enhance learning and assess competency. The lab is equipped with a fully operational anesthesia suite, a trauma suite, and a general ward environment. The Simulation Lab has two debriefing rooms for immediate feedback on performance as well as a large central control room for all simulation activities.

In addition, the 40,000-square-foot Plumwood House is devoted to basic research in the fields of neurological disorders, diagnostic systems and reagents, and industrial bioreactors. In this facility, faculty from the Department of Biological Chemistry share laboratory space with corporate researchers.

Outpatient services are available on campus through the Louis A. and Helen C. Gottschalk Medical Plaza and the Beckman Laser Institute. The Plaza capitalizes upon the broad range of diagnostic and therapeutic programs of the School as well as the extensive clinical expertise of the faculty. The facility offers primary care and specialty services. Special programs in diabetes, multiple sclerosis, Alzheimer’s disease, and inflammatory bowel diseases also are offered. The Plaza also houses UC Irvine Corporate Health Services and the Gavin Herbert Eye Institute, which offers the latest in diagnostic health care for eye diseases, including computerized refraction analysis, glaucoma diagnosis, and ultrason sound analysis of eye disorders.

Housing one of the world’s leading programs in medical laser technology, the Beckman Laser Institute offers state-of-the-art treatment for cancer and dermatological conditions. The Institute specializes in the development and application of laser and other optical technologies for the diagnosis and treatment of disease.

Biomedical Research Center

UCI’s Biomedical Research Center (BRC) is a landmark public-private collaboration between UCI and businesses involved in biomedical, biotechnological, and healthcare services. The Center enables UCI researchers and participating companies to work alongside one another, combining basic science, clinical study, and product development to find new approaches to the diagnosis and treatment of disease. The William J. Gillespie Neuroscience Research Facility, the first of several BRC buildings, is the home of a core group of prominent scientists investigating the causes and cures for neurological disorders, including Alzheimer’s disease, Parkinson’s disease, schizophrenia, and spinal cord injury. The second building is the Robert R. Sprague Family Foundation Hall, where scientists work to reveal the role of genetics in cancer treatment and prevention. The third building, the Dottie and George Hewitt Research Hall, is home to a state-of-the-art General Clinical Research Center and internationally recognized investigators studying infectious diseases, molecular medicine, immunology, and complementary and alternative medicine. The Sue and Bill Gross Stem Cell Research Center is the fourth building in UCI’s Biomedical Research Center. Opened in 2010, this state-of-the-art research and clinical building fosters a multi-pronged approach to neurodegenerative repair and basic stem cell biology by supporting basic research, regenerative medicine, and drug-development programs.

Chao Family Comprehensive Cancer Center

The Chao Family Comprehensive Cancer Center is the only National Cancer Institute-designated facility in Orange County and one of only 40 such centers in the country. Overall, more than 100 faculty members at the Cancer Center are involved in several major research programs, encompassing everything from basic research that looks at how cancer cells grow to bone marrow transplantation. Located at the UC Irvine Medical Center in Orange, the 56,000-square-foot facility provides an ideal setting for the practice of all the basic and clinical subspecialties involved in adult and pediatric oncology, including the application of the latest techniques for diagnosis and management of patients with cancer.

University of California, Irvine Health

UC Irvine Health is committed to providing the highest quality healthcare to Orange County and surrounding communities through UC Irvine Medical Center, Orange County’s only university hospital.
UC Irvine Medical Center, located in the City of Orange, is a 415-bed, comprehensive medical care center. It is the principal clinical facility of the UC Irvine School of Medicine. The medical faculty of the School of Medicine together with the medical resident-physician staff, provide the professional care. A full scope of acute- and general-care services offered at UC Irvine Medical Center include cancer, cardiology, digestive disease, dermatology, obstetrics and gynecology, neonatology, psychiatry, family medicine, pathology, radiology, physical medicine and rehabilitation, ophthalmology, neurology, anesthesiology, orthopaedics, geriatrics, oncology, neurosurgery, otolaryngology, and urology.

UC Irvine Medical Center also has cardiac, neonatal, burn, medical, surgery, and neurosciences intensive care units, and more than 90 specialty outpatient services. It is Orange County’s only Level I trauma center—the most comprehensive designation for the treatment of life-threatening injuries. In March 2009, the seven-story UC Irvine Douglas Hospital opened at UC Irvine Medical Center and includes 236 beds, 19 operating rooms, and interventional procedure rooms. Private patient rooms offer patients optimal comfort and healing and accommodate family members who wish to stay overnight. More information is available at the UC Irvine Health (http://www.ucirvinehealth.org) website.

UCI Family Health Center-Santa Ana
The UCI Family Health Center-Santa Ana is a state-of-the-art primary care facility, conveniently located near the Santa Ana Civic Center. The Center has two missions—healthcare delivery and medical education.

As a community clinic, the Family Health Center’s multilingual physicians and staff are committed to providing quality health care to patients, including the medically under-served. It provides primary care services to people of all ages including family medicine, preventive care for children and adults, and specialty care in pediatrics and obstetrics and gynecology.

As an integral part of the UCI School of Medicine, the Family Health Center provides educational and training opportunities for medical and nurse practitioner students, including the UCI Family Medicine and Obstetrics and Gynecology residency training programs.

UCI Family Health Center-Anaheim
The UCI Family Health Center-Anaheim provides care for more than 20,000 outpatient visits annually and training programs for resident physicians in primary care, general internal medicine, and general and adolescent pediatrics. There are additional programs in gynecology, dermatology, general surgery, podiatry, neurology, ophthalmology, optometry, orthopedics, psychiatry, and multispecialty faculty practice. The Center provides training for medical students in their primary care, general pediatric, adolescent medicine, and geriatric medicine rotations and electives.

Affiliated Hospitals and Clinics
Additional major teaching and research programs of the School of Medicine are conducted at the Veterans Affairs Long Beach Healthcare System, Children’s Hospital of Orange County (CHOC), Long Beach Memorial Medical Center, and Miller Children's Hospital (Long Beach). Other academic programs are conducted in affiliation with Kaiser Foundation Hospital (Anaheim, Bellflower, Irvine, and Riverside), Children’s Hospital of Los Angeles, Western Medical Center (Tustin/Santa Ana), and St. Jude's Hospital (Fullerton).

School of Medicine Alumni Relations
The UCI School of Medicine is an outgrowth of what began in 1896 as the Pacific College of Osteopathy (PSO). Some years later it became the College of Osteopathic Physicians and Surgeons, which then evolved into the California College of Medicine in 1962 and subsequently joined the UC system in 1965. The Office of Alumni Relations provides programs and services for nearly 4,000 alumni of the School as well as for students. From financial support to Honor’s Night awards, mentorship to reunions, the Office of Alumni Relations seeks to provide a cornerstone from which students and alumni can benefit from their relationships to one another and in so doing, strengthen the School of Medicine.

The M.D. Program
Admissions
All inquiries regarding the UCI School of Medicine’s admission programs and procedures should be directed to:

University of California, Irvine
School of Medicine
Office of Admissions and Outreach
Medical Education Building
Irvine, CA 92697-4089

949-824-5388 or 800-UCI-5388
http://www.meded.uci.edu/admissions/

The UCI School of Medicine is a member of the American Medical College Application Service (AMCAS). All students who seek entrance to the UCI School of Medicine must complete the AMCAS application (http://www.aamc.org/students/amcas/start.htm). Applications must be submitted between June 1 and November 1 of the year preceding anticipated admission.

Additional information for the following programs is included below: Medical Scientist Training Program (M.D./Ph.D.) (p. 1123), the M.D./M.B.A Program (p. 1123), and the Program in Medical Education for the Latino Community (PRIME-LC) (p. 1124).
Selection Factors
The UCI School of Medicine seeks to admit students who are highly qualified to be trained in the practice of medicine and whose backgrounds, talents, and experiences contribute to a diverse student body. The Admissions Committee carefully reviews all applicants whose academic record and MCAT scores indicate that they will be able to handle the rigorous medical school curriculum. In addition to scholastic achievement, attributes deemed desirable in prospective students include leadership ability and participation in extracurricular activities such as clinical and/or medically related research experience, as well as community service. Careful consideration is given to applicants from disadvantaged backgrounds.

After receipt of the AMCAS application, applicants will be invited to complete a secondary application and will be required to submit a nonrefundable application fee of $80. Upon further review by the Admissions Committee, approximately 600 will be invited to interview. Regional interviews are not available. UC Irvine School of Medicine does not give preference to California residents. UC Irvine School of Medicine does not accept transfer students.

Requirements for Admission
Students can be considered for admission to the School of Medicine if they meet the following requirements:

1. All applicants must complete the American Medical Colleges Application Service (AMCAS) (https://www.aamc.org/students/applying/amcas) application between June 1-November 1, of the application year for the following year’s entering class. A minimum of three years (90 semester units) of undergraduate coursework, including a minimum of one full-time year at an accredited U.S. college or university. For purposes of evaluation, letter or numerical grades are preferred for course work, particularly for the required subjects listed below. All prerequisite courses listed as “in progress” on the AMCAS application and UC Irvine School of Medicine Secondary Application must be successfully completed by matriculation. Failure to meet the requirements or falsification of information are grounds for rejection or dismissal.

2. Completion of the following college course requirements prior to matriculation:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Requirement</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biology</td>
<td>1.5 Years: 3 semesters or 5 quarters.</td>
<td>Must include one upper-division Biology course.</td>
</tr>
<tr>
<td></td>
<td>1 Year Labs: 2 semesters or 3 quarters.</td>
<td></td>
</tr>
<tr>
<td>Chemistry</td>
<td>2 Years: 4 semesters or 6 quarters.</td>
<td>Must include biochemistry course and inorganic and organic chemistry courses.</td>
</tr>
<tr>
<td></td>
<td>1 Year Labs: 2 semesters or 3 quarters.</td>
<td></td>
</tr>
<tr>
<td>Physics</td>
<td>1 Year: 2 semesters or 3 quarters.</td>
<td></td>
</tr>
<tr>
<td>Math</td>
<td>1 semester/quarter of calculus.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>1 semester/quarter of statistics.</td>
<td></td>
</tr>
<tr>
<td>English</td>
<td>1 semester/quarter.</td>
<td>English or writing composition.</td>
</tr>
</tbody>
</table>

3. Applicants are strongly encouraged to have completed their basic science requirements at the time of application. No specific major is required, however, demonstrated ability in the sciences is of great importance. In addition, applicants are advised to take advantage of the intellectual maturation afforded by a well-rounded liberal arts education. English, the humanities, and the social and behavioral sciences are considered particularly important. The following courses are also recommended but not required: molecular biology, cell biology, genetics, vertebrate embryology, psychology, and Spanish.

4. Medical College Admissions Test (MCAT) (https://www.aamc.org/students/applying/mcat) must have been taken within the three years preceding June 1 of the application year and no later than September 1 of the application year.

5. Three to six letters are suggested. We recommend that at least two of the letters be from senior professors who can evaluate your academic abilities. If you have been involved in research, clinical, community service, or other significant extracurricular activities, it is recommended that you submit a letter from your mentor, supervisor or advisor. The Admissions Committee will only be reviewing letters of recommendation from those applicants who received a secondary application.

6. A criminal background check is conducted on all accepted applicants.

7. All students matriculating to the UCI School of Medicine must be able to meet the Technical Standards available at the School of Medicine Admissions (http://www.meded.uci.edu/admissions) website.

Outreach
Outreach efforts coordinated by this office are designed to introduce students to the medical profession during their high school and undergraduate education. An additional goal of this office is to build a pipeline of potential candidates for medical school and recruit students from socioeconomically disadvantaged groups who have a desire to serve in the medically under-served communities in California. To reach these goals, programs are developed and implemented for students in high school, community colleges, and four-year undergraduate institutions. Examples of these activities include a Post baccalaureate Program, Premedical Conferences, and Summer Outreach Programs. Outreach staff conduct academic advising related to the medical school admissions process and develop liaisons with UCI undergraduate academic programs and pre-health advisors.

Medical Student Advisor System
The School of Medicine provides a comprehensive academic advising and assistance program that spans the full duration of the students’ educational program.
Academic Skills Assessment
All entering students undergo an academic skills assessment during the new student orientation. Students then meet individually with the associate dean for student affairs, the academic skills coordinator, and the School of Medicine psychologist to discuss study skills, early performance, and overall adjustment to medical school. Additional services are provided on an as-needed basis by the academic skills coordinator and the SOM psychologist.

Academic Advisors
Michael Prislin, M.D., Associate Dean Student Affairs; 949-824-8358

Student academic performance during the first two years is monitored on a monthly basis by the Educational Support Committee. The committee develops specific action plans for each student experiencing academic difficulty. All students are also assigned a faculty advisor beginning early in their first year. This faculty advisor serves as the student’s Clinical Foundations course small-group leader during years one and two. For years three and four, academic advisement occurs primarily via continuing interactions with the student’s faculty advisor and the associate dean for student affairs. Also during years three and four, the Educational Support Committee consisting of the Clinical Clerkship Directors periodically reviews student performance. The faculty advisor provides semi-annual reviews and formative feedback regarding student performance as well as general counseling relating to emerging career preferences and year-four scheduling. Students also have access to a group of faculty from various departments who have agreed to provide specialty-specific academic advice in their disciplines. Several workshops are conducted during the second half of year three and early in year four to prepare students for the residency application process. All students also meet individually with the associate dean for student affairs to review their Medical Student Performance Evaluation (dean’s letter) and discuss individual residency application strategies. Additional resources are involved on an as-needed basis by the associate dean for student affairs.

Peer Review and Peer Counseling Program
Michael Prislin, M.D., Associate Dean Student Affairs; 949-824-8358

The School of Medicine has an informal peer review process, aimed at early detection and assistance for medical students who are experiencing difficulty such as professional conduct problems, suspected impairment, violation of the honor code, or violation of any University policy, regulation, or rule. The Peer Review Committee is comprised of two representatives from each class, the student body co-presidents, and two advisory faculty members. The committee operates under guidelines set jointly by the School of Medicine administration and the student body. Cases involving serious professional misconduct are referred to the Dean’s Office. The Peer Review Committee conducts hearings and may impose sanctions or provide assistance to the student.

Medical Scientist Training Program (M.D./Ph.D.)
Alan Goldin, M.D., Ph.D., Chair; 949-824-5264

Exceptionally well-qualified students interested in careers in academic medicine and with demonstrated research accomplishments may be considered for admission to the Medical Scientist Training Program (MSTP). Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and a Ph.D. degree from any of the graduate programs at UCI. The normative time for completion of the program is eight years, and students holding either degree are not eligible for MSTP. The maximum time for completion of the program is 10 years. Additional information is available from the MSTP Coordinator’s Office, (949) 824-5264; mstp@uci.edu; or visit the Medical Scientist Training Program (http://www.mstp.uci.edu) website.

Applicants must submit a supplementary application (available from the School of Medicine Office of Admissions) to the Medical Scientist Training Program when they are submitting their secondary application information to the School of Medicine. Students accepted into the program have the option of pursuing graduate study in any of the graduate programs at UCI. Although a specific graduate department need not be chosen at the time of admission, students are expected to have selected a field for their graduate studies. Financial support in the form of a fellowship, which includes a stipend as well as tuition and fees, is provided. Applicants not accepted into MSTP may be considered separately for admission to the School of Medicine.

M.D./M.B.A. Degree Program
Maria Chandler, M.D./M.B.A., Faculty Advisor; 949-824-7133

The M.D./M.B.A. program requires five or six years for completion. It is aimed at individuals who are exceptional in ability and motivation and who seek a career as physicians with major responsibility for administration and management in health care organizations and institutions. Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and an M.B.A. degree from The Paul Merage School of Business.

Students must be currently enrolled in the M.D. program in order to apply to the combined M.D./M.B.A. program. During their second or third year of medical school, interested students submit an application to The Paul Merage School of Business Admissions Committee, after review by the School of Medicine. Final acceptance to the program is granted by The Paul Merage School of Business, and M.B.A. course work begins following completion of the student’s third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the M.B.A. program.
The MCAT, along with the completion of three years of medical school training in good standing and passage of USMLE Step 1, currently serve as a waiver for the GMAT entrance examination usually required for application to the M.B.A. program. The total number of units required to graduate from each program separately are satisfied in the M.D./M.B.A. program.

**Program in Medical Education for the Latino Community (PRIME-LC)**

Charles Vega, M.D., Director; 949-824-7136

A carefully selected group of students from diverse backgrounds and with superior academic credentials, proven commitment to service, and solid conversational Spanish will be considered for acceptance to the Program in Medical Education for the Latino Community (PRIME-LC) at the UCI School of Medicine. PRIME-LC responds to the increasing demand for physician-leaders who are culturally and linguistically competent to address the health care delivery, research, and policy needs of underserved Latino communities in California. The program spans all three components of medical training: undergraduate (medical school), graduate (residency program), and continuing medical education (post-residency). Students in PRIME-LC complete additional value-added curriculum in addition to their medical training in order to reach their goals of leading communities, and they also complete a Master’s degree program of their choice. The first residency positions in any UC PRIME opened in the UCI Family Medicine program in 2010.

The PRIME-LC supplemental application is part of the UCI School of Medicine secondary application and must be completed to be considered for acceptance. Applicants selected for faculty and student interviews are required to undertake a third interview in Spanish to evaluate conversational skills and commitment to service. All interested applicants, including those who are not currently California residents, are encouraged to complete the PRIME-LC application. Financial support is available in the form of scholarships, loans, and loan repayment programs. Applicants not accepted into PRIME-LC may be considered separately for admission to the regular School of Medicine M.D. program. For more information contact (949) 824-7136; primelc@uci.edu; or visit the PRIME-LC (http://www.medec.uci.edu/primelc) website.

**The M.D. Curriculum**

The UCI medical curriculum continues to meet the changing needs of medical education within all four years of instruction. Indeed, the School of Medicine faculty views curriculum development as a continual process and feels that medical education and teaching innovations must be encouraged and supported. The curriculum is designed to encourage medical students to become participants in their education process, to be active rather than passive learners, to become lifelong learners, and to use cooperative and team-learning principles.

UCI is dedicated to the nurturing of humanistic, caring physicians with top-notch clinical expertise and skills. The School strives for this through a curriculum that is not only anchored in the science of medicine but also provides meaningful experiences in the humanistic dimensions of medicine. In this context, the faculty endeavors to provide students with experiences in areas such as communications and empathy, ethics and professionalism; diversity awareness; and cultural sensitivity and medical humanities. The faculty also feels that the curriculum should strive to integrate basic and clinical sciences by bringing substantial clinical material into the early phases of medical education.

The School has achieved vertical integration of the curriculum with the development of a series of “Clinical Foundations” courses. The courses are longitudinal multidisciplinary experiences broadly designed to prepare students for their future careers in medicine through the application of experiential and self-directed learning principles. First-and second-year students begin to prepare for their clerkships through clinical exposures featuring standardized patients and clinical tag-along experiences. These courses also utilize small group learning sessions to reinforce core concepts of patient-physician interactions and introductory clinical reasoning skill development. During the Clinical Foundations IV course (years three and four) students explore many of the crucial issues first presented during the introductory courses. During this segment greater emphasis is placed on advanced skill acquisition and more mature professional role development.

To satisfy the requirement for the M.D. degree, each medical student must successfully complete the full curriculum. Students must also pass both Step 1 and Step 2 of the United States Medical Licensing Examination (USMLE) and successfully pass a Clinical Practice Examination (CPX) prior to graduation.

An ongoing academic monitoring program is coordinated by the Office of Student Affairs, which identifies students early who might be experiencing academic difficulty and provides them with resources to successfully complete their course work. Faculty advisors are assigned to students during their first and second years. Students have advisory sessions with M.D. faculty prior to the scheduling of their fourth-year course work. A Learning Resources Program is available to provide tutorial assistance and study skills training. USMLE reviews are also provided.

**Curricular Policies**

The curricular policies of the School of Medicine are the responsibility of the faculty committees on Curriculum and Educational Policy and on Promotions and Honors. A listing of these policies, as well as information regarding registration, rules and regulations, grading procedures, and requirements for academic advancement, are contained in the *School of Medicine Handbook*, which is available at the School of Medicine Office of Educational Affairs (http://www.medec.uci.edu/Students) website.

**First and Second Years:**

**Basic Science and Preclinical Course Work**

**First Year**

Clinical Foundations I
Anatomy and Embryology
Neuroscience
Histology
Medical Genetics
Medical Biochemistry and Molecular Biology
Physiology/Pathophysiology
Immunology

Second Year
Clinical Foundations II
Medical Microbiology
General and Systemic Pathology
Clinical Pathology
Medical Pharmacology

Third- and Fourth-Year Requirements

Third Year
Clinical Foundations III
Family Medicine
Inpatient Medicine
Ambulatory Medicine
Obstetrics and Gynecology
Pediatrics
Psychiatry
Surgery

Fourth Year
Clinical Foundations IV
Emergency Medicine
Intensive Care Unit
Neuroscience
Radiology
Senior Subinternship
Electives

1 The sequence of third and fourth years varies.
2 Prerequisite: Inpatient and Ambulatory Medicine.

Curricular Description

First-Year Curriculum
Clinical Foundations I
Clinical Foundations I, first of the four-part Clinical Foundations series, serves as the introductory clinical medicine course for first-year medical students. Participating students learn core skills in physician-patient communication, medical interviewing, physical examination, and health promotion. The course is horizontally integrated with the basic science curriculum. The series includes a variety of small and large group sessions taught by three types of faculty: core teachers, content theme coordinators, and community preceptors. Students complete multiple medical interviews, physical examinations, and patient write-ups for which they receive feedback designed to improve proficiency. (Med Ed 554A-B-C)

Anatomy and Embryology
The structure of the human body is taught in Anatomy and Embryology. Emphasis is placed on normal structure as it relates to function, with consideration of abnormal structures that may be revealed in a clinical setting. Anatomy is taught through a regional approach, with an emphasis on laboratory dissections and demonstrations, augmented by lectures, radiographic films, discussions, and clinical correlate material. The course includes a detailed consideration of the embryologic aspects of human development. (Med Ed 500A-B)

Neuroscience
The objective of this course is to provide students with the fundamental concepts, vocabulary, and learning strategies to attain a level of proficiency in basic integrative neurosciences so that they will develop an understanding in the clinical neurosciences throughout their careers as physicians. The course is integrative in the sense that the underlying knowledge of molecular, cellular, physiological, developmental, and neuroanatomical organization
of the nervous system is brought together in each lecture block with clinical themes and examples in lectures, and which is further reinforced by clinical correlates given by clinicians. The course emphasizes knowledge of the nervous system using lessons from clinical neuroanatomy, systems neurosciences, and regional and developmental neuroanatomy. The course uses the Blumenfeld text, Haines atlas, wet lab handouts, and the Neurosyllabus CD, which are all geared toward mastering this multiple strategy to the study of the human nervous system. (Med Ed 502A)

**Histology**

Histology is designed to provide students with knowledge of the major features of the structural organization of cells, tissues and organs, and how that organization is related to function. Course material consists of lectures, clinical correlate discussions, and group/independent study of images. Emphasis is placed on normal structure and function, with consideration of abnormalities in clinical cases. (Med Ed 503A-B)

**Medical Genetics**

Medical Genetics reviews the basic principles of human genetics related to disease. Assessment of patterns of genetic risk, screening for genetics diseases, and cytogenetics and biochemical diagnosis are presented. Utilization of the human gene map and DNA sequence information for molecular genetic diagnosis are discussed. Students are introduced to the use of genetic databases and bioinformatics. Approaches to treatment of genetic diseases are presented. Legal, ethical, and social aspects of diagnosis and management of genetic disease are discussed. (Med Ed 511)

**Medical Biochemistry and Molecular Biology**

Covers the following topics from a biomedical perspective: protein and nucleic acid biochemistry, carbohydrates, lipids, amino acids, purines and pyrimidines, genome structure, molecular mechanisms of development, and signal transduction. (Med Ed 522)

**Physiology/Pathophysiology**

This course consists of lectures, clinical correlates, hands-on workshops, small group discussions, and exercises in the simulation center covering the classical concepts of medical physiology. Specific topics include hemostasis, blood, neurophysiology, cardiovascular, respiratory, renal, gastrointestinal, endocrine, exercise, temperature regulation, and sexual physiology. Prerequisite: Medical Biochemistry and Molecular Biology. (Med Ed 543A-B)

**Immunology**

Immunology covers the cellular and molecular basis of immune responsiveness and the roles of the immune system in both health and disease. The material is presented in lectures and clinical correlates, as well as in a set of printed core notes. Also included are a number of Patient-Oriented Problem Solving (POPS) sessions in which participation is required. (Med Ed 544)

**Behavioral Science & Ethics**

This clinically oriented course will cover foundational topics in behavioral science and medical ethics, and will introduce clinically relevant social issues such as dealing with domestic violence as it presents clinically, treating minority or underserved populations (cultural competence). (Med Ed 505A)

**Second-Year Curriculum**

**Clinical Foundations II**

Clinical Foundations II, second of the Clinical Foundations series, builds second-year medical students’ clinical skills. Students learn advanced skills in history-taking, physical diagnosis, and clinical reasoning. Clinical didactics sessions synthesize learning in the clinical and basic sciences. The course is comprised mostly of small-group sessions taught primarily by three types of faculty: core clinical teachers, community clinical teachers, and content theme coordinators. With these faculty, students work on focused, guided practice of clinical skills that integrates basic science course work. About a third of the course is in the form of large group clinical didactic and interactive sessions to synthesize clinical and basic sciences. (Med Ed 555A-B)

**Medical Microbiology**

This course covers the biology of infectious agents, including viruses, bacteria, fungi, and parasites, to provide the foundation in microbiology for the subsequent study of infectious diseases. Lectures, small group sessions with clinicians, and laboratory sessions are used to teach the molecular bases of microbial pathogenesis, diagnostic testing, antimicrobial therapy, and prevention strategies. Prerequisite: first-year curriculum. Graduate students must have approval of the course director and enroll through the Department of Microbiology and Molecular Genetics. (Med Ed 507A, B)

**General and Systemic Pathology**

This course deals with basic causes, mechanisms, and consequences of disease processes and with some applications of these considerations to clinical medicine. After an introduction to general types of disease processes, these processes are studied further as they affect specific organs and organ systems. Prerequisite: first-year curriculum. (Med Ed 508A-B-C)

**Clinical Pathology**

This course consists of lectures and laboratories covering the areas of hematology, blood bank, clinical chemistry, and microbiology. It provides students with a foundation for understanding the pathogenesis of a variety of disease states, as well as a foundation for the proper use of the laboratory for diagnosis and optimum patient management. Prerequisite: first-year curriculum. (Med Ed 509A-B)

**Medical Pharmacology**

This course covers the various classes of drugs that are used in medicine, particularly those used in specific or symptomatic treatment of disease states. Drugs of abuse are also covered. Emphasis is on the mechanisms of action of drugs at the organ and system level and on their use in medicine. The
obtain ACLS certification.

Clinical Foundations IV
This is a two-week required course that all fourth-year students take during the month of March. The students prepare presentations for their peers and faculty that integrate basic science and clinical science. The course also prepares the students for residency and provides them with an opportunity to obtain ACLS certification. (Med Ed 535)
Senior Subinternship
Students spend four weeks as subinterns during which time they carry the full ward responsibility of an intern on one-half the number of patients usually carried by an intern. The subinternship is designed to improve clinical competence and to prepare the students for the challenges and demands of the internship. Students may choose between subinternships in medicine, surgery, or pediatrics. (Med Ed 536, 537, 538, or 539)

Family Medicine Clerkship
This clerkship matches students with a family physician for a four-week block. Students are assigned to a UCI-affiliated clinic where the principles of family medicine and primary care are taught. Emphasis is placed upon exposing students to the 25 most common health care problems seen in family medicine. Students are exposed to the principles of community health and epidemiology, as practically applied in an ambulatory care setting. Students develop an awareness of the current health care delivery environment, including issues such as health care costs and the lifestyle of a family physician. Special tracks are available for interested students in geriatrics, integrative medicine, and under-served care. Special teaching sessions on family centered maternity care, health maintenance and nutrition, and musculoskeletal joint exams are part of the experience. A curriculum in ophthalmology is also part of the clerkship. Prerequisites: successful completion of the first- and second-year curriculum. (Med Ed 597)

Intensive Care Unit
This is a four-week rotation offered at UC Irvine Medical Center and Veterans Affairs Long Beach Healthcare System. ICU is offered in medicine, surgery, and anesthesiology. Students function as subinterns, becoming integral members of the ICU team, and serve as primary caregivers under supervision. (Med Ed 605B, 630K, 633M, or 685U)

Emergency Medicine
The objectives of the Emergency Medicine clerkship are to introduce students to principles of acute care medicine while caring for acutely ill and injured patients. Students have the opportunity to evaluate patients, expand their directed history and physical making skills, create a broad differential diagnosis, and formulate effective testing and treatment strategies. Active participation in patient care through refinement of procedural skills is largely emphasized and encouraged. The course consists of experiences in direct patient care, assigned readings from emergency medicine references, weekly conferences, and an end-of-rotation final examination. (Med Ed 630D)

Electives
Depending upon their particular interests, needs, and goals, students may take a variety of elective courses consisting of at least 30 contact-hours per week during the third and fourth years. Electives must be approved by the clinical faculty advisor. Students may take up to 20 weeks of their fourth-year course work (core/electives) at institutions other than UCI.

A listing of elective courses and descriptions can be found online at http://www.meded.uci.edu/elective.

All questions regarding the curriculum, electives, or matters of records should be directed to:

University of California, Irvine
School of Medicine
Office of Educational Affairs
Medical Education Building
Irvine, CA 92697-4089

General information/records: (949) 824-6138; scheduling: (714) 456-8462; curriculum: (949) 824-4609.

Office of Medical Education
Gerald A. Maguire, M.D., Senior Associate Dean; 949-824-5798

The Senior Associate Dean for Medical Education, in cooperation with the Academic Senate faculty, has responsibility for administrative oversight of the educational program leading to the M.D. degree, the postgraduate residency programs, and continuing medical education programs provided for practicing physicians and allied health personnel. The Senior Associate Dean also has administrative oversight responsibility for the Office of Admissions and Outreach. Medical Education provides services for the M.D. program which include curriculum development, implementation, management, and evaluation. The Office of Student Affairs provides student support services which include academic advisement, learning skills counseling, psychological counseling, career counseling, and student records, and coordinates additional services offered through general University offices which include housing, student health, and disabled student services.

Student Affairs
Michael Prislin, M.D., Associate Dean; 949-824-8358
Barbara Lutz, Registrar, Director; 949-824-5283
David Franklin, Ph.D., Counseling Psychologist; 949-824-4621
Geraldine Codd, Academic Skills Coordinator; 949-824-3415

The mission of the Office of Student Affairs is to create an environment within the School of Medicine community that fosters student attainment of the School of Medicine educational objectives. This is accomplished through assuring that student participation in the educational program occurs in a manner consistent with School of Medicine policies and regulations, and through the provision of support services that facilitate optimal student
participation in the educational program. To accomplish the educational assurance mission, the Office of Student Affairs disseminates information regarding academic policies and regulations, provides administrative and executive support for the faculty Committee on Promotions and Honors, and facilitates the institutional recognition of student achievement through the conduct of various School of Medicine events. To accomplish the educational support mission, the Office of Student Affairs provides academic, personal, psychological, career, and financial counseling; academic skills assessment and learning resources support, student wellness programs, student facilities support, initiatives to enhance the learning environment, and support for a variety of student organizations and informal activities.

Financial Aid
Luis Medina, Director; 949-824-6476

The UCI School of Medicine Financial Aid Office provides financial assistance and financial counseling services to entering and continuing medical students. The office secures, manages, and provides funds in the form of scholarships, grants, and loans to assist in meeting students' educational expenses.

The office coordinates financial aid application materials; tracks documents needed to complete an application; reviews and evaluates information provided by applicants; awards financial aid programs; and conducts research to determine basic educational expense budgets. It also provides students with information on policies and procedures, cost of attendance, and eligibility criteria.

In providing counseling services, the office advises students, reviews their individual circumstances, and provides financial assistance within financial aid program guidelines. It presents financial aid workshops for prospective and enrolled students to enhance their knowledge about financial aid programs and the application process, provides debt management counseling, and conducts entrance and exit interviews.

Curricular Affairs
Shahram Lotfipour, M.D., M.P.H., Associate Dean, Clinical Science Education; 949-824-6138
Jeffrey Suchard, M.D., Associate Dean, Basic Science Education; 949-824-6304

This office provides support related to curricular issues for the School of Medicine, departments, faculty, and students; initiates curriculum review and innovation to meet the challenges of contemporary medical education; establishes and reviews the objectives of the School of Medicine and ensures individual courses are teaching to meet the objectives; serves as facilitators of new programs and curriculum and supports working committees during curriculum development; facilitates and monitors curriculum content theme integration; and maintains records on course materials and grading policies. This office is responsible for curriculum documentation for review by the Curriculum and Educational Policies committee; the collection of course evaluations by students; maintaining accurate information on core and elective curriculum; and assessing the success of the current programs.

Instructional Technology Group
Warren Wiechmann, M.D., Faculty Director; 949-824-6138

The Instructional Technologies Group (ITG) is tasked with providing top-quality technology, innovation and support for UC Irvine School of Medicine faculty, students, and staff. We work closely with Medical Education to develop novel uses of technology within the medical school setting that will enhance the overall educational experience for our students.

Continuing Medical Education
Ellen Seaback, Director; (949) 824-1150

The Office of Continuing Medical Education provides educational activities to physicians and other health care professionals to reinforce basic medical knowledge, improve competency, and enhance performance-in-practice and outcomes of patient care. Additionally, these activities impart updated information on clinical practice and health care delivery; introduce new ideas, skills, and technology; and disseminate pertinent research findings. The program encompasses a broad and comprehensive range of topics based on identified gaps in the needs of the communities served. As an academic center of excellence that includes the UC Irvine Medical Center, emphasis is placed on the identification of areas for improvement through the system's Quality Improvement Department for which CME is a change-agent.

Graduate Medical Education
Khanh-Van Le-Bucklin, M.D., Associate Dean; 714-456-3526
Courtney Strayer, Director, Graduate Medical Education; 714-456-3526

The UCI School of Medicine Graduate Medical Education Training Programs attract medical students from prestigious medical schools nationwide. UCI offers 54 ACGME-approved residency and fellowship training programs. There are approximately 650 residents and fellows in these training programs. UC Irvine Medical Center, Veterans Affairs Long Beach Healthcare System, Long Beach Memorial Medical Center and Miller Children's Hospital are the integrated training sites for the residency programs. Other affiliations such as Kaiser (Anaheim, Bellflower, Irvine, and Riverside), Western Medical Center, Children's Hospital of Orange County, St. Jude's Hospital, and Children's Hospital Los Angeles offer additional residents training in specialized fields.
Postgraduate Educational Programs

Residency Programs

The School of Medicine and its affiliated hospitals offer approximately 650 residency positions in almost all areas of medicine. Training levels range from first-year residencies through seventh-year-level subspecialty fellowships. Inquiries about specific programs should be directed to the Program Director as listed in the Directory of Residency Training Programs, published each year by the American Medical Association, or to the chair of the appropriate School of Medicine department.

All residency programs meet the formal standards of the Accreditation Council for Graduate Medical Education and the appropriate specialty boards. UCI adheres to the Health Professions Educational Assistance Act of 1976, P.L. 94-484, Section 709, regarding shared-schedule residency training positions.

Residents in all programs rotate to UC Irvine Medical Center at some time. Residents in anesthesiology, dermatology, diagnostic radiology, medicine, neurology, ophthalmology, pathology, surgery, physical medicine and rehabilitation, radiation oncology, family medicine, subspecialties of medicine, orthopaedics, otolaryngology, urology, and psychiatry also rotate to the Veterans Affairs Long Beach Healthcare System. Residents in medicine, medicine subspecialties, anesthesiology, radiation oncology, psychiatry, obstetrics and gynecology, pathology, pediatrics, physical medicine and rehabilitation, plastic surgery, and surgery also rotate to the Memorial Hospital Medical Center/Miller Children’s Hospital in Long Beach. In 2009, UCI established an affiliation with the Children’s Hospital of Orange County (CHOC), which will be a major training site for the combined program in pediatrics and other specialties. Residents may also spend periods of time at other affiliated hospitals and clinics.

Anesthesiology

The Anesthesiology Residency Program is a five-year accredited categorical program. It offers training for residents at the postgraduate PG-1 to PG-4 levels. The residents spend a PGY-1/Clinical Base Year in intensive medical/surgical training at Long Beach Memorial Medical Center, Veterans Affairs Long Beach Healthcare System, and UC Irvine Medical Center. The PGY-2 through PGY-4 years involve broad clinical training at the UC Irvine Medical Center as well as rotations in affiliates at Children’s Hospital of Los Angeles (two months), Cedars-Sinai Medical Center (two months), Long Beach Memorial (two months) and the Veterans Affairs Long Beach Healthcare System (two months). Training is offered in general anesthesia, regional anesthesia, cardiac anesthesia, pediatric anesthesia, trauma anesthesia, neurosurgical anesthesia, ambulatory anesthesia, obstetric anesthesia, intensive care, and pain management. Electives in subspecialty training in obstetrical anesthesia, critical care medicine, pediatric anesthesia, pain management, cardiac anesthesia, or research are offered as part of the PGY-4 year.

Dermatology

The Department of Dermatology offers a three-year accredited residency which has fifteen residents, five for each of three postgraduate years. Residents rotate through clinics at UC Irvine, the Veteran Affairs Long Beach Healthcare System, and Kaiser Permanente and receive extensive training in medical and surgical dermatology and are active in research projects. Residents rotate through specialty clinics which see patients with immunobullous disease, pigmented disorders, venous disease, vascular birthmarks, pediatric disorders, and melanoma. Residents receive extensive training in Mohs surgery, laser techniques, excisional surgery, performance of flaps and grafts, and administration of cosmetic agents. Residents present at local, national, and international meetings.

Emergency Medicine

The Emergency Medicine residency was established in 1988 and has full accreditation by the Residency Review Committee. The program has 18 residents, six for each of three postgraduate years. The UC Irvine Medical Center Emergency Department is a high-acuity, Level I Trauma Center, treating over 50,000 patients annually. Thirteen board-certified emergency medicine faculty provide 24-hour patient care and supervision of residents and medical students. The Department of Emergency Medicine is active in disaster preparedness and response, emergency uses of ultrasound imaging, public affairs, community service, and research in the areas of prehospital care, instructional methods, trauma, health policy, and infectious disease, among others.

Family Medicine

The mission of the Family Medicine Residency Program is to train family physicians to succeed in a contemporary practice environment and to deliver high-quality medical care to a culturally and socioeconomically diverse patient population. This fully accredited program boasts 27 residents and offers training in a variety of settings. The residents’ continuity clinic is located in the largest community clinic in Orange County, and residents participate in a number of community outreach activities. The world-class faculty act as teachers and mentors to the residents and teach them important principles to help them succeed as professionals. The residency program is a leader in a variety of curricular endeavors including school outreach, training residents how to teach, the business of medicine, sports medicine, and much more. The hundreds of successful residency graduates in the local area are a testament to the program’s ongoing efforts to train outstanding family doctors.

Geriatrics

The Geriatrics Fellowship is a comprehensive one-year training program that has been accredited since 1991, providing eligibility for Geriatric Medicine specialization for Internal Medicine and Family Medicine physicians. Fellows receive training at UC Irvine Medical Center as well as affiliated sites, including Veterans Affairs Long Beach Healthcare System, and alternative community care environments for seniors. Fellows have longitudinal
experiences in high-quality skilled nursing facilities, assisted living facilities, a comprehensive, multidisciplinary assessment program, and primary care practices.

**Internal Medicine**
The internal medicine residency program is a traditional three-year training program and also sponsors a one-year preliminary program. The program focuses on core educational skills of the internist and offers pathways for primary care, hospitalist medicine, and research. Residents rotate through UC Irvine Medical Center, the Veterans Affairs Long Beach Healthcare System, and Long Beach Memorial Medical Center. Core program faculty have a special interest in academic internal medicine and education. Subspecialty fellowships are offered in basic and clinical immunology, cardiology, endocrinology and metabolic diseases, gastroenterology, hematology/oncology, infectious diseases, nephrology, pulmonary/critical care diseases, and rheumatology.

**Interventional Radiology**
The Department of Radiological Sciences offers a one-year, clinically oriented fellowship in Interventional Radiology. Training in this discipline involves a broad range of vascular and interventional radiology procedures including interventional CT and Ultrasound. The fellow will also have the opportunity and option to participate in neuroradiological procedures including neurovascular intervention. The fellow is encouraged to participate in ongoing research projects and publications. The Vascular and Interventional Fellowship Program at UCI is ACGME accredited.

**Medical Genetics**
UCI offers two Medical Genetics residency training programs. The first is a two-year categorical Medical Genetics residency that is straight Medical Genetics and requires prior satisfactory completion of 24 months of the ACGME-accredited residency training in a specialty other than Medical Genetics. At the end of the program a trainee should be eligible to take the American Board of Medical Genetics (ABMG) examinations. The second program is a five-year combined Pediatrics/Medical Genetics training program that devotes two and one-half years each to Pediatrics and to Medical Genetics. Usually, the first year is all Pediatrics, the last year is all Medical Genetics, and the middle three years alternate between Pediatrics and Medical Genetics for periods of three-six months each. After successful completion of the program the trainee will be eligible to take both the Pediatrics boards and the Medical Genetics boards. The number and content of genetics rotations that the combined Pediatrics/Genetics residents do are identical to those of the categorical genetics residents except that there is an additional six months of genetics time that is expected to be devoted to research or to training in a specialized area of genetics in which the resident intends to devote his or her career. This extra is flexible but must be spent in academic pursuit. Training utilizes three teaching hospitals: UC Irvine Medical Center, Children’s Hospital of Orange County, and Long Beach Memorial Medical Center/Miller Children’s Hospital. Research offices and laboratories are on the UCI main campus.

**Neonatal-Perinatal Medicine**
UCI offers a three-year fellowship in Neonatal-Perinatal Medicine, accredited by the Accreditation Council for Graduate Medical Education (ACGME). The program provides a well-rounded curriculum that balances between clinical experiences, teaching opportunities, and academic and scientific activities. The program offers variety and depth due to the diversity of the two major training sites—UC Irvine Medical Center and Long Beach Memorial Medical Center/Miller Children’s Hospital. The care of newborns seen through the two hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. These two sites represent a broad-spectrum of neonatal practice and offer excellent opportunities to learn and teach. Clinical and basic science research conducted by the faculty in the section gives the fellow the ability to gain skills in scientific investigation. The program’s superb physical environment, extraordinary clinical services, and varied research interests permit the faculty to carry out the mission of preparing neonatal fellows for a career in clinical or academic neonatology. In addition, the program collaborates clinically and through research with a superb fellowship training in Maternal-Fetal Medicine that is also based at the two institutions. The Neonatal-Perinatal Medicine Fellowship training consists of 14 months of direct patient care responsibilities, 19 months of research training, and three months of vacation.

**Neurology**
Neurology residency training focuses on the development of strong clinical skills to competently evaluate and treat the large number of disorders that afflict the nervous system. During three years of training at UCI, residents have the opportunity to see a wide variety of neurological conditions and receive progressively more responsibility. The program provides a rich, intellectually stimulating environment in which to learn. UCI Neurology faculty all have broad experience caring for neurological disorders and have special expertise in different neurological disciplines. Residents have opportunities to work in many different subspecialty areas with the faculty. The neurology residency program is big enough to provide a rich environment to learn about neurological disorders, yet remains small enough for residents to work closely with each faculty member. Residents are encouraged to learn at every opportunity: from patients, peers, the faculty, and visiting experts. There are many formats in which to learn, from bedside discussions, tutorials, to specially prepared lectures. To further stimulate intellectual growth, residents are actively encouraged to pursue research in any topic of their choosing, with the guidance of the faculty.

**Neurosurgery**
The UCI Residency Program in Neurosurgery is a rigorous training program designed to develop academic neurosurgeons. There are ample opportunities for both clinical and basic research within the Department and in collaboration with other laboratories or departments at UCI. Applicants are expected to have a strong academic record with a strong commitment to neurosurgery. One candidate is selected for each program year. Exact order of clinical rotations may vary slightly subject to the trainee’s previous experience and needs as well as the training program circumstances, however, the rotation generally proceeds as follows: the PGY-1 year is a nine-month general surgery rotation with three-months of neurology; PGY-2 is one year of
training at UC Irvine Medical Center; PGY-3 is a six-month rotation at Kaiser Permanente, Anaheim, followed by three-months of neuropathology and three-months of neuroradiology at UC Irvine Medical Center; PGY-4 is a six-month rotation at Children's Hospital of Orange County (CHOC) and a six-month rotation at Kaiser Permanente, Anaheim; PGY-5 is a research year; PGY-6 is a three-month rotation at Hoag Memorial Presbyterian Gamma Knife Center for stereotactic radiosurgery and a three-month elective (Interventional Radiology or Spine) at UC Irvine Medical Center and a six-month rotation at CHOC; PGY-7 is the chief resident year and will be at UC Irvine Medical Center. Invitations to interview for these positions are based on the candidate's academic record, National Board scores, publications, letters of recommendation, and a personal statement.

**Obstetrics and Gynecology**

This four-year program provides a solid foundation in Obstetrics and Gynecology with emphasis in the reproductive pathophysiology in the many different areas of women's health care. Based on this foundation, training continues with progressive resident responsibility for operative and medical management and surgical techniques. While predominantly clinical in scope, the program is strongly flavored by academic and research exposure. Training is provided in general obstetrics and gynecology with rotations in the subspecialties of perinatology, urogynecology, family planning, gynecologic oncology, and reproductive endocrinology. There are seven resident positions available each year in this four-year training program.

**Ophthalmology**

The three-year Ophthalmology Residency Program provides extensive clinical and surgical experience coupled to an excellent weekly didactic curriculum. The program provides a broad spectrum of ophthalmic disease management with extensive exposure and surgical experience in the full range of ophthalmology subspecialties. Residents have rotations in cornea and refractive surgery, vitreoretinal surgery, oculoplastic and orbital surgery, glaucoma, pediatric ophthalmology and strabismus, ophthalmic pathology, and neuro-ophthalmology, in addition to comprehensive ophthalmology clinics. Residents also receive instruction and practical application in the newest laser surgical techniques as well as the use of state-of-the-art diagnostic equipment.

**Orthopaedic Surgery**

The program is designed to provide intense exposure and experience in all areas of orthopaedics including trauma, reconstructive and joint replacement surgeries, pediatric orthopaedics, spine surgery, sports medicine, foot surgery, and rehabilitation. It is structured for maximum resident participation with an emphasis on personalized mentorship. The program's teaching hospitals include UC Irvine Medical Center, Veterans Affairs Long Beach Healthcare System, Children's Hospital of Orange County, and Kaiser Permanente Medical Center in Anaheim. There are four resident positions available each year.

**Otolaryngology—Head and Neck Surgery**

The Department of Otolaryngology—Head and Neck Surgery offers a five-year residency program providing comprehensive training in otolaryngology to prepare trainees to sit for the American Board of Otolaryngology Examinations. The five-year program provides a breadth of training in otological surgery, head and neck surgery, facial plastic surgery, pediatric otolaryngology, and nasal and paranasal sinus surgery. Residents receive an extensive clinical experience at UC Irvine Medical Center, Children's Hospital of Orange County, Veterans Affairs Long Beach Healthcare System, and Kaiser Foundation Hospital-Anaheim. Acceptance is through application and successful matching through the National Residency Matching Program. The program follows requirements set by the Accreditation Council for Graduate Medical Education.

**Pain Medicine**

The Fellowship Training Program in Pain Medicine at the UC Irvine Medical Center is an intensive one-year ACGME-accredited multidisciplinary training program sponsored by the Department of Anesthesiology and Perioperative Care. The fellowship boasts a multidisciplinary faculty with both Anesthesiology and Physical Medicine and Rehabilitation leadership. The program trains fellows who have completed a residency training program in Anesthesiology, Physical Medicine and Rehabilitation, Neurology or Psychiatry, although applicants from other fields may also apply. Truly interdisciplinary, the fellowship teaches interventional pain management, opioid and adjunctive medication management, as well as non-interventional pain management. Personalized physical and occupational therapy, off-loading therapy, electroacupuncture, electrodiagnostics, psychologic and cognitive therapies, and regional anesthesia are common treatment modalities at UCI that are also taught during the fellowship. The fellows also rotate through rehabilitation medicine, anesthesiology, neuroradiology, palliative care, neurology, and psychiatry.

**Pathology**

The Department of Pathology and Laboratory Medicine offers a residency training program covering all areas of anatomic and clinical pathology. The program is affiliated with Long Beach Memorial Medical Center and Veterans Affairs Long Beach Healthcare System. The training for the combined anatomic and clinical pathology program consists of four years of training in both anatomic and clinical pathology. The first three years consist of a core program providing exposure to each of the subspecialty areas of clinical pathology as well as surgical pathology, autopsy pathology, and cytopathology. Ample opportunities for research and teaching exist for individuals planning on an academic career. Excellent preparation is also provided for individuals planning on a career in forensic pathology or private practice in a community hospital.

**Pediatrics**

The Pediatric Residency Program emphasizes the interrelationship of patient care, didactic teaching, and research in the training of the pediatric resident physician. The focus is on the total care of the child from birth through young adulthood. A strong clinical and educational foundation is provided
through experiences in a broad spectrum of disease and/or injury as well as training in biosocial pediatrics, preventive health care, and community resources.

The program offers variety and depth due to the diversity of the Department’s major teaching hospitals—Children’s Hospital of Orange County, Miller Children’s Hospital (located at Long Beach Memorial Medical Center), and UC Irvine Medical Center. The faculty at these institutions provides a comprehensive teaching program in general pediatrics and cover the full range of pediatric subspecialties. The care of children seen through the two hospitals represents a cross-section of racial, cultural, and socioeconomic groups from a local population of more than 2.5 million. Thus, pediatric residents are exposed to a wide range of problems presented in settings ranging from intensive care to supervised office-based practice.

Physical Medicine and Rehabilitation

The Department of Physical Medicine and Rehabilitation offers a three-year residency for applicants who have completed a one year internship. The focus is on the diagnosis and comprehensive treatment and care of patients with neuromusculoskeletal or cardiopulmonary disabilities, from newborns to the elderly. Residents are also involved in research and medical student teaching.

Plastic Surgery

The Aesthetic and Plastic Surgery Institute of UCI has a fully integrated residency program. The program currently accepts three residents for a six-year educational training experience in Plastic Surgery. The goals and objectives of this program are to educate plastic surgeons who are analytical and scholarly in their approach to surgical problem solving, broadly experienced in all fields of the specialty, safe in their application of judgment and technique, and ultimately self-educating in a lifelong continuing medical education process. The goals and teaching philosophy are based on the graduate school model, which emphasizes analytic problem solving, scholarly use of the knowledge base and scientific resources of the field, development of judgment skills, and identification of educational tools that produce the ability to self-direct one’s lifelong professional education in a scholarly manner. At the successful completion of this program, candidates will be able to sit for their boards in Plastic Surgery.

Preventive Medicine

This residency program is offered by the Division of Occupational Medicine, Department of Medicine. It is intended for physicians who are seeking certification by the Board of Preventive Medicine. A prerequisite to participation is a minimum of one year of postgraduate clinical training in a primary care discipline. The objective of the program is the training of physicians in the fields of occupational medicine and industrial medical care. The resident is provided an academic foundation in occupational medicine, industrial hygiene, environmental toxicology, and epidemiology, in addition to practical experience in preventive medicine as it is applied to employed persons. This two-year program includes didactic training and clinical and field experience in occupational health and safety. Upon completion of training, the resident is qualified to enter the specialty practice of occupational medicine in an industrial setting, in private practice, in a government agency, or in an academic institution.

Psychiatry

The Psychiatry Residency Training Program is a four-year program that fosters academic excellence and broad clinical experience in general psychiatry. Residents receive extensive supervised training in both psychotherapy and psychopharmacology. The core curriculum includes didactic seminars and supervised clinical experiences in the following areas: adult inpatient and outpatient psychiatry, child psychiatry, geriatric psychiatry, primary care, neurology, emergency psychiatry, consultation and liaison psychiatry, forensic psychiatry, and substance abuse. Residents rotate at the UC Irvine Medical Center, the Veterans Affairs Long Beach Healthcare System, and Orange County Behavioral Health. Elective rotations are also available at the UC Irvine Outreach Clinics, Kaiser Permanente, and Long Beach Memorial Medical Center. The flexible curriculum allows residents to pursue elective interests in research, teaching, and administrative psychiatry. The program includes a broad array of full-time, part-time, and volunteer clinical and research faculty, and maintains a teaching affiliation with the New Center for Psychoanalysis.

Radiological Sciences (Diagnostic Radiology)

The Department of Radiological Sciences has an ACGME-approved four-year residency program based at UC Irvine Medical Center and integrated with Veterans Affairs Long Beach Healthcare System. There is also a month-long Pediatric Radiology rotation at Children’s Hospital of Orange County. The objectives of the program are (1) to train competent radiologists with a solid background in all modalities of imaging and interventional procedures, (2) to provide a conducive atmosphere and to encourage opportunities for residents to participate in translational and basic science research, and (3) to provide elective periods in which residents have the opportunity to increase their clinical radiology expertise or to work on research projects during their residency training. The residency program includes sub-specialized training in interventional, cardiothoracic, abdominal, pediatric, musculoskeletal radiology, as well as breast imaging, neuroradiology, and molecular imaging. Residents are exposed to a variety of modalities including radiography, fluoroscopy, computed tomography (CT), magnetic resonance imaging (MRI), ultrasonography, mammography, nuclear medicine, and spectroscopy. All residents participate in scholarly activities and are encouraged to complete at least one major research project during the program. The program provides a month-long research time. Candidates are accepted for six positions at the PGY-2 level for the four-year program. Fellowships are available for an additional year in specialized areas following the successful completion of the residency. The newest technologies in the field of radiological sciences are available at UC Irvine Medical Center and affiliated institutions.

Radiation Oncology

The Residency Training Program in Radiation Oncology is designed to prepare suitably qualified applicants for academic and clinical practice careers in radiation oncology. Candidates enter a four-year program which includes clinical experience, didactic lectures and integrated research experience. Unique opportunities exist for training in the use of interstitial and intracavitary treatment using radionuclides and specially designed applicators as
well as a variety of high-dose external beam technologies such as IMRT, radiosurgery, and VMAT/IMAT. The program includes rotations at three participating hospitals: UC Irvine Medical Center, Veterans Affairs Long Beach Healthcare System, and Long Beach Memorial Medical Center.

**Surgery**

The philosophy underlying all aspects of surgical training is that surgery is best learned, taught, and practiced as applied clinical physiology. Operative techniques and applied anatomy receive appropriate attention. Major portions of clinical experience, teaching, conferences, research, and patient care are oriented toward understanding and correcting disordered human biology. The surgical specialty involves more years of training than other medical disciplines due to the breadth of diseases and complexity of pathophysiology involved in surgery.

**Urology**

The Department of Urology Residency Program is a six-year training program that includes a one-year internship in the Department of Surgery and five years of Urology training. The residency program provides training in all aspects of adult and pediatric urologic diseases. The residents receive extensive training in open and endoscopic procedures, laparoscopy and other minimally invasive techniques, urologic pathology, uroradiology, and management of non-operative urologic conditions. The program's training hospitals include UC Irvine Medical Center, Veterans Affairs Long Beach Healthcare System, Kaiser Permanente Anaheim, and Children's Hospital of Orange County. The Urology Department encourages and supports both clinical and basic science research.

**Graduate Academic Programs**

The School of Medicine offers graduate study in a wide variety of fields in both basic science and clinical departments. The basic medical science departments of Anatomy and Neurobiology (p. 1163), Biological Chemistry (p. 1167), Microbiology and Molecular Genetics (p. 1186), Pathology and Laboratory Medicine (p. 1179), and Physiology and Biophysics (p. 1193) offer graduate instruction leading to the M.S. and Ph.D. degrees in Biomedical Sciences. The Department of Pharmacology (p. 1191), in conjunction with the Department of Pharmaceutical Sciences, offers graduate instruction leading to the M.S. and Ph.D. degrees in Pharmaceutical Sciences (p. 1083). The Department of Epidemiology (p. 1175) offers graduate instruction leading to the M.S. and Ph.D. degrees in Epidemiology. The Department of Medicine offers graduate instruction leading to the M.S. and Ph.D. degrees in Environmental Health Sciences (p. 1172). Most graduate students in these programs are admitted for the Doctor of Philosophy (Ph.D.) degree. The Department of Pediatrics offers an M.S. degree in Genetic Counseling (p. 1183). The School of Medicine also offers an M.S. degree in Biomedical and Translational Science (p. 1170). Each department or program has a graduate advisor whom students may consult for additional details of the individual programs.

The departments evaluate applications for admission to graduate study or program based on letters of recommendation, Graduate Record Examination scores, grades, research experience, and other relevant qualifications of the applicant. Candidates for graduate admission are urged to consult the particular department or program whose faculty and expertise best fit their interests and background.

Application materials may be obtained by contacting the individual graduate programs or:

**University of California, Irvine**
Graduate Division
120 Aldrich Hall
Irvine, CA 92697-4611
949-824-6761
http://www.grad.uci.edu

**Master or Science and Doctor of Philosophy in the School of Medicine**

The School of Medicine offers both the Master of Science and Doctor of Philosophy degrees, although emphasis at the graduate level is placed on the Ph.D. programs. Most training takes place within one of the departments, although full facilities and curricular offerings are available to all graduate students in all departments of the School of Medicine. Interdisciplinary study and research are encouraged. Students are expected to maintain a B average at all times. The normative time to degree is two years for the master's degree, and five years for the doctoral degree. A master's degree is not a prerequisite for the Ph.D. degree.

Students plan their academic program in consultation with the graduate advisor or a faculty committee. Faculty advisors may be changed to meet the needs and interests of the student. In addition, it is possible for students to transfer to another program in the School, subject to the approval of the Dean of Graduate Studies, and acceptance into that program. Students are encouraged to consult with faculty members with regard to their research and academic interests.

**Master of Science in Biomedical Sciences**

The Master of Science degree in Biomedical Sciences may be completed by submission of a research thesis (plan I) or by course-work and a comprehensive exam (plan II).

**Plan I: Thesis Plan.** The student is required to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional 8 units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment
in University Teaching (399) may not be counted toward degree completion. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a dissertation to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S. degree.

**Plan II: Comprehensive Examination Plan.** The plan II M.S. degree is awarded based on completion of at least 36 units of coursework and a satisfactory completion of a comprehensive exam. The student is required to complete at least 16 units (four courses) of didactic graduate course work offered by the department. In addition, the student will take up to 12 units of research. An additional 8 units or more of elective course work will be completed from other graduate courses offered by the department. A maximum of 4 units of upper-division undergraduate courses may be included in the program with the approval of the Associate Dean for Graduate Studies. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The comprehensive exam will be administered by a committee of at least three departmental faculty, and may include written and oral sections. The comprehensive exam format will include a research presentation and may include additional portions such as a research proposal, presentation of a project, or other components. The normative time to degree is one year for the M.S. degree by comprehensive exam.

**Doctor of Philosophy**

**Comprehensive Examination-First Year.** The student must pass comprehensive oral or written examinations at the discretion of the department. The examination is generally taken at the end of the first year of graduate study.

**Advancement to Candidacy.** The advancement to candidacy examination is taken before the end of the third year of graduate study. The student is expected to have identified an important and tractable dissertation research topic. A faculty committee for the advancement to candidacy examination is proposed by the faculty mentor in consultation with the student, and approved by the Department Graduate Advisor. A majority of the committee must hold primary or joint appointments in the student's department.

Once this examination is completed, the student is advanced to candidacy for the doctoral degree and is expected to complete the degree within three years. The student must submit a dissertation on this research and defend the thesis in an oral examination during the final year of graduate study. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate-student status or consent of instructor is a prerequisite for all 200–299 courses.

**Faculty**

Payandeh S. Abadee, M.D. Pahlavi University, **Health Sciences Clinical Professor of Physical Medicine and Rehabilitation**

Pablo J. Abbona, M.D. National University of Cuyo, **Health Sciences Associate Clinical Professor of Radiological Sciences**

Geoffrey W. Abbott, Ph.D. University of London, **Professor of Pharmacology; Physiology and Biophysics**

Hermelinda Abcede, M.D. Medical College of Wisconsin, **Health Sciences Assistant Clinical Professor of Neurology**

Munjal Acharya, Ph.D. Maharaja Sayajirao University of Baroda, **Assistant Professor in Residence of Radiation Oncology**

Gregory R. Adams, Ph.D. Michigan State University, **Associate Adjunct Professor of Physiology and Biophysics**

Felice Adler Shohet, M.D. Vanderbilt University, **Health Sciences Associate Clinical Professor of Pediatrics**

Behnoosh Afghani, M.D. University of Southern California, **Health Sciences Professor of Pediatrics**

Phyllis F. Agran, M.D. University of California, Irvine, **Professor Emerita of Pediatrics**

Anshu Agrawal, Ph.D. Lucknow University, **Associate Adjunct Professor of Medicine**

Lama M. Al-Khoury, M.D. American University of Beirut, **Health Sciences Assistant Clinical Professor of Neurology**
Gregory C. Albers, Ph.D. University of California, Los Angeles, Health Sciences Professor of Medicine
Lawrence Albers, M.D. University of California, San Diego, Health Sciences Clinical Professor of Psychiatry and Human Behavior
Navid Alem, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care
Michael T. Alkire, M.D. University of California, Los Angeles, Associate Professor in Residence of Anesthesiology and Perioperative Care
Tina M. Allee, M.D. Stanford University, Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior
Byron J. Allen, M.D. University of California, Los Angeles, Health Sciences Professor of Medicine
Al Aly, M.D. Georgetown University, Health Sciences Professor of Surgery
Alpesh N. Amin, M.D. Northwestern University, Thomas and Mary Cesario Endowed Chair in Medicine and Professor of Medicine; Biomedical Engineering; Paul Merage School of Business; Program in Nursing Science (hospital medicine, quality/safety, new technologies in healthcare)
George Anas, M.D. West Virginia University, Health Sciences Clinical Professor of Pediatrics
Arash Anavim, M.D. University of Tehran, Health Sciences Associate Clinical Professor of Radiological Sciences
Bogi Andersen, M.D. University of Iceland, Professor of Medicine; Biological Chemistry
Aileen J. Anderson, Ph.D. University of California, Irvine, Associate Professor of Physical Medicine and Rehabilitation
Cynthia T. Anderson, M.D. University of Tennessee, Health Sciences Clinical Professor of Anesthesiology and Perioperative Care
Kathrine M. Andreeff, M.D. Wayne State University, Health Sciences Clinical Professor of Pediatrics
Brian S. Andrews, M.D. University of New South Wales, Professor Emeritus of Medicine
Hoda Anton-Culver, Ph.D. University of St Andrews, Professor of Epidemiology
Stuart M. Arlin, Ph.D. Albert Einstein College of Medicine, Professor Emeritus of Biological Chemistry
Steven A. Armentrout, M.D. University of Chicago, Professor Emeritus of Medicine
Jeffrey Armstrong, M.D. University of South Carolina, Health Sciences Clinical Professor of Pediatrics
William B. Armstrong, M.D. University of Washington, Department Chair and Professor of Otolaryngology
Antonio C. Arrieta, M.D. Cayetano Heredia University, Health Sciences Clinical Professor of Pediatrics
Negar Ashouri, M.D. St. George's University, Health Sciences Clinical Professor of Pediatrics
Muhammad Aslam, M.D., Health Sciences Associate Clinical Professor of Pediatrics
Golnaz Aubin, M.D., Health Sciences Clinical Instructor of Radiological Sciences
Raciela B. Austin, MSN California State University, Long Beach, Health Sciences Assistant Clinical Professor of Family Medicine
Robert E. Ayer, M.D. Boston University, Health Sciences Clinical Instructor of Neurological Surgery
Samar H. Azawi, M.D. University of Baghdad, Health Sciences Associate Clinical Professor of Radiation Oncology
Simon R. Bababeygy, M.D. Stanford University, Health Sciences Clinical Instructor of Ophthalmology
Kara N. Babaian, M.D. University of Texas, Health Sciences Clinical Instructor of Urology
Dylan M. Bach, M.D. University of California, San Diego, Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine
George Baerveldt, M.D. University of Pretoria, Professor Emeritus of Ophthalmology
Berge C. Bakamjian, D.O. Midwestern State University, Health Sciences Clinical Professor of Psychiatry and Human Behavior
Dean B. Baker, M.D. University of California, San Diego, Professor of Medicine; Environmental Health Sciences; Program in Public Health
Pierre F. Baldi, Ph.D. California Institute of Technology, UCI Chancellor's Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology (bioinformatics, computational biology)
Kenneth M. Baldwin, Ph.D. University of Iowa, Professor Emeritus of Physiology and Biophysics

Fayez M. Bany-Mohammed, MBBS University of Jordan, Health Sciences Professor of Pediatrics

Tallie Z. Baram, M.D. University of Miami, Danette Dee Dee Shepard Chair in Neurological Studies and Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics

Alan G. Barbour, M.D. Tufts University, Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine

Steven J. Barker, M.D. University of Miami, Professor Emeritus of Anesthesiology and Perioperative Care

Ronald J. Barr, M.D. Johns Hopkins University, Professor Emeritus of Dermatology

Cristobal Barrios, M.D. University of Miami, Health Sciences Associate Clinical Professor of Surgery

Scott Bartell, Ph.D. University of California, Davis, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology; Social Ecology; Statistics

Cyril H. Barton, M.D. University of Colorado Boulder, Professor Emeritus of Medicine

Stanley Bassin, Ed.D. University of California, Berkeley, Clinical Professor of Medicine

Daryoush Bassiri, M.D. St. George's University, Health Sciences Clinical Professor of Pediatrics

Alan G. Barbour, M.D. Tufts University, Professor of Microbiology and Molecular Genetics; Ecology and Evolutionary Biology; Medicine

S. S. Bederman, M.D. University of Toronto, Health Sciences Assistant Clinical Professor of Orthopaedic Surgery

Dorit Ben-Ezer, M.D. Tel Aviv University, Health Sciences Clinical Professor of Pediatrics

Donald Beamon, M.D. University of Missouri—St. Louis, Health Sciences Clinical Professor of Radiological Sciences

S. S. Bederman, M.D. University of Toronto, Health Sciences Assistant Clinical Professor of Orthopaedic Surgery

Donald W. Bendig, M.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Pediatrics

Lbachir Benmohamed, Ph.D. Pasteur Institute, Associate Professor in Residence of Ophthalmology; Molecular Biology and Biochemistry

Rimal B. Bera, M.D. University of California, Irvine, Health Sciences Professor of Psychiatry and Human Behavior

Pamela Berkson, M.S. California State University, Long Beach, Health Sciences Clinical Professor of Medicine

Michael L. Berman, M.D. George Washington University, Professor Emeritus of Obstetrics and Gynecology

Stephen Berman, M.D. Rush University, Health Sciences Clinical Professor of Medicine

Nicole P. Bernal, M.D. Case Western Reserve University, Health Sciences Assistant Clinical Professor of Surgery

Michael W. Berns, Ph.D. Cornell University, Arnold and Mabel Beckman Chair in Laser Biomedicine and Professor of Surgery; Biomedical Engineering; Developmental and Cell Biology (photomedicine, laser microscopy, biomedical devices)

Deepak K. Bhalla, Ph.D. Howard University, Senate Emeritus of Medicine

Naveen D. Bhandarkar, M.D. Ohio State University, Health Sciences Assistant Clinical Professor of Otolaryngology

Rishi Bhargava, M.D. Indiana University, Health Sciences Clinical Professor of Emergency Medicine

Nitin Narain Bhatia, M.D. Baylor College of Medicine, Associate Professor of Orthopaedic Surgery

Anand B. Bhatt, M.D. University of Miami, Health Sciences Assistant Clinical Professor of Ophthalmology

John T. Billimek, Ph.D. University of California, Irvine, Assistant Adjunct Professor of Medicine

Robert H. Blanks, Ph.D. University of California, Los Angeles, Professor Emeritus of Anatomy and Neurobiology

Robert S. Blumenfeld, Ph.D. University of California, Davis, Assistant Adjunct Professor of Neurology

Maureen E. Bocian, M.D. University of Illinois Medical Center, Senate Emerita of Pediatrics

Jacob O. Boeckmann, M.D. University of Arkansas at Little Rock, Health Sciences Clinical Instructor of Otolaryngology

Stephen C. Bondy, Ph.D. University of Birmingham, Professor of Medicine; Environmental Health Sciences; Pharmacology; Program in Public Health
Peyman Borghei, M.D., Health Sciences Clinical Professor of Radiological Sciences

Emiliana Borrelli, Ph.D. University of Strasbourg, Professor of Microbiology and Molecular Genetics; Pharmacology

Daniela Bota, M.D. Carol Davila University of Medicine and Pharmacy, Associate Professor in Residence of Neurology

Elliot L. Botvinick, Ph.D. University of California, San Diego, Associate Professor of Surgery; Biomedical Engineering (laser microbeams, cellular mechanotransduction, mechanobiology)

Varaz Bozoghlanian, M.D. Medical College of Wisconsin, Health Sciences Clinical Instructor of Medicine

Ralph A. Bradshaw, Ph.D. Duke University, Professor Emeritus of Physiology and Biophysics

Peter Breen, M.D. University of Manitoba, Associate Professor of Anesthesiology and Perioperative Care

Matthew Brenner, M.D. University of California, San Diego, Professor of Medicine

Robert E. Bristow, M.D. University of California, Los Angeles, Philip J. Di Saia, M.D., Prestigious Chair in Gynecologic Oncology and Professor of Obstetrics and Gynecology

Ashley Broussard, M.D. Tulane University, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Donald J. Brown, Ph.D. University of Colorado Denver, Associate Professor in Residence of Ophthalmology; Biomedical Engineering (glaucoma, optic nerve, non-linear optics)

Robert Brown, Ph.D., Adjunct Professor of Surgery

David K. Buchbinder, M.D. Medical College of Wisconsin, Health Sciences Clinical Professor of Pediatrics

Michael J. Buchmeier, Ph.D. McMaster University, Professor of Medicine; Microbiology and Molecular Genetics; Molecular Biology and Biochemistry

Monte S. Buchsbaum, M.D. University of California, San Francisco, Professor Emeritus of Psychiatry and Human Behavior

Sean F. Buckley, M.D. Creighton University, Health Sciences Clinical Professor of Psychiatry and Human Behavior

Diep Ngoc Bui, M.D. City University of New York, Mount Sinai, Health Sciences Clinical Professor of Medicine

Lynette T. Bui, D.O. Midwestern University, Arizona College of Osteopathic Medicine, Health Sciences Assistant Clinical Professor of Family Medicine

Szofia S. Bullain, M.D., Health Sciences Clinical Instructor of Neurology

William E. Bunney, M.D. University of Pennsylvania, Della Martin Chair in Psychiatry and Professor Emeritus of Psychiatry and Human Behavior

Keith R. Burnett, M.D. Creighton University, Health Sciences Clinical Professor of Psychiatry and Human Behavior; Radiological Sciences

Kerry P. Burnight, Ph.D. University of Southern California, Health Sciences Professor of Family Medicine

Joseph Burns, M.D. McGill University, Health Sciences Associate Clinical Professor of Radiological Sciences

Michael J. Burns, M.D. University of California, Irvine, Health Sciences Professor of Emergency Medicine

Claudia Buss, Ph.D., Assistant Adjunct Professor of Pediatrics

Jennifer R. Butler, M.D. University of Virginia, Health Sciences Associate Clinical Professor of Obstetrics and Gynecology

John A. Butler, M.D. Loyola University Chicago, Professor of Surgery

Matthew Butteri, M.D. University of Southern California, Health Sciences Assistant Clinical Professor of Medicine

Michael D. Cahalan, Ph.D. University of Washington, UCI Distinguished Professor of Physiology and Biophysics

Catherine M. Cahill, Ph.D. Dalhousie University, Acting Associate Professor of Anesthesiology and Perioperative Care; Anesthesiology and Perioperative Care; Pharmacology

Vincent J. Caiozzo, Ph.D. University of California, Irvine, Professor in Residence of Orthopaedic Surgery; Environmental Health Sciences; Physiology and Biophysics

Justin D. Call, M.D. University of Utah, Professor Emeritus of Psychiatry and Human Behavior
Anne L. Calof, Ph.D. University of California, San Francisco, Professor of Anatomy and Neurobiology; Developmental and Cell Biology (neurogenesis and neuronal differentiation)

Joan E. Campbell, M.D. University of California, San Diego, Health Sciences Professor of Radiological Sciences

Maxime Cannesson, M.D. Paris Descartes University, Professor of Anesthesiology and Perioperative Care

Jamie B. Capasso, D.O. A.T. Still University, Kirksville College of Osteopathic Medicine, Health Sciences Assistant Clinical Professor of Medicine

Joseph C. Carmichael, M.D. University of Missouri-Columbia, Health Sciences Assistant Clinical Professor of Surgery

Philip M. Carpenter, M.D. Southwestern Medical School, Professor of Pathology and Laboratory Medicine

Jose Carrillo, M.D. Dartmouth College, Health Sciences Assistant Clinical Professor of Neurology

Robert M. Carroll, M.D. Hahnemann University Hospital, Health Sciences Associate Clinical Professor of Medicine

Paolo Casali, M.D. University of Milan, Donald Bren Professor Emeritus of Medicine

Thomas C. Cesario, M.D. University of Wisconsin-Madison, UCI Endowed Chair and Professor Emeritus of Medicine

Kelly F. Chain, M.D. Temple University, Health Sciences Clinical Instructor of Pediatrics

Barry F. Chaitin, M.D. New York University, Non-Senate Academic Emeritus of Psychiatry and Human Behavior

Bharath Chakravarthy, M.D. Boston University, Assistant Professor of Emergency Medicine; Program in Public Health

Mark Chambers, M.D. University of Illinois at Urbana–Champaign, Health Sciences Clinical Professor of Radiological Sciences

Jefferson Chan, Ph.D. University of California, San Francisco, Associate Professor of Pathology and Laboratory Medicine; Environmental Health Sciences

Maria Y. Chandler, M.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Pediatrics

P. A. Chandraratna, M.D. University of Ceylon, Professor Emeritus of Medicine

Carrie E. Chandwani, M.D. Chicago Medical School, Health Sciences Assistant Clinical Professor of Emergency Medicine

K. George Chandy, Ph.D. University of Birmingham, Professor of Physiology and Biophysics; Microbiology and Molecular Genetics

Eric Y. Chang, M.D. Albert Einstein College of Medicine, Assistant Professor in Residence of Physical Medicine and Rehabilitation

Kenneth J. Chang, M.D. Brown University, Endowed Chair in Gastrointestinal Endoscopic Oncology and Professor of Medicine

Wayne Wei Chung Chang, M.D. Saint Louis University, Health Sciences Associate Clinical Professor of Medicine; Program in Public Health

Elizabeth Chao, M.D. University of California, Irvine, Assistant Adjunct Professor of Pediatrics; Pathology and Laboratory Medicine

Constance Chen, M.D. University of Southern California, Health Sciences Clinical Professor of Medicine

Dongbao Chen, Ph.D. Beijing University of Agricultural, Associate Professor of Obstetrics and Gynecology

Joline L. Chen, M.D. University of Toronto, Health Sciences Clinical Professor of Medicine

Lily K. Chen, D.O. Western University of Health Sciences, Health Sciences Clinical Professor of Physical Medicine and Rehabilitation

Phang-Lang Chen, Ph.D. University of California, San Diego, Associate Professor of Biological Chemistry

Zhongping Chen, Ph.D. Cornell University, Professor of Biomedical Engineering; Chemical Engineering and Materials Science; Electrical Engineering and Computer Science; Otolaryngology; Surgery (biomedical optics, optical coherence tomography, bioMEMS, biomedical devices)

Steven D. Chessler, M.D. University of Washington, Associate Professor of Medicine

Kota G. Chetty, MBBS Guntur Medical College, Health Sciences Clinical Professor of Medicine

Robert R. Chilcote, M.D. University of Rochester, Senate Emeritus of Pediatrics

Vi K. Chiu, M.D. New York University, Assistant Professor of Medicine

Zang-Hee Cho, Ph.D. Uppsala University, Professor Emeritus of Radiological Sciences
Bernard H. Choi, Ph.D. University of Texas at Austin, **Associate Professor in Residence of Surgery; Biomedical Engineering** (biomedical optics, in vivo optical imaging, microvasculature, light-based therapeutics)

Bongkyoo Choi, Sc.D. University of Massachusetts, **Assistant Professor of Medicine; Program in Public Health**

Byung H. Choi, M.D. Severance Union Medical College, **Professor Emeritus of Pathology and Laboratory Medicine**

Ho Joon Choi, M.D. Seoul National University, **Health Sciences Professor of Anesthesiology and Perioperative Care**

Yung-In Choi, M.D. Yonsei University, **Health Sciences Professor of Medicine**

Susan S. Choo, M.D. University of California, San Diego, **Health Sciences Associate Clinical Professor of Pediatrics**

Christine C. Chou, M.D. University of California, Los Angeles, **Health Sciences Clinical Instructor of Pediatrics**

Emilie Chow, M.D. Chicago Medical School, **Health Sciences Associate Clinical Professor of Medicine**

Sophia N. Chun, M.D. Loma Linda University, **Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation**

Judith H. Chung, M.D. University of Pennsylvania, **Associate Professor of Obstetrics and Gynecology**

Susan Claster, M.D. University of Chicago, **Health Sciences Professor of Medicine**

Ralph V. Clayman, M.D. University of California, San Diego, **Dean of the School of Medicine and Professor of Urology**

John P. Cleary, M.D. University of Massachusetts Medical School, **Health Sciences Associate Clinical Professor of Pediatrics**

Jennifer L. Clebanoff, M.D. Boston University, **Health Sciences Clinical Instructor of Pathology and Laboratory Medicine**

Melitza J. Cobham-Browne, M.D. Universidad de Panamá, **Health Sciences Professor of Pediatrics**

Allen J. Cohen, M.D. University of Miami, **Health Sciences Clinical Professor of Radiological Sciences**

Rebecca Coleman, M.D. University of California, San Francisco, **Health Sciences Assistant Clinical Professor of Pediatrics**

Martin Colman, MMEd University of Witwatersrand, **Professor Emeritus of Radiation Oncology**

Henri G. Colt, M.D. University of Nice Sophia Antipolis, **Senate Emeritus of Medicine**

John E. Connolly, M.D. Harvard University, **Professor Emeritus of Surgery**

Jason Cook, M.D. University of Vermont, **Health Sciences Clinical Professor of Pediatrics**

Dan M. Cooper, M.D. University of California, San Francisco, **Professor of Pediatrics; Biomedical Engineering** (impact of exercise on exhaled biological gases, novel methods of assessing physical activity in infants and children using bioMEMS, impact of oxygen gradients on neutrophil trafficking)

Maria A. Corrada-Bravo, SCE Johns Hopkins University, **Associate Adjunct Professor of Neurology; Epidemiology**

Carl W. Cotman, Ph.D. Indiana University, **Professor of Neurology; Biomedical Engineering; Neurobiology and Behavior** (amyloid, C1q, Alzheimer's disease, apoptosis, successful aging, dementia)

Ardith Courtney, D.O. University of North Texas, **Health Sciences Associate Clinical Professor of Neurology**

Steven C. Cramer, M.D. University of Southern California, **Professor of Neurology; Anatomy and Neurobiology; Physical Medicine and Rehabilitation**

Francis M. Crinella, Ph.D. Louisiana State University, **Health Sciences Clinical Professor of Pediatrics**

Robert W. Crow, M.D. University of Southern California, **Health Sciences Assistant Clinical Professor of Ophthalmology; Neurology**

Roger L. Crumley, M.D. University of Iowa, **Professor Emeritus of Otolaryngology**

Dwight Culver, M.D. Stanford University, **Health Sciences Clinical Professor of Epidemiology**

Brian J. Cummings, Ph.D. University of California, Irvine, **Associate Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology**

Dennis D. Cunningham, Ph.D. University of Chicago, **Professor Emeritus of Microbiology and Molecular Genetics**

Ralph W. Cygan, M.D. State University of New York Downstate Medical Center, **Health Sciences Professor of Medicine; Program in Public Health**
James I. Cyriac, M.D. State University of New York Upstate Medical Center, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Dvora Cyrlak, M.D. Yale University, Health Sciences Clinical Professor of Radiological Sciences

Mudit Dabral, M.D. State University of New York Upstate Medical Center, Health Sciences Clinical Professor of Anesthesiology and Perioperative Care

Maria G. Dacosta-Iyer, M.D. University of Bombay, Health Sciences Clinical Professor of Pathology and Laboratory Medicine

Xing Dai, Ph.D. University of Chicago, Professor of Biological Chemistry

Amish A. Dangodara, M.D. University of Miami, Health Sciences Professor of Medicine

Mark W. Daniels, M.D. Stanford University, Health Sciences Clinical Professor of Pediatrics

Francis Dann, M.D. Columbia University, Health Sciences Clinical Professor of Dermatology

Parima Darouei, M.D. Robert Wood Johnson Medical School, Health Sciences Assistant Clinical Professor of Radiation Oncology

Omar S. Darwish, D.O. Touro U College of Osteopathic Medicine, Health Sciences Assistant Clinical Professor of Medicine

Cyrus Dastur, M.D. Drexel University, Health Sciences Clinical Professor of Neurology

Mohsen Davoudi, M.D. University of Tehran, Health Sciences Associate Clinical Professor of Medicine

Israel De Alba, M.D. University of Guadalajara, Health Sciences Associate Clinical Professor of Medicine

Luis M. De La Maza, Ph.D. University of Minnesota, Professor of Pathology and Laboratory Medicine

Ralph J. Delfino, M.D., Ph.D. McGill University, Professor in Residence of Epidemiology; Environmental Health Sciences

Michael Demetriou, M.D. University of Toronto, Professor of Neurology; Microbiology and Molecular Genetics

Aram N. Demirjian, M.D. Boston University, Assistant Professor of Surgery

Sheetal Desai, M.D. University of Southern California, Health Sciences Associate Clinical Professor of Medicine

Suvarna A. Deshmukh-Rane, M.D., Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine

Robert Detrano, M.D. University of Rome, Health Sciences Clinical Professor of Radiological Sciences; Program in Public Health

Philip J. Di Saia, M.D. Tufts University, Dorothy J. Marsh Chair in Reproductive Biology and Professor Emeritus of Obstetrics and Gynecology

Catherine Diamond, M.D. Albany Medical College, Associate Professor of Medicine

Cordula V. Dick-Muehlke, Ph.D. Fuller Theological Seminary, Health Sciences Associate Clinical Professor of Family Medicine

Hamid Djalilian, M.D. University of Minnesota, Associate Professor of Otolaryngology; Biomedical Engineering (medical devices, hearing loss, tinnitus, dizziness/imbalance, clinical research)

An H. Do, M.D. University of California, Los Angeles, Health Sciences Assistant Clinical Professor of Neurology

Matthew O. Dolich, M.D. State University of New York at Stony Brook, Health Sciences Professor of Surgery

Michele Domico, M.D. University of Texas Health Science Center at San Antonio, Health Sciences Clinical Professor of Pediatrics

Joseph H. Donnelly, M.D. Georgetown University, Health Sciences Professor of Pediatrics

Peter J. Donovan, Ph.D. University College London, Professor of Biological Chemistry; Developmental and Cell Biology (stem cell biology)

Nita Doshi, M.D. University of California, Irvine, Health Sciences Clinical Professor of Pediatrics

Emily E. Dow, M.D. University of Cincinnati, Health Sciences Professor of Family Medicine

Kenneth W. Dumars, M.D. University of Colorado Boulder, Professor Emeritus of Pediatrics

Dang Tam Duong, M.D. University of Washington, Health Sciences Associate Clinical Professor of Medicine

Anthony J. Durkin, Ph.D. University of Texas at Austin, Associate Professor in Residence of Surgery
Karen L. Edwards, Ph.D. University of Washington, Professor of Epidemiology; Genetic Epidemiology Research Institute

Robert A. Edwards, M.D. Baylor College of Medicine, Associate Professor of Pathology and Laboratory Medicine

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology

Alan N. Elias, M.D. University of Calcutta, Professor Emeritus of Medicine

Mark H. Ellis, M.D. Tulane University, Health Sciences Associate Clinical Professor of Pediatrics

Jill Elizabeth Endres, M.D. University of Vermont, Health Sciences Associate Clinical Professor of Surgery

Scott A. Engwall, M.D. University of Florida, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

Sonja Entringer, Ph.D. University of Trier, Assistant Adjunct Professor of Pediatrics

Ramez N. Eskander, M.D. University of California, San Diego, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Gregory R. Evans, M.D. University of Southern California, Professor of Surgery; Biomedical Engineering (aesthetic surgery, breast augmentation, cosmetic plastic surgery, craniomaxillofacial, hand surgery, head and neck reconstruction, liposuction, oncology, pelvic bone reconstruction, peripheral nerve regeneration, reconstructive microsurgery, replantation, tissue engineering)

Marc-Eivind C. Evensen, M.D. University of California, Irvine, Health Sciences Professor of Physical Medicine and Rehabilitation

James H. Fallon, Ph.D. University of Illinois Medical Center, Professor Emeritus of Anatomy and Neurobiology

Guity Faraehmand, M.D. University at Buffalo, The State University of New York, Health Sciences Clinical Instructor of Medicine

Hamed Farid, M.D. University of California, San Diego, Health Sciences Associate Clinical Professor of Radiological Sciences

Marjan Farid, M.D. University of California, San Diego, Health Sciences Associate Clinical Professor of Ophthalmology

Lawrence R. Faziola, M.D. Creighton University, Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior

Marion J. Fedoruk, M.D. University of Alberta, Health Sciences Clinical Professor of Medicine

Stephen Feig, M.D. New York University, Fong and Jean Tsai Chair in Women's Imaging and Professor of Radiological Sciences

Philip Felgner, Ph.D. Michigan State University, Adjunct Professor of Medicine; Physiology and Biophysics

Amanda N. Fernandez, M.D., Health Sciences Clinical Professor of Pediatrics

Dayantha Fernando, M.D. Georgetown University, Health Sciences Assistant Clinical Professor of Radiological Sciences

Robert R. Field, M.D. University of Kansas, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Mark J. Fisher, M.D. University of Cincinnati, Professor of Neurology; Anatomy and Neurobiology; Political Science

Sheila Fitzgibbons, M.P.A. California State University, Long Beach, Health Sciences Associate Clinical Professor of Medicine

Laura E. Fitzmaurice, M.D. University of California, Los Angeles, Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology

Lisa Flanagan-Monuki, Ph.D. University of California, San Diego, Assistant Professor of Neurology; Biomedical Engineering (stem cells, neural, embryonic, neuron)

Angela G. Fleischman, M.D. Stanford University, Assistant Professor of Medicine

Pamela L. Flodman, M.S. University of California, Irvine, Associate Adjunct Professor of Pediatrics

Cecilia A. Florio, M.D. University of California, San Francisco, Health Sciences Associate Clinical Professor of Family Medicine

Alex Fong, M.D. Northwestern University, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Gareth K. Forde, M.D. University of Minnesota, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Nikta Forghani, M.D. University of California, Davis, Health Sciences Clinical Professor of Pediatrics

Donald N. Forthal, M.D. University of California, Irvine, Professor of Medicine
Michelle Fortier, Ph.D. University of Nebraska, Assistant Professor in Residence of Anesthesiology and Perioperative Care; Psychology and Social Behavior (pediatric pain management, pediatric oncology, family-centered medicine, complementary and alternative medicine (CAM), health information technology, coping with illness-related Stress)

Clarence E. Foster, M.D. Johns Hopkins University, Health Sciences Professor of Surgery

John C. Fox, M.D. Tufts University, Professor of Emergency Medicine

David L. Franklin, Ph.D. Alliant International University, Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior

Kathryn Steinhaus French, M.S. University of Colorado Denver, Health Sciences Professor of Pediatrics

John P. Fruehauf, M.D. Rush University, Professor of Medicine; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences (in-vitro cancer models using 3-D tissue systems to predict drug response)

Roy M. Fujitani, M.D. University of Hawaii at Manoa, Professor of Surgery

Cole M. Fulwider, M.D. University of California, Irvine, Health Sciences Clinical Professor of Dermatology

David W. Furnas, M.D. University of California, Berkeley, Non-Senate Academic Emeritus of Surgery

Pietro R. Galassetti, Ph.D. Vanderbilt University, Associate Professor of Pediatrics; Pharmacology

Anjalee W. Galion, M.D. New Jersey Medical School, Health Sciences Clinical Professor of Pediatrics

Christine M. Gall, Ph.D. University of California, Irvine, Professor of Anatomy and Neurobiology; Neurobiology and Behavior

Valerie B. Galván-Turner, M.D. University of Texas Medical Branch, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Anand K. Ganesan, M.D. Medical College of Wisconsin, Associate Professor of Dermatology; Biological Chemistry

Sumit Garg, M.D. New York Medical College, Health Sciences Assistant Clinical Professor of Ophthalmology

John Jay Gargus, Ph.D. Yale University, Professor of Physiology and Biophysics; Pediatrics

Thomas J. Garite, M.D. University of California, Irvine, Professor Emeritus of Obstetrics and Gynecology

Chad P. Garner, Ph.D. Oxford University, Associate Professor of Epidemiology; Program in Public Health

Leslie Garson, M.D. University of Kansas, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

Alan B. Gazzaniga, M.D. Harvard University, Professor Emeritus of Surgery

Norman Ge, M.D. Baylor College of Medicine, Health Sciences Associate Clinical Professor of Otolaryngology

Jean G. Gehricke, Ph.D. Free University of Berlin, Assistant Adjunct Professor of Pediatrics

Gamal Ghoniem, M.D. Alexandria University, Professor of Urology

Lisa M. Gibbs, M.D. Stanford University, Health Sciences Professor of Family Medicine

Daniel L. Gillen, Ph.D. University of Washington, Associate Professor of Statistics; Epidemiology; Program in Public Health

Stuart Gilman, M.D. Tufts University, Health Sciences Clinical Professor of Medicine

Kimberly Marie Gimenez, M.D. University of California, Irvine, Health Sciences Professor of Anesthesiology and Perioperative Care

Roland A. Gioli, Ph.D. University of California, Berkeley, Professor Emeritus of Anatomy and Neurobiology

Melanie W. Gironda, Ph.D. University of California, Los Angeles, Associate Adjunct Professor of Family Medicine

Gordon Gl. Globus, M.D. Tufts University, Professor Emeritus of Psychiatry and Human Behavior

Julie A. Goddard, M.D. Baylor College of Medicine, Health Sciences Assistant Clinical Professor of Otolaryngology

Shruti K. Gohil, M.D. Tufts University, Health Sciences Assistant Clinical Professor of Medicine

Alan L. Goldin, M.D. University of Michigan, Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics

Sastry V. Gollapudi, Ph.D. Dalhousie University, Assistant Adjunct Professor of Medicine
Kiarash Golshani, M.D. Oregon Health & Science University, Health Sciences Assistant Clinical Professor of Neurological Surgery
Sidney H. Golub, Ph.D. Temple University, Professor Emeritus of Microbiology and Molecular Genetics
Frances L. Gonzalez, Ph.D. University of Aberdeen, Professor of Pharmacology; Anatomy and Neurobiology
Deborah Goodman-Gruen, Ph.D. University of California, Los Angeles, Associate Adjunct Professor of Epidemiology
Scott C. Goodwin, M.D. Harvard University, Hasso Brothers Endowed Chair in Radiological Sciences and Professor of Radiological Sciences
Ian L. Gordon, Ph.D. University of Southern California, Health Sciences Clinical Professor of Surgery
Namita Goyal, M.D. Ross University, Health Sciences Assistant Clinical Professor of Neurology
Kaylan A. Graham, M.D. Loyola University Chicago, Health Sciences Clinical Instructor of Medicine
Sergei Grando, M.D., Professor of Dermatology
Kenneth E. Grant, M.D. Albany Medical College, Health Sciences Clinical Professor of Pediatrics
Jennifer S. Green, M.D. Georgetown University, Health Sciences Clinical Professor of Pediatrics
Sheldon Greenfield, M.D. University of Cincinnati, Donald Bren Professor and Professor of Medicine
Fred S. Greensite, M.D. University of California, San Diego, Professor of Radiological Sciences
Leonid Groysman, M.D. Nicolae Testemi?anu State University of Medicine and Pharmacy, Health Sciences Assistant Clinical Professor of Neurology
Jacqueline M. Guerrero, M.D. University of Rochester, Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology
Rajesh Gulati, MBBS University College of Medical Sciences, Health Sciences Professor of Medicine
Gultekin Gulsen, Ph.D. Bogazici University, Associate Professor of Radiological Sciences; Biomedical Engineering; Electrical Engineering and Computer Science; Physics and Astronomy (in vivo molecular imaging, diffuse optical tomography, fluorescence tomography, photo-magnetic imaging, multi-modality imaging)
Geeta K. Gupta, M.D. Harvard University, Health Sciences Professor of Medicine
Ranjan Gupta, M.D. Albany Medical College, Professor of Orthopaedic Surgery; Anatomy and Neurobiology; Biomedical Engineering (hand and upper extremity surgery)
Sudhir Gupta, Ph.D. University of Lucknow, Professor of Medicine; Microbiology and Molecular Genetics
George A. Gutman, Ph.D. Stanford University, Professor Emeritus of Microbiology and Molecular Genetics
Ravi Chandra Gutta, M.D. Andhra Medical College, Health Sciences Assistant Clinical Professor of Medicine
Grant Gwinup, M.D. University of Colorado Boulder, Professor Emeritus of Medicine
Mollod Hadi, D.O. Western University of Health Sciences, Health Sciences Assistant Clinical Professor of Medicine
Richard J. Haier, Ph.D. Johns Hopkins University, Senate Emeritus of Pediatrics
Harry T. Haigler, Ph.D. Vanderbilt University, Professor of Physiology and Biophysics
James E. Hall, Ph.D. University of California, Riverside, Professor of Physiology and Biophysics
Afshan Hameed, B.A. King Edward Medical College, Health Sciences Associate Clinical Professor of Obstetrics and Gynecology
Jason Handwerker, M.D. Harvard University, Health Sciences Assistant Clinical Professor of Radiological Sciences; Otolaryngology
Tabetha Harken, M.D. University of Colorado Boulder, Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology
Kevin Harley, M.D. New York Medical College, Health Sciences Assistant Clinical Professor of Medicine
Anna L. Harris, M.D. Loma Linda University, Health Sciences Professor of Anesthesiology and Perioperative Care
Anton N. Hasso, Ph.D. Loma Linda University, Professor of Radiological Sciences
Justin Hata, M.D. New York Medical College, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care
G. Wesley Hatfield, Ph.D. Purdue University, *Professor Emeritus of Microbiology and Molecular Genetics; Chemical Engineering and Materials Science*

Tamera J. Hatfield, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

David J. Haupt, M.D. California School of Podiatric Medicine, *Health Sciences Clinical Professor of Medicine*

Peter Hauser, M.D. University of Virginia, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Leif Havton, Ph.D. Umea University, *Professor of Anesthesiology and Perioperative Care; Anatomy and Neurobiology; Neurology*

Heather T. Hawthorne, M.D. University of Arkansas at Little Rock, *Health Sciences Clinical Professor of Pediatrics*

Susan M. Heller, M.D. University of Iowa, *Health Sciences Clinical Professor of Pediatrics*

Mohammad Helmy, M.D. University of California, Irvine, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Walter L. Henry, M.D. Stanford University, *Professor Emeritus of Medicine*

June Herman, M.D. U of North Dakota, *Health Sciences Professor of Radiological Sciences*

Neal Hermanowicz, M.D. Temple University, *Health Sciences Professor of Neurology*

Klemens J. Hertel, Ph.D. University of Colorado Boulder, *Professor of Microbiology and Molecular Genetics*

David A. Hicks, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics*

Elsie R. Hidalgo, M.D. University of California, Los Angeles, *Health Sciences Professor of Pediatrics*

Richard A. Hill, M.D. Northwestern University, *Professor Emeritus of Ophthalmology*

Jeffrey H. Ho, D.O. Touro U College of Osteopathic Medicine, *Health Sciences Clinical Professor of Pediatrics*

Danphuong Ho-Wang, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Family Medicine*

Bang H. Hoang, M.D. University of California, Los Angeles, *Associate Professor of Orthopaedic Surgery*

John C. Hoefs, M.D. George Washington University, *Professor Emeritus of Medicine*

M. Mark Hoffer, M.D. Chicago Medical School, *Professor Emeritus of Orthopaedic Surgery*

Michael Hollifield, M.D. University of Washington, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Christine L. Hollister, M.D. Dartmouth College, *Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care*

Todd Holmes, Ph.D. Massachusetts Institute of Technology, *Department Vice Chair and Professor of Physiology and Biophysics*

Christy Hom, M.A. University of Michigan, *Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior*

Wirachin Hoonponsimanont, M.D., *Assistant Professor of Emergency Medicine*

Susan Hopp, M.D. City University of New York, Mount Sinai, *Health Sciences Clinical Professor of Medicine*

Naoto Hoshi, Ph.D. Kanazawa University, *Assistant Professor of Pharmacology; Physiology and Biophysics*

Roozbeh Houshyar, M.D., *Health Sciences Assistant Clinical Professor of Radiological Sciences*

David B. Hoyt, M.D. Case Western Reserve University, *Professor Emeritus of Surgery*

David Jb. Hsiang, M.D. Thomas Jefferson University, Jefferson Medical College, *Associate Professor of Surgery*

An-Fu Hsiao, M.D. Boston University, *Health Sciences Associate Clinical Professor of Medicine*

Lanny Hsieh, M.D. New York University, *Health Sciences Associate Clinical Professor of Medicine*

Loan B. Hsieh, M.D. Virginia Commonwealth University, *Health Sciences Clinical Professor of Pediatrics*

Frank P. Hsu, M.D. University of Maryland, College Park, *Department Chair and Professor of Neurological Surgery; Biomedical Engineering; Otolaryngology* (biomechanics of cerebral aneurysms, functional neurosurgery, epilepsy)

Ke-Qin Hu, M.D. Tongji Medical College, *Professor of Medicine*
Lan Huang, Ph.D. University of Florida, Professor of Physiology and Biophysics; Biological Chemistry

Susan Huang, M.D. Johns Hopkins University, Associate Professor of Medicine

Taosheng Huang, Ph.D. City University of New York, Mount Sinai, Professor Emeritus of Pediatrics

Yan Lin Huang, MBBS University of Melbourne, Health Sciences Clinical Instructor of Medicine

F. Allan Hubbell, M.D. Baylor University, Professor Emeritus of Medicine; Program in Public Health

Juliette L. Hunt, M.D. University of California, Davis, Health Sciences Clinical Professor of Pediatrics

Peter C. Hunt, Ph.D. University of Pittsburgh, Health Sciences Clinical Professor of Physical Medicine and Rehabilitation

Anju Hurria, M.D. State University of New York Upstate Medical Center, Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior

Kenneth H. Ibsen, Ph.D. University of California, Los Angeles, Professor Emeritus of Biological Chemistry

Hirohito Ichii, Ph.D. Kobe University, Associate Professor of Surgery

David Imagawa, Ph.D. Johns Hopkins University, Suzanne Dykema Endowed Chair in Pancreatic Cancer and Professor of Surgery

Heba Ismail, M.D. Alexandria University, Health Sciences Assistant Clinical Professor of Medicine

Leslie M. Israel, D.O. U Medical C of Kansas City, Health Sciences Professor of Medicine

Padmini Iyer, M.D. Andhra University, Health Sciences Clinical Professor of Medicine

Sonali L. Iyer, M.D. Rosalind Franklin University of Medicine and Science, Chicago Medical School, Health Sciences Assistant Clinical Professor of Medicine

Stephanie A. Jacobs, M.D. University of Pittsburgh, Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology

Behrouz Jafari, M.D., Health Sciences Clinical Professor of Medicine

Daniel Jaffurs, M.D. University of Pittsburgh, Health Sciences Assistant Clinical Professor of Surgery

Vivek Jain, M.D. Memorial University of Newfoundland, Health Sciences Associate Clinical Professor of Neurology

James G. Jakowatz, M.D. University of Kansas, Health Sciences Clinical Professor of Surgery

Mehrdad Jalili, M.D. University of Isfahan, Health Sciences Professor of Pediatrics

M. M. Jamal, M.D. University of Damascus, Health Sciences Clinical Professor of Medicine

Anthony A. James, Ph.D. University of California, Irvine, UCI Distinguished Professor of Microbiology and Molecular Genetics; Molecular Biology and Biochemistry

Algimantas Jasinskas, Ph.D., Associate Specialist of Medicine

Edward W. Jeffes, M.D. University of California, Los Angeles, Health Sciences Clinical Professor of Dermatology

Brenda L. Jensen, M.D. University of California, Irvine, Health Sciences Clinical Professor of Psychiatry and Human Behavior

James V. Jester, Ph.D. University of Southern California, Jack H. Skirball Endowed Chair and Professor of Ophthalmology; Biomedical Engineering (mechanics of wound healing and the inter-relationship of mechanical force, cell-matrix interaction, and gene expression, cellular basis of corneal transparency and the role of water-soluble proteins in isolated cell light scattering, three-dimensional and temporal imaging of cells in intact living tissue)

Jonathan Jewkes, M.D. Loma Linda University, Health Sciences Clinical Instructor of Radiological Sciences

Deepa Jeyakumar, M.D. Temple University, Health Sciences Assistant Clinical Professor of Medicine

Anna Jin, M.D. Tulane University, Health Sciences Clinical Professor of Medicine

Rongsheng Jin, Ph.D. Columbia University, Associate Professor of Physiology and Biophysics

Victor C. Joe, M.D. Virginia Commonwealth University, Health Sciences Associate Clinical Professor of Surgery

Jennifer Johnson, M.D. University of Münster, Senate Emerita of Pediatrics
Neil Jones, M.D. Oxford University, Professor of Orthopaedic Surgery

Mark L. Jordan, M.D. University of Toronto, Health Sciences Clinical Professor of Urology

Sara M. Jordan, M.D. University of New Mexico, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Tibor Juhasz, Ph.D. Attila József University, Professor of Ophthalmology; Biomedical Engineering (laser-tissue interactions, high-precision microsurgery with lasers, laser applications in ophthalmology, corneal biomechanics)

Pawan Juneja, M.D., Health Sciences Clinical Professor of Medicine

Kwang M. Jung, Ph.D. Chung-Ang University, Assistant Adjunct Professor of Anatomy and Neurobiology

Frances A. Jurnak, Ph.D. University of California, Berkeley, Professor Emerita of Physiology and Biophysics

Nii-Kabu Kabutey, M.D. Albany Medical College, Health Sciences Assistant Clinical Professor of Surgery

Kanwarpal S. Kahlon, M.D. University of Illinois Medical Center, Health Sciences Assistant Clinical Professor of Medicine

Tatiana Kain, M.D. Ben Gurion School of Medicine, Health Sciences Associate Clinical Professor of Radiological Sciences

Zeev Kain, M.D. Ben Gurion School of Medicine, UCI Chancellor's Professor of Anesthesiology and Perioperative Care

Peter Kaiser, Ph.D. University of Innsbruck, Professor of Biological Chemistry

Kamyar Kalantar-Zadeh, M.D. University of Bonn, Professor of Medicine; Program in Public Health

Katalin Kalman, Ph.D., Associate Project Scientist of Ophthalmology

Daniel Kang, M.D. University of Maryland, College Park, Health Sciences Clinical Instructor of Pediatrics

Grace Kao, M.D. National Taiwan University, Health Sciences Associate Clinical Professor of Neurology

Robert Kaplan, M.D. Harvard University, Health Sciences Clinical Professor of Medicine

Sherrie H. Kaplan, Ph.D. University of California, Los Angeles, Professor of Medicine; Anesthesiology and Perioperative Care

Shreya Kapoor, M.D. Ross University, Health Sciences Clinical Professor of Medicine

Danielle Karimi, M.D. University of Medicine and Dentistry of New Jersey, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

William E. Karnes, M.D. University of Minnesota, Health Sciences Associate Clinical Professor of Medicine

Moti L. Kashyap, M.D. National University of Singapore, Senate Emeritus of Medicine

Kari L. Kassir, M.D. University of California, Irvine, Health Sciences Clinical Professor of Pediatrics

David Katz, M.D. Case Western Reserve University, Non-Senate Academic Emeritus of Radiological Sciences

Mark Katz, M.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior

Mitchell Katz, M.D. State University of New York Downstate Medical Center, Health Sciences Clinical Professor of Pediatrics

Robert Katzer, B.A. University of California, Berkeley, Health Sciences Assistant Clinical Professor of Emergency Medicine

Claudia H. Kawas, M.D. University of Louisville, Nichols Term Chair in Neuroscience and Professor of Neurology; Epidemiology; Neurobiology and Behavior

Kirk A. Keegan, M.D. University of Maryland, College Park, Non-Senate Academic Emeritus of Obstetrics and Gynecology

Hans Stegmann Keirstead, Ph.D. University of British Columbia, Professor of Anatomy and Neurobiology

Kristen M. Kelly, M.D. University of California, Irvine, Health Sciences Professor of Dermatology

Richard Kelly, M.D. Stanford University, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

Maria C. Kenney, M.D. University of California, Los Angeles, Professor of Ophthalmology

Morton Kern, M.D. City University of New York, Mount Sinai, Health Sciences Professor of Medicine
Joyce H. Keyak, Ph.D. University of California, San Francisco, Professor in Residence of Radiological Sciences; Biomedical Engineering; Mechanical and Aerospace Engineering (bone mechanics, finite element modeling, quantitative computed tomography, prosthetic implants, osteoporosis, metastatic tumors in bone, radiation therapy)

Aaron Kheriaty, M.D. Georgetown University, Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior

Rostam Khoshsar, M.D. University of Tehran, Health Sciences Clinical Professor of Anesthesiology and Perioperative Care

Antoine Elie Khoury, M.D. Ain Shams University, Walter R. Schmid Chair in Pediatric Urology and Professor in Residence of Urology

Shahira Khoury, M.D. Ain Shams University, Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation

Nafiz M. Kiciman, M.D. Hacettepe University, Health Sciences Professor of Pediatrics

Jayashri Kidao, M.D. Christian Medical College of India, Health Sciences Clinical Professor of Medicine

P. Douglas Kiester, Ph.D. University of Utah, Health Sciences Professor of Orthopaedic Surgery

Yutaka Kikkawa, M.D. University of Tokyo, Professor Emeritus of Pathology and Laboratory Medicine

David B. Kilgore, M.D. University of Southern California, Health Sciences Professor of Family Medicine

Christine M. Kim, M.D. Saint Louis University, Health Sciences Associate Clinical Professor of Obstetrics and Gynecology

Deborah Kim, M.D. Drexel University, Health Sciences Clinical Instructor of Ophthalmology

Jin Kyung Kim, M.D. University of Rochester, Health Sciences Associate Clinical Professor of Medicine

Michael J. Kim, M.D. Northwestern University, Health Sciences Clinical Professor of Radiological Sciences

Moon H. Kim, M.D. Yonsei University, Non-Senate Academic Emeritus of Obstetrics and Gynecology

Ronald C. Kim, M.D. Thomas Jefferson University, Jefferson Medical College, Health Sciences Professor of Pathology and Laboratory Medicine

Sharon Kim, M.D. Drexel University, Health Sciences Clinical Professor of Pediatrics

Virginia Kimonis, M.D. University of Southampton, Professor of Pediatrics; Environmental Health Sciences

Ivan I. Kirov, M.D., Health Sciences Clinical Professor of Pediatrics

Leonard M. Kitzes, Ph.D. University of California, Irvine, Professor Emeritus of Anatomy and Neurobiology

Henry John Klassen, M.D. University of Pittsburgh, Associate Professor in Residence of Ophthalmology

Michael T. Kleinman, Ph.D. New York University, Adjunct Professor of Community & Environ Medicine; Environmental Health Sciences; Program in Public Health

Samuel J. Klempner, M.D. University of Massachusetts, Health Sciences Assistant Clinical Professor of Medicine

Jason M. Knight, M.D., Health Sciences Clinical Professor of Pediatrics

Kristi L. Koenig, M.D. City University of New York, Mount Sinai, Professor of Emergency Medicine

Scott J. Koenig, M.D. New York University, Health Sciences Clinical Instructor of Orthopaedic Surgery

Allen P. Kong, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Surgery

Elliott H. Kornhauser, M.D. University of Toronto, Health Sciences Professor of Medicine; Program in Public Health

Arthur Kreitenberg, M.D. University of California, San Diego, Health Sciences Clinical Professor of Orthopaedic Surgery

Lauren D. Krill, M.D. Thomas Jefferson University, Jefferson Medical College, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Mayil S. Krishnam, M.D. Stanley Medical College, Professor of Radiological Sciences

Christopher A. Kroner, M.D. Tulane University, Health Sciences Assistant Clinical Professor of Family Medicine

Jeffrey V. Kuo, M.D. Thomas Jefferson University, Jefferson Medical College, Health Sciences Professor of Radiation Oncology
Baruch D. Kuppermann, M.D. University of Miami, *Professor of Ophthalmology; Biomedical Engineering* (ocular manifestations of AIDS, risk factors for
the development of retinopathy of prematurity post partum, photodynamic therapy for the treatment of choroidal melanomas)

John A. Kusske, M.D. University of California, San Francisco, *Professor Emeritus of Neurological Surgery*

Frank M. Laferla, Ph.D. University of Minnesota, *Dean of the Francisco J. Ayala School of Biological Sciences and Professor of Neurobiology and
Behavior; Neurology*

Kimberly Lakes, Ph.D. University of Wisconsin-Madison, *Assistant Professor in Residence of Pediatrics*

Jonathan Lacy, Ph.D. University of Alberta, *Associate Professor of Surgery; Biomedical Engineering* (islet transplantation for patients with diabetes,
improving methods of islet isolation, characterization and developing novel methods of islet transplantation, biopolymer and encapsulation technologies)

Chandana Lall, M.D. University College of Medical Sciences, *Health Sciences Professor of Radiological Sciences*

Nils W. Lambrecht, Ph.D. Ruhr University Bochum, *Health Sciences Clinical Professor of Pathology and Laboratory Medicine*

Jaime Landman, M.D. Columbia University College of Physicians and Surgeons, *Professor of Urology*

Felicia L. Lane, M.D. Georgetown University, *Health Sciences Associate Clinical Professor of Obstetrics and Gynecology*

Karen T. Lane, M.D. University of California, Los Angeles, *Health Sciences Associate Clinical Professor of Surgery*

Nathaniel G. Lane, M.D. University of Colorado Boulder, *Health Sciences Assistant Clinical Professor of Emergency Medicine*

Mark I. Landorf, M.D. University of California, San Diego, *Professor of Emergency Medicine*

Janos K. Lanyi, Ph.D. Harvard University, *Professor Emeritus of Physiology and Biophysics*

Kathryn M. Larsen, M.D. University of Washington, *Health Sciences Professor of Family Medicine*

Wei Ling Lau, M.D. University of Washington, *Health Sciences Clinical Instructor of Medicine*

Pamela A. Lawrence, M.D. Columbia University, *Non-Senate Academic Emerita of Medicine*

George V. Lawry, M.D. Johns Hopkins University, *Health Sciences Professor of Medicine*

Chinh Duy Le, M.D. Ho Chi Minh City Medicine and Pharmacy University, *Health Sciences Associate Clinical Professor of Medicine*

Khanh-Van T. Le-Bucklin, M.D. University of California, San Francisco, *Health Sciences Professor of Pediatrics*

Chung Lee, Ph.D. West Virginia University, *Adjunct Professor of Pathology and Laboratory Medicine*

Eva Y. Lee, Ph.D. University of California, Berkeley, *UCI Chancellor's Professor of Biological Chemistry*

Jenny Lee, M.D. New York Medical College, *Health Sciences Clinical Professor of Medicine*

John G. Lee, M.D. University of Miami, *Professor of Medicine*

Nancy Lee, M.D. Temple University, *Health Sciences Clinical Instructor of Ophthalmology*

Robert H. Lee, M.D. University of Michigan, *Health Sciences Clinical Professor of Medicine*

Se-Young Lee, M.D. New York Medical College, *Health Sciences Clinical Professor of Medicine*

Thay Q. Lee, Ph.D. Gothenburg School of Business, Economics and Law, *Professor in Residence of Orthopaedic Surgery; Biomedical Engineering:
Physical Medicine and Rehabilitation* (research biomechanics)

Wen-Hwa Lee, Ph.D. University of California, Berkeley, *Donald Bren Professor Emeritus of Biological Chemistry*

Michael E. Lekawa, M.D. Thomas Jefferson University, Jefferson Medical College, *Health Sciences Professor of Surgery*

Lucille Lemus, M.D. Harvard University, *Health Sciences Clinical Professor of Dermatology*

Patrick J. Lenehan, M.D. University of Vermont, *Health Sciences Clinical Instructor of Emergency Medicine*

Marc A. Lerner, M.D. City University of New York, Mount Sinai, *Health Sciences Clinical Professor of Pediatrics*

Lawrence Lerno, M.D. University of Pittsburgh, *Health Sciences Clinical Professor of Medicine*
Alvina Leung, M.D. University of California, San Diego, Health Sciences Clinical Professor of Medicine

Steven B. Leven, M.D. Medical College of Wisconsin, Health Sciences Professor of Medicine

Ellis Levin, M.D. Thomas Jefferson University, Jefferson Medical College, Professor in Residence of Medicine; Biological Chemistry; Pharmacology

Mark R. Levinstein, M.D. Northwestern University, Health Sciences Clinical Professor of Medicine

Donald S. Levy, M.D. University at Albany, State University of New York, Health Sciences Clinical Professor of Medicine

Patricia Liao, M.D. Northwestern University, Health Sciences Clinical Professor of Pediatrics

Solomon S. Liao, M.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Medicine

Lih-Huei Liaw, M.S. Northeastern University, Project Scientist of Surgery

Richard W. Light, M.D. Johns Hopkins University, Senate Emeritus of Medicine

Charles L. Limoli, Ph.D. University of California, San Diego, Professor of Radiation Oncology; Environmental Health Sciences

Estelle S. Lin, M.D. Drexel University, Health Sciences Clinical Instructor of Medicine

Fritz Lin, M.D. Medical College of Virginia, Professor of Pathology and Laboratory Medicine

Jack J. Lin, M.D. Rush University, Associate Professor of Neurology

Jeannette Lin, M.D. University of California, San Diego, Health Sciences Assistant Clinical Professor of Medicine

Kenneth Linden, M.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Dermatology

Robert W. Lingua, M.D. University of Southern California, Health Sciences Professor of Ophthalmology

Mark E. Linskey, M.D. Columbia University, Professor of Surgery

Linda S. Lippa, M.D. Columbia University, Health Sciences Professor of Ophthalmology

Fong W. Liu, M.D. University of Alabama, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Haoping Liu, Ph.D. Cornell University, Professor of Biological Chemistry

Jeffrey W. Liu, M.D. Brown University, Health Sciences Clinical Instructor of Ophthalmology

Dawn M. Lombardo, D.O. Midwestern University, Chicago College of Osteopathic Medicine, Health Sciences Associate Clinical Professor of Medicine

John C. Longhurst, Ph.D. University of California, Davis, Susan Samueli Chair in Integrative Medicine and Professor of Medicine; Pharmacology; Physiology and Biophysics

Kenneth J. Longmuir, Ph.D. University of Oregon, Professor of Physiology and Biophysics

Shahram Lotfipour, M.D. University of Iowa, Professor of Emergency Medicine; Program in Public Health

Ira T. Lott, M.D. Ohio State University, Professor Emeritus of Pediatrics

Di Lu, M.D. Shanghai University, Health Sciences Professor of Pathology and Laboratory Medicine

Kim D. Lu, M.D. Tufts University, Health Sciences Assistant Clinical Professor of Pediatrics

Stephanie Lu, M.D. University of California, San Diego, Health Sciences Assistant Clinical Professor of Ophthalmology

Paul Lubinsky, M.D. University of Capetown, Health Sciences Associate Clinical Professor of Pediatrics

Ulrike Luderer, M.D., Ph.D. Northwestern University, Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health (reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity, ovarian cancer)

Hartmut Luecke, Ph.D. William Marsh Rice University, Professor of Molecular Biology and Biochemistry; Molecular Biology and Biochemistry; Physiology and Biophysics

Zhigang D. Luo, Ph.D. State University of New York at Buffalo, Professor of Anesthesiology and Perioperative Care; Pharmacology

Gary S. Lynch, Ph.D. Princeton University, Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology; Cognitive Sciences
David Christian Lyon, Ph.D. Vanderbilt University, Assistant Professor of Anatomy and Neurobiology; Cognitive Sciences

Fabio Macciardi, M.D. University of Milan, Professor in Residence of Psychiatry and Human Behavior

Gerald A. Maguire, M.D. Saint Louis University, Kirkup Chair in Psychiatry and Human Behavior for the Medical Treatment of Stuttering and Professor of Psychiatry and Human Behavior

Arash Mahajerin, M.S. Indiana University-Purdue University Indianapolis, Health Sciences Clinical Professor of Pediatrics

Carol A. Major, M.D. Case Western Reserve University, Health Sciences Professor of Obstetrics and Gynecology

Deepika Malik, MBBS, Health Sciences Clinical Instructor of Ophthalmology

Shaista Malik, M.D. University of California, Irvine, Associate Professor of Medicine

Fred M. Malkin, M.D. University of Miami, Health Sciences Associate Clinical Professor of Pediatrics

Dan A. Mandel, M.D. Tel Aviv University, Health Sciences Assistant Clinical Professor of Medicine

Alberto Manetta, M.D. University of Buenos Aires, Professor Emeritus of Obstetrics and Gynecology

William W. Mantulin, Ph.D. Northeastern University, Adjunct Professor of Surgery

Heather A. Marino, D.O. Midwestern University, Arizona College of Osteopathic Medicine, Health Sciences Clinical Instructor of Emergency Medicine

Donald C. Martin, M.D. University of British Columbia, Professor Emeritus of Surgery

G. Robert Mason, M.D. University of Chicago, Professor Emeritus of Surgery

Farhad Mazdisnian, M.D. Thomas Jefferson University, Jefferson Medical College, Health Sciences Associate Clinical Professor of Medicine

Irene M. McAleer, M.D. Ohio State University, Health Sciences Associate Clinical Professor of Urology

Michael McClelland, Ph.D. University of Georgia, Professor of Microbiology and Molecular Genetics

Christopher McCoy, M.D. University of California, San Francisco, Health Sciences Assistant Clinical Professor of Emergency Medicine

Jerry L. McCullough, Ph.D. Yale University, Professor Emeritus of Dermatology

Elsbeth M. McDougall, M.D. University of Calgary, Professor Emerita of Urology

Christine E. McLaren, Ph.D. Case Western Reserve University, Professor of Epidemiology

Gordon McLaren, M.D. Stanford University, Adjunct Professor of Medicine

Calvin S. McLaughlin, Ph.D. Massachusetts Institute of Technology, Professor Emeritus of Biological Chemistry

Gordon McLorie, M.D. University of Toronto, Health Sciences Professor of Urology

Kirk McNagny, M.D. Creighton University, Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior

Deena McRae, M.D. University of California, Irvine, Health Sciences Clinical Professor of Psychiatry and Human Behavior

Rita S. Mehta, M.D. Mahatma Gandhi Memorial Medical College, Health Sciences Associate Clinical Professor of Medicine

Daniel B. Menzel, Ph.D. University of California, Berkeley, Professor Emeritus of Medicine

Dan Mercola, Ph.D. University of California, Los Angeles, Professor of Pathology and Laboratory Medicine

Hooshang Meshkinpour, M.D. University of Tehran, Professor Emeritus of Medicine

Frank L. Meyskens, M.D. University of California, San Francisco, Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Epidemiology; Program in Public Health

David E. Michalik, D.O., Health Sciences Clinical Professor of Pediatrics

John Middlebrooks, Ph.D. University of California, San Francisco, Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior (hearing research, neurophysiology, auditory prosthesis, computational neuroscience, auditory cortex)

Michel Mikael, M.D., Health Sciences Clinical Professor of Pediatrics
Ronald B. Miller, M.D. Columbia University, *Non-Senate Academic Emeritus of Medicine*

Jeffrey C. Milliken, M.D. University of Michigan, *Health Sciences Professor of Surgery*

Steven D. Mills, M.D. New York Medical College, *Associate Professor of Surgery*

Donald S. Minckler, M.D. University of Oregon, *Professor Emeritus of Ophthalmology; Pathology and Laboratory Medicine*

Sean A. Minjares, M.D. University of California, Davis, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Lilit Mnatsakanyan, M.D. Yerevan State Medical University, *Health Sciences Assistant Clinical Professor of Neurology*

Sabee Y. Molloi, Ph.D. University of Wisconsin-Madison, *Professor of Radiological Sciences; Biomedical Engineering; Electrical Engineering and Computer Science* (quantitative aspects of medical x-ray imaging and its applications to cardiac and breast imaging)

Edwin S. Monuki, M.D. University of California, San Diego, *Associate Professor of Pathology and Laboratory Medicine; Developmental and Cell Biology* (cerebral cortex, choroid plexus development, translation)

Hamid Moradi, M.D. Oregon Health & Science University, *Health Sciences Assistant Clinical Professor of Medicine*

Edgar Moran, M.D. University of Bucharest, *Senate Emeritus of Medicine*

Timothy R. Morgan, M.D. Emory University, *Professor in Residence of Medicine*

David K. Morohashi, M.D. University of Washington, *Health Sciences Professor of Family Medicine*

Debra E. Morrison, M.D. Northwestern University, *Health Sciences Professor of Anesthesiology and Perioperative Care; Urology*

Sameh Mosaed, M.D. New York Medical College, *Health Sciences Associate Clinical Professor of Ophthalmology*

Gina R. Mosich, M.D. University of California, Irvine, *Health Sciences Clinical Professor of Psychiatry and Human Behavior*

Harry David Mosier, M.D. Johns Hopkins University, *Professor Emeritus of Pediatrics*

Ross Moskowitz, M.D. University of California, Irvine, *Health Sciences Clinical Instructor of Urology*

Laura Mosqueda, M.D. University of Southern California, *Ronald Reagan Chair in Geriatrics and Professor of Family Medicine*

Peter J. Mostert, D.O. Oklahoma State University, *Health Sciences Clinical Instructor of Radiological Sciences*

Robert K. Moyzis, Ph.D. Johns Hopkins University, *Professor Emeritus of Biological Chemistry*

Tahseen Mozaffar, MBBS Aga Kahn University, *Professor of Neurology*

Dana Mukamel, Ph.D. University of Rochester, *Professor of Medicine; Program in Public Health*

Jogeshwar Mukherjee, Ph.D. Jodhpur National University, *Professor in Residence of Radiological Sciences; Physiology and Biophysics*

J. Dennis Mull, M.D. Medical College of Virginia, *Professor Emeritus of Family Medicine*

Maury Lee Ellis Mulligan, M.D. City University of New York, Mount Sinai, *Senate Emeritus of Medicine*

Penny R. Murata, M.D. Women's Medical College of Pennsylvania, *Health Sciences Professor of Pediatrics*

Yuji Murata, M.D. Osaka University, *Professor Emeritus of Obstetrics and Gynecology*

Cynthia T. Murphy, M.D. University of South Dakota, *Health Sciences Associate Clinical Professor of Physical Medicine and Rehabilitation*

Sandra Murray, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor of Pediatrics*

Padmaja Muthiah, M.D. University of Hawaii at Manoa, *Health Sciences Clinical Professor of Medicine*

Robert Myers, Ph.D. University of Southern California, *Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior*

Bavani Nadeswaran, MBBS University of the West Indies, *Health Sciences Professor of Medicine*

Orhan Nalcioglu, Ph.D. University of Oregon, *Professor Emeritus of Radiological Sciences*

Patricia W. Nance, M.D. University of South Florida, *Health Sciences Clinical Professor of Physical Medicine and Rehabilitation*
Andreea Nanci, M.D. Goethe University Frankfurt, Health Sciences Associate Clinical Professor of Medicine

Chaitali S. Nangia, M.D. Lady Hardinge Medical College, Health Sciences Assistant Clinical Professor of Medicine

Shoba Narayan, M.D. University of California, Los Angeles, Health Sciences Clinical Professor of Pediatrics

Corey Nelson, M.D. Thomas Jefferson University, Jefferson Medical College, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Edward L. Nelson, M.D. University of Oregon, Associate Professor of Medicine; Molecular Biology and Biochemistry

J. Stuart Nelson, Ph.D. University of California, Irvine, Professor of Surgery; Biomedical Engineering (laser surgery, port wine stains, hemangiomas, vascular birthmarks)

Kari J. Nelson, M.D. Medical College of Wisconsin, Health Sciences Clinical Instructor of Radiological Sciences

Linda D. Nelson, Ph.D. Ohio State University, Senate Emerita of Neurology

Thomas L. Nelson, M.D. University of California, San Francisco, Professor Emeritus of Pediatrics

Anthony B. Nesburn, M.D. Harvard University, Adjunct Professor of Ophthalmology

Robert L. Newcomb, Ph.D. University of California, Santa Barbara, Senior Lecturer with Security of Employment Emeritus of Pediatrics; Clinical Translational Science

Richard S. Newman, M.D. University of California, Irvine, Health Sciences Professor of Pathology and Laboratory Medicine

Angelica T. Nguyen, M.D. University of California, Los Angeles, Health Sciences Assistant Clinical Professor of Medicine

Danh V. Nguyen, Ph.D. University of California, Davis, Professor of Medicine

Hanh T. Nguyen, M.D. Medical College of Virginia, Health Sciences Assistant Clinical Professor of Family Medicine

Lan T. Nguyen, M.D. University of California, San Diego, Health Sciences Professor of Medicine

Ninh Tuan Nguyen, M.D. University of Texas at San Antonio, Professor of Surgery

Tan Quoc Viet Nguyen, M.D. Michigan State University, Health Sciences Assistant Clinical Professor of Family Medicine

Y. Vien T. Nguyen, D.O. Western University of Health Sciences, Health Sciences Clinical Instructor of Radiological Sciences

Bruce Nickerson, M.D. University of California, Los Angeles, Health Sciences Associate Clinical Professor of Pediatrics

Delma J. Nieves, M.D. University of Washington, Health Sciences Clinical Professor of Pediatrics

Theresa L. Nilson, M.D. Boston University, Health Sciences Clinical Instructor of Medicine

Karen L. Noblett, M.D. University of California, Irvine, Health Sciences Professor of Obstetrics and Gynecology

Diane J. Nugent, M.D. University of California, Los Angeles, Health Sciences Clinical Professor of Pediatrics

Eliezer Nussbaum, M.D. Tel Aviv University, Professor of Pediatrics

Diane K. O'Dowd, Ph.D. University of California, San Diego, Professor of Developmental and Cell Biology; Anatomy and Neurobiology (regulation of activity in developing and adult nervous systems)

Michael O'Reilly, M.D. University of Vermont, Health Sciences Clinical Professor of Anesthesiology and Perioperative Care

Leticia Oliveros, M.D. University of Iowa, Health Sciences Professor of Pediatrics

Bonnie Jean Olsen, Ph.D. California School of Professional Psychology, Health Sciences Professor of Family Medicine

Harold G. Olson, M.D. University of California, Irvine, Health Sciences Professor of Medicine

Robin D. Onishi, M.D. University of Washington, Health Sciences Clinical Professor of Medicine

Kathryn Osann, Ph.D. University of California, Berkeley, Adjunct Professor of Medicine; Environmental Health Sciences

Donald R. Ostergard, M.D. University of California, San Francisco, Senate Emeritus of Obstetrics and Gynecology
Sai-Hong Ignatius Ou, Ph.D. University of Texas at Dallas, *Health Sciences Associate Clinical Professor of Medicine*

Andre J. Ouellette, Ph.D. Indiana University, *Professor Emeritus of Pathology and Laboratory Medicine*

Yi Ouyang, M.D. Jilin University, *Health Sciences Associate Clinical Professor of Pathology and Laboratory Medicine*

Madeleine V. Pahl, M.D. University of California, Irvine, *Professor of Medicine*

Marilyn J. Pais, M.D. Women's Medical College of Pennsylvania, *Senior Lecturer with Security of Employment Emerita of Radiological Sciences*

Nimisha Parekh, M.D. Tulane University, *Health Sciences Associate Clinical Professor of Medicine*

Hannah Park, Ph.D. Stanford University, *Assistant Professor in Residence of Epidemiology*

Steven Park, M.D. New York University, *Health Sciences Associate Clinical Professor of Medicine*

Ian Parker, Ph.D. University College London, *Professor of Neurobiology and Behavior; Physiology and Biophysics*

Angela Parkin, M.D. University of Texas, *Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care*

Iris Partovi, M.D., *Health Sciences Clinical Professor of Medicine*

Victor Passy, M.D. University of California, Irvine, *Senior Lecturer with Security of Employment Emeritus of Otolaryngology*

Anup Patel, M.D. University of Nevada, *Health Sciences Clinical Professor of Pediatrics*

Hiren Patel, M.D., *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Pranav Patel, M.D. Saint Louis University, *Chief, Division of Cardiology; Director of Cardiac Catheterization Laboratory and Cardiac Care Unit (CCU) and Health Sciences Associate Clinical Professor of Medicine; Biomedical Engineering (intravascular imaging (OCT and IVUS), interventional cardiology research-coronary artery disease and peripheral vascular disease, medical quality and outcomes research, cardiac hemodynamics: fractional flow reserve and coronary flow reserve, preventive cardiology research)*

Sameer S. Pathare, M.D. Medical College of Wisconsin, *Health Sciences Clinical Professor of Pediatrics*

Julie V. Patterson, Ph.D. University of Southern California, *Specialist of Psychiatry and Human Behavior*

Keyianoosh Paydar, M.D. University of Tennessee, *Health Sciences Associate Clinical Professor of Surgery*

Daniel Pelot, M.D. Howard University, *Senior Lecturer with Security of Employment Emeritus of Medicine*

Kristine R. Penner, M.D. University of California, San Francisco, *Health Sciences Assistant Clinical Professor of Obstetrics and Gynecology*

Ellena Peterson, Ph.D. Georgetown University, *Professor of Pathology and Laboratory Medicine*

Parham Pezeshk, M.D., *Health Sciences Clinical Instructor of Radiological Sciences*

Robert F. Phalen, Ph.D. University of Rochester, *Professor of Medicine; Environmental Health Sciences*

Peter H. Pham, M.D. University of California, Los Angeles, *Associate Professor of Radiological Sciences*

Son Phan, M.D. University of Vermont, *Health Sciences Assistant Clinical Professor of Radiological Sciences*

Nicolas M. Phielipp, M.D. University of Buenos Aires, *Health Sciences Assistant Clinical Professor of Neurology*

Gloria J. Picking, M.A. San Diego State University, *Health Sciences Clinical Instructor of Psychiatry and Human Behavior*

Aimee Pierce, M.D. Columbia University College of Physicians and Surgeons, *Health Sciences Assistant Clinical Professor of Neurology*

Alessio Pigazzi, M.D. Boston University, *Associate Professor of Surgery*

Daniele Piomelli, Ph.D. Columbia University, *Louise Turner Arnold Chair in the Neurosciences and Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmacology*

Hubert C. Pirkle, M.D. Indiana University, *Professor Emeritus of Pathology and Laboratory Medicine*

Alice Police, M.D. Loma Linda University, *Health Sciences Assistant Clinical Professor of Surgery*

Robert W. Porter, M.D. Northwestern University, *Senate Emeritus of Neurological Surgery*
Dmitry Portnoy, M.D. Moscow State University, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

Manuel Porto, M.D. Rutgers, the State University of New Jersey, The Edward J. Quilligan Chair in Maternal-Fetal Medicine and Professor of Obstetrics and Gynecology

Steven G. Potkin, M.D. Washington University, Robert R. Sprague Chair in Brain Imaging and Professor of Psychiatry and Human Behavior

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Adrian Preda, M.D., Health Sciences Professor of Psychiatry and Human Behavior

Pamela E. Prete, M.D. Hahnemann University Hospital, Senate Emerita and Professor of Medicine

Henry W. Pribram, MB Chir Cambridge University, Professor Emeritus of Radiological Sciences

Douglas W. Priestly, M.D. University of Manitoba, Health Sciences Clinical Professor of Physical Medicine and Rehabilitation

Michael D. Prislin, M.D. Georgetown University, Professor of Family Medicine

Geetha Puthenveetil, MBBS, Health Sciences Clinical Professor of Pediatrics

Feng Qiao, Ph.D. University of California, Los Angeles, Assistant Professor of Biological Chemistry

Lisa K. Quane, M.D. University of Illinois at Urbana-Champaign, Health Sciences Professor of Radiological Sciences

Edward J. Quilligan, M.D. Ohio State University, Professor Emeritus of Obstetrics and Gynecology

W. Leslie Quinlivan, MBBS University of London, Professor Emeritus of Obstetrics and Gynecology

Bouchaib Rabbani, Ph.D. University of California, Irvine, Non-Senate Academic Emeritus of Radiation Oncology

Manuela Raffatellu, M.D. Università degli Studi di Sassari, Assistant Professor of Microbiology and Molecular Genetics

Gregory Rafijah, M.D. Chicago Medical School, Health Sciences Assistant Clinical Professor of Orthopaedic Surgery

Maryam Rahimi, M.D. Indiana University, Health Sciences Associate Clinical Professor of Medicine

Asif Rahman, M.D. University of Toledo, Health Sciences Clinical Instructor of Emergency Medicine

Govind R. Rajan, MBBS University of Delhi, Health Sciences Professor of Anesthesiology and Perioperative Care

Davinder Ramsingh, M.D. Medical College of Georgia, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Nilam S. Ramsinghani, MBBS Grant Medical College, Health Sciences Professor of Radiation Oncology

Leslie M. Randall, M.D. University of Louisville, Assistant Professor of Obstetrics and Gynecology

Gayathri V. Rao, Ph.D., Specialist of Microbiology and Molecular Genetics

Bahram Raofi, M.D. University of Tehran, Health Sciences Clinical Professor of Radiological Sciences

Darren R. Raphael, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Jody M. Rawles, M.D. Albany Medical College, Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior

Radoslav Raychev, M.D., Health Sciences Assistant Clinical Professor of Neurological Surgery

Virgil S. Raymundo, M.D. University of California, Irvine, Health Sciences Professor of Medicine

Louis Recher, M.D. University of Basel, Senate Emeritus of Pathology and Laboratory Medicine

Michael R. Recto, M.D., Health Sciences Clinical Professor of Pediatrics

Varalakshmi Reddy, M.D. Osmania Medical College, Health Sciences Professor of Pediatrics

John L. Redpath, Ph.D. University of Newcastle, Professor Emeritus of Radiation Oncology; Environmental Health Sciences

Christina M. Reh, M.D. Loma Linda University, Health Sciences Clinical Professor of Pediatrics
Andrew R. Reikes, M.D. University of California, San Diego, Health Sciences Professor of Medicine

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation (robotics, mechatronics, biomedical engineering, rehabilitation, biomechanics, neural control of movement)

Christopher Reist, M.D. Medical College of Virginia, Associate Professor in Residence of Psychiatry and Human Behavior

Ricardo Restrepo, M.D. Health Sciences Clinical Professor of Psychiatry and Human Behavior

Sherif Rezk, MBBS Alexandria University, Associate Professor of Pathology and Laboratory Medicine

Connie Rhee, M.D. Northwestern University, Health Sciences Clinical Instructor of Medicine

Jessica M. Rhee, M.D. University of Chicago, Health Sciences Associate Clinical Professor of Medicine

Charles E. Ribak, Ph.D. Boston University, Professor Emeritus of Anatomy and Neurobiology

James Rick, M.D. University of Illinois at Urbana–Champaign, Health Sciences Clinical Professor of Medicine

Cameron Ricks, M.D. American University of the Caribbean School of Medicine, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Joseph Rinehart, M.D. Loyola University Chicago, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

Monica B. Rivera, M.D., Health Sciences Clinical Professor of Radiological Sciences

Dante Eduardo Roa, Ph.D. Florida State University, Health Sciences Associate Clinical Professor of Radiation Oncology

Richard T. Robertson, Ph.D. University of California, Irvine, Professor of Anatomy and Neurobiology

W. Edward Robinson, Ph.D. Vanderbilt University, Professor in Residence of Pathology and Laboratory Medicine; Microbiology and Molecular Genetics

Leland D. Ronningen, M.D. Uniformed Services University of the Health Sciences, Health Sciences Professor of Urology

Irwin A. Rose, Ph.D. University of Chicago, Senate Emeritus of Physiology and Biophysics

Steven D. Ross, M.D. University of Southern California, Health Sciences Professor of Orthopaedic Surgery

Elyssa Rubin, M.D., Health Sciences Clinical Professor of Pediatrics

Lloyd Rucker, M.D. University of Kentucky, Health Sciences Clinical Professor of Medicine

Scott E. Rudkin, M.D. University of California, Irvine, Health Sciences Professor of Emergency Medicine

Bahman Saatian, M.D., Health Sciences Assistant Clinical Professor of Medicine

Terra R. Safer, M.D. University of California, Los Angeles, Health Sciences Associate Clinical Professor of Medicine

Angela N. Sagar, M.D. Ross University, Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior

Hamid M. Said, Ph.D. Aston University, Professor of Medicine; Physiology and Biophysics

Naghmeh Salamat Saberi, M.D. New York Medical College, Health Sciences Associate Clinical Professor of Obstetrics and Gynecology

Jason B. Samarasena, M.D. Memorial University of Newfoundland, Health Sciences Assistant Clinical Professor of Medicine

Curt A. Sandman, Ph.D. Louisiana State University, Senate Emeritus of Psychiatry and Human Behavior

Suzanne B. Sandmeyer, Ph.D. University of Washington, Grace Beekhuis Bell Chair in Biological Chemistry and Professor of Biological Chemistry; Chemical Engineering and Materials Science; Microbiology and Molecular Genetics (retroelements, metabolic molding, genomics)

Zsuzsanna Sandor, M.D. Semmelweis University, Health Sciences Associate Clinical Professor of Medicine

Jose Y. Sandoval, M.D. University of California, Los Angeles, Health Sciences Clinical Professor of Family Medicine

Rozanne M. Sandri-Goldin, Ph.D. Johns Hopkins University, Professor of Microbiology and Molecular Genetics

I. James Sarfeh, M.D. Albany Medical College, Professor Emeritus of Surgery
Jon F. Sassin, M.D. Saint Louis University, **Professor Emeritus of Neurology**

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, **Donald Bren Professor and Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences**

Catherine S. Sassoon, M.D. Gadjah Mada University, **Professor in Residence of Medicine**

Mona Sazgar, M.D. McMaster University, **Health Sciences Associate Clinical Professor of Neurology**

Justin Schafer, Ph.D. University of California, Irvine, **Assistant Adjunct Professor of Anatomy and Neurobiology**

Shira A. Schlesinger, M.D. University of California, San Diego, **Health Sciences Clinical Instructor of Emergency Medicine**

Peter L. Schnall, M.D. Stanford University, **Health Sciences Clinical Professor of Medicine; Program in Public Health**

Alan L. Schneider, M.D. University of Southern California, **Health Sciences Associate Clinical Professor of Psychiatry and Human Behavior**

Sanford Schneider, M.D. New York University, **Health Sciences Clinical Professor of Pediatrics**

Merritt D. Schreiber, Ph.D. Ohio State University, **Associate Professor of Emergency Medicine**

Steven S. Schreiber, M.D. Albany Medical College, **Professor in Residence of Neurology; Anatomy and Neurobiology; Psychiatry and Human Behavior**

Sabrina E. Schuck, Ph.D. University of California, Riverside, **Health Sciences Assistant Clinical Professor of Pediatrics; Psychology and Social Behavior (ADHD, autistic spectrum disorders, disorders of reading and written language, human-animal intervention, non-pharmacological treatment of disruptive behavior, cognitive-behavioral school-based and family-based interventions)**

Carl Schultz, M.D. University of California, Irvine, **Professor of Emergency Medicine**

Adam J. Schwarz, M.D. Stanford University, **Health Sciences Associate Clinical Professor of Pediatrics**

Ran Schwarzkopf, M.D., **Health Sciences Assistant Clinical Professor of Orthopaedic Surgery**

John A. Scolaro, M.D. Boston College, **Health Sciences Assistant Clinical Professor of Orthopaedic Surgery**

Shruti Scott, D.O. Western University of Health Sciences, **Health Sciences Assistant Clinical Professor of Medicine**

Tara E. Seery, M.D. University College Dublin, **Health Sciences Assistant Clinical Professor of Medicine**

Gary P. Segal, M.D. University of Pennsylvania, **Health Sciences Clinical Professor of Medicine**

Sonia Sehgal, M.D. St. George’s University, **Health Sciences Associate Clinical Professor of Medicine**

Varun Sehgal, Ph.D. University of Florida, **Health Sciences Associate Clinical Professor of Radiation Oncology**

Michael E. Selsted, M.D. University of California, Los Angeles, **Professor Emeritus of Pathology and Laboratory Medicine**

Bert L. Semler, Ph.D. University of California, San Diego, **Professor of Microbiology and Molecular Genetics**

Leonard S. Sender, M.D. University of Witwatersrand, **Health Sciences Professor of Medicine**

Stefano Sensi, M.D. Gabriele D'Annunzio University of Chieti Pescara, **Associate Adjunct Professor of Neurology; Pharmacology**

Cagin Senturk, M.D. Hacettepe University Medical School, **Health Sciences Clinical Professor of Radiological Sciences**

Arnold H. Seto, M.D. Harvard University, **Health Sciences Assistant Clinical Professor of Medicine**

Gaurang Shah, M.D. The Maharaja Sayajirao University of Baroda, **Health Sciences Clinical Professor of Medicine**

Shalini S. Shah, M.D. St. George’s University, **Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care**

Joel B. Shallit, M.D. University of California, Los Angeles, **Assistant Adjunct Professor of Family Medicine**

Ronald C. Shank, Ph.D. Massachusetts Institute of Technology, **Professor Emeritus of Medicine; Environmental Health Sciences**

Deane H. Shapiro, Ph.D. Stanford University, **Senate Emeritus of Psychiatry and Human Behavior**

Johanna F. Shapiro, Ph.D. Stanford University, **Professor of Family Medicine**

Ankush Sharma, M.D. American University of the Caribbean School of Medicine, **Health Sciences Assistant Clinical Professor of Medicine**
Lili Sheibani, M.D. University of California, Irvine, Health Sciences Clinical Instructor of Obstetrics and Gynecology
Lavonne Sheng, M.D. University of California, Irvine, Health Sciences Clinical Professor of Pediatrics
Yongsheng Shi, Ph.D. Syracuse University, Assistant Professor of Microbiology and Molecular Genetics
Cynthia H. Sholly, M.D. University of Utah, Health Sciences Professor of Pediatrics
Jordan A. Siegel, M.D. Tufts University, Health Sciences Clinical Instructor of Urology
Herbert C. Sier, M.D. Medical College of Virginia, Health Sciences Professor of Medicine
Jack H. Sills, M.D. Northwestern University, Health Sciences Clinical Professor of Pediatrics
Valeria B. Simon, M.D. University of Illinois at Urbana–Champaign, Health Sciences Clinical Instructor of Obstetrics and Gynecology
Jennifer L. Simpson, M.D. University of Michigan, Health Sciences Professor of Ophthalmology
Jasjit Singh, M.D. Duke University, Health Sciences Associate Clinical Professor of Pediatrics
Kira Skavinski, D.O. New York Inst of Technology, Health Sciences Assistant Clinical Professor of Family Medicine
Harry B. Skinner, M.D. Medical University of South Carolina, Professor Emeritus of Orthopaedic Surgery
Lewis M. Slater, M.D. University of Vermont, Professor Emeritus of Medicine
Steven L. Small, M.D. University of Rochester, Dr. Stanley van den Noort Endowed Chair and Professor of Neurology; Cognitive Sciences; Neurobiology and Behavior
Brian Smith, M.D. Universidad Autonoma De Guadalajara, Health Sciences Assistant Clinical Professor of Surgery
Janellen Smith, M.D. University of Iowa, Health Sciences Professor of Dermatology
Martin A. Smith, Ph.D. University of Newcastle, Professor of Anatomy and Neurobiology
Moyra Smith, M.D. University of Pretoria, Professor Emerita of Pediatrics
Kenneth Sokolski, M.D. University of California, Irvine, Associate Adjunct Professor of Psychiatry and Human Behavior
Antoine N. Soliman, M.D. Pennsylvania State University, Health Sciences Clinical Professor of Pediatrics
Ana Solodkin, Ph.D. National Polytechnic Inst of Mexico, Associate Professor of Anatomy and Neurobiology; Neurology
Ivan Soltesz, Ph.D. Eötvös Loránd University, UCI Chancellor's Professor of Anatomy and Neurobiology; Neurobiology and Behavior; Physiology and Biophysics
Charles A. Sondhaus, Ph.D. University of California, Berkeley, Professor Emeritus of Radiological Sciences
Amit Soni, M.D. St. George's University, Health Sciences Clinical Professor of Pediatrics
Dara H. Sorkin, Ph.D. University of California, Irvine, Associate Professor in Residence of Medicine (close relationships, social support and conflict, behavioral lifestyle interventions around chronic disease management, program evaluation)
Martha G. Sosa-Johnson, M.D. University of San Diego, Health Sciences Associate Clinical Professor of Medicine
Jennifer Soung, M.D. Albert Einstein College of Medicine, Health Sciences Assistant Clinical Professor of Dermatology
Marian Sowa, M.D., Health Sciences Associate Clinical Professor of Neurology
Gerald S. Spear, M.D. Johns Hopkins University, Professor Emeritus of Pathology and Laboratory Medicine
M. Anne Spence, Ph.D. University of Hawaii at Manoa, Professor Emerita of Pediatrics
Donald R. Sperling, M.D. Yale University, Professor Emeritus of Pediatrics
Lawrence D. Sporty, M.D. State University of New York Downstate Medical Center, Senior Lecturer with Security of Employment Emeritus of Psychiatry and Human Behavior
Michael J. Stamos, Ph.D. Case Western Reserve University, John E. Connolly Chair in Surgery and Professor of Surgery
Eric J. Stanbridge, Ph.D. Stanford University, Professor Emeritus of Microbiology and Molecular Genetics

Robert E. Steele, Ph.D. Yale University, Professor of Biological Chemistry

Joan S. Steffan, Ph.D. University of California, San Diego, Associate Professor in Residence of Psychiatry and Human Behavior

Robin Steinberg-Epstein, M.D. University of California, Irvine, Health Sciences Professor of Pediatrics

Roger F. Steinert, M.D. Harvard University, Irving H. Leopold Chair in Ophthalmology and Professor of Ophthalmology; Biomedical Engineering (cataract surgical technique and management of complications, refractive surgery, corneal transplantation)

Barry A. Steinmetz, M.D. University of California, Irvine, Health Sciences Clinical Instructor of Obstetrics and Gynecology

Megan L. Stephenson, M.D. University of California, Irvine, Health Sciences Clinical Instructor of Psychiatry and Human Behavior

Oswald Steward, Ph.D. University of California, Irvine, Health Sciences Clinical Instructor of Ophthalmology and Neurology

Cassandra L. Stewart, M.D. Medical University of South Carolina, Health Sciences Clinical Instructor of Pediatrics

Svetlana R. Stivi, Ph.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Family Medicine

Daniel S. Stokols, Ph.D. University of North Carolina at Wilmington, Professor Emeritus of Psychology and Social Behavior; Epidemiology; Planning, Policy, and Design; Program in Public Health (environmental psychology, science of team science, transdisciplinary public health)

Suzanne L. Strom, M.D. University of Texas, Health Sciences Associate Clinical Professor of Anesthesiology and Perioperative Care

Min-Ying Su, Ph.D. University of California, Irvine, Professor of Radiological Sciences; Physics and Astronomy

Veedamali Subramanian, Ph.D. University of Madras, Assistant Adjunct Professor of Medicine

Jeffrey R. Suchard, M.D. University of California, Los Angeles, Professor of Emergency Medicine; Pharmacology

Coral Sun, M.D. University of Florida, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

Laxmi A. Suthar, M.D. Oregon Health & Science University, Health Sciences Assistant Clinical Professor of Medicine

Shuichi Suzuki, M.D. Kitasato University, Associate Professor of Neurological Surgery; Neurology

Morgan L. Swank, M.D. Creighton University, Health Sciences Clinical Instructor of Obstetrics and Gynecology

James M. Swanson, Ph.D. Ohio State University, Professor Emeritus of Pediatrics; Cognitive Sciences

Bindu Swaroop, M.D. St. George’s University, Health Sciences Assistant Clinical Professor of Medicine

John E. Swett, Ph.D. University of California, Los Angeles, Professor Emeritus of Anatomy and Neurobiology

Paul S. Sypherd, Ph.D. Yale University, Professor Emeritus of Microbiology and Molecular Genetics

Sandor Szabo, Ph.D. Université de Montréal, Professor in Residence of Pathology and Laboratory Medicine; Pharmacology

Yona Tadir, M.D. Tel Aviv University, Adjunct Professor of Surgery

Ronald Takemoto, M.D. University of Southern California, Health Sciences Clinical Professor of Physical Medicine and Rehabilitation

Steven Tam, M.D. University of California, San Diego, Health Sciences Assistant Clinical Professor of Medicine

Ming Tan, M.D. Johns Hopkins University, Professor of Microbiology and Molecular Genetics; Medicine

Siu W. Tang, M.D. University of Hong Kong, Senate Emeritus of Psychiatry and Human Behavior

Dawn T. Tanner, M.D. Creighton University, Health Sciences Clinical Instructor of Radiological Sciences

Jeremiah Tao, M.D. University of Southern California, Health Sciences Associate Clinical Professor of Ophthalmology

Sharief K. Taraman, M.D. Wayne State University, Health Sciences Clinical Professor of Pediatrics

Andrzej S. Tarnawski, M.D. University Medical School, Professor of Medicine
Candice E. Taylor, M.D., Health Sciences Assistant Clinical Professor of Pediatrics
Jamshid Tehranzadeh, M.D. Pahlavi University, Professor Emeritus of Radiological Sciences
Krishnansu S. Tewari, M.D. University of California, Irvine, Professor of Obstetrics and Gynecology
Gaby T. Thai, M.D. Tufts University, Health Sciences Professor of Neurology
Leslie M. Thompson, Ph.D. University of California, Irvine, Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior
Lauri D. Thrupp, M.D. University of Washington, Professor Emeritus of Medicine
Jeremiah G. Tilles, M.D. Harvard University, Professor Emeritus of Medicine
David Timberlake, Ph.D. University of California, San Diego, Associate Professor of Program in Public Health; Epidemiology
Pornchai Tirakitsoontorn, M.D. University of California, San Diego, Health Sciences Associate Clinical Professor of Pediatrics
Katherine Tobin, M.D. Stritch School of Medicine, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care
Jerome S. Tobis, M.D. Chicago Medical School, Professor Emeritus of Physical Medicine and Rehabilitation
Francesco Tombola, Ph.D. University of Padua, Assistant Professor of Physiology and Biophysics
Julianne S. Toohey, M.D. University of California, Irvine, Health Sciences Professor of Obstetrics and Gynecology
Nojan Toomari, M.D. Western University of Health Sciences, Health Sciences Clinical Instructor of Surgery
Simin Torabzadeh, Ph.D. Universidad Central del Este, Health Sciences Professor of Medicine
Jason D. Toranto, M.D. University of Michigan, Health Sciences Assistant Clinical Professor of Surgery
Lillibeth Torno, M.D., Health Sciences Associate Clinical Professor of Pediatrics
Minodora Totoiu, M.D., Health Sciences Clinical Professor of Pediatrics
Paul E. Touchette, Ed.D. Harvard University, Recall Non-Senate Academic of Pediatrics
Anne E. Tournay, MBBS University College London, Health Sciences Associate Clinical Professor of Pediatrics
Bao Q. Tran, M.D. Creighton University, Health Sciences Clinical Professor of Physical Medicine and Rehabilitation
Hien T. Tran, M.D. Harvard University, Health Sciences Clinical Professor of Dermatology
Huy T. Tran, M.D. Western University of Health Sciences, Health Sciences Professor of Family Medicine
Lily H. Tran, M.D. University of Rochester, Health Sciences Clinical Professor of Pediatrics
Minh-Ha Tran, D.O. Western University of Health Sciences, Health Sciences Associate Clinical Professor of Pathology and Laboratory Medicine
Lien N. Trinh, M.D. St. George’s University, Health Sciences Clinical Professor of Pediatrics
Bruce Tromberg, Ph.D. University of Tennessee, Director of Surgery; Biomedical Engineering; Physiology and Biophysics (photon migration, diffuse optical imaging, non-linear optical microscopy, photodynamic therapy)
Fong Y. Tsai, M.D. Taipei Medical University, Senate Emeritus of Radiological Sciences
Atur V. Turakhia, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Psychiatry and Human Behavior
Martin Tynan, M.D. Trinity College, Health Sciences Professor of Orthopaedic Surgery
Edward M. Uchio, M.D. University of California, Irvine, Health Sciences Associate Clinical Professor of Urology
Cherry C. Uy, M.D. Far Eastern University, Health Sciences Professor of Pediatrics
Duane J. Vajgrt, M.D. University of California, San Francisco, Health Sciences Professor of Radiological Sciences
Shermeen Bejan Vakharia, MBBS Aga Khan University, Health Sciences Professor of Anesthesiology and Perioperative Care
Theodorus G. Van Erp, Ph.D. Utrecht University, Assistant Professor in Residence of Psychiatry and Human Behavior

Richard A. Van Etten, M.D. Stanford University, Professor of Medicine

Nicolaas-John Van Nieuwenhuysen, MBBS, Health Sciences Clinical Professor of Psychiatry and Human Behavior

Taya C. Varteresian, D.O. A.T. Still University, Kirksville College of Osteopathic Medicine, Health Sciences Clinical Professor of Psychiatry and Human Behavior

Nosratola D. Vaziri, M.D. University of Tehran, Professor Emeritus of Medicine; Physiology and Biophysics

Charles P. Vega, M.D. University of Wisconsin-Madison, Health Sciences Professor of Family Medicine

Swapna Vemuri, M.D. Wayne State University, Health Sciences Clinical Instructor of Ophthalmology

Vasan Venugopalan, ScD Massachusetts Institute of Technology, Department Chair and Professor of Chemical Engineering and Materials Science; Biomedical Engineering; Mechanical and Aerospace Engineering; Surgery (laser-induced thermal, mechanical and radiative transport processes for application in medical diagnostics, therapeutics, biotechnology, micro-electro-mechanical systems (MEMS))

Sunil P. Verma, M.D. University of Southern California, Health Sciences Assistant Clinical Professor of Otolaryngology

Larry E. Vickery, Ph.D. University of California, Santa Barbara, Professor Emeritus of Physiology and Biophysics

Anthony Vo, M.D. University of California, Irvine, Health Sciences Clinical Professor of Medicine

Baotran N. Vo, M.D. University of California, San Francisco, Health Sciences Assistant Clinical Professor of Family Medicine

Martin J. Vogel, M.D. New York Medical College, Health Sciences Clinical Instructor of Anesthesiology and Perioperative Care

Trung Q. Vu, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Anesthesiology and Perioperative Care

K. Mark Vuchinich, M.D. University of California, San Diego, Health Sciences Professor of Obstetrics and Gynecology

Thomas W. Waddington, M.D. Saint Louis University, Health Sciences Clinical Professor of Medicine

Matthew Wade, M.D. George Washington University, Health Sciences Assistant Clinical Professor of Ophthalmology

Pathik Wadhwa, Ph.D. University of California, Irvine, Professor of Psychiatry and Human Behavior

Feizal Waffarn, MBBS University of Madras, Professor Emeritus of Pediatrics

Howard B. Waitzkin, Ph.D. Harvard University, Professor Emeritus of Medicine

Akio Wakabayashi, M.D. University of Tokyo, Professor Emeritus of Surgery

Roger Walsh, Ph.D. University of Queensland, Professor of Psychiatry and Human Behavior; Anthropology

Annabel Wang, M.D. McGill University, Health Sciences Associate Clinical Professor of Neurology

Ping H. Wang, M.D. Harvard University, Professor of Medicine; Physiology and Biophysics

Raymond Wang, M.D. University of California, Los Angeles, Health Sciences Clinical Professor of Pediatrics

Tommy Wang, M.D. Albany Medical College, Health Sciences Assistant Clinical Professor of Pediatrics

Kerry E. Wangen, M.D. University of Minnesota, Health Sciences Clinical Professor of Psychiatry and Human Behavior

James E. Ward, M.D. Loyola University Chicago, Health Sciences Assistant Clinical Professor of Medicine

Marian L. Waterman, Ph.D. University of California, San Diego, Professor of Microbiology and Molecular Genetics

David Webb, M.D. Tufts University, Health Sciences Clinical Professor of Medicine

Steven L. Wechsler, Ph.D. University of North Carolina at Chapel Hill, Professor of Ophthalmology

Elia Webbi, M.D. University of Toronto, Health Sciences Assistant Clinical Professor of Urology

Gerald Weinstein, M.D. University of Pennsylvania, Professor Emeritus of Dermatology

John H. Weiss, Ph.D. Stanford University, Professor of Neurology
Christopher H. Wen, M.D. Baylor College of Medicine, Health Sciences Associate Clinical Professor of Radiological Sciences
Li Wen, M.D. West China University of Medical Sciences, Health Sciences Clinical Professor of Medicine
Lari B. Wenzel, Ph.D. Arizona State University, Professor of Medicine; Program in Public Health
Dennis Whang, M.D. Northwestern University, Health Sciences Clinical Instructor of Medicine
Stephen H. White, Ph.D. University of Washington, Professor Emeritus of Physiology and Biophysics
Warren F. Wiechmann, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Emergency Medicine
Jamie Wikenheiser, Ph.D. Case Western Reserve University, Assistant Adjunct Professor of Anatomy and Neurobiology
Petra E. Wilder-Smith, Ph.D. University of Bern, Associate Professor in Residence of Surgery
James H. Williams, M.D. Harvard University, Health Sciences Professor of Medicine
Richard G. Williams, M.D. University of Pittsburgh, Health Sciences Clinical Professor of Radiation Oncology
Russell A. Williams, MBBS University of Sydney, Professor of Surgery
Archie F. Wilson, M.D. University of California, San Francisco, Professor Emeritus of Medicine
Samuel E. Wilson, M.D. Wayne State University, Professor of Surgery
William C. Wilson, M.D. Temple University, Health Sciences Professor of Anesthesiology and Perioperative Care
Deborah A. Wing, M.D. Tulane University, Professor in Residence of Obstetrics and Gynecology
Sara T. Winokur, Ph.D. University of California, Irvine, Project Scientist of Psychiatry and Human Behavior
Garrett A. Wirth, M.D. Albany Medical College, Health Sciences Associate Clinical Professor of Surgery
Michael Wolf, M.D. University of California, Los Angeles, Health Sciences Clinical Professor of Psychiatry and Human Behavior
Brian Wong, M.D. Johns Hopkins University, Professor of Otolaryngology; Biomedical Engineering (biomedical optics, tissue engineering, development of surgical instrumentation)
Edward K. Wong, M.D. University of Southern California, Professor Emeritus of Ophthalmology
Nathan D. Wong, Ph.D. Yale University, Adjunct Professor of Medicine; Epidemiology
Valerie L. Wright, Ph.D. Fuller Theological Seminary, Health Sciences Associate Clinical Professor of Family Medicine
Joseph C. Wu, M.D. University of California, Irvine, Associate Professor in Residence of Psychiatry and Human Behavior
Mark Li-Cheng Wu, M.D. University of Wisconsin-Madison, Associate Professor of Pathology and Laboratory Medicine
Sing-Yung Wu, M.D. Johns Hopkins University, Senate Emeritus of Radiological Sciences
Frederic A. Wyle, M.D. University of Pennsylvania, Senate Emeritus of Medicine
Danli L. Xing, M.D. Robert Wood Johnson Medical School, Health Sciences Clinical Instructor of Ophthalmology
Xiangmin Xu, Ph.D. Vanderbilt University, Assistant Professor of Anatomy and Neurobiology; Biomedical Engineering; Electrical Engineering and Computer Science; Microbiology and Molecular Genetics (local cortical circuits)
Aparche B. Yang, M.D. University of California, Irvine, Health Sciences Assistant Clinical Professor of Dermatology
Jing Yang, M.D., Assistant Professor in Residence of Ophthalmology
Qin Yang, M.D., Assistant Professor of Medicine; Physiology and Biophysics
Daniel S. Yanni, M.D. University of California, San Diego, Assistant Professor of Neurological Surgery
Leman Yel, M.D. Hacettepe University, Senate Emeritus of Medicine
Douglas B. Yim, M.D. University of Southern California, Health Sciences Associate Clinical Professor of Radiological Sciences; Surgery
Anatomy and Neurobiology

anatomy@uci.edu; http://www.anatomy.uci.edu/

Ivan Soltesz, Department Chair
Martin A. Smith, Department Vice Chair
David C. Lyon, Departmental Graduate Advisor

Research programs in the Department of Anatomy and Neurobiology in the School of Medicine focus on the neurosciences. Faculty interests range across all areas of basic and clinical research including cellular and molecular neurobiology, mechanisms of development, ion channel physiology, experimental neuroanatomy, structure and function of sensory and motor systems, response to injury and regeneration. The Department maintains facilities for electron microscopy, laser confocal microscopy, and computer-based imaging and informatics. Students performing graduate work in the Department are encouraged to become proficient in multiple areas of study using interdisciplinary techniques.

The Department offers graduate training under the auspices of the School of Medicine in conjunction with the Interdepartmental Neuroscience Program (INP). Students are eligible to enter the Department program after meeting the specific requirements of the INP gateway curriculum or by direct application to the Department. The Department program leads to the M.S. or Ph.D. degree in Biomedical Sciences, awarded after successful completion of all requirements.

In concert with other departments, a combined neuroscience core curriculum has been developed which includes offerings in systems neurobiology, neurophysiology, and cellular, molecular, and developmental neurobiology that may be taken as complete or partial fulfillment of the requirements of the INP. Students admitted into the INP who subsequently select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year. Students may take additional elective courses at their own option, but they are required to attend departmental seminars and participate in the Journal Club and an annual “Grad Day” symposium. The research topic for a student’s dissertation is chosen by the student in consultation with the research advisor. Students are expected to advance to candidacy by the end of the third year by
presenting and defending a proposal for their research dissertation. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Faculty

Tallie Z. Baram, M.D. University of Miami, Danette Dee Dee Shepard Chair in Neurological Studies and Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics

Robert H. Blanks, Ph.D. University of California, Los Angeles, Professor Emeritus of Anatomy and Neurobiology

Anne L. Calof, Ph.D. University of California, San Francisco, Professor of Anatomy and Neurobiology; Developmental and Cell Biology (neurogenesis and neuronal differentiation)

Steven C. Cramer, M.D. University of Southern California, Professor of Neurology; Anatomy and Neurobiology; Physical Medicine and Rehabilitation

Brian J. Cummings, Ph.D. University of California, Irvine, Associate Professor of Physical Medicine and Rehabilitation; Anatomy and Neurobiology

James H. Fallon, Ph.D. University of Illinois Medical Center, Professor Emeritus of Anatomy and Neurobiology

Mark J. Fisher, M.D. University of Cincinnati, Professor of Neurology; Anatomy and Neurobiology; Political Science

Christine M. Gall, Ph.D. University of California, Irvine, Professor of Anatomy and Neurobiology; Neurobiology and Behavior

Roland A. Giolli, Ph.D. University of California, Berkeley, Professor Emeritus of Anatomy and Neurobiology

Alan L. Goldin, M.D. University of Michigan, Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics

Frances L. Gonzalez, Ph.D. University of Aberdeen, Professor of Pharmacology; Anatomy and Neurobiology

Ranjan Gupta, M.D. Albany Medical College, Professor of Orthopaedic Surgery; Anatomy and Neurobiology; Biomedical Engineering (hand and upper extremity surgery)

Leif Havton, Ph.D. Umea University, Professor of Anesthesiology and Perioperative Care; Anatomy and Neurobiology; Neurology

Kwang M. Jung, Ph.D. Chung-Ang University, Assistant Adjunct Professor of Anatomy and Neurobiology

Hans Stegmann Keirstead, Ph.D. University of British Columbia, Professor of Anatomy and Neurobiology

Leonard M. Kitzes, Ph.D. University of California, Irvine, Professor Emeritus of Anatomy and Neurobiology

Gary S. Lynch, Ph.D. Princeton University, Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology; Cognitive Sciences

David Christian Lyon, Ph.D. Vanderbilt University, Assistant Professor of Anatomy and Neurobiology; Cognitive Sciences

Diane K. O’Dowd, Ph.D. University of California, San Diego, Professor of Developmental and Cell Biology; Anatomy and Neurobiology (regulation of activity in developing and adult nervous systems)

Daniele Piomelli, Ph.D. Columbia University, Louise Turner Arnold Chair in the Neurosciences and Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmacology

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, Professor of Anatomy and Neurobiology; Biomedical Engineering; Mechanical and Aerospace Engineering; Physical Medicine and Rehabilitation (robotics, mechatronics, biomedical engineering, rehabilitation, biomechanics, neural control of movement)

Charles E. Ribak, Ph.D. Boston University, Professor Emeritus of Anatomy and Neurobiology

Richard T. Robertson, Ph.D. University of California, Irvine, Professor of Anatomy and Neurobiology

Justin Schaefer, Ph.D. University of California, Irvine, Associate Adjunct Professor of Anatomy and Neurobiology

Steven S. Schreiber, M.D. Albany Medical College, Professor in Residence of Neurology; Anatomy and Neurobiology; Psychiatry and Human Behavior

Martin A. Smith, Ph.D. University of Newcastle, Professor of Anatomy and Neurobiology

Ana Solodkin, Ph.D. National Polytechnic Inst of Mexico, Associate Professor of Anatomy and Neurobiology

Ivan Soltesz, Ph.D. Eötvös Loránd University, UCI Chancellor's Professor of Anatomy and Neurobiology; Neurobiology and Behavior; Physiology and Biophysics
Oswald Steward, Ph.D. University of California, Irvine, Reeve-Irvine Chair in Spinal Cord Injury Research and Professor of Anatomy and Neurobiology; Neurobiology and Behavior

John E. Swett, Ph.D. University of California, Los Angeles, Professor Emeritus of Anatomy and Neurobiology

Jamie Wikenheiser, Ph.D. Case Western Reserve University, Assistant Adjunct Professor of Anatomy and Neurobiology

Xiangmin Xu, Ph.D. Vanderbilt University, Assistant Professor of Anatomy and Neurobiology; Biomedical Engineering; Electrical Engineering and Computer Science; Microbiology and Molecular Genetics (local cortical circuits)

Fan-Gang Zeng, Ph.D. Syracuse University, Director of Hearing Research and Professor of Otolaryngology; Anatomy and Neurobiology; Biomedical Engineering; Cognitive Sciences (cochlear implants and auditory neuroscience)

Courses

ANATOMY 200. Research in Anatomy. 2-12 Units.
Individual research supervised by a particular faculty member.

Repeatability: May be repeated for credit unlimited times.

ANATOMY 200R. Research in Anatomy and Neurobiology for First-Year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in the Department of Anatomy and Neurobiology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

ANATOMY 201. Human Gross Anatomy. 8 Units.
Study and dissection of the human body, including muscular, skeletal, nervous, and cardiovascular systems. Emphasis on both normal and abnormal structure and function.

Restriction: Graduate students only.

ANATOMY 202B. Human Neuroscience. 4 Units.
Study of the human nervous system at the systems level including the physiology and anatomy of sensory, motor, and integrative functions.

Prerequisite: ANATOMY 202A.

ANATOMY 203A. Human Microscopic Anatomy. 3 Units.
Lecture and laboratory course on human microscopic anatomy. Emphasis is on functional implications of structure of cells and tissues.

Restriction: Graduate students only.

ANATOMY 203B. Human Microscopic Anatomy. 3 Units.
Lecture and laboratory course on human microscopic anatomy. Emphasis is on functional implications of structure of cells and tissues.

Prerequisite: ANATOMY 203A.

Restriction: Graduate students only.

ANATOMY 206. Tutorial in Anatomy. 3 Units.
Series of tutorials on advanced topics in anatomy.

Repeatability: May be repeated for credit unlimited times.

ANATOMY 210A. Systems Neuroscience. 5 Units.
Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as NEURBIO 208A.

Restriction: Neurobiology and Behavior graduate students only.
ANATOMY 210B. Systems Neuroscience. 5 Units.
Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Prerequisite: NEURBIO 208A.

Repeatability: May be taken for credit 2 times.

Same as NEURBIO 208B.

Restriction: Neurobiology and Behavior graduate students only.

ANATOMY 215. Epilepsy as a Window to Mechanisms of Neuronal Plasticity. 4 Units.
Understanding the mechanisms of brain disorders provides novel insights into the normal function of neurons and circuits. Discusses approaches to studying mechanisms of brain function ranging from imaging, the use of models and others to study epilepsy.

Grading Option: Satisfactory/unsatisfactory only.

ANATOMY 227A. Current Topics in Neuroscience. 1-4 Units.
Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ANATOMY 227B. Current Topics in Neuroscience. 1-4 Units.
Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ANATOMY 227C. Current Topics in Neuroscience. 1-4 Units.
Focuses on critical reading, presentation, and discussion of current literature in neuroscience research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ANATOMY 230. Topics in Stem Cells. 2-4 Units.
One-hour seminar presentation by participating faculty or guest lecturer and open to the science community, followed by one-hour student discussion of the lecture topic or related topic. Students are responsible for presentations and readings for the course.

ANATOMY 230A. Molecular, Cellular, & Developmental Neurobiology. 4 Units.
Molecular aspects of the structure and function of neurons and glia including neurotransmission, synaptic modulation, and channels. Neural development at the cellular and molecular level including neurogenesis, pattern formation, trophic factors, axonal growth, and synaptic rearrangement.

Restriction: Graduate students only.

ANATOMY 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

ANATOMY 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

ANATOMY 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
Biological Chemistry

Building D, Room 240, Medical Sciences I; 949-824-6051
http://www.biochem.uci.edu/
Eva Y.-H. P. Lee, Department Chair
Kyoko Yokomori, Departmental Graduate Advisor

The Department of Biological Chemistry provides advanced training to individuals who are interested in understanding the fine regulation of the biological processes, structural basis of the regulation, and the identification of targets for disease managements. Faculty research interests are diverse with emphases on several areas of basic and clinical research: epigenetic regulation of gene expression; circadian rhythm and metabolism; chromatin structure and function; DNA repair and DNA damage responses; telomerase and telomere regulation; ubiquitin regulation in metabolism and cell cycle; signal transduction and transcription regulation in development and disease manifestation; molecular mechanisms of stem cell regulation and tumorigenesis; genomic and bioinformatics. Students are trained and exposed to technical expertise in all facets of current biological sciences. Established core research facilities are available in which students have access to a microarray core facility, electron microscopy, atomic force microscopy, confocal imaging center, mass spectroscopy, flow cytometry, transgenic core laboratories, biopolymer sequencing and synthesis laboratories, and other resources. The Department administers a graduate student and postdoctoral training grant on translational research in cancer genomics and medicine.

The Department offers graduate study under the auspices of the School of Medicine and in conjunction with the gateway program in Cellular and Molecular Biosciences (CMB) as well as the Mathematical and Computational Biology (MCB). Students are eligible to enter the Department program after meeting the specific requirements of the CMB gateway curriculum or by direct application to the department. The Department program leads to the M.S. or Ph.D. degree in Biomedical Sciences, awarded after successful completion of all requirements. Students admitted into the combined program who select a research advisor in the Department begin thesis research in the second year. Students are required to attend and participate in the departmental research seminars. In addition, students are required to complete two advanced-level graduate courses subsequent to entering the Department’s Ph.D. concentration. In the third year, students take the advancement-to-candidacy examination for the Ph.D. degree by presenting and defending a proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Faculty

Bogi Andersen, M.D. University of Iceland, Professor of Medicine; Biological Chemistry
Stuart M. Arfin, Ph.D. Albert Einstein College of Medicine, Professor Emeritus of Biological Chemistry
Pierre F. Baldi, Ph.D. California Institute of Technology, UCI Chancellor's Professor of Computer Science; Biological Chemistry; Biomedical Engineering; Developmental and Cell Biology (bioinformatics, computational biology)
Phang-Lang Chen, Ph.D. University of California, San Diego, Associate Professor of Biological Chemistry
Xing Dai, Ph.D. University of Chicago, Professor of Biological Chemistry
Peter J. Donovan, Ph.D. University College London, Professor of Biological Chemistry; Developmental and Cell Biology (stem cell biology)
John P. Fruehauf, M.D. Rush University, Professor of Medicine; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences (in-vitro cancer models using 3-D tissue systems to predict drug response)
Anand K. Ganesan, M.D. Medical College of Wisconsin, Associate Professor of Dermatology; Biological Chemistry
Lan Huang, Ph.D. University of Florida, Professor of Physiology and Biophysics; Biological Chemistry
Kenneth H. Ibsen, Ph.D. University of California, Los Angeles, Professor Emeritus of Biological Chemistry
Peter Kaiser, Ph.D. University of Innsbruck, Professor of Biological Chemistry
Eva Y. Lee, Ph.D. University of California, Berkeley, UCI Chancellor's Professor of Biological Chemistry
Wen-Hwa Lee, Ph.D. University of California, Berkeley, Donald Bren Professor Emeritus of Biological Chemistry
Ellis Levin, M.D. Thomas Jefferson University, Jefferson Medical College, Professor in Residence of Medicine; Biological Chemistry; Pharmacology
Haoping Liu, Ph.D. Cornell University, Professor of Biological Chemistry
Calvin S. McLaughlin, Ph.D. Massachusetts Institute of Technology, Professor Emeritus of Biological Chemistry
Frank L. Meyskens, M.D. University of California, San Francisco, Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Epidemiology; Program in Public Health
Robert K. Moyzis, Ph.D. Johns Hopkins University, Professor Emeritus of Biological Chemistry

Daniele Piomelli, Ph.D. Columbia University, Louise Turner Arnold Chair in the Neurosciences and Professor of Anatomy and Neurobiology; Biological Chemistry; Pharmacology

Feng Qiao, Ph.D. University of California, Los Angeles, Assistant Professor of Biological Chemistry

Suzanne B. Sandmeyer, Ph.D. University of Washington, Grace Beekhuis Bell Chair in Biological Chemistry and Professor of Biological Chemistry; Chemical Engineering and Materials Science; Microbiology and Molecular Genetics (retroelements, metabolic molding, genomics)

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, Donald Bren Professor and Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences

Robert E. Steele, Ph.D. Yale University, Professor of Biological Chemistry

Leslie M. Thompson, Ph.D. University of California, Irvine, Professor of Psychiatry and Human Behavior; Biological Chemistry; Neurobiology and Behavior

Kyoko Yokomori, Ph.D. University of Tokyo, Professor of Biological Chemistry; Biological Chemistry

Michael V. Zaragoza, M.D. Case Western Reserve University, Assistant Professor of Pediatrics; Biological Chemistry

Courses

**BIOCHEM 200A. Research in Biological Chemistry. 2-12 Units.**
Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200B. Research in Biological Chemistry. 2-12 Units.**
Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200C. Research in Biological Chemistry. 2-12 Units.**
Individual research under the supervision of a professor.

Repeatability: Unlimited as topics vary.

**BIOCHEM 200R. Research in Biological Chemistry for First-Year Students. 2-12 Units.**
Independent research within the laboratories of graduate training faculty in the Department of Biological Chemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**BIOCHEM 202A. Laboratory Seminar Series. 1 Unit.**
Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 202B. Laboratory Seminar Series. 1 Unit.**
Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

**BIOCHEM 202C. Laboratory Seminar Series. 1 Unit.**
Study within a laboratory group including research and journal presentations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.
BIOCHEM 207. Advanced Molecular Genetics. 4 Units.
Teaching genetics and genomics approaches in yeast. Covers cell-type determination, MAPK signaling, cell cycle, ubiquitin, genomics, transposons.
Repeatability: May be taken for credit 2 times.

BIOCHEM 210A. Medical Biochemistry and Molecular Biology. 12 Units.
Covers the following topics from a biomedical perspective: protein and nucleic acid biochemistry, carbohydrates, lipids, amino acids, purines and pyrimidines, genome structure, molecular mechanisms of development, and signal transduction.
Restriction: Graduate students only.

BIOCHEM 212. Signal Transduction and Growth Control. 4 Units.
Covers various eukaryotic signaling pathways (tyrosine kinase, ras-raf-MAPK, TGF-β, wnt, JAK-STAT, and FAS) with an emphasis on the experimental underpinnings. The material is covered in lectures and discussions of pertinent papers.
Same as PATH 212.

BIOCHEM 215. Mouse Developmental Genetics. 4 Units.
Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.
Same as DEV BIO 207.
Restriction: Graduate students only.

BIOCHEM 217. Human Evolution and Behavior. 4 Units.
Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).
Same as PSY BEH P271.
Restriction: Graduate students only.

BIOCHEM 225. Chromatin Structure and Function. 4 Units.
Focuses on the role of chromatin/nuclear structure organization in eukaryotic genome regulation. The effects of histone and DNA modification, chromatin remodeling, higher order chromatin structure and nuclear organization on gene regulation, DNA replication, and repair are discussed.
Prerequisite: MOL BIO 203 or MOL BIO 204 or NEUROBIO 206.
Same as NEURBIO 230.
Restriction: Graduate students only.

BIOCHEM 240. New Breakthroughs in Basic and Translational Cancer Research. 4 Units.
Highlights breakthroughs in molecular and cellular aspects of cancer biology and emerging therapeutic approaches. Emphasis on new discoveries of critical pathways/processes in cancer etiology, progression, and metastasis. Introduces strategies used in the discovery, design of biological and small molecules-based therapies.
Restriction: Graduate students only.

BIOCHEM 291. Research Seminar. 2 Units.
Student research-based colloquium covering current topics in gene organization and expression, cell cycle and differentiation, DNA repair, checkpoint control, and the physical, chemical, and biological properties of macromolecules. Students are encouraged to read critically and analyze recent literature.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

BIOCHEM 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
BIOCHEM 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

BIOCHEM 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

BIOCHEM 299. Independent Study. 2-12 Units.
Independent research in biological chemistry.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Open only to students pursuing the Ph.D. degree in the Department of Biological Chemistry.

Biomedical and Translational Science

Master of Science in Biomedical and Translational Science (M.S.-BATS)

School of Medicine, 100 Theory Street, Suite 110
949-824-6064; fjeffrey@uci.edu
Sherri H. Kaplan, Director

The aim of the M.S.-BATS program is to train students in the conduct of high-quality multidisciplinary clinical research to facilitate the rapid transformation of basic knowledge to clinical medicine. The program is designed for students from varying levels of training, including medical students, residents, fellows, physicians, and others who are interested in conducting clinical research to maximize interdisciplinary communication and understanding sufficient to carry out high-quality clinical research. The program provides training in core competencies required to conduct clinical research including study design reflecting the breadth and complexity of clinical research applications, critical appraisal of multidisciplinary research literature, conduct and management of clinical research, medical statistics, research ethics, and the leadership of multidisciplinary research teams. Students who successfully complete the program receive the M.S. degree in Biomedical and Translational Science.

The faculty evaluate applicants to the program on the basis of grades, previous course work, letters of recommendation, MCAT or GRE scores, and other relevant qualifications. All graduate students, including those from public health, nursing science, and pharmaceutical science are eligible to apply, but the program has a highly clinical focus and is specifically designed for those with a sufficient background in clinical sciences. Applicants should have successfully completed a B.S. degree or equivalent, and may be current medical students, residents, clinical fellows, faculty, or licensed physicians in the community.

The M.S.-BATS program will initially offer training in Evidence-Based Medicine/Clinical Research, which will focus on the conduct and interpretation of clinical research, synthesis of clinical literature, and the assessment and improvement of quality of healthcare. Additional fields of emphasis will be added, including Molecular Medicine, focusing on the molecular mechanisms and molecular physiology of human disease, and Population Medicine, focusing on the application of epidemiologic research and research methods and findings to clinical practice.

The M.S.-BATS program is a two-year curriculum. First-year students are required to enroll in core courses including Introduction to Clinical Epidemiology, Introduction to Medical Statistics, Design and Analysis of Clinical Trials, and Ethics in Clinical Research. Additional required courses include, Comparative Effectiveness Research, Health Politics and Policy, Measurement Science, Outcomes Research and Advanced Applied Methods, and Disparities in Health and Health Care. Optional additional courses include, Introduction to Medical Statistics II, Laboratory in Big Data Analysis for Health Services and Clinical Researchers (formerly known as Quantitative Data Analysis Methods); and Research in Quality and Safety (formerly known as Quality, Efficiency, and Cost-effectiveness). Training during the second year emphasizes research and culminates in a written thesis. Throughout the program, students enroll in the BATS Seminar Series. By exception only, some students entering the program with advanced degrees, clinical research experience, and previous completion of the four core courses may be able to complete the program in less than two years.

Courses

BATS 209A. Introduction to Medical Statistics. 4 Units.
Provides understanding of medical statistics for clinicians and clinical researchers to read and interpret literature.
BATS 209B. Introduction to Medical Statistics II. 4 Units.
Provides sufficient understanding of medical statistics to read and interpret medical literature critically, identify appropriate statistics for basic research designs used in medicine, and discriminate between appropriate and inappropriate statistical applications for common research designs.
Prerequisite: BATS 209A.

BATS 210A. Introduction to Clinical Epidemiology. 4 Units.
Introduces principles and practice of clinical epidemiology and the population-based approach to health and disease.
Prerequisite: BATS 209A or STATS 250.

BATS 232. Design and Analysis of Clinical Trials. 4 Units.
Presents history, organization and planning, rationale for methods, limits, and ethics in conducting clinical trials.
Prerequisite: BATS 209A or STATS 250.

BATS 245A. Comparative Effectiveness Research I. 4 Units.
Two-part course designed to provide a comprehensive overview of comparative effectiveness research (CER) with in-depth methodologic clinical practice and policy/dissemination issues related to the conduct, interpretation, and clinical applications of CER.
Prerequisite: BATS 245A.

BATS 245B. Comparative Effectiveness Research II. 4 Units.
Two-part course designed to provide a comprehensive overview of comparative effectiveness research (CER) with in-depth methodologic clinical practice and policy/dissemination issues related to the conduct, interpretation, and clinical applications of CER.
Prerequisite: BATS 245A.

BATS 247. Measurement Science, Outcomes Research and Advanced Applied Methods. 4 Units.
Further the understanding of methodologic issues involved in the conduct of comparative effectiveness research (CER). Topics: risk adjustment, balancing observational study designs, use of outcomes from multiple data sources, innovations clinical trial designs, the conduct of meta-analysis, and psychometric methods.

BATS 251. Research in Quality and Safety. 4 Units.
Introduces the principles and practice of quality of care, patient safety and patient experience research, along with major national and statewide policy and legislative initiatives related to quality of care and patient safety.

BATS 253. Disparities in Health and Health Care. 4 Units.
Review all aspects of culture that influence health status, development of public health policy, and management and practice of health care. Explores how race and ethnicity affect health and health care, including health care services and policies governing these services.

BATS 255. Health Politics and Policy. 4 Units.
Offers political and analytical insights into understanding the U.S. health policymaking and developing strategies that influence health policy outcomes.

BATS 257. Laboratory in Big Data Analysis for Health Services and Clinical Researchers. 4 Units.
Introduces quantitative research methods, with an emphasis on large surveys and administrative health data sets. Presents the advantages and disadvantages of these data sources and the iterative process of formulating research questions and identifying data sources to answer these questions.
Prerequisite: BATS 209A.
Restriction: Biomedical and Translational Science graduate students only.

BATS 280. Biomedical and Translational Science Seminar. 2 Units.
Students present their current research or a topic of interest and are exposed to diverse projects in the biomedical and translational science arena.
Repeatability: May be repeated for credit unlimited times.

BATS 295. Master’s Thesis Research and Writing. 2-12 Units.
Master’s thesis research and writing with Biomedical and Translational Science faculty.
Repeatability: May be repeated for credit unlimited times.

BATS 296. Ethics in Clinical Research. 4 Units.
Covers major frameworks and concepts of ethics in public health research as well as human subject protection issues.

BATS 299. Independent Directed Research. 2-12 Units.
Independent research with Biomedical and Translational Science faculty.
Repeatability: May be repeated for credit unlimited times.
# Environmental Health Sciences

Center for Occupational and Environmental Health (COEH)  
100 Theory Drive, Suite 100, Irvine, CA 92617; 949-824-9013  
http://www.medicine.uci.edu/occupational/graduate.asp  
Alpesh Amin, Chair, Department of Medicine  
Ulrike Luderer, Graduate Program Director

The Division of Occupational and Environmental Medicine in the Department of Medicine provides graduate training in environmental health sciences and offers the M.S. and Ph.D. degrees in Environmental Health Sciences. The Environmental Health Sciences program is also an official graduate program of the Program in Public Health. The Ph.D. program offers tracks in Environmental Toxicology and in Exposure Sciences and Risk Assessment. The program in Environmental Health Sciences provides students with the knowledge and skills necessary and appropriate to teach and/or conduct basic and applied research programs in inhalation/pulmonary toxicology, biochemical neurotoxicology, reproductive and developmental toxicology, chemical pathology, toxicokinetics, radiation toxicology, exposure sciences, and risk assessment.

Environmental Toxicology involves the scientific study of the entry, distribution, biotransformation and mechanism of the action of chemical agents that are harmful to the body. The graduate program interprets environmental toxicology as the study of the effects and mechanisms of action of hazardous chemicals in food, air, water, and soil in the home, the workplace and the community. It considers experimentally and theoretically such diverse research problems as:

- new scientific approaches to toxicological evaluation of environmental chemicals such as air and water pollutants, food additives, industrial wastes, and agricultural adjuvants at the molecular, cellular, and organism levels;
- mechanisms of action in chemical toxicity;
- the molecular pathology of tissue injury in acute and chronic toxicity.

Exposure Sciences involves the study of human exposures to environmental contaminants in different media such as air, water, and food and via multiple routes including inhalation, ingestion, and dermal absorption. Risk Assessment combines knowledge obtained from toxicological and exposure studies to come to conclusions about the risks to human health. Research in the Exposure Sciences and Risk Assessment Track includes:

- new approaches to the evaluation of human exposures to environmental chemicals, including exposure modeling and biomonitoring;
- scientific principles involved in evaluating risks to human health from environmental exposures.

Students entering the program have varied backgrounds, including chemistry, biology, and physiology. The curriculum is based on a foundation of basic and health sciences with applications of scientific principles to environmental exposures and their potential health effects. Formal course work is enriched by a strong commitment to student-professor interaction throughout the program. An important and integral part of the learning process is an early and intensive involvement of the student in ongoing original research projects in environmental health sciences, especially inhalation/pulmonary toxicology, reproductive and developmental toxicology, biochemical toxicology, chemical pathology, neurotoxicology, exposure sciences, and risk assessment.

In addition to meeting the general admission requirements set by the Graduate Division, applicants must be admitted by an Admissions Committee composed of faculty members of the program. Candidates are selected on the basis of a balanced evaluation of the following criteria: (1) prior scholastic performance, including a consideration of grade point average, course load, nature of courses taken, and college attended; (2) recommendations by professors and others; (3) scores on the Graduate Record Examination; the Subject Test in either Biology or Chemistry is strongly recommended; (4) an interview by the Admissions Committee, when feasible; and (5) experience in undergraduate research. The applicant must have received a bachelor’s degree in a biological, public health, or physical science, in a premedical curriculum, or have an acceptable equivalent. Applicants with a bachelor’s degree in engineering may qualify for admission into the program if they have had sufficient training in biology, chemistry, and physical sciences.

Undergraduate preparation of applicants should include six quarter units in general biology, zoology, bacteriology, or anatomy; 12 quarter units in mathematics, including calculus through vector analysis and differential equations; 12 quarter units of chemistry, including four quarter units of organic chemistry; 12 quarter units of physics; and four quarter units in molecular biology or biochemistry. Outstanding applicants who lack one or two of these prerequisites may be given an opportunity to take the required course(s) either before admission or during the first year in the graduate program; in such circumstances, none of these undergraduate courses may be used to satisfy the program elective or core course requirements. Upper-division or graduate science courses may be considered as substitutes for the above prerequisites by the Admissions Committee.

## Doctor of Philosophy in Environmental Health Sciences

All courses must be passed with an average grade of B or better.

### Core Curriculum

A. Complete the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPIDEM 200</td>
<td>Principles of Epidemiology</td>
</tr>
<tr>
<td>TOX 206A</td>
<td>Target Organ Toxicology I</td>
</tr>
<tr>
<td>TOX 206B</td>
<td>Target Organ Toxicology II</td>
</tr>
</tbody>
</table>
TOX 264  Introduction to Environmental Health Science
TOX 298A  Seminar in Toxicology
TOX 298B  Seminar in Toxicology
TOX 298C  Seminar in Toxicology

B. Select one track:

1. Environmental Toxicology Track (complete the following):
   
   EPIDEM 204  Biostatistics
   or PUBHLTH 207  Public Health Statistics
   or STATS 201  Statistical Methods for Data Analysis I
   TOX 201  Principles of Toxicology
   TOX 207  Experimental Design and Interpretation of Toxicology Studies

   16 units from the approved elective pool.

2. Exposure Sciences and Risk Assessment Track (complete the following):
   
   PUBHLTH 283  Geographical Information Systems for Public Health
   STATS 201  Statistical Methods for Data Analysis I
   STATS 202  Statistical Methods for Data Analysis II
   STATS 203  Statistical Methods for Data Analysis III
   TOX 275  Environmental Modeling and Risk Management

   8 units from the approved elective pool.

Approved elective pool for both tracks:

- ANATOMY 203A  Human Microscopic Anatomy
- ANATOMY 203B  Human Microscopic Anatomy
- DEV BIO 231B  Cell Biology
- EPIDEM 205  Environmental Epidemiology
- MOL BIO 203  Nucleic Acid Structure and Function
- MOL BIO 204  Protein Structure and Function
- PHYSIO 206A  Introduction to Medical Physiology
- PHYSIO 206B  Introduction to Medical Physiology
- PUBHLTH 265  Advanced Environmental Health Science
- PUBHLTH 276  Toxic Chemicals in Environment
- TOX 202  Environmental Toxicology
- TOX 204  Neurotoxicology
- TOX 212  Inhalation Toxicology
- TOX 220  Industrial Toxicology
- TOX 269  Air Pollution, Climate, and Health
- TOX 270  Human Exposure to Environmental Contaminants

C. Fulfill the following:

- Comprehensive Exam
- Qualifying Exam
- Teaching Requirement
- Research Dissertation

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

**Master of Science in Environmental Health Sciences**

All courses must be passed with an average grade of B or better.

A. Complete the following:

- EPIDEM 200  Principles of Epidemiology
- EPIDEM 204  Biostatistics
- PUBHLTH 207  Public Health Statistics
- STATS 201  Statistical Methods for Data Analysis I
Eight units from the approved elective pool.

C. Complete one of the following plans:

Plan I:
Under the direction of a faculty advisor, prepare a thesis that is acceptable to the thesis committee

Plan II:
1. Under the supervision of a faculty member, prepare a scholarly paper based on individual study in an area of toxicology
2. Pass the written comprehensive examination.

Opportunities for individual training and independent research experience exist in inhalation and pulmonary toxicology, atmospheric chemistry and aerosol science, neurochemistry and neurotoxicology, reproductive and developmental toxicology, toxicology of naturally occurring compounds, exposure modeling, risk assessment, chemical pathology, environmental microbiology, and environmental chemistry. Research grants and contracts are available to support qualified doctoral students as research assistants.

Faculty

Dean B. Baker, M.D. University of California, San Diego, Professor of Medicine; Environmental Health Sciences; Program in Public Health

Scott Bartell, Ph.D. University of California, Davis, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology; Social Ecology; Statistics

Bruce Blumberg, Ph.D. University of California, Los Angeles, Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Stephen C. Bondy, Ph.D. University of Birmingham, Professor of Medicine; Environmental Health Sciences; Pharmacology; Program in Public Health

Vincent J. Caiozzo, Ph.D. University of California, Irvine, Professor in Residence of Orthopaedic Surgery; Environmental Health Sciences; Physiology and Biophysics

Jefferson Chan, Ph.D. University of California, San Francisco, Associate Professor of Pathology and Laboratory Medicine; Environmental Health Sciences

Ralph J. Delfino, M.D., Ph.D. McGill University, Professor in Residence of Epidemiology; Environmental Health Sciences

Derek Dunn-Rankin, Ph.D. University of California, Berkeley, Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering; Environmental Health Sciences (combustion, optical particle sizing, particle aero-dynamics, laser diagnostics and spectroscopy)

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology

C. Sunny Jiang, Ph.D. University of South Florida, Professor of Civil and Environmental Engineering; Environmental Health Sciences (water pollution microbiology, environmental biotechnology, aquatic microbial ecology)

Virginia Kimonis, M.D. University of Southampton, Professor of Pediatrics; Environmental Health Sciences

Michael T. Kleinman, Ph.D. New York University, Adjunct Professor of Community & Environ Medicine; Environmental Health Sciences; Program in Public Health

Charles E. Lambert, Ph.D. University of California, Irvine, Assistant Adjunct Professor of Environmental Health Sciences

Charles L. Limoli, Ph.D. University of California, San Diego, Professor of Radiation Oncology; Environmental Health Sciences

Ulrike Luderer, M.D., Ph.D. Northwestern University, Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health (reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity, ovarian cancer)

Oladele A. Ogunseitan, Ph.D. University of Tennessee, Professor of Program in Public Health; Environmental Health Sciences
Overview

The Department of Epidemiology faculty researches the genetic and environmental factors affecting the distribution of health and illness in large human populations. This serves as a cornerstone of the graduate program and the medical research program by utilizing highly evidence-based biostatistical methodologies to determine the risk factors leading to disease and optimal treatment approaches for clinical practice and medical interventions essential to preventative medicine and public health. In addition to the medical sciences, the epidemiology faculty has diverse research interests and relies on a number of other basic science disciplines including biological sciences (to understand the disease process), biostatistics (to evaluate large population data and develop research methods), geographic information science (to map disease patterns), and social science (to understand proximate and distal risk factors). The Department maintains facilities for research that include genetic, molecular, and biochemical techniques. The faculty in the Department of Epidemiology has strong, peer-reviewed research portfolios and resources needed to support the Department’s postdoctoral and doctoral training programs.

The Department offers a program of study leading to the M.S. and Ph.D. degrees, but not an undergraduate degree. The Department offers undergraduates the opportunity to gain research experience in epidemiology through the Department’s 199 undergraduate research course in epidemiology. This course is available to all upper-division undergraduates irrespective of the individual major they have declared on campus.

Master of Science in Epidemiology

The M.S. degree in Epidemiology requires the student to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional 8 units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a dissertation to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S. degree.

Doctor of Philosophy in Epidemiology

At the end of the first year, students must demonstrate proficiency by passing a preliminary qualifying exam. The purpose of this exam is to verify that the student has completed the required courses of the first-year of the program. The goals of these first-year courses are to establish a foundation of knowledge in the relevant disciplines, to acquire an understanding of research methods including the responsible conduct of research, and to sharpen critical thinking abilities so that students are ready to begin thesis research in which they will take major responsibility for the design, conduct, and publication of Ph.D.-level research projects.

Students must have selected a thesis advisor and joined the advisor’s research group by the end of the third quarter of the first year.

Advancement to Candidacy. Following successful completion of the second year of graduate study, the next step in progression toward the doctoral degree is Advancement to Candidacy. The purpose of this process is to ensure that the student has selected an appropriate topic for the dissertation and that the experimental work that has been completed or is contemplated is scientifically rigorous and likely to be completed successfully and within the normal period of graduate study. The advancement to candidacy exam must be taken by the end of the spring quarter of the third year of graduate study.

Once this examination is completed, the student is advanced to candidacy for the doctoral degree and is expected to complete the degree within two to three years. The student must submit a dissertation on this research and defend the thesis in an oral examination during the final year of graduate study. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.
Students who are interested in these graduate degrees in Epidemiology should apply to the Department of Epidemiology in the School of Medicine. Applications are available at the Graduate Division (http://www.grad.uci.edu) website. For further questions contact EpiGrad@uci.edu or call (949) 824-7401.

The Department of Epidemiology in the School of Medicine also has a joint doctoral program with the School of Social Ecology leading to a Ph.D. in Social Ecology with a concentration in Epidemiology and Public Health. That program is designed to prepare students to conduct research on questions in epidemiology and public health and on related questions on the formulation of environment and health policy. Students interested in that program should contact the School of Social Ecology for information.

Faculty

Hoda Anton-Culver, Ph.D. University of St Andrews, Professor of Epidemiology

Scott Bartell, Ph.D. University of California, Davis, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology; Social Ecology; Statistics

Maria A. Corrada-Bravo, SCE Johns Hopkins University, Associate Adjunct Professor of Neurology; Epidemiology

Dwight Culver, M.D. Stanford University, Health Sciences Clinical Professor of Epidemiology

Ralph J. Delfino, M.D., Ph.D. McGill University, Professor in Residence of Epidemiology; Environmental Health Sciences

Karen L. Edwards, Ph.D. University of Washington, Professor of Epidemiology; Genetic Epidemiology Research Institute

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology

Chad P. Garner, Ph.D. Oxford University, Associate Professor of Epidemiology; Program in Public Health

Daniel L. Gillen, Ph.D. University of Washington, Associate Professor of Statistics; Epidemiology; Program in Public Health

Karen L. Edwards, Ph.D. University of Washington, Professor of Epidemiology; Genetic Epidemiology Research Institute

Claudia H. Kawas, M.D. University of Louisville, Nichols Term Chair in Neuroscience and Professor of Neurology; Epidemiology; Neurobiology and Behavior

Christine E. McLaren, Ph.D. Case Western Reserve University, Professor of Epidemiology

Frank L. Meyskens, M.D. University of California, San Francisco, Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Epidemiology; Program in Public Health

Hannah Park, Ph.D. Stanford University, Assistant Professor in Residence of Epidemiology

David Stokols, Ph.D. University of North Carolina at Wilmington, Professor Emeritus of Psychology and Social Behavior; Epidemiology; Planning, Policy, and Design; Program in Public Health (environmental psychology, science of team science, transdisciplinary public health)

David Timberlake, Ph.D. University of California, San Diego, Associate Professor of Program in Public Health; Epidemiology

Nathan D. Wong, Ph.D. Yale University, Adjunct Professor of Medicine; Epidemiology

Argyrios Ziogas, Ph.D. University of Southern California, Associate Adjunct Professor of Epidemiology

Courses

EPIDEM 199. Undergraduate Research in Epidemiology. 2-4 Units.
Provides disciplinary research participation. Original or existing research options provide undergraduates the opportunity for faculty/mentor interactions including access to appropriate facilities. Medical Epidemiology research areas: Cancer, Genetic/Molecular, Environmental, Occupational, Biostatistics, and Infectious Disease.

Repeatability: Unlimited as topics vary.

Restriction: Upper-division students only.
EPIDEM 200. Principles of Epidemiology. 4 Units.
Fundamental principles of epidemiology, biostatistics, and epidemiological research. Topics include research methods of measuring health problems in populations, disease control and prevention in populations, how epidemiology contributes to knowledge of disease etiology, and biostatistical analysis and interpretation of epidemiologic data.

Restriction: Graduate students only.

EPIDEM 202. Genetic Epidemiology. 4 Units.
Concentrates on the role of genetic factors in the etiology of disease in human populations with an objective of disease control and prevention and the role of interactions of genetic factors and environmental exposures in the occurrence of disease.

Prerequisite: PUBHLTH 203 or EPIDEM 203 or PUBHLTH 206.

Restriction: Graduate students only.

EPIDEM 203. Epidemiology. 4 Units.
Presents descriptive and experimental approaches to the recognition of the causal association of disease in the general population, as these approaches apply to populations using different student designs and models free from the literature.

Same as PUBHLTH 203.

Restriction: Graduate students only.

EPIDEM 204. Biostatistics. 4 Units.
Designed to help students develop an appreciation for statistician's view of the research process, emphasizing biomedical research. Instills an understanding of how statistical models are used to yield insights about data that form evidence-based understanding of the world around us.

Same as PUBHLTH 204.

Restriction: Graduate students only.

EPIDEM 205. Environmental Epidemiology. 4 Units.
Concentrates on epidemiological approaches to the assessment of community environmental hazards; issues involved in environmental exposure estimation; interdisciplinary approaches to environmental epidemiology, including the use of biomarkers of exposures and susceptibility; epidemiological studies within the context of risk assessment.

Prerequisite: EPIDEM 200 and EPIDEM 204.

Restriction: Graduate students only.

EPIDEM 215. Introduction to Statistical Genetics. 4 Units.
Provides students with knowledge of the basic principles, concepts, and methods used in statistical genetic research. Topics include principles of population genetics, and statistical methods for family- and population-based studies.

Prerequisite: Two quarters of upper-division or graduate training in statistical methods.

Same as STATS 257.

EPIDEM 217. Advanced Epidemiologic Methods. 4 Units.
Advanced topics in the design and statistical analysis of epidemiologic studies. Topics include simulation methods, counter-matching and multiphase study designs, missing data, and Bayesian analysis. Published simulation studies are discussed and replicated using the R software package.

Prerequisite: PUBHLTH 101B or STATS 111 or STATS 211.

Same as PUBHLTH 205.

Concurrent with PUBHLTH 119.

EPIDEM 232. Chronic Disease Epidemiology & Prevention. 4 Units.
Epidemiological aspects of chronic human diseases. Topics include methodologies for quantifying aspects of prevalent chronic diseases including risk factors, identification of susceptible groups, societal burdens, promising future research; and the intervention, prevention, and control of diseases in populations.

Restriction: Graduate students only.
EPIDEM 244. Toxic Chemicals in Environment. 4 Units.
Industrial ecology of toxicants and their impacts on environmental quality and human health. Explores theoretical basis of toxicity thresholds and regulatory issues. Uses classic and contemporary research articles to understand the legacy of traditional toxicants, and to identify emerging threats.
Restriction: Graduate students only.

EPIDEM 264. Introduction to Environmental Health Science. 4 Units.
Convergence of agents (chemical, physical, biological or psychosocial) in environment can emerge as diseases influenced by social, political, and economic factors allowing them to become rooted in society. How these agents from various spheres come together and impact human health.
Same as PUBHLTH 264, TOX 264.
Restriction: Graduate students only.

EPIDEM 265. Advanced Environmental Health Science. 4 Units.
Explores the complex relationships among exposure processes and adverse health effects of environmental toxins focusing on specific chemicals, sources, transport media, exposure pathways, and human behaviors. Techniques of environmental sampling for exposure assessment are discussed.
Same as PUBHLTH 265.
Restriction: Graduate students only.

EPIDEM 269. Air Pollution, Climate, and Health. 4 Units.
Emission of air pollutants into the atmosphere, physical and meteorological processes that affect transport, and influence on global warming. Concepts of how and where people are most exposed, and how exposures and health effects differ in developed and developing regions.
Same as TOX 269, PUBHLTH 269.

EPIDEM 270. Human Exposure to Environmental Contaminants. 4 Units.
Introduces founders of conceptual thought that environmental contaminants can impact health. Theory and principles of exposure assessment, the continuum from emissions of a contaminant into the environment to evidence of health effects in a population.
Same as TOX 270, PUBHLTH 270.

EPIDEM 275. Special Topics in Epidemiology. 1-4 Units.
Presents various topics and latest research in the broad field of epidemiology.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

EPIDEM 290. Introduction to Biostatistics and Epidemiology for Medical Fellows. 4 Units.
Prepares medical fellows and other physicians for rotations in research programs. Understanding of basic biostatistics and study design, and interdependencies between the two. Application of principles in evaluation of medical literature for guidance on patient care and public health policy.
Prerequisite: Medical degree.

EPIDEM 296. M.S. Thesis Research and Writing. 1-12 Units.
Individual research and study necessary for a graduate student to prepare and complete the thesis required for the Master of Science (M.S.) degree.
Prerequisite: Advancement to candidacy.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

EPIDEM 297. PhD Degree Dissertation Research & Writing. 1-12 Units.
Individual research and study necessary for a graduate student to prepare and complete the dissertation required for the Doctor of Philosophy (Ph.D.) degree.
Prerequisite: Advancement to candidacy.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
EPIDEM 298. Directed Study in Epidemiology. 2-4 Units.
Directed study with Epidemiology faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

EPIDEM 299. Independent Study in Epidemiology. 2-8 Units.
Independent research with Epidemiology faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

EPIDEM 399. University Supervised Teaching. 2-4 Units.
Limited to students with active Teaching Assistant (T.A.) appointments.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Experimental Pathology

Building D, Room D440, Medical Sciences I; 949-824-5367
http://www.pathology.uci.edu/

Edwin S. Monuki, Acting Department Chair and Graduate Program Director

The Department of Pathology and Laboratory Medicine offers a Ph.D. in Biomedical Sciences with a concentration in Experimental Pathology. The graduate program emphasizes experimental approaches to better understand the molecular and cellular mechanisms of disease, particularly human disease. Students work in laboratories studying topics ranging from infectious processes such as malaria and the acquired immune deficiency syndrome to innate immunity. The principal areas of research investigated by faculty in the Experimental Pathology concentration range from developmental neurobiology, to microbial genomics, to cellular stress response, to cancer.

The Department offers graduate study under the auspices of the School of Medicine and in conjunction with the program in Cellular and Molecular Biosciences (CMB), which is described in the Francisco J. Ayala School of Biological Sciences (p. 289) section. Students are eligible to enter the Department program after meeting the specific requirements of the CMB gateway curriculum or by direct application to the Department. The Department program leads to the M.S. or Ph.D. degree in Biomedical Sciences, awarded after successful completion of all requirements. Students admitted into the program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the start of their second year.

Experimental Pathology makes extensive use of both animal models of human disease and studies on human tissues from human subjects. Therefore, the curriculum is heavily weighted on experimental models, including animal models, of human disease. The didactic teaching components of the track are supplemented by a Pathology research conference, in which faculty, postdoctoral fellows, and graduate students present seminars or "research in progress" (RIP) talks. This seminar series allows trainees the opportunity to gain invaluable experience in presenting their research to other scientists and provides a mentoring process through which students gain insights from diverse scientific viewpoints.

Students should advance to candidacy by the end of their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Faculty

Dylan M. Bach, M.D. University of California, San Diego, Health Sciences Assistant Clinical Professor of Pathology and Laboratory Medicine

Philip M. Carpenter, M.D. Southwestern Medical School, Professor of Pathology and Laboratory Medicine

Jefferson Chan, Ph.D. University of California, San Francisco, Associate Professor of Pathology and Laboratory Medicine; Environmental Health Sciences

Elizabeth Chao, M.D. University of California, Irvine, Assistant Adjunct Professor of Pediatrics; Pathology and Laboratory Medicine

Byung H. Choi, M.D. Severance Union Medical College, Professor Emeritus of Pathology and Laboratory Medicine

Jennifer L. Clebanoff, M.D. Boston University, Health Sciences Clinical Instructor of Pathology and Laboratory Medicine

Maria G. Dacosta-Iyer, M.D. University of Bombay, Health Sciences Clinical Professor of Pathology and Laboratory Medicine
Courses

**PATH 200A. Research in Experimental Pathology. 2-12 Units.**
Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203A.

Repeatability: Unlimited as topics vary.

**PATH 200B. Research in Experimental Pathology. 2-12 Units.**
Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.

Corequisite: PATH 203B.

Repeatability: Unlimited as topics vary.
PATH 200C. Research in Experimental Pathology. 2-12 Units.
Independent research for the Ph.D. program within the laboratories of graduate training faculty in Experimental Pathology.
Corequisite: PATH 203C.
Repeatability: Unlimited as topics vary.

PATH 200R. Research in Experimental Pathology for First-Year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in Experimental Pathology for first-year Ph.D. students.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.

PATH 203A. Advanced Studies in Experimental Pathology. 1 Unit.
A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.
Corequisite: PATH 200A.
Repeatability: May be repeated for credit unlimited times.

PATH 203B. Advanced Studies in Experimental Pathology. 1 Unit.
A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.
Corequisite: PATH 200B.
Repeatability: May be repeated for credit unlimited times.

PATH 203C. Advanced Studies in Experimental Pathology. 1 Unit.
A tutorial course for Ph.D. students in Experimental Pathology entailing attendance at Departmental seminars and critical reading of the scientific literature.
Corequisite: PATH 200C.
Repeatability: May be repeated for credit unlimited times.

PATH 204A. Experimental Pathology Research Seminar. 1 Unit.
Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PATH 204B. Experimental Pathology Research Seminar. 1 Unit.
Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PATH 204C. Experimental Pathology Research Seminar. 1 Unit.
Seminar series for graduate students in Experimental Pathology. Students attend seminars and, beginning in their third year of graduate study, present one formal seminar on their graduate research.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PATH 212. Signal Transduction and Growth Control. 4 Units.
Covers various eukaryotic signaling pathways (tyrosine kinase, ras-raf-MAPK, TGF-β, wnt, JAK-STAT, and FAS) with an emphasis on the experimental underpinnings. The material is covered in lectures and discussions of pertinent papers.
Same as BIOCHEM 212.
PATH 221. Immunopathogenic Mechanisms of Disease. 3 Units.
Examination of the mechanisms underlying disease states mediated by immune dysregulation. Topics include innate and adaptive immunity, autoimmunity, immunodeficiency, inflammatory disorders, and certain infectious diseases. Emphasis on biological basis of immunopathologies taught from reports in the original scientific literature.

Prerequisite: M&MG 215.

Same as M&MG 221.

Restriction: Graduate students only.

PATH 225. Molecular Mechanisms of Human Disease. 3 Units.
Provides an overview of the molecular mechanisms of human diseases, including neurologic, hematologic, neoplastic, and infectious diseases. Students gain an understanding of these mechanisms, as well as models of human diseases.

Same as M&MG 225.

PATH 226. Topics in Experimental Pathology. 4 Units.
Select topics related to principles of experimental pathology including normal host responses to disease are presented. Animal models of human disease are emphasized. Material includes both lectures and critical review of the primary literature.

PATH 227. Experimental Pathology Journal Club. 1 Unit.
Graduate-level course, which is open to all years, will involve the reading and discussion of papers, preferably written by the invited seminar speaker. Discussions will cover advanced topics in experimental pathology as related to an understanding of human disease.

Corequisite: PATH 204A and PATH 204B and PATH 204C.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PATH 230D. Principles of Experimental Pathology. 4 Units.
Introduces graduate students to the general pathologic processes that mediate disease. Topics include cell injury and repair, inflammation, immunopathology, neoplasia, and genetic diseases. Combines lecture, small group discussion, and oral presentations.

PATH 231A. Pathology of Cardiovascular Diseases. 2 Units.
For graduate students interested in human cardiovascular disease. Students receive training in physiology, anatomy, and pathologic processes of the heart and blood vessels. Experimental approaches to study such processes are emphasized.

PATH 232A. Pathology of Pulmonary Diseases. 1.5 Unit.
For graduate students interested in pulmonary disease. Students receive training in physiology, anatomy, and pathologic processes of the lungs and airways. Experimental approaches to study such processes are emphasized.

PATH 233A. Pathology of Renal Diseases. 1 Unit.
For graduate students interested in renal disease. Students receive training in physiology, anatomy, and pathologic processes of the kidneys. Experimental approaches to study such processes are emphasized.

PATH 234A. Pathology of Gastrointestinal Diseases.
For graduate students interested in gastrointestinal disease. Students receive training in physiology, anatomy, and pathologic processes of the gastrointestinal tract. Experimental approaches to study such processes are emphasized.

Grading Option: In progress only.

PATH 234B. Pathology of Gastrointestinal Diseases. 2 Units.
For graduate students interested in gastrointestinal disease. Students receive training in physiology, anatomy, and pathologic processes of the gastrointestinal tract. Experimental approaches to study such processes are emphasized.

Prerequisite: PATH 234A.

PATH 235A. Pathology of Genitourinary Tract Disease.
For graduate students interested in genitourinary tract or breast disease. Students receive training in physiology, anatomy, and pathologic processes of the breast and genitourinary tract. Experimental approaches to study such processes are emphasized.

Grading Option: In progress only.
PATH 235B. Pathology of Genitourinary Tract Disease. 2 Units.
For graduate students interested in genitourinary tract or breast disease. Students receive training in physiology, anatomy, and pathologic processes of the breast and genitourinary tract. Experimental approaches to study such processes are emphasized.
Prerequisite: PATH 235A.

PATH 236B. Graduate Neuropathology. 1 Unit.
For graduate students interested in diseases of the nervous system. Students receive training in physiology, anatomy, and pathologic processes of the central and peripheral nervous system. Experimental approaches to study such processes are emphasized.

PATH 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PATH 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PATH 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PATH 299. Dissertation in Experimental Pathology. 1-12 Units.
Provided for the preparation and completion of the dissertation required for the Ph.D. degree.
Repeatability: May be repeated for credit unlimited times.

Genetic Counseling
UC Irvine Medical Center, City Tower, Suite 800; 714-456-5789
http://www.pediatrics.uci.edu/gcprogram/
Pamela Flodman, Graduate Program Director

The Division of Human Genetics in the School of Medicine’s Department of Pediatrics offers a Master of Science degree program in Genetic Counseling. Many graduates of the program join academic or hospital-based genetics teams providing clinical services, teaching, and research. Others work for local, state, or federal genetics programs, for commercial genetics laboratories, in research studies, or in education. The graduate program is fully accredited by the American Board of Genetic Counseling.

Division faculty and staff are engaged in teaching, research, and patient service. Clinical activities center on diagnostic evaluation, management, and genetic counseling for genetic disorders, including birth defects, developmentally disabling conditions, and hereditary cancers. Faculty research interests include clinical genomics; gene mapping and identification using molecular and quantitative methods; characterization and management of malformation and chromosomal syndromes; counseling for late-onset genetic conditions including familial cancers and neurogenetic disorders; factors causing chromosome abnormalities, genomic disorders, and congenital malformations; cancer genetics and cytogenetics; psychosocial and cultural issues associated with genetic conditions, prenatal diagnosis, genetic screening testing, and genetic services delivery; treatment of genetic disease; and ethical and public policy issues in genetics.

During the six to eight academic quarters of the program, students complete a sequence of core courses covering medical, quantitative, biochemical, molecular, and cancer genetics and genomics; teratology, embryology, and development; cytogenetics; counseling theory and application; research methods; ethical issues; and community resources. All courses are taught by Division faculty specifically for students in the program. Experiential professional training occurs concurrently with formal course work in a variety of clinics at UC Irvine Medical Center and satellite facilities, in the prenatal diagnosis program, in the cytogenetics and molecular genetics laboratories, and in various community agencies. Students participate in these and other divisional and departmental professional and educational activities such as lectures, seminars, and journal club; Pediatrics, Obstetrics, and Oncology Grand Rounds; and various research, counseling, and patient management conferences throughout the program. While not required, some students choose to arrange optional clinical rotations at other academic, private, or commercial genetics units.

Degree requirements include a minimum of 75 quarter units, completion of a research thesis that should be publishable, and demonstration of appropriate professional skills in genetic counseling. The program director serves as faculty advisor to students. Teaching and supervision of
professional experiential training are shared by all Division faculty and staff, who frequently review student progress. In the second year, development of professional skills can be individualized according to the trainee’s needs and interests. Successful completion of the program fulfills the curricular and clinical training requirements for eligibility to sit for examination by the American Board of Genetic Counseling.

Recommended undergraduate preparation includes course work in the biological and behavioral sciences—particularly in genetics, biochemistry, molecular biology, psychology, and human anatomy or embryology. Course work in statistics is desirable. Fluency in Spanish or a Southeast Asian language confers a considerable advantage. Extracurricular or employment experiences that provide evidence of the student’s maturity, interpersonal skills, and promise as a genetic counselor figure prominently in the admissions decision. References should speak to these qualities as well as to the academic qualifications of the applicant. The GRE General Test is required. Subject Test scores in any area will also be considered if they are available. Since there is no GRE code for the Department of Pediatrics, applicants should use the UCI institution code: R4859.

Applications are accepted for the fall quarter only and must be complete by February 1. Because of keen competition for places in the program, a two-stage admissions process is employed. Following initial review of applications by the faculty admissions committee, approximately one-third of applicants are invited for interviews, which are usually conducted during March and April. If invited, it is greatly to the candidate’s advantage to have an on-site interview, although in difficult circumstances it may be possible to arrange an out-of-town interview. Any candidate planning to be in the Southern California area in March or April is encouraged to inquire in advance regarding the likelihood of an interview. Final selection from the interviewed candidates occurs in late April or early May. Five or six students are usually admitted each year.

Courses

PED GEN 200A. Introduction to Medical Genetics and Cytogenetics. 4 Units.
Covers current concepts regarding mitosis, meiosis, the cell cycle, and chromosome ultrastructure and function. Clinical disorders caused by chromosomal aneuploidy, duplication, and deletion, and principles of Mendelian, chromosomal, and multifactorial and nontraditional inheritance are presented and illustrated.

Restriction: Graduate students only.

PED GEN 200B. Genetic Screening, Prenatal Development, and Human Teratology. 4 Units.

Prerequisite: PED GEN 200A.

Restriction: Genetic Counseling students only.

PED GEN 200C. Human Genetic Disorders. 4 Units.
Inheritance, diagnosis, natural history, management, and counseling considerations for commonly encountered genetic diseases, birth defects, and dysmorphic syndromes.

Prerequisite: PED GEN 200B.

Restriction: Genetic Counseling students only.

PED GEN 200D. Disorders due to Inborn Errors of Metabolism. 4 Units.
Aspects of biochemistry and metabolism are reviewed with special emphasis on genetic abnormalities which lead to inborn errors of metabolism. Diagnostic procedures, heterozygote detection, treatment, counseling issues, and prenatal diagnosis are reviewed.

Prerequisite: PED GEN 200A.

PED GEN 200E. Molecular Genetics, Gene Mapping, and Genetic Linkage. 4 Units.
Derivation of different types of DNA probes and DNA libraries, restriction endonuclease polymorphisms, assignment of genes to chromosomes, and genetic linkage. Emphasis on the use of recombinant DNA technologies and genetic analysis for diagnosis of human genetic disease.

Prerequisite: PED GEN 200A and PED GEN 200D.

PED GEN 200F. Quantitative Genetics. 2 Units.
Quantitative aspects of human genetics, including population studies, segregation analysis, linkage, mapping, and genetic risk determination.

Prerequisite: Prerequisite or corequisite: PED GEN 200A.

Overlaps with PED GEN 200B.
PED GEN 200G. Hereditary Cancer Counseling. 4 Units.

Prerequisite: PED GEN 200B.
Restriction: Genetic Counseling students only.

PED GEN 200H. Genetic Counseling Research Design. 4 Units.
Quantitative and qualitative methods for genetic counseling research. Reference management; statistics: sample size, power, and data analysis; reliability and validity; surveys, questionnaires, interviews, focus groups; quality of life and genetic epidemiology research; designing a research protocol; IRB issues; grant writing.

PED GEN 200L. Cytogenetics Laboratory. 4 Units.
Practicum introducing methods of specimen collection, short-term lymphocyte and bone marrow culture, long-term fibroblast and amniocyte culture, harvesting and slide preparation, chromosome staining, microphotography, and darkroom techniques. Microscopic chromosome analysis, photographic karyotyping, and appropriate use of cytogenetic nomenclature are emphasized.

Restriction: Graduate students only.

PED GEN 201A. Introduction to Genetic Counseling. 4 Units.
Through directed readings, observing patient evaluations, role-playing, and conducting intake interviews, students are introduced to the process of diagnosis, management, and counseling for genetic disease. Psychosocial issues, interviewing techniques, pedigree construction, clinical photography, and various other skills are addressed.

Restriction: Genetic Counseling students only.

PED GEN 201B. Clinical Rotation I. 4 Units.
Provides extensive supervised experience in history taking, interviewing, and psychosocial assessment in the clinical genetics setting. Students independently perform telephone, office, and home-visit intake interviews, participate in counseling, and present cases at patient management conferences.

Restriction: Genetic Counseling students only.

PED GEN 201C. Clinical Rotation II. 4 Units.
Provides further supervised experience in genetic counseling, case management, clinic administration and organization, and the use of community resources. Emphasis is on sharpening counseling skills and on developing a professional identity and code of ethics.

Restriction: Genetic Counseling students only.

PED GEN 201D. Prenatal Diagnosis Counseling. 4 Units.
A practicum with extensive supervised experience in prenatal diagnosis counseling which provides the student with the opportunity to conduct genetic counseling sessions semi-independently and to further develop clinical skills.

Prerequisite: PED GEN 200A and PED GEN 200B and PED GEN 200C.
Restriction: Genetic Counseling students only.

PED GEN 202A. Counseling in Human Genetics: Theory and Methods. 3 Units.
Theoretical approaches, counseling models and methods, and bio-psychosocial assessment strategies are examined in the context of genetic counseling. Contract-setting, working alliance, the use of self and evaluation methods. Beginning counseling and peer supervision skills are practiced in class.

Restriction: Genetic Counseling students only.

PED GEN 202B. Community Resources. 2 Units.
Lectures, guest speakers, and community visits acquaint genetic counselors with public and private health care and funding agencies, parent support and advocacy groups, and other resources to assist individuals and families confronted with genetic disorders, developmental disabilities, and birth defects.

Restriction: Genetic Counseling students only.

PED GEN 202C. Ethical Issues in Human Genetics. 2 Units.
Explores major social, legal, and ethical issues in genetic counseling including those arising in genetic screening, prenatal diagnosis, informed consent, privacy and confidentiality, rights of the disabled, new genetic and reproductive technologies, treatment, and access to services.
PED GEN 203A. Counseling in Human Genetics: Putting Thought to Practice. 4 Units.
Builds upon the skills learned in previous courses emphasizing advanced counseling methods such as listening, empathy, and collaboration. The counselor’s own self-awareness, ethical behaviors, and limits are explored. Individual, team, and group exercises are performed.
Prerequisite: PED GEN 202A.
Restriction: Genetic Counseling students only.

PED GEN 204A. Professional Skills Development. 4 Units.
Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate students only.

PED GEN 204B. Professional Skills Development. 4 Units.
Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.
Prerequisite: PED GEN 204A.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate students only.

PED GEN 204C. Professional Skills Development. 4 Units.
Hones and augments existing competencies in genetic counseling through ongoing clinical experiences. Develops skills using computers for genetics applications, provision of community and professional education, and clinic administration. Further experience in genetics laboratories or specialty clinics may be elected.
Prerequisite: PED GEN 204B.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate students only.

PED GEN 295. Master’s Thesis and Research Writing. 4-8 Units.
Under the supervision of one or more faculty members, the student designs and conducts a research project or completes a case report. A problem in the cytogenetics, biochemical, clinical, psychosocial, or behavioral areas of medical genetics may be investigated.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.
Restriction: Graduate students only.

Microbiology and Molecular Genetics
Building B, Room 240, Medical Sciences I; 949-824-5261
http://www.microbiology.uci.edu/
Rozanne M. Sandri-Goldin, Department Chair
Marian L. Waterman, Department Vice Chair
Klemens J. Hertel, Departmental Graduate Advisor

The Department of Microbiology and Molecular Genetics provides advanced training to individuals interested in the regulation of gene expression and the structural and functional properties of proteins encoded by these genes. The research in the Department covers a wide range of topics with special emphasis on bacterial gene expression and pathogenesis; viral gene expression and host interactions; vector-borne malaria and dengue fever transmission; nuclear-cytoplasmic transport and intracellular signaling; eukaryotic gene expression; mRNA splicing, and processing; cancer genetics and tumor suppressors; ion channel expression and function; genomics and bioinformatics.

The Department offers graduate study under the auspices of the School of Medicine and in conjunction with the program in Cellular and Molecular Biosciences (CMB) and the program in Mathematical and Computational Biology (MCB), which are described in the Francisco J. Ayala School of Biological Sciences (p. 289) section. Students are eligible to enter the Department program after meeting the specific requirements of the CMB gateway curriculum or by direct application to the Department. The Department program leads to the M.S. or Ph.D. degree in Biomedical Sciences, awarded after
successful completion of all requirements. Students admitted into the CMB program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year.

Participation in the Department’s seminar series and completion of at least one advanced topics course per year for three years are expected of all students. All students are required to convene a pre-advancement committee meeting at the end of their second year. In their third year, students take the advancement-to-candidacy examination for the Ph.D. degree by presenting and defending an original proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Courses

**M&MG 200A. Research in Microbiology and Molecular Genetics. 2-12 Units.**
Individual research supervised by a particular professor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200B. Research in Microbiology and Molecular Genetics. 2-12 Units.**
Individual research supervised by a particular professor.

Prerequisite: M&MG 200A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200C. Research in Microbiology and Molecular Genetics. 2-12 Units.**
Individual research supervised by a particular professor.

Prerequisite: M&MG 200B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

**M&MG 200R. Research in Microbiology and Molecular Genetics for First-Year Students. 2-12 Units.**
Independent research within the laboratories of graduate training faculty in the Department of Microbiology and Molecular Genetics for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

**M&MG 201A. Research topics in Microbiology and Molecular Genetics. 1 Unit.**
Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**M&MG 201B. Research topics in Microbiology and Molecular Genetics. 1 Unit.**
Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Prerequisite: M&MG 201A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.
M&MG 201C. Research topics in Microbiology and Molecular Genetics. 1 Unit.
Seminars presented by graduate students and faculty of the Department which explore research topics in specialized areas of microbiology and molecular genetics. Opportunity for students to gain experience in the organization, critical evaluation, and oral presentation of current research developments.

Prerequisite: M&MG 201B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

M&MG 203A. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.
Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

M&MG 203B. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.
Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Prerequisite: M&MG 203B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

M&MG 203C. Advanced Studies in Microbiology and Molecular Genetics. 1 Unit.
Organized within each laboratory group, one to four hours. Advanced study in areas related to faculty research interests. Involves small group study based on readings, discussions, and guest speakers. May be conducted as journal clubs.

Prerequisite: M&MG 203B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

M&MG 205A. Basic Immunology Core Lectures. 1 Unit.
Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Grading Option: Satisfactory/unsatisfactory only.

M&MG 205B. Basic Immunology Core Lectures. 1 Unit.
Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.

Prerequisite: M&MG 205A.

Grading Option: Satisfactory/unsatisfactory only.
M&MG 205C. Basic Immunology Core Lectures. 1 Unit.
Basic concepts in human immunology including development of the immune system, innate immunity, immunoglobulin structure and genetics, antigen-antibody reactions, the major histocompatibility complex and antigen presentation, T cell and B cell development, initiation of the immune response, effector mechanisms.
Prerequisite: M&MG 205C.
Grading Option: Satisfactory/unsatisfactory only.

M&MG 206. Regulation of Gene Expression. 4 Units.
Aspects of gene expression including organization of the eukaryotic nucleus in terms of protein-nucleic acid interaction; comparisons between prokaryotic and eukaryotic gene expression, enzymology and regulation of RNA transcription in E. Coli and other prokaryotes; enzymology of transcription in eukaryotes.

M&MG 210A. Medical Microbiology. 4-6 Units.
Biology of microbial pathogens (viruses, bacteria, fungi, parasites) as foundation for subsequent study of infectious diseases. Topics: molecular basis of microbial pathogenesis; clinical presentation and epidemiology; diagnostic testing; antimicrobial therapy; prevention strategies. Format: lectures, laboratory, clinical cases, liveclass tech interactive questions.

M&MG 210B. Medical Immunology. 6 Units.
Cellular and molecular basis of immune response and roles of the immune system in both maintaining health and contributing to disease.
Prerequisite: M&MG 210A.
Restriction: Medical students only.

M&MG 215. Integrative Immunology. 4 Units.
Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.
Same as MOL BIO 215.

M&MG 216. Pathogenic Microbiology. 4 Units.
Biochemical and genetic properties of infectious agents; identification and behavior of pathogens; activities of toxins; the chemotherapy, biochemistry, and genetics of drug resistance; and epidemiology of infectious diseases.

M&MG 219. Medical Virology. 4 Units.
Animal viruses as disease causing agents, including mechanisms of infection at both the cellular and organismic levels. Topics include comparative studies of different groups of viruses, viral transformation, and mechanisms of viral gene expression.

M&MG 221. Immunopathogenic Mechanisms of Disease. 3 Units.
Examination of the mechanisms underlying disease states mediated by immune dysregulation. Topics include innate and adaptive immunity, autoimmunity, immunodeficiency, inflammatory disorders, and certain infectious diseases. Emphasis on biological basis of immunopathologies taught from reports in the original scientific literature.
Prerequisite: M&MG 215.
Same as PATH 221.
Restriction: Graduate students only.

M&MG 222. Molecular Pathogenesis of Viral Infections. 4 Units.
Features lectures by faculty on the molecular aspects of viral pathogenesis, highlighting both viral and cellular functions. Students give oral presentations and write a research proposal on a selected topic.
Prerequisite: MOL BIO 205.

M&MG 225. Molecular Mechanisms of Human Disease. 3 Units.
Provides an overview of the molecular mechanisms of human diseases, including neurologic, hematologic, neoplastic, and infectious diseases. Students gain an understanding of these mechanisms, as well as models of human diseases.
Same as PATH 225.
M&MG 227. Immunology Journal Club. 2 Units.
Advanced topics in immunology as related to an understanding of human disease.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

M&MG 230. Topics in Stem Cells. 2-4 Units.
One-hour seminar presentation by participating faculty or guest lecturer and open to the science community, followed by one-hour discussion of the lecture topic or related topic. Students are responsible for presentations and readings.

M&MG 240. M.D./Ph.D. Tutorial. 1 Unit.
Explores a variety of topics that impact careers of medical scientists (M.D./Ph.D students). Topics range from scientific, such as recent advances in particular research areas, to ethical problems brought on by increased technology and intervention in the disease process.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

M&MG 250. Responsible Conduct of Research. 2 Units.
Each session includes a formal presentation by faculty/invited speaker followed by a discussion of case studies related to the topic under consideration.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

M&MG 270. Career Development. 2 Units.
Topics include preparation of papers, grants and fellowships, scientific presentations, and curriculum vitae, and career opportunities.
Repeatability: May be repeated for credit unlimited times.

M&MG 280. Tutorial in Microbiology and Molecular Genetics. 2 Units.
Tutorial in Microbiology and Molecular Genetics. Presented by the department chair; relates current laboratory research to the literature.
Repeatability: May be repeated for credit unlimited times.

M&MG 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

M&MG 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

M&MG 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

M&MG 298. Independent Study. 1-12 Units.
Provided for MSTP students to synthesize the basic science information learned during the basic science years of medical school and learn how to apply that knowledge toward graduate research directed at understanding the basis of human disease.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
M&MG 299. Dissertation—Microbiology and Molecular Genetics . 1-12 Units.
Course provided for Ph.D. students to prepare and complete the dissertation required for a Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

Pharmacological Sciences

Graduate Student Affairs: (949) 824-7651 (Program administered by the Department of Pharmacology)

Frederick J. Ehler, Graduate Program Director/Advisor for the Interdisciplinary Program

The Department of Pharmacology and Pharmaceutical Sciences join forces to offer an interdisciplinary program leading to the Ph.D. degree in Pharmacological Sciences with a concentration in Pharmacology or in Pharmaceutical Sciences. For complete program information, see the Interdisciplinary Studies (p. 1083) section of the Catalogue.

The Department of Pharmacology also admits students through the following two gateway programs:

Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP). The one-year graduate MCP Gateway Program is designed to function in concert with selected department programs, including the Ph.D. in Pharmacological Sciences. Upon successful completion of the MCP curriculum at the end of their first year, students choose a faculty advisor who is affiliated with one of the participating departments, and transition into their “home” department to complete the remaining degree requirements. They will receive their Ph.D. degree from the department of their chosen advisor. Detailed information is available at Department of Pharmacology (http://www.pharmacology.uci.edu) website.

The Department also participates in the Interdepartmental Neuroscience Gateway Program, described in the Francisco J. Ayala School of Biological Sciences section of the Catalogue. Students who select a focus in Neuroscience and a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year and will receive their Ph.D. from the department of their chosen advisor. Detailed information is available at Interdepartmental Neuroscience Gateway Program (http://www.inp.uci.edu/about) website.

Faculty

Geoffrey W. Abbott, Ph.D. University of London, Professor of Pharmacology; Physiology and Biophysics

James D. Belluzzi, Ph.D. University of Chicago, Adjunct Professor of Pharmacology

Stephen C. Bondy, Ph.D. University of Birmingham, Professor of Medicine; Environmental Health Sciences; Pharmacology; Program in Public Health

Emiliana Borrelli, Ph.D. University of Strasbourg, Professor of Microbiology and Molecular Genetics; Pharmacology

Catherine M. Cahill, Ph.D. Dalhousie University, Acting Associate Professor of Anesthesiology and Perioperative Care; Anesthesiology and Perioperative Care; Pharmacology

A. Richard Chamberlin, Ph.D. University of California, San Diego, Department Chair and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (chemical biology, organic and synthetic)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, Department Chair and Eric L. and Lila D. Nelson Chair in Neuropharmacology and Professor of Pharmacology; Developmental and Cell Biology; Pharmaceutical Sciences (novel neuroactive molecules)

Sue P. Duckles, Ph.D. University of California, San Francisco, Professor Emerita of Pharmacology

Frederick J. Ehler, Ph.D. University of California, Irvine, Professor of Pharmacology

Pietro R. Galassetti, Ph.D. Vanderbilt University, Associate Professor of Pediatrics; Pharmacology

Kelvin W. Gee, Ph.D. University of California, Davis, Professor of Pharmacology

Frances L. Gonzalez, Ph.D. University of Aberdeen, Professor of Pharmacology; Anatomy and Neurobiology

Stephen Hanessian, Ph.D. Ohio State University, Director of Medicinal Chemistry and Pharmacology Graduate Program and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (organic chemistry)

Naoto Hoshi, Ph.D. Kanazawa University, Assistant Professor of Pharmacology; Physiology and Biophysics

Mahtab F. Jafari, Ph.D. University of California, San Francisco, Vice Chair of the Undergraduate Program in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology; Pharmacology

Diana N. Krause, Ph.D. University of California, Los Angeles, Adjunct Professor of Pharmacology
Courses

PHARM 210. Chemical Neuroanatomy. 4 Units.
Organization of the nervous system, especially with respect to chemical identity of elements, for students of pharmacology. Major cell types, methods of study, ultrastructure, synaptic organization of functionally defined systems, localization of chemically defined cells and receptors, and brain development.

Restriction: Graduate students only.

PHARM 241. Advanced Topics in Pharmacology. 2 Units.
Application of pharmacological principles in disease therapy. Advanced pharmacological mechanisms and in-depth study of drug action. Discussion of several major drug classes/therapeutic strategies: molecular mechanisms of action, physiological consequences of administration, and clinical use.

PHARM 241B. Graduate Pharmacology. 6 Units.

Prerequisite: PHYSIO 206A and PHYSIO 206B and BIOCHEM 210A.

PHARM 252. Neurotransmitter and Drug Receptors. 6 Units.
Ligand gated ion channels, G protein linked receptors, receptor tyrosine kinases, ligand regulated transcription factors, their signaling mechanisms, trafficking and physiological responses. Analysis of receptor properties by pharmacological methods, radioligand binding, and molecular biology.

PHARM 254. Introduction to Pharmacology. 4 Units.
Receptor analysis: bioassay measuring contraction, calcium mobilization, second messenger responses; operant conditioning: whole animal, single neuron; radioligand binding; quantitative autoradiography; immunocytochemistry; in situ hybridization for analysis of mRNA; Western and Northern analysis; transgenic mouse knock in and knock out techniques.

PHARM 255. Chemical Transmission. 4 Units.
Mechanisms underlying chemical signaling processes in the brain and periphery. Molecular biology, signal transduction, transmitter synthesis and inactivation, pharmacology of integrative function and behavior.

PHARM 256. Experimental Design for Pharmacologists. 1 Unit.
Population and sample statistics, hypothesis testing, analysis of variance, nonparametric statistics, experimental design, power, and the use of statistical computer software.

Prerequisite: PHARM 252.
PHARM 257. Ethics in Research. 1 Unit.
Ethical conduct in research including data handling, authorship, conflict of interest, animal rights, handling of misconduct.

Prerequisite: PHARM 299.

Repeatability: May be taken for credit 2 times.

PHARM 298. Seminar. 2 Units.
Presentation and discussion of current problems and methods in teaching and research in pharmacology, toxicology, and therapeutics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHARM 299. Research. 1-12 Units.
Independent research with Pharmacology and Toxicology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Physiology and Biophysics

Building D, Room D340, Medical Sciences I; 949-824-5863
http://www.physiology.uci.edu/

Michael D. Cahalan, Department Chair

Todd C. Holmes, Department Vice Chair

Albert Zlotnik, Departmental Graduate Advisor

The Department of Physiology and Biophysics offers research opportunities in the molecular biophysics of membranes and proteins, ion channels and signal transduction, endocrinology, molecular and cell biology, physiological genomics, developmental neurobiology, and exercise physiology.

The Department offers graduate study under the auspices of the School of Medicine and in conjunction with the graduate program in Cellular and Molecular Biosciences (CMB) and the Interdepartmental Neuroscience Program (INP), which are described in the Francisco J. Ayala School of Biological Sciences (p. 289) section. Students are eligible to enter the Department program after meeting the specific requirements of the CMB or INP gateway curriculum or by direct application to the Department. The Department program leads to the M.S. or Ph.D. degree in Biomedical Sciences, awarded after successful completion of all requirements. Students admitted into these combined programs who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year.

The faculty conducts quarterly reviews of all continuing students to ensure that they are maintaining satisfactory progress within their particular academic program. Students participate in a literature review course designed to strengthen research techniques and presentation skills, and attend the weekly Department colloquium. Students advance to candidacy during the third year; each student presents a seminar on a topic assigned by the formal candidacy committee. Following the seminar, the committee examines the student’s qualifications for the successful conduct of doctoral dissertation research. Each student must submit a written dissertation on an original research project and successfully defend this dissertation in an oral examination. Interdisciplinary dissertation research involving more than one faculty member is encouraged. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Faculty

Geoffrey W. Abbott, Ph.D. University of London, Professor of Pharmacology; Physiology and Biophysics

Gregory R. Adams, Ph.D. Michigan State University, Associate Adjunct Professor of Physiology and Biophysics

Kenneth M. Baldwin, Ph.D. University of Iowa, Professor Emeritus of Physiology and Biophysics

Tallie Z. Baram, M.D. University of Miami, Danette Dee Dee Shepard Chair in Neurological Studies and Professor of Pediatrics; Anatomy and Neurobiology; Neurology; Physiology and Biophysics

Ralph A. Bradshaw, Ph.D. Duke University, Professor Emeritus of Physiology and Biophysics

Michael D. Cahalan, Ph.D. University of Washington, UCI Distinguished Professor of Physiology and Biophysics

Vincent J. Caiozzo, Ph.D. University of California, Irvine, Professor in Residence of Orthopaedic Surgery; Environmental Health Sciences; Physiology and Biophysics
K. George Chandy, Ph.D. University of Birmingham, Professor of Physiology and Biophysics; Microbiology and Molecular Genetics

Philip Felgner, Ph.D. Michigan State University, Adjunct Professor of Medicine; Physiology and Biophysics

John Jay Gargus, Ph.D. Yale University, Professor of Physiology and Biophysics; Pediatrics

Alan L. Goldin, M.D. University of Michigan, Professor of Microbiology and Molecular Genetics; Anatomy and Neurobiology; Physiology and Biophysics

Harry T. Haigler, Ph.D. Vanderbilt University, Professor of Physiology and Biophysics

James E. Hall, Ph.D. University of California, Riverside, Professor of Physiology and Biophysics

Todd Holmes, Ph.D. Massachusetts Institute of Technology, Department Vice Chair and Professor of Physiology and Biophysics

Naoto Hoshi, Ph.D. Kanazawa University, Assistant Professor of Pharmacology; Physiology and Biophysics

Lan Huang, Ph.D. University of Florida, Professor of Physiology and Biophysics; Biological Chemistry

Rongsheng Jin, Ph.D. Columbia University, Associate Professor of Physiology and Biophysics

Frances A. Jurnak, Ph.D. University of California, Berkeley, Professor Emerita of Physiology and Biophysics

Janos K. Lanyi, Ph.D. Harvard University, Professor Emeritus of Physiology and Biophysics

John C. Longhurst, Ph.D. University of California, Davis, Susan Samuelli Chair in Integrative Medicine and Professor of Medicine; Pharmacology; Physiology and Biophysics

Kenneth J. Longmuir, Ph.D. University of Oregon, Professor of Physiology and Biophysics

Hartmut Luecke, Ph.D. William Marsh Rice University, Professor of Molecular Biology and Biochemistry; Molecular Biology and Biochemistry; Physiology and Biophysics

Jogeshwar Mukherjee, Ph.D. Jodhpur National University, Professor in Residence of Radiological Sciences; Physiology and Biophysics

Ian Parker, Ph.D. University College London, Professor of Neurobiology and Behavior; Physiology and Biophysics

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Irwin A. Rose, Ph.D. University of Chicago, Senate Emeritus of Physiology and Biophysics

Hamid M. Said, Ph.D. Aston University, Professor of Medicine; Physiology and Biophysics

Ivan Soltesz, Ph.D. Eötvös Loránd University, UCI Chancellor's Professor of Anatomy and Neurobiology; Neurobiology and Behavior; Physiology and Biophysics

Francesco Tombola, Ph.D. University of Padua, Assistant Professor of Physiology and Biophysics

Bruce Tromberg, Ph.D. University of Tennessee, Director of Surgery; Biomedical Engineering; Physiology and Biophysics (photon migration, diffuse optical imaging, non-linear optical microscopy, photodynamic therapy)

Nosratola D. Vaziri, M.D. University of Tehran, Professor Emeritus of Medicine; Physiology and Biophysics

Larry E. Vickery, Ph.D. University of California, Santa Barbara, Professor Emeritus of Physiology and Biophysics

Ping H. Wang, M.D. Harvard University, Professor of Medicine; Physiology and Biophysics

Stephen H. White, Ph.D. University of Washington, Professor Emeritus of Physiology and Biophysics

Qin Yang, M.D., Assistant Professor of Medicine; Physiology and Biophysics

Albert Zlotnik, Ph.D. University of Colorado Boulder, Professor of Physiology and Biophysics

Courses

**PHYSIO 200. Research in Physiology and Biophysics. 2-12 Units.**

Individual research directed toward doctoral dissertation and supervised by a particular professor.

Repeatability: May be repeated for credit unlimited times.
PHYSIO 200R. Research in Physiology and Biophysics for First-Year Students. 2-12 Units.
Independent research within the laboratories of graduate training faculty in the Department of Physiology and Biophysics for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

PHYSIO 201. Introduction to Physiology Research. 1-4 Units.
Introduction to research in physiology and related sciences. Concentrates on techniques emphasized in the various laboratories of the Department of Physiology and Biophysics.

Repeatability: May be repeated for credit unlimited times.

PHYSIO 204. Concepts of Biophysics. 3 Units.
Principles of crystallography; introduction to time-resolved absorption and fluorescence spectroscopy; the concepts of kinetic order and kinetic rate theory.

Restriction: Graduate students only.

PHYSIO 205. Electronics for Biologists. 4 Units.
Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as NEURBIO 249.

PHYSIO 206A. Introduction to Medical Physiology. 5 Units.
Vertebrate physiology with emphasis on humans and on the relationship between the function of normal tissues and the processes of disease. Fundamental principles of physiology and the interrelationships which control organ function.

Prerequisite: A biochemistry course.

Restriction: Graduate students only.

PHYSIO 206B. Introduction to Medical Physiology. 6 Units.
Vertebrate physiology with emphasis on humans and on the relationship between the function of normal tissues and the processes of disease. Fundamental principles of physiology and the interrelationships which control organ function.

Prerequisite: PHYSIO 206A.

Restriction: Graduate students only.

PHYSIO 232. The Physiology of Ion Channels. 4 Units.
Discusses how ion channels work (molecular/structural biophysics level) and what ion channels do in diverse cell types (cell physiology level).

Restriction: Graduate students only.

PHYSIO 252. Introduction to Proteomics. 4 Units.
Introduces students to concepts and methods of proteomics including protein identification, expression proteomics, and protein-protein interactions.

Repeatability: May be taken for credit 2 times.

PHYSIO 290. Topics in Physiology. 3 Units.
Contemporary research problems in physiology. Students review papers in the current literature and present ideas contained therein to other students. Students present results of their own research and attend presentations given by other students and departmental researchers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PHYSIO 292A. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
PHYSIO 292B. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PHYSIO 292C. Scientific Communication. 2 Units.
Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PHYSIO 299. Dissertation in Physiology and Biophysics. 2-12 Units.
Preparation and completion of the dissertation required for the Ph.D. or Master of Science degree.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Program in Nursing Science

252 Berk Hall; 949-824-1514
http://www.nursing.uci.edu/; nssao@uci.edu
Alison Holman, Interim Director of the Program in Nursing Science

Degrees

Nursing Science B.S., M.S., Ph.D.

Undergraduate Program

Nurse professionals are members of interdisciplinary teams who work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. The Bachelor of Science degree program in Nursing Science prepares graduates to function as generalists in professional nursing practice and to collaborate with other health care providers in clinics, hospitals, and community health settings. The undergraduate curriculum is designed to provide theory and research-based clinical practice focusing on critical thinking, human caring, and clinical expertise. Students who successfully complete the B.S. degree in Nursing Science are eligible to take the licensure examination to become a registered nurse. The Nursing Science major is approved by the Board of Registered Nursing and the Commission on Collegiate Nursing Education (CCNE).

Most of the courses required for the major require completion of prerequisites. The sample program shown is a preferred sequence that accounts for all prerequisites. Most required courses are offered in sequence and only once a year. Full-time enrollment is required.

All students interested in the Nursing Science major should be aware that they will be required to do the following: (1) meet the physical and mental requirements necessary to perform nursing practice functions as outlined in Chapter 6, Article 2, Item 2725 of the Business and Professions Code of California; (2) complete a criminal background check prior to entering the clinical portion of the major in the junior year as required by health care facilities in which students will have clinical experiences; (3) purchase uniforms and other required equipment such as stethoscopes; (4) have access to transportation for off-campus clinical experiences beginning in the junior year.

Admission to the Major

Meeting the UCI admission criteria does not guarantee admission into the major. The admission process is competitive due to limited enrollment. In addition to meeting the UCI admission criteria, all eligible applicants are required to submit a supplemental application that includes a personal statement and a résumé detailing experiences in health care. A proctored essay and personal interview may also be required.

Freshmen: Preference will be given to those who rank the highest using the selection criteria as stated in the Admissions (p. 52) section of the Catalogue.

Transfer students: Admission to the major is limited and selective. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Nursing Science major. The following list of prerequisites is required for transfer students applying for fall 2015 entry and beyond. All applicants must complete the following with grades of B or better: one year of general chemistry equivalent to UCI’s CHEM 1A - CHEM 1B - CHEM 1C; one quarter/semester of organic chemistry equivalent to UCI’s CHEM 51A; one quarter/semester of genetics equivalent to UCI’s BIO SCI 97; one quarter/semester of biochemistry equivalent to UCI’s BIO SCI 98; one quarter/semester of human physiology with laboratory equivalent to UCI’s BIO SCI E109 and BIO SCI E112L; one quarter/semester of microbiology with laboratory equivalent to UCI’s BIO SCI M122 and either BIO SCI M118L or BIO SCI M122L; one quarter/semester of human anatomy with laboratory equivalent to UCI’s BIO SCI D170; one quarter/semester of philosophy equivalent to UCI’s PHILOS 4 or PHILOS 5; one quarter/semester of psychology equivalent to UCI’s PSYCH 7A/PSY BEH 9; one quarter/semester of public health equivalent to UCI’s PUBHLTH 1; one quarter/semester of sociology equivalent to UCI’s SOCIOLO 1; and one quarter/semester of statistics equivalent to UCI’s STATS 7 or STATS 8. Applicants must have a cumulative GPA of 3.0 or higher to be considered.

Change of Major: Due to strict limits on the number of students who can be admitted to the program and rigid sequencing of much of the upper-division curriculum, change-of-major students need to apply in the month of November for winter quarter admission, at the earliest in sophomore year. Students should review the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website and the Nursing Science (http://www.nursing.uci.edu/programs/bs/change-of-major) website for information regarding change of major admission requirements, application instructions, and selection criteria. Change-of-major students who are intending to apply to the Program in Nursing Science should be aware that the Program in Nursing Science cannot waive course prerequisites for any Francisco J. Ayala School of Biological Sciences or School of Physical Sciences courses, prior to admission into the Nursing Science major. As such, change of major students must adhere to the course prerequisites that these Schools have established and have published in the course descriptions that appear in the Catalogue.

Honors at Graduation

Honors at graduation, e.g., cum laude, magna cum laude, summa cum laude, are awarded to approximately the top 12 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at a University of
California campus. Other important factors are considered: visit at Honors Recognition (http://catalogue.uci.edu/informationforadmittedstudents/academicadvisingandhonors/#honorsopportunitiestext).

**Requirements for the B.S. Degree in Nursing Science**

All major requirements must be passed with a C or better if taken at UCI, and a B or better if taken at another university. All Nursing Science courses must be taken at UCI. Students must maintain a 2.75 GPA in their upper-division Nursing Science courses to remain in good standing. If Nursing Science students fail any courses required for the major, they should contact Student Affairs for the repeat policy.

**All students must meet the University Requirements** (p. 71).

### Major Requirements

Program in Nursing Science

NUR SCI 132   NUR SCI 160   NUR SCI 175L
NUR SCI 179A   NUR SCI 179B

Graduate Program

The Program in Nursing Science offers both the M.S. and Ph.D. degrees in Nursing Science. Detailed information about both degree programs follows.

Master of Science in Nursing Science

The Master of Science (M.S.) in Nursing Science at the University of California, Irvine is a professional degree program which will prepare Registered Nurses in selected specialties and in research so they may assume roles as research-based advanced practice clinicians, administrators, or educators. The program course work is designed to prepare nurses with: (1) expertise in a specialized area of advanced nursing practice; (2) role preparation as a nurse practitioner, nurse educator, or nurse administrator; (3) leadership and health policy skills; and (4) research skills. The M.S. degree will also prepare students for future doctoral work.

Admission

Applicants must have earned a bachelor’s degree in nursing from an accredited program, currently be licensed as a Registered Nurse in the State of California, and provide proof of licensure by the California Board of Registered Nursing (BRN). In addition, eligible candidates must have a 3.0 cumulative grade point average, have completed a descriptive and inferential statistics course and an upper-division nursing research course at the undergraduate level, and have at least one year direct clinical experience in patient care in a U.S. healthcare system upon entering the program.

Applicants must meet the general admission requirements of the UCI Graduate Division and the Program in Nursing Science admission requirements, and submit both the Application for Graduate Admission and the Nursing Science Supplemental Application in order to be considered for admission. The GRE is not required. Students are admitted every fall quarter.

M.S. Concentration Areas

Students applying to the M.S. program must select an area of concentration, either the Family Nurse Practitioner concentration (FNP) or the Adult-Gerontological Primary Care Nurse Practitioner concentration (AGPCNP). Graduates of the nurse practitioner (NP) tracks will also be eligible for certification by the California Board of Registered Nursing (BRN).

Requirements

Students enrolled in either the FNP concentration or the AGPCNP concentration will complete 72 units. Students will complete 720 hours of clinical practice with populations in their area of concentration to be eligible for certification. There is no foreign language requirement; proficiency in a language other than English is desirable but not required.

Doctor of Philosophy in Nursing Science

Admission

To be considered for admission, applicants must have a Bachelor or Master of Science degree in Nursing. Degrees must be from U.S. accredited programs or international programs with accreditations satisfactory to the Graduate Division and the Program in Nursing Science and equivalent to UC educational requirements.

Applicants are required to submit transcripts showing a minimum grade point average (GPA) of 3.2 for undergraduate work and 3.5 for graduate work from an accredited institution and a scholarship record commensurate with requirements of the Graduate Division and the Program in Nursing Science. Previous education at the graduate level and/or graduate levels will be evaluated for equivalency of design, theory, and intensity as a means of determining whether the prior degree standards are equivalent to those required by the UC system. Applicants are also required to submit scores from the General Test of the Graduate Record Examination taken within the last five years as required by the Graduate Division. If English is not the applicant’s first language, the applicant must demonstrate proficiency in English prior to admission commensurate with that identified by the Graduate Division for the Test of English as a Foreign Language (TOEFL) or TOEFL Internet-Based (TOEFL iBT).

Applicants who did not have a course in descriptive and inferential statistics within the last five years must complete a course similar to STATS 7 prior to admission. Applicants without an undergraduate research course are required to complete both NUR SCI 125 and NUR SCI 200. Applicants who have completed an undergraduate research course but not a graduate-level course in nursing research must complete NUR SCI 200.

In addition, applicants are required to submit:

- A statement of objectives for graduate study, career goals, and personal research goals including ways in which those goals are compatible with the UCI expected outcomes for doctoral education;
- A resume or Curriculum Vitae detailing educational background, professional work, previous research, and volunteer work as well as other relevant information such as fluency in another language;
- Examples of scholarly work;
- Three letters of recommendation submitted on the Graduate Division Recommendation Form from persons in a supervisory role who are able to comment on academic abilities, research-related abilities/capabilities, and/or work-related experiences; and
- Evidence of licensure as a registered nurse.

A personal interview will be required of applicants considered for admission. Acceptance is based on materials submitted, research interests related to those of faculty, and results of the interview process.

Areas of Focus

The specific field of emphasis for the Ph.D. program is Nursing Science. Generally, this involves increasing the quality of life for the community that nurses serve. Consistent with faculty research expertise, the Ph.D. program will specifically promote the development of scientific and theoretical expertise that contributes to scholarly endeavors in four key areas: health promotion/disease prevention, health disparities and diversity, disease and symptom management, and health services and health policy. These areas of research emphasis intersect as they contribute to healthy communities. Emphasis will be placed on building expertise in the use of translational science methods in conjunction with traditional models for research. Research emphasis areas are described below.

**Health Promotion/Disease Prevention.** According to the World Health Organization (2010), health promotion is empowering others to modify and improve their health. This happens at the individual, family, and community level. Health promoting activities often lead to disease prevention. Students choosing this focus may work with UCI faculty (Nursing Science and others) on stress and coping, women’s health, and obesity prevention and nutrition, to name a few specific areas.

**Health Disparities and Diversity.** The focus on Health Disparities acknowledges that there are individuals, families, and communities who are not equally treated in the quest for health. Many do not have equal access to quality health care nor the means to achieve an equal level of desired health outcomes. The emphasis will be to examine these health disparities among diverse populations who encounter differences in treatment and outcomes. Students choosing this focus will have an opportunity to work with diverse community members in Orange County and beyond, and they will be mentored by researchers who study the experiences of these community members.
**Disease and Symptom Management.** Many individuals face challenges in managing chronic illness. The focus is to aid individuals to be healthy within the context of living with a chronic illness by investigating factors influencing self-management and developing best intervention strategies for symptom management. Students choosing this focus will have an opportunity to study chronic illness demands and the experiences, coping efforts, and challenges that patients face. Research at UCI covers a wide variety of diseases such as asthma, diabetes, congestive heart failure, peripheral vascular disease, mental illness, dementia, cancer, and other illnesses.

**Health Services and Health Policy.** Health policy and the economics of delivering health care are important issues affecting health outcomes. Students choosing this focus will have an opportunity to examine the implications of a variety of policies and services on health and health system outcomes. There will be opportunities to study with researchers who have expertise in health care system management, law, organizational theory and behavior, and quality of care.

**Requirements**

Ph.D. students are required to take a minimum of 75 quarter units. Among those, 44 quarter units must be formal course work selected in part by consultation with the faculty advisor, subject to review by a faculty oversight committee. These courses will cover the necessary fundamental and methodological principles, and accommodate cross-disciplinary themes in nursing science. Students will also be required to participate in the educational mission of the Program in Nursing Science as teaching assistants for two quarters.

Students will have two formal examinations along the process toward writing their thesis. First they will write a comprehensive examination at the end of the second year of study and following completion of required course work. The next benchmark will be the qualifying exam, in which students will advance to candidacy upon successful presentation of an original dissertation research proposal and oral defense of the proposal. Ph.D. completion requires submission of an acceptable dissertation and oral defense. The normative time to degree is five years, and the maximum time permitted is seven years.

**Elective Courses**

At least eight units of elective courses contributing to the area of proposed research must be taken outside of Nursing Science, and elective methods and statistics courses related to proposed research.

**Faculty**

Jill Berg, Ph.D. University of Pittsburgh, **Professor Emerita of Program in Nursing Science**

Sarah E. Choi, F.N.P., Ph.D. University of California, San Francisco, **Assistant Professor of Program in Nursing Science**

Karen Deck, F.N.P., M.S.N. California State University, Long Beach, **Health Sciences Assistant Clinical Professor of Program in Nursing Science**

Lorraine S. Evangelista, Ph.D. University of California, Los Angeles, **Professor of Program in Nursing Science**

Camille F. Fitzpatrick, A.N.P., G.N.P., M.S.N. California State University, Long Beach, **Health Sciences Clinical Professor of Program in Nursing Science**

Yuqing Guo, Ph.D. University of Washington, **Assistant Professor of Program in Nursing Science**

Beth M. Haney, D.N.P. University of Colorado, Colorado Springs, **Health Sciences Assistant Clinical Professor of Program in Nursing Science**
E. Alison Holman, F.N.P., Ph.D. University of California, Irvine, Associate Professor of Program in Nursing Science

Jung-Ah Lee, Ph.D. University of Washington, Assistant Professor of Program in Nursing Science

Bernadette M. Milbury, M.S.N. University of California, Los Angeles, Health Sciences Assistant Clinical Professor of Program in Nursing Science

Maureen Movius, M.N. University of California, Los Angeles, Health Sciences Associate Clinical Professor of Program in Nursing Science

Ruth A. Mulnard, D.N.Sc. University of San Diego, Associate Professor of Program in Nursing Science

Ellen Olshansky, Ph.D. University of California, San Francisco, Professor of Program in Nursing Science

Susanne J. Phillips, F.N.P., M.S.N. California State University, Long Beach, Health Sciences Clinical Professor of Program in Nursing Science

Julie M. Rousseau, C.N.M., Ph.D. Columbia University, Health Sciences Assistant Clinical Professor of Program in Nursing Science

Kathleen Saunders, M.S.N. California State University, Dominguez Hills, Health Sciences Associate Clinical Professor of Program in Nursing Science

Susan M. Tiso, D.N.P. George Washington University, Health Sciences Clinical Professor of Program in Nursing Science

Courses

NUR SCI 92. Compassion in Health Care. 1 Unit.
An overview of the importance of compassion in health care, providing examples from a variety of health care professions through lectures and discussion.

Grading Option: Pass/no pass only.

NUR SCI 110W. Frameworks for Professional Nursing Practice. 5 Units.
Conceptual frameworks for professional practice. Scope of professional nursing, jurisprudence and ethics, professional interpersonal relationships, and health care delivery systems in the context of the social, political, and economic environments. Socialization of the student for professional roles in nursing.

Corequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A.
Prerequisite: BIO SCI D170 and BIO SCI E109. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Nursing Science majors only.

NUR SCI 112LA. Foundations of Professional Practice. 3 Units.
Development of skills in communication, interviewing, functional and physical health assessment across the life span, the art and science of human care, and clinical judgment.

Corequisite: NUR SCI 110W and NUR SCI 114A and NUR SCI 118A.
Prerequisite: BIO SCI E109 and BIO SCI D170.

Restriction: Nursing Science majors only.

NUR SCI 112LB. Foundations of Professional Practice. 4 Units.
Development of skills in communication, interviewing, functional and physical health assessment across the life span, the art and science of human care, and clinical judgment.

Corequisite: NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135.
Prerequisite: NUR SCI 112LA and NUR SCI 110W and NUR SCI 114A and NUR SCI 118A.

Restriction: Nursing Science majors only.

NUR SCI 114A. Applied Pharmacology I. 2 Units.
Presents principles of pharmacology applied to interventions in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education are included.

Corequisite: NUR SCI 110W and NUR SCI 118A and NUR SCI 112LA.
Prerequisite: BIO SCI E109 and BIO SCI D170.

Restriction: Nursing Science majors only.
NUR SCI 114B. Applied Pharmacology II. 2 Units.
Presents principles of pharmacology applied to interventions in pathophysiologic states across the life span. Discussion of the major drug groups with implications for monitoring, drug administration, toxicity, and patient education are included.

Corequisite: NUR SCI 118B and NUR SCI 112LB and NUR SCI 125 and NUR SCI 135.
Prerequisite: NUR SCI 114A and NUR SCI 118A and NUR SCI 110W and NUR SCI 112LA.

Restriction: Nursing Science majors only.

NUR SCI 118A. Human Health and Disease I. 2 Units.
Presents content on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Emphasis on critical thinking, application of concepts to clinical practice, and related research.

Corequisite: NUR SCI 114A and NUR SCI 112LA and NUR SCI 110W.
Prerequisite: BIO SCI E109 and BIO SCI D170.

Restriction: Nursing Science majors only.

NUR SCI 118B. Human Health and Disease II. 2 Units.
Presents content on pathologic alterations in physiologic processes in cells, tissues, organs, and systems across the life span. Emphasis on critical thinking, application of concepts to clinical practice, and related research.

Corequisite: NUR SCI 114B and NUR SCI 112LB and NUR SCI 125 and NUR SCI 135.
Prerequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and NUR SCI 110W.

Restriction: Nursing Science majors only.

NUR SCI 120. Adult Health Care. 8 Units.
Restorative, perioperative, supportive care of adults with acute/chronic alterations in oxygenation, regulation, immune response, elimination, metabolism, mobility, cognition, and substance abuse. Concurrent practicum occurs in inpatient medical-surgical units, perioperative units and outpatient clinics utilizing critical thinking and research skills.

Corequisite: NUR SCI 140.
Prerequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135.

Restriction: Nursing Science majors only.

NUR SCI 125. Research Methods and Applications in Health Care. 4 Units.
Foundational concepts of research in health care. Emphasizes critical evaluation and interpretation of research for application in practice.

Corequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 135.
Prerequisite: NUR SCI 110W and NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and a basic statistics course.

Restriction: Nursing Science majors only.

NUR SCI 130. Maternity and Women’s Health Care. 8 Units.
Provides didactic and clinical experiences in nursing management of women’s wellness across the lifespan, the childbirth process, and newborn care. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Corequisite: NUR SCI 132.
Prerequisite: NUR SCI 120 and NUR SCI 140 and PSYCH 120D.

Restriction: Nursing Science majors only.

NUR SCI 132. Pediatrics: Care of Children and Families. 7 Units.
Provides didactic and clinical experiences in nursing management of infants, children, and adolescents with acute, chronic and/or life-threatening conditions. Incorporates concepts of family-centered care, teamwork and collaboration, patient safety, quality improvement and informatics, utilizing an evidence-based practice approach.

Corequisite: NUR SCI 130.
Prerequisite: NUR SCI 120 and NUR SCI 140 and PSYCH 120D.

Restriction: Nursing Science majors only.
NUR SCI 135. Older Adult Health Care. 2 Units.
Theories of aging and application of principles of gerontology in health maintenance of older adults. Concepts and principles of rehabilitation and palliative care.

Corequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125.
Prerequisite: NUR SCI 112LA and NUR SCI 114A and NUR SCI 118A and NUR SCI 110W.

Restriction: Nursing Science major only.

NUR SCI 140. Human Behavior and Mental Health Care. 8 Units.
Biopsychosocial and cultural influences on promotion and restoration of mental health in adults and adolescents. Assessment, classification, and care of clients with mental health problems and/or substance abuse. Concurrent practicum in adult/adolescent inpatient psychiatric units and outpatient mental health clinics.

Corequisite: NUR SCI 120.
Prerequisite: NUR SCI 112LB and NUR SCI 114B and NUR SCI 118B and NUR SCI 125 and NUR SCI 135.

Restriction: Nursing Science majors only.

NUR SCI 150. Critical and Specialty Health Care. 6 Units.
Delivery of patient centered care for individuals with life-threatening alterations in health status utilizing technology and pharmacology for life support. Concurrent practicum in critical care units emphasizes collaboration, team work, and quality improvement in safe care delivery.

Corequisite: NUR SCI 160 and NUR SCI 179A.
Prerequisite: NUR SCI 130 and NUR SCI 132.

Restriction: Nursing Science majors only.

NUR SCI 160. Leadership and Management in Health Care. 4 Units.
Principles, concepts, and theories related to organizations, management, leadership, decision-making, and group process applied to the delivery of health care. The professional nurse using evidenced based practice, collaboration and informatics is incorporated in concurrent practicum emphasizing safe patient care delivery.

Corequisite: NUR SCI 150 and NUR SCI 179A.
Prerequisite: NUR SCI 130 and NUR SCI 132.

Restriction: Nursing Science majors only.

NUR SCI 170. Community-Based Health Care. 6 Units.
Epidemiology, primary health care promotion, and disease prevention applied to nursing care of individuals, families, groups, and communities. Includes sociocultural, political, economic, and environmental influences. Concepts and methods of assessing populations and communities incorporated in concurrent practicum.

Corequisite: NUR SCI 175L and NUR SCI 179B.
Prerequisite: NUR SCI 150 and NUR SCI 160 and NUR SCI 179A.

Restriction: Nursing Science majors only.

NUR SCI 175L. Clinical Preceptorship. 8 Units.
Independent study course focusing on critical thinking skills for nursing practice in selected clinical areas of interest to the student. The clinical experience focus will be on core competencies: patient-centered care, evidence-based practice, quality improvement, safety and informatics.

Corequisite: NUR SCI 170 and NUR SCI 179B.
Prerequisite: NUR SCI 150 and NUR SCI 160 and NUR SCI 179A.

Grading Option: Pass/no pass only.

Restriction: Nursing Science majors only.

NUR SCI 179A. Scholarly Concentration I. 2 Units.
Independent study focusing on the research process to provide the evidence basis for a nursing protocol in an area of interest to the student.

Corequisite: NUR SCI 150 and NUR SCI 160.
Prerequisite: NUR SCI 130 and NUR SCI 132.

Restriction: Nursing Science majors only.
NUR SCI 179B. Scholarly Concentration II. 2 Units.
Second of two sequential courses focusing on analysis of research as evidence to support a nursing protocol in an area of interest to the student. Emphasizes formal development and dissemination of information to peers in a podium/poster session.

Corequisite: NUR SCI 170 and NUR SCI 175L.
Prerequisite: NUR SCI 179A.
Restriction: Nursing Science majors only.

NUR SCI 199. Independent Study in Nursing Science. 1-4 Units.
Original research with Nursing Science faculty.
Repeatability: May be repeated for credit unlimited times.

NUR SCI 200. Research Methods and Evaluation for Evidence-Based Practice. 3 Units.
Clinical research methods and evaluation procedures relevant to evidence-based advanced nursing practice.
Prerequisite: Undergraduate statistics course; undergraduate nursing research course.
Restriction: Nursing Science graduate students only.

NUR SCI 210. Advanced Pathophysiology. 3 Units.
Principles of normal body functioning and pathophysiologic changes that occur as a result of compensatory mechanisms and disease. Physical and psychological aspects of altered health are explored from the cellular to the level of the total body system.
Restriction: Nursing Science graduate students only.

NUR SCI 212. Philosophy of Science and Theory Development in Nursing Science. 4 Units.
Development of philosophy of science in relation to nursing science, scholarship, and practice; emphasis on inquiry, scientific reasoning, and contemporary philosophical thought; historical and contemporary influences on nursing science theory development; evaluation/analysis of interdisciplinary theory and application to nursing research.
Restriction: Graduate students only.

NUR SCI 215. Health Promotion/Disease Prevention. 3 Units.
Covers the evidence-based national clinical preventive services guidelines for health promotion and disease prevention. Emphasizes counseling about personal health behaviors, screening tests for the early detection of risk factors and disease, immunizations and chemo-prophylaxis.
Restriction: Nursing Science graduate students only.

NUR SCI 220. Nursing Science and the Ecology of Healthy Communities. 2 Units.
Seminar in nursing science research contributions and opportunities as they pertain to the ecology of health in local, national, and global communities. Emphasis on methodological and ethical issues, research gaps, and clinical translational opportunities.
Restriction: Graduate students only.

NUR SCI 222A. Seminar in Clinical Translational Science. 2 Units.
Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches.
Restriction: Graduate students only.

NUR SCI 222B. Seminar in Clinical Translational Science. 2 Units.
Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches.
Prerequisite: NUR SCI 222A.
Restriction: Graduate students only.

NUR SCI 222C. Seminar in Clinical Translational Science. 2 Units.
Discussion of clinical translational science methods in the context of nursing science research. Emphasis placed on interdisciplinary and community participatory research approaches.
Prerequisite: NUR SCI 222B.
Restriction: Graduate students only.
NUR SCI 225A. Advanced Pharmacology. 2 Units.
Principles of pharmacology that serve as a foundation for the pharmacotherapeutic management of patients evaluated and treated by advanced practice nurses. Emphasis includes that application of pharmacokinetic and pharmacodynamic principles.

Restriction: Nursing Science graduate students only.

NUR SCI 225B. Advanced Pharmacology. 3 Units.
Principles of pharmacology that serve as a foundation for the pharmacotherapeutic management of patients evaluated and treated by advanced practice nurses. Emphasis includes that application of pharmacokinetic and pharmacodynamic principles.

Prerequisite: NUR SCI 225A.

Restriction: Nursing Science graduate students only.

NUR SCI 230. Advanced Health and Physical Assessment. 3 Units.
Application of theoretical concepts related to comprehensive health assessment of patients across the lifespan. Analysis, synthesis, and application of comprehensive health assessment data.

Corequisite: NUR SCI 230L.

Restriction: Nursing Science graduate students only.

NUR SCI 230L. Advanced Health and Physical Assessment Laboratory. 1 Unit.
Clinical laboratory course for the application of concepts related to comprehensive health assessment of patients across the lifespan.

Corequisite: NUR SCI 230.

Restriction: Nursing Science graduate students only.

NUR SCI 245A. Primary Care. 3 Units.
Assessment and management of acute or episodic problems affecting patients and families across the lifespan. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated.

Prerequisite: NUR SCI 210 and NUR SCI 230.

Restriction: Nursing Science graduate students only.

NUR SCI 245B. Primary Care. 3 Units.
Assessment and management of acute or episodic problems affecting patients and families across the lifespan. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated.

Prerequisite: NUR SCI 245A.

Restriction: Nursing Science graduate students only.

NUR SCI 246. Qualitative Research Designs in Nursing Science. 4 Units.
Seminar in qualitative research philosophies, methods and analysis in nursing science clinical research. Consideration of population access and sampling, ethics, data management, analytical approaches, and translational potential.

Corequisite: NUR SCI 212.

NUR SCI 247. Quantitative Research Designs in Nursing Science. 4 Units.
Seminar in experimental and survey research designs, methods, and analysis in nursing science clinical research. Consideration of measurement issues, mixed methods models, population access and sampling, data management, analytical approaches, and translational potential.

Prerequisite: NUR SCI 212.

NUR SCI 250. Primary Care Women’s Health. 3 Units.
Primary health care needs of women including adolescent, adult and aging adults. Emphasizes assessment, diagnosis, prevention, management, and education of common gynecologic and family planning health care needs.

Prerequisite: NUR SCI 210 and NUR SCI 230.

Restriction: Nursing Science graduate students only.
NUR SCI 255. Primary Care Obstetrics. 3 Units.
Assessment and management of women during pregnancy. Diagnostics, pharmacology, pathophysiology and therapeutics are integrated. Includes assessment, differential diagnosis, management, patient/family education, & counseling related to normal pregnancy care.
Prerequisite: NUR SCI 245A and NUR SCI 210 and NUR SCI 230 and NUR SCI 230L.
Restriction: Nursing Science graduate students only.

NUR SCI 260A. Primary Care Adult/Geriatric. 3 Units.
Assessment and management of acute or episodic problems affecting adult and geriatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutic are integrated.
Prerequisite: NUR SCI 245A.
Restriction: Nursing Science graduate students only.

NUR SCI 260B. Primary Care Adult/Geriatric. 3 Units.
Assessment and management of acute or episodic problems affecting adult and geriatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutic are integrated.
Prerequisite: NUR SCI 260A.
Restriction: Nursing Science graduate students only.

NUR SCI 270. Primary Care Pediatrics. 3 Units.
Assessment and management of acute or episodic problems affecting pediatric patients and their families. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated.
Prerequisite: NUR SCI 245A and NUR SCI 210 and NUR SCI 230 and NUR SCI 230L.
Restriction: Nursing Science graduate students only.

NUR SCI 280. Aging and Chronic Illness. 3 Units.
Assessment and management of the geriatric patient. Diagnostics, pharmacology, pathophysiology, and therapeutics are integrated. Includes assessment, differential diagnosis, management, patient/family education, and counseling related to aging.
Prerequisite: NUR SCI 260B.
Restriction: Nursing Science graduate students only.

NUR SCI 281. Frameworks for Advanced Professional Practice in Nursing. 3 Units.
Provides an orientation to the scope and standards of advanced professional nursing practice. Principles of jurisprudence, ethics, and advocacy are introduced along with conceptual frameworks for nursing practice.
Restriction: Nursing Science graduate students only.

NUR SCI 282. Human Behavior and Mental Health Care for Advanced Practice. 3 Units.
Focuses on theory and research related to the psychiatric illness and sociocultural factors such as race, ethnicity, gender, and class which may impact patients across their life span. Emphasis includes assessment, diagnosis, management, patient/family education, lifestyle modification, and counseling strategies.
Restriction: Nursing Science graduate students only.

NUR SCI 283. Primary Care Procedures. 3 Units.
Introduces the theoretical basis for common procedures performed in primary care clinical practice. Focus includes EKG interpretation, x-ray interpretation, minor surgery and orthopaedic procedures.
Prerequisite: NUR SCI 245A.
Restriction: Nursing Science graduate students only.

NUR SCI 284. Advanced Practice Scholarly Concentration. 3 Units.
Independent study focusing on critique, analysis, and synthesis of research evidence as a basis for advanced practice nursing in an area of interest to the student.
Prerequisite: NUR SCI 200.
Restriction: Nursing Science graduate students only.
NUR SCI 285. APN Clinical Practicum I. 2 Units.
Clinical application of theory and research related to the advanced assessment and health promotion of patients across the lifespan.
Prerequisite: NUR SCI 210 and NUR SCI 230.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Nursing Science graduate students only.

NUR SCI 286. APN Clinical Practicum II. 4 Units.
Clinical field study applying theory, research, and developing clinical skills related to the provision of care to patients and their families in increasingly complex clinical situations.
Prerequisite: NUR SCI 285.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Nursing Science graduate students only.

NUR SCI 287. APN Clinical Practicum III. 5 Units.
Clinical application of theory and research through clinical experiences in selected primary care settings designed to provide students with competencies in the assessment, diagnosis, management, and education/counseling in selected populations.
Prerequisite: NUR SCI 286.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Nursing Science graduate students only.

NUR SCI 288. APN Clinical Practicum IV. 6 Units.
Continued clinical application of theory and research through clinical experiences in selected primary care settings designed to provide students with competencies in the assessment, diagnosis, management, and education/counseling in selected populations.
Prerequisite: NUR SCI 287.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Nursing Science graduate students only.

NUR SCI 289. APN Clinical Practicum V. 6 Units.
Culminating clinical experience serves as a transition from the student role to that of the advanced practice nurse.
Prerequisite: NUR SCI 288.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Nursing Science graduate students only.

NUR SCI 294. Directed Study in Vulnerable Populations. 1-4 Units.
Independent study that focuses on individually designed clinical learning experiences and goals within a selected vulnerable population, such as the homeless, veterans, minority groups, etc. Students work in a clinical setting addressing health care needs of the vulnerable population(s).
Prerequisite: NUR SCI 286.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 2 times.
Restriction: Nursing Science graduate students only.
NUR SCI 295. Directed Study in Latino Health Care. 2-4 Units.
Independent study in Latino health care.
Prerequisite: NUR SCI 286. Spanish language skills.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 2 times.
Restriction: Nursing Science graduate students only.

NUR SCI 296. Doctoral Dissertation Reading and Writing. 4-12 Units.
Dissertation research with Nursing Sciences faculty.
Prerequisite: Advancement to Candidacy.
Repeatability: May be repeated for credit unlimited times.

NUR SCI 298. Directed Studies in Nursing Science. 1-4 Units.
Directed study with Nursing Science faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

NUR SCI 299. Independent Study in Nursing Science. 1-4 Units.
Independent research with Nursing Science faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

NUR SCI 399. University Teaching. 4 Units.
Limited to Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Department of Pharmaceutical Sciences

147 Bison Modular; 949-824-1239
http://www.pharmsci.uci.edu
A. Richard Chamberlin, Department Chair

The Department of Pharmaceutical Sciences offers a curriculum focusing on the preparation of students for professional positions in the pharmaceutical production, control, and development sectors of the pharmaceutical and biotechnology industry or for graduate studies in pharmaceutics, medicinal chemistry, pharmacology, analytical chemistry, medicine, and pharmacy. Collaborative interdisciplinary research will be supported by joint faculty appointments shared with other UCI departments.

Degrees

<table>
<thead>
<tr>
<th>Program</th>
<th>Degree</th>

</thead>
<tbody>
<tr>
<td>Pharmaceutical Sciences</td>
<td>B.S.</td>
</tr>
<tr>
<td>Pharmacological Sciences</td>
<td>M.S., Ph.D.</td>
</tr>
</tbody>
</table>

* Offered in conjunction with the Department of Pharmacology.

In addition, the Gateway Program in Medicinal Chemistry and Pharmacology (MCP), established through the joint efforts of the Departments of Chemistry, Pharmacology, Molecular Biology and Biochemistry, and Pharmaceutical Sciences, offers a graduate program of study.

Undergraduate Program

The B.S. degree program in Pharmaceutical Sciences trains students in a multidisciplinary approach so that they can contribute to the advancement of new pharmaceutical technologies such as accelerated chemical synthesis, molecular-based assays using cloned enzymes and cloned metabolizing enzymes, combinatorial chemistry, in vitro biopharmaceutical techniques, and gene therapies. Pharmaceutical scientists are rapidly changing the field of drug discovery and development. The graduates of this program may seek employment in public and private sectors or choose to pursue graduate degrees such as a Ph.D., M.D., or Pharm.D.

Undergraduate Honors. Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 12 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at a University of California campus. Other important factors are considered visit at Honors Recognition (http://catalogue.uci.edu/informationforadmittedstudents/academicadvisingandhonors/#honorsopportunitiestext).

Admission to the Major

Students may be admitted to the Pharmaceutical Sciences major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities.

Information about change-of-major policies is available in the Department of Pharmaceutical Sciences office and at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website.

Transfer Students: All applicants must have completed the following required courses with a grade of B- or better in all courses: one year of general chemistry courses with laboratory courses equivalent to UCI’s CHEM 1A-CHEM 1B-CHEM 1C and CHEM 1LC-CHEM 1LD and one year of biology courses equivalent to UCI’s BIO SCI 93 and BIO SCI 94. In addition, all applicants must have a cumulative GPA of 3.0 or better. Additional courses that are recommended, but not required: one year of calculus, one year of calculus-based physics with laboratory, one year of organic chemistry with laboratory, and additional articulated lower-division biology requirements.

Requirements for the B.S. Degree in Pharmaceutical Sciences

All students must meet the University Requirements (p. 71).

Major Requirements

A. Lower-Division Requirements:

1. Select one of the following sequences:

<table>
<thead>
<tr>
<th>Sequence</th>
<th>General Chemistry and General Chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A- 1B- 1C</td>
<td>and General Chemistry and General Chemistry</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Sequence</th>
<th>Honors General Chemistry and Honors General Chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM H2A- H2B- H2C</td>
<td>and Honors General Chemistry and Honors General Chemistry</td>
</tr>
</tbody>
</table>

and select one of the following lab sequences:
<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1LC-1LD</td>
<td>General Chemistry Laboratory and General Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM H2LA-H2LB-H2LC</td>
<td>Honors General Chemistry Laboratory and Honors General Chemistry Laboratory and Honors General Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM M2LA-M2LB-M3LC</td>
<td>Majors General Chemistry Laboratory and Majors General Chemistry Laboratory and Majors Quantitative Analytical Chemistry Laboratory</td>
</tr>
</tbody>
</table>

Select one of the following organic chemistry sequences and accompanying labs:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 51A-51B-51C</td>
<td>Organic Chemistry and Organic Chemistry and Organic Chemistry</td>
</tr>
<tr>
<td>CHEM 51LB-51LC</td>
<td>Organic Chemistry Laboratory and Organic Chemistry Laboratory</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM H52A-H52B-H52C</td>
<td>Honors Organic Chemistry and Honors Organic Chemistry and Honors Organic Chemistry</td>
</tr>
<tr>
<td>CHEM H52LA-H52LB-H52LC</td>
<td>Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory</td>
</tr>
</tbody>
</table>

2. Complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 2A-2B</td>
<td>Single-Variable Calculus and Single-Variable Calculus</td>
</tr>
</tbody>
</table>

and select one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 2D</td>
<td>Multivariable Calculus</td>
</tr>
<tr>
<td>MATH 3A</td>
<td>Introduction to Linear Algebra</td>
</tr>
<tr>
<td>STATS 7</td>
<td>Basic Statistics</td>
</tr>
<tr>
<td>STATS 8</td>
<td>Introduction to Biological Statistics</td>
</tr>
</tbody>
</table>

3. Select one of the following physics sequences and accompanying labs:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 3A-3B-3C</td>
<td>Basic Physics and Basic Physics and Basic Physics</td>
</tr>
<tr>
<td>PHYSICS 3LB-3LC</td>
<td>Basic Physics Laboratory and Basic Physics Laboratory</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSICS 7C-7D-7E</td>
<td>Classical Physics and Classical Physics and Classical Physics</td>
</tr>
<tr>
<td>PHYSICS 7LC-7LD</td>
<td>Classical Physics Laboratory and Classical Physics Laboratory</td>
</tr>
</tbody>
</table>

4. Complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 93</td>
<td>From DNA to Organisms</td>
</tr>
<tr>
<td>BIO SCI 94</td>
<td>From Organisms to Ecosystems</td>
</tr>
<tr>
<td>BIO SCI 97</td>
<td>Genetics</td>
</tr>
<tr>
<td>BIO SCI 98</td>
<td>Biochemistry</td>
</tr>
<tr>
<td>BIO SCI 99</td>
<td>Molecular Biology</td>
</tr>
</tbody>
</table>

5. Complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHRMSCI 42</td>
<td>Life 101</td>
</tr>
</tbody>
</table>

**B. Upper-Division Requirements:**

Complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Course Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 100</td>
<td>Scientific Writing</td>
</tr>
<tr>
<td>BIO SCI 194S</td>
<td>Safety and Ethics for Research</td>
</tr>
<tr>
<td>PHRMSCI 120-120L</td>
<td>Human Physiology and Human Physiology Lab</td>
</tr>
</tbody>
</table>
PHRMSCI 170A- 170B  Molecular Pharmacology I
                        and Molecular Pharmacology II

PHRMSCI 171  Physical Biochemistry

PHRMSCI 172  Topics in Pharmaceutical Sciences

PHRMSCI 173  Pharmacotherapy

PHRMSCI 174- 174L  Biopharmaceutics and Nanomedicine
                        and Biopharmaceutics & Nanomedicine Lab

PHRMSCI 176  Ethics Conduct of Research

PHRMSCI 177- 177L  Medicinal Chemistry
                        and Medicinal Chemistry Laboratory

C. Upper-Division Electives (8 units):

The upper-division electives may be selected from the following: ¹

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI D103</td>
<td>Cell Biology</td>

</tbody>
</table>

1 Course may not be used to satisfy more than one requirement.

Upper-Division Writing Requirement: Pharmaceutical Sciences majors satisfy the upper-division writing requirement by completing BIO SCI 100 with a grade of C or better, followed by the completion of PHRMSCI 174L and PHRMSCI 177L. Students must earn a grade of C or better in each of these laboratory courses.

NOTE: Double majors with Pharmaceutical Sciences, Public Health Sciences, Nursing Science, Biomedical Engineering: Premedical, or with any of the School of Biological Sciences majors are not permitted.

Graduate Programs

Graduate Student Affairs: (949) 824-1991

Andrej Luptak, Graduate Program Advisor/Vice Chair of Graduate Programs for the Pharmaceutical Sciences Department

The Department of Pharmacology and Pharmaceutical Sciences join forces to offer an interdisciplinary program leading to the Ph.D. degree in Pharmacological Sciences with a concentration in Pharmacology or in Pharmaceutical Sciences. For complete program information, see the Interdisciplinary Studies (p. 1083) section of the Catalogue.

The Department also admits students through the Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP). The one-year graduate MCP Gateway Program is designed to function in concert with selected department programs, including the Ph.D. in Pharmacological Sciences. Upon successful completion of the MCP curriculum at the end of their first year, students choose a faculty advisor who is affiliated with one of the participating departments, and transition into their “home” department to complete the remaining degree requirements. They will receive their Ph.D. degree from the department of their chosen advisor. Detailed information is available at Department of Pharmaceutical Sciences (http://www.pharmsci.uci.edu/graduate) website.

Faculty

Claudia Benavente, Ph.D. University of Arizona, Assistant Professor of Pharmaceutical Sciences
Bruce Blumberg, Ph.D. University of California, Los Angeles, Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

A. Richard Chamberlin, Ph.D. University of California, San Diego, Department Chair and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (chemical biology, organic and synthetic)

Olivier Civelli, Ph.D. Swiss Federal Institute of Technology in Zurich, Department Chair and Eric L. and Lila D. Nelson Chair in Neuropharmacology and Professor of Pharmacology; Developmental and Cell Biology; Pharmaceutical Sciences (novel neuroactive molecules)

Melanie Cocco, Ph.D. Pennsylvania State University, Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences

John P. Fruehauf, M.D. Rush University, Professor of Medicine; Biological Chemistry; Biomedical Engineering; Pharmaceutical Sciences (in-vitro cancer models using 3-D tissue systems to predict drug response)

Daniel W. Gil, Ph.D. University of Pennsylvania, Associate Adjunct Professor of Pharmaceutical Sciences

Celia Goulding, Ph.D. King's College London, Associate Professor of Molecular Biology and Biochemistry; Pharmaceutical Sciences

Stephen Hanessian, Ph.D. Ohio State University, Director of Medicinal Chemistry and Pharmacology Graduate Program and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (organic chemistry)

Mahtab F. Jafari, Ph.D. University of California, San Francisco, Vice Chair of the Undergraduate Program in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences; Ecology and Evolutionary Biology; Pharmacology

Young Jik Kwon, Ph.D. University of Southern California, Associate Professor of Pharmaceutical Sciences; Biomedical Engineering; Chemical Engineering and Materials Science; Molecular Biology and Biochemistry (gene therapy, drug delivery, cancer-targeted therapeutics, combined molecular imaging and therapy, cancer vaccine)

Anthony D. Long, Ph.D. McMaster University, Professor of Ecology and Evolutionary Biology; Pharmaceutical Sciences

Andrej Luptak, Ph.D. Yale University, Vice Chair of Graduate Programs in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry (chemical biology)

David L. Mobley, Ph.D. University of California, Davis, Associate Professor of Pharmaceutical Sciences; Chemistry (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Lawrence Plon, PHAR University of Southern California, Assistant Adjunct Professor of Pharmaceutical Sciences

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor’s Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Jennifer A. Prescher, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences (chemical biology, organic and synthetic)

Paolo Sassone-Corsi, Ph.D. University of Naples Federico II, Donald Bren Professor and Professor of Biological Chemistry; Microbiology and Molecular Genetics; Pharmaceutical Sciences

Samuel E. Schriner, Ph.D. University of Washington, Lecturer with Potential Security of Employment of Pharmaceutical Sciences

Robert Spitale, Ph.D. University of Rochester, Assistant Professor of Pharmaceutical Sciences

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, UCI Chancellor's Fellow and Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences

Sun (Coco) Yang, Pharm D. Chinese Academy of Medical Science & Peking Union Medical College, Assistant Adjunct Professor of Pharmaceutical Sciences

Weian Zhao, Ph.D. McMaster University, Assistant Professor of Pharmaceutical Sciences; Biomedical Engineering (stem cell therapy, diagnostics, biosensors, nano- and microtechnology, aptamers)

Courses

**PHRMSCI 1. Introduction to Pharmaceutical Sciences. 1 Unit.**

Introduction to the scientific disciplines that comprise the multidisciplinary field of pharmaceutical sciences. Students gain an appreciation of basic concepts in the relevant physical, biological, and clinical sciences and how they fit together in the search for new medicines.

Grading Option: Pass/no pass only.
PHRMS 42. Life 101. 1 Unit.
Covers the latest scientific work on the impact of nutrition, exercise, and lifestyle choices on mental and physical health. The course will motivate students to make positive changes by fostering personal growth. Course may be offered online.

PHRMS 90. Speaking about Science. 4 Units.
Introductory courses in research, composition, organization, and delivery of informative and persuasive speeches for various purposes, including scientific talks. Includes strategies for reducing speaker apprehension.

PHRMS 120. Human Physiology. 4 Units.
Focuses on anatomy and physiology—organism structure and function, respectively—as they relate to human diseases and their treatment. Prepares students for more advanced studies in pharmacology, medicinal chemistry, biopharmaceutics, and other disciplines encompassing pharmaceutical sciences.
Prerequisite: BIO SCI 99.

PHRMS 120L. Human Physiology Lab. 3 Units.
Through an active learning environment, provides practical knowledge of topics covered in Human Physiology as they relate to health care professions. Participation in group projects that strengthen basic laboratory skills and teach students to work more efficiently in a team.
Corequisite: PHRMS 120.
Prerequisite: BIO SCI 194S or BIO SCI E109.

PHRMS 170A. Molecular Pharmacology I. 4 Units.
Molecular basis of drug-receptor action at the molecular and cellular levels. Structure-function of drug targets emphasizing enzymes, ion channels, and membrane transport proteins. Understanding how the drugs’ mechanisms of action contribute to the development of more efficacious and safer drugs. Course may be offered online.
Corequisite: CHEM 51C or CHEM H52C.
Prerequisite: (CHEM 51C or CHEM H52C) and (PHRMS 120 or BIO SCI E109).
Restriction: Pharmaceutical Science majors have first consideration for enrollment.

PHRMS 170B. Molecular Pharmacology II. 4 Units.
Mechanism-based overview of pharmacology and therapeutic drugs in the fields of autonomic nervous system, central nervous system, and antimicrobials.
Prerequisite: PHRMS 170A.

PHRMS 171. Physical Biochemistry. 4 Units.
Thermodynamics and kinetic fundamentals as applied to problems relevant to pharmaceutical sciences such as receptor/enzyme-ligand interactions. Fundamentals of biophysical methods used in the pharmaceutical sciences including structure determination and biomolecular spectroscopy.
Prerequisite: MATH 2B and PHYSICS 3C and (CHEM 1C or CHEM H2C) and BIO SCI 99.
Restriction: Pharmaceutical Sciences majors have first consideration for enrollment.

PHRMS 172. Topics in Pharmaceutical Sciences. 2 Units.
Presents information about various fields of research, study, careers, and graduate school opportunities in pharmaceutical sciences. Taught by guest lecturers from various disciplines including 199 research course faculty. Helps Pharmaceutical Sciences students select electives appropriate to their future goals.
Prerequisite: BIO SCI 99 and as a prerequisite or corequisite: CHEM 51C or CHEM H52C.

PHRMS 173. Pharmacotherapy. 4 Units.
An exploration of the clinical application of medications to selected disease states. Focus is on an understanding of underlying principles of pharmacology and how this knowledge can be applied to treatment of diseases.
Prerequisite: Prerequisite or corequisite: PHRMS 170B.
PHRMSCI 174. Biopharmaceutics and Nanomedicine. 4 Units.
Introduces theories and tools of new drug formulations. Particularly new novel therapeutics based on biological materials, pathological characteristics utilized to achieve the maximum efficacy and specificity, and drug delivery systems based on emerging nanotechnology are extensively discussed.
Prerequisite: PHRMSCI 170B.
Restriction: Pharmaceutical Sciences majors have first consideration for enrollment.

PHRMSCI 174L. Biopharmaceutics & Nanomedicine Lab. 3 Units.
Introduction to cancer drug screening using cellular models and confirmation of comprehensive therapeutic efficacy using a live animal model. Includes basic cell culture, cytotoxicity assays, cell analysis, drug circulation test, and tumor eradication and imaging experiments.
Prerequisite: PHRMSCI 170B and BIO SCI 100.

PHRMSCI 176. Ethics Conduct of Research. 2 Units.
Covers the ethical responsibilities of biomedical scientists. Topics include, as discussions and case studies, the high standards of science, the responsible conduct of research, animal experimentation, and clinical trials as they relate to the pharmaceutical sciences.

PHRMSCI 177. Medicinal Chemistry. 4 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128).
Same as CHEM 177.
Restriction: Pharmaceutical Science majors have first consideration for enrollment.

PHRMSCI 177L. Medicinal Chemistry Laboratory. 2 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity. Materials fee.
Corequisite: PHRMSCI 177.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIO SCI 100 and (BIO SCI 98 or CHEM 128).
Same as CHEM 177L.
Restriction: Pharmaceutical Science majors have first consideration for enrollment.

PHRMSCI 177LW. Medicinal Chemistry Lab. 2 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.
Corequisite: CHEM 177.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128) and BIO SCI 100.
Same as CHEM 177LW.

PHRMSCI 197. Professional Internship. 4 Units.
Provides students with opportunity to develop leadership and professional skills necessary for competitive placement in their chosen industry. Students gain new and field-specific skills outside the classroom environment while participating in a supervised internship for a total of 100 hours.
Grading Option: Pass/no pass only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Seniors only.
PHRMSCI 198. Independent Study in Pharmaceutical Sciences. 1-4 Units.
Students interested in independent study should arrange with a faculty member to sponsor and supervise such work. A time commitment of three hours per week per unit is expected. A written report is required at the end of each quarter.

Repeatability: May be taken for credit for 4 units.

PHRMSCI 199. Undergraduate Research. 1-4 Units.
Original research in the laboratory of Pharmaceutical Sciences faculty. Attendance at regular research group meetings is also generally expected, and a quarterly written report is required. Strongly recommended for students considering research careers and/or graduate degree programs.

Repeatability: May be repeated for credit unlimited times.

PHRMSCI H199. Honors Research in Pharmaceutical Sciences. 4 Units.
Undergraduate honors research in Pharmaceutical Sciences. A student time commitment of 10-15 hours per week is required.

Repeatability: May be repeated for credit unlimited times.

PHRMSCI 223. Biological Macromolecules. 4 Units.
Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.

Same as CHEM 223.

PHRMSCI 250A. Current Topics in Pharmaceutical Sciences. 1 Unit.
Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: MCP Gateway Program students only.

PHRMSCI 250B. Current Topics in Pharmaceutical Sciences. 1 Unit.
Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Prerequisite: PHRMSCI 250A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: MCP Gateway Program students only.

PHRMSCI 250C. Current Topics in Pharmaceutical Sciences. 1 Unit.
Intended to expose students to the primary literature and current research in the field of Pharmaceutical Sciences. Students analyze and present information for discussion. Guest speakers from academia and industry may participate throughout the quarter.

Prerequisite: PHRMSCI 250B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Restriction: MCP Gateway Program students only.

PHRMSCI 270. Advanced Pharmacology. 4 Units.
Provides a mechanism-based overview of pharmacology with strong emphasis on clinical application of pharmacology. Students will learn the most recent advances in pharmacology as they relate to drug discovery, development, and clinical application.

Restriction: Graduate students only.
PHRMSCI 272. Special Topics in Pharmaceutical Sciences. 2-4 Units.
Reserved for current topics of particular interest in areas of pharmaceutical sciences that are not covered by other courses. The subject will vary from year to year, highlighting, for example, significant emerging fields or highly specialized but vital research areas.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PHRMSCI 274. Nanomedicine . 4 Units.
Students will learn the current challenges in administering drugs to treat highly challenging diseases, the background theories of drug and gene delivery systems, and apply their knowledge in designing innovative forms of therapeutics formulations.

Restriction: Graduate students only.

PHRMSCI 277. Medicinal Chemistry. 4 Units.
Fundamentals of medicinal chemistry covering diverse aspects of drug design, discovery, synthesis, and development. Molecular basis of drug action with an emphasis on the structure-to-function continuum.

PHRMSCI 278. Stem Cell Therapy . 4 Units.
Introduces new paradigms in regenerative medicine particularly those that involve stem cells, and emerging molecular, nano- and micro-engineered tools for in vivo imaging that is critical for studying and monitoring regeneration.

(Design units: 0)
Same as BME 216.
Restriction: Graduate student only.

PHRMSCI 280. Graduate Research. 1-12 Units.
Supervised original research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

PHRMSCI 298. Research Seminar . 2 Units.
Presentation and discussion of current problems and methods in teaching and research in pharmaceutical sciences.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHRMSCI 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Overview

The School of Physical Sciences offers both professional training and general education in the Departments of Chemistry (p. 1293), Earth System Science (p. 1320), Mathematics (p. 1347), and Physics and Astronomy (p. 1380). The faculty, active in research and graduate education, are at the same time vitally concerned with undergraduate teaching. Curricula of the School are designed to meet the needs of a wide variety of students ranging from those with little technical background who seek insight into the activities and accomplishments of physical scientists to those seeking a comprehensive understanding that will prepare them for creative research in physical science.

Over the course of the past century and a half, physics, chemistry, and mathematics have evolved into interdependent but separate intellectual disciplines. This development is reflected in the departmental structure of the School of Physical Sciences. In the same period, these fundamental disciplines have moved into domains of abstraction unimagined by early scientists. This trend to abstraction with its concomitant increase in understanding of the physical universe provides the major challenge to the student of the physical sciences. Mathematics, physics, and chemistry, while providing the foundation of the technology that dominates contemporary civilization, underlie to an ever-increasing extent the new developments in the biological and social sciences. Earth system science is grounded in the traditional physical sciences while breaking new paths in the quantitative study of changes in the global environment.

Honors

Criteria used by the School of Physical Sciences in selecting candidates for honors at graduation are as follows: Approximately 1 percent will be awarded summa cum laude, 3 percent magna cum laude, and 8 percent cum laude. Honors are awarded on the basis of a student’s performance in research, cumulative grade point average, and performance in upper-division courses in the major. Students considered for honors at graduation must have completed 72 units in residence at the University of California. The student’s cumulative record at the end of the final quarter is the basis for all decisions regarding honors at graduation. Other important factors are considered visit at Honors Recognition. The School of Physical Sciences also grants special honors to students who have distinguished themselves by their work in their major subject.

- Preparation for Teaching Science and Mathematics (p. 1221)
- Special Programs (p. 1223)

Undergraduate Programs

Each department offers courses that are of value to nonmajors and majors in the sciences. The programs for majors are designed to meet the needs of students planning careers in business, education, or industry: of students planning advanced professional study; and of students planning graduate work that continues their major interest. Students who wish to complete a coordinated set of courses beyond the introductory level in Mathematics and in Earth and Atmospheric Sciences may pursue minors in these areas. Students interested in mathematical and computational biology may complete the Mathematics for Biology minor which prepares them for interdisciplinary graduate studies in this area. Introductory courses in chemistry, mathematics, and physics meet the needs of students majoring in the sciences, mathematics, and engineering and are also appropriate for students in other disciplines who seek a rigorous introduction to the physical sciences. In addition, a number of courses within the School have few or no prerequisites and are directed particularly toward students majoring in areas remote from the sciences.

Planning a Program of Study

Students who choose a major in the School of Physical Sciences have a variety of academic advising and counseling resources available to them. In addition to faculty advisors, there is a Chief Academic Advisor in each department who is responsible for interpreting degree requirements, reviewing student petitions, and assisting with special advising problems. An academic advising and counseling staff, employed in the Associate Dean’s Office, is available to serve a broad range of student advising needs. In consultation with their faculty advisor or an academic counselor, students should plan a course of study leading to a major in one of the departments of the School. In carrying out this major, students may often concentrate very heavily in
a second department within the School or in some other school. Occasionally students choose to pursue a double major. Permission to do so may be sought by an online application submitted to the Office of the Associate Dean of Physical Sciences.

All initial courses of study for majors include mathematics through calculus, and calculus is a prerequisite for much of the upper-division work in each major. A student interested in any of the physical sciences should continue mathematical training beyond these prerequisite courses. Furthermore, students interested in either physics or chemistry usually will include work in both of these subjects in their undergraduate careers.

Students in the physical sciences are urged to acquire a working knowledge of computer programming at an early stage of their University studies. This can be accomplished by taking one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

**Career Opportunities**

Many of the School of Physical Sciences graduates continue their education beyond the Bachelor’s degree level. Some pursue advanced academic degrees in preparation for careers in scientific or medical research, engineering, or postsecondary education. Other students will complete a secondary education credential in order to prepare for careers teaching high school mathematics and science. Some students enter professional school in areas such as medicine, dentistry, law, or business administration. Students who choose not to continue their studies beyond the baccalaureate level most frequently find employment in private business or industry. In addition to technical areas directly related to their major fields of study, students often enter careers in less obviously related fields such as computing, systems analysis, engineering, journalism, marketing, or sales.

The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Career Center (p. 124) section for additional information.

**Preparation for Teaching Science and Mathematics**

**Option 1: Earn a Bachelor’s Degree, Education Concentration, and Teaching Credential**

Physical Sciences students who are interested in pursuing a teaching career should consider the UCI Cal Teach Science and Mathematics Program. This program offers Chemistry, Earth System Science, Environmental Science, Mathematics, and Physics majors an option to earn their bachelor’s degree concurrently with a California Preliminary Single Subject Teaching Credential. Individuals who hold this credential are authorized to teach science (chemistry, geosciences, or physics) or math in a middle school or high school.

Students complete the degree requirements for their selected major, the requirements for an optional education concentration offered by the same department, and any additional teacher credentialing course requirements that are not included in the major or the concentration. The following courses are required for the Preliminary Single Subject Teaching Credential:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 55</td>
<td>Knowing and Learning in Mathematics and Science</td>
</tr>
<tr>
<td>EDUC 109</td>
<td>Reading and Writing in Secondary Mathematics and Science Classrooms</td>
</tr>
<tr>
<td>EDUC 143AW</td>
<td>Classroom Interactions I</td>
</tr>
<tr>
<td>EDUC 143BW</td>
<td>Classroom Interactions II</td>
</tr>
<tr>
<td>EDUC 148</td>
<td>Complex Pedagogical Design</td>
</tr>
<tr>
<td>EDUC 158</td>
<td>Student Teaching Mathematics and Science in Middle/High School (two quarters)</td>
</tr>
<tr>
<td>LPS 60</td>
<td>The Making of Modern Science (for chemistry, geosciences, and physics credential candidates only)</td>
</tr>
<tr>
<td>MATH 8</td>
<td>Explorations in Functions and Modeling (for mathematics credential candidates only)</td>
</tr>
<tr>
<td>PHY SCI 5</td>
<td>California Teach 1: Introduction to Science and Mathematics Teaching</td>
</tr>
<tr>
<td>PHY SCI 105</td>
<td>California Teach 2: Middle School Science and Mathematics Teaching</td>
</tr>
<tr>
<td>PHYSICS 193</td>
<td>Research Methods</td>
</tr>
<tr>
<td>or CHEM 193</td>
<td>Research Methods</td>
</tr>
</tbody>
</table>

Beyond course work, some additional requirements for teacher certification are described below.
With careful, early planning, it is possible for students to complete their bachelor’s degree and teacher certification in four years. This is a more time-efficient and cost-effective route than the traditional five-year teacher preparation model, which usually involves a full academic year of teacher education courses and clinical teaching experience after completion of a bachelor’s degree.

After the School of Physical Sciences verifies the completion of all requirements for the bachelor’s degree and education concentration, students are awarded their degree from UC Irvine. The Preliminary Single Subject Teaching Credential is awarded by the California Commission on Teacher Credentialing (CTC) upon completion of a bachelor’s degree and the state-approved UCI teacher education program, which combines course work, student teaching, and a teaching performance assessment. The UCI School of Education must verify completion of all requirements for the teaching credential and then recommend that the credential be awarded to a candidate by the CTC.

Additional Requirements for Teacher Certification. In addition to the required course work for a California Preliminary Single Subject Teaching Credential, the following additional requirements must be satisfied:

1. The School of Physical Sciences requires a cumulative GPA of 2.0 (C) to graduate with the bachelor’s degree. However, students must earn a grade of C or better in each of the following courses in order to be recommended for the Preliminary Single Subject Credential: PHY SCI 105, EDUC 55, EDUC 143AW, EDUC 143BW, EDUC 148, and EDUC 158.
2. The following must be completed and verified prior to the start of student teaching in EDUC 158:
   a. Pass the California Basic Education Skills Test (CBEST), a basic mathematics and literacy skills test. For more information, visit the CBEST website (http://www.cctcexams.nesinc.com) website.
   b. Pass the California Subject Exam for Teachers (CSET) in the discipline in which a candidate plans to earn a Preliminary Single Subject Credential (chemistry, geosciences, mathematics, or physics). Although secondary teachers are only required to pass the CSET exam in one discipline, those who pass the CSET exam in more than one disciplinary field (e.g., physics and mathematics) can be authorized to teach classes in each of those disciplines. For more information visit the CSET exam website (http://www.cctcexams.nesinc.com/tests.asp) website. Mathematics majors have an option to waive the CSET exam by completing prescribed course work, referred to as a subject-matter preparation program (SMPP). More information is available at the School of Education’s Mathematics SMPP (http://www.gse.uci.edu/academic_programs/smpp/math.php) website.
   c. Secondary school science teachers in California are expected to have a broad range of general science knowledge in additional to their discipline of specialization, because their Single Subject Teaching Credential in one of the sciences also authorizes them to teach classes in general or integrated science. The general science subtests of the CSET exam cover foundational topics in astronomy, geodynamics, Earth resources, ecology, genetics and evolution, molecular biology and biochemistry, cell and organismal biology, waves, forces and motion, electricity and magnetism, heat transfer and thermodynamics, and structure and properties of matter. Although students can prepare for the CSET exam’s general science subtests through independent study, Physical Sciences students can also prepare themselves by taking lower-division courses that cover that content. Some suggested courses include BIO SCI 1A or BIO SCI 93 and BIO SCI 94; CHEM 1A-CHEM 1B-CHEM 1C; EARTHSS 1 and EARTHSS 7 and PHYSICS 20A.
   d. Obtain a Certificate of Clearance from the State of California.
   e. Obtain a TB test with negative results.
3. The following must be completed and verified before the School of Education is able to recommend an individual for the Preliminary Single Subject Credential:
   a. Complete a college-level course or pass an examination on the U.S. Constitution. POL SCI 21A satisfies this requirement. Contact the UCI School of Education Student Affairs Office for information about the exam.
   b. Obtain a CPR certificate in adult, child, or infant training.

Declaring Intention to Complete the Concentration and Teacher Certification. Prospective teachers who want to complete their degree and a teaching credential in four years are encouraged to start planning early by reviewing the sample programs for the major and the education concentration that they have selected, and to consult with an academic counselor. Interested students are encouraged to get started on the suggested first- and second-year credentialing course work, including PHY SCI 5 and PHY SCI 105, and can do so without officially declaring their intention to complete the concentration or the credential. However, students must declare their intention to complete the optional education concentration and their intention to earn the Preliminary Single Subject Teaching Credential by the end of their second year at the latest, and prior to enrolling in EDUC 55, which they would typically take in fall of their third year. Forms for declaring a selected education concentration and for declaring an intention to complete the teaching credential are available in the Cal Teach Science and Mathematics Resource and Advising Center (137 Bison Modular).

Option 2: Earn a Bachelor’s Degree and Education Concentration or Specialization

A second option for students interested in teaching science and mathematics is to earn a teaching credential in a post-baccalaureate teacher preparation program after completing their bachelor’s degree. UCI and other universities offer such programs, which typically require one academic year of education course work and clinical teaching experience. The Departments of Chemistry, Mathematics, and Physics and Astronomy offer the concentration in Chemistry Education, the specialization in Mathematics for Education, and the concentration in Physics Education, respectively, which are well suited for undergraduates who plan to pursue a teaching credential after finishing their degree. These programs offer strong grounding in the fundamentals of one discipline, and at the same time, emphasize the breadth in natural sciences needed by secondary science teachers. Each department’s curriculum includes introductory courses on effective methods of science and mathematics teaching and provides opportunities for practical fieldwork experiences in a secondary school classroom. Detailed requirements for each program are provided in the departmental sections.
Special Programs

Campuswide Honors Program
The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; or visit the Campuswide Honors Program (http://www.honors.uci.edu) website.

UC Education Abroad Program
Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University’s Education Abroad Program (EAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Visit the Study Abroad Center (http://www.studyabroad.uci.edu) website for additional information.

Minor in Biomedical Engineering
The minor in Biomedical Engineering is an interdisciplinary curriculum that includes courses from the Schools of Engineering, Physical Sciences, and Biological Sciences. The minor is designed to provide a student in the physical sciences with the introductory skills needed in the quantitative biomedical arena. See The Henry Samueli School of Engineering (p. 493) section of the Catalogue for more information.

Minor in Conflict Resolution
The interdisciplinary minor in Conflict Resolution provides skills in conflict analysis and resolution and a useful understanding of integrative institutions at the local, regional, and international levels. See School of Social Sciences (p. 1877) section of the Catalogue for more information.

Minor in Global Sustainability
The interdisciplinary minor in Global Sustainability trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See Interdisciplinary Studies (p. 1095) section of the Catalogue for more information.

Requirements for the Bachelor’s Degree
All students must meet the University Requirements (p. 71).
School Requirements: None.
Departmental Requirements: Refer to individual departments.

Graduate Programs
The School offers M.S. and Ph.D. degree programs in the Departments of Chemistry, Earth System Science, Mathematics, and Physics and Astronomy. See the department sections for detailed information.

Faculty
Kevork N. Abazajian, Ph.D. University of California, San Diego, Associate Professor of Physics and Astronomy
Takeo Akasaki, Ph.D. University of California, Los Angeles, Professor Emeritus of Mathematics (ring theory)
Jun F. Allard, Ph.D. University of British Columbia, Assistant Professor of Mathematics; Physics and Astronomy (mathematical and computational biology)
Steven D. Allison, Ph.D. Stanford University, Associate Professor of Ecology and Evolutionary Biology; Earth System Science
Ioan Andricioaei, Ph.D. Boston University, Professor of Chemistry (chemical biology, physical chemistry and chemical physics, theoretical and computational)
Ara Apkarian, Ph.D. Northwestern University, Professor of Chemistry (physical chemistry and chemical physics)
Ramesh D. Arasasingham, Ph.D. University of California, Davis, Senior Lecturer of Chemistry (chemical education and inorganic chemistry)
Shane Ardo, Ph.D. Johns Hopkins University, Assistant Professor of Chemistry; Chemical Engineering and Materials Science (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)
Vladimir Baranovsky, Ph.D. University of Chicago, Associate Professor of Mathematics (algebra and number theory)
Aaron J. Barth, Ph.D. University of California, Berkeley, Professor of Physics and Astronomy
Steven W. Barwick, Ph.D. University of California, Berkeley, Professor of Physics and Astronomy
Gregory A. Benford, Ph.D. University of California, San Diego, Professor Emeritus of Physics and Astronomy

Donald R. Blake, Ph.D. University of California, Irvine, UCI Distinguished Professor of Chemistry (analytical, atmospheric, environmental)

Suzanne A. Blum, Ph.D. University of California, Berkeley, Associate Professor of Chemistry; Chemistry (inorganic and organometallic, organic and synthetic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Andrew Borovik, Ph.D. University of North Carolina at Chapel Hill, Vice Chair and Professor of Chemistry (inorganic and organometallic, organic and synthetic)

David A. Brant, Ph.D. University of Wisconsin-Madison, Professor Emeritus of Chemistry (biophysical)

Amanda J. Brindley, Ph.D. University of California, Irvine, Lecturer with Potential Security of Employment of Chemistry (chemistry)

James S. Bullock, Ph.D. University of California, Santa Cruz, Gary McCue Administrative Term Chair in Cosmology and Professor of Physics and Astronomy

David A. Buote, Ph.D. Massachusetts Institute of Technology, Professor of Physics and Astronomy

Kieron Burke, Ph.D. University of California, Santa Barbara, Professor of Chemistry; Physics and Astronomy (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Frank B. Cannonito, Ph.D. Adelphi University, Professor Emeritus of Mathematics (group theory)

David W. Casper, Ph.D. University of Michigan, Associate Professor of Physics and Astronomy

A. Richard Chamberlin, Ph.D. University of California, San Diego, Department Chair and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (chemical biology, organic and synthetic)

Gary A. Chanan, Ph.D. University of California, Berkeley, Professor of Physics and Astronomy

Liu Chen, Ph.D. University of California, Berkeley, Research Professor and Professor Emeritus of Physics and Astronomy

Long Chen, Ph.D. Pennsylvania State University, Associate Professor of Mathematics (applied and computational mathematics)

Mu-Chun Chen, Ph.D. University of Colorado Boulder, Associate Professor of Physics and Astronomy

Alexander L. Chernyshev, Ph.D. Russian Academy of Sciences, Professor of Physics and Astronomy

Ralph J. Cicerone, Ph.D. University of Illinois at Urbana-Champaign, Professor Emeritus of Earth System Science

Philip Collins, Ph.D. University of California, Berkeley, Professor of Physics and Astronomy

Michael Cooper, Ph.D. University of California, Berkeley, Assistant Professor of Physics and Astronomy

Asantha R. Cooray, Ph.D. University of Chicago, Professor of Physics and Astronomy

Robert Corn, Ph.D. University of California, Berkeley, Professor of Chemistry; Biomedical Engineering (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Michael C. Cranston, Ph.D. University of Minnesota, Professor of Mathematics (probability)

Anthony V. Daly, M.F.A. University of California, Irvine, Lecturer of Physical Sciences

Donald A. Darling, Ph.D. California Institute of Technology, Professor Emeritus of Mathematics

Kristen A. Davis, Ph.D. Stanford University, Assistant Professor of Civil and Environmental Engineering; Earth System Science (coastal oceanography, fluid mechanics, turbulent flows)

Steven J. Davis, Ph.D. Stanford University, Assistant Professor of Earth System Science

Michael B. Dennin, Ph.D. University of California, Santa Barbara, Professor of Physics and Astronomy

Robert J. Doedens, Ph.D. University of Wisconsin-Madison, Professor Emeritus of Chemistry (inorganic and organometallic)

Vy M. Dong, Ph.D. California Institute of Technology, Professor of Chemistry (organic and synthetic)

Ellen R. Druffel, Ph.D. University of California, San Diego, Fred Kavli Chair in Earth System Science and Professor of Earth System Science
Todd Dupont, Ph.D. Pennsylvania State University, **Assistant Professor of Earth System Science**

Igor E. Dzyaloshinskii, Ph.D. Moscow State University, **Professor Emeritus of Physics and Astronomy**

Kimberly D. Edwards, Ph.D. University of California, Irvine, **Lecturer with Security of Employment of Chemistry** (general chemistry)

Paul C. Eklof, Ph.D. Cornell University, **Professor Emeritus of Mathematics** (logic and algebra)

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, **Associate Professor of Mathematics; Developmental and Cell Biology** (applied and computational mathematics, mathematical and computational biology)

Aaron P. Esser-Kahn, Ph.D. University of California, Berkeley, **Assistant Professor of Chemistry; Biomedical Engineering; Chemical Engineering and Materials Science** (chemical biology, organic and synthetic, polymer, materials, nanoscience)

William J. Evans, Ph.D. University of California, Los Angeles, **Professor of Chemistry** (inorganic and organometallic)

Catherine M. Famiglietti, Ph.D. Princeton University, **Lecturer of Mathematics** (calculus and numerical methods)

James S. Famiglietti, Ph.D. Princeton University, **Professor of Earth System Science; Civil and Environmental Engineering**

Jonathan L. Feng, Ph.D. Stanford University, **Professor of Physics and Astronomy**

Julie E. Ferguson, Ph.D. Oxford University, **Lecturer with Potential Security of Employment of Earth System Science**

Aleksandr Figotin, Ph.D. Tashkent University of Information Technologies, **Professor of Mathematics** (applied and computational mathematics, mathematical physics)

Mark Finkelstein, Ph.D. Stanford University, **Professor Emeritus of Mathematics; Center for Educational Partnerships** (analysis)

Barbara J. Finlayson-Pitts, Ph.D. University of California, Riverside, **Director of AirUCI and UCI Distinguished Professor of Chemistry; Chemistry** (chemistry, analytical, atmospheric and environmental, physical chemistry and chemical physics)

Zachary Fisk, Ph.D. University of California, San Diego, **UCI Distinguished Professor Emeritus of Physics and Astronomy**

Matthew Foreman, Ph.D. University of California, Berkeley, **Professor of Mathematics; Logic and Philosophy of Science** (ergodic theory and dynamical systems, logic and foundations)

Fillmore Freeman, Ph.D. Michigan State University, **Professor of Chemistry** (organic and synthetic, theoretical and computational)

Michael D. Fried, Ph.D. University of Michigan, **Professor Emeritus of Mathematics** (arithmetic geometry and complex variables)

Filipp Furche, Ph.D. University of Karlsruhe, **Professor of Chemistry** (physical chemistry and chemical physics, theoretical and computational)

Nien-Hui Ge, Ph.D. University of California, Berkeley, **Associate Professor of Chemistry** (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Robert B. Gerber, Ph.D. Oxford University, **Professor of Chemistry** (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

Anton Gorodetski, Ph.D. Moscow State University, **Associate Professor of Mathematics** (ergodic theory and dynamical systems)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, **Assistant Professor of Chemical Engineering and Materials Science; Chemistry** (organic photovoltaics, electrical biosensors, nanotechnology, DNA, materials chemistry)

Michael L. Goulden, Ph.D. Stanford University, **Department Vice Chair and Professor of Earth System Science; Ecology and Evolutionary Biology**

Enrico Gratton, Ph.D. University of Rome, **Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy** (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Claudia I. Green, Ph.D. Max Planck Institute, **Assistant Professor of Earth System Science**

Steven P. Gross, Ph.D. University of Texas at Austin, **Professor of Developmental and Cell Biology; Biomedical Engineering; Physics and Astronomy** (force generation by molecular motors in living cells)

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, **Professor of Chemistry; Biomedical Engineering** (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Arnold Guerra, Ph.D. University of California, Irvine, **Lecturer of Physics and Astronomy**
School of Physical Sciences

Patrick Q. Guidotti, Ph.D. University of Zurich, Professor of Mathematics (analysis and partial differential equations, applied and computational mathematics)

Gultekin Gulsen, Ph.D. Bogazici University, Associate Professor of Radiological Sciences; Biomedical Engineering; Electrical Engineering and Computer Science; Physics and Astronomy (in vivo molecular imaging, diffuse optical tomography, fluorescence tomography, photo-magnetic imaging, multi-modality imaging)

Herbert W. Hamber, Ph.D. University of California, Santa Barbara, Professor of Physics and Astronomy

Stephen Hansensian, Ph.D. Ohio State University, Director of Medicinal Chemistry and Pharmacology Graduate Program and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (organic chemistry)

Warren J. Hehre, Ph.D. Carnegie Mellon University, Professor Emeritus of Chemistry (physical theoretical chemistry)

William W. Heidbrink, Ph.D. Princeton University, Professor of Physics and Astronomy

John C. Hemminger, Ph.D. Harvard University, Vice Chancellor for Research and Professor of Chemistry (analytical, atmospheric and environmental, physical chemistry and chemical physics, polymer, materials, nanoscience)

Alan F. Heyduk, Ph.D. Massachusetts Institute of Technology, Associate Professor of Chemistry (chemical biology, inorganic and organometallic)

Hamid Hezari, Ph.D. Johns Hopkins University, Assistant Professor of Mathematics (analysis and partial differential equations)

Wilson Ho, Ph.D. University of Pennsylvania, Donald Bren Professor and Professor of Physics and Astronomy; Chemistry (physical chemistry and chemical physics, polymer, materials, nanoscience)

Allon I. Hochbaum, Ph.D. University of California, Berkeley, Assistant Professor of Chemical Engineering and Materials Science; Chemistry (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

Herbert J. Hopster, Ph.D. University of Arizona, Professor Emeritus of Physics and Astronomy

Kenneth C. Janda, Ph.D. Harvard University, Dean of the School of Physical Sciences and Professor of Chemistry (physical chemistry and chemical physics)

Elizabeth R. Jarvo, Ph.D. Boston College, Associate Professor of Chemistry (inorganic and organometallic, organic and synthetic)

Svetlana Jitomirskaya, Ph.D. Moscow State University, UCI Chancellor's Fellow and Professor of Mathematics (mathematical physics)

Kathleen Johnson, Ph.D. University of California, Berkeley, Assistant Professor of Earth System Science

Manoj Kaplinghat, Ph.D. Ohio State University, Professor of Physics and Astronomy

Saewung Kim, Ph.D. Georgia Institute of Technology, Assistant Professor of Earth System Science

Susan M. King, Ph.D. Massachusetts Institute of Technology, Senior Lecturer of Chemistry (organic chemistry)

David P. Kirkby, Ph.D. California Institute of Technology, Professor of Physics and Astronomy; Electrical Engineering and Computer Science (observational cosmology, data science, embedded systems)

Abel Klein, Ph.D. Massachusetts Institute of Technology, Professor of Mathematics (mathematical physics)

Natalia Komarova, Ph.D. University of Arizona, Professor of Mathematics: Ecology and Evolutionary Biology (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Ilya N. Krivorotov, Ph.D. University of Minnesota, Associate Professor of Physics and Astronomy

Andrew J. Lankford, Ph.D. Yale University, Professor of Physics and Astronomy

Matthew Law, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Chemical Engineering and Materials Science (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Jon M. Lawrence, Ph.D. University of Rochester, Professor Emeritus of Physics and Astronomy

Rachel Lehman, Ph.D. University of California, Irvine, Lecturer of Mathematics (mathematics education and probability)

Peter Li, Ph.D. University of California, Berkeley, Professor Emeritus of Mathematics (geometry and topology)

Song-Ying Li, Ph.D. University of Pittsburgh, Professor of Mathematics (analysis and partial differential equations)
Zhihong Lin, Ph.D. Princeton University, *Professor of Physics and Astronomy*

Renee Link, Ph.D. University of California, Irvine, *Lecturer with Potential Security of Employment of Chemistry* (organic chemistry)

Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering; Chemistry* (genetic engineering, directed evolution, synthetic biology, chemical biology)

John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, *UCI Chancellor's Professor of Mathematics; Biomedical Engineering; Chemical Engineering and Materials Science* (applied and computational mathematics, mathematical and computational biology)

Zhiqin Lu, Ph.D. Courant Institute of Mathematical Sciences, *Professor of Mathematics* (geometry and topology)

Andrej Luptak, Ph.D. Yale University, *Vice Chair of Graduate Programs in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry* (chemical biology)

Penelope J. Maddy, Ph.D. Princeton University, *UCI Distinguished Professor of Logic and Philosophy of Science; Mathematics; Philosophy* (philosophy of mathematics and logic, meta-philosophy)

Gudrun Magnusdottir, Ph.D. Colorado State University, *Department Chair and Professor of Earth System Science*

Mark A. Mandelkern, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Physics and Astronomy*

Vladimir A. Mandelshtam, Ph.D. Russian Academy of Sciences, *Professor of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Alexei A. Maradudin, Ph.D. University of Bristol, *Professor Emeritus of Physics and Astronomy*

Craig C. Martens, Ph.D. Cornell University, *Professor of Chemistry* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Rachel Martin, Ph.D. Yale University, *Associate Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, physical chemistry and chemical physics)

Adam Martiny, Ph.D. Technical University of Denmark, *Associate Professor of Earth System Science; Ecology and Evolutionary Biology*

Robert McIver, Ph.D. Stanford University, *Professor Emeritus of Chemistry*

Roger D. McWilliams, Ph.D. Princeton University, *Professor of Physics and Astronomy*

George E. Miller, Ph.D. Oxford University, *Senior Lecturer with Security of Employment Emeritus of Chemistry* (analytical and radioanalytical chemistry and chemical education)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (applied mathematics, mathematical biology, modeling languages)

David L. Mobley, Ph.D. University of California, Davis, *Associate Professor of Pharmaceutical Sciences; Chemistry* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

William R. Molzon, Ph.D. University of Chicago, *Professor of Physics and Astronomy*

Harold W. Moore, Ph.D. University of Illinois at Urbana-Champaign, *Professor Emeritus of Chemistry* (organic and synthetic)

Jefferson Moore, Ph.D. Oregon State University, *Professor of Earth System Science*

Shaul Mukamel, Ph.D. Tel Aviv University, *UCI Distinguished Professor of Chemistry* (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Simona Murgia, Ph.D. Michigan State University, *Assistant Professor of Physics and Astronomy*

Craig Murray, Ph.D. University of Edinburgh, *Assistant Professor of Chemistry* (atmospheric and environmental, physical chemistry and chemical physics)

Riley D. Newman, Ph.D. University of California, Berkeley, *Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy*

Qing Nie, Ph.D. Ohio State University, *Professor of Mathematics; Biomedical Engineering* (computational mathematics, systems biology, cell signaling, stem cell)
Sergey Nizkorodov, Ph.D. University of Basel, Professor of Chemistry (analytical, atmospheric and environmental, physical chemistry and chemical physics)

James S. Nowick, Ph.D. Massachusetts Institute of Technology, Professor of Chemistry (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Larry E. Overman, Ph.D. University of Wisconsin-Madison, UCI Distinguished Professor of Chemistry (chemical biology, inorganic and organometallic, organic and synthetic)

Alessandra Pantano, Ph.D. Princeton University, Lecturer with Potential Security of Employment of Mathematics (algebra and number theory)

Siddah Ashok Parameswaran, Ph.D. Princeton University, Assistant Professor of Physics and Astronomy

William H. Parker, Ph.D. University of Pennsylvania, Professor Emeritus of Physics and Astronomy

Reginald M. Penner, Ph.D. Texas A&M University, Department Chair and UCI Chancellor's Professor of Chemistry; Chemical Engineering and Materials Science (analytical, physical chemistry and chemical physics, polymer, materials, nanoscience)

Eric Potma, Ph.D. University of Groningen, Department Vice Chair and Associate Professor of Chemistry (analytical, chemical biology, physical chemistry and chemical physics)

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Michael J. Prather, Ph.D. Yale University, UCI Endowed Chair and Professor of Earth System Science

Jennifer A. Prescher, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences (chemical biology, organic and synthetic)

Francois W. Primeau, Ph.D. Massachusetts Institute of Technology, Associate Professor of Earth System Science

Michael S. Pritchard, Ph.D. University of California, San Diego, Assistant Professor of Earth System Science

Sergey V. Pronin, Ph.D. University of Chicago, Assistant Professor of Chemistry (organic chemistry)

Arvind Rajaraman, Ph.D. Stanford University, Professor of Physics and Astronomy

James T. Randerson, Ph.D. Stanford University, UCI Chancellor's Professor of Earth System Science; Ecology and Evolutionary Biology

David L. Rector, Ph.D. Massachusetts Institute of Technology, Professor Emeritus of Mathematics (algebraic topology and computer algebra)

William S. Reeburgh, Ph.D. Johns Hopkins University, Professor Emeritus of Earth System Science

Robert C. Reilly, Ph.D. University of California, Berkeley, Professor Emeritus of Mathematics (geometry and topology)

Peter M. Rentzepis, Ph.D. Cambridge University, UC Presidential Chair and Professor of Chemistry; Chemical Engineering and Materials Science (physical chemistry and chemical physics)

Markus W. Ribbe, Ph.D. University of Bayreuth, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry (chemical biology, inorganic and organometallic)

Eric Rignot, Ph.D. University of Southern California, Department Vice Chair and Professor of Earth System Science

Thorsten Ritz, Ph.D. University of Ulm, Professor of Physics and Astronomy

Norman Rostoker, Sc.D. Carnegie Institute of Technology, Research Professor and Professor Emeritus of Physics and Astronomy

Karl Rubin, Ph.D. Harvard University, Department Chair and Edward and Vivian Thorp Chair in Mathematics and Professor of Mathematics (algebra and number theory)

Bernard Russo, Ph.D. University of California, Los Angeles, Professor Emeritus of Mathematics (functional analysis)

James E. Rutledge, Ph.D. University of Illinois at Chicago Circle, Associate Dean of the School of Physical Sciences and Professor of Physics and Astronomy

Scott D. Rychnovsky, Ph.D. Columbia University, Professor of Chemistry (chemical biology, organic and synthetic)

Nathan Rynn, Ph.D. Stanford University, Professor Emeritus of Physics and Astronomy
Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor of Economics; Logic and Philosophy of Science; Mathematics* (ergodic theory and dynamical systems, mathematics of complex social phenomena)

Eric S. Saltzman, Ph.D. University of Miami, *Professor of Earth System Science; Chemistry* (analytical, atmospheric and environmental)

Martin Schechter, Ph.D. New York University, *Professor of Mathematics* (analysis and partial differential equations, mathematical physics)

Stephen Scheinberg, Ph.D. Princeton University, *Professor Emeritus of Mathematics*

Jonas Schultz, Ph.D. Columbia University, *Professor Emeritus of Physics and Astronomy; International Studies; Logic and Philosophy of Science*

A. J. Shaka, Ph.D. Oxford University, *Professor of Chemistry* (chemical biology, physical chemistry and chemical physics)

Kenneth J. Shea, Ph.D. Pennsylvania State University, *Professor of Chemistry; Chemical Engineering and Materials Science* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Yuri Shirman, Ph.D. University of California, Santa Cruz, *Professor of Physics and Astronomy*

Alice Silverberg, Ph.D. Princeton University, *Professor of Mathematics; Computer Science* (algebra and number theory)

Dennis J. Silverman, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, *Professor of Physics and Astronomy; Biomedical Engineering; Chemistry* (biosensing, nanotechnology, condensed matter physics)

Tammy Ann Smecker-Hane, Ph.D. Johns Hopkins University, *Associate Professor of Physics and Astronomy*

William H. Smoke, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (homological algebra)

Henry W. Sobel, Ph.D. Case Western Reserve University, *Professor of Physics and Astronomy*

Knut Solna, Ph.D. Stanford University, *Professor of Mathematics* (applied and computational mathematics, inverse problems and imaging, probability)

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, *Director of the Center for Hydrometeorology and Remote Sensing and UCI Distinguished Professor of Civil and Environmental Engineering; Earth System Science* (hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water sources management)

Ronald J. Stern, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (geometry and topology)

Jeffrey D. Streets, Ph.D. Duke University, *Assistant Professor of Mathematics* (geometry and topology)

Min-Ying Su, Ph.D. University of California, Irvine, *Professor of Radiological Sciences; Physics and Astronomy*

Peter Taborek, Ph.D. California Institute of Technology, *Department Chair and Professor of Physics and Astronomy*

Agnes Taffard, Ph.D. University of Liverpool, *Associate Professor of Physics and Astronomy*

Timothy Tait, Ph.D. Michigan State University, *UCI Chancellor's Fellow and Professor of Physics and Astronomy*

Fumiko Tajima, Ph.D. University of Tokyo, *Lecturer of Physics and Astronomy*

Toshiki Tajima, Ph.D. University of California, Irvine, *UCI Endowed Chair and Adjunct Professor of Physics and Astronomy*

Chuu-Lian Terng, Ph.D. Brandeis University, *UCI ADVANCE Term Chair and Professor of Mathematics* (geometry and topology, mathematical visualization)

Edriss S. Titi, Ph.D. Indiana University, *Professor Emeritus of Mathematics; Mechanical and Aerospace Engineering* (analysis and partial differential equations, applied and computational mathematics)

Douglas J. Tobias, Ph.D. Carnegie Mellon University, *Professor of Chemistry* (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Ivan V. Tomov, Ph.D., *Associate Specialist of Chemistry*

Virginia L. Trimble, Ph.D. California Institute of Technology, *Professor of Physics and Astronomy*

Susan E. Trumbore, Ph.D. Columbia University, *Professor of Earth System Science*
Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *UCI Chancellor's Fellow and Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences*

Li Sheng Tseng, Ph.D. University of Chicago, *Assistant Professor of Mathematics* (geometry and topology, mathematical physics)

Howard G. Tucker, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (probability and statistics)

Mark Vagins, Ph.D. Yale University, *Adjunct Professor of Physics and Astronomy*

David Van Vranken, Ph.D. Stanford University, *Professor of Chemistry* (chemical biology, organic and synthetic)

Christopher Vanderwal, Ph.D. Scripps Research Institute, *Professor of Chemistry* (organic and synthetic)

Gerard Vanhoven, Ph.D. Stanford University, *Professor Emeritus of Physics and Astronomy*

Isabella Velicogna, Ph.D. Università degli Studi di Trieste, *Associate Professor of Earth System Science*

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Assistant Professor of Civil and Environmental Engineering; Earth System Science* (surface hydrology and soil physics)

Richard F. Wallis, Ph.D. Catholic University of America, *Professor Emeritus of Physics and Astronomy*

Sean P. Walsh, Ph.D. University of Notre Dame, *Assistant Professor of Logic and Philosophy of Science; Mathematics* (philosophy of mathematics, philosophy of logic and mathematical logic)

Daqing Wan, Ph.D. University of Washington, *Professor of Mathematics* (algebra and number theory)

Frederic Yui-Ming Wan, Ph.D. Massachusetts Institute of Technology, *Professor of Mathematics; Mechanical and Aerospace Engineering* (applied and computational mathematics, mathematical and computational biology)

Gregory A. Weiss, Ph.D. Harvard University, *Professor of Chemistry; Molecular Biology and Biochemistry* (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Frank J. Wessel, Ph.D. University of California, Irvine, *Project Scientist of Physics and Astronomy*

Robert W. West, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (algebraic topology)

Joel J. Westman, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (analysis)

Steven R. White, Ph.D. Cornell University, *Professor of Physics and Astronomy*

Daniel Whiteson, Ph.D. University of California, Berkeley, *Associate Professor of Physics and Astronomy; Logic and Philosophy of Science*

Robert J. Whitley, Ph.D. New Mexico State University, *Professor Emeritus of Mathematics* (analysis)

Laurel L. Wilkening, Ph.D. University of California, San Diego, *Professor Emerita of Earth System Science*

Janet L. Williams, Ph.D. Brandeis University, *Professor Emerita of Mathematics* (probability and statistics)

Dominik Franz X. Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology; Mathematics* (mathematical biology, infectious disease and cancer)

Max Wolfsberg, Ph.D. Washington University, *Professor Emeritus of Chemistry* (physical chemistry and chemical physics, theoretical and computational)

Ruoqian Wu, Ph.D. Institute of Physics, Chinese Academy of Science, *Professor of Physics and Astronomy*

Jing Xia, Ph.D. Stanford University, *Assistant Professor of Physics and Astronomy*

Jack Xin, Ph.D. New York University, *Professor of Mathematics* (applied and computational mathematics, mathematical and computational biology, probability)

Jenny Y. Yang, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Chemistry* (inorganic and organometallic, organic and synthetic, polymer, materials, nanoscience)

Albert Fan Yee, Ph.D. University of California, Berkeley, *Professor of Chemical Engineering and Materials Science; Biomedical Engineering; Chemistry* (materials science aspects of polymers and soft materials, particularly on how they are used to impact nanotechnology)

James J. Yeh, Ph.D. University of Minnesota, *Professor Emeritus of Mathematics* (analysis and partial differential equations, probability)
Chemistry Courses

**CHEM 1A. General Chemistry. 4 Units.**
Atomic structure; general properties of the elements; covalent, ionic, and metallic bonding; intermolecular forces; mass relationships.

Prerequisite: MATH 2A or PHYSICS 7C or CHEM 1P or placement via a score of 600 or higher on the SAT Mathematics Reasoning test, or a score of 27 or higher on the ACT Mathematics test, or a score of 700 or higher on the SAT Chemistry subject exam, or a score of 3 on the AP Chemistry exam, or a score of 4 on the AP Calc AB Exam, or a score of 3 on the AP Calc BC Exam. CHEM 1P with a grade of C- or better.

Overlaps with CHEM H2A, ENGR 1A.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

(II, Va)

**CHEM 1B. General Chemistry. 4 Units.**
Properties of gases, liquids, solids; changes of state; properties of solutions; stoichiometry; thermochemistry; and thermodynamics.

Corequisite: CHEM M2LB. CHEM M2LB for Chemistry majors only. No co-requisite for other majors.

Prerequisite: CHEM 1A or ENGR 1A or a score of 4 or higher on the AP Chemistry exam. CHEM 1A with a grade of C- or better. ENGR 1A with a grade of C- or better.

Overlaps with CHEM H2B.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

(II, Va)

**CHEM 1C. General Chemistry. 4 Units.**
Equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; kinetics; special topics.

Corequisite: CHEM 1LC.

Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better.

Overlaps with CHEM H2C.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

(II, Va)
CHEM 1LC. General Chemistry Laboratory. 2 Units.
Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics of CHEM 1A-B-C. Materials fee.

Corequisite: CHEM 1C.
Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better.

Overlaps with CHEM 1LE, CHEM H2LB, CHEM M2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB. Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 1LD. General Chemistry Laboratory. 2 Units.
Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics in CHEM 1A-B-C. Materials fee.

Prerequisite: CHEM 1C and CHEM 1LC or CHEM 1LE. CHEM 1C with a grade of C- or better. CHEM 1LC with a grade of C- or better. CHEM 1LE with a grade of C- or better.

Overlaps with CHEM H2LB, CHEM M2LB.

Restriction: No credit for CHEM M2LA if taken after CHEM 1LD. Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 1LE. Accelerated General Chemistry Lab. 3 Units.
Lecture and experiments covering chemical concepts for accelerated students who do not plan to take organic chemistry. Properties of gases, liquids, solutions, and solids; chemical equilibrium, chemical thermodynamics; atomic and molecular structure; chemical kinetics; electrochemistry. Materials fee.

Corequisite: CHEM 1A or CHEM 1B or ENGR 1A.

Overlaps with CHEM 1LC.

Restriction: Majors in the School of Engineering and Biomedical Computing majors have first consideration for enrollment.

CHEM 1P. Preparation for General Chemistry Online. 4 Units.
Units of measurement, dimensional analysis, significant figures; elementary concepts of volume, mass, force, pressure, energy, density, temperature, heat, work; fundamentals of atomic and molecular structure; the mole concept, stoichiometry; properties of the states of matter; gas laws; solutions concentrations. Course may be offered online.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Biomedical Computing, Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM H2A. Honors General Chemistry. 4 Units.
Covers the same material as CHEM 1A-B-M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LA.
Prerequisite: Membership in the Campuswide Honors Program, or a score of 4 or 5 on the Chemistry Advanced Placement Examination, or a score of 700 or better on the SAT II in Chemistry.

Overlaps with CHEM 1A.

(II, Va)

CHEM H2B. Honors General Chemistry. 4 Units.
Covers the same material as CHEM 1A-B-M3C but in greater. depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LB.
Prerequisite: CHEM H2A and CHEM H2LA. CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better.

Overlaps with CHEM 1B.

(II, Va)
CHEM H2C. Honors General Chemistry. 4 Units.
Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LC.
Prerequisite: CHEM H2B and CHEM H2LB. CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better.

Overlaps with CHEM 1C.

(CHEM H2LA. Honors General Chemistry Laboratory. 3 Units.
Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2A.
Prerequisite: Membership in the Campuswide Honors Program, or a score of 4 or 5 on the Chemistry Advanced Placement Examination, or a score of 700 or better on the SAT II in Chemistry.

Overlaps with CHEM M2LA.

CHEM H2LB. Honors General Chemistry Laboratory. 3 Units.
Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2B.
Prerequisite: CHEM H2A and CHEM H2LA. CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better.

Overlaps with CHEM M2LB.
Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB.

CHEM H2LC. Honors General Chemistry Laboratory. 3 Units.
Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.

Corequisite: CHEM H2C.
Prerequisite: CHEM H2B and CHEM H2LB. CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better.

CHEM M2LA. Majors General Chemistry Laboratory. 3 Units.
Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM 1C. Materials fee.

Corequisite: CHEM 1A.
Prerequisite: High school chemistry.

Overlaps with CHEM H2LA, CHEM 1LD.
Restriction: Chemistry majors only. No credit for CHEM M2LA if taken after CHEM 1LD.

CHEM M2LB. Majors General Chemistry Laboratory. 3 Units.
Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM 1C. Materials fee.

Corequisite: CHEM 1B.
Prerequisite: CHEM 1A and CHEM M2LA. CHEM 1A with a grade of C- or above. CHEM M2LA with a grade of C- or above.

Overlaps with CHEM H2LB.
Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB. Chemistry majors only.
CHEM M3C. Majors Quantitative Analytical Chemistry. 4 Units.
Topics covered are equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; and kinetics with a special emphasis on the statistical treatment of data and analytical methods of chemical analysis.

Corequisite: CHEM M3LC.
Prerequisite: (CHEM 1B and CHEM M2LB) or (CHEM H2B and H2LB). CHEM 1B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM H2LB with a grade of C- or better.

Restriction: Chemistry majors only.

CHEM M3LC. Majors Quantitative Analytical Chemistry Laboratory. 3 Units.
Training and experience in analytical laboratory techniques through experiments related to lecture topics in CHEM M3C.

Corequisite: CHEM M3C or CHEM H2C.
Prerequisite: (CHEM 1B or CHEM H2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better.

Overlaps with CHEM H2LC.

Restriction: Chemistry majors only.

CHEM 5. Scientific Computing Skills. 4 Units.
Introduces students to the personal computing software used by chemists for managing and processing of data sets, plotting of graphs, symbolic and numerical manipulation of mathematical equations, and representing chemical reactions and chemical formulas.

Corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (MATH 2D or MATH H2D).
Prerequisite: CHEM 1B or CHEM H2B and MATH 2B or a score of 4 or 5 on the AP CALCULUS BC.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 12. Chemistry Around Us. 4 Units.
Addresses ways in which chemistry affects everyday life. Topics include pollution, global warming, water supply/demands, biodiesel fuels, foods we eat, natural/synthetic materials, common drugs, drug design. Learn and apply basic chemistry concepts. Use risk/benefit analysis for optimal solutions.

(II, Va)

CHEM 51A. Organic Chemistry. 4 Units.
Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereochemical, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM M52LA or CHEM H52LA for Chemistry majors only or completion of or concurrent enrollment in CHEM 1LD for other majors.
Prerequisite: (CHEM 1C and CHEM 1LC) or (CHEM H2C and CHEM H2LC) or (CHEM M3C and CHEM M3LC). CHEM 1C and CHEM 1LC with a grade of C- or better. CHEM H2C and CHEM H2LC with a grade of C- or better. CHEM M3C and CHEM M3LC with a grade of C- or better.

Overlaps with CHEM H52A.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51B. Organic Chemistry. 4 Units.
Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereochemical, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM M52LB for Chemistry majors or CHEM H52LB or CHEM 51LB for other majors.
Prerequisite: CHEM 51A and (CHEM 1LD or CHEM M52LA or CHEM H52LA). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM M52LA or CHEM H52LA with a grade of C- or better.

Overlaps with CHEM H52B.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.
CHEM 51C. Organic Chemistry. 4 Units.
Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM M52LC for Chemistry majors or CHEM H52LC or CHEM 51LC for other majors.
Prerequisite: CHEM 51B and (CHEM 51LB or CHEM M52LB or CHEM H52LB). CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better. CHEM M52LB with a grade of C- or better. CHEM H52LB with a grade of C- or better.

Overlaps with CHEM H52C.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51LB. Organic Chemistry Laboratory. 2 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Course may be offered online. Materials fee.

Corequisite: CHEM 51B.
Prerequisite: CHEM 51A and CHEM 1LD. CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better.

Overlaps with CHEM H52LA, CHEM M52LA.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51LC. Organic Chemistry Laboratory. 2 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Course may be offered online. Materials fee.

Corequisite: CHEM 51C.
Prerequisite: CHEM 51B and CHEM 51LB. CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better.

Overlaps with CHEM H52LB, CHEM M52LB.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51LD. Organic Chemistry Laboratory. 2 Units.
Modern techniques of organic chemistry using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Course may be offered online. Materials fee.

Prerequisite: CHEM 51C and CHEM 51LC. CHEM 51C with a grade of C- or better. CHEM 51LC with a grade of C- or better.

Overlaps with CHEM H52LC.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM H52A. Honors Organic Chemistry. 4 Units.
Fundamental concepts of the chemistry of carbon compounds. Structural, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM H52LA.
Prerequisite: (CHEM 1A and CHEM 1B and CHEM 1C) or (CHEM H2A and CHEM H2B and CHEM H2C).

Overlaps with CHEM 51A.

CHEM H52B. Honors Organic Chemistry. 4 Units.
Fundamental concepts of the chemistry of carbon compounds. Structural, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM H52LB.
Prerequisite: CHEM H52A and CHEM H52LA. CHEM H52A with a grade of C or better. CHEM H52LA with a grade of C or better.
CHEM H52C. Honors Organic Chemistry. 4 Units.
Fundamental concepts of the chemistry of carbon compounds. Structural, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM H52LC.
Prerequisite: CHEM H52B. CHEM H52B with a grade of C or better.

Overlaps with CHEM 51C.

CHEM H52LA. Honors Organic Chemistry Laboratory. 3 Units.
Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51A.
Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM M3LC or CHEM H2LC or CHEM 1LD).

Overlaps with CHEM 51LB, CHEM M52LA.

Restriction: Campuswide Honors Program students only.

CHEM H52LB. Honors Organic Chemistry Laboratory. 3 Units.
Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51B.
Prerequisite: CHEM 51A and CHEM H52LA. CHEM 51A with a grade of C- or better. CHEM H52LA with a grade of C- or better.

Overlaps with CHEM M52LB, CHEM 51LC.

CHEM H52LC. Honors Organic Chemistry Laboratory. 3 Units.
Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51C.
Prerequisite: CHEM 51B and CHEM H52LB. CHEM 51B with a grade of C- or better. CHEM H52LB with a grade of C- or better.

Overlaps with CHEM 51LD, CHEM M52LC.

CHEM M52LA. Majors Organic Chemistry Laboratory. 3 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51A.
Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM H2LC or CHEM M3LC or CHEM 1LD).

Overlaps with CHEM H52LA, CHEM 51LB.

Restriction: Chemistry majors only.

CHEM M52LB. Majors Organic Chemistry Laboratory. 3 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51B.
Prerequisite: CHEM 51A and CHEM M52LA. CHEM 51A with a grade of C- or better. CHEM M52LA with a grade of C- or better.

Overlaps with CHEM H52LB, CHEM 51LC.

Restriction: Chemistry majors only.

CHEM M52LC. Majors Organic Chemistry Laboratory. 3 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C.
Prerequisite: CHEM 51B and CHEM M52LB. CHEM 51B with a grade of C- or better. CHEM M52LB with a grade of C- or better.

Overlaps with CHEM H52LC, CHEM 51LD.

Restriction: Chemistry majors only.
CHEM H90. The Idiom and Practice of Science. 4 Units.
A series of fundamental and applied problems in the chemical sciences are addressed. Topics may include the periodic table, electronic structure of atoms, chemical bonding, molecular structure, thermodynamics, and kinetics, with applications to energy and the environment, and/or biochemistry.

Restriction: Campuswide Honors Program students only.

(II, Va)

CHEM 107. Inorganic Chemistry. 4 Units.
Introduction to modern inorganic chemistry. Principles of structure, bonding, and chemical reactivity with application to compounds of the main group and transition elements, including organometallic chemistry.

Prerequisite: CHEM 51C or CHEM H52C.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 107L. Inorganic Chemistry Laboratory. 3 Units.
Modern techniques of inorganic and organometallic chemistry including experience with glove box, Schlenk line, and vacuum line methods. Materials fee.

Prerequisite: CHEM 107.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 125. Advanced Organic Chemistry. 4 Units.
Rapid-paced comprehensive treatment of organic chemistry. Focuses on molecular structure, reactivity, stability, scope and mechanisms of organic reactions. Topics include: structure and bonding; theoretical organic chemistry; acidity and basicity; reactive intermediates; pericyclic reactions; stereochemistry; organic synthesis; natural products; organic photochemistry.

Prerequisite: CHEM 51C.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 127. Inorganic Chemistry II. 4 Units.
Advanced treatment of selected fundamental topics in inorganic chemistry, building on material presented in Chemistry 107. Molecular symmetry with applications to electronic structure and spectroscopy. Reaction kinetics and mechanisms; inorganic synthesis and catalysis; bioinorganic chemistry.

Prerequisite: CHEM 107.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 128. Introduction to Chemical Biology. 4 Units.
Introduction to the basic principles of chemical biology: structures and reactivity; chemical mechanisms of enzyme catalysis; chemistry of signalling, biosynthesis, and metabolic pathways.

Prerequisite: (CHEM 1A and CHEM 1B and (CHEM 1C or CHEM H2C or CHEM M3C)) and (CHEM 51A and CHEM 51B and CHEM 51C).

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 128L. Introduction to Chemical Biology Laboratory Techniques. 3 Units.
Introduction to the basic laboratory techniques of chemical biology: electrophoresis, plasmid preparation, PCR, protein expression, isolation, and kinetics. Materials fee.

Corequisite: CHEM 128.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 131A. Quantum Principles. 4 Units.
Principles of quantum chemistry with applications to nuclear motions and the electronic structure of the hydrogen atom.

Corequisite: (CHEM 5 or CBEMS 45C) and (CBEMS 45C or PHYSICS 7E).

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and MATH 2D and PHYSICS 7D.

Restriction: Chemistry majors have first consideration for enrollment.
CHEM 131B. Molecular Structure and Elementary Statistical Mechanics. 4 Units.
Principles of quantum mechanics with application to the elements of atomic structure and energy levels, diatomic molecular spectroscopy and structure determination, and chemical bonding in simple molecules.
Prerequisite: CHEM 131A and (PHYSICS 7E or CBEMS 45C).
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 131C. Thermodynamics and Chemical Dynamics. 4 Units.
Prerequisite: CHEM 131B.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 137. Computational Chemistry. 4 Units.
Short introduction to programming languages and to representative algorithms employed in chemical research. Students have the opportunity to devise and employ their own codes and also to employ codes which are widely used in various fields of chemistry. Materials fee.
Corequisite: CHEM 131B.
Prerequisite: CHEM 51C and CHEM 131A.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 138. Introduction to Computational Organic Chemistry. 4 Units.
An introduction to the use of computational chemistry to investigate reaction mechanisms, to calculate structures, and to predict properties of molecules. Students have the opportunity to perform calculations employing computational methods which are widely used in various fields of chemistry. Materials fee.
Prerequisite: CHEM 51C.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 152. Advanced Analytical Chemistry. 5 Units.
In-depth treatment of modern instrumental methods for quantitative analysis of real samples and basic principles of instrument design. Laboratory experiments using spectroscopic, chromatographic, mass spectrometric, and other instrumental methods. Materials fee.
Prerequisite: (CHEM 1C or CHEM M3C) and CHEM M3LC.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 153. Physical Chemistry Laboratory. 4 Units.
Introduction to the modern experimental approaches and software tools used in spectroscopy, kinetics, electrochemistry, and other physical chemistry experiments. Basics of interfacing with instruments using LabView. Materials fee.
Corequisite: CHEM 131C.
Prerequisite: CHEM 1C OR (CHEM M3C and CHEM M3LC) and CHEM 131B.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 156. Advanced Laboratory in Chemistry and Synthesis of Materials. 4 Units.
Synthesis and characterization of organic and inorganic materials including polymers and oxides. Techniques include electron and scanning probe microscopy, gel permeation chromatography, X-ray diffraction, porosimetry, and thermal analysis. Materials fee.
Prerequisite: CHEM 131B or ENGR 54 or PHRMSCI 171.
Same as CBEMS 160.
Restriction: Chemistry majors and Materials Science Engineering majors have first consideration for enrollment.

CHEM 160. Organic Synthesis Laboratory. 4 Units.
Modern experimental techniques in organic synthesis including experience with thin-layer chromatography, liquid chromatography, and gas chromatography. Modern methods of structure elucidation including FT NMR are employed in the characterization of products. Materials fee.
Prerequisite: CHEM 51C and (CHEM 51LC or CHEM H52LC or CHEM M52LC).
Restriction: Chemistry majors have first consideration for enrollment.
CHEM 170. Radioisotope Techniques. 4 Units.
Basic theory and practice of production, separation, safe handling, counting, applications of radioactive isotopes with emphasis on applications in chemistry, biology, and medicine. Materials fee.
Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM 1LC or CHEM M3LC or CHEM H2LC).
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 177. Medicinal Chemistry. 4 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128).
Same as PHRMSCI 177.
Restriction: Pharmaceutical Science majors have first consideration for enrollment.

CHEM 177L. Medicinal Chemistry Laboratory. 2 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity. Materials fee.
Corequisite: PHRMSCI 177.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIO SCI 100 and (BIO SCI 98 or CHEM 128).
Same as PHRMSCI 177L.
Restriction: Pharmaceutical Science majors have first consideration for enrollment.

CHEM 177LW. Medicinal Chemistry Lab. 2 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-throughput screening. Relationship of molecular structure to pharmacological activity.
Corequisite: CHEM 177.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128) and BIO SCI 100.
Same as PHRMSCI 177LW.

CHEM 180. Undergraduate Research. 4 Units.
Research for credit arranged with a faculty member to sponsor and supervise work. Student time commitment of 10 to 15 hours per week is expected, and a written research report is required at the end of each quarter of enrollment.
Repeatability: May be repeated for credit unlimited times.

CHEM H180A. Honors Research in Chemistry. 4 Units.
Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.
Restriction: Chemistry Honors program students and Chemistry majors participating in the Campuswide Honors Program only.

CHEM H180B. Honors Research in Chemistry. 4 Units.
Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.
Prerequisite: CHEM H180A.
Restriction: Campuswide Honors Program students only.

CHEM H180C. Honors Research in Chemistry. 4 Units.
Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.
Prerequisite: CHEM H180B.
Restriction: Chemistry majors participating in the Campuswide Honors Program students only. Chemistry Honors Program students only.
CHEM H181W. Honors Seminar in Chemistry. 2 Units.
Students will receive guidance in the preparation of oral and written research presentations. A written thesis will be prepared and a formal research seminar will be presented.

Corequisite: CHEM H180C.
Prerequisite: CHEM H180A and CHEM H180B. Satisfactory completion of the Lower-Division Writing requirement.

CHEM 191. Chemistry Outreach Program. 2 Units.
Involves intensive participation in the UCI Chemistry Outreach Program, which performs Chemistry demonstrations at local high schools.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

CHEM 192. Tutoring in Chemistry. 2 Units.
Enrollment limited to participants in the Chemistry Peer Tutoring Program.

Repeatability: May be taken for credit 9 times.

Restriction: The first eight may be taken for a letter grade. The remaining ten units must be taken Pass/Not Pass only. NOTE: No more than eight units may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.

CHEM 193. Research Methods. 4 Units.
Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5.
Same as BIO SCI 108, PHYSICS 193.

CHEM 197. Professional Internship. 4 Units.
Internship program that provides students with opportunity to develop professional skills necessary for competitive placement in their chosen chemical inspired industry. Students gain new and field-specific skills outside the classroom while participating in a supervised internship totaling 100 hours.

Prerequisite: Enrollment requires completion of an application form. Student selection is made by a selection committee.

Restriction: Upper-division students only.

CHEM 199. Independent Study in Chemistry. 1-4 Units.
Independent research with Chemistry faculty. Student time commitment of three to four hours per week per unit is expected, and a written report on the independent study is required at the end of each quarter of enrollment.

Repeatability: Unlimited as topics vary.

CHEM 200. Conduct of Research . 2 Units.
Introduces new graduate students to ethical conduct of scientific research, mentoring, and current research in the Department of chemistry.

Repeatability: May be taken for credit 2 times.

CHEM 201. Organic Reaction Mechanisms I. 4 Units.
Advanced treatment of basic mechanistic principles of modern organic chemistry. Topics include molecular orbital theory, orbital symmetry control of organic reactions, aromaticity, carbonium ion chemistry, free radical chemistry, the chemistry of carbenes and carbanions, photochemistry, electrophilic substitutions, aromatic chemistry.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 202. Organic Reaction Mechanisms II. 4 Units.
Topics include more in-depth treatment of mechanistic concepts, kinetics, conformational analysis, computational methods, stereoelectronics, and both solution and enzymatic catalysis.

Prerequisite: CHEM 201.
CHEM 203. Organic Spectroscopy. 4 Units.
Modern methods used in structure determination of organic molecules. Topics include mass spectrometry; ultraviolet, chiroptical, infrared, and nuclear magnetic resonance spectroscopy.
Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C) or (CHEM H52A and CHEM H52B and CHEM H52C).
Restriction: Graduate students only.

CHEM 204. Organic Synthesis I. 4 Units.
Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis is on carbon-carbon bond forming methodology. Topics include carbonyl annelations, cycloadditions, sigmatropic rearrangements, and organometallic methods.

CHEM 205. Organic Synthesis II. 4 Units.
Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis this quarter is on natural product total synthesis and retrosynthetic (antithetic) analysis.
Prerequisite: CHEM 204.

CHEM 206. Laboratory Skills. 4-6 Units.
Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.
Same as PHYSICS 206.
Concurrent with PHYSICS 106.

CHEM 207. Chemistry for Physicists. 4 Units.
Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.
Same as PHYSICS 207.

CHEM 208. Mathematics for Chemists. 4 Units.
Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.
Same as PHYSICS 208.

CHEM 209. Physics for Chemists. 4 Units.
An introduction to concepts of electrodynamics with special emphasis on applications to chemistry: vector analysis, electrostatics, magnetostatics, electrodynamics, electromagnetic waves, classical radiation theory, special relativity.

CHEM 213. Chemical Kinetics. 4 Units.
Surveys gas phase and organic reaction mechanisms and their relationship to kinetic rate laws; treats the basic theory of elementary reaction rates. A brief presentation of modern cross-sectional kinetics is included.
Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 215. Inorganic Chemistry I. 4 Units.
Principles of modern inorganic chemistry with applications to chemical systems of current interest. Inorganic phenomena are organized into general patterns which rationalize observed structures, stabilities, and physical properties.
Prerequisite: CHEM 107 and (CHEM 131A and CHEM 131B and CHEM 131C).
Restriction: Graduate students only.

CHEM 216. Organometallic Chemistry. 4 Units.
Synthesis and reactivity of organometallic complexes with an emphasis on mechanisms. Topics include bonding and fluxional properties; metal-carbon single and multiple bonds; metal 8-complexes. Applications to homogenous catalysis and organic synthesis are incorporated throughout the course.
Prerequisite: CHEM 107 or CHEM 215.
CHEM 217. Physical Inorganic Chemistry. 4 Units.
General principles of the spectroscopy and magnetism of inorganic compounds. Characterization of inorganic complexes by infrared, near-infrared, visible, ultraviolet, NMR, EPR, EXAFS, and Mossbauer spectroscopies. Some necessary group theory developed.
Prerequisite: CHEM 215.

CHEM 218. Metallobiochemistry. 4 Units.
A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature’s exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.
Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 219. Chemical Biology. 4 Units.
A survey of the organic chemistry underlying biological function. Introduction to chemical genetics, receptor-ligand interactions, small molecule agonists and antagonists, combinatorial synthesis, high throughput assays, molecular evolution, protein and small molecule design.
Restriction: Graduate students only.

CHEM 220. Bioorganic Chemistry. 4 Units.
Structure and function of biologically important macromolecules. Introduction to nucleic acid, protein structure, principles of molecular recognition, enzyme function, modelling, and engineering.
Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C).

CHEM 221A. Fundamentals of Molecular Biophysics. 4 Units.
An overview of the principles and concepts in molecular biophysics. Topics covered include energy and entropy in biology, non-equilibrium reaction kinetics, random walks and molecular diffusion, molecular forces in biology.
Prerequisite: Undergraduate courses in physical chemistry and biochemistry.
Repeatability: May be taken for credit 3 times.

CHEM 222. Biological Macromolecules. 4 Units.
Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.
Same as PHRMSCI 223.

CHEM 223. Molecular and Cellular Biophotonics. 4 Units.
Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.
(Design units: 0)
Same as CBEMS 224.
Restriction: Graduate students only.

CHEM 224. Polymer Chemistry: Synthesis and Characterization of Polymers. 4 Units.
Prerequisite: Undergraduate courses in organic and physical chemistry.

CHEM 225. Electromagnetism. 4 Units.
Maxwell’s equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.
Same as PHYSICS 228.

CHEM 229A. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.
Same as PHYSICS 229A.
Concurrent with PHYSICS 100.
CHEM 229B. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as PHYSICS 229B.

CHEM 230. Classical Mechanics and Electromagnetic Theory. 4 Units.
Fundamentals of classical mechanics and electromagnetic theory are developed with specific application to molecular systems. Newtonian, Lagrangian, and Hamiltonian mechanics are developed. Boundary value problems in electrostatics are investigated. Multipole expansion and macroscopic media are discussed from a molecular viewpoint.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 231A. Fundamentals of Quantum Mechanics. 4 Units.
The postulates of quantum mechanics are discussed and applied to a variety of model problems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 231B. Applications of Quantum Mechanics. 4 Units.
Approximate methods for solving atomic and molecular structure problems are developed, and the application of quantum mechanics to spectroscopy is introduced.

Prerequisite: CHEM 231A.

CHEM 231C. Molecular Spectroscopy. 4 Units.
Theory and techniques of spectroscopy as used for the study of molecular and condensed phase properties. Coherent time domain spectroscopies are covered.

Prerequisite: CHEM 231B.

CHEM 232A. Thermodynamics and Introduction to Statistical Mechanics. 4 Units.
A detailed discussion from an advanced point of view of the principles of classical thermodynamics. The fundamentals of statistical mechanics. Topics include an introduction to ensemble theory, Boltzmann statistics, classical statistical mechanics, and the statistical mechanics of ideal gas systems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 232B. Advanced Topics in Statistical Mechanics. 4 Units.
Continued discussion of the principles of statistical mechanics. Applications to topics of chemical interest including imperfect gases, liquids, solutions, and crystals. Modern techniques such as the use of autocorrelation function methods.

Prerequisite: CHEM 232A.

CHEM 232C. Non-Equilibrium Statistical Mechanics. 4 Units.
Phenomenology of material processes, including: kinetic theories of transport and continuum, linear response theory, critical phenomena of phase transition, self-assembly, and nucleation.

CHEM 233. Nuclear and Radiochemistry. 4 Units.
Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CBEMS 233.

Concurrent with CBEMS 133.

CHEM 234. Advanced Chemical Kinetics. 4 Units.
Topics and format vary.

Prerequisite: CHEM 213.

Repeatability: Unlimited as topics vary.

CHEM 235. Molecular Quantum Mechanics. 4 Units.
Application of quantum mechanics to calculation of molecular properties. Electronic structure of molecules.

Prerequisite: CHEM 231A.
CHEM 236. Forces Between Molecules. 4 Units.
The nature and effects of non-covalent interactions between molecular systems. The focus is on properties of these interactions in condensed phases: macromolecular systems; particle-surface interactions.

CHEM 237. Mathematical Methods in Chemistry. 4 Units.
Survey of essential math methods in chemistry. Topics may include series and limits, complex analysis, Fourier and Laplace transforms, linear algebra and operators (theory and algorithms), differential equations, and probability concepts for stochastic processes.

CHEM 241. Current Issues Related to Tropospheric and Stratospheric Processes. 4 Units.
Examination of current issues related to the atmosphere, including energy usage; toxicology; effects on humans, forests, plants, and ecosystems; particulate matter (PM10); combustion; modeling and meteorology; airborne toxic chemicals and risk assessment; application of science to development of public policies.

Prerequisite: ENGRMAE 164 or ENGRMAE 261 or CHEM 245 or EARTHSS 240.

Same as ENGRMAE 260.

CHEM 242A. Physical and Geometrical Optics. 4 Units.
Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Same as CBEMS 242A.

Restriction: Graduate students only.

Concurrent with PHYSICS 134A.

CHEM 242B. Applied Optics. 4 Units.
Focuses on the treatment of a wide variety of tools and techniques used in optics, particularly in research. Subjects include an introduction to lasers, optical detection, coherent optics, spectroscopic techniques, and selected topics corresponding to the interest of the students.

Prerequisite: CHEM 242A.

Same as CBEMS 242B.

CHEM 243. Advanced Instrumental Analysis. 4 Units.
Theory and applications of modern advanced instrumental methods of analysis. Includes data acquisition, storage, retrieval and analysis; Fourier transform methods; vacuum technologies; magnetic sector; quadrupole and ion trap mass spectrometry; surface science spectroscopic methods; lasers and optics.

Prerequisite: CHEM 152 and (CHEM 131A and CHEM 131B and CHEM 131C).

CHEM 245. Atmospheric Chemistry of the Natural and Polluted Troposphere. 4 Units.
Kinetics, mechanisms and photochemistry of tropospheric reactions in the gas, liquid, and solid phases, and methods of analysis. Chemistry of photochemical oxidant formation and acid deposition, and applications to control strategies. Chemistry of toxic chemicals and indoor air pollution.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 246. Separations and Chromatography. 4 Units.
Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, supercritical fluid chromatography, capillary electrophoresis, and field flow fractionation. Applications of these separation strategies are discussed.

CHEM 247. Current Problems in Analytical Chemistry. 4 Units.
Surveys current research challenges in analytical chemistry. Topics include electrochemistry, chromatography, spectroscopy, and mass spectrometry.

CHEM 248. Electrochemistry. 4 Units.
Fundamentals of electrochemistry including thermodynamics and the electrochemical potential, charge transfer kinetics, and mass transfer. Methods based on controlled potential and controlled current are described; the effects of slow heterogeneous kinetics and the perturbation caused by homogeneous chemistry are discussed.

CHEM 249. Analytical Spectroscopy. 4 Units.
Advanced treatment of spectroscopic techniques and instrumentation. Atomic and molecular absorption, emission, and scattering processes and their application to quantitative chemical analysis are outlined. Puts different spectroscopic techniques in perspective and demonstrates most appropriate applications to analytical problems.
CHEM 251. Special Topics in Organic Chemistry. 1-4 Units.
Advanced topics in organic chemistry.
Repeatability: Unlimited as topics vary.

CHEM 252. Special Topics in Physical Chemistry. 1-4 Units.
Advanced topics in physical chemistry. Materials fee.
Repeatability: Unlimited as topics vary.

CHEM 253. Special Topics in Inorganic Chemistry. 4 Units.
Advanced topics in inorganic chemistry.
Prerequisite: CHEM 215.
Repeatability: Unlimited as topics vary.

CHEM 254. Special Topics in Computational and Theoretical Chemistry. 4 Units.
Subjects covered vary from year to year.
Repeatability: Unlimited as topics vary.

CHEM 255. Materials Chemistry. 4 Units.
An introduction to crystalline solids, descriptive crystal chemistry, solid-state synthesis and characterization techniques, x-ray and electron diffraction, phase diagrams, electronic band structure of extended solids, semi conductors, and nanoscale inorganic materials.

CHEM 266. Current Topics in Chemical and Materials Physics. 1 Unit.
The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.
Repeatability: May be repeated for credit unlimited times.
Same as PHYSICS 266.

CHEM 271. Structural X-Ray Crystallography. 4 Units.
The principles and practice of the determination of structures by single crystal X-Ray diffraction techniques. Crystal symmetry, diffraction, structure solution and refinement. Opportunities for hands-on experience in structure determination.
Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 272. Industrial Chemistry. 4 Units.
Scientific, economic environmental aspects of the top 50 industrially produced chemicals, including: how they are obtained, and used; present and future sources of energy and raw materials, and the effects of chemical manufacturing on the price structure of our economy.

CHEM 273. Technical Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations, through examples and practice.
Grading Option: Satisfactory/unsatisfactory only.
Same as PHYSICS 273.

CHEM 280. Research. 2-12 Units.
Supervised original research toward the preparation of a Ph.D dissertation or M.S. thesis.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

CHEM 290. Seminar. 1 Unit.
Weekly seminars and discussions on general and varied topics of current interest in chemistry.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
CHEM 291. Research Seminar. 4 Units.
Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

CHEM 292. Graduate Symposium. 2 Units.
Students present public seminars on literature-based research topics in contemporary chemistry. Topics to be chosen by student and approved by instructor.

Repeatability: May be repeated for credit unlimited times.

CHEM 299. Independent Study. 1-4 Units.
Independent research with Chemistry faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

CHEM 399. University Teaching. 1-4 Units.
Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Earth System Science Courses

EARTHSS 1. Introduction to Earth System Science. 4 Units.
Covers the origin and evolution of the Earth, its atmosphere, and oceans, from the perspective of biogeochemical cycles, energy use, and human impacts on the Earth system.

(II, Va)

EARTHSS 3. Oceanography. 4 Units.
Examines circulation of the world oceans and ocean chemistry as it relates to river, hydrothermal vent, and atmospheric inputs. Geological features, the wide variety of biological organisms, and global climate changes, such as greenhouse warming, are also studied.

(II, Va)

EARTHSS 5. The Atmosphere. 4 Units.
The composition and circulation of the atmosphere with a focus on explaining the fundamentals of weather and climate. Topics include solar and terrestrial radiation, clouds, and weather patterns.

(II, Va)

EARTHSS 7. Physical Geology. 4 Units.
Introduction to Earth materials and processes. Topics include rocks and minerals, plate tectonics, volcanoes, earthquakes, Earth surface processes, Earth resources, geologic time, and Earth history. Laboratory work involves hands-on study of geologic materials, maps, and exercises pertaining to geologic processes. Materials fee.

(II, Va)

EARTHSS 11. Climate Change and Policy. 4 Units.
Develops an understanding of the physical basis behind global climate change; examines how human activities cause it, looks to future rates and impacts of global warming, and reviews the international conventions, protocols, and scientific assessments of climate change.

(II)

EARTHSS 13. Global-Change Biology. 4 Units.
Addresses ways in which humans are altering the global environment, with consequences for the ecology of animals, plants, and microbes. Discussion on how these biologically oriented questions relate to human society, politics, and the economy.

Same as BIO SCI 9K.

(II)
EARTHSS 15. Introduction to Global Climate Change. 4 Units.
Introduction of scientific, technological, environmental, economic, and social aspects underlying the threat and understanding of global climate change. Human and natural drivers of climate. Impacts of climate on natural, managed, and human systems, including their vulnerability and ability to adapt.
(II and (VA or VIII) ).

EARTHSS 17. Hurricanes, Tsunamis, and other Catastrophes. 4 Units.
Introduction to the basic science and state of predictability of various natural catastrophic events including earthquakes, volcanic eruptions, tsunamis, landslides, floods, hurricanes, fires, and asteroid impacts and their interactions and implications with human society in the U.S. and globally.
(II and (VA or VIII) ).

EARTHSS 19. Introduction to Modeling the Earth System. 4 Units.
Simulate the Earth's system using computer models. Covers the interaction of the air, land, and ocean, and explores how changes to one part of the environment affect the complete Earth system. Utilizes technological tools to understand scientific principles.
(II, Vb)

EARTHSS 21. On Thin Ice: Climate Change and the Cryosphere. 4 Units.
Introduction of the basic science that governs the cryosphere and its interaction with the climate system. Covers some of the significant economic, sociological, and political consequences of the recent melting of the cryosphere driven by anthropogenic climate change.
(II and (VA or VIII) ).

EARTHSS 23. Air Pollution: From Urban Smog to Global Change . 4 Units.
Air pollution occurs on regional to global scales. A wide range of air pollution sources and physical, chemical, and meteorological sciences behind air pollution are introduced. The consequences of air pollution to our society are also discussed.
(II and (VA or VIII) ).

EARTHSS 51. Land Interactions. 4 Units.
The role of terrestrial processes in the Earth system. Provides an introduction to ecosystem processes that regulate the cycling of energy, water, carbon, and nutrients. Analysis of the impact of human activities.
Prerequisite: CHEM 1C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 53. Ocean Biogeochemistry. 4 Units.
Overview of oceanography for those interested in earth system science. Focus is on physical, chemical, and biological processes that drive biogeochemical cycling in the oceans. Coastal systems also reviewed, with emphasis on California waters.
Prerequisite: CHEM 1C. Prerequisite or corequisite: MATH 2B or AP Calculus BC exam with a minimum score of 4.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 55. Earth’s Atmosphere. 4 Units.
Composition, physics, and circulation of Earth’s atmosphere with an emphasis on explaining the role of atmospheric processes in shaping the climate system. Topics include: atmospheric composition, the global energy balance, radiative transfer and climate, atmospheric circulation and climate sensitivity.
Corequisite: PHYSICS 3B or PHYSICS 7C.
Prerequisite: MATH 2B or a score of 4 or higher on the AP Calculus BC exam.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 60A. Fundamental Processes in Earth and Environmental Studies. 4 Units.
An introduction to the physical environment, biological systems, and human-environment interactions. Explores physical principles such as fluid transport and reaction rates using environmental examples as well as principles of populations, ecosystems, carrying capacity, and sustainable use of resources.
Corequisite: EARTHSS 1 or UNI STU 13A.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.
EARTHSS 60B. Local and Regional Environmental Issues. 4 Units.
An introduction to common environmental issues using case studies from Orange County and California. Studies natural hazards as well as human-caused problems with air quality, water quality, coastal pollution, ecosystem degradation, and urban climate.

Prerequisite: EARTHSS 60A and (CHEM 1B or CHEM H2B).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 60C. Global Environmental Issues. 4 Units.
An overview of global environmental changes including climate change, sea level rise, biodiversity loss, land and ocean degradation, and resource depletion. Discusses scientific, cultural, historical, and policy dimensions of these issues as well as possible solutions.

Prerequisite: EARTHSS 60A and (CHEM 1B or CHEM H2B).

EARTHSS H90. The Idiom and Practice of Science. 4 Units.
A series of fundamental and applied scientific problems are addressed, illustrating the pervasive role of mathematical analysis. Topics may include energy utilization, the climate system, the "greenhouse effect," zone depletion and air pollution, ecological consequences of water pollution, nutrient cycles.

Restriction: Campuswide Honors Program students only.

EARTHSS 101. Paleoclimatology. 4 Units.
Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for predication of future climate.

Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 110. Environmental Controversies. 4 Units.
Examines the roles and strategies of advocacy groups, scientists, lobbyists, celebrities, pundits, politicians, and other opinion-makers in creating and shaping public opinion on controversial environmental issues. Use and misuse of science to influence public opinion is elicited.

Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or EARTHSS 51 or EARTHSS 53 or EARTHSS 55.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 112. Global Climate Change and Impacts. 4 Units.
Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.

Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 222.

EARTHSS 114. Earth System Science Laboratory and Field Methods. 4 Units.
Introduction to methods used to measure exchange of gases and energy between the atmosphere and terrestrial ecosystems. Laboratories include data acquisition and isotopic and chromatographic analysis. Field measurements at UCI's Marsh Reserve include microclimate, hydrology, trace-gas exchange, and plant growth.

Prerequisite: EARTHSS 51 or EARTHSS 60A.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 116. Data Analysis for Earth Sciences. 4 Units.
Analysis and interpretation of geophysical data, including functional fitting, probability density functions, and multidimensional time-series methods, with applications in atmospheric, oceanic, and biogeochemical sciences.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.
EARTHSS 118. Advanced Data Analysis and Modeling. 4 Units.
Covers advanced data analysis and modeling techniques for applications within Earth system science. These applications will come from variety of Earth science problems. Students will gain programming proficiency by implementing computational methods in MATLAB.

Prerequisite: EARTHSS 116 and (MATH 2B or AP Calculus BC exam with a minimum score of 4).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 122. Atmospheric Dynamics. 4 Units.
Fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean. Most important are interactions between the density stratification and the Coriolis force associated with Earth's rotation. Topics include circulation, vorticity, planetary waves and their role in climate.

Prerequisite: EARTHSS 55 and MATH 2D and PHYSICS 7C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 124. Weather Analysis. 4 Units.
Provides an overview of weather systems in mid-latitudes and tropics. The fundamental dynamics possible for these weather systems are described. Elementary weather analysis and forecasting techniques are introduced.

Prerequisite: EARTHSS 55 or EARTHSS 60A.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 130. Physical Oceanography. 4 Units.
Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.

Prerequisite: MATH 2D and PHYSICS 7C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 132. Terrestrial Hydrology. 4 Units.
Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.

Prerequisite: EARTHSS 60A or EARTHSS 51.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 232

EARTHSS 134. Fundamentals of GIS for Environmental Sciences. 4 Units.
Introduction to Geographic Information Systems (GIS). Topics include fundamentals of cartography, creating/editing GIS data, linking spatial and tabular data, georeferencing, map projections, geospatial analysis, spatial statistics and the development of GIS models. Examples from hydrology, ecology, and geology.

Prerequisite: EARTHSS 60A or EARTHSS 60C or EARTHSS 51 or EARTHSS 53.
Overlaps with CRM/LAW C148.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 138. Satellite Remote Sensing for Earth System Science. 4 Units.
Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

Prerequisite: EARTHSS 51 or EARTHSS 53 or EARTHSS 60A or EARTHSS 60C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 238.
EARTHSS 140. Advanced Geology. 4 Units.
Introduces students to the geological processes which have formed and continue to shape the Earth. Topics will include geological time, minerals and the rock cycle, plate tectonics and associated geological hazards, earth resources, and earth surface processes.

Prerequisite: EARTHSS 51 or EARTHSS 60A.

Overlaps with EARTHSS 7.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 142. Atmospheric Chemistry. 4 Units.
Chemistry of the troposphere and stratosphere. Topics include: processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.

Prerequisite: (CHEM 1C or CHEM H2C) and (MATH 2B or AP Calculus BC exam with a minimum score of 4).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 144. Marine Geochemistry and Biogeochemistry. 4 Units.
Processes controlling the major and minor element composition of seawater and element distributions in the ocean. Gas exchange, carbon dioxide system, stable isotopes, radionuclides as tracers and chronometers, particle fluxes, organic geochemistry, sediment geochemistry, global cycles of biogeochemically important elements.

Prerequisite: (EARTHSS 53 or EARTHSS 60A) and EARTHSS 60C.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 146. Consequences of Air Pollution. 4 Units.
From public health to the global climate system this course will explore the impacts of air pollution from the beginning of human history to current and emerging issues. Scientific concepts behind air pollution and solutions will be discussed.

Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 148. Marine Ecosystems and Global Change. 4 Units.
Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 53 or (EARTHSS 60A and EARTHSS 60C).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 248.

EARTHSS 150. Laboratory Methods in Earth Systems Science. 4 Units.
Introduction to analytical methods used in Earth science research. Lectures cover theory and applications of each method. Laboratories cover sample preparation, experimental design, standardization and calibration, operation of analytical instruments (mass spectrometers, gas chromatographs, and spectrophotometers), and analysis of data.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 250.

EARTHSS 164. Ecosystem Ecology. 4 Units.
A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C.

Same as BIO SCI E118.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 264.
EARTHSS 168. Physiological Plant Ecology. 4 Units.
An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.
Prerequisite: (EARTHSS 51) or (EARTHSS 60A and EARTHSS 60C) or (BIO SCI E106).
Same as BIO SCI E127.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 170. Environmental Microbiology. 4 Units.
Establishes a fundamental understanding of microbes living in the environment, including their distribution, diversity, and biochemistry, and discusses how they attribute to global biogeochemical cycles.
Prerequisite: (EARTHSS 53) or (EARTHSS 60A and EARTHSS 60C) or (BIO SCI E106 and BIO SCI M122).
Same as BIO SCI E163.
Concurrent with EARTHSS 270.

EARTHSS 172. Science Communication and Outreach. 2 Units.
Students learn and practice effective science communication skills useful in public and educational outreach. Topics include research explication, language scaffolding, educational psychology, oral presentation techniques, K-12 science standards, and effective writing styles for op-eds, blogs, and Web sites.
Prerequisite: EARTHSS 51 or EARTHSS 60A.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.
Concurrent with EARTHSS 272.

EARTHSS 174. Ice in the Climate System. 4 Units.
Examines the major components of the Earth's cryosphere. Characteristics, volume, extent, remote sensing observations, long-term trends, mass balance, key physical processes, relevance and importance to the climate system, responses and feedbacks, future evolution, and key uncertainties will be discussed.
Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.
Concurrent with EARTHSS 274.

EARTHSS 178. Solving the Energy-Carbon-Climate Problem. 4 Units.
Why is climate change such a difficult problem? What can we do about it? The course will introduce the global politics of energy and climate, assess options for decreasing energy demand, generating low-carbon energy, sequestering carbon, geoengineering, and adaptation.
Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).
Restriction: Earth System Science majors and Environmental Science majors have first consideration for enrollment.

EARTHSS 180. Environmental Sustainability I. 4 Units.
Provides an introduction to sustainability from different points of view; historical, scientific, political, ethical, and economic.
Same as PP&D 131.
Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

EARTHSS 182. Environmental Sustainability II. 4 Units.
Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.
Same as PP&D 132.
Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.
EARTHSS 190A. Senior Seminar on Global Sustainability I. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Prerequisite: BIO SCI 65 and ENVIRON E20 and EARTHSS 10.

Grading Option: In progress only.

Same as BIO SCI 191A, SOCECOL 186A.

Restriction: Seniors only.

EARTHSS 190B. Senior Seminar on Global Sustainability II. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A.

Grading Option: In progress only.

Same as BIO SCI 191B, SOCECOL 186B.

Restriction: Seniors only.

EARTHSS 190CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, SOCECOL 186CW.

Restriction: Seniors only.

EARTHSS 191. Title Introduction to Research in Earth System Science. 1 Unit.
Weekly presentations by Earth System Science faculty describing ongoing research in their laboratories. The goals are to introduce students to the range of research topics and methods in Earth System Science and to the research opportunities available within the Department.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. Earth System Science and Environmental Science majors have first consideration for enrollment. Earth and Atmospheric Sciences minors have first consideration for enrollment.

EARTHSS 192. Careers in Earth System Science. 1 Unit.
A weekly seminar course designed to help students transition to post-graduation career paths. Topics include designing effective resumes, applying to graduate school, and seeking employment. Also includes presentations by faculty, business, and government leaders describing potential environmental science career trajectories.

Grading Option: Pass/no pass only.

Restriction: Seniors only. Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 197. Independent Study in Earth System Science. 1-4 Units.
Field study, educational outreach, or other independent projects under faculty direction. Interested students should arrange with an ESS faculty member to supervise and support an independent study project. A written summary is required at the end of each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.
EARTHSS 198W. Senior Thesis in Earth System Science. 4 Units.
Students receive guidance on the effective oral and written communication of research results. Students prepare and present a seminar, a poster, and a written thesis describing their research in Earth System Science.

Prerequisite: Two quarters of EARTHSS 199. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with EARTHSS H198.

(Ib)

EARTHSS H198. Honors Thesis in Earth System Science. 4 Units.
Students receive guidance on effective written and oral communication of research results. Students prepare and present a seminar, poster, and written thesis describing their honors research in Earth System Science. Submission of the thesis and successful completion of this course will also satisfy the UCI upper-division writing requirement.

Prerequisite: EARTHSS 199A and EARTHSS 199B

Restriction: Consent of instructor to enroll and Prerequisite required

(Ib)

EARTHSS 199. Undergraduate Research. 1-4 Units.
For junior and senior undergraduates, preferably with majors in science or engineering. Interested students should arrange with an ESS faculty member to supervise and support a research project. A written summary is required at the end of each quarter.

Repeatability: May be taken for credit for 12 units.

Restriction: Juniors and Seniors only.

EARTHSS H199A. Honors Research in Earth System Science. 4 Units.
Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors Program students only. Earth System Science majors only. Campuswide Honors Program students only.

EARTHSS H199B. Honors Research in Earth System Science. 4 Units.
Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors Program students only. Earth System Science majors only. Campuswide Honors Program students only.

EARTHSS H199C. Honors Research in Earth System Science. 4 Units.
Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors Program students only. Earth System Science majors only. Campuswide Honors Program students only.

EARTHSS 200. Global Physical Climatology. 4 Units.
A descriptive overview of Earth's climate system and energy budget. Large-scale circulations, key physical processes, and climate sensitivity of the atmosphere, ocean, land surface, and cryosphere.

Restriction: Graduate students only.

EARTHSS 202. Climate Change. 4 Units.
Explores past, present, and projected changes in Earth's climate. Topics include paleoclimate records and mechanisms of natural climate variability at a range of timescales (orbital to seasonal); General Circulation Models; and IPCC observations and projections of future climate change.

Restriction: Graduate students only.

EARTHSS 212. Geoscience Modeling and Data Analysis. 4 Units.
Computer-based course. Fundamental statistical techniques needed to analyze Earth system data and models. Basic numerical techniques to solve Earth system models. Focuses on linear and non-linear ordinary differential equations, as well as simple partial differential equations.

Restriction: Graduate students only.
EARTHSS 222. Global Climate Change and Impacts. 4 Units.
Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.

Concurrent with EARTHSS 112.

EARTHSS 224. Ocean Processes. 4 Units.
Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.

EARTHSS 226. Land Surface Processes. 4 Units.
Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.

EARTHSS 228. Geophysical Fluid Dynamics. 4 Units.
Introduces fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean, with particular emphasis on the interactions between the stable density stratification and the Coriolis force associated with Earth's rotation.

Restriction: Graduate students only.

EARTHSS 232. Terrestrial Hydrology. 4 Units.
Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.

Prerequisite: EARTHSS 60A or EARTHSS 51.

Concurrent with EARTHSS 132

EARTHSS 236. Radiative Processes and Remote Sensing. 4 Units.
Solar and terrestrial radiation and Earth system interaction. Radiative transfer theory. Principles, applications of remote sensing of environment. Planck's law, radiative transfer equation, radiative properties of trace gasses and aerosols, remote sensing techniques, global trends in radiative forcing.

Prerequisite: MATH 2D and PHYSICS 7D.

EARTHSS 238. Satellite Remote Sensing for Earth System Science. 4 Units.
Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

Concurrent with EARTHSS 138.

EARTHSS 240. Atmospheric Chemistry and Physics. 4 Units.
Examines the physical/chemical processes which determine the structure and composition of Earth's atmosphere and its role in the climate system.

Restriction: Graduate students only.

EARTHSS 248. Marine Ecosystems and Global Change. 4 Units.
Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 224.

Restriction: Graduate students only.

Concurrent with EARTHSS 148.

EARTHSS 250. Laboratory Methods in Earth System Science. 4 Units.
Introduction to analytical methods used in Earth science research. Lectures cover theory and applications of each method. Laboratories cover sample preparation, experimental design, standardization and calibration, operation of analytical instruments (mass spectrometers, gas chromatographs, and spectrophotometers), and analysis of data.

Concurrent with EARTHSS 150.
EARTHSS 264. Ecosystem Ecology. 4 Units.
A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C.
Concurrent with EARTHSS 164 and BIO SCI E118.

EARTHSS 266. Global Biogeochemical Cycles. 4 Units.
Global biogeochemical cycling of the elements. Topics include global cycling of carbon, nitrogen, oxygen, and sulfur; impact of human activities on biogeochemical processes.

Restriction: Graduate students only.

EARTHSS 270. Environmental Microbiology. 4 Units.
Establishes a fundamental understanding of microbes living in the environment, including their distribution, diversity, and biochemistry, and discusses how they attribute to global biogeochemical cycles.

Prerequisite: (EARTHSS 53 or EARTHSS 60A) and (EARTHSS 60C or BIO SCI E106).
Concurrent with EARTHSS 170 and BIO SCI E163.

EARTHSS 272. Science Communication and Outreach. 2 Units.
Students learn and practice effective science communication skills useful in public and educational outreach. Topics include research explication, language scaffolding, educational psychology, oral presentation techniques, K-12 science standards, and effective writing styles for op-eds, blogs, and Web sites.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit 3 times.
Concurrent with EARTHSS 172.

EARTHSS 274. Ice in the Climate System. 4 Units.
Examines the major components of the Earth's cryosphere. Characteristics, volume, extent, remote sensing observations, long-term trends, mass balance, key physical processes, relevance and importance to the climate system, responses and feedbacks, future evolution, and key uncertainties will be discussed.

Concurrent with EARTHSS 174.

EARTHSS 280A. Special Topics in Earth System Science. 1-4 Units.
Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

EARTHSS 280B. Special Topics in Earth System Science. 1-4 Units.
Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280A.
Repeatability: Unlimited as topics vary.

EARTHSS 280C. Special Topics in Earth System Science. 1-4 Units.
Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280B.
Repeatability: Unlimited as topics vary.

EARTHSS 282A. Special Topics in Climate. 1-4 Units.
Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
EARTHSS 282B. Special Topics in Climate. 1-4 Units.
Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 282C. Special Topics in Climate. 1-4 Units.
Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 284A. Special Topics in Atmospheric Chemistry. 1-4 Units.
Each quarter is devoted to current topics in the field of Atmospheric Chemistry. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

EARTHSS 284B. Special Topics in Atmospheric Chemistry. 1-4 Units.
Each quarter is devoted to current topics in the field of Atmospheric Chemistry. Topics addressed vary each quarter.

Prerequisite: EARTHSS 284A.

Repeatability: Unlimited as topics vary.

EARTHSS 284C. Special Topics in Atmospheric Chemistry. 1-4 Units.
Each quarter is devoted to current topics in the field of Atmospheric Chemistry. Topics addressed vary each quarter.

Prerequisite: EARTHSS 284B.

Repeatability: Unlimited as topics vary.

EARTHSS 286A. Special Topics in Biogeochemistry. 1-4 Units.
Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 286B. Special Topics in Biogeochemistry. 1-4 Units.
Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 286C. Special Topics in Biogeochemistry. 1-4 Units.
Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
EARTHSS 288A. Special Topics in Ecosystems. 1-4 Units.
Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

EARTHSS 288B. Special Topics in Ecosystems. 1-4 Units.
Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.
Prerequisite: EARTHSS 288A.
Repeatability: Unlimited as topics vary.

EARTHSS 288C. Special Topics in Ecosystems. 1-4 Units.
Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.
Prerequisite: EARTHSS 288B.
Repeatability: Unlimited as topics vary.

EARTHSS 290. Seminar. 1 Unit.
Weekly seminars and discussions on topics of general and current interest in Earth System Science. Topics addressed vary each quarter.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

EARTHSS 291. Research Seminar. 1-4 Units.
Detailed discussions of ongoing research in earth system science. Format, content, and frequency of the course are variable.
Repeatability: May be repeated for credit unlimited times.

EARTHSS 298. Practicum in Earth System Science. 4 Units.
Designed to introduce first-year graduate students to research. Students explore research opportunities and develop a proposal for a summer research
project under the direction of a faculty mentor.
Restriction: Graduate students only.

EARTHSS 299. Research. 2-12 Units.
Supervised original research in areas of Earth System Science.
Repeatability: May be repeated for credit unlimited times.

Mathematics Courses

MATH 1A. Pre-Calculus. 4 Workload Units.
Basic equations and inequalities, linear and quadratic functions, and systems of simultaneous equations. Course may be offered online.

MATH 1B. Pre-Calculus. 4 Units.
Preparation for calculus and other mathematics courses. Exponentials, logarithms, trigonometry, polynomials, and rational functions. Satisfies no
requirements other than contribution to the 180 units required for graduation. Course may be offered online.
Prerequisite: MATH 1A or placement into MATH 1B via the Calculus Placement exam, or a score of 450 or higher on the Mathematics section of the
SAT Reasoning Test.
MATH 2A. Single-Variable Calculus. 4 Units.
Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or placement into MATH 2A via the Calculus Placement exam (fee required), or a score of 3 on the AP Calculus AB exam, or a score of 600 or higher on the Mathematics section of the SAT Reasoning Test. MATH 1B with a grade of C or better.

Restriction: School of Physical Sciences, School of Engineering, and School of Information and Computer Sciences majors have first consideration for enrollment.

(Vb)

MATH 2B. Single-Variable Calculus. 4 Units.
Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration. Infinite sequences and series. Parametric and polar equations.

Prerequisite: MATH 2A.

Restriction: School of Physical Sciences, School of Engineering, and School of Information and Computer Sciences majors have first consideration for enrollment.

(Vb)

MATH 2D. Multivariable Calculus. 4 Units.
Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates.

Prerequisite: MATH 2A and MATH 2B.

Overlaps with MATH H2D.

Restriction: School of Physical Sciences, School of Engineering, and School of Information and Computer Sciences majors have first consideration for enrollment.

(Vb)

MATH 2E. Multivariable Calculus. 4 Units.
The differential and integral calculus of vector-valued functions. Implicit and inverse function theorems. Line and surface integrals, divergence and curl, theorems of Greens, Gauss, and Stokes.

Prerequisite: MATH 2D.

Overlaps with MATH H2E.

Restriction: School of Physical Sciences and School of Engineering majors have first consideration for enrollment.

MATH 3A. Introduction to Linear Algebra. 4 Units.
Systems of linear equations, matrix operations, determinants, eigenvalues and eigenvectors, vector spaces, subspaces and dimension.

Prerequisite: MATH 2B.

Overlaps with MATH 6G, I&C SCI 6N.

Restriction: School of Physical Sciences and School of Engineering majors have first consideration for enrollment.

MATH 3D. Elementary Differential Equations. 4 Units.
Linear differential equations, variation of parameters, constant coefficient cookbook, systems of equations, Laplace tranforms, series solutions.

Prerequisite: MATH 2D and MATH 3A.

Restriction: School of Physical Sciences and School of Engineering majors have first consideration for enrollment.
MATH 4. Mathematics for Economists. 4 Units.
Topics in linear algebra and multivariable differential calculus suitable for economic applications.
Prerequisite: MATH 2B.
Overlaps with MATH 2D, MATH 2J, MATH 3A.
Restriction: MATH 4 may not be taken for credit if taken after MATH 2D and either MATH 2J or MATH 3A.
(Vb)

MATH 6G. Linear Algebra. 4 Units.
Linear equations, vector spaces and subspaces, linear functions and matrices, linear codes, determinants, scalar products.
Prerequisite: High school mathematics through trigonometry.
Overlaps with MATH 3A, I&C SCI 6N.
(Vb)

MATH 8. Explorations in Functions and Modeling. 4 Units.
Explorations of applications and connections in topics in algebra, geometry, calculus, and statistics for future secondary math educators. Emphasis on nonstandard modeling problems.
Corequisite: MATH 2A.

MATH 13. Introduction to Abstract Mathematics. 4 Units.
Introduction to formal definition and rigorous proof writing in mathematics. Topics include basic logic, set theory, equivalence relations, and various proof techniques such as direct, induction, contradiction, contrapositive, and exhaustion.
Prerequisite: MATH 2A or I&C SCI 6D.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 77A. Mathematics and Computation in the Digital Age: Introduction to Signal Processing. 4 Units.
Signals in Matlab; blurring, filtering; elements of linear algebra, statistics, optimization; blind matrix inversion; de-correlation method, stochastic gradient descent method, applications to sounds and images.
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77A.
Restriction: Lower-division students only.
(II, Va)

MATH 77B. Mathematics and Computation in the Digital Age: Introduction to Collaborative Filtering. 4 Units.
Basic concepts of collaborative filtering; clustering; matrix factorization and principal components analysis; regression; classification: naive Bayes classifier, decision trees, Perceptron (neural networks).
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77B.
Restriction: Lower-division students only.
(II, Va)

MATH 77C. Mathematics and Computation in the Digital Age: Introduction to Image Processing. 4 Units.
Image de-noising, de-blurring, low pass filtering; image segmentation and classification; Sparse representation; visualization.
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77C.
Restriction: Lower-division students only.
(II, Va)
MATH 77D. Mathematics and Computation in the Digital Age: Intro to Game Simulation and Analysis. 4 Units.
Combinatorial Game Theory--game classification, tree graphs, strategy analysis, Sprague Grundy functions, Bouton's Theorem; Zero-Sum and General-
Sum Game Theory--pay off matrices, Minimax Theorem, Nash equilibrium; machine learning--search algorithms.
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77D.
Restriction: Lower-division students only.

(I, Il, Va)

MATH 105A. Numerical Analysis. 4 Units.
Introduction to the theory and practice of numerical computation. Floating point arithmetic, roundoff; solving transcendental equations; quadrature; linear
systems, eigenvalues, power method.
Corequisite: MATH 105LA.
Prerequisite: MATH 3A. Some acquaintance with computer programming.
Overlaps with ENGRMAE 185.

MATH 105B. Numerical Analysis. 4 Units.
Introduction to the theory and practice of numerical computation. Lagrange interpolation, finite differences, splines, Padé approximations; Gaussian
quadrature; Fourier series and transforms.
Corequisite: MATH 105LB.
Prerequisite: MATH 105A.

MATH 105LA. Numerical Analysis Laboratory. 1 Unit.
Provides practical experience to complement the theory developed in Mathematics 105A.
Corequisite: MATH 105A.

MATH 105LB. Numerical Analysis Laboratory. 1 Unit.
Provides practical experience to complement the theory developed in Mathematics 105B.
Corequisite: MATH 105B.

MATH 107. Numerical Differential Equations. 4 Units.
Theory and applications of numerical methods to initial and boundary-value problems for ordinary and partial differential equations.
Corequisite: MATH 107L.
Prerequisite: MATH 3D and MATH 105A and MATH 105B.

MATH 107L. Numerical Differential Equations Laboratory. 1 Unit.
Provides practical experience to complement the theory developed in Mathematics 107.
Corequisite: MATH 107.

MATH 112A. Introduction to Partial Differential Equations and Applications. 4 Units.
Introduction to ordinary and partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential,
heat, and wave equations). Classification of PDEs, separation of variables and series expansions, special functions, eigenvalue problems.
Prerequisite: MATH 2D and MATH 3D.

MATH 112B. Introduction to Partial Differential Equations and Applications. 4 Units.
Introduction to partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and
wave equations). Green functions and integral representations, method of characteristics.
Prerequisite: MATH 2E and MATH 112A.

MATH 112C. Introduction to Partial Differential Equations and Applications. 4 Units.
Nonhomogeneous problems and Green's functions, Sturm-Liouville theory, general Fourier expansions, applications of partial differential equations in
different areas of science.
Prerequisite: MATH 3D and MATH 2D and MATH 3A.
MATH 113A. Mathematical Modeling in Biology. 4 Units.
Discrete mathematical and statistical models; difference equations, population dynamics, Markov chains, and statistical models in biology.
Prerequisite: MATH 2B.

MATH 113B. Mathematical Modeling in Biology. 4 Units.
Linear algebra; differential equations models; dynamical systems; stability; hysteresis; phase plane analysis; applications to cell biology, viral dynamics, and infectious diseases.
Prerequisite: MATH 113A.

MATH 113C. Mathematical Modeling in Biology. 4 Units.
Partial differential equations models in biology such as one dimensional blood flow, morphogen gradients, and tumor growth; stochastic models in cancer and epidemiology.
Prerequisite: MATH 113B.

MATH 114A. Applied Complex Analysis. 4 Units.
Introduction to complex functions and their applications to engineering and science. Complex numbers, elementary functions; analytic functions; complex integration; power series; residue theory; conformal maps; applications.
Prerequisite: MATH 2D and MATH 3A.
Overlaps with MATH 147.

MATH 115. Mathematical Modeling. 4 Units.
Mathematical modeling and analysis of phenomena that arise in engineering physical sciences, biology, economics, or social sciences.
Prerequisite: Corequisite or prerequisite: MATH 112A or ENGRMAE 140. MATH 2D and (MATH 3A or MATH 6G) and MATH 3D.

MATH 117. Dynamical Systems. 4 Units.
Introduction to the modern theory of dynamical systems including contraction mapping principle, fractals and chaos, conservative systems, Kepler problem, billiard models, expanding maps, Smale's horseshoe, topological entropy.
Prerequisite: MATH 3D and MATH 140A.

MATH 118. The Theory of Differential Equations. 4 Units.
Existence and uniqueness of solutions, continuous dependence of solutions on initial conditions and parameters, Lyapunov and asymptotic stability, Floquet theory, nonlinear systems, and bifurcations.
Prerequisite: MATH 3D and MATH 140A.

MATH 119. Boundary Value Problems. 4 Units.
Introduction to boundary value problems including Green's function representations, maximum principle, variational formulations, Sturm-Liouville problems, eigenfunction expansions, existence and uniqueness for nonlinear problems, method of shooting, finite difference methods.
Prerequisite: MATH 3D and MATH 140A.

MATH 120A. Introduction to Abstract Algebra: Groups. 4 Units.
Axioms for group theory; permutation groups, matrix groups. Isomorphisms, homomorphisms, quotient groups. Advanced topics as time permits. Special emphasis on doing proofs.
Prerequisite: (MATH 3A OR MATH 6G) and MATH 13. MATH 13 with a grade of C- or better.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 120B. Introduction to Abstract Algebra: Rings and Fields. 4 Units.
Basic properties of rings; ideals, quotient rings; polynomial and matrix rings. Elements of field theory.
Prerequisite: MATH 120A.
Restriction: Mathematics majors have first consideration for enrollment.
MATH 120C. Introduction to Abstract Algebra: Galois Theory. 4 Units.
Galois Theory: proof of the impossibility of certain ruler-and-compass constructions (squaring the circle, trisecting angles); nonexistence of analogues to the "quadratic formula" for polynomial equations of degree 5 or higher.

Prerequisite: MATH 120B.

Restriction: Mathematics majors have first consideration for enrollment.

MATH 121A. Linear Algebra. 4 Units.

Prerequisite: (MATH 3A OR MATH 6G) and MATH 13. MATH 13 with a grade of C- or better.

Restriction: Mathematics majors have first consideration for enrollment.

MATH 121B. Linear Algebra. 4 Units.
Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Canonical forms; inner products; similarity of matrices.

Prerequisite: MATH 121A.

Restriction: Mathematics majors have first consideration for enrollment.

MATH 130A. Probability and Stochastic Processes. 4 Units.
Basic concepts of random variables, distributions, independence, correlations, moments, limit theorems, conditional probability, Markov chains, gambler's ruin, branching process, birth and death processes, numerical simulations in Matlab.

Prerequisite: MATH 2A and MATH 2B and (MATH 3A or MATH 6G).

Overlaps with MATH 131A, MATH 132A, STATS 120A.

MATH 130B. Probability and Stochastic Processes. 4 Units.
Exponential distributions, Poisson processes, continuous time Markov chains, renewal theory, insurance ruin and claim problems, numerical simulations in Matlab.

Prerequisite: MATH 130A OR MATH 131A or STATS 120A.

MATH 130C. Probability and Stochastic Processes. 4 Units.
Martingales, Invariance Principle, Brownian motions and applications in option pricing, stationary processes and applications in Wiener filter, numerical simulations in Matlab.

Prerequisite: MATH 130B.

MATH 131A. Introduction to Probability and Statistics. 4 Units.
Introductory course covering basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.

Prerequisite: MATH 2A and MATH 2B and (MATH 2D or MATH 4).

Overlaps with MATH 130A, MATH 132A.

MATH 131B. Introduction to Probability and Statistics. 4 Units.
Introductory course covering basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.

Prerequisite: (MATH 131A or STATS 120A) and (MATH 3A or MATH 6G or MATH 4).

MATH 133A. Statistical Methods with Applications to Finance. 4 Units.
Overview of probability, statistics and financial concepts: distribution, point estimation, confidence interval, linear regression, hypothesis testing, principal component analysis, financial applications.

Prerequisite: MATH 130A or STATS 120A or MATH 2D or MATH 4.

MATH 133B. Statistical Methods with Applications to Finance. 4 Units.
Overview of markets and options: asset modeling, Brownian motion, risk neutrality, option pricing, value at risk, MC simulations.

Prerequisite: MATH 133A.
MATH 140A. Elementary Analysis. 4 Units.
Introduction to real analysis, including: convergence of sequence, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: MATH 2D and MATH 3A and MATH 13. MATH 13 with a grade of C- or better.

Restriction: Math majors have first consideration for enrollment.

MATH 140B. Elementary Analysis. 4 Units.
Introduction to real analysis including convergence of sequences, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.

Prerequisite: MATH 140A. MATH 140A with a grade of C- or better.

Restriction: Mathematics majors have first consideration for enrollment.

MATH 140C. Analysis in Several Variables. 4 Units.
Rigorous treatment of multivariable differential calculus. Jacobians, Inverse and Implicit Function theorems.

Prerequisite: MATH 140B.

MATH 141. Introduction to Topology. 4 Units.
The elements of naive set theory and the basic properties of metric spaces. Introduction to topological properties.

Prerequisite: MATH 140A.

MATH 146. Fourier Analysis. 4 Units.
Rigorous introduction to the theory of Fourier series and orthogonal expansions. Fourier transform.

Prerequisite: MATH 3D and MATH 140A and MATH 140B. Recommended: MATH 112A.

MATH 147. Complex Analysis. 4 Units.
Rigorous treatment of basic complex analysis: analytic functions, Cauchy integral theory and its consequences, power series, residue calculus, harmonic functions, conformal mapping. Students are expected to do proofs.

Corequisite: MATH 140B.
Prerequisite: MATH 140A.

Overlaps with MATH 114A.

Restriction: MATH 114A may not be taken for credit after MATH 147.

MATH 150. Introduction to Mathematical Logic. 4 Units.
First order logic through the Completeness Theorem for predicate logic.

Prerequisite: MATH 13 or (I&C SCI 6B and I&C SCI 6D). MATH 13 with a grade of C- or better.

Overlaps with LPS 105B, PHILOS 105B.

MATH 151. Set Theory. 4 Units.
Axiomatic development; infinite sets; cardinal and ordinal numbers.

Prerequisite: MATH 150.

Overlaps with SOC SCI 105A, LPS 105A.

MATH 152. Computability. 4 Units.
Computable functions; undecidability; Gödel's Incompleteness Theorem.

Prerequisite: MATH 150.

Overlaps with PHILOS 105C, LPS 105C.
MATH 161. Modern Geometry. 4 Units.
Euclidean Geometry; Hilbert's Axioms; Absolute Geometry; Hyperbolic Geometry; the Poincare Models; and Geometric Transformations.

Prerequisite: MATH 13 or (I&C SCI 6B and I&C SCI 6D). MATH 13 with a C- or better.

Restriction: Math majors have first consideration for enrollment.

MATH 162A. Introduction to Differential Geometry. 4 Units.
Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: MATH 2E and MATH 3A and MATH 3D.

MATH 162B. Introduction to Differential Geometry. 4 Units.
Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.

Prerequisite: MATH 162A.

MATH 171A. Mathematical Methods in Operations Research Linear Programming. 4 Units.
Simplex algorithm, duality, optimization in networks.

Prerequisite: MATH 3A or MATH 6G.

MATH 171B. Mathematical Methods in Operations Research Nonlinear Programming. 4 Units.
Conditions for optimality, quadratic and convex programming, search methods, geometric programming.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G).

MATH 173A. Introduction to Cryptology. 4 Units.
Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.

Prerequisite: MATH 2B and (MATH 3A or MATH 6G) and (MATH 13 or (I&C SCI 6B and I&C SCI 6D)). MATH 13 with a grade of C- or better.

MATH 173B. Introduction to Cryptology. 4 Units.
Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.

Prerequisite: MATH 173A.

MATH 174A. Modern Graph Theory. 4 Units.
An introductory course emphasizing the fundamental concepts of graph theory by developing abilities to produce examples, following and devising simple proofs, and current applications of graph theory. Topics include: Graph Types; Matching in Graphs; Menger's Theorem; Kuratowski's Theorem.

Prerequisite: MATH 2B and (MATH 3A or MATH 6G) and (MATH 13 or (I&C SCI 6B and I&C SCI 6D)). MATH 13 with a grade of C- or better.

MATH 175. Combinatorics . 4 Units.
Introduction to combinatorics including basic counting principles, permutations, combinations, binomial coefficients, inclusion-exclusion, derangements, ordinary and exponential generating functions, recurrence relations, Catalan numbers, Stirling numbers, and partition numbers. Course may be offered online.

Prerequisite: MATH 2B and MATH 13. MATH 13 with a grade of C- or better.

MATH 176. Mathematics of Finance. 4 Units.
After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A.

Same as ECON 135.

Restriction: Mathematics, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
MATH 180A. Number Theory. 4 Units.

Prerequisite: MATH 3A and MATH 13. MATH 13 with a grade of C- or better.

Restriction: Math majors have first consideration for enrollment.

MATH 180B. Number Theory. 4 Units.
Introduction to number theory and applications. Analytic number theory, character sums, finite fields, discrete logarithm, computational complexity. Introduction to coding theory. Other topics as time permits.

Prerequisite: MATH 180A.

Restriction: Mathematics majors have first consideration for enrollment.

MATH 184. History of Mathematics. 4 Units.
Topics vary from year to year. Some possible topics: mathematics in ancient times; the development of modern analysis; the evolution of geometric ideas. Students will be assigned individual topics for term papers.

Prerequisite: MATH 120A and MATH 140A.

Restriction: Math majors have first consideration for enrollment.

MATH 184L. History of Mathematics Lesson Lab. 1 Unit.
Aspiring math teachers research, design, present, and peer review middle school or high school math lessons that draw from history of mathematics topics.

Corequisite: MATH 184.
Prerequisite: PHY SCI 5.

MATH 189. Special Topics in Mathematics. 4 Units.
Offered from time to time, but not on a regular basis. Content and prerequisites vary with the instructor.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

MATH 191. Mathematical Modeling Seminar. 2 Units.
Developing, testing, and presenting mathematical models for real world problems. Students will prepare for and participate in the Mathematical Contest in Modeling (MCM) in late February. Separate contest registration fee required.

Prerequisite: MATH 3D.

Repeatability: May be taken for credit 2 times.

MATH 192. Studies in the Learning and Teaching of Secondary Mathematics. 2 Units.
Focus is on historic and current mathematical concepts related to student learning and effective math pedagogy, with fieldwork in grades 6-14.

Prerequisite: MATH 2D and MATH 2J and MATH 3D and (MATH 13 or MATH 120A or MATH 140A).

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Upper-division students only. Math majors with specialization in Mathematics for Education only.

MATH 193. SMPP Capstone. 2 Units.
Capstone course for the Mathematics Subject-Matter Preparation (SMP) program. Engages students in reviewing and conducting current research on significant issues related to the teaching and learning of mathematics in the secondary classroom.

Corequisite: Recommended: MATH 192.

Repeatability: May be taken for credit 2 times.
MATH 194. Problem Solving Seminar. 2 Units.
Develops ability in analytical thinking and problem solving, using problems of the type found in the Mathematics Olympiad and the Putnam Mathematical Competition. Students taking the course in fall will prepare for and take the Putnam examination in December.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

MATH H195A. Honors Seminar. 4 Units.
Topics vary from year to year. Provides an integrative experience, including problem-solving and oral and written presentations. Required for the Honors Program in Mathematics and open to others with consent of instructor.

Restriction: Mathematics Honors Program students only.

MATH H195B. Honors Seminar. 4 Units.
Topics vary from year to year. Provides an integrative experience, including problem-solving and oral and written presentations. Required for the Honors Program in Mathematics and open to others with consent of instructor.

Restriction: Mathematics Honors Program students only.

MATH 199A. Special Studies in Mathematics. 2-4 Units.
Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

MATH 199B. Special Studies in Mathematics. 2-4 Units.
Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

MATH 199C. Special Studies in Mathematics. 2-4 Units.
Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.

MATH 205A. Introduction to Graduate Analysis. 5 Units.
Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 2E and MATH 3A and MATH 13.

MATH 205B. Introduction to Graduate Analysis. 5 Units.
Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205A.

MATH 205C. Introduction to Graduate Analysis. 5 Units.
Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.

Prerequisite: MATH 205B.

MATH 206A. Introduction to Graduate Algebra. 5 Units.
Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials and Galois groups.

Prerequisite: MATH 3A.

MATH 206B. Introduction to Graduate Algebra. 5 Units.
Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials and Galois groups.

Prerequisite: MATH 206A.
MATH 206C. Introduction to Graduate Algebra. 5 Units.
Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators. Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials and Galois groups.
Prerequisite: MATH 206B.

MATH 210A. Real Analysis. 4 Units.
Prerequisite: MATH 140C.

MATH 210B. Real Analysis. 4 Units.
Prerequisite: MATH 210A.

MATH 210C. Real Analysis. 4 Units.
Prerequisite: MATH 210B.

MATH 211A. Topics in Analysis . 4 Units.
Studies in selected areas of Real Analysis, a continuation of MATH 210A-MATH 210B-MATH 210C. Topics addressed vary each quarter.
Prerequisite: MATH 210C.

MATH 211B. Topics in Analysis . 4 Units.
Studies in selected areas of Real Analysis, a continuation of MATH 210A-MATH 210B-MATH 210C. Topics addressed vary each quarter.
Prerequisite: MATH 211A.

MATH 211C. Topics in Analysis . 4 Units.
Studies in selected areas of Real Analysis, a continuation of MATH 210A-MATH 210B-MATH 210C. Topics addressed vary each quarter.
Prerequisite: MATH 211B.

MATH 218A. Introduction to Manifolds and Geometry. 4 Units.
General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.
Prerequisite: MATH 205C.

MATH 218B. Introduction to Manifolds and Geometry. 4 Units.
General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.
Prerequisite: MATH 218A.

MATH 218C. Introduction to Manifolds and Geometry. 4 Units.
General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.
Prerequisite: MATH 218B.

MATH 220A. Analytic Function Theory. 4 Units.
Prerequisite: MATH 140C.

MATH 220B. Analytic Function Theory. 4 Units.
Prerequisite: MATH 220A.
MATH 220C. Analytic Function Theory. 4 Units.
Prerequisite: MATH 220B.

MATH 222A. Several Complex Variables and Complex Geometry. 4 Units.
Several Complex variables, d-bar problems, mappings, Kaehler geometry, de Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.
Prerequisite: MATH 218C and MATH 220C.

MATH 222B. Several Complex Variables and Complex Geometry. 4 Units.
Several Complex variables, d-bar problems, mappings, Kaehler geometry, Le Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.
Prerequisite: MATH 222A.

MATH 222C. Several Complex Variables and Complex Geometry. 4 Units.
Several Complex variables, d-bar problems, mappings, Kaehler geometry, Le Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.
Prerequisite: MATH 222B.

MATH 225A. Introduction to Numerical Analysis and Scientific Computing. 4 Units.
Introduction to fundamentals of numerical analysis from an advanced viewpoint. Error analysis, approximation of functions, nonlinear equations.
Prerequisite: MATH 3D and ((MATH 105A and MATH 105B) or (MATH 140A and MATH 140B)) and MATH 121A and (MATH 112A or ENGRMAE 140).
Restriction: Graduate students only.

MATH 225B. Introduction to Numerical Analysis and Scientific Computing. 4 Units.
Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.
Prerequisite: MATH 225A.
Restriction: Graduate students only.

MATH 225C. Introduction to Numerical Analysis and Scientific Computing. 4 Units.
Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.
Prerequisite: MATH 225B.
Restriction: Graduate students only.

MATH 226A. Computational Differential Equations. 4 Units.
Prerequisite: MATH 3D and (MATH 112A or ENGRMAE 140) and (MATH 140B or MATH 105B).

MATH 226B. Computational Differential Equations. 4 Units.
Prerequisite: MATH 226A.

MATH 226C. Computational Differential Equations. 4 Units.
Prerequisite: MATH 226B.
MATH 227A. Mathematical and Computational Biology. 4 Units.
Prerequisite: MATH 2A and MATH 2B and MATH 3A.

MATH 227B. Mathematical and Computational Biology. 4 Units.
Prerequisite: MATH 227A.

MATH 227C. Mathematical and Computational Biology. 4 Units.
Prerequisite: MATH 227A.
Same as COMPSCI 285.

MATH 230A. Algebra. 4 Units.
Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.
Prerequisite: MATH 120A and MATH 121A and MATH 121B.

MATH 230B. Algebra. 4 Units.
Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.
Prerequisite: MATH 230A.

MATH 230C. Algebra. 4 Units.
Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.
Prerequisite: MATH 230B.

MATH 232A. Algebraic Number Theory. 4 Units.
Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.
Prerequisite: MATH 230C.

MATH 232B. Algebraic Number Theory. 4 Units.
Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.
Prerequisite: MATH 232A.

MATH 232C. Algebraic Number Theory. 4 Units.
Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.
Prerequisite: MATH 232B.

MATH 233A. Algebraic Geometry. 4 Units.
Prerequisite: MATH 230C.

MATH 233B. Algebraic Geometry. 4 Units.
Prerequisite: MATH 233A.
MATH 233C. Algebraic Geometry. 4 Units.

Prerequisite: MATH 233B.

MATH 234B. Topics in Algebra. 4 Units.
Group theory, homological algebra, and other selected topics.

Prerequisite: MATH 230C.

Repeatability: May be repeated for credit unlimited times.

MATH 234C. Topics in Algebra. 4 Units.
Group theory, homological algebra, and other selected topics.

Prerequisite: MATH 234B.

Repeatability: May be repeated for credit unlimited times.

MATH 235A. Mathematics of Cryptography. 4 Units.
Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.

Prerequisite: MATH 230C.

MATH 235B. Mathematics of Cryptography. 4 Units.
Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.

Prerequisite: MATH 235A.

MATH 235C. Mathematics of Cryptography. 4 Units.
Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.

Prerequisite: MATH 235B.

MATH 239A. Analytic Methods in Arithmetic Geometry. 4 Units.
Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 220C and MATH 230C.

MATH 239B. Analytic Methods in Arithmetic Geometry. 4 Units.
Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239A.

MATH 239C. Analytic Methods in Arithmetic Geometry. 4 Units.
Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.

Prerequisite: MATH 239B.

MATH 240A. Differential Geometry. 4 Units.
Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

MATH 240B. Differential Geometry. 4 Units.
Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240A.
MATH 240C. Differential Geometry. 4 Units.
Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

Prerequisite: MATH 240B.

MATH 245A. Topics in Differential Geometry. 4 Units.
Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 240C.
Repeatability: Unlimited as topics vary.

MATH 245B. Topics in Differential Geometry. 4 Units.
Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245A.
Repeatability: Unlimited as topics vary.

MATH 245C. Topics in Differential Geometry. 4 Units.
Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.

Prerequisite: MATH 245B.
Repeatability: Unlimited as topics vary.

MATH 250A. Algebraic Topology. 4 Units.
Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 230A.

MATH 250B. Algebraic Topology. 4 Units.
Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250A.

MATH 250C. Algebraic Topology. 4 Units.
Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.

Prerequisite: MATH 250B.

MATH 260A. Functional Analysis. 4 Units.
Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative C*-algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 210C and MATH 220C.

MATH 260B. Functional Analysis. 4 Units.
Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative C*-algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260A.

MATH 260C. Functional Analysis. 4 Units.
Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative C*-algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.

Prerequisite: MATH 260B.
MATH 270A. Probability. 4 Units.
Prerequisite: MATH 130C and MATH 210C.

MATH 270B. Probability. 4 Units.
Prerequisite: MATH 270A.

MATH 270C. Probability. 4 Units.
Prerequisite: MATH 270B.

MATH 271A. Stochastic Processes. 4 Units.
Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.
Prerequisite: MATH 210C.
Overlaps with STATS 270.

MATH 271B. Stochastic Processes. 4 Units.
Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.
Prerequisite: MATH 271A.
Overlaps with STATS 270.

MATH 271C. Stochastic Processes. 4 Units.
Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.
Prerequisite: MATH 271B.
Overlaps with STATS 270.

MATH 272A. Probability Models. 4 Units.
Spin systems, Ising models, contact process, exclusion process, percolation, increasing events, critical probabilities, sub- and super-critical phases, scaling theory, oriented percolation, concentration of measure, Gaussian fields, Borell's inequality, chaining, entropy.
Prerequisite: MATH 271C.

MATH 272B. Probability Models. 4 Units.
Spin systems, Ising models, contact process, exclusion process, percolation, increasing events, critical probabilities, sub- and super-critical phases, scaling theory, oriented percolation, concentration of measure, Gaussian fields, Borell's inequality, chaining, entropy.
Prerequisite: MATH 272A.

MATH 272C. Probability Models. 4 Units.
Spin systems, Ising models, contact process, exclusion process, percolation, increasing events, critical probabilities, sub- and super-critical phases, scaling theory, oriented percolation, concentration of measure, Gaussian fields, Borell's inequality, chaining, entropy.
Prerequisite: MATH 272B.

MATH 274. Topics in Probability. 4 Units.
Selected topics, such as theory of stochastic processes, martingale theory, stochastic integrals, stochastic differential equations.
Prerequisite: MATH 270C.
Repeatability: Unlimited as topics vary.

MATH 277A. Topics in Mathematical Physics. 4 Units.
Studies in selected areas of mathematical physics. Topics addressed vary each quarter.
Repeatability: May be repeated for credit unlimited times.
MATH 277B. Topics in Mathematical Physics. 4 Units.
Studies in selected areas of mathematical physics. Topics addressed vary each quarter.
Prerequisite: MATH 277A.
Repeatability: May be repeated for credit unlimited times.

MATH 277C. Topics in Mathematical Physics. 4 Units.
Studies in selected areas of mathematical physics. Topics addressed vary each quarter.
Prerequisite: MATH 277B.
Repeatability: May be repeated for credit unlimited times.

MATH 280A. Mathematical Logic. 4 Units.
Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

MATH 280B. Mathematical Logic. 4 Units.
Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.
Prerequisite: MATH 280A.

MATH 280C. Mathematical Logic. 4 Units.
Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.
Prerequisite: MATH 280B.

MATH 281A. Set Theory. 4 Units.
Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.
Prerequisite: MATH 280C.

MATH 281B. Set Theory. 4 Units.
Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.
Prerequisite: MATH 281A.

MATH 281C. Set Theory. 4 Units.
Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.
Prerequisite: MATH 281B.

MATH 282A. Model Theory. 4 Units.
Prerequisite: MATH 280C.

MATH 282B. Model Theory. 4 Units.
Prerequisite: MATH 282A.

MATH 282C. Model Theory. 4 Units.
Prerequisite: MATH 282B.
MATH 285A. Topics in Mathematical Logic. 4 Units.
Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.
Prerequisite: MATH 280C.
Repeatability: Unlimited as topics vary.

MATH 285B. Topics in Mathematical Logic. 4 Units.
Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.
Prerequisite: MATH 285A.
Repeatability: Unlimited as topics vary.

MATH 285C. Topics in Mathematical Logic. 4 Units.
Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.
Prerequisite: MATH 285B.
Repeatability: Unlimited as topics vary.

MATH 290A. Methods in Applied Mathematics. 4 Units.
Prerequisite: MATH 290A.

MATH 290B. Methods in Applied Mathematics. 4 Units.
Prerequisite: MATH 290B.

MATH 290C. Methods in Applied Mathematics. 4 Units.
Prerequisite: MATH 290B.

MATH 291C. Topics in Applied and Computational Math. 4 Units.
Studies in selected areas of applied and computational mathematics. Topics addressed vary each quarter.
Repeatability: May be repeated for credit unlimited times.

MATH 295A. Partial Differential Equations. 4 Units.
Prerequisite: MATH 210C and MATH 112B and MATH 112C.

MATH 295B. Partial Differential Equations. 4 Units.
Prerequisite: MATH 295A.

MATH 295C. Partial Differential Equations. 4 Units.
Prerequisite: MATH 295B.
MATH 296. Topics in Partial Differential Equations. 4 Units.
Studies in selected areas of partial differential equations, a continuation of MATH 295A-MATH 295B-MATH 295C. Topics addressed vary each quarter.
Prerequisite: MATH 295C.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

MATH 297. Mathematics Colloquium. 1 Unit.
Weekly colloquia on topics of current interest in mathematics.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

MATH 298A. Seminar. 1-3 Units.
Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.

MATH 298B. Seminar. 2 Units.
Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.
Prerequisite: MATH 298A.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.

MATH 298C. Seminar. 2 Units.
Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.
Prerequisite: MATH 298B.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.

MATH 299A. Supervised Reading and Research. 1-12 Units.
Supervised reading and research with Mathematics faculty.
Repeatability: May be repeated for credit unlimited times.

MATH 299B. Supervised Reading and Research. 1-12 Units.
Supervised reading and research with Mathematics faculty.
Prerequisite: MATH 299A.
Repeatability: May be repeated for credit unlimited times.

MATH 299C. Supervised Reading and Research. 1-12 Units.
Supervised reading and research with Mathematics faculty.
Prerequisite: MATH 299B.
Repeatability: May be repeated for credit unlimited times.

MATH 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Physical Science Courses

PHY SCI 5. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.
First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as BIO SCI 14.
Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

PHY SCI 105. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.
Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5.
Same as BIO SCI 101.
Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

PHY SCI 106. California Teach 3: High School Science and Mathematics Teaching. 2 Units.
Capstone of a series of three seminars for students interested in becoming secondary mathematics or science teachers. Meets six times for students to understand effective, research-based teaching strategies. Includes an opportunity to experience teaching in a high school.

Prerequisite: (PHY SCI 5 or BIO SCI 14) and (PHY SCI 105 or BIO SCI 101).
Same as BIO SCI 102.
Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

PHY SCI 139W. Technical Writing and Communication Skills. 4 Units.
Workshop in writing technical reports, journal articles, proposals. Oral presentations. Communicating with the public. May not be used in satisfaction of any School or departmental requirement.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Upper-division students only. School of Physical Sciences majors have first consideration for enrollment.

(IIb)

PHY SCI 220. Science Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations. Topics range from the art of creating keynote slides to strategically crafting a personal story, culminating in a live presentation to an invited audience.

Physics Courses

PHYSICS 2. Introduction to Mathematical Methods for Physics. 4 Units.
Provides the applied mathematics and problem solving/presentation skills necessary for success in an introductory physics sequence. Focuses on practical exercises in problem solving. Covers kinematics in one and two dimensions in detail. Additional topics include vectors, differentiation, and integration.

Corequisite: MATH 2A.
Prerequisite: Passing score on the UCI Physics Placement Exam.

PHYSICS 3A. Basic Physics. 4 Units.
Vectors; motion, force, and energy. Course may be offered online.

Corequisite: MATH 2A.
(II, Va)
PHYSICS 3B. Basic Physics. 4 Units.
Fluids; heat; electricity and magnetism.

Prerequisite: PHYSICS 3A.

(II, Va)

PHYSICS 3C. Basic Physics. 4 Units.
Waves and sound; optics; quantum ideas; atomic and nuclear physics; relativity.

Corequisite: MATH 2B.
Prerequisite: PHYSICS 3B.

(II, Va)

PHYSICS 3LB. Basic Physics Laboratory. 1.5 Unit.
Practical applications of electronics and classical physics to biology. Goals include skill to use oscilloscope and other basic instrumentation. Materials fee.

PHYSICS 3LC. Basic Physics Laboratory. 1.5 Unit.
Practical applications of physics to medical imaging. Topics include optics, radioactivity, and acoustics. Materials fee.

PHYSICS 7C. Classical Physics. 4 Units.
Topics include force; energy; momentum; rotation and gravity.

Corequisite: PHYSICS 7LC and MATH 2B.
Prerequisite: PHYSICS 2A and ((PHYSICS 2 or (Math 2D and CHEM 1C or CHEM H2C or CHEM M3C)) or passing score on the UCI Physics Placement Exam). PHYSICS 2 with a grade of C or better.

Restriction: Physics majors have first consideration for enrollment in one section of this course. PHYSICS 7C may not be taken for credit after PHYSICS 7A and PHYSICS 7B.

(II, Va)

PHYSICS 7D. Classical Physics. 4 Units.
Electricity and magnetism.

Corequisite: PHYSICS 7LD and MATH 2D.
Prerequisite: PHYSICS 7C and MATH 2B.

Restriction: Physics majors have first consideration for enrollment in one section of this course.

(II, Va)

PHYSICS 7E. Classical Physics. 4 Units.
Fluids; oscillations; waves; and optics. Course may be offered online.

Prerequisite: PHYSICS 7C and MATH 2B.

Restriction: Physics majors have first consideration for enrollment in one section of this course.

(II, Va)

PHYSICS 7LC. Classical Physics Laboratory. 1 Unit.
Experiments related to lecture topics in Physics 7C. Materials fee.

Corequisite: PHYSICS 7C.

Overlaps with PHYSICS 7LA, PHYSICS 7LB.

Restriction: Physics majors have first consideration for enrollment.

PHYSICS 7LD. Classical Physics Laboratory. 1 Unit.
Electricity and magnetism.

Corequisite: PHYSICS 7D.

Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.
PHYSICS 12. Science Fiction and Science Fact. 4 Units.
An introduction to fundamental physics principles, the scientific process, and the mathematical language of science, used to analyze topics drawn from superheroes, science fiction works, and current science news to distinguish science fiction and science fact. Course may be offered online.

Overlaps with PHYSICS 21.

(II, Va)

The physics of society’s energy production and consumption, and of their influences on the environment. Topics include fossil and renewable energy resources; nuclear power; prospects for a hydrogen economy; efficient and environmentally benign transportation; efficient home and commercial energy usage.

Restriction: Non-School of Physical Sciences majors only. Non-Physics majors only.

(II)

PHYSICS 15. Physics of Music. 4 Units.
Introduces basic physical principles underlying generation and properties of music, including basic properties of sound waves, musical scales and temperament, musical instruments, and acoustics of music halls. No mathematics background required, but high school algebra is recommended.

(II)

PHYSICS 17. Physics of Athletics. 4 Units.
Introduces basic physical principles behind motion. Examples are drawn from a range of athletic endeavors (such as ice skating, baseball, diving, and dance). No mathematics background required, but high school algebra is recommended.

(II)

PHYSICS 18. How Things Work. 4 Units.
Survey of the physical basis of modern technology, with an emphasis on electronics and materials. Topics include power generation and distribution, communication (radio, TV, telephone, computers, tape recorders, CD players), imaging (optics, x-rays, MRI), and modern materials (alloys, semiconductors, superconductors). Course may be offered online.

(II)

PHYSICS 19. Great Ideas of Physics. 4 Units.
Introduces nonscience majors to physics, examining important breakthroughs and controversies. Potential topics: Einstein's Relativity; Heisenberg's Uncertainty Principle; black holes; extra-dimensions; antimatter. Case studies illustrate the essential nature of scientific review and independent confirmation of results. No mathematics background required.

(II)

PHYSICS 20A. Introduction to Astronomy. 4 Units.
History of astronomy. Underlying physics. Objects in the solar system and how they are studied. Properties of stars: their formation, structure, and evolution. Pulsars and black holes. Galaxies and quasars. Course may be offered online.

(II, Va)

PHYSICS 20B. Cosmology: Man's Place in the Universe. 4 Units.
"Cook's Tour" of the universe. Ancient world models. Evidence for universal expansion; the size and age of the universe and how it all began. The long-range future and how to decide the right model. Anthropic principle. Course may be offered online.

(II, Va)

PHYSICS 20C. Observational Astronomy. 4 Units.
Basics of observing the night sky. Includes using UCI Observatory telescopes. Discusses fundamental observational techniques used to determine orbits and masses of objects, identify asteroids, classify stars, derive star cluster ages, measure the Universe's expansion rate and dark matter content. Course may be offered online.

Prerequisite: PHYSICS 20A or PHYSICS 20B or MATH 1B or MATH 2A.

(II, Va)
PHYSICS 20D. Space Science. 4 Units.
Motions of planets, satellites, and rockets. Propulsion mechanisms and space flight. The solar radiation field and its influence on planets. The interplanetary medium, solar wind, and solar-terrestrial relations. Course may be offered online.

(II, Va)

PHYSICS 20E. Life in the Universe. 4 Units.
An overview of the scientific quest to discover life elsewhere in the universe. Topics include the origin of life on Earth, Mars, extra-solar planets, interstellar travel, and extra-terrestrial intelligence.

(II, Va)

PHYSICS 21. Special Topics in Physics. 4 Units.
Topics addressed vary each quarter. Past topics have included physics and music, Newton, planetary science. Lectures on areas of special interest in physics used to introduce students to scientific method, fundamental laws of science, qualitative and quantitative analysis of data.

Repeatability: Unlimited as topics vary.
Overlaps with PHYSICS 12, PHYSICS XI12.

(II)

PHYSICS 50. Mathematical Methods for Physical Science. 4 Units.
Mathematica and its applications to linear algebra, differential equations, and complex functions. Fourier series and Fourier transforms. Other topics in integral transforms. Course may be offered online.

Corequisite: MATH 2E.
Prerequisite: MATH 2J or MATH 3A.
Overlaps with PHYSICS 100.

PHYSICS 51A. Modern Physics. 4 Units.
Wave-particle duality; quantum mechanics; special relativity; statistical mechanics.
Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D.
Overlaps with PHYSICS 61A.
Restriction: Non-Physics majors only.

PHYSICS 51B. Modern Physics. 4 Units.
Atoms; molecules; solids; nuclei; elementary particles.
Prerequisite: PHYSICS 51A or PHYSICS 61A.
Overlaps with PHYSICS 61B.
Restriction: Non-Physics majors only.

PHYSICS 52A. Fundamentals of Experimental Physics. 2 Units.
Optics: lenses, mirrors, polarization, lasers, optical fibers, interference, spectra. Materials fee.
Corequisite: PHYSICS 7E or PHYSICS 3C.
Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.

PHYSICS 52B. Fundamentals of Experimental Physics. 2 Units.
Prerequisite: PHYSICS 7D or PHYSICS 3B.
Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.
PHYSICS 52C. Fundamentals of Experimental Physics. 2 Units.
Data analysis: random and systematic errors, curve fitting; nuclear counting; quantum experiments. Error analysis: random and systematic errors, curve fitting, nuclear counting, and quantum experiments. Materials fee.

Prerequisite: PHYSICS 51A or PHYSICS 61A.

Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.

PHYSICS 53. Introduction to C and Numerical Analysis. 4 Units.
Introduction to structured programming; in-depth training in C. Elementary numerical methods applied to physics problems.

Prerequisite: (MATH 2J or MATH 3A) and MATH 3D.

PHYSICS 60. Thermal Physics. 4 Units.
Introduction to thermodynamics and systems of many particles. Topics include first and second laws of thermodynamics, ideal gas laws, kinetic theory, heat engines and refrigerators, thermodynamic potentials, phase transitions, dilute solutions, chemical equilibrium, and basic statistical distributions.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D.

Restriction: Physics majors only.

PHYSICS 61A. Modern Physics for Majors. 4 Units.
Wave-particle duality; Schrödinger equation; angular momentum.

Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D.

Overlaps with PHYSICS 51A.

Restriction: Physics majors only.

PHYSICS 61B. Modern Physics for Majors. 4 Units.
Atomic transitions; molecules; solids; nuclei; elementary particles; cosmological models.

Prerequisite: PHYSICS 61A or PHYSICS 51A.

Overlaps with PHYSICS 51B.

Restriction: Physics majors only.

PHYSICS H90. The Idiom and Practice of Science. 4 Units.
A series of fundamental and applied scientific problems of social relevance. Possible topics include Newton's Law, calculus, earthquake physics, and radiation.

Restriction: Campuswide Honors Program students only.

(II, Va)

PHYSICS 99. General Physics Seminar. 1 Unit.
Designed to introduce undergraduate students to current topics in physics. Focus is discussion of selected readings on current research issues.

Repeatability: Unlimited as topics vary.

PHYSICS 100. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Overlaps with PHYSICS 50.

Concurrent with PHYSICS 229A.

PHYSICS 106. Laboratory Skills. 4-6 Units.
Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills.

Concurrent with PHYSICS 206 and CHEM 206.
PHYSICS 111A. Classical Mechanics. 4 Units.
One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian
dynamics; rigid body motion and relativity.
Prerequisite: (PHYSICS 7E or PHYSICS 3C) and PHYSICS 50.

PHYSICS 111B. Classical Mechanics. 4 Units.
One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian
dynamics; rigid body motion and relativity.
Prerequisite: PHYSICS 111A.

PHYSICS 112A. Electromagnetic Theory. 4 Units.
Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.
Prerequisite: (PHYSICS 7D or PHYSICS 3B) and PHYSICS 50.

PHYSICS 112B. Electromagnetic Theory. 4 Units.
Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.
Prerequisite: PHYSICS 7E and PHYSICS 112A.

PHYSICS 113A. Quantum Physics. 4 Units.
Inadequacy of classical physics; time independent and time dependent Schrödinger equation; systems in one, two, and three dimensions; matrices;
Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on
phenomenology.
Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 50.

PHYSICS 113B. Quantum Physics. 4 Units.
Inadequacy of classical physics; time independent and time dependent Schrödinger equation; systems in one, two, and three dimensions; matrices;
Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on
phenomenology.
Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113A.

PHYSICS 113C. Quantum Physics. 4 Units.
Inadequacy of classical physics; time independent and time dependent Schrödinger equation; systems in one, two, and three dimensions; matrices;
Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on
phenomenology.
Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113B.

PHYSICS 115A. Statistical Physics. 4 Units.
Microscopic theory of temperature, heat, and entropy; kinetic theory; multicomponent systems; quantum statistics.
Prerequisite: PHYSICS 50 and PHYSICS 60.

PHYSICS 115B. Thermodynamics. 4 Units.
Macroscopic theory of temperature, heat, and entropy; mathematical relationships of thermodynamics; heat engines; phase transitions.
Prerequisite: PHYSICS 115A.

PHYSICS 116. Relativity and Black Holes. 4 Units.
Introduces students to both special and general relativity; includes the formalism of four-vectors, equivalence principle, curved space-time, and modern
issues with black holes.
Corequisite: PHYSICS 111A.
Prerequisite: PHYSICS 50.

PHYSICS 120. Electronics for Scientists. 4 Units.
Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and
digital circuits. Materials fee.
Prerequisite: PHYSICS 52B.

Concurrent with PHYSICS 220.
PHYSICS 121W. Advanced Laboratory. 4 Units.
Experiments in atomic, condensed matter, nuclear, particle, and plasma physics. Introduction to instrumentation and a first experience in the research laboratory.

Prerequisite: (PHYSICS 51B or PHYSICS 61B) and (PHYSICS 52C or PHYSICS 193) and (PHYSICS 194 or EDUC 143BW).

Repeatability: May be taken for credit 3 times.

Restriction: Physics majors only.

(1b)

PHYSICS 125A. Mathematical Physics. 4 Units.
Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 50 and MATH 3D.

PHYSICS 125B. Mathematical Physics. 4 Units.
Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.

Prerequisite: PHYSICS 125A and PHYSICS 113A.

PHYSICS 133. Introduction to Condensed Matter Physics. 4 Units.
Phenomena of solids and their interpretation in terms of quantum theory.

Prerequisite: PHYSICS 113B and PHYSICS 115A.

PHYSICS 134A. Physical and Geometrical Optics. 4 Units.
Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Corequisite: PHYSICS 112B.
Prerequisite: PHYSICS 112A.

Concurrent with CBEMS 242A and CHEM 242A.

PHYSICS 135. Plasma Physics. 4 Units.
Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.

Prerequisite: PHYSICS 112B.

Concurrent with PHYSICS 239A.

PHYSICS 136. Introduction to Particle Physics. 4 Units.
Experimental techniques and theoretical concepts of high-energy phenomena: accelerators and detectors; classification of particles and interactions; particle properties; symmetries and mass multiplets; production and decay mechanisms.

Prerequisite: PHYSICS 113B.

PHYSICS 137. Introduction to Cosmology. 4 Units.
Solution of the differential equations governing the expansion of the Universe. Observational determinations of the parameters governing the expansion. Big Bang inflation, primordial nucleosynthesis, and cosmic microwave background. Dark matter, dark energy, and large-scale structure of the Universe.

Prerequisite: PHYSICS 111A.

PHYSICS 138. Extragalactic Astrophysics. 4 Units.

Prerequisite: PHYSICS 111A.

PHYSICS 139. Observational Astrophysics. 4 Units.
Telescopes and astronomical observations, imaging with CCD detectors and image processing techniques. Photometry and spectroscopy of stars, galaxies, and quasars. Advanced imaging techniques such as deconvolution, adaptive optics, and interferometry.

Prerequisite: PHYSICS 52A and PHYSICS 52B and PHYSICS 52C and PHYSICS 53.
PHYSICS 144. Stellar Astrophysics. 4 Units.
Stars: their structure and evolution; physical state of the interior; the Hertzsprung-Russell diagram, stellar classification, and physical principles responsible for the classification; star formation; nuclear burning; giant and dwarf stars; neutron stars and black holes.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A.

PHYSICS 145. High-Energy Astrophysics. 4 Units.
Production of radiation by high-energy particles, white dwarfs, neutron stars, and black holes. Evolution of galactic nuclei, radio galaxies, quasars, and pulsars. Cosmic rays and the cosmic background radiation.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A.

PHYSICS 146A. Biophysics of Molecules and Molecular Machines. 4 Units.
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A.

Concurrent with PHYSICS 230A.

PHYSICS 146B. Biophysics of Molecules and Molecular Machines. 4 Units.
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A.

Concurrent with PHYSICS 230B.

PHYSICS 147A. Principles of Imaging. 4 Units.
Linear systems, probability and random processes, image processing, projection imaging, tomographic imaging.

Prerequisite: PHYSICS 50.

Concurrent with PHYSICS 233A and EECS 202A.

PHYSICS 147B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.
Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: PHYSICS 147A.

Concurrent with PHYSICS 233B and EECS 202B.

PHYSICS 147C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.
Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: PHYSICS 147B.

Concurrent with PHYSICS 233C and EECS 202C.

PHYSICS 150. Special Topics in Physics and Astronomy. 4 Units.
Current topics in physics. Includes topics from nano-science, biological sciences, astrophysics, and the common use of estimation across subdisciplines within physics.

Repeatability: Unlimited as topics vary.

PHYSICS 191. Field Experience in Physics Education. 1-4 Units.
Students develop and perform physics assemblies at neighboring public schools.

Prerequisite: PHYSICS 7C and PHYSICS 7D and PHYSICS 7E.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.
**PHYSICS 192. Tutoring in Physics. 1-2 Units.**
Formalizes the already existing free tutoring for the lower-division physics courses that is provided by the Society of Physics Students (SPS). Includes instructions on tutoring techniques.

Prerequisite: PHYSICS 7E.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

Restriction: Society of Physics Students (SPS) tutoring program students only.

**PHYSICS 193. Research Methods. 4 Units.**
Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5.

Same as BIO SCI 108, CHEM 193.

**PHYSICS 194. Research Communication for Physics Majors. 2 Units.**
Students learn the fundamentals of communicating about research. Topics include preparing abstracts, proposals, and literature reviews. Provides preparation for presentation of independent research projects in PHYSICS 121 and PHYSICS 196.

Prerequisite: PHYSICS 61B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Physics majors only.

**PHYSICS 195. Undergraduate Research. 4 Units.**
Independent research under the guidance of a Physics faculty member.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Juniors only. Physics majors only.

**PHYSICS 196A. Thesis in Physics I. 2 Units.**
Independent research for seniors conducted under the guidance of a faculty member. Students’ research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194.

Overlaps with PHYSICS H196A.

Restriction: Physics majors only.

**PHYSICS 196B. Thesis in Physics II. 4 Units.**
Independent research for seniors conducted under the guidance of a faculty member. Students’ research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196A.

Overlaps with PHYSICS H196B.

Restriction: Physics majors only.

**PHYSICS 196C. Thesis in Physics III. 4 Units.**
Independent research for seniors conducted under the guidance of a faculty member. Students’ research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196B.

Overlaps with PHYSICS H196C, PHYSICS 197.

Restriction: Physics majors only.
PHYSICS H196A. Honors Thesis in Physics I. 2 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194.

Overlaps with PHYSICS 196A.

Restriction: Physics majors only. Honors Program in Physics students only. Campuswide Honors Program students only.

PHYSICS H196B. Honors Thesis in Physics II. 4 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196A.

Overlaps with PHYSICS 196B.

Restriction: Physics majors only. Honors Program in Physics students only. Campuswide Honors Program students only.

PHYSICS H196C. Honors Thesis in Physics III. 4 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196B.

Overlaps with PHYSICS 196C.

Restriction: Physics majors only. Honors Program in Physics students only. Campuswide Honors Program students only.

PHYSICS 199. Readings on Special Topics. 1-4 Units.
Readings in selected areas of Physics. Topics addressed vary each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

PHYSICS 206. Laboratory Skills. 4-6 Units.
Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as CHEM 206.

Concurrent with PHYSICS 106.

PHYSICS 207. Chemistry for Physicists. 4 Units.
Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as CHEM 207.

PHYSICS 208. Mathematics for Chemists. 4 Units.
Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as CHEM 208.

PHYSICS 211. Classical Mechanics. 4 Units.
Variational principles, Lagrange's equations; applications to two body problems, small oscillation theory, and other phenomena. Hamilton's equations. Hamilton-Jacobi theory. Canonical transformations.

Restriction: Graduate students only.

PHYSICS 212A. Mathematical Physics. 4 Units.
Complex variables and integration; ordinary and partial differential equations; the eigenvalue problem.

Restriction: Graduate students only.
PHYSICS 213A. Electromagnetic Theory. 4 Units.
Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

PHYSICS 213B. Electromagnetic Theory. 4 Units.
Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.
Prerequisite: Physics 213A.

PHYSICS 214A. Statistical Physics. 4 Units.
Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; ideal and imperfect gases; thermodynamic properties of solids; transport theory.
Restriction: Graduate students only.

PHYSICS 214B. Statistical Physics. 4 Units.
Phase transitions; critical phenomena; cooperative phenomena; fluctuations.
Prerequisite: PHYSICS 214A.
Restriction: Graduate students only.

PHYSICS 214C. Many Body Theory. 4 Units.
Application of field theory methods, perturbative and non-perturbative, to many particle systems; second quantization, Feynman diagrams, linear response theory, and functional integral methods applied to the ground state and at finite temperature.
Prerequisite: PHYSICS 214A and PHYSICS 215A and PHYSICS 215B.
Restriction: Graduate students only.

PHYSICS 215A. Quantum Mechanics. 4 Units.
Foundations; Dirac notation; basic operators and their eigenstates; perturbation theory; spin.
Restriction: Graduate students only.

PHYSICS 215B. Quantum Mechanics. 4 Units.
Atomic physics; scattering theory, formal collision theory; semi-classical radiation theory; many body systems.
Prerequisite: PHYSICS 215A.
Restriction: Graduate students only.

PHYSICS 220. Electronics for Scientists. 4 Units.
Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits.
Restriction: Graduate students only.

PHYSICS 222. Continuum Mechanics. 4 Units.
Introduction to the continuum limit and stress and strain tensors. Hydrodynamics of perfect fluids; two-dimensional problems, motion of incompressible viscous fluids, Navier Stokes equations. Basic elasticity theory. Description of viscoelastic materials. Introduction to nonlinear behavior instabilities.

PHYSICS 223. Numerical Methods. 4 Units.
Introduction to theory and practice of modern numerical methods. Techniques are drawn from topics such as solution of differential equations, Monte Carlo methods, Fast Fourier transforms, and evaluation of special functions.

PHYSICS 228. Electromagnetism. 4 Units.
Maxwell’s equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.
Same as CHEM 228.
PHYSICS 229A. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229A.

Concurrent with PHYSICS 100.

PHYSICS 229B. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229B.

PHYSICS 230A. Biophysics of Molecules and Molecular Machines. 4 Units.
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146A.

PHYSICS 230B. Biophysics of Molecules and Molecular Machines. 4 Units.
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146B.

PHYSICS 231. Special Topics in Computational Physics. 4 Units.
Modern symbolic and numerical techniques on state-of-the-art computers for solving problems in classical and quantum mechanics, fluids, electromagnetism, and mathematical physics.

Prerequisite: PHYSICS 223 or PHYSICS 229A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 233A. Principles of Imaging. 4 Units.
Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Prerequisite: PHYSICS 51B or PHYSICS 61B.

Same as EECS 202A.

Restriction: Graduate students only.

Concurrent with PHYSICS 147A.

PHYSICS 233B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.
Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A.

Same as EECS 202B.

Restriction: Graduate students only.

Concurrent with PHYSICS 147B.

PHYSICS 233C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.
Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B.

Same as EECS 202C.

Restriction: Graduate students only.

Concurrent with PHYSICS 147C.
PHYSICS 234A. Elementary Particle Physics. 4 Units.
Overview of Standard Model theory and phenomenology. Electromagnetic, strong and weak forces, quark model, interactions with matter, particle detectors and accelerators.
Prerequisite: PHYSICS 215B.

PHYSICS 234B. Advanced Elementary Particle Physics. 4 Units.
SU(3)xSU(2)xU(1) model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.
Prerequisite: PHYSICS 234A and PHYSICS 235A.

PHYSICS 234C. Advanced Elementary Particle Physics. 4 Units.
SU(3)xSU(2)xU(1) model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.
Prerequisite: PHYSICS 234A and PHYSICS 235A.

PHYSICS 235A. Quantum Field Theory. 4 Units.
Canonical quantization, scalar field theory, Feynman diagrams, tree-level quantum electrodynamics.
Prerequisite: PHYSICS 215B.
Restriction: Graduate students only.

PHYSICS 235B. Advanced Quantum Field Theory. 4 Units.
Pathintegral techniques, loop diagrams, regularization and renormalization, anomalies.
Prerequisite: PHYSICS 235A.
Restriction: Graduate students only.

PHYSICS 238A. Condensed Matter Physics. 4 Units.
Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.
Prerequisite: PHYSICS 133 and (PHYSICS 214A or CHEM 232A) and (PHYSICS 215B or CHEM 231B).

PHYSICS 238B. Condensed Matter Physics. 4 Units.
Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.
Prerequisite: PHYSICS 238A.

PHYSICS 238C. Condensed Matter Physics. 4 Units.
Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body perturbation theory.
Prerequisite: PHYSICS 238B.

PHYSICS 239A. Plasma Physics. 4 Units.
Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.
Restriction: Graduate students only.

PHYSICS 239B. Plasma Physics. 4 Units.
Magnetic confinement, MHD equilibrium and stability, collisional transport.
Prerequisite: PHYSICS 239A.
Restriction: Graduate students only.
PHYSICS 239C. Plasma Physics. 4 Units.
Linear waves and instabilities, uniform un-magnetized and magnetized plasmas, non-uniform plasmas.
Prerequisite: PHYSICS 239B.
Restriction: Graduate students only.

PHYSICS 239D. Plasma Physics. 4 Units.
Nonlinear plasma physics, quasilinear theory, large-amplitude coherent waves, resonance broadening, strong turbulence.
Prerequisite: PHYSICS 239C.
Restriction: Graduate students only.

PHYSICS 240A. Galactic Astrophysics. 4 Units.
The morphology, kinematics, and evolution of our Milky Way and other galaxies. Topics include stellar formation and stellar evolution, end states of stars (supernovae, neutron stars), the distribution of stars, interstellar gas and mass in galaxies. The Local Group.

PHYSICS 240B. Cosmology. 4 Units.
An introduction to modern cosmology set within the context of general relativity. Topics include the expansion history of the Universe, inflation, the cosmic microwave background, density fluctuations, structure formation, dark matter, dark energy, and gravitational lensing.

PHYSICS 240C. Radiative Processes in Astrophysics. 4 Units.
Exploration of radiation mechanisms (electron scattering, synchrotron emission, collisional excitation, and more) and radiative transfer through matter including absorption and emission. Includes such observational astrophysics topics as spectroscopic study of atoms and nuclei, X-rays, and cosmic rays.

PHYSICS 241B. Stellar Astrophysics. 4 Units.
Prerequisite: PHYSICS 211 and PHYSICS 240A.

PHYSICS 241C. Extragalactic Astrophysics. 4 Units.
The physics and phenomenology of galaxies; star formation, interstellar medium, and intergalactic medium. Galaxy structure and dynamics. Galaxy evolution, stellar populations, and scaling relations; the relationship between galaxy properties and environment. Galaxy clusters and active galactic nuclei.
Prerequisite: PHYSICS 211 and PHYSICS 240A.

PHYSICS 241D. Early Universe Physics. 4 Units.
Includes a thorough quantum treatment of the generation of perturbations during inflation and various topics related to kinetic theory in an expanding Universe. Other topics include the astrophysics and cosmology of weakly interacting particles.
Prerequisite: PHYSICS 234A and (PHYSICS 240B or PHYSICS 255).

PHYSICS 246. Special Topics in Astrophysics. 4 Units.
Outlines and emphasizes a subarea of astrophysics that is undergoing rapid development.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 247. Special Topics in Particle Physics. 4 Units.
Current topics in particle non-accelerator-based research fields.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 248. Special Topics in Condensed Matter Physics. 4 Units.
Outlines and emphasizes a subarea of condensed matter physics that is undergoing rapid development.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
PHYSICS 249. Special Topics in Plasma Physics. 4 Units.
Outlines and emphasizes a subarea of plasma physics that is undergoing rapid development.
Prerequisite: PHYSICS 239A and PHYSICS 239B.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PHYSICS 255. General Relativity. 4 Units.
An introduction to Einstein's theory of gravitation. Tensor analysis, Einstein's field equations, astronomical tests of Einstein's theory, gravitational waves.

PHYSICS 260A. Seminar in Condensed Matter Physics. 1 Unit.
Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 260B. Seminar in Condensed Matter Physics. 1 Unit.
Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 260C. Seminar in Condensed Matter Physics. 1 Unit.
Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 261A. Seminar in Plasma Physics. 1 Unit.
Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PHYSICS 261B. Seminar in Plasma Physics. 1 Unit.
Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PHYSICS 261C. Seminar in Plasma Physics. 1 Unit.
Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.
PHYSICS 263A. Seminar in Particle Physics. 1 Unit.
Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 263B. Seminar in Particle Physics. 1 Unit.
Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 263C. Seminar in Particle Physics. 1 Unit.
Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 265A. Seminar in Astrophysics. 1 Unit.
Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 265B. Seminar in Astrophysics. 1 Unit.
Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 265C. Seminar in Astrophysics. 1 Unit.
Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 266. Current Topics in Chemical and Materials Physics. 1 Unit.
The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.
Repeatability: May be repeated for credit unlimited times.
Same as CHEM 266.

PHYSICS 267A. Current Problems in Particle Physics. 4 Units.
Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.
Repeatability: May be repeated for credit unlimited times.
PHYSICS 267B. Current Problems in Particle Physics. 4 Units.
Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

PHYSICS 267C. Current Problems in Particle Physics. 4 Units.
Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.

PHYSICS 269. Seminar in Teaching Physics. 2 Units.
Techniques for effective teaching. Covers active listening and student engagement, problem-solving skills, peer instruction and collaborative learning, and evaluation. Required of all new Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

PHYSICS 273. Technical Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations, through examples and practice.

Grading Option: Satisfactory/unsatisfactory only.

Same as CHEM 273.

PHYSICS 291. Research Seminar. 1-4 Units.
Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 295. Experimental Research. 4-12 Units.
With the approval of a faculty member, a student may pursue a research program in experimental physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Physical Sciences majors only. Graduate students only.

PHYSICS 296. Theoretical Research. 4-12 Units.
With approval of a faculty member, a student may pursue a research program in theoretical physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Physical Sciences majors only. Graduate students only.

PHYSICS 298. Physics Colloquium. 1 Unit.
Seminar held each week, in which a current research topic is explored. Frequently, off-campus researchers are invited to present the seminar, and on occasion a faculty member or researcher from the Department will speak.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: School of Physical Sciences majors only.

PHYSICS 299. Reading of Special Topic. 4-12 Units.
With special consent from a faculty member who will agree to supervise the program, a student may receive course credit for individual study of some area of physics.

Restriction: Graduate students only.
PHYSICS 395. Laboratory Teaching. 1 Unit.
Required of and limited to teaching assistants of undergraduate laboratory courses. Designed to teach the necessary skills required of teaching assistants for these courses.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PHYSICS 399. University Teaching. 1-4 Units.
Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Department of Chemistry
1120 Natural Sciences II; 949-824-6018
http://www.chem.uci.edu/
Reginald M. Penner, Department Chair

Undergraduate Program

The major in Chemistry is elected by students planning careers in the chemical sciences and frequently also by those whose interests lie in biology, medicine, earth sciences, secondary education, business, and law. The curriculum of the Department is designed to satisfy the diverse needs of these students and others who may have occasion to study chemistry. The year-long course CHEM 1A-CHEM 1B-CHEM M3C (or the Honors sequence CHEM H2A-CHEM H2B-CHEM H2C) is prerequisite to all study in the Department at more advanced levels. The subject matter of this course serves also as a thorough introduction to the varied aspects of modern chemistry for students who do not wish to pursue their studies beyond the introductory level.

One year of high school chemistry is strongly recommended for enrollment in CHEM 1A. Refer to the Guidelines for General Chemistry course placement located on the Testing Office (http://www.testingcenter.uci.edu/chemistry.html) website. A preparatory course, Chemistry 1P, is offered in summer and fall for those who have not taken a high school chemistry course, or who need additional preparation prior to entering CHEM 1A. A grade of C- or better in CHEM 1P automatically qualifies the student for CHEM 1A.

Completion of a one-year sequence in organic chemistry is required for Chemistry majors and for students of the life sciences. Certain advanced courses required of Chemistry majors may also be of interest to others.

The undergraduate program of the Chemistry Department emphasizes close contact with research. Chemistry majors are urged to engage in research or independent study under the direction of a faculty member. Information describing the procedures for arranging an undergraduate research opportunity is available on the Chemistry Department (http://www.chem.uci.edu/undergrad) website.

Much of the important chemical literature is being and has been printed in foreign languages, principally German, Russian, Japanese, Chinese, and French. Reading competence in one or more of these languages is desirable, and Chemistry majors are encouraged to acquire this competence.

Chemistry majors who are interested in teaching chemistry at the secondary level are urged to consider completing the optional concentration in Chemistry Education. A two-year post-baccalaureate program for the M.S. in Chemistry and a California Secondary Teaching Credential is described in the Chemistry Graduate Program section. Chemistry majors who plan subsequent study in medical, dental, or other professional schools should request information concerning admission requirements directly from the schools which they seek to enter. Counseling about preparation for a career in the health sciences is provided by the health science advisors in the Francisco J. Ayala School of Biological Sciences. Those intending to pursue graduate studies in chemistry should discuss their plans with a faculty member no later than the fall quarter of their senior year.

Admission to the Major

Students may be admitted to the Chemistry major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website. For transfer student admission, preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following required courses: one year of general chemistry with laboratory and one year of approved calculus. Completion of one year of organic chemistry is strongly recommended.
## Requirements for the B.S. Degree in Chemistry

All students must meet the University Requirements (p. 71).

**School Requirements:** None.

### Departmental Requirements

#### Basic Requirements

<table>
<thead>
<tr>
<th>Math Courses</th>
<th>Description</th>

</thead>
<tbody>
<tr>
<td>PHYSICS 7LC-7LD</td>
<td>Classical Physics Laboratory and Classical Physics Laboratory</td>
</tr>
</tbody>
</table>

Select one of the following sequences and accompanying labs:

- **CHEM 1A-1B**
  - General Chemistry and General Chemistry
- **CHEM M3C**
  - Majors Quantitative Analytical Chemistry
- **CHEM M2LA-M2LB**
  - Majors General Chemistry Laboratory and Majors General Chemistry Laboratory
- **CHEM M3LC**
  - Majors Quantitative Analytical Chemistry Laboratory
- **CHEM H2A-H2B-H2C**
  - Honors General Chemistry and Honors General Chemistry
- **CHEM H2LA-H2LB-H2LC**
  - Honors General Chemistry Laboratory and Honors General Chemistry Laboratory

Select one of the following organic chemistry sequences and accompanying labs:

- **CHEM 51A-51B-51C**
  - Organic Chemistry and Organic Chemistry
- **CHEM M52LA-M52LB-M52LC**
  - Majors Organic Chemistry Laboratory and Majors Organic Chemistry Laboratory
- **CHEM H52A-H52B-H52C**
  - Honors Organic Chemistry and Honors Organic Chemistry
- **CHEM H52LA-H52LB-H52LC**
  - Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory

Complete:

- **CHEM 5**
  - Scientific Computing Skills
- **CHEM 107-107L**
  - Inorganic Chemistry and Inorganic Chemistry Laboratory
- **CHEM 131A-131B-131C**
  - Quantum Principles and Molecular Structure and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics

#### Elective Requirements

Select at least five electives from the following lists, including at least two courses selected from the lecture list and two courses selected from the laboratory list:

**Lectures:**

- BIO SCI 98 Biochemistry
- BIO SCI 99 Molecular Biology
- CBEMS 110 Reaction Kinetics and Reactor Design

</tbody>
</table>

1. Courses must be taken for a letter grade.
2. At least three of the courses used to satisfy the Elective Requirement must be courses offered by the Chemistry Department, including at least one lecture course and one laboratory course.
3. CHEM 180 and CHEM H180 can be counted toward this requirement no more than once.

Optional American Chemical Society Certification

For ACS Certification, the program must include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 128</td>
<td>Introduction to Chemical Biology</td>
</tr>
<tr>
<td>or BIO SCI 98</td>
<td>Biochemistry</td>
</tr>
</tbody>
</table>

Select two additional laboratory courses from the following list:

<table>
<thead>
<tr>
<th>Laboratory Code</th>
<th>Laboratory Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 128L</td>
<td>Introduction to Chemical Biology Laboratory Techniques</td>
</tr>
<tr>
<td>CHEM 152</td>
<td>Advanced Analytical Chemistry</td>
</tr>
<tr>
<td>CHEM 153</td>
<td>Physical Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM 156</td>
<td>Advanced Laboratory in Chemistry and Synthesis of Materials</td>
</tr>
<tr>
<td>CHEM 160</td>
<td>Organic Synthesis Laboratory</td>
</tr>
<tr>
<td>CHEM 180</td>
<td>Undergraduate Research (or CHEM H180)</td>
</tr>
</tbody>
</table>
These courses may not overlap with the upper-division laboratory elective requirement. A maximum of one quarter of CHEM 180 or Chemistry H180 may be used. Courses must be taken for a letter grade.

### Optional Concentration in Biochemistry

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
<tr>
<td>BIO SCI M137</td>
<td>Microbial Genetics</td>
</tr>
<tr>
<td>BIO SCI M144</td>
<td>Cell Organelles and Membranes</td>
</tr>
<tr>
<td>BIO SCI M160</td>
<td>Structure-Function Relationships of Integral Membrane Proteins</td>
</tr>
<tr>
<td>BIO SCI N110</td>
<td>Neurobiology and Behavior</td>
</tr>
<tr>
<td>PHRMSCI 170A</td>
<td>Molecular Pharmacology I</td>
</tr>
<tr>
<td>PHRMSCI 170B</td>
<td>Molecular Pharmacology II</td>
</tr>
</tbody>
</table>

### Optional Concentration in Chemistry Education

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 193</td>
<td>Research Methods</td>
</tr>
<tr>
<td>EDUC 55</td>
<td>Knowing and Learning in Mathematics and Science</td>
</tr>
<tr>
<td>PHY SCI 5</td>
<td>California Teach 1: Introduction to Science and Mathematics Teaching</td>
</tr>
<tr>
<td>PHY SCI 105</td>
<td>California Teach 2: Middle School Science and Mathematics Teaching</td>
</tr>
</tbody>
</table>

Students interested in teaching at the high school level are encouraged to complete PHY SCI 106.

### Secondary Teaching Certification Option

With additional course work and field experience offered through the UCI Cal Teach program, students who complete the concentration in Chemistry Education can also earn a California Preliminary Single Subject Teaching Credential. Completing the bachelor’s degree, concentration, and teacher certification in four years is possible with careful, early planning. Additional courses required for teacher certification are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 109</td>
<td>Reading and Writing in Secondary Mathematics and Science Classrooms</td>
</tr>
<tr>
<td>EDUC 143AW- 143BW</td>
<td>Classroom Interactions I and Classroom Interactions II</td>
</tr>
<tr>
<td>EDUC 148</td>
<td>Complex Pedagogical Design</td>
</tr>
</tbody>
</table>
EDUC 158  Student Teaching Mathematics and Science in Middle/High School (two quarters)

LPS 60  The Making of Modern Science

Successful completion of EDUC 143AW-EDUC 143BW and EDUC 148 will be accepted in lieu of two electives (from the above Elective Requirements list) for students pursuing the concentration in Chemistry Education. For additional information about teacher certification requirements and enrollment procedures, see Preparation for Teaching Science and Mathematics (p. 1220). Interested students are strongly encouraged to contact the Cal Teach Resource and Advising Center or the Physical Sciences Student Affairs Office.

Honors Program in Chemistry

The Honors Program in Chemistry is a research-based program offered to selected Chemistry majors during their final year. Applicants to the program must have completed their junior year with a grade point average of at least 3.3 overall and in their Chemistry courses. They must also have demonstrated the potential of carrying out research of honors quality, as judged by the Chemistry faculty member who will supervise their research. Students in this program enroll in Honors Research in Chemistry (CHEM H180A-CHEM H180B-CHEM H180C) throughout their senior year and submit a formal thesis late in the spring quarter. They also enroll in the Honors Seminar in Chemistry (CHEM H181), in which they receive instruction in scientific writing and present a formal research seminar. Successful completion of CHEM H181 satisfies the UCI upper-division writing requirement.

NOTE: Students enrolled in the Honors Research in Chemistry (CHEM H180A-B-C) do not enroll in CHEM 180 (Undergraduate Research).

Students who complete these requirements, whose grade point average remains above the 3.3 standard, and whose research is judged to be of honors quality will graduate with Departmental Honors in Chemistry.

The Department also offers an Honors General Chemistry sequence, CHEM H2A-CHEM H2B-CHEM H2C. This course in general chemistry is designed for members of the Campuswide Honors Program (CHP) and other highly qualified students. It covers the same material as CHEM 1A-CHEM 1B-CHEM M3C, but in greater depth.

Additional information is available from the Chemistry Undergraduate Program Office.

Planning a Program of Study

The departmental requirements leave the student a great deal of latitude in choice of courses; the student can choose to pursue interests ranging from biochemistry on the one hand to chemical physics on the other. Many of the basic requirements above coincide with those of the School of Biological Sciences. For this reason a double major in Chemistry and Biological Sciences is popular. The Department is approved by the American Chemical Society to offer an undergraduate degree certified by the Society as suitable background for a career in chemistry or for graduate study in chemistry. While it is not mandatory, it is desirable for students to pursue a course of study that the Department judges to merit a certified degree. Specifically, the following courses must be included in the program of study and must be taken for a letter grade:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 128</td>
<td>Introduction to Chemical Biology</td>
</tr>
<tr>
<td>or BIO SCI 98</td>
<td>Biochemistry</td>
</tr>
<tr>
<td>and two laboratory courses from the list of upper-division laboratory courses that are not already required for the major from the following:</td>
<td></td>
</tr>
<tr>
<td>CHEM 128L</td>
<td>Introduction to Chemical Biology Laboratory Techniques</td>
</tr>
<tr>
<td>CHEM 152</td>
<td>Advanced Analytical Chemistry</td>
</tr>
<tr>
<td>CHEM 153</td>
<td>Physical Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM 156</td>
<td>Advanced Laboratory in Chemistry and Synthesis of Materials</td>
</tr>
<tr>
<td>CHEM 160</td>
<td>Organic Synthesis Laboratory</td>
</tr>
<tr>
<td>CHEM 170</td>
<td>Radioisotope Techniques</td>
</tr>
<tr>
<td>CHEM 177L</td>
<td>Medicinal Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM 180</td>
<td>Undergraduate Research (or CHEM H180)</td>
</tr>
</tbody>
</table>

Students should consult with their academic advisors on courses of study. A Chemistry major normally takes CHEM 1A-CHEM 1B and CHEM M3C and CHEM M2LA-CHEM M2LB and CHEM M3LC (or CHEM H2A-CHEM H2B-CHEM H2C and CHEM H2LA-CHEM H2LB-CHEM H2LC), MATH 2A-MATH 2B-MATH 2D, and required writing courses during the freshman year. Students are encouraged to enroll in at least one freshman seminar during the freshman year; freshman seminars probe timely scientific topics and allow students to interact with faculty in an intimate environment. The sophomore year should include CHEM 5, CHEM 51A-CHEM 51B-CHEM 51C, and CHEM M52LA-CHEM M52LB-CHEM M52LC (or equivalent) or CHEM H52A-CHEM H52B-CHEM H52C and CHEM H52LA-CHEM H52LB-CHEM H52LC; the Physics 7 sequence should be completed no later than the fall quarter of the junior year. The balance of the freshman and sophomore program can be chosen at the student’s discretion with consideration given to progress toward completion of the UCI general education requirement.

In the junior year all Chemistry majors should enroll in a year sequence of physical chemistry (fall), CHEM 107 (fall), CHEM 107L (winter or spring), and CHEM 131A-CHEM 131B-CHEM 131C.
During the junior and senior years the Chemistry Department electives requirement should be fulfilled, as should other University and departmental requirements.

Sample programs for Chemistry majors, American Chemical Society-certified Chemistry majors, the Biochemistry concentration, the Chemistry Education concentration, and Chemistry-Biological Sciences double majors are shown in the accompanying charts. Sample programs for Chemistry majors wishing to emphasize chemical physics, computational or theoretical chemistry, chemical synthesis and reactivity, or materials or polymer science in their undergraduate programs are also available. All sample programs can be viewed on the Chemistry Department (http://www.chem.uci.edu/undergrad) website.

The faculty encourages Chemistry majors to enhance their education by studying abroad for one or more quarters, or during the summer. In most cases, the Chemistry EAP advisor can help students plan a program of study that will not extend the time it takes to graduate. Also, study abroad can enhance students’ applications for admission to graduate and professional schools. For more information, visit the Study Abroad Center (http://www.studyabroad.uci.edu) website or visit the Physical Sciences Student Affairs Office.

Graduate Program

The Department offers the M.S. and Ph.D. degrees in Chemistry. The Ph.D. degree is granted in recognition of breadth and depth of knowledge of the facts and theories of modern chemistry and an ability to carry out independent chemical research demonstrated through submission of an acceptable doctoral dissertation. The M.S. degree may be earned either through submission of an acceptable Master’s thesis (Plan I) or through an approved program of graduate course work and a comprehensive oral examination (Plan II). A Master’s degree is not a prerequisite for admission to the Ph.D. program.

Students in the Ph.D. and M.S. Plan I (Thesis) programs are required to complete a minimum of seven approved courses (28 units), including six graduate-level courses (24 units), in chemistry. The M.S. Plan II (Non-Thesis) program requires that the student complete 10 graduate-level chemistry courses (40 units) and a comprehensive oral examination. Graduate students are expected to attain grades of B or better to remain in good academic standing. The comprehensive oral examination assesses the competence of the candidate in the areas of chemistry covered by the chosen course work, with unanimous agreement among the three examination committee members required for satisfactory completion.

Progress toward the Ph.D. degree during the first year is assessed by a written examination administered after completion of the first year of study. This examination covers either research accomplishments during the first year or comprehensive knowledge acquired in course work. The time and content of the examination depends upon the student’s specific area of interest.

Training in teaching is an integral part of each graduate program, and all graduate degree candidates are expected to participate in the teaching program for at least four quarters during their graduate career.

Participants in the Ph.D. program take an oral examination for formal Advancement to Candidacy. This examination consists of an oral defense before a faculty committee of the student’s dissertation research project, and an original research proposition conceived, developed, and documented by the student. The committee may examine the student at this time on any subject it deems relevant to the independent pursuit of chemical research. The normative time for advancement to candidacy is three years.

The most important component of the Ph.D. program is the doctoral dissertation, which must describe the results of original research performed by the student under the supervision of a faculty member of the Department. The criterion for acceptability of the dissertation is that its contents be of a quality suitable for publication in a scientific journal of high editorial standards. Each Ph.D. candidate is expected to present the work described in the completed dissertation in a seminar before the Department, following which the candidate will be examined on the contents of the dissertation by a committee of the faculty. A Master’s thesis presented in partial fulfillment of the requirements for the M.S. under Plan I must also describe the results of a student’s original research performed under the direction of a faculty member. However, no public oral defense of the Master’s thesis is required.

Residency requirements specify a minimum of six quarters in residence at UCI for Ph.D. candidates and three quarters for M.S. candidates.

The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Master of Science in Chemistry with a Teaching Credential

In cooperation with the UCI School of Education, the Chemistry Department sponsors a coordinated two-year program for the M.S. degree in Chemistry and the California Single Subject Teaching Credential. The M.S. degree may be obtained under either Plan I or Plan II described below. Prospective graduate students interested in this program should so indicate on their graduate application and should request a detailed description of the program from the Chemistry Department Graduate Affairs Office or the School of Education.

The following lists specify requirements for each of the graduate programs offered by the Department of Chemistry.

Master of Science in Chemistry Plan I (Thesis Plan)

- Completion of a minimum of seven approved courses (or 28 units), including six graduate-level courses (or 24 units) in chemistry (as specified by the Department and excluding CHEM 280, CHEM 290, CHEM 291, and CHEM 399) with maintenance of an average grade of B or better in all course work undertaken.
- Completion of the teaching requirement.
- Completion of three quarters in residence at UCI.
- Submission of an acceptable Master’s thesis.
Master of Science in Chemistry Plan II (Non-Thesis Plan)

- Completion of 10 graduate-level courses (or 40 units) in chemistry (excluding CHEM 290, CHEM 291, and CHEM 399 and counting CHEM 280 no more than once) with an average grade of B or better.
- Maintenance of an average grade of B or better in all course work undertaken.
- Completion of the teaching requirement.
- Completion of three quarters in residence at UCI.
- Satisfactory completion of a comprehensive oral examination.

Doctor of Philosophy in Chemistry

- Completion of a minimum of seven approved courses (28 units), including six graduate-level courses (24 units) in chemistry (as specified by the Department and excluding CHEM 280, CHEM 290, CHEM 291, and CHEM 399) with maintenance of an average grade of B or better in all course work undertaken. In addition, all students will be required to take a “Conduct of Research” course.
- Completion of the second-year Examination requirement.
- Completion of the Oral Examination requirement for Advancement to Candidacy.
- Completion of the teaching requirement.
- Completion of six quarters in residence at UCI.
- Submission of an acceptable doctoral dissertation.

Concentration in Chemical and Materials Physics

This is an interdisciplinary program between condensed matter physics and physical chemistry, which is designed to eliminate the barrier between these two disciplines. Students with B.S. degrees in Physics, Chemistry, or Materials Science and Engineering, are encouraged to apply to the program. The goal of the concentration in Chemical and Materials Physics (ChaMP) is to provide students with a broad interdisciplinary education in the applied physical sciences that emphasizes modern laboratory and computational skills. The program accepts students for both the M.S. and the Ph.D. degrees.

Upon admission to the program, students are assigned two faculty advisors, one from the Department of Physics and Astronomy, and one from the Department of Chemistry, to provide guidance on curriculum and career planning.

The curriculum for the M.S. program includes a summer session to assimilate students with different undergraduate backgrounds; formal shop, laboratory, and computational courses; a sequence on current topics to bridge the gap between fundamental principles and applied technology; and a course to develop communication skills. The required courses include thirteen core courses and three electives (subject to advisor approval) as follows:

<table>
<thead>
<tr>
<th>Core</th>

Select two of the following:

- CHEM 228 - Electromagnetism
- CHEM 230 - Classical Mechanics and Electromagnetic Theory
- PHYSICS 211 - Classical Mechanics
- PHYSICS 222 - Continuum Mechanics

Select one of the following:

- CHEM 236 - Forces Between Molecules
- PHYSICS 133 - Introduction to Condensed Matter Physics
- PHYSICS 238A - Condensed Matter Physics
In addition to the required courses, M.S. students complete a master’s thesis. Students are required to advance to candidacy for the master’s degree at least one quarter prior to filing the master’s thesis. There is no examination associated with this advancement, but the thesis committee needs to be selected and appropriate forms need to be filed. The M.S. program prepares students to compete for high-tech jobs or to begin research toward a Ph.D. degree.

Successful completion of the M.S. degree requirements qualifies students for the Ph.D. program but, although recommended, a written master's thesis is not required in addition to the Ph.D. dissertation for students obtaining a Ph.D. in Chemistry. Progress toward the Ph.D. degree is assessed by a written comprehensive examination administered in the summer after completion of the first year of study. This examination covers comprehensive knowledge acquired in course work, and the content of the examination depends upon the student’s specific area of interest.

Participants in the Ph.D. program take an examination for formal advancement to candidacy. It is typically taken within one year of successful completion of the comprehensive examination. To satisfy normative progress toward the degree, it must be taken by the end of the student’s third year. The examination is comprised of two parts: (a) a written report on a topic to be determined in consultation with the research advisor and (b) an oral report on research accomplished and plans for completion of the Ph.D. dissertation.

**Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP)**

The one-year graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP) is designed to function in concert with selected department programs, including the Ph.D. in Chemistry. Detailed information is available in the Department of Pharmaceutical Sciences (p. 1214) section and at Pharmaceutical Sciences (http://www.pharmsci.uci.edu) website.

**Faculty**

Ioan Andricioaei, Ph.D. Boston University, *Professor of Chemistry* (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Ara Apkarian, Ph.D. Northwestern University, *Professor of Chemistry* (physical chemistry and chemical physics)

Ramesh D. Arasasingham, Ph.D. University of California, Davis, *Senior Lecturer of Chemistry* (chemical education and inorganic chemistry)

Shane Ardo, Ph.D. Johns Hopkins University, *Assistant Professor of Chemistry; Chemical Engineering and Materials Science* (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Donald R. Blake, Ph.D. University of California, Irvine, *UCI Distinguished Professor of Chemistry* (analytical, atmospheric, environmental)

Suzanne A. Blum, Ph.D. University of California, Berkeley, *Associate Professor of Chemistry; Chemistry* (inorganic and organometallic, organic and synthetic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Andrew Borovik, Ph.D. University of North Carolina at Chapel Hill, *Vice Chair and Professor of Chemistry* (inorganic and organometallic, organic and synthetic)

David A. Brant, Ph.D. University of Wisconsin-Madison, *Professor Emeritus of Chemistry* (biophysical)

Kieron Burke, Ph.D. University of California, Santa Barbara, Professor of Chemistry; Physics and Astronomy (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

A. Richard Chamberlin, Ph.D. University of California, San Diego, Department Chair and Professor of Pharmaceutical Sciences; Chemistry; Pharmacology (chemical biology, organic and synthetic)

Robert Corn, Ph.D. University of California, Berkeley, Professor of Chemistry; Biomedical Engineering (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Robert J. Doedens, Ph.D. University of Wisconsin-Madison, Professor Emeritus of Chemistry (inorganic and organometallic)

Vy M. Dong, Ph.D. California Institute of Technology, Professor of Chemistry (organic and synthetic)

Kimberly D. Edwards, Ph.D. University of California, Irvine, Lecturer with Security of Employment of Chemistry (general chemistry)

Aaron P. Esser-Kahn, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Biomedical Engineering; Chemical Engineering and Materials Science (chemical biology, organic and synthetic, polymer, materials, nanoscience)

William J. Evans, Ph.D. University of California, Los Angeles, Professor of Chemistry (inorganic and organometallic)

Barbara J. Finlayson-Pitts, Ph.D. University of California, Riverside, Director of AirUCI and UCI Distinguished Professor of Chemistry; Chemistry (chemistry, analytical, atmospheric and environmental, physical chemistry and chemical physics)

Fillmore Freeman, Ph.D. Michigan State University, Professor of Chemistry (organic and synthetic, theoretical and computational)

Filipp Furche, Ph.D. University of Karlsruhe, Professor of Chemistry (physical chemistry and chemical physics, theoretical and computational)

Nien-Hui Ge, Ph.D. University of California, Berkeley, Associate Professor of Chemistry (analytical, chemical biology, physical chemistry and chemical physics, polymer, materials, nanoscience)

Robert B. Gerber, Ph.D. Oxford University, Professor of Chemistry (atmospheric and environmental, physical chemistry and chemical physics, theoretical and computational)

Alon A. Gorodetsky, Ph.D. California Institute of Technology, Assistant Professor of Chemical Engineering and Materials Science; Chemistry (organic photovoltaics, electrical biosensors, nanotechnology, DNA, materials chemistry)

Zhibin Guan, Ph.D. University of North Carolina at Chapel Hill, Professor of Chemistry; Biomedical Engineering (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Warren J. Hehre, Ph.D. Carnegie Mellon University, Professor Emeritus of Chemistry (physical theoretical chemistry)

John C. Hemminger, Ph.D. Harvard University, Vice Chancellor for Research and Professor of Chemistry (analytical, atmospheric and environmental, physical chemistry and chemical physics, polymer, materials, nanoscience)

Alan F. Heyduk, Ph.D. Massachusetts Institute of Technology, Associate Professor of Chemistry (chemical biology, inorganic and organometallic)

Wilson Ho, Ph.D. University of Pennsylvania, Donald Bren Professor and Professor of Physics and Astronomy; Chemistry (physical chemistry and chemical physics, polymer, materials, nanoscience)

Allan I. Hochbaum, Ph.D. University of California, Berkeley, Assistant Professor of Chemical Engineering and Materials Science; Chemistry (nanoscale materials and hybrid bio-inorganic devices for applications in clean energy)

Kenneth C. Janda, Ph.D. Harvard University, Dean of the School of Physical Sciences and Professor of Chemistry (physical chemistry and chemical physics)

Elizabeth R. Jarvo, Ph.D. Boston College, Associate Professor of Chemistry (inorganic and organometallic, organic and synthetic)

Susan M. King, Ph.D. Massachusetts Institute of Technology, Senior Lecturer of Chemistry (organic chemistry)

Matthew Law, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Chemical Engineering and Materials Science (inorganic and organometallic, physical chemistry and chemical physics, polymer, materials, nanoscience)

Renee Link, Ph.D. University of California, Irvine, Lecturer with Potential Security of Employment of Chemistry (organic chemistry)
Chang C. Liu, Ph.D. Scripps Research Institute, Assistant Professor of Biomedical Engineering; Chemistry (genetic engineering, directed evolution, synthetic biology, chemical biology)

Andrej Luptak, Ph.D. Yale University, Vice Chair of Graduate Programs in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences; Chemistry; Molecular Biology and Biochemistry (chemical biology)

Vladimir A. Mandelshtam, Ph.D. Russian Academy of Sciences, Professor of Chemistry (physical chemistry and chemical physics, theoretical and computational)

Craig C. Martens, Ph.D. Cornell University, Professor of Chemistry (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Rachel Martin, Ph.D. Yale University, Associate Professor of Chemistry; Molecular Biology and Biochemistry (analytical, chemical biology, physical chemistry and chemical physics)

Robert McIver, Ph.D. Stanford University, Professor Emeritus of Chemistry

George E. Miller, Ph.D. Oxford University, Senior Lecturer with Security of Employment Emeritus of Chemistry (analytical and radioanalytical chemistry and chemical education)

David L. Mobley, Ph.D. University of California, Davis, Associate Professor of Pharmaceutical Sciences; Chemistry (chemical biology, physical chemistry and chemical physics, theoretical and computational)

Harold W. Moore, Ph.D. University of Illinois at Urbana-Champaign, Professor Emeritus of Chemistry (organic and synthetic)

Shaul Mukamel, Ph.D. Tel Aviv University, UCI Distinguished Professor of Chemistry (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

Craig Murray, Ph.D. University of Edinburgh, Assistant Professor of Chemistry (atmospheric and environmental, physical chemistry and chemical physics)

Sergey Nizkorodov, Ph.D. University of Basel, Professor of Chemistry (analytical, atmospheric and environmental, physical chemistry and chemical physics)

James S. Nowick, Ph.D. Massachusetts Institute of Technology, Professor of Chemistry (chemical biology, organic and synthetic, polymer, materials, nanoscience)

Larry E. Overman, Ph.D. University of Wisconsin-Madison, UCI Distinguished Professor of Chemistry (chemical biology, inorganic and organometallic, organic and synthetic)

Reginald M. Penner, Ph.D. Texas A&M University, Department Chair and UCI Chancellor's Professor of Chemistry; Chemical Engineering and Materials Science (analytical, physical chemistry and chemical physics, polymer, materials, nanoscience)

Eric Potma, Ph.D. University of Groningen, Department Vice Chair and Associate Professor of Chemistry (analytical, chemical biology, physical chemistry and chemical physics)

Thomas L. Poulos, Ph.D. University of California, San Diego, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences; Physiology and Biophysics (chemical biology)

Jennifer A. Prescher, Ph.D. University of California, Berkeley, Assistant Professor of Chemistry; Molecular Biology and Biochemistry; Pharmaceutical Sciences (chemical biology, organic and synthetic)

Sergey V. Pronin, Ph.D. University of Chicago, Assistant Professor of Chemistry (organic chemistry)

Peter M. Rentzepis, Ph.D. Cambridge University, UC Presidential Chair and Professor of Chemistry; Chemical Engineering and Materials Science (physical chemistry and chemical physics)

Markus W. Ribbe, Ph.D. University of Bayreuth, UCI Chancellor's Professor of Molecular Biology and Biochemistry; Chemistry (chemical biology, inorganic and organometallic)

Scott D. Rychnovsky, Ph.D. Columbia University, Professor of Chemistry (chemical biology, organic and synthetic)

Eric S. Saltzman, Ph.D. University of Miami, Professor of Earth System Science; Chemistry (analytical, atmospheric and environmental)

A. J. Shaka, Ph.D. Oxford University, Professor of Chemistry (chemical biology, physical chemistry and chemical physics)

Kenneth J. Shea, Ph.D. Pennsylvania State University, Professor of Chemistry; Chemical Engineering and Materials Science (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)
Zuzanna S. Siwy, Ph.D. Silesian University of Technology, Professor of Physics and Astronomy; Biomedical Engineering; Chemistry (biosensing, nanotechnology, condensed matter physics)

Douglas J. Tobias, Ph.D. Carnegie Mellon University, Professor of Chemistry (atmospheric and environmental, chemical biology, physical chemistry and chemical physics, theoretical and computational)

Ivan V. Tomov, Ph.D., Associate Specialist of Chemistry

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, UCI Chancellor’s Fellow and Professor of Molecular Biology and Biochemistry; Chemistry; Pharmaceutical Sciences

David Van Vranken, Ph.D. Stanford University, Professor of Chemistry (chemical biology, organic and synthetic)

Christopher Vanderwal, Ph.D. Scripps Research Institute, Professor of Chemistry (organic and synthetic)

Gregory A. Weiss, Ph.D. Harvard University, Professor of Chemistry; Molecular Biology and Biochemistry (analytical, chemical biology, organic and synthetic, polymer, materials, nanoscience)

Max Wolfsberg, Ph.D. Washington University, Professor Emeritus of Chemistry (physical chemistry and chemical physics, theoretical and computational)

Jenny Y. Yang, Ph.D. Massachusetts Institute of Technology, Assistant Professor of Chemistry (inorganic and organometallic, organic and synthetic, polymer, materials, nanoscience)

Albert Fan Yee, Ph.D. University of California, Berkeley, Professor of Chemical Engineering and Materials Science; Biomedical Engineering; Chemistry (materials science aspects of polymers and soft materials, particularly on how they are used to impact nanotechnology)

Courses

CHEM 1A. General Chemistry. 4 Units.
Atomic structure; general properties of the elements; covalent, ionic, and metallic bonding; intermolecular forces; mass relationships.

Prerequisite: MATH 2A or PHYSICS 7C or CHEM 1P or placement via a score of 600 or higher on the SAT Mathematics Reasoning test, or a score of 27 or higher on the ACT Mathematics test, or a score of 700 or higher on the SAT Chemistry subject exam, or a score of 3 on the AP Chemistry exam, or a score of 4 on the AP Calc AB Exam, or a score of 3 on the AP Calc BC Exam. CHEM 1P with a grade of C- or better.

Overlaps with CHEM H2A, ENGR 1A.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

(II, Va)

CHEM 1B. General Chemistry. 4 Units.
Properties of gases, liquids, solids; changes of state; properties of solutions; stoichiometry; thermochemistry; and thermodynamics.

Corequisite: CHEM M2LB. CHEM M2LB for Chemistry majors only. No co-requisite for other majors.
Prerequisite: CHEM 1A or ENGR 1A or a score of 4 or higher on the AP Chemistry exam. CHEM 1A with a grade of C- or better. ENGR 1A with a grade of C- or better.

Overlaps with CHEM H2B.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

(II, Va)

CHEM 1C. General Chemistry. 4 Units.
Equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; kinetics; special topics.

Corequisite: CHEM 1LC.
Prerequisite: CHEM 1B. CHEM 1B with a grade of C- or better.

Overlaps with CHEM H2C.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

(II, Va)
CHEM 1LC. General Chemistry Laboratory. 2 Units.
Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics of CHEM 1A-B-C. Materials fee.

Corequisite: CHEM 1C.
Prerequisite: CHEM 1B, CHEM 1B with a grade of C- or better.

Overlaps with CHEM 1LE, CHEM H2LB, CHEM M2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB. Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 1LD. General Chemistry Laboratory. 2 Units.
Training and experience in basic laboratory techniques. Chemical practice and principles illustrated through experiments related to lecture topics in CHEM 1A-B-C. Materials fee.

Prerequisite: CHEM 1C and CHEM 1LC or CHEM 1LE. CHEM 1C with a grade of C- or better. CHEM 1LC with a grade of C- or better. CHEM 1LE with a grade of C- or better.

Overlaps with CHEM H2LB, CHEM M2LB.

Restriction: No credit for CHEM M2LA if taken after CHEM 1LD. Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 1LE. Accelerated General Chemistry Lab. 3 Units.
Lecture and experiments covering chemical concepts for accelerated students who do not plan to take organic chemistry. Properties of gases, liquids, solutions, and solids; chemical equilibrium, chemical thermodynamics; atomic and molecular structure; chemical kinetics; electrochemistry. Materials fee.

Corequisite: CHEM 1A or CHEM 1B or ENGR 1A.

Overlaps with CHEM 1LC.

Restriction: Majors in the School of Engineering and Biomedical Computing majors have first consideration for enrollment.

CHEM 1P. Preparation for General Chemistry Online. 4 Units.
Units of measurement, dimensional analysis, significant figures; elementary concepts of volume, mass, force, pressure, energy, density, temperature, heat, work; fundamentals of atomic and molecular structure; the mole concept, stoichiometry; properties of the states of matter; gas laws; solutions concentrations. Course may be offered online.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Biomedical Computing, Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM H2A. Honors General Chemistry. 4 Units.
Covers the same material as CHEM 1A-B-M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LA.
Prerequisite: Membership in the Campuswide Honors Program, or a score of 4 or 5 on the Chemistry Advanced Placement Examination, or a score of 700 or better on the SAT II in Chemistry.

Overlaps with CHEM 1A.

(II, Va)

CHEM H2B. Honors General Chemistry. 4 Units.
Covers the same material as CHEM 1A-B-M3C but in greater depth. Additional topics will also be included as time permits.

Corequisite: CHEM H2LB.
Prerequisite: CHEM H2A and CHEM H2LA. CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better.

Overlaps with CHEM 1B.

(II, Va)
CHEM H2C. Honors General Chemistry. 4 Units.
Covers the same material as CHEM 1A-CHEM 1B-CHEM M3C but in greater depth. Additional topics will also be included as time permits.
Corequisite: CHEM H2LC.
Prerequisite: CHEM H2B and CHEM H2LB. CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better.
Overlaps with CHEM 1C.

CHEM H2LA. Honors General Chemistry Laboratory. 3 Units.
Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.
Corequisite: CHEM H2A.
Prerequisite: Membership in the Campuswide Honors Program, or a score of 4 or 5 on the Chemistry Advanced Placement Examination, or a score of 700 or better on the SAT II in Chemistry.
Overlaps with CHEM M2LA.

CHEM H2LB. Honors General Chemistry Laboratory. 3 Units.
Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.
Corequisite: CHEM H2B.
Prerequisite: CHEM H2A and CHEM H2LA. CHEM H2A with a grade of B or better. CHEM H2LA with a grade of B or better.
Overlaps with CHEM M2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB.

CHEM H2LC. Honors General Chemistry Laboratory. 3 Units.
Training and experience in fundamental and analytical laboratory techniques through experiments related to lecture topics in CHEM H2A-CHEM H2B-CHEM H2C. Materials fee.
Corequisite: CHEM H2C.
Prerequisite: CHEM H2B and CHEM H2LB. CHEM H2B with a grade of B or better. CHEM H2LB with a grade of B or better.

CHEM M2LA. Majors General Chemistry Laboratory. 3 Units.
Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM 1C. Materials fee.
Corequisite: CHEM 1A.
Prerequisite: High school chemistry.
Overlaps with CHEM H2LA, CHEM 1LD.

Restriction: Chemistry majors only. No credit for CHEM M2LA if taken after CHEM 1LD.

CHEM M2LB. Majors General Chemistry Laboratory. 3 Units.
Training and experience in basic laboratory techniques through experiments related to lecture topics in CHEM 1A-CHEM 1B-CHEM 1C. Materials fee.
Corequisite: CHEM 1B.
Prerequisite: CHEM 1A and CHEM M2LA. CHEM 1A with a grade of C- or above. CHEM M2LA with a grade of C- or above.
Overlaps with CHEM H2LB.

Restriction: No credit for CHEM 1LC if taken after CHEM H2LB or CHEM M2LB. Chemistry majors only.
CHEM M3C. Majors Quantitative Analytical Chemistry. 4 Units.
Topics covered are equilibria, aqueous acid-base equilibria, solubility equilibria, oxidation reduction reactions, electrochemistry; and kinetics with a special emphasis on the statistical treatment of data and analytical methods of chemical analysis.

Corequisite: CHEM M3LC.
Prerequisite: (CHEM 1B and CHEM M2LB) or (CHEM H2B and H2LB). CHEM 1B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM H2LB with a grade of C- or better.

Restriction: Chemistry majors only.

CHEM M3LC. Majors Quantitative Analytical Chemistry Laboratory. 3 Units.
Training and experience in analytical laboratory techniques through experiments related to lecture topics in CHEM M3C.

Corequisite: CHEM M3C or CHEM H2C.
Prerequisite: (CHEM 1B or CHEM H2B) and (CHEM M2LB or CHEM H2LB). CHEM 1B with a grade of C- or better. CHEM H2B with a grade of C- or better. CHEM M2LB with a grade of C- or better. CHEM H2LB with a grade of C- or better.

Overlaps with CHEM H2LC.

Restriction: Chemistry majors only.

CHEM 5. Scientific Computing Skills. 4 Units.
Introduces students to the personal computing software used by chemists for managing and processing of data sets, plotting of graphs, symbolic and numerical manipulation of mathematical equations, and representing chemical reactions and chemical formulas.

Corequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (MATH 2D or MATH H2D).
Prerequisite: CHEM 1B or CHEM H2B and MATH 2B or a score of 4 or 5 on the AP CALCULUS BC.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 12. Chemistry Around Us. 4 Units.
Addresses ways in which chemistry affects everyday life. Topics include pollution, global warming, water supply/demands, biodiesel fuels, foods we eat, natural/synthetic materials, common drugs, drug design. Learn and apply basic chemistry concepts. Use risk/benefit analysis for optimal solutions.

II, Va

CHEM 51A. Organic Chemistry. 4 Units.
Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM M52LA or CHEM H52LA for Chemistry majors only or completion of or concurrent enrollment in CHEM 1LD for other majors.
Prerequisite: (CHEM 1C and CHEM 1LC) or (CHEM H2C and CHEM H2LC) or (CHEM M3C and CHEM M3LC). CHEM 1C and CHEM 1LC with a grade of C- or better. CHEM H2C and CHEM H2LC with a grade of C- or better. CHEM M3C and CHEM M3LC with a grade of C- or better.

Overlaps with CHEM H52A.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51B. Organic Chemistry. 4 Units.
Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM M52LB for Chemistry majors or CHEM H52LB or CHEM 51LB for other majors.
Prerequisite: CHEM 51A and (CHEM 1LD or CHEM M52LA or CHEM H52LA). CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better. CHEM M52LA or CHEM H52LA with a grade of C- or better.

Overlaps with CHEM H52B.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.
CHEM 51C. Organic Chemistry. 4 Units.
Fundamental concepts relating to carbon compounds with emphasis on structural theory and the nature of chemical bonding, stereochemistry, reaction mechanisms, and stereoscopic, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM M52LC for Chemistry majors or CHEM H52LC or CHEM 51LC for other majors.
Prerequisite: CHEM 51B and (CHEM 51LB or CHEM M52LB or CHEM H52LB). CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better. CHEM M52LB with a grade of C- or better. CHEM H52LB with a grade of C- or better.

Overlaps with CHEM H52C.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51LB. Organic Chemistry Laboratory. 2 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Course may be offered online. Materials fee.

Corequisite: CHEM 51B.
Prerequisite: CHEM 51A and CHEM 1LD. CHEM 51A with a grade of C- or better. CHEM 1LD with a grade of C- or better.

Overlaps with CHEM H52LA, CHEM M52LA.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51LC. Organic Chemistry Laboratory. 2 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Course may be offered online. Materials fee.

Corequisite: CHEM 51C.
Prerequisite: CHEM 51B and CHEM 51LB. CHEM 51B with a grade of C- or better. CHEM 51LB with a grade of C- or better.

Overlaps with CHEM H52LB, CHEM M52LB.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM 51LD. Organic Chemistry Laboratory. 2 Units.
Modern techniques of organic chemistry using selected experiments to illustrate topics introduced in CHEM 51A-CHEM 51B-CHEM 51C. Course may be offered online. Materials fee.

Prerequisite: CHEM 51C and CHEM 51LC. CHEM 51C with a grade of C- or better. CHEM 51LC with a grade of C- or better.

Overlaps with CHEM H52LC.

Restriction: Majors in the Schools of Physical Sciences, Biological Sciences, and Engineering, and majors in Nursing Science, Pharmaceutical Sciences, Public Health Sciences, and Undecided/Undeclared students have first consideration for enrollment.

CHEM H52A. Honors Organic Chemistry. 4 Units.
Fundamental concepts of the chemistry of carbon compounds. Structural, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM H52LA.
Prerequisite: (CHEM 1A and CHEM 1B and CHEM 1C) or (CHEM H2A and CHEM H2B and CHEM H2C).

Overlaps with CHEM 51A.

CHEM H52B. Honors Organic Chemistry. 4 Units.
Fundamental concepts of the chemistry of carbon compounds. Structural, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM H52LB.
Prerequisite: CHEM H52A and CHEM H52LA. CHEM H52A with a grade of C or better. CHEM H52LA with a grade of C or better.
CHEM H52C. Honors Organic Chemistry. 4 Units.
Fundamental concepts of the chemistry of carbon compounds. Structural, physical, and chemical properties of the principal classes of carbon compounds.

Corequisite: CHEM H52LC.
Prerequisite: CHEM H52B. CHEM H52B with a grade of C or better.
Overlaps with CHEM 51C.

CHEM H52LA. Honors Organic Chemistry Laboratory. 3 Units.
Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51A.
Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM M3LC or CHEM H2LC or CHEM 1LD).
Overlaps with CHEM 51LB, CHEM M52LA.
Restriction: Campuswide Honors Program students only.

CHEM H52LB. Honors Organic Chemistry Laboratory. 3 Units.
Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51B.
Prerequisite: CHEM 51A and CHEM H52LA. CHEM 51A with a grade of C- or better. CHEM H52LA with a grade of C- or better.
Overlaps with CHEM 51LB, CHEM 51LC.

CHEM H52LC. Honors Organic Chemistry Laboratory. 3 Units.
Fundamental techniques of modern experimental organic chemistry. Materials fee.

Corequisite: CHEM 51C.
Prerequisite: CHEM 51B and CHEM H52LB. CHEM 51B with a grade of C- or better. CHEM H52LB with a grade of C- or better.
Overlaps with CHEM 51LD, CHEM M52LC.

CHEM M52LA. Majors Organic Chemistry Laboratory. 3 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51A.
Prerequisite: (CHEM 1C or CHEM H2C or CHEM M3C) and (CHEM H2LC or CHEM M3LC or CHEM 1LD).
Overlaps with CHEM H52LA, CHEM 51LB.
Restriction: Chemistry majors only.

CHEM M52LB. Majors Organic Chemistry Laboratory. 3 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51B.
Prerequisite: CHEM 51A and CHEM M52LA. CHEM 51A with a grade of C- or better. CHEM M52LA with a grade of C- or better.
Overlaps with CHEM H52LB, CHEM 51LC.
Restriction: Chemistry majors only.

CHEM M52LC. Majors Organic Chemistry Laboratory. 3 Units.
Modern techniques of organic chemistry, using selected experiments to illustrate topics introduced in CHEM 51A-B-C. Materials fee.

Corequisite: CHEM 51C.
Prerequisite: CHEM 51B and CHEM M52LB. CHEM 51B with a grade of C- or better. CHEM M52LB with a grade of C- or better.
Overlaps with CHEM H52LC, CHEM 51LD.
Restriction: Chemistry majors only.
CHEM H90. The Idiom and Practice of Science. 4 Units.
A series of fundamental and applied problems in the chemical sciences are addressed. Topics may include the periodic table, electronic structure of atoms, chemical bonding, molecular structure, thermodynamics, and kinetics, with applications to energy and the environment, and/or biochemistry.

Restriction: Campuswide Honors Program students only.

(II, Va)

CHEM 107. Inorganic Chemistry. 4 Units.
Introduction to modern inorganic chemistry. Principles of structure, bonding, and chemical reactivity with application to compounds of the main group and transition elements, including organometallic chemistry.

Prerequisite: CHEM 51C or CHEM H52C.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 107L. Inorganic Chemistry Laboratory. 3 Units.
Modern techniques of inorganic and organometallic chemistry including experience with glove box, Schlenk line, and vacuum line methods. Materials fee.

Prerequisite: CHEM 107.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 125. Advanced Organic Chemistry. 4 Units.
Rapid-paced comprehensive treatment of organic chemistry. Focuses on molecular structure, reactivity, stability, scope and mechanisms of organic reactions. Topics include: structure and bonding; theoretical organic chemistry; acidity and basicity; reactive intermediates; pericyclic reactions; stereochemistry; organic synthesis; natural products; organic photochemistry.

Prerequisite: CHEM 51C.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 127. Inorganic Chemistry II. 4 Units.
Advanced treatment of selected fundamental topics in inorganic chemistry, building on material presented in Chemistry 107. Molecular symmetry with applications to electronic structure and spectroscopy. Reaction kinetics and mechanisms; inorganic synthesis and catalysis; bioinorganic chemistry.

Prerequisite: CHEM 107.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 128. Introduction to Chemical Biology. 4 Units.
Introduction to the basic principles of chemical biology: structures and reactivity; chemical mechanisms of enzyme catalysis; chemistry of signalling, biosynthesis, and metabolic pathways.

Prerequisite: (CHEM 1A and CHEM 1B and (CHEM 1C or CHEM H2C or CHEM M3C)) and (CHEM 51A and CHEM 51B and CHEM 51C).

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 128L. Introduction to Chemical Biology Laboratory Techniques. 3 Units.
Introduction to the basic laboratory techniques of chemical biology: electrophoresis, plasmid preparation, PCR, protein expression, isolation, and kinetics. Materials fee.

Corequisite: CHEM 128.

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 131A. Quantum Principles. 4 Units.
Principles of quantum chemistry with applications to nuclear motions and the electronic structure of the hydrogen atom.

Corequisite: (CHEM 5 or CBEMS 45C) and (CBEMS 45C or PHYSICS 7E).

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and MATH 2D and PHYSICS 7D.

Restriction: Chemistry majors have first consideration for enrollment.
CHEM 131B. Molecular Structure and Elementary Statistical Mechanics. 4 Units.
Principles of quantum mechanics with application to the elements of atomic structure and energy levels, diatomic molecular spectroscopy and structure determination, and chemical bonding in simple molecules.
Prerequisite: CHEM 131A and (PHYSICS 7E or CBEMS 45C).
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 131C. Thermodynamics and Chemical Dynamics. 4 Units.
Prerequisite: CHEM 131B.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 137. Computational Chemistry. 4 Units.
Short introduction to programming languages and to representative algorithms employed in chemical research. Students have the opportunity to devise and employ their own codes and also to employ codes which are widely used in various fields of chemistry. Materials fee.
Corequisite: CHEM 131B.
Prerequisite: CHEM 51C and CHEM 131A.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 138. Introduction to Computational Organic Chemistry. 4 Units.
An introduction to the use of computational chemistry to investigate reaction mechanisms, to calculate structures, and to predict properties of molecules. Students have the opportunity to perform calculations employing computational methods which are widely used in various fields of chemistry. Materials fee.
Prerequisite: CHEM 51C.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 152. Advanced Analytical Chemistry. 5 Units.
In-depth treatment of modern instrumental methods for quantitative analysis of real samples and basic principles of instrument design. Laboratory experiments using spectroscopic, chromatographic, mass spectrometric, and other instrumental methods. Materials fee.
Prerequisite: (CHEM 1C or CHEM M3C) and CHEM M3LC.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 153. Physical Chemistry Laboratory. 4 Units.
Introduction to the modern experimental approaches and software tools used in spectroscopy, kinetics, electrochemistry, and other physical chemistry experiments. Basics of interfacing with instruments using LabView. Materials fee.
Corequisite: CHEM 131C.
Prerequisite: CHEM 1C OR (CHEM M3C and CHEM M3LC) and CHEM 131B.
Restriction: Chemistry majors have first consideration for enrollment.

CHEM 156. Advanced Laboratory in Chemistry and Synthesis of Materials. 4 Units.
Synthesis and characterization of organic and inorganic materials including polymers and oxides. Techniques include electron and scanning probe microscopy, gel permeation chromatography, X-ray diffraction, porosimetry, and thermal analysis. Materials fee.
Prerequisite: CHEM 131B or ENGR 54 or PHRMSCI 171.
Same as CBEMS 160.
Restriction: Chemistry majors and Materials Science Engineering majors have first consideration for enrollment.

CHEM 160. Organic Synthesis Laboratory. 4 Units.
Modern experimental techniques in organic synthesis including experience with thin-layer chromatography, liquid chromatography, and gas chromatography. Modern methods of structure elucidation including FT NMR are employed in the characterization of products. Materials fee.
Prerequisite: CHEM 51C and (CHEM 51LC or CHEM H52LC or CHEM M52LC).
Restriction: Chemistry majors have first consideration for enrollment.
CHEM 170. Radioisotope Techniques. 4 Units.
Basic theory and practice of production, separation, safe handling, counting, applications of radioactive isotopes with emphasis on applications in chemistry, biology, and medicine. Materials fee.

Prerequisite: (CHEM 1C or CHEM M3C or CHEM H2C) and (CHEM 1LC or CHEM M3LC or CHEM H2LC).

Restriction: Chemistry majors have first consideration for enrollment.

CHEM 177. Medicinal Chemistry. 4 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.

Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128).

Same as PHRMSCI 177.

Restriction: Pharmaceutical Science majors have first consideration for enrollment.

CHEM 177L. Medicinal Chemistry Laboratory. 2 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity. Materials fee.

Corequisite: PHRMSCI 177.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and BIO SCI 100 and (BIO SCI 98 or CHEM 128).

Same as PHRMSCI 177L.

Restriction: Pharmaceutical Science majors have first consideration for enrollment.

CHEM 177LW. Medicinal Chemistry Lab. 2 Units.
An introduction of the basics of drug activity and mechanisms. Strategies used to identify lead compounds such as natural product chemistry, combinatorial chemistry, molecular modeling, and high-through put screening. Relationship of molecular structure to pharmacological activity.

Corequisite: CHEM 177.
Prerequisite: CHEM 51A and CHEM 51B and CHEM 51C and (BIO SCI 98 or CHEM 128) and BIO SCI 100.

Same as PHRMSCI 177LW.

Repeatability: May be repeated for credit unlimited times.

CHEM 180. Undergraduate Research. 4 Units.
Research for credit arranged with a faculty member to sponsor and supervise work. Student time commitment of 10 to 15 hours per week is expected, and a written research report is required at the end of each quarter of enrollment.

CHEM H180A. Honors Research in Chemistry. 4 Units.
Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Restriction: Chemistry Honors program students and Chemistry majors participating in the Campuswide Honors Program only.

CHEM H180B. Honors Research in Chemistry. 4 Units.
Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180A.

Restriction: Campuswide Honors Program students only.

CHEM H180C. Honors Research in Chemistry. 4 Units.
Undergraduate honors research in Chemistry. A student time commitment of 10-15 hours per week is required.

Prerequisite: CHEM H180B.

Restriction: Chemistry majors participating in the Campuswide Honors Program students only. Chemistry Honors Program students only.
CHEM H181W. Honors Seminar in Chemistry. 2 Units.
Students will receive guidance in the preparation of oral and written research presentations. A written thesis will be prepared and a formal research seminar will be presented.
Corequisite: CHEM H180C.
Prerequisite: CHEM H180A and CHEM H180B. Satisfactory completion of the Lower-Division Writing requirement.

CHEM 191. Chemistry Outreach Program. 2 Units.
Involves intensive participation in the UCI Chemistry Outreach Program, which performs Chemistry demonstrations at local high schools.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 6 times.

CHEM 192. Tutoring in Chemistry. 2 Units.
Enrollment limited to participants in the Chemistry Peer Tutoring Program.
Repeatability: May be taken for credit 9 times.
Restriction: The first eight may be taken for a letter grade. The remaining ten units must be taken Pass/Not Pass only. NOTE: No more than eight units may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.

CHEM 193. Research Methods. 4 Units.
Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.
Prerequisite: BIO SCI 14 or PHY SCI 5.
Same as BIO SCI 108, PHYSICS 193.

CHEM 197. Professional Internship. 4 Units.
Internship program that provides students with opportunity to develop professional skills necessary for competitive placement in their chosen chemical inspired industry. Students gain new and field-specific skills outside the classroom while participating in a supervised internship totaling 100 hours.
Prerequisite: Enrollment requires completion of an application form. Student selection is made by a selection committee.
Restriction: Upper-division students only.

CHEM 199. Independent Study in Chemistry. 1-4 Units.
Independent research with Chemistry faculty. Student time commitment of three to four hours per week per unit is expected, and a written report on the independent study is required at the end of each quarter of enrollment.
Repeatability: Unlimited as topics vary.

CHEM 200. Conduct of Research . 2 Units.
Introduces new graduate students to ethical conduct of scientific research, mentoring, and current research in the Department of chemistry.
Repeatability: May be taken for credit 2 times.

CHEM 201. Organic Reaction Mechanisms I. 4 Units.
Advanced treatment of basic mechanistic principles of modern organic chemistry. Topics include molecular orbital theory, orbital symmetry control of organic reactions, aromaticity, carbonium ion chemistry, free radical chemistry, the chemistry of carbenes and carbanions, photochemistry, electrophilic substitutions, aromatic chemistry.
Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 202. Organic Reaction Mechanisms II. 4 Units.
Topics include more in-depth treatment of mechanistic concepts, kinetics, conformational analysis, computational methods, stereoelectronics, and both solution and enzymatic catalysis.
Prerequisite: CHEM 201.
CHEM 203. Organic Spectroscopy. 4 Units.
Modern methods used in structure determination of organic molecules. Topics include mass spectrometry; ultraviolet, chiroptical, infrared, and nuclear magnetic resonance spectroscopy.

Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C) or (CHEM H52A and CHEM H52B and CHEM H52C).

Restriction: Graduate students only.

CHEM 204. Organic Synthesis I. 4 Units.
Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis is on carbon-carbon bond forming methodology. Topics include carbonyl annelations, cycloadditions, sigmatropic rearrangements, and organometallic methods.

CHEM 205. Organic Synthesis II. 4 Units.
Fundamentals of modern synthetic organic chemistry will be developed. Major emphasis this quarter is on natural product total synthesis and retrosynthetic (antithetic) analysis.

Prerequisite: CHEM 204.

CHEM 206. Laboratory Skills. 4-6 Units.
Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as PHYSICS 206.

Concurrent with PHYSICS 106.

CHEM 207. Chemistry for Physicists. 4 Units.
Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as PHYSICS 207.

CHEM 208. Mathematics for Chemists. 4 Units.
Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as PHYSICS 208.

CHEM 209. Physics for Chemists. 4 Units.
An introduction to concepts of electrodynamics with special emphasis on applications to chemistry: vector analysis, electrostatics, magnetostatics, electrodynamics, electromagnetic waves, classical radiation theory, special relativity.

CHEM 213. Chemical Kinetics. 4 Units.
Surveys gas phase and organic reaction mechanisms and their relationship to kinetic rate laws; treats the basic theory of elementary reaction rates. A brief presentation of modern cross-sectional kinetics is included.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 215. Inorganic Chemistry I. 4 Units.
Principles of modern inorganic chemistry with applications to chemical systems of current interest. Inorganic phenomena are organized into general patterns which rationalize observed structures, stabilities, and physical properties.

Prerequisite: CHEM 107 and (CHEM 131A and CHEM 131B and CHEM 131C).

Restriction: Graduate students only.

CHEM 216. Organometallic Chemistry. 4 Units.
Synthesis and reactivity of organometallic complexes with an emphasis on mechanisms. Topics include bonding and fluxional properties; metal-carbon single and multiple bonds; metal 8-complexes. Applications to homogenous catalysis and organic synthesis are incorporated throughout the course.

Prerequisite: CHEM 107 or CHEM 215.
CHEM 217. Physical Inorganic Chemistry. 4 Units.
General principles of the spectroscopy and magnetism of inorganic compounds. Characterization of inorganic complexes by infrared, near-infrared, visible, ultraviolet, NMR, EPR, EXAFS, and Mossbauer spectroscopies. Some necessary group theory developed.
Prerequisite: CHEM 215.

CHEM 218. Metallobiochemistry. 4 Units.
A review of the biochemistry of metallic elements emphasizing: methods for studying metals in biological systems; the chemical basis for nature’s exploitation of specific elements; structures of active sites; mechanisms; solid-state structures and devices; metals in medicine.
Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 219. Chemical Biology. 4 Units.
A survey of the organic chemistry underlying biological function. Introduction to chemical genetics, receptor-ligand interactions, small molecule agonists and antagonists, combinatorial synthesis, high throughput assays, molecular evolution, protein and small molecule design.
Restriction: Graduate students only.

CHEM 220. Bioorganic Chemistry. 4 Units.
Structure and function of biologically important macromolecules. Introduction to nucleic acid, protein structure, principles of molecular recognition, enzyme function, modelling, and engineering.
Prerequisite: (CHEM 51A and CHEM 51B and CHEM 51C).

CHEM 221A. Fundamentals of Molecular Biophysics. 4 Units.
An overview of the principles and concepts in molecular biophysics. Topics covered include energy and entropy in biology, non-equilibrium reaction kinetics, random walks and molecular diffusion, molecular forces in biology.
Prerequisite: Undergraduate courses in physical chemistry and biochemistry.
Repeatability: May be taken for credit 3 times.

CHEM 223. Biological Macromolecules. 4 Units.
Introduction to nucleic acid and protein structure, dynamics, and function. Topics include analytical methods, molecular evolution, folding, and catalysis.
Same as PHRMSCI 223.

CHEM 224. Molecular and Cellular Biophotonics. 4 Units.
Principles underlying the application of photonic technologies to biomolecular and cellular systems. Sample technologies Optical Tweezers, Linear and Nonlinear Optical Microscopy and Fluorescence Lifetime and Correlation Methods and their use to investigate emergent problems in Molecular, Cellular, and Developmental Biology.
(Design units: 0)
Same as CBEMS 224.
Restriction: Graduate students only.

CHEM 225. Polymer Chemistry: Synthesis and Characterization of Polymers. 4 Units.
Prerequisite: Undergraduate courses in organic and physical chemistry.

CHEM 228. Electromagnetism. 4 Units.
Maxwell’s equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.
Same as PHYSICS 228.

CHEM 229A. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.
Same as PHYSICS 229A.
Concurrent with PHYSICS 100.
CHEM 229B. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as PHYSICS 229B.

CHEM 230. Classical Mechanics and Electromagnetic Theory. 4 Units.
Fundamentals of classical mechanics and electromagnetic theory are developed with specific application to molecular systems. Newtonian, Lagrangian, and Hamiltonian mechanics are developed. Boundary value problems in electrostatics are investigated. Multipole expansion and macroscopic media are discussed from a molecular viewpoint.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 231A. Fundamentals of Quantum Mechanics. 4 Units.
The postulates of quantum mechanics are discussed and applied to a variety of model problems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 231B. Applications of Quantum Mechanics. 4 Units.
Approximate methods for solving atomic and molecular structure problems are developed, and the application of quantum mechanics to spectroscopy is introduced.

Prerequisite: CHEM 231A.

CHEM 231C. Molecular Spectroscopy. 4 Units.
Theory and techniques of spectroscopy as used for the study of molecular and condensed phase properties. Coherent time domain spectroscopies are covered.

Prerequisite: CHEM 231B.

CHEM 232A. Thermodynamics and Introduction to Statistical Mechanics. 4 Units.
A detailed discussion from an advanced point of view of the principles of classical thermodynamics. The fundamentals of statistical mechanics. Topics include an introduction to ensemble theory, Boltzmann statistics, classical statistical mechanics, and the statistical mechanics of ideal gas systems.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 232B. Advanced Topics in Statistical Mechanics. 4 Units.
Continued discussion of the principles of statistical mechanics. Applications to topics of chemical interest including imperfect gases, liquids, solutions, and crystals. Modern techniques such as the use of autocorrelation function methods.

Prerequisite: CHEM 232A.

CHEM 232C. Non-Equilibrium Statistical Mechanics. 4 Units.
Phenomenology of material processes, including: kinetic theories of transport and continuum, linear response theory, critical phenomena of phase transition, self-assembly, and nucleation.

CHEM 233. Nuclear and Radiochemistry. 4 Units.
Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Same as CBEMS 233.

Concurrent with CBEMS 133.

CHEM 234. Advanced Chemical Kinetics. 4 Units.
Topics and format vary.

Prerequisite: CHEM 213.

Repeatability: Unlimited as topics vary.

CHEM 235. Molecular Quantum Mechanics. 4 Units.
Application of quantum mechanics to calculation of molecular properties. Electronic structure of molecules.

Prerequisite: CHEM 231A.
CHEM 236. Forces Between Molecules. 4 Units.
The nature and effects of non-covalent interactions between molecular systems. The focus is on properties of these interactions in condensed phases: macromolecular systems; particle-surface interactions.

CHEM 237. Mathematical Methods in Chemistry. 4 Units.
Survey of essential math methods in chemistry. Topics may include series and limits, complex analysis, Fourier and Laplace transforms, linear algebra and operators (theory and algorithms), differential equations, and probability concepts for stochastic processes.

CHEM 241. Current Issues Related to Tropospheric and Stratospheric Processes. 4 Units.
Examination of current issues related to the atmosphere, including energy usage; toxicology; effects on humans, forests, plants, and ecosystems; particulate matter (PM10); combustion; modeling and meteorology; airborne toxic chemicals and risk assessment; application of science to development of public policies.

Prerequisite: ENGRMAE 164 or ENGRMAE 261 or CHEM 245 or EARTHSS 240.
Same as ENGRMAE 260.

CHEM 242A. Physical and Geometrical Optics. 4 Units.
Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Same as CBEMS 242A.
Restriction: Graduate students only.
Concurrent with PHYSICS 134A.

CHEM 242B. Applied Optics. 4 Units.
Focuses on the treatment of a wide variety of tools and techniques used in optics, particularly in research. Subjects include an introduction to lasers, optical detection, coherent optics, spectroscopic techniques, and selected topics corresponding to the interest of the students.

Prerequisite: CHEM 242A.
Same as CBEMS 242B.

CHEM 243. Advanced Instrumental Analysis. 4 Units.
Theory and applications of modern advanced instrumental methods of analysis. Includes data acquisition, storage, retrieval and analysis; Fourier transform methods; vacuum technologies; magnetic sector; quadrupole and ion trap mass spectrometry; surface science spectroscopic methods; lasers and optics.

Prerequisite: CHEM 152 and (CHEM 131A and CHEM 131B and CHEM 131C).

CHEM 245. Atmospheric Chemistry of the Natural and Polluted Troposphere. 4 Units.
Kinetics, mechanisms and photochemistry of tropospheric reactions in the gas, liquid, and solid phases, and methods of analysis. Chemistry of photochemical oxidant formation and acid deposition, and applications to control strategies. Chemistry of toxic chemicals and indoor air pollution.

Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 246. Separations and Chromatography. 4 Units.
Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, supercritical fluid chromatography, capillary electrophoresis, and field flow fractionation. Applications of these separation strategies are discussed.

CHEM 247. Current Problems in Analytical Chemistry. 4 Units.
Surveys current research challenges in analytical chemistry. Topics include electrochemistry, chromatography, spectroscopy, and mass spectrometry.

CHEM 248. Electrochemistry. 4 Units.
Fundamentals of electrochemistry including thermodynamics and the electrochemical potential, charge transfer kinetics, and mass transfer. Methods based on controlled potential and controlled current are described; the effects of slow heterogeneous kinetics and the perturbation caused by homogeneous chemistry are discussed.

CHEM 249. Analytical Spectroscopy. 4 Units.
Advanced treatment of spectroscopic techniques and instrumentation. Atomic and molecular absorption, emission, and scattering processes and their application to quantitative chemical analysis are outlined. Puts different spectroscopic techniques in perspective and demonstrates most appropriate applications to analytical problems.
CHEM 251. Special Topics in Organic Chemistry. 1-4 Units.
Advanced topics in organic chemistry.
Repeatability: Unlimited as topics vary.

CHEM 252. Special Topics in Physical Chemistry. 1-4 Units.
Advanced topics in physical chemistry. Materials fee.
Repeatability: Unlimited as topics vary.

CHEM 253. Special Topics in Inorganic Chemistry. 4 Units.
Advanced topics in inorganic chemistry.
Prerequisite: CHEM 215.
Repeatability: Unlimited as topics vary.

CHEM 254. Special Topics in Computational and Theoretical Chemistry. 4 Units.
Subjects covered vary from year to year.
Repeatability: Unlimited as topics vary.

CHEM 263. Materials Chemistry . 4 Units.
An introduction to crystalline solids, descriptive crystal chemistry, solid-state synthesis and characterization techniques, x-ray and electron diffraction, phase diagrams, electronic band structure of extended solids, semi conductors, and nanoscale inorganic materials.

CHEM 266. Current Topics in Chemical and Materials Physics. 1 Unit.
The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.
Repeatability: May be repeated for credit unlimited times.
Same as PHYSICS 266.

CHEM 271. Structural X-Ray Cystallography. 4 Units.
The principles and practice of the determination of structures by single crystal X-Ray diffraction techniques. Crystal symmetry, diffraction, structure solution and refinement. Opportunities for hands-on experience in structure determination.
Prerequisite: CHEM 131A and CHEM 131B and CHEM 131C.

CHEM 272. Industrial Chemistry. 4 Units.
Scientific, economic environmental aspects of the top 50 industrially produced chemicals, including: how they are obtained, and used; present and future sources of energy and raw materials, and the effects of chemical manufacturing on the price structure of our economy.

CHEM 273. Technical Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations, through examples and practice.
Grading Option: Satisfactory/unsatisfactory only.
Same as PHYSICS 273.

CHEM 280. Research. 2-12 Units.
Supervised original research toward the preparation of a Ph.D dissertation or M.S. thesis.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

CHEM 290. Seminar. 1 Unit.
Weekly seminars and discussions on general and varied topics of current interest in chemistry.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
CHEM 291. Research Seminar. 4 Units.
Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

CHEM 292. Graduate Symposium. 2 Units.
Students present public seminars on literature-based research topics in contemporary chemistry. Topics to be chosen by student and approved by instructor.

Repeatability: May be repeated for credit unlimited times.

CHEM 299. Independent Study. 1-4 Units.
Independent research with Chemistry faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

CHEM 399. University Teaching. 1-4 Units.
Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Department of Earth System Science

3200 Croul Hall; 949-824-8794
http://www.ess.uci.edu/
Gudrun Magnusdottir, Chair

Understanding global environmental issues such as global warming, stratospheric ozone depletion, and worldwide air pollution requires the cooperation of scientists across many fields. Global change is projected to accelerate through the twenty-first century and will impact the ecosystems that preserve the habitability of the planet. The Department of Earth System Science focuses on the atmosphere, land, and oceans, how these interact as a system, and how the Earth will change over a human lifetime. Earth System Science (ESS) is inherently interdisciplinary in scope, linking oceanography, atmospheric and terrestrial sciences, climatology, hydrology, biology, physics, and chemistry to understand the environment. ESS faculty includes chemists, biologists, ecologists, physicists, hydrologists, geologists, meteorologists, engineers, applied mathematicians, and oceanographers. The wide-ranging expertise of ESS faculty and teaching assistants allows students to learn valuable scientific skills in the classroom, laboratory, and field experiences.

Degrees

¹ Emphasis at the graduate level is on the Ph.D. degree; the master’s degree may be awarded to Ph.D. students after fulfillment of the requirements.

Undergraduate Programs

B.S. Earth System Science (p. 1320)

B.A. Environmental Science (p. 1325)

Bachelor of Science Major in Earth System Science

http://ess.uci.edu/undergrad/bs

Earth System Science is an interdisciplinary field of study that combines oceanography, atmospheric science, meteorology, geography, geology, hydrology, and environmental science. ESS students gain an understanding of how individual aspects of the environment interact, including the influence of humans on this complex system.
Examples of important questions in Earth System Science include, but are not limited to, the influence of atmospheric chemistry on climate and air quality, biological controls on the chemistry of the oceans, and physical controls on atmosphere and ocean circulation.

The Earth System Science (B.S.) program provides students with a fundamental understanding of the oceanographic, atmospheric, and terrestrial sciences. This program of study prepares students for careers in science, research, or technical fields. Students learn to apply basic sciences (physics, chemistry, mathematics, and biology) to understand the major processes and systems governing the Earth’s climate, biogeochemical cycles, and global change. Central to the B.S. program is an understanding of relevant scientific literature, methods to collect/analyze data, and interpret results in the context of scientific theory. Students will learn to work collaboratively to understand and address complex problems and communicate scientific knowledge.

Through the core course work, students will learn to explain the current and projected future state of the Earth system in the context of past climate change and current human activities. Once the core course work is complete, students are encouraged to focus on a particular area within Earth System Science and to choose electives that build a coherent core of knowledge. Focus areas include but are not limited to climatology, biogeochemical cycles, oceanography, hydrology, terrestrial sciences, and atmospheric sciences. Optional specializations are available in Atmospheric Science, Hydrology and Terrestrial Ecosystems, and Oceanography.

Earth System Science students are encouraged to become directly involved in research. The Department provides excellent opportunities to learn from and work with recognized experts in the field, while fulfilling degree requirements. EARTHSS 198W may satisfy Department and UCI upper-division writing requirements.

**Careers for the Earth System Science Major**

Some students go on to graduate school in physical sciences, engineering, or related areas. Others begin careers as research scientists in academic, public, or private institutions (may require a graduate-level degree). Options that may be available are scientist positions in the following roles: environmental policy and planning, environmental consulting, air quality monitoring and assessment, laboratory analysis, scientific research, science education, natural resource management, wildlife management, conservation and environmental protection, and water resource management.

**Special Programs**

**Earth System Science Honors Program.** In the year-long honors course sequence, students admitted into the ESS Honors Program pursue research with faculty in the Department, and prepare a written thesis of their work. Visit the Earth System Science Honors Program (http://ess.uci.edu/undergrad/honors) website for more information.

**Teaching Certification.** Earth System Science students interested in teaching careers can earn a bachelor’s degree concurrently with a California Preliminary Single Subject Teaching Credential. See the Concentration in Geosciences Education with Secondary Teaching Certification section below for more information.

**Admission to the Earth System Science Major**

Students may be admitted to the Earth System Science major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website. For transfer student admission, preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following required courses: one year of approved calculus and one year of either general chemistry with laboratory (preferred) or one-year of calculus-based physics with laboratory.

**Requirements for the B.S. Degree in Earth System Science**

**All students must meet the University Requirements (p. 71).**

**School Requirements: None.**

**Major Requirements**

A. Complete:

### Optional Specializations

Three optional specializations are available: Atmospheric Science, Hydrology and Terrestrial Ecosystems, and Oceanography. The specializations require the completion of at least five courses from the following lists (four science courses plus one advanced tools course).

#### Specialization in Atmospheric Science

**Requirements**

Four courses selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 101</td>
<td>Paleoclimatology</td>
</tr>
<tr>
<td>EARTHSS 112</td>

</tr>
<tr>
<td>EARTHSS 122</td>
<td>Atmospheric Dynamics</td>
</tr>
<tr>
<td>EARTHSS 124</td>
<td>Weather Analysis</td>
</tr>
<tr>
<td>EARTHSS 142</td>
<td>Atmospheric Chemistry</td>
</tr>
<tr>
<td>EARTHSS 199</td>
<td>Undergraduate Research (one 4-unit course focused on atmospheric research selected from EARTHSS 199, 198, H198, H199A-H199B-H199C)</td>
</tr>
</tbody>
</table>

One advanced tools course selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 118</td>
<td>Advanced Data Analysis and Modeling</td>
</tr>
<tr>
<td>EARTHSS 138</td>
<td>Satellite Remote Sensing for Earth System Science</td>
</tr>
<tr>
<td>EARTHSS 150</td>
<td>Laboratory Methods in Earth Systems Science</td>
</tr>
</tbody>
</table>

(These courses may overlap in Major Requirements, Section B.)

#### Specialization in Hydrology and Terrestrial Ecosystems

**Requirements**

Four courses selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 132</td>
<td>Terrestrial Hydrology</td>
</tr>
<tr>
<td>EARTHSS 140</td>
<td>Advanced Geology</td>
</tr>
</tbody>
</table>
EARTHSS 164 Ecosystem Ecology
EARTHSS 168 Physiological Plant Ecology
EARTHSS 174 Ice in the Climate System
EARTHSS 199 Undergraduate Research (one 4-unit course focused on terrestrial research selected from EARTHSS 199, 198, H198, H199A-H199B-H199C)

One advanced tools course selected from the following:
EARTHSS 118 Advanced Data Analysis and Modeling
EARTHSS 134 Fundamentals of GIS for Environmental Sciences
EARTHSS 138 Satellite Remote Sensing for Earth System Science
EARTHSS 150 Laboratory Methods in Earth Systems Science
(These courses may overlap in Major Requirements, Section B.)

Specialization in Oceanography

Requirements
Four courses selected from the following:
EARTHSS 101 Paleoclimatology
EARTHSS 112 Global Climate Change and Impacts
EARTHSS 130 Physical Oceanography
EARTHSS 144 Marine Geochemistry and Biogeochemistry
EARTHSS 148 Marine Ecosystems and Global Change
EARTHSS 170 Environmental Microbiology
EARTHSS 199 Undergraduate Research (one 4-unit course focused on oceanographic research selected from EARTHSS 199, 198, H198, H199A-H199B-H199C)

One advanced tools course selected from the following:
EARTHSS 118 Advanced Data Analysis and Modeling
EARTHSS 138 Satellite Remote Sensing for Earth System Science
EARTHSS 150 Laboratory Methods in Earth Systems Science
(These courses may overlap in Major Requirements, Section B.)

Some students (particularly transfer students) take EARTHSS 51, EARTHSS 53, and EARTHSS 55 in the junior year.
Concentration in Geosciences Education with Secondary Teaching Certification

This concentration allows students pursuing the B.S. in Earth System Science to earn a bachelor's degree and complete the required course work and field experience for a California Preliminary Single Subject Teaching Credential at the same time. In addition to the requirements listed above, students must complete the following courses:

- CHEM 193 or PHYSICS 193: Research Methods
- EARTHSS 7 or EARTHSS 140: Physical Geology
- EDUC 55: Knowing and Learning in Mathematics and Science
- EDUC 109: Reading and Writing in Secondary Mathematics and Science Classrooms
- EDUC 143AW: Classroom Interactions I
- EDUC 143BW: Classroom Interactions II
- EDUC 148: Complex Pedagogical Design
- EDUC 158: Student Teaching Mathematics and Science in Middle/High School (two quarters)
- LPS 60: The Making of Modern Science
- PHY SCI 5: California Teach 1: Introduction to Science and Mathematics Teaching
- PHY SCI 105: California Teach 2: Middle School Science and Mathematics Teaching
- PHYSICS 20A or PHYSICS 20B: Introduction to Astronomy
- EARTHSS 140: Cosmology: Man's Place in the Universe

1 EARTHSS 140 may overlap with the major requirement in section B.

With careful, early planning, it is possible for students to complete the bachelor's degree and the secondary teaching certification in four years.

For additional information about teacher certification requirements and enrollment procedures, visit the Cal Teach (http://www.gse.uci.edu/calteach) website. Interested students are strongly encouraged to contact the Cal Teach Resource and Advising Center or the Physical Sciences Student Affairs Office.

Bachelor of Arts Major in Environmental Science

http://ess.uci.edu/undergrad/ba
The Gulf Oil Spill, Global Climate Change, Drought and Water Supply. Each of these topics illustrates the continuing need for environmental professionals with training in the natural sciences, social sciences, economics, and public policy. The Environmental Science B.A. degree program prepares students interested in environmental problem solving by linking an understanding of natural science with socioeconomic factors and public policy. The curriculum combines a quantitative understanding of environmental science, chemistry, and biology with studies of social science, policy, and macro- and microeconomics to provide a foundation for careers in environmental policy, resource management, education, environmental law, and related fields.

The Environmental Science program provides students with a solid foundation to recognize the impacts of human activities on the environment, and in turn the impacts of environmental change on society. Students will understand the mechanisms by which key institutions, policies, and regulations impact ecosystems and the physical environment. Once the core course work is complete, students are encouraged to focus on a particular area within Environmental Science and to choose electives that build a coherent core of knowledge. Focus areas include, but are not limited to planning, policy and design, sociology, economics, climatology, water resources, water quality, air pollution, resource management, and atmospheric sciences.

**Careers for the Environmental Science Major**

Some students may find career opportunities in roles such as policy advisor, data analyst (may require a graduate-level degree), scientific journalist, or technical writer. Other options that may be available are scientist positions in the following roles: environmental policy and planning, environmental consulting, air quality monitoring and assessment, natural resource management, wildlife management, conservation and environmental protection.

**Special Programs**

**Environmental Science Honors Program.** In the year-long honors course sequence, Environmental Science students admitted into the ESS Honors Program pursue research with faculty in the Department, and prepare a written thesis of their work. Visit the Environmental Science Honors Program ([http://ess.uci.edu/undergrad/honors](http://ess.uci.edu/undergrad/honors)) website for more information.

**Teaching Certification.** Environmental Science students interested in teaching careers can earn a bachelor’s degree concurrently with a California Preliminary Single Subject Teaching Credential. See the Concentration in Geosciences Education with Secondary Teaching Certification section below for more information.

**Admission to the Environmental Science Major**

Students may be admitted to the Environmental Science major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria ([http://www.changeofmajor.uci.edu](http://www.changeofmajor.uci.edu)) website. For transfer student admission, preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed either one year of general chemistry with laboratory (preferred) or one year of biology with laboratory. One year of economics or sociology is recommended.

**NOTE:** The major is open to all students except Earth System Science B.S. majors and Earth and Atmospheric Sciences minors.

**Requirements for the B.A. Degree in Environmental Science**

All students must meet the University Requirements (p. 71).

**School Requirements:** None.

**Major Requirements**

**A. Select one of the following:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 1</td>
<td>Introduction to Earth System Science</td>
</tr>
<tr>
<td>EARTHSS 3</td>

### Concentration in Geosciences Education with Secondary Teaching Certification

This concentration allows students pursuing the B.A. in Environmental Science to earn a bachelor’s degree and complete the required course work and field experience for a California Preliminary Single Subject Teaching Credential at the same time. With careful, early planning, it is possible for students to complete the bachelor’s degree and the secondary teaching certification in four years.

For additional information about teacher certification requirements and enrollment procedures, visit the Cal Teach (http://www.gse.uci.edu/calteach) website. Interested students are strongly encouraged to contact the Cal Teach Resource and Advising Center or the Physical Sciences Student Affairs Office.

### Departmental Requirements

#### A. Select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 1</td>
<td>Introduction to Earth System Science</td>
</tr>
<tr>
<td>EARTHSS 3</td>
<td>Oceanography</td>
</tr>
<tr>
<td>EARTHSS 5</td>
<td>The Atmosphere</td>
</tr>
<tr>
<td>EARTHSS 7</td>
<td>Physical Geology</td>
</tr>
<tr>
<td>EARTHSS 11</td>
<td>Climate Change and Policy</td>
</tr>
<tr>
<td>EARTHSS 13</td>
<td>Global-Change Biology</td>
</tr>
<tr>
<td>EARTHSS 15</td>
<td>Introduction to Global Climate Change</td>
</tr>
<tr>
<td>EARTHSS 17</td>
<td>Hurricanes, Tsunamis, and other Catastrophes</td>
</tr>
<tr>
<td>EARTHSS 21</td>
<td>On Thin Ice: Climate Change and the Cryosphere</td>
</tr>
<tr>
<td>EARTHSS 23</td>
<td>Air Pollution: From Urban Smog to Global Change</td>
</tr>
</tbody>
</table>

Complete:
### EARTHSS 7
- Physical Geology

or EARTHSS 140
- Advanced Geology

### EARTHSS 60A-60B-60C
- Fundamental Processes in Earth and Environmental Studies
- and Local and Regional Environmental Issues
- and Global Environmental Issues

### EARTHSS 114
- Earth System Science Laboratory and Field Methods

### EARTHSS 180
- Environmental Sustainability I

### EARTHSS 182
- Environmental Sustainability II

### EARTHSS 192
- Careers in Earth System Science

### PHYSICS 20A
- Introduction to Astronomy

or PHYSICS 20B
- Cosmology: Man's Place in the Universe

### B. Select one of the following sequences and accompanying labs:

<table>
<thead>
<tr>
<th>Sequence</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1A-1B-1C</td>
<td>General Chemistry and General Chemistry</td>
</tr>
<tr>
<td>CHEM 1LC-1LD</td>
<td>General Chemistry Laboratory and General Chemistry Laboratory</td>
</tr>
<tr>
<td>CHEM H2A-H2B-H2C</td>
<td>Honors General Chemistry and Honors General Chemistry and Honors General Chemistry</td>
</tr>
<tr>
<td>CHEM H2LA-H2LB-H2LC</td>
<td>Honors General Chemistry Laboratory and Honors General Chemistry Laboratory and Honors General Chemistry Laboratory</td>
</tr>
</tbody>
</table>

### Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 93</td>
<td>From DNA to Organisms</td>
</tr>
<tr>
<td>BIO SCI 94</td>
<td>From Organisms to Ecosystems</td>
</tr>
</tbody>
</table>

### C. Select three courses from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 19</td>
<td>Introduction to Modeling the Earth System</td>
</tr>
<tr>
<td>EARTHSS 116</td>
<td>Data Analysis for Earth Sciences</td>
</tr>
<tr>
<td>EARTHSS 134</td>
<td>Fundamentals of GIS for Environmental Sciences</td>
</tr>
<tr>
<td>MATH 2A-2B</td>
<td>Single-Variable Calculus and Single-Variable Calculus</td>
</tr>
<tr>
<td>MATH 4</td>
<td>Mathematics for Economists</td>
</tr>
<tr>
<td>STATS 7</td>
<td>Basic Statistics</td>
</tr>
</tbody>
</table>

### D. Select two courses from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI E189</td>
<td>Environmental Ethics</td>
</tr>
<tr>
<td>EARTHSS 110</td>
<td>Environmental Controversies</td>
</tr>
<tr>
<td>EARTHSS 178</td>
<td>Solving the Energy-Carbon-Climate Problem</td>
</tr>
<tr>
<td>ECON 13</td>
<td>Global Economy</td>
</tr>
<tr>
<td>ECON 20A-20B</td>
<td>Basic Economics I and Basic Economics II</td>
</tr>
<tr>
<td>LPS 60</td>
<td>The Making of Modern Science</td>
</tr>
<tr>
<td>PP&amp;D 4</td>
<td>Introduction to Urban Studies</td>
</tr>
<tr>
<td>PP&amp;D 134</td>
<td>Human Ecology</td>
</tr>
<tr>
<td>PP&amp;D 139</td>
<td>Water Resource Policy</td>
</tr>
</tbody>
</table>
E. Select two electives each from the following three categories:

1. Any upper-division, 4-unit course in EARTHSS or 190A-B (199/H199 may count only once; the combination of 190A and 190B may be used as one elective requirement); courses may not be used as electives if counted toward degree requirements.

2.

---

1. EARTHSS 140 may overlap with the major requirement in section E1.
2. PHYSICS 20A and PHYSICS 20B may overlap with the major requirement in section E2.
Honors Program in Earth System Science

The Department of Earth System Science awards honors to students who have completed a customized year-long research program in their senior year. ESS honors students engage in advanced research, alongside faculty, research staff, and graduate students within well-equipped laboratories in Earth System Science. The program involves both conducting original research and communicating scientific findings.

The Honors Program in Earth System Science provides an opportunity for selected students majoring in Earth System Science or Environmental Science to pursue research with faculty in the Department during their senior year. Admission to the program is based on an application normally submitted by the sixth week of the spring quarter during the junior year.

To be considered for Departmental Honors, a student must have satisfied the following requirements:

1. Completion of all mathematics, chemistry, and physics requirements for the major;
2. Completion of EARTHSS 51-EARTHSS 53-EARTHSS 55 or EARTHSS 60A-EARTHSS 60B-EARTHSS 60C.
3. Achievement of an overall GPA at UCI of at least 3.3; and

Students must also demonstrate potential for carrying out research of honors quality, as judged by the Earth System Science faculty member who will supervise their research. Application materials are available at the Environmental Science Honors Program (http://ess.uci.edu/undergrad/honors) website.

Once admitted to the program, students will enroll in:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS H199A- H199B- H199C</td>
<td>Honors Research in Earth System Science and Honors Research in Earth System Science</td>
</tr>
<tr>
<td>EARTHSS H198</td>
<td>Honors Thesis in Earth System Science</td>
</tr>
</tbody>
</table>

In the Honors Research series, students will commit 10–15 hours a week to conduct research with an ESS faculty. At the end of each quarter, a written report is required.

In the Honors Thesis course, students will prepare and submit a seminar, poster, and written thesis describing their research. The thesis will be written in the style of a scientific manuscript, with separate abstract, introduction, methods, results and discussion sections. If the thesis is deemed honors quality by the ESS faculty and the student’s final accumulative GPA is above 3.3, the student will graduate with Departmental Honors.

Minor in Earth and Atmospheric Sciences

The science of the Earth as a system has implications for many fields of study. Students interested in understanding how the Earth’s systems work can complete the requirements for a minor in Earth and Atmospheric Sciences. The program is primarily designed for students in the natural sciences and engineering who wish to explore interdisciplinary problems and broaden their studies to include the application of their fields to understanding the Earth system.

NOTE: This minor is not available to students in the Earth System Science (B.S.) or Environmental Science (B.A.) majors.

Requirements for the Minor

Select one of the following series:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 51- 53- 55</td>
<td>Land Interactions and Ocean Biogeochemistry and Earth’s Atmosphere</td>
</tr>
</tbody>
</table>

or

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 60A- 60B- 60C</td>
<td>Fundamental Processes in Earth and Environmental Studies and Local and Regional Environmental Issues and Global Environmental Issues</td>
</tr>
</tbody>
</table>

and select four electives from the approved elective list for the B.S. in Earth System Science major, at least two of which must be Earth System Science courses.

Graduate Program

The Earth, as a coupled system of atmosphere, ocean, land, and cryosphere, has changed in our lifetime. The observed depletion of stratospheric ozone at high latitudes has been attributed directly to industrial use of halocarbons. Global warming is likely to result from increases in the atmospheric concentrations of greenhouse gases, such as carbon dioxide and methane, which are released by the use of fossil fuel and agricultural practices.
These examples illustrate the ability of humans to alter the global environment on the time-scale of decades. Understanding the sensitivity of the Earth’s climate system requires a broad base of scientific knowledge, which includes detection, quantification, and prediction of the rates of change of chemical, physical, and biological variables.

The Department’s doctoral program is aimed at training new research scientists in the field of Earth System Science. The graduate education provides a comprehensive curriculum, along with opportunities to conduct groundbreaking research. The Department’s doctoral-level students are expected to become researchers with a global perspective and broad research skills as well as a high level of expertise in specific areas. Active programs of research are underway in atmospheric chemistry, biogeochemical cycles, and physical climate.

NOTE: Students are admitted to the Ph.D. program only; the master’s degree is awarded upon progress to the Ph.D.

Course Requirements. Students must complete a minimum of 10 approved graduate-level courses, including the core curriculum, with an average grade of B or better. All courses must be approved by the student’s advisor.

Core Curriculum

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EARTHSS 202</td>
<td>Climate Change</td>
</tr>
<tr>
<td>EARTHSS 212</td>

</tr>
</tbody>
</table>

Residency. Academic Senate regulations specify a minimum period of residence of six quarters for Ph.D. candidates. Enrollment in a minimum of 12 units of graduate/upper-division course work per quarter is required. Registration in every regular academic session is necessary until all requirements for the degree have been completed, unless a formal Leave of Absence is granted by the Graduate Division. All Ph.D. requirements must be completed within 15 quarters in residence (five years), excluding summer quarters. Exceptions must be put to a vote of the Earth System Science faculty. The maximum time permitted is seven years.

Comprehensive Examination. Progress toward the degree and readiness to begin research is assessed by a comprehensive examination covering breadth, general knowledge, and the ability to integrate and use information covered in the core curriculum and other course work. At the end of the spring quarter, the ESS Comprehensive Examination Committee administers the written and oral examinations. The oral comprehensive examination is offered after the written examination and provides an opportunity to clarify questions that arise from the student’s performance on the written examination.

Teaching and Seminar. Students are required to complete a teaching assistant training program and to have a minimum of two quarters of experience as a teaching assistant, provided opportunities are available. Students can enroll in EARTHSS 399 while serving as a teaching assistant. Students are also expected to participate in the Earth System Science seminar.

Advance to Ph.D. Candidacy. Following completion of the Comprehensive Examination, those students who receive a recommendation to continue Ph.D. work will pursue research on a potential dissertation topic and then take the Advancement to Candidacy Examination. This oral examination is given by a faculty committee, including extra-departmental faculty. The normative time for advancement for candidacy is two years.

Dissertation. After advancing to candidacy, students are expected to be fully involved in research toward writing their Ph.D. dissertation. Students should keep in steady contact/interaction with their Doctoral Committee. A dissertation based on original research and demonstrating critical judgment, intellectual synthesis, creativity, and clarity in written communication is required for the Ph.D. degree. The dissertation must summarize the results of original research performed by the student under the supervision of a faculty member of the Department. The dissertation will be evaluated by the Dissertation Committee, based on suitability for publication in a peer-reviewed journal of high editorial standards. The dissertation may be a compilation of published papers or manuscripts accepted for publication, so long as the candidate has produced a major proportion of the material independently. The Dissertation Committee approves the format and content, which must meet University requirements for style, format, and appearance.

Doctor of Philosophy in Earth System Science

1. Completion of course work (10 courses, including core courses)
2. Six quarters in residence at UCI
3. Completion of the Comprehensive Examination, with recommendation to continue for the Ph.D.
4. Completion of the teaching and seminar requirements
5. Pass the Advancement to Candidacy Examination
6. Presentation of an open research seminar
7. Submission of an acceptable doctoral dissertation and formal defense.
Master of Science in Earth System Science

1. Completion of course work (8 courses, including core courses)
2. Three quarters in residence at UCI
3. Completion of the Comprehensive Examination.

Faculty

Steven D. Allison, Ph.D. Stanford University, Associate Professor of Ecology and Evolutionary Biology; Earth System Science

Ralph J. Cicerone, Ph.D. University of Illinois at Urbana-Champaign, Professor Emeritus of Earth System Science

Kristen A. Davis, Ph.D. Stanford University, Assistant Professor of Civil and Environmental Engineering; Earth System Science (coastal oceanography, fluid mechanics, turbulent flows)

Steven J. Davis, Ph.D. Stanford University, Assistant Professor of Earth System Science

Ellen R. Druffel, Ph.D. University of California, San Diego, Fred Kavli Chair in Earth System Science and Professor of Earth System Science

Todd Dupont, Ph.D. Pennsylvania State University, Assistant Professor of Earth System Science

James S. Famiglietti, Ph.D. Princeton University, Professor of Earth System Science; Civil and Environmental Engineering

Julie E. Ferguson, Ph.D. Oxford University, Lecturer with Potential Security of Employment of Earth System Science

Michael L. Goulden, Ph.D. Stanford University, Department Vice Chair and Professor of Earth System Science; Ecology and Evolutionary Biology

Claudia I. Green, Ph.D. Max Planck Institute, Assistant Professor of Earth System Science

Kathleen Johnson, Ph.D. University of California, Berkeley, Assistant Professor of Earth System Science

Saewung Kim, Ph.D. Georgia Institute of Technology, Assistant Professor of Earth System Science

Gudrun Magnusdottir, Ph.D. Colorado State University, Department Chair and Professor of Earth System Science

Adam Martiny, Ph.D. Technical University of Denmark, Associate Professor of Earth System Science; Ecology and Evolutionary Biology

Jefferson Moore, Ph.D. Oregon State University, Professor of Earth System Science

Michael J. Prather, Ph.D. Yale University, UCI Endowed Chair and Professor of Earth System Science

Francois W. Primeau, Ph.D. Massachusetts Institute of Technology, Associate Professor of Earth System Science

Michael S. Pritchard, Ph.D. University of California, San Diego, Assistant Professor of Earth System Science

James T. Randerson, Ph.D. Stanford University, UCI Chancellor's Professor of Earth System Science; Ecology and Evolutionary Biology

William S. Reeburgh, Ph.D. Johns Hopkins University, Professor Emeritus of Earth System Science

Eric Rignot, Ph.D. University of Southern California, Department Vice Chair and Professor of Earth System Science

Eric S. Saltzman, Ph.D. University of Miami, Professor of Earth System Science; Chemistry (analytical, atmospheric and environmental)

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, Director of the Center for Hydrometeorology and Remote Sensing and UCI Distinguished Professor of Civil and Environmental Engineering; Earth System Science (hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water sources management)

Susan E. Trumbore, Ph.D. Columbia University, Professor of Earth System Science

Isabella Velicogna, Ph.D. Università degli Studi di Trieste, Associate Professor of Earth System Science

Jasper A. Vrugt, Ph.D. University of Amsterdam, Assistant Professor of Civil and Environmental Engineering; Earth System Science (surface hydrology and soil physics)

Laurel L. Wilkening, Ph.D. University of California, San Diego, Professor Emerita of Earth System Science

Jin Yi Yu, Ph.D. University of Washington, Professor of Earth System Science

Charles S. Zender, Ph.D. University of Colorado Boulder, Professor of Earth System Science; Computer Science
Courses

EARTHSS 1. Introduction to Earth System Science. 4 Units.
Covers the origin and evolution of the Earth, its atmosphere, and oceans, from the perspective of biogeochemical cycles, energy use, and human impacts on the Earth system.

(I, Va)

EARTHSS 3. Oceanography. 4 Units.
Examines circulation of the world oceans and ocean chemistry as it relates to river, hydrothermal vent, and atmospheric inputs. Geological features, the wide variety of biological organisms, and global climate changes, such as greenhouse warming, are also studied.

(I, Va)

EARTHSS 5. The Atmosphere. 4 Units.
The composition and circulation of the atmosphere with a focus on explaining the fundamentals of weather and climate. Topics include solar and terrestrial radiation, clouds, and weather patterns.

(I, Va)

EARTHSS 7. Physical Geology. 4 Units.
Introduction to Earth materials and processes. Topics include rocks and minerals, plate tectonics, volcanoes, earthquakes, Earth surface processes, Earth resources, geologic time, and Earth history. Laboratory work involves hands-on study of geologic materials, maps, and exercises pertaining to geologic processes. Materials fee.

(I, Va)

EARTHSS 11. Climate Change and Policy. 4 Units.
Develops an understanding of the physical basis behind global climate change; examines how human activities cause it, looks to future rates and impacts of global warming, and reviews the international conventions, protocols, and scientific assessments of climate change.

(I)

EARTHSS 13. Global-Change Biology. 4 Units.
Addresses ways in which humans are altering the global environment, with consequences for the ecology of animals, plants, and microbes. Discussion on how these biologically oriented questions relate to human society, politics, and the economy.

Same as BIO SCI 9K.

(I)

EARTHSS 15. Introduction to Global Climate Change. 4 Units.
Introduction of scientific, technological, environmental, economic, and social aspects underlying the threat and understanding of global climate change. Human and natural drivers of climate. Impacts of climate on natural, managed, and human systems, including their vulnerability and ability to adapt.

(II and (VA or VIII) ).

EARTHSS 17. Hurricanes, Tsunamis, and other Catastrophes. 4 Units.
Introduction to the basic science and state of predictability of various natural catastrophic events including earthquakes, volcanic eruptions, tsunamis, landslides, floods, hurricanes, fires, and asteroid impacts and their interactions and implications with human society in the U.S. and globally.

(II and (VA or VIII) ).

EARTHSS 19. Introduction to Modeling the Earth System. 4 Units.
Simulate the Earth's system using computer models. Covers the interaction of the air, land, and ocean, and explores how changes to one part of the environment affect the complete Earth system. Utilizes technological tools to understand scientific principles.

(II, Vb)

EARTHSS 21. On Thin Ice: Climate Change and the Cryosphere. 4 Units.
Introduction of the basic science that governs the cryosphere and its interaction with the climate system. Covers some of the significant economic, sociological, and political consequences of the recent melting of the cryosphere driven by anthropogenic climate change.

(II and (VA or VIII) ).
EARTHSS 23. Air Pollution: From Urban Smog to Global Change . 4 Units.
Air pollution occurs on regional to global scales. A wide range of air pollution sources and physical, chemical, and meteorological sciences behind air pollution are introduced. The consequences of air pollution to our society are also discussed.

(II and (VA or VIII) ).

EARTHSS 51. Land Interactions. 4 Units.
The role of terrestrial processes in the Earth system. Provides an introduction to ecosystem processes that regulate the cycling of energy, water, carbon, and nutrients. Analysis of the impact of human activities.

Prerequisite: CHEM 1C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 53. Ocean Biogeochemistry. 4 Units.
Overview of oceanography for those interested in earth system science. Focus is on physical, chemical, and biological processes that drive biogeochemical cycling in the oceans. Coastal systems also reviewed, with emphasis on California waters.

Prerequisite: CHEM 1C. Prerequisite or corequisite: MATH 2B or AP Calculus BC exam with a minimum score of 4.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 55. Earth's Atmosphere. 4 Units.
Composition, physics, and circulation of Earth's atmosphere with an emphasis on explaining the role of atmospheric processes in shaping the climate system. Topics include: atmospheric composition, the global energy balance, radiative transfer and climate, atmospheric circulation and climate sensitivity.

Corequisite: PHYSICS 3B or PHYSICS 7C.
Prerequisite: MATH 2B or a score of 4 or higher on the AP Calculus BC exam.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 60A. Fundamental Processes in Earth and Environmental Studies. 4 Units.
An introduction to the physical environment, biological systems, and human-environment interactions. Explores physical principles such as fluid transport and reaction rates using environmental examples as well as principles of populations, ecosystems, carrying capacity, and sustainable use of resources.

Corequisite: EARTHSS 1 or UNI STU 13A.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 60B. Local and Regional Environmental Issues. 4 Units.
An introduction to common environmental issues using case studies from Orange County and California. Studies natural hazards as well as human-caused problems with air quality, water quality, coastal pollution, ecosystem degradation, and urban climate.

Prerequisite: EARTHSS 60A and (CHEM 1B or CHEM H2B).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 60C. Global Environmental Issues. 4 Units.
An overview of global environmental changes including climate change, sea level rise, biodiversity loss, land and ocean degradation, and resource depletion. Discusses scientific, cultural, historical, and policy dimensions of these issues as well as possible solutions.

Prerequisite: EARTHSS 60A and (CHEM 1B or CHEM H2B).

EARTHSS H90. The Idiom and Practice of Science. 4 Units.
A series of fundamental and applied scientific problems are addressed, illustrating the pervasive role of mathematical analysis. Topics may include energy utilization, the climate system, the "greenhouse effect," zone depletion and air pollution, ecological consequences of water pollution, nutrient cycles.

Restriction: Campuswide Honors Program students only.

(II, Va)
EARTHSS 101. Paleoclimatology. 4 Units.
Explores past changes in Earth's climate. Topics include tools and techniques used to reconstruct past climate from natural archives; records and mechanisms of past climate changes throughout Earth history; and lessons learned from the paleo-record for prediction of future climate.
Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 110. Environmental Controversies. 4 Units.
Examines the roles and strategies of advocacy groups, scientists, lobbyists, celebrities, pundits, politicians, and other opinion-makers in creating and shaping public opinion on controversial environmental issues. Use and misuse of science to influence public opinion is elicited.
Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or EARTHSS 51 or EARTHSS 53 or EARTHSS 55.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 112. Global Climate Change and Impacts. 4 Units.
Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.
Prerequisite: (EARTHSS 51 and EARTHSS 53 and EARTHSS 55) or (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 222.

EARTHSS 114. Earth System Science Laboratory and Field Methods. 4 Units.
Introduction to methods used to measure exchange of gases and energy between the atmosphere and terrestrial ecosystems. Laboratories include data acquisition and isotopic and chromatographic analysis. Field measurements at UCI's Marsh Reserve include microclimate, hydrology, trace-gas exchange, and plant growth.
Prerequisite: EARTHSS 51 or EARTHSS 60A.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 116. Data Analysis for Earth Sciences. 4 Units.
Analysis and interpretation of geophysical data, including functional fitting, probability density functions, and multidimensional time-series methods, with applications in atmospheric, oceanic, and biogeochemical sciences.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 118. Advanced Data Analysis and Modeling. 4 Units.
Covers advanced data analysis and modeling techniques for applications within Earth system science. These applications will come from variety of Earth science problems. Students will gain programming proficiency by implementing computational methods in MATLAB.
Prerequisite: EARTHSS 116 and (MATH 2B or AP Calculus BC exam with a minimum score of 4).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 122. Atmospheric Dynamics. 4 Units.
Fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean. Most important are interactions between the density stratification and the Coriolis force associated with Earth's rotation. Topics include circulation, vorticity, planetary waves and their role in climate.
Prerequisite: EARTHSS 55 and MATH 2D and PHYSICS 7C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 124. Weather Analysis. 4 Units.
Provides an overview of weather systems in midlatitudes and tropics. The fundamental dynamics possible for these weather systems are described. Elementary weather analysis and forecasting techniques are introduced.
Prerequisite: EARTHSS 55 or EARTHSS 60A.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.
EARTHSS 130. Physical Oceanography. 4 Units.
Physical processes that determine the distribution of water properties such as salt and temperature. Fluid-dynamical underpinnings of physical oceanography. Wave motions. The wind-driven and thermohaline circulation. Similarities and differences between ocean and atmosphere dynamics.
Prerequisite: MATH 2D and PHYSICS 7C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 132. Terrestrial Hydrology. 4 Units.
Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.
Prerequisite: EARTHSS 60A or EARTHSS 51.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 134. Fundamentals of GIS for Environmental Sciences. 4 Units.
Introduction to Geographic Information Systems (GIS). Topics include fundamentals of cartography, creating/editing GIS data, linking spatial and tabular data, georeferencing, map projections, geospatial analysis, spatial statistics and the development of GIS models. Examples from hydrology, ecology, and geology.
Prerequisite: EARTHSS 60A or EARTHSS 60C or EARTHSS 51 or EARTHSS 53.
Overlaps with CRM/LAW C148.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 138. Satellite Remote Sensing for Earth System Science. 4 Units.
Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.
Prerequisite: EARTHSS 51 or EARTHSS 53 or EARTHSS 60A or EARTHSS 60C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 140. Advanced Geology. 4 Units.
Introduces students to the geological processes which have formed and continue to shape the Earth. Topics will include geological time, minerals and the rock cycle, plate tectonics and associated geological hazards, earth resources, and earth surface processes.
Prerequisite: EARTHSS 51 or EARTHSS 60A.
Overlaps with EARTHSS 7.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 142. Atmospheric Chemistry. 4 Units.
Chemistry of the troposphere and stratosphere. Topics include: processes controlling the lifetime and reaction pathways of chemicals in the atmosphere, the role of the atmosphere in biogeochemical cycles, and interactions between atmospheric chemistry and the physical climate system.
Prerequisite: (CHEM 1C or CHEM H2C) and (MATH 2B or AP Calculus BC exam with a minimum score of 4).
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 144. Marine Geochemistry and Biogeochemistry. 4 Units.
Processes controlling the major and minor element composition of seawater and element distributions in the ocean. Gas exchange, carbon dioxide system, stable isotopes, radionuclides as tracers and chronometers, particle fluxes, organic geochemistry, sediment geochemistry, global cycles of biogeochemically important elements.
Prerequisite: (EARTHSS 53 or EARTHSS 60A) and EARTHSS 60C.
Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.
EARTHSS 146. Consequences of Air Pollution. 4 Units.
From public health to the global climate system this course will explore the impacts of air pollution from the beginning of human history to current and emerging issues. Scientific concepts behind air pollution and solutions will be discussed.

Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 148. Marine Ecosystems and Global Change. 4 Units.
Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 53 or (EARTHSS 60A and EARTHSS 60C).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 248.

EARTHSS 150. Laboratory Methods in Earth Systems Science. 4 Units.
Introduction to analytical methods used in Earth science research. Lectures cover theory and applications of each method. Laboratories cover sample preparation, experimental design, standardization and calibration, operation of analytical instruments (mass spectrometers, gas chromatographs, and spectrophotometers), and analysis of data.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 250.

EARTHSS 164. Ecosystem Ecology. 4 Units.
A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C.

Same as BIO SCI E118.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

EARTHSS 168. Physiological Plant Ecology. 4 Units.
An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: (EARTHSS 51) or (EARTHSS 60A and EARTHSS 60C) or (BIO SCI E106).

Same as BIO SCI E127.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 170. Environmental Microbiology. 4 Units.
Establishes a fundamental understanding of microbes living in the environment, including their distribution, diversity, and biochemistry, and discusses how they attribute to global biogeochemical cycles.

Prerequisite: (EARTHSS 53) or (EARTHSS 60A and EARTHSS 60C) or (BIO SCI E106 and BIO SCI M122).

Same as BIO SCI E163.

Concurrent with EARTHSS 270.
EARTHSS 172. Science Communication and Outreach. 2 Units.
Students learn and practice effective science communication skills useful in public and educational outreach. Topics include research explication, language scaffolding, educational psychology, oral presentation techniques, K-12 science standards, and effective writing styles for op-eds, blogs, and Web sites.

Prerequisite: EARTHSS 51 or EARTHSS 60A.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 272.

EARTHSS 174. Ice in the Climate System. 4 Units.
Examines the major components of the Earth's cryosphere. Characteristics, volume, extent, remote sensing observations, long-term trends, mass balance, key physical processes, relevance and importance to the climate system, responses and feedbacks, future evolution, and key uncertainties will be discussed.

Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 274.

EARTHSS 178. Solving the Energy-Carbon-Climate Problem. 4 Units.
Why is climate change such a difficult problem? What can we do about it? The course will introduce the global politics of energy and climate, assess options for decreasing energy demand, generating low-carbon energy, sequestering carbon, geoengineering, and adaptation.

Prerequisite: (EARTHSS 60A and EARTHSS 60B and EARTHSS 60C) or (EARTHSS 51 and EARTHSS 53 and EARTHSS 55).

Restriction: Earth System Science majors and Environmental Science majors have first consideration for enrollment.

EARTHSS 180. Environmental Sustainability I. 4 Units.
Provides an introduction to sustainability from different points of view: historical, scientific, political, ethical, and economic.

Same as PP&D 131.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

EARTHSS 182. Environmental Sustainability II. 4 Units.
Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.

Same as PP&D 132.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.

EARTHSS 190A. Senior Seminar on Global Sustainability I. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Prerequisite: BIO SCI 65 and ENVIRON E20 and EARTHSS 10.

Grading Option: In progress only.

Same as BIO SCI 191A, SOCECOL 186A.

Restriction: Seniors only.
EARTHSS 190B. Senior Seminar on Global Sustainability II. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare research proposal.
Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A.
Grading Option: In progress only.
Same as BIO SCI 191B, SOCECOL 186B.
Restriction: Seniors only.

EARTHSS 190CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.
Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.
Same as BIO SCI 191CW, SOCECOL 186CW.
Restriction: Seniors only.

EARTHSS 191. Title Introduction to Research in Earth System Science. 1 Unit.
Weekly presentations by Earth System Science faculty describing ongoing research in their laboratories. The goals are to introduce students to the range of research topics and methods in Earth System Science and to the research opportunities available within the Department.
Grading Option: Pass/no pass only.
Restriction: Upper-division students only. Earth System Science and Environmental Science majors have first consideration for enrollment. Earth and Atmospheric Sciences minors have first consideration for enrollment.

EARTHSS 192. Careers in Earth System Science. 1 Unit.
A weekly seminar course designed to help students transition to post-graduation career paths. Topics include designing effective resumes, applying to graduate school, and seeking employment. Also includes presentations by faculty, business, and government leaders describing potential environmental science career trajectories.
Grading Option: Pass/no pass only.
Restriction: Seniors only. Earth System Science and Environmental Science majors have first consideration for enrollment.

EARTHSS 197. Independent Study in Earth System Science. 1-4 Units.
Field study, educational outreach, or other independent projects under faculty direction. Interested students should arrange with an ESS faculty member to supervise and support an independent study project. A written summary is required at the end of each quarter.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 12 units.

EARTHSS 198W. Senior Thesis in Earth System Science. 4 Units.
Students receive guidance on the effective oral and written communication of research results. Students prepare and present a seminar, a poster, and a written thesis describing their research in Earth System Science.
Prerequisite: Two quarters of EARTHSS 199. Satisfactory completion of the Lower-Division Writing requirement.
Overlaps with EARTHSS H198.

(Ib)
EARTHSS H198. Honors Thesis in Earth System Science. 4 Units.
Students receive guidance on effective written and oral communication of research results. Students prepare and present a seminar, poster, and written thesis describing their honors research in Earth System Science. Submission of the thesis and successful completion of this course will also satisfy the UCI upper-division writing requirement.

Prerequisite: EARTHSS 199A and EARTHSS 199B
Restriction: Consent of instructor to enroll and Prerequisite required

EARTHSS 199. Undergraduate Research. 1-4 Units.
For junior and senior undergraduates, preferably with majors in science or engineering. Interested students should arrange with an ESS faculty member to supervise and support a research project. A written summary is required at the end of each quarter.

Repeatability: May be taken for credit for 12 units.
Restriction: Juniors and Seniors only.

EARTHSS H199A. Honors Research in Earth System Science. 4 Units.
Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors Program students only. Earth System Science majors only. Campuswide Honors Program students only.

EARTHSS H199B. Honors Research in Earth System Science. 4 Units.
Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors Program students only. Earth System Science majors only. Campuswide Honors Program students only.

EARTHSS H199C. Honors Research in Earth System Science. 4 Units.
Undergraduate honors research in Earth System Science. A student commitment of 10-15 hours a week is expected, and a written report is required at the end of the quarter.

Restriction: Earth System Science Honors Program students only. Earth System Science majors only. Campuswide Honors Program students only.

EARTHSS 200. Global Physical Climatology. 4 Units.
A descriptive overview of Earth’s climate system and energy budget. Large-scale circulations, key physical processes, and climate sensitivity of the atmosphere, ocean, land surface, and cryosphere.

Restriction: Graduate students only.

EARTHSS 202. Climate Change. 4 Units.
Explores past, present, and projected changes in Earth’s climate. Topics include paleoclimate records and mechanisms of natural climate variability at a range of timescales (orbital to seasonal); General Circulation Models; and IPCC observations and projections of future climate change.

Restriction: Graduate students only.

EARTHSS 212. Geoscience Modeling and Data Analysis. 4 Units.
Computer-based course. Fundamental statistical techniques needed to analyze Earth system data and models. Basic numerical techniques to solve Earth system models. Focuses on linear and non-linear ordinary differential equations, as well as simple partial differential equations.

Restriction: Graduate students only.

EARTHSS 222. Global Climate Change and Impacts. 4 Units.
Observations over the 20th century show extensive changes in atmospheric composition, climate and weather, and biological systems that have paralleled industrial growth. Evidence of globally driven changes in these biogeochemical systems is studied, including projected impacts over the 21st century.

Concurrent with EARTHSS 112.

EARTHSS 224. Ocean Processes. 4 Units.
Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.
EARTHSS 226. Land Surface Processes. 4 Units.
Introduction to the physics, chemistry, and biology of the oceans. Offers a mechanistic perspective of the structure and functioning of marine ecosystems, nutrient cycles, and role of ecosystem dynamics in local and global biogeochemistry.

Restriction: Graduate students only.

EARTHSS 228. Geophysical Fluid Dynamics. 4 Units.
Introduces fluid dynamical processes that determine the large-scale flow of the atmosphere and ocean, with particular emphasis on the interactions between the stable density stratification and the Coriolis force associated with Earth's rotation.

Restriction: Graduate students only.

EARTHSS 232. Terrestrial Hydrology. 4 Units.
Comprehensive treatment of modern conceptual and methodological approaches to hydrological science. Combines qualitative understanding of hydrological processes with quantitative representation, approaches to measurement, and treatment of uncertainty. Components of the hydrological cycle and their linkages within the coupled Earth system.

Prerequisite: EARTHSS 60A or EARTHSS 51.

Concurrent with EARTHSS 132

EARTHSS 236. Radiative Processes and Remote Sensing. 4 Units.
Solar and terrestrial radiation and Earth system interaction. Radiative transfer theory. Principles, applications of remote sensing of environment. Planck's law, radiative transfer equation, radiative properties of trace gasses and aerosols, remote sensing techniques, global trends in radiative forcing.

Prerequisite: MATH 2D and PHYSICS 7D.

EARTHSS 238. Satellite Remote Sensing for Earth System Science. 4 Units.
Satellite remote sensing data are increasingly used to study the Earth system. Provides an overview of the principles behind remote sensing, and the types of satellite data available for study of the oceans, land, and atmosphere.

Concurrent with EARTHSS 138.

EARTHSS 240. Atmospheric Chemistry and Physics. 4 Units.
Examines the physical/chemical processes which determine the structure and composition of Earth's atmosphere and its role in the climate system.

Restriction: Graduate students only.

EARTHSS 248. Marine Ecosystems and Global Change. 4 Units.
Presents an overview of marine ecosystem structure, diversity, and processes in the context of global change, including the impacts of climate warming, ocean acidification, marine fisheries, and anthropogenic additions of nutrients and pollutants.

Prerequisite: EARTHSS 224.

Restriction: Graduate students only.

Concurrent with EARTHSS 148.

EARTHSS 250. Laboratory Methods in Earth System Science. 4 Units.
Introduction to analytical methods used in Earth science research. Lectures cover theory and applications of each method. Laboratories cover sample preparation, experimental design, standardization and calibration, operation of analytical instruments (mass spectrometers, gas chromatographs, and spectrophotometers), and analysis of data.

Concurrent with EARTHSS 150.

EARTHSS 264. Ecosystem Ecology . 4 Units.
A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C.

Concurrent with EARTHSS 164 and BIO SCI E118.
EARTHSS 266. Global Biogeochemical Cycles. 4 Units.
Global biogeochemical cycling of the elements. Topics include global cycling of carbon, nitrogen, oxygen, and sulfur; impact of human activities on biogeochemical processes.

Restriction: Graduate students only.

EARTHSS 270. Environmental Microbiology. 4 Units.
Establishes a fundamental understanding of microbes living in the environment, including their distribution, diversity, and biochemistry, and discusses how they attribute to global biogeochemical cycles.

Prerequisite: (EARTHSS 53 or EARTHSS 60A) and (EARTHSS 60C or BIO SCI E106).

Concurrent with EARTHSS 170 and BIO SCI E163.

EARTHSS 272. Science Communication and Outreach. 2 Units.
Students learn and practice effective science communication skills useful in public and educational outreach. Topics include research explication, language scaffolding, educational psychology, oral presentation techniques, K-12 science standards, and effective writing styles for op-eds, blogs, and Web sites.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

Concurrent with EARTHSS 172.

EARTHSS 274. Ice in the Climate System. 4 Units.
Examines the major components of the Earth’s cryosphere. Characteristics, volume, extent, remote sensing observations, long-term trends, mass balance, key physical processes, relevance and importance to the climate system, responses and feedbacks, future evolution, and key uncertainties will be discussed.

Concurrent with EARTHSS 174.

EARTHSS 280A. Special Topics in Earth System Science. 1-4 Units.
Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

EARTHSS 280B. Special Topics in Earth System Science. 1-4 Units.
Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280A.

Repeatability: Unlimited as topics vary.

EARTHSS 280C. Special Topics in Earth System Science. 1-4 Units.
Each quarter is devoted to current topics in the field of Earth System Science. Topics addressed vary each quarter.

Prerequisite: EARTHSS 280B.

Repeatability: Unlimited as topics vary.

EARTHSS 282A. Special Topics in Climate. 1-4 Units.
Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 282B. Special Topics in Climate. 1-4 Units.
Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
EARTHSS 282C. Special Topics in Climate. 1-4 Units.
Each quarter is devoted to in-depth analysis of an important and rapidly developing area in the field of climate dynamics. Topics addressed vary each quarter.

Prerequisite: EARTHSS 282B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 284A. Special Topics in Atmospheric Chemistry. 1-4 Units.
Each quarter is devoted to current topics in the field of Atmospheric Chemistry. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

EARTHSS 284B. Special Topics in Atmospheric Chemistry. 1-4 Units.
Each quarter is devoted to current topics in the field of Atmospheric Chemistry. Topics addressed vary each quarter.

Prerequisite: EARTHSS 284A.

Repeatability: Unlimited as topics vary.

EARTHSS 284C. Special Topics in Atmospheric Chemistry. 1-4 Units.
Each quarter is devoted to current topics in the field of Atmospheric Chemistry. Topics addressed vary each quarter.

Prerequisite: EARTHSS 284B.

Repeatability: Unlimited as topics vary.

EARTHSS 286A. Special Topics in Biogeochemistry. 1-4 Units.
Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 286B. Special Topics in Biogeochemistry. 1-4 Units.
Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 286C. Special Topics in Biogeochemistry. 1-4 Units.
Each quarter is devoted to in-depth analysis of a subarea in biogeochemistry which is undergoing rapid development. Topics addressed vary each quarter.

Prerequisite: EARTHSS 286B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

EARTHSS 288A. Special Topics in Ecosystems. 1-4 Units.
Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

EARTHSS 288B. Special Topics in Ecosystems. 1-4 Units.
Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.

Prerequisite: EARTHSS 288A.

Repeatability: Unlimited as topics vary.
EARTHSS 288C. Special Topics in Ecosystems. 1-4 Units.
Each quarter is devoted to current topics relating to Ecosystems. Topics addressed vary each quarter.

Prerequisite: EARTHSS 288B.
Repeatability: Unlimited as topics vary.

EARTHSS 290. Seminar. 1 Unit.
Weekly seminars and discussions on topics of general and current interest in Earth System Science. Topics addressed vary each quarter.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

EARTHSS 291. Research Seminar. 1-4 Units.
Detailed discussions of ongoing research in earth system science. Format, content, and frequency of the course are variable.
Repeatability: May be repeated for credit unlimited times.

EARTHSS 298. Practicum in Earth System Science. 4 Units.
Designed to introduce first-year graduate students to research. Students explore research opportunities and develop a proposal for a summer research project under the direction of a faculty mentor.
Restriction: Graduate students only.

EARTHSS 299. Research. 2-12 Units.
Supervised original research in areas of Earth System Science.
Repeatability: May be repeated for credit unlimited times.

EARTHSS 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Department of Mathematics
340 Rowland Hall; 949-824-5503
http://www.math.uci.edu/
Karl Rubin, Department Chair

The Department of Mathematics is engaged in teaching and in fundamental research in a wide variety of basic mathematical disciplines, and offers undergraduate and graduate students the opportunity to fashion a thorough program of study leading to professional competence in mathematical research or in an area of application.

The curriculum in mathematics includes opportunities for supervised individual study and research and is augmented by seminars and colloquia. It is designed to be compatible with curricular structures at other collegiate institutions in California in order to enable students transferring to UCI to continue their programs of mathematics study.

Undergraduate Program
The Department offers a B.S. degree in Mathematics. Within this program there are six tracks; besides the standard track, there are five specializations or concentrations (in Mathematical Biology, Mathematical Finance, Applied and Computational Mathematics, Mathematics for Education, and Mathematics for Education/Secondary Teaching Certification). In addition, the Department offers minors in Mathematics and Mathematics for Biology.

Undergraduate mathematics courses are of several kinds: courses preparatory to advanced work in mathematics, the exact sciences, and engineering; courses for students of the social and biological sciences; and courses for liberal arts students and those planning to enter the teaching field.

Admission to the Major
Students may be admitted to the Mathematics major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change
of Major Criteria (http://www.changeofmajor.uci.edu) website. For transfer student admission, preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the required course work of one year of approved calculus. Additional course work in multivariable calculus, linear algebra, and differential equations is strongly recommended.

## Requirements for the B.S. Degree in Mathematics

All students must meet the University Requirements (p. 71).

**School Requirements:** None.

### Core Requirements for all Mathematics Majors

#### Lower-Division Requirements:

<table>
<thead>
<tr>
<th>Requirement</th>

#### Upper-Division Requirements:

**A. Complete:**

- MATH 120A: Introduction to Abstract Algebra: Groups
- MATH 121A: Linear Algebra
- MATH 130A: Probability and Stochastic Processes
- MATH 140A-140B: Elementary Analysis and Elementary Analysis

### Requirements for the Pure Mathematics Major

Core requirements for all Mathematics majors plus:

#### Lower-Division Requirements:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Course Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Complete</td>
<td>MATH 2E</td>
</tr>
</tbody>
</table>

#### Upper-Division Requirements:

**A. Complete:**

- MATH 120B: Introduction to Abstract Algebra: Rings and Fields
- MATH 121B: Linear Algebra
- MATH 147: Complex Analysis

B. Five additional four-unit MATH lecture courses numbered 100–189.
The Department offers two concentrations and three specializations. Note that all require the completion of an application and an interview with the faculty advisor for that concentration or specialization. Students must complete the basic "Core" requirements for the B.S. in Mathematics along with the lower- and upper-division requirements specified for each concentration and specialization.

Requirements for Mathematics Major with a Concentration in Mathematical Finance

Admission to this concentration requires approval in advance by the Mathematics Department. The admissions process begins with completing a form at the Department office and includes an interview with the Department's advisor for the concentration. This approval should be applied for after the student has completed ECON 20A-ECON 20B, but no later than the end of the junior year.

Core requirements for all Mathematics majors plus:

Lower-Division Requirements:
A. Complete:
MATH 2E Multivariable Calculus

Upper-Division Requirements:
A. Complete:
MATH 130B Probability and Stochastic Processes
MATH 133A Statistical Methods with Applications to Finance
MATH 176 Mathematics of Finance
B. Select three elective lecture courses from the following:
- MATH 105A-105B Numerical Analysis and Numerical Analysis (plus MATH 105LA-105LB)
- MATH 107 Numerical Differential Equations (plus MATH 107L)
- MATH 112A-112B-112C Introduction to Partial Differential Equations and Applications and Introduction to Partial Differential Equations and Applications and Introduction to Partial Differential Equations and Applications
- MATH 115 Mathematical Modeling
- MATH 117 Dynamical Systems
- MATH 118 The Theory of Differential Equations
- MATH 119 Boundary Value Problems
- MATH 121B Linear Algebra
- MATH 130C Probability and Stochastic Processes
- MATH 133B Statistical Methods with Applications to Finance
- MATH 140C Analysis in Several Variables
C. Complete the following eight required Economics courses:
- ECON 20A-20B Basic Economics I and Basic Economics II
- ECON 122A Applied Econometrics I
- or ECON 123A Econometrics I
- ECON 132A Introduction to Financial Investments
- ECON 134A Corporate Finance

Requirements for Mathematics Major with a Specialization in Applied and Computational Mathematics

Admission to this specialization requires approval in advance by the Mathematics Department. The admissions process begins with completing a form at the Department office, and includes an interview with the Department's advisor for the specialization. This approval should be applied for no later than the end of the junior year.

Core requirements for all Mathematics majors plus:

Lower-Division Requirements:
A. Complete:
MATH 2E Multivariable Calculus

Upper-Division Requirements:
A. Six required lecture courses:
MATH 105A-105B  Numerical Analysis
and Numerical Analysis (plus MATH 105LA-LB)
MATH 112A-112B  Introduction to Partial Differential Equations and Applications
and Introduction to Partial Differential Equations and Applications
MATH 115  Mathematical Modeling
MATH 121B  Linear Algebra

B. Select three additional Mathematics courses from the following:
MATH 107  Numerical Differential Equations (plus MATH 107L)
MATH 112C  Introduction to Partial Differential Equations and Applications
MATH 117  Dynamical Systems
MATH 118  The Theory of Differential Equations
MATH 130B-130C  Probability and Stochastic Processes
and Probability and Stochastic Processes
MATH 133A-133B  Statistical Methods with Applications to Finance
and Statistical Methods with Applications to Finance
MATH 140C  Analysis in Several Variables
MATH 176  Mathematics of Finance

C. Two approved upper-division courses in an area of application outside of Mathematics. Approval must be obtained in advance from the advisor for this specialization. The student is responsible for satisfying any prerequisites for these courses.

Requirements for Mathematics Major with a Specialization in Mathematical Biology
Admission to this specialization requires approval in advance by the Mathematics Department. The admissions process begins with completing a form at the Department Office, and includes an interview with the Department's advisor for the specialization. This approval should be applied for no later than the end of the junior year.

Core requirements for all Mathematics majors plus:

Lower-Division Requirements:
A. Complete:
MATH 2E  Multivariable Calculus
B. Replace item C in the Core Requirements with the following:
BIO SCI 93  From DNA to Organisms
BIO SCI 94  From Organisms to Ecosystems
and two courses selected from the following:
BIO SCI 97  Genetics
CHEM 1A  General Chemistry
CHEM 1B  General Chemistry
PHYSICS 2  Introduction to Mathematical Methods for Physics
PHYSICS 7C  Classical Physics
PHYSICS 7D  Classical Physics

Upper-Division Requirements:
A. Complete the following seven required upper-division lecture courses:
MATH 105A-105B  Numerical Analysis
and Numerical Analysis (plus MATH 105LA-LB)
MATH 112A-112B  Introduction to Partial Differential Equations and Applications
and Introduction to Partial Differential Equations and Applications
MATH 113A-113B  Mathematical Modeling in Biology
and Mathematical Modeling in Biology
MATH 113C  or MATH 115  Mathematical Modeling in Biology
B. Two additional elective courses, at least one from MATH courses numbered 100–189. The second elective may be either an upper-division MATH course or a four-unit upper-division Biological Sciences course with the advanced approval by the advisor for this specialization.
Requirements for Mathematics Major with a Specialization in Mathematics for Education

Admission to this specialization requires approval in advance by the Mathematics Department. The admission process begins with completing a form at the Department office, and includes an interview with the Department’s advisor for the specialization. This approval should be applied for no later than the end of the junior year.

This specialization is designed to help prepare students for teaching mathematics. Students wishing to go on and teach at the intermediate and high school levels should also consult with an academic advisor in the School of Education. A Commission on Teacher Credentialing (CTC)-approved subject-matter program (SMP) in Mathematics can be easily satisfied in tandem with this specialization, and enables students to waive a subject matter exam for teachers. Specific SMP requirements and enrollment procedures are available from the School of Education. Students interested in teaching at the high school level are encouraged to complete the course PHY SCI 106 in addition to the requirements listed below.

Core requirements for all Mathematics majors plus:

Lower-Division Requirements:
A. Complete:
MATH 8 Explorations in Functions and Modeling

Upper-Division Requirements:
A. Complete:
MATH 105A-105LA Numerical Analysis and Numerical Analysis Laboratory
MATH 120B Introduction to Abstract Algebra: Rings and Fields
MATH 130B Probability and Stochastic Processes
MATH 150 Introduction to Abstract Algebra: Rings and Fields
MATH 161 Modern Geometry
MATH 180A Number Theory
MATH 184-184L History of Mathematics and History of Mathematics Lesson Lab

Plus one additional four-unit MATH course numbered 100–189.

B. Complete:
EDUC 172B Teaching and Learning Secondary Mathematics
PHY SCI 5 California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105 California Teach 2: Middle School Science and Mathematics Teaching

Requirements for Mathematics Major with a Concentration in Mathematics for Education/Secondary Teaching Certification

Admission to this concentration requires approval in advance. The admission process begins with completing an Intent form at the Cal Teach Resource and Advising Center.

Following completion of the Intent form, students must complete an application in the Mathematics Department office and an interview with the Department’s advisor for the concentration. These approvals should be applied for no later than the end of the sophomore year.

This concentration allows students pursuing the B.S. in Mathematics to earn a bachelor’s degree and complete the required course work and field experience for a California Preliminary Single Subject Teaching Credential at the same time. With careful, early planning, it is possible for students to complete both in four years. For additional information about teacher certification requirements and enrollment procedures, see Preparation for Teaching Science and Mathematics (p. 1220) or contact the Cal Teach Resource and Advising Center. A Commission on Teacher Credentialing (CTC)-approved subject-matter program (SMP) in Mathematics can be satisfied in tandem with this concentration, and enables students to waive a subject matter exam for teachers. Specific SMP requirements and enrollment procedures are available from the Cal Teach Resource and Advising Center or the School of Education. Students interested in teaching at the high school level are encouraged to complete the course PHY SCI 106 in addition to the requirements listed below.

Core requirements for all Mathematics majors plus:

Lower-Division Requirements:
A. Complete:
MATH 8 Explorations in Functions and Modeling

Upper-Division Requirements:
A. Complete:
MATH 105A-105LA Numerical Analysis and Numerical Analysis Laboratory
MATH 120B Introduction to Abstract Algebra: Rings and Fields

</tbody>
</table>

**NOTE:** Students may pursue either the concentration in Mathematics for Education/Secondary Teaching Certification or the specialization in Mathematics for Education, but not both.

### Honors Program in Mathematics

The Honors Program in Mathematics is designed for students contemplating graduate work in mathematics. The program is open to junior and senior Mathematics majors who meet the minimum academic qualifications of a 3.5 GPA in Mathematics courses and a 3.2 GPA overall. It is highly recommended that students meet with the Honor’s advisor by the beginning of their junior year to begin planning courses. Students should officially apply for the Honors Program no later than the fall quarter of their senior year. Recognition for completing the program is conferred upon graduation.

In addition to completing the requirements for the major in Mathematics (in any one of its tracks), participants must meet the following requirements:

**A. Select one of the following series:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 205A-205B-205C</td>
<td>Introduction to Graduate Analysis and Introduction to Graduate Analysis</td>
</tr>
<tr>
<td>or MATH 206A-206B-206C</td>
<td>Introduction to Graduate Algebra and Introduction to Graduate Algebra</td>
</tr>
</tbody>
</table>

**B. Complete the Honors Seminar, MATH H195A-B, or two quarters of MATH 199. One quarter of MATH 199 may be replaced by other research experience with the approval of the Honor’s Program advisor.**

In order to prepare for independent study/independent research, it is highly recommended that students take at least one course sequence in the field they are interested in studying. The following list contains the major mathematical disciplines and the course work suggested for completion prior to doing independent study in that field:

- Applied Mathematics: MATH 117 and MATH 118
- Algebra: MATH 120A-MATH 120B-MATH 120C
- Probability and Statistics: MATH 130A-MATH 130B-MATH 130C
- Analysis: MATH 140A-MATH 140B-MATH 140C
- Logic: MATH 150 and MATH 151
- Geometry: MATH 162A-MATH 162B
- Number Theory: MATH 180A-MATH 180B

**NOTE:** These requirements are in addition to the math major requirements or requirements for any specialization/concentration. However, Math 206A-B-C in item A may be used to satisfy upper-division electives or taken in place of MATH 120A-B-C and 121A-B, and MATH 205A-B-C may be used to satisfy upper-division electives or taken in place of MATH 140A-B-C requirements as described in the major.
If all requirements are completed and the student’s work and final GPA satisfies the program restrictions, the student will graduate with Honors in Mathematics, and this distinction is noted on the transcript.

**Requirements for the Minor in Mathematics**

A. Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 13</td>
<td>Introduction to Abstract Mathematics</td>
</tr>
<tr>
<td>MATH 120A</td>
<td>Introduction to Abstract Algebra: Groups</td>
</tr>
<tr>
<td>or MATH 140A</td>
<td>Elementary Analysis</td>
</tr>
</tbody>
</table>

B. Select five additional four-unit courses in MATH (plus the associated lab, where applicable) numbered 77–189.

NOTE: Nearly all upper-division courses in Mathematics have MATH 2A-MATH 2B as prerequisites, and many courses have additional prerequisites such as MATH 2D, MATH 2E, MATH 3A, and/or MATH 3D. Only one course from MATH 77A-MATH 77B-MATH 77C-MATH 77D (same as I&C SCI 77A-I&C SCI 77B-I&C SCI 77C-I&C SCI 77D) can be used toward the minor.

**Requirements for the Minor in Mathematics for Biology**

A. Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 13</td>
<td>Introduction to Abstract Mathematics</td>
</tr>
<tr>
<td>MATH 113A-113B-113C</td>
<td>Mathematical Modeling in Biology and Mathematical Modeling in Biology</td>
</tr>
</tbody>
</table>

B. Select two of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 105A</td>
<td>Numerical Analysis (plus MATH 105A)</td>
</tr>
<tr>
<td>MATH 112A</td>
<td>Introduction to Partial Differential Equations and Applications</td>
</tr>
<tr>
<td>MATH 117</td>
<td>Dynamical Systems</td>
</tr>
<tr>
<td>MATH 118</td>
<td>The Theory of Differential Equations</td>
</tr>
<tr>
<td>MATH 119</td>
<td>Boundary Value Problems</td>
</tr>
<tr>
<td>MATH 121A</td>
<td>Linear Algebra</td>
</tr>
<tr>
<td>MATH 140A</td>
<td>Elementary Analysis</td>
</tr>
</tbody>
</table>

C. One additional four-unit upper-division lecture course in MATH numbered 100–189.

NOTE: Nearly all upper-division courses in Mathematics have MATH 2A-MATH 2B as prerequisites, and many courses have additional prerequisites such as MATH 2D, MATH 2E, MATH 3A, and/or MATH 3D.

**Planning a Program of Study**

For all Mathematics majors, or prospective majors, assistance in planning a program of study is available from the Mathematics Department Undergraduate Advisor and the advisors for the various tracks, as well as from the academic counselors for the School of Physical Sciences. The application process for the specializations and concentrations requires students to plan a program of study with the assistance of a faculty advisor. The following sample programs are only examples.

Those in the specialization for Education should note that MATH 184 may not be offered more than once every other year and thus should be taken when offered.

**Sample Program — Pure Mathematics**

Sample Program – Concentration in Mathematics for Education/Secondary Teaching Certification

**Freshman**
- **Fall**: MATH 2A, PHYSICS 2, PHY SCI 5, Gen. Ed.
- **Winter**: MATH 2B, PHYSICS 7C-7LC, PHY SCI 13, Gen. Ed.
- **Spring**: MATH 2C, MATH 13, CHEM 193, Gen. Ed.

**Sophomore**
- **Fall**: MATH 3A, PHY SCI 105, Gen. Ed.
- **Winter**: MATH 3B, MATH 120A, CHEM 193, Gen. Ed.
- **Spring**: MATH 3C, MATH 120B, Math. Elective

**Junior**
- **Fall**: MATH 130A, MATH 140A, EDUC 55
- **Winter**: MATH 130B, MATH 120A, EDUC 140B
- **Spring**: MATH 130C, MATH 120B, EDUC 143AW

**Senior**
- **Fall**: MATH 105A-105LA, MATH 150, Gen. Ed.
- **Winter**: EDUC 109, EDUC 158
- **Spring**: EDUC 158AW, Gen. Ed.

**Graduate Program**

Graduate courses are designed to meet the needs of students doing graduate work in mathematics and in those disciplines that require graduate-level mathematics for their study. Among the fields covered are analysis, algebra, applied and computational mathematics, mathematical biology, geometry and topology, probability, ordinary and partial differential equations, and mathematical logic.

In addition to formal courses, there are seminars for advanced study toward the Ph.D. in various fields of mathematics. Topics will vary from year to year. Each seminar is conducted by a faculty member specializing in the subject studied. Enrollment will be subject to the approval of the instructor in charge.

**Master of Science in Mathematics**

To earn the Master of Science degree, the student must satisfy course and residency requirements, and achieve two passes at the M.S. level among three exams in Real Analysis, Complex Analysis, and Algebra prior to the beginning of the second year.

The total number of required courses for the M.S. degree is 12, completed with satisfactory performance, that is, with a grade of B or better. Students are required to complete at least one series of the following courses:

**A Series**
- MATH 210A-210B-210C

**B Series**
- Real Analysis
- and Real Analysis
- and Real Analysis

or
MATH 220A- 220B- 220C  Analytic Function Theory and Analytic Function Theory and Analytic Function Theory

or

MATH 230A- 230B- 230C  Algebra and Algebra and Algebra

At most one undergraduate course may count as an elective course, provided it is sponsored by rank faculty and approved by the Graduate Advisor. At most one elective course (at least three units) is allowed outside the Department.

To satisfy exam requirements, students may take the Core Assessment Exam (offered in the spring of every year), the Comprehensive Exams (offered in the spring of every year), or the Qualifying Exams (offered before the start of each fall quarter) in Real Analysis, Complex Analysis, and Algebra. Students may not attempt to pass an exam in any particular area more than three times. Some students may require additional background before entering MATH 210 or MATH 230. This will be determined by assessment prior to the start of the students' first year by the Vice Chair of Graduate Studies, upon consultation with the Graduate Studies Committee. Such students will be directed into MATH 205 and/or MATH 206 during their first year. They may pass one Comprehensive Exam in the areas of Analysis or Algebra in lieu of achieving an M.S. pass in one of the Core Assessment or Qualifying Exams that must be obtained prior to the start of their second year.

Students who fail to pass the required examinations satisfactorily within the period specified will be recommended for academic disqualification by the Graduate Dean.

MATH 199, MATH 297, MATH 298, MATH 299, and MATH 399 may not be used to fulfill course requirements.

The residency requirement ordinarily is satisfied by full-time enrollment for three quarters immediately preceding the award of the M.S. degree. When appropriate, a leave of absence may be granted between matriculation and the final quarters of study.

If the candidate is not advanced before the beginning of the quarter in which all requirements are completed, the degree will not be conferred until the end of the following quarter. Deadlines for submission of the Application for Advancement to Candidacy are published on the Graduate Division (http://www.grad.uci.edu/academics/filing%20deadlines) website under filing fees and deadlines.

**Master of Science in Mathematics with a Teaching Credential**

In cooperation with the UCI School of Education, the Department of Mathematics sponsors a coordinated program for the M.S. degree in Mathematics and the California Single Subject Teaching Credential. The requirements for this option are the same as the Master of Science in Mathematics requirements listed above.

The student will complete the requirements for the Master's degree with the Mathematics Department (generally a two-year commitment) and then will petition with the UCI School of Education to take the School of Education's credential courses (generally a one-year commitment). The student must meet the requirements of the School of Education for the CBEST, CSET, TB test, and Certificate of Clearance. Prospective graduate students interested in this program should so indicate on their applications. A detailed description of the program can be requested from the School of Education.

**Advancement to M.S. Candidacy**

All Master's students must be advanced to candidacy for the degree prior to the beginning of their final quarter of enrollment. An application for Advancement to Candidacy must be completed by the student and submitted for approval to the Department. The approved application must be submitted to the Graduate Division by the deadline published on the Graduate Division (http://www.grad.uci.edu) website. Advancement to M.S. Candidacy must occur one quarter prior to the degree conferral quarter.

Filing fee information can be located on the Graduate Division (http://www.grad.uci.edu) website.

**Doctor of Philosophy in Mathematics**

When accepted into the doctoral program, the student embarks on a program of formal courses, seminars, and individual study courses to prepare for the Ph.D. written examinations, Advancement to Candidacy examination, and dissertation.

Upon entering the program, students are expected to take MATH 210, MATH 220, and MATH 230, which must be passed with a grade of B or better. Students must complete these sequences by the end of the second year.

By the start of the second year, students must achieve at least two passes at the M.S. level among three exams in Real Analysis, Complex Analysis, and Algebra. By the start of the third year, students must achieve two Ph.D. level passes among three exams in Real Analysis, Complex Analysis, and Algebra.

To satisfy the exam requirements, students may take the Core Assessment Exams (offered in spring of every year) or the Qualifying Exams (offered before the start of the fall quarter) in these areas. Students may not attempt to take an exam in a particular subject area more than three times. A student who passes a Qualifying Examination at the Ph.D. level prior to taking the corresponding course will be exempted from taking the course.
Some students may require additional background prior to entering MATH 210 and MATH 230. This will be determined by assessment prior to the start of the students’ first year by the Vice Chair for Graduate Studies, upon consultation with the Graduate Studies Committee. Such students will be directed into MATH 205 and/or MATH 206, or equivalent, during their first year. These students may pass one Comprehensive Exam in the areas of Algebra or Analysis in lieu of achieving an M.S. pass on one Core Assessment or Qualifying Exam that must be obtained prior to the start of the students’ second year. Comprehensive Exams in Analysis and Algebra will be offered once per year in the spring quarter.

By the end of their second year, students must declare a major specialization from the following areas: Algebra, Analysis, Applied and Computational Mathematics, Geometry and Topology, Logic, or Probability. Students are required to take two series of courses from their chosen area. (Students who later decide to change their area must also take two series of courses from the new area.) Additionally, all students must take two series outside their declared major area of specialization. Special topics courses within certain areas of specialization and courses counted toward the M.S. degree, other than MATH 205A-MATH 205B-MATH 205C and MATH 206A-MATH 206B-MATH 206C, will count toward the fulfillment of the major specialization requirement.

By the beginning of their third year, students must have an advisor specializing in their major area. With the advisor’s aid, the student forms a committee for the Advancement to Candidacy oral examination. This committee will be approved by the Department on behalf of the Dean of the Graduate Division and the Graduate Council and will consist of five faculty members. At least one, and at most two, of the members must be faculty from outside the Department. Before the end of the third year, students must have a written proposal, approved by their committee, for the Advancement to Candidacy examination. The proposal should explain the role of at least two series of courses from the student’s major area of specialization that will be used to satisfy the Advancement to Candidacy requirements. The proposal should also explain the role of additional research reading material as well as providing a plan for investigating specific topics under the direction of the student’s advisor(s). Only one of the courses MATH 210A-MATH 210B-MATH 210C, MATH 220A-MATH 220B-MATH 220C, and MATH 230A-MATH 230B-MATH 230C may count for the course requirement for Advancement to Candidacy Examinations. After the student meets the requirements, the Graduate Studies Committee recommends to the Dean of the Graduate Division the advancement to candidacy for the Ph.D. degree. Students should advance to candidacy by the beginning of their fourth year.

After advancing to candidacy, students are expected to be fully involved in research toward writing their Ph.D. dissertation. Ideally, students should keep in steady contact/interaction with their Doctoral Committee.

Teaching experience and training is an integral part of the Ph.D. program. All doctoral students are expected to participate in the Department’s teaching program.

The candidate must demonstrate independent, creative research in Mathematics by writing and defending a dissertation that makes a new and valuable contribution to mathematics in the candidate’s area of concentration. Upon Advancement to Candidacy a student must form a Thesis Committee, a subcommittee of the Advancement Examination Committee, consisting of at least three faculty members and chaired by the student’s advisor. The committee guides and supervises the candidate’s research, study, and writing of the dissertation; conducts an oral defense of the dissertation; and recommends that the Ph.D. be conferred upon approval of the Doctoral Dissertation. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Completion of the Ph.D. degree must occur within nine quarters of Advancement to Ph.D. candidacy.

Examinations

Ph.D. examinations are given in Algebra, Complex Analysis, and Real Analysis. All students seeking the Ph.D. degree must successfully complete two examinations before the end of the third year of entering the graduate program. Only two attempts are allowed for a Ph.D. student on each exam.

Area Requirements

Ph.D. students will choose from one of six areas of specialization in the Mathematics Department, which determines course work requirements. Each area of specialization will have a core course, which the Department will do its best to offer each year. The Department will offer other courses every other year, or more frequently depending on student demands and other Department priorities.

### Graduate Program in Mathematical and Computational Biology

The graduate program in Mathematical and Computational Biology (MCB) is a one-year “gateway” program designed to function in concert with selected department programs, including the Ph.D. in Mathematics. Detailed information is available at the Mathematical, Computational and Systems Biology (http://mcsb.bio.uci.edu) website and in the Francisco J. Ayala School of Biological Sciences (p. 289) section of the Catalogue.

### Faculty

Takeo Akasaki, Ph.D. University of California, Los Angeles, Professor Emeritus of Mathematics (ring theory)

Jun F. Allard, Ph.D. University of British Columbia, Assistant Professor of Mathematics; Physics and Astronomy (mathematical and computational biology)

Vladimir Baranovsky, Ph.D. University of Chicago, Associate Professor of Mathematics (algebra and number theory)

Frank B. Cannonito, Ph.D. Adelphi University, Professor Emeritus of Mathematics (group theory)

Long Chen, Ph.D. Pennsylvania State University, Associate Professor of Mathematics (applied and computational mathematics)

Michael C. Cranston, Ph.D. University of Minnesota, Professor of Mathematics (probability)

Donald A. Darling, Ph.D. California Institute of Technology, Professor Emeritus of Mathematics

Paul C. Eklof, Ph.D. Cornell University, Professor Emeritus of Mathematics (logic and algebra)

German A. Enciso Ruiz, Ph.D. Rutgers, the State University of New Jersey, Associate Professor of Mathematics; Developmental and Cell Biology (applied and computational mathematics, mathematical and computational biology)

Catherine M. Famiglietti, Ph.D. Princeton University, Lecturer of Mathematics (calculus and numerical methods)

Aleksandr Figotin, Ph.D. Tashkent University of Information Technologies, Professor of Mathematics (applied and computational mathematics, mathematical physics)

Mark Finkelstein, Ph.D. Stanford University, Professor Emeritus of Mathematics; Center for Educational Partnerships (analysis)
Matthew Foreman, Ph.D. University of California, Berkeley, *Professor of Mathematics; Logic and Philosophy of Science* (ergodic theory and dynamical systems, logic and foundations)

Michael D. Fried, Ph.D. University of Michigan, *Professor Emeritus of Mathematics* (arithmetic geometry and complex variables)

Anton Gorodetski, Ph.D. Moscow State University, *Associate Professor of Mathematics* (ergodic theory and dynamical systems)

Patrick Q. Guidotti, Ph.D. University of Zurich, *Professor of Mathematics* (analysis and partial differential equations, applied and computational mathematics)

Hamid Hezari, Ph.D. Johns Hopkins University, *Assistant Professor of Mathematics* (analysis and partial differential equations)

Svetlana Jitomirskaya, Ph.D. Moscow State University, UCI Chancellor's Fellow and *Professor of Mathematics* (mathematical physics)

Abel Klein, Ph.D. Massachusetts Institute of Technology, *Professor of Mathematics* (mathematical physics)

Natalia Komarova, Ph.D. University of Arizona, *Professor of Mathematics; Ecology and Evolutionary Biology* (applied and computational mathematics, mathematical and computational biology, mathematics of complex and social phenomena)

Rachel Lehman, Ph.D. University of California, Irvine, *Lecturer of Mathematics* (mathematics education and probability)

Peter Li, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (geometry and topology)

Song-Ying Li, Ph.D. University of Pittsburgh, *Professor of Mathematics* (analysis and partial differential equations)

John S. Lowengrub, Ph.D. Courant Institute of Mathematical Sciences, UCI Chancellor's Professor of Mathematics; Biomedical Engineering; Chemical Engineering and Materials Science (applied and computational mathematics, mathematical and computational biology)

Zhiqin Lu, Ph.D. Courant Institute of Mathematical Sciences, *Professor of Mathematics* (geometry and topology)

Penelope J. Maddy, Ph.D. Princeton University, *UCI Distinguished Professor of Logic and Philosophy of Science; Mathematics; Philosophy* (philosophy of mathematics and logic, meta-philosophy)

Eric D. Mjolsness, Ph.D. California Institute of Technology, *Professor of Computer Science; Mathematics* (applied mathematics, mathematical biology, modeling languages)

Qing Nie, Ph.D. Ohio State University, *Professor of Mathematics; Biomedical Engineering* (computational mathematics, systems biology, cell signaling, stem cell)

David L. Rector, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Mathematics* (algebraic topology and computer algebra)

Robert C. Reilly, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (geometry and topology)

Karl Rubin, Ph.D. Harvard University, *Department Chair and Edward and Vivian Thorp Chair in Mathematics and Professor of Mathematics* (algebra and number theory)

Bernard Russo, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (functional analysis)

Donald G. Saari, Ph.D. Purdue University, *UCI Distinguished Professor of Economics; Logic and Philosophy of Science; Mathematics* (ergodic theory and dynamical systems, mathematics of complex social phenomena)

Martin Schechter, Ph.D. New York University, *Professor of Mathematics* (analysis and partial differential equations, mathematical physics)

Stephen Scheinberg, Ph.D. Princeton University, *Professor Emeritus of Mathematics*

Alice Silverberg, Ph.D. Princeton University, *Professor of Mathematics; Computer Science* (algebra and number theory)

William H. Smoke, Ph.D. University of California, Berkeley, *Professor Emeritus of Mathematics* (homological algebra)

Knut Solna, Ph.D. Stanford University, *Professor of Mathematics* (applied and computational mathematics, inverse problems and imaging, probability)

Ronald J. Stern, Ph.D. University of California, Los Angeles, *Professor Emeritus of Mathematics* (geometry and topology)

Jeffrey D. Streets, Ph.D. Duke University, *Assistant Professor of Mathematics* (geometry and topology)

Chuu-Lian Terng, Ph.D. Brandeis University, *UCI ADVANCE Term Chair and Professor of Mathematics* (geometry and topology, mathematical visualization)
Edriss S. Titi, Ph.D. Indiana University, Professor Emeritus of Mathematics; Mechanical and Aerospace Engineering (analysis and partial differential equations, applied and computational mathematics)

Li Sheng Tseng, Ph.D. University of Chicago, Assistant Professor of Mathematics (geometry and topology, mathematical physics)

Howard G. Tucker, Ph.D. University of California, Berkeley, Professor Emeritus of Mathematics (probability and statistics)

Sean P. Walsh, Ph.D. University of Notre Dame, Assistant Professor of Logic and Philosophy of Science; Mathematics (philosophy of mathematics, philosophy of logic and mathematical logic)

Daqing Wan, Ph.D. University of Washington, Professor of Mathematics (algebra and number theory)

Frederic Yui-Ming Wan, Ph.D. Massachusetts Institute of Technology, Professor of Mathematics; Mechanical and Aerospace Engineering (applied and computational mathematics, mathematical and computational biology)

Robert W. West, Ph.D. University of Michigan, Professor Emeritus of Mathematics (algebraic topology)

Joel J. Westman, Ph.D. University of California, Los Angeles, Professor Emeritus of Mathematics (analysis)

Robert J. Whitley, Ph.D. New Mexico State University, Professor Emeritus of Mathematics (analysis)

Janet L. Williams, Ph.D. Brandeis University, Professor Emerita of Mathematics (probability and statistics)

Dominik Franz X. Wodarz, Ph.D. Oxford University, Professor of Ecology and Evolutionary Biology; Mathematics (mathematical biology, infectious disease and cancer)

Jack Xin, Ph.D. New York University, Professor of Mathematics (applied and computational mathematics, mathematical and computational biology, probability)

James J. Yeh, Ph.D. University of Minnesota, Professor Emeritus of Mathematics (analysis and partial differential equations, probability)

Yifeng Yu, Ph.D. University of California, Berkeley, Associate Professor of Mathematics (analysis and partial differential equations)

Martin Zeman, Ph.D. Humboldt University of Berlin, Professor of Mathematics; Logic and Philosophy of Science (logic and foundations)

Hong-Kai Zhao, Ph.D. University of California, Los Angeles, Professor of Mathematics; Computer Science (applied and computational mathematics, inverse problems and imaging)

Weian Zheng, Ph.D. University of Strasbourg, Professor Emeritus of Mathematics (probability theory and financial engineering)

Courses

MATH 1A. Pre-Calculus. 4 Workload Units.
Basic equations and inequalities, linear and quadratic functions, and systems of simultaneous equations. Course may be offered online.

MATH 1B. Pre-Calculus. 4 Units.
Preparation for calculus and other mathematics courses. Exponentials, logarithms, trigonometry, polynomials, and rational functions. Satisfies no requirements other than contribution to the 180 units required for graduation. Course may be offered online.

Prerequisite: MATH 1A or placement into MATH 1B via the Calculus Placement exam, or a score of 450 or higher on the Mathematics section of the SAT Reasoning Test.

MATH 2A. Single-Variable Calculus. 4 Units.
Introduction to derivatives, calculation of derivatives of algebraic and trigonometric functions; applications including curve sketching, related rates, and optimization. Exponential and logarithm functions.

Prerequisite: MATH 1B or placement into MATH 2A via the Calculus Placement exam (fee required), or a score of 3 on the AP Calculus AB exam, or a score of 600 or higher on the Mathematics section of the SAT Reasoning Test. MATH 1B with a grade of C or better.

Restriction: School of Physical Sciences, School of Engineering, and School of Information and Computer Sciences majors have first consideration for enrollment.

(Vb)
MATH 2B. Single-Variable Calculus. 4 Units.
Definite integrals; the fundamental theorem of calculus. Applications of integration including finding areas and volumes. Techniques of integration.
Infinite sequences and series. Parametric and polar equations.
Prerequisite: MATH 2A.
Restriction: School of Physical Sciences, School of Engineering, and School of Information and Computer Sciences majors have first consideration for enrollment.

MATH 2D. Multivariable Calculus. 4 Units.
Differential and integral calculus of real-valued functions of several real variables, including applications. Polar coordinates.
Prerequisite: MATH 2A and MATH 2B.
Overlaps with MATH H2D.
Restriction: School of Physical Sciences, School of Engineering, and School of Information and Computer Sciences majors have first consideration for enrollment.

MATH 2E. Multivariable Calculus. 4 Units.
The differential and integral calculus of vector-valued functions. Implicit and inverse function theorems. Line and surface integrals, divergence and curl, theorems of Greens, Gauss, and Stokes.
Prerequisite: MATH 2D.
Overlaps with MATH H2E.
Restriction: School of Physical Sciences and School of Engineering majors have first consideration for enrollment.

MATH 3A. Introduction to Linear Algebra. 4 Units.
Systems of linear equations, matrix operations, determinants, eigenvalues and eigenvectors, vector spaces, subspaces and dimension.
Prerequisite: MATH 2B.
Overlaps with MATH 6G, I&C SCI 6N.
Restriction: School of Physical Sciences and School of Engineering majors have first consideration for enrollment.

MATH 3D. Elementary Differential Equations. 4 Units.
Linear differential equations, variation of parameters, constant coefficient cookbook, systems of equations, Laplace transforms, series solutions.
Prerequisite: MATH 2D and MATH 3A.
Restriction: School of Physical Sciences and School of Engineering majors have first consideration for enrollment.

MATH 4. Mathematics for Economists. 4 Units.
Topics in linear algebra and multivariable differential calculus suitable for economic applications.
Prerequisite: MATH 2B.
Overlaps with MATH 2D, MATH 2J, MATH 3A.
Restriction: MATH 4 may not be taken for credit if taken after MATH 2D and either MATH 2J or MATH 3A.

MATH 6G. Linear Algebra. 4 Units.
Linear equations, vector spaces and subspaces, linear functions and matrices, linear codes, determinants, scalar products.
Prerequisite: High school mathematics through trigonometry.
Overlaps with MATH 3A, I&C SCI 6N.
MATH 8. Explorations in Functions and Modeling. 4 Units.
Explorations of applications and connections in topics in algebra, geometry, calculus, and statistics for future secondary math educators. Emphasis on nonstandard modeling problems.
Corequisite: MATH 2A.

MATH 13. Introduction to Abstract Mathematics. 4 Units.
Introduction to formal definition and rigorous proof writing in mathematics. Topics include basic logic, set theory, equivalence relations, and various proof techniques such as direct, induction, contradiction, contrapositive, and exhaustion.
Prerequisite: MATH 2A or I&C SCI 6D.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 77A. Mathematics and Computation in the Digital Age: Introduction to Signal Processing. 4 Units.
Signals in Matlab; blurring, filtering; elements of linear algebra, statistics, optimization; blind matrix inversion; de-correlation method, stochastic gradient descent method, applications to sounds and images.
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77A.
Restriction: Lower-division students only.

MATH 77B. Mathematics and Computation in the Digital Age: Introduction to Collaborative Filtering. 4 Units.
Basic concepts of collaborative filtering; clustering; matrix factorization and principal components analysis; regression; classification: naive Bayes classifier, decision trees, Perceptron (neural networks).
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77B.
Restriction: Lower-division students only.

MATH 77C. Mathematics and Computation in the Digital Age: Introduction to Image Processing. 4 Units.
Image de-noising, de-blurring, low pass filtering; image segmentation and classification; Sparse representation; visualization.
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77C.
Restriction: Lower-division students only.

MATH 77D. Mathematics and Computation in the Digital Age: Intro to Game Simulation and Analysis. 4 Units.
Combinatorial Game Theory--game classification, tree graphs, strategy analysis, Sprague Grundy functions, Bouton's Theorem; Zero-Sum and General-Sum Game Theory--pay off matrices, Minimax Theorem, Nash equilibrium; machine learning--search algorithms.
Prerequisite: MATH 2B and I&C SCI 31.
Same as I&C SCI 77D.
Restriction: Lower-division students only.
MATH 105A. Numerical Analysis. 4 Units.
Introduction to the theory and practice of numerical computation. Floating point arithmetic, roundoff; solving transcendental equations; quadrature; linear systems, eigenvalues, power method.
Corequisite: MATH 105LA.
Prerequisite: MATH 3A. Some acquaintance with computer programming.
Overlaps with ENGRMAE 185.

MATH 105B. Numerical Analysis. 4 Units.
Introduction to the theory and practice of numerical computation. Lagrange interpolation, finite differences, splines, Padé approximations; Gaussian quadrature; Fourier series and transforms.
Corequisite: MATH 105LB.
Prerequisite: MATH 105A.

MATH 105LA. Numerical Analysis Laboratory. 1 Unit.
Provides practical experience to complement the theory developed in Mathematics 105A.
Corequisite: MATH 105A.

MATH 105LB. Numerical Analysis Laboratory. 1 Unit.
Provides practical experience to complement the theory developed in Mathematics 105B.
Corequisite: MATH 105B.

MATH 107. Numerical Differential Equations. 4 Units.
Theory and applications of numerical methods to initial and boundary-value problems for ordinary and partial differential equations.
Corequisite: MATH 107L.
Prerequisite: MATH 3D and MATH 105A and MATH 105B.

MATH 107L. Numerical Differential Equations Laboratory. 1 Unit.
Provides practical experience to complement the theory developed in Mathematics 107.
Corequisite: MATH 107.

MATH 112A. Introduction to Partial Differential Equations and Applications. 4 Units.
Introduction to ordinary and partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Classification of PDEs, separation of variables and series expansions, special functions, eigenvalue problems.
Prerequisite: MATH 2D and MATH 3D.

MATH 112B. Introduction to Partial Differential Equations and Applications. 4 Units.
Introduction to partial differential equations and their applications in engineering and science. Basic methods for classical PDEs (potential, heat, and wave equations). Green functions and integral representations, method of characteristics.
Prerequisite: MATH 2E and MATH 112A.

MATH 112C. Introduction to Partial Differential Equations and Applications. 4 Units.
Nonhomogeneous problems and Green's functions, Sturm-Liouville theory, general Fourier expansions, applications of partial differential equations in different areas of science.
Prerequisite: MATH 3D and MATH 2D and MATH 3A.

MATH 113A. Mathematical Modeling in Biology. 4 Units.
Discrete mathematical and statistical models; difference equations, population dynamics, Markov chains, and statistical models in biology.
Prerequisite: MATH 2B.

MATH 113B. Mathematical Modeling in Biology. 4 Units.
Linear algebra; differential equations models; dynamical systems; stability; hysteresis; phase plane analysis; applications to cell biology, viral dynamics, and infectious diseases.
Prerequisite: MATH 113A.
MATH 113C. Mathematical Modeling in Biology. 4 Units.
Partial differential equations models in biology such as one dimensional blood flow, morphogen gradients, and tumor growth; stochastic models in cancer and epidemiology.
Prerequisite: MATH 113B.

MATH 114A. Applied Complex Analysis. 4 Units.
Introduction to complex functions and their applications to engineering and science. Complex numbers, elementary functions; analytic functions; complex integration; power series; residue theory; conformal maps; applications.
Prerequisite: MATH 2D and MATH 3A.
Overlaps with MATH 147.

MATH 115. Mathematical Modeling. 4 Units.
Mathematical modeling and analysis of phenomena that arise in engineering physical sciences, biology, economics, or social sciences.
Prerequisite: Corequisite or prerequisite: MATH 112A or ENGRMAE 140. MATH 2D and (MATH 3A or MATH 6G) and MATH 3D.

MATH 117. Dynamical Systems. 4 Units.
Introduction to the modern theory of dynamical systems including contraction mapping principle, fractals and chaos, conservative systems, Kepler problem, billiard models, expanding maps, Smale's horseshoe, topological entropy.
Prerequisite: MATH 3D and MATH 140A.

MATH 118. The Theory of Differential Equations. 4 Units.
Existence and uniqueness of solutions, continuous dependence of solutions on initial conditions and parameteres, Lyapunov and asymptotic stability, Floquet theory, nonlinear systems, and bifurcations.
Prerequisite: MATH 3D and MATH 140A.

MATH 119. Boundary Value Problems. 4 Units.
Introduction to boundary value problems including Green's function representations, maximum principle, variational formulations, Sturm-Liouville problems, eigenfunction expansions, existence and uniqueness for nonlinear problems, method of shooting, finite difference methods.
Prerequisite: MATH 3D and MATH 140A.

MATH 120A. Introduction to Abstract Algebra: Groups. 4 Units.
Axioms for group theory; permutation groups, matrix groups. Isomorphisms, homomorphisms, quotient groups. Advanced topics as time permits. Special emphasis on doing proofs.
Prerequisite: (MATH 3A OR MATH 6G) and MATH 13. MATH 13 with a grade of C- or better.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 120B. Introduction to Abstract Algebra: Rings and Fields. 4 Units.
Basic properties of rings; ideals, quotient rings; polynomial and matrix rings. Elements of field theory.
Prerequisite: MATH 120A.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 120C. Introduction to Abstract Algebra: Galois Theory. 4 Units.
Galois Theory: proof of the impossibility of certain ruler-and-compass constructions (squaring the circle, trisecting angles); nonexistence of analogues to the "quadratic formula" for polynomial equations of degree 5 or higher.
Prerequisite: MATH 120B.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 121A. Linear Algebra. 4 Units.
Prerequisite: (MATH 3A OR MATH 6G) and MATH 13. MATH 13 with a grade of C- or better.
Restriction: Mathematics majors have first consideration for enrollment.
MATH 121B. Linear Algebra. 4 Units.
Introduction to modern abstract linear algebra. Special emphasis on students doing proofs. Canonical forms; inner products; similarity of matrices.
Prerequisite: MATH 121A.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 130A. Probability and Stochastic Processes. 4 Units.
Basic concepts of random variables, distributions, independence, correlations, moments, limit theorems, conditional probability, Markov chains, gambler’s ruin, branching process, birth and death processes, numerical simulations in Matlab.
Prerequisite: MATH 2A and MATH 2B and (MATH 3A or MATH 6G).
Overlaps with MATH 131A, MATH 132A, STATS 120A.

MATH 130B. Probability and Stochastic Processes. 4 Units.
Exponential distributions, Poisson processes, continuous time Markov chains, renewal theory, insurance ruin and claim problems, numerical simulations in Matlab.
Prerequisite: MATH 130A OR MATH 131A or STATS 120A.

MATH 130C. Probability and Stochastic Processes. 4 Units.
Martingales, Invariance Principle, Brownian motions and applications in option pricing, stationary processes and applications in Wiener filter, numerical simulations in Matlab.
Prerequisite: MATH 130B.

MATH 131A. Introduction to Probability and Statistics. 4 Units.
Introductory course covering basic principles of probability and statistical inference. Axiomatic definition of probability, random variables, probability distributions, expectation.
Prerequisite: MATH 2A and MATH 2B and (MATH 2D or MATH 4).
Overlaps with MATH 130A, MATH 132A.

MATH 131B. Introduction to Probability and Statistics. 4 Units.
Introductory course covering basic principles of probability and statistical inference. Point estimation, interval estimating, and testing hypotheses, Bayesian approaches to inference.
Prerequisite: (MATH 131A or STATS 120A) and (MATH 3A or MATH 6G or MATH 4).

MATH 133A. Statistical Methods with Applications to Finance. 4 Units.
Overview of probability, statistics and financial concepts: distribution, point estimation, confidence interval, linear regression, hypothesis testing, principal component analysis, financial applications.
Prerequisite: MATH 130A or STATS 120A or MATH 2D or MATH 4.

MATH 133B. Statistical Methods with Applications to Finance. 4 Units.
Overview of markets and options: asset modeling, Brownian motion, risk neutrality, option pricing, value at risk, MC simulations.
Prerequisite: MATH 133A.

MATH 140A. Elementary Analysis. 4 Units.
Introduction to real analysis, including: convergence of sequence, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.
Prerequisite: MATH 2D and MATH 3A and MATH 13. MATH 13 with a grade of C- or better.
Restriction: Math majors have first consideration for enrollment.

MATH 140B. Elementary Analysis. 4 Units.
Introduction to real analysis including convergence of sequences, infinite series, differentiation and integration, and sequences of functions. Students are expected to do proofs.
Prerequisite: MATH 140A. MATH 140A with a grade of C- or better.
Restriction: Mathematics majors have first consideration for enrollment.
MATH 140C. Analysis in Several Variables. 4 Units.
Rigorous treatment of multivariable differential calculus. Jacobians, Inverse and Implicit Function theorems.
Prerequisite: MATH 140B.

MATH 141. Introduction to Topology. 4 Units.
The elements of naive set theory and the basic properties of metric spaces. Introduction to topological properties.
Prerequisite: MATH 140A.

MATH 146. Fourier Analysis. 4 Units.
Rigorous introduction to the theory of Fourier series and orthogonal expansions. Fourier transform.
Prerequisite: MATH 3D and MATH 140A and MATH 140B. Recommended: MATH 112A.

MATH 147. Complex Analysis. 4 Units.
Rigorous treatment of basic complex analysis: analytic functions, Cauchy integral theory and its consequences, power series, residue calculus, harmonic functions, conformal mapping. Students are expected to do proofs.
Corequisite: MATH 140B.
Prerequisite: MATH 140A.

MATH 150. Introduction to Mathematical Logic. 4 Units.
First order logic through the Completeness Theorem for predicate logic.
Prerequisite: MATH 13 or (I&C SCI 6B and I&C SCI 6D). MATH 13 with a grade of C- or better.
Overlaps with LPS 105B, PHILOS 105B.

MATH 151. Set Theory. 4 Units.
Axiomatic development; infinite sets; cardinal and ordinal numbers.
Prerequisite: MATH 150.
Overlaps with SOC SCI 105A, LPS 105A.

MATH 152. Computability. 4 Units.
Computable functions; undecidability; Gödel's Incompleteness Theorem.
Prerequisite: MATH 150.
Overlaps with PHILOS 105C, LPS 105C.

MATH 161. Modern Geometry. 4 Units.
Euclidean Geometry; Hilbert's Axioms; Absolute Geometry; Hyperbolic Geometry; the Poincare Models; and Geometric Transformations.
Prerequisite: MATH 13 or (I&C SCI 6B and I&C SCI 6D). MATH 13 with a C- or better.
Restriction: Math majors have first consideration for enrollment.

MATH 162A. Introduction to Differential Geometry. 4 Units.
Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.
Prerequisite: MATH 2E and MATH 3A and MATH 3D.

MATH 162B. Introduction to Differential Geometry. 4 Units.
Applications of advanced calculus and linear algebra to the geometry of curves and surfaces in space.
Prerequisite: MATH 162A.

MATH 171A. Mathematical Methods in Operations Research Linear Programming. 4 Units.
Simplex algorithm, duality, optimization in networks.
Prerequisite: MATH 3A or MATH 6G.
MATH 171B. Mathematical Methods in Operations Research Nonlinear Programming. 4 Units.
Conditions for optimality, quadratic and convex programming, search methods, geometric programming.
Prerequisite: MATH 2D and (MATH 3A or MATH 6G).

MATH 173A. Introduction to Cryptology. 4 Units.
Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.
Prerequisite: MATH 2B and (MATH 3A or MATH 6G) and (MATH 13 or (I&C SCI 6B and I&C SCI 6D)). MATH 13 with a grade of C- or better.

MATH 173B. Introduction to Cryptology. 4 Units.
Introduction to some of the mathematics used in the making and breaking of codes, with applications to classical ciphers and public key systems. The mathematics which is covered includes topics from number theory, probability, and abstract algebra.
Prerequisite: MATH 173A.

MATH 174A. Modern Graph Theory. 4 Units.
An introductory course emphasizing the fundamental concepts of graph theory by developing abilities to produce examples, following and devising simple proofs, and current applications of graph theory. Topics include: Graph Types; Matching in Graphs; Menger's Theorem; Kuratowski's Theorem.
Prerequisite: MATH 2B and (MATH 3A or MATH 6G) and (MATH 13 or (I&C SCI 6B and I&C SCI 6D)). MATH 13 with a grade of C- or better.

MATH 175. Combinatorics . 4 Units.
Introduction to combinatorics including basic counting principles, permutations, combinations, binomial coefficients, inclusion-exclusion, derangements, ordinary and exponential generating functions, recurrence relations, Catalan numbers, Stirling numbers, and partition numbers. Course may be offered online.
Prerequisite: MATH 2B and MATH 13. MATH 13 with a grade of C- or better.

MATH 176. Mathematics of Finance. 4 Units.
After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.
Prerequisite: MATH 3A.
Same as ECON 135.
Restriction: Mathematics, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

MATH 180A. Number Theory. 4 Units.
Prerequisite: MATH 3A and MATH 13. MATH 13 with a grade of C- or better.
Restriction: Math majors have first consideration for enrollment.

MATH 180B. Number Theory. 4 Units.
Introduction to number theory and applications. Analytic number theory, character sums, finite fields, discrete logarithm, computational complexity. Introduction to coding theory. Other topics as time permits.
Prerequisite: MATH 180A.
Restriction: Mathematics majors have first consideration for enrollment.

MATH 184. History of Mathematics. 4 Units.
Topics vary from year to year. Some possible topics: mathematics in ancient times; the development of modern analysis; the evolution of geometric ideas. Students will be assigned individual topics for term papers.
Prerequisite: MATH 120A and MATH 140A.
Restriction: Math majors have first consideration for enrollment.
MATH 184L. History of Mathematics Lesson Lab. 1 Unit.
Aspiring math teachers research, design, present, and peer review middle school or high school math lessons that draw from history of mathematics topics.

Corequisite: MATH 184.
Prerequisite: PHY SCI 5.

MATH 189. Special Topics in Mathematics. 4 Units.
Offered from time to time, but not on a regular basis. Content and prerequisites vary with the instructor.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

MATH 191. Mathematical Modeling Seminar. 2 Units.
Developing, testing, and presenting mathematical models for real world problems. Students will prepare for and participate in the Mathematical Contest in Modeling (MCM) in late February. Separate contest registration fee required.

Prerequisite: MATH 3D.
Repeatability: May be taken for credit 2 times.

MATH 192. Studies in the Learning and Teaching of Secondary Mathematics. 2 Units.
Focus is on historic and current mathematical concepts related to student learning and effective math pedagogy, with fieldwork in grades 6-14.

Prerequisite: MATH 2D and MATH 2J and MATH 3D and (MATH 13 or MATH 120A or MATH 140A).
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Upper-division students only. Math majors with specialization in Mathematics for Education only.

MATH 193. SMPP Capstone. 2 Units.
Capstone course for the Mathematics Subject-Matter Preparation (SMP) program. Engages students in reviewing and conducting current research on significant issues related to the teaching and learning of mathematics in the secondary classroom.

Corequisite: Recommended: MATH 192.
Repeatability: May be taken for credit 2 times.

MATH 194. Problem Solving Seminar. 2 Units.
Develops ability in analytical thinking and problem solving, using problems of the type found in the Mathematics Olympiad and the Putnam Mathematical Competition. Students taking the course in fall will prepare for and take the Putnam examination in December.

Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.

MATH H195A. Honors Seminar. 4 Units.
Topics vary from year to year. Provides an integrative experience, including problem-solving and oral and written presentations. Required for the Honors Program in Mathematics and open to others with consent of instructor.

Restriction: Mathematics Honors Program students only.

MATH H195B. Honors Seminar. 4 Units.
Topics vary from year to year. Provides an integrative experience, including problem-solving and oral and written presentations. Required for the Honors Program in Mathematics and open to others with consent of instructor.

Restriction: Mathematics Honors Program students only.

MATH 199A. Special Studies in Mathematics. 2-4 Units.
Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.

Repeatability: Unlimited as topics vary.
MATH 199B. Special Studies in Mathematics. 2-4 Units.
Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.
Repeatability: Unlimited as topics vary.

MATH 199C. Special Studies in Mathematics. 2-4 Units.
Supervised reading. For outstanding undergraduate Mathematics majors in supervised but independent reading or research of mathematical topics.
Repeatability: Unlimited as topics vary.

MATH 205A. Introduction to Graduate Analysis. 5 Units.
Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.
Prerequisite: MATH 2E and MATH 3A and MATH 13.

MATH 205B. Introduction to Graduate Analysis. 5 Units.
Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.
Prerequisite: MATH 205A.

MATH 205C. Introduction to Graduate Analysis. 5 Units.
Construction of the real number system, topology of the real line, concepts of continuity, differential and integral calculus, sequences and series of functions, equicontinuity, metric spaces, multivariable differential and integral calculus, implicit functions, curves and surfaces.
Prerequisite: MATH 205B.

MATH 206A. Introduction to Graduate Algebra. 5 Units.
Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators.
Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials and Galois groups.
Prerequisite: MATH 3A.

MATH 206B. Introduction to Graduate Algebra. 5 Units.
Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators.
Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials and Galois groups.
Prerequisite: MATH 206A.

MATH 206C. Introduction to Graduate Algebra. 5 Units.
Introduction to abstract linear algebra, including bases, linear transformation, eigenvectors, canonical forms, inner products, symmetric operators.
Introduction to groups, rings, and fields including examples of groups, group actions, Sylow theorems, modules over principal ideal domains, polynomials and Galois groups.
Prerequisite: MATH 206B.

MATH 210A. Real Analysis. 4 Units.
Prerequisite: MATH 140C.

MATH 210B. Real Analysis. 4 Units.
Prerequisite: MATH 210A.
MATH 210C. Real Analysis. 4 Units.
Prerequisite: MATH 210B.

MATH 211A. Topics in Analysis . 4 Units.
Studies in selected areas of Real Analysis, a continuation of MATH 210A-MATH 210B-MATH 210C. Topics addressed vary each quarter.
Prerequisite: MATH 210C.

MATH 211B. Topics in Analysis . 4 Units.
Studies in selected areas of Real Analysis, a continuation of MATH 210A-MATH 210B-MATH 210C. Topics addressed vary each quarter.
Prerequisite: MATH 211A.

MATH 211C. Topics in Analysis . 4 Units.
Studies in selected areas of Real Analysis, a continuation of MATH 210A-MATH 210B-MATH 210C. Topics addressed vary each quarter.
Prerequisite: MATH 211B.

MATH 218A. Introduction to Manifolds and Geometry. 4 Units.
General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.
Prerequisite: MATH 205C.

MATH 218B. Introduction to Manifolds and Geometry. 4 Units.
General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.
Prerequisite: MATH 218A.

MATH 218C. Introduction to Manifolds and Geometry. 4 Units.
General topology and fundamental groups, covering space; Stokes theorem on manifolds, selected topics on abstract manifold theory.
Prerequisite: MATH 218B.

MATH 220A. Analytic Function Theory. 4 Units.
Prerequisite: MATH 140C.

MATH 220B. Analytic Function Theory. 4 Units.
Prerequisite: MATH 220A.

MATH 220C. Analytic Function Theory. 4 Units.
Prerequisite: MATH 220B.

MATH 222A. Several Complex Variables and Complex Geometry. 4 Units.
Several Complex variables, d-bar problems, mappings, Kaehler geometry, de Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.
Prerequisite: MATH 218C and MATH 220C.

MATH 222B. Several Complex Variables and Complex Geometry. 4 Units.
Several Complex variables, d-bar problems, mappings, Kaehler geometry, Le Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.
Prerequisite: MATH 222A.
MATH 222C. Several Complex Variables and Complex Geometry. 4 Units.
Several Complex variables, d-bar problems, mappings, Kaehler geometry, Le Rham and Dolbeault Theorems, Chern Classes, Hodge Theorems, Calabi conjecture, Kahler-Einstein geometry, Monge-Ampere.

Prerequisite: MATH 222B.

MATH 225A. Introduction to Numerical Analysis and Scientific Computing. 4 Units.
Introduction to fundamentals of numerical analysis from an advanced viewpoint. Error analysis, approximation of functions, nonlinear equations.

Prerequisite: MATH 3D and ((MATH 105A and MATH 105B) or (MATH 140A and MATH 140B)) and MATH 121A and (MATH 112A or ENGRMAE 140).
Restriction: Graduate students only.

MATH 225B. Introduction to Numerical Analysis and Scientific Computing. 4 Units.
Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225A.
Restriction: Graduate students only.

MATH 225C. Introduction to Numerical Analysis and Scientific Computing. 4 Units.
Introduction to fundamentals of numerical analysis from an advanced viewpoint. Numerical linear algebra, numerical solutions of differential equations; stability.

Prerequisite: MATH 225B.
Restriction: Graduate students only.

MATH 226A. Computational Differential Equations. 4 Units.

Prerequisite: MATH 3D and (MATH 112A or ENGRMAE 140) and (MATH 140B or MATH 105B).

MATH 226B. Computational Differential Equations. 4 Units.

Prerequisite: MATH 226A.

MATH 226C. Computational Differential Equations. 4 Units.

Prerequisite: MATH 226B.

MATH 227A. Mathematical and Computational Biology. 4 Units.

Prerequisite: MATH 2A and MATH 2B and MATH 3A.

MATH 227B. Mathematical and Computational Biology. 4 Units.

Prerequisite: MATH 227A.

MATH 227C. Mathematical and Computational Biology. 4 Units.

Prerequisite: MATH 227A.
Same as COMPSCI 285.
MATH 230A. Algebra. 4 Units.
Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.
Prerequisite: MATH 120A and MATH 121A and MATH 121B.

MATH 230B. Algebra. 4 Units.
Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.
Prerequisite: MATH 230A.

MATH 230C. Algebra. 4 Units.
Elements of the theories of groups, rings, fields, modules. Galois theory. Modules over principal ideal domains. Artinian, Noetherian, and semisimple rings and modules.
Prerequisite: MATH 230B.

MATH 232A. Algebraic Number Theory. 4 Units.
Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.
Prerequisite: MATH 230C.

MATH 232B. Algebraic Number Theory. 4 Units.
Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.
Prerequisite: MATH 232A.

MATH 232C. Algebraic Number Theory. 4 Units.
Algebraic integers, prime ideals, class groups, Dirichlet unit theorem, localization, completion, Cebotarev density theorem, L-functions, Gauss sums, diophantine equations, zeta functions over finite fields. Introduction to class field theory.
Prerequisite: MATH 232B.

MATH 233A. Algebraic Geometry. 4 Units.
Prerequisite: MATH 230C.

MATH 233B. Algebraic Geometry. 4 Units.
Prerequisite: MATH 233A.

MATH 233C. Algebraic Geometry. 4 Units.
Prerequisite: MATH 233B.

MATH 234B. Topics in Algebra. 4 Units.
Group theory, homological algebra, and other selected topics.
Prerequisite: MATH 230C.
Repeatability: May be repeated for credit unlimited times.

MATH 234C. Topics in Algebra. 4 Units.
Group theory, homological algebra, and other selected topics.
Prerequisite: MATH 234B.
Repeatability: May be repeated for credit unlimited times.
MATH 235A. Mathematics of Cryptography. 4 Units.
Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.
Prerequisite: MATH 230C.

MATH 235B. Mathematics of Cryptography. 4 Units.
Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.
Prerequisite: MATH 235A.

MATH 235C. Mathematics of Cryptography. 4 Units.
Mathematics of public key cryptography: encryption and signature schemes; RSA; factoring; primality testing; discrete log based cryptosystems, elliptic and hyperelliptic curve cryptography and additional topics as determined by the instructor.
Prerequisite: MATH 235B.

MATH 239A. Analytic Methods in Arithmetic Geometry. 4 Units.
Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.
Prerequisite: MATH 220C and MATH 230C.

MATH 239B. Analytic Methods in Arithmetic Geometry. 4 Units.
Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.
Prerequisite: MATH 239A.

MATH 239C. Analytic Methods in Arithmetic Geometry. 4 Units.
Riemann zeta function, Dirichlet L-functions, prime number theorem, zeta functions over finite fields, sieve methods, zeta functions of algebraic curves, algebraic coding theory, L-Functions over number fields, L-functions of modular forms, Eisenstein series.
Prerequisite: MATH 239B.

MATH 240A. Differential Geometry. 4 Units.
Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.

MATH 240B. Differential Geometry. 4 Units.
Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.
Prerequisite: MATH 240A.

MATH 240C. Differential Geometry. 4 Units.
Riemannian manifolds, connections, curvature and torsion. Submanifolds, mean curvature, Gauss curvature equation. Geodesics, minimal submanifolds, first and second fundamental forms, variational formulas. Comparison theorems and their geometric applications. Hodge theory applications to geometry and topology.
Prerequisite: MATH 240B.

MATH 245A. Topics in Differential Geometry. 4 Units.
Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.
Prerequisite: MATH 240C.
Repeatability: Unlimited as topics vary.
MATH 245B. Topics in Differential Geometry. 4 Units.
Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.
Prerequisite: MATH 245A.
Repeatability: Unlimited as topics vary.

MATH 245C. Topics in Differential Geometry. 4 Units.
Studies in selected areas of differential geometry, a continuation of MATH 240A-MATH 240B-MATH 240C. Topics addressed vary each quarter.
Prerequisite: MATH 245B.
Repeatability: Unlimited as topics vary.

MATH 250A. Algebraic Topology. 4 Units.
Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.
Prerequisite: MATH 230A.

MATH 250B. Algebraic Topology. 4 Units.
Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.
Prerequisite: MATH 250A.

MATH 250C. Algebraic Topology. 4 Units.
Provides fundamental materials in algebraic topology: fundamental group and covering space, homology and cohomology theory, and homotopy group.
Prerequisite: MATH 250B.

MATH 260A. Functional Analysis. 4 Units.
Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative C*-algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.
Prerequisite: MATH 210C and MATH 220C.

MATH 260B. Functional Analysis. 4 Units.
Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative C*-algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.
Prerequisite: MATH 260A.

MATH 260C. Functional Analysis. 4 Units.
Normed linear spaces, Hilbert spaces, Banach spaces, Stone-Weierstrass Theorem, locally convex spaces, bounded operators on Banach and Hilbert spaces, the Gelfand-Neumark Theorem for commutative C*-algebras, the spectral theorem for bounded self-adjoint operators, unbounded operators on Hilbert spaces.
Prerequisite: MATH 260B.

MATH 270A. Probability. 4 Units.
Prerequisite: MATH 130C and MATH 210C.

MATH 270B. Probability. 4 Units.
Prerequisite: MATH 270A.

MATH 270C. Probability. 4 Units.
Prerequisite: MATH 270B.
MATH 271A. Stochastic Processes. 4 Units.
Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 210C.

Overlaps with STATS 270.

MATH 271B. Stochastic Processes. 4 Units.
Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271A.

Overlaps with STATS 270.

MATH 271C. Stochastic Processes. 4 Units.
Processes with independent increments, Wiener and Gaussian processes, function space integrals, stationary processes, Markov processes.

Prerequisite: MATH 271B.

Overlaps with STATS 270.

MATH 272A. Probability Models. 4 Units.
Spin systems, Ising models, contact process, exclusion process, percolation, increasing events, critical probabilities, sub- and super-critical phases, scaling theory, oriented percolation, concentration of measure, Gaussian fields, Borell's inequality, chaining, entropy.

Prerequisite: MATH 271C.

MATH 272B. Probability Models. 4 Units.
Spin systems, Ising models, contact process, exclusion process, percolation, increasing events, critical probabilities, sub- and super-critical phases, scaling theory, oriented percolation, concentration of measure, Gaussian fields, Borell's inequality, chaining, entropy.

Prerequisite: MATH 272A.

MATH 272C. Probability Models. 4 Units.
Spin systems, Ising models, contact process, exclusion process, percolation, increasing events, critical probabilities, sub- and super-critical phases, scaling theory, oriented percolation, concentration of measure, Gaussian fields, Borell's inequality, chaining, entropy.

Prerequisite: MATH 272B.

MATH 274. Topics in Probability. 4 Units.
Selected topics, such as theory of stochastic processes, martingale theory, stochastic integrals, stochastic differential equations.

Prerequisite: MATH 270C.

Repeatability: Unlimited as topics vary.

MATH 277A. Topics in Mathematical Physics. 4 Units.
Studies in selected areas of mathematical physics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

MATH 277B. Topics in Mathematical Physics. 4 Units.
Studies in selected areas of mathematical physics. Topics addressed vary each quarter.

Prerequisite: MATH 277A.

Repeatability: May be repeated for credit unlimited times.

MATH 277C. Topics in Mathematical Physics. 4 Units.
Studies in selected areas of mathematical physics. Topics addressed vary each quarter.

Prerequisite: MATH 277B.

Repeatability: May be repeated for credit unlimited times.

MATH 280A. Mathematical Logic. 4 Units.
Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.
MATH 280B. Mathematical Logic. 4 Units.
Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280A.

MATH 280C. Mathematical Logic. 4 Units.
Basic set theory; models, compactness, and completeness; basic model theory; Incompleteness and Gödel's Theorems; basic recursion theory; constructible sets.

Prerequisite: MATH 280B.

MATH 281A. Set Theory. 4 Units.
Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 280C.

MATH 281B. Set Theory. 4 Units.
Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281A.

MATH 281C. Set Theory. 4 Units.
Ordinals, cardinals, cardinal arithmetic, combinatorial set theory, models of set theory, Gödel's constructible universe, forcing, large cardinals, iterate forcing, inner model theory, fine structure.

Prerequisite: MATH 281B.

MATH 282A. Model Theory. 4 Units.

Prerequisite: MATH 280C.

MATH 282B. Model Theory. 4 Units.

Prerequisite: MATH 282A.

MATH 282C. Model Theory. 4 Units.

Prerequisite: MATH 282B.

MATH 285A. Topics in Mathematical Logic. 4 Units.
Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.

Prerequisite: MATH 280C.

Repeatability: Unlimited as topics vary.

MATH 285B. Topics in Mathematical Logic. 4 Units.
Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.

Prerequisite: MATH 285A.

Repeatability: Unlimited as topics vary.

MATH 285C. Topics in Mathematical Logic. 4 Units.
Studies in selected areas of mathematical logic, a continuation of MATH 280A-MATH 280B-MATH 280C. Topics addressed vary each quarter.

Prerequisite: MATH 285B.

Repeatability: Unlimited as topics vary.
MATH 290A. Methods in Applied Mathematics. 4 Units.

MATH 290B. Methods in Applied Mathematics. 4 Units.

Prerequisite: MATH 290A.

MATH 290C. Methods in Applied Mathematics. 4 Units.

Prerequisite: MATH 290B.

MATH 291C. Topics in Applied and Computational Math. 4 Units.
Studies in selected areas of applied and computational mathematics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

MATH 295A. Partial Differential Equations. 4 Units.

Prerequisite: MATH 210C and MATH 112B and MATH 112C.

MATH 295B. Partial Differential Equations. 4 Units.

Prerequisite: MATH 295A.

MATH 295C. Partial Differential Equations. 4 Units.

Prerequisite: MATH 295B.

MATH 296. Topics in Partial Differential Equations. 4 Units.
Studies in selected areas of partial differential equations, a continuation of MATH 295A-MATH 295B-MATH 295C. Topics addressed vary each quarter.

Prerequisite: MATH 295C.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

MATH 297. Mathematics Colloquium. 1 Unit.
Weekly colloquia on topics of current interest in mathematics.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MATH 298A. Seminar . 1-3 Units.
Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.
MATH 298B. Seminar . 2 Units.
Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.
Prerequisite: MATH 298A.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.

MATH 298C. Seminar . 2 Units.
Seminars organized for detailed discussion of research problems of current interest in the Department. The format, content, frequency, and course value are variable.
Prerequisite: MATH 298B.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: Unlimited as topics vary.

MATH 299A. Supervised Reading and Research. 1-12 Units.
Supervised reading and research with Mathematics faculty.
Repeatability: May be repeated for credit unlimited times.

MATH 299B. Supervised Reading and Research. 1-12 Units.
Supervised reading and research with Mathematics faculty.
Prerequisite: MATH 299A.
Repeatability: May be repeated for credit unlimited times.

MATH 299C. Supervised Reading and Research. 1-12 Units.
Supervised reading and research with Mathematics faculty.
Prerequisite: MATH 299B.
Repeatability: May be repeated for credit unlimited times.

MATH 399. University Teaching. 1-4 Units.
Limited to Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

Department of Physics and Astronomy

4129 Frederick Reines Hall; 949-824-6911
http://www.physics.uci.edu/
Peter Taborek, Department Chair

Physics is that branch of science concerned with the study of natural phenomena at the fundamental level. Physicists study the smallest particles of matter (quarks and leptons), nuclei, and atoms; the fundamental forces; the properties of solids, liquids, gases, and plasmas; the behavior of matter on the grand scale in stars and galaxies; and even the origin and fate of the universe. Other disciplines such as chemistry, biology, medicine, and engineering often build upon the foundations laid by physics.

The Department of Physics and Astronomy offers courses for students of various interests, from those in the humanities and social sciences, to those in biological sciences, and to those in physics, engineering, and other sciences. Faculty members are conducting active research in several forefront areas of physical research, and there is student access to specialized research areas such as astrophysics, cosmology, elementary particle, plasma, condensed matter, biological, and medical physics at both advanced and undergraduate course levels. The Department offers several interdisciplinary concentrations and tracks which include courses taught by faculty in Biological Sciences, Chemistry, Engineering, and Medicine. The faculty is vigorous, innovative, and engaged in a wide variety of research, education, and university and public service activities. The Department encourages student-faculty interaction.
Undergraduate Program

The goal of the undergraduate major in Physics is to develop expert problem solvers with a broad understanding of physical principles. The program is flexible and prepares students for careers in industrial research, applications programming, education, law, or business, as well as for graduate study in astronomy, biomedical physics, engineering, or physics. Annual mandatory meetings with faculty advisors assist students in selecting a program that matches their aptitudes and interests. In addition to the core Physics courses, students complete either a standard track (such as the track for future Ph.D. physicists), or one of the formal concentrations or specializations (in Applied Physics, Biomedical Physics, Computational Physics, Philosophy of Physics, Physics Education, or Astrophysics). In addition, Physics majors may find the minor in Earth and Atmospheric Sciences, offered by the Department of Earth System Science, to be of interest.

The three lower-division sequences in physics are distinguished by their intended audience, their mathematical prerequisites, and the extent to which they offer preparation for more advanced courses. These aspects of the beginning courses are summarized as follows:

- **Physics 3**: Intended audience: Premedical students, Biological Sciences majors. Prerequisites: concurrent enrollment in MATH 2A. Preparation for advanced courses: PHYSICS 7D with permission.

- **Physics 7**: Intended audience: Physical Sciences and Engineering majors. Prerequisite: concurrent enrollment in Mathematics 2. Preparation for advanced courses: PHYSICS 51A.

Admission to the Major

Students may be admitted to the Physics major upon entering the University as freshmen, via change of major, or as transfer students from other colleges and universities. Information about change of major policies is available in the Physical Sciences Student Affairs Office and at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website. For transfer student admission, preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following required courses: one year of approved calculus and one year of calculus-based physics with laboratory for engineering and physics majors.

Requirements for the B.S. Degree in Physics

All students must meet the University Requirements (p. 71). School Requirements: None. Departmental Requirements

And select five additional coherently related four-unit courses. (This requirement is normally satisfied by concentrations, specializations, and tracks, as listed below.)

For students transferring into the major after taking PHYSICS 51A-PHYSICS 51B, PHYSICS 51A-PHYSICS 51B will be accepted in place of PHYSICS 61A-PHYSICS 61B.

Upper-Division Writing Requirement: Physics majors are required to satisfy the upper-division writing requirement by completing PHYSICS 194 with a grade of C or better, followed by PHYSICS 121W with a grade of C or better.

Concentration in Applied Physics
Requirements:
The six additional coherently related courses required for the major must be in engineering and be approved by the Department of Physics and Astronomy.

Concentration in Biomedical Physics
Requirements:
BIO SCI 97 Genetics
BIO SCI 98 Biochemistry
BIO SCI 99 Molecular Biology
CHEM 1A- 1B- 1C General Chemistry
and General Chemistry
and General Chemistry
CHEM 1LC- 1LD General Chemistry Laboratory
and General Chemistry Laboratory
Select one of the following:
CHEM 51A- 51B Organic Chemistry
and Organic Chemistry
or
CHEM H52A- H52B Honors Organic Chemistry
and Honors Organic Chemistry

Concentration in Computational Physics
Requirements:
Three courses in computer science:
I&C SCI 31 Introduction to Programming
I&C SCI 32 Programming with Software Libraries
I&C SCI 33 Intermediate Programming
Two courses in numerical analysis plus the accompanying laboratories:
MATH 105A- 105B Numerical Analysis
and Numerical Analysis
MATH 105LA- 105LB Numerical Analysis Laboratory
and Numerical Analysis Laboratory
One advanced computational course and accompanying laboratory:
MATH 107- 107L Numerical Differential Equations
and Numerical Differential Equations Laboratory

Concentration in Philosophy of Physics
Requirements:
Select one course from the following:
MATH 150 Introduction to Mathematical Logic
MATH 151 Set Theory
MATH 152 Computability
PHILOS/LPS 30 Introduction to Symbolic Logic
PHILOS/LPS 104 Introduction to Logic
### PHILOS 105A-105B-105C
Elementary Set Theory and Metalogic and Undecidability and Incompleteness (or LPS 105A-105B-105C)

**Complete:**
- PHILOS/LPS 31: Introduction to Inductive Logic
- PHILOS/LPS 140: Topics in Philosophy of Science

**Select one of the following:**
- HISTORY 60: The Making of Modern Science
- HISTORY 135B: Crossing the World's Oceans: From Sail to Steam
  or an approved alternative elective

**Complete:**
- PHYSICS 113B: Quantum Physics

**Select three of the following:**
- PHILOS/LPS 102: Introduction to the Theory of Knowledge
- PHILOS/LPS 121: Topics in the Theory of Knowledge
- PHILOS/LPS 141A: Topics in Philosophy of Physics
- PHILOS/LPS 141B: Geometry and Spacetime
- PHILOS/LPS 141C: Philosophy of Quantum Mechanics
- PHILOS/LPS 141D: Probability and Determinism

### Concentration in Physics Education

**Requirements:**
- EDUC 55: Knowing and Learning in Mathematics and Science
- PHYS SCI 5: California Teach 1: Introduction to Science and Mathematics Teaching
- PHYS SCI 105: California Teach 2: Middle School Science and Mathematics Teaching
- PHYSICS 193: Research Methods

**Select four courses from the following:**
- BIO SCI 1A: Life Sciences
- BIO SCI 93: From DNA to Organisms
- BIO SCI 94: From Organisms to Ecosystems
- CHEM 1A-1B-1C: General Chemistry and General Chemistry
- EARTHSS 1: Introduction to Earth System Science
- EARTHSS 7: Physical Geology
- PHYSICS 20A-20B: Introduction to Astronomy and Cosmology: Man's Place in the Universe

**The following course is recommended:**
- PHYS SCI 106: California Teach 3: High School Science and Mathematics Teaching

**NOTE:** With this concentration, a Secondary Teaching Certification (p. 1386) option is available.

### Specialization in Astrophysics

**Requirements:**

**Requirements:**
- PHYSICS 139: Observational Astrophysics

**Select three astrophysics courses from the following:**
- PHYSICS 137: Introduction to Cosmology
- PHYSICS 138: Extragalactic Astrophysics
- PHYSICS 144: Stellar Astrophysics
- PHYSICS 145: High-Energy Astrophysics

**Select any two upper-division Physics electives.**
Honors Program in Physics

The Honors Program in Physics provides an opportunity for selected students majoring in Physics to pursue advanced work in one of the research areas of the Department. Admission to the program is based on an application normally submitted by the sixth week of the spring quarter of the junior year. Applicants must have an overall grade point average of at least 3.4 and a grade point average in physics courses of 3.5 or better. (Exceptions to these procedures and standards may be granted in unusual circumstances.) In selecting students for the program, the Department considers evidence of ability and interest in research.

Students admitted to the program participate in a year-long course, PHYSICS H196A-PHYSICS H196B-PHYSICS H196C, which includes two quarters of research and a final quarter in which a written thesis is submitted. If this work and the student’s final GPA are deemed of honors quality by the program advisor, the student then graduates with Departmental Honors in Physics.

Planning a Program of Study

Physics 3 is a one-year course suitable for premedical students, students majoring in Biological Sciences, and nonscience majors. It surveys most of the important branches of physics. Laboratory work accompanies the course. Nonscience majors with some mathematical skill may wish to consider Physics 3 as an alternative to PHYSICS 12 through PHYSICS 21.

A student who decides to major in Physics after completing Physics 3 should meet with the Department Undergraduate Advisor for placement information.

Physics 7 is an intensive four-quarter course for students in Physical Sciences and Engineering who are interested in a careful quantitative approach to macroscopic physics. Laboratory work accompanies the course.

Physics courses numbered between 12 and 21 are general education courses intended for nonscience majors. The content and format of PHYSICS 21 may vary from year to year.

The introduction to mathematical methods (MATH 2E, MATH 3A, MATH 3D, and PHYSICS 50), microscopic physics (PHYSICS 61A-PHYSICS 61B), and experimental physics (PHYSICS 52A-PHYSICS 52B-PHYSICS 52C) are normally taken in the sophomore year.

Courses numbered 100 and above are for Physics majors and other qualified students. Courses numbered between 111 and 115 emphasize the mathematical and theoretical structures that have unified our understanding of nature. It should be noted that multi-quarter courses such as 111A-B must be taken and passed in sequential order. Any student who is so inclined may take more than the minimum one quarter of advanced laboratory work. Courses numbered between 133 and 149 introduce active subdisciplines in current research. Independent research (PHYSICS 195, PHYSICS 196) is strongly encouraged. In PHYSICS 194, students learn the basics of writing about science, proper use of references and background material, presentation of research proposals, and more.

Transfer students are specifically advised to seek individual consultation with the Department Undergraduate Advisor before deciding on a program of courses.

All Physics majors must complete the core courses listed below. By the end of the junior year, each student is encouraged to select a concentration or track.

Note that alternatives to Physics major requirements can be approved upon petition to the Department and the Office of the Associate Dean. Furthermore, exceptionally prepared students are allowed to enroll in graduate-level courses; to do so requires the approval of the Department Undergraduate Advisor.

Physics Elective

Students preparing for graduate school in atmospheric science or physical oceanography should complete the minor in Earth and Atmospheric Sciences.

The Applied Physics concentration is designed to provide appropriate education to students who anticipate a career in industrial or technological research. It combines the fundamental knowledge of physical processes obtained from physics courses with the technical knowledge obtained from engineering courses. A student is required to complete six courses in the School of Engineering approved by the Physics and Astronomy Department. Examples of appropriate courses include:

- EECS 70A: Network Analysis I
- EECS 70B-70LB: Network Analysis II and Network Analysis II Laboratory
- EECS 170A-170LA: Electronics I and Electronics I Laboratory
- EECS 170B-170LB: Electronics II and Electronics II Laboratory
- EECS 170C-170LC: Electronics III and Electronics III Laboratory
- EECS 174: Semiconductor Devices
- EECS 188: Optical Electronics
- ENGRMAE 120: Heat and Mass Transfer
- ENGRMAE 135: Compressible Flow
- ENGRMAE 147: Vibrations

Upon completion of the Applied Physics concentration, the student will receive a B.S. degree in Physics.

The Biomedical Physics concentration is designed for the student who anticipates a career in physics applied to biology and medicine, such as health physics or radiological physics, or who intends to work in a scholarly field which deals with the physical aspects of biology or medicine, such as molecular biology or physiology. Completion of requirements for the Physics major is required as are nine quarters of basic courses in biology
and chemistry. Students who wish to follow the Biomedical Physics concentration are advised to seek guidance early in their college careers. The requirements are such that coordination of a program in the second year is essential.

The **Computational Physics concentration** provides training for positions in software development in a wide variety of high-technology fields. For example, consider medical imaging software for magnetic resonance imaging. To write a first-rate program, one must understand the apparatus and analysis techniques (physics), use appropriate numerical techniques (numerical analysis), and employ a convenient object-oriented interface (computer science). The concentration develops this unique set of skills: physical and mathematical insight through the Physics curriculum, knowledge of modern computer programming techniques, and knowledge of numerical analysis.

</tbody>
</table>

The **Philosophy of Physics concentration** is concerned with the study of the conceptual history of physics, the method of inquiry that has led to our best physical theories, and the structure and interpretation of the theories themselves. Students take courses in deductive and inductive logic, the philosophy and history of physics, and quantum mechanics. The emphasis on careful argument makes this concentration useful for anyone who wishes to pursue a graduate degree in philosophy or law, or for other careers that employ both verbal and quantitative analysis.

The **Physics Education concentration** is for students who plan a career in secondary education. An Education course, four general science courses, a research methods course, and two quarters of classroom experience complete the requirements for the concentration. Students are encouraged to take PHYSICS 191 (outreach).

**Secondary Teaching Certification Option:** With additional course work and field experience offered through the UCI Cal Teach program, students who complete the concentration in Physics Education can also earn a California Preliminary Single Subject Teaching Credential. Completing the bachelor’s degree, concentration, and teacher certification in four years is possible with careful, early planning. Additional courses required for teacher certification are:

**The Astrophysics specialization** is primarily taken by two types of students, those planning on going on to graduate school in astronomy or astrophysics and those planning to work in aeronautics or astrophysics-related industries or government research laboratories after receiving their bachelor’s degree. It also is an excellent focus for students who anticipate careers in science journalism, teaching, science administration, or public relations. The course work includes:

One upper-division astrophysics laboratory:

**PHYSICS 139 Observational Astrophysics**

Select three of four courses in astrophysics:

- **PHYSICS 137** Introduction to Cosmology
- **PHYSICS 138** Extragalactic Astrophysics
- **PHYSICS 144** Stellar Astrophysics
- **PHYSICS 145** High-Energy Astrophysics

Two or more upper-division Physics courses. Of the Physics electives, students bound for graduate school are strongly advised to include:

- **PHYSICS 113B** Quantum Physics
- **PHYSICS 115B** Thermodynamics
- **PHYSICS 125B** Mathematical Physics

Other recommended electives include:

- **PHYSICS 116** Relativity and Black Holes
- **PHYSICS 134A** Physical and Geometrical Optics
- **PHYSICS 135** Plasma Physics
- **PHYSICS 136** Introduction to Particle Physics

Graduate Program

The Department offers the M.S. and Ph.D. degrees in Physics. These degrees are awarded in recognition of demonstrated knowledge of the basic facts and theories of physics and of a demonstrated capacity for independent research. Active programs of research are underway in particle physics, nanophysics, biophysics, medical physics, condensed matter physics, low-temperature physics, plasma physics, gravitational physics, astrophysics, and cosmology.

In general, graduate study in the physics Ph.D. program is expected to be a full-time activity. Other proposed arrangements should be approved by the Graduate Committee. The normative time for completion of the Ph.D. is six years of full-time study, and the maximum time permitted is seven years. Students may pursue the M.S. degree on either a full-time or part-time basis.

Complementing the formal courses, the Department offers regular colloquia and informal seminars. Graduate students are members of an intellectual community and are expected to participate fully in departmental activities. Attendance at colloquia is considered an essential part of graduate study. In addition, there are regular weekly research seminars in condensed matter, particle, and plasma physics, and astrophysics.

Sources of support available to graduate students include teaching assistantships, research assistantships, and fellowships. Students planning to pursue graduate work in Physics should visit the Physics Department website.

Students admitted into the graduate program in Physics and Astronomy may elect to pursue the M.S. or Ph.D. degree with a concentration in Chemical and Materials Physics, as described in a later section.

Master of Science in Physics

Requirements for the M.S. degree:

All courses must be passed with a grade of B or better.

A. Three quarters of residence.

B. Seven quarter courses including:

The requirements for the M.S. degree with a concentration in Chemical and Materials Physics differ from these.

Doctor of Philosophy in Physics

The principal requirements for the Ph.D. degree are a minimum of six quarters of residence, passage of a written and an oral examination, and successful completion and defense of a dissertation reporting results of original research. In addition, the Ph.D. candidate must complete certain graduate course requirements. There is no foreign language requirement.

Course Requirements. Students are required to exhibit mastery of the basic sequences—Classical Mechanics, Electromagnetic Theory, Quantum Mechanics, Mathematical Physics, and Statistical Physics.

All courses must be passed with a grade of B or better.

Students who do not have a prior Master's degree (or other equivalent degree) in Physics from UCI or another institution must take a minimum of 11 quarter courses including:

<td>PHYSICS 211</td>
<td>Classical Mechanics</td>
</tr>
</tbody>
</table>
committee.

Upon completion of the dissertation, the student will take an oral examination, open to the public, before the doctoral Defense of Dissertation.

The Department requires a dissertation summarizing the results of original research performed by the student under the supervision of a doctoral committee, entitled A Dissertation. The student must prepare and submit a dissertation that is suitable for publication in a scientific journal. The dissertation may not have been submitted to any other institution prior to its submission to the UCI Physics and Astronomy Department. The criterion for the acceptability of a dissertation by the Department is that it be suitable for publication in a scientific journal. The dissertation must not have been submitted to any other institution prior to its submission to the UCI Physics and Astronomy Department.

The student will be appointed by the Department Chair on behalf of the Dean of the Graduate Division and the Graduate Council, will be required for the Ph.D. degree. A dissertation can be passed before such a student can qualify for a teaching assistantship in order to fulfill the Department’s teaching requirement. The Department passes either the Test of Spoken English (TSE) or the UCI SPEAK (Speaking Proficiency English Assessment Kit) examination. One of these tests must be passed before such a student can qualify for a teaching assistantship in order to fulfill the Department’s teaching requirement. Students who are not citizens from countries where English is either the primary or dominant language as approved by the UCI Graduate Council must pass either the Test of Spoken English (TSE) or the UCI SPEAK (Speaking Proficiency English Assessment Kit) examination. One of these tests must be passed before such a student can qualify for a teaching assistantship in order to fulfill the Department’s teaching requirement. Students who have obtained a prior Master’s degree (or other equivalent degree) in Physics from UCI or another institution:

Take a minimum of 4 quarter courses including: two courses numbered between 200 and 259 and two other courses approved by the graduate advisor. These students are strongly encouraged to take the qualifying exam in the Fall quarter of entrance.

Students are strongly encouraged to take PHYSICS 211, PHYSICS 212A, PHYSICS 213A, PHYSICS 214A, PHYSICS 215A-PHYSICS 215B, and either PHYSICS 213B or PHYSICS 240C in their first year of study. It is expected that students, having selected a research specialty, will ordinarily take the core courses in that subject in their second year of study. Students pursuing research in elementary particle physics ordinarily complete PHYSICS 234A-PHYSICS 234B-PHYSICS 234C and PHYSICS 235A-PHYSICS 235B during their second year. Students pursuing research in plasma physics ordinarily complete PHYSICS 239A during their first year and PHYSICS 239B-PHYSICS 239C-PHYSICS 239D their second year; PHYSICS 249 is also recommended. Students pursuing research in condensed-matter physics ordinarily take PHYSICS 238A-PHYSICS 238B-PHYSICS 238C during their second year; PHYSICS 133 should be taken in the first year by those students who have not had an equivalent course. Students pursuing research in astrophysics/cosmology ordinarily complete PHYSICS 240A during spring of their first year; PHYSICS 240B, PHYSICS 240C in their second year; and one or more of PHYSICS 241B, PHYSICS 241C, PHYSICS 241D in their second or subsequent years. Students interested in medical imaging should take PHYSICS 233A-PHYSICS 233B-PHYSICS 233C in the second year. Students pursuing research in biological physics should take PHYSICS 230A-PHYSICS 230B in the second year. Students who have earned grades of B or better in equivalent graduate-level courses prior to entering UCI may be exempted from required courses by the graduate advisor. Equivalency will be determined by the instructor of each course for which an exemption is sought.

NOTE: The requirements for the Ph.D. degree with a concentration in Chemical and Materials Physics (ChaMP) differ from these and are outlined in a later section.

**Comprehensive Examination.** Progress toward the degree is assessed by a written comprehensive examination covering a broad range of fundamentals of physics at the graduate and advanced undergraduate levels. It is offered twice a year, and a student is allowed a maximum of three attempts. The first attempt must occur before the end of the fall quarter of the student’s second year, and the examination must be passed by the end of spring quarter of the student’s second year.

**Advancement to Ph.D. Candidacy.** For advancement to Ph.D. candidacy, a student must pass an oral advancement examination. It is typically taken within one year of successful completion of the comprehensive examination. To satisfy normative progress toward the degree, it must be taken by the end of the student’s third year. The candidacy committee that administers this examination will contain one or two faculty members from outside the Department. This oral examination will cover material principally related to the broad and general features of the student’s dissertation area.

**Teaching Program.** Experience in teaching is an integral part of the graduate program, and all Ph.D. students are required to participate in the teaching program for at least one quarter during their graduate careers. All new teaching assistants are required to enroll in PHYSICS 269 and must pass in order to be allowed to TA in future quarters. Students are required to enroll in PHYSICS 399 while serving as a TA. Lab TAs are required to enroll in PHYSICS 395 as well as PHYSICS 399.

Students who are not citizens from countries where English is either the primary or dominant language as approved by the UCI Graduate Council must pass either the Test of Spoken English (TSE) or the UCI SPEAK (Speaking Proficiency English Assessment Kit) examination. One of these tests must be passed before such a student can qualify for a teaching assistantship in order to fulfill the Department’s teaching requirement. The Department expects one of these tests to be passed by the end of the student’s second year at UCI.

**Dissertation.** A dissertation summarizing the results of original research performed by the student under the supervision of a doctoral committee, appointed by the Department Chair on behalf of the Dean of the Graduate Division and the Graduate Council, will be required for the Ph.D. degree. A criterion for the acceptability of a dissertation by the Department is that it be suitable for publication in a scientific journal. The dissertation must not have been submitted to any other institution prior to its submission to the UCI Physics and Astronomy Department.

**Defense of Dissertation.** Upon completion of the dissertation, the student will take an oral examination, open to the public, before the doctoral committee.
Concentration in Chemical and Materials Physics

This is an interdisciplinary program between condensed matter physics and physical chemistry, which is designed to eliminate the barrier between these two disciplines. Students with B.S. degrees in Physics, Chemistry, or Materials Science and Engineering, are encouraged to apply to the program. The goal of the concentration in Chemical and Materials Physics (ChaMP) is to provide students with a broad interdisciplinary education in the applied physical sciences that emphasizes modern laboratory and computational skills. The program accepts students for both the M.S. and the Ph.D. degrees. Upon admission to the program, students are assigned two faculty advisors, one from the Department of Physics and Astronomy, and one from the Department of Chemistry, to provide guidance on curriculum and career planning.

The curriculum for the M.S. program includes a summer session to assimilate students with different undergraduate backgrounds; formal shop, laboratory, and computational courses; a sequence on current topics to bridge the gap between fundamental principles and applied technology; and a course to develop communication skills. The required courses include thirteen core courses and three electives (subject to advisor approval) as follows:

In addition to the required courses, M.S. students complete a master’s thesis. Students are required to advance to candidacy for the master’s degree at least one quarter prior to filing the master’s thesis. There is no examination associated with this advancement, but the thesis committee needs to be
selected and appropriate forms need to be filed. The M.S. program prepares students to compete for high-tech jobs or to begin research toward a Ph.D. degree.

Successful completion of the M.S. degree requirements qualifies students for the Ph.D. program. Progress toward the Ph.D. degree is assessed by a written comprehensive examination administered in the summer after completion of the first year of study. This examination covers comprehensive knowledge acquired in course work, and the content of the examination depends upon the student’s specific area of interest.

Participants in the Ph.D. program take an examination for formal advancement to candidacy. It is typically taken within one year of successful completion of the comprehensive examination. To satisfy normative progress toward the degree, it must be taken by the end of the student’s third year. The examination is comprised of two parts: (a) a written report on a topic to be determined in consultation with the research advisor and (b) an oral report on research accomplished and plans for completion of the Ph.D. dissertation.

Faculty

Kevork N. Abazajian, Ph.D. University of California, San Diego, **Associate Professor of Physics and Astronomy**

Jun F. Allard, Ph.D. University of British Columbia, **Assistant Professor of Mathematics; Physics and Astronomy** (mathematical and computational biology)

Aaron J. Barth, Ph.D. University of California, Berkeley, **Professor of Physics and Astronomy**

Steven W. Barwick, Ph.D. University of California, Berkeley, **Professor of Physics and Astronomy**

Gregory A. Benford, Ph.D. University of California, San Diego, **Professor Emeritus of Physics and Astronomy**

James S. Bullock, Ph.D. University of California, Santa Cruz, **Gary McCue Administrative Term Chair in Cosmology and Professor of Physics and Astronomy**

David A. Buote, Ph.D. Massachusetts Institute of Technology, **Professor of Physics and Astronomy**

Kieron Burke, Ph.D. University of California, Santa Barbara, **Professor of Chemistry; Physics and Astronomy** (physical chemistry and chemical physics, polymer, materials, nanoscience, theoretical and computational)

David W. Casper, Ph.D. University of Michigan, **Associate Professor of Physics and Astronomy**

Gary A. Chanan, Ph.D. University of California, Berkeley, **Professor of Physics and Astronomy**

Liu Chen, Ph.D. University of California, Berkeley, **Research Professor and Professor Emeritus of Physics and Astronomy**

Mu-Chun Chen, Ph.D. University of Colorado Boulder, **Associate Professor of Physics and Astronomy**

Alexander L. Chernyshev, Ph.D. Russian Academy of Sciences, **Professor of Physics and Astronomy**

Philip Collins, Ph.D. University of California, Berkeley, **Professor of Physics and Astronomy**

Michael Cooper, Ph.D. University of California, Berkeley, **Assistant Professor of Physics and Astronomy**

Asantha R. Cooray, Ph.D. University of Chicago, **Professor of Physics and Astronomy**

Michael B. Dennin, Ph.D. University of California, Santa Barbara, **Professor of Physics and Astronomy**

Igor E. Dzyaloshinskii, Ph.D. Moscow State University, **Professor Emeritus of Physics and Astronomy**

Jonathan L. Feng, Ph.D. Stanford University, **Professor of Physics and Astronomy**

Enrico Gratton, Ph.D. University of Rome, **Professor of Biomedical Engineering; Developmental and Cell Biology; Physics and Astronomy** (design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues)

Steven P. Gross, Ph.D. University of Texas at Austin, **Professor of Developmental and Cell Biology; Biomedical Engineering; Physics and Astronomy** (force generation by molecular motors in living cells)

Arnold Guerra, Ph.D. University of California, Irvine, **Lecturer of Physics and Astronomy**

Gultekin Gulsen, Ph.D. Bogazici University, **Associate Professor of Radiological Sciences; Biomedical Engineering; Electrical Engineering and Computer Science; Physics and Astronomy** (in vivo molecular imaging, diffuse optical tomography, fluorescence tomography, photo-magnetic imaging, multi-modality imaging)
Herbert W. Hamber, Ph.D. University of California, Santa Barbara, \textit{Professor of Physics and Astronomy}

William W. Heidbrink, Ph.D. Princeton University, \textit{Professor of Physics and Astronomy}

Wilson Ho, Ph.D. University of Pennsylvania, \textit{Donald Bren Professor and Professor of Physics and Astronomy; Chemistry} (physical chemistry and chemical physics, polymer, materials, nanoscience)

Herbert J. Hopster, Ph.D. Aachen University, \textit{Professor Emeritus of Physics and Astronomy}

Manoj Kaplinghat, Ph.D. Ohio State University, \textit{Professor of Physics and Astronomy}

David P. Kirkby, Ph.D. California Institute of Technology, \textit{Professor of Physics and Astronomy; Electrical Engineering and Computer Science} (observational cosmology, data science, embedded systems)

Ilya N. Krivorotov, Ph.D. University of Minnesota, \textit{Associate Professor of Physics and Astronomy}

Andrew J. Lankford, Ph.D. Yale University, \textit{Professor of Physics and Astronomy}

Jon M. Lawrence, Ph.D. University of Rochester, \textit{Professor Emeritus of Physics and Astronomy}

Zhihong Lin, Ph.D. Princeton University, \textit{Professor of Physics and Astronomy}

Mark A. Mandelkern, Ph.D. University of California, Berkeley, \textit{Research Professor and Professor Emeritus of Physics and Astronomy}

Alexei A. Maradudin, Ph.D. University of Bristol, \textit{Professor Emeritus of Physics and Astronomy}

Roger D. McWilliams, Ph.D. Princeton University, \textit{Professor of Physics and Astronomy}

William R. Molzon, Ph.D. University of Chicago, \textit{Professor of Physics and Astronomy}

Simona Murgia, Ph.D. Michigan State University, \textit{Assistant Professor of Physics and Astronomy}

Riley D. Newman, Ph.D. University of California, Berkeley, \textit{Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy}

Siddah Ashok Parameswaran, Ph.D. Princeton University, \textit{Assistant Professor of Physics and Astronomy}

William H. Parker, Ph.D. University of Pennsylvania, \textit{Professor Emeritus of Physics and Astronomy}

Arvind Rajaraman, Ph.D. Stanford University, \textit{Professor of Physics and Astronomy}

Thorsten Ritz, Ph.D. University of Ulm, \textit{Professor of Physics and Astronomy}

Norman Rostoker, Sc.D. Carnegie Institute of Technology, \textit{Research Professor and Professor Emeritus of Physics and Astronomy}

James E. Rutledge, Ph.D. University of Illinois at Chicago Circle, \textit{Associate Dean of the School of Physical Sciences and Professor of Physics and Astronomy}

Nathan Rynn, Ph.D. Stanford University, \textit{Professor Emeritus of Physics and Astronomy}

Jonas Schultz, Ph.D. Columbia University, \textit{Professor Emeritus of Physics and Astronomy; International Studies; Logic and Philosophy of Science}

Yuri Shirman, Ph.D. University of California, Santa Cruz, \textit{Professor of Physics and Astronomy}

Dennis J. Silverman, Ph.D. Stanford University, \textit{Professor Emeritus of Physics and Astronomy}

Zuzanna S. Siwy, Ph.D. Silesian University of Technology, \textit{Professor of Physics and Astronomy; Biomedical Engineering; Chemistry} (biosensing, nanotechnology, condensed matter physics)

Tammy Ann Smecker-Hane, Ph.D. Johns Hopkins University, \textit{Associate Professor of Physics and Astronomy}

Henry W. Sobel, Ph.D. Case Western Reserve University, \textit{Professor of Physics and Astronomy}

Min-Ying Su, Ph.D. University of California, Irvine, \textit{Professor of Radiological Sciences; Physics and Astronomy}

Peter Taborek, Ph.D. California Institute of Technology, \textit{Department Chair and Professor of Physics and Astronomy}

Agnes Taffard, Ph.D. University of Liverpool, \textit{Associate Professor of Physics and Astronomy}

Timothy Tait, Ph.D. Michigan State University, \textit{UCI Chancellor's Fellow and Professor of Physics and Astronomy}
Fumiko Tajima, Ph.D. University of Tokyo, Lecturer of Physics and Astronomy
Toshiki Tajima, Ph.D. University of California, Irvine, UCI Endowed Chair and Adjunct Professor of Physics and Astronomy
Virginia L. Trimble, Ph.D. California Institute of Technology, Professor of Physics and Astronomy
Mark Vagins, Ph.D. Yale University, Adjunct Professor of Physics and Astronomy
Gerard Vanhoven, Ph.D. Stanford University, Professor Emeritus of Physics and Astronomy
Richard F. Wallis, Ph.D. Catholic University of America, Professor Emeritus of Physics and Astronomy
Frank J. Wessel, Ph.D. University of California, Irvine, Project Scientist of Physics and Astronomy
Steven R. White, Ph.D. Cornell University, Professor of Physics and Astronomy
Daniel Whiteson, Ph.D. University of California, Berkeley, Associate Professor of Physics and Astronomy; Logic and Philosophy of Science
Ruqian Wu, Ph.D. Institute of Physics, Chinese Academy of Science, Professor of Physics and Astronomy
Jing Xia, Ph.D. Stanford University, Assistant Professor of Physics and Astronomy
Basilio J. Yniguez, Ph.D. University of California, Irvine, Lecturer of Physics and Astronomy
Gaurang B. Yodh, Ph.D. University of Chicago, Professor Emeritus of Physics and Astronomy
Clare C. Yu, Ph.D. Princeton University, Professor of Physics and Astronomy

Courses

PHYSICS 2. Introduction to Mathematical Methods for Physics. 4 Units.
Provides the applied mathematics and problem solving/presentation skills necessary for success in an introductory physics sequence. Focuses on practical exercises in problem solving. Covers kinematics in one and two dimensions in detail. Additional topics include vectors, differentiation, and integration.
Corequisite: MATH 2A.
Prerequisite: Passing score on the UCI Physics Placement Exam.

PHYSICS 3A. Basic Physics. 4 Units.
Vectors; motion, force, and energy. Course may be offered online.
Corequisite: MATH 2A.
(II, Va)

PHYSICS 3B. Basic Physics. 4 Units.
Fluids; heat; electricity and magnetism.
Prerequisite: PHYSICS 3A.
(II, Va)

PHYSICS 3C. Basic Physics. 4 Units.
Waves and sound; optics; quantum ideas; atomic and nuclear physics; relativity.
Corequisite: MATH 2B.
Prerequisite: PHYSICS 3B.
(II, Va)

PHYSICS 3LB. Basic Physics Laboratory. 1.5 Unit.
Practical applications of electronics and classical physics to biology. Goals include skill to use oscilloscope and other basic instrumentation. Materials fee.

PHYSICS 3LC. Basic Physics Laboratory. 1.5 Unit.
Practical applications of physics to medical imaging. Topics include optics, radioactivity, and acoustics. Materials fee.
PHYSICS 7C. Classical Physics. 4 Units.
Topics include force; energy; momentum; rotation and gravity.

Corequisite: PHYSICS 7LC and MATH 2B.
Prerequisite: MATH 2A and ((PHYSICS 2 or (Math 2D and CHEM 1C or CHEM H2C or CHEM M3C)) or passing score on the UCI Physics Placement Exam). PHYSICS 2 with a grade of C or better.

Restriction: Physics majors have first consideration for enrollment in one section of this course. PHYSICS 7C may not be taken for credit after PHYSICS 7A and PHYSICS 7B.

(II, Va)

PHYSICS 7D. Classical Physics. 4 Units.
Electricity and magnetism.

Corequisite: PHYSICS 7LD and MATH 2D.
Prerequisite: PHYSICS 7C and MATH 2B.

Restriction: Physics majors have first consideration for enrollment in one section of this course.

(II, Va)

PHYSICS 7E. Classical Physics. 4 Units.
Fluids; oscillations; waves; and optics. Course may be offered online.

Prerequisite: PHYSICS 7C and MATH 2B.

Restriction: Physics majors have first consideration for enrollment in one section of this course.

(II, Va)

PHYSICS 7LC. Classical Physics Laboratory. 1 Unit.
Experiments related to lecture topics in Physics 7C. Materials fee.

Corequisite: PHYSICS 7C.

Overlaps with PHYSICS 7LA, PHYSICS 7LB.

Restriction: Physics majors have first consideration for enrollment.

PHYSICS 7LD. Classical Physics Laboratory. 1 Unit.
Electricity and magnetism.

Corequisite: PHYSICS 7D.

Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.

PHYSICS 12. Science Fiction and Science Fact. 4 Units.
An introduction to fundamental physics principles, the scientific process, and the mathematical language of science, used to analyze topics drawn from superheroes, science fiction works, and current science news to distinguish science fiction and science fact. Course may be offered online.

Overlaps with PHYSICS 21.

(II, Va)

The physics of society’s energy production and consumption, and of their influences on the environment. Topics include fossil and renewable energy resources; nuclear power; prospects for a hydrogen economy; efficient and environmentally benign transportation; efficient home and commercial energy usage.

Restriction: Non-School of Physical Sciences majors only. Non-Physics majors only.

(II)
PHYSICS 15. Physics of Music. 4 Units.
Introduces basic physical principles underlying generation and properties of music, including basic properties of sound waves, musical scales and temperament, musical instruments, and acoustics of music halls. No mathematics background required, but high school algebra is recommended.

(II)

PHYSICS 17. Physics of Athletics. 4 Units.
Introduces basic physical principles behind motion. Examples are drawn from a range of athletic endeavors (such as ice skating, baseball, diving, and dance). No mathematics background required, but high school algebra is recommended.

(II)

PHYSICS 18. How Things Work. 4 Units.
Survey of the physical basis of modern technology, with an emphasis on electronics and materials. Topics include power generation and distribution, communication (radio, TV, telephone, computers, tape recorders, CD players), imaging (optics, x-rays, MRI), and modern materials (alloys, semiconductors, superconductors). Course may be offered online.

(II)

PHYSICS 19. Great Ideas of Physics. 4 Units.
Introduces nonscience majors to physics, examining important breakthroughs and controversies. Potential topics: Einstein's Relativity; Heisenberg's Uncertainty Principle; black holes; extra-dimensions; antimatter. Case studies illustrate the essential nature of scientific review and independent confirmation of results. No mathematics background required.

(II)

PHYSICS 20A. Introduction to Astronomy. 4 Units.
History of astronomy. Underlying physics. Objects in the solar system and how they are studied. Properties of stars: their formation, structure, and evolution. Pulsars and black holes. Galaxies and quasars. Course may be offered online.

(II, Va)

PHYSICS 20B. Cosmology: Man's Place in the Universe. 4 Units.
"Cook's Tour" of the universe. Ancient world models. Evidence for universal expansion; the size and age of the universe and how it all began. The long-range future and how to decide the right model. Anthropic principle. Course may be offered online.

(II, Va)

PHYSICS 20C. Observational Astronomy. 4 Units.
Basics of observing the night sky. Includes using UCI Observatory telescopes. Discusses fundamental observational techniques used to determine orbits and masses of objects, identify asteroids, classify stars, derive star cluster ages, measure the Universe's expansion rate and dark matter content. Course may be offered online.

Prerequisite: PHYSICS 20A or PHYSICS 20B or MATH 1B or MATH 2A.

(II, Va)

PHYSICS 20D. Space Science. 4 Units.
Motions of planets, satellites, and rockets. Propulsion mechanisms and space flight. The solar radiation field and its influence on planets. The interplanetary medium, solar wind, and solar-terrestrial relations. Course may be offered online.

(II, Va)

PHYSICS 20E. Life in the Universe. 4 Units.
An overview of the scientific quest to discover life elsewhere in the universe. Topics include the origin of life on Earth, Mars, extra-solar planets, interstellar travel, and extra-terrestrial intelligence.

(II, Va)
PHYSICS 21. Special Topics in Physics. 4 Units.
Topics addressed vary each quarter. Past topics have included physics and music, Newton, planetary science. Lectures on areas of special interest in physics used to introduce students to scientific method, fundamental laws of science, qualitative and quantitative analysis of data.

Repeatability: Unlimited as topics vary.
Overlaps with PHYSICS 12, PHYSICS XI12.

PHYSICS 50. Mathematical Methods for Physical Science. 4 Units.
Mathematica and its applications to linear algebra, differential equations, and complex functions. Fourier series and Fourier transforms. Other topics in integral transforms. Course may be offered online.

Corequisite: MATH 2E.
Prerequisite: MATH 2J or MATH 3A.
Overlaps with PHYSICS 100.

PHYSICS 51A. Modern Physics. 4 Units.
Wave-particle duality; quantum mechanics; special relativity; statistical mechanics.
Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D.
Overlaps with PHYSICS 61A.
Restriction: Non-Physics majors only.

PHYSICS 51B. Modern Physics. 4 Units.
Atoms; molecules; solids; nuclei; elementary particles.
Prerequisite: PHYSICS 51A or PHYSICS 61A.
Overlaps with PHYSICS 61B.
Restriction: Non-Physics majors only.

PHYSICS 52A. Fundamentals of Experimental Physics. 2 Units.
Optics: lenses, mirrors, polarization, lasers, optical fibers, interference, spectra. Materials fee.
Corequisite: PHYSICS 7E or PHYSICS 3C.
Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.

PHYSICS 52B. Fundamentals of Experimental Physics. 2 Units.
Prerequisite: PHYSICS 7D or PHYSICS 3B.
Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.

PHYSICS 52C. Fundamentals of Experimental Physics. 2 Units.
Data analysis: random and systematic errors, curve fitting; nuclear counting; quantum experiments. Error analysis: random and systematic errors, curve fitting, nuclear counting, and quantum experiments. Materials fee.
Prerequisite: PHYSICS 51A or PHYSICS 61A.
Restriction: Physics majors have first consideration for enrollment in select section(s) of this course.

PHYSICS 53. Introduction to C and Numerical Analysis. 4 Units.
Introduction to structured programming; in-depth training in C. Elementary numerical methods applied to physics problems.
Prerequisite: (MATH 2J or MATH 3A) and MATH 3D.
PHYSICS 60. Thermal Physics. 4 Units.
Introduction to thermodynamics and systems of many particles. Topics include first and second laws of thermodynamics, ideal gas laws, kinetic theory, heat engines and refrigerators, thermodynamic potentials, phase transitions, dilute solutions, chemical equilibrium, and basic statistical distributions.
Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D.
Restriction: Physics majors only.

PHYSICS 61A. Modern Physics for Majors. 4 Units.
Wave-particle duality; Schrödinger equation; angular momentum.
Prerequisite: (PHYSICS 7E or PHYSICS 3C) and MATH 2D.
Overlaps with PHYSICS 51A.
Restriction: Physics majors only.

PHYSICS 61B. Modern Physics for Majors. 4 Units.
Atomic transitions; molecules; solids; nuclei; elementary particles; cosmological models.
Prerequisite: PHYSICS 61A or PHYSICS 51A.
Overlaps with PHYSICS 51B.
Restriction: Physics majors only.

PHYSICS H90. The Idiom and Practice of Science. 4 Units.
A series of fundamental and applied scientific problems of social relevance. Possible topics include Newton's Law, calculus, earthquake physics, and radiation.
Restriction: Campuswide Honors Program students only.

PHYSICS 99. General Physics Seminar. 1 Unit.
Designed to introduce undergraduate students to current topics in physics. Focus is discussion of selected readings on current research issues.
Repeatability: Unlimited as topics vary.

PHYSICS 100. Computational Methods. 4 Units.
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.
Overlaps with PHYSICS 50.

PHYSICS 106. Laboratory Skills. 4-6 Units.
Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills.
Concurrent with PHYSICS 206 and CHEM 206.

PHYSICS 111A. Classical Mechanics. 4 Units.
One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.
Prerequisite: (PHYSICS 7E or PHYSICS 3C) and PHYSICS 50.

PHYSICS 111B. Classical Mechanics. 4 Units.
One-dimensional motion and oscillations; three-dimensional motion, non-inertial coordinates, conservation laws, and Lagrangian and Hamiltonian dynamics; rigid body motion and relativity.
Prerequisite: PHYSICS 111A.

PHYSICS 112A. Electromagnetic Theory. 4 Units.
Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.
Prerequisite: (PHYSICS 7D or PHYSICS 3B) and PHYSICS 50.
PHYSICS 112B. Electromagnetic Theory. 4 Units.
Electric, magnetic, and gravitational fields and potentials; electrodynamics; mechanical and electromagnetic waves and radiation.
Prerequisite: PHYSICS 7E and PHYSICS 112A.

PHYSICS 113A. Quantum Physics. 4 Units.
Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.
Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 50.

PHYSICS 113B. Quantum Physics. 4 Units.
Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.
Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113A.

PHYSICS 113C. Quantum Physics. 4 Units.
Inadequacy of classical physics; time independent and time dependent Schrodinger equation; systems in one, two, and three dimensions; matrices; Hermitian operators; symmetries; angular momentum; perturbation theory; scattering theory; applications to atomic structure; emphasis on phenomenology.
Prerequisite: PHYSICS 111B and PHYSICS 112B and PHYSICS 113B.

PHYSICS 115A. Statistical Physics. 4 Units.
Microscopic theory of temperature, heat, and entropy; kinetic theory; multicomponent systems; quantum statistics.
Prerequisite: PHYSICS 50 and PHYSICS 60.

PHYSICS 115B. Thermodynamics. 4 Units.
Macroscopic theory of temperature, heat, and entropy; mathematical relationships of thermodynamics; heat engines; phase transitions.
Prerequisite: PHYSICS 115A.

PHYSICS 116. Relativity and Black Holes. 4 Units.
Introduces students to both special and general relativity; includes the formalism of four-vectors, equivalence principle, curved space-time, and modern issues with black holes.
Corequisite: PHYSICS 111A.
Prerequisite: PHYSICS 50.

PHYSICS 120. Electronics for Scientists. 4 Units.
Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits. Materials fee.
Prerequisite: PHYSICS 52B.

PHYSICS 121W. Advanced Laboratory. 4 Units.
Experiments in atomic, condensed matter, nuclear, particle, and plasma physics. Introduction to instrumentation and a first experience in the research laboratory.
Prerequisite: (PHYSICS 51B or PHYSICS 61B) and (PHYSICS 52C or PHYSICS 193) and (PHYSICS 194 or EDUC 143BW).
Repeatability: May be taken for credit 3 times.
Restriction: Physics majors only.

(Ib)
PHYSICS 125A. Mathematical Physics. 4 Units.
Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.
Prerequisite: PHYSICS 50 and MATH 3D.

PHYSICS 125B. Mathematical Physics. 4 Units.
Complex variables; Legendre and Bessel functions; complete sets of orthogonal functions; partial differential equations; integral equations; calculus of variations; coordinate transformations; special functions and series.
Prerequisite: PHYSICS 125A and PHYSICS 113A.

PHYSICS 133. Introduction to Condensed Matter Physics. 4 Units.
Phenomena of solids and their interpretation in terms of quantum theory.
Prerequisite: PHYSICS 113B and PHYSICS 115A.

PHYSICS 134A. Physical and Geometrical Optics. 4 Units.
Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.
Corequisite: PHYSICS 112B.
Prerequisite: PHYSICS 112A.
Concurrent with CBEMS 242A and CHEM 242A.

PHYSICS 135. Plasma Physics. 4 Units.
Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.
Prerequisite: PHYSICS 112B.
Concurrent with PHYSICS 239A.

PHYSICS 136. Introduction to Particle Physics. 4 Units.
Experimental techniques and theoretical concepts of high-energy phenomena: accelerators and detectors; classification of particles and interactions; particle properties; symmetries and mass multiplets; production and decay mechanisms.
Prerequisite: PHYSICS 113B.

PHYSICS 137. Introduction to Cosmology. 4 Units.
Solution of the differential equations governing the expansion of the Universe. Observational determinations of the parameters governing the expansion. Big Bang inflation, primordial nucleosynthesis, and cosmic microwave background. Dark matter, dark energy, and large-scale structure of the Universe.
Prerequisite: PHYSICS 111A.

PHYSICS 138. Extragalactic Astrophysics. 4 Units.
Prerequisite: PHYSICS 111A.

PHYSICS 139. Observational Astrophysics. 4 Units.
Telescopes and astronomical observations, imaging with CCD detectors and image processing techniques. Photometry and spectroscopy of stars, galaxies, and quasars. Advanced imaging techniques such as deconvolution, adaptive optics, and interferometry.
Prerequisite: PHYSICS 52A and PHYSICS 52B and PHYSICS 52C and PHYSICS 53.

PHYSICS 144. Stellar Astrophysics. 4 Units.
Stars: their structure and evolution; physical state of the interior; the Hertzsprung-Russell diagram, stellar classification, and physical principles responsible for the classification; star formation; nuclear burning; giant and dwarf stars; neutron stars and black holes.
Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A.
PHYSICS 145. High-Energy Astrophysics. 4 Units.
Production of radiation by high-energy particles, white dwarfs, neutron stars, and black holes. Evolution of galactic nuclei, radio galaxies, quasars, and pulsars. Cosmic rays and the cosmic background radiation.

Prerequisite: (PHYSICS 51A or PHYSICS 61A) and PHYSICS 111A and PHYSICS 112A.

PHYSICS 146A. Biophysics of Molecules and Molecular Machines. 4 Units.
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A.

Concurrent with PHYSICS 230A.

PHYSICS 146B. Biophysics of Molecules and Molecular Machines. 4 Units.
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Prerequisite: PHYSICS 115A.

Concurrent with PHYSICS 230B.

PHYSICS 147A. Principles of Imaging. 4 Units.
Linear systems, probability and random processes, image processing, projection imaging, tomographic imaging.

Prerequisite: PHYSICS 50.

Concurrent with PHYSICS 233A and EECS 202A.

PHYSICS 147B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.
Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: PHYSICS 147A.

Concurrent with PHYSICS 233B and EECS 202B.

PHYSICS 147C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.
Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: PHYSICS 147B.

Concurrent with PHYSICS 233C and EECS 202C.

PHYSICS 150. Special Topics in Physics and Astronomy. 4 Units.
Current topics in physics. Includes topics from nano-science, biological sciences, astrophysics, and the common use of estimation across subdisciplines within physics.

Repeatability: Unlimited as topics vary.

PHYSICS 191. Field Experience in Physics Education. 1-4 Units.
Students develop and perform physics assemblies at neighboring public schools.

Prerequisite: PHYSICS 7C and PHYSICS 7D and PHYSICS 7E.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.
PHYSICS 192. Tutoring in Physics. 1-2 Units.
Formalizes the already existing free tutoring for the lower-division physics courses that is provided by the Society of Physics Students (SPS). Includes instructions on tutoring techniques.

Prerequisite: PHYSICS 7E.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 12 units.
Restriction: Society of Physics Students (SPS) tutoring program students only.

PHYSICS 193. Research Methods. 4 Units.
Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5.
Same as BIO SCI 108, CHEM 193.

PHYSICS 194. Research Communication for Physics Majors. 2 Units.
Students learn the fundamentals of communicating about research. Topics include preparing abstracts, proposals, and literature reviews. Provides preparation for presentation of independent research projects in PHYSICS 121 and PHYSICS 196.

Prerequisite: PHYSICS 61B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Physics majors only.

PHYSICS 195. Undergraduate Research. 4 Units.
Independent research under the guidance of a Physics faculty member.

Grading Option: Pass/no pass only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Juniors only. Physics majors only.

PHYSICS 196A. Thesis in Physics I. 2 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students’ research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194.
Overlaps with PHYSICS H196A.
Restriction: Physics majors only.

PHYSICS 196B. Thesis in Physics II. 4 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students’ research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196A.
Overlaps with PHYSICS H196B.
Restriction: Physics majors only.

PHYSICS 196C. Thesis in Physics III. 4 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students’ research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS 196B.
Overlaps with PHYSICS H196C, PHYSICS 197.
Restriction: Physics majors only.
PHYSICS H196A. Honors Thesis in Physics I. 2 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Corequisite: PHYSICS 194.

Overlaps with PHYSICS 196A.

Restriction: Physics majors only. Honors Program in Physics students only. Campuswide Honors Program students only.

PHYSICS H196B. Honors Thesis in Physics II. 4 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196A.

Overlaps with PHYSICS 196B.

Restriction: Physics majors only. Honors Program in Physics students only. Campuswide Honors Program students only.

PHYSICS H196C. Honors Thesis in Physics III. 4 Units.
Independent research for seniors conducted under the guidance of a faculty member. Students' research results are discussed in oral presentations, and a written proposal, progress report, and thesis are submitted.

Prerequisite: PHYSICS H196B.

Overlaps with PHYSICS 196C.

Restriction: Physics majors only. Honors Program in Physics students only. Campuswide Honors Program students only.

PHYSICS 199. Readings on Special Topics. 1-4 Units.
Readings in selected areas of Physics. Topics addressed vary each quarter.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

PHYSICS 206. Laboratory Skills. 4-6 Units.
Introduces students to a variety of practical laboratory techniques, including lock-in, boxcar, coincidence counting, noise filtering, PID control, properties of common transducers, computer interfacing to instruments, vacuum technology, laboratory safety, basic mechanical design, and shop skills. Materials fee.

Same as CHEM 206.

Concurrent with PHYSICS 106.

PHYSICS 207. Chemistry for Physicists. 4 Units.
Introduction to fundamental concepts in molecular structure and reactivity: theory of bonding, valence and molecular orbitals; structure and reactivity in inorganic chemistry; elements in molecular group theory; nomenclature in organic chemistry; and survey of macromolecules.

Same as CHEM 207.

PHYSICS 208. Mathematics for Chemists. 4 Units.
Applications of mathematics to physical and chemical problems. Calculus of special functions, complex variables and vectors; linear vector spaces and eigenvalue problems. Differential equations.

Same as CHEM 208.

PHYSICS 211. Classical Mechanics. 4 Units.
Variational principles, Lagrange's equations; applications to two body problems, small oscillation theory, and other phenomena. Hamilton's equations. Hamilton-Jacobi theory. Canonical transformations.

Restriction: Graduate students only.

PHYSICS 212A. Mathematical Physics. 4 Units.
Complex variables and integration; ordinary and partial differential equations; the eigenvalue problem.

Restriction: Graduate students only.
PHYSICS 213A. Electromagnetic Theory. 4 Units.
Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.

PHYSICS 213B. Electromagnetic Theory. 4 Units.
Electrostatics; magnetostatics; relativity; classical electron theory; fields in vacuum and matter; retardation; radiation and absorption; dispersion; propagation of light; diffraction; geometric optics; theories of the electric and magnetic properties of materials; scattering.
Prerequisite: Physics 213A.

PHYSICS 214A. Statistical Physics. 4 Units.
Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; ideal and imperfect gases; thermodynamic properties of solids; transport theory.
Restriction: Graduate students only.

PHYSICS 214B. Statistical Physics. 4 Units.
Phase transitions; critical phenomena; cooperative phenomena; fluctuations.
Prerequisite: PHYSICS 214A.
Restriction: Graduate students only.

PHYSICS 214C. Many Body Theory. 4 Units.
Application of field theory methods, perturbative and non-perturbative, to many particle systems; second quantization, Feynman diagrams, linear response theory, and functional integral methods applied to the ground state and at finite temperature.
Prerequisite: PHYSICS 214A and PHYSICS 215A and PHYSICS 215B.
Restriction: Graduate students only.

PHYSICS 215A. Quantum Mechanics. 4 Units.
Foundations; Dirac notation; basic operators and their eigenstates; perturbation theory; spin.
Restriction: Graduate students only.

PHYSICS 215B. Quantum Mechanics. 4 Units.
Atomic physics; scattering theory, formal collision theory; semi-classical radiation theory; many body systems.
Prerequisite: PHYSICS 215A.
Restriction: Graduate students only.

PHYSICS 220. Electronics for Scientists. 4 Units.
Applications of modern semiconductor devices to physical instrumentation. Characteristics of semiconductor devices, integrated circuits, analog and digital circuits.
Restriction: Graduate students only.
Concurrent with PHYSICS 120.

PHYSICS 222. Continuum Mechanics. 4 Units.
Introduction to the continuum limit and stress and strain tensors. Hydrodynamics of perfect fluids; two-dimensional problems, motion of incompressible viscous fluids, Navier Stokes equations. Basic elasticity theory. Description of viscoelastic materials. Introduction to nonlinear behavior instabilities.

PHYSICS 223. Numerical Methods. 4 Units.
Introduction to theory and practice of modern numerical methods. Techniques are drawn from topics such as solution of differential equations, Monte Carlo methods, Fast Fourier transforms, and evaluation of special functions.

PHYSICS 228. Electromagnetism. 4 Units.
Maxwell’s equations, electrodynamics, electromagnetic waves and radiation, wave propagation in media, interference and quantum optics, coherent and incoherent radiation, with practical applications in interferometry, lasers, waveguides, and optical instrumentation.
Same as CHEM 228.
**PHYSICS 229A. Computational Methods. 4 Units.**
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229A.

Concurrent with PHYSICS 100.

**PHYSICS 229B. Computational Methods. 4 Units.**
Mathematical and numerical analysis using Mathematica and C programming, as applied to problems in physical science.

Same as CHEM 229B.

**PHYSICS 230A. Biophysics of Molecules and Molecular Machines. 4 Units.**
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146A.

**PHYSICS 230B. Biophysics of Molecules and Molecular Machines. 4 Units.**
Physical concepts and experimental and computational techniques used to study the structure and function of biological molecules and molecular machines with examples from enzyme action, protein folding, molecular motors, photobiology, chemotaxis, and vision.

Concurrent with PHYSICS 146B.

**PHYSICS 231. Special Topics in Computational Physics. 4 Units.**
Modern symbolic and numerical techniques on state-of-the-art computers for solving problems in classical and quantum mechanics, fluids, electromagnetism, and mathematical physics.

Prerequisite: PHYSICS 223 or PHYSICS 229A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

**PHYSICS 233A. Principles of Imaging. 4 Units.**
Linear systems, probability and random processes, image processing, projecting imaging, tomographic imaging.

Prerequisite: PHYSICS 51B or PHYSICS 61B.

Same as EECS 202A.

Restriction: Graduate students only.

Concurrent with PHYSICS 147A.

**PHYSICS 233B. Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging. 4 Units.**
Ionizing radiation, planar and tomographic radiographic and nuclear imaging, magnetism, NMR, MRI imaging.

Prerequisite: EECS 202A.

Same as EECS 202B.

Restriction: Graduate students only.

Concurrent with PHYSICS 147B.

**PHYSICS 233C. Techniques in Medical Imaging II: Ultrasound, Electrophysiological, Optical. 4 Units.**
Sound and ultrasound, ultrasonic imaging, physiological electromagnetism, EEG, MEG, ECG, MCG, optical properties of tissues, fluorescence and bioluminescence, MR impedance imaging, MR spectroscopy, electron spin resonance and ESR imaging.

Prerequisite: EECS 202B.

Same as EECS 202C.

Restriction: Graduate students only.

Concurrent with PHYSICS 147C.
PHYSICS 234A. Elementary Particle Physics. 4 Units.
Overview of Standard Model theory and phenomenology. Electromagnetic, strong and weak forces, quark model, interactions with matter, particle
detectors and accelerators.
Prerequisite: PHYSICS 215B.

PHYSICS 234B. Advanced Elementary Particle Physics. 4 Units.
SU(3)xSU(2)xU(1) model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-
unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.
Prerequisite: PHYSICS 234A and PHYSICS 235A.

PHYSICS 234C. Advanced Elementary Particle Physics. 4 Units.
SU(3)xSU(2)xU(1) model of strong, weak, and electromagnetic interactions. K-meson system and CP violation, neutrino masses and mixing, grand-
unified theories, supersymmetry, introduction to cosmology and its connection to particle physics.
Prerequisite: PHYSICS 234A and PHYSICS 235A.

PHYSICS 235A. Quantum Field Theory. 4 Units.
Canonical quantization, scalar field theory, Feynman diagrams, tree-level quantum electrodynamics.
Prerequisite: PHYSICS 215B.
Restriction: Graduate students only.

PHYSICS 235B. Advanced Quantum Field Theory. 4 Units.
Pathintegral techniques, loop diagrams, regularization and renormalization, anomalies.
Prerequisite: PHYSICS 235A.
Restriction: Graduate students only.

PHYSICS 238A. Condensed Matter Physics. 4 Units.
Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion
of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body
perturbation theory.
Prerequisite: PHYSICS 133 and (PHYSICS 214A or CHEM 232A) and (PHYSICS 215B or CHEM 231B).

PHYSICS 238B. Condensed Matter Physics. 4 Units.
Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion
of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body
perturbation theory.
Prerequisite: PHYSICS 238A.

PHYSICS 238C. Condensed Matter Physics. 4 Units.
Bonding in solids; crystal symmetry and group theory, elastic properties of crystals; lattice vibrations, interaction of radiation with matter; cohesion
of solids; the electron gas; electron energy bands in solids; ferromagnetism; transport theory; semiconductors and superconductors; many-body
perturbation theory.
Prerequisite: PHYSICS 238B.

PHYSICS 239A. Plasma Physics. 4 Units.
Basic concepts, orbits, kinetic and fluid equations, Coulomb collisions, fluctuations, scattering, radiation.
Restriction: Graduate students only.

PHYSICS 239B. Plasma Physics. 4 Units.
Magnetic confinement, MHD equilibrium and stability, collisional transport.
Prerequisite: PHYSICS 239A.
Restriction: Graduate students only.
PHYSICS 239C. Plasma Physics. 4 Units.
Linear waves and instabilities, uniform un-magnetized and magnetized plasmas, non-uniform plasmas.
Prerequisite: PHYSICS 239B.
Restriction: Graduate students only.

PHYSICS 239D. Plasma Physics. 4 Units.
Nonlinear plasma physics, quasilinear theory, large-amplitude coherent waves, resonance broadening, strong turbulence.
Prerequisite: PHYSICS 239C.
Restriction: Graduate students only.

PHYSICS 240A. Galactic Astrophysics. 4 Units.
The morphology, kinematics, and evolution of our Milky Way and other galaxies. Topics include stellar formation and stellar evolution, end states of stars (supernovae, neutron stars), the distribution of stars, interstellar gas and mass in galaxies. The Local Group.

PHYSICS 240B. Cosmology. 4 Units.
An introduction to modern cosmology set within the context of general relativity. Topics include the expansion history of the Universe, inflation, the cosmic microwave background, density fluctuations, structure formation, dark matter, dark energy, and gravitational lensing.

PHYSICS 240C. Radiative Processes in Astrophysics. 4 Units.
Exploration of radiation mechanisms (electron scattering, synchrotron emission, collisional excitation, and more) and radiative transfer through matter including absorption and emission. Includes such observational astrophysics topics as spectroscopic study of atoms and nuclei, X-rays, and cosmic rays.

PHYSICS 241B. Stellar Astrophysics. 4 Units.
Prerequisite: PHYSICS 211 and PHYSICS 240A.

PHYSICS 241C. Extragalactic Astrophysics. 4 Units.
The physics and phenomenology of galaxies; star formation, interstellar medium, and intergalactic medium. Galaxy structure and dynamics. Galaxy evolution, stellar populations, and scaling relations; the relationship between galaxy properties and environment. Galaxy clusters and active galactic nuclei.
Prerequisite: PHYSICS 211 and PHYSICS 240A.

PHYSICS 241D. Early Universe Physics. 4 Units.
Includes a thorough quantum treatment of the generation of perturbations during inflation and various topics related to kinetic theory in an expanding Universe. Other topics include the astrophysics and cosmology of weakly interacting particles.
Prerequisite: PHYSICS 234A and (PHYSICS 240B or PHYSICS 255).

PHYSICS 246. Special Topics in Astrophysics. 4 Units.
Outlines and emphasizes a subarea of astrophysics that is undergoing rapid development.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 247. Special Topics in Particle Physics. 4 Units.
Current topics in particle non-accelerator-based research fields.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 248. Special Topics in Condensed Matter Physics. 4 Units.
Outlines and emphasizes a subarea of condensed matter physics that is undergoing rapid development.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
PHYSICS 249. Special Topics in Plasma Physics. 4 Units.
Outlines and emphasizes a subarea of plasma physics that is undergoing rapid development.
Prerequisite: PHYSICS 239A and PHYSICS 239B.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PHYSICS 255. General Relativity. 4 Units.
An introduction to Einstein’s theory of gravitation. Tensor analysis, Einstein’s field equations, astronomical tests of Einstein’s theory, gravitational waves.

PHYSICS 260A. Seminar in Condensed Matter Physics. 1 Unit.
Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 260B. Seminar in Condensed Matter Physics. 1 Unit.
Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 260C. Seminar in Condensed Matter Physics. 1 Unit.
Seminar designed to acquaint students with recent advances in solid state physics. Lecturers from the Department of Physics and Astronomy (both faculty and graduate students), other UCI departments, and other institutions.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 261A. Seminar in Plasma Physics. 1 Unit.
Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PHYSICS 261B. Seminar in Plasma Physics. 1 Unit.
Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PHYSICS 261C. Seminar in Plasma Physics. 1 Unit.
Advanced topics in plasma physics: wave propagation, nonlinear effects, kinetic theory and turbulence, stability problems, transport coefficients, containment, and diagnostics. Applications to controlled fusion and astrophysics.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.
PHYSICS 263A. Seminar in Particle Physics. 1 Unit.
Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 263B. Seminar in Particle Physics. 1 Unit.
Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate student only.

PHYSICS 263C. Seminar in Particle Physics. 1 Unit.
Discussion of advanced topics and reports of current research results in theoretical and experimental particle physics and cosmic rays.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 265A. Seminar in Astrophysics. 1 Unit.
Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 265B. Seminar in Astrophysics. 1 Unit.
Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 265C. Seminar in Astrophysics. 1 Unit.
Acquaints students with current research in astrophysics. Lecturers from the Department of Physics and Astronomy and from other institutions.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PHYSICS 266. Current Topics in Chemical and Materials Physics. 1 Unit.
The subjects covered vary from year to year. Connection between fundamental principles and implementations in practice in science, industry, and technology.

Repeatability: May be repeated for credit unlimited times.

Same as CHEM 266.

PHYSICS 267A. Current Problems in Particle Physics. 4 Units.
Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.

Repeatability: May be repeated for credit unlimited times.
PHYSICS 267B. Current Problems in Particle Physics. 4 Units.
Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.
Repeatability: May be repeated for credit unlimited times.

PHYSICS 267C. Current Problems in Particle Physics. 4 Units.
Presentation and discussion of current research and theory in particle physics. Lectures given by staff and students.
Repeatability: May be repeated for credit unlimited times.

PHYSICS 269. Seminar in Teaching Physics. 2 Units.
Techniques for effective teaching. Covers active listening and student engagement, problem-solving skills, peer instruction and collaborative learning, and evaluation. Required of all new Teaching Assistants.
Grading Option: Satisfactory/unsatisfactory only.

PHYSICS 273. Technical Communication Skills. 2 Units.
Development of effective communication skills, oral and written presentations, through examples and practice.
Grading Option: Satisfactory/unsatisfactory only.
Same as CHEM 273.

PHYSICS 291. Research Seminar. 1-4 Units.
Detailed discussion of research problems of current interest in the Department. Format, content, and frequency of the course are variable.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PHYSICS 295. Experimental Research. 4-12 Units.
With the approval of a faculty member, a student may pursue a research program in experimental physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: School of Physical Sciences majors only. Graduate students only.

PHYSICS 296. Theoretical Research. 4-12 Units.
With approval of a faculty member, a student may pursue a research program in theoretical physics. Typical areas include astrophysics, condensed matter physics, elementary particle physics, and plasma physics.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: School of Physical Sciences majors only. Graduate students only.

PHYSICS 298. Physics Colloquium. 1 Unit.
Seminar held each week, in which a current research topic is explored. Frequently, off-campus researchers are invited to present the seminar, and on occasion a faculty member or researcher from the Department will speak.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: School of Physical Sciences majors only.

PHYSICS 299. Reading of Special Topic. 4-12 Units.
With special consent from a faculty member who will agree to supervise the program, a student may receive course credit for individual study of some area of physics.
Restriction: Graduate students only.
PHYSICS 395. Laboratory Teaching. 1 Unit.
Required of and limited to teaching assistants of undergraduate laboratory courses. Designed to teach the necessary skills required of teaching assistants for these courses.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PHYSICS 399. University Teaching. 1-4 Units.
Required of and limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
Program in Public Health

The Program in Public Health was established in 2003 to provide institutional focus for existing academic strengths in various sub-disciplines of public health and to facilitate well-grounded education and innovative research in emerging cross-disciplinary topics in the field. Undergraduate degree programs in public health began enrolling students in 2006, and the Department of Population Health and Disease Prevention was established in 2007 to advance the collaborative interdisciplinary mission of public health research, education, service, and professional development. The Department offers a B.S. in Public Health Sciences, a B.A. in Public Health Policy, a minor in Public Health, a Master of Public Health (M.P.H.) in three emphases: Environmental Health, Epidemiology, and Sociocultural Diversity and Health, and a Doctor of Philosophy (Ph.D.) in Public Health in two concentrations: Disease Prevention and Global Health. The Department also offers a dual-degree M.D./M.P.H. and a joint Doctor of Philosophy (Ph.D.) in Environmental Health Sciences with the School of Medicine. Future plans and information is available at the Program in Public Health website. The Program is fully accredited by the Council on Education for Public Health.

Department of Population Health and Disease Prevention

Oladele Ogunseitan, Department Chair

Overview

The mission of the Department of Population Health and Disease Prevention is to create, integrate, and translate population-based knowledge into preventive strategies to reduce the societal burden of human disease and disability through excellence in interdisciplinary research, education, and service. This is a forward-thinking mission that acknowledges and complements traditional discipline-based research and training in public health. It is a specific mission that is increasingly recognized by eminent organizations such as the Institute of Medicine’s Board on Population Health and Public Health Practice, by research and education funding institutions such as the Robert Wood Johnson Foundation’s Health & Society Scholars Program, and by distinguished Schools of Public Health.

New sources of funding for research and education are emerging, including the translational science initiative of the National Institutes of Health, to support this ecological paradigm of public health. The societal challenges facing health care and the burden of diseases at the community, national, and international levels have increased the demand for experts capable of researching, developing, and implementing programs to prevent disease and to improve population health. The Department hosts activities that bridge disciplinary perspectives, methods, and practices to nurture new leaders in public health through research and training on risk factors that render people vulnerable to diseases in their communities and the development of strategies for preventing disease by separating risk factors from specific vulnerable populations.

* With emphases in Environmental Health; Epidemiology; and Sociocultural Diversity and Health.

** With concentrations in Disease Prevention and Global Health.

Honors

Honors Research Program in Public Health

The Public Health Honors Program provides an opportunity for selected outstanding students in the program to pursue advanced work in independent research and earn honors in Public Health upon graduation. Successful completion of the honors program requires three quarters of commitment, while enrolled in PUBHLTH H192A-PUBHLTH H192B-PUBHLTH H192C. Students are also expected to enroll in supervised Undergraduate Research (PUBHLTH 199) with their research mentor. The program concludes with a presentation and submission of an honors culminating thesis.

Eligibility and Application Process

In order to be considered, a student must have satisfied the following requirements: completion of all lower-division Public Health courses required for the major; completion of at least five upper-division Public Health courses; an overall UCI grade point average of a minimum of 3.5; and a minimum 3.5 grade point average in all required and completed Public Health courses. Acceptance into the program is based upon evidence of the student’s ability, interest in research, and proposed thesis project with a faculty member.
Admission to the program is based on formal invitation and/or an application to participate in the Public Health Honors Program submitted by the student in the spring quarter of the junior year.

**Requirements**

Beyond fulfilling the regular courses required for either the Public Health Sciences or Public Health Policy major, honor students must take the following:

A. Fall Quarter
- PUBHLTH H192A: Public Health Honors Seminar and Thesis I (4 units)
- PUBHLTH 199: Undergraduate Research (4 units)

B. Winter Quarter
- PUBHLTH H192B: Public Health Honors Seminar and Thesis II (1 unit)
- PUBHLTH 199: Undergraduate Research (4 units)

C. Spring Quarter
- PUBHLTH H192C: Public Health Honors Seminar and Thesis III (1 unit)
- PUBHLTH 199: Undergraduate Research (4 units)

**Graduation with Honors**

Honors at graduation, e.g., *cum laude, magna cum laude, summa cum laude*, are awarded to about 12 percent of the graduating seniors. Eligibility for such honors will be on the basis of grade point average (GPA). A minimum overall GPA of 3.5 is required for consideration. Students must have completed at least 72 units in residence at a University of California campus by the end of the final quarter prior to graduation. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin honors. Other important factors are considered visit at Honors Recognition (http://catalogue.uci.edu/informationforadmittedstudents/academicadvisingandhonors/#honorsopportunities).

**Campuswide Honors Program**

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; http://www.honors.uci.edu/.

**Dean’s Honor List**

The quarterly Dean’s Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

**Public Health Honors, Scholarships, Prizes, and Awards**

The following honors, scholarships, prizes, and awards are presented at the annual Public Health Honors and Awards Ceremony held in June.

- **Outstanding Contribution to Public Health and Community.** This award is for undergraduates who have made significant contributions to the Public Health community, including the intellectual growth of others.
- **Excellence in Community and UCI Service.** This award is to signify any work/research done by a student that benefits the campus community or the community-at-large.
- **Excellence in Public Health Research.** This award is for research conducted by a student that is exceptional in quality.
- **Excellence in Writing.** This award honors students who best demonstrate an ability to communicate ideas clearly through writing.
- **Special Recognition.** This award is given to undergraduates who deserve special recognition.
- **Recognition of Preceptors.** This award goes to nominated Practicum Preceptor Sites who have shown an outstanding commitment to UCI students or have been nominated for the award by student recognition.

**Undergraduate Program**

The B.S. in Public Health Sciences (p. 1414) and the B.A. in Public Health Policy (p. 1417) degree programs train students in multidisciplinary approaches to public health practice and research. The degrees explore both quantitative and qualitative aspects of public health at all levels of analysis. Graduates will advance, through selective employment or further education, to become the new generation of public health professionals prepared to face the emerging challenges to human health from a population perspective using cutting-edge prevention approaches.

Students who are interested in pursuing a premedical program should note that additional courses will be needed beyond the requirements of the public health degrees to fulfill requirements for medical school.

Students considering the public health degrees should carefully evaluate their academic preparation and career goals before enrolling in either the B.S. or B.A. degree program. Changing from a degree program to the other is possible, but will require completion of the required lower- and upper-division
courses specified for each program. It is also possible for a student to enroll in both the B.S. and B.A. degree programs (double major), provided the student completes all the requirements outlined under each degree.

The Department also offers an undergraduate minor (p. 1419).

Academic Advising: Academic, Career, Public Health

AIRB Suite 2010
http://publichealth.uci.edu/ph_docs/new_ugrad

Academic Advising

The Public Health Student Services Office coordinates the advising program and provides academic counseling. Undergraduate Public Health students should consult the Public Health Student Services Office for information on academic requirements for the degree, career opportunities, the Public Health 198/199 Research Program, the Public Health Honors Research Program, and student organizations such as the Public Health Association. Students can also visit the Public Health Student Services Office to process change-of-major requests, apply for graduation, obtain information about public health alumni, professional development, or for any other help they might need related to their academic career at UCI.

Peer Academic Advisors. The Peer Academic Advisors are upper-division Public Health majors who bring with them valuable academic, social, and professional experiences. Their functions include counseling students in matters of major selection, program planning, petitioning, tutoring, learning skills problems, and participation in co-curricular and extracurricular activities. The Peer Advisors are located in the Public Health Student Services Office. Office hours are posted at the beginning of each quarter.

Career Advising

Information on graduate and professional schools in public health can be obtained from the Public Health Student Services Office. The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Career Center (p. 124) section for additional information.

Areas of opportunity open to those with a Bachelor of Science in Public Health Sciences degree include laboratory technology, publishing, technical editing, pharmaceutical sales, and training programs in county, state, and federal agencies. The bachelor’s degree is necessary to pursue studies leading to the M.S. and Ph.D. degrees. The B.S. degree, plus short training periods, may prepare students for employment in education, medical technology (usually one year), allied health positions, and various other areas.

Areas of opportunity open to those with a Bachelor of Arts in Public Health Policy degree include health care administration and planning, lobbying, corporate planning, health promotion, health education (in hospitals, clinics, government agencies, etc.), mental health, chemical dependency, case managing, insurance, health strategizing, fundraising, community organization, and social work. The B.A. degree, plus brief training periods, may prepare students for employment in education, medical technology, counseling, and other areas.

Areas of opportunity open to those with a Bachelor of Arts in Public Health Policy degree include health care administration and planning, lobbying, corporate planning, health promotion, health education (in hospitals, clinics, government agencies, etc.), mental health, chemical dependency, case managing, insurance, health strategizing, fundraising, community organization, and social work. The B.A. degree, plus brief training periods, may prepare students for employment in education, medical technology, counseling, and other areas.

Education (community colleges, state colleges, or private schools), medical illustration, and public health (which includes hospital administration, biostatistics, epidemiology, environmental health sciences, social work, public health education, maternal and child health, and chronic, infectious, and tropical diseases) are fields in which opportunities are available upon completion of a master’s program. Other areas where advanced degrees are necessary include medicine, dentistry, law, nursing, actuary, optometry, podiatry, osteopathy, physical therapy, and veterinary medicine.

Health Sciences Advising

Students desiring to enter the health sciences should have their majors checked in the Public Health Student Services Office. Admissions tests for medical, dental, pharmacy, and graduate schools should be taken in the spring, a year and one-half before the student plans to enter.

Leaders in nearly all health professional schools recommend that students preparing to seek admission to their schools plan to obtain a bachelor’s degree. Students who plan to enter a school of dentistry, medicine, or other areas of the health sciences may receive the required preprofessional training at UCI. This preprofessional training may be accomplished by (1) completing a major in Public Health Sciences and specializing the degree to complete specific course requirements of the dental, medical, or other professional school the student expects to attend, or (2) majoring in any school or department and fulfilling concurrently the specific course requirements of the dental, medical, or other professional school the student expects to attend.

Practicum

A major part of the undergraduate curriculum in Public Health is the Practicum requirement. Public Health Practicum and Culminating Experience (PUBLTH 195W) is an 8-unit required course for students majoring in Public Health Policy or Public Health Sciences. The course allows students to gain hands-on experience at an approved organization in the field of public health. Preparation for the Practicum course requires that each student interview officials at a selected site. There is an online catalog of approved organizations that have agreed to accept, train and supervise Public Health students in the ongoing activities of the organization. Students must choose a placement site listed in the Practicum catalog. Unlisted sites will not be approved for registration. All students are required to spend 100 hours (about 10 hours per week) at the public health organization during the quarter in which they are enrolled in PUBLTH 195W.
Practicum is open only to upper-division Public Health students who are in good academic standing and have completed all prerequisite course work. Practicum must be taken for a letter grade. Additional information, including Practicum enrollment procedures and prerequisites, can be found at the Public Health (http://publichealth.uci.edu) website.

Change of major. Students who wish to change their major to Public Health Sciences or Public Health Policy should contact the Public Health Student Services office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of MajorCriteria (http://www.changeofmajor.uci.edu) website.

Requirements for the Bachelor's Degree
All Program in Public Health students must complete the following requirements.

All students must meet the University Requirements (p. 71).

Program Requirements:
Grade Requirement: A minimum grade point average of at least C (2.0) is required (1) overall, (2) in all courses required for the major program, (3) in the upper-division courses required for the major, and (4) in Public Health 195W.

Residence Requirement: After matriculation, all Public Health courses required for the major must be successfully completed at UCI. The Program in Public Health strictly enforces the UCI residence requirement. At least 36 of the final 45 units completed by a student for the bachelor’s degree must be earned in residence at the UCI campus. (The Program considers courses taken in the Education Abroad Program to be in-residence courses.)

Normal Progress: Students in the Public Health Program are expected to make progress toward their degree, and their progress will be monitored. If normal academic progress toward the degree in Public Health is not being met, students will be subject to probation.

Double Majoring and Minoring
Second majors and/or minors will not be approved unless the student can complete both the degree and double major/minor(s) in their allotted time permitted at UCI. Students must be in good standing and not on academic probation for acceptance as a double major/minor(s).

Students may not enter as a double major, but Public Health students interested in other areas may apply for a double major after their first quarter, if the Public Health Program approves.

Overlap Restrictions
Double Majoring in Public Health Sciences and Public Health Policy. Students may double major in Public Health Sciences and Public Health Policy; however there are only seven courses that may overlap between the two majors. Students may overlap PUBHLTH 1, PUBHLTH 2, PUBHLTH 101, MATH 2A, MATH 2B, STATS 7 or STATS 8, and PUBHLTH 195W. There are no other courses that can count for both majors.

Other Double Majors. In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors.

Major and Minor Requirements. In fulfilling minor requirements, a maximum of two courses may overlap between a major and minor. No course overlap is permitted between minors.

Students may not double major in Public Health Sciences, Pharmaceutical Sciences, Nursing Science, Biomedical Engineering: Premedical, or with any of the School of Biological Sciences majors or minors.

Requirements for the B.S. Degree in Public Health Sciences
All students must meet the University Requirements (p. 71).
All students must meet the P (p. 1414)rogram Requirements (p. 1414).

2. Course content requires approval by the Program.
3. Note additional prerequisites.
4. Taken for upper-division writing credit.

---

### Minor in Public Health

The minor in Public Health provides students with the fundamental knowledge of principles, applications, and skills needed to develop a firm appreciation of health and disease prevention at the population level, and to use this special knowledge to transform the experience of their major education into innovative approaches for solving problems in health care and assessment.

**Teaching and learning.** Public Health education demands interdisciplinary engagement. The minor curriculum is intended to engage students from majors across the campus by introducing them to the main concepts and branches of public health, while also giving them the skills and values needed to translate their major education into meaningful projects in population health assessment and disease prevention. In concert with the major degrees in public health, the minor emphasizes learning through the ecological model of public health where the linkages and relationships among multiple determinants affecting health are examined to identify critical nodes of opportunities to improve the health of populations at various scales of analysis.

**Research.** Public Health education is most firmly embedded in knowledge systems through research and practice. The minor curriculum requires a period of directed or special studies where students have the opportunity to translate their didactic knowledge into tangible projects within the rubric of public health practice.

**Service.** Public Health education also demands community engagement. All students of Public Health are encouraged to incorporate public health impacts and benefit assessments into societal functions that ground their understanding of public problems. Experience in public health service may be acquired through participation in learning opportunities and by reflecting critically on those experiences under the auspices of vigorous campus organizations such as the Public Health Association (http://pha-uci.org).

### Requirements for the Minor

Nine courses are required (36 units), no more than two of which may be taken on a Pass/Not Pass basis, distributed as follows:

#### A. Complete:

- PUBHLTH 1 Principles of Public Health
- PUBHLTH 2 Case Studies in Public Health Practice

#### B. Six upper-division courses in Public Health with at least one from each of four subject-cluster areas as follows:

- **Epidemiology, Genetics, and Health Informatics**
  - PUBHLTH 101–119

- **Health Policy and Management**
  - PUBHLTH 120–139

- **Social and Behavioral Health Sciences**
  - PUBHLTH 140–159

- **Environmental and Global Health Sciences**
  - PUBHLTH 160–179
**Infectious and Chronic Diseases**

**PUBHLTH 180–189**

C. Complete:

<table>

</tr>
</tbody>
</table>

1 Course work must be on topics demonstrably related to public health research and/or practice. The courses selected to fulfill this requirement must have Public Health number designations. Petitions to use alternative courses will be considered on a case-by-case basis.

No more than two courses may overlap between the student’s major degree and the minor in Public Health.

**Residence Requirement:** A minimum of six courses required for the minor must be completed at UCI. Approved courses taken in the UC Education Abroad Program are considered to be in-residence courses.

**Graduate Programs**

The Program in Public Health offers a Master of Public Health (M.P.H.), a Doctor of Philosophy (Ph.D.) in Public Health, and a dual degree M.D./M.P.H. with the School of Medicine. Detailed information about the degree programs follows.

**Master of Public Health**

The distinctive mission of the UCI M.P.H. program is to create a motivated cadre of public health professionals who are prepared to implement effective strategies for reducing the burden of disease and disability in culturally diverse communities, and who are primed to draw from their broad training in the global dimensions of public health principles to lead and work collaboratively on precise assessments of health-risk factors and on the management of evidence-based prevention strategies.

In addition to meeting all the training requirements in the core competency subjects recommended by the Association of Schools and Programs in Public Health (ASPPH), students enrolled in the UCI M.P.H. program will have the opportunity for in-depth pursuit of one of three emphasis areas: Environmental Health, Epidemiology, or Sociocultural Diversity and Health. The M.P.H. is a 60-unit program. A full-time student must enroll in at least 12 units per quarter. Part-time enrollment is also allowed. To maintain residency, part-time students must enroll in four to eight units per quarter. All students are required to complete 240 hours of fieldwork at an approved public health practicum site. The Program is fully accredited by the Council on Education for Public Health (http://ceph.org).

Further information may be obtained from the Public Health (http://publichealth.uci.edu) website, by calling (949) 824-7095, or by sending e-mail to phgo@uci.edu.

**Career Information**

Graduates of the UCI M.P.H. program will find employment in both public and private agencies committed to preventing disease and promoting health in all aspects of society. Earning a graduate degree gives new professionals a competitive edge over students who complete their education at the bachelor’s degree level. In particular, the curriculum of the M.P.H. program at UCI is specifically designed to create students who can combine knowledge of the five core disciplines in public health with leadership, communication, and problem-solving skills to meet the needs of culturally diverse communities. Earning an M.P.H. degree will allow graduates to pursue supervisory positions and career advancement opportunities that may be unattainable without an advanced degree. Students may also wish to combine an M.P.H. with a clinical degree in the health professions to increase opportunities for employment.

Course work in the M.P.H. program can also prepare a student to pursue doctoral programs in public health. The Ph.D. is a research-based degree that prepares the candidate for research and teaching positions in institutions of higher education. The Dr.P.H. is a professional degree that prepares candidates for careers as practitioners in high-level administration or teaching. The UCI Program in Public Health offers a Ph.D. in Public Health with concentrations in Disease Prevention and Global Health. More information about careers and graduate school in public health can be obtained through the ASPPH (http://www.aspph.org/discover) and the Council on Education for Public Health (http://ceph.org).

**General Admission Requirements**

The M.P.H. program accepts students for the fall quarter only. Students are encouraged to begin the application process early to facilitate the timely submission of the application. The deadline for receipt of all application materials for the M.P.H. program is December 15. There are no specific course prerequisites needed to enroll, and the program is open to students with bachelor’s degrees in a variety of disciplines. Individuals from diverse cultural, geographic, and socioeconomic backgrounds are encouraged to apply.

To be eligible to apply for the M.P.H. program, applicants must meet certain minimum academic requirements. Applicants must hold a bachelor’s degree from an accredited academic institution, have earned a minimum grade point average of 3.0 (B average) in undergraduate course work, and possess strong verbal and quantitative skills as reflected by Graduate Record Examination (GRE) General Test scores. Applicants may also submit standardized test scores from the MCAT, GMAT, or LSAT in lieu of the GRE. If the applicant has, from a UC-equivalent university, a Ph.D. in a health-related field, a medical degree, or is currently enrolled in medical school, a test score must be submitted, but the test score’s date does not need to be within the
validity period. Evaluations of applicant files for admission to the M.P.H. program will consist of an assessment of transcripts of previous academic work, standardized graduate admission test scores, statement of purpose, letters of recommendation, and other relevant qualifications. Applicants must choose one of the three available emphases at the time of application.

Applicants must submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission. For more information on admissions, visit the Public Health (http://publichealth.uci.edu) website or contact phgo@uci.edu.

Program Requirements
The M.P.H. is a 60-unit degree program consisting of fourteen courses taken over five quarters. Eight courses must be taken by all students. In addition, students choose three courses in their emphasis and three elective courses. The introductory course in the foundations of public health and the five core competency courses must be taken for a letter grade. Any foundation or core competency courses in which a minimum grade of B is not achieved must be re-taken.

Required Courses. All students begin the program with a four-unit introductory course in the foundations of public health. The five core competency courses, each of which is four units, are Public Health Statistics (PUBHLTH 207), Introduction to Environmental Health Science (PUBHLTH 264), Graduate Epidemiology in Public Health (PUBHLTH 206), Health Policy and Management (PUBHLTH 222), and Health Behavior Theory (PUBHLTH 244). Students must also complete at least two quarters of the Graduate Seminar (PH 291) for two units each quarter, and the Graduate Practicum and Culminating Experience in Public Health (PUBHLTH 295) (eight units).

Emphasis Courses. Three courses (four units each) in one of the three emphases are required. Students choose their emphasis at the time of application and select courses with the help of a faculty mentor in that emphasis.

Elective Courses. Three elective courses (four units each) are required. Students select electives in light of their educational and career goals.

Practicum and Culminating Experience. Students are required to complete a supervised internship of 240 hours while registered in the Graduate Practicum and Culminating Experience in Public Health (PUBHLTH 295). The practicum experience follows the first three academic quarters of study in public health, the completion of all core competency courses, and advancement to candidacy. A compendium of approved practicum sites is available online to enrolled M.P.H. students. The student’s work at the practicum site is expected to culminate in a comprehensive written report.

All M.P.H. students are required to maintain an electronic portfolio to document their academic and practical progress throughout the curriculum. The portfolio facilitates reflection on core and emphasis area competencies defined for the M.P.H. degree. Students are required to give an oral presentation near the end of their studies to demonstrate competence for the degree.

Comprehensive Examination. A two-part comprehensive examination will be administered by the faculty of the student’s area of emphasis in the fall quarter. The normative time to take the exam is in the fall quarter, but it is also offered in the spring by special request. Part one consists of a multiple choice proctored examination on the core competency areas and the cross-disciplinary themes of public health. Part two consists of an analysis of case studies in the student’s area of emphasis. Students must pass both parts of the examination before they can be advanced to candidacy for the M.P.H. degree.

For students enrolled full-time, the normative time for completion of the M.P.H. degree is six quarters, and the maximum time permitted is nine quarters. For students enrolled part-time, the normative time is nine quarters, and the maximum is fifteen quarters. Students admitted with advanced standing due to prior graduate-level training may receive credit for up to one-fifth of the total units required toward the M.P.H. degree, upon petition and demonstration of competency associated with those courses. Such credits are not applicable to the graduate practicum and graduate seminar.

M.D./M.P.H. Dual Degree Program
The M.D./M.P.H. program requires five years for completion. It is aimed at individuals who are seeking a career as physicians concerned about making a significant difference in community disease prevention. Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and an M.P.H. degree from the Program in Public Health.

Students must be currently enrolled in the M.D. program in order to apply to the dual M.D./M.P.H. program. During their second or third year of medical school, interested students submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission. Final acceptance to the program is granted by the Program in Public Health, and M.P.H. coursework begins following the student's third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the M.P.H. program.

The MCAT, along with the completion of three years of medical school training in good standing, currently serve as a waiver for the GRE entrance examination usually required for application to the M.P.H. program. The total number of units required to graduate from each program separately are satisfied in the M.D./M.P.H. program.

Contact the M.D./M.P.H. Student Affairs Officer at 949-824-7095 for more information.
Doctor of Philosophy in Public Health

The distinctive mission of the Ph.D. in Public Health is to train graduate students to conduct original research on the determinants of health status of populations, and the translation of such knowledge to improve strategies for preventing disease and disability. Graduates of the Ph.D. program will be prepared for independent and collaborative research careers, and to teach at advanced levels of instruction. Students enrolled in the Ph.D. in Public Health must concentrate in either Global Health or Disease Prevention.

Concentration in Global Health

The focus of the Ph.D. research concentration in Global Health is to train excellence in research through engagement in hypothesis-driven projects to investigate the global context of disease burden and the improvement of population health status. The program will attract candidates who seek to analyze problems at the intersection of risk, vulnerability, and disease. Activities may include investigation of strategies to make research results that have already produced benefits in one country or region effective in underprivileged regions. The program trains students in integrative expertise essential for global health research with hypotheses in the nexus of content (risk analysis), context (vulnerability assessments), and process (translation of knowledge to reduce the burden of disease).

The specific learning objectives of the Concentration in Global Health are for graduates of the degree to:

1. Demonstrate knowledge of the major theoretical underpinnings of advances in global health research.
2. Explain the relationship between theory and research methods focused on understanding the association of risk, vulnerability, and outcome in global health.
3. Compare and contrast the health status of different populations with respect to their burden of disease.
4. Formulate research hypotheses in the intersection of risk factors, vulnerable populations, and burden of disease.
5. Compose research proposals and conduct original research resulting in discoveries that contribute to improved understanding of risk factors and variations in disease burden in a population, and strategies to alleviate the burden at the global level.

Concentration in Disease Prevention

The focus of the Ph.D. concentration in Disease Prevention is to train excellence in research to discover insights into how human behavior, social constraints, and other contextual factors influence strategies to prevent disease in populations that are vulnerable to risk factors. The program emphasizes the ecological model of disease prevention, with research hypotheses emerging through multi-layered analysis of determinants of health status, including individual, interpersonal, organizational, community, and overarching policy. Students generate the hypotheses for their research in the nexus of risk factors, health behavior, and vulnerable populations.

The specific learning objectives of the Concentration in Disease Prevention are:

1. Demonstrate knowledge of the major theoretical underpinnings of strategies for disease prevention.
2. Explain the relationship between theory and research methods focused on understanding the association of risk, behavior, and vulnerability with respect to disease pathways.
3. Analyze interrelationships among the determinants of illness and maladaptive health behaviors using theories of health behavior.
4. Formulate research hypotheses in the intersection of health risk factors, health behavior, and health promotion and policies toward disease prevention.
5. Compose research proposals and conduct original research resulting in discoveries that contribute to improved understanding of the role of behavior and health promotion strategies in mitigating the vulnerability to health risk factors in specific populations, with the goals of applying the knowledge to disease prevention.

Career Information

The Ph.D. in Public Health prepares graduates to initiate independent and collaborative research careers in academic institutions, to teach at advanced levels of instruction, and to lead research efforts at agencies dedicated to public health at all levels of organization. Graduates of the Ph.D. in Public health will gain employment at research universities, government agencies, or private sector organizations including research institutes, hospitals, and public health foundations.

General Admission Requirements

Students enroll in the Ph.D. in Public Health in the fall quarter of each year. Applicants are encouraged to start the application process early by consulting with faculty members whose research activities align with the applicant’s interests and academic background. The deadline for receipt of all application materials is December 1. Applicants must choose one of the two available concentrations at the time of application. Master’s level degrees in health-related disciplines are the preferred preparation for admission to the Ph.D. in Public Health. Applicants to the Ph.D. in Public Health who come
with undergraduate degrees from other related majors might be required to take supplementary courses in addition to the preparatory module of the Ph.D. program.

All applicants must have an overall grade point average of B (3.0 on a 4.0 scale) or better and take the Graduate Record Examination (GRE) general test. Applicants must meet the general admission requirements of the UCI Graduate Division and submit both the Application for Graduate Admission and the School of Public Health Application Service (SOPHAS) application in order to be considered for admission.

Each Ph.D. student must serve as a teaching assistant for at least two quarters during the graduate program. If English is not the student’s first language, the student must pass a campus-approved oral English proficiency exam prior to serving as a teaching assistant.

For more information on admissions, visit the Public Health (http://publichealth.uci.edu) website or contact phgo@uci.edu.

Program Requirements

A main feature of the Ph.D. in Public Health is the situation of dissertation research in an ecological framework that considers multi-level analysis of public health questions. We integrate this feature in the two concentrations, each with knowledge modules and creative activity that must be satisfied in partial fulfillment of the degree requirements. All Ph.D. students are required to complete a minimum of 88 quarter-units according to the following modules:

1. Preparatory Module: Courses on the following topics:
   a. Development of research proposals (PUBHLTH 288).
   b. Research design (PUBHLTH 297).
   c. Statistical analysis (STATS 201, STATS 202, STATS 203).
   d. Qualitative methods.
   e. Epidemiologic methods (PUBHLTH 205).
   f. Contemporary ethical and regulatory issues governing research in public health (PUBHLTH 292).
   g. Communication of research findings to various audiences (PUBHLTH 294).
   h. Team research through participation in directed research with a faculty research group (PUBHLTH 298).

2. Concentration Module: Seven core courses:
   a. Global Health Research (One course each in Advances in Global Health (PUBHLTH 282), Global Burden of Disease (PUBHLTH 280), International Epidemiology (PUBHLTH 213), and Geographic Information Science (PUBHLTH 283), and two courses each in the thematic areas of Risk Factors and Vulnerable Populations);
   b. Disease Prevention Research (One course each in Health Promotion (PUBHLTH 245), Social Research Methods (PUBHLTH 246), Social Epidemiology (PUBHLTH 208), and Health Behavior (PUBHLTH 244), and two courses each in the thematic areas of Risk Factors and Vulnerable Populations).

3. Research Module: Requires students to:
   a. Establish a dissertation committee of faculty members.
   b. Submit a research proposal and advance to Ph.D. candidacy by defending the proposal.
   c. Consistently enroll in research course units (Students must register for at least three quarters of the dissertation research course (PUBHLTH 296) under the supervision of the Chair of the dissertation committee).
   d. Conduct research under the supervision of faculty member(s) to complete original research.
   e. Submit and defend a dissertation to the faculty committee.

4. Elective Module: elective courses are not designated, and may be used to fill any deficiency in a student’s background or advance knowledge in a particular subject. Students consult with faculty mentor and research dissertation committee to select elective courses, subject to review by the Program’s curriculum committee.

The qualifying examination consists of two parts. The first part is a written test based on the breadth of knowledge of subjects within the Ph.D. concentration. The second part is an oral defense of the student’s research proposal. Students must submit a detailed research proposal to a committee of five faculty members consisting of four members with formal appointments in Public Health, and an external member. Advancement to doctoral candidacy is contingent on passing the qualifying examination. We expect students to sit for the qualifying examination by the beginning of their third
year in the program. Ph.D. completion requires submission of an acceptable dissertation and oral defense. The normative time to degree is six years, and the maximum time permitted is eight years.

**Teaching Requirement**

Students enrolled in the Ph.D. in Public Health are required to serve as Teaching Assistants in public health courses for two quarters during their graduate study. Teaching is an important component of graduate training, as it helps graduate students learn how to communicate effectively about their field of knowledge. In addition, teaching experience is valuable to those planning for a career in academia. Graduate students with comparable prior teaching experience (e.g., through postgraduate degrees earned at UC Irvine or other comparable institution) may request a waiver of the teaching requirement.

**Faculty**

Dean B. Baker, M.D. University of California, San Diego, *Professor of Medicine; Environmental Health Sciences; Program in Public Health*

Scott Bartell, Ph.D. University of California, Davis, *Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology; Social Ecology; Statistics*

Hans-Ulrich Bernard, Ph.D. University of Goettingen, *Professor of Molecular Biology and Biochemistry; Program in Public Health*

Zuzana Bic, Dr.P.H. Loma Linda University, *Lecturer with Security of Employment of Program in Public Health*

Stephen C. Bondy, Ph.D. University of Birmingham, *Professor of Medicine; Environmental Health Sciences; Pharmacology; Program in Public Health*

Brandon J. Brown, Ph.D. Johns Hopkins University, *Lecturer with Potential Security of Employment of Program in Public Health*

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, *Assistant Professor of Program in Public Health; Planning, Policy, and Design*

Bharath Chakravarthy, M.D. Boston University, *Assistant Professor of Emergency Medicine; Program in Public Health*

Wayne Wei Chung Chang, M.D. Saint Louis University, *Health Sciences Associate Clinical Professor of Medicine; Program in Public Health*

Yunan Chen, Ph.D. Drexel University, *Associate Professor of Informatics; Program in Public Health* (medical informatics, human-computer interaction)

Bongkyoo Choi, Sc.D. University of Massachusetts, *Assistant Professor of Medicine; Program in Public Health*

Ralph W. Cygan, M.D. State University of New York Downstate Medical Center, *Health Sciences Professor of Medicine; Program in Public Health*

Robert Detrano, M.D. University of Rome, *Health Sciences Clinical Professor of Radiological Sciences; Program in Public Health*

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, *Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology*

Aviane Forde, J.D. Thomas M. Cooley Law School, *Lecturer of Program in Public Health*

Chad P. Garner, Ph.D. Oxford University, *Associate Professor of Epidemiology; Program in Public Health*

Daniel L. Gillen, Ph.D. University of Washington, *Associate Professor of Statistics; Epidemiology; Program in Public Health*

Elisabeth Gonzalez, Ph.D. University of California, Irvine, *Lecturer of Program in Public Health*

Lisa B. Grant Ludwig, Ph.D. California Institute of Technology, *Professor of Program in Public Health*

F. Allan Hubbell, M.D. Baylor University, *Professor Emeritus of Medicine; Program in Public Health*

Kamyar Kalantar-Zadeh, M.D. University of Bonn, *Professor of Medicine; Program in Public Health*

Michael T. Kleinman, Ph.D. New York University, *Adjunct Professor of Community & Environ Medicine; Environmental Health Sciences; Program in Public Health*

Elliott H. Kornhauser, M.D. University of Toronto, *Health Sciences Professor of Medicine; Program in Public Health*

Cynthia Lakon, Ph.D. University of North Carolina at Chapel Hill, *Assistant Professor of Program in Public Health*

Shahram LotfiPour, M.D. University of Iowa, *Professor of Emergency Medicine; Program in Public Health*

Ulrike Ludrner, M.D., Ph.D. Northwestern University, *Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health* (reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity, ovarian cancer)
Frank L. Meyskens, M.D. University of California, San Francisco, Daniel G. Aldrich, Jr. Endowed Chair and Professor of Medicine; Biological Chemistry; Epidemiology; Program in Public Health

Michael J. Montoya, Ph.D. Stanford University, UCI Chancellor's Fellow and Associate Professor of Anthropology; Chicano/Latino Studies; Culture and Theory; Program in Public Health (social inequality and health, race and ethnicity, social and cultural studies of science, technology, and medicine, participation of ethnic populations in biomedical research, the U.S./Mexican border, critical bioethics)

Dana Mukamel, Ph.D. University of California, Professor of Medicine; Program in Public Health

Andrew Noymer, Ph.D. University of California, Berkeley, Associate Professor of Program in Public Health

Oladele A. Ogunseitan, Ph.D. University of Tennessee, Professor of Program in Public Health; Environmental Health Sciences

Annie E. Ro, Ph.D. University of California, Los Angeles, Assistant Professor of Program in Public Health

Abbas-Jean Roayaei, Ph.D. Florida State University, Lecturer of Program in Public Health

Miryha G. Runnerstrom, Ph.D. University of California, Irvine, Lecturer of Program in Public Health

Terry L. Schmidt, Dr.H.A. Medical University of South Carolina, Lecturer of Program in Public Health; Paul Merage School of Business

Peter L. Schnall, M.D. Stanford University, Health Sciences Clinical Professor of Medicine; Program in Public Health

Tonya L. Schuster, Ph.D. University of California, Riverside, Lecturer of Sociology; Program in Public Health

Behjat Sharif, Ph.D. Southern Illinois University Carbondale, Lecturer of Program in Public Health

Roxane C. Silver, Ph.D. Northwestern University, Professor of Psychology and Social Behavior; Program in Public Health (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)

Lisa Sparks, Ph.D. University of Oklahoma, Adjunct Professor of Program in Public Health

Sharon M. Stern, Ph.D. University of Utah, Senior Lecturer with Security of Employment Emerita of Program in Public Health

Daniel S. Stokols, Ph.D. University of North Carolina at Wilmington, Professor Emeritus of Psychology and Social Behavior; Epidemiology; Planning, Policy, and Design; Program in Public Health (environmental psychology, science of team science, transdisciplinary public health)

David Timberlake, Ph.D. University of California, San Diego, Associate Professor of Program in Public Health; Epidemiology

Veronica M. Vieira, D.Sc. Boston University, Associate Professor of Program in Public Health; Environmental Health Sciences

Lari B. Wenzel, Ph.D. Arizona State University, Professor of Medicine; Program in Public Health

Jun Wu, Ph.D. University of California, Los Angeles, Associate Professor of Program in Public Health; Environmental Health Sciences

Guiyun Yan, Ph.D. University of Vermont, Professor of Program in Public Health; Ecology and Evolutionary Biology; Program in Public Health

**Courses**

**PUBHLTH 1. Principles of Public Health. 4 Units.**
Introduces the major concepts and principles of public health and the determinants of health status in communities. Emphasizes the ecological model that focuses on the linkages and relationships among multiple natural and social determinants affecting health. Course may be offered online.

Restriction: Public Health Sciences, Public Health Policy, and Nursing Science majors have first consideration for enrollment.

**PUBHLTH 2. Case Studies in Public Health Practice. 4 Units.**
Present case studies in various themes of public health practice to demonstrate how the principles of public health were established and continue to evolve.

Prerequisite: PUBHLTH 1.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.
PUBHLTH 7. Introduction to Public Health Statistics. 4 Units.
Introduces the development and application of statistical reasoning and methods in addressing, analyzing, and solving problems in public health, health care, and biomedical, clinical, and population-based research and practice.

Overlaps with SOCECOL 13, STATS 7, STATS 8, MGMT 7.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

(Va)

PUBHLTH 10. Special Topics in Public Health . 2-4 Units.
Introduction to emerging topics in public health. Topics addressed vary each quarter. Course may be offered online.

Repeatability: Unlimited as topics vary.

PUBHLTH 30. Human Environments. 4 Units.
Study of natural and physical components of earth's environmental problems due to human activities. Topics include global air, water, soil, biodiversity, rainforests, energy, demographics, agriculture, and urbanization. Theme is sustainability. Integrated into the science are social, legal, and economic considerations.

(Ii)

PUBHLTH 60. Environmental Quality and Health. 4 Units.
A survey of how pollution in the natural and physical environment affects human health. Topics are toxicology, epidemiology, risk assessment, water, food, air, radiation, pesticides, solid and hazardous waste. Included are interdisciplinary elements of environmental regulations, environmental education, consumer protection.

(Ii)

PUBHLTH 80. AIDS Fundamentals. 4 Units.
Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as BIO SCI 45.

(Ii)

PUBHLTH 90. Natural Disasters. 4 Units.
Natural disasters are natural processes that adversely affect humans. By examining these processes students develop a basic understanding of Earth's physical environment. Topics include: tectonics, earthquakes, volcanoes, landslides, severe weather, flooding, climate change, mass extinctions and impacts with space objects.

(Ii)

PUBHLTH 91. Disparities in Health Care. 2-8 Units.
Student participatory course practicing initiation, planning, and coordination of various speakers on the subject of Disparities in Health Care.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

PUBHLTH 100. Special Topics in Public Health. 4 Units.
Studies in selected areas of public health. Topics addressed vary each quarter. Course may be offered online when topic is Public Health in the Corporate World.

Prerequisite: PUBHLTH 1.

Repeatability: Unlimited as topics vary.

PUBHLTH 101. Introduction to Epidemiology. 4 Units.
The distribution of disease and injury across time, space and populations. Covers basic concepts and methods of descriptive epidemiology including the natural history of disease, data, and indices of health.

Prerequisite: STATS 7 or STATS 8.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.
PUBHLTH 102. Social Epidemiology. 4 Units.
Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10 and SOCECOL 13.
Same as PSY BEH 183S.
Restriction: Psychology and Social Behavior, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 103. Introduction to Genetic Epidemiology. 4 Units.
Examines the methodological approaches for studying the importance of genetic factors and gene-environment interactions in human diseases. Topics include: genetic and epidemiological concepts, population studies, family studies, and applications in medicine and public health.
Prerequisite: PUBHLTH 101.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 104. Analytic and Applied Epidemiology. 4 Units.
 Covers basic concepts of analytic epidemiology and applications, including experimental and observational designs, prevention, screening, treatment and rehabilitation, infectious disease, and injury prevention.
Prerequisite: PUBHLTH 101.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 105. Introduction to Medical Informatics. 4 Units.
Broad overview of medical informatics for students with varied backgrounds. Electronic medical records, online resources, mobile technologies, patient safety, and computational design. Legal, ethical, and public policy issues. Health systems management. Evaluation and fieldwork for health systems.
Same as IN4MATX 171.
Restriction: Upper-division students only.

PUBHLTH 106. Project in Health Informatics. 4 Units.
Students undertake significant quarter-long projects related to health informatics. Topics may include field evaluations of health care technologies, prototypes, iterative design, and system implementations.
Prerequisite: PUBHLTH 105 or IN4MATX 171.
Same as IN4MATX 172.

PUBHLTH 107. Epidemiology of Drug Use and Misuse. 4 Units.
Applies epidemiologic concepts to the use and misuse of licit/illicit substances. Emphasizes descriptive aspects of drug use and determinants of progressing from experimental use to misuse. Assesses subgroups of abusers, risk factors, trends, and surveillance techniques for estimating drug prevalence.
Prerequisite: PUBHLTH 1.
Restriction: Upper-division students only. Public Health Policy and Public Health Sciences majors have first consideration for enrollment.

PUBHLTH 119. Special Topics in Epidemiology and Genetics. 4 Units.
Studies in selected areas of epidemiology and genetics. Topics addressed vary each quarter.
Prerequisite: PUBHLTH 1.
Repeatability: Unlimited as topics vary.

PUBHLTH 120. Nutrition and Global Health. 4 Units.
Global issues related to nutrition and public health. Evaluation of nutritional risk factors associated with the development of chronic diseases and the role of nutritional medicine in prevention. Topics include food safety, communicable diseases, supplements, and regulatory issues.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.
PUBHLTH 121. Introduction to Complementary and Alternative Medicine. 4 Units.
Examines health and disease in contemporary American culture/society with definitions, models, and practices of what has come to be known as "orthodox" or "conventional" medicine. Selected "alternative" or "complementary" modes of promoting health and well-being including homeopathy, herbology, and chiropractic.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 122. Health Policy. 4 Units.
Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as PP&D 170.

Restriction: Urban Studies, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 123. Public Issues in Biotechnology. 4 Units.
An assessment of developments in biotechnology potentially affecting various facets of human society, or warranting significant public debate. Covers the implications of genetic engineering and other biotechnological developments for public health, environment, agriculture, legislation, research ethics, public policy, and commerce.

Prerequisite: PUBHLTH 1 and PUBHLTH 2.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 124. Environmental and Public Health Policy. 4 Units.
Examines factors involved in shaping public health and environmental policy. Topics include the role of science in public health policy, the function of governmental regulatory agencies, citizen participation, and economic and sociopolitical aspects of controlling infectious diseases and regulating carcinogens.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 125. Foundations of Community Health. 4 Units.
A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as PP&D 112.

Restriction: Urban Studies, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

Addresses the relationship of U.S. public health law to health systems at the individual and population levels. Examines legislative and judicial concepts and how they are applied to disease prevention strategies, health services, management, and policy.

PUBHLTH 127. Public Health Programs for the Corporate World. 4 Units.
International perspective on workplace health promotion. Strategies for developing programs to improve employee health and to decrease risks of chronic degenerative diseases. Case studies include assessment of employee health, program design, implementation, and evaluation. Emphasis on disease prevention. Course may be offered online.

PUBHLTH 129. Public Health Administration. 4 Units.
Examines historical aspects of public health administration including policies, procedures, trends, and development of organizations. Addresses information and skills necessary to succeed in public health leadership roles. Discusses strategic planning, collaborations, and ethical considerations for successful management in public health.

Prerequisite: PUBHLTH 1.

Restriction: Upper-division only. Public Health Policy and Public Health Sciences majors have first consideration for enrollment.

PUBHLTH 134. Asian American Community Public Health. 4 Units.
Focuses on major issues and concepts of community health and their application to public health programs for Asian American populations. Analyzes individual, institutional, community, and policy factors that influence a person's health status within a larger environmental context.

Same as ASIANAM 134.
PUBHLTH 139. Special Topics in Health Policy and Administration. 4 Units.
Studies in selected areas of health policy and administration. Topics addressed vary each quarter.
Prerequisite: PUBHLTH 1.
Repeatability: Unlimited as topics vary.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 141. Clinical Health Psychology. 4 Units.
Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSY BEH 141H.
Restriction: Public Health Sciences, Public Health Policy, and Psychology and Social Behavior majors have first consideration for enrollment.

PUBHLTH 142. The Human Pain Experience. 4 Units.
Examines the physiological and sociocultural correlates of human pain perception. Emphasis on laboratory and clinical methods of measuring acute and chronic pain; social influences on the experience and communication of pain; biopsychosocial approaches to pain control.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and any upper-division course from the Health or Pre-clinical Psychology areas.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 143. Social Ecology of Health Promotion. 4 Units.
Core themes of Social Ecology are examined as they apply to major areas of health promotion research and practice. Students attend lectures and work collaboratively on team projects conducted in university and community settings.
Same as SOCECOL 131.
Restriction: Public Health Sciences, Public Health Policy, and Social Ecology majors have first consideration for enrollment.

PUBHLTH 144. Health Behavior Theory. 4 Units.
Introduces theoretical perspectives from the social sciences to understand health behavior from the vantage point of individuals, their interpersonal contacts, communities, and ecological contexts. Application of theory to public health problems is a central focus.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 146. Health Promotion Programs. 4 Units.
Examines ecological perspectives of health promotion programs and risk factors related to mortality/morbidity. Analyzes effectiveness of health promotion strategies and issues in the existing healthcare systems in light of sociocultural beliefs and economical/political conditions.
Prerequisite: PUBHLTH 1.
Restriction: Upper-division students only. Public Health Policy and Public Health Sciences majors have first consideration for enrollment.

PUBHLTH 147. Drug Abuse and Its Prevention. 4 Units.
Theoretical and practical underpinnings of drug abuse and its prevention at the individual and population levels. Students practice developing drug abuse prevention schemes for specific populations. Recent developments in pharmacological and biobehavioral theories of drug dependence are explored.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 148. Public Health Communication. 4 Units.
Theoretical underpinnings and practical applications of communication sciences in public health practice. Techniques of effective communication, including fear appeal and deterrence; social marketing; public-private partnerships; health service delivery; and outreach in rural and urban settings, and for international health strategies.
Prerequisite: PUBHLTH 1 and PUBHLTH 2.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.
PUBHLTH 151. Environmental Psychology. 4 Units.
Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Prerequisite: SOCECOL E8 or SOCECOL 10 or PP&D 4.

Same as PSY BEH 171S, PP&D 151.

Restriction: Urban Studies, Social Ecology, Psychology and Social Behavior, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 159. Special Topics in Social and Behavioral Health Science. 4 Units.
Studies in selected areas of social and behavioral health sciences. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1.

Repeatability: Unlimited as topics vary.

PUBHLTH 160. Environmental Pollution and Remediation. 4 Units.
The study of pollution—its identification, risks, and remediation. Analysis of sources of natural and anthropogenic environmental pollutants using ecological concepts, chemical fate and transport, engineering technologies, economics, and policy to provide understanding and solutions to these problems.

Restriction: Upper-division students only. Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 161. Environmental Geology. 4 Units.
Introduction to geologic principles and applications to environmental problems. Topics include: tectonic processes, earth materials, soils, river processes, groundwater, the coastal environment, slope failures, seismic hazards, mineral resources, and land-use evaluation based on geologic conditions. Examples from case studies.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 162. Human Ecology of Health. 4 Units.
Many human health problems are directly associated with ethnicity, sex, and age. Integrates the science of these issues with anthropology, geography, economics to understand the relationship, management, treatment. Involves lectures and discussions to probe these factors.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 163. Introduction to Environmental Health Science. 4 Units.
Focuses on processes of exposure to environmental toxins/agents and their impact to human health and the environment. Media transport, exposure assessment, susceptibility, behavior, and health effect of several toxins are discussed.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 164. Toxic Chemicals in the Environment. 4 Units.
Explores the sources, transformation, and sinks of toxic chemicals in the environment, and their effects on public health. Covers regulatory issues and design-for-the-environment initiatives to reduce or eliminate the adverse effects of toxic chemicals.

Prerequisite: PUBHLTH 1 and PUBHLTH 2.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 164L. Toxic Chemicals in the Environment Laboratory. 4 Units.
Covers field sampling techniques and laboratory analysis methods for assessing the occurrence and effects of toxic chemicals in environmental compartments, including water, soils, sediments, air, and food resources.

Prerequisite: PUBHLTH 1 and PUBHLTH 2. Prerequisite or corequisite: PUBHLTH 164.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 165. Issues in Potable Water Reuse. 4 Units.
Provides an in-depth study of the treatment and subsequent reuse of wastewater for drinking. Analyzes existing regulations for both drinking water and reuse situations, microbial and chemical contaminants, health concerns and risk assessment.

Prerequisite: SOCECOL E8.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.
PUBHLTH 166. Geographic Information Systems. 4 Units.
Basic geographic, cartographic, and GIS concepts including computer representation of physical, political, statistical, and social aspects of space using vector and grid-based maps. Experience with extensive geographic base map files and databases through use of GIS software (ArcView 3.x).

Same as CRM/LAW C148.

Restriction: Public Health Sciences, Public Health Policy, and Criminology, Law and Society majors have first consideration for enrollment.

PUBHLTH 167. Air Pollution, Climate, and Health. 4 Units.
Introduction to how air pollutants are emitted into the atmosphere, how people are most exposed to air pollutants in developed and developing areas, physical and meteorological processes that affect transport, and the influence of air pollutants on global warming.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 168. Nuclear Environments. 4 Units.
Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as INTL ST 122, SOCECOL E127.

PUBHLTH 169. Human Exposure Modeling. 4 Units.
Indirect methods in estimating human exposure to environmental agents. Topics include air, noise, dermal and ingestion exposure assessment, time-activity and micro-environmental approach, uncertainty and variability analysis, and the use of GIS and remote sensing in exposure assessment.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 170. Introduction to Global Health. 4 Units.
Provides a foundational interdisciplinary understanding of global health issues and their importance to various societal goals, including poverty reduction, economic productivity, and peace promotion. Covers major communicable and non-communicable diseases and demographic patterns of disease burden.

Prerequisite: PUBHLTH 1.

PUBHLTH 171. Human Exposure to Environmental Contaminants. 4 Units.
Introduces origins of human's realization that chemicals in the environment may adversely affect health. Introduces the theory and principles of exposure assessment. Covers estimation of exposure, variability of measures, the way exposure assessment is incorporated into the risk-assessment paradigm.

PUBHLTH 173. Health and Global Environmental Change. 4 Units.
Overview of scientific underpinnings of global environmental change and human health consequences. Provides an understanding of the fundamental dependency of human health on global environmental integrity. Encourages disciplinary cross-fertilization through interaction of students in environmental, health, and policy sciences.

Prerequisite: One upper-division course in environmental science, public health, environmental policy, and/or environmental management.

Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 175. Environmental Modeling and Risk Assessment. 4 Units.
Surveys the general principles, basic mathematical methods, and practices of environmental modeling and human health risk assessment. Topics include advection-dispersion models, risk management, and risk perception. Students conduct an original risk assessment as a final group project.

Prerequisite: MATH 2A and STATS 7.

Concurrent with PUBHLTH 275 and TOX 275.

PUBHLTH 176. War and Public Health. 4 Units.
Explores how war impacts public health both globally and domestically in the United States. Focus on the link between war and the burden that it ultimately places on physical, mental, environmental, and societal health as well as on health systems.

PUBHLTH 179. Special Topics in Environmental and Global Health Science. 4 Units.
Studies in selected areas of environmental and global health sciences. Topics addressed vary each quarter.

Prerequisite: PUBHLTH 1.

Repeatability: Unlimited as topics vary.
PUBHLTH 180. Epidemiology of Infectious Disease. 4 Units.
Examines the distribution of infectious disease and the health and disease risk among human populations. Introduces basic methods for infectious disease epidemiology. Case studies of important diseases, including HIV and malaria, are conducted.
Prerequisite: PUBHLTH 1.

PUBHLTH 189. Special Topics in Infectious Diseases. 4 Units.
Studies in selected areas of infectious diseases. Topics addressed vary each quarter.
Prerequisite: PUBHLTH 1.
Repeatability: Unlimited as topics vary.
Restriction: Public Health Sciences and Public Health Policy majors have first consideration for enrollment.

PUBHLTH 190. Geographical Information Systems for Public Health. 4 Units.
Provides a broad introduction to the use of Geographic Information Systems software to carry out projects for visualizing and analyzing spatial data to address significant issues of health care and policy-planning.
Overlaps with PUBHLTH 166, CRM/LAW C148.
Concurrent with PUBHLTH 283.

PUBHLTH 191A. Seminar: Advances and Challenges in Public Health. 2 Units.
Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.
Grading Option: Pass/no pass only.
Concurrent with PUBHLTH 291A.

PUBHLTH 191B. Seminar: Advances and Challenges in Public Health. 2 Units.
Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.
Grading Option: Pass/no pass only.
Concurrent with PUBHLTH 291B.

PUBHLTH 191C. Seminar: Advances and Challenges in Public Health. 2 Units.
Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.
Grading Option: Pass/no pass only.
Concurrent with PUBHLTH 291C.

PUBHLTH H192A. Public Health Honors Seminar and Thesis I. 4 Units.
Provides an opportunity for selected students to pursue advanced work in research and earn Public Health Honors. Students will conduct their honors research project with faculty through lectures, guest speakers, creating timelines and assignments.
Corequisite: PUBHLTH 199.
Repeatability: May be repeated for credit unlimited times.
Restriction: Public Health Policy and Public Health Sciences graduate students only.

PUBHLTH H192B. Public Health Honors Seminar and Thesis II. 1 Unit.
Students undertake research and summarize results while preparing research grants and practicing oral presentations.
Corequisite: PUBHLTH 199.
Prerequisite: PUBHLTH H192A.
Repeatability: May be repeated for credit unlimited times.
Restriction: Public Health Policy and Public Health Sciences graduate students only.
PUBHLTH H192C. Public Health Honors Seminar and Thesis III. 1 Unit.
Students complete the final writeup of their research project, present their research at conferences/seminars, and write an academic manuscript.

Corequisite: PUBHLTH 199.
Prerequisite: PUBHLTH H192B.

Repeatability: May be repeated for credit unlimited times.
Restriction: Public Health Policy and Public Health sciences graduate students only.

PUBHLTH 193. Ethics and Responsible Conduct of Research in Public Health. 4 Units.
Issues of scientific integrity and satisfies the requirements for training in public health ethics. Includes guidelines for responsible conduct of research, federal and international codes, administrative review and approval, conflict of interest, and privacy and safety of research participants.

Restriction: Public Health Sciences and Public Health Policy majors only. Upper-division students only.
Concurrent with PUBHLTH 292.

PUBHLTH 194A. Clinical and Translational Research Preparatory I. 4 Units.
Provides training for students with an interest in clinical and translational research in the health care setting. Cultivates skills for study design, research literature review, ethics, responsible conduct of research, and cultural competence while emphasizing professionalism and personal responsibility.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Upper-division students only.

PUBHLTH 194B. Clinical and Translational Research Preparatory II. 1-4 Units.
Provides opportunities for students to participate in clinical and translational research through rotations in at least two health care settings. Builds on preparation through the first course (194A) in the sequence to support exploration of various research topics.

Prerequisite: PUBHLTH 194A. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Upper-division students only.

PUBHLTH 194C. Clinical and Translational Research Preparatory III. 4 Units.
Provides opportunities for students to work closely in a particular clinical and translational research setting. Builds on preparation through the didactic instruction presented in first course of the sequence (194A) to support deeper engagement on a particular research topic.

Prerequisite: PUBHLTH 194A. Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: May be repeated for credit unlimited times.
Restriction: Upper-division students only.

PUBHLTH 195W. Public Health Practicum and Culminating Experience. 8 Units.
Provides direct opportunities for Public Health majors to observe and participate in public health activities and/or research; and to cultivate skills for verbal and written communication of contemporary public health topics for an integrative culminating experience.

Prerequisite: PUBHLTH 1 and PUBHLTH 2. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Upper-division students only. Public Health Sciences and Public Health Policy majors only.

PUBHLTH 197. Field Studies in Public Health. 2-12 Units.
For students who may either accompany faculty members on field trips or engage in post-practicum work at a field agency.

Prerequisite: PUBHLTH 1 and PUBHLTH 2.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 12 units.
PUBHLTH 198. Directed Studies. 1-4 Units.
Student participation in a series of research-related activities performed in an individual or small-group setting under the guidance of a faculty advisor.

Prerequisite: PUBHLTH 1.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

PUBHLTH 199. Undergraduate Research. 1-4 Units.
Original research with Public Health faculty. Attendance at regular research group meetings is also generally expected, and a quarterly written report is required. Strongly recommended for students considering research careers and/or graduate degree programs.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

PUBHLTH 200. Foundations of Public Health. 4 Units.
Presents the overarching framework, principles, and core responsibilities of public health research and practice from a multidisciplinary perspective. Provides necessary foundation for further studies toward advanced cross-cutting approaches essential for public health practice.

Restriction: Graduate students only.

PUBHLTH 203. Epidemiology. 4 Units.
Presents descriptive and experimental approaches to the recognition of the causal association of disease in the general population, as these approaches apply to populations using different student designs and models free from the literature.

Same as EPIDEM 203.

Restriction: Graduate students only.

PUBHLTH 204. Biostatistics. 4 Units.
Designed to help students develop an appreciation for statistician's view of the research process, emphasizing biomedical research. Instills an understanding of how statistical models are used to yield insights about data that form evidence-based understanding of the world around us.

Same as EPIDEM 204.

Restriction: Graduate students only.

PUBHLTH 205. Advanced Epidemiologic Methods. 4 Units.
Advanced topics in the design and statistical analysis of epidemiologic studies. Topics include simulation methods, counter-matching and multiphase study designs, missing data, and Bayesian analysis. Published simulation studies are discussed and replicated using the R software package.

Prerequisite: PUBHLTH 101B or STATS 111 or STATS 211.

Same as EPIDEM 217.

Concurrent with PUBHLTH 119.

PUBHLTH 206. Graduate Epidemiology in Public Health. 4 Units.
Presents descriptive and experimental approaches to the recognition of the causal association of disease in the general populations, as these approaches apply to populations using different student designs and models from the literature.

Restriction: Graduate students only.

PUBHLTH 207. Public Health Statistics. 4 Units.
Surveys statistical methods for public health. Topics include descriptive statistics, probability models, likelihood functions, estimation, and hypothesis testing for categorical and continuous data. Student learn to use statistical software to perform epidemiologic data analysis.

Prerequisite: PUBHLTH 203 and MATH 2A.

Restriction: Graduate students only.

PUBHLTH 208. Advances in Social Epidemiology. 4 Units.
Advances understanding of social distribution and social determinants of disease through multiple risk factor models and mechanisms that emphasize developmental and socio-environmental risk factors on mental and physical health across the life span.

Restriction: Graduate students only.
PUBHLTH 209. Methods of Demographic Analysis. 4 Units.
Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.

Same as SOCIOL 226A.
Restriction: Graduate students only.

PUBHLTH 210. Cancer Epidemic and Prevention. 4 Units.
Explores the global burden of various cancers, including geographical and societal distribution. Includes causes, diagnosis, and interactions among genetic, environmental, and behavioral risk factors. Covers major cancer preventative strategies.

Prerequisite: PUBHLTH 203.
Restriction: Graduate students only.

PUBHLTH 211. Public Health Genomics. 4 Units.
Explores the role of genetic predisposition in the occurrence of the human diseases with emphasis on population screening and prevention of disease. Includes interactions between genetic factors and environmental situations, policies, and ethics of population genomics.

Prerequisite: PUBHLTH 203.
Restriction: Graduate students only.

PUBHLTH 212. Intermediate Epidemiology. 4 Units.
Learn to design and conduct epidemiologic studies using common designs. Determine why bias and measurement error arise in observational studies, and how they influence effect estimates. Perform and interpret epidemiologic data analyses using statistical software.

Corequisite: PUBHLTH 207.
Prerequisite: PUBHLTH 203.
Restriction: Graduate students only.

PUBHLTH 213. International Epidemiology. 4 Units.
Explores methodological approaches in the literature on international trials and requires formulation of proposals to answer public health questions of interest in a developing country setting. Students develop case study aims, ideal teams, and budget in an international context.

Restriction: Graduate students only.

PUBHLTH 214. Surveillance Systems. 4 Units.
Surveillance as a fundamental element of the practice of public health is examined in terms of the application and evaluation of monitoring systems. Topics include surveillance of infectious and chronic diseases, environmental constituents, and other indicators of population health.

Prerequisite: PUBHLTH 206.
Restriction: Graduate students only.

PUBHLTH 219. Special Topics in Biostatistics, Epidemiology, and Health Informatics. 4 Units.
Current research in biostatistics, epidemiology, and health informatics. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PUBHLTH 220. Public Health Cost-Effectiveness Analysis. 4 Units.
Examines using cost-effectiveness information to allocate limited resources to maximize health benefits to a population; defining and measuring cost, survival and health-related quality of life; and how to calculate cost-effectiveness using decision trees and Markov simulation models.

Same as PP&D 226.
Restriction: Graduate students only.
PUBHLTH 221. Health Promotion and Planning. 4 Units.
Focuses on health and health care in the United States, but discussion of global health issues and/or international comparisons will be made whenever possible. Considers both the social and economic aspects of health and disease.

Same as PP&D 241.

Restriction: Graduate students only.

PUBHLTH 222. Health Policy and Management. 4 Units.
Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as PP&D 243.

Restriction: Graduate students only.

PUBHLTH 223. Risk Communication. 4 Units.
Examines theory and research related to the communication of scientific information in risk communication contexts, risk perceptions, and behavior as related to decision-making under risk.

Restriction: Graduate students only.

PUBHLTH 224. Public Health Leadership. 4 Units.
Integrates theory and practice of public health leadership through lectures on global health leadership, case studies on leadership issues, and course assignments that include assessment of leadership traits, and development of individual career mission, vision, and values statements.

Restriction: Graduate students only.

PUBHLTH 239. Special Topics in Health Policy and Management. 4 Units.
Current research in health policy and management. Topics vary from quarter to quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PUBHLTH 240. Topics in Environmental Health Promotion and Education. 4 Units.
Focuses on design of intervention strategies dependent on the environmental agent, exposure to assessment, SES, health effects, stakeholders, and support base. Programmatic design includes media selection, communication/education, and pre/post surveys. Analysis of transborder and local environmental health promotion programs.

Restriction: Graduate students only.

PUBHLTH 241. Environmental Policy and Global Sustainability. 4 Units.
Seminar organized around four transcendent questions: does the world value sustainability, what challenges must be met to move toward it, what are the roots of inequality, and is capitalism compatible with sustainability.

Same as SOCECOL 250.

Restriction: Graduate students only.

PUBHLTH 242. Theories of Health Communication. 4 Units.
Explores the concepts, constructs, and theories of communication in health and risk contexts. Examines interpersonal, family, organizational, and mediated communicative processes about health care and conditions from a global perspective.

Restriction: Graduate students only.

PUBHLTH 244. Health Behavior Theory. 4 Units.
Introduces the field of Health Behavior and then segues into major theoretical perspectives. Focus on health behavior change from the vantage point of individual health behavior and theoretical abstraction. Explores how to relate theory to behavior-change intervention programs.

Restriction: Graduate students only.
PUBHLTH 245. Health Promotion Planning. 4 Units.
Introduces strategic planning integral to intervention planning in public health practice and research, emphasizing the fundamental domains of social and behavioral health science and practices. Students develop an intervention plan for a specific health problem, health behavior, and target population.

Restriction: Graduate students only.

PUBHLTH 246. Social Research Methods. 4 Units.
An interactive graduate seminar covering topics related to the research process and study design. Begins with conceptualizing research questions, hypotheses, and then turns to topics in measurement and concludes with experimental, quasi-experimental, and observational study designs.

Restriction: Graduate students only.

PUBHLTH 247. Program Evaluation. 4 Units.
Introduces methods, tools, and procedures for systematic investigation of the effectiveness of programs in health and social services for disease intervention, prevention, and health promotion. Includes development of program evaluation plans, logic models, contextual frameworks, study designs, and data analyses.

Restriction: Graduate students only.

PUBHLTH 248. Fundamentals of Maternal and Child Health - Programs, Problems, and Policy. 4 Units.
Overview of issues facing women, children, and families from a public health perspective. Discusses role of socio-economic, political, biological, environmental factors on population health. Studies historical foundations and current factors impacting Maternal Child Health programs and legislation in the US.

Restriction: Graduate students only.

PUBHLTH 250. Health Status and Care Disparities. 4 Units.
Expert health care providers present viewpoints and interdisciplinary strategies for addressing sociocultural, economic, gender, age, and other disparities in population health status and care provision.

Restriction: Graduate students only.

PUBHLTH 259. Special Topics in Social and Behavioral Health Sciences. 4 Units.
Current research in Social and Behavioral Health Sciences. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PUBHLTH 261. Environmental Hydrology. 4 Units.
Provides an overview of the occurrence, distribution, and movement of water in the environment. Quantitative methods are introduced for analyzing hydrologic processes. Human impacts on water distribution and quality are considered.

Restriction: Graduate students only.

PUBHLTH 262. Earthquakes and Seismic Hazard. 4 Units.
Provides an overview of earthquakes and introduction to seismic hazard. Topics include characteristics and effects of earthquakes, sources of earthquakes, seismic hazard assessment, introduction to earthquake loss estimation and mitigation. California examples are emphasized.

Restriction: Graduate students only.

PUBHLTH 263. Seminar in Paleoseismology. 4 Units.
Provides an introduction to paleoseismology and its applications. Topics include data collection methods, data analysis, earthquakes in different tectonic environments, and applications to seismic hazard assessment and fault characterization.

Restriction: Graduate students only.

PUBHLTH 264. Introduction to Environmental Health Science. 4 Units.
Convergence of agents (chemical, physical, biological or psychosocial) in environment can emerge as diseases influenced bu social, political, and economic factors allowing them to become rooted in society. How these agents from various spheres come together and impact human health.

Same as EPIDEM 264, TOX 264.

Restriction: Graduate students only.
PUBHLTH 265. Advanced Environmental Health Science. 4 Units.
Explores the complex relationships among exposure processes and adverse health effects of environmental toxins focusing on specific chemicals, sources, transport media, exposure pathways, and human behaviors. Techniques of environmental sampling for exposure assessment are discussed.
Same as EPIDEM 265.
Restriction: Graduate students only.

PUBHLTH 269. Air Pollution, Climate, and Health. 4 Units.
Emission of air pollutants into the atmosphere, physical and meteorological processes that affect transport, and influence on global warming. Concepts of how and where people are most exposed, and how exposures and health effects differ in developed and developing regions.
Same as EPIDEM 269, TOX 269.

PUBHLTH 270. Human Exposure to Environmental Contaminants. 4 Units.
Introduces founders of conceptual thought that environmental contaminants can impact health. Theory and principles of exposure assessment, the continuum from emissions of a containment into the environment to evidence of health effects in a population.
Same as EPIDEM 270, TOX 270.

PUBHLTH 271. Health Impacts of Environmental Change. 4 Units.
Seminar on health impacts of environmental change at various scales of analysis. Uses numerical models such as "MIASMA" and "TARGETS" to analyze alternative outcomes of environmental-change scenarios. Presentations from experts are featured.
Restriction: Graduate students only.

PUBHLTH 272. Environmental Health and Quality. 4 Units.
Concepts and principles of environmental health. Focuses on industrial hygiene, water and air quality, noise pollution, and environmental carcinogens. Discusses theory and implementation practices through review of legislative measures and enforcement procedures. Examines social and biological interactions surrounding each topic.
Restriction: Graduate students only.

PUBHLTH 273. Environmental Health, Science, and Policy. 2 Units.
Topics relevant to the field of environmental health, science, and policy are covered in depth. Included are: hazardous and biological pollutants in soil, water, air; remediation technologies; water conflicts; and regulations pertaining to contaminants.
Restriction: Graduate students only.

PUBHLTH 275. Environmental Modeling and Risk Management. 4 Units.
Surveys the general principles, basic mathematical methods, and practices of environmental modeling and human health risk assessment. Topics include advection-dispersion models, risk management, and risk perception. Students conduct an original risk assessment as a final group project.
Prerequisite: MATH 2A and STATS 7.
Same as TOX 275.
Restriction: Graduate students only.
Concurrent with PUBHLTH 175.

PUBHLTH 276. Toxic Chemicals in Environment. 4 Units.
Industrial ecology of toxicants and their impacts on environmental quality and human health. Explores theoretical basis of toxicity thresholds and regulatory issues. Uses classic and contemporary research articles to understand the legacy of traditional toxicants, and to identify emerging threats.
Same as EPIDEM 244.
Restriction: Grad students only or Consent of instructor to enroll

PUBHLTH 277A. Target Organ Toxicology I. 6 Units.
Analysis of responses occurring in 12 organ systems of humans exposed to environmental chemicals at toxic levels; distinctive cellular and tissue structure and physiological function; toxicological responses discussed in terms of phenomena, mechanisms of action, and methods of study.
Same as TOX 206A.
PUBHLTH 277B. Target Organ Toxicology II. 6 Units.
Analysis of responses occurring in 12 organ systems of humans exposed to environmental chemicals at toxic levels; distinctive cellular and tissue structure and physiological function; toxicological responses discussed in terms of phenomena, mechanisms of action, and methods of study.
Prerequisite: PUBHLTH 277A or TOX 206A.
Same as TOX 206B.

PUBHLTH 278. Industrial Toxicology. 4 Units.
Analysis of responsibilities toxicologists have in industry, including product safety generating material safety, data sheets, animal testing, ecotoxicological testing, risk/hazard communication, and assisting industrial hygienists and occupational physicians; emphasis on interdisciplinary nature of industrial toxicology and communication skills.
Prerequisite: (PUBHLTH 277A or TOX 206A) and (PUBHLTH 277B or TOX 206B).
Same as TOX 220.

PUBHLTH 279. Special Topics in Environmental & Occupational Health. 4 Units.
Current research in environmental and occupational health. Topics vary from quarter to quarter.
Repeatability: May be repeated for credit unlimited times.
Restriction: Grad students only

PUBHLTH 280. Global Burden of Disease. 4 Units.
Introduces composite measures of disease burden, including Disability Adjusted Life Years and their use in prioritizing disease burden at local, regional, and global levels. Focuses on WHO's landmark assessments and introduces DISMOD software for specific analyses.
Restriction: Graduate students only.

PUBHLTH 281. Infectious Disease Epidemiology. 4 Units.
Geographical distribution of infectious diseases and the health and disease risk in diverse human populations. Introduces basic methods for infectious disease epidemiology and case studies of important diseases. Includes surveillance, outbreak investigation, emerging pathogens, traditional and molecular epidemiology.
Restriction: Graduate students only.

PUBHLTH 282. Advances in Global Health. 4 Units.
Critical appraisal of advances in taming the global burden of disease. The underlying sectoral determinates of health, and health systems development through multiple frames, including economics, infectious and chronic disease, nutrition, injury, culture, social/political organization, humanitarian emergencies, and international organizations.
Restriction: Graduate students only.

PUBHLTH 283. Geographical Information Systems for Public Health. 4 Units.
Provides a broad introduction to the use of Geographic Information Systems software to carry out projects for visualizing and analyzing spatial data to address significant issues of health care and policy-planning.
Restriction: Graduate students only.

Concurrent with PUBHLTH 190.

PUBHLTH 284. Graduate Field Studies. 2-12 Units.
Field studies with Public Health faculty.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit for 12 units.
Restriction: Graduate students only.

PUBHLTH 285. Global Health Law and Diplomacy. 4 Units.
Extends theory and practice of law and diplomacy from the scope of health to trade, intellectual property, national security, human rights, and environmental protection. Focuses on negotiations that shape and manage the global policy environment for health.
Restriction: Graduate students only.
PUBHLTH 287. Qualitative Research Methods in Public Health. 4 Units.
General introduction to qualitative research methods for investigating public health questions at various scales from community level to global populations. Emphasizes systematic approaches to the collection, analysis, interpretation of qualitative data.

Restriction: Graduate students only.

PUBHLTH 288. Research Proposal Writing in Global Health. 4 Units.
Overview of financial support for research in global health and disease prevention. Collaborative agreements, guidelines for proposal writing, team building, budgeting, peer-review process, and transitioning from proposal to research project implementation.

Restriction: Graduate students only.

PUBHLTH 289. Special Topics in Global Health and Disease Prevention. 4 Units.
Current research in global health and disease prevention. Topics vary from quarter to quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PUBHLTH 290. Special Topics in Public Health. 4 Units.
Studies in selected areas of public health. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PUBHLTH 291A. Seminar: Advances and Challenges in Public Health. 2 Units.
Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191A.

PUBHLTH 291B. Seminar: Advances and Challenges in Public Health. 2 Units.
Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191B.

PUBHLTH 291C. Seminar: Advances and Challenges in Public Health. 2 Units.
Forum for exploring recent advances and challenges in all disciplines of public health research and practice. Features case studies exemplifying the integration of core competencies with cross-cutting interdisciplinary themes of public health.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

Concurrent with PUBHLTH 191C.

PUBHLTH 292. Ethics and Responsible Conduct of Research in Public Health. 4 Units.
Issues of scientific integrity and satisfies the requirements for training in public health ethics. Includes guidelines for responsible conduct of research, federal and international codes, administrative review and approval, conflict of interest, and privacy and safety of research participants.

Restriction: Graduate students only.

PUBHLTH 293. Foundations of Clinical and Translational Science. 4 Units.
Introduces rationale and imperative for clinical translational science and various approaches being developed to speed-up discoveries and their transformation into health care practices. Compares and contrasts current impediments to clinical research with the potential and transformative power of translational science.

Restriction: Graduate students only.
PUBHLTH 294. Research Communication in Public Health. 4 Units.
Strategies for effective writing and oral presentation of research characteristics and results to various audiences. Includes exercises in writing for the public, for scholarly journals, and at conferences.
Restriction: Graduate students only.

PUBHLTH 295. Graduate Practicum and Culminating Experience in Public Health. 8 Units.
Provides opportunities for hands-on experience for graduate students at agencies or organizations engaged in public health practice. Students are matched with placement sites based on academic preparation and students' career goals. The practicum report is integrated into the culminating experience.
Prerequisite: PUBHLTH 200 and PUBHLTH 291.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Master of Public Health students only.

PUBHLTH 296. Doctoral Dissertation Research and Writing. 1-12 Units.
Dissertation research with Public Health faculty.
Prerequisite: Advancement to candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be taken for credit for 12 units.
Restriction: Graduate students only.

PUBHLTH 297. Research Design. 4 Units.
Provides training in research design and methods. Students learn how to evaluate the strength of research findings based on the methods used by a researcher and learn to use lessons from the course to develop a research proposal.
Same as PP&D 297.
Restriction: Graduate students only.

PUBHLTH 298. Directed Studies in Public Health. 2-4 Units.
Directed study with Public Health faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PUBHLTH 299. Independent Study in Public Health. 2-8 Units.
Independent research with Public Health faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PUBHLTH 399. University Teaching. 2-4 Units.
Limited to teaching assistants.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
School of Social Ecology

Valerie Jenness, Dean
5300 Social & Behavioral Sciences Gateway
Social Ecology Student Services: 949-824-6861
Graduate Counseling: 949-824-5918
http://socialecology.uci.edu/

Overview

The School of Social Ecology is an interdisciplinary academic unit committed to scholarly research and instruction that is informed by and contributes to knowledge in the social, behavioral, legal, and health sciences. It promotes discipline and boundary-crossing research and teaching that is inspired by pressing social problems and directed toward the betterment of society. It is committed to the pursuit of theory development, the creation of empirically derived knowledge, the practical application of scholarly knowledge, and civic engagement.

The School is home to three academic departments: Criminology, Law and Society; Planning, Policy, and Design; and Psychology and Social Behavior; offers four undergraduate and eight graduate degrees; and currently has about 2,360 undergraduate majors, 360 graduate students, 61 faculty, and more than 21,000 alumni.

Social Ecology faculty apply scientific methods to the study of a wide array of recurring social, behavioral, and environmental problems and specialize in conducting research “with considerations of use” in society. Among issues of long-standing interest in the School are crime and justice in society, social influences on human development over the life cycle, and the effects of the physical environment on health and human behavior. While the field of ecology focuses on the relationships between organisms and their environments, social ecology is concerned with the relationships between human populations and their environments.

Social Ecology’s faculty is multidisciplinary, including psychologists with a variety of specialties (e.g., developmental, social, and health psychology); criminologists; sociologists; anthropologists; political scientists; lawyers; urban and regional planners; and program evaluation experts. The School’s research and teaching is distinguished by an emphasis on the integration of the concepts and perspectives of these multiple disciplines. This focus is based on the School’s core belief that the analysis and amelioration of complex societal problems requires interdisciplinary efforts.

Many Social Ecology faculty are involved in developing policies and interventions directed toward improving the functioning of individuals, families and other groups, organizations, institutions, and communities. Social Ecology undergraduate students benefit from the multidisciplinary instructional expertise of the School’s faculty in the classroom and are afforded opportunities to engage in field-based and laboratory-based learning, as well, through the School’s well-established and highly regarded Field Study Program. Graduate training in the School of Social Ecology is organized around the study of contemporary problems in the social and physical environment. Emphasis is placed primarily upon theory and research that have implications for policy and intervention. Problems are investigated from the complementary perspectives of a multidisciplinary faculty that includes specialists in social, developmental, clinical, environmental, and health psychology; urban and regional planning and architecture; urban sociology; law; criminology; and environmental health. Graduate students work closely with the faculty in the classroom and in laboratories, as well as collaborating on important research projects that enhance their research skills while advancing knowledge and addressing important societal problems.

Research Facilities

Social Ecology I and II and the nearby Social & Behavioral Sciences Gateway building are wireless environments that house the School’s research centers and feature many facilities for experimental research, such as behavioral assessment laboratories for research in human development, social relations, and legal studies. Behavioral assessment laboratories are used for studying social phenomena such as parent-child interaction, cooperation among children, memory functions, hyperactivity, social support processes, and mock jury discussions.

The School also offers students up-to-date computing facilities, including the state-of-the-art Janice R. Green Instructional Computing Lab, and assistance to ensure that their skills prepare them for either advanced (graduate) work or for the changing needs of today’s workplace, which increasingly demands skills in computing and information technology.

Centers for Research

The Center for Evidence-Based Corrections (CEBC) has administered millions of dollars in state-funded research on juvenile and adult correctional programs, including research on rehabilitation, parole and reentry programs, monitoring of sex offenders, and correctional options for female offenders. CEBC, which consists primarily of Criminology, Law and Society faculty, has become a nexus for policy-oriented research and graduate training. Given the importance of this topic for law and policy, the faculty expects CEBC will also develop close ties with UCI’s new School of Law. More information is available at the Center for Evidence-Based Corrections (http://ucicorrections.seweb.uci.edu) website.

The Center in Law, Society and Culture (CLSC) brings together faculty in the Schools of Social Ecology, Social Sciences, and Humanities who share an interest in the role of social, cultural, and historical factors in the development of law and the importance of social and cultural assumptions in...
understanding and interpreting law. Law and culture has emerged as an exciting area of legal scholarship and UC Irvine already has significant strength in this area. More information is available at the Center in Law, Society and Culture (http://clsc.soceco.uci.edu) website.

UC Irvine has enjoyed a long tradition of innovative, interdisciplinary organizational research that dates back to the founding of the campus in the mid-1960s. The Center for Organizational Research continues that tradition by providing a focal point for organization scholars from Social Ecology, Social Sciences, The Merage School of Business, and The Bren School of Information and Computer Sciences. More information is available at the Center for Organizational Research (http://www.cor.web.uci.edu) website.

The Community Outreach Partnership Center (COPC) is an initiative to apply scholarly research to community needs. COPC leverages campus assets to equip nonprofit organizations with research that increases their capacity to effectively assess needs, analyze issues, build community, and impact change. COPC projects are guided by a commitment to “civic engagement.” This model of applied scholarship is widely embraced by research universities across the country and promotes collaborative approaches to problem solving using applied research, training and instruction, and public outreach to help address issues and support actions which build and sustain healthy communities. More information is available at the Community Outreach Partnership Center (http://sites.uci.edu/copc) website.

The Center for Psychology and Law (CPL) draws together faculty in the Department of Criminology, Law and Society and the Department of Psychology and Social Behavior. UC Irvine has emerged as one of the world’s leading centers for research in the field of psychology and law. The Center’s primary goals are to foster collaboration and communication among academics, legal professionals, policy makers, and the general public, and to address areas of inquiry where social sciences and legal systems intersect. Our mission is to bridge the gap between scientific evidence and public policy. More information is available at the Center for Psychology and Law (http://psychlaw.soceco.uci.edu) website.

New threats such as global terrorist networks, environmental change, and cyber attacks dominate the security agenda. The Center for Unconventional Security Affairs addresses these and other security challenges of the twenty-first century and provides opportunities for student involvement in research and outreach. The Center serves as the hub of a global network of academics and practitioners that study and develop solutions to human and environmental security challenges. Through basic, translational and applied research, we leverage emerging technologies to better understand and meet the most urgent needs of current and future generations. Our innovative education and learning programs inspire, train and develop future leaders and entrepreneurs to further this work throughout their lifetimes. More information is available at the Center for Unconventional Security Affairs (http://www.cusa.uci.edu) website.

The Newkirk Center for Science and Society finds ways to develop and share research knowledge with the public and policymakers so they can make informed decisions on vital policy issues of law, education, environment, health care, crime, and public infrastructure. The Center carries out its mission in several ways: through workshops, colloquia, town hall meetings, distinguished visitors, and communication programs. One area in which the interests of several CLS faculty members overlap with the focus of the Newkirk Center relates to expert testimony and, more broadly, the use (and misuse) of science in legal proceedings. More information is available at the Newkirk Center for Science and Society (http://www.newkirkcenter.uci.edu) website.

In the Community

The Community Outreach Partnership Center (COPC) is an initiative to apply scholarly research to community needs. COPC leverages campus assets to equip nonprofit organizations with research that increases their capacity to effectively assess needs, analyze issues, build community, and impact change. COPC projects are guided by a commitment to “civic engagement.” This model of applied scholarship is widely embraced by research universities across the country and promotes collaborative approaches to problem solving using applied research, training and instruction, and public outreach to help address issues and support actions which build and sustain healthy communities. More information is available at the Community Outreach Partnership Center (http://sites.uci.edu/copc) website.

The Criminology Outreach Program (COP) was established in 1999 to address the needs of under-served students in the community through an education on the legal system. The mission is to create higher-education aspirations for junior high and high school students from neighboring districts that do not send a high proportion of graduates to college. The program acquaints students with college course content and procedures to familiarize them with the issues of student life and intellectual pursuit, and to involve the students in the type of policy debates that occur in the field of criminology. The Criminology Outreach Program emphasizes four elements: critical thinking, writing, library research, and oral presentation skills. More information is available at the Criminology Outreach Program (http://socialecology.uci.edu/pages/criminology-outreach-program-cop) website.

The Field Study Program (SOCECOL 195) is designed to provide students with the opportunity to examine social problems, evaluate the merit of ideas presented in the classroom, and educate students in conducting naturalistic observations and investigations. Students have the opportunity to participate in the ongoing activities of an organization and develop interpersonal as well as technical competencies. Field Study also offers students the opportunity for data collection projects, theory-testing, and social interaction. There are over 215 community partners participating in the program. The students have a major presence in the community with over 900 students completing a minimum of 100 hours each year. In addition, students and community partners seeking an in-depth, three-quarter field study experience focused on civic and community engagement may wish to apply for Advanced Field Study (SOCECOL 195A, 195B, 195C). More information is available at the Field Study Program (http://students.soceco.uci.edu/pages/field-study) website.

The Metropolitan Futures Initiative (MFI) aims to develop and approved understanding of communities and their potential for integrative and collaborative planning and action to ensure a bright future for the region. With initial focus on Orange County and its location within the larger Southern California area, the MFI is a commitment to build communities that are economically vibrant, environmentally sustainable, and socially just by partnering Social Ecology’s world-class, boundary-crossing scholarship with expertise throughout Southern California. More information is available at the Metropolitan Futures Initiative (http://socialecology.uci.edu/mfi) site.
The University of California, Irvine (UCI) is proud to offer a unique research opportunity for advanced undergraduate students studying at Historically Black Colleges and Universities (HBCUs) who are committed to pursuing doctoral education in Criminology, Law and Society (CLS) and Psychology and Social Behavior (PSB), the **Summer Research Program in Social Ecology**. The eight-week program at the UCI campus provides summer scholars with hands-on research experience, participation in graduate-style seminars, and experience disseminating scholarly research in academic forums. This program aims to build relationships with HBCU campus communities (faculty and students), strengthen pathways to graduate and professional programs at UCI, and promote academic careers. More information is available at the Summer Research Program (http://socialecology.uci.edu/mfi) website.

### Honors, Awards, and Scholarships

**Graduation with Honors.** Honors at graduation will be awarded to approximately 12 percent of the graduating seniors who have completed at least 72 units at a University of California campus by the end of the final quarter prior to graduation, including approximately 1 percent *summa cum laude*, 3 percent *magna cum laude*, and 8 percent *cum laude*. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. For more information about honors criteria contact the Social Ecology Student Services Office at (949) 824-6861 or visit the Social Ecology (http://students.socceco.uci.edu/pages/frequently-asked-questions-faqs) website. Other important factors are also considered visit at Honors Recognition (http://catalogue.uci.edu/informationforadmittedstudents/academicadvisingandhonors/#honorsopportunitiestext).

**Dean’s Honor List.** Quarterly recognition for students who earned a 3.5 grade point average while carrying a minimum of 12 graded units. Recognition is noted on the student’s transcript.

**Dean’s Award for Community Engagement.** This award recognizes students who demonstrate both scholarly achievement and community service participation.

**Fudge Family Foundation Scholarship.** Two scholarships are awarded to students who have a strong academic record and who have established financial need because they are self-supporting or have other personal hardships that would make it difficult for them to complete their studies without this assistance.

**School Awards.** The School of Social Ecology recognizes the most outstanding undergraduate and graduate students for their academic achievements, contributions to the School, and service to the campus and community.

**Social Ecology Honors Program.** The Social Ecology Honors Program provides the opportunity for selected School of Social Ecology students to pursue advanced independent study. Admission to the program is based on formal invitation and an application submitted by the prospective student in the spring quarter of the junior year. In order to be considered, a student must have satisfied the following requirements: completion of all lower-division Social Ecology courses required for the major; completion of at least five upper-division Social Ecology courses with a grade point average of at least 3.5 in these courses; and achievement of an overall grade point average at UCI of at least 3.2. Acceptance into the program is based upon evidence of the student’s ability, interest in research, and proposed thesis project. Successful completion of the program requires three quarters, including supervised independent work on a thesis research project (SOCECOL H190A-SOCECOL H190B) and written and oral presentation of an honors thesis (SOCECOL H190W).

**Excellence in Undergraduate Research Award in Honor of Gilbert Geis.** This award was created to encourage and support undergraduate students interested in research related to Criminology, Law and Society.

**Michelle Smith Pontell Memorial Fellowship.** This award is given annually to a graduate student in the Department of Criminology, Law and Society for excellence in both research and course work.

**Outstanding Achievement in Field Study.** This award recognizes students who have gone “above and beyond” in their field study placements and/or who have completed an exceptional academic project as part of their field study.

**Strauss Scholarship.** This scholarship is awarded to a junior who is planning for a career in public service.

- School Requirements (p. 1446)
- B.A. Social Ecology (p. 1447)
- Social Ecology minor (p. 1448)
Undergraduate Program

The School of Social Ecology offers either a general interdisciplinary degree in Social Ecology or a more focused experience through degree programs in Criminology, Law and Society; Psychology and Social Behavior; and Urban Studies.

Change of Major. Students who wish to change their major to one offered by the School should contact the Social Ecology Student Services Office for information about change-of-major requirements, procedures and policies. Information is also available at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website.

Career Opportunities

Graduates of the School of Social Ecology bring a distinctive cross-disciplinary perspective to the job market. The School provides a solid foundation for those students who seek jobs in planning departments, mental health settings, educational institutions and a variety of community and governmental agencies, including, for example, criminal justice agencies. Many Social Ecology students find that their interdisciplinary training is also useful for careers in public management, law and business.

The School also provides useful preparation for students who wish to apply to graduate and professional schools of law, public policy/public administration, public health, social welfare, psychology, sociology, criminology and urban planning.

The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library and workshops on resume preparation, job search and interview techniques. Additional information is available in the Career Center (p. 124) section.

Field Study

From criminal justice agencies to elementary schools to nonprofit agencies to local cities, counties and beyond, Social Ecology students have the opportunity to take what they learn in the classroom out into the community, effectively serving our communities and enhancing the value of their education. The Field Study program is a unique experiential learning program for undergraduates in Social Ecology and a key element of the School’s commitment to training future leaders. The general goal of Field Study is to integrate academic and experiential learning. This approach is based on evidence that learning is maximized when it is active, when students are engaged and when theories and research are informed by their application to “real world” problems. Students reflect on how to apply what they have learned in the classroom to address societal challenges in a seminar led by ladder rank faculty. At the same time, through fieldwork with one or more of the School’s 225-plus community partners, students gain pre-professional experience and develop their resume along with their academic and research skills. The settings provided for field study include a wide range of problem-oriented institutions and agencies in both the private and the public sector (e.g., Orange County Public Defender’s Office; California State Parks; United Cerebral Palsy of Orange County; primary and secondary schools; Fairview Development Center; planning, law enforcement, legal and design corporations). Students must select a placement site from those listed and approved by the School of Social Ecology. Unlisted or inappropriate placements, as well as those that could give the appearance of nepotism or preferential treatment, will not be approved. Departmental approval for field study will be determined by the Field Study Director.

Field study is open only to upper-division School of Social Ecology students who are in good academic standing and have completed all prerequisite course work. All field studies are taken on a Pass/Not Pass grading basis. Further information, including field study sign-up procedures and prerequisites, is available at the Field Study Program (http://fieldstudy.soceco.uci.edu) website.

Advanced Field Study

Advanced Field Study offers a small number of undergraduate students in the School of Social Ecology an in-depth, three-quarter field study experience focused on civic and community engagement. Students work together with a local community, government, or business organization to prepare a professional research client report which helps the organization better understand the social or community problems it hopes to address, helps inform the organization’s strategic goals, and/or helps enhance the organization’s operations or services. Students draw upon academic training, local insights of people living and working in the community, personal reflections, and in-class discussions to guide these problem-solving efforts and other civic education experiences. Advanced Field Study embodies the School’s commitment to engaged scholarship, developing interdisciplinary approaches to social problems, and improving and making positive and lasting contributions to communities. Students must apply for acceptance into the program. Application materials are available on our Field Study Program (http://fieldstudy.soceco.uci.edu) website.

Planning a Program of Study

Because there are many alternative ways to plan a program, some of which may require careful attention to specific major requirements, students should consult with the Social Ecology Student Services Office, 102 Social Ecology I, to design an appropriate program of study.

Students who elect one of the majors in the School of Social Ecology in their freshman year might begin by taking the introductory courses required by their major. It is a good idea to take these courses early because they include fundamental concepts that are widely applicable in more advanced courses. In addition, the lower-division writing requirement of the general education requirement (category I) should be completed during the first year. In the sophomore year, the student might complete three courses toward the general education requirement, four courses in their major, and four electives. Students who are planning to go on to graduate school can use their freshman and sophomore years to advantage by taking courses in theory, research methods, statistics and other areas important to graduate study. In the junior and senior years, the student should take courses in the major area and should create an individualized program of study through a combination of courses and course modules which fall in an area of interest. Particular
attention should be paid to planning a program of study that will ensure that major requirements are met prior to graduation. In the plan, students are encouraged to include core courses for their major in their junior or early in their senior year.

**Additional Curricular Options**

Students in the School of Social Ecology may combine their course work with the following University programs and should consult an academic counselor for further information.

**Campuswide Honors Program**

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; or visit the Campuswide Honors Program (http://www.honors.uci.edu) website.

**School of Education**

Students who plan to obtain a teaching credential or a higher degree in the field of education should consult with counselors in the UCI School of Education early in their college career. Students completing a degree program in the School of Social Ecology may qualify for a waiver of the Single Subject Credential Examination. For additional information about teaching credentials, refer to the School of Education (p. 414) section.

**UC Education Abroad Program**

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the UC Education Abroad Program (EAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges in countries throughout the world. Visit the Study Abroad Program (http://www.studyabroad.uci.edu) website for additional information.

**Interdisciplinary Minors**

These minors are available to all UCI students. Information is available in other sections of the Catalogue, as noted.

- **The minor in Civic and Community Engagement** seeks to provide students with the knowledge, skills, attitudes and values to engage as citizens and active community members in the twenty-first century. The minor is distinguished both by what students learn, and by how they learn it. See the Interdisciplinary Studies (p. 1081) section for information.

- **The minor in Conflict Resolution** provides skills in conflict analysis and resolution and a useful understanding of integrative institutions at the local, regional and international levels. See the School of Social Sciences (p. 1877) section for information.

- **The minor in Global Sustainability** trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See the Interdisciplinary Studies (p. 1081) section for information.

- **The minor in Native American Studies** is an interdisciplinary, interschool program which focuses on history, culture, religion and the environment. See the Interdisciplinary Studies (p. 1081) section for information.

**Requirements for the Bachelor’s Degree**

All students must meet the University Requirements (p. 71).

**School Requirements**

A. Three lower-division courses

<td>Advanced Field Study</td>
</tr>
</tbody>
</table>

¹ Students majoring in Psychology and Social Behavior are required to take PSY BEH 11A, PSY BEH 11B, PSY BEH 11C as a departmental requirement, in lieu of SOCECOL E8 or PP&D 4, PSY BEH 9 or PSY BEH 11B or PSY BEH 11C, and the additional upper-division course.

**Departmental Requirements: Refer to individual departments.**

**Grade Requirement**

A minimum grade average of at least C (2.0) is required (1) overall; (2) in all courses required for the major program, including the School requirements; and (3) in the upper-division courses required for the major.

**Overlap Restrictions**

**Double Majors.** In order to double major within the School of Social Ecology, major requirements must be met for both majors without any overlap of upper-division courses.

**Other Double Majors.** In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors.

**Major and Minor Requirements:** In fulfilling minor requirements, a maximum of two courses may overlap between a major and a minor. No course overlap is permitted between minors.

**Undergraduate Major in Social Ecology**

**Requirements for the B.A. Degree in Social Ecology**

All students must meet the University Requirements (p. 71).

All students must meet the School Requirements (p. 1446).

**Requirements for the Major**

Ten upper-division courses (40 units) as specified below:

A. Three courses (12 units)—one course (numbered 100–193) selected from each of the three departments—Criminology, Law and Society; Planning, Policy, and Design; and Psychology and Social Behavior.

B. Seven additional courses (28 units) selected from Social Ecology or the departments of Criminology, Law and Society; Planning, Policy, and Design; and Psychology and Social Behavior. Course prerequisites established by the individual departments must be satisfied.

Students may petition to have two SOCECOL 199 courses (total of 8 units) count toward upper-division major credit, provided that the courses (1) were taken for a letter grade; (2) required a written term paper or research presentation at an academic conference; and (3) were taught by a Social Ecology
faculty member whose name appears on a list maintained in the Social Ecology Student Services Office. Students may also petition graduate courses (numbered 200–209) to fulfill upper-division major requirements.

**Social Ecology Minor Requirements**

### A. Three lower-division courses (12 units)

<table>

### B. Six upper-division courses (24 units): (see exceptions below)

Three courses (12 units). One upper-division course (numbered 100-196) selected from each of the three departments—Criminology, Law and Society; Planning, Policy and Design; and Psychology and Social Behavior.

Three additional courses (12 units). Selected from Social Ecology or the departments of Criminology, Law, and Society; Planning, Policy and Design; and Psychology and Social Behavior. Course prerequisites established by the individual departments must be satisfied.

NOTE: Students pursuing a major in the School of Social Ecology may not use upper-division coursework for both school major or minor requirements. No overlap is permitted. SOCECOL 198 and SOCECOL 199 may not be applied toward the minor.

**Graduate Programs**

Graduate training in the School of Social Ecology is organized around the study of contemporary problems in the social and physical environment. Emphasis is placed primarily upon theory and research that have implications for policy and intervention. Problems are investigated from the complementary perspectives of a multidisciplinary faculty that includes specialists in social, developmental, clinical, environmental, and health psychology; urban and regional planning, public policy, and architecture; urban sociology; law and society; and criminology.

Among issues of long-standing interest in the School are crime and justice in society, social influences on health and human development over the life course, and the effects of the physical environment on health and human behavior. The graduate curriculum emphasizes an interdisciplinary orientation, training students to draw upon the knowledge offered by several of the traditional academic fields in order to examine important social, legal, and environmental problems from a perspective of breadth as well as depth.

The School offers M.A., M.A.S., M.P.P., M.U.R.P., and Ph.D. degree programs. Doctoral students have the opportunity to pursue an individualized course of study in the principles and methods of social ecology for the Ph.D. in Social Ecology, a concentration in Epidemiology and Public Health, or a concentration in Environmental Analysis and Design. Additional degree programs offered are as follows: Ph.D. in Criminology, Law and Society; Ph.D. in Planning, Policy, and Design; and Ph.D. in Psychology and Social Behavior. Master’s degrees include the M.A. in Social Ecology; the M.A. in Social Ecology with a concentration in Demographic and Social Analysis; the Master of Advanced Studies (M.A.S.) in Criminology, Law and Society (an online degree program); the Master of Public Policy (M.P.P.); and the Master of Urban and Regional Planning (M.U.R.P.). In addition, many students in the Ph.D. programs in Criminology, Law and Society and in Psychology and Social Behavior obtain an M.A. in Social Ecology on the way to their Ph.D.

Social Ecology faculty members apply diverse methods of scientific inquiry to study social, behavioral, and environmental problems. Evaluation research, legal research, questionnaire and survey methods, field research, naturalistic observation, and quasi-experimental techniques receive emphasis along with behavioral laboratory experimentation. Collaborative research with faculty members is an important component of graduate education in the School.

A sampling of faculty research and teaching interests includes human stress; health promotion; biobehavioral bases of health and illness; program evaluation; economic change and behavioral disorders; a typical child development; adaptive aging; end-of-life medical decision-making; violence and aggression; legal sanctions and deterrence; the socio-cultural context of law; white-collar and organized crime; gangs; police work; wrongful conviction/miscarriages of justice; transitions to parenthood; personality and psychopathology; effects of chemical and social environments on early child development; urban growth management and policies; transportation policies; poverty and homelessness; community design and development; regional economic development; the use of scientific information in public policy formation and litigation; and the health impacts of work environments.

**Admission**

Students should submit their complete application file including the application form, transcripts, three letters of recommendation, and Graduate Record Examination (GRE) scores (see exceptions below) by December 15 if they are applying to the Psychology and Social Behavior, Criminology, Law and Society, or Social Ecology Ph.D. program and by January 15 if they are applying to the Planning, Policy, and Design Ph.D. program.

GRE scores are not required for applicants to the M.A.S. in Criminology, Law and Society. However, applicants may submit them if they believe the scores will strengthen their file. Applicants must answer a short writing question provided by the M.A.S. Director and Admissions Committee. The deadline for M.A.S. applications is March 1 and specific program information is available at the M.A.S. in Criminology, Law and Society (http://
The student’s dissertation plan has been approved by the candidacy committee appointed by the School of Social Ecology, on behalf of the Dean of the A student may be formally advanced to candidacy for the Ph.D. degree when all requirements except the dissertation have been completed, and when Each incoming Ph.D. student is assigned a faculty advisor with whom the student should meet at least once every quarter to discuss an individualized and physical health across the life course. The normative time for completion of the Ph.D. degree is either five or six years, depending upon the specific skills, and special expertise to such issues as environmental design; urban and regional planning; criminal justice; and social policies affecting mental qualified for employment in private or government agencies, where they can bring advanced academic training, strong methodological and statistical The doctoral programs offered by the School of Social Ecology prepare students for academic careers in research and teaching. Graduates also are well Career Opportunities
Ph.D. graduates enjoy a wide variety of career opportunities and have succeeded in obtaining positions in academic institutions such as Stanford University; Rutgers University; Johns Hopkins University; Temple University; University of California, Los Angeles; University of California, San Diego; University of Colorado; University of Kansas; University of Minnesota; University of Oregon; University of Wisconsin; Indiana University; Carnegie-Mellon University; University of Texas at Austin; Arizona State University; and City University of New York. Other graduates have established research and administrative careers in government agencies and private firms throughout the United States and Canada, including National Institutes of Health; Toronto Department of Public Health; Environmental Protection Agency; Centers for Disease Control; Food and Drug Administration; U.S. Department of Agriculture; Metropolitan Water District; Air Resources Board; Orange County Department of Health Services; United Cerebral Palsy Foundation; Philadelphia Geriatric Center; New Mexico Tumor Registry; Orange County Superior Court; Southern California Metropolitan Water District; and in marketing and research firms such as the Yankelovich Group and McGuire Environmental Consultants. Master of Urban and Regional Planning graduates are employed in top urban planning consulting firms and in cities and counties throughout California and beyond.

Master’s Programs
M.A. in Social Ecology
The M.A. degree in Social Ecology option is available to those students who have been admitted to one of the Ph.D. degree programs in Criminology, Law and Society; Psychology and Social Behavior; or Planning, Policy, and Design. In very rare circumstances a student may be admitted directly to the M.A. degree program in Social Ecology. Consult with the Graduate Student Services Office before submitting an application or for additional questions; telephone (949) 824-5918.

Each M.A. degree student is assigned a faculty advisor with whom the student discusses an individual program of education. The M.A. degree program in Social Ecology requires a thesis and satisfactory completion of seven approved courses (28 units), including the Seminar in Social Ecology (SOCECOL 200), Research Methods (CRM/LAW C201, PSY BEH P201, PP&D 297, or equivalent), and at least one additional approved course in statistics or methodology. Other courses should be selected with regard to the student’s academic and career objectives, and must be approved by the faculty advisor. The seven required courses must include at least five graduate courses and must be exclusive of any directed study, independent study, or thesis courses (SOCECOL 298, SOCECOL 299, or SOCECOL 295). A grade of B or better must be achieved in all courses. Students are advanced to candidacy for the M.A. degree, and a thesis committee is appointed, after a review of their graduate work and thesis plans by a faculty committee.

M.A. in Social Ecology with a Concentration in Demographic and Social Analysis
The M.A. in Social Ecology with a concentration in Demographic and Social Analysis offers training in the practical research skills needed to address analytical problems confronting society, business, government, and the nonprofit sector. The concentration emphasizes the Pacific Rim and issues defining Southern California’s population, such as immigration, changing household and family structure, racial and economic inequalities, and the impact of local and regional population growth. Informed by the interdisciplinary field of demography, the program draws on faculty and courses in the Schools of Social Ecology and Social Sciences.

The concentration in Demographic and Social Analysis offers the option of additional professional certification for doctoral students already admitted to the School of Social Ecology. Admission, core course, and thesis requirements are identical to those for the general M.A. in Social Ecology. In addition, students must complete 12 units of designated electives in population issues or research methods. Up to two upper-division undergraduate courses may be approved to fulfill the elective requirement. Students interested in this concentration should call the Graduate Student Services Office at (949) 824-5918 for more information.

Ph.D. Programs
The doctoral programs offered by the School of Social Ecology prepare students for academic careers in research and teaching. Graduates also are well qualified for employment in private or government agencies, where they can bring advanced academic training, strong methodological and statistical skills, and special expertise to such issues as environmental design; urban and regional planning; criminal justice; and social policies affecting mental and physical health across the life course. The normative time for completion of the Ph.D. degree is either five or six years, depending upon the specific program.

Each incoming Ph.D. student is assigned a faculty advisor with whom the student should meet at least once every quarter to discuss an individualized program of graduate education.

A student may be formally advanced to candidacy for the Ph.D. degree when all requirements except the dissertation have been completed, and when the student’s dissertation plan has been approved by the candidacy committee appointed by the School of Social Ecology, on behalf of the Dean of the
Graduate Division and the Graduate Council. The student will appear before this committee for an oral examination. The dissertation plan will include a thorough examination of the history of the problem being proposed for investigation, its current status, the way in which the proposed research will further knowledge, a detailed specification of the proposed method of investigating the problem, and a description of the planned methods for analyzing the data collected. The normative time for advancement to candidacy is either three or four years, depending upon the program. In no case will students be allowed to advance to candidacy after the end of their fifth year of study.

Formal advancement to candidacy for the Ph.D. degree will be approved by the Dean of the Graduate Division upon recommendation by a unanimous vote of the student’s candidacy committee. Alternatively, the committee may recommend a course of action to strengthen the student for advancement to candidacy at a future date. When the student is advanced to candidacy, a doctoral committee will be appointed on behalf of the Graduate Council. The doctoral committee, ordinarily consisting of three members of the faculty, will supervise the preparation and completion of the doctoral dissertation. The dissertation should be completed and accepted within one to two years, and no later than three calendar years after the student’s advancement to candidacy.

All Ph.D. students who have not been advanced to candidacy will be formally evaluated by members of the Social Ecology faculty at the end of each year. At that time, the faculty may recommend that the student continue toward the Ph.D. degree, complete the M.A. degree only, or cease graduate studies in the School. A negative evaluation at this point is evidence of failure to maintain satisfactory academic progress. Evaluation of Ph.D. students who have advanced to candidacy is the responsibility of the student’s doctoral dissertation committee.

**Ph.D. in Social Ecology**

The Ph.D. program in Social Ecology allows students to develop a tailored course of graduate study that draws upon the knowledge of several traditional academic disciplines. This is a small distinguished program intended for genuinely interdisciplinary doctoral students. The emphases of this training program are in keeping with the academic mission of the School, namely, its emphases on an ecological approach to research and policy, an interdisciplinary approach to research and community intervention, and the application of theory and research to community problem solving. Students are encouraged to integrate the diverse theoretical and methodological insights of several disciplines in order to analyze important social and environmental problems from a perspective of breadth as well as depth. In doing so, students gain familiarity with the classic and contemporary literature in social ecology and with the application of the ecological paradigm, as it has evolved in the natural and behavioral sciences. This program is ideally suited for independent students who wish to develop a unique interdepartmental program of study in consultation with faculty from several departments.

Each incoming student takes Seminar in Social Ecology (SOCECOL 200), Research Methods (CRM/LAW C201, PSY BEH P201, PP&D 297, or equivalent), two approved quarters of graduate-level statistics from the Data Analysis, SE 264A and SE 264B, one additional approved research methods or statistics course, and a minimum of six elective courses, chosen in consultation with the faculty advisor. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Students are encouraged to become involved in research in their first year of study by participating in the research projects of the faculty. Students complete a supervised research project before they begin work on their doctoral dissertation. Research is broadly construed to include experimental methods, questionnaire and interview studies, systematic field observation, secondary analyses, and legal analyses. This predissertation research project should be completed during the second year in residence and must be evaluated and approved by a committee of three faculty members.

Students complete the breadth requirement during their third year of study. This is accomplished through successful completion of either a written comprehensive examination or the submission of a major paper or series of papers that intensively examine specific substantive problems and bodies of research. Preferably, the perspective taken should be multidisciplinary, but a single disciplinary approach is acceptable if it is more congruent with the student’s educational goals and is acceptable to the student’s committee. Each student’s plans for completing the breadth requirement are developed in collaboration with a committee of three Social Ecology faculty members. Students are encouraged to meet with this committee as early as possible during their graduate career and are required to do so no later than the third quarter of their second year. When the student’s plans have been approved and implemented, the examining committee will determine whether the breadth requirement was successfully completed, and will recommend additional academic work if it is deemed necessary. The normative time for advancement to candidacy is three years. The fourth, and possibly fifth, years of study are devoted to developing and defending a dissertation proposal and conducting dissertation research.

**Ph.D. in Social Ecology with a Concentration in Environmental Analysis and Design**

The doctoral concentration in Environmental Analysis and Design prepares students to conduct research on questions of vital importance to professionals in environmental analysis and evaluation and on related questions on the formulation of environmental and health policy. These questions reflect an overarching concern with the effects of the natural and built environments on the health and social well-being of humans.

This doctoral concentration particularly focuses on insights from a social ecological perspective. One of the concentration’s strengths is its research sequence which spans the disciplines within the School. Students are encouraged to take classes across the campus to improve their knowledge of related fields as well.

Students conduct analyses of sociocultural, behavioral, biological, chemical, and physical factors that influence health and well-being of humans, including public and private sector policy as well as the environment as a whole. They are also trained to evaluate the effectiveness of interventions designed to enhance the health of individuals and the community as a whole. The curriculum and diversity of faculty within the concentration afford unique opportunities for multidisciplinary research and training.
Potential employment sources for graduates include academic and research institutions; state and federal agencies; policy-making organizations; national, community, and workplace health-promotion programs; and a diverse range of consulting firms ranging from engineering to design.

Each incoming student takes the five core courses required of most Ph.D. students, noted earlier, and eight elective courses drawn from the focal areas within this concentration. The elective courses cover topics such as environmental health risks, behavioral epidemiology, demography, and technological hazards and change. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Students are expected to become involved in research activities in their first year of graduate study. Students complete a supervised research project before they begin work on their doctoral dissertation. This predissertation research project should be completed during the second year in residence (preferably by the end of the winter quarter of the second year). The research project must be evaluated and approved by a committee of three faculty members. Students complete the breadth requirement, described earlier, during their third year of study. The normative time for advancement to candidacy is three years. The fourth and fifth years of study are devoted to developing and defending a dissertation proposal and conducting dissertation research.

Faculty

Dean B. Baker, M.D. University of California, San Diego, Professor of Medicine; Environmental Health Sciences; Program in Public Health

Mario Barnes, LL.M. University of Wisconsin-Madison, Professor of School of Law; Criminology, Law and Society (criminal law, constitutional law, critical race theory)

Scott Bartell, Ph.D. University of California, Davis, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology; Social Ecology; Statistics

Mary V. Basolo, Ph.D. University of North Carolina at Chapel Hill, Associate Professor of Planning, Policy, and Design

Susan C. Bibler Coutin, Ph.D. Stanford University, Associate Dean of the Graduate Division and Professor of Criminology, Law and Society; Anthropology; Culture and Theory (law, culture, immigration, human rights, citizenship, political activism, Central America)

Arnold Binder, Ph.D. Stanford University, Professor Emeritus of Criminology, Law and Society (research methodology, juvenile delinquency, police organization and methods)

Bruce Blumberg, Ph.D. University of California, Los Angeles, Professor of Developmental and Cell Biology; Biomedical Engineering; Environmental Health Sciences; Pharmaceutical Sciences (gene regulation by nuclear hormone receptors in vertebrate development physiology, endocrine disruption)

Scott A. Bollens, Ph.D. University of North Carolina at Chapel Hill, Drew, Chace and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation and Professor of Planning and Policy, and Design

Stephen C. Bondy, Ph.D. University of Birmingham, Professor of Medicine; Environmental Health Sciences; Pharmacology; Program in Public Health

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, Assistant Professor of Program in Public Health; Planning, Policy, and Design

Jan K. Brueckner, Ph.D. Stanford University, Department Chair and Professor of Economics; Planning, Policy, and Design

Vincent J. Caloizzo, Ph.D. University of California, Irvine, Professor in Residence of Orthopaedic Surgery; Environmental Health Sciences; Physiology and Biophysics

Kitty C. Calavita, Ph.D. University of Delaware, Professor Emerita of Criminology, Law and Society; Sociology (sociology of law, criminology, social deviance, immigration, inequality)

Belinda Campos, Ph.D. University of California, Berkeley, Associate Professor of Chicano/Latino Studies; Psychology and Social Behavior (culture, relationships, positive emotion, health)

Sarah L. Catz, J.D. Santa Clara University, Lecturer of Planning, Policy, and Design

Elizabeth E. Cauffman, Ph.D. Temple University, UCI Chancellor's Fellow and Professor of Psychology and Social Behavior; Education; Psychology and Social Behavior; School of Law (adolescent development, mental health, juvenile justice, legal and social policy)

Jefferson Chan, Ph.D. University of California, San Francisco, Associate Professor of Pathology and Laboratory Medicine; Environmental Health Sciences

Susan T. Charles, Ph.D. University of Southern California, UCI Chancellor's Fellow and Professor of Psychology and Social Behavior (emotional processes across the adult life span, subjective experience and cognitive processes, health and emotion)

Chuansheng Chen, Ph.D. University of Michigan, Professor of Psychology and Social Behavior; Education (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Jacqueline Chen, Ph.D. University of California, Santa Barbara, Assistant Professor of Psychology and Social Behavior (experimental social psychology, diversity and intergroup relations, social cognition, cultural psychology)
Joey Cheng, Ph.D. University of British Columbia, Assistant Professor of Psychology and Social Behavior (social hierarchies, psychology of social status, nonverbal cues of power and status, social contagion)

Kenneth S. Chew, Ph.D. University of California, Berkeley, Senior Lecturer of Planning, Policy, and Design

Simon A. Cole, Ph.D. Cornell University, Professor of Criminology, Law and Society; History (science, technology, law, criminal justice)

Ross F. Conner, Ph.D. Northwestern University, Professor Emeritus of Planning, Policy, and Design

William J. Cooper, Ph.D. University of Miami, Professor of Civil and Environmental Engineering; Chemical Engineering and Materials Science; Planning, Policy, and Design (environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling)

Thomas J. Crawford, Ph.D. Harvard University, Senior Lecturer with Security of Employment Emeritus of Psychology and Social Behavior (attitude theory and social problems research)

Elliott P. Currie, Ph.D. University of California, Berkeley, Professor of Criminology, Law and Society (criminal justice policy in the U.S. and other countries, causes of violent crime, social context of delinquency and youth violence, etiology of drug abuse and assessment of drug policy, race and criminal justice)

Teresa A. Dalton, Ph.D. University of Denver, Lecturer with Potential Security of Employment of Criminology, Law and Society (quantitative methodology, criminology, law and social sciences)

Ralph J. Delfino, M.D., Ph.D. McGill University, Professor in Residence of Epidemiology; Environmental Health Sciences

Joseph Di Mento, Ph.D. University of Michigan, Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Planning, Policy, and Design (planning, land use and environmental law, use of social science in policy making, legal control of corporate behavior)

Sally S. Dickerson, Ph.D. University of California, Los Angeles, Associate Professor of Psychology and Social Behavior (health psychology, stress physiology, effects of social and emotional processes on physiology and health)

Peter H. Ditto, Ph.D. Princeton University, Professor of Psychology and Social Behavior (social psychology, judgment and decision making, political and moral reasoning)

John D. Dombrik, Ph.D. University of California, Berkeley, Professor of Criminology, Law and Society; Sociology (crime and criminal justice, deviance and social control)

C. David Dooley, Ph.D. University of California, Los Angeles, Professor Emeritus of Psychology and Social Behavior (community psychology, epidemiology, economic change)

Greg Duncan, Ph.D. University of Michigan, UCI Distinguished Professor of Education; Economics; Psychology and Social Behavior (economics of education, program evaluation, child development)

Derek Dunn-Rankin, Ph.D. University of California, Berkeley, Professor of Mechanical and Aerospace Engineering; Civil and Environmental Engineering; Environmental Health Sciences (combustion, optical particle sizing, particle aero-dynamics, laser diagnostics and spectroscopy)

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, UCI Distinguished Professor of Education; Psychology and Social Behavior (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

Rufus D. Edwards, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Program in Public Health; Environmental Health Sciences; Epidemiology

David Feldman, Ph.D. University of Missouri-Columbia, Professor of Planning, Policy, and Design; Political Science

Martha S. Feldman, Ph.D. Stanford University, Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Planning, Policy, and Design; Paul Merage School of Business; Political Science; Sociology

Catherine Fisk, J.D. University of California, Berkeley, UCI Chancellor's Professor of School of Law; Criminology, Law and Society; History (labor and employment law, civil rights)

Michelle Fortier, Ph.D. University of Nebraska, Assistant Professor in Residence of Anesthesiology and Perioperative Care; Psychology and Social Behavior (pediatric pain management, pediatric oncology, family-centered medicine, complementary and alternative medicine (CAM), health information technology, coping with illness-related Stress)

Ajay Garde, Ph.D. University of Southern California, Associate Professor of Planning, Policy, and Design

Howard A. Gillman, Ph.D. University of California, Los Angeles, Provost and Interim Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law
Wendy A. Goldberg, Ph.D. University of Michigan, Professor of Psychology and Social Behavior; Education (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, Professor of Criminology, Law and Society (criminology, theory, crime, policy)

Ellen Greenberger, Ph.D. Harvard University, Professor Emerita of Psychology and Social Behavior (developmental psychology, social and cultural influences on adolescent and young adult development, family relationships and consequences throughout the lifespan)

Sera Han, Ph.D. University of California, Santa Cruz, Assistant Professor of Criminology, Law and Society; African American Studies; Culture and Theory (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

Jutta Heckhausen, Ph.D. University of Strathclyde, Professor of Psychology and Social Behavior (life-span developmental psychology, motivation, individual agency and social context)

Barb J. Heine, Ph.D. Saint Louis University, Lecturer of Psychology and Social Behavior

John Hipp, Ph.D. University of North Carolina at Chapel Hill, UCI Chancellor’s Fellow and Professor of Criminology, Law and Society; Sociology (community context of crime, household decisions and neighborhood change, research methods)

John D. Houston, Ph.D. University of California, Los Angeles, Assistant Professor of Planning, Policy, and Design

Clarence Ronald Huff, Ph.D. Ohio State University, Professor Emeritus of Criminology, Law and Society (criminology and public policy, wrongful convictions, gangs)

Helen Ingram, Ph.D. Columbia University, UCI Endowed Chair and Professor Emerita of Planning, Policy, and Design

Larry D. Jamner, Ph.D. State University of New York at Stony Brook, Professor of Psychology and Social Behavior (health psychology, psychophysiology, pain, mHealth)

Valerie Jenness, Ph.D. University of California, Santa Barbara, Dean of the School of Social Ecology and Professor of Criminology, Law and Society; Sociology (links between deviance and social control (especially law), the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Paul D. Jesilow, Ph.D. University of California, Irvine, Professor of Criminology, Law and Society (healthcare regulation, in particular the role of fraud; the police, in particular police-community relations)

C. Sunny Jiang, Ph.D. University of South Florida, Professor of Civil and Environmental Engineering; Environmental Health Sciences (water pollution microbiology, environmental biotechnology, aquatic microbial ecology)

Jae H. Kim, Ph.D. University of Illinois at Urbana-Champaign, Assistant Professor of Planning, Policy, and Design

Virginia Kimonis, M.D. University of Southampton, Professor of Pediatrics; Environmental Health Sciences

Michael T. Kleinman, Ph.D. New York University, Adjunct Professor of Community & Environ Medicine; Environmental Health Sciences; Program in Public Health

Charis E. Kubrin, Ph.D. George Washington University, Professor of Criminology, Law and Society; Sociology (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Charles E. Lambert, Ph.D. University of California, Irvine, Assistant Adjunct Professor of Environmental Health Sciences

Raul P. Lejano, Ph.D. University of California, Los Angeles, Professor Emeritus of Planning, Policy, and Design

Linda J. Levine, Ph.D. University of Chicago, Professor of Psychology and Social Behavior (bias in predicted and remembered emotion, how emotions influence the features of events people attend to and remember, the development of children’s ability to regulate emotion)

Charles L. Limoli, Ph.D. University of California, San Diego, Professor of Radiation Oncology; Environmental Health Sciences

Elizabeth F. Loftus, Ph.D. Stanford University, UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law (cognitive psychology, human memory, psychology and law)

Bryce C. Lowery, M.S. California State Polytechnic University, Pomona, Lecturer of Planning, Policy, and Design

Ulrike Luderer, M.D., Ph.D. Northwestern University, Professor of Medicine; Developmental and Cell Biology; Environmental Health Sciences; Program in Public Health (reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity, ovarian cancer)
Angela F. Lukowski, Ph.D. University of Minnesota, Assistant Professor of Psychology and Social Behavior (memory development in infancy and early childhood, individual differences in long-term memory in infancy, the impact of sleep on cognitive functioning from infancy to adulthood)

Mona Lynch, Ph.D. University of California, Santa Cruz, Professor of Criminology, Law and Society; School of Law (law and society, psychology and law, punishment and society, race and criminal justice)

Salvatore R. Maddi, Ph.D. Harvard University, Professor of Psychology and Social Behavior (personality, psychopathology, health psychology, creativity)

Elizabeth Martin, Ph.D., University of Missouri, Assistant Professor of Psychiatry and Human Behavior (transdiagnostic emotional and social functioning, affective control and regulation, relations between affect and cognition)

Richard A. Matthew, Ph.D. Princeton University, Professor of Planning, Policy, and Design

William M. Maurer, Ph.D. Stanford University, Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; Culture and Theory; School of Law (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Cheryl Lee Maxson, Ph.D. University of Southern California, Associate Professor of Criminology, Law and Society (crime and delinquency, youth violence, street gangs, juvenile justice system and policing)

Sanjoy Mazumdar, Ph.D. Massachusetts Institute of Technology, Professor of Planning, Policy, and Design; Asian American Studies

Richard D. McCleary, Ph.D. Northwestern University, Professor of Criminology, Law and Society; Planning, Policy, and Design (criminal justice, research methodology, statistics)

Stephanie McEwan, Psy.D. United States International University, J.D. American College School of Law, Lecturer of Psychology and Social Behavior (neurosciences, clinical psychology, sport psychology, psychopathology, psychoanalytic psychotherapy, psychoanalysis and emergency trauma)

Michael G. McNally, Ph.D. University of California, Irvine, Professor of Civil and Environmental Engineering; Planning, Policy, and Design (travel behavior, transportation systems analysis)

James W. Meeker, Ph.D. State University of New York at Buffalo, Professor of Criminology, Law and Society; Sociology (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

David S. Meyer, Ph.D. Boston University, Professor of Sociology; Planning, Policy, and Design; Political Science (social movements, public policy, peace and war, social justice)

Raymond W. Novaco, Ph.D. Indiana University, Professor of Psychology and Social Behavior (anger, violence, stress, trauma, and interventions)

Olaade A. Ogunseitan, Ph.D. University of Tennessee, Professor of Program in Public Health; Environmental Health Sciences

Judith Olson, Ph.D. University of Michigan, Donald Bren Professor of Information & Computer Sciences and Professor of Informatics; Paul Merage School of Business; Planning, Policy, and Design (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Kathryn Osann, Ph.D. University of California, Berkeley, Adjunct Professor of Medicine; Environmental Health Sciences

Joan R. Petersilia, Ph.D. University of California, Irvine, Professor Emerita of Criminology, Law and Society (program evaluation, public policy, juvenile justice)

Mark P. Petracca, Ph.D. University of Chicago, Associate Professor of Political Science; Planning, Policy, and Design

Robert F. Phalen, Ph.D. University of Rochester, Professor of Medicine; Environmental Health Sciences

Paul Piff, Ph.D. University of California, Berkeley, Assistant Professor of Psychology and Social Behavior (social hierarchy, emotion, uncertainty, nature, groups, prosocial behavior, ethics, morality)

Seth D. Pipkin, Ph.D. Massachusetts Institute of Technology, Assistant Professor of Planning, Policy, and Design

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, Professor of Criminology, Law and Society; Sociology (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Joann Prause, Ph.D. University of California, Irvine, Senior Lecturer of Psychology and Social Behavior (statistics, quantitative epidemiology, employment typology)

Sarah D. Pressman, Ph.D. University of Pittsburgh, Assistant Professor of Psychology and Social Behavior (health psychology, positive emotions, stress physiology, psychosocial effects on physiology and health)
Jodi A. Quas, Ph.D. University of California, Davis, Professor of Psychology and Social Behavior (memory development, children's involvement in the legal system)

John L. Redpath, Ph.D. University of Newcastle, Professor Emeritus of Radiation Oncology; Environmental Health Sciences

Stephanie Reich, Ph.D. Vanderbilt University, Associate Professor of Education; Psychology and Social Behavior (child development, parenting, peer interactions, media, program evaluation)

Keramet A. Reiter, Ph.D. University of California, Berkeley, Assistant Professor of Criminology, Law and Society; School of Law (prisons, legal history, criminal justice policy, criminal and civil rights law, law and society)

Maria G. Rendon, Ph.D. Harvard University, Assistant Professor of Planning, Policy, and Design; Sociology

Karen S. Rook, Ph.D. University of California, Los Angeles, Professor of Psychology and Social Behavior (gerontology, social relationships and health)

Shawn W. Rosenberg, M.S. Oxford University, Professor of Political Science; Psychology and Social Behavior (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Michael Ruane, M.A. University of California, Los Angeles, Lecturer of Planning, Policy, and Design

Ruben G. Rumbaut, Ph.D. Brandeis University, Professor of Sociology; Criminology, Law and Society; Education (international migration, immigration laws, criminalization, incarceration, inequality)

Jean-Daniel M. Saphores, Ph.D. Cornell University, Professor of Civil and Environmental Engineering; Economics; Planning, Policy, and Design (transportation economics, planning and policy, environmental and natural resource economics and policy, quantitative methods)

Sabrina E. Schuck, Ph.D. University of California, Riverside, Health Sciences Assistant Clinical Professor of Pediatrics; Psychology and Social Behavior (ADHD, autistic spectrum disorders, disorders of reading and written language, human-animal intervention, non-pharmacological treatment of disruptive behavior, cognitive-behavioral school-based and family-based interventions)

Donna Schuele, Ph.D. University of California, Berkeley, Lecturer with Potential Security of Employment of Criminology, Law and Society (law and society, American legal/constitutional history, constitutional law, civil rights and civil liberties, women and law, crime and gender, judicial process and politics, California legal history)

Nicholas I. Scurich, Ph.D. University of Southern California, Assistant Professor of Psychology and Social Behavior; Criminology, Law and Society (judgment and decision making, juridical proof, violence risk assessment)

Carroll S. Seron, Ph.D. New York University, Professor of Criminology, Law and Society; School of Law; Sociology (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Ronald C. Shank, Ph.D. Massachusetts Institute of Technology, Professor Emeritus of Medicine; Environmental Health Sciences

Roxane C. Silver, Ph.D. Northwestern University, Professor of Psychology and Social Behavior; Program in Public Health (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, Professor of Sociology; Planning, Policy, and Design (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east asia)

David M. Snow, J.D. Loyola Marymount University, Lecturer of Planning, Policy, and Design

Ann Southworth, J.D. Stanford University, Professor of School of Law; Criminology, Law and Society

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business; Psychology and Social Behavior (sensory cues in the retail environment and the effects of self-prediction on behavior)

Mark Steyvers, Ph.D. Indiana University, Professor of Cognitive Sciences; Psychology and Social Behavior (wisdom of crowds, aggregating human judgments, computational models of the mind, machine learning and statistics, memory and decision making)

Daniel S. Stokols, Ph.D. University of North Carolina at Wilmington, Professor Emeritus of Psychology and Social Behavior; Epidemiology; Planning, Policy, and Design; Program in Public Health (environmental psychology, science of team science, transdisciplinary public health)

Luis Suarez-Villa, Ph.D. Cornell University, Professor of Planning, Policy, and Design

Naomi Sugie, Ph.D. Princeton University, Assistant Professor of Criminology, Law and Society; Sociology (sociology of crime and punishment, inequality, families, criminal justice policy, methods, new technologies for data collection)

Bryan Sykes, Ph.D. University of California, Berkeley, Assistant Professor of Criminology, Law and Society; Sociology (demography, criminology, research methods, health, social inequality, statistics)
Shauhin A. Talesh, J.D. University of Connecticut, **Acting Professor of School of Law; Criminology, Law and Society; Sociology** (civil procedure, consumer law, insurance, business organizations, empirical legal studies, law and society)

William C. Thompson, Ph.D. Stanford University, **Professor of Criminology, Law and Society; Psychology and Social Behavior; School of Law** (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

Kara L. Thorsen, Ph.D. University of California, Irvine, **Lecturer of Social Ecology**

George E. Tita, Ph.D. Carnegie Institute of Technology, **Professor of Criminology, Law and Society; Planning, Policy, and Design** (criminology, community context of violence, urban youth gangs, homicide studies)

Christopher L. Tomlins, Ph.D. Johns Hopkins University, **UCI Chancellor’s Professor of School of Law; Criminology, Law and Society** (law and humanities, law and society, legal history)

Rudolfo D. Torres, Ph.D. Claremont Graduate University, **Professor of Planning, Policy, and Design; Culture and Theory**

Kerry Vandell, Ph.D. Massachusetts Institute of Technology, **Professor of Paul Merage School of Business; Planning, Policy, and Design; School of Law**

James D. Vigil, Ph.D. University of California, Los Angeles, **Professor Emeritus of Criminology, Law and Society** (urban research, urban poverty, culture change, socialization and education, psychological anthropology, street gangs in cross-cultural perspective, Mexico and U.S. southwestern ethnohistory, comparative ethnicity)

Veronica M. Vieira, D.Sc. Boston University, **Associate Professor of Program in Public Health; Environmental Health Sciences**

Ilona S. Yim, Ph.D. University of Trier, **Associate Professor of Psychology and Social Behavior** (stress, pregnancy and postpartum depression, biopsychology of stress, developmental psychobiology)

Joanne F. Zinger, Ph.D. University of California, Riverside, **Lecturer with Security of Employment of Psychology and Social Behavior** (expressive writing, meta-analysis, positive psychology, health psychology, preventive medicine, educational psychology)

**Criminology, Law and Society Courses**

**CRM/LAW C7. Introduction to Criminology, Law and Society . 4 Units.**
Introduces characteristics of the U.S. criminal justice system, including responses to crime, components of the system, and current challenges to the system. Examines structure and function of police and courts, criminal procedure, and sentencing and incarceration policies. Course may be offered online.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, and Psychology and Social Behavior majors have first consideration for enrollment.
CRM/LAW C10. Fundamentals of Criminology, Law and Society. 4 Units.
Introduces three interdisciplinary literatures—criminology, socio-legal studies, and justice studies. Focuses on theoretical and empirical work addressing law making, law breaking, and legal systems.

Prerequisite: CRM/LAW C7.

CRM/LAW C40. Forms of Criminal Behavior. 4 Units.
Undergraduates are introduced to the subjects of crime and criminal behavior. Topics include "street" and "white-collar" crimes. Histories of the offenses, the types of people who commit the crimes, and society's reactions to the offenses are presented.

CRM/LAW C100. Special Topics in Criminology, Law and Society. 4 Units.
Special topic courses are offered from time to time. Course content varies with interest of the instructor.

Prerequisite: CRM/LAW C7.
Repeatability: Unlimited as topics vary.

CRM/LAW C101. American Law. 4 Units.
Introduction to substantive and procedural law governing private dispute resolution, including common law (tort, property, contracts), lawsuits (civil procedure), and alternative dispute resolution; emphasis on the socio-legal ramifications of private disputes, particularly the modern tort system and tort reform movement.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C102. Introduction to the Comparative Study of Legal Cultures. 4 Units.
Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as INTL ST 124A.
Restriction: Criminology, Law and Society, Social Ecology, and International Studies majors have first consideration for enrollment.

CRM/LAW C103. American Legal Thought. 4 Units.
Evolution of legal thought in socio-historical context from nineteenth century to present; emphasizes the rise and fall of legal classicism and modern socio-legal critiques, including the law and society movement, critical legal studies, feminist legal theory, and critical race studies.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C104. Sociology of Law. 4 Units.
Examines law creation and law enforcement in their social and political context. Discusses the major theories of law and the modern state, and presents case studies in order to evaluate the strengths and weaknesses of these theoretical perspectives.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C105. Psychology and the Law. 4 Units.
Psychological assumptions of American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eye-witness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.
Same as PSY BEH 193E.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C106. Crime and Public Policy. 4 Units.
Explores nature and dimensions of crime in America and uses and limits of various strategies to control it. Topics include growth of imprisonment, the problem of domestic violence, the death penalty, gun control, and the potential of crime prevention programs.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C107. Deviance. 4 Units.
Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, PSYCH 177D.

Restriction: Criminology, Law and Society, Social Ecology, Sociology, and Psychology majors have first consideration for enrollment.

CRM/LAW C108. Criminological Theory. 4 Units.
Explores the question of crime causation from a number of theoretical perspectives in the social sciences. Schools of thought examined include utilitarianism, positivism, human ecology, social structural approaches, social process (learning) theories, labeling, and radical-critical (political) perspectives.

Prerequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C109. Juvenile Delinquency. 4 Units.
Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Prerequisite: CRM/LAW C7.

Same as PSY BEH 193B.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C110. Community Context of Crime. 4 Units.
Examines the social context of high-crime communities, with special emphasis on the problems of poverty, joblessness, economic inequality, and racial discrimination. Assesses debates on the causes of these problems, and on the most effective policies to combat them.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C111. Theories of Punishment. 4 Units.
Survey of the various schools of thought regarding formal punishment theory. The purposes of legal sanctions are examined, including those of deterrence, rehabilitation, retribution, and incapacitation. Considers problems in realizing formal goals of punishment in practice.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C112. Legal Sanctions and Social Control. 4 Units.
Examination of criminal sanctions as mechanisms of social control. Includes the nature, function, and organization of courts as sanction generating institutions, and problems associated with punishing white-collar and corporate illegalities.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C113. Gender and Social Control. 4 Units.
Examines the legal system's use of sex as an organizing characteristic, focusing particularly on sameness and difference feminism, and tracing the evolution of equal treatment of men and women in the areas of constitutional rights, employment, education, and military service.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C114. Miscarriages of Justice. 4 Units.
Systematically describes, explains, and analyzes the causes and consequences of the wrongful accusation, prosecution, incarceration, and sometimes even execution, of the innocent in the American criminal justice system.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C115. Prisons, Punishment, and Corrections. 4 Units.
A review of how the U.S. punishes and rehabilitates convicted law violators. The conflicts among the major purposes of sentencing—rehabilitation, deterrence, incapacitation—are discussed, as well as the effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C116. Race, Ethnicity, and Social Control. 4 Units.
Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.
Prerequisite: CRM/LAW C7.
Same as CHC/LAT 152A.

CRM/LAW C117. Imprisonment and Reentry. 4 Units.
Offers an overview of imprisonment and reentry in the contemporary United States. Examines the development of the prison in the United States and explores changes in its composition, structure, and purpose over time.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C120. Law and Inequality. 4 Units.
Various aspects of the law as related to three specific areas of inequality: immigration and immigrants, race, and gender. The role of law as a tool of social reform and limitations of the legal system historically in resolving inequality issues.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C122. Constitutional Law. 4 Units.
Examines the First and Fourteenth Amendments, focusing on freedom of speech and religion, and the incorporation of the Bill of Rights. Topics include political, symbolic, offensive, and obscene speech, student speech rights, and the free exercise and disestablishment of religion.
Prerequisite: CRM/LAW C7.
Overlaps with POL SCI 174A.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C123. Family Law. 4 Units.
Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.
Prerequisite: CRM/LAW C7 or CRM/LAW C101.
Same as PSY BEH 193F.
Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C125. Child Development, the Law, and Social Policy. 4 Units.
Examines how psychology research and practice can inform areas of law and social policy affecting children and adolescents. Topics include education, mental health, reproductive rights, and delinquency. Goals are to evaluate research and identify the costs/benefits of current policies.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C. Recommended: PSY BEH 111D OR PSY BEH 112D.
Same as PSY BEH 120D.
Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C126. Drugs, Crime, and Social Control. 4 Units.
Drug abuse in the U.S.; the psychopharmacology of various drugs; biological, psychological, and sociological explanations for drug abuse. Policy issues are discussed; students will develop and defend a set of strategies for limiting harm done by drugs and drug laws.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C127. Hate Crimes. 4 Units.
Examines the causes, manifestations, and consequences of hate crimes and the larger social context within which they occur. The politics and dynamics of intergroup violence born of bigotry and manifested as discrimination; social policy designed to control bias-motivated violence.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C130. Seminar on Gangs. 4 Units.
An overview of gangs, including the nature and definition of gangs; types of gangs; diversity of membership; theoretical explanations; criminal behavior; drug use and sales; law enforcement responses; gangs in correctional institutions; intervention and prevention strategies; and public policy issues.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C131. Organized Crime and American Society. 4 Units.
Examination of the phenomenon of American organized crime from a sociological perspective. Explanation of methods by which organized crime is tolerated at various levels of society. Emphasis on ways in which "underworld" interests interact with legitimate economic and political institutions.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C132. Forensic Science, Law, and Society. 4 Units.
Examines use of "forensic science" to resolve issues arising in criminal cases including crime scene analysis, DNA testing, fingerprints, trace evidence comparisons, profiling, lie detectors, other forensic techniques; evaluation, statistical characterization, and legal admissibility of evidence; regulation of forensic laboratories.

Prerequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C133. Homicide and Suicide. 4 Units.
Examines similarities and differences among homicide and suicide, two major causes of death.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C134. Victimless Crimes. 4 Units.
Examines major theoretical, empirical, and policy-oriented research related to the design, implementation, and analysis of government intervention, through the criminal sanction, in the spheres of vice and morality.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C136. Forensic Psychology: Advanced Seminar. 4 Units.
The focus is on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and (PSY BEH 178S or CRM/LAW C149).

Same as PSY BEH 156C, PSYCH 177F.

Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C137. Criminal Procedure. 4 Units.
Examines the law governing arrests (with and without a warrant); police detention; search and seizure; interrogation; use of informers, eavesdropping, wiretapping; examination and identification of suspects. Pretrial motions such as speedy trial and discovery of evidence may be covered.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C139. Police and Change. 4 Units.
Organizational efforts to modify police conduct are addressed by focusing on the history of policing in the United States including training, education, and the contributions of women.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C142. White-Collar Crime. 4 Units.
Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as SOCIOL 142.

Restriction: Sociology, Criminology, Law and Society, and Social Ecology majors have first consideration for enrollment.
CRM/LAW C144. Criminal Law. 4 Units.
Deals specifically with the substantive nature of criminal law and its historical development. Focuses on understanding the development of fundamental doctrinal principles upon which criminal law is based, including mens rea, actus reus, homicide, causation, group criminality, and exculpation.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C145. Government Crime. 4 Units.
Examines the legal, organizational, and political issues involved in the generation and control of government lawlessness. Readings present historical and theoretical perspectives in the abuse of government authority and the ability of the legal system to control such behavior.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C147. Law and Social Change. 4 Units.
Explores the relationship of law to its social setting by considering both law as a product of social change and law as a source or medium of change.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C148. Geographic Information Systems. 4 Units.
Basic geographic, cartographic, and GIS concepts including computer representation of physical, political, statistical, and social aspects of space using vector and grid-based maps. Experience with extensive geographic base map files and databases through use of GIS software (ArcView 3.x).

Same as PUBHLTH 166.

Restriction: Public Health Sciences, Public Health Policy, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C149. Violence in Society. 4 Units.
Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSY BEH 178S.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C150. The Legal Profession. 4 Units.
Role of the legal profession in modern society, the diverse professional roles lawyers play, the American legal profession compared with that of other societies. "Litigation explosion," ethical problems, interactions between lawyers and other professionals, training and socialization of new lawyers.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C151. Cybercrimes, Investigation, Forensics and Prosecution. 4 Units.
Examines crimes committed against persons, property, society, and the government in which a computer is used. How these computer crimes are committed, investigated, and ultimately prosecuted.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C152. Interrogation, Confession, and the Law. 4 Units.
In-depth examination of social psychology of police interrogation in America, the evolution of American interrogation practices from the nineteenth century to the present, impact of law on police behavior and ideology, causes and consequences of false confessions, possibilities of reform.

Same as PSY BEH 193D.

Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C156. Cross-Cultural Research on Urban Gangs. 4 Units.
Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CHC/LAT 153.

(VII)
CRM/LAW C157. Language in Law and Society. 4 Units.
Considers the role of language in legal practice and power. Particular attention is paid to linguistic and discourse analytic research that covers topics such as: trial talk, language crimes, law talk in cross-cultural perspectives, and linguistic evidence.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C160. Forensic Psychology. 4 Units.
Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues arising when psychologists are involved in legal proceedings.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSY BEH 11C.
Same as PSY BEH 161C.

CRM/LAW C162. Crime Hotspots. 4 Units.
Criminological theories of local public safety hazards or hotspots are introduced. Spatial statistics are developed for different types of hotspots. Hotspot policing theories are introduced and research on the effectiveness of policing strategies is reviewed.

CRM/LAW C163. Ethics and Politics of Justice. 4 Units.
Theoretical perspective on how ethics and politics relate to criminal justice through an introduction to moral philosophy; consideration of specific theories of punishment and justice; and consideration of practical and empirical illustrations of the intersection of ethics, politics, and justice.
Prerequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C164. Social Control of Delinquency. 4 Units.
Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.
Prerequisite: Prerequisite or corequisite: CRM/LAW C7. Recommended: CRM/LAW C109.
Same as PSY BEH 193C.
Restriction: Psychology and Social Behavior, Social Ecology, Criminology, Law and Society, and Psychology majors have first consideration for enrollment.

CRM/LAW C165. The Death Penalty. 4 Units.
Examines why the U.S. continues to have a death penalty when so many other countries have abandoned it. Arguments for and against the death penalty are covered.
Prerequisite: Prerequisite or corequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C167. Crime Measurement. 4 Units.
The strengths and weaknesses of three crime measures (police reports, victim surveys, and offender self-reports) are illustrated through analyses of research articles. Common measurement problems are analyzed with a focus on reliability and validity.

CRM/LAW C168. Extreme Punishment. 4 Units.
Explores the history and law of America’s Eighth Amendment prohibition against cruel and unusual punishment, examining the death penalty, long prison sentences, harsh confinement conditions, and other punishments. Students debate practical, legal, and moral arguments for and against these punishments.

CRM/LAW C170. Federal Law Enforcement. 4 Units.
The peculiar legal, organizational concerns of the federal system of law enforcement and some of the crimes it is uniquely designed to address—white-collar crime, drug trafficking, racketeering, public corruption. Roles, responsibilities of the FBI, DEA, Customs, other policing agencies.
Prerequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.
CRM/LAW C171. Latinos and the Law. 4 Units.
Examines a range of theoretical, empirical, and policy approaches to legal issues affecting the Latino population, with emphasis on California. Discusses topics concerning the purpose of law, the creation of law, and the enforcement of law.
Same as CHC/LAT 142.

(VII)

CRM/LAW C172. Culture Change and the Mexican People. 4 Units.
Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.
Same as CHC/LAT 155.

CRM/LAW C173. Maritime Piracy, Law and Society. 4 Units.
Explores the historical and contemporary images and reality of pirates and piracy since the 16th century across the globe through an analysis of primary sources, key historiographical and legal debates, and criminological theories. Course may be offered online.

CRM/LAW C176. Classics in Crime Cinema. 4 Units.
A multidimensional understanding of crime films and how they shape public thinking about crime and criminals.
Restriction: CRM/LAW C176 and CRM/LAW C20 may not be taken for credit.

CRM/LAW C177. Eyewitness Testimony. 4 Units.
Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.
Prerequisite: SOCECOL 10.
Same as PSY BEH 193G.
Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment. Seniors only.

CRM/LAW C178. Critical Race Theory. 4 Units.
Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.
Same as AFAM 157.
Restriction: Upper-division students only.

CRM/LAW C185. Criminal Justice System Capacity. 4 Units.
Examines “system capacity” in criminological and criminal justice related research and how it is used to explain and describe current problems and practices in the American legal system. Limitations of sanctioning criminals due to political, physical space, and resource constraints.
Prerequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society, Social Ecology, and Chicano/Latino Studies majors have first consideration for enrollment.

CRM/LAW C191. Law and Modernity. 4 Units.
The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of “liberty, equality, fraternity”; contradictions of liberal law, its understandings of “primitive” and “civilized”; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.
Same as ANTHRO 127A.

CRM/LAW C196. Research Seminar in Criminology, Law and Society. 4 Units.
Special topics research seminar. Content varies with interest of instructor. Capstone research opportunity with Criminology, Law and Society faculty members.
Repeatability: Unlimited as topics vary.
Restriction: Upper-division students only. Criminology, Law and Society, Social Ecology, and Anthropology majors have first consideration for enrollment.
CRM/LAW C201. Research Methods. 4 Units.
An introduction to techniques of inductive methodologies, including qualitative interviewing and participant observation, and deductive methodologies, including survey research and experimental and quasi-experimental design. Provides a sound overview of research methodology with tools to pursue specific methods in greater depth.

Restriction: Graduate students only.

CRM/LAW C207. Development Control Law and Policy. 4 Units.
Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as PP&D 207.

Restriction: Graduate students only.

CRM/LAW C210. Introduction to Criminology, Law and Society. 4 Units.
Familiarizes students with the interrelated fields of criminology, law and society studies, and criminal justice studies. Organized around three well-established interdisciplinary literatures: criminology, sociolegal studies, and criminal justice studies.

Restriction: Graduate students only.

CRM/LAW C211. Legal Institutions and Society. 4 Units.
Acquaints students with the institutions of U.S. legal system and its operations, as well as with the constitutional framework undergirding this system, and defines the relationship between U.S. citizens and government at a variety of levels.

Restriction: Graduate students only.

CRM/LAW C212. Police, Courts, and Corrections. 4 Units.
Focuses on basic policy issues in the administration of the criminal justice system. The key elements of the criminal justice system are police, courts, and corrections. Prepares students for continued study of these organizations.

Restriction: Graduate students only.

CRM/LAW C213. Crime and Social Deviance. 4 Units.
Examines the major social scientific perspectives on criminal and deviant behavior. Specific deviant and criminal activities are described and explained using established theoretical frameworks.

Restriction: Graduate students only.

CRM/LAW C214. Research Methods. 4 Units.
Structures research methodology, the approach to developing and evaluating knowledge of the sciences for use in criminal justice professional activities. Special emphasis on differentiating scientific approaches from pseudo-science.

Restriction: Graduate students only.

CRM/LAW C215. Applied Statistics. 4 Units.
Provides a basis for the use of fundamental statistical analysis techniques for solving public policy and management problems through a series of assignments, examinations, and online discussions and demonstrations.

Restriction: Graduate students only.

CRM/LAW C216. Public Policy, Crime, and Criminal Justice. 4 Units.
Increases understanding of crime, violence, and the criminal justice system. Assesses the state of knowledge on key policy issues of our time. Discusses the contribution of communities, schools, employment, drugs, guns, and alcohol to crime and violence.

Restriction: Graduate students only.

CRM/LAW C217. Leadership. 4 Units.
Introduces concepts, ideas, and theories about leadership and its operation. Explores leadership concepts through interviews with leaders from the community and fellow classmates.

Restriction: Graduate students only.
CRM/LAW C218. Social Problems, Law, and Policy. 4 Units.
Capstone course for M.A.S. program in Criminology, Law and Society. Students choose a social problem related to crime, criminal justice, and law; relate the problem to legal and social issues; and devise a plan of action to research the problem.

Restriction: Criminology, Law and Society M.A.S. students only.

CRM/LAW C219. Hate Crime. 4 Units.
Examines the causes, manifestations, and consequences of hate crimes, as well as the larger social context within which they occur, are reacted to, and seem to be proliferating.

Restriction: Graduate students only.

CRM/LAW C221. Sentencing and Corrections. 4 Units.
Reviews U.S. attempts to punish and rehabilitate convicted law violators. Conflicts among major purposes of sentencing (rehabilitation, deterrence, incapacitation, and retribution) are discussed, as well as effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Graduate students only.

CRM/LAW C222. Street Ethnography. 4 Units.
Focuses on urban street populations, especially gangs, and outlines some of the major conceptual and theoretical issues related to this topic and the processes of street socialization. Methods of inquiry include mapping, ethnohistory, survey questionnaires, and other quantitative techniques.

Same as CHC/LAT 217.

Restriction: Graduate students only.

CRM/LAW C224. Organizational Perspectives on the Legal System. 4 Units.
Familiarizes students with organization theory and research as ways to make sense of, navigate, and act on the legal system. Acquaints students with major frameworks in organization theory and their application to the system of legal organizations.

Restriction: Graduate students only.

CRM/LAW C225. Consequences of Imprisonment. 4 Units.
Reviews imprisonment and its consequences in the United States. Views prison and inmates as part of (rather than separate from) society. Examines the effects of prison on American society, the family, the labor market, and the community.

Restriction: Graduate students only.

CRM/LAW C227. Alternative Conflict Resolution: Theory and Methods. 4 Units.
Provide an understanding of the major alternatives to the traditional system for the administration of justice, expanding on some of the newer theories and methods in the field. Key research on social conflict and its resolution examined. Course may be offered online.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

CRM/LAW C228. Criminology: Micro Approaches. 4 Units.
Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practice, and focuses on micro-level, individual theories of crime causation. Formerly Criminology, Law and Society C233A.

CRM/LAW C229. Criminology: Macro Approaches. 4 Units.
Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practices, and addresses macro-level theories of crime causation. Formerly Criminology, Law and Society C233B.

CRM/LAW C230. Crime and Public Policy. 4 Units.
Discusses the measurement of violent crime; violent offenders and their victims; theoretical explanations of violence; the contribution of the media, drugs, guns, and alcohol to violence; and how the justice system treats and punishes violent offenders.

Restriction: Graduate students only.

CRM/LAW C231. Crime and Gender. 4 Units.
Examines the legal, political, social, economic, and policy implications of making gender (primarily) and race (secondarily) the focus in the study of crime, criminal law, and the criminal justice system. Course may be offered online.

Restriction: Graduate students only.
CRM/LAW C232. Juvenile Delinquency. 4 Units.
Examines the major theoretical perspectives regarding the onset, persistence, and desistance of juvenile delinquency and examines empirical evidence for each perspective.

Restriction: Graduate students only.

CRM/LAW C234. Anthropology of Law. 4 Units.
Law has been a key site of anthropological inquiry since the discipline's nineteenth-century origins. Course introduces and critically assesses the contributions anthropology has made to sociolegal lytic trends.

Restriction: Graduate students only.

CRM/LAW C235. Theories of Crime. 4 Units.
Examines classical and contemporary theories of crime and crime control with special emphasis on the implications of theory for public and social action.

Restriction: Graduate students only.

CRM/LAW C236. Gender and Power in Law and Society. 4 Units.
Focuses on questions of gender and sexuality in law and society studies. Drawing on a variety of theoretical frameworks, especially feminist legal theory, examines social processes and structures related to legal regulation, inequality, and social change.

Restriction: Graduate students only.

CRM/LAW C237. Legal Reasoning. 4 Units.
Introduction to law and legal process; use of legal source materials; history and assumptions underlying modern legal reasoning. Key jurisprudential perspectives, development and application of constitutional doctrines (focus on equal protection and right of privacy), and procedure and evidence issues.

Restriction: Graduate students only.

CRM/LAW C238. White-Collar Crime. 4 Units.
Examines the illegal behavior of individuals who commit crimes in the course of their employment. Special attention will be paid to ways in which power and organizational structure affect the behavior of the white-collar offenders.

Restriction: Graduate students only.

CRM/LAW C239A. Law and Society I. 4 Units.
Provides an introduction to the law and society field from its origins in social scientific, legal, and philosophical scholarship during the eighteenth, nineteenth, and early-twentieth centuries. Formerly Criminology, Law, and Society C239.

Restriction: Graduate students only.

CRM/LAW C239B. Law and Society II. 4 Units.
Building on Law and Society I, addresses contemporary issues in the field from mid-twentieth century to the present with emphasis on the degree to which the field's foundational assumptions are being challenged, refined, or confirmed through current research.

Prerequisite: CRM/LAW C239A.

Restriction: Graduate students only.

CRM/LAW C241. Race, Ethnicity, and Social Control. 4 Units.
Origins and organization of racialized social control, with emphasis on criminal justice. Racial politics of criminal/juvenile justice considered in comparative (historical and international) perspective. Exploration of theoretical and methodological issues for research on race, ethnicity, and social control.

Same as CHC/LAT 221.

Restriction: Graduate students only.

CRM/LAW C245. Social Science and the Legal Process. 4 Units.
Examines the use (and misuse) of social science in the legal process, focusing on role of social science evidence in trial and appellate decision making. Test-case litigation in which social science has been used to challenge laws or support reform.

Restriction: Graduate students only.
CRM/LAW C248. Geographic Information Systems. 4 Units.
Prepares students to become proficient in the basic GIS functionality including visualization, data management, and spatial analysis.
Restriction: Graduate students only.

CRM/LAW C252. Issues in Environmental Law and Policy. 4 Units.
Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.
Same as PP&D 252.
Restriction: Graduate students only.

CRM/LAW C255. Public Policy. 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.
Same as POL SCI 221A, PP&D 221.
Restriction: Graduate students only.

CRM/LAW C263. Eyewitness Testimony. 4 Units.
Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.
Same as PSY BEH P263.
Restriction: Graduate students only.

CRM/LAW C265. Memory and the Law. 4 Units.
Examines the controversial topic of repressed memory, or perception and memory of real-world events.
Same as PSY BEH P265.
Restriction: Graduate students only.

CRM/LAW C266. Psychology and the Law. 4 Units.
Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.
Same as PSY BEH P266.
Restriction: Graduate students only.

CRM/LAW C275. Special Topics in Criminology, Law and Society. 4 Units.
Topics covered vary with interests of instructor.
Repeatability: Unlimited as topics vary.

CRM/LAW C296. Doctoral Dissertation Research and Writing. 2-12 Units.
Dissertation research with Criminology, Law and Society faculty.
Prerequisite: Advancement to candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

CRM/LAW C298. Directed Study. 2-4 Units.
Directed study with Criminology, Law and Society faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
CRM/LAW C299. Independent Study . 2-8 Units.
Independent research with Criminology, Law and Society faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Planning, Policy, and Design Courses

PP&D 4. Introduction to Urban Studies. 4 Units.
Introduces the substantive areas, concepts, and tools in the field of urban studies. Acquaints students with physical, environmental, social, economic, and political dimensions of cities. Examines the challenges facing cities, including poverty, sustainability, development, globalization, and others.
Restriction: School of Social Ecology and Urban Studies majors have first consideration for enrollment.

(III)

PP&D 40. Urban Sociology. 4 Units.
Overview of theoretical, substantive, and policy issues in urban sociology. History of urbanization, the school of human ecology, and recent trends regarding urbanism. Time is devoted to understanding the causes and possible solutions to urban problems.
Overlaps with SOCIOL 43.

PP&D 100. Special Topics in Urban Studies. 4 Units.
Special topics courses are offered from time to time. Course content varies with interest of the instructor.
Repeatability: Unlimited as topics vary.
Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 101. Urbanization and Social Change. 4 Units.
Surveys the global and historical co-evolution of cities and social institutions, including religion, the economy, governance, the arts, technology, and family life.

PP&D 102. Urban Inequality. 4 Units.
Examines structural inequality and the influence that urbanization has in affecting race, ethnic, and class relations. Explores how race/ethnicity, class, urban space, housing, economic development, public education and land policy intersect in cities, both historically and today.
Restriction: Urban Studies, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PP&D 104. Urban America . 4 Units.
Students examine the historical, social, political and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America’s urban neighborhoods.

PP&D 105. California’s Population. 4 Units.
Surveys California’s human population (past, present, and future) and its interactions with trends in society, government, the economy, and the environment.
Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 106. Technology and Economic Development. 4 Units.
Importance of technology for urban economic and social development. Concepts of technological innovation and diffusion, and their relevance for cities and metropolitan areas. Principles of networks and their importance for diffusion. Relationship of technology to urban infrastructure and metropolitan form.
Prerequisite: SOCECOL 10 and SOCECOL 13.
Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.
PP&D 107. Urban and Regional Planning. 4 Units.
Important substantive areas, concepts, tools in the field of urban and regional planning. Topics include: forces that have historically guided and are currently guiding U.S. urbanization; land use, economic development, housing and community development, environmental planning; legal, environmental, governmental contexts.

Prerequisite: PP&D 4.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.

PP&D 108. Cities and Transportation. 4 Units.
The relationship between urban areas and transportation systems. Economic analysis of cities, transportation and urban form, highway congestion, environmental impacts of transportation, public transit, land use and transportation, and political influences on transportation planning.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 109. Housing and Urban Development Policy. 4 Units.
Surveys public policy issues and develops analytic techniques in the areas of housing and urban development. Examines a range of policy topics including housing assistance to low- and moderate-income families, housing finance system, incentives for economic development and neighborhood preservation.

Prerequisite: Recommended: previous course work in economics.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 110. Urban Economic Development Policy. 4 Units.
Theoretical and practical perspectives on local economic development policy. Integrates economic, planning, and political perspectives. Overview of economic role of cities and metropolitan areas. Specific development issues include: link between taxes, regulation, job growth; redevelopment planning; evaluation economic development policy.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 112. Foundations of Community Health. 4 Units.
A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as PUBHLTH 125.

Restriction: Urban Studies, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PP&D 113. Poverty in Developing Countries. 4 Units.
Focuses on poverty in developing countries. Analyzes the magnitude and changing nature of poverty in the global south. Critically examines poverty conceptualized in terms of economic deprivation, well-being, and social exclusion.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 131. Environmental Sustainability I. 4 Units.
Provides an introduction to sustainability from different points of view; historical, scientific, political, ethical, and economic.

Same as EARTHSS 180.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 132. Environmental Sustainability II. 4 Units.
Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.

Same as EARTHSS 182.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.
**PP&D 134. Human Ecology. 4 Units.**
Explores the interaction of social choice and physical constraint in shaping the earth's human carrying capacity, including ramifications for local, regional, or global environmental issues.

Prerequisite: PP&D 4.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

**PP&D 139. Water Resource Policy. 4 Units.**
Examination of contemporary water problems worldwide, with particular attention to the competing water demands in the western U.S., and water demand by the poor in developing countries. History and analysis of U.S. water policies at local, state, and federal levels.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.

**PP&D 140. Ethics and International Relations. 4 Units.**
Introduces students to the dynamic field of ethics and international relations. A variety of traditional and emerging perspectives are examined, skeptical views are discussed in detail, and arguments are illustrated with current cases.

Same as POL SCI 146A, INTL ST 154D.

**PP&D 150. Experience Design. 4 Units.**
Explores functional, experiential, emotional, sensorial, and extra-sensorial aspects of built and modified natural environments. Examines methods for acquiring, evaluating, and presenting information and developing specifications for designers' information needs and for assuring great designed environments.

Prerequisite: PP&D 4 and PP&D 152.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

**PP&D 151. Environmental Psychology. 4 Units.**
Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Prerequisite: SOCECOL E8 or SOCECOL 10 or PP&D 4.

Same as PSY BEH 171S, PUBHLTH 151.

Restriction: Urban Studies, Social Ecology, Psychology and Social Behavior, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

**PP&D 152. Cultural Ecology and Environmental Design. 4 Units.**
Introduction to cultural ecology and environmental and architectural design. Addresses the understanding of people's relationships with their built environments, the basic elements of architecture, architectural analysis, and cultural analysis are covered. Examines values in design and design for multicultural societies.

Prerequisite: PP&D 4.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

**PP&D 153. Elements of Environmental Design. 4 Units.**
Basic elements of environmental design such as scale, proportion, rhythm, color, sound, lighting, surfaces, texture, architectural definition of spaces, volumes, massing volumetric analysis, solids and voids, and cultural aspects of design. Excitement and creativity in design, imageability.

Prerequisite: PP&D 4 and PP&D 152.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

**PP&D 155. Urban Design Principles. 4 Units.**
Introduction to principles of urban design and its applications. Study of contemporary and traditional theories of urban design formulated to improve physical characteristics of built environment to facilitate an enhanced quality of life. A variety of case studies are discussed.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.
PP&D 156. Urban Design and Graphics Studio. 4 Units.
Introductory course organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and graphic representation assignments to learn practical aspects of urban design.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 166. Urban Public Policy. 4 Units.
Examines why and how urban policies are enacted and carried out in contemporary U.S. cities and regions. Topics include: evolution and organization of city governments and policymaking over the past century; who directs public policy and controls how cities develop.

Prerequisite: SOCECOL 10 and PP&D 4.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 167. Public Policy and Management. 4 Units.
Exposes students to best management practices that assure effective planning and implementation of policies and programs in government, business, and nonprofit sectors. Includes guest lecturers who are proven leaders in four principal institutions of community: business, education, government, and nonprofit.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 169. Public Policy Analysis. 4 Units.
Examines different approaches to the analysis of public policy, what constitutes good policy, the role of government, and citizen participation in policymaking. Suggests a policy-design perspective which builds upon other frameworks but concentrates on goals, implementation structures, tools, and rationales.

Prerequisite: SOCECOL E8 and (PP&D 4 or PP&D 166).

Same as POL SCI 121E.

Restriction: Urban Studies, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PP&D 170. Health Policy. 4 Units.
Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as PUBHLTH 122.

Restriction: Urban Studies, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PP&D 172. Latino Metropolis. 4 Units.
Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as CHC/LAT 154.

(VII)

PP&D 177. Chicano Movement. 4 Units.
Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, "El Movimiento," within the wide context of socio-economic change.

Same as CHC/LAT 166.

Restriction: Chicano/Latino Studies, Urban Studies, and Social Ecology majors have first consideration for enrollment.

PP&D 202. History of Urban Planning. 4 Units.
Introduction to the historical roots and fundamental perspectives of urban and regional planning. Exploration of the significant historical phases and personalities which have shaped the profession. The roles and responsibilities, the limitations and potential, of urban planning.

Restriction: Graduate students only.
PP&D 203. Theoretical Foundations of Planning. 4 Units.
Intellectual excursion into central themes in policy and planning, including philosophy of the market, institutionalization of space, hypostatizations of policy, constructions of communities, logics of spatial analysis. Objective is engagement of the professional in thoughtful reflections on practice and institutions.

Restriction: Graduate students only.

PP&D 204. Design and Planning Graphics: Fundamentals. 4 Units.
Graphic representation and communication of physical place characteristics, design and physical planning ideas and concepts using a variety of graphic techniques of free hand drawing, sketching, orthographic representations, scale drawings, 3D representations, maps, photo-documentation, and various media.

Restriction: Masters in Urban & Regional Planning graduate students only.

PP&D 205. Environmental Economics and Policy. 4 Units.
Provides a broad introduction to environmental economics and to environmental policy. Environmental problems facing the United States and Europe are analyzed, and whenever possible, the environmental problems facing developing countries.

Restriction: Graduate students only.

PP&D 206. Microeconomic Analysis for Urban Planning. 4 Units.
Provides students with a working knowledge of basic microeconomic concepts. Emphasizes applications related to urban planning and policy analysis. Topics covered include demand analysis, firm behavior, market structure, public goods, externalities, and the role of economics in land markets.

Restriction: Graduate students only.

PP&D 207. Development Control Law and Policy. 4 Units.
Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as CRM/LAW C207.

Restriction: Graduate students only.

PP&D 208. California's Population. 4 Units.
Provides a non-specialist introduction to social demography through a focus on California population. Surveys historical and current trends in the State's growth, its industries and occupations, and its ethnic and racial makeup.

Restriction: Graduate students only.

PP&D 209. Qualitative Research Methods: Overview. 4 Units.
Introduction to fundamentals of “qualitative” research and non-positivistic inquiry. Formulation of research questions, selection of method, data collection techniques, and analysis (briefly). Overview of selected methods from ethnography, naturalistic field research, phenomenology, ethnoarcheology, critical approaches, and others.

Restriction: Graduate students only.

PP&D 210. Practice Experience. 4 Units.
Provides Master of Urban & Regional Planning Students an opportunity to link classroom knowledge with real Planning situations through a ten-week unpaid practice experience.

Restriction: Masters in Urban & Regional Planning graduate students only.

PP&D 211. Urban Design and Behavior. 4 Units.
Acquaints students with vocabulary, history, theories, process, and trends in urban design, and the relationship of design to human well-being. The local environment is used as a resource and a laboratory.

Restriction: Graduate students only.

PP&D 212. Transportation Planning. 4 Units.
Introduces current topics in transportation planning. Includes an analysis of the economic role of transportation in urban areas, land-use impacts of transportation projects, traffic congestion, air quality, alternatives to the automobile, and other transportation topics.

Restriction: Graduate students only.
PP&D 213. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.

Same as POL SCI 273A, SOCIOL 223, MGMTPHD 297K.

Restriction: Graduate students only.

PP&D 214. Quantitative Analysis for Planners. 4 Units.
Introduces students to the basic statistical concepts used to address issues of public concern. Prepares students to perform, interpret, and evaluate quantitative data analyses commonly used in professional studies.

Restriction: Graduate students only.

PP&D 215. Analytical Methods for Planning. 4 Units.
Emphasizes the development of analytical techniques proven useful in the fields of management and administration. Topics include multiple regression, cost-benefit analysis and discounting, decision trees, and other techniques useful for the purposes of community analysis and planning.

Restriction: Graduate students only.

PP&D 219. Advanced Planning Theory. 4 Units.
Readings and discussions aimed at developing a foundation for critical research into theories and epistemologies of planning and policy. Topics include the liberal, communitarian, communicative, and other conceptions of nationality; praxis, hermaneutics, and policy; topologies of justice and social fracture.

Restriction: Graduate students only.

PP&D 220. Qualitative Methods. 4 Units.
Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 225.

Restriction: Master of Public Policy graduate students only.

PP&D 221. Public Policy. 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 221.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

PP&D 223. Regional Analysis. 4 Units.
Major concepts and techniques of regional analysis, with applications for urban and regional planning and public policy-making. Definition of regions, processes of economic change, regional structure, location of activities, and analysis of selected policy issues. Emphasis on practical applications.

Restriction: Graduate students only.

PP&D 224. Environmental Politics and Policy. 4 Units.
Reviews and critiques literature on discussion topics including: the nature and effectiveness of environmental movements and policies; the role of science and technology; the use of economic incentives in policy; decentralization of decision making; and creating arenas for public involvement.

Restriction: Graduate students only.

PP&D 225. Local Economic Development. 4 Units.
Analyzes the economic development process. Attention is given to economic theories of local development and practical implications of those theories. Topics include local economic development and poverty, tax incentives, infrastructure credits, effects of government competition for economic activity.

Restriction: Graduate students only.
PP&D 226. Public Health Cost-Effectiveness Analysis. 4 Units.
Examines using cost-effectiveness information to allocate limited resources to maximize health benefits to a population; defining and measuring cost, survival and health-related quality of life; and how to calculate cost-effectiveness using decision trees and Markov simulation models.

Same as PUBHLTH 220.

Restriction: Graduate students only.

PP&D 227. Qualitative Methods: Case Study. 4 Units.
Deals with case study as a qualitative, anti-positivistic research method. Discussion focuses on the essential nature of case study research, quality of case study, rigor, design, implementation, analysis, data collection techniques, analysis, and writing.

Restriction: Graduate students only.

PP&D 228. Demographics for Planning and Policy. 4 Units.
Provides planning and policy practitioners with a condensed, nonspecialist orientation to the sources, applications, and interpretation of population statistics, and conveys the steps used in constructing local-area population forecasts and projections.

Restriction: Graduate students only.

PP&D 231. Transportation and Environmental Health. 4 Units.
Critically evaluates how transportation can promote sustainable, healthy, and equitable cities. Examines the interaction of transportation systems with urban form, land use, community health, and environmental quality.

Restriction: Graduate students only.

PP&D 233. Transportation, Transit, and Land-Use Policy and Planning. 4 Units.
Places students into a specific transportation public policy situation to devise real solutions, with the goal of helping students understand factors in land use, travel behavior, politics, and finance that shape transportation planning policy choices.

Restriction: Graduate students only.

Explores the application of geographic information systems (GIS) in urban planning. Steps through a GIS-based planning procedure that balances housing, jobs, tax base, utilities, transportation, and the natural environment.

Restriction: Graduate students only.

PP&D 236. Community Design. 4 Units.
Provides an overview of the current condition of urban design in the United States. Topics include the academic environment, the retail environment, multi- and single-family residential environments, the office environment, and new urban design tools.

Restriction: Graduate students only.

PP&D 237. Introduction to Geographic Information Systems. 4 Units.
Application of Geographic Information Systems (GIS) to the field of urban and regional planning. Emphasizes current issues that occur in actual implementation settings. Lecture/discussion followed by laboratory demonstrating the area of GIS discussed. Offers “hands-on” student usage of GIS software.

PP&D 238. Advanced Geographic Information Systems. 4 Units.
Extends study of geographic information systems to more advanced issues, including data sources, data conversion, relational database integration, software customization, and spatial and three-dimensional analysis.

Prerequisite: PP&D 237.

PP&D 239. Urban Design Theories and Applications. 4 Units.
Introduction to contemporary and traditional theories of urban design and their applications. Organized around one question: How might planning and design of built environment contribute to making a good city? National and international case studies are introduced.

Restriction: Graduate students only.

PP&D 240. International Environmental Policy. 4 Units.
Explores causes and effects of environmental problems and the effectiveness of different adaptation or restoration strategies and how they are closely linked to ways in which political, economic, demographic, and cultural systems interact among themselves and ecological systems.
PP&D 241. Health Promotion and Planning. 4 Units.
Focuses on health and health care in the United States, but discussion of global health issues and/or international comparisons will be made whenever possible. Considers both the social and economic aspects of health and disease.

Same as PUBHLTH 221.
Restriction: Graduate students only.

PP&D 242. Regional Development Theory. 4 Units.
Regional economic development concepts and studies, with applications for urban and regional planning, and public policy-making. Roles and performance of economic sectors, technological innovation, and communications in the process of development. Analysis of regional development policies and programs.

Restriction: Graduate students only.

PP&D 243. Health Policy and Management. 4 Units.
Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as PUBHLTH 222.
Restriction: Graduate students only.

PP&D 244. Land-Use Policy. 4 Units.
Examination of the role of public policy in guiding growth and development in urban and suburban environments. Description of a wide-ranging set of growth policies, the rationales underlying their use, controversies and legal constraints, and evaluation of their effectiveness.

Restriction: Graduate students only.

PP&D 245. Urban Security. 4 Units.
Examines changing urban security landscape facing planners, businesses, policymakers, first responders, and academics. Identifies threats and vulnerabilities and how they can be reduced. Focus on transnational networks where contemporary cities are enmeshed, and function as sources of threat and opportunity.

Restriction: Graduate students only.

PP&D 246. Housing Policy. 4 Units.
Examines theories and practices of housing policy and the relationship of housing to larger neighborhood, community, and regional development issues. Considers the roles of private for-profit and not-for-profit developers, lenders, and all levels of government in the provision of housing.

Prerequisite: Basic statistics.

PP&D 247. Neighborhood Planning. 4 Units.
Focuses on asset-based development and community-building tools. Public policies and neighborhood-based case studies are explored which provide practical skills for the planner of the future.

Restriction: Graduate students only.

PP&D 251. Poverty and Development. 4 Units.
Critical examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as SOCIOL 235.
Restriction: Graduate students only.

PP&D 252. Issues in Environmental Law and Policy. 4 Units.
Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as CRM/LAW C252.
Restriction: Graduate students only.
PP&D 253. Site Planning. 4 Units.
Examines site specific, neighborhood, and community site planning from the site designer and local government perspectives. By reviewing actual discretionary case applications and case studies, students learn how regulatory, environmental, and government constraints influence site planning.

Restriction: Graduate students only.

PP&D 260. Grant Writing for Community Planning and Development. 4 Units.
Introduces students to grant writing and processes involved in generating funding for nonprofit programs and community research projects.

Restriction: Graduate students only.

PP&D 264. Planning, Policy and Design Seminar. 1 Unit.
For first- and second-year doctoral students. Topics include professional development; journal publication process; academic conference presentations; and the job market for doctoral students in and out of academia.

Restriction: Graduate students only.

PP&D 265. Urban and Community Development Seminar. 1 Unit.
For first- and second-year doctoral students. Topics include scholarship related to the urban and community development area. Discussion of assigned articles and book chapters and how they relate to urban and community development.

Restriction: Graduate students only.

PP&D 270. Environmental Ethics. 4 Units.
Introduction to major themes and debates in environmental ethics, with application to contemporary environmental issues.

Restriction: Graduate students only.

PP&D 273. Global Urbanization. 4 Units.
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as SOC SCI 254J, SOCIOL 252A.

Restriction: Graduate students only.

PP&D 275. Special Topics in Urban Planning. 4 Units.
Special topics in urban and regional planning are offered from time to time, but not on a regular basis. Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PP&D 278. Culture, Community, and Space. 4 Units.
Covers how cultures relate to natural and built physical environments. Ways in which culture influences space; ways space influences culture. Concepts for understanding the interrelationship, including values, norms, traditions, religion, and place attachment. Culture and cities, urban form, ethnic communities.

Restriction: Graduate students only.

PP&D 279. Theories of Power and Empowerment. 4 Units.
Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as POL SCI 223A, SOCIOL 271, MGMTPHD 297R.

Restriction: Graduate students only.

PP&D 282. Urban Design Studio for Planners: An Introduction. 4 Units.
Introductory urban design for planners. Organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and drawing assignments to learn practical aspects of urban design.

Restriction: Graduate students only.
PP&D 283. Collaborative Governance and Public Management. 4 Units.
Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 283.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

PP&D 284. Theories of Public Policy. 4 Units.
Focuses on two important theorists with the aim being to study not so much their theory, but their mode of theorizing. Taking them two at a time (e.g., Foucault, Bourdieu) allows us to understand each more deeply through the comparison.

Restriction: Graduate students only.

PP&D 288. Environment-Behavior Studies. 4 Units.
Provides an overview of major theoretical and research perspectives within the field of environment-design research/environment-behavior studies (EBS). Reviews contributions to EBS from architecture, planning, geography, psychology, sociology, and other fields.

Restriction: Graduate students only.

PP&D 292. Professional Report. 4 Units.
Workshop designed to assist M.U.R.P. students in conducting their professional reports. Students select topics, design projects, conduct professional investigations, and write up reports.

PP&D 292A. Professional Report Seminar I. 4 Units.
Provides an introduction to prepare students for writing a professional planning report. Students learn how to diagnose a planning problem; select appropriate analytical methods to assess the problem; pose, evaluate, and recommend alternative approaches to addressing the problem.

Restriction: Graduate students only.

PP&D 292B. Professional Report Seminar II. 4 Units.
Students write and deliver oral presentations in a manner appropriate for professional planning, which includes peer feedback from these presentations. Includes lectures, student assignments, and guest speakers. "Deliverables" and due dates are treated as fixed and contractual professional commitments.

Prerequisite: PP&D 292A.

Restriction: Graduate students only.

PP&D 293. Research Practicum. 4 Units.
Through reading, discussion, and review of existing research proposals, and implementation of preliminary work for dissertation research, students enhance their knowledge of research design and methods, as well as develop skills to write a proposal for dissertation funding.

Prerequisite: PP&D 297.

Restriction: Graduate students only.

PP&D 294A. Urban Planning Practicum I. 4 Units.
Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Restriction: Graduate students only.

PP&D 294B. Urban Planning Practicum II. 4 Units.
Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.

Prerequisite: PP&D 294A.

Restriction: Graduate students only.
PP&D 295. Master's Thesis Research and Writing. 1-8 Units.
Independent research with Planning, Policy, and Design faculty.

Prerequisite: Advancement to candidacy.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PP&D 296. Doctoral Dissertation Research and Writing. 2-12 Units.
Dissertation research with Planning, Policy, and Design faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PP&D 297. Research Design. 4 Units.
Provides training in research design and methods. Students learn how to evaluate the strength of research findings based on the methods used by a researcher and learn to use lessons from the course to develop a research proposal.

Same as PUBHLTH 297.

Restriction: Graduate students only.

PP&D 298. Directed Studies in Urban Planning. 2-4 Units.
Directed Studies in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PP&D 299. Independent Study in Urban Planning. 2-8 Units.
Independent Study in Urban Planning.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

Psychology and Social Behavior Courses

PSY BEH 9. Introduction to Psychology. 4 Units.
Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior. Course may be offered online.

Same as PSYCH 7A.

Overlaps with PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 11A. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYCH 9A.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)
PSY BEH 11B. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYCH 9B.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 11C. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYCH 9C.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 100. Special Topics in Social Behavior. 4 Units.
Special topics courses are offered from time to time. Course content varies with interest of instructor.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Repeatability: Unlimited as topics vary.

PSY BEH 101D. Life Span Developmental Psychology. 4 Units.
Addresses the major issues, concepts, and methods of life span developmental psychology. The fundamental theories, distinctive methods, and the physical, perceptual, cognitive, social, motivational, and emotional development for each developmental phase of the life course are considered. Course may be offered online.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Restriction: Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 102C. Abnormal Psychology. 4 Units.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10.

Overlaps with PSYCH 120A.

Restriction: Psychology and Social Behavior and Psychology majors have first consideration for enrollment.

PSY BEH 103H. Health Psychology. 4 Units.
Theory and research are considered as they contribute to an understanding of the role of psychological processes in health and illness. The distinction between prevention and treatment of illness is established, and a variety of psychosocial interventions are elaborated.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 104S. Social Animal: An Introduction to Social Psychology. 4 Units.
Theories and research exploring social behavior and social influences on behavior. Topics include methods of social research, attitude formation and change, social perception, the social self, stereotypes and prejudice, conformity, obedience, altruism, aggression, interpersonal relationships and love, and group behavior.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior majors have first consideration for enrollment.
PSY BEH 110D. Infant Development. 4 Units.
Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and
cognitive development.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 127I.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 111D. Child Development. 4 Units.
Examines social, emotional, and intellectual growth and development between the ages of 2 and 12 years.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Overlaps with PSYCH 120D.
Restriction: Psychology and Social Behavior and Social Ecology and Psychology majors have first consideration for enrollment.

PSY BEH 112D. Adolescent Development. 4 Units.
Examines current research on the biological, social, and cultural contexts of adolescent development. Topics include the impacts of puberty, adolescents’ decision-making competencies, changes in family and peer relationships, identity development, and psychosocial problems such as depression and problem behavior.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Overlaps with PSYCH 21A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 113D. Adult Development. 4 Units.
Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time.
Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 127A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 114D. Gerontology. 4 Units.
Examines stereotypes and myths associated with aging; physiological and psychological changes that accompany old age; distinguishes behavior
changes due to aging per se from those due to historical and socioeconomic factors; political, social aspects of old age in contemporary society.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 127G.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 116D. Human Development and Cross-Cultural Perspectives. 4 Units.
Human development in diverse cultures (e.g., Asian, American, and African). Special emphasis on East-West contrasts and when East meets West (i.e.,
Asian-American experiences). Topics include parenting, family relations, language and cognition, schooling and academic achievement, and morality.
Prerequisite: (PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B) and SOCECOL 10.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 117D. Development of Gender Differences. 4 Units.
Examination of research on how sexes differ in physiology, cognitive functioning, personality, and social behavior. Sex-differentiated development from
the prenatal period through adulthood. Explanations for male-female differences are sought, focusing on biological (genetic, hormonal), and social
(familial, cultural) mechanisms.
Prerequisite: PSY BEH 9 or PSYCH 9B or PSY BEH 11B or PSYCH 7A.
Same as PSYCH 127D.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 118D. Human Sexuality. 4 Units.
A broad survey of human sexuality encompassing genetic factors, physiological and anatomical development, customary and atypical forms of behavior, reproductive processes, and cultural determinants.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 120D. Child Development, the Law, and Social Policy. 4 Units.
Examines how psychology research and practice can inform areas of law and social policy affecting children and adolescents. Topics include education, mental health, reproductive rights, and delinquency. Goals are to evaluate research and identify the costs/benefits of current policies.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C. Recommended: PSY BEH 111D OR PSY BEH 112D.
Same as CRM/LAW C125.
Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

PSY BEH 121D. Work and Family. 4 Units.
Effects of employment and unemployment on mental health and marital quality; effects of work on parenting and child development; corporate and social policies for "families that work"; young adults' decision-making about work and family.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Upper-division students only. Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 123D. Child in the Family, School, and Community. 4 Units.
The ecological study of contexts in which the child develops and is socialized: the family, school, peer group, media, and community. Examines the impact of societal influences, such as culture, religion, economics, politics, and technology.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 135H. Introduction to Biopsychology. 4 Units.
Introductory overview of the biology of behavior with a focus on the structure and function of the brain. Selected behaviors (e.g., eating, sleeping) and psychological states (e.g., stress, psychiatric disorders) are addressed from a biopsychological perspective.
Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 136H. Behavioral Medicine. 4 Units.
Examines biobehavioral aspects of health and illness, focusing on how stress contributes to or exacerbates disease processes. Background information on psychosomatic medicine and stress models and detailed examination of specific organ systems emphasizing the reactivity of these systems to stress.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 137H. Human Stress. 4 Units.
Stress as a multidisciplinary topic. Biological, psychological, and sociological approaches to adaptation-related disorders. Effects of acute and chronic stress on emotions, physiology, and behavior. Methods of stress assessment, stress reduction, and intervention.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 138H. Child Health Psychology. 4 Units.
Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children's beliefs about health, illness, and medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of child's illness on family.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 9C or PSYCH 7A. Recommended: SOCECOL 10.
Same as PSYCH 127H.
Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Public Health Policy majors have first consideration for enrollment.
PSY BEH 139H. Sports Psychology. 4 Units.
Psychological components of athletic performance with regard to scientific and practical issues. Roles of cognitive processes, physiological arousal, and emotion. Various personality factors related to performance, competition, and coaching. Strategies for improving athletic performance for individual and team competition.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 140H. The Hardiness Approach to Stress Management. 4 Units.
New development within psychology involving a combination of motivations and skills that extensive research has shown enhances performance, conduct, morale, stamina, and health. Combines study of hardiness research with strategies for improvement of personal hardiness through a series of exercises.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 141H. Clinical Health Psychology. 4 Units.
Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PUBHLTH 141.

Restriction: Public Health Sciences, Public Health Policy, and Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 150C. Clinical Psychology. 4 Units.
Overview of theories, assessment techniques, research methodologies and intervention approaches in clinical psychology. Psychodynamic, behavioral, humanistic, and cognitive perspectives are examined along with ethical and professional issues.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and SOCECOL 10.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 151C. Psychological Testing and Assessment. 4 Units.
Laboratory-seminar exploration of diverse methods of assessing, analyzing, and recording behavior. Includes methods of direct behavioral observation, structured (analog) assessments, rating scales, interviewing, and self-monitoring. Development of assessment skills and their application in intervention and research programs.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and PSY BEH 150C. Recommended: SOCECOL 10.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 152C. Clinical Child Psychology. 4 Units.
Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy implications of identifying children who are different.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSYCH 127C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 153C. Developmental Psychopathology. 4 Units.
Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 120A. Recommended: SOCECOL 10.

Same as PSYCH 177P.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 154C. Cognitive Behavior Therapy. 4 Units.
Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.
Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSY BEH 11C) or PSYCH 7A or (PSYCH 9A and PSYCH 9C).
Same as PSYCH 147C.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 155C. Child Therapies. 4 Units.
Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people's lives.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 122C.
Same as PSYCH 127T.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 156C. Forensic Psychology: Advanced Seminar. 4 Units.
The focus is on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and (PSY BEH 178S or CRM/LAW C149).
Same as CRM/LAW C136, PSYCH 177F.
Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Criminology, Law and Society majors have first consideration for enrollment.

PSY BEH 160C. Clinical Neuroscience. 4 Units.
Offers an introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

PSY BEH 161C. Forensic Psychology. 4 Units.
Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues arising when psychologists are involved in legal proceedings.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSY BEH 11C.
Same as CRM/LAW C160.

PSY BEH 162C. Psychodynamic Studies. 4 Units.
Introduction to psychoanalysis and contemporary psychodynamic studies. Emphasis on theories associated with psychoanalysis and psychodynamic psychotherapy, including unconscious determinants of behavior and influence of the past on the present. Exploration of links between psychodynamic studies and other disciplines (music, medicine, neuroscience).
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 170S. Personality. 4 Units.
Comparison of the major theories of personality. Provides a frame of reference for understanding lifestyles, development, maturity, and psychopathology. Emerging research themes are used to identify promising lines of personality theorizing.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Overlaps with PSYCH 120P.
Restriction: Sophomores only or upper-division students only. Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.
PSY BEH 171S. Environmental Psychology. 4 Units.
Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.
Prerequisite: SOCECOL E8 or SOCECOL 10 or PP&D 4.
Same as PP&D 151, PUBHLTH 151.
Restriction: Urban Studies, Social Ecology, Psychology and Social Behavior, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 173S. Social Relationships. 4 Units.
Examines major issues, concepts, and methods in the scientific study of social relationships. Topics include relationship formation and dissolution, friendships and love relationships, loneliness, bereavement, societal influences on close relationships, significance of close relationships for health and well-being.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 174S. Error and Bias in Social Judgement. 4 Units.
Examines how people encode, reason about, and remember social information and explores how biases and shortcomings in social perception, judgment, and memory are central to understanding both effective social functioning and many forms of maladaptive behavior and social conflict.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 175S. Cognition and Emotion. 4 Units.
Examines relations between cognition and emotion. How have the relations between cognition and emotion been construed historically? How closely related are cognitive and emotional development? How do emotions influence reasoning and memory? How similar is emotional experience across cultures?
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 176S. Motivation. 4 Units.
History, major theories, methods, and applications of motivational psychology, with emphasis on European approaches. Origins of the field in personality, learning, cognition, and activation research. Recent innovations in motivational and volitional self-recognition. Current approaches, major debates, empirical research programs.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 101D and (PSY BEH 104S or PP&D 151).
Overlaps with PSYCH 121M.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 177S. Psychology and Emotion. 4 Units.
General theories of emotion and research regarding cognitive, behavioral, physiological, and subjective experience of emotion. Specific topics include emotion regulation, emotion and health, emotional intelligence, and emotional development.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSYCH 127E.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 178S. Violence in Society. 4 Units.
Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as CRM/LAW C149.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.
PSY BEH 179S. Cultural Psychology. 4 Units.
An examination of culture's influence on human minds. Topics include culture's impact on perception, cognition, motivation, emotion, moral reasoning, communication, and health. Addresses cultural psychology's methods, history, and place within psychology and related fields.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSY BEH 11C or PSYCH 7A or PSYCH 9B or PSYCH 9C.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 180S. Organizational/Industrial Psychology. 4 Units.
Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research and consumer psychology. Potential ethical problems are discussed.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSY BEH 11B or PSY BEH 11C or PSYCH 7A or PSYCH 9A or PSYCH 9B or PSYCH 9C.

Same as PSYCH 122I.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 183S. Social Epidemiology. 4 Units.
Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10 and SOCECOL 13.

Same as PUBHLTH 102.

Restriction: Psychology and Social Behavior, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 184S. Positive Psychology. 4 Units.
The field of positive psychology focuses on what is right and positive about people and institutions. Course introduces findings associated with human strengths and positive emotions and provides clinical and personal applications and implications.

Prerequisite: PSY BEH 9 or PSY BEH 11C.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 190. Applied Statistics in Psychological Research. 4 Units.
Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.

Prerequisite: SOCECOL 13.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192A. History of Psychology. 4 Units.
A history of the development of various schools and systems of psychological thought.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSYCH 120H.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192E. Perception and Sensory Processes. 4 Units.
A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis on the visual system.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.

Same as PSYCH 130A.
Overlaps with PSYCH 131A, PSYCH 131B.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 192G. Cognitive Science. 4 Units.
Introduction to investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include: perception, attention, knowledge representations, learning and memory, action, reasoning, and language.
Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSYCH 11B) or PSYCH 7A or (PSYCH 9A and PSYCH 9B).
Same as PSYCH 140C.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192I. Principles of Learning Theory. 4 Units.
Investigation of the learning and memory processes of humans and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.
Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.
Same as PSYCH 140L.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192J. Human Memory. 4 Units.
Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 140M.
Overlaps with PSYCH 46A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192K. Human Problem Solving. 4 Units.
Modern developments in the psychology of human problem solving. Topics include: concept identification, arithmetic, sets, logic puzzles, story problems, group problem solving, and theorem proving.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 143P.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192L. Introduction to Cognitive Neuroscience. 4 Units.
Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.
Same as PSYCH 160A, BIO SCI N166.
Restriction: Psychology majors have first consideration for enrollment.

PSY BEH 192P. Perceptual Neuroscience. 4 Units.
Examines the physiology of cortical networks underlying human perceptual experience.
Prerequisite: PSYCH 160A or PSY BEH 192L.
Same as PSYCH 161P.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 192Q. Chicano/Latino Social Psychology. 4 Units.
Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 168.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)

PSY BEH 192R. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.

Same as CHC/LAT 177.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)

PSY BEH 192RW. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 177W.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(Ib, VII)

PSY BEH 192S. Health and the Latino Paradox. 4 Units.
Examines research and theories concerning the physical and mental health of U.S. Latino populations. Contemporary accounts, health care implications, and new directions for understanding sources of risks and resilience for health in Latino populations are evaluated and discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 178.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)

PSY BEH 192T. Cognition and Learning in Educational Settings. 4 Units.
Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as EDUC 173.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

PSY BEH 192U. Psychology of Learning, Abilities, and Intelligence. 4 Units.
Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYCH 7A or PSY BEH 9.

Same as EDUC 176.

Restriction: Psychology and Social Behavior, Social Ecology, and Education majors have first consideration for enrollment.
PSY BEH 192V. Language and Literacy. 4 Units.
Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as EDUC 151.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

PSY BEH 193B. Juvenile Delinquency. 4 Units.
Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Prerequisite: CRM/LAW C7.

Same as CRM/LAW C109.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 193C. Social Control of Delinquency. 4 Units.
Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7. Recommended: CRM/LAW C109.

Same as CRM/LAW C164.

Restriction: Psychology and Social Behavior, Social Ecology, Criminology, Law and Society, and Psychology majors have first consideration for enrollment.

PSY BEH 193D. Interrogation, Confession, and the Law. 4 Units.
In-depth examination of social psychology of police interrogation in America, the evolution of American interrogation practices from the nineteenth century to the present, impact of law on police behavior and ideology, causes and consequences of false confessions, possibilities of reform.

Same as CRM/LAW C152.

Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

PSY BEH 193E. Psychology and the Law. 4 Units.
Psychological assumptions of American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eye-witness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.

Same as CRM/LAW C105.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 193F. Family Law. 4 Units.
Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.

Same as CRM/LAW C123.

Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

PSY BEH 193G. Eyewitness Testimony. 4 Units.
Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SOCECOL 10.

Same as CRM/LAW C177.

Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment. Seniors only.
PSY BEH 196. Research Seminar in Psychology and Social Behavior. 4 Units.
Special topics research seminar. Content varies with interest of instructor. Capstone seminar for students who have conducted research with, or have a background in, the research topics of the PSB faculty member offering this seminar in a given quarter.

Prerequisite: PSY BEH 11C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

PSY BEH P201. Research Methods in Psychology. 4 Units.
In-depth examination of the conceptualization of research problems and linkages between theory and the design of appropriate strategies for empirical research in psychological science. Topics include experimental and quasi-experimental designs, reliability and validity of measurement and non-experimental procedures.

Restriction: Psychology and Social Behavior graduate students only.

PSY BEH P204. Adolescence. 4 Units.
Considers pubertal and cognitive changes and their social consequences; the family, peer group, school, and cultural contexts in which adolescence is embedded; and selected psychosocial issues including autonomy, identity, health, and well-being.

Restriction: Graduate students only.

PSY BEH P209A. Applied Psychological Research. 4 Units.
Focuses on scientific and professional issues in the field of psychology. Topics include communication skills; intervention approaches; collaboration, consultation, and referral; and ethical issues associated with at-risk populations research.

Restriction: Graduate students only.

PSY BEH P212. Social Cognition. 4 Units.
Explores historical and current developments in cognitive social psychology. Topics include judgment and decision making, automatic versus controlled processing, affective forecasting, motivated reasoning, and the effects of emotion on memory and judgment.

Restriction: Graduate students only.

PSY BEH P214. Seminar in Social Psychology. 4 Units.
Presents an overview of selected theoretical and empirical topics in social psychology including social influence and conformity, altruism and aggression, persuasion and attitude change, self and social perception, and social cognition.

Restriction: Graduate students only.

PSY BEH P218. Infancy. 4 Units.
Covers development from conception through the second year. Focus is on research and theory concerning infants’ physical, social, cognitive, perceptual, emotional, and language development. Also covers transition to parenthood and family context of infant development.

Restriction: Graduate students only.

PSY BEH P220. Developmental Psychology: Theories and History. 4 Units.
Examines key concepts, theories, and the historical and philosophical roots of research in human life span development. Focuses on biological and environmental causation, universalism and cultural relativism, continuity and change.

Restriction: Graduate students only.

PSY BEH P226. Emotion in Psychology. 4 Units.
Covers original and recent theories of emotions and how they guide current research. Specific topics include neuroanatomical structure of emotion, life-span emotional development, and health and emotion.

Restriction: Graduate students only.

PSY BEH P230. Adulthood. 4 Units.
Focuses on early and middle adulthood. Examines extended period of transitioning to adulthood; changes in relationships with family members; impact of major role-related experiences (e.g., spouse, parent, worker) on development and well-being; continuity and change in personality and social identities.

Restriction: Graduate students only.
PSY BEH P231. Professional Issues in Psychology. 4 Units.
Examines a variety of issues related to the professional socialization and development of graduate students in psychology. Topics include the publication process, sources of research funding, alternative employment options, competitiveness on the job market, and the academic career route.
Restriction: Graduate students only.

PSY BEH P232. Hardiness as the Pathway to Resilience. 4 Units.
Theory, research, and practice supports hardiness as a major pathway to surviving and thriving under stress in our turbulent times. Course (1) imparts relevant theory, research, and practice, and (2) teaches how to use hardiness assessment and training techniques.
Restriction: Graduate students only.

PSY BEH P233. Personality. 4 Units.
Provides a frame of reference for understanding personality and its role in life-span development, the relationship of the individual to society, and both mental and physical illness.
Restriction: Graduate students only.

PSY BEH P237. Violence, Society and Psychopathology. 4 Units.
The multifactorial, societal-contextual nature of violence is examined through historical, philosophical, and social science theoretical accounts. Priority topics are violent crime, socio-environmental factors, family violence, media violence, terrorism, personality and mental disorder, psychiatric institutions, and interventions for violent offenders.
Restriction: Graduate students only.

PSY BEH P238. Child Psychopathology. 4 Units.
Examination of etiology, classification, and developmental pathways of disorders, as well as risk and resilience factors, during the childhood/adolescent years. Discussion of genetic influences and contextual risk factors as well as internalizing and externalizing disorders.
Restriction: Graduate students only.

PSY BEH P239. Adult Psychopathology. 4 Units.
Explores the antecedents, characteristics, course, outcomes, and options for the prevention or management of various forms of psychopathology and behavior disorder. Focuses on psychological and biobehavioral mechanisms that influence the development, expression, and amelioration of maladaptation.
Restriction: Graduate students only.

PSY BEH P245. Psychological Assessment. 4 Units.
Familiarizes students with psychological assessments in intelligence, clinical diagnosis, personality, and neuropsychological functioning. Exposure to administering, scoring, and interpreting assessments. Special focus on psychometrics (e.g., reliability and validity), test construction, and ethical responsibilities.
Restriction: Graduate students only.

PSY BEH P250. Emotion, Reasoning, and Memory. 4 Units.
Examines research and theory on emotion from the perspective of cognitive psychology. Topics include the effects of emotions on attention, memory, and problem solving; the relations between emotional and cognitive development; flash-bulb memories of intense emotional experiences; eyewitness testimony.
Restriction: Graduate students only.

PSY BEH P257. Genes, Emotions, and Behavior. 4 Units.
Course in behavioral genetics addresses the nature/nurture question: what is the strength of relative genetic and environmental influences on psychosocial processes ranging from attachment and social behavior to aggression and depression.
Restriction: Graduate students only.

PSY BEH P258. Health Psychology. 4 Units.
Interdisciplinary exploration of emerging fields of health psychology and behavioral medicine. Topics: role of stress in development/treatment of medical problems; sociocognitive determinants of health and illness; interpersonal health transactions; behavioral approaches to medical problems such as diabetes, obesity, hypertension.
Restriction: Graduate students only.
PSY BEH P262. Interpersonal Processes and Health. 4 Units.
Examines traditions of research linking interpersonal processes to emotional or physical health. Topics include: role of social support in ameliorating stress, effects of social control on health-compromising behaviors, adverse effects of social relationships on health, causes of deficient social relationships.

Restriction: Graduate students only.

PSY BEH P263. Eyewitness Testimony. 4 Units.
Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as CRM/LAW C263.

Restriction: Graduate students only.

PSY BEH P264A. Quantitative Methods in Psychology. 4 Units.
Statistical techniques for inference in psychological research including point, interval, and effect size estimation to establish test association between variables. General Linear Model techniques include single- and multifactor analysis of variance with use of linear contrasts and post hoc comparisons.

Restriction: Graduate students only.

PSY BEH P264B. Advanced Quantitative Methods in Psychology. 4 Units.
Focuses on proper specification of multivariable regression models with emphasis on inferences using OLS and logistical regression. Emphasizes framework for assessing interaction and other complex relationships between response and predictor variables. Use of statistical software to analyze data.

Prerequisite: PSY BEH P264A.

Restriction: Graduate students only.

PSY BEH P265. Memory and the Law. 4 Units.
Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as CRM/LAW C265.

Restriction: Graduate students only.

PSY BEH P266. Psychology and the Law. 4 Units.
Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as CRM/LAW C266.

Restriction: Graduate students only.

PSY BEH P268. Coping with Stressful Life Events. 4 Units.
Explores how individuals cope with serious life crises (e.g., illness, bereavement), life transitions, and daily stressors. Considers how such events impact on people's cognitions, emotions, and health, and the role of others in the coping process.

Restriction: Graduate students only.

PSY BEH P271. Human Evolution and Behavior. 4 Units.
Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as BIOCHEM 217.

Restriction: Graduate students only.

PSY BEH P272. Human Stress and the HPA Axis. 4 Units.
Introduction to a new and multidisciplinary research field investigating the interactions between the brain, hormones, and behavior. After an introduction to relevant neuroendocrine concepts, covers current research topics in the field including stress, memory, development, and psychopathology.

Restriction: Graduate students only.
PSY BEH P273. Biobehavioral Aspects of Health and Illness. 4 Units.
Examines the behavior-physiology interactions of some major bodily systems: the nervous, cardiovascular, gastrointestinal, and endocrine systems. Analysis of normal and abnormal states of these systems as they relate to tissue injury, disease, and rehabilitation.

Restriction: Graduate students only.

PSY BEH P274. The Psychobiology of Stress. 4 Units.
Introduction to stress physiology and psychoneuroimmunology and critical review of research in this area. Examines bi-directional relationships between psychological factors (e.g., stressors, social processes, emotions), neuroendocrine and immune systems, and disease.

Restriction: Graduate students only.

PSY BEH P275. Special Topics in Psychology and Social Behavior. 4 Units.
Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PSY BEH P276. Meta Analysis. 4 Units.
The process of synthesizing results from a number of studies that address a common research question is often referred to as meta-analysis. This applied course explores the meta-analysis process from the coding of retrieved studies to the final research synthesis.

Restriction: Graduate students only.

PSY BEH P289. The Teaching of Psychology. 4 Units.
Provides students with the theory and skills needed to teach undergraduate psychology courses. Covers research on theories and methods of teaching, curriculum design, and evaluation. Students also gain practical experience preparing and presenting material.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology and Social Behavior graduate students only.

PSY BEH P290. Research in Developmental Psychology. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of developmental psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PSY BEH P291. Research in Health Psychology. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of health psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PSY BEH P292. Research in Psychopathology and Behavior Disorder. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of psychopathology and behavior disorder. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PSY BEH P293. Research in Social and Personality Psychology. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of social and personality psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.
PSY BEH P294A. Research Directions in Psychology and Social Behavior. 2 Units.
Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychology and Social Behavior. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PSY BEH P294B. Research Directions in Psychology and Social Behavior. 2 Units.
Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychology and Social Behavior. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PSY BEH P294C. Research Directions in Psychology and Social Behavior. 2 Units.
Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychology and Social Behavior. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

PSY BEH P295. Research in Psychology and Law. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of psychology and law. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P296. Doctoral Dissertation Research and Writing. 4-12 Units.
Dissertation research with Psychology and Social Behavior faculty.

Prerequisite: Advancement to candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P298. Directed Studies in Psychology and Social Behavior. 2-4 Units.
Directed study with Psychology and Social Behavior faculty.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P299. Independent Studies in Psychology and Social Behavior. 2-8 Units.
Independent research with Psychology and Social Behavior faculty.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Public Policy Courses

PUB POL 219. Information and Public Policy. 4 Units.
Evaluates strengths and weaknesses of qualitative and quantitative methods and the data used in making public policy claims. Looks at the bases of certain widely accepted measures of poverty, growth, environmental quality, and the like.

Repeatability: May be taken for credit 2 times.
Restriction: Master of Public Policy graduate students have first consideration for enrollment.
PUB POL 221. Public Policy . 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PP&D 221.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

PUB POL 225. Qualitative Methods . 4 Units.
Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Repeatability: May be taken for credit 2 times.

Same as PP&D 220.

Restriction: Master of Public Policy graduate students only.

PUB POL 240. Microeconomics and Public Policy. 4 Units.
Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as ECON 255.

Restriction: Graduate students only.

PUB POL 283. Collaborative Governance and Public Management. 4 Units.
Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Repeatability: May be taken for credit 2 times.

Same as PP&D 283.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

Social Ecology Courses

SOCCECOL E8. Introduction to Environmental Analysis and Design. 4 Units.
Overview of general concepts, theoretical principles, and analytical techniques for investigating environmental systems. Integrates tools from natural and social sciences to analyze contemporary environmental challenges such as pollution, resource acquisition, facility and ecosystem design, impact assessments, formulation of environmental policy.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

SOCCECOL 10. Research Design. 4 Units.
An introduction to the logic behind and methods of designing and conducting research studies in Social Ecology. Topics include how to measure variables of interest, identifying causal relationships, sampling, survey research methods, experiments, quasi-experimental designs, and ethics in research. Course may be offered online.

Restriction: School of Social Ecology majors only.
SOCECOL 13. Statistical Analysis in Social Ecology. 4 Units.
Introduction to the techniques of statistical analysis in Social Ecology. Topics include probability, statistical inference, significance testing, univariate descriptive statistics, and multivariate analysis from an interdisciplinary perspective.

Prerequisite: SOCECOL 10.

Restriction: School of Social Ecology majors have first consideration for enrollment. No credit for SOCECOL 13 if taken concurrently with or after PSYCH 10A, ANTHRO 10A, SOCIOL 10A, POL SCI 10ABC, SOC SCI 9A, or SOC SCI 10A.

(Va)

SOCECOL H20A. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOC SCI H1E.

Restriction: Campuswide Honors Program students only.

(III)

SOCECOL H20B. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A.

Same as SOC SCI H1F.

Restriction: Campuswide Honors Program students only.

(III)

SOCECOL H20C. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B.

Same as SOC SCI H1G.

Restriction: Campuswide Honors Program students only.

(III)

SOCECOL 74A. Moral Development and Just Communities. 4 Units.
A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Grading Option: Pass/no pass only.

SOCECOL 74B. Moral Development and Just Communities. 4 Units.
A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Prerequisite: SOCECOL 74A.

Grading Option: Pass/no pass only.

SOCECOL 74C. Moral Development and Just Communities. 4 Units.
A three-quarter sequence exploring interpersonal, personal, and social issues based on principles of fairness and justice. Both the living environment of a University residence hall and selected institutions of society are analyzed in terms of moral development theory.

Prerequisite: SOCECOL 74B.

Grading Option: Pass/no pass only.)
SOCECOL 100. Special Topics in Social Ecology. 4 Units.
Special topics courses are offered from time to time. In general they will focus on a topic from interdisciplinary perspectives. Course content varies with the interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: School of Social Ecology majors only.

SOCECOL 111. Advanced Research Methods. 4 Units.
For students planning to conduct senior research projects or apply to graduate school in social research fields. Topics include reviewing literature, preparing a research proposal, protecting human subjects, citing scholarly work, building measures, estimating sample size, interview and presentation skills.

Prerequisite: SOCECOL 10 and SOCECOL 13.

SOCECOL E113. Social Ecology of Peace. 4 Units.
Examination of differing definitions of the problem of achieving peace and the special problems of seeking peace in the nuclear age.

Same as INTL ST 121.

SOCECOL E127. Nuclear Environments. 4 Units.
Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as INTL ST 122, PUBHLTH 168.

SOCECOL 131. Social Ecology of Health Promotion. 4 Units.
Core themes of Social Ecology are examined as they apply to major areas of health promotion research and practice. Students attend lectures and work collaboratively on team projects conducted in university and community settings.

Same as PUBHLTH 143.

Restriction: Public Health Sciences, Public Health Policy, and Social Ecology majors have first consideration for enrollment.

SOCECOL 150. Social Ecology of Technology. 4 Units.
Socio-ecological principles applied to technological change and innovation. Technological change as a result of interrelations between people and their socioeconomic environment. Organizational ecology of technology; life cycle concepts and history. Social ecology of technocapitalism and its networks.

Prerequisite: SOCECOL 10 and SOCECOL 13.

SOCECOL 181. Mentors in Higher Education. 4 Units.
Discussion of roles and functions of mentors in higher education. Specific mentoring issues include: personal skills, training, the sociocultural role of mentoring in higher education, student affirmative action, history and politics in higher education.

SOCECOL 183A. International Studies Forum. 2 Units.
A faculty-student forum featuring lecturers from a variety of institutions with discussion issues related to international studies.

Repeatability: May be taken for credit 4 times.

Same as SOC SCI 183A, HUMAN 183A, INTL ST 183A.

Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

SOCECOL 183B. Seminar in Mediation. 4 Units.
Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as HUMAN 183B, INTL ST 183B, SOC SCI 183B.

Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

SOCECOL 183C. Seminar in Conflict Resolution. 4 Units.
Designed for students pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write research paper.

Same as SOC SCI 183C, HUMAN 183C.
SOCECOL 183CW. Seminar Conflict Resolution. 4 Units.
Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOC SCI 183CW, HUMAN 183CW.

SOCECOL 186A. Senior Seminar on Global Sustainability I. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Prerequisite: BIO SCI 65 and ENVIロン E20 and EARTHSS 10.

Grading Option: In progress only.

Same as BIO SCI 191A, EARTHSS 190A.

Restriction: Seniors only.

SOCECOL 186B. Senior Seminar on Global Sustainability II. 2 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A.

Grading Option: In progress only.

Same as BIO SCI 191B, EARTHSS 190B.

Restriction: Seniors only.

SOCECOL 186CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.
Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B. Satisfactory completion of the Lower-Division Writing requirement.

Same as BIO SCI 191CW, EARTHSS 190CW.

Restriction: Seniors only.

SOCECOL H190A. Honors Research. 4 Units.
Independent work on an individual research project in addition to participation in a mini proseminar in which faculty discuss their ongoing research. Students prepare a written proposal for a research project.

Restriction: Upper-division students only. Campuswide Honors Program students only.

SOCECOL H190B. Honors Research. 4 Units.
Independent work on an individual research project in addition to participation in a mini proseminar in which faculty discuss their ongoing research. Students prepare a written proposal for a research project.

Prerequisite: SOCECOL H190A.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only. Campuswide Honors Program students only.
SOCECOL H190W. Honors Research. 4 Units.
Students write up their honors research project (H190A-B) and prepare an oral report which is presented at the honors seminar.

Prerequisite: SOCECOL H190B.

Restriction: Upper-division students only. Campuswide Honors Program students only.

(Ib)

SOCECOL 194W. Naturalistic Field Research. 4 Units.
Introduction to alternative models of experiential learning and to various methods of observation, assessment, and evaluation. Introduction to the nature of organizations and ethical issues that emerge from research and intervention in natural settings.

Prerequisite: SOCECOL 10. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Ecology majors.

(Ib)

SOCECOL 195. Field Study. 2-8 Units.
Naturalistic observation and analysis of social issues and problems in combination with experiential learning in field placement sites in the areas of psychology and social services, criminology, and environmental studies. Course may be offered online.

Prerequisite: SOCECOL 10 and SOCECOL 13.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 24 units.

Restriction: School of Social Ecology majors only. Upper-division students only.

SOCECOL 195A. Advanced Field Study. 4 Units.
While completing 10 hours of field work per week, students become acquainted with the goals and activities of their placement and will work closely with the placement supervisor and AFS instructor to identify the scope of a research project.

Prerequisite: SOCECOL 10 and SOCECOL 13. Acceptance to Advanced Field Study required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: School of Social Ecology majors only. Upper-division students only.

SOCECOL 195B. Advanced Field Study. 4 Units.
While completing 10 hours of field work per week, students implement their research project through data collection and observations which allow them to reflect on, apply, and synthesize their academic training through observations and experiences at the placement.

Prerequisite: SOCECOL 195A. Acceptance to Advanced Field Study required.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: School of Social Ecology majors only. Upper-division students only.

SOCECOL 195C. Advanced Field Study. 4 Units.
While completing 10 hours per week of field work, students write and finalize their AFS Client Project in consultation with the placement and the FS instructor, and make a final written and oral presentation to the placement and invited guests.

Prerequisite: SOCECOL 195B. Acceptance to Advanced Field Study required.

Repeatability: May be taken for credit 2 times.

Restriction: School of Social Ecology majors only. Upper-division students only.

SOCECOL 198. Directed Study. 2-4 Units.
Directed study with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.
SOCECOL 199. Special Studies. 1-4 Units.
Special Studies with Social Ecology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

SOCECOL 200. Seminar in Social Ecology. 4 Units.
Students are introduced to the classic and contemporary literature of human and social ecology and are expected to use the ecological paradigm to analyze social phenomena of interest to the differing subprograms.

Restriction: Graduate students only.

SOCECOL 250. Environmental Policy and Global Sustainability. 4 Units.
Seminar organized around four transcendent questions: does the world value sustainability, what challenges must be met to move toward it, what are the roots of inequality, and is capitalism compatible with sustainability.

Same as PUBHLTH 241.

Restriction: Graduate students only.

SOCECOL 261. Strategies of Theory Development. 4 Units.
The goals of this course are (1) to examine key issues and controversies facing the development of social ecological theory, and (2) to encourage students to develop their own abilities as theorists. Strategies for enhancing creative hypothesis formation are emphasized.

SOCECOL 264A. Data Analysis. 4 Units.
Provides an appreciation and understanding of statistics necessary to conduct applied research. Topics include approaches to and presentation of data, robust statistics, standardization techniques, multivariate regression, and analysis of variance.

Restriction: Graduate students only.

SOCECOL 264B. Data Analysis. 4 Units.
Provides an appreciation and understanding of statistics necessary to conduct applied research. Topics include approaches to and presentation of data, robust statistics, standardization techniques, multivariate regression, and analysis of variance.

Prerequisite: SOCECOL 264A.

Restriction: Graduate students only.

SOCECOL 266A. Applied Logistic Regression. 4 Units.
Develops statistical models to be used where the dependent variable is dichotomous. Applications to be considered include cohort and case-control analyses.

Prerequisite: SOCECOL 264A and SOCECOL 264B.

SOCECOL 266C. Analysis of Statistical Power. 4 Units.
Statistical power is a crucial aspect of hypothesis testing. Students learn how to interpret statistical power; how to calculate statistical power for most common designs; and how to design experiments and quasi-experiments to optimize power.

Prerequisite: SOCECOL 264A and SOCECOL 264B.

Restriction: Graduate students only.

SOCECOL 266D. Analysis of Survival Data. 4 Units.
Provides an introduction to survival analysis methods for the analysis of change in discrete dependent variables. Focuses on data collection strategies for obtaining longitudinal data and continuous-time hazards models. Communicates the variety and power of multivariate hazard models.

SOCECOL 266E. Applied Longitudinal Data Analysis. 4 Units.
Longitudinal data feature measurements over a continuum and are often conceptualized as a trajectory describing the evolution of the response "over time." Course emphasizes use of the linear mixed model for the analysis of normally distributed, longitudinal responses.

Prerequisite: SOCECOL 264B or PSY BEH P264B.

Restriction: Graduate students only.
SOCECOL 272A. Structural Equation Modeling I. 4 Units.
The general structural equation model is developed including path models, recursive and nonrecursive structural models, multiple indicator models, and confirmatory factor models. Use of LISREL and other software for estimating model parameters is covered.
Prerequisite: SOCECOL 264A and SOCECOL 264B.

SOCECOL 272B. Structural Equation Modeling II: Longitudinal and Advanced Topics. 4 Units.
Provides hands-on experience with longitudinal and advanced structural equation models and will be of interest to students from a range of disciplines. Topics covered include confirmatory factor, latent growth curve, general growth mixture, and multi-level modeling.
Prerequisite: SOCECOL 272A.
Restriction: Graduate students only.

SOCECOL 275. Special Topics in Social Ecology. 2-4 Units.
Topics covered vary with interests of the instructor.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCECOL 291. Program Evaluation. 4 Units.
Students are introduced to the use of research techniques and statistical methods in assessing the effectiveness of social programs. Different evaluative models are discussed using examples of actual program evaluations.
Prerequisite: Two courses of graduate level statistics.
Restriction: Graduate students only.

SOCECOL 295. Masters Thesis Research & Writing. 1-8 Units.
Independent research with Social Ecology faculty.
Prerequisite: Advancement to candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

SOCECOL 296. Doctoral Dissertation Research & Writing. 1-12 Units.
Dissertation research with Social Ecology faculty.
Prerequisite: Advancement to Candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

SOCECOL 297. Field Study. 2-4 Units.
Field studies in Social Ecology.
Restriction: Graduate students only.

SOCECOL 298. Directed Studies. 2-4 Units.
Directed study with Social Ecology faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

SOCECOL 299. Independent Study. 1-8 Units.
Independent study with Social Ecology faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
SOECOL 399. University Supervised Teaching. 2-4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Criminology, Law and Society

2340 Social Ecology II: 949-824-5575
http://cls.soceco.uci.edu/
Cheryl Maxson, Department Chair

The Department of Criminology, Law and Society focuses on the problem of crime and on understanding the social, cultural, political, and economic forces that interact with the law. Basic courses present overviews of American legal systems with particular emphasis on criminal and juvenile justice, forms of criminal behavior, the role of law in understanding social and psychological phenomena, and the applications of sociological theory in understanding law and legal systems. Subsequent course work provides a deeper understanding of the causes and consequences of crime, criminal justice policy, and socio-legal theory, including how legal institutions can both address problems of inequality and exacerbate those problems.

Students are provided with opportunities to become acquainted with the varieties of behavior that society chooses to control or regulate, the methods and institutions used to achieve that control or regulation, and the approaches aimed specifically at altering behavior deemed unacceptable. In addition, there is provision for students to use their increasing knowledge of the law, its procedures, and institutions to enhance their understanding of the social sciences.

The course of study provides excellent preparation for law school and for graduate study in sociology, criminology, and criminal justice. Careers for students who terminate their University education at the baccalaureate level may be developed through placements in criminal justice and regulatory agencies, in organizations determining public policy, and in programs that deliver services to people who have difficulties with some aspect of the legal system.

Students are strongly encouraged to select electives in a variety of departments. Courses in areas such as Psychology, Sociology, Economics, and Political Science can provide a further context for the understanding of crime, law, and criminal justice, while courses in areas such as art history, theater, and music can enhance the quality of the student’s entire life.

Field study placements are available in police departments, public defenders’ offices, probation and parole agencies, the Orange County District Attorney’s Office, the State juvenile detention system, the Orange County Victim/Witness Assistance Program, juvenile shelters, legislative offices, and in private legal firms.

Undergraduate Program

Requirements for the B.A. Degree in Criminology, Law and Society

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1444).

Departmental Requirements

Eleven courses (44 units) as specified below:

A. One lower-division gateway course
CRM/LAW C10 Fundamentals of Criminology, Law and Society

B. Select one course from each of the following four groups:

(1) The Legal System, Law and Society

<table>
<thead>
<tr>

</table>
C. Six upper-division elective courses (24 units). Select from courses numbered CRM/LAW C100–C191.

1 Courses taken to satisfy requirement B may not also be used to satisfy requirement C.

Criminology, Law and Society Minor Requirements

Nine courses (36 units) as specified below:

- CRM/LAW C7: Introduction to Criminology, Law and Society
- SOCECOL E8: Introduction to Environmental Analysis and Design
- PSY BEH 9: Introduction to Psychology
  or
  - PSY BEH 11A- 11B- 11C: Psychology Fundamentals
- and six upper-division courses selected from CRM/LAW C100–C191

NOTE: SOCECOL 198 and SOCECOL 199 may not be applied toward the minor.

Graduate Program

General information about the School of Social Ecology’s graduate programs, including admission requirements, career opportunities, and Ph.D. program milestones can be found in the School of Social Ecology Graduate (p. 1448) section of the Catalogue. Specific information about the Department of Criminology, Law and Society’s graduate program appears below.

M.A.S. in Criminology, Law and Society

The Master of Advanced Study (M.A.S.) in Criminology, Law and Society, the first online degree program at the University of California, prepares professionals for leadership positions in criminal justice and the legal professions. The curriculum emphasizes theoretical and practical applications central to crime and its control, social policy, and the law. In keeping with one of the main tenets of the School of Social Ecology, students approach topics from a multidisciplinary perspective.

This program is ideally suited for professionals interested in obtaining positions in or currently working in the criminal justice or legal fields and who are seeking a graduate degree for career advancement. The program consists of 52 units of course work completed over a two-year period (six quarters) that includes a required one-week in-residence introductory course scheduled right before the first fall quarter of instruction. In lieu of a thesis, students are required to take a capstone course in the winter quarter of the second year of study. The M.A.S. is awarded upon completion of 13 courses (52 units).

Ph.D. in Criminology, Law and Society

The study of crime, institutional responses to illegal behavior, and the interaction of law and society are the foci of the doctoral program in Criminology, Law and Society. Students examine issues related to the etiology of crime, the process of changing criminal behavior, social regulation, the civil justice system, and the social and cultural context of law.

Students gain familiarity with a number of subjects including sentencing; crime rates; modes of modifying criminal behavior; police behavior; white collar and organized crime; policies against hate crimes; behavior of courts, juries, and regulatory agencies; environmental law; immigration lawmaking; Native American justice issues; and the interaction among law, culture, and identity. In general, students are introduced to the leading classical and
contemporary issues in criminology, law and society and to ways of understanding them through interdisciplinary research. The program aims to develop theoretical sophistication and to prepare the graduate student for faculty positions at major universities; and for research and administrative work in institutions in the legal system, the criminal justice system, and related organizations.

The following five core courses are required: Seminar in Social Ecology (SOCECOL 200), Research Methods (CRM/LAW C201), two quarters of graduate-level statistics: Data Analysis (SOCECOL 264A) and Data Analysis (SOCECOL 264B); and two additional approved graduate research methods or statistics courses. Students in the Criminology, Law and Society program additionally take four required courses: Criminology: Micro Approaches (CRM/LAW C228); Criminology: Macro Approaches (CRM/LAW C229); Law and Society I (CRM/LAW C239A); and Law and Society II (CRM/LAW C239B); and two elective courses in Criminology, Law and Society. These elective courses should be chosen according to a plan that best meets the needs of the individual student, as determined in consultation with the student's faculty advisor. They should satisfy the elective requirement with regularly scheduled courses (with rare exceptions). (NOTE: An initial faculty advisor for each new Criminology, Law and Society student is assigned by the Criminology, Law and Society Graduate Advisor. Students, however, are expected to choose their own faculty advisor during their first year of study based on research interests. Students must notify the Criminology, Law and Society Graduate Advisor and the Departmental Graduate Coordinator of any changes in advisors.

Students become involved in research activities from the earliest stages of their training and complete an independent, supervised research project during the second year of graduate study. Methods of research may include questionnaires and surveys, systematic field observation, computer simulation, legal analyses, and archival research. Students complete a written comprehensive examination during year three, which requires them to demonstrate mastery of major issues in criminology, and law and society. The normative time for advancement to candidacy is four years (three years for students who entered with a master's degree). Students are required to advance to candidacy by the end of fall quarter of their fifth year of study, adjusted for any approved leaves of absence. The fourth and, possibly, fifth years of study are devoted to developing and defending a dissertation proposal and completing dissertation research. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years. (For students who have waived two required courses and the second-year project based upon master's-level work completed at another institution, the time to degree is five years, with a maximum of six years.) All Ph.D. students in the Criminology, Law and Society program are required to pass a final oral defense of the dissertation. Opportunities for field placements in legal and criminal justice settings also are available.

Program in Law and Graduate Studies (J.D./Ph.D.). Highly qualified students interested in combining the study of law and graduate qualifications in Criminology, Law and Society are invited to undertake concurrent degree study under the auspices of UC’s Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Criminology, Law and Society. Additional information is available from the PLGS Director’s office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs (http://www.law.uci.edu/plgs) website.

**Faculty**

Mario Barnes, LL.M. University of Wisconsin-Madison, *Professor of School of Law; Criminology, Law and Society* (criminal law, constitutional law, critical race theory)

Susan C. Bibler Coutin, Ph.D. Stanford University, *Associate Dean of the Graduate Division and Professor of Criminology, Law and Society; Anthropology; Culture and Theory* (law, culture, immigration, human rights, citizenship, political activism, Central America)

Arnold Binder, Ph.D. Stanford University, *Professor Emeritus of Criminology, Law and Society* (research methodology, juvenile delinquency, police organization and methods)

Kitty C. Calavita, Ph.D. University of Delaware, *Professor Emerita of Criminology, Law and Society; Sociology* (sociology of law, criminology, social deviance, immigration, inequality)

Simon A. Cole, Ph.D. Cornell University, *Professor of Criminology, Law and Society; History* (science, technology, law, criminal justice)

Elliott P. Currie, Ph.D. University of California, Berkeley, *Professor of Criminology, Law and Society* (criminal justice policy in the U.S. and other countries, causes of violent crime, social context of delinquency and youth violence, etiology of drug abuse and assessment of drug policy, race and criminal justice)

Joseph Di Mento, Ph.D. University of Michigan, *Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Planning, Policy, and Design* (planning, land use and environmental law, use of social science in policy making, legal control of corporate behavior)

John D. Dombrink, Ph.D. University of California, Berkeley, *Professor of Criminology, Law and Society; Sociology* (crime and criminal justice, deviance and social control)

Catherine Fisk, J.D. University of California, Berkeley, *UCI Chancellor's Professor of School of Law; Criminology, Law and Society; History* (labor and employment law, civil rights)
Howard A. Gillman, Ph.D. University of California, Los Angeles, Provost and Interim Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law

Michael R. Gottfredson, Ph.D. University at Albany, State University of New York, Professor of Criminology, Law and Society (criminology, theory, crime, policy)

Sera Han, Ph.D. University of California, Santa Cruz, Assistant Professor of Criminology, Law and Society; African American Studies; Culture and Theory (law and popular culture, critical race theory, philosophies of punishment, feminism and psychoanalysis)

John Hipp, Ph.D. University of North Carolina at Chapel Hill, UCI Chancellor's Fellow and Professor of Criminology, Law and Society; Sociology (community context of crime, household decisions and neighborhood change, research methods)

Clarence Ronald Huff, Ph.D. Ohio State University, Professor Emeritus of Criminology, Law and Society (criminology and public policy, wrongful convictions, gangs)

Valerie Jenness, Ph.D. University of California, Santa Barbara, Dean of the School of Social Ecology and Professor of Criminology, Law and Society; Sociology (links between deviance and social control (especially law), the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Paul D. Jesilow, Ph.D. University of California, Irvine, Professor of Criminology, Law and Society (healthcare regulation, in particular the role of fraud; the police, in particular police-community relations)

Charis E. Kubrin, Ph.D. George Washington University, Professor of Criminology, Law and Society; Sociology (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Elizabeth F. Loftus, Ph.D. Stanford University, UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law (cognitive psychology, human memory, psychology and law)

Mona Lynch, Ph.D. University of California, Santa Cruz, Professor of Criminology, Law and Society; School of Law (law and society, psychology and law, punishment and society, race and criminal justice)

William M. Maurer, Ph.D. Stanford University, Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; Culture and Theory; School of Law (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Cheryl Lee Maxson, Ph.D. University of Southern California, Associate Professor of Criminology, Law and Society (crime and delinquency, youth violence, street gangs, juvenile justice system and policing)

Richard D. McCleary, Ph.D. Northwestern University, Professor of Criminology, Law and Society; Planning, Policy, and Design (criminal justice, research methodology, statistics)

James W. Meeker, Ph.D. State University of New York at Buffalo, Professor of Criminology, Law and Society; Sociology (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

Joan R. Petersilia, Ph.D. University of California, Irvine, Professor Emerita of Criminology, Law and Society (program evaluation, public policy, juvenile justice)

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, Professor of Criminology, Law and Society; Sociology (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Keramet A. Reiter, Ph.D. University of California, Berkeley, Assistant Professor of Criminology, Law and Society; School of Law (prisons, legal history, criminal justice policy, criminal and civil rights law, law and society)

Ruben G. Rumbaut, Ph.D. Brandeis University, Professor of Sociology; Criminology, Law and Society; Education (international migration, immigration laws, criminalization, incarceration, inequality)

Donna Schuele, Ph.D. University of California, Berkeley, Lecturer with Potential Security of Employment of Criminology, Law and Society (law and society, American legal/constitutional history, constitutional law, civil rights and civil liberties, women and law, crime and gender, judicial process and politics, California legal history)

Nicholas I. Scurich, Ph.D. University of Southern California, Assistant Professor of Psychology and Social Behavior; Criminology, Law and Society (judgment and decision making, juridical proof, violence risk assessment)

Carroll S. Seron, Ph.D. New York University, Professor of Criminology, Law and Society; School of Law; Sociology (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Ann Southworth, J.D. Stanford University, Professor of School of Law; Criminology, Law and Society
Naomi Sugie, Ph.D. Princeton University, Assistant Professor of Criminology, Law and Society; Sociology (sociology of crime and punishment, inequality, families, criminal justice policy, methods, new technologies for data collection)

Bryan Sykes, Ph.D. University of California, Berkeley, Assistant Professor of Criminology, Law and Society; Sociology (demography, criminology, research methods, health, social inequality, statistics)

Shauhin A. Talesh, J.D. University of Connecticut, Acting Professor of School of Law; Criminology, Law and Society; Sociology (civil procedure, consumer law, insurance, business organizations, empirical legal studies, law and society)

William C. Thompson, Ph.D. Stanford University, Professor of Criminology, Law and Society; Psychology and Social Behavior; School of Law (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

George E. Tita, Ph.D. Carnegie Institute of Technology, Professor of Criminology, Law and Society; Planning, Policy, and Design (criminology, community context of violence, urban youth gangs, homicide studies)

Christopher L. Tomlins, Ph.D. Johns Hopkins University, UCI Chancellor's Professor of School of Law; Criminology, Law and Society (law and humanities, law and society, legal history)

Susan F. Turner, Ph.D. University of North Carolina at Chapel Hill, Professor of Criminology, Law and Society (sentencing and corrections, applied research methods)

Kristin E. Turney, Ph.D. University of Pennsylvania, Assistant Professor of Sociology; Criminology, Law and Society (social inequality, family demography, population health, incarceration and punishment, intergenerational transmission of disadvantage, child well-being)

Benjamin van Rooij, Ph.D., John S. and Marilyn Long Chair in U.S.-China Business and Law and Professor of Criminology, Law and Society; School of Law (urban research, urban poverty, culture change, socialization and education, psychological anthropology, street gangs in cross-cultural perspective, Mexico and U.S. southwestern ethnohistory, comparative ethnicity)

Geoff Ward, Ph.D. University of Michigan, Associate Professor of Criminology, Law and Society; Sociology (race relations, courts and sentencing, juvenile justice, social movements, justice workers)

Courses

**CRM/LAW C7. Introduction to Criminology, Law and Society. 4 Units.**
Introduces characteristics of the U.S. criminal justice system, including responses to crime, components of the system, and current challenges to the system. Examines structure and function of police and courts, criminal procedure, and sentencing and incarceration policies. Course may be offered online.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, and Psychology and Social Behavior majors have first consideration for enrollment.

(III)

**CRM/LAW C10. Fundamentals of Criminology, Law and Society. 4 Units.**
Introduces three interdisciplinary literatures—criminology, socio-legal studies, and justice studies. Focuses on theoretical and empirical work addressing law making, law breaking, and legal systems.

Prerequisite: CRM/LAW C7.

(III)

**CRM/LAW C40. Forms of Criminal Behavior. 4 Units.**
Undergraduates are introduced to the subjects of crime and criminal behavior. Topics include "street" and "white-collar" crimes. Histories of the offenses, the types of people who commit the crimes, and society's reactions to the offenses are presented.

(III)

**CRM/LAW C100. Special Topics in Criminology, Law and Society. 4 Units.**
Special topic courses are offered from time to time. Course content varies with interest of the instructor.

Prerequisite: CRM/LAW C7.

Repeatability: Unlimited as topics vary.
CRM/LAW C101. American Law. 4 Units.
Introduction to substantive and procedural law governing private dispute resolution, including common law (tort, property, contracts), lawsuits (civil procedure), and alternative dispute resolution; emphasis on the socio-legal ramifications of private disputes, particularly the modern tort system and tort reform movement.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C102. Introduction to the Comparative Study of Legal Cultures. 4 Units.
Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as INTL ST 124A.

Restriction: Criminology, Law and Society, Social Ecology, and International Studies majors have first consideration for enrollment.

CRM/LAW C103. American Legal Thought. 4 Units.
Evolution of legal thought in socio-historical context from nineteenth century to present; emphasizes the rise and fall of legal classicism and modern socio-legal critiques, including the law and society movement, critical legal studies, feminist legal theory, and critical race studies.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C104. Sociology of Law. 4 Units.
Examines law creation and law enforcement in their social and political context. Discusses the major theories of law and the modern state, and presents case studies in order to evaluate the strengths and weaknesses of these theoretical perspectives.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C105. Psychology and the Law. 4 Units.
Psychological assumptions of American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eye-witness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.

Same as PSY BEH 193E.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C106. Crime and Public Policy. 4 Units.
Explores nature and dimensions of crime in America and uses and limits of various strategies to control it. Topics include growth of imprisonment, the problem of domestic violence, the death penalty, gun control, and the potential of crime prevention programs.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C107. Deviance. 4 Units.
Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, PSYCH 177D.

Restriction: Criminology, Law and Society, Social Ecology, Sociology, and Psychology majors have first consideration for enrollment.

CRM/LAW C108. Criminological Theory. 4 Units.
Explores the question of crime causation from a number of theoretical perspectives in the social sciences. Schools of thought examined include utilitarianism, positivism, human ecology, social structural approaches, social process (learning) theories, labeling, and radical-critical (political) perspectives.

Prerequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C109. Juvenile Delinquency. 4 Units.
Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.

Prerequisite: CRM/LAW C7.

Same as PSY BEH 193B.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C110. Community Context of Crime. 4 Units.
Examines the social context of high-crime communities, with special emphasis on the problems of poverty, joblessness, economic inequality, and racial discrimination. Assesses debates on the causes of these problems, and on the most effective policies to combat them.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C111. Theories of Punishment. 4 Units.
Survey of the various schools of thought regarding formal punishment theory. The purposes of legal sanctions are examined, including those of deterrence, rehabilitation, retribution, and incapacitation. Considers problems in realizing formal goals of punishment in practice.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C112. Legal Sanctions and Social Control. 4 Units.
Examination of criminal sanctions as mechanisms of social control. Includes the nature, function, and organization of courts as sanction generating institutions, and problems associated with punishing white-collar and corporate illegalities.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C113. Gender and Social Control. 4 Units.
Examines the legal system’s use of sex as an organizing characteristic, focusing particularly on sameness and difference feminism, and tracing the evolution of equal treatment of men and women in the areas of constitutional rights, employment, education, and military service.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C114. Miscarriages of Justice. 4 Units.
Systematically describes, explains, and analyzes the causes and consequences of the wrongful accusation, prosecution, incarceration, and sometimes even execution, of the innocent in the American criminal justice system.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C115. Prisons, Punishment, and Corrections. 4 Units.
A review of how the U.S. punishes and rehabilitates convicted law violators. The conflicts among the major purposes of sentencing—rehabilitation, deterrence, incapacitation—are discussed, as well as the effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C116. Race, Ethnicity, and Social Control. 4 Units.
Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Prerequisite: CRM/LAW C7.

Same as CHC/LAT 152A.

CRM/LAW C117. Imprisonment and Reentry. 4 Units.
Offers an overview of imprisonment and reentry in the contemporary United States. Examines the development of the prison in the United States and explores changes in its composition, structure, and purpose over time.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C120. Law and Inequality. 4 Units.
Various aspects of the law as related to three specific areas of inequality: immigration and immigrants, race, and gender. The role of law as a tool of social reform and limitations of the legal system historically in resolving inequality issues.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C122. Constitutional Law. 4 Units.
Examines the First and Fourteenth Amendments, focusing on freedom of speech and religion, and the incorporation of the Bill of Rights. Topics include political, symbolic, offensive, and obscene speech, student speech rights, and the free exercise and disestablishment of religion.

Prerequisite: CRM/LAW C7.

Overlaps with POL SCI 174A.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C123. Family Law. 4 Units.
Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.

Same as PSY BEH 193F.

Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C125. Child Development, the Law, and Social Policy. 4 Units.
Examines how psychology research and practice can inform areas of law and social policy affecting children and adolescents. Topics include education, mental health, reproductive rights, and delinquency. Goals are to evaluate research and identify the costs/benefits of current policies.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C. Recommended: PSY BEH 111D OR PSY BEH 112D.

Same as PSY BEH 120D.

Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C126. Drugs, Crime, and Social Control. 4 Units.
Drug abuse in the U.S.; the psychopharmacology of various drugs; biological, psychological, and sociological explanations for drug abuse. Policy issues are discussed; students will develop and defend a set of strategies for limiting harm done by drugs and drug laws.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C127. Hate Crimes. 4 Units.
Examines the causes, manifestations, and consequences of hate crimes and the larger social context within which they occur. The politics and dynamics of intergroup violence born of bigotry and manifested as discrimination; social policy designed to control bias-motivated violence.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C130. Seminar on Gangs. 4 Units.
An overview of gangs, including the nature and definition of gangs; types of gangs; diversity of membership; theoretical explanations; criminal behavior; drug use and sales; law enforcement responses; gangs in correctional institutions; intervention and prevention strategies; and public policy issues.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C131. Organized Crime and American Society. 4 Units.
Examination of the phenomenon of American organized crime from a sociological perspective. Explanation of methods by which organized crime is tolerated at various levels of society. Emphasis on ways in which "underworld" interests interact with legitimate economic and political institutions.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C132. Forensic Science, Law, and Society. 4 Units.
Examines use of "forensic science" to resolve issues arising in criminal cases including crime scene analysis, DNA testing, fingerprints, trace evidence comparisons, profiling, lie detectors, other forensic techniques; evaluation, statistical characterization, and legal admissibility of evidence; regulation of forensic laboratories.

Prerequisite: CRM/LAW C7.

Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C133. Homicide and Suicide. 4 Units.
Examines similarities and differences among homicide and suicide, two major causes of death.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C134. Victimless Crimes. 4 Units.
Examines major theoretical, empirical, and policy-oriented research related to the design, implementation, and analysis of government intervention, through the criminal sanction, in the spheres of vice and morality.
Prerequisite: Prerequisite or corequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C136. Forensic Psychology: Advanced Seminar. 4 Units.
The focus is on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and (PSY BEH 178S or CRM/LAW C149).
Same as PSY BEH 156C, PSYCH 177F.
Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C137. Criminal Procedure. 4 Units.
Examines the law governing arrests (with and without a warrant); police detention; search and seizure; interrogation; use of informers, eavesdropping, wiretapping; examination and identification of suspects. Pretrial motions such as speedy trial and discovery of evidence may be covered.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C139. Police and Change. 4 Units.
Organizational efforts to modify police conduct are addressed by focusing on the history of policing in the United States including training, education, and the contributions of women.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C142. White-Collar Crime. 4 Units.
Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.
Same as SOCIOL 142.
Restriction: Sociology, Criminology, Law and Society, and Social Ecology majors have first consideration for enrollment.

CRM/LAW C144. Criminal Law. 4 Units.
Deals specifically with the substantive nature of criminal law and its historical development. Focuses on understanding the development of fundamental doctrinal principles upon which criminal law is based, including mens rea, actus reus, homicide, causation, group criminality, and exculpation.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C145. Government Crime. 4 Units.
Examines the legal, organizational, and political issues involved in the generation and control of government lawlessness. Readings present historical and theoretical perspectives in the abuse of government authority and the ability of the legal system to control such behavior.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C147. Law and Social Change. 4 Units.
Explores the relationship of law to its social setting by considering both law as a product of social change and law as a source or medium of change.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C148. Geographic Information Systems. 4 Units.
Basic geographic, cartographic, and GIS concepts including computer representation of physical, political, statistical, and social aspects of space using vector and grid-based maps. Experience with extensive geographic base map files and databases through use of GIS software (ArcView 3.x).
Same as PUBHLTH 166.
Restriction: Public Health Sciences, Public Health Policy, and Criminology, Law and Society majors have first consideration for enrollment.
CRM/LAW C149. Violence in Society. 4 Units.
Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger
examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSY BEH 178S.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C150. The Legal Profession. 4 Units.
Role of the legal profession in modern society, the diverse professional roles lawyers play, the American legal profession compared with that of other
societies. "Litigation explosion," ethical problems, interactions between lawyers and other professionals, training and socialization of new lawyers.
Prerequisite: Prerequisite or corequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C151. Cybercrimes, Investigation, Forensics and Prosecution. 4 Units.
Examines crimes committed against persons, property, society, and the government in which a computer is used. How these computer crimes are
committed, investigated, and ultimately prosecuted.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C152. Interrogation, Confession, and the Law. 4 Units.
In-depth examination of social psychology of police interrogation in America, the evolution of American interrogation practices from the nineteenth
century to the present, impact of law on police behavior and ideology, causes and consequences of false confessions, possibilities of reform.
Same as PSY BEH 193D.
Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

CRM/LAW C156. Cross-Cultural Research on Urban Gangs. 4 Units.
Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-
and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.
Same as CHC/LAT 153.

CRM/LAW C157. Language in Law and Society. 4 Units.
Considers the role of language in legal practice and power. Particular attention is paid to linguistic and discourse analytic research that covers topics
such as: trial talk, language crimes, law talk in cross-cultural perspectives, and linguistic evidence.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C160. Forensic Psychology. 4 Units.
Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency
to stand trial) and includes critical thinking about issues arising when psychologists are involved in legal proceedings.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSY BEH 11C.
Same as PSY BEH 161C.

CRM/LAW C162. Crime Hotspots. 4 Units.
Criminological theories of local public safety hazards or hotspots are introduced. Spatial statistics are developed for different types of hotspots. Hotspot
policing theories are introduced and research on the effectiveness of policing strategies is reviewed.

CRM/LAW C163. Ethics and Politics of Justice. 4 Units.
Theoretical perspective on how ethics and politics relate to criminal justice through an introduction to moral philosophy; consideration of specific theories
of punishment and justice; and consideration of practical and empirical illustrations of the intersection of ethics, politics, and justice.
Prerequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.
CRM/LAW C164. Social Control of Delinquency. 4 Units.
Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.
Prerequisite: Prerequisite or corequisite: CRM/LAW C7. Recommended: CRM/LAW C109.
Same as PSY BEH 193C.
Restriction: Psychology and Social Behavior, Social Ecology, Criminology, Law and Society, and Psychology majors have first consideration for enrollment.

CRM/LAW C165. The Death Penalty. 4 Units.
Examines why the U.S. continues to have a death penalty when so many other countries have abandoned it. Arguments for and against the death penalty are covered.
Prerequisite: Prerequisite or corequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

CRM/LAW C166. Crime Measurement. 4 Units.
The strengths and weaknesses of three crime measures (police reports, victim surveys, and offender self-reports) are illustrated through analyses of research articles. Common measurement problems are analyzed with a focus on reliability and validity.

CRM/LAW C167. Extreme Punishment . 4 Units.
Explores the history and law of America’s Eighth Amendment prohibition against cruel and unusual punishment, examining the death penalty, long prison sentences, harsh confinement conditions, and other punishments. Students debate practical, legal, and moral arguments for and against these punishments.

CRM/LAW C168. Federal Law Enforcement. 4 Units.
The peculiar legal, organizational concerns of the federal system of law enforcement and some of the crimes it is uniquely designed to address—white-collar crime, drug trafficking, racketeering, public corruption. Roles, responsibilities of the FBI, DEA, Customs, other policing agencies.
Prerequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

CRM/LAW C170. Latinos and the Law. 4 Units.
Examines a range of theoretical, empirical, and policy approaches to legal issues affecting the Latino population, with emphasis on California. Discusses topics concerning the purpose of law, the creation of law, and the enforcement of law.
Same as CHC/LAT 142.

CRM/LAW C171. Culture Change and the Mexican People. 4 Units.
Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.
Same as CHC/LAT 155.

CRM/LAW C173. Maritime Piracy, Law and Society. 4 Units.
Explores the historical and contemporary images and reality of pirates and piracy since the 16th century across the globe through an analysis of primary sources, key historiographical and legal debates, and criminological theories. Course may be offered online.

CRM/LAW C176. Classics in Crime Cinema. 4 Units.
A multidimensional understanding of crime films and how they shape public thinking about crime and criminals.
Restriction: CRM/LAW C176 and CRM/LAW C20 may not be taken for credit.
CRM/LAW C177. Eyewitness Testimony. 4 Units.
Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SOCECOL 10.
Same as PSY BEH 193G.
Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment. Seniors only.

CRM/LAW C178. Critical Race Theory. 4 Units.
Introduction to Critical Race Theory and key American cases on racial inequality. Using this literature, examines the possibilities and pitfalls of legal claims of race, gender, and sexuality discrimination in the age of colorblindness.

Same as AFAM 157.
Restriction: Upper-division students only.

CRM/LAW C185. Criminal Justice System Capacity. 4 Units.
Examines "system capacity" in criminological and criminal justice related research and how it is used to explain and describe current problems and practices in the American legal system. Limitations of sanctioning criminals due to political, physical space, and resource constraints.

Prerequisite: CRM/LAW C7.
Restriction: Criminology, Law and Society, Social Ecology, and Chicano/Latino Studies majors have first consideration for enrollment.

CRM/LAW C191. Law and Modernity. 4 Units.
The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of "liberty, equality, fraternity"; contradictions of liberal law, its understandings of "primitive" and "civilized"; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as ANTHRO 127A.

CRM/LAW C196. Research Seminar in Criminology, Law and Society. 4 Units.
Special topics research seminar. Content varies with interest of instructor. Capstone research opportunity with Criminology, Law and Society faculty members.
Repeatability: Unlimited as topics vary.
Restriction: Upper-division students only. Criminology, Law and Society, Social Ecology, and Anthropology majors have first consideration for enrollment.

CRM/LAW C201. Research Methods. 4 Units.
An introduction to techniques of inductive methodologies, including qualitative interviewing and participant observation, and deductive methodologies, including survey research and experimental and quasi-experimental design. Provides a sound overview of research methodology with tools to pursue specific methods in greater depth.

Restriction: Graduate students only.

CRM/LAW C207. Development Control Law and Policy. 4 Units.
Investigates local and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as PP&D 207.
Restriction: Graduate students only.

CRM/LAW C210. Introduction to Criminology, Law and Society. 4 Units.
Familiarizes students with the interrelated fields of criminology, law and society studies, and criminal justice studies. Organized around three well-established interdisciplinary literatures: criminology, sociolegal studies, and criminal justice studies.

Restriction: Graduate students only.
CRM/LAW C211. Legal Institutions and Society. 4 Units.
Acquaints students with the institutions of U.S. legal system and its operations, as well as with the constitutional framework undergirding this system, and defines the relationship between U.S. citizens and government at a variety of levels.

Restriction: Graduate students only.

CRM/LAW C212. Police, Courts, and Corrections. 4 Units.
Focuses on basic policy issues in the administration of the criminal justice system. The key elements of the criminal justice system are police, courts, and corrections. Prepares students for continued study of these organizations.

Restriction: Graduate students only.

CRM/LAW C213. Crime and Social Deviance. 4 Units.
Examines the major social scientific perspectives on criminal and deviant behavior. Specific deviant and criminal activities are described and explained using established theoretical frameworks.

Restriction: Graduate students only.

CRM/LAW C214. Research Methods. 4 Units.
Structures research methodology, the approach to developing and evaluating knowledge of the sciences for use in criminal justice professional activities. Special emphasis on differentiating scientific approaches from pseudo-science.

Restriction: Graduate students only.

CRM/LAW C215. Applied Statistics. 4 Units.
Provides a basis for the use of fundamental statistical analysis techniques for solving public policy and management problems through a series of assignments, examinations, and online discussions and demonstrations.

Restriction: Graduate students only.

CRM/LAW C216. Public Policy, Crime, and Criminal Justice. 4 Units.
Increases understanding of crime, violence, and the criminal justice system. Assesses the state of knowledge on key policy issues of our time. Discusses the contribution of communities, schools, employment, drugs, guns, and alcohol to crime and violence.

Restriction: Graduate students only.

CRM/LAW C217. Leadership. 4 Units.
Introduces concepts, ideas, and theories about leadership and its operation. Explores leadership concepts through interviews with leaders from the community and fellow classmates.

Restriction: Graduate students only.

CRM/LAW C218. Social Problems, Law, and Policy. 4 Units.
Capstone course for M.A.S. program in Criminology, Law and Society. Students choose a social problem related to crime, criminal justice, and law; relate the problem to legal and social issues; and devise a plan of action to research the problem.

Restriction: Criminology, Law and Society M.A.S. students only.

CRM/LAW C219. Hate Crime. 4 Units.
Examines the causes, manifestations, and consequences of hate crimes, as well as the larger social context within which they occur, are reacted to, and seem to be proliferating.

Restriction: Graduate students only.

CRM/LAW C221. Sentencing and Corrections. 4 Units.
Reviews U.S. attempts to punish and rehabilitate convicted law violators. Conflicts among major purposes of sentencing (rehabilitation, deterrence, incapacitation, and retribution) are discussed, as well as effects of different sanctions on public safety, offender rehabilitation, and justice system costs.

Restriction: Graduate students only.

CRM/LAW C222. Street Ethnography. 4 Units.
Focuses on urban street populations, especially gangs, and outlines some of the major conceptual and theoretical issues related to this topic and the processes of street socialization. Methods of inquiry include mapping, ethnohistory, survey questionnaires, and other quantitative techniques.

Same as CHC/LAT 217.

Restriction: Graduate students only.
CRM/LAW C224. Organizational Perspectives on the Legal System. 4 Units.
Familiarizes students with organization theory and research as ways to make sense of, navigate, and act on the legal system. Acquaints students with major frameworks in organization theory and their application to the system of legal organizations.

Restriction: Graduate students only.

CRM/LAW C225. Consequences of Imprisonment. 4 Units.
Reviews imprisonment and its consequences in the United States. Views prison and inmates as part of (rather than separate from) society. Examines the effects of prison on American society, the family, the labor market, and the community.

Restriction: Graduate students only.

CRM/LAW C227. Alternative Conflict Resolution: Theory and Methods. 4 Units.
Provide an understanding of the major alternatives to the traditional system for the administration of justice, expanding on some of the newer theories and methods in the field. Key research on social conflict and its resolution examined. Course may be offered online.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

CRM/LAW C228. Criminology: Micro Approaches. 4 Units.
Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practice, and focuses on micro-level, individual theories of crime causation. Formerly Criminology, Law and Society C233A.

CRM/LAW C229. Criminology: Macro Approaches. 4 Units.
Introduces students to the dominant theories in modern criminology, their theoretical antecedents and extensions, major empirical tests and implications for programs, policy and practices, and addresses macro-level theories of crime causation. Formerly Criminology, Law and Society C233B.

CRM/LAW C230. Crime and Public Policy. 4 Units.
Discusses the measurement of violent crime; violent offenders and their victims; theoretical explanations of violence; the contribution of the media, drugs, guns, and alcohol to violence; and how the justice system treats and punishes violent offenders.

Restriction: Graduate students only.

CRM/LAW C231. Crime and Gender . 4 Units.
Examines the legal, political, social, economic, and policy implications of making gender (primarily) and race (secondarily) the focus in the study of crime, criminal law, and the criminal justice system. Course may be offered online.

Restriction: Graduate students only.

CRM/LAW C232. Juvenile Delinquency. 4 Units.
Examines the major theoretical perspectives regarding the onset, persistence, and desistance of juvenile delinquency and examines empirical evidence for each perspective.

Restriction: Graduate students only.

CRM/LAW C234. Anthropology of Law. 4 Units.
Law has been a key site of anthropological inquiry since the discipline's nineteenth-century origins. Course introduces and critically assesses the contributions anthropology has made to sociolgal lytic trends.

Restriction: Graduate students only.

CRM/LAW C235. Theories of Crime. 4 Units.
Examines classical and contemporary theories of crime and crime control with special emphasis on the implications of theory for public and social action.

Restriction: Graduate students only.

CRM/LAW C236. Gender and Power in Law and Society. 4 Units.
Focuses on questions of gender and sexuality in law and society studies. Drawing on a variety of theoretical frameworks, especially feminist legal theory, examines social processes and structures related to legal regulation, inequality, and social change.

Restriction: Graduate students only.
CRM/LAW C237. Legal Reasoning. 4 Units.
Introduction to law and legal process; use of legal source materials; history and assumptions underlying modern legal reasoning. Key jurisprudential perspectives, development and application of constitutional doctrines (focus on equal protection and right of privacy), and procedure and evidence issues.

Restriction: Graduate students only.

CRM/LAW C238. White-Collar Crime. 4 Units.
Examines the illegal behavior of individuals who commit crimes in the course of their employment. Special attention will be paid to ways in which power and organizational structure affect the behavior of the white-collar offenders.

Restriction: Graduate students only.

CRM/LAW C239A. Law and Society I. 4 Units.
Provides an introduction to the law and society field from its origins in social scientific, legal, and philosophical scholarship during the eighteenth, nineteenth, and early-twentieth centuries. Formerly Criminology, Law, and Society C239.

Restriction: Graduate students only.

CRM/LAW C239B. Law and Society II. 4 Units.
Building on Law and Society I, addresses contemporary issues in the field from mid-twentieth century to the present with emphasis on the degree to which the field's foundational assumptions are being challenged, refined, or confirmed through current research.

Prerequisite: CRM/LAW C239A.

Restriction: Graduate students only.

CRM/LAW C241. Race, Ethnicity, and Social Control. 4 Units.
Origins and organization of racialized social control, with emphasis on criminal justice. Racial politics of criminal/juvenile justice considered in comparative (historical and international) perspective. Exploration of theoretical and methodological issues for research on race, ethnicity, and social control.

Same as CHC/LAT 221.

Restriction: Graduate students only.

CRM/LAW C245. Social Science and the Legal Process. 4 Units.
Examines the use (and misuse) of social science in the legal process, focusing on role of social science evidence in trial and appellate decision making. Test-case litigation in which social science has been used to challenge laws or support reform.

Restriction: Graduate students only.

CRM/LAW C248. Geographic Information Systems. 4 Units.
Prepares students to become proficient in the basic GIS functionality including visualization, data management, and spatial analysis.

Restriction: Graduate students only.

CRM/LAW C252. Issues in Environmental Law and Policy. 4 Units.
Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as PP&D 252.

Restriction: Graduate students only.

CRM/LAW C255. Public Policy. 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Same as POL SCI 221A, PP&D 221.

Restriction: Graduate students only.
CRM/LAW C263. Eyewitness Testimony. 4 Units.
Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.

Same as PSY BEH P263.
Restriction: Graduate students only.

CRM/LAW C265. Memory and the Law. 4 Units.
Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as PSY BEH P265.
Restriction: Graduate students only.

CRM/LAW C266. Psychology and the Law. 4 Units.
Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as PSY BEH P266.
Restriction: Graduate students only.

CRM/LAW C275. Special Topics in Criminology, Law and Society. 4 Units.
Topics covered vary with interests of instructor.
Repeatability: Unlimited as topics vary.

CRM/LAW C296. Doctoral Dissertation Research and Writing. 2-12 Units.
Dissertation research with Criminology, Law and Society faculty.

Prerequisite: Advancement to candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

CRM/LAW C298. Directed Study. 2-4 Units.
Directed study with Criminology, Law and Society faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

CRM/LAW C299. Independent Study. 2-8 Units.
Independent research with Criminology, Law and Society faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Department of Planning, Policy, and Design

300 Social Ecology I; 949-824-0563
http://ppd.soceco.uci.edu/
David L. Feldman, Department Chair

The Department of Planning, Policy, and Design utilizes an interdisciplinary approach to the study of urban and regional planning, public policy issues, and the built environment. The Department faculty devote their scholarly and teaching efforts to theory-driven and empirically oriented urban research and their interests include urban and community development, environmental policy, health promotion and policy, and urban design and behavior. The faculty focuses on education in urban, social, public policy, and environmental problems.

The Department offers the B.A. degree in Urban Studies; undergraduate minors in Urban Studies and Urban and Regional Planning; the Ph.D. degree in Planning, Policy, and Design; the Master of Public Policy; and the Master of Urban and Regional Planning professional degree (fully accredited by the national Planning Accreditation Board). The Department’s graduate degree programs feature innovative teaching often involving students in community projects, and a significant degree of accessibility by students to faculty members.
The faculty members in the Department are productive and influential scholars. The Department’s teaching, research, and graduate training utilize UCI’s proximity to both urban centers and planned communities, as well as the University’s location within the dynamic and multicultural Southern California and Pacific Rim regions. Collaborative academic and research ties are maintained with UCI’s Institute of Transportation Studies, Center for Global Peace and Conflict Studies, Newkirk Center for Science and Society, Environment Institute, Focused Research Group on International Environmental Policy, Center for Community Health, Community Outreach Partnership Center, Center for Unconventional Security Affairs, Center for Organizational Research, and the Urban Water Research Center.

The common mission linking the Department’s undergraduate, master’s, and doctorate-level instruction and faculty research efforts is to bring applied research to the cause of bettering individuals, neighborhoods, communities, and regions. Southern California has grown dramatically over the past four decades and will soon become the nation’s largest urban corridor. The challenges to maintain the quality of life, provide employment opportunities, and reduce the deep socioeconomic disparities of this bi-national and multicultural metropolitan region are enormous. Extremely diverse, multiethnic communities face the necessity of solving their problems in ways that are acceptable to their populations. Older central city areas that are vital to the region face issues of social and economic sustainability. The need to create employment opportunities, through the application of new technologies in industries and services, will be a constant feature of an urban region undergoing such population increases. At the same time, urban growth and transportation will have to meet increasingly stringent environmental regulations that can safeguard the population’s health and quality of the diverse natural environments. The urban design and landscape of most communities stand to be reshaped as never before, as the building stock ages and the need to redevelop intensifies.

The Department is grouped into four major clusters, each addressing sets of important issues to contemporary society. Faculty members and students who study urban and community development examine contemporary planning approaches to managing local, community, and regional development and explore the spatial dynamics of urbanization in diverse settings and how public policy can guide urban and regional growth to balance environmental and economic concerns. Faculty members and students engaged in design-behavior research investigate the interrelationships of people and their socio-physical environments at all scales, from micro to macro, with emphasis on urban design and community-scale issues. Faculty members and students who examine environmental policy focus on the environment and natural resources as important policy and planning issues and provide a clear understanding about how politics, economics, ethics, and institutions affect planning and policy choices. Finally, faculty members and students who study health promotion and policy investigate issues at the interface between (1) urban planning and health policy and (2) community and individual health. They examine the public welfare, psychological, and health implications of social and physical planning, and the techniques and goals of public health policy making.

Undergraduate Program

Undergraduate students who major in Urban Studies will become acquainted with the global challenges of urbanization and the analytical skills needed for addressing them. Students will acquire the background for entering graduate study in related fields, including urban planning, community and economic development, and transportation, to name only a few, or for seeking entry-level positions in fields that address urban problems, including urban planning, community development, transportation, and housing.

Requirements for the B.A. Degree in Urban Studies

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1444).

Departmental Requirements

Twelve courses (48 units) as specified below:

A. Four lower-division courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 20A</td>
<td>Basic Economics I</td>
</tr>
<tr>
<td>POL SCI 21A</td>
<td>Introduction to American Gov't</td>
</tr>
<tr>
<td>or POL SCI 51A</td>
<td>Introduction to Politics</td>
</tr>
<tr>
<td></td>
<td>Around the World</td>
</tr>
<tr>
<td>PP&amp;D 4</td>
<td>Introduction to Urban Studies</td>
</tr>
<tr>
<td>PP&amp;D 40</td>
<td>Urban Sociology</td>
</tr>
<tr>
<td>or SOCIOL 43</td>
<td>City and Community</td>
</tr>
</tbody>
</table>

B. Eight upper-division electives:

Among the eight courses, include at least one three-course “integrative string.” An integrative string consists of one designated integrative course plus any other electives from the same course cluster, as listed below.

Urban and Community Development

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<td>Housing and Urban Development Policy</td>
</tr>
<tr>
<td>PP&amp;D 110</td>
<td>Urban Economic Development Policy</td>
</tr>
<tr>
<td>PP&amp;D 112</td>
<td>Foundations of Community Health</td>
</tr>
<tr>
<td>PP&amp;D 100</td>
<td>Special Topics in Urban Studies</td>
</tr>
<tr>
<td>PP&amp;D 131</td>
<td>Environmental Sustainability I</td>
</tr>
<tr>
<td>PP&amp;D 132</td>
<td>Environmental Sustainability II</td>
</tr>
<tr>
<td>PP&amp;D 134</td>
<td>Human Ecology</td>
</tr>
<tr>
<td>PP&amp;D 139</td>
<td>Water Resource Policy</td>
</tr>
<tr>
<td>PP&amp;D 140</td>
<td>Ethics and International Relations</td>
</tr>
<tr>
<td>PP&amp;D 100</td>
<td>Special Topics in Urban Studies</td>
</tr>
<tr>
<td>PP&amp;D 151</td>
<td>Environmental Psychology</td>
</tr>
<tr>
<td>PP&amp;D 152</td>
<td>Cultural Ecology and Environmental Design</td>
</tr>
<tr>
<td>PP&amp;D 153</td>
<td>Elements of Environmental Design</td>
</tr>
<tr>
<td>PP&amp;D 155</td>
<td>Urban Design Principles</td>
</tr>
<tr>
<td>PP&amp;D 156</td>
<td>Urban Design and Graphics Studio</td>
</tr>
<tr>
<td>PP&amp;D 166</td>
<td>Integrated course.</td>
</tr>
</tbody>
</table>

### Urban Studies Minor Requirements

Eight courses (32 units):

- PP&D 4: Introduction to Urban Studies

Select any seven upper-division PP&D courses.

### Urban and Regional Planning Minor Requirements

Nine courses (36 units):

- PP&D 4: Introduction to Urban Studies
- PP&D 107: Urban and Regional Planning

Select seven of the following:

- PP&D 108: Cities and Transportation
- PP&D 109: Housing and Urban Development Policy
- PP&D 110: Urban Economic Development Policy
- PP&D 112: Foundations of Community Health
- PP&D 113: Poverty in Developing Countries
- PP&D 132: Environmental Sustainability II
- PP&D 139: Water Resource Policy
- PP&D 155: Urban Design Principles
- PP&D 156: Urban Design and Graphics Studio
- PP&D 166: Urban Public Policy
- PP&D 169: Public Policy Analysis
Graduate Program

General information about the School of Social Ecology’s graduate programs, including admission requirements, career opportunities, and Ph.D. program milestones can be found in the School of Social Ecology Graduate (p. 1448) section of the Catalogue. Specific information about the Department of Planning, Policy, and Design’s graduate program appears below.

Master of Public Policy

The Master of Public Policy (M.P.P.) program is a two-year professional degree program administered by both the School of Social Ecology and the School of Social Sciences. Students are required to complete 72 units of graduate courses. In the first year, students will attend an introductory conference, participate in a workshop, and take seven core courses and two elective courses. In the summer after the first year, students will participate in a policy-relevant internship in an appropriate government, business, or nonprofit setting. In the second year, students take three core courses and five elective courses.

The core course requirements in year one of the program are Qualitative Methods and Public Policy, Statistical Methods for Public Policy, Information and the Policy Process, Microeconomics and Public Policy, Policy Processes and Institutions of Governance, Collaborative Governance and Public Management, and Social Mobilization, Power, and Justice. The core course requirements in year two are The Economics of Government, Policy and Ethics, and Capstone Research Project and Briefing.

Additional information is available at the Master of Public Policy (http://mpp.web.uci.edu) website.

Master of Urban and Regional Planning

The Master of Urban and Regional Planning (M.U.R.P) provides students with a rigorous intellectual foundation and critical analytical skills that prepare them to work in public, private, and non-governmental planning and related fields. The program is fully accredited by the national Planning Accreditation Board and has more than a dozen full-time core faculty. Students gain knowledge of planning problems and practices through a series of courses related to the environmental, economic, and social challenges in Southern California, and the United States, as well as other national contexts.

A total of 72 graduate units are necessary to satisfy the master’s degree requirements—including 36–40 units of core courses and successful completion of a capstone project, thesis, or comprehensive examination. A normal course load is 12 units per quarter (three courses), which enables students to complete the degree in two years. Required core courses are History of Urban Planning (PP&D 202), Theoretical Foundations of Planning (PP&D 203), Design and Planning Graphics: Fundamentals (PP&D 204), Microeconomic Analysis for Urban Planning (PP&D 206), and Quantitative Analysis for Planners (PP&D 214). Students are required to take three additional courses from the subject areas of methods, law, and urban settlements, selected from a menu of courses approved to satisfy this requirement. The curriculum culminates with a capstone requirement that may be fulfilled through one of the following options:

1. Completion of a Professional Report (PR). This entails a two-quarter course sequence, comprising Professional Report (PP&D 292), followed by four units of Independent Study in Urban Planning (PP&D 299) under continued supervision of the original PR faculty advisor;
2. Completion of a two-quarter Practicum sequence Urban Planning Practicum I (PP&D 294A)-Urban Planning Practicum II (PP&D 294B);
3. A comprehensive examination; or

Students complete seven elective courses to develop an area of substantive concentration. Some examples of concentration include housing and community development, international development planning, environmental planning, transportation planning, health and social service planning, economic development, regional growth management, state and municipal governance, and urban design. Students work with faculty members to define their concentration and identify appropriate electives. Elective courses are selected from within as well as outside the Department of Planning, Policy, and Design.

The program supports a diverse set of educational opportunities for master’s students. For example, students are eligible to apply to the Affordable Housing Competition Team and Community Scholars Program. Students are also encouraged to incorporate an international educational experience as part of their degree either through the University of California’s Education Abroad Program (UCEAP) or the Network for European and U.S. Regional Urban Studies program (NEURUS). Practical experience in planning in the form of part-time planning internships is also strongly encouraged.

The range of employment opportunities for planners in the public, private, and non-governmental sectors is expanding due to rapid urbanization, rising concerns over environmental issues, and increases in social inequality. Career paths exist in public entities dealing with urban planning, economic development, transportation, community development, regional growth management, air quality, water treatment, community health, community revitalization, and public infrastructure. Employment possibilities also exist with private firms that specialize in transportation, general plans, economic development, environmental planning, emergency management, and residential, commercial, and industrial development. Finally, planners are increasingly pursuing meaningful careers in the growing non-governmental or third sector. These career opportunities include working with affordable housing developers, environmental and conservation organizations, community-based organizations, advocacy groups, and labor unions.

Concurrent Master’s Degree Program with Civil and Environmental Engineering

The Department of Planning, Policy, and Design (PPD) in the School of Social Ecology and the Department of Civil and Environmental Engineering (CEE) in The Henry Samueli School of Engineering offer a concurrent degree program that allows students to earn both a master of Urban and Regional
Planning (M.U.R.P.) and a master of Civil Engineering (M.S.) in less than the three years required if the degrees were pursued sequentially. Students in the concurrent degree program must meet a minimum of twice with the PPD graduate coordinator and/or MURP faculty program director. The first meeting is at the start of the student’s concurrent program to review current requirements and devise a plan of study for the MURP. The second meeting is the start of the third quarter of the first year of the concurrent program to assess progress toward the MURP, identify the student's Capstone choice, and review the plan for completion of MURP course work.

The concurrent degree program involves a course plan that fulfills requirements in both programs. The engineering focus of the concurrent degree program is organized around two tracks: (1) transportation systems, and (2) environmental hydrology and water resources. The course load for the MURP is the same for both tracks; however, the number of CEE courses varies for the transportation systems and the environmental hydrology and water resources tracks. Students should check with the CEE graduate advisor to review course requirements for the appropriate track. Concurrent MURP-MSCE students must complete a Capstone requirement. Students choose among multiple options for the Capstone including professional report, practicum, thesis, and comprehensive exam. Capstone requirements will be reviewed with concurrent students in their initial meeting with the PPD graduate coordinator and/or MURP faculty program director at the start of the concurrent program.

Undergraduates seeking admission to the concurrent master’s degree program should have a strong record of course work in disciplines related to urban planning and civil engineering, and they must meet the requirements for admission in both departments. For more information about these requirements, visit the CEE Graduate Admissions (http://www.eng.uci.edu/grad/programs/cee/admissions) and PPD Graduate Admissions (http://ppd.socceco.uci.edu/pages/admissions) websites.

**Ph.D. in Planning, Policy, and Design**

Today’s complex urban, social, and environmental issues can best be understood by researchers who can work across disciplinary boundaries, and who understand the relationship of research to action. For example, efforts to control transportation problems by building neighborhoods that encourage alternatives to the automobile require an understanding of travel behavior and human interactions with the built environment. Understanding how to reduce tobacco use requires an appreciation of how behavior is shaped by programmatic interventions, community settings and norms, and policy tools. Environmental cooperation across national borders often requires understanding of political processes, infrastructure systems, and metropolitan structure and governance in regions, such as the U.S.-Mexico border, where population is concentrated in urban settlements that span the border. And, issues of public safety are increasingly related to the design of public and private spaces, and how those spaces are used and regulated.

In all of these areas, public and private officials are increasingly working on topics that span the boundaries of several traditional academic disciplines. The Planning, Policy, and Design (PPD) doctoral program at the University of California, Irvine trains scholars for national and international prominence in the analysis of social problems related to the built, natural, and institutional environments. Faculty members and students combine perspectives from urban planning, public policy, and design behavior. The Planning, Policy, and Design Ph.D. is based on the Department's internationally prominent research and teaching strengths, including design-behavior research, environmental policy, health promotion and policy, and urban and community development. Students in the Ph.D. program take a common core of classes, and then specialize in study related to their research interests. Students may design their own specialization or may follow the guidelines provided to specialize in Policy and/or Urban and Regional Planning. In either case, the elective courses must be approved by the student's faculty advisory committee.

The Ph.D. program consists of four components: course work, comprehensive exams, advancing to candidacy, and dissertation research, writing, and defense. Each component is described below. A typical pattern for completion of requirements is the following:

**Years 1 and 2:** Take required departmental courses supplemented by electives.

**September after year 2:** Take comprehensive exams.

**Year 3:** Finish required course work, write and defend dissertation prospectus, advance to candidacy.

**Years 4–6:** Dissertation research and writing (students are expected to complete and defend their dissertations within nine quarters of advancing to candidacy).

Students must also TA for at least one quarter. The normative time for completion of the Ph.D. in Planning, Policy, and Design is six years, and the maximum time permitted in seven years.

The following courses are required of all students and must be completed before advancement to candidacy:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PP&amp;D 297</td>
<td>Research Design</td>
</tr>
<tr>
<td>SOCECOL 200</td>
<td>Seminar in Social Ecology</td>
</tr>
</tbody>
</table>

Select two of the following three research methods courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PP&amp;D 209</td>
<td>Qualitative Research Methods: Overview (or equivalent)</td>
</tr>
<tr>
<td>SOCECOL 264A</td>
<td>Data Analysis (or equivalent)</td>
</tr>
<tr>
<td>SOCECOL 264B</td>
<td>Data Analysis (or equivalent)</td>
</tr>
</tbody>
</table>

One advanced research methods course

Two courses providing disciplinary/theoretical orientation
Two quarters of PP&D 298 or PP&D 299
Nine electives

Graduates with a doctorate degree in Planning, Policy, and Design are employed in a wide array of activities, ranging from university teaching and research, to administrative and research-oriented positions in governmental agencies, international organizations, nonprofit organizations, and private consulting practices.

**Faculty**

Mary V. Basolo, Ph.D. University of North Carolina at Chapel Hill, Associate Professor of Planning, Policy, and Design

Scott A. Bollens, Ph.D. University of North Carolina at Chapel Hill, Drew, Chace and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation and Professor of Planning, Policy, and Design

Tim-Allen Bruckner, Ph.D. University of California, Berkeley, Assistant Professor of Program in Public Health; Planning, Policy, and Design

Jan K. Brueckner, Ph.D. Stanford University, Department Chair and Professor of Economics; Planning, Policy, and Design

Sarah L. Catz, J.D. Santa Clara University, Lecturer of Planning, Policy, and Design

Kenneth S. Chew, Ph.D. University of California, Berkeley, Senior Lecturer of Planning, Policy, and Design

Ross F. Conner, Ph.D. Northwestern University, Professor Emeritus of Planning, Policy, and Design

William J. Cooper, Ph.D. University of Miami, Professor of Civil and Environmental Engineering; Chemical Engineering and Materials Science; Planning, Policy, and Design (environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling)

Joseph Di Mento, Ph.D. University of Michigan, Professor of School of Law; Criminology, Law and Society; Paul Merage School of Business; Planning, Policy, and Design (planning, land use and environmental law, use of social science in policy making, legal control of corporate behavior)

David Feldman, Ph.D. University of Missouri-Columbia, Professor of Planning, Policy, and Design; Political Science

Martha S. Feldman, Ph.D. Stanford University, Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Planning, Policy, and Design; Paul Merage School of Business; Political Science; Sociology

Ajay Garde, Ph.D. University of Southern California, Associate Professor of Planning, Policy, and Design

John D. Houston, Ph.D. University of California, Los Angeles, Assistant Professor of Planning, Policy, and Design

Helen Ingram, Ph.D. Columbia University, UCI Endowed Chair and Professor Emerita of Planning, Policy, and Design

Jae H. Kim, Ph.D. University of Illinois at Urbana-Champaign, Assistant Professor of Planning, Policy, and Design

Raul P. Lejano, Ph.D. University of California, Los Angeles, Professor Emeritus of Planning, Policy, and Design

Bryce C. Lowery, M.S. California State Polytechnic University, Pomona, Lecturer of Planning, Policy, and Design

Richard A. Matthew, Ph.D. Princeton University, Professor of Planning, Policy, and Design

Sanjoy Mazumdar, Ph.D. Massachusetts Institute of Technology, Professor of Planning, Policy, and Design; Asian American Studies

Richard D. McCleary, Ph.D. Northwestern University, Professor of Criminology, Law and Society; Planning, Policy, and Design (criminal justice, research methodology, statistics)

Michael G. McNally, Ph.D. University of California, Irvine, Professor of Civil and Environmental Engineering; Planning, Policy, and Design (travel behavior, transportation systems analysis)

David S. Meyer, Ph.D. Boston University, Professor of Sociology; Planning, Policy, and Design; Political Science (social movements, public policy, peace and war, social justice)

Judith Olson, Ph.D. University of Michigan, Donald Bren Professor of Information & Computer Sciences and Professor of Informatics; Paul Merage School of Business; Planning, Policy, and Design (interactive and collaborative technology, human-computer interaction, computer-supported cooperative work)

Mark P. Petracca, Ph.D. University of Chicago, Associate Professor of Political Science; Planning, Policy, and Design

Seth D. Pipkin, Ph.D. Massachusetts Institute of Technology, Assistant Professor of Planning, Policy, and Design
Planning, Policy, and Design Courses

PP&D 4. Introduction to Urban Studies. 4 Units.
Introduces the substantive areas, concepts, and tools in the field of urban studies. Acquaints students with physical, environmental, social, economic, and political dimensions of cities. Examines the challenges facing cities, including poverty, sustainability, development, globalization, and others.

Restriction: School of Social Ecology and Urban Studies majors have first consideration for enrollment.

(III)

PP&D 40. Urban Sociology. 4 Units.
Overview of theoretical, substantive, and policy issues in urban sociology. History of urbanization, the school of human ecology, and recent trends regarding urbanism. Time is devoted to understanding the causes and possible solutions to urban problems.

Overlaps with SOCIOL 43.

PP&D 100. Special Topics in Urban Studies. 4 Units.
Special topics courses are offered from time to time. Course content varies with interest of the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 101. Urbanization and Social Change. 4 Units.
Surveys the global and historical co-evolution of cities and social institutions, including religion, the economy, governance, the arts, technology, and family life.

PP&D 102. Urban Inequality. 4 Units.
Examines structural inequality and the influence that urbanization has in affecting race, ethnic, and class relations. Explores how race/ethnicity, class, urban space, housing, economic development, public education and land policy intersect in cities, both historically and today.

Restriction: Urban Studies, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PP&D 104. Urban America. 4 Units.
Students examine the historical, social, political and economic factors that contributed to the construction of the American urban context, one that is poverty concentrated and racially/ethnically segregated. Students also critically assess the consequence of growing up in America's urban neighborhoods.
PP&D 105. California’s Population. 4 Units.
Surveys California’s human population (past, present, and future) and its interactions with trends in society, government, the economy, and the environment.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 106. Technology and Economic Development. 4 Units.
Importance of technology for urban economic and social development. Concepts of technological innovation and diffusion, and their relevance for cities and metropolitan areas. Principles of networks and their importance for diffusion. Relationship of technology to urban infrastructure and metropolitan form.

Prerequisite: SOCECOL 10 and SOCECOL 13.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 107. Urban and Regional Planning. 4 Units.
Important substantive areas, concepts, tools in the field of urban and regional planning. Topics include: forces that have historically guided and are currently guiding U.S. urbanization; land use, economic development, housing and community development, environmental planning; legal, environmental, governmental contexts.

Prerequisite: PP&D 4.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.

PP&D 108. Cities and Transportation. 4 Units.
The relationship between urban areas and transportation systems. Economic analysis of cities, transportation and urban form, highway congestion, environmental impacts of transportation, public transit, land use and transportation, and political influences on transportation planning.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 109. Housing and Urban Development Policy. 4 Units.
Surveys public policy issues and develops analytic techniques in the areas of housing and urban development. Examines a range of policy topics including housing assistance to low- and moderate-income families, housing finance system, incentives for economic development and neighborhood preservation.

Prerequisite: Recommended: previous course work in economics.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 110. Urban Economic Development Policy. 4 Units.
Theoretical and practical perspectives on local economic development policy. Integrates economic, planning, and political perspectives. Overview of economic role of cities and metropolitan areas. Specific development issues include: link between taxes, regulation, job growth; redevelopment planning; evaluation economic development policy.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 112. Foundations of Community Health. 4 Units.
A social ecological framework for understanding community health is presented. Measures of individual and community health are compared, and the influence of personal and environmental factors on individual, group, and population health is examined. Community health promotion strategies are discussed.

Same as PUBHLTH 125.

Restriction: Urban Studies, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PP&D 113. Poverty in Developing Countries. 4 Units.
Focuses on poverty in developing countries. Analyzes the magnitude and changing nature of poverty in the global south. Critically examines poverty conceptualized in terms of economic deprivation, well-being, and social exclusion.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 131. Environmental Sustainability I. 4 Units.
Provides an introduction to sustainability from different points of view; historical, scientific, political, ethical, and economic.

Same as EARTHSS 180.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.
PP&D 132. Environmental Sustainability II. 4 Units.
Investigates how sustainability can be implemented in a variety of contexts including water, energy, non-renewable resources, biodiversity, and urban policy, and also how it could be measured.

Same as EARTHSS 182.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.

PP&D 134. Human Ecology. 4 Units.
Explores the interaction of social choice and physical constraint in shaping the earth's human carrying capacity, including ramifications for local, regional, or global environmental issues.

Prerequisite: PP&D 4.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 139. Water Resource Policy. 4 Units.
Examination of contemporary water problems worldwide, with particular attention to the competing water demands in the western U.S., and water demand by the poor in developing countries. History and analysis of U.S. water policies at local, state, and federal levels.

Restriction: Urban Studies, Social Ecology, Earth System Science, and Environmental Science majors have first consideration for enrollment.

PP&D 140. Ethics and International Relations. 4 Units.
Introduces students to the dynamic field of ethics and international relations. A variety of traditional and emerging perspectives are examined, skeptical views are discussed in detail, and arguments are illustrated with current cases.

Same as POL SCI 146A, INTL ST 154D.

PP&D 150. Experience Design. 4 Units.
Explores functional, experiential, emotional, sensorial, and extra-sensorial aspects of built and modified natural environments. Examines methods for acquiring, evaluating, and presenting information and developing specifications for designers' information needs and for assuring great designed environments.

Prerequisite: PP&D 4 and PP&D 152.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 151. Environmental Psychology. 4 Units.
Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.

Prerequisite: SOCECOL E8 or SOCECOL 10 or PP&D 4.

Same as PSY BEH 171S, PUBHLTH 151.

Restriction: Urban Studies, Social Ecology, Psychology and Social Behavior, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PP&D 152. Cultural Ecology and Environmental Design. 4 Units.
Introduction to cultural ecology and environmental and architectural design. Addresses the understanding of people's relationships with their built environments, the basic elements of architecture, architectural analysis, and cultural analysis are covered. Examines values in design and design for multicultural societies.

Prerequisite: PP&D 4.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 153. Elements of Environmental Design. 4 Units.
Basic elements of environmental design such as scale, proportion, rhythm, color, sound, lighting, surfaces, texture, architectural definition of spaces, volumes, massing volumetric analysis, solids and voids, and cultural aspects of design. Excitement and creativity in design, imageability.

Prerequisite: PP&D 4 and PP&D 152.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.
PP&D 155. Urban Design Principles. 4 Units.
Introduction to principles of urban design and its applications. Study of contemporary and traditional theories of urban design formulated to improve physical characteristics of built environment to facilitate an enhanced quality of life. A variety of case studies are discussed.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 156. Urban Design and Graphics Studio. 4 Units.
Introductory course organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and graphic representation assignments to learn practical aspects of urban design.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 166. Urban Public Policy. 4 Units.
Examines why and how urban policies are enacted and carried out in contemporary U.S. cities and regions. Topics include: evolution and organization of city governments and policymaking over the past century; who directs public policy and controls how cities develop.

Prerequisite: SOCECOL 10 and PP&D 4.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 167. Public Policy and Management. 4 Units.
Exposes students to best management practices that assure effective planning and implementation of policies and programs in government, business, and nonprofit sectors. Includes guest lecturers who are proven leaders in four principal institutions of community: business, education, government, and nonprofit.

Restriction: Urban Studies and Social Ecology majors have first consideration for enrollment.

PP&D 169. Public Policy Analysis. 4 Units.
Examines different approaches to the analysis of public policy, what constitutes good policy, the role of government, and citizen participation in policymaking. Suggests a policy-design perspective which builds upon other frameworks but concentrates on goals, implementation structures, tools, and rationales.

Prerequisite: SOCECOL E8 and (PP&D 4 or PP&D 166).

Same as POL SCI 121E.

Restriction: Urban Studies, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PP&D 170. Health Policy. 4 Units.
Considers social and economic aspects of health and disease in the United States. What are the proper roles of the individual, community, and government in improving health and health care? International comparisons will be made wherever possible.

Same as PUBHLTH 122.

Restriction: Urban Studies, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PP&D 172. Latino Metropolis. 4 Units.
Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as CHC/LAT 154.

(VII)

PP&D 177. Chicano Movement. 4 Units.
Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, "El Movimiento," within the wide context of socio-economic change.

Same as CHC/LAT 166.

Restriction: Chicano/Latino Studies, Urban Studies, and Social Ecology majors have first consideration for enrollment.

PP&D 202. History of Urban Planning. 4 Units.
Introduction to the historical roots and fundamental perspectives of urban and regional planning. Exploration of the significant historical phases and personalities which have shaped the profession. The roles and responsibilities, the limitations and potential, of urban planning.

Restriction: Graduate students only.
PP&D 203. Theoretical Foundations of Planning. 4 Units.
Intellectual excursion into central themes in policy and planning, including philosophy of the market, institutionalization of space, hypostatizations of policy, constructions of communities, logics of spatial analysis. Objective is engagement of the professional in thoughtful reflections on practice and institutions.

Restriction: Graduate students only.

PP&D 204. Design and Planning Graphics: Fundamentals. 4 Units.
Graphic representation and communication of physical place characteristics, design and physical planning ideas and concepts using a variety of graphic techniques of free hand drawing, sketching, orthographic representations, scale drawings, 3D representations, maps, photo-documentation, and various media.

Restriction: Masters in Urban & Regional Planning graduate students only.

PP&D 205. Environmental Economics and Policy. 4 Units.
Provides a broad introduction to environmental economics and to environmental policy. Environmental problems facing the United States and Europe are analyzed, and whenever possible, the environmental problems facing developing countries.

Restriction: Graduate students only.

PP&D 206. Microeconomic Analysis for Urban Planning. 4 Units.
Provides students with a working knowledge of basic microeconomic concepts. Emphasizes applications related to urban planning and policy analysis. Topics covered include demand analysis, firm behavior, market structure, public goods, externalities, and the role of economics in land markets.

Restriction: Graduate students only.

PP&D 207. Development Control Law and Policy. 4 Units.
Investigates legal and institutional frameworks for development control. Review of constitutional issues implicated in land-use regulation. Traces development control historically and analyzes contemporary approaches to land-use control which reflect environmental and economic development concerns.

Same as CRM/LAW C207.

Restriction: Graduate students only.

PP&D 208. California's Population. 4 Units.
Provides a non-specialist introduction to social demography through a focus on California population. Surveys historical and current trends in the State's growth, its industries and occupations, and its ethnic and racial makeup.

Restriction: Graduate students only.

PP&D 209. Qualitative Research Methods: Overview. 4 Units.
Introduction to fundamentals of “qualitative” research and non-positivistic inquiry. Formulation of research questions, selection of method, data collection techniques, and analysis (briefly). Overview of selected methods from ethnography, naturalistic field research, phenomenology, ethnoarchaeology, critical approaches, and others.

Restriction: Graduate students only.

PP&D 210. Practice Experience. 4 Units.
Provides Master of Urban & Regional Planning Students an opportunity to link classroom knowledge with real Planning situations through a ten-week unpaid practice experience.

Restriction: Masters in Urban & Regional Planning graduate students only.

PP&D 211. Urban Design and Behavior. 4 Units.
Acquaints students with vocabulary, history, theories, process, and trends in urban design, and the relationship of design to human well-being. The local environment is used as a resource and a laboratory.

Restriction: Graduate students only.

PP&D 212. Transportation Planning. 4 Units.
Introduces current topics in transportation planning. Includes an analysis of the economic role of transportation in urban areas, land-use impacts of transportation projects, traffic congestion, air quality, alternatives to the automobile, and other transportation topics.

Restriction: Graduate students only.
PP&D 213. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.

Same as POL SCI 273A, SOCIOL 223, MGMTPHD 297K.

Restriction: Graduate students only.

PP&D 214. Quantitative Analysis for Planners. 4 Units.
Introduces students to the basic statistical concepts used to address issues of public concern. Prepares students to perform, interpret, and evaluate quantitative data analyses commonly used in professional studies.

Restriction: Graduate students only.

PP&D 215. Analytical Methods for Planning. 4 Units.
Emphasizes the development of analytical techniques proven useful in the fields of management and administration. Topics include multiple regression, cost-benefit analysis and discounting, decision trees, and other techniques useful for the purposes of community analysis and planning.

Restriction: Graduate students only.

PP&D 219. Advanced Planning Theory. 4 Units.
Readings and discussions aimed at developing a foundation for critical research into theories and epistemologies of planning and policy. Topics include the liberal, communitarian, communicative, and other conceptions of nationality; praxis, hermeneutics, and policy; topologies of justice and social fracture.

Restriction: Graduate students only.

PP&D 220. Qualitative Methods. 4 Units.
Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 225.

Restriction: Master of Public Policy graduate students only.

PP&D 221. Public Policy. 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 221.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

PP&D 223. Regional Analysis. 4 Units.
Major concepts and techniques of regional analysis, with applications for urban and regional planning and public policy-making. Definition of regions, processes of economic change, regional structure, location of activities, and analysis of selected policy issues. Emphasis on practical applications.

Restriction: Graduate students only.

PP&D 224. Environmental Politics and Policy. 4 Units.
Reviews and critiques literature on discussion topics including: the nature and effectiveness of environmental movements and policies; the role of science and technology; the use of economic incentives in policy; decentralization of decision making; and creating arenas for public involvement.

Restriction: Graduate students only.

PP&D 225. Local Economic Development. 4 Units.
Analyzes the economic development process. Attention is given to economic theories of local development and practical implications of those theories. Topics include local economic development and poverty, tax incentives, infrastructure credits, effects of government competition for economic activity.

Restriction: Graduate students only.
PP&D 226. Public Health Cost-Effectiveness Analysis. 4 Units.
Examines using cost-effectiveness information to allocate limited resources to maximize health benefits to a population; defining and measuring cost, survival and health-related quality of life; and how to calculate cost-effectiveness using decision trees and Markov simulation models.

Same as PUBHLTH 220.

Restriction: Graduate students only.

PP&D 227. Qualitative Methods: Case Study. 4 Units.
Deals with case study as a qualitative, anti-positivistic research method. Discussion focuses on the essential nature of case study research, quality of case study, rigor, design, implementation, analysis, data collection techniques, analysis, and writing.

Restriction: Graduate students only.

PP&D 228. Demographics for Planning and Policy. 4 Units.
Provides planning and policy practitioners with a condensed, nonspecialist orientation to the sources, applications, and interpretation of population statistics, and conveys the steps used in constructing local-area population forecasts and projections.

Restriction: Graduate students only.

PP&D 231. Transportation and Environmental Health. 4 Units.
Critically evaluates how transportation can promote sustainable, healthy, and equitable cities. Examines the interaction of transportation systems with urban form, land use, community health, and environmental quality.

Restriction: Graduate students only.

PP&D 233. Transportation, Transit, and Land-Use Policy and Planning. 4 Units.
Places students into a specific transportation public policy situation to devise real solutions, with the goal of helping students understand factors in land use, travel behavior, politics, and finance that shape transportation planning policy choices.

Restriction: Graduate students only.

Explores the application of geographic information systems (GIS) in urban planning. Steps through a GIS-based planning procedure that balances housing, jobs, tax base, utilities, transportation, and the natural environment.

Restriction: Graduate students only.

PP&D 236. Community Design. 4 Units.
Provides an overview of the current condition of urban design in the United States. Topics include the academic environment, the retail environment, multi- and single-family residential environments, the office environment, and new urban design tools.

Restriction: Graduate students only.

PP&D 237. Introduction to Geographic Information Systems. 4 Units.
Application of Geographic Information Systems (GIS) to the field of urban and regional planning. Emphasizes current issues that occur in actual implementation settings. Lecture/discussion followed by laboratory demonstrating the area of GIS discussed. Offers “hands-on” student usage of GIS software.

PP&D 238. Advanced Geographic Information Systems. 4 Units.
Extends study of geographic information systems to more advanced issues, including data sources, data conversion, relational database integration, software customization, and spatial and three-dimensional analysis.

Prerequisite: PP&D 237.

PP&D 239. Urban Design Theories and Applications. 4 Units.
Introduction to contemporary and traditional theories of urban design and their applications. Organized around one question: How might planning and design of built environment contribute to making a good city? National and international case studies are introduced.

Restriction: Graduate students only.

PP&D 240. International Environmental Policy. 4 Units.
Explores causes and effects of environmental problems and the effectiveness of different adaptation or restoration strategies and how they are closely linked to ways in which political, economic, demographic, and cultural systems interact among themselves and ecological systems.
PP&D 241. Health Promotion and Planning. 4 Units.
Focuses on health and health care in the United States, but discussion of global health issues and/or international comparisons will be made whenever possible. Considers both the social and economic aspects of health and disease.

Same as PUBHLTH 221.

Restriction: Graduate students only.

PP&D 242. Regional Development Theory. 4 Units.
Regional economic development concepts and studies, with applications for urban and regional planning, and public policy-making. Roles and performance of economic sectors, technological innovation, and communications in the process of development. Analysis of regional development policies and programs.

Restriction: Graduate students only.

PP&D 243. Health Policy and Management. 4 Units.
Multidisciplinary inquiry into theory and practice concerned with delivery, quantity, costs of health care for individuals and populations. Explores managerial and policy concerns regarding structure, process, outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

Same as PUBHLTH 222.

Restriction: Graduate students only.

PP&D 244. Land-Use Policy. 4 Units.
Examination of the role of public policy in guiding growth and development in urban and suburban environments. Description of a wide-ranging set of growth policies, the rationales underlying their use, controversies and legal constraints, and evaluation of their effectiveness.

Restriction: Graduate students only.

PP&D 245. Urban Security. 4 Units.
Examines changing urban security landscape facing planners, businesses, policymakers, first responders, and academics. Identifies threats and vulnerabilities and how they can be reduced. Focus on transnational networks where contemporary cities are enmeshed, and function as sources of threat and opportunity.

Restriction: Graduate students only.

PP&D 246. Housing Policy. 4 Units.
Examines theories and practices of housing policy and the relationship of housing to larger neighborhood, community, and regional development issues. Considers the roles of private for-profit and not-for-profit developers, lenders, and all levels of government in the provision of housing.

Prerequisite: Basic statistics.

PP&D 247. Neighborhood Planning. 4 Units.
Focuses on asset-based development and community-building tools. Public policies and neighborhood-based case studies are explored which provide practical skills for the planner of the future.

Restriction: Graduate students only.

PP&D 248. Poverty and Development. 4 Units.
Critical examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as SOCIOL 235.

Restriction: Graduate students only.

PP&D 249. Issues in Environmental Law and Policy. 4 Units.
Treatment of legal and policy strategies for promoting environmental protection and deterring environmental degradation within the context of other societal objectives. Topical approach with a focus on problems of special interest to criminologists and to environmental policy specialists.

Same as CRM/LAW C252.

Restriction: Graduate students only.
PP&D 253. Site Planning. 4 Units.
Examines site specific, neighborhood, and community site planning from the site designer and local government perspectives. By reviewing actual discretionary case applications and case studies, students learn how regulatory, environmental, and government constraints influence site planning.
Restriction: Graduate students only.

PP&D 260. Grant Writing for Community Planning and Development. 4 Units.
Introduces students to grant writing and processes involved in generating funding for nonprofit programs and community research projects.
Restriction: Graduate students only.

PP&D 264. Planning, Policy and Design Seminar. 1 Unit.
For first- and second-year doctoral students. Topics include professional development; journal publication process; academic conference presentations; and the job market for doctoral students in and out of academia.
Restriction: Graduate students only.

PP&D 265. Urban and Community Development Seminar. 1 Unit.
For first- and second-year doctoral students. Topics include scholarship related to the urban and community development area. Discussion of assigned articles and book chapters and how they relate to urban and community development.
Restriction: Graduate students only.

PP&D 270. Environmental Ethics. 4 Units.
Introduction to major themes and debates in environmental ethics, with application to contemporary environmental issues.
Restriction: Graduate students only.

PP&D 273. Global Urbanization. 4 Units.
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.
Same as SOC SCI 254J, SOCIOL 252A.
Restriction: Graduate students only.

PP&D 282. Urban Design Studio for Planners: An Introduction. 4 Units.
Introductory urban design for planners. Organized around a variety of assignments to encourage learning by design in a studio setting. Students work on design projects and drawing assignments to learn practical aspects of urban design.
Restriction: Graduate students only.
PP&D 283. Collaborative Governance and Public Management. 4 Units.
Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.
Repeatability: May be taken for credit 2 times.
Same as PUB POL 283.
Restriction: Master of Public Policy graduate students have first consideration for enrollment.

PP&D 284. Theories of Public Policy. 4 Units.
Focuses on two important theorists with the aim being to study not so much their theory, but their mode of theorizing. Taking them two at a time (e.g., Foucault, Bourdieu) allows us to understand each more deeply through the comparison.
Restriction: Graduate students only.

PP&D 288. Environment-Behavior Studies. 4 Units.
Provides an overview of major theoretical and research perspectives within the field of environment-design research/environment-behavior studies (EBS). Reviews contributions to EBS from architecture, planning, geography, psychology, sociology, and other fields.
Restriction: Graduate students only.

PP&D 292. Professional Report. 4 Units.
Workshop designed to assist M.U.R.P. students in conducting their professional reports. Students select topics, design projects, conduct professional investigations, and write up reports.

PP&D 292A. Professional Report Seminar I. 4 Units.
Provides an introduction to prepare students for writing a professional planning report. Students learn how to diagnose a planning problem; select appropriate analytical methods to assess the problem; pose, evaluate, and recommend alternative approaches to addressing the problem.
Restriction: Graduate students only.

PP&D 292B. Professional Report Seminar II. 4 Units.
Students write and deliver oral presentations in a manner appropriate for professional planning, which includes peer feedback from these presentations. Includes lectures, student assignments, and guest speakers. "Deliverables" and due dates are treated as fixed and contractual professional commitments.
Prerequisite: PP&D 292A.
Restriction: Graduate students only.

PP&D 293. Research Practicum. 4 Units.
Through reading, discussion, and review of existing research proposals, and implementation of preliminary work for dissertation research, students enhance their knowledge of research design and methods, as well as develop skills to write a proposal for dissertation funding.
Prerequisite: PP&D 297.
Restriction: Graduate students only.

PP&D 294A. Urban Planning Practicum I. 4 Units.
Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.
Restriction: Graduate students only.

PP&D 294B. Urban Planning Practicum II. 4 Units.
Engages students in practical planning projects in the community under a central theme within Planning. Students take a problem-solving approach and employ and further develop data gathering, analysis, graphic and oral communication, public engagement, and report writing skills.
Prerequisite: PP&D 294A.
Restriction: Graduate students only.
PP&D 295. Master's Thesis Research and Writing. 1-8 Units.
Independent research with Planning, Policy, and Design faculty.
Prerequisite: Advancement to candidacy.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
PP&D 296. Doctoral Dissertation Research and Writing. 2-12 Units.
Dissertation research with Planning, Policy, and Design faculty.
Prerequisite: Advancement to candidacy.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
PP&D 297. Research Design. 4 Units.
Provides training in research design and methods. Students learn how to evaluate the strength of research findings based on the methods used by a researcher and learn to use lessons from the course to develop a research proposal.
Same as PUBHLTH 297.
Restriction: Graduate students only.
PP&D 298. Directed Studies in Urban Planning. 2-4 Units.
Directed Studies in Urban Planning.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
PP&D 299. Independent Study in Urban Planning. 2-8 Units.
Independent Study in Urban Planning.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
Public Policy Courses
PUB POL 219. Information and Public Policy. 4 Units.
Evaluates strengths and weaknesses of qualitative and quantitative methods and the data used in making public policy claims. Looks at the bases of certain widely accepted measures of poverty, growth, environmental quality, and the like.
Repeatability: May be taken for credit 2 times.
Restriction: Master of Public Policy graduate students have first consideration for enrollment.
PUB POL 221. Public Policy. 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.
Repeatability: May be taken for credit 2 times.
Same as PP&D 221.
Restriction: Master of Public Policy graduate students have first consideration for enrollment.
PUB POL 225. Qualitative Methods. 4 Units.
Fieldwork, data collections techniques, and related issues for anti-positivistic research. Data collection techniques include observation, physical traces, participation, in-depth interview. Data checks include veracity, detail, completeness, rigor.
Repeatability: May be taken for credit 2 times.
Same as PP&D 220.
Restriction: Master of Public Policy graduate students only.
PUB POL 240. Microeconomics and Public Policy. 4 Units.
Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as ECON 255.

Restriction: Graduate students only.

PUB POL 283. Collaborative Governance and Public Management. 4 Units.
Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Repeatability: May be taken for credit 2 times.

Same as PP&D 283.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

Department of Psychology and Social Behavior

4201 Social & Behavioral Sciences Gateway; 949-824-5574
http://psb.soceco.uci.edu/
Linda J. Levine, Department Chair

The Department of Psychology and Social Behavior is concerned with human behavior in social contexts. A major objective is to investigate how different social environments (e.g., the family, school, workplace, culture) affect health and human behavior across the life span. The Department’s faculty share a strong commitment to interdisciplinary scholarship and research that has the potential for application to important societal problems. Students begin with basic course work in developmental psychology, health and preclinical (abnormal) psychology, and social and environmental psychology. Subsequent courses cover such topics as social, emotional, and cognitive development in children, adolescents, adults, and the elderly; behavior disorders and developmental psychopathology; cultural, social, and personality influences on behavior; attitude formation and change; health psychology; cognition and emotion; stress and coping; psychology and the law; and counseling and therapy. Opportunities are available to work with faculty members on research in these and other areas. Obtaining research experience as an undergraduate also provides a valuable background for entry into many graduate programs.

Students are given a foundation that will enable them to pursue graduate work in psychology, public health, health services, social work, counseling, or education, or to work after graduation from UCI in both the private and public sectors. Field study opportunities include hospital settings, social service agencies, educational institutions, and community health clinics and counseling centers, among others.

Students should be aware that psychology courses are offered in several different departments and programs at UCI. Students interested in developmental, clinical, social, emotional, health, cross-cultural, or environmental psychology, or in psychology and the law, are advised to consult the course listings here in the Department of Psychology and Social Behavior section. These courses offer students a solid foundation in general psychology. Students interested in language, perception, sensorimotor integration, memory, learning, mathematical psychology, and neuroscience are advised to consult the course listings in the Department of Cognitive Sciences and the Francisco J. Ayala School of Biological Sciences sections of the Catalogue.

Undergraduate Program

Requirements for the B.A. Degree in Psychology and Social Behavior

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1444).

Departmental Requirements

Thirteen courses (52 units) as specified below:

A. Psychology Fundamentals (12 units):
   PSY BEH 11A psychology Fundamentals
   PSY BEH 11B psychology Fundamentals
   PSY BEH 11C psychology Fundamentals

B. Four upper-division core courses (16 units):
   PSY BEH 101D Life Span Developmental Psychology
PSY BEH 102C  Abnormal Psychology
PSY BEH 103H  Health Psychology
PSY BEH 104S  Social Animal: An Introduction to Social Psychology

C. Six upper-division courses (24 units) chosen from the following:

C-1. Choose one course from three different groups:
Group 1: Developmental Psychology (PSY BEH 110D–134D)
Group 2: Health Psychology (PSY BEH 118D, 135H–149H)
Group 3: Pre-Clinical/Psychopathology (PSY BEH 150C–169C)
Group 4: Social, Personality, and Environmental Psychology (PSY BEH 170S–189S)

C-2. Three additional upper-division courses chosen from the specialty areas in C-1 above or from:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY BEH 100</td>
<td>Special Topics in Social Behavior</td>
</tr>
<tr>
<td>PSY BEH 190A–193Z</td>
<td></td>
</tr>
<tr>
<td>PSY BEH 196</td>
<td>Research Seminar in Psychology and Social Behavior</td>
</tr>
<tr>
<td>SOCECOL H190A</td>
<td>Honors Research</td>
</tr>
<tr>
<td>SOCECOL H190W</td>
<td>Honors Research</td>
</tr>
</tbody>
</table>

1 Three additional upper-division courses chosen from the specialty areas in C-1 above or from courses numbered Psychology and Social Behavior 100, 190–193Z, 196, Social Ecology H190A, and H190W. NOTE: Courses used to satisfy requirement C-1 cannot be used to satisfy C-2; a maximum of two courses from 192A-Z and one 196 course may be counted toward the major.

Psychology and Social Behavior Minor Requirements

The minor in Psychology and Social Behavior is met by completing eight courses (32 units). Students have the option of choosing between two versions of the minor as specified below:

Version 1:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY BEH 11A</td>
<td>Psychology Fundamentals</td>
</tr>
<tr>
<td>PSY BEH 11B</td>
<td>Psychology Fundamentals</td>
</tr>
<tr>
<td>PSY BEH 11C</td>
<td>Psychology Fundamentals</td>
</tr>
<tr>
<td>SOCECOL 10</td>
<td>Research Design</td>
</tr>
</tbody>
</table>

Select four courses from PSY BEH 100–193Z.

or

Version 2:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY BEH 9</td>
<td>Introduction to Psychology</td>
</tr>
<tr>
<td>SOCECOL 10</td>
<td>Research Design</td>
</tr>
</tbody>
</table>

Select six courses from PSY BEH 100–193Z.

Residence Requirement for the Minor: Six courses required for the minor must be completed successfully at UCI.

Excellence in Research in Psychology and Social Behavior

High-achieving students majoring in Psychology and Social Behavior can earn Excellence in Research in Psychology and Social Behavior by participating in a two-component program consisting of faculty-supervised research and courses in methodology and statistics. To be eligible for the program, students must have earned an overall 3.2 UC GPA in their junior year, with grades of B or above in the required methodology and statistics courses (SOCECOL 10, SOCECOL 13, SOCECOL 111, and PSY BEH 190). Students will work with a faculty mentor during at least two quarters of the junior year in PSY BEH 196 or SOCECOL 198 or SOCECOL 199. Successful completion of the program also requires faculty-mentored research (SOCECOL H190A-SOCECOL H190B) and completion of a senior research thesis or a report at a research conference (SOCECOL H190W). Applications for the program are submitted in the spring quarter of the senior year, after completion of all requirements.

Graduate Program

For general information about the School of Social Ecology’s graduate programs, including admission requirements, career opportunities, and Ph.D. program milestones can be found in the School of Social Ecology Graduate (p. 1448) section of the Catalogue. Specific information about the Department of Psychology and Social Behavior’s graduate program appears below.
Ph.D. in Psychology and Social Behavior

The Department of Psychology and Social Behavior offers a Ph.D. program in Psychology and Social Behavior. The main goal of this program is to train behavioral scientists to apply theory and methods in psychology, together with perspectives and knowledge from allied disciplines, to the analysis of human behavior and health across the life span and in diverse sociocultural contexts. This program values both basic and applied research that is relevant to the improvement of individual, community, and societal functioning. Emphasis is placed on the integration of knowledge from several subspecialties in psychology in order to understand the antecedents and developmental course of adaptive or maladaptive behavior and on the conduct of research that has implications for social policies, programs, and interventions.

Training in this program emphasizes four core areas of psychology. The specialization in Developmental Psychology focuses on the development of individuals at various periods in the life course and the effects of varying social and cultural contexts on cognitive, social, and health outcomes. Health Psychology focuses on identifying, evaluating, and enhancing the psychosocial and behavioral factors that promote mental and physical health, prevent disease, and optimize medical treatments. The specialization in Affective Science focuses on the effects of emotion, motivation, and values on human reasoning, behavior, and health in typical and atypical populations, across the life span, and across cultures. Social and Personality Psychology focuses on the interrelations among attitudes, perceptions, motives, emotions, and personality characteristics as they affect individual functioning, interpersonal processes, and intergroup relations. In addition, several faculty offer courses and conduct research in the area of Psychology and Law, dealing with such issues as the malleability of memory processes, the ability of jurors to understand scientific evidence, the impact on children and adolescents of contact with the legal system, and the response of the legal system to individuals with severe personality disorders.

Students will learn to understand human behavior from a social ecological, contextual perspective. They will be exposed to the major theories in each specialization and learn various social science research methods. All students are encouraged to become actively involved in research from the earliest stage of their training. Through close association with faculty members and participation in the faculty’s research projects, students learn to conduct methodologically sophisticated research that addresses contemporary psychological and social issues. Current research teams are investigating stress, coping, and social support; biobehavioral mechanisms of cardiovascular reactivity; psychobiology of stress; personality factors that increase resilience to health threats; parent-child relations; work and family; transitions across the life course; adaptive aging; end-of-life medical decision making; culture and adolescent psychosocial development; cultural influences on social judgment; relations between cognitive and emotional development; emotion regulation; memory and eyewitness testimony; violence and anger management; the development of health-risking and health-protecting behaviors during childhood and adolescence; economic stress and psychopathology/behavioral disorders; health impacts of environmental stressors; mental health and psychopathy; juvenile and criminal justice; positive psychology; and person-environment fit.

All students take eight required core courses:

<table>

<td>Research Directions in Psychology and Social Behavior</td>
</tr>
</tbody>
</table>

The course on Applied Research PSY BEH P209A introduces students to the scientific, professional, and ethical issues involved in conducting and translating psychological research in a variety of applied settings. Some students may wish to take a complementary (optional) course, PSY BEH P209B, that provides the opportunity for a supervised research internship in an appropriate community setting. The three-quarter course Research Directions in Psychology and Social Behavior (PSY BEH P294A-PSY BEH P294B-PSY BEH P294C) allows students to increase their breadth of knowledge regarding contemporary issues and controversies in psychology and social behavior by participating in the Department’s weekly colloquium series and interacting with visiting scholars and other speakers.

Students must select one of four core specialization areas in which to further focus their graduate training. Additional course requirements vary across each specialization.

Health Psychology Specialization

Social and Personality Specialization

PSY BEH P214
or PSY BEH P233
and three additional courses from an approved list

Seminar in Social Psychology
Personality

Affective Science Specialization

PSY BEH P226
or PSY BEH P250
and three additional courses from an approved list of Affective Science electives

Emotion in Psychology
Emotion, Reasoning, and Memory

Developmental Psychology Specialization

PSY BEH P220
and three additional courses from approved developmental electives

Developmental Psychology: Theories and History

In addition to selecting a core specialization area, students are also required to select a minor specialization and complete one required specialization course and one elective course in this area. The minor specialization and elective courses should be chosen according to the plan that best meets the needs of the individual student, as determined in consultation with the student’s faculty advisor and the departmental graduate advisor. In addition to courses offered by the Department of Psychology and Social Behavior and the School of Social Ecology, students may take courses offered by other departments in other schools such as the Departments of Cognitive Science, Anthropology, and Sociology in the School of Social Sciences and the Department of Neurobiology and Behavior in the School of Biological Sciences. Approval from instructors is required to enroll in these courses.

Finally, students who are interested can pursue an optional training track in psychology and law. This track is supplemental to the requirements associated with the required specializations and supplemental to the required minor. That is, all students must complete the above-listed requirements for their specialization and minor. Then, if the student decides to complete the training track in psychology and law, this training is in addition to the requirements listed above. For the training track, a total of four courses must be taken, one required (PSY BEH P266 Psychology and the Law) and three electives. The electives must be approved by the student’s faculty mentor and departmental advisor and can be a course in PSB, or in the School of Social Ecology or School of Law, with instructor and school approval.

Students complete a supervised research project during their second year culminating in a paper that may form the basis for a publication. They take a written comprehensive examination during their third year, which requires them to demonstrate mastery of the principles of social ecology and of major theoretical, substantive, and methodological issues in the study of their major and minor specializations and in the psychology of human behavior. The normative time for advancement to candidacy is four years. The fourth year is devoted to developing and defending a dissertation proposal, and the fifth year is spent completing the dissertation research. The normative time for completion of the Ph.D. is six years. Students must complete all requirements for the Ph.D. in Psychology and Social Behavior no later than their seventh year of study, adjusted for any approved leaves of absence that may have been taken. It is expected that most students will complete the degree requirements well in advance of this deadline. All Ph.D. students in the Psychology and Social Behavior program are required to pass a final oral defense of the dissertation.

Potential employment sites for graduates of the program include academic institutions, research organizations, government policy institutes, health care and human services settings (e.g., hospitals, schools, community agencies), and a variety of private sector employers. The Ph.D. Program in Psychology and Social Behavior specializes in the training of researchers, not in the training of clinical practitioners.

Program in Law and Graduate Studies (J.D./Ph.D.). Highly qualified students interested in combining the study of law with graduate research and/or research qualifications in cognate disciplines are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students approved for this concurrent degree program may pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Psychology and Social Behavior. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a graduate degree in less time than would be required to acquire both degrees separately. The normative time for completion is seven years for the J.D./Ph.D. combination.

Applicants must submit separate applications for admission to the School of Law and to Psychology and Social Behavior. Once admitted for study into both components of their program, concurrent degree students will work with the PLGS director and the PSB graduate advisor to develop a program of study that will permit efficient pursuit of both degrees. Ordinarily, students will commence their studies in PSB and begin their first year of law school instruction after one or more years of graduate program training. Upon completion of the first year of law instruction, students will pursue a coordinated curriculum of upper-level law study and PSB graduate program courses and research. Concurrent degree students’ law enrollments will include a required 1-unit “Graduate Legal Studies” colloquium and 3-unit “Interdisciplinary Perspectives on Law” course. Concurrent degree students will be eligible for financial support through PSB while pursuing the Ph.D. and through the law school while pursuing law studies.

Faculty

Belinda Campos, Ph.D. University of California, Berkeley, Associate Professor of Chicano/Latino Studies; Psychology and Social Behavior (culture, relationships, positive emotion, health)
Elizabeth E. Cauffman, Ph.D. Temple University, UCI Chancellor’s Fellow and Professor of Psychology and Social Behavior; Education; Psychology and Social Behavior; School of Law (adolescent development, mental health, juvenile justice, legal and social policy)

Susan T. Charles, Ph.D. University of Southern California, UCI Chancellor’s Fellow and Professor of Psychology and Social Behavior (emotional processes across the adult life span, subjective experience and cognitive processes, health and emotion)

Chuansheng Chen, Ph.D. University of Michigan, Professor of Psychology and Social Behavior; Education (cross-cultural psychology, adolescent development, cognitive neuroscience, genes and behavior)

Jacqueline Chen, Ph.D. University of California, Santa Barbara, Assistant Professor of Psychology and Social Behavior (experimental social psychology, diversity and intergroup relations, social cognition, cultural psychology)

Joey Cheng, Ph.D. University of British Columbia, Assistant Professor of Psychology and Social Behavior (social hierarchies, psychology of social status, nonverbal cues of power and status, social contagion)

Thomas J. Crawford, Ph.D. Harvard University, Senior Lecturer with Security of Employment Emeritus of Psychology and Social Behavior (attitude theory and social problems research)

Sally S. Dickerson, Ph.D. University of California, Los Angeles, Associate Professor of Psychology and Social Behavior (health psychology, stress physiology, effects of social and emotional processes on physiology and health)

Peter H. Ditto, Ph.D. Princeton University, Professor of Psychology and Social Behavior (social psychology, judgment and decision making, political and moral reasoning)

C. David Dooley, Ph.D. University of California, Los Angeles, Professor Emeritus of Psychology and Social Behavior (community psychology, epidemiology, economic change)

Greg Duncan, Ph.D. University of Michigan, UCI Distinguished Professor of Education; Economics; Psychology and Social Behavior (economics of education, program evaluation, child development)

Jacquelynn Eccles, Ph.D. University of California, Los Angeles, UCI Distinguished Professor of Education; Psychology and Social Behavior (academic motivation and achievement, school and family influences on adolescent development, gender and ethnicity in STEM fields)

Michelle Fortier, Ph.D. University of Nebraska, Assistant Professor in Residence of Anesthesiology and Perioperative Care; Psychology and Social Behavior (pediatric pain management, pediatric oncology, family-centered medicine, complementary and alternative medicine (CAM), health information technology, coping with illness-related Stress)

Wendy A. Goldberg, Ph.D. University of Michigan, Professor of Psychology and Social Behavior; Education (developmental psychology, work and family, infant sleep, transition to parenthood, autism)

Ellen Greenberger, Ph.D. Harvard University, Professor Emerita of Psychology and Social Behavior (developmental psychology, social and cultural influences on adolescent and young adult development, family relationships and consequences throughout the lifespan)

Jutta Heckhausen, Ph.D. University of Strathclyde, Professor of Psychology and Social Behavior (life-span developmental psychology, motivation, individual agency and social context)

Barb J. Heine, Ph.D. Saint Louis University, Lecturer of Psychology and Social Behavior

Larry D. Jamner, Ph.D. State University of New York at Stony Brook, Professor of Psychology and Social Behavior (health psychology, psychophysiology, pain, mHealth)

Linda J. Levine, Ph.D. University of Chicago, Professor of Psychology and Social Behavior (bias in predicted and remembered emotion, how emotions influence the features of events people attend to and remember, the development of children’s ability to regulate emotion)

Elizabeth F. Loftus, Ph.D. Stanford University, UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law (cognitive psychology, human memory, psychology and law)

Angela F. Lukowski, Ph.D. University of Minnesota, Assistant Professor of Psychology and Social Behavior (memory development in infancy and early childhood, individual differences in long-term memory in infancy, the impact of sleep on cognitive functioning from infancy to adulthood)

Salvatore R. Maddi, Ph.D. Harvard University, Professor of Psychology and Social Behavior (personality, psychopathology, health psychology, creativity)

Elizabeth Martin, Ph.D., University of Missouri, Assistant Professor of Psychiatry and Human Behavior (transdiagnostic emotional and social functioning, affective control and regulation, relations between affect and cognition)

Stephanie McEwan, Psy.D. United States International University, J.D. American College School of Law, Lecturer of Psychology and Social Behavior (neurosciences, clinical psychology, sport psychology, psychopathology, psychoanalytic psychotherapy, psychoanalysis and emergency trauma)
Raymond W. Novaco, Ph.D. Indiana University, Professor of Psychology and Social Behavior (anger, violence, stress, trauma, and interventions)

Paul Piit, Ph.D. University of California, Berkeley, Assistant Professor of Psychology and Social Behavior (social hierarchy, emotion, uncertainty, nature, groups, prosocial behavior, ethics, morality)

Joann Prause, Ph.D. University of California, Irvine, Senior Lecturer of Psychology and Social Behavior (statistics, quantitative epidemiology, employment typology)

Sarah D. Pressman, Ph.D. University of Pittsburgh, Assistant Professor of Psychology and Social Behavior (health psychology, positive emotions, stress physiology, psychosocial effects on physiology and health)

Jodi A. Quas, Ph.D. University of California, Davis, Professor of Psychology and Social Behavior (memory development, children's involvement in the legal system)

Stephanie Reich, Ph.D. Vanderbilt University, Associate Professor of Education; Psychology and Social Behavior (child development, parenting, peer interactions, media, program evaluation)

Karen S. Rook, Ph.D. University of California, Los Angeles, Professor of Psychology and Social Behavior (gerontology, social relationships and health)

Shawn W. Rosenberg, M.S. Oxford University, Professor of Political Science; Psychology and Social Behavior (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Sabrina E. Schuck, Ph.D. University of California, Riverside, Health Sciences Assistant Clinical Professor of Pediatrics; Psychology and Social Behavior (ADHD, autistic spectrum disorders, disorders of reading and written language, human-animal intervention, non-pharmacological treatment of disruptive behavior, cognitive-behavioral school-based and family-based interventions)

Nicholas I. Scurich, Ph.D. University of Southern California, Assistant Professor of Psychology and Social Behavior; Criminology, Law and Society (judgment and decision making, juridical proof, violence risk assessment)

Roxane C. Silver, Ph.D. Northwestern University, Professor of Psychology and Social Behavior; Program in Public Health (coping with traumatic life events (personal losses and collective traumas), stress, social psychology, health psychology)

Eric Spangenberg, Ph.D. University of Washington, M.B.A. Portland State University, Dean of The Paul Merage School of Business and Professor of Paul Merage School of Business; Psychology and Social Behavior (sensory cues in the retail environment and the effects of self-prediction on behavior)

Mark Steyvers, Ph.D. Indiana University, Professor of Cognitive Sciences; Psychology and Social Behavior (wisdom of crowds, aggregating human judgments, computational models of the mind, machine learning and statistics, memory and decision making)

Daniel S. Stokols, Ph.D. University of North Carolina at Wilmington, Professor Emeritus of Psychology and Social Behavior; Epidemiology; Planning, Policy, and Design; Program in Public Health (environmental psychology, science of team science, transdisciplinary public health)

William C. Thompson, Ph.D. Stanford University, Professor of Criminology, Law and Society; Psychology and Social Behavior; School of Law (psychology and law, criminal justice, forensic science, expert evidence, human judgment and decision making, use of social science in appellate litigation)

Deborah Lowe Vandell, Ph.D. Boston University, Dean of the School of Education and Professor of Education; Psychology and Social Behavior (P-20 education, longitudinal studies of development)

Carol K. Whalen, Ph.D. University of California, Los Angeles, Professor Emerita of Psychology and Social Behavior (developmental psychopathology, childhood behavior disorders, child therapies, health psychology)

Ilona S. Yim, Ph.D. University of Trier, Associate Professor of Psychology and Social Behavior (stress, pregnancy and postpartum depression, biopsychology of stress, developmental psychobiology)

Joanne F. Zinger, Ph.D. University of California, Riverside, Lecturer with Security of Employment of Psychology and Social Behavior (expressive writing, meta-analysis, positive psychology, health psychology, preventive medicine, educational psychology)
Courses

PSY BEH 9. Introduction to Psychology. 4 Units.
Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior. Course may be offered online.

Same as PSYCH 7A.
Overlaps with PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 11A. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYCH 9A.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 11B. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYCH 9B.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 11C. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSYCH 9C.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSY BEH 100. Special Topics in Social Behavior. 4 Units.
Special topics courses are offered from time to time. Course content varies with interest of instructor.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Repeatability: Unlimited as topics vary.

PSY BEH 101D. Life Span Developmental Psychology. 4 Units.
Addresses the major issues, concepts, and methods of life span developmental psychology. The fundamental theories, distinctive methods, and the physical, perceptual, cognitive, social, motivational, and emotional development for each developmental phase of the life course are considered. Course may be offered online.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Restriction: Psychology and Social Behavior majors have first consideration for enrollment.
PSY BEH 102C. Abnormal Psychology. 4 Units.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10.
Overlaps with PSYCH 120A.
Restriction: Psychology and Social Behavior and Psychology majors have first consideration for enrollment.

PSY BEH 103H. Health Psychology. 4 Units.
Theory and research are considered as they contribute to an understanding of the role of psychological processes in health and illness. The distinction between prevention and treatment of illness is established, and a variety of psychosocial interventions are elaborated.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 104S. Social Animal: An Introduction to Social Psychology. 4 Units.
Theories and research exploring social behavior and social influences on behavior. Topics include methods of social research, attitude formation and change, social perception, the social self, stereotypes and prejudice, conformity, obedience, altruism, aggression, interpersonal relationships and love, and group behavior.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 110D. Infant Development. 4 Units.
Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and cognitive development.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 127I.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 111D. Child Development. 4 Units.
Examines social, emotional, and intellectual growth and development between the ages of 2 and 12 years.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Overlaps with PSYCH 120D.
Restriction: Psychology and Social Behavior and Social Ecology and Psychology majors have first consideration for enrollment.

PSY BEH 112D. Adolescent Development. 4 Units.
Examines current research on the biological, social, and cultural contexts of adolescent development. Topics include the impacts of puberty, adolescents' decision-making competencies, changes in family and peer relationships, identity development, and psychosocial problems such as depression and problem behavior.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Overlaps with PSYCH 21A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 113D. Adult Development. 4 Units.
Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time. Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 127A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 114D. Gerontology. 4 Units.
Examines stereotypes and myths associated with aging; physiological and psychological changes that accompany old age; distinguishes behavior changes due to aging per se from those due to historical and socioeconomic factors; political, social aspects of old age in contemporary society.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSYCH 127G.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 116D. Human Development and Cross-Cultural Perspectives. 4 Units.
Human development in diverse cultures (e.g., Asian, American, and African). Special emphasis on East-West contrasts and when East meets West (i.e., Asian-American experiences). Topics include parenting, family relations, language and cognition, schooling and academic achievement, and morality.
Prerequisite: (PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B) and SOCECOL 10.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 117D. Development of Gender Differences. 4 Units.
Examination of research on how sexes differ in physiology, cognitive functioning, personality, and social behavior. Sex-differentiated development from the prenatal period through adulthood. Explanations for male-female differences are sought, focusing on biological (genetic, hormonal), and social (familial, cultural) mechanisms.
Prerequisite: PSY BEH 9 or PSYCH 9B or PSY BEH 11B or PSYCH 7A.
Same as PSYCH 127D.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 118D. Human Sexuality. 4 Units.
A broad survey of human sexuality encompassing genetic factors, physiological and anatomical development, customary and atypical forms of behavior, reproductive processes, and cultural determinants.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 120D. Child Development, the Law, and Social Policy. 4 Units.
Examines how psychology research and practice can inform areas of law and social policy affecting children and adolescents. Topics include education, mental health, reproductive rights, and delinquency. Goals are to evaluate research and identify the costs/benefits of current policies.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C. Recommended: PSY BEH 111D OR PSY BEH 112D.
Same as CRM/LAW C125.
Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment.

PSY BEH 121D. Work and Family. 4 Units.
Effects of employment and unemployment on mental health and marital quality; effects of work on parenting and child development; corporate and social policies for "families that work"; young adults' decision-making about work and family.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Upper-division students only. Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 123D. Child in the Family, School, and Community. 4 Units.
The ecological study of contexts in which the child develops and is socialized: the family, school, peer group, media, and community. Examines the impact of societal influences, such as culture, religion, economics, politics, and technology.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.
PSY BEH 135H. Introduction to Biopsychology. 4 Units.
Introductory overview of the biology of behavior with a focus on the structure and function of the brain. Selected behaviors (e.g., eating, sleeping) and psychological states (e.g., stress, psychiatric disorders) are addressed from a biopsychological perspective.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 136H. Behavioral Medicine. 4 Units.
Examines biobehavioral aspects of health and illness, focusing on how stress contributes to or exacerbates disease processes. Background information on psychosomatic medicine and stress models and detailed examination of specific organ systems emphasizing the reactivity of these systems to stress.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 137H. Human Stress. 4 Units.
Stress as a multidisciplinary topic. Biological, psychological, and sociological approaches to adaptation-related disorders. Effects of acute and chronic stress on emotions, physiology, and behavior. Methods of stress assessment, stress reduction, and intervention.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 138H. Child Health Psychology. 4 Units.
Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children's beliefs about health, illness, and medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of child's illness on family.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 9C or PSYCH 7A. Recommended: SOCECOL 10.

Same as PSYCH 127H.

Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 139H. Sports Psychology. 4 Units.
Psychological components of athletic performance with regard to scientific and practical issues. Roles of cognitive processes, physiological arousal, and emotion. Various personality factors related to performance, competition, and coaching. Strategies for improving athletic performance for individual and team competition.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 140H. The Hardiness Approach to Stress Management. 4 Units.
New development within psychology involving a combination of motivations and skills that extensive research has shown enhances performance, conduct, morale, stamina, and health. Combines study of hardiness research with strategies for improvement of personal hardiness through a series of exercises.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 141H. Clinical Health Psychology. 4 Units.
Behavioral role in etiology, treatment, and prevention of certain diseases. Behavioral intervention including biofeedback, stress-, pain-management, health habit counseling, and other skills to assist patients make cognitive, emotional, and behavioral changes needed to cope with disease or achieve better health.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PUBHLTH 141.

Restriction: Public Health Sciences, Public Health Policy, and Psychology and Social Behavior majors have first consideration for enrollment.
PSY BEH 150C. Clinical Psychology. 4 Units.
Overview of theories, assessment techniques, research methodologies and intervention approaches in clinical psychology. Psychodynamic, behavioral, humanistic, and cognitive perspectives are examined along with ethical and professional issues.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and SOCECOL 10.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 151C. Psychological Testing and Assessment. 4 Units.
Laboratory-seminar exploration of diverse methods of assessing, analyzing, and recording behavior. Includes methods of direct behavioral observation, structured (analog) assessments, rating scales, interviewing, and self-monitoring. Development of assessment skills and their application in intervention and research programs.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and PSY BEH 150C. Recommended: SOCECOL 10.

Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 152C. Clinical Child Psychology. 4 Units.
Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy implications of identifying children who are different.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSYCH 127C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 153C. Developmental Psychopathology. 4 Units.
Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 120A. Recommended: SOCECOL 10.

Same as PSYCH 177P.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 154C. Cognitive Behavior Therapy. 4 Units.
Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.

Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSY BEH 11C) or PSYCH 7A or (PSYCH 9A and PSYCH 9C).

Same as PSYCH 147C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 155C. Child Therapies. 4 Units.
Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people's lives.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 122C.

Same as PSYCH 127T.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 156C. Forensic Psychology: Advanced Seminar. 4 Units.
The focus is on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and (PSY BEH 178S or CRM/LAW C149).
Same as CRM/LAW C136, PSYCH 177F.
Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Criminology, Law and Society majors have first consideration for enrollment.

PSY BEH 160C. Clinical Neuroscience. 4 Units.
Offers an introduction to the neuroclinical bases of human behavior, including neuropsychological approaches to mental disorders. Also includes case formulations, research articles, therapeutic approaches, and other discussions related to select psychopathology and other neurobehavioral topics.

PSY BEH 161C. Forensic Psychology. 4 Units.
Forensic psychology is the interface between clinical psychology and the law. Emphasizes clinically relevant legal topics (insanity defense; competency to stand trial) and includes critical thinking about issues arising when psychologists are involved in legal proceedings.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSY BEH 11C.
Same as CRM/LAW C160.

PSY BEH 162C. Psychodynamic Studies. 4 Units.
Introduction to psychoanalysis and contemporary psychodynamic studies. Emphasis on theories associated with psychoanalysis and psychodynamic psychotherapy, including unconscious determinants of behavior and influence of the past on the present. Exploration of links between psychodynamic studies and other disciplines (music, medicine, neuroscience).
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 170S. Personality. 4 Units.
Comparison of the major theories of personality. Provides a frame of reference for understanding lifestyles, development, maturity, and psychopathology. Emerging research themes are used to identify promising lines of personality theorizing.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Overlaps with PSYCH 120P.
Restriction: Sophomores only or upper-division students only. Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 171S. Environmental Psychology. 4 Units.
Impact of the physical environment on individual and group behavior. Three basic concerns examined: (a) environmental determinants of behavior at the individual and interpersonal level; (b) social planning and urban design; (c) methodological approaches to the study of environmental issues.
Prerequisite: SOCECOL E8 or SOCECOL 10 or PP&D 4.
Same as PP&D 151, PUBHLTH 151.
Restriction: Urban Studies, Social Ecology, Psychology and Social Behavior, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 173S. Social Relationships. 4 Units.
Examines major issues, concepts, and methods in the scientific study of social relationships. Topics include relationship formation and dissolution, friendships and love relationships, loneliness, bereavement, societal influences on close relationships, significance of close relationships for health and well-being.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.
PSY BEH 174S. Error and Bias in Social Judgement. 4 Units.
Examines how people encode, reason about, and remember social information and explores how biases and shortcomings in social perception, judgment, and memory are central to understanding both effective social functioning and many forms of maladaptive behavior and social conflict.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 175S. Cognition and Emotion. 4 Units.
Examines relations between cognition and emotion. How have the relations between cognition and emotion been construed historically? How closely related are cognitive and emotional development? How do emotions influence reasoning and memory? How similar is emotional experience across cultures?
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 176S. Motivation. 4 Units.
History, major theories, methods, and applications of motivational psychology, with emphasis on European approaches. Origins of the field in personality, learning, cognition, and activation research. Recent innovations in motivational and volitional self-recognition. Current approaches, major debates, empirical research programs.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 101D and (PSY BEH 104S or PP&D 151).
Overlaps with PSYCH 121M.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 177S. Psychology and Emotion. 4 Units.
General theories of emotion and research regarding cognitive, behavioral, physiological, and subjective experience of emotion. Specific topics include emotion regulation, emotion and health, emotional intelligence, and emotional development.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSYCH 127E.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 178S. Violence in Society. 4 Units.
Current theory and research on aggression; anger and violence as problems in individual and social functioning. Process and functions of anger examined with regard to normal behavior and psychopathology. The determinants, prevalence, and implications of violence in society are analyzed.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as CRM/LAW C149.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 179S. Cultural Psychology. 4 Units.
An examination of culture's influence on human minds. Topics include culture's impact on perception, cognition, motivation, emotion, moral reasoning, communication, and health. Addresses cultural psychology's methods, history, and place within psychology and related fields.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSY BEH 11C or PSYCH 7A or PSYCH 9B or PSYCH 9C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 180S. Organizational/Industrial Psychology. 4 Units.
Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research and consumer psychology. Potential ethical problems are discussed.
Prerequisite: PSY BEH 9 or PSY BEH 11A or PSY BEH 11B or PSY BEH 11C or PSYCH 7A or PSYCH 9A or PSYCH 9B or PSYCH 9C.
Same as PSYCH 122I.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 183S. Social Epidemiology. 4 Units.
Overviews evidence linking environmental factors to mental and physical disorders including such variables as socioeconomic status, income inequality, work stress, job loss, social capital, location, and other demographic characteristics. Measurement and research design issues of both individual and aggregate levels.
Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and SOCECOL 10 and SOCECOL 13.
Same as PUBHLTH 102.
Restriction: Psychology and Social Behavior, Social Ecology, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment.

PSY BEH 184S. Positive Psychology . 4 Units.
The field of positive psychology focuses on what is right and positive about people and institutions. Course introduces findings associated with human strengths and positive emotions and provides clinical and personal applications and implications.
Prerequisite: PSY BEH 9 or PSY BEH 11C.
Restriction: Psychology and Social Behavior and Social Ecology majors have first consideration for enrollment.

PSY BEH 190. Applied Statistics in Psychological Research. 4 Units.
Covers statistical techniques used to describe and make generalizations about phenomena represented by data. Hands-on experience in data analysis and interpretation using statistical software (SPSS, STATA) is emphasized. Topics include data visualization, ANOVA, multiple regression, and categorical data analyses.
Prerequisite: SOCECOL 13.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192A. History of Psychology. 4 Units.
A history of the development of various schools and systems of psychological thought.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSYCH 120H.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192E. Perception and Sensory Processes. 4 Units.
A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis on the visual system.
Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.
Same as PSYCH 130A.
Overlaps with PSYCH 131A, PSYCH 131B.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192G. Cognitive Science. 4 Units.
Introduction to investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include: perception, attention, knowledge representations, learning and memory, action, reasoning, and language.
Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSYCH 11B) or PSYCH 7A or (PSYCH 9A and PSYCH 9B).
Same as PSYCH 140C.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192I. Principles of Learning Theory. 4 Units.
Investigation of the learning and memory processes of humans and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.
Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.
Same as PSYCH 140L.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSY BEH 192J. Human Memory. 4 Units.
Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed
scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSYCH 140M.
Overlaps with PSYCH 46A.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192K. Human Problem Solving. 4 Units.
Modern developments in the psychology of human problem solving. Topics include: concept identification, arithmetic, sets, logic puzzles, story problems,
group problem solving, and theorem proving.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSYCH 143P.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192L. Introduction to Cognitive Neuroscience. 4 Units.
Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language,
attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.

Same as PSYCH 160A, BIO SCI N166.

Restriction: Psychology majors have first consideration for enrollment.

PSY BEH 192P. Perceptual Neuroscience. 4 Units.
Examines the physiology of cortical networks underlying human perceptual experience.

Prerequisite: PSYCH 160A or PSY BEH 192L.

Same as PSYCH 161P.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSY BEH 192Q. Chicano/Latino Social Psychology. 4 Units.
Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics
include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and
discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as CHC/LAT 168.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)

PSY BEH 192R. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close
relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle
East.

Same as CHC/LAT 177.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)
PSY BEH 192RW. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as CHC/LAT 177W.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

PSY BEH 192S. Health and the Latino Paradox. 4 Units.
Examines research and theories concerning the physical and mental health of U.S. Latino populations. Contemporary accounts, health care implications, and new directions for understanding sources of risks and resilience for health in Latino populations are evaluated and discussed.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as CHC/LAT 178.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

PSY BEH 192T. Cognition and Learning in Educational Settings. 4 Units.
Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.
Same as EDUC 173.
Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

PSY BEH 192U. Psychology of Learning, Abilities, and Intelligence. 4 Units.
Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.
Prerequisite: PSYCH 7A or PSY BEH 9.
Same as EDUC 176.
Restriction: Psychology and Social Behavior, Social Ecology, and Education majors have first consideration for enrollment.

PSY BEH 192V. Language and Literacy. 4 Units.
Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.
Same as EDUC 151.
Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

PSY BEH 193B. Juvenile Delinquency. 4 Units.
Patterns of delinquent behavior, theories that explain behavior, current research aimed at enhancing exploratory power. Attempts to prevent and control delinquency are put in historical perspective. Development of the current juvenile justice system and evolution of modern juvenile law.
Prerequisite: CRM/LAW C7.
Same as CRM/LAW C109.
Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.
PSY BEH 193C. Social Control of Delinquency. 4 Units.
Assumes familiarity with theories of delinquency, the juvenile justice system, and elements of juvenile law. Explores socio-historical origins and evolution of juvenile justice, current research and policy on delinquency prevention and treatment, and future directions of law, policy, and practice.

Prerequisite: Prerequisite or corequisite: CRM/LAW C7. Recommended: CRM/LAW C109.

Same as CRM/LAW C164.

Restriction: Psychology and Social Behavior, Social Ecology, Criminology, Law and Society, and Psychology majors have first consideration for enrollment.

PSY BEH 193D. Interrogation, Confession, and the Law. 4 Units.
In-depth examination of social psychology of police interrogation in America, the evolution of American interrogation practices from the nineteenth century to the present, impact of law on police behavior and ideology, causes and consequences of false confessions, possibilities of reform.

Same as CRM/LAW C152.

Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

PSY BEH 193E. Psychology and the Law. 4 Units.
Psychological assumptions of American legal system and mental health aspects of provision of criminal justice services. Civil commitment, insanity defense, competence to stand trial, jury selection, eye-witness identification. Use of police, courts, correctional institutions in prevention of behavior disorder.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.

Same as CRM/LAW C105.

Restriction: Criminology, Law and Society, Social Ecology, and Psychology and Social Behavior majors have first consideration for enrollment.

PSY BEH 193F. Family Law. 4 Units.
Examines legal issues surrounding marriage, cohabitation, divorce, child custody and support, adoption, and the rights of parents and children in the family context. The findings of social science research are used to illuminate the legal issues.

Prerequisite: CRM/LAW C7 or CRM/LAW C101.

Same as CRM/LAW C123.

Restriction: Psychology and Social Behavior, Social Ecology, and Criminology, Law and Society majors have first consideration for enrollment.

PSY BEH 193G. Eyewitness Testimony. 4 Units.
Faulty eyewitness testimony is a major cause of wrongful convictions. Covers the fast-growing topic of eyewitness testimony and memory for real-world events, both how psychologists study eyewitness capacity, and how the legal system has dealt with eyewitness issues.

Prerequisite: SOCECOL 10.

Same as CRM/LAW C177.

Restriction: Psychology and Social Behavior, Criminology, Law and Society and Social Ecology majors have first consideration for enrollment. Seniors only.

PSY BEH 196. Research Seminar in Psychology and Social Behavior. 4 Units.
Special topics research seminar. Content varies with interest of instructor. Capstone seminar for students who have conducted research with, or have a background in, the research topics of the PSB faculty member offering this seminar in a given quarter.

Prerequisite: PSY BEH 11C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

PSY BEH P201. Research Methods in Psychology. 4 Units.
In-depth examination of the conceptualization of research problems and linkages between theory and the design of appropriate strategies for empirical research in psychological science. Topics include experimental and quasi-experimental designs, reliability and validity of measurement and non-experimental procedures.

Restriction: Psychology and Social Behavior graduate students only.
PSY BEH P204. Adolescence. 4 Units.
Considers pubertal and cognitive changes and their social consequences; the family, peer group, school, and cultural contexts in which adolescence is embedded; and selected psychosocial issues including autonomy, identity, health, and well-being.

Restriction: Graduate students only.

PSY BEH P209A. Applied Psychological Research. 4 Units.
Focuses on scientific and professional issues in the field of psychology. Topics include communication skills; intervention approaches; collaboration, consultation, and referral; and ethical issues associated with at-risk populations research.

Restriction: Graduate students only.

PSY BEH P212. Social Cognition. 4 Units.
Explores historical and current developments in cognitive social psychology. Topics include judgment and decision making, automatic versus controlled processing, affective forecasting, motivated reasoning, and the effects of emotion on memory and judgment.

Restriction: Graduate students only.

PSY BEH P214. Seminar in Social Psychology. 4 Units.
Presents an overview of selected theoretical and empirical topics in social psychology including social influence and conformity, altruism and aggression, persuasion and attitude change, self and social perception, and social cognition.

Restriction: Graduate students only.

PSY BEH P218. Infancy. 4 Units.
Covers development from conception through the second year. Focus is on research and theory concerning infants' physical, social, cognitive, perceptual, emotional, and language development. Also covers transition to parenthood and family context of infant development.

Restriction: Graduate students only.

PSY BEH P220. Developmental Psychology: Theories and History. 4 Units.
Examines key concepts, theories, and the historical and philosophical roots of research in human life span development. Focuses on biological and environmental causation, universalism and cultural relativism, continuity and change.

Restriction: Graduate students only.

PSY BEH P226. Emotion in Psychology. 4 Units.
Covers original and recent theories of emotions and how they guide current research. Specific topics include neuroanatomical structure of emotion, life-span emotional development, and health and emotion.

Restriction: Graduate students only.

PSY BEH P230. Adulthood. 4 Units.
Focusses on early and middle adulthood. Examines extended period of transitioning to adulthood; changes in relationships with family members; impact of major role-related experiences (e.g., spouse, parent, worker) on development and well-being; continuity and change in personality and social identities.

Restriction: Graduate students only.

PSY BEH P231. Professional Issues in Psychology. 4 Units.
Examines a variety of issues related to the professional socialization and development of graduate students in psychology. Topics include the publication process, sources of research funding, alternative employment options, competitiveness on the job market, and the academic career route.

Restriction: Graduate students only.

PSY BEH P232. Hardiness as the Pathway to Resilience. 4 Units.
Theory, research, and practice supports hardiness as a major pathway to surviving and thriving under stress in our turbulent times. Course (1) imparts relevant theory, research, and practice, and (2) teaches how to use hardiness assessment and training techniques.

Restriction: Graduate students only.

PSY BEH P233. Personality. 4 Units.
Provides a frame of reference for understanding personality and its role in life-span development, the relationship of the individual to society, and both mental and physical illness.

Restriction: Graduate students only.
PSY BEH P237. Violence, Society and Psychopathology. 4 Units.
The multifactorial, societal-contextual nature of violence is examined through historical, philosophical, and social science theoretical accounts. Priority topics are violent crime, socio-environmental factors, family violence, media violence, terrorism, personality and mental disorder, psychiatric institutions, and interventions for violent offenders.
Restriction: Graduate students only.

PSY BEH P238. Child Psychopathology. 4 Units.
Examination of etiology, classification, and developmental pathways of disorders, as well as risk and resilience factors, during the childhood/adolescent years. Discussion of genetic influences and contextual risk factors as well as internalizing and externalizing disorders.
Restriction: Graduate students only.

PSY BEH P239. Adult Psychopathology. 4 Units.
Explores the antecedents, characteristics, course, outcomes, and options for the prevention or management of various forms of psychopathology and behavior disorder. Focuses on psychological and biobehavioral mechanisms that influence the development, expression, and amelioration of maladaptation.
Restriction: Graduate students only.

PSY BEH P245. Psychological Assessment. 4 Units.
Familiarizes students with psychological assessments in intelligence, clinical diagnosis, personality, and neuropsychological functioning. Exposure to administering, scoring, and interpreting assessments. Special focus on psychometrics (e.g., reliability and validity), test construction, and ethical responsibilities.
Restriction: Graduate students only.

PSY BEH P250. Emotion, Reasoning, and Memory. 4 Units.
Examines research and theory on emotion from the perspective of cognitive psychology. Topics include the effects of emotions on attention, memory, and problem solving; the relations between emotional and cognitive development; flash-bulb memories of intense emotional experiences; eyewitness testimony.
Restriction: Graduate students only.

PSY BEH P257. Genes, Emotions, and Behavior. 4 Units.
Course in behavioral genetics addresses the nature/nurture question: what is the strength of relative genetic and environmental influences on psychosocial processes ranging from attachment and social behavior to aggression and depression.
Restriction: Graduate students only.

PSY BEH P258. Health Psychology. 4 Units.
Interdisciplinary exploration of emerging fields of health psychology and behavioral medicine. Topics: role of stress in development/treatment of medical problems; sociocognitive determinants of health and illness; interpersonal health transactions; behavioral approaches to medical problems such as diabetes, obesity, hypertension.
Restriction: Graduate students only.

PSY BEH P262. Interpersonal Processes and Health. 4 Units.
Examines traditions of research linking interpersonal processes to emotional or physical health. Topics include: role of social support in ameliorating stress, effects of social control on health-compromising behaviors, adverse effects of social relationships on health, causes of deficient social relationships.
Restriction: Graduate students only.

PSY BEH P263. Eyewitness Testimony. 4 Units.
Examines the evidence that shows that faulty eyewitness memory is the major cause of wrongful convictions. Explores what the legal system thinks of eyewitness testimony and how the legal system has dealt with eyewitness issues.
Same as CRM/LAW C263.
Restriction: Graduate students only.
PSY BEH P264A. Quantitative Methods in Psychology. 4 Units.
Statistical techniques for inference in psychological research including point, interval, and effect size estimation to establish test association between variables. General Linear Model techniques include single- and multifactor analysis of variance with use of linear contrasts and post hoc comparisons.

Restriction: Graduate students only.

PSY BEH P264B. Advanced Quantitative Methods in Psychology. 4 Units.
Focuses on proper specification of multivariable regression models with emphasis on inferences using OLS and logistical regression. Emphasizes framework for assessing interaction and other complex relationships between response and predictor variables. Use of statistical software to analyze data.

Prerequisite: PSY BEH P264A.

Restriction: Graduate students only.

PSY BEH P265. Memory and the Law. 4 Units.
Examines the controversial topic of repressed memory, or perception and memory of real-world events.

Same as CRM/LAW C265.

Restriction: Graduate students only.

PSY BEH P266. Psychology and the Law. 4 Units.
Overview of how psychology is applied to the civil and criminal justice systems, how case law shapes this application, and how legal decisions affect the direction of psychological research. Interdisciplinary approach to research in psychology, law, and/or criminology.

Same as CRM/LAW C266.

Restriction: Graduate students only.

PSY BEH P268. Coping with Stressful Life Events. 4 Units.
Explores how individuals cope with serious life crises (e.g., illness, bereavement), life transitions, and daily stressors. Considers how such events impact on people's cognitions, emotions, and health, and the role of others in the coping process.

Restriction: Graduate students only.

PSY BEH P271. Human Evolution and Behavior. 4 Units.
Covers theories and empirical research concerning the evolutionary origins of human behaviors and their variations. An interdisciplinary course emphasizing both evolutionary psychology (e.g., mating strategies, kinship, and parenting) and molecular evolution (i.e., evolution of genes for various behaviors).

Same as BIOCHEM 217.

Restriction: Graduate students only.

PSY BEH P272. Human Stress and the HPA Axis. 4 Units.
Introduction to a new and multidisciplinary research field investigating the interactions between the brain, hormones, and behavior. After an introduction to relevant neuroendocrine concepts, covers current research topics in the field including stress, memory, development, and psychopathology.

Restriction: Graduate students only.

PSY BEH P273. Biobehavioral Aspects of Health and Illness. 4 Units.
Examines the behavior-physiology interactions of some major bodily systems: the nervous, cardiovascular, gastrointestinal, and endocrine systems. Analysis of normal and abnormal states of these systems as they relate to tissue injury, disease, and rehabilitation.

Restriction: Graduate students only.

PSY BEH P274. The Psychobiology of Stress. 4 Units.
Introduction to stress physiology and psychoneuroimmunology and critical review of research in this area. Examines bi-directional relationships between psychological factors (e.g., stressors, social processes, emotions), neuroendocrine and immune systems, and disease.

Restriction: Graduate students only.
PSY BEH P275. Special Topics in Psychology and Social Behavior. 4 Units.
Topics covered vary with interests of instructor.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSY BEH P276. Meta Analysis. 4 Units.
The process of synthesizing results from a number of studies that address a common research question is often referred to as meta-analysis. This applied course explores the meta-analysis process from the coding of retrieved studies to the final research synthesis.
Restriction: Graduate students only.

PSY BEH P278. The Teaching of Psychology. 4 Units.
Provides students with the theory and skills needed to teach undergraduate psychology courses. Covers research on theories and methods of teaching, curriculum design, and evaluation. Students also gain practical experience preparing and presenting material.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology and Social Behavior graduate students only.

PSY BEH P290. Research in Developmental Psychology. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of developmental psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P291. Research in Health Psychology. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of health psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P292. Research in Psychopathology and Behavior Disorder. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of psychopathology and behavior disorder. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P293. Research in Social and Personality Psychology. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of social and personality psychology. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSY BEH P294A. Research Directions in Psychology and Social Behavior. 2 Units.
Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychology and Social Behavior. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
PSY BEH P294B. Research Directions in Psychology and Social Behavior. 2 Units.
Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychology and Social Behavior. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PSY BEH P294C. Research Directions in Psychology and Social Behavior. 2 Units.
Introduces students to the current research of faculty, graduate students, and visitors to the Department of Psychology and Social Behavior. Includes examination of contemporary research issues and controversies, as well as issues related to students' development as professionals.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

PSY BEH P295. Research in Psychology and Law. 4 Units.
Introduces graduate students to research conducted by individual faculty members in the area of psychology and law. This is accomplished by having students involve themselves in the conceptualization, strategy, and implementation of the faculty member's research.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PSY BEH P296. Doctoral Dissertation Research and Writing. 4-12 Units.
Dissertation research with Psychology and Social Behavior faculty.

Prerequisite: Advancement to candidacy.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PSY BEH P298. Directed Studies in Psychology and Social Behavior. 2-4 Units.
Directed study with Psychology and Social Behavior faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

PSY BEH P299. Independent Studies in Psychology and Social Behavior. 2-8 Units.
Independent research with Psychology and Social Behavior faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.
School of Social Sciences

William M. Maurer, Dean

Graduate Student Affairs: 949-824-4074
http://www.socsci.uci.edu/

Overview

Undergraduate and graduate education in the School of Social Sciences at UCI represents a commitment to modern social science. The classic subject areas of anthropology, economics, geography, linguistics, political science, psychology, and sociology are included in the school’s educational programs, and these programs go well beyond the traditional disciplines.

First, the faculty recognizes the value of systematic empirical observation and quantitative analysis in the study of human behavior. Developments in computer science and in mathematics oriented toward the problems of the social sciences, and the refinement of techniques for the observational, experimental, and statistical study of human behavior, have contributed major new elements to social science. Students in the School of Social Sciences will become familiar with the mathematical, computational, and statistical tools underlying modern social science.

Second, many of the most interesting questions in the study of human behavior cannot be fixed within the traditional disciplinary boundaries. Some of the new and evolving areas which cross orthodox boundaries are political sociology, public policy, cognitive anthropology, psycholinguistics and neuroeconomics. Therefore many courses and course modules are built around these interdisciplinary social science phenomena rather than representing social science disciplines.

Third, the school emphasizes the design of hypotheses and of systems of interrelated ideas as an essential part of scientific pursuit. Consequently, the educational programs place substantial emphasis on understanding social science phenomena through the development of theories that can be used to guide empirical studies.

Educational opportunities for students in the School of Social Sciences extend well beyond attendance at courses. Students may develop independent study proposals in cooperation with interested faculty members or may investigate social science applications via off-campus internships. They are invited to participate in the quarterly evaluation of courses and instructors, to propose new courses and other modifications in existing programs, to nominate candidates for visiting faculty appointments, and to serve on school committees. The school provides a variety of opportunities for faculty-student interaction, and students will find the faculty, administration, and academic counseling staff of the school highly accessible and responsive.

Special Facilities

The School of Social Sciences maintains several special facilities for research and education.

The Social Sciences Research Laboratory, used for both faculty and student research, occupies the entire fourth floor of the Social Sciences Laboratory Building. The facility contains 40 experiment and control rooms and several specialized facilities including a virtual reality facility and cognition laboratory.

Three Computer Laboratories provide access to networked systems, where students can work on assignments using full-featured word-processing, database, graphics, and statistical packages. In addition, these computers provide students with access to e-mail and Internet services. The Social Science Plaza facility contains state-of-the-art, high-tech lecture halls and is fully Internet accessible.

The Social Sciences Academic Resource Center (SSARC) was created over a decade ago to help School of Social Sciences students obtain the appropriate information to select a career and/or graduate school program, generate professional contacts, and learn how to gain a competitive edge during their undergraduate years. Centered around the five educational pillars (academics, research, practical experience, leadership, and community service), the SSARC offers valuable services, programming, and resources ranging from resume consultation, internship opportunities, and graduate school guidance, to research and leadership training. Through one-on-one consultations and various co-curricular programs, staff assist students with developing an educational blueprint that will ensure a quality educational experience while developing a strong educational portfolio and transforming each student into successful leaders within their chosen careers. Visit the Social Sciences Academic Resource Center (http://www.socsci.uci.edu/ssarc) website for more information.

Social Sciences Undergraduate Student Affairs (SSUSA) provides general and detailed information about UCI, the School of Social Sciences, and specific requirements exclusive to the majors and minors in the school to students, faculty, administrators, and the general public. SSUSA is fully staffed with academic counselors who speak one-on-one with students regarding their UCI academic career as well as opportunities beyond the classroom. There are also eight peer academic advisors available to undergraduates for walk-in advising regarding requirements and classes. Visit the Social Sciences Undergraduate Student Affairs (http://undergraduatestudies.ss.uci.edu/ugs_usa) website for more information.

The Experimental Social Science Laboratory, launched in fall 2011, is dedicated to experimental studies on individual and interactive decision making in the social sciences. The facility is available to researchers in all social science disciplines and can accommodate up to 40 research subjects at a
time for computer-based studies of human behavior. Researchers interested in using the facility, and students interested in participating in paid studies, should visit Experimental Social Science Laboratory (http://www.essl.ss.uci.edu) website or e-mail essl@ss.uci.edu.

The School of Social Sciences Anechoic Research Facility opened in fall 2011 as a shared school resource for use by all faculty who have an interest in auditory research. The facility includes a large (12.5' x 12.5' x 7') interior acoustically isolated RF-shielded chamber for free-field research and a second smaller RF-shielded steel booth for research using headphones. The facility has access to state-of-the-art equipment including a harmonizer, function generators, oscilloscopes, mixers/equalizers, amplifiers, ABR setup (auditory brainstem recording), and research-quality vocal microphones and headphones. To learn more about the facility, or to request time for use, visit the School of Social Sciences Anechoic Research Facility (http://faculty.sites.uci.edu/anechoic) website.

Centers for Research

The UC Irvine branch of the Census Research Data Center is a partnership between the School of Social Sciences and the U.S. Census Bureau. The on-campus site allows UCI researchers access to confidential Census data that is central to high quality research in economics, sociology, health services, public health, transportation, law, and business. With these data, researchers can link information about the policy environment at a detailed geographic level with micro level data on public health, transportation, labor, crime, education and other highly relevant public policy-oriented outcomes. The result? Studies that address pressing policy needs – like how crime impacts local businesses, or how educational attainment effects labor earnings at local and national levels. Data accessible through the center includes U.S. Census records as well as datasets from the National Institute of Health Statistics and Agency for Healthcare Research and Quality, and others. Learn more at Census Research Data Center (http://www.ccrdc.uci.edu) website.

The Center for the Advancement of Logic, its Philosophy, History and Applications (C-ALPHA) provides a formal structure that strengthens extant cross-disciplinary connections while fostering new ones. Modern logic is the science of valid inference. Not being restricted to any particular subject matter, it applies to all human endeavors that aspire to an understanding of rationality, the discovery of proofs, the assessment of evidence, or the establishing of truths - including the physical sciences, the formal sciences like mathematics and legal theory, as well as the social sciences, whether they follow quantitative or qualitative research paradigms. Learn more at the Center for the Advancement of Logic, its Philosophy, History and Applications (http://www.calpha.ss.uci.edu) website.

The Center for Asian Studies at the University of California, Irvine is comprised of more than 40 interdisciplinary faculty members who study China, Japan, Korea, India, and Southeast Asia and enhance the study of the many countries and cultures of Asia. Housed in the School of Social Sciences, the Center provides a forum for discussions across geographic and disciplinary boundaries both on campus and within the community. Learn more at the Center of Asian Studies (http://www.asian-studies.uci.edu) website.

The Center for Citizen Peacebuilding at UCI is a distinctive international clearinghouse for research, education, and action on public peace processes. The program focuses on how citizens participate in these activities to prevent violent conflict and, if violence occurs, to promote reconciliation, and sustainable peace. The purpose is to significantly contribute to the theory and practice of conflict resolution. Learn more at the Center for Citizen Peacebuilding (http://www.peacebuilding.uci.edu) website.

The Center for Cognitive Neuroscience and Engineering (CENCE) is a multidisciplinary research center aimed at understanding the relation between cognitive abilities and neural systems through brain imaging, brain mapping, computational modeling, informatics, and engineering techniques. The center's research focus is on cognitive neuroscience and engineering spans a wide range of methods involving human and animal work, and engineering techniques, such as BCI, BMI, biorobotics, computational neuroscience, neuroinformatics, neuromorphic engineering, neurorobotics, signal processing, image analysis, and mathematical models of brain data. Learn more at Center for Cognitive Neuroscience and Engineering (http://cence.ss.uci.edu) website.

The Center for Experimental Social Science (应用行为科学实验室) (EXLAB) at the School of Social Sciences, is a specialized research facility. Research conducted at the EXLAB is focused on understanding the behavior of human subjects in a controlled environment. The center's primary goal is to advance our understanding of human behavior and decision-making processes through the use of experimental methodologies.

The Center for Decision Analysis, located in the Institute for Mathematical Behavioral Sciences (IMBS) in the School of Social Sciences, is a specialized research center where the objective is to facilitate interaction and common research goals among scientists whose purpose is to formulate and test theories of human behavior. This is to be interpreted in a wide sense as manifested by the membership which spans the following areas: anthropology, cognitive science, economics, engineering, logic and philosophy of science, mathematics, political science, and sociology. Additional faculty come from management science and psychobiology. To describe the focus, consider the fruitful symbiotic relationship that has existed for millennia between mathematics and the physical sciences. A goal of IMBS is to generate a similar relationship between mathematics and the behavioral and social sciences. With high-power social scientists (several are members of the National Academy) providing insights about the field and working with the mathematicians who are involved, new mathematical approaches to analyze these issues are being developed and new kinds of mathematical questions are being raised. For more information, visit the Institute for Mathematical Behavioral Sciences (http://www.imbs.uci.edu) website.

The Center for Demographic and Social Analysis (C-DASA) advances population science by bridging academic units to identify common research interests and exchange new conceptual approaches and analytic methods. Serving 50 UCI faculty members in a dozen departments, as well as their graduate and postgraduate trainees, the Center is committed to research on the critical issues shaping the well-being of local, national, and global populations. Faculty affiliates are recognized for award-winning research, ranging from China's one-child policy to global influenza epidemics, from programs to raise school achievement to social networks that link local neighborhoods. C-DASA promotes innovative research by fostering multidisciplinary exchange, supporting collaboration, and building the advanced infrastructure essential for demographic research and training in the twenty-first century. For additional information, including upcoming seminars, visit the Center for Demographic and Social Analysis (http://www.socsci.uci.edu/cdasa) website.
Established in 2011, the Center for Economics & Public Policy (CEPP) seeks to improve analysis, formulation, and debate on economics-related public policy issues at the international, national, state, and local levels. CEPP brings economics-related public policy research—especially by UCI faculty and students—to policymakers, the public generally, and the UCI community; and strengthens the public policy focus of economics-related research at UCI. Based in the Department of Economics, CEPP provides a focal point for scholars in sociology, social ecology, business, education, law, and engineering who engage in economics-related public policy research. To create lasting impact, CEPP holds policy-related seminars for faculty and graduate students and increases UCI’s interaction with the policy community; increases student and faculty involvement in the new Master of Public Policy program; disseminates policy-related research of Center faculty to the media and the policy community through targeted studies, its Web site, and its network of policymakers; and organizes Universitywide events discussing current policy issues, involving Center faculty and high-profile public figures. CEPP also provides support for policy-oriented faculty and graduate student research. Learn more at the Center for Economic & Public Policy (http://www.economicsandpublicpolicy.uci.edu) website.

Established in 2006, the Center for Ethnography works to develop a series of sustained theoretical and methodological conversations about ethnographic research practices across the disciplines. It supports innovative collaborative ethnographic research as well as research on the theoretical and methodological refunctoning of ethnography for contemporary cultural, social, and technological transformations. Learn more at the Center for Ethnography (http://www.ethnography.uci.edu) website.

The Center for Global Peace and Conflict Studies (CGPACS) is a multidisciplinary research unit housed in the School of Social Sciences. The mission of CGPACS is to promote research on international problems and processes. Current research emphases include weapons of mass destruction, especially biological weapons; international governance, focusing on the evolution of international norms and institutions; citizen peace building; international environmental cooperation; and religion in international affairs. CGPACS also sponsors research conferences and public colloquia on topics of current significance. The Center’s Margolis Lecture brings to UCI high-profile speakers who have played active roles in international affairs. Recent Margolis Lectures have featured Justice Louise Arbour, former chief prosecutor for the International Criminal Tribunals; Chinese democracy activist Wei Jinseng; Congressman Christopher Cox; former Secretary of State Warren Christopher; and former Secretary of Defense William Perry. Visit the Center for Global Peace and Conflict Studies (http://www.cgpac.s.uci.edu) website for more information.

The Center for Language Science is a multidisciplinary, interactive research community aimed at understanding how language is organized in the human mind, how this system of knowledge is learned, how it is understood and expressed, and how it is represented and processed by the brain. This effort spans a wide range of scientific research areas, from basic and clinical hearing research to computational and psychological models of the structure and processing of linguistic knowledge to detailed neuroanatomical models hearing, comprehending, and speaking derived from advanced neuroimaging and clinical-based methods. Accordingly, Center faculty are drawn from several departments and schools at UCI including Cognitive Sciences, Psychology and Social Behavior, Anthropology, Computer Science, Logic and Philosophy of Science, Mathematics, Education, Humanities, Biological Sciences, and Medicine. The Center for Language Science has three specific aims: (1) to promote an integrated, multidisciplinary research program on language from the unique and diverse perspective afforded by UCI’s faculty; (2) to promote and guide training in the field of language science; and (3) to inform and guide the development of new clinical applications for hearing, speech, and language disorders that impact millions of people worldwide. Learn more at the Center for Language Science (http://www.languagescience.ss.uci.edu) website.

The purpose of the UCI Center for Research on Immigration, Population, and Public Policy is to foster and conduct basic and policy-relevant research on international migration and other population processes, with a main focus on U.S. immigration. In order to encourage multi-investigator, multidisciplinary, and interdisciplinary research projects, the Center organizes informal discussions of ideas for future research projects, “brainstorming” sessions about research funding opportunities, “brown-bag” presentations of research findings, and workshops and conferences. Much of the Center’s research focuses on the multigenerational incorporation experiences of immigrant groups in the United States, especially those occurring in diverse contexts such as Southern California. Investigations of this type often devote as much attention to what happens to the children and grandchildren of immigrants as to what happens to immigrants themselves. For more information, visit the UCI Center for Research on Immigration, Population, and Public Policy (http://immigrationresearch.uci.edu) website.

The Center for the Study of Democracy (CSD) continues the work of the UCI Focused Research Program on Democratization that was founded in 1991 and sponsors research and training on the process of democratic transition and the expansion of the democratic process in already established democracies. CSD includes a multidisciplinary faculty from four UC campuses. CSD’s activities are focused on three areas. First, faculty administer a graduate training program on empirical democratic theory. The National Science Foundation selected UCI in 1995 as a national center for the training of doctoral students in democratization issues; the five-year NSF grant provides funding for graduate fellowships and other training activities. Second, the democracy research program aims at improving the democratic process in the United States and other established democracies as we enter the next century. The program focuses on reforms to increase the ability of citizens to express their preferences and have these preferences represented within the democratic process. Third, CSD supports research on the development of sustainable democracies in Eastern Europe, East Asia, and other new democracies. The New Democracies Initiative contributes to the promotion of democracy in these formerly authoritarian systems. For more information visit the Center for the Study of Democracy (http://www.democracy.uci.edu) website.

The Institute for International, Global and Regional Studies (IGARS) was created to be a hub for research and teaching at UCI on the interactions of politics, economics, societies, cultures, and history in global and international affairs. It provides a calendar of events, hosts the bi-weekly International Studies Public Forum and monthly research seminars, collaborates with over 17 other campus centers, and promotes seed funding for collaborative research activities on international and global issues. Faculty associated with IGARS participate in the international studies undergraduate major and honors program and the minor in conflict resolution. Learn more at the Institute for International, Global and Regional Studies (http://internationalstudies.ss.uci.edu) website.
The Institute for Money, Technology and Financial Inclusion (IMTFI) was formed in 2008. Its mission is to support research on money and technology among the world’s poorest people: those who live on less than $1 per day. IMTFI seeks to create a community of practice and inquiry into the everyday uses and meanings of money, as well as the technological infrastructures being developed as carriers of mainstream and alternative currencies worldwide. Learn more at the Institute for Money, Technology and Financial Inclusion (http://www.imtfi.uci.edu) website.

The Intel Science and Technology Center (ISTC) for Social Computing was founded to conduct foundational research into the relationship between information technology and society. Centered at UCI, it brings together an interdisciplinary group of researchers from leading universities across the United States, including experts in social media, digital culture, user interfaces, cultural computing, and participatory design. Learn more at the Intel Science and Technology Center for Social Computing (http://socialcomputing.uci.edu) website.

The UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality was established in 2003 by a group of scholars interested in recent scientific research that yields insight on the origins and causes of morality. In creating the center, UCI faculty both address a topic that is becoming one of the new frontiers in science and reflect critically on the moral implications of this new frontier. The center focuses on the etiology of ethical behavior and differs in several important ways from existing centers dedicated to the discussion of ethics. Traditional academic approaches tend to originate in philosophical, foundational, or religious discussions of ethics. They tend to be humanistic in orientation and emphasize abstract, theoretical considerations of what constitutes ethics and morality. The center complements this traditional approach and explores the scientific and/or the empirically verifiable factors that influence morality, using a variety of methodologies that examine factors contributing to and driving moral action in a variety of social, psychological, and biological contexts. The center encourages ties between scholars interested in ethics in humanities and the sciences—including social science, social ecology, biological sciences, and medicine—building on the interdisciplinary tradition at UCI, complementing, rather than duplicating, existing efforts. Visit UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality (http://www.ethicscenter.uci.edu) website for more information.

Within the Ph.D. in Social Science is an optional concentration in Mathematical Behavioral Sciences, supervised by an interdisciplinary group of faculty.

Within the M.A. in Social Science, students may apply directly to the concentration in Demographic and Social Analysis. For those enrolled in a Ph.D. program at another institution, the M.A. concentration in Mathematical Behavioral Sciences is available. A concentration in Medicine, Science, and Technology Studies is available within the M.A. in Social Science.

<sup>1</sup> Jointly administered by the Department of Philosophy in the School of Humanities.

<sup>2</sup> Jointly administered by the School of Social Ecology.

<sup>3</sup> Admission to this program is no longer available.

**Honors**

Graduation with Honors. No more than 12 percent of the graduating seniors, who have completed at least 72 units in the University of California will receive honors: approximately 1 percent summa cum laude, 3 percent magna cum laude, and 8 percent cum laude. The student’s cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. To be eligible for consideration for honors at graduation, the student must, before the end of winter quarter of the senior year, have submitted an Application for Graduation; be officially declared as a major within the School of Social Sciences; have all corrections to the academic record processed by the Registrar’s Office; if completing the Language Other Than English general education requirement with a language exemption test, pass the test by the end of winter quarter; and be able to verify completion of all course work by the end of the spring quarter of the senior year. Other factors are listed in the Honors Recognition (http://catalogue.uci.edu/informationforadmittedstudents/academicadvisingandhonors/#honorsopportunitiestext) section.
Dean’s Honor List. The quarterly Dean’s Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

Departmental Honors Programs. Most departments in the School of Social Sciences offer an honors program (refer to the departmental information). Upon successful completion of the honors program, students graduate with honors in their respective majors and their transcripts note that they were in the honors program.

Honor Societies. Several departments in the School of Social Sciences belong to a national honor society. Eligibility is based on satisfying the requirements of the specific honor society. In the School of Social Sciences, these national honor societies include Lambda Alpha Kappa (Anthropology), Omicron Delta Epsilon (Economics), Pi Omicron of Pi Sigma Alpha (Political Science), Psi Chi (Psychology), Pi Gamma Mu (Social Sciences), Sigma Iota Rho (International Studies), and Alpha Kappa Delta (Sociology).

Order of Merit. The Dean of the School of Social Sciences’ Order of Merit award recognizes the most outstanding graduating undergraduates and graduate students for their academic achievements, contributions to the School, and service to the campus and community.

Kathy Alberti Award for Graduate Student Excellence. This award recognizes a graduate student who holds truly outstanding promise as a future professor or teacher.

Alumni Academic Excellence Scholarship. This scholarship recognizes an undergraduate for outstanding academic performance and service to the School, campus, and community.

The Ruth Fulton Benedict Prize. This prize recognizes outstanding writing in anthropology by an undergraduate.

Steve Borowski Scholarship. This scholarship is awarded to an exemplary School of Social Sciences student athlete. The award winner is selected from among a pool of Social Sciences student athletes based on academic merit and extracurricular involvement. Coaches may also nominate outstanding Social Sciences student athletes. Athletes interested in being considered should contact their coaches. Administered by Athletics. Award varies.

The Boukai Family Foundation Middle East Studies Student Initiative Research Award. This award recognizes MESSI students for academic excellence. Applicants must be full-time MESSI students with a 3.0 GPA or higher.

James N. Danziger Award for Teaching Excellence. This award recognizes a Political Science graduate student who has advanced to candidacy for teaching excellence.

David Easton Award. This award is given for the outstanding qualifying paper written by a Political Science graduate student during the preceding academic year.

Harry Eckstein Award for the Outstanding Undergraduate Honors Thesis. This award is given annually for the best honors thesis written by a Political Science major.

Harry Eckstein Memorial Fund. The Harry Eckstein Memorial Fund is presented annually to Political Science graduate students conducting research toward the completion of the Ph.D. in Political Science at UCI. Recipients of the award are designated as Eckstein Scholars.

Jean-Claude Falmagne Research Award. This award is given to a Cognitive Sciences graduate student who has advanced to candidacy for the Ph.D. The award is to support the student’s summer research activity.

Jeff Garcilazo Scholarship. This award, established in honor and memory of the late Chicano/Latino Studies and History professor Jeff Garcilazo, is awarded annually to the undergraduate student author(s) of the best research paper(s) in Chicano/Latino Studies, to provide opportunities for students to examine the historical and contemporary experiences of Latino communities.

Sheen T. Kassouf Endowed Fellowship. The fellowship is awarded to a student enrolled in the UCI Economics doctoral program. Graduate students in all areas of economics are eligible, with the major criteria for the award being excellence in course work and research.

The Justine Lambert Prize in Foundations of Science. This award is given every other year to the best submitted graduate paper on the foundations of logic, mathematics, and the empirical sciences. The competition is open to all graduate students at UCI, regardless of department or school affiliation.

Charles A. Lave Paper Prize for Creative Modeling in Social Sciences. The prize is awarded to any UCI undergraduate or graduate student and may be in any social or behavioral science discipline, or interdisciplinary. It may be qualitative (with words only) or quantitative (with mathematical expressions). The prize will be awarded to a paper that displays creative modeling; points to or includes data that permits model evaluation; and exhibits the clear writing and brevity that Charles Lave valued.

Alice B. Macy Outstanding Undergraduate Paper Award. This award is given to a Social Sciences undergraduate student in any discipline for a paper that demonstrates original research.

The Malinowski Prize for Undergraduate Research. This award recognizes outstanding original research in the area of anthropology.
Thomas W. McGillin Scholarship. This scholarship is given to an undergraduate who is a first-generation citizen of this country with at least one foreign-born parent.

Outstanding Legal Scholar Scholarship. This scholarship is given to an undergraduate who has achieved outstanding academic achievement as well as contributing to the UCI Law Forum program.

Outstanding Transfer Student Scholarship. This scholarship is given to an outstanding community college transfer student in the School of Social Sciences.

Sanli Pastore & Hill, Inc. Excellence in Economics Writing Award. The Institute for Mathematical Behavioral Sciences (IMBS) awards this paper prize for the top graduate student paper in economics or decision analysis. Students who have written papers in game theory, economic theory, mathematical economics, decision analysis, and related areas are encouraged to submit them for consideration.

Jack and Suzie Peltason Scholarship. This award is given at the discretion of the department chair to support and facilitate the education of undergraduate Political Science majors. All undergraduate political science majors are eligible to apply.

Pi Omicron Award for Outstanding Political Science Major. This award is given annually by UCI’s Pi Omicron Chapter of Pi Sigma Alpha to a graduating senior Political Science major who best exemplifies a commitment to academic excellence and public service.

A. Kimball Romney Outstanding Graduate Paper Award. This award is given to a Social Sciences graduate student in any discipline for a paper that demonstrates original research.

David and Kristen Rosten International and Community Service Scholarship. This scholarship is awarded to an undergraduate who is planning a career in public service in either the domestic or international community.

Vicki Ruiz Award. This award is given to graduating seniors in Chicano/Latino Studies who have achieved scholarly excellence and service. Nomination by faculty in the Department of Chicano/Latino Studies is required for this award.

Elena B. and William R. Schonfeld Scholarship. This scholarship is awarded annually in the School of Social Sciences to the outstanding undergraduate who combines excellence in scholarship with dedication to the University community and the highest level of achievement in other fields. The award is available to students with one year remaining prior to graduation.

School of Social Sciences Outstanding Graduate Scholarship Award. This award is for high intellectual achievement by a Social Sciences graduate student.

School of Social Sciences Outstanding Graduate Student Service Award. This award is for contributions to the Social Science community, including the intellectual growth of others.

School of Social Sciences Outstanding Undergraduate Honors Thesis Award. This award is for the outstanding undergraduate honors thesis.

School of Social Sciences Student Athlete Award. This award is given to a Social Sciences student who has demonstrated outstanding academic achievement as well as significant contributions to the UCI Athletics Department.

Gary Singer Scholar Athlete Award. This award is for a student athlete who has outstanding academic achievement as well as contributions to their sport.

Robin M. Williams Award. This award is given to an undergraduate student and a graduate student for the best research paper in the field of sociology.

John I. Yellot Scholar Award. This award is given to a Cognitive Sciences graduate student who has not yet advanced to candidacy for the Ph.D. The award is to support the student’s summer research activity.

Community Outreach

The Ambassador’s Council has been created to promote and enrich the school by supporting new and existing school-wide/department projects. It collectively acts as an official student in discussing program development with administrators and department chairs and other faculty.

Global Connect is a university led curriculum program through which UCI social sciences faculty, undergraduate and graduate students bring their knowledge of international issues into high school classrooms in order to better prepare students to become informed global citizens. UCI faculty and students develop global issue-focused lesson plans on topics such as UN millennium development goals, mass media and technology, and the purpose of NGOs – areas of study in which UCI experts are known internationally, but subjects which are not part of the current California state education standards. Lessons are team-taught by UCI students and faculty alongside high school educators in Newport Mesa and Saddleback School Districts. The real-time course content, updated annually, reflects the continually changing global landscape while bringing new and updated university research directly to high school teachers - a challenge that traditional textbook publishing schedules are unable to keep up with.

HABLA is a broad-spectrum Latino-focused educational outreach program based in the School of Social Sciences and created by Professor Virginia Mann in 2000 with the support of the Orange County Children and Families Commission. Its purpose is to increase the school readiness of
disadvantaged children ages two–four years, by uniting faculty and students at UCI with the Santa Ana Unified School System, local Families Resource Center, AmeriCorps/VISTA, FACT, and the national Parent Child Home Program (PCHP).

Jumpstart was established on the UCI campus by Professor Virginia Mann in 2003. Students involved as Jumpstart members are paired with children participating in pre-school programs in the local Orange County area. The purpose is to help young students develop language, literacy, and social skills. Social Sciences undergraduates usually serve with Jumpstart for a full school year. The UCI Jumpstart program recruits, trains, and supervises UCI students to work with Head Start and other early-childhood programs in low-income communities of Orange County.

The School of Social Sciences’ Summer Academic Enrichment Program (SAEP) is an intensive, five-week on-campus residential program. It is designed to enhance the academic experience of first-generation, low-income university students. SAEP is a landmark program on the University of California, Irvine campus and represents a successful model to offer a rigorous research experience. Three courses in research methods, statistical analysis, and writing and communications are taught by UC Irvine faculty. SAEP’s goal is to strengthen specific analytical and research skills and to prepare participants for graduate school.

- School Requirements (p. 1561)

Undergraduate Program

Planning a Program of Study

Since there are many alternative ways to plan a program, some of which may require careful attention to specific major requirements, students should consult with the School of Social Sciences Undergraduate Student Affairs to design an appropriate program of study.

Students who select one of the School majors in their freshman year might begin by taking the one-digit courses required by their major and one of the mathematics sequences listed under Part A of the School requirements. It is a good idea to take these courses early since they include fundamental concepts that will be widely applicable in more advanced courses. In addition, the lower-division writing requirement of the general education requirement (category I) should be completed during the first year. In the sophomore year, the student might complete the course on computing, three courses toward the general education requirement, four courses in the social sciences, and four electives. Students who are planning to go on to graduate school can use their freshman and sophomore years to advantage by taking courses in theory, research methods, mathematics, and other areas important to graduate study. In the junior and senior years, the student should take courses in the major area and should create an individualized program of study through a combination of courses and course modules which fall in an area of interest. Particular attention should be paid to planning a program of study that will ensure that major requirements are met prior to graduation.

Change of Major. Students who wish to change their major to one offered by the school should contact the Social Sciences Undergraduate Student Affairs Office for information about change-of-major requirements, procedures, and policies. Information is also available at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website.

Double Majors within Social Sciences

In fulfilling degree requirements for multiple majors, a maximum of two lower-division courses may overlap between any two majors.

Other Double Majors

In fulfilling degree requirements for multiple majors, a maximum of two courses may overlap between any two majors. For students pursuing a major in Psychology and Social Behavior, a total of three courses (PSYCH 9A- PSYCH 9B-PSYCH 9C, same as PSY BEH 11A-PSY BEH 11B-PSY BEH 11C) may be overlapped.

Mathematics and Social Sciences

The mathematics requirement stems from the nature of modern social science. The concepts and terms of mathematics, statistics, and computers are an important part of the social scientist’s vocabulary. Basic knowledge of these tools is necessary to an understanding of current literature in the social sciences, to the analysis of data, and to an intelligent use of social science models. Each candidate for a degree in the School of Social Sciences is expected to have a basic knowledge of probability, statistics, and computing. In addition, for students who are preparing for graduate school in an area of social science, it will be important to supplement the minimal mathematics requirements with additional courses related to mathematics and social science methodology. The particular courses which would be recommended are not specified here, however, since they are highly dependent on the major emphasis of the student. Students who are preparing for graduate study should consult their advisors to determine a program of study which will give them the research skills necessary for successful graduate work.

Requirements for the Bachelor’s Degree

All students must meet the University Requirements (p. 71).

School Requirements

1. Familiarity with basic mathematical, computational, and statistical tools underlying modern social sciences. This requirement is met by passing a three-course sequence in mathematics selected from the following: ANTHRO 10A-ANTHRO 10B-ANTHRO 10C; MATH 2A-MATH 2B and either STATS 7 or MGMT 7 or PUBHLTH 7; PSYCH 10A-PSYCH 10B-PSYCH 10C; SOC SCI 10A-SOC SCI 10B-SOC SCI 10C; or SOCIOL 10A-SO CIOL 10B-SO CIOL 10C. (NOTE: School of Social Sciences majors may not take SOC SCI 9A-B-C to fulfill the mathematics requirement.) Computer education is essential for a complete social science education. This requirement can be satisfied by passing I&C SCI 31, PSYCH 114M,
or SOC SCI 3A. Departments may have preferences for specific courses. Students should see their major department for acceptable courses. This course requirement should be taken during the student’s first year.

2. An understanding of the fundamental concepts, analytical tools, and methods of social science. This requirement is met by taking two four-unit introductory courses in the School of Social Sciences bearing a one-digit course number. (Such courses include ANTHRO 2A, ANTHRO 2B, ANTHRO 2C, ANTHRO 2D, ECON 1, LINGUIS 3, POL SCI 6A, POL SCI 6B, POL SCI 6C, PSYCH 7A, SOC SCI 1A, SOC SCI 5A, SOC SCI 5B, SOC SCI 5D, SOCIOL 1, SOCIOL 2, SOCIOL 3). These courses normally should be taken during the student’s first year. (NOTE: This requirement may be fulfilled by option B of the departmental requirements for students majoring in Political Science as well as the major requirements in Sociology). For students majoring in Cognitive Sciences, the requirements are waived due to the academic rigor of the B.S. curriculum.

3. An understanding of important advanced areas in social science. This requirement is met by passing satisfactorily nine four-unit upper-division courses in the School of Social Sciences, where at least three of these courses comprise core courses or a module. (NOTE: The major in Social Science requires 11 four-unit upper-division courses.) For modules which are listed with more than three courses, the student may normally elect to take any subset of three courses in the module. Appropriate substitutions may be made upon petition.

4. Four additional four-unit social science courses from any level.

5. No more than two courses numbered 198-199 may be used towards a degree requirement (excluding majors in the Department of Cognitive Sciences and Economics which allow three such numbered courses).

Students are reminded that the Pass/Not Pass option is not applicable to course requirements 1 through 4 above or to any additional requirements listed for specific major programs. However, I&C SCI 31 is an exception to this rule and may be taken Pass/Not Pass.

Courses used to meet requirements 2 through 5 above are included in the computation of the grade point average in courses required in the major program.

**Maximum Overlap Between Major and Minor Requirements:** Students completing both a major and a minor within the School of Social Sciences may count courses taken to fulfill the School’s mathematics and computer science requirement toward satisfaction of both the major and the minor. No other course overlap is allowed. For students completing a major within the School of Social Sciences and a minor outside of the School of Social Sciences, a maximum of two courses may overlap between a major and a minor. For students pursuing a minor in Mathematics, Psychology and Social Behavior, or Statistics, a total of three courses may overlap. No course overlap is permitted between minors.

**Transfer Study Recommendations**

The School recommends that students wishing to transfer to UCI do the following:

1. Complete the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer to UCI.

2. Refer to the ASSIST (http://www.assist.org/web-assist/welcome.html) website for information about community college courses that will fulfill UCI lower-division major requirements.

Specific course recommendations:

Prospective **Economics majors:** complete the equivalent of UCI’s MATH 4 at a community college (in addition to the courses required for transfer-student admission; see the Department of Economics section).

Prospective **International Studies majors:** complete two semesters of foreign language at the intermediate level.

Prospective **Psychology majors:** complete a three-course sequence in introductory, physiological, and either social or abnormal psychology.

**Transfer Students**

**Freshmen and Sophomores:** Students transferring to UCI as freshmen or sophomores will fulfill the regular requirements of the four-year program either through work at UCI or through transfer credit for comparable work elsewhere.

**Juniors:** Following review by the School of Social Sciences, it may be determined that junior transfer students electing to major in one of the School’s degree programs, who have good records at other accredited colleges and universities, have satisfied School requirement 2 and the University requirements. However, all transfer students must fulfill the upper-division writing general education requirement (category I) while at UCI. Students anticipating transfer to UCI in their junior year should plan their curriculum so as to anticipate the special mathematics requirement (School requirement 1). Every effort will be made to accommodate individual variation in background, provided students are prepared to commit themselves to intensive work in areas of deficiency. Ordinarily, the typical two-year program for junior transfers is simply the last two years of the regular four-year program, except that students who have not satisfied the mathematics requirements of the School should plan to do so in the junior year and must do so before graduation.

**Seniors:** Students wishing to graduate with a degree in the School by transferring to UCI in their senior year should plan their work carefully to ensure that the requirements can be met in one year of residence. In general, differences between the program at UCI and programs elsewhere make senior transfers difficult.
Service Learning, Community Service, and Internships

Service learning is a meaningful educational activity that integrates community service within the curriculum. It is an opportunity for students to make positive contributions to underserved and marginalized communities through academic courses, field studies, and internships.

Service learning provides out-of-class experiences to reinforce understanding of academic theory while addressing serious community concerns. When combined with a structured curriculum that includes research components, students can explore the role of the social scientist while seeking solutions to problems affecting society. The School of Social Sciences' philosophy is to practice research, service, and good citizenship.

The School actively supports service learning through its philosophy of enhancing the learning process by motivating, inspiring, and teaching students how to recognize and accept their civic responsibilities. The goal is to educate students about social issues and provide them with the necessary tools to solve the difficult problems society faces. Under the guidance and supervision of faculty and staff, students are offered the opportunity to experience personal, professional, social, and intellectual growth through the following School of Social Sciences programs: public- and private-sector internships, community service, field studies, and the major in Social Policy and Public Service.

Undergraduate Programs in K–12 Education

Undergraduate students who wish to pursue a career in the field of K–12 education are well-served in the School of Social Sciences and the School of Education. The following interrelated programs provide opportunities for students to gain knowledge and experience in this important area.

Minor in Educational Studies

The minor in Educational Studies allows students to explore a broad range of issues in the field of education and provides a strong foundation for K-12 teaching. Both introductory and advanced courses are included, giving students a solid preparation for later teacher credential programs and many related occupations. NOTE: A Statement of Intent is required of all students wishing to enroll in this minor. See the School of Education (p. 414) section of the Catalogue for more information.

School of Education Programs

The School of Education provides many other opportunities for prospective educators, including a mentoring program which provides students with valuable experience while they work with credentialed teachers; UC Links, a program in which undergraduates tutor K–8 students in after-school settings; and advising services provided by counselors who assist students in planning future careers in education. Further information about these programs is available from the School of Education counselors at 2001 Berkeley Place.

Students interested in obtaining a teaching credential should see the School of Education (p. 414) section of the Catalogue for information.

Special Programs

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; or visit the Campuswide Honors Program (http://www.honors.uci.edu) website.

UC Education Abroad Program

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (EAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Visit the Study Abroad Center (http://www.studyabroad.uci.edu) website for additional information.

Interdisciplinary Minors

A variety of interdisciplinary minors are available to all UCI students. The minor in Chicano/Latino Studies, offered by the School of Social Sciences, is designed to provide an awareness, knowledge, and appreciation of the language, history, culture, literature, sociology, anthropology, politics, social ecology, health, medicine, and creative (art, dance, film, drama, music) accomplishments of Chicano/Latino communities.

The minor in Conflict Resolution, sponsored by the International Studies program in the School of Social Sciences, provides skills in conflict analysis and resolution and a useful understanding of integrative institutions at the local, regional, and international levels. The curriculum includes training that students may apply toward State of California certification as a mediator.

Information about the following minors is available in the Interdisciplinary Studies (p. 1081) section of the Catalogue.

The minor in Civic and Community Engagement seeks to provide students with the knowledge, skills, attitudes, and values to engage as citizens and active community members in the twenty-first century. The minor is distinguished both by what students learn, and by how they learn it.

The minor in Global Sustainability trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet.
The minor in the History and Philosophy of Science explores how science is actually done and how it has influenced history, and is concerned with determining what science and mathematics are, accounting for their apparent successes, and resolving problems of philosophical interest that arise in the sciences.

The minor in Native American Studies focuses on history, culture, religion, and the environment. The three core courses serve as an introduction to the Native American experience from the perspective of different historical periods and frameworks of analysis.

Information about the following interdisciplinary minors is available in the School of Humanities section.

The minor in African American Studies offers undergraduate students an opportunity to study those societies and cultures established by the people of the African diaspora and to investigate the African American experience from a variety of disciplinary perspectives and theoretical approaches.

The minor in Archaeology introduces students to modern archaeological theory and practice, to different approaches and theoretical frameworks used in the reconstruction of cultures based on their material remains, and the use of such approaches and frameworks in a comparative context that emphasizes one geographic area.

The minor in Asian American Studies examines the historical and contemporary experiences of Asians after their arrival in the United States and seeks to provide an awareness of the history, culture (e.g., literary and creative art accomplishments), psychology, and social organization of Asian American communities.

The minor in Asian Studies creates opportunities for students to explore Asian topics in a variety of fields, to develop advanced language skills, and to acquire broader perspectives.

The minor in Latin American Studies is designed to develop in students an awareness, knowledge, and appreciation of Latin American issues in the areas of language, history, culture, literary studies, sociology, anthropology, political science, health, folk medicine, and creative (art, dance, film, drama, music) accomplishments.

The minor in Religious Studies focuses on the comparative study of religions in various cultural settings around the world and seeks to provide a wide-ranging academic understanding and knowledge of the religious experience in society.

The minor in Gender and Sexuality Studies fosters critical and creative analysis of the various disciplinary perspectives—historical, political, economic, representational, technological, and scientific—that have (or have not) constituted women, gender, and sexuality as objects of study.

Department of Gender and Sexuality Studies also offers a minor in Queer Studies.

**Careers in Social Sciences**

Business and industry often look to social science graduates to fill positions in management, finance, marketing and advertising, personnel, production supervision, and general administration. In the public sector, a wide variety of opportunities are available in city, county, state, and federal government. Teaching is a frequently chosen career at all levels from elementary school teacher to professor. In addition, many graduates enter professional practice, becoming lawyers, psychologists, researchers, or consultants in various fields.

Because all degrees offered by the School of Social Sciences involve an educational program that is interdisciplinary and that prepares students to understand quantitative methods of data analysis, graduates are well-positioned for research and analysis careers at all levels of government and in private firms. Their solid grounding in contemporary social science methods and their familiarity with a broad spectrum of social scientific thinking gives them an excellent foundation for the pursuit of further training in graduate and professional programs.

The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. Additional information is available in the Career Center section.

**Graduate Program**

The School of Social Sciences offers graduate training in the following areas: Anthropology (Ph.D. in Anthropology), Cognitive Sciences (Ph.D. in Psychology), Economics (Ph.D. in Economics), Logic and Philosophy of Science (Ph.D. in Philosophy), Mathematical Behavioral Sciences (Ph.D. in Social Science), Politics and Society (Ph.D. in Political Science), and Sociology (Ph.D. in Sociology). In addition, an interdisciplinary concentration in Public Choice is offered within the programs in Economics and Political Science, a concentration in Cognitive Neuroscience is offered within the program in Cognitive Sciences, a specialized concentration in Transportation Economics is offered within the program in Economics, an emphasis in Social Networks is offered within the Mathematical Behavioral Sciences concentration, and a concentration in Political Psychology is offered within the program in Political Science. When an applicant’s interests lie outside of or across these areas, the Associate Dean of Graduate Studies, School of Social Sciences, may, on rare occasions, appoint a three-member faculty committee to guide an independent course of study for the Ph.D. degree in Social Science.

The M.A. degree in Anthropology, Economics, Philosophy, Political Science, Psychology, Social Science, or Sociology may be conferred upon students in Ph.D. programs after completion of the necessary requirements.

Additionally, the M.A. degree program in Social Science with a concentration in Demographic and Social Analysis is supervised by faculty from the Schools of Social Sciences and Social Ecology. Students may apply directly to this M.A. program.
A concentration in Medicine, Science, and Technology Studies is available within the M.A. degree in Social Science.

A Master of Public Policy (M.P.P.) program (p. 1565) is also available and is jointly supervised by faculty from the Schools of Social Sciences and Social Ecology. Students may apply directly to this program.

In cooperation with the UCI School of Education, students enrolled in a School of Social Sciences graduate program may choose to pursue a teaching credential while working toward their degree. After completion of requirements for an M.A. degree, students may apply for admission into the credential program administered by the School of Education. As required by law, the applicant must pass the California Basic Educational Skills Test (CBEST), obtain a Certification of Clearance, and successfully complete the appropriate subject area examination or an approved subject-matter program. A detailed description of the program may be obtained from the Social Sciences Graduate Office or the School of Education.

**Admission**

Potential graduate students should apply by January 15 to receive fullest consideration for financial aid. Applicants should indicate the title of the degree sought (Anthropology, Economics, Political Science, Psychology, or Social Science), and the academic area of concentration (see above). All applicants are required to submit Graduate Record Examination General Test scores. Letters of recommendation and the applicant’s statement of interest are important factors in the admission decision.

In addition to the University admission requirements described in the Graduate Division section, individual graduate programs may prescribe special requirements or expectations of applicants, subject to the approval of the Graduate Council. Such requirements are minimum standards only; successful applicants typically must exceed them by a substantial margin.

**Financial Support**

Many students receive financial support in the form of fellowships, teaching assistantships, or research assistantships available under grants to individual faculty. Before accepting an offer of admission with financial support for the first year, applicants should inquire about the likelihood of such support in future years. Occasionally, a newly admitted student may receive a multiyear commitment of some specified financial support, but this is not the rule. Students are also advised to seek aid from sources external to the University. NOTE: Teaching assistantships do not include remission of fees, tuition, or nonresident supplemental tuition.

**Length of Study and Residence**

The normative time for completion of the Ph.D. degree is either five, six, or seven years, depending upon the specific program. See the department sections for information.

Students admitted to the M.A. concentration in Demographic and Social Analysis should be able to earn the M.A. within one to two years.

Because the intellectual training offered by the School requires full-time study and constant contact with the faculty, the School does not accept part-time students.

**Master of Public Policy**

The Master of Public Policy (M.P.P.) program is a two-year professional degree program administered by both the School of Social Ecology and the School of Social Sciences. Students are required to complete 72 units of graduate courses. In the first year, students will attend an introductory conference, participate in a workshop, and take seven core courses and two elective courses. In the summer after the first year, students will participate in a policy-relevant internship in an appropriate government, business, or nonprofit setting. In the second year, students take three core courses and five elective courses.

The core course requirements in year one of the program are Qualitative Methods and Public Policy, Statistical Methods for Public Policy, Information and the Policy Process, Microeconomics and Public Policy, Policy Processes and Institutions of Governance, Collaborative Governance and Public Management, and Social Mobilization, Power, and Justice. The core course requirements in year two are The Economics of Government, Policy and Ethics, and Capstone Research Project and Briefing.

Additional information is available at the Master of Public Policy (http://mpp.web.uci.edu) website.

**Faculty**

Neerja Aggarwal, Ph.D. University of California, Irvine, Lecturer of Economics

Nurudeen O. Alao, Ph.D. Northwestern University, Lecturer of Social Sciences; International Studies

Edwin Amenta, Ph.D. University of Chicago, Professor of Sociology; Political Science (political sociology, historical and comparative sociology, social movements, social policy)

Mohammad Amjad, Ph.D. University of California, Riverside, Lecturer of Political Science

Olufunmilayo B. Arewa, J.D. Harvard University, Professor of School of Law; Anthropology
Jacob P. Avery, Ph.D. University of Pennsylvania, Assistant Professor of Sociology (poverty and inequality, culture and interaction, city and community, human service organizations, sociology of knowledge, ethnography)

Francisco J. Ayala, Ph.D. Columbia University, Donald Bren Professor and University Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Stephen D. Bach, Ph.D. University of California, Irvine, Lecturer of International Studies; Engineering

Stanley Bailey, Ph.D. University of California, Los Angeles, Associate Professor of Sociology (race and ethnicity, religion, immigration, Latin America)

Nina Bandelj, Ph.D. Princeton University, Associate Professor of Sociology; European Languages and Studies (economic sociology, culture, organizations, social networks, political economy, globalization, social change, central and eastern Europe)

Jeffrey A. Barrett, Ph.D. Columbia University, Professor of Logic and Philosophy of Science; Philosophy

William H. Batchelder, Ph.D. Stanford University, Professor of Cognitive Sciences

Frank D. Bean, Ph.D. Duke University, UCI Chancellor's Professor of Sociology; Economics (international migration, demography, racial and ethnic relations, economic sociology, family)

Christine Beckman, Ph.D. Stanford University, Associate Professor of Paul Merage School of Business; Sociology

Matthew N. Beckmann, Ph.D. University of Michigan, Associate Professor of Political Science

D. Bell, Ph.D. University of California, Berkeley, Professor Emeritus of Economics

Bruce G. Berg, Ph.D. Indiana University, Associate Professor of Cognitive Sciences

Victoria Bernal, Ph.D. Northwestern University, Associate Professor of Anthropology; Culture and Theory

Susan C. Bibler Coutin, Ph.D. Stanford University, Associate Dean of the Graduate Division and Professor of Criminology, Law and Society; Anthropology; Culture and Theory (law, culture, immigration, human rights, citizenship, political activism, Central America)

Marianne Bitler, Ph.D. Massachusetts Institute of Technology, UCI Chancellor's Fellow and Professor of Economics; Education

Thomas D. Boellstorff, Ph.D. Stanford University, Professor of Anthropology; Culture and Theory (virtual worlds, sexuality, postcoloniality, HIV/AIDS, mass media and popular culture, language and culture, Indonesia, Southeast Asia)

Daniel E. Bogart, Ph.D. University of California, Los Angeles, Associate Professor of Economics

Catherine I. Bolzendahl, Ph.D. Indiana University, Associate Professor of Sociology (gender, the welfare state, political sociology, comparative sociology, family, quantitative methodology)

Graeme T. Boushey, Ph.D. Carnegie Mellon University, Assistant Professor of Sociology

Geoffrey C. Bowker, Ph.D. University of Melbourne, Professor of Informatics; Anthropology (values in design, social studies of databases, science and technology studies)

John P. Boyd, Ph.D. University of Michigan, Professor Emeritus of Anthropology

William A. Branch, Ph.D. University of Oregon, UCI Chancellor's Fellow and Professor of Economics

Alyssa Brewer, Ph.D. Stanford University, Assistant Professor of Cognitive Sciences

Susan K. Brown, Ph.D. University of California, Berkeley, Professor of Economics

Jan K. Brueckner, Ph.D. Stanford University, Department Chair and Professor of Economics; Planning, Policy, and Design

Daniel R. Brunstetter, Ph.D. University of California, Davis, Associate Professor of Political Science; European Languages and Studies (political theory, international relations, French political thought)

Michael L. Burton, Ph.D. Stanford University, Professor Emeritus of Anthropology; Economics

Carter Butts, Ph.D. Carnegie Mellon University, Professor of Sociology; Electrical Engineering and Computer Science; Statistics (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Lawrence F. Cahill, Ph.D. University of California, Irvine, Professor of Neurobiology and Behavior; Cognitive Sciences
Kitty C. Calavita, Ph.D. University of Delaware, Professor Emerita of Criminology, Law and Society; Sociology (sociology of law, criminology, social deviance, immigration, inequality)

Alejandro E. Camacho, LL.M. Georgetown University, Professor of School of Law; Political Science

Belinda Campos, Ph.D. University of California, Berkeley, Associate Professor of Chicano/Latino Studies; Psychology and Social Behavior (culture, relationships, positive emotion, health)

Francis A. Cancian, Ph.D. Harvard University, Professor Emeritus of Anthropology; Economics

David O. Carter, J.D. University of California, Los Angeles, Lecturer of Political Science

Jean-Paul Carvalho, Ph.D. Oxford University, Assistant Professor of Economics; Logic and Philosophy of Science

Anita Casavantes Bradford, Ph.D. University of California, San Diego, Assistant Professor of Chicano/Latino Studies; History

Jeanett Castellanos, Ph.D. Washington State University, Lecturer with Security of Employment of Social Sciences

Leo Chavez, Ph.D. Stanford University, Professor of Anthropology

Ricardo Chavira, M.A. California State University, Northridge, Lecturer of Social Sciences; International Studies

Erwin Chemerinsky, J.D. Harvard University, Dean of the School of Law, Raymond Pryke Endowed Chair in First Amendment Law and Professor of School of Law; Political Science

Jaawei Chen, Ph.D. Johns Hopkins University, Associate Professor of Economics

Natalia Chernyshoff, Ph.D. University of California, Davis, Lecturer of Economics

Joanne Christopherson, Ph.D. University of California, Irvine, Lecturer of Social Sciences

Charles F. Chubb, Ph.D. New York University, Professor of Cognitive Sciences

Damon Clark, Ph.D. Oxford University, Assistant Professor of Economics

Benjamin N. Colby, Ph.D. Harvard University, Professor Emeritus of Anthropology

Gilverto Q. Conchas, Ph.D. University of Michigan, Associate Professor of Education; Sociology

Thomas M. D’Zmura, Ph.D. University of Rochester, Professor of Cognitive Sciences

Russell Dalton, Ph.D. University of Michigan, Professor of Political Science; European Languages and Studies; Political Science

James N. Danziger, Ph.D. Stanford University, Professor Emeritus of Political Science

Arthur S. De Vany, Ph.D. University of California, Los Angeles, Professor Emeritus of Economics

Louis Desipio, Ph.D. University of Texas at Austin, Professor of Chicano/Latino Studies; Political Science

John D. Dombrink, Ph.D. University of California, Berkeley, Professor of Criminology, Law and Society; Sociology (crime and criminal justice, deviance and social control)

Yingying Dong, Ph.D. Boston College, Assistant Professor of Economics

Barbara A. Dosher, Ph.D. University of Oregon, UCI Distinguished Professor of Cognitive Sciences

Thomas J. Douglas, Ph.D. University of California, Irvine, Lecturer of Anthropology

Christopher E. Drover, Ph.D. University of California, Riverside, Lecturer of Anthropology

John Duffy, Ph.D. University of California, Professor of Economics

Greg Duncan, Ph.D. University of Michigan, UCI Distinguished Professor of Education; Economics; Psychology and Social Behavior (economics of education, program evaluation, child development)

Robert Henry Duncan, Ph.D. University of California, Irvine, Lecturer of International Studies

David Easton, Ph.D. Harvard University, UCI Distinguished Professor of Political Science

James A. Egan, Ph.D. University of California, Irvine, Lecturer of Anthropology
Julia Elyachar, Ph.D. Harvard University, Associate Professor of Anthropology; Culture and Theory

George Farkas, Ph.D. Cornell University, Professor of Education; Education; Sociology

Katherine Faust, Ph.D. University of California, Irvine, Professor of Sociology (social networks, animal social organization, population processes and social networks, research methods)

David Feldman, Ph.D. University of Missouri-Columbia, Professor of Planning, Policy, and Design; Political Science

Martha S. Feldman, Ph.D. Stanford University, Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Planning, Policy, and Design; Paul Merage School of Business; Political Science; Sociology

Paul Feldstein, Ph.D. University of Chicago, Professor Emeritus of Paul Merage School of Business; Economics

Cynthia Feliciano, Ph.D. University of California, Los Angeles, Associate Professor of Sociology; Chicano/Latino Studies; Education (race/ethnicity/minority relations, migration and immigration, education)

Raúl A. Fernández, Ph.D. Claremont Graduate University, Director of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences

Gordon J. Fielding, Ph.D. University of California, Los Angeles, Professor Emeritus of Economics

Mark J. Fisher, M.D. University of Cincinnati, Professor of Neurology; Anatomy and Neurobiology; Political Science

James J. Flink, Ph.D. University of Pennsylvania, Professor Emeritus of Social Sciences

Glenda M. Flores, Ph.D. University of Southern California, Assistant Professor of Chicano/Latino Studies; Sociology

Matthew Foreman, Ph.D. University of California, Berkeley, Professor of Mathematics; Logic and Philosophy of Science (ergodic theory and dynamical systems, logic and foundations)

Charless C. Fowkes, Ph.D. University of California, Berkeley, Associate Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science (computer vision, machine learning, computational biology)

David J. Frank, Ph.D. Stanford University, Professor of Sociology; Education; Political Science (globalization, sexuality, the natural environment, higher education)

Steven A. Frank, Ph.D. University of Michigan, Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Lewis A. Froman, Ph.D. Northwestern University, Professor Emeritus of Political Science

Paula Garb, Ph.D. Russian Academy of Sciences, Lecturer of Social Sciences; International Studies; Undergraduate Education

Robert Garfias, Ph.D. University of California, Los Angeles, Professor Emeritus of Anthropology

Michelle Garfinkel, Ph.D. Brown University, Professor of Economics

Howard A. Gillman, Ph.D. University of California, Los Angeles, Provost and Interim Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law

Samuel L. Gilmore, Ph.D. Northwestern University, Lecturer of Sociology

Amihai Glazer, Ph.D. Yale University, Professor of Economics

Peter Gluck, J.D. Franklin Pierce College, Lecturer of International Studies

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Culture and Theory (race, racism, race and the law, political theory, South Africa, digital humanities)

Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences

Sara Goodman, Ph.D. Georgetown University, Assistant Professor of Political Science

Susan M. Greenhalgh, Ph.D. Columbia University, Professor Emerita of Anthropology

Teresa A. Griffith, Ph.D. University of California, Irvine, Lecturer of Linguistics

Bernard N. Grofman, Ph.D. University of Chicago, Jack Peltason Chair and Professor of Political Science; Economics
Emily D. Grossman, Ph.D. Vanderbilt University, Associate Professor of Cognitive Sciences

Richard L. Hasen, J.D. University of California, Los Angeles, UCI Chancellor's Professor of School of Law; Political Science

Jeremy Heis, Ph.D. University of Pittsburgh, Associate Professor of Logic and Philosophy of Science; Philosophy

William Hernandez, J.D. Georgetown University, Lecturer of Paul Merage School of Business; International Studies

Gregory S. Hickok, Ph.D. Brandeis University, Professor of Cognitive Sciences; Linguistics

John Hipp, Ph.D. University of North Carolina at Chapel Hill, UCI Chancellor's Fellow and Professor of Criminology, Law and Society; Sociology (community context of crime, household decisions and neighborhood change, research methods)

Ann Hironaka, Ph.D. Stanford University, Associate Professor of Sociology (political sociology, war and peace, environmental sociology, ethnic and racial conflict)

David Hirshleifer, Ph.D. University of Chicago, Paul Merage Chair in Business Growth and Professor of Paul Merage School of Business; Economics

Donald D. Hoffman, Ph.D. Massachusetts Institute of Technology, Professor of Cognitive Sciences; Logic and Philosophy of Science

Matthew L. Huffman, Ph.D. University of California, Santa Barbara, Professor of Sociology; Paul Merage School of Business (race/gender inequality, organizations, labor markets)

James R. Hull, Ph.D. University of North Carolina at Chapel Hill, Lecturer with Potential Security of Employment of Social Sciences; Sociology

Simon Huttegger, Ph.D. University of Salzburg, UCI Chancellor's Fellow and Associate Professor of Logic and Philosophy of Science

Mizuko Ito, Ph.D. Stanford University, John D. and Catherine T. MacArthur Foundation Chair in Digital Media and Learning and Professor in Residence of Anthropology; Education; Informatics (ethnography, game studies, youth culture, learning sciences, online communities)

Geoffrey J. Iverson, Ph.D. New York University, Professor of Cognitive Sciences

Ivan G. Jeliazkov, Ph.D. Washington University, Associate Professor of Economics; Statistics

Brian C. Jenkins, Ph.D. University of North Carolina at Chapel Hill, Lecturer of Economics

Angela C. Jenks, Ph.D. University of California, Berkeley, Lecturer with Potential Security of Employment of Anthropology

Valerie Jenness, Ph.D. University of California, Santa Barbara, Dean of the School of Social Ecology and Professor of Criminology, Law and Society; Sociology (links between deviance and social control (especially law), the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Linda Cohen Jennings, Ph.D. California Institute of Technology, Professor of Economics; School of Law

Kent E. Johnson, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Logic and Philosophy of Science; Linguistics

Philippe Jorion, Ph.D. University of Chicago, Professor of Paul Merage School of Business; Economics

Marek Kaminski, Ph.D. University of Maryland, College Park, Associate Professor of Political Science; Economics

Pamela A. Kelley, J.D. Yale University, Lecturer of Political Science

Claire J. Kim, Ph.D. Yale University, Associate Professor of Asian American Studies; Culture and Theory; Political Science

Eleana Kim, Ph.D. New York University, Associate Professor of Anthropology

Igor Kopylov, Ph.D. University of Rochester, Associate Professor of Economics; Economics

Jeffrey Krichmar, Ph.D. George Mason University, Professor of Cognitive Sciences; Computer Science

Charis E. Kubrin, Ph.D. George Washington University, Professor of Criminology, Law and Society; Sociology (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Arthur D. Lander, Ph.D. University of California, San Francisco, Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science; Pharmacology (systems biology of development, pattern formation, growth control)

Jee-Young J. Lee, Ph.D. Columbia University, Professor of Sociology; Asian American Studies (immigration, race/ethnicity, social inequality, Asian American studies)
Michael Lee, Ph.D. University of Adelaide, *Professor of Cognitive Sciences*

Karen Leonard, Ph.D. University of Wisconsin, *Professor Emerita of Anthropology*

Mimi Liljeholm, Ph.D. University of California, Los Angeles, *Assistant Professor of Cognitive Sciences*

Elizabeth F. Loftus, Ph.D. Stanford University, *UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law* (cognitive psychology, human memory, psychology and law)

Cecelia M. Lynch, Ph.D. Columbia University, *Professor of Political Science*

Gary S. Lynch, Ph.D. Princeton University, *Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology; Cognitive Sciences*

David Christian Lyon, Ph.D. Vanderbilt University, *Assistant Professor of Anatomy and Neurobiology; Cognitive Sciences*

G. Craig MacAndrew, Ph.D. University of Chicago, *Professor Emeritus of Anthropology*

Penelope J. Maddy, Ph.D. Princeton University, *UCI Distinguished Professor of Logic and Philosophy of Science; Mathematics; Philosophy* (philosophy of mathematics and logic, meta-philosophy)

Lilith Mahmud-Abdelwahab, Ph.D. Harvard University, *Assistant Professor of Gender and Sexuality Studies; Anthropology; Culture and Theory* (elites, race and nationalism, cultural capital, secrecy and conspiracy, feminist ethnography, critical studies of Europe)

David B. Malament, Ph.D. The Rockefeller University, *Professor Emeritus of Logic and Philosophy of Science*

Virginia Mann, Ph.D. Massachusetts Institute of Technology, *Professor of Cognitive Sciences; Education; Linguistics*

George E. Marcus, Ph.D. Harvard University, *UCI Chancellor's Professor of Anthropology*

Raffaele Mari, M.A. San Diego State University, *Lecturer of Economics*

William M. Maurer, Ph.D. Stanford University, *Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; Culture and Theory; School of Law* (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Shampa Mazumdar, Ph.D. Northeastern University, *Lecturer of Sociology*

Michael T. McBride, Ph.D. Yale University, *Associate Professor of Economics; Logic and Philosophy of Science*

Anthony J. McGann, Ph.D. Duke University, *Associate Professor of Political Science*

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science*

Martin C. McGuire, Ph.D. Harvard University, *UCI Endowed Chair and Professor Emeritus of Economics*

Richard B. McKenzie, Ph.D. Virginia Polytechnic Institute and State University, *Professor Emeritus of Economics; Paul Merage School of Business*

James W. Meeker, Ph.D. State University of New York at Buffalo, *Professor of Criminology, Law and Society; Sociology* (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

Richard Mendelsohn, Ph.D. Massachusetts Institute of Technology, *Adjunct Professor of Logic and Philosophy of Science*

Carrie Menkel-Meadow, J.D. University of Pennsylvania, *UCI Chancellor's Professor of Political Science; School of Law*

David S. Meyer, Ph.D. Boston University, *Professor of Sociology; Planning, Policy, and Design; Political Science* (social movements, public policy, peace and war, social justice)

John Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior* (hearing research, neurophysiology, auditory prosthesis, computational neuroscience, auditory cortex)

Fabio Milani, Ph.D. Princeton University, *Associate Professor of Economics*

Kristen R. Monroe, Ph.D. University of Chicago, *UCI Chancellor's Professor of Political Science*

Michael J. Montoya, Ph.D. Stanford University, *UCI Chancellor's Fellow and Associate Professor of Anthropology; Chicano/Latino Studies; Culture and Theory; Program in Public Health* (social inequality and health, race and ethnicity, social and cultural studies of science, technology, and medicine, participation of ethnic populations in biomedical research, the U.S./Mexican border, critical bioethics)

Alejandro Morales, Ph.D. Rutgers, The State University of New Jersey, *Professor of Chicano/Latino Studies; Spanish and Portuguese*
Patrick M. Morgan, Ph.D. Yale University, Professor Emeritus of Political Science

Keith Murphy, Ph.D. University of California, Los Angeles, Assistant Professor of Anthropology; Linguistics

Sylvia Nam, Ph.D. University of California, Berkeley, Assistant Professor of Anthropology

Louis E. Narens, Ph.D. University of California, Los Angeles, Professor of Cognitive Sciences; Logic and Philosophy of Science

David Neumark, Ph.D. Harvard University, UCI Chancellor's Professor of Economics; Paul Merage School of Business

Riley D. Newman, Ph.D. University of California, Berkeley, Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy

Nick R. Noviello, Ph.D. University of California, Irvine, Lecturer of Social Sciences

Charles T. O'Connell, Ph.D. University of California, Los Angeles, Lecturer of International Studies; Sociology

Cailin O'Connor, B.A. Harvard University, Assistant Professor of Logic and Philosophy of Science

Sheila G. O'Rourke, Ph.D. University of California, Irvine, Lecturer of Anthropology

Kevin E. Olson, Ph.D. Northwestern University, Associate Professor of Political Science; Culture and Theory (contemporary European political theory, cultural politics, politics of diversity, popular sovereignty, citizenship, nineteenth- and twentieth-century political theory)

Valerie A. Olson, Ph.D. William Marsh Rice University, Assistant Professor of Anthropology

Lisa Pearl, Ph.D. University of Maryland, College Park, Associate Professor of Cognitive Sciences; Linguistics; Logic and Philosophy of Science

Jack W. Pelletson, Ph.D. Princeton University, Professor Emeritus of Political Science

Andrew Penner, Ph.D. University of California, Berkeley, Assistant Professor of Sociology (gender, inequality, education, family, race)

Kristin Peterson, Ph.D. William Marsh Rice University, Associate Professor of Anthropology; Culture and Theory; European Languages and Studies

Mark P. Petracca, Ph.D. University of Chicago, Associate Professor of Political Science; Planning, Policy, and Design

Bojan M. Petrovic, Ph.D. University of California, Irvine, Lecturer of Social Sciences; Political Science

Dale J. Poirier, Ph.D. University of Wisconsin-Madison, Professor of Economics; Statistics

Andrew Policano, Ph.D. Brown University, Dean's Leadership Circle Endowed Professorship and Professor of Paul Merage School of Business; Economics

Francesca Polletta, Ph.D. Yale University, Professor of Sociology (social movements, democracy, culture, sociology of law, race and ethnicity, social theory)

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, Professor of Criminology, Law and Society; Sociology (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

M. Ross Quillian, Ph.D. Carnegie Mellon University, Professor Emeritus of Political Science

Charles C. Ragin, Ph.D. University of North Carolina at Chapel Hill, UCI Chancellor's Professor of Sociology (comparative and historical sociology, social inequality, political sociology, quantitative methodology, qualitative methodology)

Priya Ranjan, Ph.D. Columbia University, Professor of Economics

Maria G. Rendon, Ph.D. Harvard University, Assistant Professor of Planning, Policy, and Design; Sociology

Virginia Richards, Ph.D. University of California, Berkeley, Professor of Cognitive Sciences

Gary Richardson, Ph.D. University of California, Berkeley, UCI Chancellor's Fellow and Professor of Economics; European Languages and Studies (economic history, macroeconomics, Great Depression, Industrial Revolution, property rights and economic development)

Belinda B. Robnett-Olsen, Ph.D. University of Michigan, Professor of Sociology; African American Studies; Culture and Theory (social movements, race and ethnicity, gender, social change, African Americans)

Guillaume Rocheteau, Ph.D. University of Paris, UCI Chancellor's Fellow and Professor of Economics

Jose Antonio Rodriguez Lopez, Ph.D. University of California, Berkeley, Assistant Professor of Economics
A. K. Romney, Ph.D. Harvard University, Professor Emerita of Anthropology; Cognitive Sciences

Rocio Rosales, Ph.D. University of California, Los Angeles, Assistant Professor of Sociology

Ana Rosas, Ph.D. University of Southern California, Associate Professor of Chicano/Latino Studies; History

Shawn W. Rosenberg, M.S. Oxford University, Professor of Political Science; Psychology and Social Behavior (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Kevin Roth, M.S. Cornell University, Assistant Professor of Economics

Vicki L. Ruiz, Ph.D. Stanford University, UCI Distinguished Professor of History; Chicano/Latino Studies; Culture and Theory (Chicana/Latina history, U.S. labor, immigration, gender)

Ruben G. Rumbaut, Ph.D. Brandeis University, Professor of Sociology; Criminology, Law and Society; Education (international migration, immigration laws, criminalization, incarceration, inequality)

Donald G. Saari, Ph.D. Purdue University, UCI Distinguished Professor of Economics; Logic and Philosophy of Science; Mathematics (ergodic theory and dynamical systems, mathematics of complex social phenomena)

Kourosh Saberi, Ph.D. University of California, Berkeley, Professor of Cognitive Sciences

Kamal Sadiq, Ph.D. University of Chicago, Associate Professor of Political Science

Jean-Daniel M. Saphores, Ph.D. Cornell University, Professor of Civil and Environmental Engineering; Economics; Planning, Policy, and Design (transportation economics, planning and policy, environmental and natural resource economics and policy, quantitative methods)

Barbara W. Sarnecka, Ph.D. University of Michigan, Associate Professor of Cognitive Sciences; Logic and Philosophy of Science

George Sarraf, Ph.D. Claremont Graduate University, Lecturer of Economics

David Scharp, Ph.D. Washington University, Lecturer of International Studies

Seymour A. Schlosser, M.A. University of California, Los Angeles, Lecturer of International Studies

Evan Schofer, Ph.D. Stanford University, Professor of Sociology (comparative political sociology, sociology of education, quantitative methods and statistics, globalization, sociology of the environment, organizations, sociology of science)

William R. Schonfeld, Ph.D. Princeton University, Professor Emeritus of Political Science

Jonas Schultz, Ph.D. Columbia University, Professor Emeritus of Physics and Astronomy; International Studies; Logic and Philosophy of Science

Tonya L. Schuster, Ph.D. University of California, Riverside, Lecturer of Sociology; Program in Public Health

Gabriele J. Schwab, Ph.D. University of Konstanz, Department Chair and UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; European Languages and Studies (modern literature, critical theory, psychoanalysis, comparative literature)

Carl E. Schwarz, Ph.D. University of California, Santa Barbara, Lecturer of Political Science; International Studies

Armin Schwegler, Ph.D. University of California, Berkeley, Professor of Spanish and Portuguese; Linguistics

Sherilyn K. Sellgren, MB.A. University of California, Irvine, Lecturer of Political Science

Cesar D. Sereseres, Ph.D. University of California, Riverside, Associate Professor of Political Science

Carroll S. Seron, Ph.D. New York University, Professor of Criminology, Law and Society; School of Law; Sociology (sociology of law, sociology of professions, law and society, sociology of legal profession, methods and police misconduct)

Nilopa Shah, Ph.D. University of California, Irvine, Lecturer of Economics

Paul R. Shirey, Ph.D. University of California, Irvine, Lecturer of Social Sciences; Economics

Stergios Skaperdas, Ph.D. Johns Hopkins University, Clifford S. Heinz Chair and Professor of Economics

Brian Skyrms, Ph.D. University of Pittsburgh, UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy

Kenneth A. Small, Ph.D. University of California, Berkeley, Professor Emeritus of Economics
Steven L. Small, M.D. University of Rochester, Dr. Stanley van den Noort Endowed Chair and Professor of Neurology; Cognitive Sciences; Neurobiology and Behavior

Charles Smith, Ph.D. University of California, San Diego, Associate Professor of Political Science

David A. Smith, Ph.D. University of North Carolina at Chapel Hill, Professor of Sociology; Planning, Policy, and Design (world systems analysis, urbanization, development, comparative-historical sociology, dependent development in east asia)

David A. Snow, Ph.D. University of California, Los Angeles, UCI Distinguished Professor of Sociology (collective behavior, protest and social movements, framing processes, social psychology and culture, homelessness and social problems, qualitative methods)

Etel Solingen, Ph.D. University of California, Los Angeles, Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies and Professor of Political Science

Dorothy J. Solinger, Ph.D. Stanford University, Professor of Political Science

George Sperling, Ph.D. Harvard University, UCI Distinguished Professor of Cognitive Sciences; Neurobiology and Behavior

Ramesh Srinivasan, Ph.D. Tulane University, Professor of Cognitive Sciences; Biomedical Engineering (cognitive neuroscience, brain development, consciousness, perception, EEG, brain dynamics)

P. Kyle Stanford, Ph.D. University of California, San Diego, Professor of Logic and Philosophy of Science; Philosophy

Arnold Starr, M.D. New York University, Professor Emeritus of Neurology; Cognitive Sciences; Neurobiology and Behavior

Judith Stepan-Norris, Ph.D. University of California, Los Angeles, Professor of Sociology (labor unions, sociology of work, political sociology, American society, research methods, historical-comparative methods, class formation)

Hal S. Stern, Ph.D. Stanford University, Dean of the Donald Bren School of Information and Computer Sciences, Ted and Janice Smith Family Foundation Endowed Chair in Information and Computer Science, and Professor of Statistics; Cognitive Sciences

Mark Steyvers, Ph.D. Indiana University, Professor of Cognitive Sciences; Psychology and Social Behavior (wisdom of crowds, aggregating human judgments, computational models of the mind, machine learning and statistics, memory and decision making)

Yang Su, Ph.D. Stanford University, Associate Professor of Sociology (social movements and collective action, political sociology, China's political transition)

Naomi Sugie, Ph.D. Princeton University, Assistant Professor of Criminology, Law and Society; Sociology (sociology of crime and punishment, inequality, families, criminal justice policy, methods, new technologies for data collection)

Eric Swanson, Ph.D. Stanford University, Professor of Economics

James M. Swanson, Ph.D. Ohio State University, Professor Emeritus of Pediatrics; Cognitive Sciences

Bryan Sykes, Ph.D. University of California, Berkeley, Assistant Professor of Criminology, Law and Society; Sociology (demography, criminology, research methods, health, social inequality, statistics)

Rein Taagepera, Ph.D. University of Delaware, Professor Emeritus of Political Science

Shauhin A. Talesh, J.D. University of Connecticut, Acting Professor of School of Law; Criminology, Law and Society; Sociology (civil procedure, consumer law, insurance, business organizations, empirical legal studies, law and society)

Gary B. Thom, Ph.D. Yale University, Professor Emeritus of Political Science

Jean Tompke, Ph.D. University of California, Los Angeles, Lecturer of International Studies

Keith Topper, Ph.D. University of California, Los Angeles, Associate Professor of Political Science; Culture and Theory (political theory, critical theory, poststructuralism, theories of power, language and politics, theory and politics of interpretation, politics of culture, philosophy of the social sciences)

Bernard H. Tranel, Ph.D. University of California, San Diego, Professor of Linguistics

Denis Trapido, Ph.D. Stanford University, Assistant Professor of Paul Merage School of Business; Sociology

Judith Treas, Ph.D. University of California, Los Angeles, Professor of Sociology (gender, inequality, family, aging and life course, social demography)

Jennifer S. Trueblood, Ph.D. Indiana University, Assistant Professor of Cognitive Sciences
Anthropology Courses

ANTHRO 2A. Introduction to Sociocultural Anthropology. 4 Units.
Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Stresses the application of anthropological methods to research problems. Course may be offered online.

(III, VIII)
ANTHRO 2B. Introduction to Biological Anthropology. 4 Units.
Evolutionary theory and processes, comparative primate fossil record, human variation, and the adequacy of theory, and empirical data.

(III)

ANTHRO 2C. Introduction to Archaeology. 4 Units.
Archaeological theory and cultural processes with emphasis on the American Southwest, Mesoamerica, and Mesopotamia.

(III)

ANTHRO 2D. Introduction to Language and Culture. 4 Units.
Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as LINGUIS 68.

(III)

ANTHRO 10A. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as SOCIOL 10A.
Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A, SOC SCI 9A.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Va)

ANTHRO 10B. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A.

Same as SOCIOL 10B.
Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B, SOC SCI 9B.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Va)

ANTHRO 10C. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B.

Same as SOCIOL 10C.
Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C, SOC SCI 9C.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Vb)

ANTHRO 20A. People, Cultures, and Environmental Sustainability. 4 Units.

(VIII)
ANTHRO 20B. Anthropology of Food. 4 Units.
Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the "Western diet" and its health consequences.

Same as CHC/LAT 66.
(III, VII)

ANTHRO 30A. Global Issues in Anthropological Perspective. 4 Units.
Explores anthropological perspectives on issues of importance in an increasingly global society. Topics include emphases on ethnic conflict; identity; immigration and citizenship; religion and religious diversity; medical anthropology; legal anthropology; development and economic change; gender.

Restriction: Anthropology majors have first consideration for enrollment.
(VIII)

ANTHRO 30B. Ethnography and Anthropological Methods. 4 Units.
Explores ethnography, anthropology's classic method. Students obtain hands-on training in participant observation, interviewing, and other methods, in local communities, and the preparation of research reports. Also provides theoretical and reflexive readings on ethnography.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 30C. Visual Anthropology. 4 Units.
Focusing on the construction of culture through visuality, this course engages traditional ethnographic films, popular media and anthropological texts to analyze ethics, “reality” and fiction; propaganda and documentary, construction of a frame, the responsibility of the filmmaker, photographer, and anthropologist.

ANTHRO 41A. Global Cultures and Society. 4 Units.
Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as INTL ST 11.

Restriction: Anthropology and International Studies majors have first consideration for enrollment.
(III, VIII)

ANTHRO 50B. Gender and Global Health. 4 Units.
Examines the social forces, life circumstances, and political and economic processes that influence gendered health outcomes. Focuses especially on women located at the economic and political margins of societies throughout the world.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 85A. Cultures in Collision: Indian-White Relations Since Columbus. 4 Units.
An introduction to theories, terms, concepts, and methods used by anthropologists and sociologists to understand Native American cultures. How racial construction of an Indian "other" emerged, how anthropology contributed to Indian invisibility, and the persistence of Indian identity are examined.

Same as SOCIOL 65.
(VII)

ANTHRO 89. Special Topics in Anthropology. 1-4 Units.
Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 121AW. Kinship and Social Organization. 4 Units.
Organization of social life primarily in preindustrial societies. Theories of kinship, marriage regulations, sexual behavior, and social roles. Comparisons of biological, psychological, sociological, and economic explanations of social organization.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
(Ib)
ANTHRO 121D. Cross-Cultural Studies in Gender. 4 Units.
Familiarizes students with the diversity of women’s experiences around the world. Gender roles and relations are examined within cultural and historical contexts. A central concern is how class, race, and global inequalities interact with women’s status.
Prerequisite: ANTHRO 2A or ANTHRO 2B.

ANTHRO 121G. Political Anthropology. 4 Units.
Utilizes anthropological accounts of Western and non-Western societies to question conventional ways of thinking about power and politics. Classical traditions in political anthropology are critiqued; an alternative view is presented through recent anthropological political analyses of various topics.

ANTHRO 121J. Urban Anthropology. 4 Units.
Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

ANTHRO 125A. Economic Anthropology. 4 Units.
Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.
Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

ANTHRO 125B. Ecological Anthropology. 4 Units.
Studies relationships between human communities and their natural environments. The role of environment in shaping culture; effects of extreme environments on human biology and social organization; anthropologist’s role in studying global environmental problems, e.g., African famine, tropical rain forests destruction.
Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C.

ANTHRO 125F. Humans and Other Animals. 4 Units.
Explores peoples’ relationships with other animals, a topic that continues to shape anthropological understandings of humanness, culture, and the social. Subthemes: symbol and matter, nature/culture, ontologies, relations, moralities, ecologies, futures.
Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C.

ANTHRO 125S. The Anthropology of Money. 4 Units.
Anthropological approaches to money; impact of money on subsistence economies; cultural history of money; and modern transformations of money. Students conduct ethnographic research on alternative money practices in Southern California, and create an online exhibition and research paper.
Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 125X. Transnational Migration. 4 Units.
Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

ANTHRO 125Z. Muslim Identities in North America. 4 Units.
Explores multiple identities of Muslims in North America, including indigenous Muslims and immigrants of many national origins. Explores religious, political, cultural, ethnic, class differences among American Muslims, turning to Islamic institutions or events near UCI to conduct fieldwork projects.
Same as ASIANAM 142.

ANTHRO 126A. Elite Cultures. 4 Units.
The distinctive contribution that ethnographic studies have made to the understanding of elites past and present, in particular societies and globally.
Restriction: Anthropology majors have first consideration for enrollment.
ANTHRO 127A. Law and Modernity. 4 Units.
The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of "liberty, equality, fraternity"; contradictions of liberal law, its understandings of "primitive" and "civilized"; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.
Same as CRM/LAW C191.

ANTHRO 128A. Science, Technology, Controversy. 4 Units.
Explores ways in which the social sciences conceive of science as a sociocultural practice. Emphasis on literature in Science and Technology Studies (STS), especially writings that concern the relationship of science to space and place, power, and politics.
Restriction: Anthropology majors only.

ANTHRO 128B. Race, Gender, and Science. 4 Units.
Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.
Same as CHC/LAT 176, GEN&SEX 188A.
(VII)

ANTHRO 128C. Digital Cultures. 4 Units.
Explores cultural and political implications of the infotech revolution and the ways new media are used around the world, new cultural practices and spaces (e.g., cybercafes), debates surrounding the meanings of these new technologies, and their implications for transforming society.
Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 129. Special Topics: Social and Economic Anthropology. 1-4 Units.
Studies in selected areas of Social and Economic Anthropology. Topics addressed vary each quarter.
Repeatable: Unlimited as topics vary.
Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 132A. Psychological Anthropology. 4 Units.
Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.
Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)
Same as PSYCH 173A.
Restriction: Psychology majors have first consideration for enrollment.

ANTHRO 134A. Medical Anthropology. 4 Units.
Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.
Same as CHC/LAT 178A.
(VIII)

ANTHRO 134B. Anthropology of Drugs. 4 Units.
Examines the increasing role "drugs" play in shaping the expression, understanding, and representation of the self and social life. The shifting construction of licit/illicit; cultural and ethnographic representations of drug use; pharmaceutical industry; production and management of addiction and disease.
Restriction: Upper-division students only.
(III)

ANTHRO 134C. Medicine, Food, and Health. 4 Units.
With anthropological studies of edible things as its foundation, this course explores topics related to the relationship between medical knowledge, eating, and health from a medical anthropological perspective.
Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D.
ANTHRO 134F. Anthropology of the Body. 4 Units.
Examines human bodies as both biological and sociocultural entities and explores the relationship among mind, body, and society cross-culturally. Topics include embodiment; race, sex, gender and the body; somatization; control of the body; commodified bodies; and hybrid/cyborg bodies.

ANTHRO 134G. HIV/AIDS in a Global Context. 4 Units.
Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

VIII

ANTHRO 134GW. HIV/AIDS in a Global Context. 4 Units.
Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Ib, VIII

ANTHRO 135A. Religion and Social Order. 4 Units.
An anthropological exploration of religious belief and practices in diverse social and historical contexts. Emphasis placed on selected non-western traditions of the sacred, and on issues of power, ritual, moral order, and social transformation.

ANTHRO 135I. Modern South Asian Religions. 4 Units.
Nineteenth- and twentieth-century developments in Hinduism, Islam, and Sikhism are covered, with emphasis on changing forms as well as contents of religious movements and the state.

Same as INTL ST 158A.

II

ANTHRO 136A. Nationalism and Ethnicity in the Contemporary World. 4 Units.
An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does "culture" get worked into contemporary racisms and nationalisms.

Same as INTL ST 153E.

II

ANTHRO 136B. History of Anthropological Theory. 4 Units.
Provides foundational knowledge in the discipline of anthropology by reviewing competing approaches in anthropological theory, from the nineteenth century to the present. Covers historically fundamental approaches—social evolutionism, functionalism—and recent movements such as feminism, cultural studies, poststructuralism, and postmodernism.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 136D. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as POL SCI 154G, SOC SCI 183E, INTL ST 183E.

II

ANTHRO 136G. Colonialism and Gender. 4 Units.
An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as INTL ST 153D.

Restriction: Anthropology majors have first consideration for enrollment.
ANTHRO 136K. The Woman and the Body. 4 Units.
Probes culture and politics of the female body in contemporary American life. Focusing on "feminine beauty," examines diverse notions of beauty, bodily practices, and body politics embraced by American women of different classes, ethnicities, and sexualities.

(VII)

ANTHRO 137A. Reading Images Culturally. 4 Units.
Provides analytical tools necessary to undertake research on visual representations. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them. Of concern are representations of race, identity, gender, and the "Other."

Same as CHC/LAT 116.

(VII)

ANTHRO 138H. Music of Indonesia and the Philippines. 4 Units.
Thousands of islands are encompassed by Philippines, Malaysia, and Indonesia. Common cultural ties are obscured by colonial conditions and influences during last two centuries. Reviews region’s major forms of music, from earliest communal societies to complex stratified and recent cultures.

ANTHRO 138J. Music of Japan and Okinawa. 4 Units.
A survey of the musics that developed in the islands of Japan and Okinawa from the perspective of the social, political, and economic forces that played upon the culture and that formed the context of these musical languages.

Restriction: Upper-division students only. Anthropology majors have first consideration for enrollment.

ANTHRO 138M. Music as Expressive Culture. 4 Units.
Fundamental requirements for development of a musical tradition. Guiding structural principles for new forms of expression to be understood and accepted. How members of society develop individual musical cultures which permit them to interact with the personal cultures of others.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 138Q. Latino Music: A View of Its Diversity and Strength. 4 Units.
A survey of the music of the many Latin cultures of the Americas including Mexico, Central and South America, as well as the Caribbean and of those many Latin cultures which thrive and survive in the United States.

Same as CHC/LAT 115A.

(VIII)

ANTHRO 139. Special Topics in Cultural and Psychological Anthropology. 1-4 Units.
Studies in selected areas of Cultural and Psychological Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 141A. Ancient Civilization of Mexico and the Southwest. 4 Units.
The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as INTL ST 177I.

ANTHRO 149. Special Topics in Archaeology. 1-4 Units.
Studies in selected areas of Archaeology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 150A. Language and Social Cognition. 4 Units.
Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Restriction: Anthropology majors have first consideration for enrollment.
ANTHRO 151A. Improvisation, Language, and Culture. 4 Units.
Addresses improvisation, both in performance and in everyday life. Examines improvisation as the "flexible regulation" of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.
Restriction: Upper-division students only.

ANTHRO 152A. Language Origins: Evolution, Genetics, and the Brain. 4 Units.
Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including Is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.
Same as HISTORY 135G, GLBLCLT 105, LINGUIS 175.

ANTHRO 161T. Field Research: Asian Immigrants and Refugees in Orange County. 4 Units.
Instruction in field work methodology via research projects involving the local communities of immigrants and refugees from Asia. Open only to School of Social Sciences majors.
Restriction: Seniors only. School of Social Sciences majors only.

ANTHRO 161TW. Field Research: Asian Immigrants and Refugees in Orange County. 4 Units.
Instruction in field work methodology via research projects involving the local communities of immigrants and refugees from Asia.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Seniors only. School of Social Sciences majors only
(Ib)

ANTHRO 162A. Peoples and Cultures of Latin America. 4 Units.
Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.
Same as INTL ST 177J.
(VIII)

ANTHRO 162B. Indian North America. 4 Units.
A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.
(VII)

ANTHRO 162BW. Indian North America. 4 Units.
A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
(Ib, VII)

ANTHRO 162C. Race and Empire in Colonial Latin America. 4 Units.
Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptions, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.
Same as HISTORY 165.

ANTHRO 163A. Peoples of the Pacific. 4 Units.
The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.
Same as INTL ST 158B.
(VIII)
ANTHRO 164A. Twenty-First Century Africa. 4 Units.
Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.
Prerequisite: ANTHRO 2A.
Same as INTL ST 157A.
Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 164P. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.
Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.
Same as INTL ST 162B, POL SCI 154F.

ANTHRO 165A. Modern Iran: Cinema and Society. 4 Units.
Exploring modern Iran through film, literature, photography, travel writing, philosophy and social science texts introduces students to important concepts in post-colonial studies, social thought, war culture, religion and media as experienced through the paradigm of a non-Western modernity.

ANTHRO 169. Special Topics in Area Studies. 1-4 Units.
Studies in selected areas of Anthropology. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 179. Special Topics: Methods and Formal Representations. 1-4 Units.
Studies in selected areas of Methods and Formal Representations. Topics addressed vary each quarter.
Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 180AW. Anthropology Majors Seminar. 4 Units.
A course in anthropological theory designed especially for majors in Anthropology. Different issues are considered in different years.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: May be taken for credit 3 times.
Restriction: Anthropology majors only.

ANTHRO 190. Senior Thesis. 4 Units.
Senior thesis with Anthropology faculty.
Repeatability: May be taken for credit 3 times.

ANTHRO H190A. Honors Research Workshop. 4 Units.
Students articulate the goals and significance of their research projects. Written work consists of an eight- to fifteen-page research proposal, due by quarter's end, describing the research question, the relevant literature, and methods of data collection and analysis.
Prerequisite: 3.3 or greater GPA.
Restriction: Anthropology Honors Program students only.

ANTHRO H190B. Honors Field Research. 4 Units.
Students begin or continue ethnographic field research that combines exploratory field research (e.g., participant-observation, interviews, study of archival and documentary materials) with fixed format data collection methods (e.g., standardized interviews, behavioral observations).
Prerequisite: ANTHRO H190A.
ANTHRO H191W. Honors Senior Thesis. 4 Units.
Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, ethnographic background, description of the methods, results, and conclusions.

Prerequisite: ANTHRO H190A and ANTHRO H190B. Satisfactory completion of the Lower-Division Writing requirement.

ANTHRO 197. Field Study. 1-4 Units.
Field study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

ANTHRO 198. Directed Group Study. 1-4 Units.
Directed study with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

ANTHRO 199. Independent Study. 1-4 Units.
Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

ANTHRO 202A. Proseminar in Anthropology. 4 Units.
Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Restriction: Graduate students only.

ANTHRO 202B. Proseminar in Anthropology. 4 Units.
Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202A.

Restriction: Graduate students only.

ANTHRO 202C. Proseminar in Anthropology. 4 Units.
Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202B.

Restriction: Graduate students only.

ANTHRO 204A. Proseminar in Medicine, Science, and Technology. 4 Units.
Explores the phenomena studied by "medical anthropology" and "science and technology studies" are inextricably linked, and how understanding formations requires moving between disparate fields of inquiry. Required for students pursuing a Graduate Certificate in Anthropologies of Medicine, Science, and Technology.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

ANTHRO 208A. Anthropological Fieldwork Methodology. 4 Units.
A survey of anthropological fieldwork methodology techniques, including attention to contemporary analysis of fieldwork.

Restriction: Graduate students only.

ANTHRO 211A. Statistics and Research Design. 4 Units.
Introduces basic concepts of research design for anthropology in conjunction with relevant concepts from the field of statistics, which will be learned in conjunction with the research designs that require use of those methods.

Restriction: Graduate students only.

ANTHRO 212A. Research Design and Data Analysis. 4 Units.
Introduces advanced concepts of research design for anthropology, presents statistical models for multivariate analysis and for analysis of systems of relationships, and includes practice in sampling and data analysis.

Restriction: Graduate students only.
ANTHRO 213A. Grant and Proposal Writing. 4 Units.
Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Same as SOC SCI 255C.

Restriction: Graduate students only.

ANTHRO 221A. Oral History, Life History. 4 Units.
Interdisciplinary and comparative work in oral and life history; methods of interviewing.

Same as SOC SCI 253A.

Restriction: Graduate students only.

ANTHRO 228A. Anthropology Encounters. 4 Units.
Cultural encounters have long provided the ground for ethnographic research. This seminar refocuses on "encounter" not only as the material condition but also as a productive heuristic device in anthropological inquiry. Examines the reorientation of anthropology as a "global discipline."

ANTHRO 230A. Anthropology and History. 4 Units.
An examination of the complex, long-standing relationship between anthropology and history. Themes include: history, culture, and colonialism; history and the power to represent; nostalgia and the uses of the past in struggles over "national history."

Restriction: Graduate students only.

ANTHRO 230D. Ethnographies. 4 Units.
Surveys changes in the character of ethnographic writing in the face of changing fields and topics of research. The emergence of new research terrains and the comparative contexts of ethnography are emphasized.

ANTHRO 231C. Technomethods for Sociocultural Research. 4 Units.
An introduction to using particular technologies for conducting contemporary ethnographic fieldwork. Focuses both on the practical use of these tools and the conceptual work that is necessary for successfully integrating them into specific research projects.

ANTHRO 232B. Medical Anthropology. 4 Units.
Explores historical and contemporary theoretical positions and debates in medical anthropology. Topics may include subjectivity, theories of the body, biopolitics, biomedical technologies, sexuality, pharmaceuticals, political economy and health, infectious disease and epidemics, health disparities, and humanitarianism.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

ANTHRO 232C. Ethnographies of Science and Medicine. 4 Units.
Surveys current ethnographic research pertaining to medical anthropology and science and technology studies.

ANTHRO 234C. Anthropology of Food. 4 Units.
Course examines the role of food in culture history and in anthropological thinking about ethnocentrism, disgust, privilege, gender, race, identities, social relationships, kinship, social hierarchies, globalization, production, consumption, food scarcities, body image, health, and power.

Restriction: Graduate students only.

ANTHRO 235A. Transnational Migration. 4 Units.
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troublings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, CHC/LAT 215.

Restriction: Graduate students only.

ANTHRO 240A. Economic Anthropology. 4 Units.

Restriction: Graduate students only.

ANTHRO 242A. Language and the Social World. 4 Units.
An introduction to the study of language in culture. Topics include theories of the sign; the relation of language structure to linguistic practice; language and group formation; linguistic ideologies; conversation analysis; and language and embodiment.
ANTHRO 245A. Seminar in Political Anthropology. 4 Units.
Explores anthropological approaches to politics. Covers a range of issues and topics, including: theories of culture, power, and hegemony; approaches to colonial and post-colonial relations of global inequality; and ethnographic approaches to the modern state.

Restriction: Graduate students only.

ANTHRO 246B. Law, Colonialism, & Nationalism. 4 Units.
Origins and spread of law in colonial and nationalist contexts: law’s role in constituting and policing difference. Recent theoretical approaches; property in things and people; human and indigenous rights; “customary” law; legal foundations of nationalism; resistance to/through law; globalization.

Restriction: Graduate students only.

ANTHRO 246C. Nations, States, and Gender. 4 Units.
Explores the ways in which nations, nationalism, states, and citizenship are gendered relations and processes. Questions include: How do women construct themselves as political subjects and how are constructions of citizenship and discourses of rights gendered.

Restriction: Graduate students only.

ANTHRO 247A. Structuralism and Post-structuralism. 4 Units.
Traces recent theoretical discussions and arguments over the philosophical and historical “subject” from structuralist decenterings toward the characteristically “post-structuralist” contemporary concern with the historical and political constitution of subjectivities and subject positions.

Restriction: Graduate students only.

ANTHRO 248A. Approaches to Globalization. 4 Units.
Historical and contemporary approaches to the world economy, emphasizing anthropological questions of culture, power, identity, inequality. Examines “neo-imperialism,” “late capitalism,” accumulation, global markets, urban space, the state, business and policy globalization discourse, “local” responses to and instantiations of the “global.”.

Same as SOC SCI 254L.

Restriction: Graduate students only.

ANTHRO 249A. Humanism and Posthumanism. 4 Units.
Examines alternative forms of human, humanisms, and posthumanisms to explore the inherent ambiguities and shifting boundaries of knowing and being human, and to venture into modes of analysis that problematize the universality and globality of liberal humanism.

ANTHRO 249B. Multispecies Anthropology. 4 Units.
Examines how the co-constituting categories of animal and human in tandem with investigating how engagements with human/animal relations continue to define and alter anthropology. Subthemes: meaning, nature/culture, non-humanism, ontologies, relations, matter, evolutions, ecologies, and futures.

ANTHRO 250A. The Cultural Politics of Visual Representation. 4 Units.
Develops a theoretical framework for analyzing and reading visual images. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them and a political economy that is class, race, and gender inflected.

ANTHRO 250B. Digital Technologies, Culture, and Media. 4 Units.
Explores questions of sociality in cyberspace, including what social theories and ethnographic methods are effective in studying online cultures. Topics include general issues like indexicality, reference, temporality, spatiality, and embodiment, and topics such as language, gender, ethnicity, property, and inequality.

Restriction: Graduate students only.

ANTHRO 252A. Queer Anthropology. 4 Units.
Explores historical and contemporary scholarship that employs ethnographic approaches to address the discursive construction of sexuality. Also examines how the discipline of anthropology has been shaped by the study of sexuality.

Restriction: Graduate students only.

ANTHRO 253A. Design, Aesthetics, and Social Life. 4 Units.
Anthropology has only recently recognized that design demands consideration as a cultural form linked to, yet nonetheless distinct from, other aesthetic endeavors. Course is largely oriented toward collaboratively working out a conceptual basis for a distinctly anthropological approach to design.

ANTHRO 254A. Postcoloniality and the Subject. 4 Units.
Examines key issues regarding postcoloniality and conceptions of selfhood in the context of varied forms of colonial and state power. In particular, explores how technology and desire intersect with these questions of subjectification.
ANTHRO 256A. Ethnographies of Technology. 4 Units.
Surveys current ethnographic research pertaining to technologies, technical systems, and infrastructures.

ANTHRO 257A. Natures and Environments. 4 Units.
Examines social scientific understandings of natural contexts and human milieus via a survey of key analytic categories. Begins by examining historical and ongoing definitions and problems organized around “nature” and “environment” as separate but imbricated concepts.

ANTHRO 259A. Dissertation Writing Seminar. 4 Units.
Intended for advanced, post-fieldwork Anthropology graduate students. Emphasis on the presentation of research design and results, problems of ethnographic writing, and qualitative and quantitative data and analysis. Prerequisites: post-fieldwork; graduate standing in Anthropology or consent of instructor.

Restriction: Graduate students only.

ANTHRO 289. Special Topics in Anthropology. 1-4 Units.
Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ANTHRO 290. Dissertation Research. 4-12 Units.
Dissertation research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ANTHRO 299. Independent Study. 4-12 Units.
Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Chicano/Latino Studies Courses

CHC/LAT 61. Introduction to Chicano/Latino Studies I. 4 Units.
An introduction to the study of the historical foundations of the Chicano/Latino experience. Addresses such topics as empire, migration, immigrant settlement, economic integration, race, gender, and the formation of group identities.

(III, VII)

CHC/LAT 62. Introduction to Chicano/Latino Studies II. 4 Units.
Provides an introduction to the arts, literature, and culture of Chicano/Latino communities. Analyzes representations of and cultural production in Chicano/Latino communities through such media as folklore, literature, art, film, architecture, dance theatre, performance, music, poetry, mass media, and language.

(III, VII)

CHC/LAT 63. Introduction to Chicano/Latino Studies III. 4 Units.
Examines contemporary public policy issues in Chicano/Latino communities. Each offering addresses at least three of the following themes: migration, immigrant incorporation, identity construction, language policy, health policy, politics, sexuality, gender, labor, class, and education. Course may be offered online.

(III, VII)

CHC/LAT 64. Introduction to Race and Ethnicity in Political Science. 4 Units.
Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics. Course may be offered online.

Same as POL SCI 61A.

(III, VII)
CHC/LAT 65. Ethnic and Immigrant America. 4 Units.
Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as SOCIOL 68A.

(VII)

CHC/LAT 66. Anthropology of Food. 4 Units.
Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the "Western diet" and its health consequences.

Same as ANTHRO 20B.

(III, VII)

CHC/LAT 69. Lower-Division Special Topics in Chicano/Latino Studies. 4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

CHC/LAT 101. Research in the Latino Community. 4 Units.
Students engage in firsthand research in the local Orange County environment. Students identify a research problem, conduct a literature review, develop questions and/or hypotheses, appropriate methods, and write a proposal.

Prerequisite: Two courses from CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63 and two courses from CHC/LAT 110-189.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 101B. Supervised Research for Chicano/Latino Studies Majors. 4 Units.
Students who have designed a research project & begun collecting data in CHC/LAT 101 will continue to collect/analyze data for their research projects. By end of the course, students will be prepared to write up their findings in CHC/LAT 102W.

Prerequisite: CHC/LAT 101.

Restriction: Chicano/Latino Studies majors only.

CHC/LAT 102W. Chicano/Latino Research Seminar. 4 Units.
Taught as a writing and research seminar in Chicano/Latino Studies. Student develops own project; engages in peer editing; drafts, writes, and presents paper at Spring research conference. Prior course work in Chicano/Latino Studies helpful, i.e., CHC/LAT 61, 62, 63.

Prerequisite: CHC/LAT 101. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chicano/Latino Studies Majors only.

(Ib)

CHC/LAT 110. Chicano Literature and Culture. 4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as SPANISH 140.

CHC/LAT 114. Film Media and the Latino Community. 4 Units.
Uses film as a resource for understanding contemporary issues and problems facing the Chicano/Latino community. (Does not study cinema as a genre.).

Same as SOC SCI 173G.

(VII)
CHC/LAT 115A. Latino Music: A View of Its Diversity and Strength. 4 Units.
A survey of the music of the many Latin cultures of the Americas including Mexico, Central and South America, as well as the Caribbean and of those many Latin cultures which thrive and survive in the United States.

Same as ANTHRO 138Q.

(VIII)

CHC/LAT 116. Reading Images Culturally. 4 Units.
Provides analytical tools necessary to undertake research on visual representations. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them. Of concern are representations of race, identity, gender, and the “Other.”.

Same as ANTHRO 137A.

(VII)

CHC/LAT 121. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.
With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 129. Special Topics in Literature, Arts, Media, Culture. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 130. Introduction to Cuba: History, Culture, and Society. 4 Units.
Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as INTL ST 177F, SOC SCI 173Q.

(VIII)

CHC/LAT 132A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.
Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as HISTORY 151A.

CHC/LAT 132B. Chicana/Chicano History: Twentieth Century. 4 Units.
Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barrioization, ethnicity, patriarchy, sexuality.

Same as HISTORY 151B.

CHC/LAT 133B. Twentieth-Century Mexico. 4 Units.
Examines the history of contemporary Mexico beginning with the Mexican Revolution and concluding with the present administration. Social, economic, and political effects of the Revolution; formation of a “one-party democracy”; economic transformation of the nation; the present crisis.

Same as HISTORY 161C.

CHC/LAT 134. U.S. Latino Literature and Cultures. 4 Units.
Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.

Same as SPANISH 110C.
CHC/LAT 135. Latinas in the Twentieth Century U.S.. 4 Units.
Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.

Same as HISTORY 151C.

CHC/LAT 138. Chicano/Chicana Labor History. 4 Units.
Examines origins of Latino/ Latina labor from colonial period to present. Emphasis on the issues of race, culture, class, and gender. Focus on processes and institutions including: encomienda, migration, unions, informal economies, Bracero program, domestic work.

Same as SOC SCI 167.

CHC/LAT 139. Special Topics in Chicano/Latino History. 1-4 Units.
Studies in selected areas of Chicano/Latino History. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino majors only.

CHC/LAT 140A. Latina/Latino Queer Sexualities. 4 Units.
Introduces students to the notion of "queer" in relation to Chicanas/Chicanos and Latinas/Latinos and provides students with theoretical frameworks to explore the shifting categories of sexuality, gender, Chicano, Latino within the scholarship areas of Chicana/Chicano and Latina/Latino Studies.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 142. Latinos and the Law. 4 Units.
Examines a range of theoretical, empirical, and policy approaches to legal issues affecting the Latino population, with emphasis on California. Discusses topics concerning the purpose of law, the creation of law, and the enforcement of law.

Same as CRM/LAW C171.

(VII)

CHC/LAT 147. Comparative Minority Politics. 4 Units.
Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, ASIANAM 132, POL SCI 124C.

CHC/LAT 148. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Same as SOCIOL 167A.

Restriction: Sociology majors have first consideration for enrollment.

CHC/LAT 148W. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 167AW.

Restriction: Chicano/Latino Studies and Sociology majors have first consideration for enrollment.

(Ib)

CHC/LAT 150. U.S. Intervention in Latin America. 4 Units.
Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as INTL ST 177D, SOC SCI 123A, HISTORY 166.
CHC/LAT 151. Latinos in U.S. Politics. 4 Units.
Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as POL SCI 124B.

(VII)

CHC/LAT 151A. Latin American Politics. 4 Units.
Introduces the main concepts and theoretical approaches underlying the study of Latin American politics, examines recent political dynamics, and explores the challenges the region faces in the twenty-first century and how countries will attempt to address them.

Same as INTL ST 176K, POL SCI 153A.

Restriction: Political Science majors, Chicano/Latino Studies majors, and International Studies majors have first consideration for enrollment.

CHC/LAT 151B. Revolution in Latin America. 4 Units.
Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as SOC SCI 173N, HISTORY 166D, INTL ST 177C.

CHC/LAT 152A. Race, Ethnicity, and Social Control. 4 Units.
Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Prerequisite: CRM/LAW C7.

Same as CRM/LAW C116.

CHC/LAT 153. Cross-Cultural Research on Urban Gangs. 4 Units.
Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CRM/LAW C156.

(VII)

CHC/LAT 154. Latino Metropolis. 4 Units.
Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as PP&D 172.

(VII)

CHC/LAT 155. Culture Change and the Mexican People. 4 Units.
Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CRM/LAW C172.

CHC/LAT 156W. Chicano/Latinos and Labor. 4 Units.
Explores theories that explain the occupational pathways and workplace experiences of Latinos in various work sectors. Investigates jobs such as migrant labor, child street vendors, Latina/Latino professionals, and Latinos migrating to the U.S. South that work in poultry processing plants.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

CHC/LAT 157. Cuban Society and Revolution. 4 Units.
Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, INTL ST 177E.
CHC/LAT 158. Feminisms of Color. 4 Units.
Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

(VII)

CHC/LAT 158W. Feminisms of Color. 4 Units.
Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VII)

CHC/LAT 159. Special Topics in Society, Labor, Politics, Law, Gender, Race, Ethnicity. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino majors only.

CHC/LAT 160. Perspectives on the U.S.-Mexican Border. 4 Units.
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as SOC SCI 173I, INTL ST 177B.

(VII)

CHC/LAT 161. Transnational Migration. 4 Units.
Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as ANTHRO 125X, INTL ST 117A.

(VIII)

CHC/LAT 163. U.S. Immigration Policy. 4 Units.
Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as POL SCI 126C.

(VII)

CHC/LAT 166. Chicano Movement. 4 Units.
Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, “El Movimiento,” within the wide context of socio-economic change.

Same as PP&D 177.

Restriction: Chicano/Latino Studies, Urban Studies, and Social Ecology majors have first consideration for enrollment.

CHC/LAT 168. Chicano/Latino Social Psychology. 4 Units.
Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PSY BEH 192Q.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)
CHC/LAT 169. Special Topics in Globalization, Transnationalism, Immigration, U.S.-Mexico Border. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

CHC/LAT 170. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.
Same as SOC SCI 165, PSYCH 174H.

CHC/LAT 171. Chicano/Latino Psychology. 4 Units.
Examines research and literature investigating Chicano/Latino ethnicity as a variable influencing behavior. Explores mental health needs and issues of Chicano/Latinos and discusses competent, sensitive methods of mental health service delivery.
Same as PSYCH 174F.

CHC/LAT 176. Race, Gender, and Science. 4 Units.
Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.
Same as ANTHRO 128B, GEN&SEX 188A.

CHC/LAT 177. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.
Same as PSY BEH 192R.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 177W. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as PSY BEH 192RW.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 178. Health and the Latino Paradox. 4 Units.
Examines research and theories concerning the physical and mental health of U.S. Latino populations. Contemporary accounts, health care implications, and new directions for understanding sources of risks and resilience for health in Latino populations are evaluated and discussed.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as PSY BEH 192S.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.
CHC/LAT 178A. Medical Anthropology. 4 Units.
Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as ANTHRO 134A.

(VIII)

CHC/LAT 179. Special Topics in Health, Medicine, and Psychosocial Dynamics. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 182. Latina/Latino Access and Persistence in Higher Education. 4 Units.
Introduction to how social, political, and economic forces impact on Latina/Latino racial/ethnic minorities with regard to their access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research.

Same as EDUC 182.

CHC/LAT 183. Multicultural Education in K-12 Schools. 4 Units.
Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S.-born minority student populations in an increasingly diverse and changing society.

Same as EDUC 124.

(VII)

CHC/LAT 184. College Advising for High School Students. 4 Units.
Provides a brief introduction to college-access issues and in-depth understanding in the field of college advising. Students learn how to help high school students develop higher education plans and guide them through the college application process.

Same as EDUC 183.

CHC/LAT 189. Special Topics in Educational Policy and Issues. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

CHC/LAT H190A. Honors Research Preparation. 4 Units.
Students write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Field work for the project may begin this quarter.

Restriction: Open only to students in the Honors Program in Chicano/Latino Studies.

CHC/LAT H190B. Honors Field Research. 4 Units.
Students begin or continue their research for their senior honors thesis.

Prerequisite: CHC/LAT H190A.

CHC/LAT H190C. Honors Thesis. 4 Units.
Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B.

CHC/LAT H190CW. Honors Thesis. 4 Units.
Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B. Satisfactory completion of the Lower-Division Writing requirement.

(lb)
CHC/LAT 191A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as SOC SCI 186A, PSYCH 144A.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

CHC/LAT 191B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children and be culturally sensitive.

Same as SOC SCI 186B, PSYCH 144B.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

CHC/LAT 191C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as SOC SCI 186C, PSYCH 144C.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

CHC/LAT 198. Group Directed Study. 1-4 Units.
Directed study with Chicano/Latino faculty.

Repeatability: Unlimited as topics vary.

CHC/LAT 199. Independent Study. 1-4 Units.
Independent research with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

CHC/LAT 200A. Theoretical Issues in Chicano/Latino Research. 4 Units.
Introduction to theoretical issues in the scholarship in Chicano/Latino Studies. Theories from social sciences, humanities, critical theory. Topics: immigration, identity, gender and sexuality, globalization, transnationalism, social, political, and economic integration, race theory, labor market participation, social history, cultural productions.

CHC/LAT 210A. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.
Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Grading Option: In progress only.

Overlaps with CHC/LAT 212.
CHC/LAT 210B. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.
Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.
Prerequisite: CHC/LAT 210A.
Overlaps with CHC/LAT 212.
Restriction: Chicano/Latino Studies 210A-B and 212 may not both be taken for credit.

CHC/LAT 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.
Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

CHC/LAT 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.
Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.
Prerequisite: CHC/LAT 211A.

CHC/LAT 215. Transnational Migration. 4 Units.
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troublings of places, spaces, borders, and bodies of all sorts.
Same as SOC SCI 254A, ANTHRO 235A.
Restriction: Graduate students only.

CHC/LAT 217. Street Ethnography. 4 Units.
Focuses on urban street populations, especially gangs, and outlines some of the major conceptual and theoretical issues related to this topic and the processes of street socialization. Methods of inquiry include mapping, ethnohistory, survey questionnaires, and other quantitative techniques.
Same as CRM/LAW C222.
Restriction: Graduate students only.

CHC/LAT 221. Race, Ethnicity, and Social Control. 4 Units.
Origins and organization of racialized social control, with emphasis on criminal justice. Racial politics of criminal/juvenile justice considered in comparative (historical and international) perspective. Exploration of theoretical and methodological issues for research on race, ethnicity, and social control.
Same as CRM/LAW C241.
Restriction: Graduate students only.

CHC/LAT 235. U.S. Ethnic Politics. 4 Units.
Assesses theories of ethnic political attitudes and behaviors in U.S. politics and examines methodological approaches to testing theories of ethnic politics. The primary focus is contemporary ethnic politics with attention to ethnic politics in American political development.
Same as POL SCI 245A.
Restriction: Graduate students only.

CHC/LAT 289. Special Topics in Chicano/Latino Studies. 1-4 Units.
Current research in Chicano/Latino Studies.
Repeatability: May be repeated for credit unlimited times.

CHC/LAT 290. Dissertation Research. 4 Units.
Dissertation research with Chicano/Latino faculty.
Repeatability: May be taken for credit 10 times.
Restriction: Graduate students only.
CHC/LAT 299. Independent Study. 4 Units.
Independent study with Chicano/Latino Studies faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Cognitive Sciences Courses

PSYCH 7A. Introduction to Psychology. 4 Units.
Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior. Course may be offered online.

Same as PSY BEH 9.
Overlaps with PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9A. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSY BEH 11A.
Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9B. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSY BEH 11B.
Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9C. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSY BEH 11C.
Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9D. Psychology Fundamentals Research. 1.3 Unit.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.

Corequisite: PSYCH 9A.
PSYCH 9E. Psychology Fundamentals Research. 1.3 Unit.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.
Corequisite: PSYCH 9B.

PSYCH 9F. Psychology Fundamentals Research. 1.3 Unit.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.
Corequisite: PSYCH 9C.

PSYCH 10A. Probability and Statistics in Psychology I. 4 Units.
An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.
Overlaps with ANTHRO 10A, SOCECOL 13, SOC SCI 10A, SOCIOL 10A, POL SCI 10A.
Restriction: Psychology majors have first consideration for enrollment.
(Va)

PSYCH 10B. Probability and Statistics in Psychology II. 4 Units.
An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.
Prerequisite: PSYCH 10A.
Overlaps with ANTHRO 10B, SOCECOL 13, SOC SCI 10B, SOCIOL 10B, POL SCI 10B.
Restriction: Psychology majors have first consideration for enrollment.
(Va)

PSYCH 10C. Probability and Statistics in Psychology III. 4 Units.
An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.
Prerequisite: PSYCH 10B.
Overlaps with ANTHRO 10C, SOCECOL 13, SOC SCI 10C, SOCIOL 10C, POL SCI 10C.
Restriction: Psychology majors have first consideration for enrollment.
(Vb)

PSYCH 21A. Adolescent Psychology. 4 Units.
Focuses on psychosocial dynamics of today's adolescents in America emphasizing the quest for identity, independence, values, and sexual orientation. The influence of society, family, school, and peers is analyzed. Strategies for helping troubled adolescents are discussed.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Overlaps with PSY BEH 112D.
(III)

PSYCH 46A. Introduction to Human Memory. 4 Units.
Covers the core concepts of modern research and theorizing about human memory, including structural subdivisions (e.g., perceptual memory, short-term memory, long-term memory), different measures of memory (e.g., recall, reorganization), and some practical applications of memory research (e.g., mnemonics). Course may be offered online.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Overlaps with PSYCH 140M, PSY BEH 192J.
(III)
PSYCH 56L. Acquisition of Language. 4 Units.
What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year olds. Comparison of kinds of data on which these theories are based.

Same as LINGUIS 51.

(III)

PSYCH 78A. Self-Identity and Society. 4 Units.
Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as SOCIOL 31.
Overlaps with SOCIOL 61A.

(III)

PSYCH 89. Special Topics in Lower-Division Psychology. 4 Units.
Studies in selected areas of psychology at the lower-division level. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

PSYCH H101A. Honors Seminar in Psychology I. 4 Units.
Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Honors Program in Psychology students only.

PSYCH H101B. Honors Seminar in Psychology II. 4 Units.
Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101A.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Honors Program in Psychology students only.

PSYCH H101C. Honors Seminar in Psychology III. 4 Units.
Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101B.
Repeatability: May be taken for credit 2 times.
Restriction: Honors Program in Psychology students only.

PSYCH 109. Cognitive Sciences Research Seminar. 4 Units.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.

Corequisite: PSYCH 9B.
Prerequisite: PSYCH 9A.
Restriction: Cognitive Sciences majors have first consideration for enrollment.
PSYCH 110. Quantitative Methods for Cognitive Sciences Research. 4 Units.
Basics of quantitative methods used in cognitive science research focusing on linear algebra, Fourier analysis, multivariate statistics, and signal
detection theory. Examples drawn from models and methods used in cognitive sciences research with practical examples.

Prerequisite: MATH 2A and MATH 2B and STATS 7 AND (PSYCH 114M or I&C SCI 31).

Restriction: Cognitive Sciences majors have first consideration for enrollment.

PSYCH 111BW. Honors Advanced Experimental Psychology. 4 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH H111B.
Prerequisite: (PSYCH H111A or PSYCH 112A). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Honors Program in Psychology students only.

(lb)

PSYCH H111A. Honors Experimental Psychology. 4 Units.
Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH H111LA.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSYH BEH 11A and PSYH BEH 11B and PSYH BEH 11C)) and ((PSYCH 10A and 10B and 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH 112A.

Restriction: Campuswide Honors Program students only.

PSYCH H111B. Honors Advanced Experimental Psychology Laboratory. 2 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 111BW.

PSYCH H111C. Honors Research in Experimental Psychology. 4 Units.
Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project
are submitted at the end of the quarter.

Prerequisite: PSYCH 111BW or PSYCH 112B.

Restriction: Honors Program in Psychology students only.

PSYCH 112A. Experimental Psychology. 4 Units.
Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH 112LA.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSYH BEH 11A and PSYH BEH 11B and PSYH BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH H111A, PSYCH 112F, PSYCH 112G.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112B. Advanced Experimental Psychology. 4 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 112LB.
Prerequisite: PSYCH 112A and PSYCH 112LA.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology majors have first consideration for enrollment.
PSYCH 112BW. Advanced Experimental Psychology. 4 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 112LB.
Prerequisite: PSYCH 112A and PSYCH 112LA. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112C. Research in Experimental Psychology. 4 Units.
Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Prerequisite: PSYCH 112B and PSYCH 112LB.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112D. Effective Graphical Presentation of Data. 4 Units.
Learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112LD.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and STATS 7)).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LA. Experimental Psychology Laboratory. 2 Units.
Required laboratory section and co-requisite for Psych 112A.

Corequisite: PSYCH 112A.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LB. Advanced Experimental Psychology Laboratory. 2 Units.
Required laboratory section and co-requisite for PSYCH 112B and PSYCH 112BW.

Corequisite: PSYCH 112B or PSYCH 112BW.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LC. Research in Experimental Psychology.
Required laboratory section and co-requisite for PSYCH 112C.

Corequisite: PSYCH 112C.

PSYCH 112LD. Effective Graphical Presentation of Data Lab. 2 Units.
Lab to learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112D.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LM. Research Methods in Psychology Laboratory. 2 Units.
Required laboratory section and co-requisite for PSYCH 112M.

Corequisite: PSYCH 112M.

Restriction: Psychology majors have first consideration for enrollment.
PSYCH 112LR. Cognitive Robotics Laboratory. 2 Units.
Required laboratory section and co-requisite for Psych 112R.
Corequisite: PSYCH 112R.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112M. Research Methods in Psychology. 4 Units.
Research methods in psychology for majors who wish to fulfill this requirement separately from upper-division writing. Covers both experimental and descriptive research methods, analysis of results, and reading the psychological literature. Research experience is provided in laboratory sections.
Corequisite: PSYCH 112LM.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).
Overlaps with PSYCH 112F, PSYCH 112FW.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112R. Cognitive Robotics. 4 Units.
Introduces concepts on experimental design, embodiment, robot construction, and computer programming. Concepts of embodied intelligence and case studies of cognitive robotics are covered in lecture. Simple robots are constructed and programmed to carry out different behavioral experiments in lab.
Corequisite: PSYCH 112LR.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 113T. Introduction to Psychological Tests and Measurement. 4 Units.
Principles of psychological measurement, including elementary psychophysics, psychometrics, test theory, and the measurement of abilities, attitudes, traits, and interests. Reliability and validity of psychological measurements.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and PSYCH 10A.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 114M. MATLAB Programming. 4 Units.
MATLAB is a mathematical software package for solving quantitative problems often encountered in experimental psychology. Topics include rudiments of programming, statistical analysis of data, matrix algebra, signal processing, graphic visualization, and simulated models of cognitive and perceptual processes.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 119. Special Topics in Research Methodologies. 1-4 Units.
Studies in selected areas of research methodologies. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 120A. Abnormal Psychology. 4 Units.
Introduction to psychopathology and behavioral deviations, and the concepts of theories regarding these conditions.
Prerequisite: PSYCH 7A or PSYCH 9C or PSY BEH 9 or PSY BEH 11C.
Overlaps with PSY BEH 102C.
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 120D. Developmental Psychology. 4 Units.
A general introduction to the study of the physical, intellectual, social, and emotional development of the child from birth to adulthood.

Prerequisite: PSYCH 7A or PSYCH 9A or PSY BEH 9 or PSY BEH 11A

Overlaps with PSY BEH 111D.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 120H. History of Psychology. 4 Units.
A history of the development of various schools and systems of psychological thought.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSY BEH 192A.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 120P. Personality Theories. 4 Units.
A survey of the evolution of personality theory during this century. An overview of major perspectives in the field, with special attention to Freud, Jung, and Adler.

Prerequisite: PSYCH 7A or PSYCH 9C or PSY BEH 9 or PSY BEH 11C.

Overlaps with PSY BEH 170S.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 121M. Theories of Motivation. 4 Units.
Factors affecting the behavioral performance of organisms. A survey of theoretical and empirical approaches to the physiological, psychological, and social factors which generate behavior.

Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).

Overlaps with PSY BEH 178S.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 121P. Positive Psychology. 4 Units.
Positive psychology, at the subjective level, is about valued subjective experiences; at the individual level, it is about positive individual traits; and at the group level, it is about the civic virtues and institutions that move individuals toward better citizenship.

Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 121S. Psychology of Sleep and Consciousness. 4 Units.
Covers the physiology, neurochemistry, and neuroanatomy associated with sleep, contemporary sleep theory, REM and NREM, phenomenology, sleep disorders, examination of differences between conscious and unconscious cognitive function, the history of sleep and dream theories from ancient time to present day.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 122C. Clinical Psychology. 4 Units.
Provides overview of the clinical psychology field including theories and techniques used in counseling and testing.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 122I. Organizational/Industrial Psychology. 4 Units.
Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research and consumer psychology. Potential ethical problems are discussed.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSY BEH 11B or PSY BEH 11C or PSYCH 7A or PSYCH 9A or PSYCH 9B or PSYCH 9C.

Same as PSY BEH 180S.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 123P. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PHILOS 143.

Restriction: Psychology and Philosophy majors have first consideration for enrollment.

PSYCH 124S. Sports Psychology. 4 Units.
Discuss the field of sports psychology with an emphasis on clinical practice including motivation, goal setting, performance skills, and mental skills. Discusses and utilizes a wide range of techniques designed to enhance performance and manage problems among athletes.

Prerequisite: (PSYCH 7A or PSYCH 9C) or (PSY BEH 9 or PSY BEH 11C).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 124V. Psychology of Violence. 4 Units.
Discuss the psychology of violence and aggression with an emphasis on understanding the psychological, social, and physiological roots of violent and aggressive behavior. Psychological treatment techniques and strategies for prevention of aggressive and violent behavior are also discussed.

Prerequisite: (PSYCH 7A or PSYCH 9C) or (PSY BEH 9 or PSY BEH 11C).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 127A. Adult Development. 4 Units.
Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time. Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSY BEH 113D.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127C. Clinical Child Psychology. 4 Units.
Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy implications of identifying children who are different.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSY BEH 152C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127D. Development of Gender Differences. 4 Units.
Examines research on how sexes differ in physiology, cognitive functioning, personality, and social behavior. Sex-differentiated development from the prenatal period through adulthood. Explanations for male-female differences are sought, focusing on biological (genetic, hormonal), and social (familial, cultural) mechanisms.

Prerequisite: PSY BEH 9 or PSYCH 9B or PSY BEH 11B or PSYCH 7A.

Same as PSY BEH 117D.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127E. Psychology and Emotion. 4 Units.
General theories of emotion and research regarding cognitive, behavioral, physiological, and subjective experience of emotion. Specific topics include emotion regulation, emotion and health, emotional intelligence, and emotional development.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.

Same as PSY BEH 177S.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 127G. Gerontology. 4 Units.
Examines stereotypes and myths associated with aging; physiological and psychological changes that accompany old age; distinguishes behavior changes due to aging per se from those due to historical and socioeconomic factors; political, social aspects of old age in contemporary society.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSY BEH 114D.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127H. Child Health Psychology. 4 Units.
Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children's beliefs about health, illness, and medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of child's illness on family.

Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 9C or PSYCH 7A. Recommended: SOCECOL 10.

Same as PSY BEH 138H.

Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Public Health Policy majors have first consideration for enrollment.

PSYCH 127I. Infant Development. 4 Units.
Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and cognitive development.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSY BEH 110D.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127T. Child Therapies. 4 Units.
Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people's lives.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 122C.

Same as PSY BEH 155C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 129. Special Topics in General Psychology. 4 Units.
Studies in selected areas of general psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 130A. Perception and Sensory Processes. 4 Units.
A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis on the visual system.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.

Same as PSY BEH 192E.

Overlaps with PSYCH 131A, PSYCH 131B.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 131A. Vision. 4 Units.
Visual perception and the anatomy and physiology of the visual system. Topics include: the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as BIO SCI N182.
Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology majors have first consideration for enrollment.

PSYCH 131B. Hearing. 4 Units.
Auditory perception, the anatomy and physiology of the auditory system, and the physics of sound. Topics include: neural transduction of sound, sensitivity, sound localization, complex sound perception, and hearing loss.

Prerequisite: (PSYCH 9A and PSYCH 9B) or (PSY BEH 11A and PSY BEH 11B).
Overlaps with PSYCH 130A, PSY BEH 192E.

Restriction: Upper-division students only. Psychology majors have first consideration for enrollment.

PSYCH 135A. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 235A.

PSYCH 135B. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 235B.

PSYCH 135C. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 235C.

PSYCH 135M. The Mind/Body Problem. 4 Units.
What is consciousness and what is matter and how are the two related? How can brains have minds? This multidisciplinary course draws on information from the fields of computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 139. Special Topics in Perception and Sensory Processes. 4 Units.
Studies in selected areas of perception and sensory processes. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 140C. Cognitive Science. 4 Units.
Introduction to investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include: perception, attention, knowledge representations, learning and memory, action, reasoning, and language.
Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSYCH 11B) or PSYCH 7A or (PSYCH 9A and PSYCH 9B).
Same as PSY BEH 192G.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 140L. Principles of Learning Theory. 4 Units.
Investigation of the learning and memory processes of humans and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.
Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.
Same as PSY BEH 192I.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 140M. Human Memory. 4 Units.
Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSY BEH 192J.
Overlaps with PSYCH 46A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 141J. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.
Same as EDUC 141A.
Restriction: Psychology majors and School of Education students have first consideration for enrollment.

PSYCH 141K. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.
Same as EDUC 141B.
Restriction: Psychology majors and School of Education students have first consideration for enrollment.

PSYCH 141L. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lecture, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.
Same as EDUC 141C.
Restriction: Psychology majors and School of Education students have first consideration for enrollment.

PSYCH 141M. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.
Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).
Same as EDUC 141D.
PSYCH 141N. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as EDUC 141E.

PSYCH 141O. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as EDUC 141F.

PSYCH 141P. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as EDUC 141G.

PSYCH 141Q. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as EDUC 141H.

PSYCH 141R. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as EDUC 141I.

PSYCH 143P. Human Problem Solving. 4 Units.
Modern developments in the psychology of human problem solving. Topics include: concept identification, arithmetic, sets, logic puzzles, story problems, group problem solving, and theorem proving.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSY BEH 192K.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 144A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as SOC SCI 186A, CHC/LAT 191A.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.
PSYCH 144B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children and be culturally sensitive.

Same as SOC SCI 186B, CHC/LAT 191B.
Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

PSYCH 144C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as SOC SCI 186C, CHC/LAT 191C.
Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

PSYCH 145P. Attention and Learning Deficits in Children I. 4 Units.
Learning in normal and attention-deficit disordered children. Covers the normal developmental course of learning and a variety of deficits. Includes field work with attention-deficit disordered children.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 145Q. Attention and Learning Deficits in Children II. 4 Units.
Learning in normal and attention-deficit disordered children. Covers the normal developmental course of learning and a variety of deficits. Includes field work with attention-deficit disordered children.

Prerequisite: PSYCH 145P.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 145R. Attention and Learning Deficits in Children III. 4 Units.
Learning in normal and attention-deficit disordered children. Covers the normal developmental course of learning and a variety of deficits. Includes field work with attention-deficit disordered children.

Prerequisite: PSYCH 145Q.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 146MW. Writing about Memory. 4 Units.
Covers a broad range of texts, literary, philosophical, and scientific, each probing the nature of memory and its meaning in human life. Readings are drawn from across many disciplines and many perspectives.

Prerequisite: PSYCH 7A or PSYCH 9B or PSY BEH 9 or PSY BEH 11B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 147C. Cognitive Behavior Therapy. 4 Units.
Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.

Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSY BEH 11C) or PSYCH 7A or (PSYCH 9A and PSYCH 9C).
Same as PSY BEH 154C.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 148A. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 228A.

PSYCH 148B. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 228B.

PSYCH 148C. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 228C.

PSYCH 149. Special Topics in Cognition and Learning. 4 Units.
Studies in selected areas of cognition and learning. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 150. Psychology of Language. 4 Units.
Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.

Same as LINGUIS 155.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 151. Brainwaves in Language Research. 4 Units.
Provides a hands-on introduction to the use of electroencephalography (EEG) in language processing research. In addition to theoretical discussions, students design, deploy, and analyze a novel EEG experiment of their own during the quarter.

Prerequisite: PSYCH 150.

PSYCH 156A. Acquisition of Language II. 4 Units.
Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the "how" of language acquisition.

Prerequisite: Recommended: PSYCH 56L or LINGUIS 51.

Same as LINGUIS 150.

Restriction: Psychology majors have first consideration for enrollment.
PSYCH 157M. Computational Methods for Language Research. 4 Units.
Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.
Prerequisite: PSYCH 155 or LINGUIS 155 or PSYCH 156A or LINGUIS 150.
Same as LINGUIS 107M.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 247M.

PSYCH 158A. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 248A.

PSYCH 158B. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 248B.

PSYCH 158C. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 248C.

PSYCH 159. Special Topics in Semiotics and Language. 4 Units.
Studies in selected areas of language sciences. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 160A. Introduction to Cognitive Neuroscience. 4 Units.
Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.
Same as PSY BEH 192L, BIO SCI N166.
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 160D. Brain Disorders and Behavior. 4 Units.
Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory and decision-making.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N165.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 161. Language and the Brain. 4 Units.
Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.
Prerequisite: BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N160, LINGUIS 158.
Restriction: Psychology and Biology majors have first consideration for enrollment.

PSYCH 161H. Hearing and the Brain. 4 Units.
An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.
Prerequisite: PSYCH 160A or BIO SCI N110.
Same as BIO SCI N147.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 161P. Perceptual Neuroscience. 4 Units.
Examines the physiology of cortical networks underlying human perceptual experience.
Prerequisite: PSYCH 160A or PSY BEH 192L.
Same as PSY BEH 192P.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 162A. Neurobiology of Learning and Memory. 4 Units.
How the brain and behavior change as a result of experience, with an emphasis on identifying the neurochemical processes through which memory is stored and the parts of the brain that are involved.
Prerequisite: BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N158.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 162B. Human Memory Disorders. 4 Units.
Focuses on models and methods of assessing human memory and its disorders. Exposure to conventional and new assessment devices provided.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 164A. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 264A.
PSYCH 164B. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 264B.

PSYCH 164C. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 264C.

PSYCH 165A. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 263A.

PSYCH 165B. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 263B.

PSYCH 165C. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 263C.

PSYCH 168E. Embodied Cognition. 4 Units.
Addresses concepts of embodiment in cognitive sciences. Introduces the notion of how the brain is closely coupled to the body and its interaction with the environment. Case studies of both natural and artificial systems are explored.

Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 169. Special Topics in Cognitive Neuroscience. 4 Units.
Studies in selected areas of cognitive neuroscience. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 171. Psychology of a Diverse Society. 4 Units.
Examines the social and cultural bases of human behavior, including ethnicity, gender, gender orientation, class, and religion. Analysis of historical, political, and economic factors influencing a diverse society.

Restriction: Psychology majors have first consideration for enrollment.
PSYCH 172S. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online.
Same as REL STD 112B, SOC SCI 130B, LPS 140B.

PSYCH 173A. Psychological Anthropology. 4 Units.
Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.
Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)
Same as ANTHRO 132A.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 174A. Asian American Psychology. 4 Units.
Examines the social and psychological concerns of Asian Americans; e.g., coping with racial prejudice, maintaining bicultural identities, dealing with cross-cultural conflicts in interracial relationships, and trying to reconcile generational differences between immigrant parents and their American-born children.
Same as ASIANAM 141.

PSYCH 174E. African American Psychology. 4 Units.
Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.
Same as AFAM 153.

PSYCH 174F. Chicano/Latino Psychology. 4 Units.
Examines research and literature investigating Chicano/Latino ethnicity as a variable influencing behavior. Explores mental health needs and issues of Chicano/Latinos and discusses competent, sensitive methods of mental health service delivery.
Same as CHC/LAT 171.

PSYCH 174H. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.
Same as CHC/LAT 170, SOC SCI 165.

PSYCH 176A. Political Psychology. 4 Units.
Examines how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses the formation of political attitudes, the process of political decision-making, the nature of political leadership.
Same as POL SCI 137C.
Restriction: Psychology and Political Science majors have first consideration for enrollment.

PSYCH 177D. Deviance. 4 Units.
Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.
Same as SOCIOL 156, CRM/LAW C107.
Restriction: Criminology, Law and Society, Social Ecology, Sociology, and Psychology majors have first consideration for enrollment.
PSYCH 177F. Forensic Psychology: Advanced Seminar. 4 Units.
The focus is on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and (PSY BEH 178S or CRM/LAW C149).

Same as PSY BEH 156C, CRM/LAW C136.

Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Criminology, Law and Society majors have first consideration for enrollment.

PSYCH 177P. Developmental Psychopathology. 4 Units.
Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 120A. Recommended: SOCECOL 10.

Same as PSY BEH 153C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 178N. Social Psychology of Networks. 4 Units.
Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as SOCIOL 135.

Restriction: Sociology and Psychology majors have first consideration for enrollment.

PSYCH 179. Special Topics in Interdisciplinary Studies. 1-4 Units.
Studies in selected areas of interdisciplinary studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 190. Senior Thesis. 4 Units.
Student writes senior thesis on a topic of psychology with guidance from a three-member committee comprised of Cognitive Sciences faculty. Senior thesis includes the following: research statement, literature review, experimental design, data collection and analysis, and a written final thesis.

Grading Option: In progress only.

Repeatability: May be taken for credit 3 times.

PSYCH 198. Directed Group Study. 1-4 Units.
Directed study with Cognitive Sciences faculty.

Repeatability: May be repeated for credit unlimited times.

PSYCH 199. Independent Study. 1-4 Units.
Independent research with Cognitive Sciences faculty.

PSYCH 201A. Cognitive Sciences Research Seminar. 1.3 Unit.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Psychology graduate students only.
PSYCH 201B. Cognitive Sciences Research Seminar. 1.3 Unit.
Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201A.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 201C. Cognitive Sciences Research Seminar. 1.4 Unit.
Weekly reports and colloquia by faculty, students, and visitors.

Prerequisite: PSYCH 201B.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 202A. Proseminar in the Cognitive Sciences. 1 Unit.
Introduction to the conceptual foundations and basic research results in the cognitive sciences for first-year graduate students.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 203A. Discrete Mathematics and Probability. 4 Units.
Logic and set theory are covered during the first three weeks, using an interactive computer system. The remaining seven weeks are devoted to probability theory and cover elementary concepts from samples spaces to Chebychev's Inequality and the moment generating function.

Restriction: Graduate students only.

PSYCH 203B. Introduction to Mathematical Statistics. 4 Units.

Restriction: Graduate students only.

PSYCH 203C. Algorithmic Statistics. 4 Units.
Discussion of the fundamentals of statistical inference and computational implementations of common statistical models.

Restriction: Graduate students only.

PSYCH 203D. Applied Mathematics for Cognitive Sciences Research. 4 Units.
Covers the basics of linear systems analysis, focusing on linear algebra, Fourier analysis, differential equations, and elementary signal processing. Applications in Cognitive Science and Cognitive Neuroscience research will be developed.

Prerequisite: PSYCH 205A.
Restriction: Psychology graduate students only.

PSYCH 204A. Seminar in Professional Development. 1 Unit.
Development of professional skills. Focuses on grant writing and submission process, responsible conduct of research, and ethics training.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 204B. Seminar in Professional Development. 1 Unit.
Development of professional skills. Focus on scientific presentations and preparation.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.
PSYCH 204C. Seminar in Professional Development. 1 Unit.
Development of professional skills. Focuses on career opportunities, interests and information, and community outreach.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 205A. Computational and Research Methods with MATLAB. 4 Units.
Introduces rudiments of programming, statistical analysis and probability theory, graphic visualization, GUI design, spectral analysis, and simulation models using MATLAB, a software package for solving quantitative problems often encountered in experimental psychology.
Restriction: Graduate students only.

PSYCH 205B. Running Experiments Using MATLAB. 4 Units.
Provides an in-depth introduction to writing MATLAB programs to run auditory and visual experiments. Topics covered include program structure, stimulus generation, presentation, and data collection.
Prerequisite: PSYCH 205A.

PSYCH 205C. Computational Statistics. 4 Units.
Introduction to a number of computational statistics approaches including exploratory data analysis and modeling using a probabilistic framework with Bayesian graphical models. Emphasis will be on in-class programming using MATLAB.
Restriction: Graduate students only.

PSYCH 210A. Introduction to Cognitive and Brain Sciences I: Perception. 4 Units.
Discusses models of cognition and evidence linking cognition and the brain. Focus is on visual, auditory, and somatic perception and bottom-up mechanisms of attention.
Restriction: Graduate students only.

PSYCH 210B. Introduction to Cognitive and Brain Sciences II: Cognition. 4 Units.
Discusses models of cognition and evidence linking cognition and the brain. Focus is on emotion, top-down attention, goal-directed behavior, categorization, judgment, and decision-making.
Restriction: Graduate students only.

PSYCH 211. Attention and Perception. 4 Units.
Focuses on selective attention, the process of selecting a subset of available information for analysis and representation, and on how stimulus salience, behavioral goals, and expectations influence attentional deployment and perception. Also explores related cognitive processes and applications.
Restriction: Graduate students only.

PSYCH 212. Learning, Memory, and Knowledge Organization. 4 Units.
Addresses fundamental issues in human memory, inductive learning, and knowledge organization. Knowledge representation, storage, retrieval, acquisition, and relation to the environment are explored. Prominent computational approaches are reviewed.
Restriction: Graduate students only.

PSYCH 213. The Mind/Body Problem. 4 Units.
Course is multidisciplinary, drawing on information from the fields of quantum physics, computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.
Restriction: Graduate students only.

PSYCH 214. Bayesian Cognitive Modeling. 4 Units.
Considers a range of statistical methods of data analysis and simple cognitive models using the Bayesian graphical modeling framework.
Restriction: Graduate students only.

PSYCH 215L. Language Acquisition. 4 Units.
Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the "how" of language acquisition.
Restriction: Graduate students only.
PSYCH 215N. Neuroscience of Language. 4 Units.
Covers fundamental issues in the neuroscience of language processing. Topics include word and sentence-level psycholinguistics, and the neural basis of these language functions as revealed by neuropsychological and functional imaging studies.

Restriction: Graduate students only.

PSYCH 215S. Structure of Language. 4 Units.
Explores the structure of human languages, and the theoretical architectures that have been proposed to capture that structure. Special focus on the nature of linguistic facts, the structure of linguistic argumentation, and the psychological claims of linguistic theories.

Restriction: Graduate students only.

PSYCH 216. Introduction to Cognitive Neuroscience. 4 Units.
Explores the neural basis of higher cognitive functions such as perception, attention, language, memory, and executive function as understood from functional brain imaging, neuropsychological disorders, and other neuroscience techniques.

Restriction: Graduate students only.

Concurrent with PSYCH 160A.

PSYCH 217. Vision. 4 Units.
Examines visual sensation and perception using psychophysical and neuroscientific perspectives. Covers visual stimulus description and generation; the eye and retinal processing; LGN and cortical visual area function; specialized processing for form, depth, motion, and color perception; and neurological disorders.

Restriction: Graduate students only.

PSYCH 218. Hearing. 4 Units.
Examines auditory sensation and perception using psychophysical and neuroscientific perspectives. Covers physical aspects of sound; subcortical auditory processing; aspects of sensation and perception such as sensitivity, sound localization, and complex-sound recognition; neuroscientific studies of cortical function; and abnormal auditory processing.

Restriction: Graduate students only.

PSYCH 219. Cognitive Development I: Core Knowledge. 4 Units.
Explores the study of cognitive development in infancy and childhood. Emphasizes the role of this research in answering questions concerning the origins of human knowledge. Addresses topics of space, objects, agency, navigation, number, and conceptual change.

Restriction: Graduate students only.

PSYCH 220. Cognitive Development II: Conceptual Change. 4 Units.
The cognition of human infants is similar to that of other primates. But adult human knowledge is vastly different from that of any other animal. Examines the childhood conceptual changes that underlie adult human cognitive achievements.

Restriction: Graduate students only.

PSYCH 228A. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 148A.

PSYCH 228B. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 148B.
PSYCH 228C. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 148C.

PSYCH 229. Special Topics in Human Cognition. 1.3-4 Units.
Current research in brain/behavior relationships, human memory, and learning theory is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PSYCH 231P. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PHILOS 243.

PSYCH 233A. Observer Theory I. 4 Units.
Provides framework for mathematical analysis of perception/cognition and its relation to the physical world. Permits a unified treatment of perceptual and physical interactions and lays the foundation for a nondualistic, nonreductionistic science. Mathematical aspects include study of Markovian dynamic systems.

Restriction: Graduate students only.

PSYCH 234A. Mathematical Models of Cognitive Processes I. 4 Units.
Mathematical models of various cognitive processes developed since 1960, including learning, memory, perception, psycholinguistics, and problem solving. Models are formulated in different mathematical languages: calculus, algebra, logic, probability, and computer. Difficulties in testing and validating models discussed.

Restriction: Graduate students only.

PSYCH 235A. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 135A.

PSYCH 235B. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 135B.

PSYCH 235C. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 135C.
PSYCH 236. Multivariate Time Series Analysis. 4 Units.
Introduces multivariate time series analysis theory and methods emphasizing computational methods in spectral analysis, autoregressive modeling, information theory, principal and independent components analysis, and nonlinear dynamics. Applications to human neuroimaging data are extensively discussed.
Prerequisite: PSYCH 205A.
Restriction: Graduate students only.

PSYCH 237. Advanced Bayesian Cognitive Modeling. 4 Units.
Considers a range of advanced cognitive process models including models of signal detection, memory retention, category learning, stimulus representation, and reasoning using the Bayesian graphical modeling framework.
Prerequisite: PSYCH 214.
Restriction: Graduate students only.

PSYCH 238. Auditory Signal Processing and Experimental Design. 4 Units.
Topics include physics and measurement of sounds, digital signal processing (DSP), recording/processing of speech and music, generating complex sounds (e.g., FM and AM), use of sound level meter and artificial ear (coupler), digital filtering, signal mixing, autocorrelation and cross-correlation.
Prerequisite: PSYCH 205A.

PSYCH 239. Special Topics in Methodology and Models. 1.3-4 Units.
Current research in cognitive sciences methodologies, concepts, and models is presented.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 245A. Computational Models of Language Learning. 4 Units.
Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.
Prerequisite: PSYCH 215L.
Restriction: Graduate students only.

PSYCH 247M. Computational Methods for Language Research. 4 Units.
Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.
Prerequisite: PSYCH 215L or PSYCH 215S or PSYCH 215N or PSYCH 245A.
Restriction: Graduate students only.
Concurrent with PSYCH 157M and LINGUIS 107M.

PSYCH 248A. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 158A.

PSYCH 248B. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 158B.
PSYCH 248C. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 158C.

PSYCH 249. Special Topics in Language Science. 1.3-4 Units.
Foundations and current research in theoretical, experimental, and computational linguistics.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PSYCH 254. Human Information Processing. 4 Units.
Detailed introduction to speed-accuracy tradeoff experimental procedures; speed-accuracy tradeoff issues; quantitative modeling of temporal aspects of human information processing.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only or Honors Program in Psychology undergraduate students.

PSYCH 259. Special Topics in Human Performance. 1.3-4 Units.
Current research in the human issues involved with sensation, perception, and cognition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PSYCH 261N. Cortical Neuroscience. 4 Units.
Physiology of the cerebral cortex, theoretical neuroscience, and the neural basis of perception.

Prerequisite: PSYCH 216.

PSYCH 262. Functional Neuroanatomy. 4 Units.
It is impossible to truly understand human behavior without some understanding of the physical structure that enables behavior. Examines recent findings in functional neuroanatomy through lectures and papers discussing links between particular behaviors and specific brain structures.

Restriction: Graduate students only.

PSYCH 263A. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with PSYCH 165A.

PSYCH 263B. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Restriction: Graduate students only.

Concurrent with PSYCH 165B.

PSYCH 263C. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Restriction: Graduate students only.

Concurrent with PSYCH 165C.
PSYCH 264A. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Concurrent with PSYCH 164A.

PSYCH 264B. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Concurrent with PSYCH 164B.

PSYCH 264C. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Concurrent with PSYCH 164C.

PSYCH 265. Introduction to Functional MRI. 4 Units.
Describes the fundamentals of imaging the human brain function using functional Magnetic Resonance Imaging (fMRI). Topics include basic fMRI physics, experimental design, and data acquisition and analysis.
Restriction: Graduate students only.

PSYCH 266. Special Topics in Cognitive Neuroscience. 1.3-4 Units.
Current research in cognitive neuroscience.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 267. Cognitive Neuroscience of Music. 4 Units.
Introduction to cortical mechanisms involved in music perception and production.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSYCH 268A. Computational Neuroscience. 4 Units.
Introduction to computational neuroscience. Mathematical models of single neurones, neural circuits, thalamocortical systems, and cortical mass action can stimulate single-unit, local field potential, and EEG dynamics. These models are used to investigate mechanisms of sensation, motor control, attention, and consciousness.
Prerequisite: PSYCH 205A and (PSYCH 216 or PSYCH 261N).

PSYCH 268R. Cognitive Robotics. 4 Units.
Introduces concepts for studying cognitive function by embedding brain models on robotic platforms. Topics include robot construction, computer programming, and the notion of embodiment. Students construct simple robots and program these robots to perform different behaviors.

PSYCH 269. Special Topics in Cognitive Neuroscience. 1.3-4 Units.
Current research in cognitive neuroscience.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
PSYCH 271A. Cognitive Neuroscience Brownbag. 1.3 Unit.
Participants, who include faculty interested in auditory and visual perception/psychophysics, along with interested graduate students, make research presentations and discuss current publications. The seminar also serves as a forum for presentations by visiting researchers.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 271B. Cognitive Neuroscience Brownbag. 1.3 Unit.
Participants, who include faculty interested in auditory and visual perception/psychophysics, along with interested graduate students, make research presentations and discuss current publications. The seminar also serves as a forum for presentations by visiting researchers.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 271C. Cognitive Neuroscience Brownbag. 1.4 Unit.
Participants, who include faculty interested in auditory and visual perception/psychophysics, along with interested graduate students, make research presentations and discuss current publications. The seminar also serves as a forum for presentations by visiting researchers.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 289. Special Topics in Sensation and Perception. 1.3-4 Units.
Current research in the reception and processing of visual and auditory stimuli presented.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 290. Dissertation Research. 1-12 Units.
Dissertation research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology graduate students only.

PSYCH 299. Individual Study. 4-12 Units.
Individual research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Economics Courses

ECON 1. Introduction to Economics. 4 Units.
An analysis of the problems society faces in organizing itself to provide goods and services. How decisions of government, business, and the individual relate to current economic problems such as unemployment, inflation, poverty, and environmental pollution.

Restriction: Non-Economics majors only. ECON 1 may not be taken for credit if taken concurrently or after ECON 20A or ECON 20B.

ECON 11. The Internet and Public Policy. 4 Units.
How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as I&C SCI 11.

ECON 12. Federal Reserve: Past, Present, and Future. 4 Units.
Studies central banking in the United States from colonial times to the present. Focuses on the past, present, and future of the Federal Reserve and precursors to that system, which was established in 1913.
ECON 13. Global Economy. 4 Units.
Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as INTL ST 13.

Restriction: International Studies, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(III, VIII)

ECON 15A. Probability and Statistics in Economics I. 4 Units.
An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics. MGMT 7 may not be used to substitute for ECON 15A-ECON 15B.

Prerequisite: MATH 2A and MATH 2B and MATH 4.

Restriction: No credit for MGMT 7 if taken after ECON 15A and ECON 15B. Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(Va)

ECON 15B. Probability and Statistics in Economics II. 4 Units.
An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics. MGMT 7 may not be used to substitute for ECON 15A-ECON 15B.

Prerequisite: MATH 2A and MATH 2B and MATH 4.

Restriction: No credit for MGMT 7 if taken after ECON 15A OR 15B. Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(Va)

ECON 17. An Economic Approach to Religion. 4 Units.
Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.

Same as REL STD 17.

(III)

ECON 20A. Basic Economics I. 4 Units.
The fundamentals of microeconomics. The behavior of firms and consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency. Course may be offered online.

Overlaps with ECON 23.

(III)

ECON 20B. Basic Economics II. 4 Units.
The fundamentals of macroeconomics. Government behavior: monetary and fiscal policy, inflation, and unemployment. Effective fall 2006, the content of Economics 20B is macroeconomics. This course cannot be taken to repeat Economics 20B taken prior to fall 2006. Course may be offered online.

Prerequisite: ECON 20A or ECON 13.

(III)

ECON 23. Basic Economics for Engineers. 4 Units.
The fundamentals of microeconomics. The behavior of firms and of consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.

Overlaps with ECON 20A.

(III)
ECON 25. The Economics of Accounting Decisions. 4 Units.
Introduction to accounting concepts and principles, including the accounting model and accounting style, transaction analysis, and preparation of financial statements. An analysis of the similarities and differences between accounting and economic concepts (e.g., value, profits).
Prerequisite: ECON 20A.
Overlaps with MGMT 30A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 26A. Managerial Accounting. 4 Units.
An introduction to the fundamentals of management accounting, including the study of terms and concepts, comparisons of different costing systems, analysis of cost-volume profit relationships, preparation of information for planning, control, and evaluation of performance, and decision analysis.
Prerequisite: MATH 2A and MATH 2B and MATH 4.
Overlaps with MGMT 30B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 100A. Intermediate Economics I. 4 Units.
Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.
Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B.
Overlaps with ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 100B. Intermediate Economic II. 4 Units.
Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.
Prerequisite: ECON 100A.
Overlaps with ECON 105B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 100C. Intermediate Economic III. 4 Units.
Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.
Prerequisite: ECON 100B.
Overlaps with ECON 105C.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 105A. Intermediate Quantitative Economics I . 4 Units.
An advanced and mathematical version of ECON 100A for students in the Quantitative Economics major.
Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B and MATH 3A and MATH 4.
Overlaps with ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 105B. Intermediate Quantitative Economics II . 4 Units.
An advanced and mathematical version of ECON 100B for students in the Quantitative Economics major.
Prerequisite: ECON 105A.
Overlaps with ECON 100B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 105C. Intermediate Quantitative Economics III. 4 Units.
An advanced and mathematical version of ECON 100C for students in the Quantitative Economics major.

Prerequisite: ECON 105B.

Overlaps with ECON 100C.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 107. Economics of Asymmetric Information. 4 Units.
Focuses on the effects of asymmetric information in the markets for traditional economic goods and resources, such as labor, insurance, used cars, credit, and in auctions and bargaining problems. Prerequisite:

Prerequisite: ECON 100A or ECON 105A.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 109. Special Topics in Economic Theory. 4 Units.
Studies in selected areas of Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 115. Behavioral Economics. 4 Units.
Studies the behavioral and psychological biases in economics settings. Both individual decisions and games are discussed.

Prerequisite: ECON 20A and ECON 20B.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 116A. Game Theory I. 4 Units.
Extensive form games with perfect information, and coalitional games. The key solution concepts are Nash Equilibrium, Backward Induction, and the Core. Substantive examples include public good production, oligopoly, electoral competition, auctions, holdup, market entry, and voting.

Prerequisite: ECON 15A and ECON 15B and (ECON 100A or ECON 105A).

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 116B. Game Theory II. 4 Units.
Two-quarter sequence on game theory. Bayesian games, extensive form games with imperfect information, zero-sum games.

Prerequisite: ECON 116A.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 117. Experimental Economics. 4 Units.
Students will learn what constitutes proper experimental design and what laboratory experiments teach us about human behavior and the economy. Students will participate in a sample experiment, evaluate the results, and discuss experiment design and larger issues.

Prerequisite: ECON 15B and ECON 100B.

ECON 122A. Applied Econometrics I. 4 Units.
Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.

Prerequisite: ECON 15A and (ECON 15B or MATH 130B or MATH 133A or MATH 131C or STATS 120C) and ECON 20B.

Overlaps with ECON 123A, ECON 123B.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 122B. Applied Econometrics II. 4 Units.
Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.
Prerequisite: ECON 122A.
Overlaps with ECON 123B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 122CW. Data Analysis Writing. 4 Units.
Research writing course in econometrics focusing on individual research projects. Students employ econometric analysis to address an economic question in a 20-page paper and present their findings to the class in a short presentation.
Prerequisite: ECON 15A and ECON 15B and ECON 122A and ECON 122B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(Ib)

ECON 123A. Econometrics I. 4 Units.
Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.
Prerequisite: (MATH 2A and MATH 2B and MATH 4) or (MATH 3A and STATS 120A and STATS 120B and (STATS 120C or MATH 131C)) and ((ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)).
Overlaps with ECON 122A, ECON 122B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123B. Econometrics II. 4 Units.
Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.
Prerequisite: ECON 123A
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123C. Econometrics III. 4 Units.
Seminar course in which students do an original econometric research project.
Prerequisite: ECON 123B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123CW. Econometrics III. 4 Units.
Seminar course in which students do an original econometric research project.
Prerequisite: ECON 123B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(Ib)

ECON 124. Advances in Econometrics I. 4 Units.
Aims to supplement the training in econometrics for students who have completed either Economics 122A-B or 123A-B-C by covering chapters in the two texts used in these sequences which were not covered.
Prerequisite: (ECON 122A and ECON 122B) or (ECON 123A and ECON 123B).

ECON 125. Business Forecasting. 4 Units.
Students learn how to produce forecasts of the behavior of economic (and other) variables. The techniques examined are linear regression, nonlinear regression, and nonparametric kernel regression, AR, MA, ARMA, ARIMA, and Box-Jenkins.
Prerequisite: ECON 15A and ECON 15B and ECON 20A and ECON 20B.
Overlaps with MGMT 180.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 129. Special Topics in Quantitative Methods. 4 Units.
Studies in selected areas of Quantitative Methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 131A. The Economics of Risk and Uncertainty. 4 Units.
The theory of insurance and joint-ownership of risky enterprises; optimal procedures for the allocation of uncertain payoffs.

Prerequisite: ECON 15A and ECON 15B and ((ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) or (MATH 131A and MATH 131B and STATS 120A and STATS 120B and STATS 120C) or (MATH 130B or MATH 133A or MATH 131C)).

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 132A. Introduction to Financial Investments. 4 Units.
Modern theories of investment and their application to the study of financial markets. The relation between risk and return, diversification, asset pricing, efficient markets hypothesis, and the market valuation of stocks, bonds, options, and futures.

Prerequisite: (ECON 15A and ECON 15B and ECON 122A and ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) or (MATH 131A and MATH 131B and STATS 120A and STATS 120B and STATS 120C) or (MATH 130B or MATH 133A or MATH 131C).

Prerequisite or corequisite: ECON 100C or ECON 105C.

Overlaps with MGMT 141.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 134A. Corporate Finance. 4 Units.
Provides an overview of the modern theory and practice of corporate finance and focuses on two fundamental financial decisions: investment as well as financing. Beginning with discounted cash flow analysis, basic theory will be applied to the valuation of stocks.

Prerequisite: ((ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)) and MATH 131A and MATH 131B and STATS 120A and STATS 120B and STATS 120C.

Overlaps with MGMT 109.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 135. Mathematics of Finance. 4 Units.
After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.

Prerequisite: MATH 3A.

Same as MATH 176.

Restriction: Mathematics, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 139. Special Topics in Financial Economics. 4 Units.
Studies in selected areas of Financial Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 140. Managerial Economics. 4 Units.
A collection of concepts and methods for effective decision making. Explores how the tools of microeconomics, including game theory and industrial organization theory, can be used to make better managerial decisions, particularly those involving allocation of resources within firms.

Prerequisite: ECON 100A and ECON 100B.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 141B. Public Economics II. 4 Units.
Theory of public goods, externalities, voting models, analysis of bureaucracy, the Tiebout model, income redistribution, intergovernmental grants.
Prerequisite: (ECON 100A and ECON 100B) or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 142A. Industrial Organization I. 4 Units.
The theory of market structure. Imperfect markets, government policies and industry performance.
Prerequisite: (ECON 15A and ECON 15B and ECON 100A and ECON 100B) or (ECON 105A and ECON 105B).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 142B. Industrial Organization II. 4 Units.
Regulation and antitrust theory and performance in industries.
Prerequisite: (ECON 15A and ECON 15B and ECON 100A and ECON 100B) or (ECON 105A and ECON 105B).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 142CW. Industrial Organization III. 4 Units.
Research in industrial organization. Satisfies the honors research requirement.
Prerequisite: ECON 15A and ECON 15B and ECON 122A. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(Eb)

ECON 143. Energy Economics. 4 Units.
The economics of markets for oil, natural gas, electricity, renewable energy and their interactions with each other and the rest of the economy. Effects of government intervention, policy measures, economic policy issues arising between energy use and the environment.
Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 144A. Urban Economics I. 4 Units.
Why cities exist, economics of urban land-use, housing demand and tenure choice, traffic congestion.
Prerequisite: ECON 20A and ECON 20B and ECON 15A and ECON 15B. Recommended: ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 144B. Urban Economics II. 4 Units.
Housing policy analysis, urban public goods and services, crime, pollution, urban amenities.
Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 144CW. Urban Economics III. 4 Units.
Allows students to apply knowledge of urban economics in the conduct of individual research.
Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(Eb)

ECON 145. Health Economics. 4 Units.
Considers why some people are healthier than others, why health outcomes differ across countries, the problems of moral hazard and of adverse selection that appear in health insurance, and how hospitals and physicians behave.
Prerequisite: ECON 100A.
ECON 145E. Economics of the Environment. 4 Units.
Surveys economic aspects of natural resources, pollution, population, and the environment. Examines the causes of pollution; analysis of public policies regarding these problems. Emphasis on microeconomic aspects of environmental problems.

Prerequisite: ECON 15A and ECON 15B and ECON 122A and ((ECON 100A and ECON 100B) or ECON 105A).

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 145FW. Economics of the Environment II. 4 Units.
Applications of the tools covered in ECON 145E to such topics as global warming, destruction of the ozone layer, and emissions trading. Emphasis on independent research papers. Syllabus and classes include writing technique.

Prerequisite: ECON 145E and ECON 15A and ECON 15B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 145L. Economics of Law. 4 Units.
Examination of several economic concepts which are useful in understanding legal rules: externalities, the assignment of property rights, and Coase's theorem. Examples are drawn from the fields of pollution control, no-fault insurance, medical malpractice, and product liability.

Prerequisite: (ECON 100A and ECON 100B) or ECON 105A. Prerequisite or corequisite: ECON 100B.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 147A. Corporate Governance. 4 Units.
Studies topics in the internal organization of firms, including rent seeking, incentive contracts, principal-agent problems, internal labor markets, contests, and herd behavior.

Prerequisite: ECON 100A.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 147B. Economics of Strategy. 4 Units.
Uses of tools of economics, game theory in particular, to develop an understanding of business decision making. Deals with questions such as how the firm decides what kind of business to be in, how large should it be, and others.

Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or ECON 105A.

Overlaps with MGMT 110, MGMT 168.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 148. Business Decisions. 4 Units.
Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)).

Same as SOCIOL 138.

Restriction: Sociology majors have first consideration for enrollment.

ECON 149. Special Topics in Economics of Public and Private Organizations. 4 Units.
Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 149W. Special Topics in Economics of Public and Private Organizations. 4 Units.
Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 151A. Labor Economics and Human Resources I. 4 Units.
Labor demand, labor supply, human capital, personnel economics, and other topics.
Prerequisite: ECON 15A and ECON 15B and ECON 100A and ECON 100B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 151B. Labor Economics and Human Resources II. 4 Units.
Labor market discrimination, compensating wage differentials, immigration, and other topics.
Prerequisite: ECON 151A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 152A. Economic Anthropology. 4 Units.
Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.
Prerequisite: One course in general science, anthropology, economics, geography, or sociology.
Same as ANTHRO 125A.
Restriction: Economics, Quantitative Economics, Business Economics, and Anthropology majors have first consideration for enrollment.

ECON 153W. Political Institutions, Legal Systems, and Economic Development. 4 Units.
Studies a variety of empirical papers analyzing how institutions affect economic development. The topics include cross-country studies of institutions as well as narrower topics such as corruption, regulation of entry, political connections, and pork barrel politics.
Prerequisite: ECON 15A and ECON 15B and ECON 100A and ECON 100B and ECON 100C and ECON 122A. Satisfactory completion of the lower-division writing requirement.

ECON 154. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.
Same as INTL ST 156A, SOC SCI 121T, POL SCI 151H.
Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

ECON 157. Economic Development. 4 Units.
Considers the process of economic development across the globe and why some countries are rich and others poor. Discusses the major problems facing developing countries, such as population growth, education, capital formation, environmental protection, and international trade.
Prerequisite: ECON 20A and ECON 20B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 158. Economics of Education. 4 Units.
Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.
Prerequisite: ECON 15A and ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 158W. Economics of Education. 4 Units.
Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.

Prerequisite: ECON 15A and ECON 100A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 159. Special Topics in Economics in Human Resources. 4 Units.
Studies in selected areas of Economics in Human Resources. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 161A. Money and Banking. 4 Units.
Basic elements of money and banking: institutional features and economics of financial markets and, in particular, the U.S. banking system; determinants of interest rates; the Federal Reserve and its role in money supply; effects of money on output and inflation.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B). Prerequisite or corequisite: ECON 100C OR ECON 105C.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 161B. International Money. 4 Units.
Open economy macroeconomics and determination of exchange rates. Asset-market approach to the balance of payments. Internal and external balance in the economy. Macroeconomic policies under fixed and floating exchange rates. The international monetary system and institutions.

Prerequisite: ECON 100A and ECON 100B. Prerequisite or corequisite: ECON 100C.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 161D. Advanced Money and Banking. 4 Units.
Studies business cycles in the United States during the last century. The first portion of the course reviews the theoretical models employed to study economic fluctuations and empirical methods used to measure fluctuations.

Prerequisite: ECON 15A and ECON 15B and ((ECON 100A and ECON 100B and ECON 100C) OR (ECON 105A and ECON 105B and ECON 105C)).

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 162. Poverty, Growth, and Development. 4 Units.
Examines India as a case study for each of the topics studied: growth experience of India along with its poverty eradication record and aspects of poverty and the policies that have been undertaken to tackle poverty.

Prerequisite: ECON 15A and ECON 15B and ECON 100A and ECON 100B and ECON 100C.

ECON 164. American Economic History from Colonization to the Present. 4 Units.
Examines how the American economy evolved from colonization to the post-war era. Topics include relations with foreign countries, the emergence of manufacturing and big business, railroads, slavery, war, the Great Depression, the rise of fiscal and monetary policies.

Prerequisite: ECON 20A and ECON 20B.

ECON 164A. The Industrial Revolution in Western Europe. 4 Units.
How do economists explain the process of economic development during the past three centuries? How has the process of industrialization affected living standards? In focusing on these questions, students will learn how to apply economic theory and quantitative methods.

Prerequisite: ((ECON 100A and ECON 100B and ECON 100C) OR (ECON 105A and ECON 105B and ECON 105C)) and ECON 122A and ECON 122B.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 164AW. The Industrial Revolution in Western Europe. 4 Units.
How do economists explain the process of economic development during the past three centuries? Has the process of industrialization affected living standards? Focusing on these questions, students will learn how to apply economic theory and quantitative methods.

Corequisite: ECON 100C.
Prerequisite: ECON 100C or ECON 105C. Prerequisite or corequisite: ECON 100C. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 165. Economics of International Business. 4 Units.
Students learn to understand and analyze the principal economic issues in the international business arena. Covers topics such as trade theory, foreign direct investment, foreign exchange market, and strategy of international business.

Prerequisite: ECON 100C.

ECON 167. International Trade and Commercial Policy. 4 Units.
Determination of trade flows and the relative prices. Gains from trade, the terms of trade, and income distribution. Imperfect competition and international trade. The effect of tariffs, export subsidies, and import quotas. The effects of free and restricted trade.

Prerequisite: ECON 100A or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 169. Special Topics in Development Economics. 4 Units.
Studies in selected areas of Development Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 190. Senior Thesis. 4 Units.
Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 3 times.

ECON 190BW. Economics Honors Colloquium II. 4 Units.
Colloquium required for honors students in Economics, Quantitative Economics, and Business Economics. Introduces students to independent research. Helps students plan a research program. Students complete their thesis.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement. Must be enrolled in the honors program in Economics.

ECON H190A. Economics Honors Colloquium I. 4 Units.
Colloquium required for honors students in economics, quantitative economics, and business economics. Introduces students to independent research. Helps students plan a research program. Prepares students for thesis writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement. Must be enrolled in the honors program in economics.

ECON 192. Tutoring in Economics. 2 Units.
Enrollment limited to participants in the Economics Peer Tutoring Program. No more than eight units earned in this course may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.

Repeatability: May be taken for credit 4 times.

ECON 197. Field Study. 4 Units.
Not listed in Catalogue.

Repeatability: Unlimited as topics vary.
Restriction: Authorization required or Enrollment by add card only
ECON 198. Directed Group Study. 4 Units.
Not listed in Catalogue.
Repeatability: Unlimited as topics vary.
Restriction: Authorization required or Enrollment by add card only

ECON 199. Independent Study. 1-5 Units.
Independent research with Economics faculty.
Repeatability: May be repeated for credit unlimited times.

ECON 200A. Graduate Colloquium for Economics I. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics graduate students only.

ECON 200B. Graduate Colloquium for Economics II. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.
Prerequisite: ECON 200A.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics graduate students only.

ECON 200C. Graduate Colloquium for Economics III. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.
Prerequisite: ECON 200B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics graduate students only.

ECON 202. Probability and Statistics. 4 Units.
Provides lectures on probability theory and the beginning of mathematical statistics (continued in ECON 220A-ECON 221A) necessary to prepare students for the required econometrics sequence. Topics include probability, distributions, mathematical expectation, sampling, and point estimation.
Restriction: Graduate students only.

ECON 203A. Mathematics for Economists. 4 Units.
Gives students the mathematical background required for graduate work in economics. Topics covered include multivariate calculus, differential equations, and linear algebra.
Restriction: Graduate students only.

ECON 205A. Research Writing in Economics. 4 Units.
For Economics graduate students who are writing their required research paper in an applied field. How to write an original paper in economics. Guidance for specific papers.
Restriction: Economics graduate students only.

ECON 206. How to Write a Paper. 2 Units.
A course on writing. Also discusses how to make an oral presentation, how to go about doing research, and how academic journals operate. Grade based on two written assignments in which student edits and revises a paper.

ECON 210A. Microeconomic Theory I. 4 Units.
Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.
Restriction: Graduate students only.
ECON 210B. Microeconomic Theory II. 4 Units.
Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.
Prerequisite: ECON 210A.
Restriction: Graduate students only.

ECON 210C. Microeconomic Theory III. 4 Units.
Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.
Prerequisite: ECON 210B.
Restriction: Graduate students only.

ECON 210D. Macroeconomic Theory I. 4 Units.
Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.
Restriction: Graduate students only.

ECON 210E. Macroeconomic Theory II. 4 Units.
Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.
Corequisite: ECON 211L.
Prerequisite: ECON 210D.
Restriction: Graduate students only.

ECON 210F. Macroeconomic Theory III. 4 Units.
Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.
Prerequisite: ECON 210E.
Restriction: Graduate students only.

ECON 211L. Macroeconomics Theory II Lab. 2 Units.
Overview of stochastic processes; introduction to dynamic programming; two equilibrium concepts; Ricardian equivalence; real business cycle model; complete versus incomplete markets; asset pricing and the equity premium puzzle.
Corequisite: ECON 210E.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

ECON 219. Special Topics in Economic Theory. 2-4 Units.
Studies in selected areas of Economic Theory. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 220A. Statistics & Econometrics I. 4 Units.
Covers probability mathematical statistics necessary to prepare students for econometric study and empirical work. Topics include probability theory, distributions, sampling, and classical point estimation. A likelihood perspective is emphasized.
Restriction: Grad students only or Consent of instructor to enroll.
ECON 220B. Statistics & Econometrics II. 4 Units.
Beginning with Bayesian point estimation. Then covers interval estimation and hypothesis testing from both classical and Bayesian perspectives, followed by a general discussion of prediction. Finally, all these techniques are applied to the standard linear regression model under ideal conditions, and Generalized Least Squares (GLS) is introduced.

Prerequisite: ECON 220A
Restriction: Prerequisite required and (Grad students only or Consent of instructor to enroll)

ECON 220C. Statistics & Econometrics III. 4 Units.
Beginning by relaxing the ideal conditions of the standard regression model. Potential topics include kernel density estimation, instrumental variables (IV), two-stage least squares (2SLS), panel data models, and simulation-based Bayesian methods, including Gibbs sampling, the bootstrap, econometric time series, discrete choice and count models, sample selection, and duration models. Covers both Bayesian and classical asymptotic methods.

Prerequisite: ECON 220B and SOC SCI 213A
Restriction: Prerequisite required and Grad students only

ECON 221A. Statistics and Econometrics Laboratory I. 2 Units.
Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220A.

ECON 221B. Statistics and Econometrics Laboratory II. 2 Units.
Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220B.

ECON 221C. Statistics and Econometrics Laboratory III. 2 Units.
Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220C.

ECON 222. Replication and Applied Economics Writing. 4 Units.
Before the course begins, students choose a published empirical economics article and obtain the necessary data to replicate it. Students will replicate and extend the economic analysis and write a paper describing their work.

Prerequisite: ECON 220A and ECON 220B and ECON 220C.

ECON 223A. Discrete Choice Econometrics. 4 Units.
Specification, estimation, and testing of discrete choice models, with emphasis on cross-sectional and panel data models and applications. Students use computer packages to apply models and techniques to real data.

Prerequisite: ECON 220A and ECON 220B and ECON 220C.

ECON 224A. Time Series Econometrics. 4 Units.
Econometric analysis of time series data. Moving average and autoregressive series, regression analysis, Box-Jenkins techniques, computational methods, and causality conditions.

Prerequisite: ECON 220A and ECON 220B and ECON 220C.

ECON 229. Special Topics in Social Dynamics Seminar. 4 Units.
Studies in selected areas of Social Dynamics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 231A. Institutions in Historical Perspective I. 4 Units.
Investigates economic and political institutions across the world and throughout history. Focuses on institutions such as property rights, political regimes, regulations, legal systems, corporate organization, and social norms.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.
ECON 231B. Institutions in Historical Perspective II. 4 Units.
Investigates economic and political institutions across the world and throughout history. Focuses on institutions such as property rights, political regimes, regulations, legal systems, corporate organization, and social norms.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 232. Business Cycles in Historical Perspective. 4 Units.
Investigates business cycles in the United States and worldwide during the last two centuries. Topics include causes and consequences of business fluctuations, monetary and fiscal policy, models of fluctuations, and empirical macroeconomics.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 233. European Economic History. 4 Units.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 234. American Economic History. 4 Units.
Focuses on American economic history from colonization onwards. Topics include the development of legal systems, transport systems, financial markets, industrialization, migration, immigration, technological change, and the consequences of slavery.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 239. Special Topics in Financial Economics. 2-4 Units.
Studies in selected areas of Financial Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 241A. Industrial Organization I. 4 Units.
Prerequisite: ECON 100B and ECON 203A.
Restriction: Graduate students only.

ECON 241B. Industrial Organization II. 4 Units.
Prerequisite: ECON 241A and ECON 100B and ECON 203A.
Restriction: Graduate students only.

ECON 241C. Industrial Organization III. 4 Units.
Continuation of the graduate Industrial Organization (IO) sequence. Students are expected to have started a field paper in IO during the earlier quarters, and will finish a completed draft of it during this quarter.
Prerequisite: ECON 241B and ECON 100B and ECON 203A.
Restriction: Graduate students only.

ECON 243A. Game Theory. 4 Units.
A formal introduction to non-cooperative game theory. Topics include properties of Nash Equilibrium and equilibrium refinements, games with imperfect information, and games with incomplete information.
Prerequisite: ECON 210A and ECON 210B and ECON 210C.
Restriction: Graduate students only.
**ECON 243B. Advanced Game Theory. 4 Units.**
Provides advanced instruction in game theory. The topics covered will be (i) the theory of repeated games and (ii) evolutionary game theory. Applications include bargaining, collusion, reputation, social norms, and the evolution of preferences via natural selection and cultural transmission.

Prerequisite: ECON 243A.

Restriction: Graduate students only.

**ECON 245. Empirical Methods in Applied Microeconomics. 4 Units.**
Focuses on the empirical methods used in modern applied microeconomics. Teaches methods that can be applied to produce original research in applied fields using cross-sectional and panel data. Applications will be drawn heavily from labor, public, health and development economics.

**ECON 249. Special Topics in Microeconomics. 2-4 Units.**
Studies in selected areas of Microeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

**ECON 251A. Labor Economics I. 4 Units.**
Analysis of the relationships between education and the labor market (human capital theory), between resources devoted to education and the return to education (the education production function) and between education and labor market inequality (the theory of skill-biased technical change).

Prerequisite: ECON 203A.

Restriction: Graduate students only.

**ECON 251B. Labor Economics II. 4 Units.**
Analysis of core topics in labor economics, with an emphasis on empirical methods. Topics may include minimum wages, discrimination, gender, aging and retirement, labor market networks, personnel economics, and employment policy.

Prerequisite: ECON 203A.

Restriction: Graduate students only.

**ECON 251C. Labor Economics III. 4 Units.**
Discussion of treatment effect/program evaluation in labor economics, emphasizing identification. Classical labor topics, including human capital, technology, wages, labor supply, and migration are discussed in the context of causal inference. A unified framework is used in analyzing identification strategies.

Prerequisite: ECON 203A.

Restriction: Graduate students only.

**ECON 255. Microeconomics and Public Policy. 4 Units.**
Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 240.

Restriction: Graduate students only.

**ECON 259. Special Topics in Labor Economics. 2-4 Units.**
Studies in selected areas of Labor Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

**ECON 260A. Monetary Economics I. 4 Units.**
Focuses on the derivation and estimation of state-of-the-art Dynamic Stochastic General Equilibrium (DSGE) models, with particular emphasis on models useful for monetary policy.

**ECON 260B. Monetary Economics II. 4 Units.**
Surveys recent issues on monetary policy in uncertain environments. Examines settings where both the policy makers and the private sector are uncertain of future outcomes or the underlying economic structure.
ECON 261A. International Trade I. 4 Units.
Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.
Prerequisite: ECON 210A and ECON 210B.

ECON 261B. International Trade II. 4 Units.
Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.
Prerequisite: ECON 261A and ECON 210A and ECON 210B.

ECON 263A. Advanced Macroeconomics I. 4 Units.
Students build Dynamic Stochastic General Equilibrium (DSGE) macroeconomic models from microeconomic foundations. This approach emphasizes intertemporal optimization by firms and households and typically incorporates nominal rigidities such as sluggish price and/or wage adjustment.

ECON 263B. Advanced Macroeconomics II. 4 Units.
Extensively studies policy in dynamic models. Topics: rule versus discretionary-based policy and its implications for macroeconomic stability and multiple equilibria; the design of optimal monetary policy; economic policy with model uncertainty and when the economic model is unknown.
Prerequisite: ECON 263A.

ECON 269. Special Topics in Macroeconomics. 2-4 Units.
Studies in selected areas of Macroeconomics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 270A. Political Economy I. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.
Same as POL SCI 270A.
Restriction: Graduate students only.

ECON 270B. Political Economy II. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.
Prerequisite: POL SCI 270A.
Same as POL SCI 270B.
Restriction: Graduate students only.

ECON 270C. Political Economy III. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.
Prerequisite: POL SCI 270B.
Same as POL SCI 270C.
Restriction: Graduate students only.

ECON 272A. Public Economics I. 4 Units.
Covers welfare economics and the theory of optimal taxation. Also presents applications of the theory, including measurement of the distortionary cost of taxation and principles of environmental policy (instrument choice and the debate on the double dividend of environmental taxation).
Prerequisite: ECON 210A and ECON 210B and ECON 210C.
ECON 272B. Public Economics II. 4 Units.
Covers the theory of public goods and models of decentralized provision of such goods, including voluntary provision, voting, bureaucratic provision, and preference revelation mechanisms.

Prerequisite: ECON 210A and ECON 210B and ECON 210C.

ECON 272C. Public Economics III. 4 Units.
Covers two broad categories of government expenditure policies, redistribution programs and social insurance, from a theoretical and empirical perspective as well as the effects on individuals of the income tax system.

Prerequisite: ECON 210A and ECON 210B and ECON 210C.

ECON 279. Special Topics in Political Economy. 2-4 Units.
Studies in selected areas of Political Economy. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 281A. Urban Economics I. 4 Units.
Economic reasons for the existence of cities, analysis of urban spatial structure, urban sprawl, Third World urbanization, hedonic price analysis, housing tenure choice.

Prerequisite: ECON 210A.

ECON 281B. Urban Economics II. 4 Units.
Housing in the portfolio, land-use controls, rent control, homelessness, neighborhood effects, urban quality-of-life measurement, and subcenters.

Prerequisite: ECON 210A.

ECON 282A. Transportation Economics I. 4 Units.
Applies microeconomic concepts of demand, costs, pricing, investment, and project evaluation to analyze transportation activities. Empirical studies include travel demand using discrete models, and cost functions.

Restriction: Graduate students only.

ECON 282B. Transportation Economics II. 4 Units.
Policy analysis in presence of road transport externalities (such as environmental spill-overs), imperfect instruments, and other economic distortions such as imperfectly priced networks and imperfect competition. Connections of transportation economics with environmental economics, public finance, spatial economics and industrial organization.

Prerequisite: ECON 282A.
Restriction: Graduate students only.

ECON 285A. Colloquium for Transportation Science I. 2 Units.
Selected perspectives on transportation based on the study of human behavior. Organized by Interdisciplinary Program in Transportation Science. Research presentations by faculty, students, and visitors supplemented by class discussion.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECON 285B. Colloquium for Transportation Science II. 2 Units.
Selected perspectives on transportation based on the study of human behavior. Organized by Interdisciplinary Program in Transportation Science. Research presentations by faculty, students, and visitors supplemented by class discussion.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
ECON 285C. Colloquium for Transportation Science III. 2 Units.
Selected perspectives on transportation based on the study of human behavior. Organized by Interdisciplinary Program in Transportation Science. Research presentations by faculty, students, and visitors supplemented by class discussion.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECON 289. Special Topics in Urban and Transportation Economics. 2-4 Units.
Studies in selected areas of Urban and Transportation Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: May be repeated for credit unlimited times.

ECON 290. Dissertation Research. 2-12 Units.
Dissertation research with Economics faculty.
Repeatability: May be repeated for credit unlimited times.

ECON 299. Independent Study. 2-4 Units.
Independent research with Economics faculty.
Repeatability: May be repeated for credit unlimited times.

International Studies Courses

INTL ST 11. Global Cultures and Society. 4 Units.
Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.
Same as ANTHRO 41A.
Restriction: Anthropology and International Studies majors have first consideration for enrollment.

(III, VIII)

INTL ST 13. Global Economy. 4 Units.
Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.
Same as ECON 13.
Restriction: International Studies, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(III, VIII)

INTL ST 14. Introduction to International Relations. 4 Units.
Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined. Course may be offered online.
Same as POL SCI 41A.
Restriction: International Studies and Political Science majors have first consideration for enrollment.

(III, VIII)

INTL ST 105A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.
Same as POL SCI 130A, SOC SCI 103A, SOCIOL 134.
Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.
INTL ST 105B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.
Prerequisite: POL SCI 130A or ECON 116A.
Same as POL SCI 130B, SOC SCI 103B.
Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

INTL ST 111B. Coffee and Capitalism. 4 Units.
History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.
Same as HISTORY 163.

INTL ST 111C. Global Economics and Security. 4 Units.
Analyzes U.S. economic strategy, the impact of U.S. foreign policy on economic strategy, the rise and the challenge of future Great Powers, and focuses on theories of growth, hegemonic stability, and the rise of interdependence in the economic field.

INTL ST 112A. International Business. 4 Units.
Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.
Same as SOC SCI 115D.

INTL ST 114A. International Political Economy. 4 Units.
Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.
Same as POL SCI 141B.

INTL ST 114D. Political Economy of Japan. 4 Units.
Surveys postwar developments in the politics and political economy of Japan. Topics include the political and institutional context of policy making; pressures for change which Japan's political economy has faced in the last decade; Japan's past and present foreign policies.
Same as POL SCI 155F.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 117A. Transnational Migration. 4 Units.
Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.
Same as CHC/LAT 161, ANTHRO 125X.

INTL ST 117B. Migration Destinations. 4 Units.
Examines the migration patterns to the three largest nations that receive immigrants (i.e., permanent settlers): Australia, Canada, and the United States.
Same as ASIANAM 171A, SOCIOL 175D.

INTL ST 121. Social Ecology of Peace. 4 Units.
Examination of differing definitions of the problem of achieving peace and the special problems of seeking peace in the nuclear age.
Same as SOCECOL E113.

INTL ST 122. Nuclear Environments. 4 Units.
Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.
Same as SOCECOL E127, PUBHLTH 168.
INTL ST 124A. Introduction to the Comparative Study of Legal Cultures. 4 Units.
Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as CRM/LAW C102.
Restriction: Criminology, Law and Society, Social Ecology, and International Studies majors have first consideration for enrollment.

INTL ST 124B. New Democracies. 4 Units.
Examines what democracy is; considers competing theories about its causes; explores multiple democratic institutions; discusses several types of democracy; and analyzes various aspects of democratic quality and stability, focusing on Eastern Europe, Latin America, and sub-Saharan Africa.

Same as POL SCI 155A.

INTL ST 130. Transnational Gangs. 4 Units.
Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology. Course may be offered online.

Prerequisite: SOC SCI 66.
Same as SOC SCI 120.
Overlaps with SOC SCI XI120, INTL ST XI130.

INTL ST 131A. Just War Revisited. 4 Units.
Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as POL SCI 135B.

INTL ST 135. California and Global Economy. 4 Units.
Presents the nature of the State's economy and the current and projected role of California in the world economy.

Same as SOC SCI 115E.

INTL ST 140A. Approaches to International Relations. 4 Units.
Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as POL SCI 144A.
Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 141A. Intelligence in International Politics. 4 Units.
Intelligence agencies, activities, and functions—their impact on international politics; how governments and societies seek to control intelligence agencies and activities; and how intelligence agencies work—their techniques, resources, technology, problems, successes, and failures.

Same as POL SCI 143F.
Restriction: Political Science and International Studies majors have first consideration for enrollment.

INTL ST 141B. Homeland Security. 4 Units.
Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as POL SCI 143G.

INTL ST 142A. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.
Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the “Cold War” era, the concept of “national interest” is examined.

Same as POL SCI 142D.
Restriction: International Studies and Political Science majors have first consideration for enrollment.
INTL ST 142B. U.S. Foreign Policy II: Cold War Decline & After. 4 Units.
Deals with U.S. foreign policy from the post-Vietnam War era through the collapse of the Cold War and into the emergence of the post-Cold War era, roughly from 1972 to the present.
Same as POL SCI 142E.
Restriction: Political Science majors have first consideration for enrollment.

INTL ST 142C. U.S. Foreign Policy III: National Security Decision-Making. 4 Units.
Concept of "national security" from 1947-1990s is reviewed. Organizational and psychological factors that influence decision-making, the dangers of "groupthink," and the issue of accountability are analyzed. National security agenda (military, economic, environmental, and social) for the 1990s is discussed.
Same as POL SCI 142F.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142D. The International Relations of East Asia. 4 Units.
Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.
Same as POL SCI 142B.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142E. U.S. Coercive Diplomacy. 4 Units.
Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.
Same as POL SCI 142G.
Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142F. Human Rights and Foreign Policy. 4 Units.
Analyzes theories, patterns, and cases of human rights foreign policy. How do countries pursue the values and standards of human rights in their foreign relations. How does the U.S. fit into worldwide trends? Examines historical and contemporary cases.
Same as POL SCI 142H.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142G. U.S. Foreign Policy Toward Asia. 4 Units.
U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.
Same as POL SCI 141E.

INTL ST 143A. Vietnam War. 4 Units.
Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.
Same as SOCIOL 170A.

INTL ST 144A. Comparative Politics: Four Nations, Three Continents. 4 Units.
Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.
Same as POL SCI 154C.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.
INTL ST 145A. International Law. 4 Units.
Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A.
Same as POL SCI 172A.

(VIII)

INTL ST 145C. Constitution and Rights. 4 Units.
How are constitutions crafted, maintained, and changed? Does constitutionalism support or undermine democracy? What difference do rights and constitutional courts make? Explores these questions through a comparative examination of the theory and practice of constitutionalism in developing democracies.

Prerequisite: POL SCI 71A.
Same as POL SCI 172C.

INTL ST 145D. Courts in New Democracies. 4 Units.
Examines the conceptual, theoretical, and empirical foundations of the study of courts and politics in new democracies, introducing students to a variety of contemporary debates about how political dynamics shape courts, and how courts shape politics.

Prerequisite: POL SCI 71A.
Same as POL SCI 172D.

INTL ST 151B. Religion and World Politics. 4 Units.
Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C.
Same as POL SCI 146B, REL STD 115.

INTL ST 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.
Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as SOC SCI 152A.

INTL ST 153B. Cross-Cultural Studies in Gender. 4 Units.
Familiarizes students with the diversity of women's experiences around the world. Gender roles and relations are examined within cultural and historical contexts. A central concern is how class, race, and global inequalities interact with women's status.

Prerequisite: ANTHRO 2A or ANTHRO 2B.
Same as ANTHRO 121D.

INTL ST 153C. Urban Anthropology. 4 Units.
Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as ANTHRO 121J.

INTL ST 153D. Colonialism and Gender. 4 Units.
An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as ANTHRO 136G.

Restriction: Anthropology majors have first consideration for enrollment.
INTL ST 153E. Nationalism and Ethnicity in the Contemporary World. 4 Units.
An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does “culture” get worked into contemporary racisms and nationalisms.

Same as ANTHRO 136A.

(VIII)

INTL ST 154. Ethics and Justice in International Affairs. 4 Units.
An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does “culture” get worked into contemporary racisms and nationalisms.

Same as ANTHRO 136A.

Restriction: Upper-division students only. International Studies majors have first consideration for enrollment.

INTL ST 154B. Human Rights. 4 Units.
Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as POL SCI 153E.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 154D. Ethics and International Relations. 4 Units.
Introduces students to the dynamic field of ethics and international relations. A variety of traditional and emerging perspectives are examined, skeptical views are discussed in detail, and arguments are illustrated with current cases.

Same as PP&D 140, POL SCI 146A.

INTL ST 154W. Ethics and Justice in International Affairs. 4 Units.
Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. International Studies majors have first consideration for enrollment.

(lb)

INTL ST 155A. International Journalism. 4 Units.
Studies and critically analyzes how the media covers international issues that have reshaped. American foreign coverage and the implications for Americans and U.S. foreign policy. Focuses on international reporting as a way of developing fundamental skills of journalism.

Same as SOC SCI 184F.

INTL ST 155BW. Media Writing. 4 Units.
Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOC SCI 184GW.

Overlaps with INTL ST XI155B, SOC SCI XI184G.

Restriction: International Studies majors have first consideration for enrollment.

(lb)

INTL ST 156A. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as POL SCI 151H, SOC SCI 121T, ECON 154.

Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.
INTL ST 157A. Twenty-First Century Africa. 4 Units.
Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A.

Same as ANTHRO 164A.

Restriction: Anthropology majors have first consideration for enrollment.

INTL ST 158A. Modern South Asian Religions. 4 Units.
Nineteenth- and twentieth-century developments in Hinduism, Islam, and Sikhism are covered, with emphasis on changing forms as well as contents of religious movements and the state.

Same as ANTHRO 135I.

(VIII)

INTL ST 158B. Peoples of the Pacific. 4 Units.
The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as ANTHRO 163A.

(VIII)

INTL ST 158D. China in the Global Age. 4 Units.
Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as SOCIOL 175B.

INTL ST 161A. Political Islam. 4 Units.
Political Islam is a diverse phenomenon. While noticeable barriers exist to "Islamist democracy," it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as SOC SCI 188K.

INTL ST 162. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as SOC SCI 188I, POL SCI 158C.

INTL ST 162B. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.
Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as POL SCI 154F, ANTHRO 164P.

(VIII)

INTL ST 165. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, POL SCI 158D.

INTL ST 166. Psychology of the Middle East Conflict. 4 Units.
Explores how emotions guide actions; political movements and social identity factors in ethnic, religious, or other group conflicts; psycho-biographies of political leaders and effects on foreign policy making; decisions to go to war; psychological dimensions of conflict and conflict resolution.

Same as SOC SCI 188M.

INTL ST 168. Iran: Past and Present. 4 Units.
Pre-revolutionary Iran; and Iran since the revolution. History, oil and politics: domestic and international.

Same as SOC SCI 188D.
INTL ST 170. Israel and the World: An Introduction. 4 Units.
Examines the founding of Israel, its relationship with the Arab world, the role of the international community, and the challenges it faces today.

Same as SOC SCI 188E.

INTL ST 174. Middle East Narratives. 4 Units.
Explores various narratives of peoples living in the Middle East: Bedouins, Jews, Muslims, Christians, Druze, Baha’i; looks at how their identities were formed and altered over time through empire, religion, exodus, war, democracy, diasporas; focus is philosophical and historical.

Same as POL SCI 136D.

INTL ST 175A. U.S. War on Terrorism. 4 Units.
Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as SOCIOL 170B.

INTL ST 176A. African Politics. 4 Units.
An overview of African politics in comparative perspective. Central themes include the analysis of state-nation building in Africa, Africa’s economy, and its civil society as this relates to implications for development prospects on the continent.

INTL ST 176B. East Asian Politics. 4 Units.
Explores the recent history and political systems of China, Japan, and Korea, comparing the three countries with each other and with occasional reference to the United States, British, and French systems.

Same as POL SCI 151A.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 176C. Introduction to Chinese Politics. 4 Units.
Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as POL SCI 151B.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 176D. Chinese Politics: Policy, Leadership, and Change. 4 Units.
Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as POL SCI 151C.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 176G. German Politics and Society. 4 Units.
Concentrates on twentieth-century German politics and society, focusing on the contemporary political system of democratic West Germany. Study of the historical legacies of Weimar and the Nazi period, the postwar division between the two states and their reunification.

Same as POL SCI 152C.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 176I. West European Politics. 4 Units.
Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as POL SCI 152F.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 176K. Latin American Politics. 4 Units.
Introduces the main concepts and theoretical approaches underlying the study of Latin American politics, examines recent political dynamics, and explores the challenges the region faces in the twenty-first century and how countries will attempt to address them.

Same as POL SCI 153A, CHC/LAT 151A.
Restriction: Political Science majors, Chicano/Latino Studies majors, and International Studies majors have first consideration for enrollment.
INTL ST 176L. Canadian Politics. 4 Units.
Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil. Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as POL SCI 153B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 177B. Perspectives on the U.S.-Mexican Border. 4 Units.
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as SOC SCI 173I, CHC/LAT 160.

(VII)

INTL ST 177C. Revolution in Latin America. 4 Units.
Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, SOC SCI 173N.

INTL ST 177D. U.S. Intervention in Latin America. 4 Units.
Explores political, economic, social, and cultural ties that bind Latin America to the United States.Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as HISTORY 166, SOC SCI 123A, CHC/LAT 150.

INTL ST 177E. Cuban Society and Revolution. 4 Units.
Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, CHC/LAT 157.

INTL ST 177F. Introduction to Cuba: History, Culture, and Society. 4 Units.
Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as CHC/LAT 130, SOC SCI 173Q.

(VIII)

INTL ST 177G. Revolution and Reaction in Cold War Latin America. 4 Units.
Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as HISTORY 166B.

INTL ST 177H. Gender, Race, and Nation in Latin America. 4 Units.
Addresses the importance of gender and race to nation-making in Latin America during the 19th and 20th centuries (1810-1945). Considers how hierarchies between men and women shaped ideas about family, the state, and modernity.

Same as HISTORY 166A, WOMN ST 172.

INTL ST 177I. Ancient Civilization of Mexico and the Southwest. 4 Units.
The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as ANTHRO 141A.
INTL ST 177J. Peoples and Cultures of Latin America. 4 Units.
Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as ANTHRO 162A.

(VIII)

INTL ST 178A. Immigration Politics in Western Europe. 4 Units.
Examines the politics of immigration in Western Europe. Considers historical, economic, political, and social dimensions of immigration as well as the nature of ensuing conflict. Students investigate a variety of immigrant-related policies, including asylum, citizenship, and integration.

Same as POL SCI 141D.

INTL ST 179. Regional Topics in International Studies. 4 Units.
Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

INTL ST H180. International Studies Honors Research Seminar. 4 Units.
Assists students to prepare a thesis prospectus for the Honors Program in International Studies. Students choose a topic, learn writing and research methods, write a prospectus and orally present and defend it, and conduct a literature review.

Restriction: International Studies Honors Program students only. International Studies majors have first consideration for enrollment.

INTL ST 183A. International Studies Forum. 2 Units.
A faculty-student forum featuring lecturers from a variety of institutions with discussion issues related to international studies.

Repeatability: May be taken for credit 4 times.

Same as SOC SCI 183A, SOCECOL 183A, HUMAN 183A.

Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

INTL ST 183B. Seminar in Mediation. 4 Units.
Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as HUMAN 183B, SOC SCI 183B, SOCECOL 183B.

Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

INTL ST 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, POL SCI 154G.

(VIII)

INTL ST 189. Special Topics in International Studies. 2-4 Units.
Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

INTL ST 190. Senior Thesis. 4 Units.
Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 2 times.

INTL ST 197. Internship. 2-4 Units.
Provides an opportunity to apply knowledge and skills to an internship experience in the non-profit sector. Students gain new skills outside the classroom environment by participating in an off-campus, supervised internship for a total of 50 or 100 hours.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.
INTL ST 199. Individual Study. 2-4 Units.
Students participate in planned research and study under written contract with a supervising UCI instructor. Students may enroll for only one individual study course each quarter.

Repeatability: Unlimited as topics vary.

Linguistics Courses

LINGUIS 1. Languages of the World. 4 Units.
The world has over 6,000 languages, with an exuberant variety of sounds, words, grammars. Introduction to a representative (about eight), drawn from every continent. Students not expected to learn these languages, but rather to explore and study their structure and complexity.

(VIII)

LINGUIS 2. Discovering Language. 4 Units.
Explores language's pervasiveness and diversity; demonstrates ways linguistics illuminates language's crucial--albeit hidden--societal role. Issues: self- and group-identification, language death, language in legal and educational settings. Illustrations: spoken and signed languages, varieties of English, Native American languages.

(VII)

LINGUIS 3. Introduction to Linguistics. 4 Units.
Emphasis on the notion that language is a remarkable achievement of the human mind. Current insights into the nature of language. Survey of various subfields of linguistics. Introduction to linguistic analysis.

(III, Vb)

LINGUIS 10. Introduction to Phonology. 4 Units.
Basic concepts in phonetic description and phonological analysis.

Prerequisite: LINGUIS 3.

(III, Vb)

LINGUIS 20. Introduction to Syntax. 4 Units.
Basic concepts in syntactic description and grammatical analysis.

Prerequisite: LINGUIS 3.

(III, Vb)

LINGUIS 51. Acquisition of Language. 4 Units.
What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year olds. Comparison of kinds of data on which these theories are based.

Same as PSYCH 56L.

(III)

LINGUIS 68. Introduction to Language and Culture. 4 Units.
Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as ANTHRO 2D.

(III)

LINGUIS 99. Special Topics in Linguistics. 4 Units.
Special Topics at lower-division level.

Repeatability: Unlimited as topics vary.

LINGUIS 100. Grammatical Theory. 4 Units.
Has both a phonology and a syntax component, and forms and bridge between lower-division course offerings and more advanced courses in phonology, syntax, and morphology. Emphasis on development of analytical skills, and evaluation of alternative proposals.

Prerequisite: LINGUIS 10 and LINGUIS 20.
LINGUIS 102. Formal Languages and Automata. 4 Units.
Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turning machines, random access machines, undecidable problems, NP-completeness.
Prerequisite: (I&C SCI 23 or CSE 23 or I&C SCI 46 or CSE 46) and MATH 2A and MATH 2B and I&C SCI 6B and I&C SCI 6D. I&C SCI 23 with a grade of C or better. CSE 23 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better.
Same as COMPSCI 162.

LINGUIS 107M. Computational Methods for Language Research. 4 Units.
Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.
Prerequisite: PSYCH 155 or LINGUIS 155 or PSYCH 156A or LINGUIS 150.
Same as PSYCH 157M.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 247M.

LINGUIS 109. Special Topics in Computational Linguistics. 4 Units.
Topics in Computational Linguistics.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 111. Intermediate Phonology. 4 Units.
Prerequisite: LINGUIS 100.
Concurrent with LINGUIS 211.

LINGUIS 112. Advanced Phonology. 4 Units.
Overview of recent developments in phonological theory.
Prerequisite: LINGUIS 111.
Concurrent with LINGUIS 212.

LINGUIS 119. Special Topics in Phonetics/Phonology. 4 Units.
Topics in Phonetics/Phonology. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 121. Intermediate Syntax. 4 Units.
Examines various phenomena within a generative theory of syntax, focusing on the nature of syntactic rules, representations, and constraints. Introduces methods of experimental syntax, providing students hands-on opportunity to recognize the connection(s) between theory and experiential results.
Prerequisite: LINGUIS 20.

LINGUIS 124. Current Topics in Syntactic Theory. 4 Units.
Research seminar in syntax. Intensive study of a small number of well-defined topics which have had significant impact on the development of syntactic theory. May be repeated for credit as topic varies.
Repeatability: May be repeated for credit unlimited times.
Concurrent with LINGUIS 224.
LINGUIS 129. Special Topics in Syntax. 4 Units.
Topics in Syntax. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 139. Special Topics in Morphology. 4 Units.
Topics in Morphology. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 141. Topics in Philosophy of Language. 4 Units.
Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.
Repeatability: Unlimited as topics vary.
Same as LPS 145, PHILOS 145.

LINGUIS 149. Special Topics in Semantics. 4 Units.
Topics in Semantics. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 150. Acquisition of Language II. 4 Units.
Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the "how" of language acquisition.
Prerequisite: Recommended: PSYCH 56L or LINGUIS 51.
Same as PSYCH 156A.
Restriction: Psychology majors have first consideration for enrollment.

LINGUIS 155. Psychology of Language. 4 Units.
Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.
Same as PSYCH 150.
Restriction: Psychology majors have first consideration for enrollment.

LINGUIS 158. Language and the Brain. 4 Units.
Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.
Prerequisite: BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N160, PSYCH 161.
Restriction: Psychology and Biology majors have first consideration for enrollment.

LINGUIS 159. Special Topics in Psycholinguistics. 4 Units.
Topics in Psycholinguistics. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
LINGUIS 163B. The Structure of English. 4 Units.

Prerequisite: LINGUIS 3.

LINGUIS 164A. Topics in Romance Languages. 4 Units.
Topics in Romance Languages. May be repeated as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 164B. French Phonetics. 4 Units.
Study of the sound structure of French. Introduction to elements of general phonetics, contrastive (French/English) phonetics, and French phonetics and phonology. Designed to help students improve their pronunciation. Also serves as a preparatory course for language teaching.

Prerequisite: FRENCH 1C.

LINGUIS 169. Special Topics in Language Studies. 4 Units.
Topics in Language Studies. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 172. History of English. 4 Units.
External (historical and social) and internal (linguistic) changes which have affected the English language from its Germanic roots to the present day.

Prerequisite: LINGUIS 3.

LINGUIS 175. Language Origins: Evolution, Genetics, and the Brain. 4 Units.
Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including Is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as HISTORY 135G, ANTHRO 152A, GLBLCLT 105.

LINGUIS 179. Special Topics in Historical Linguistics. 4 Units.
Topics in Historical Linguistics. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 189. Special Topics in Cognitive Semiotics. 4 Units.
Topics in Cognitive Semiotics. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 198. Directed Group Study. 4 Units.
Directed study with Linguistics faculty. May be repeated for credit as topic varies.

Repeatability: Unlimited as topics vary.

LINGUIS 199. Independent Study. 4 Units.
Independent research with Linguistics faculty. May be repeated for credit as topic varies. Students may enroll for only one 199 each quarter.

Repeatability: May be repeated for credit unlimited times.
Logic and Philosophy of Science Courses

LPS 29. Critical Reasoning. 4 Units.

Same as PHILOS 29.
(II, Vb)

LPS 30. Introduction to Symbolic Logic. 4 Units.
An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural deduction and semantic tableaux.

Same as PHILOS 30.
(Vb)

LPS 31. Introduction to Inductive Logic. 4 Units.
Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept of cause, Mill's method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as PHILOS 31.
(II, Va)

LPS 40. The Nature of Scientific Inquiry. 4 Units.
Investigates the nature, scope, and status of scientific knowledge and the methods used to acquire it. Uses concrete historical examples from a variety of scientific fields to identify distinctive features of the scientific enterprise and explore their significance.

(II)

LPS 60. The Making of Modern Science. 4 Units.
Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically, as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as HISTORY 60.
(IV)

LPS H80. Scientific Realism and Instrumentalism. 4 Units.
Explores competing views of the character and status of theoretical knowledge in science, including challenges to and defenses of the view that contemporary scientific theories offer straightforwardly accurate descriptions of how things stand in otherwise inaccessible domains of nature.

(II)

LPS 100W. Writing Philosophy. 4 Units.
Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments, philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHILOS 100W.

Restriction: Upper-division students only.
(Ib)

LPS 102. Introduction to the Theory of Knowledge. 4 Units.
A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the distinction between belief and knowledge, and the nature of truth and certainty.

Same as PHILOS 102.
LPS 104. Introduction to Logic. 4 Units.
Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as PHILOS 104.

LPS 105A. Elementary Set Theory. 4 Units.
An introduction to the basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as PHILOS 105A.

LPS 105B. Metalogic. 4 Units.
Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHILOS 105A.

Same as PHILOS 105B.
Overlaps with MATH 150.

LPS 105C. Undecidability and Incompleteness. 4 Units.
Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHILOS 105B.

Same as PHILOS 105C.
Overlaps with MATH 152.

LPS 106. Topics in Logic . 4 Units.
Selected topics in mathematical or philosophical logic.

Prerequisite: LPS 105B or PHILOS 105B.
Repeatability: Unlimited as topics vary.

Same as PHILOS 106.

LPS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.
Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.

Same as PHILOS 108.

LPS 113. Topics in Modern Philosophy. 4 Units.
Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.

Same as PHILOS 113.

LPS 115. Topics in History of Analytic Philosophy. 4 Units.
Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.

Same as PHILOS 115.

LPS 120. Topics in Metaphysics. 4 Units.
Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.

Same as PHILOS 120.
LPS 121. Topics in the Theory of Knowledge . 4 Units.
One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, or of a priori knowledge.
Repeatability: Unlimited as topics vary.
Same as PHILOS 121.

LPS H125. What Is Time? . 4 Units.
Engages the question "what is time?" by drawing on physics, philosophy, fiction, film, and psychology. The course is organized around understanding and addressing the tension between time as represented in physics and our immediate temporal experience.
Restriction: Campuswide Honors Program students only.

LPS 140. Topics in Philosophy of Science. 4 Units.
Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.
Repeatability: Unlimited as topics vary.
Same as PHILOS 140.

LPS 140B. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online.
Same as REL STD 112B, PSYCH 172S, SOC SCI 130B.

LPS 141A. Topics in Philosophy of Physics. 4 Units.
Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.
Repeatability: Unlimited as topics vary.
Same as PHILOS 141A.

LPS 141B. Geometry and Spacetime. 4 Units.
An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.
Prerequisite: MATH 2D and (MATH 3A or MATH 6G).
Same as PHILOS 141B.

LPS 141C. Philosophy of Quantum Mechanics. 4 Units.
An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.
Same as PHILOS 141C.

LPS 141D. Probability and Determinism. 4 Units.
An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.
Prerequisite: MATH 2D and (MATH 3A or MATH 6G).
Same as PHILOS 141D.

LPS H141. Honors Philosophy of Quantum Mechanics. 4 Units.
An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.
Overlaps with LPS 141C.
Restriction: Campuswide Honors Program students only.

LPS 142. Writing/Philosophy of Biology. 4 Units.
Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.
LPS 142W. Writing/Philosophy of Biology. 4 Units.
Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHILOS 142W, BIO SCI E142W.

Restriction: Juniors only.

LPS 143. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHILOS 143, PSYCH 123P.

Restriction: Psychology and Philosophy majors have first consideration for enrollment.

LPS 144. Topics in Philosophy of Social Science. 4 Units.
Selected topics in the philosophy of the social sciences, e.g., is their goal to understand behavior or to predict and control it?; are they normative and the natural sciences not?; do they incorporate philosophical doctrines about language and mind?.

Repeatability: Unlimited as topics vary.

Same as PHILOS 144.

LPS 145. Topics in Philosophy of Language. 4 Units.
Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as PHILOS 145, LINGUIS 141.

LPS 146. Topics in Philosophy of Logic. 4 Units.
Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as PHILOS 146.

LPS 147. Topics in Philosophy of Mathematics. 4 Units.
Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as PHILOS 147.

LPS 199. Independent Study. 1-4 Units.
Independent research with Logic and Philosophy of Science faculty.

Repeatability: May be taken for credit for 12 units.

LPS 200. Topics in Logic and Philosophy of Science. 4 Units.
Studies in selected areas of Logic and Philosophy of Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

LPS 205A. Set Theory. 4 Units.
The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as PHILOS 205A.
LPS 205B. Metologic. 4 Units.
Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.

Prerequisite: PHILOS 205A or LPS 205A.

Same as PHILOS 205B.

LPS 205C. Undecidability and Incompleteness. 4 Units.
Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, and proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.

Prerequisite: PHILOS 205B or LPS 205B.

Same as PHILOS 205C.

LPS 206. Topics in Logic. 4 Units.
Studies in selected areas of logic. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 206.

LPS 213. Topics in Modern Philosophy. 4 Units.
Studies in selected areas of modern philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 213.

LPS 215. Topics in Analytic Philosophy. 4 Units.
Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 215.

LPS 220. Topics in Metaphysics. 4 Units.
Studies in selected areas of metaphysics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 220.

LPS 221. Topics in Epistemology. 4 Units.
Studies in selected areas of epistemology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 221.

LPS 232. Topics in Political and Social Philosophy. 4 Units.
Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 232.

LPS 240. Topics in Philosophy of Science. 4 Units.
Studies in selected areas of philosophy of science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Same as PHILOS 240.
LPS 241. Topics in Philosophy of Physics. 4 Units.
Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 241.

LPS 242. Topics in Philosophy of Biology. 4 Units.
Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 242.

LPS 243. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.
Repeatability: Unlimited as topics vary.
Same as PHILOS 243, PSYCH 231P.

LPS 244. Topics in Philosophy of Social Science. 4 Units.
Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 244.

LPS 245. Topics in Philosophy of Language. 4 Units.
Studies in selected areas of philosophy of language. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 245.

LPS 246. Topics in Philosophy of Logic. 4 Units.
Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 246.

LPS 247. Topics in Philosophy of Mathematics. 4 Units.
Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 247.

LPS 289. Logic and Philosophy of Science Workshop. 1-4 Units.
A two- or three-quarter-long workshop on selected topics in logic and philosophy of science.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

LPS 298. Independent Study. 4-12 Units.
Independent research with Logic and Philosophy of Science Faculty.
Repeatability: May be taken for credit for 12 units.

LPS 299. Directed Research. 1-12 Units.
Directed study with Logic and Philosophy of Science Faculty.
Repeatability: May be repeated for credit unlimited times.
LPS 399. University Teaching. 4-12 Units.
Required of and limited to Teaching Assistants.
Repeatability: May be taken for credit for 12 units.

Political Science Courses

POL SCI 6A. Introduction to Political Science: Political Analysis. 4 Units.
Presents various modes of understanding politics. Emphasis on basic approaches to political analysis, their uses in constructing theories, and their
application to particular national political systems.

(III, VIII)

POL SCI 6B. Introduction to Political Science: Macropolitics. 4 Units.
An overview of macro-political inquiry, emphasizing the various determinants of political life in a political community. We also explore the origins and
challenges of democratic governance focusing on the tension between liberty and equality in a democratizing nation.

(III)

POL SCI 6C. Introduction to Political Science: Micropolitics. 4 Units.
Introduction to political behavior of individuals and groups within national systems. Three questions addressed: How do individuals come to understand
the political world? How do individuals behave within this world? How do groups and individuals engage in the political process.

(III)

POL SCI 10A. Probability and Statistics in Political Science I. 4 Units.
Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile
ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution.
Laboratory required.
Prerequisite: SOC SCI 3A.
Overlaps with ANTHRO 10A, ECON 15A, PSYCH 10A, SOCECOL 13, SOC SCI 9A, SOCIOL 10A.
Restriction: Lower-division students only.

(Va)

POL SCI 10B. Probability and Statistics in Political Science II. 4 Units.
Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal
variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types
of error in significance tests.
Prerequisite: POL SCI 10A.
Overlaps with ANTHRO 10B, ECON 15B, PSYCH 10B, SOCECOL 13, SOC SCI 9B, SOC SCI 10B.

(Va)

POL SCI 10C. Probability and Statistics in Political Science III. 4 Units.
Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori
comparisons. Introduction to repeated measures design and non-parametric statistics. Discusses use of statistics in newspapers and popular
magazines.
Prerequisite: POL SCI 10B.
Overlaps with ANTHRO 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOC SCI 10C, SOCIOL 10C.

(Vb)

POL SCI 21A. Introduction to American Government. 4 Units.
Introduction to American political processes and institutions. Topics include elections, political participation, parties, interest groups, the Presidency,
Congress, the bureaucracy, and the judiciary. Course may be offered online.

(III)
POL SCI 29. Special Topics in American Politics. 4 Units.
Studies in selected areas of American politics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

POL SCI 31A. Introduction to Political Theory. 4 Units.
Types of questions: What is politics? What are the theoretical and philosophical bases for different types of political arrangements? How do these perspectives get translated into reality? Among others, the works of Rousseau, Locke, Mill, and Marx are read.

POL SCI 39. Lower-Division Special Topics in Political Theory. 4 Units.
Studies in selected areas of political theory. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

POL SCI 41A. Introduction to International Relations. 4 Units.
Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined. Course may be offered online.

Same as INTL ST 14.
Restriction: International Studies and Political Science majors have first consideration for enrollment.

POL SCI 43D. Global Security and Cooperation. 4 Units.
Examination of global conflict and cooperation since World War II, and future prospects. The Cold War, nuclear arms race, regional conflicts, arms proliferation and control, deterrence theory, psychology of conflict, governmental and nongovernmental efforts to promote global peace and cooperation.

POL SCI 44A. Global Issues and Institutions. 4 Units.
Surveys recent developments in the nature of global interdependence. Examines the major political, economic, and military conflicts of this century and recent problems of population growth, environmental decay, ethnic/national antagonism and violence, and post-Cold War politics.

POL SCI 49. Lower-Division Special Topics in International Relations. 4 Units.
Studies in selected areas of international relations. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

POL SCI 51A. Introduction to Politics Around the World. 4 Units.
Introduces comparative politics. Compares political systems in a variety of countries. Includes elections, parties, parliaments, presidents, protest movements, and other aspects of national politics. Addresses how to make meaningful comparisons across countries.

POL SCI 61A. Introduction to Race and Ethnicity in Political Science. 4 Units.
Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics. Course may be offered online.

Same as CHC/LAT 64.

POL SCI 69. Lower Division Special Topics in Minority Politics. 4 Units.
Studies in selected areas of minority politics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

POL SCI 71A. Introduction to Law. 4 Units.
An introduction to the study of judicial politics. Questions include: what is law?; what is a court?; who are the judges? Analysis of a wide range of judicial decisions illustrates the political importance of courts in the U.S. and elsewhere.
POL SCI 79. Lower-Division Special Topics in Law. 4 Units.
Studies in selected areas of law. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

POL SCI 120. Public Opinion. 4 Units.
Theories concerning sources of public opinion, processes by which it is altered, organization of citizens' belief systems, and role of public opinion in government policy. Students analyze survey data as a research project.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 120W. Public Opinion. 4 Units.
Theories concerning sources of public opinion, processes by which it is altered, organization of citizens' belief systems, and role of public opinion in government policy. Students analyze survey data as a research project.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 121A. The American Presidency. 4 Units.
Presents a comprehensive survey of the American presidency and considers the question of political power.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 121C. U.S. Elections and Voting Behavior. 4 Units.
Examines how voters evaluate political parties, candidates, and issues in electoral campaigns to reach their decisions. Numerous controversies concerning the degree of issue voting, sophistication of candidate evaluations, and the decline of political parties are discussed.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 121E. Public Policy Analysis. 4 Units.
Examines different approaches to the analysis of public policy, what constitutes good policy, the role of government, and citizen participation in policymaking. Suggests a policy-design perspective which builds upon other frameworks but concentrates on goals, implementation structures, tools, and rationales.
Prerequisite: SOCECOL E8 and (PP&D 4 or PP&D 166).
Same as PP&D 169.
Restriction: Urban Studies, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

POL SCI 121F. Presidents Since World War II. 4 Units.
Reviews the actions and character of presidents from Harry Truman through Bill Clinton. Each week a different president is examined from a variety of perspectives. Students are expected to write a substantial original research paper.
Prerequisite: POL SCI 21A.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 122A. American Metropolitan Politics. 4 Units.
Explores the politics of urban and suburban America, including the policy making process; the exercise of political power; local politics, federalism and the problems of metropolitanism; and major policy problems facing urban areas.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 122B. California Politics. 4 Units.
Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.
Restriction: Political Science majors have first consideration for enrollment.
POL SCI 122BW. California Politics. 4 Units.
Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy making.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 122C. The American Electorate. 4 Units.
Provides an overview of how polls are conducted, and how they can be manipulated by question wording, sampling techniques, interviewing procedures, and context. Public attitudes toward Congress are examined. Students analyze survey data on their own as a research project.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 123A. Parties and Political Organizations. 4 Units.
A consideration of the role that parties and other political organizations play in the American political process. Also looks at the development and significance of PACs, interest groups, and social movements as vehicles for democratic participation.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 124A. The Politics of Protest. 4 Units.
Examines the Civil Rights, Black Power, and women’s movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as ASIANAM 144.

(VII)

POL SCI 124B. Latinos in U.S. Politics. 4 Units.
Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as CHC/LAT 151.

(VII)

POL SCI 124C. Comparative Minority Politics. 4 Units.
Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, ASIANAM 132.

POL SCI 124E. African American Politics. 4 Units.
Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as AFAM 152.

POL SCI 125A. The United States Congress. 4 Units.
Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 125AW. The United States Congress. 4 Units.
Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Political Science majors have first consideration for enrollment.

(Ib)
POL SCI 125B. Congress: The New Institutionalist Approach. 4 Units.
Study of the U.S. Congress emphasizing how rules and institutions (filibuster, veto, the committee system, party caucuses) structure how the congressional game is played. Combines theoretical study of procedures with the practical study of actual bills.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 126C. U.S. Immigration Policy. 4 Units.
Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as CHC/LAT 163.

(VII)

POL SCI 126D. Urban Politics and Policy. 4 Units.
Examines economic limits of cities and welfare policy. Addresses such issues as why are the poor concentrated in the central cities? Which anti-poverty programs will work best in cities? Which level of government can best combat poverty in the U.S.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 126F. Politics of Animal Rights. 4 Units.
Examines animal rights/welfare movement’s efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as ASIANAM 168.

Restriction: Political Science majors and Asian American Studies majors have first consideration for enrollment.

POL SCI 129. Special Topics in American Politics and Society. 4 Units.
Studies in selected areas of American politics and society. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 130A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as INTL ST 105A, SOC SCI 103A, SOCIOL 134.

Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

POL SCI 130B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A.

Same as INTL ST 105B, SOC SCI 103B.

Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

POL SCI 131C. Modern Political Theory. 4 Units.
Examines major thinkers and intellectual movements in the political thought of the 17th and 18th centuries.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 131F. Twentieth Century Political Theory. 4 Units.
Examines major thinkers and intellectual movements in the political thought of the 20th Century.

Prerequisite: POL SCI 31A.
POL SCI 134F. Social and Political Theory. 4 Units.
Focus is on recent major work in social and political theory. An in-depth analysis of a relatively small body of writing. Authors discussed include Jurgen Habermas, Anthony Giddens, and Richard Rorty.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 134J. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.

Same as SOCIOL 168.

Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

POL SCI 134JW. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 168W.

Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

POL SCI 135A. Origins of Liberalism. 4 Units.
Examines the ideals, social forces, and historical events that gave rise to liberal political theory. Topics include patriarchal authority, the divine right of kings, religious toleration, slavery, colonialism, political economy, the evolution of law, and tensions between liberty and equality.

Prerequisite: POL SCI 31A

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 135B. Just War Revisited. 4 Units.
Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as INTL ST 131A.

POL SCI 136A. Logical Models in Social Sciences. 4 Units.
Science asks two questions. "How things are?" leads to measurement and statistical analysis. But we see only what we look for. "How things should be, on logical grounds?" leads to quantitative logical models which tell us what to look for.

Same as SOCIOL 112.

POL SCI 136B. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.
Examines critically the notion of the "other" by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissance of the concept of human rights and tolerance.

POL SCI 136D. Middle East Narratives. 4 Units.
Explores various narratives of peoples living in the Middle East: Bedouins, Jews, Muslims, Christians, Druze, Baha'is; looks at how their identities were formed and altered over time through empire, religion, exodus, war, democracy, diasporas; focus is philosophical and historical.

Same as INTL ST 174.

POL SCI 137B. Types of Political Representation. 4 Units.
Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.
POL SCI 137BW. Types of Political Representation. 4 Units.
Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.

POL SCI 137C. Political Psychology. 4 Units.
Examines how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses the formation of political attitudes, the process of political decision-making, the nature of political leadership.

Same as PSYCH 176A.

Restriction: Psychology and Political Science majors have first consideration for enrollment.

POL SCI 138A. The Moral of the Story: Introductory Seminar in Ethics. 4 Units.
Introduces major theories and classic texts in ethics, from Plato and Aristotelian virtue ethics to utilitarianism and Kant and contemporary moral psychology.

POL SCI 138C. Ethics of Difference. 4 Units.
Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 138CW. Ethics of Difference. 4 Units.
Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 139. Special Topics in Political Theory and Methods. 4 Units.
Studies in selected areas of political theory and methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 141B. International Political Economy. 4 Units.
Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as INTL ST 114A.

(VIII)

POL SCI 141C. International Political Economy of East Asia. 4 Units.
Integration of theoretical perspectives in international political economy with the study of economic development in East Asia, with special emphasis on regional integration.

(VIII)

POL SCI 141D. Immigration Politics in Western Europe. 4 Units.
Examines the politics of immigration in Western Europe. Considers historical, economic, political, and social dimensions of immigration as well as the nature of ensuing conflict. Students investigate a variety of immigrant-related policies, including asylum, citizenship, and integration.

Same as INTL ST 178A.
POL SCI 141E. U.S. Foreign Policy Toward Asia. 4 Units.
U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as INTL ST 142G.

POL SCI 142B. The International Relations of East Asia. 4 Units.
Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as INTL ST 142D.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 142D. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.
Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the “Cold War” era, the concept of “national interest” is examined.

Same as INTL ST 142A.
Restriction: International Studies and Political Science majors have first consideration for enrollment.

POL SCI 142E. U.S. Foreign Policy II: Cold War Decline & After. 4 Units.
Deals with U.S. foreign policy from the post-Vietnam War era through the collapse of the Cold War and into the emergence of the post-Cold War era, roughly from 1972 to the present.

Same as INTL ST 142B.
Restriction: Political Science majors have first consideration for enrollment.

Concept of "national security" from 1947-1990s is reviewed. Organizational and psychological factors that influence decision-making, the dangers of "groupthink," and the issue of accountability are analyzed. National security agenda (military, economic, environmental, and social) for the 1990s is discussed.

Same as INTL ST 142C.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 142G. U.S. Coercive Diplomacy. 4 Units.
Examines the theory of compellence and the U.S. practice of coercive diplomacy--the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as INTL ST 142E.
Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 142H. Human Rights and Foreign Policy. 4 Units.
Analyzes theories, patterns, and cases of human rights foreign policy. How do countries pursue the values and standards of human rights in their foreign relations. How does the U.S. fit into worldwide trends? Examines historical and contemporary cases.

Same as INTL ST 142F.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 143F. Intelligence in International Politics. 4 Units.
Intelligence agencies, activities, and functions—their impact on international politics; how governments and societies seek to control intelligence agencies and activities; and how intelligence agencies work—their techniques, resources, technology, problems, successes, and failures.

Same as INTL ST 141A.
Restriction: Political Science and International Studies majors have first consideration for enrollment.

POL SCI 143G. Homeland Security. 4 Units.
Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as INTL ST 141B.
POL SCI 144A. Approaches to International Relations. 4 Units.
Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as INTL ST 140A.

Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 145A. Ethics in an Age of Terror and Genocide. 4 Units.
Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.

POL SCI 146A. Ethics and International Relations. 4 Units.
Introduces students to the dynamic field of ethics and international relations. A variety of traditional and emerging perspectives are examined, skeptical views are discussed in detail, and arguments are illustrated with current cases.

Same as PP&D 140, INTL ST 154D.

POL SCI 146B. Religion and World Politics. 4 Units.
Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C.

Same as REL STD 115, INTL ST 151B.

POL SCI 149. Special Topics in International Relations. 4 Units.
Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 150A. Seminar on Regime Change in East Asia. 4 Units.
Examines nine factors relevant to regime change, studying one factor each week in class. Students write four short (two-page) analytic papers, and one eight-ten-page research paper on one country.

Prerequisite: POL SCI 6A and POL SCI 6B and POL SCI 6C.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 150AW. Seminar on Regime Change in East Asia. 4 Units.
Examines nine factors relevant to regime change, studying one factor each week in class. Students write four short (two-page) analytic papers, and one eight-ten-page research paper on one country.

Prerequisite: POL SCI 6A and POL SCI 6B and POL SCI 6C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

(Pb)

POL SCI 151A. East Asian Politics. 4 Units.
Explores the recent history and political systems of China, Japan, and Korea, comparing the three countries with each other and with occasional reference to the United States, British, and French systems.

Same as INTL ST 176B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 151B. Introduction to Chinese Politics. 4 Units.
Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as INTL ST 176C.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.
POL SCI 151C. Chinese Politics: Policy, Leadership, and Change. 4 Units.
Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as INTL ST 176D.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 151E. Are Chinese Politics Changing?. 4 Units.
There’s been speculation about whether the Chinese political system is fundamentally changing. This upper-division writing seminar reviews new books on this topic and considers the question from a range of angles. Four two-page papers and one 8–10-page paper required.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151EW. Are Chinese Politics Changing?. 4 Units.
There’s been speculation about whether the Chinese political system is fundamentally changing. This upper-division writing seminar reviews new books on this topic and considers the question from a range of angles. Four two-page papers and one 8–10-page paper required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151F. Korean Politics and Society. 4 Units.
Examination of contemporary political/social structures and process of Korea (South and North). Historical and cultural influences on current political systems and policies. Also included are economic development, national security, unification issues, and foreign relations.

POL SCI 151G. Electoral Systems. 4 Units.
Worldwide overview of electoral laws by which votes are converted into assembly seats. Systematic analysis of these laws and their effect on political process/stability. Single-, two-, and multi-party systems. Proportional representation versus plurality rule. Majoritarian and consensus patterns of government.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151H. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, SOC SCI 121T, ECON 154.

Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

POL SCI 152C. German Politics and Society. 4 Units.
Concentrates on twentieth-century German politics and society, focusing on the contemporary political system of democratic West Germany. Study of the historical legacies of Weimar and the Nazi period, the postwar division between the two states and their reunification.

Same as INTL ST 176G.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 152F. West European Politics. 4 Units.
Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as INTL ST 176i.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 152G. European Politics. 4 Units.
An introduction to the politics of Europe including the smaller countries and the former Warsaw Pact. Includes case study of three or four countries, as well as contemporary issues such as globalization, immigration, population decline, and European integration.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 153A. Latin American Politics. 4 Units.
Introduces the main concepts and theoretical approaches underlying the study of Latin American politics, examines recent political dynamics, and explores the challenges the region faces in the twenty-first century and how countries will attempt to address them.

Same as INTL ST 176K, CHC/LAT 151A.

Restriction: Political Science majors, Chicano/Latino Studies majors, and International Studies majors have first consideration for enrollment.

POL SCI 153B. Canadian Politics. 4 Units.
Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil. Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as INTL ST 176L.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 153E. Human Rights. 4 Units.
Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as INTL ST 154B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 153G. Cuban Society and Revolution. 4 Units.
Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as INTL ST 177E, HISTORY 166C, CHC/LAT 157.

POL SCI 154C. Comparative Politics: Four Nations, Three Continents. 4 Units.
Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as INTL ST 144A.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 154F. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.
Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, ANTHRO 164P.

(VIII)

POL SCI 154G. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, INTL ST 183E.

(VIII)

POL SCI 155A. New Democracies. 4 Units.
Examines what democracy is; considers competing theories about its causes; explores multiple democratic institutions; discusses several types of democracy; and analyzes various aspects of democratic quality and stability, focusing on Eastern Europe, Latin America, and sub-Saharan Africa.

Same as INTL ST 124B.
POL SCI 155C. Organizations. 4 Units.
How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as SOCIOL 141.
Restriction: Sociology and Political Science majors have first consideration for enrollment.

POL SCI 155F. Political Economy of Japan. 4 Units.
Surveys postwar developments in the politics and political economy of Japan. Topics include the political and institutional context of policy making; pressures for change which Japan's political economy has faced in the last decade; Japan's past and present foreign policies.

Same as INTL ST 114D.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 155A. Political Participation. 4 Units.
The ways in which people in various political systems take part in politics, especially in activities directed toward affecting outcomes. Who is active, what they do, why they do it, and what difference it makes.

POL SCI 155B. Participation and Representation. 4 Units.
Examines the concepts "political participation" and "political representation" and the interconnection between these concepts. Addresses both the theoretical issues and debates raised by these concepts and considers how they are studied empirically.

Restriction: Upper-division students only. Political Science majors have first consideration for enrollment.

POL SCI 155C. Citizen Politics. 4 Units.
Study of the role of public opinion in the political process. Reviews some key research approaches and findings on which our current understanding of public opinion is based. Provides an opportunity to conduct research and to analyze public opinion surveys.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 155CW. Citizen Politics. 4 Units.
Study of the role of public opinion in the political process. Reviews some key research approaches and findings on which our current understanding of public opinion is based. Provides an opportunity to conduct research and to analyze public opinion surveys.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Political Science majors have first consideration for enrollment.

(Ib)

POL SCI 156D. Protests, Movements, and Revolutions. 4 Units.
A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 6A or ECON 1.
Same as SOCIOL 174.
Restriction: Political Science and Sociology majors have first consideration for enrollment.

POL SCI 157A. Nationalism. 4 Units.
Nationalism, one of the most potent social and political forces of the twentieth century, is explored. Seeks to understand the sources and nature of various forms of nationalism.

POL SCI 157AW. Nationalism. 4 Units.
Nationalism, one of the most potent social and political forces of the twentieth century, is explored. Seeks to understand the sources and nature of various forms of nationalism.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)
POL SCI 158C. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as SOC SCI 188I, INTL ST 162.

POL SCI 158D. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, INTL ST 165.

POL SCI 159. Special Topics in Comparative Politics. 4 Units.
Studies in selected areas of comparative politics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 169. Conflict Management. 4 Units.
Special Instance.

POL SCI 171A. Law and Society. 4 Units.
Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171AW. Law and Society. 4 Units.
Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171B. Jurisprudence. 4 Units.
A survey of legal philosophies. Explores jurisprudence from the ancient Greeks to the present, including natural law philosophy; legal positivism and realism; sociological jurisprudence; and liberal, radical, and conservative thought.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171C. Comparative Constitutional Politics. 4 Units.
Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171CW. Comparative Constitutional Politics. 4 Units.
Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 171D. American Constitutional Law. 4 Units.
American constitutional interpretation of cases involving separation of powers, federal-state relations, rights of property, free expression, privacy, criminal due process, political participation, and equality. Includes legal research methods, development of judicial review, legal reasoning, and impact of Supreme Court decisions.

Prerequisite: POL SCI 71A.
Overlaps with CRM/LAW C122.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171F. Law in the Twenty-First Century. 4 Units.
Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as SOC SCI 172D.

Restriction: Political Science and Social Science majors have first consideration for enrollment.

POL SCI 171G. Legal Implications of the Drug Trade. 4 Units.
Examines United States policy to combat domestic and international narcotics trafficking. Analyzes the national drug policy and program implementation by federal and state agencies. Considers the effects of these policies on our individual constitutional rights and the criminal justice system.

POL SCI 172A. International Law. 4 Units.
Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A.

Same as INTL ST 145A.

(VIII)

POL SCI 172B. International Law and the U.S. Legal System. 4 Units.
Explores how international law and U.S. law interact, focusing on recent cases and controversies. Topics include: treaty and customary law as U.S. law; international human rights litigation in U.S. courts; war powers; detentions in the war on terror; and torture.

Prerequisite: POL SCI 71A or POL SCI 172A.

POL SCI 172C. Constitution and Rights. 4 Units.
How are constitutions crafted, maintained, and changed? Does constitutionalism support or undermine democracy? What difference do rights and constitutional courts make? Explores these questions through a comparative examination of the theory and practice of constitutionalism in developing democracies.

Prerequisite: POL SCI 71A.

Same as INTL ST 145C.

POL SCI 172D. Courts in New Democracies. 4 Units.
Examines the conceptual, theoretical, and empirical foundations of the study of courts and politics in new democracies, introducing students to a variety of contemporary debates about how political dynamics shape courts, and how courts shape politics.

Prerequisite: POL SCI 71A.

Same as INTL ST 145D.

POL SCI 174A. Civil Liberties. 4 Units.
Political analysis of selected Supreme Court cases involving claims under the Bill of Rights and the Fourteenth Amendment. Topics include: race, sex, and other forms of discrimination; criminal justice; privacy; freedom of speech and related claims.

Prerequisite: POL SCI 71A.

Overlaps with CRM/LAW C122.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 174B. Contemporary Constitutional Rights. 4 Units.
Addresses the interpretation and application of the United States' fundamental rules. These rules tell us something about the goals of society, and the means chosen to achieve them by allocating rights, duties, costs, and benefits among its members.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 174C. U.S. Supreme Court. 4 Units.
Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, land decision-making, impact of Supreme Court decisions.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 174CW. U.S. Supreme Court. 4 Units.
Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, land decision-making, impact of Supreme Court decisions.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 179. Special Topics in Public Law. 4 Units.
Studies in selected areas of public law. Topics addressed vary each quarter.

Prerequisite: POL SCI 71A.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI H182A. Honors Thesis Workshop. 4 Units.
A weekly seminar/workshop to facilitate the exchange of ideas and research strategies among students and to review their progress in writing the thesis.

Restriction: Open only to students in the Political Science Senior Thesis program.

POL SCI 183. Public Affairs Internship. 4 Units.
Supervised internship and study in political, governmental, nonprofit, or related organizations for students participating in the Department’s Public Affairs Internship Program. Enrollment dependent upon availability of intern positions.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

POL SCI 190. Senior Thesis. 4 Units.
Thesis research with Political Science faculty.

Repeatability: May be taken for credit 3 times.

POL SCI 190W. Senior Thesis. 4 Units.
Thesis research with Political Science faculty.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times.

POL SCI 197. Field Study. 1-4 Units.
Field study with Political Science faculty.

Repeatability: Unlimited as topics vary.
POL SCI 198. Directed Group Study. 1-4 Units.
Directed group study with Political Science faculty.

Repeatability: Unlimited as topics vary.

POL SCI 199. Independent Study. 1-4 Units.
Independent study or research with a Political Science faculty member.

Repeatability: May be repeated for credit unlimited times.

POL SCI 209A. Study of Democracy Colloquium. 1.33 Unit.
Skills critical to professional success. Students learn and practice professional presentation skills, develop substantive knowledge in the field by attending talks and panels, and interact with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209A may not be taken for credit if taken after SOCIOL 229.

POL SCI 209B. Study of Democracy Colloquium. 1.33 Unit.
This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209B may not be taken for credit if taken after SOCIOL 229 Democracy.

POL SCI 209C. Study of Democracy Colloquium. 1.34 Unit.
This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.

Restriction: Graduate students only. POL SCI 209C may not be taken for credit if taken after SOCIOL 229 Democracy.

POL SCI 210A. Colloquium. 1.3 Unit.
Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

POL SCI 210B. Colloquium. 1.3 Unit.
Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210A.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

POL SCI 210C. Colloquium. 1.4 Unit.
Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210B.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

POL SCI 211A. Foundations of Modern Political Science. 4 Units.
Provides an introduction to foundational debates and controversies in contemporary political science, exploring these issues through the prism of nineteenth, twentieth and twenty-first century scholars who have profoundly shaped the contours of contemporary political science.

Restriction: Graduate students only.
POL SCI 211B. Micropolitics. 4 Units.
Provides students with comprehensive introduction to the substance and methods of the study of political behavior. Focuses on the level of individual behavior, but the relation to macrosocial analysis is considered.

Restriction: Graduate students only.

POL SCI 211C. Macropolitics. 4 Units.
Examines some of the major research issues in political science involving macro-level questions: systemic processes, political institutions, or system outputs.

Restriction: Graduate students only.

POL SCI 212A. Public Opinion. 4 Units.
Introduction to the study of U.S. public opinion. Provides an overview of the theories regarding opinion formation, the methodologies employed, and the role of public opinion in democratic governments.

Restriction: Graduate students only.

POL SCI 212B. Ethics Workshop. 4 Units.
Students find an important question in ethics, search literature to assess topic's importance, post question to be researched, propose method of analysis and type of data, analyze data, and note how their works contribute to knowledge in the field.

POL SCI 219. Special Topics in Politics and Society. 4 Units.
Current research in politics and society.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

POL SCI 221A. Public Policy . 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 221.

Restriction: Master of Public Policy graduate students have first consideration for enrollment.

POL SCI 222A. Collaborative Governance and Public Management. 4 Units.
Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as PP&D 283.

Restriction: Graduate students only.

POL SCI 223A. Theories of Power and Empowerment. 4 Units.
Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as PP&D 279, SOCIOL 271, MGMTPHD 297R.

Restriction: Graduate students only.

POL SCI 229. Advanced Research Methods: Varied Topics. 4 Units.
Topics in advanced research methods. Topics will vary.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

POL SCI 231A. Political Epistemology. 4 Units.
Focuses on fundamental issues of knowledge in the study of politics, especially interconnections and tensions between politics and knowledge. Counts as the Field Seminar in Political Theory.

Restriction: Graduate students only.
POL SCI 232A. Introduction to Voting Theory. 4 Units.
Introduction to voting modules. Substantive topics include majority rule, voting methods and their properties, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Restriction: Graduate students only.

POL SCI 234A. Research Methods in Political Science. 4 Units.
An introduction to standard research techniques in political science. Issues of epistemology, research design, and approaches to empirical analysis.

Prerequisite: Upper-division or graduate-level statistics.

Restriction: Graduate students only.

POL SCI 239. Special Topics in Political Theory. 4 Units.
Current research in political theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

POL SCI 241B. Seminar in International Relations Theory. 4 Units.
Overview of the major theories guiding research and scholarship in international relations. Focus on major conceptual approaches (realism, neoliberalism, marxism) and levels of analysis (systemic, state, and subnational), as well as on methodological/epistemological debates engulfing the field.

Restriction: Graduate students only.

POL SCI 241D. Norms in International Relations. 4 Units.
evaluates various theoretical and empirical approaches to understanding the emergence, diffusion, and effects of international norms.

Restriction: Graduate students only.

POL SCI 245A. U.S. Ethnic Politics. 4 Units.
Assesses theories of ethnic political attitudes and behaviors in U.S. politics and examines methodological approaches to testing theories of ethnic politics. The primary focus is contemporary ethnic politics with attention to ethnic politics in American political development.

Same as CHC/LAT 235.

Restriction: Graduate students only.

POL SCI 252A. The State in Comparative Perspective. 4 Units.
Seminar examining the state from theoretical, empirical, comparative perspectives. How the state came into being, the state's role in the economy, toward society and internationally, and in policy-making in Western Europe, East Asian newly industrialized countries, the Third World.

Restriction: Graduate students only.

POL SCI 252F. Political Culture and Democracy. 4 Units.
Examines the political culture literature and its relationship to democratic development. What are the cultural prerequisites of democracy, what aspects of political culture facilitate democratic politics and governmental performance, and what forms and reforms a political culture.

Restriction: Graduate students only.

POL SCI 253B. Regime Change in East Asia. 4 Units.
Regime change from authoritarianism to democracies (Japan, South Korea, Taiwan); gradual political change (China). Uses theories from comparative literature on regime transition; combines theory with historical institutions, political culture, prior regimes, elements in the transition process in the four countries.

Restriction: Graduate students only.

POL SCI 254A. Introduction to Game Theory. 4 Units.
Introduction to non-cooperative games. The prisoner's dilemma, Nash equilibrium, sequential games, subgame perfection. Applications include collective action, agenda-setter models, spatial competition of political parties, models of revolution and arms race.

Restriction: Graduate students only.
POL SCI 260B. Political Participation. 4 Units.
Examines theoretical approaches to the explanation of the pattern of participation and consideration of the results of empirical studies of such activity by mass publics (mainly in Europe and North America). Addresses issues in both comparative politics and political behavior.

Restriction: Graduate students only.

POL SCI 270A. Political Economy I. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Same as ECON 270A.

Restriction: Graduate students only.

POL SCI 270B. Political Economy II. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: POL SCI 270A.

Same as ECON 270B.

Restriction: Graduate students only.

POL SCI 270C. Political Economy III. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: POL SCI 270B.

Same as ECON 270C.

Restriction: Graduate students only.

POL SCI 273A. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.

Same as PP&D 213, SOCIOL 223, MGMTPHD 297K.

Restriction: Graduate students only.

POL SCI 285A. Introduction to Political Psychology I. 4 Units.
Reviews theoretical questions regarding the relationship between the analytical and normative and the polity. Considers relationships between the analytical and normative concerns of psychology and political science, addressing empirical literatures on political socialization, ideology and public opinion, identity and nationality.

POL SCI 285B. Introduction to Political Psychology II. 4 Units.
Discusses the complex set of relationships among the three disciplines of politics, psychology, and economics, focusing on human decision-making processes and political choice.

Restriction: Graduate students only.

POL SCI 290. Dissertation Research. 1-12 Units.
Dissertation research with Political Science faculty.

Repeatability: Unlimited as topics vary.

POL SCI 299. Independent Study. 1-12 Units.
Independent research with Political Science faculty.

Repeatability: Unlimited as topics vary.
Social Science Courses

SOC SCI 1A. Principles in the Social Sciences. 4 Units.
Introduction to various disciplines within the social sciences. Provides an interdisciplinary perspective on understanding human behavior and social institutions, including interpersonal, economic, and cultural activities. Course may be offered online.

(III)

SOC SCI H1E. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOCECOL H20A.

Restriction: Campuswide Honors Program students only.

(III)

SOC SCI H1F. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A.

Same as SOCECOL H20B.

Restriction: Campuswide Honors Program students only.

(III)

SOC SCI H1G. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B.

Same as SOCECOL H20C.

Restriction: Campuswide Honors Program students only.

(III)

SOC SCI 2A. Introduction to Social Science Analysis. 4 Units.
Introduction to social science research and analytical models. Theory construction and use of research methods in an interdisciplinary context. Discussion of the application of social science research to public policy. Computer laboratories develop creative thinking, graphing, and data presentation skills.

Restriction: Social Science majors have first consideration for enrollment.

(III)

SOC SCI 3A. Computer-Based Research in the Social Sciences. 4 Units.
Focuses on the data manipulation, data visualization, and information searching techniques. Hands-on experience in hypothesis testing, mapping, graphics, and data arrays. Course may be offered online.

Restriction: School of Social Sciences majors have first consideration for enrollment.

SOC SCI 5A. Introduction to Human Geography. 4 Units.
Human behavior in a geographical context. Spatial patterns and organization of the cultural, social, and economic activities of man as imposed on and influenced by the earth’s physical setting.

(III)

SOC SCI 5B. Introduction to Physical Geography. 4 Units.
An introduction to the physical world we live in. Distribution and dynamics of the earth's air, water, and solid crust. Concepts and principles from climatology and geology. Selected examples from North America and beyond.
SOC SCI 5D. US & World Geography. 4 Units.
Survey of general geographical principles and facts on a world scale, as well as introduction to the broad regional and resource geography of the U.S., emphasizing in particular the interactions of physical and cultural factors.

(III, VIII)

SOC SCI 9A. General Statistics and Probability I. 4 Units.
Introduction to the variety of statistical applications in many fields, including the humanities, physical and social sciences, business, forensic and health sciences. Descriptive statistics, including percentile ranks, standardization, and normal approximation. Estimation and the measurement of error.
Overlaps with ECON 10A, PSYCH 10A, SOCECOL 13, SOC SCI 10A, SOCIOL 10A, POL SCI 10A.
Restriction: Non-Social Sciences majors only.

(Va)

SOC SCI 9B. General Statistics and Probability II. 4 Units.
Introduction to statistical inference, sampling distributions, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square. Selected applications in fields such as ecology, forensic science, and quantitative stylistics are based on student interests.
Prerequisite: SOC SCI 9A.
Overlaps with ANTHRO 10B, POL SCI 10B, PSYCH 10B, SOCECOL 13, SOC SCI 10B, SOCIOL 10B.
Restriction: Non-Social Sciences majors only.

(Va)

SOC SCI 9C. General Statistics and Probability III. 4 Units.
Focus on correlation and regression. One-way and two-way factorial analysis of variance. Introduction to repeated measures designs and non-parametric statistics. Critiquing the use of statistics in newspapers and popular magazines. Locating, accessing, and evaluating statistical data.
Prerequisite: SOC SCI 9B.
Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOC SCI 10C, SOCIOL 10C.
Restriction: Non-Social Sciences majors only.

(Vb)

SOC SCI 10A. Probability and Statistics in Social Sciences I. 4 Units.
Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.
Corequisite: SOC SCI 3A.
Prerequisite: SOC SCI 3A.
Overlaps with ECON 10A, PSYCH 10A, SOCECOL 13, POL SCI 10A, SOC SCI 9A, SOCIOL 10A.
Restriction: Lower-division students only. Social Science majors have first consideration for enrollment.

(Va)

SOC SCI 10B. Probability & Statistics in Social Sciences II. 4 Units.
Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests. Course may be offered online.
Prerequisite: SOC SCI 10A.
Overlaps with ANTHRO 10B, POL SCI 10B, SOCECOL 13, SOC SCI 9B, SOCIOL 10B, PSYCH 10B.
Restriction: Social Science majors have first consideration for enrollment.

(Va)
**SOC SCI 10C. Probability & Statistics in Social Sciences III. 4 Units.**
Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discuss use of statistics in newspapers and popular magazines.

Prerequisite: SOC SCI 10B.

Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOCIOL 10C.

Restriction: Social Science majors have first consideration for enrollment.

(Vb)

**SOC SCI 11A. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.**
Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon? Course may be offered online.

Same as IN4MATX 12.

(II, III)

**SOC SCI 20. Model United Nations. 2 Units.**
Focuses on simulations of the foreign policy pursuits of selected countries in the international community. Emphasis placed on understanding the rules of debate, as well as the policy positions of the student's selected country in the United Nations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

**SOC SCI 40. Social Policy and Public Service. 4 Units.**
An introduction to the basic theories and principles of public policy. Students examine various influences on the development of public policy and the principle actors in the process, and learn to identify tools and techniques employed in policy making.

(III)

**SOC SCI 66. Introduction to Gangs. 4 Units.**
Introduces students to street gang subculture and explores risk factors associated with gang membership. Students develop a working definition for street gang and understand the difference between social and legal definitions. Also explores the connection between prison and street gangs.

**SOC SCI 70A. Race and Ethnicity. 4 Units.**
Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SOCIOL 63.

(VII)

**SOC SCI 70C. Comparing Cultures. 4 Units.**
Introduces students to the scope of cross-cultural comparisons by analyzing the theories, methodologies, and facts utilized by anthropologists, sociologists, social psychologists, political scientists, and historians in comparing cultures.

(III, VII)

**SOC SCI 78A. Asian American Histories. 4 Units.**
Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as ASIANAM 50, HISTORY 15C.

(III or IV) and VII.

**SOC SCI 78B. Asian American Communities. 4 Units.**
Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as ASIANAM 52.

(III, VII)
SOC SCI 78C. Asian Americans and Comparative Race Relations. 4 Units.
Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.
Same as ASIANAM 53.

(III, VII)

SOC SCI 89. Special Topics in Social Sciences. 2-4 Units.
Studies in selected areas of Social Sciences. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

SOC SCI 102A. Introduction to Geographic Information Systems. 4 Units.
Hands-on laboratory course introduces students to the fundamentals of Geographic Information Systems (GIS) technology using social science applications. Students will learn to organize, manipulate, and display spatial data leading to the design of their own GIS research project.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 102B. Intermediate Geographic Information Systems. 4 Units.
Expands Geographic Information Systems (GIS) skills to more advanced theories and concepts in the spatial analysis of social science issues and particularly to analyzing and interpreting spatial data. Students develop and complete a GIS research project of their own choosing.
Prerequisite: SOC SCI 102A.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 103A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.
Same as INTL ST 105A, POL SCI 130A, SOCIOL 134.
Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

SOC SCI 103B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.
Prerequisite: POL SCI 130A or ECON 116A.
Same as INTL ST 105B, POL SCI 130B.
Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

SOC SCI 115D. International Business. 4 Units.
Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.
Same as INTL ST 112A.

SOC SCI 115E. California and Global Economy. 4 Units.
Presents the nature of the State's economy and the current and projected role of California in the world economy.
Same as INTL ST 135.

SOC SCI 118G. Regional Geography of California. 4 Units.
Geographical analysis of selected regions of California, in particular geomorphological, hydrological, and climatic conditions, as well as economic and social strengths and weaknesses. May include some fieldwork in Orange County on environmental, social and residential problems, with legislative background information.

SOC SCI 119. Special Topics in Geography. 4 Units.
Studies in selected areas of geography. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
SOC SCI 120. Transnational Gangs. 4 Units.
Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology. Course may be offered online.

Prerequisite: SOC SCI 66.

Same as INTL ST 130.
Overlaps with SOC SCI XI120, INTL ST XI130.

SOC SCI 121T. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, POL SCI 151H, ECON 154.

Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

SOC SCI 123A. U.S. Intervention in Latin America. 4 Units.
Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as INTL ST 177D, HISTORY 166, CHC/LAT 150.

SOC SCI 130B. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online.

Same as REL STD 112B, PSYCH 172S, LPS 140B.

SOC SCI 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.
Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as INTL ST 152A.

SOC SCI 164B. Domestic Gangs. 4 Units.
Examines the history and development of California street gangs and the role of historical events in that development. Students will be able to contrast and compare gang cohort behaviors between some of the major gangs in California.

Prerequisite: SOC SCI 66.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 164C. Prison Gangs. 4 Units.
Examines the growth and spread of prison gangs throughout the country. Relationships between prison and street gangs, and possible relationships with foreign drug trafficking organizations studied. Violence examined as the standard to establish dominance in and out of prison. Course may be offered online.

Prerequisite: SOC SCI 66.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 164D. Juvenile Gangs. 4 Units.
Examines risk factors that can be used to predict gang membership. Compares generational with non-generational gangs and develops a working sociological definition that can be used to identify street gangs. Myths about juveniles, street gangs. Course may be offered online.

Prerequisite: SOC SCI 66.

Restriction: Social Science majors have first consideration for enrollment.
SOC SCI 165. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSYCH 174H.

SOC SCI 167. Chicano/Chicana Labor History. 4 Units.
Examines origins of Latino/ Latina labor from colonial period to present. Emphasis on the issues of race, culture, class, and gender. Focus on processes and institutions including: encomienda, migration, unions, informal economies, Bracero program, domestic work.

Same as CHC/LAT 138.

SOC SCI 168B. Immigration and Inequality. 4 Units.
Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOCIOL 166.

SOC SCI 169AZ. Special Topics: Sociology. 4 Units.
No description.

Repeatability: Unlimited as topics vary.

SOC SCI 170A. Research Methods in the Social Sciences. 4 Units.
Examines how interdisciplinary social science research questions are formulated and studies several research methods including: experimental method, quasi-experimental methods, survey research, field research, evaluation research, and meta-analysis. Parametric and non-parametric statistical methods are illustrated using the SPSS program.

Prerequisite: SOC SCI 1A and SOC SCI 3A and SOC SCI 10C and SOC SCI 2A.

Restriction: Upper-division students only. Social Science majors have first consideration for enrollment.

SOC SCI 172A. American Culture. 4 Units.
A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing examining its use of language and rhetoric.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 172AW. American Culture. 4 Units.
A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing examining its use of language and rhetoric.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Social Science majors have first consideration for enrollment.

(SOC SCI 172D. Law in the Twenty-First Century. 4 Units.
Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as POL SCI 171F.

Restriction: Political Science and Social Science majors have first consideration for enrollment.

SOC SCI 173G. Film Media and the Latino Community. 4 Units.
Uses film as a resource for understanding contemporary issues and problems facing the Chicano/Latino community. (Does not study cinema as a genre.)

Same as CHC/LAT 114.

(VII)
SOC SCI 173I. Perspectives on the U.S. - Mexican Border. 4 Units.
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as CHC/LAT 160, INTL ST 177B.

(VII)

SOC SCI 173N. Revolution in Latin America. 4 Units.
Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, INTL ST 177C.

SOC SCI 173Q. Introduction to Cuba: History, Culture, and Society. 4 Units.
Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as INTL ST 177F, CHC/LAT 130.

(VIII)

SOC SCI 175B. Ethnic and Racial Communities. 4 Units.
Examines various theoretical analyses of race and ethnicity, particularly as they apply to Asian Americans. Also explores the relationship of Asian Americans to other racialized minorities in the U.S.

Same as ASIANAM 161.

SOC SCI 177B. Asian American Women. 4 Units.
Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as ASIANAM 162.

SOC SCI 178C. The Korean American Experience. 4 Units.
Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as ASIANAM 151C.

SOC SCI 178D. The Vietnamese American Experience. 4 Units.
Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics discussed include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as ASIANAM 151D.

SOC SCI 178E. The Japanese American Experience. 4 Units.
Studies the settlement of Japanese in Hawaii and the continental United States since the late nineteenth century. Topics covered include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as ASIANAM 151E.

SOC SCI 178F. South Asian American Experience. 4 Units.
Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as ASIANAM 151F.

Restriction: Asian American Studies and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 178H. Southeast Asian American Experience. 4 Units.
Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as ASIANAM 151H.
SOC SCI 178J. Chinese American Experience. 4 Units.
Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.
Same as ASIANAM 151J.

SOC SCI 178K. Filipina/Filipino American Experience. 4 Units.
Examines the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the twentieth century. Topics include colonialism, nation, migration, gender, and culture.
Same as ASIANAM 151K.

SOC SCI 179. Special Topics in Asian American Studies. 4 Units.
Studies in selected areas of Asian American Studies. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

SOC SCI 180X. Research Methods . 4 Units.
Develops an understanding of major research methods emphasizing quantitative research techniques; identifies techniques for research questions; applies understanding in relation to contemporary issues by way of a written a proposal for a quantitative research project.
Grading Option: Pass/no pass only.
Restriction: SAEP students only.

SOC SCI 180Y. Statistical Methods . 4 Units.
Covers the following topics: measurement, data screening procedures, descriptive statistics, the chi-square statistic, logistic regression, bivariate correlation and regression, and multiple correlation and regression. Students will develop a conceptual understanding of applied statistics.
Grading Option: Pass/no pass only.
Restriction: SAEP participants only.

SOC SCI 180Z. Communications . 4 Units.
Improves written and verbal communication skills through gathering, synthesizing, and organizing information into salient and clear points. Students learn to articulate information so that it can be clearly understood by others. Application to SAEP program and acceptance required.
Grading Option: Pass/no pass only.
Restriction: SAEP students only.

SOC SCI 181A. Ethical Leadership. 4 Units.
Explores historical and contemporary theories of ethical and unethical leadership. Examines models of "good leadership" such as cardinal and monastic virtues; and models of "bad leadership," such as Machiavelli's Prince. Explores the philosophies, styles, and accomplishments of leaders.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 183A. International Studies Forum. 2 Units.
A faculty-student forum featuring lecturers from a variety of institutions with discussion issues related to international studies.
Repeatability: May be taken for credit 4 times.
Same as HUMAN 183A, SOCECOL 183A, INTL ST 183A.
Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

SOC SCI 183B. Seminar in Mediation. 4 Units.
Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.
Same as HUMAN 183B, INTL ST 183B, SOCECOL 183B.
Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.
SOC SCI 183C. Seminar in Conflict Resolution. 4 Units.
Designed for students pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write research paper.

Same as SOCECOL 183C, HUMAN 183C.

SOC SCI 183CW. Seminar Conflict Resolution. 4 Units.
Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, HUMAN 183CW.

SOC SCI 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, POL SCI 154G, INTL ST 183E.

SOC SCI 184A. Sage Leader Research I. 2 Units.
Participants in the SAGE Scholars Program learn to define leadership concepts, discover various leadership styles, and develop strong leadership and communication skills resulting in strengthened ability to contribute to and interact with UCI and the Orange County community.

Grading Option: Pass/no pass only.

Restriction: SAGE Scholars Program students only.

SOC SCI 184B. Sage Leader Research II. 4 Units.
Provides a survey of contemporary topics and challenges in the fields of management and leadership. Case studies and text by leading authors are used to analyze key leadership issues in twenty-first century, with particular emphasis on current events.

Restriction: SAGE Scholars Program students only.

SOC SCI 184F. International Journalism. 4 Units.
Studies and critically analyzes how the media covers international issues that have reshaped American foreign coverage and the implications for Americans and U.S. foreign policy. Focuses on international reporting as a way of developing fundamental skills of journalism.

Same as INTL ST 155A.

SOC SCI 184GW. Media Writing. 4 Units.
Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as INTL ST 155BW.

Restriction: International Studies majors have first consideration for enrollment.

SOC SCI 185W. People in Society. 4 Units.
Through readings about people in distinctly different societies throughout history, students learn concepts that cross the boundaries of the social science disciplines. Such themes as democracy, elitism, power, social class, and gender as the basis for discussion and writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences majors only.
SOC SCI 186A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as PSYCH 144A, CHC/LAT 191A.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 186B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children and be culturally sensitive.

Same as PSYCH 144B, CHC/LAT 191B.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 186C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as PSYCH 144C, CHC/LAT 191C.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 187. Twenty-First-Century Graduate Education. 2 Units.
Graduate and professional education in twenty-first century United States. Examines strategies for admission to postbaccalaureate programs and success in graduate study culture. Introduction to processes including planning and preparation, school selection, entrance examination preparation, submission of applications, writing personal statements.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only.

SOC SCI 188A. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as INTL ST 165, POL SCI 158D.

SOC SCI 188D. Iran: Past and Present. 4 Units.
Pre-revolutionary Iran; and Iran since the revolution. History, oil and politics: domestic and international.

Same as INTL ST 168.

SOC SCI 188E. Israel and the World: An Introduction. 4 Units.
Examines the founding of Israel, its relationship with the Arab world, the role of the international community, and the challenges it faces today.

Same as INTL ST 170.

SOC SCI 188I. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as INTL ST 162, POL SCI 158C.
SOC SCI 188K. Political Islam. 4 Units.
Political Islam is a diverse phenomenon. While noticeable barriers exist to "Islamist democracy," it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as INTL ST 161A.

SOC SCI 188M. Psychology of the Middle East Conflict. 4 Units.
Explores how emotions guide actions; political movements and social identity factors in ethnic, religious, or other group conflicts; psycho-biographies of political leaders and effects on foreign policy making; decisions to go to war; psychological dimensions of conflict and conflict resolution.

Same as INTL ST 166.

SOC SCI 189. Special Topics in Social Sciences. 2-4 Units.
Studies in selected areas of social sciences. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI H190A. Honors Research Workshop. 4 Units.
Student develops a 10–15-page prospectus of research for the honors thesis which includes: the research question, literature review, methods of investigation, and bibliography. Student selects a faculty mentor who will supervise thesis research and writing in winter and spring.

Restriction: Honors Program for Social Science majors students only.

SOC SCI H190B. Honors Thesis Research. 4 Units.
The student initiates and completes data collection for the honors thesis. A faculty mentor provides supervision and feedback on thesis chapters.
Prerequisite: SOC SCI H190A.

SOC SCI H190C. Honors Thesis. 4 Units.
The student completes, with the approval of the faculty mentor, an honors thesis containing: statement of the problem, literature review, research hypotheses, methods of investigation, results, discussion, and bibliography.
Prerequisite: SOC SCI H190B. Satisfactory completion of the Lower-Division Writing requirement.

(SOC SCI 191. Graduate-Mentored Study in the Social Sciences. 4 Units.
Offers a hands-on research experience while increasing awareness of the various disciplines in the social sciences and of the requirements of graduate school. Features graduate-mentored study under the supervision of the Associate Dean.
Prerequisite: Identification of a graduate student (who is in good standing) as a mentor.
Grading Option: Pass/no pass only.

SOC SCI 193A. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.
Prerequisite: SOC SCI 70C or SOCIOL 63. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Social Policy and Public Service majors only.

SOC SCI 193B. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.
Prerequisite: SOC SCI 193A.
**SOC SCI 193C. Field Studies in Public and Community Service. 4 Units.**
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.
Prerequisite: SOC SCI 193B.

**SOC SCI 194A. Public Service Internship. 2-4 Units.**
Introduces the role of etiquette and leadership in the professional environment. With a two-unit (50 hours) or four-unit (100 hours) credit option, students intern at a nonprofit agency exploring their roles as community leaders and improving their professional skills. Course may be offered online.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Social Policy and Public Service majors only.

**SOC SCI 194B. Community Internship. 2-4 Units.**
Required to complete 50 (two units) or 100 (four units) hours at a nonprofit organization, students engage in lectures related to the formation and maintenance of nonprofit organizations. Grant writing, funding issues, and effective service delivery are addressed.
Prerequisite: SOC SCI 194A.

Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.
Restriction: Social Science majors only.

**SOC SCI 194C. Management and Leadership Practicum-Social Science. 2-4 Units.**
Social Sciences Academic Resource Center (SSARC) Resource Managers (RMs) report directly to the Director and Associate Director, serving as frontline resource consultants, assisting visitors with resume development, graduate and professional school planning, internship placement, and professional development.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 12 units.

**SOC SCI 195A. Educational Policy Field Studies. 4 Units.**
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.
Repeatability: May be taken for credit 3 times.

**SOC SCI 195B. Educational Policy Field Studies. 4 Units.**
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.
Prerequisite: SOC SCI 195A.
Repeatability: May be taken for credit 3 times.

**SOC SCI 195C. Educational Policy Field Studies. 4 Units.**
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.
Prerequisite: SOC SCI 195B.
Repeatability: May be taken for credit 3 times.

**SOC SCI 196. Global Connect. 2-4 Units.**
Identifies factors of change that influence the twenty-first century. Students serve as mentors at high schools to introduce globalization issues through workshops and lectures. Students must submit an application and have a 3.0 or higher overall GPA.
Repeatability: May be taken for credit 3 times.
SOC SCI 197. Professional Internship. 2-4 Units.
Students apply classroom knowledge through research projects in nonprofit agencies (local, state, and government) and the private sector. They pose solutions to agency-posed questions. Students gain field experience through 50 hours (for 2 units) or 100 (for 4 units). Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 8 units.
Restriction: School of Social Sciences majors only.

SOC SCI 198. Directed Group Study. 2-4 Units.
Directed study with Social Science faculty.
Repeatability: May be taken for credit for 12 units.

SOC SCI 199. Individual Study. 2-4 Units.
Opportunities to do research and learn new skills outside the normal classroom environment. Students participate in planned research and study activities under a written contract with a supervising UCI instructor. Students may enroll for only one 199 each quarter.
Repeatability: May be taken for credit for 16 units.
Restriction: Upper-division students only.

SOC SCI 209. Special Topics in Mathematical Social Science. 4 Units.
Studies in selected areas of mathematical social science. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

SOC SCI 211A. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

SOC SCI 211B. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

SOC SCI 211C. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

SOC SCI 249A. Special Topics in Social Networks. 4 Units.
Studies in selected areas of social networks. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOC SCI 253A. Oral History, Life History. 4 Units.
Interdisciplinary and comparative work in oral and life history; methods of interviewing.
Same as ANTHRO 221A.
Restriction: Graduate students only.
**SOC SCI 253F. Population. 4 Units.**
Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Same as SOCIOL 262A.

Restriction: Graduate students only.

**SOC SCI 253J. Social Movements. 4 Units.**
A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Same as SOCIOL 240A.

Restriction: Graduate students only.

**SOC SCI 253N. Classical Social Theory. 4 Units.**
Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Same as SOCIOL 210A.

Restriction: Graduate students only.

**SOC SCI 253R. Contemporary Social Theory. 4 Units.**
Familiarizes students with twentieth-century developments in social thought that have influenced sociological research, suggesting "what is living and what is dead" in the "classics" and offering an overview of the main outlines of recent sociological theorizing.

Same as SOCIOL 210B.

Restriction: Graduate students only.

**SOC SCI 254A. Transnational Migration. 4 Units.**
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troublings of places, spaces, borders, and bodies of all sorts.

Same as ANTHRO 235A, CHC/LAT 215.

Restriction: Graduate students only.

**SOC SCI 254J. Global Urbanization. 4 Units.**
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as PP&D 273, SOCIOL 252A.

Restriction: Graduate students only.

**SOC SCI 254L. Approaches to Globalization. 4 Units.**
Historical and contemporary approaches to the world economy, emphasizing anthropological questions of culture, power, identity, inequality. Examines "neo-imperialism," "late capitalism," accumulation, global markets, urban space, the state, business and policy globalization discourse, "local" responses to and instantiations of the "global."

Same as ANTHRO 248A.

Restriction: Graduate students only.

**SOC SCI 255C. Grant and Proposal Writing. 4 Units.**
Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Same as ANTHRO 213A.

Restriction: Graduate students only.
SOC SCI 259A. Special Topics in Social Relations. 1-4 Units.
Studies in selected areas of social relations. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOC SCI 272A. Origin and Evolution of Marxist Social Thought. 4 Units.
Focuses on the genesis and evolution of Marxist social thought. The "systemic" method of Marx and Engels to questions of economic production and reproduction is compared and contrasted with modern world-system grand visions, feminist-theoretic approaches, and postmodern critiques.
Prerequisite: Undergraduate course in political theory or equivalent.
Restriction: Graduate students only.

SOC SCI 289. Special Topics in Social Science. 4 Units.
Current research in Social Science.
Repeatability: Unlimited as topics vary.

SOC SCI 290. Dissertation Research. 4-12 Units.
Dissertation research with Social Science faculty.
Repeatability: May be repeated for credit unlimited times.

SOC SCI 299. Independent Study. 1-12 Units.
Independent research with Social Science faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

SOC SCI 399. University Teaching. 4 Units.
Limited to Teaching Assistants.
Repeatability: May be repeated for credit unlimited times.

Sociology Courses

SOCIOl 1. Introduction to Sociology. 4 Units.
Considers major sociological concepts, theories, and research findings illuminating processes of interpersonal interaction, social differentiation and stratification, integration and conflict, and change, with attention to variation in class, race/ethnic, gender, multicultural, and cross-national perspectives and experiences.
(III, VII)

SOCIOl 2. Globalization and Social Change. 4 Units.
Examines globalization and international issues from the perspective of sociology and related fields. Issues include economic globalization and global inequality, international environmental problems, international politics, trends in global culture, and global conflict.
(III, VIII)

SOCIOl 3. Social Problems. 4 Units.
Focuses on how institutional and organizational features of societies generate problems for people. Particular attention directed at a set of problems related to political and economic inequality: poverty, racism, sexism, urban and population problems, the environment, the criminal justice system.
(III, VII)

SOCIOl 10A. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.
Same as ANTHRO 10A.
Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A, SOC SCI 9A.
Restriction: Anthropology and Sociology majors have first consideration for enrollment.
(Va)
SOCIOL 10B. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A.

Same as ANTHRO 10B.
Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B, SOC SCI 9B.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.
(Va)

SOCIOL 10C. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B.

Same as ANTHRO 10C.
Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C, SOC SCI 9C.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.
(Vb)

SOCIOL 19. Special Topics: Methods. 4 Units.
Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 29. Special Topics: Theory. 4 Units.
Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: May be repeated for credit unlimited times.

SOCIOL 31. Self-Identity and Society. 4 Units.
Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as PSYCH 78A.
Overlaps with SOCIOL 61A.
(III)

SOCIOL 39. Special Topics: Social Psychology. 4 Units.
Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 41. Small Group Dynamics. 4 Units.
Deals with models for understanding behavior in small groups, including coalition formation, socialization, group norms and decision rules, leadership, conformity, group structure, and communication processes.

Restriction: Sociology majors have first consideration for enrollment.
SOCIOL 43. City and Community. 4 Units.
Examines nature, causes, and consequences of urbanization along with changing scale and complexity, demographic/ecological city growth patterns, quality of life in urban areas, processes of decision-making, and bearing of sociological investigation on public policy concerns in contemporary urban society.
Overlaps with PP&D 40.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 44. Births, Deaths, and Migration. 4 Units.
Introduction to the analysis of human population including fertility, mortality dispersion, sex distribution. Attention is focused on the effects of these variables on, e.g., over-population, social disorganization, and the stability of social institutions.

(VIII)

SOCIOL 49. Special Topics: Structures. 4 Units.
Studies in selected areas of structures. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

SOCIOL 51. Asian American Family & Community. 4 Units.
Briefly examines the history of different Asian American groups and provides an in-depth analysis of issues related to family composition, mate selection, changing gender roles, and intergenerational conflict.

(VII)

SOCIOL 55. Media and Society. 4 Units.
Examines social implications of changes in American mass media since World War II, including demise of big-city newspapers, rise of broadcast television, fragmentation of radio and magazine markets. Explores potential implications on culture and institutions of emerging technologies.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 56. Religion and Society. 4 Units.
A critical and personal examination of the varieties of religious and spiritual experiences human beings are undergoing in contemporary society. The role of conscious understanding and unconscious conditioning regarding religion and spirituality.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 59. Special Topics: Social Institutions and Culture. 4 Units.
Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

SOCIOL 62. Families and Intimate Relations. 4 Units.
Sociological theories/research on marriage, kinship, intimacy, and divorce. Emphasis on comparing family patterns in different social classes, ethnic groups, and societies, and on relating family life to the economy and other social institutions. Topics include gender roles, child-rearing, historical change.

(III)

SOCIOL 63. Race and Ethnicity. 4 Units.
Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.
Same as SOC SCI 70A.

(VII)

SOCIOL 64. Sociology of Sexuality. 4 Units.
Explores how and why sexuality matters in society, affecting our expectations, experiences, and opportunities. Provides the conceptual and theoretical tools to analyze the personal and institutional consequences of different social constructions of sexuality.
SOCIOL 65. Cultures in Collision: Indian-White Relations Since Columbus. 4 Units.
An introduction to theories, terms, concepts, and methods used by anthropologists and sociologists to understand Native American cultures. How racial construction of an Indian "other" emerged, how anthropology contributed to Indian invisibility, and the persistence of Indian identity are examined.

Same as ANTHRO 85A.

(VII)

SOCIOL 68. Gender and Race Inequality in the Workplace. 4 Units.
Analysis of current state and trends in major inequality measures including the wage gap, occupational segregation, and access to managerial positions. Theories that purport to explain such differences, and the related empirical evidence, are also covered.

SOCIOL 68A. Ethnic and Immigrant America. 4 Units.
Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as CHC/LAT 65.

(VII)

SOCIOL 69. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.
Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

SOCIOL 79. Special Topics: Societies and Social Inequality. 4 Units.
Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 110. Research Methods. 4 Units.
Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches. Course may be offered online.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 110W. Research Methods. 4 Units.
Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment.

(Ib)

SOCIOL 112. Logical Models in Social Sciences. 4 Units.
Science asks two questions. "How things are?" leads to measurement and statistical analysis. But we see only what we look for. "How things should be, on logical grounds?" leads to quantitative logical models which tell us what to look for.

Same as POL SCI 136A.

SOCIOL 119. Special Topics: Methods. 4 Units.
Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 120. Sociological Theory. 4 Units.
What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Restriction: Sociology majors have first consideration for enrollment.
SOCIOL 120W. Sociological Theory. 4 Units.
What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 129. Special Topics: Theory. 4 Units.
Studies in selected areas of theory. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 133. Sociology of Generosity. 4 Units.
Introduces recent scientific research on the emergence of prosocial behavior that includes, but is not limited to, cooperation, fairness, reciprocity, and altruism. Emphasis is on learning why individuals would pursue collective benefits at the expense of self-interests.

SOCIOL 134. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.
Same as INTL ST 105A, SOC SCI 103A, POL SCI 130A.
Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

SOCIOL 135. Social Psychology of Networks. 4 Units.
Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.
Same as PSYCH 178N.
Restriction: Sociology and Psychology majors have first consideration for enrollment.

SOCIOL 136. Religious Traditions of Asian Americans. 4 Units.
Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.
Same as ASIANAM 143.

SOCIOL 138. Business Decisions. 4 Units.
Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.
Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)).
Same as ECON 148.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 139. Special Topics: Social Psychology. 4 Units.
Studies in selected areas of social psychology. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.
SOCIOL 141. Organizations. 4 Units.
How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as POL SCI 155C.

Restriction: Sociology and Political Science majors have first consideration for enrollment.

SOCIOL 142. White-Collar Crime. 4 Units.
Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as CRM/LAW C142.

Restriction: Sociology, Criminology, Law and Society, and Social Ecology majors have first consideration for enrollment.

SOCIOL 143. Social Networks and Social Support. 4 Units.
Examines the manner in which behaviors/attitudes of individuals are affected by their network ties to others. How are peoples' opportunities and well-being increased/decreased by their social networks? May include studies in mental/physical health, job seeking, separation and loss, and aging.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 144. Politics, Power, and Society. 4 Units.
Includes an examination of the major theoretical approaches to political sociology, and the application of these ideas to the politics of advanced capitalist societies. Also considers stability and change in power structures.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 145. Occupations and Professions. 4 Units.
What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCIOL 145W. Occupations and Professions. 4 Units.
What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

(Ib)

SOCIOL 147A. Cities and Social Change. 4 Units.
Focuses on comparative urban political economy and the way cities and urban process are linked to changes in the global system. Attempts to draw on a diverse interdisciplinary literature that includes sociology, geography, and urban planning.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCIOL 147AW. Cities and Social Change. 4 Units.
Focuses on comparative urban political economy and the way cities and urban process are linked to changes in the global system. Attempts to draw on a diverse interdisciplinary literature that includes sociology, geography, and urban planning.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

(Ib)
SOCIOL 149. Special Topics: Structures. 4 Units.
Studies in selected areas of structures. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 150. Sociological Lens on Religion. 4 Units.
Examines the effects of religious beliefs, belonging, and institutions on social dynamics, including class, gender, and racial stratification, politics, and social movements. Additional topics: the sociological significance of conversion, commitment, and secularization/sacralization.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 152. Sociology and Psychology of the Arts. 4 Units.
Explores the relationship between artists and the "art world" through which artistic activity is defined, supported, and consumed. Empirical studies in the plastic arts, performing arts, and literature are used to examine varieties of aesthetic expressions.
Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCIOL 152W. Sociology of Art and Popular Culture. 4 Units.
Explores the relationship between artists and the "art world" through which artistic activity is defined, supported, and consumed. Empirical studies in the plastic arts, performing arts, and literature are used to examine varieties of aesthetic expressions.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCIOL 154. Medical Sociology. 4 Units.
Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.
Restriction: Upper-division students only. Sociology majors have first consideration for enrollment.

SOCIOL 154W. Medical Sociology. 4 Units.
Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Upper-division students only. Sociology majors have first consideration for enrollment.

SOCIOL 155B. Baseball and Society. 4 Units.
An examination of baseball’s role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 155BW. Baseball and Society. 4 Units.
An examination of baseball’s role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment.

(Ib)
SOCIO 156. Deviance. 4 Units.
Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as CRM/LAW C107, PSYCH 177D.

Restriction: Criminology, Law and Society, Social Ecology, Sociology, and Psychology majors have first consideration for enrollment.

SOCIO 158C. Money, Work, and Social Life. 4 Units.
Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Restriction: Sociology majors have first consideration for enrollment.

SOCIO 158CW. Money, Work, and Social Life. 4 Units.
Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment.

SOCIO 159. Special Topics: Social Institutions and Culture. 4 Units.
Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIO 161. Sociology of Sex and Gender. 4 Units.
Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

SOCIO 161W. Sociology of Sex and Gender. 4 Units.
Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

SOCIO 164W. Aging and Society. 4 Units.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

(Ib)

SOCIO 165A. Social Inequality: Sociological Perspectives. 4 Units.
Concrete sociological studies from across the world, including the United States, are compared to give perspectives on social status, power, economic differences, race, ethnicity, and gender.

Prerequisite: One course in Anthropology, Economics, Political Science, or Sociology.

SOCIO 165AW. Social Inequality: Sociological Perspectives. 4 Units.
Concrete sociological studies from across the world, including the United States, are compared to give perspectives on social status, power, economic differences, race, ethnicity, and gender.

Prerequisite: One course in Anthropology, Economics, Political Science, or Sociology. Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VIII)
SOCIOL 166. Immigration and Inequality. 4 Units.
Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.
Same as SOC SCI 168B.

SOCIOL 167A. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.
Same as CHC/LAT 148.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 167AW. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as CHC/LAT 148W.
Restriction: Chicano/Latino Studies and Sociology majors have first consideration for enrollment.

(Ib)

SOCIOL 168. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.
Same as POL SCI 134J.
Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

SOCIOL 168W. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as POL SCI 134JW.
Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

(Ib)

SOCIOL 169. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.
Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 170A. Vietnam War. 4 Units.
Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.
Same as INTL ST 143A.

SOCIOL 170B. U.S. War on Terrorism. 4 Units.
Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.
Same as INTL ST 175A.
SOCIOL 171. Environment and Society. 4 Units.
Examines society's changing relationship to the natural world. Delineates different models of "nature" and then explores their institutional roots, the social responses they have generated, and their implications for social inequality.

Restriction: Sociology majors have first consideration for enrollment.

SOCL 173. Social Inequality. 4 Units.
Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Restriction: Sociology majors have first consideration for enrollment.

SOCL 174. Protests, Movements, and Revolutions. 4 Units.
A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 6A or ECON 1.

Same as POL SCI 156D.

Restriction: Political Science and Sociology majors have first consideration for enrollment.

SOCL 175B. China in the Global Age. 4 Units.
Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as INTL ST 158D.

SOCL 175D. Migration Destinations. 4 Units.
Examines the migration patterns to the three largest nations that receive immigrants (i.e., permanent settlers): Australia, Canada, and the United States.

Same as ASIANAM 171A, INTL ST 117B.

SOCL 177. Immigration and Social Policy. 4 Units.
Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Restriction: Sociology majors have first consideration for enrollment.

SOCL 177W. Immigration and Social Policy. 4 Units.
Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment.

SOCL 179. Special Topics: Societies and Social Inequality. 4 Units.
Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCL 180A. Sociology Majors Seminar. 4 Units.
Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110.

Restriction: Sociology majors only.
SOCIOl 180AW. Sociology Majors Seminar. 4 Units.
Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors only.

(Ib)

SOCIOl 188BW. Honors Research and Thesis. 4 Units.
Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Prerequisite: SOCIOL H188A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Campuswide Honors Program students only.

(Ib)

SOCIOl H188A. Honors Research and Thesis. 4 Units.
Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Restriction: Campuswide Honors Program students only.

SOCIOl 189. Special Topics: Honors Sequence. 4 Units.
Independent honors research with Social Sciences faculty.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOl 197. Field Study. 4 Units.
Field study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

SOCIOl 198. Directed Group Study. 4 Units.
Directed study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

SOCIOl 199. Independent Study. 1-4 Units.
Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

SOCIOl 202A. Proseminar I in Sociology. 1 Unit.
Introduces first-year graduate students in Sociology to the current research interests of Sociology faculty, as well as to other aspects of graduate life at UCI and to the profession of sociology more generally.

Restriction: Graduate students only.

SOCIOl 202B. Proseminar II in Sociology. 4 Units.
Focus is on second-year research projects, design, development, data gathering, analysis, and preparing oral and written presentations of the results. Students learn analytic and writing skills, gain experience with research processes, and become socialized about professional standards, customs, and institutions.

Restriction: Graduate students only.
SOCIOL 210A. Classical Social Theory. 4 Units.
Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Same as SOC SCI 253N.

Restriction: Graduate students only.

SOCIOL 210B. Contemporary Social Theory. 4 Units.
Familiarizes students with twentieth-century developments in social thought that have influenced sociological research, suggesting "what is living and what is dead" in the "classics" and offering an overview of the main outlines of recent sociological theorizing.

Same as SOC SCI 253R.

Restriction: Graduate students only.

SOCIOL 211A. Sociology of Gender. 4 Units.
An introduction to the sociology of gender in the U.S. and globally. The social construction of gender and sexuality; theoretical perspectives and feminist frameworks. Theories of economy, patriarchy, and race, and the social positions of women and men.

Restriction: Graduate students only.

SOCIOL 212. Network Theory. 4 Units.
An introduction to theoretical work in the field of social networks. Topics include baseline models, homophily, and propinquity, exchange and power, balance theory, diffusion and social influence, equivalence, and cohesion. Deductive use of theory to make novel predictions is emphasized.

Restriction: Graduate students only.

SOCIOL 219. Special Topics: Theory. 2-4 Units.
Studies in selected areas of theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOCIOL 220A. Research Design. 4 Units.
Data collection, organization, and analysis in ethnographic or quasi-experimental settings, including interviewing, participant observations, behavior observations, and questionnaires. Research design issues include sampling, longitudinal research, and comparative research. Emphasis on the integration of qualitative and quantitative data.

Overlaps with SOCIOL 265.

Restriction: Graduate students only.

SOCIOL 221A. Graduate Statistics I. 4 Units.
Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Restriction: Graduate students only.

SOCIOL 221B. Graduate Statistics II. 4 Units.
Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A.

Restriction: Graduate students only.

SOCIOL 221C. Graduate Statistics III. 4 Units.
Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A and SOCIOL 221B.

Restriction: Graduate students only.
SOCIOL 222A. Comparative and Historical Sociological Methods. 4 Units.
Topics include the logic of comparative and historical analysis techniques and the examination of exemplar works in representative problem areas.
Restriction: Graduate students only.

SOCIOL 223. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.
Same as POL SCI 273A, PP&D 213, MGMTPHD 297K.
Restriction: Graduate students only.

SOCIOL 226A. Methods of Demographic Analysis. 4 Units.
Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.
Same as PUBHLTH 209.
Restriction: Graduate students only.

SOCIOL 227A. Seminar Ethnographic & Qualitative Field Methods. 4 Units.
Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.
Grading Option: In progress only.
Restriction: Graduate students only.

SOCIOL 227B. Seminar Ethnographic & Qualitative Field Methods. 4 Units.
Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.
Prerequisite: SOCIOL 227A.
Restriction: Graduate students only.

SOCIOL 229. Special Topics: Methods. 1-4 Units.
Studies in selected areas of methods. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 230A. Race and Ethnicity. 4 Units.
An examination of central questions and issues in the field of race and ethnicity through a critical analysis and discussion of the principal theoretical perspectives and paradigms that have framed much of the scholarship in the area.
Restriction: Graduate students only.

SOCIOL 232. Inequality. 4 Units.
Theoretical and empirical approaches to the study of social and economic inequality, with special attention to race/ethnicity, class, and gender.
Restriction: Graduate students only.

SOCIOL 233. Immigration and the New Second Generation. 4 Units.
Investigates how the children of today's immigrants incorporate into the United States social structure. Covers topics such as assimilation, immigrant families and communities, education, language, racial and ethnic identities, gender, education, and the changing U.S. racial structure.

SOCIOL 234. Theory of Ethnicity. 4 Units.
Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.
Restriction: Graduate students only.
SOCIOL 235. Poverty and Development. 4 Units.
Critical examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as PP&D 251.

Restriction: Graduate students only.

SOCIOL 236. Immigrant Incorporation. 4 Units.
Focuses on the conceptual and theoretical ideas on immigrant adaptation and identity to a new country; frameworks that emphasize incorporation as a melting pot; synthesizing the theoretical and empirical literature on incorporation in order to develop better models.

Restriction: Graduate students only.

SOCIOL 237. Educational Inequality. 4 Units.
Focuses on macro-level explanations of inequality of schooling, particularly in the U.S. context. Explores traditional models, such as conflict, functionalism, status-attainment, cultural reproduction, and newer synthetic accounts. Emphasis on higher education access and the intersection of education and work.

Restriction: Graduate students only.

SOCIOL 239. Special Topics: Social Inequality. 2-4 Units.
Studies in selected areas of social inequality. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOCIOL 240A. Social Movements. 4 Units.
A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Same as SOC SCI 253J.

Restriction: Graduate students only.

SOCIOL 241A. Political Sociology. 4 Units.
Begins with an examination of the three major orientations to the State (Pluralist, Elitist, and Class). Next considers current topics in political sociology including the Welfare State, the New Deal, political behavior, social movements, participation, and democracy.

Restriction: Graduate students only.

SOCIOL 242. Sociology of Culture. 4 Units.
Major perspectives in the sociology of culture. Topics include the role of cultural dynamics in the reproduction of inequality, collective action, political and organizational decision making, emotional experience, and the social impacts of new technologies.

SOCIOL 249. Special Topics: Political Sociology and Social Movements. 2-4 Units.
Studies in selected areas of political sociology and social movements. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOCIOL 252A. Global Urbanization. 4 Units.
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as SOC SCI 254J, PP&D 273.

Restriction: Graduate students only.

SOCIOL 259. Special Topics: Global Studies and Comparative Development. 2-4 Units.
Studies in selected areas of global studies and comparative development. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
SOCIOL 260A. Family and Households . 4 Units.

Restriction: Graduate students only.

SOCIOL 261A. Life Course Sociology. 4 Units.
Age is a central organizing principle of individual lives, social institutions, and human populations. Considers how age is socially defined and how developmental transitions between ages (i.e., growing up and growing older) are accomplished.

Restriction: Graduate students only.

SOCIOL 262A. Population. 4 Units.
Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Same as SOC SCI 253F.

Restriction: Graduate students only.

SOCIOL 263. The Sociology and Demography of Health and Illness. 4 Units.
Health from a population perspective. Topics include pandemics; the "McKeown debate" (standard of living vs. public health vs. medicine); long-term health changes in developed countries; health and socio-economic status; immigrant health. Not a course in medical sociology as such.

SOCIOL 264. Immigrant America. 4 Units.
The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Restriction: Graduate students only.

SOCIOL 265. DASA Research Design. 4 Units.
Data collection, organization, and analysis in population studies and demography. Research design issues include sampling, longitudinal research, and comparative research.

Prerequisite: Enrollment in DASA program.

Overlaps with SOCIOL 220A.

Restriction: Graduate standing only.

SOCIOL 269. Special Topics: Social Demography. 4 Units.
Studies in selected areas of social demography. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOCIOL 271. Theories of Power and Empowerment. 4 Units.
Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as POL SCI 223A, PP&D 279, MGMTPHD 297R.

Restriction: Graduate students only.

SOCIOL 272A. Work and Industrial Relations. 4 Units.
Explores the nature, causes, and results of workplace conflict in American Society. Considers topics such as "American Exceptionalism," sex segregation in the workplace, strikes and the role of unions in American society.

Restriction: Graduate students only.

SOCIOL 279. Special Topics: Social Organizations and Institutions. 2-4 Units.
Studies in selected areas of social organizations and institutions. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
SOCIOL 280. Analysis of Social Network Data. 4 Units.
Overview and application of methods for analyzing social network data. Topics include: data structures, visualization, graph theory, centrality, subgroups, positions, blockmodels, local properties, and statistical models. Social network analysis software is used to analyze a range of examples.
Restriction: Graduate students only.

SOCIOL 281. Introduction to Social Network Analysis. 4 Units.
Designed to provide a broad overview of social network analysis. At the same time, students will have an opportunity to delve deeply into applications of the network approach in their individual areas of interest.
Restriction: Graduate students only.

SOCIOL 289. Special Topics . 2-4 Units.
Studies in selected areas of Social Sciences. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 290. Dissertation Research. 1-12 Units.
Dissertation research with Sociology faculty.
Repeatability: May be taken for credit 10 times.
Restriction: Graduate students only.

SOCIOL 299. Independent Study. 1-12 Units.
Independent research with Sociology faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Department of Anthropology

3203 Social & Behavioral Sciences Gateway; 949-824-7602
http://www.anthropology.uci.edu/
George Marcus, Department Chair

Anthropology is the comparative study of past and present human societies and cultures. The Department of Anthropology at UCI is at the forefront of addressing issues in contemporary theory and ethnographic methods within the discipline. The Department has a strong interdisciplinary bent, with research and teaching interests in economic anthropology, political and legal anthropology, the anthropology of finance, social history and social change, the anthropology of science, technology and medicine, identity and ethnicity, gender and feminist studies, urban anthropology, modernity and development, religion, visual anthropology, and the arts and expressive culture. The Department also has a strong emphasis on the study of contemporary issues, especially those concerned with emergent, fluid, and complex global phenomena such as international flows of goods, peoples, images, and ideas; the relationship between global processes and local practices; immigration, citizenship, and refugees; population politics; violence and political conflict; ethnicity and nationalism; gender and family; food, health, and technological innovation; law; development and economic transformation; urban studies; and environmental issues. Geographic regions of expertise include China, Southeast Asia, South Asia, Oceania, Europe, Latin America, the Caribbean, East Africa, Latino communities of the United States, and diasporic and transnational communities in the United States and abroad.

Undergraduate Program

The major in Anthropology prepares students to embark on a wide range of careers, to pursue graduate studies, and to continue to learn and achieve in our culturally diverse world. The curriculum develops students' knowledge and skills, including (1) an understanding of cultural diversity and global relationships; (2) the fundamentals of conducting research and analyzing sources of information through ethnographic and other anthropological techniques; and (3) communication skills in organizing and presenting information in written reports and oral presentations.

Requirements for the B.A. Degree in Anthropology

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1561).
Departmental Requirements for the Major
School requirements must be met and must include 12 courses (48 units) as specified below:
A. Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2A</td>
<td>Introduction to Sociocultural Anthropology</td>
</tr>
</tbody>
</table>

B. Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2B</td>
<td>Introduction to Biological Anthropology</td>
</tr>
<tr>
<td>ANTHRO 2C</td>
<td>Introduction to Archaeology</td>
</tr>
<tr>
<td>ANTHRO 2D</td>
<td>Introduction to Language and Culture</td>
</tr>
</tbody>
</table>

C. Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 30A</td>
<td>Global Issues in Anthropological Perspective</td>
</tr>
<tr>
<td>ANTHRO 30B</td>
<td>Ethnography and Anthropological Methods</td>
</tr>
</tbody>
</table>

D. Select three topical courses (12 units) from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 120–159</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 170–179</td>
<td></td>
</tr>
</tbody>
</table>

E. Select two courses (eight units) on a geographical area from ANTHRO 160–169.

F. Select four additional elective courses (16 units) from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 30A</td>
<td>Global Issues in Anthropological Perspective</td>
</tr>
<tr>
<td>ANTHRO 30B</td>
<td>Ethnography and Anthropological Methods</td>
</tr>
<tr>
<td>ANTHRO 40–179</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 180AW</td>
<td>Anthropology Majors Seminar</td>
</tr>
</tbody>
</table>

Students are strongly encouraged to take ANTHRO 180AW after they have had at least three courses beyond ANTHRO 2A and ANTHRO 2B, ANTHRO 2C, or ANTHRO 2D. Students are also strongly encouraged to take both ANTHRO 30A and ANTHRO 30B.

The faculty encourages Anthropology majors or minors to study abroad and experience a different culture while making progress toward degree objectives. The Study Abroad Center, which includes the UC Education Abroad Program (EAP) and the International Opportunities Program (IOP), assists students in taking advantage of many worldwide opportunities. For example, UCEAP offers excellent opportunities to study anthropology at many universities abroad; courses taken abroad can be used to fulfill departmental requirement C, D, and E. Study abroad also can provide opportunities for cross-cultural experience, field research, and foreign language training. The Undergraduate Research Opportunities Program (UROP) provides funding for independent field research. See the Study Abroad Center (p. 138) and the Undergraduate Research Opportunities Program (p. 138) sections of the Catalogue for additional information.

**Honors Program in Anthropology**

The Honors Program in Anthropology is designed to allow undergraduates to pursue field research and write an honors thesis on topics of their choice under the guidance of Department of Anthropology faculty members. Research projects typically involve a combination of library research, exploratory ethnographic interviews, participant observation, and systematic data collection and analysis. The program is open to all senior Anthropology majors with a grade point average of 3.3 or better overall, with 3.5 in Anthropology courses (at least five courses). Successful completion of the Honors Program and the honors thesis satisfies the upper-division writing requirement. Students must apply to be admitted into the Honors Program. The application form is available on the Department of Anthropology (http://www.anthro.uci.edu) website; in the Department office (B203 SBSG); and in the School of Social Sciences Undergraduate Student Affairs Office (1201 SBSG).

Although course work for the Honors Program does not start until the senior year, it is highly recommended that during the spring quarter of the junior year, students find a professor willing to serve as their research project advisor on the basis of a mutually acceptable abstract that indicates the goal and significance of their project. If extensive research is to be undertaken at this time, students enroll in ANTHRO 199.

During the fall quarter of the senior year, students enroll in ANTHRO H190A and write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Fieldwork for the project may begin during this quarter.

In the winter quarter of the senior year, students begin or continue ethnographic field research by enrolling in ANTHRO H190B. Field research typically combines exploratory field research with fixed format data collection methods.

In the spring of the senior year, students enroll in ANTHRO H191W and complete a senior honor thesis that is typically 40 to 80 pages long. Honor theses are read and evaluated by the advisor and the Undergraduate Program Director.

**Anthropology Minor Requirements**

Requirements for the minor in Anthropology are met by taking seven Anthropology courses (28 units) as specified below:

A. Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2A</td>
<td>Introduction to Sociocultural Anthropology</td>
</tr>
</tbody>
</table>

B. Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2B</td>
<td>Introduction to Biological Anthropology</td>
</tr>
<tr>
<td>ANTHRO 2C</td>
<td>Introduction to Archaeology</td>
</tr>
<tr>
<td>-----------------</td>
<td>----------------------------</td>
</tr>
<tr>
<td>ANTHRO 2D</td>
<td>Introduction to Language and Culture</td>
</tr>
<tr>
<td>C. Select one of the following:</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 30A</td>
<td>Global Issues in Anthropological Perspective</td>
</tr>
<tr>
<td>ANTHRO 30B</td>
<td>Ethnography and Anthropological Methods</td>
</tr>
<tr>
<td>D. Select two topical courses (eight units) from the following:</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 120–159</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 170–179</td>
<td></td>
</tr>
<tr>
<td>E. Select two courses (eight units) on a geographical area from ANTHRO 160–169.</td>
<td></td>
</tr>
<tr>
<td>Medical Anthropology Minor Requirements</td>
<td></td>
</tr>
</tbody>
</table>
Requirements for the minor in Medical Anthropology are met by taking seven Anthropology courses (28 units) as specified below:

A. Complete:
<table>
<thead>
<tr>
<th>ANTHRO 2A</th>
<th>Introduction to Sociocultural Anthropology</th>
</tr>
</thead>
<tbody>
<tr>
<td>B. Select one of the following:</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 2B</td>
<td>Introduction to Biological Anthropology</td>
</tr>
<tr>
<td>ANTHRO 2C</td>
<td>Introduction to Archaeology</td>
</tr>
<tr>
<td>ANTHRO 2D</td>
<td>Introduction to Language and Culture</td>
</tr>
<tr>
<td>C. Select one of the following:</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 30A</td>
<td>Global Issues in Anthropological Perspective</td>
</tr>
<tr>
<td>ANTHRO 30B</td>
<td>Ethnography and Anthropological Methods</td>
</tr>
<tr>
<td>D. Complete:</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 134A</td>
<td>Medical Anthropology</td>
</tr>
<tr>
<td>E. Select three topical courses (12 units) from the following:</td>
<td></td>
</tr>
<tr>
<td>ANTHRO 50B</td>
<td>Gender and Global Health</td>
</tr>
<tr>
<td>ANTHRO 121D</td>
<td>Cross-Cultural Studies in Gender</td>
</tr>
<tr>
<td>ANTHRO 128A</td>
<td>Science, Technology, Controversy</td>
</tr>
<tr>
<td>ANTHRO 128B</td>
<td>Race, Gender, and Science</td>
</tr>
<tr>
<td>ANTHRO 132A</td>
<td>Psychological Anthropology</td>
</tr>
<tr>
<td>ANTHRO 134B</td>
<td>Anthropology of Drugs</td>
</tr>
<tr>
<td>ANTHRO 134F</td>
<td>Anthropology of the Body</td>
</tr>
<tr>
<td>ANTHRO 134G</td>
<td>HIV/AIDS in a Global Context</td>
</tr>
<tr>
<td>ANTHRO 136K</td>
<td>The Woman and the Body</td>
</tr>
<tr>
<td>ANTHRO 139</td>
<td>Special Topics in Cultural and Psychological Anthropology (special topics, by petition to the Undergraduate Director)</td>
</tr>
<tr>
<td>SOCIOL 154</td>
<td>Medical Sociology</td>
</tr>
</tbody>
</table>

Residence Requirement for the Minors: The four required upper-division courses must be completed successfully at UCI. Two of the four may be taken through the UC Education Abroad Program provided course content is approved in advance by the Undergraduate Director of the Department of Anthropology.

NOTE: Students may complete only one of the following programs: the major in Anthropology, the minor in Anthropology, or the minor in Medical Anthropology.

Interdisciplinary Minor in Archaeology
An interdisciplinary minor in Archaeology is offered by the Department of Classics (p. 791). See the School of Humanities section of the Catalogue for information.

Graduate Program
The Department of Anthropology offers a Ph.D. degree program in Anthropology. The program focuses on social and cultural anthropology, with a strong focus on understanding emergent processes and systems at a number of scales, including the national and transnational level. Areas of teaching emphasis include the anthropology of modernity and development; political, legal, and economic anthropology; ethnographic method; and the anthropology of science, technology, and medicine. In addition, Ph.D. students have the option of enrolling in a Feminist Studies or a Critical Theory emphasis, both of which involve interdisciplinary work with departments and centers in the School of Humanities. The Department’s faculty members have interests in ethnicity, gender, international migration, science, technology and medicine, law and finance, urban anthropology, youth
culture, and social networks. The program also provides rigorous training in ethnographic method. The Department is committed to fostering new and innovative approaches to anthropological inquiry in a pluralistic and intellectually open academic environment. Program faculty take diverse theoretical and methodological approaches to a variety of substantive issues. They are united, however, in a willingness to question taken-for-granted theoretical premises and analytic frames, and to engage in good-faith intellectual dialogue about alternative models and approaches.

Admission

Students are admitted to the program based on their application materials and evidence of scholarly potential, including grade point average, GRE scores, and letters of recommendation.

Requirements

Students must complete a one-year Proseminar in Anthropology (ANTHRO 202A-ANTHRO 202B-ANTHRO 202C) during their first year and one course in anthropological fieldwork methods during their second year. In addition, students are required to complete a two-course sequence in statistics, research design, and data analysis (ANTHRO 211A, ANTHRO 212A), and six elective courses in Anthropology, which are selected in consultation with their advisor and which normally cover a coherent area of specialization within the field. All course work must be completed before a student is advanced to candidacy. Students must demonstrate competence to read one foreign language, in accordance with the requirements of the Ph.D. degree in Anthropology.

At the end of the first year, students must pass a formal evaluation which is made by the Department of the basis of the first-year course work and examinations to be taken as part of the Proseminar. Students should advance to candidacy by the end of the third year; the advancement to candidacy examination is based on a research proposal, a review of relevant literature, and an annotated bibliography. The fourth (and, in many cases, some or all of the fifth) year is normally devoted to extended anthropological fieldwork. The sixth year (in some cases, also part of the fifth) is devoted to writing the dissertation, in close consultation with the advisor. The normative time for completion of the Ph.D. is seven years, and the maximum time permitted is eight years.

Program in Law and Graduate Studies (J.D./Ph.D.). Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Anthropology are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Anthropology. Additional information is available from the PLGS Program Director’s office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs (http://www.law.uci.edu/plgs) website.

M.A. Concentration in Medicine, Science, and Technology Studies. Highly qualified students seeking training for responding to the significant and rapidly changing impact of medicine and technology upon economies and societies around the world are invited to apply to this terminal Master’s degree program, administered by the Department of Anthropology, but drawing expertise from faculty across the Irvine campus. This is a one-year program, with a nine-course schedule (three courses per quarter) leading to an M.A. in Social Science with a concentration in Medicine, Science, and Technology Studies. Additional information is available from Norma Miranda at (949) 824-7602 or by e-mail to nmiranda@uci.edu.

Feminist Studies Emphasis. A graduate emphasis in Feminist Studies is available. Refer to Department of Gender and Sexuality Studies (p. 891) in the School of Humanities section of the Catalogue for information.

Critical Theory Emphasis. A graduate emphasis in Critical Theory is available. Refer to the Critical Theory Emphasis (p. 937) in the School of Humanities section of the Catalogue for information.

Faculty

Olufunmilayo B. Arewa, J.D. Harvard University, Professor of School of Law; Anthropology

Victoria Bernal, Ph.D. Northwestern University, Associate Professor of Anthropology; Culture and Theory

Susan C. Bibler Coutin, Ph.D. Stanford University, Associate Dean of the Graduate Division and Professor of Criminology, Law and Society; Anthropology; Culture and Theory (law, culture, immigration, human rights, citizenship, political activism, Central America)

Thomas D. Boellstorff, Ph.D. Stanford University, Professor of Anthropology; Culture and Theory (virtual worlds, sexuality, postcoloniality, HIV/AIDS, mass media and popular culture, language and culture, Indonesia, Southeast Asia)

Geoffrey C. Bowker, Ph.D. University of Melbourne, Professor of Informatics; Anthropology (values in design, social studies of databases, science and technology studies)

John P. Boyd, Ph.D. University of Michigan, Professor Emeritus of Anthropology

Michael L. Burton, Ph.D. Stanford University, Professor Emeritus of Anthropology; Economics

Francis A. Cancian, Ph.D. Harvard University, Professor Emeritus of Anthropology; Economics
Department of Anthropology

Leo Chavez, Ph.D. Stanford University, Professor of Anthropology

Benjamin N. Colby, Ph.D. Harvard University, Professor Emeritus of Anthropology

Thomas J. Douglas, Ph.D. University of California, Irvine, Lecturer of Anthropology

Christopher E. Drover, Ph.D. University of California, Riverside, Lecturer of Anthropology

James A. Egan, Ph.D. University of California, Irvine, Lecturer of Anthropology

Julia Eliachar, Ph.D. Harvard University, Associate Professor of Anthropology; Culture and Theory

Robert Garfias, Ph.D. University of California, Los Angeles, Professor Emeritus of Anthropology

David Theo Goldberg, Ph.D. The Graduate Center, City University of New York, Director of the UC Humanities Research Institute and Professor of Comparative Literature; Anthropology; Culture and Theory (race, racism, race and the law, political theory, South Africa, digital humanities)

Susan M. Greenhalgh, Ph.D. Columbia University, Professor Emerita of Anthropology

Mizuko Ito, Ph.D. Stanford University, John D. and Catherine T. MacArthur Foundation Chair in Digital Media and Learning and Professor in Residence of Anthropology; Education; Informatics (ethnography, game studies, youth culture, learning sciences, online communities)

Angela C. Jenks, Ph.D. University of California, Berkeley, Lecturer with Potential Security of Employment of Anthropology

Eleana Kim, Ph.D. New York University, Associate Professor of Anthropology

Karen Leonard, Ph.D. University of Wisconsin, Professor Emerita of Anthropology

G. Craig MacAndrew, Ph.D. University of Chicago, Professor Emeritus of Anthropology

Lilith Mahmud-Abdelwahab, Ph.D. Harvard University, Assistant Professor of Gender and Sexuality Studies; Anthropology; Culture and Theory (elites, race and nationalism, cultural capital, secrecy and conspiracy, feminist ethnography, critical studies of Europe)

George E. Marcus, Ph.D. Harvard University, UCI Chancellor's Professor of Anthropology

William M. Maurer, Ph.D. Stanford University, Dean of the School of Social Sciences and Professor of Anthropology; Criminology, Law and Society; Culture and Theory; School of Law (anthropology of law, globalization, Caribbean, anthropology of money and finance, gender and kinship)

Michael J. Montoya, Ph.D. Stanford University, UCI Chancellor's Fellow and Associate Professor of Anthropology; Chicano/Latino Studies; Culture and Theory; Program in Public Health (social inequality and health, race and ethnicity, social and cultural studies of science, technology, and medicine, participation of ethnic populations in biomedical research, the U.S./Mexican border, critical bioethics)

Keith Murphy, Ph.D. University of California, Los Angeles, Assistant Professor of Anthropology; Linguistics

Sylvia Nam, Ph.D. University of California, Berkeley, Assistant Professor of Anthropology

Sheila G. O'Rourke, Ph.D. University of California, Irvine, Lecturer of Anthropology

Valerie A. Olson, Ph.D. William Marsh Rice University, Assistant Professor of Anthropology

Kristin Peterson, Ph.D. William Marsh Rice University, Associate Professor of Anthropology; Culture and Theory; European Languages and Studies

A. K. Romney, Ph.D. Harvard University, Professor Emerita of Anthropology; Cognitive Sciences

Gabriele J. Schwab, Ph.D. University of Konstanz, Department Chair and UCI Chancellor's Professor of Comparative Literature; Anthropology; Culture and Theory; European Languages and Studies (modern literature, critical theory, psychoanalysis, comparative literature)

Roxanne Varzi, Ph.D. Columbia University, Associate Professor of Anthropology; Culture and Theory; Film and Media Studies (Islam, visual anthropology, anthropology of war, media, youth culture, religion and public space, Iran)

Roger Walsh, Ph.D. University of Queensland, Professor of Psychiatry and Human Behavior; Anthropology

Douglas R. White, Ph.D. University of Minnesota, Professor Emeritus of Anthropology

Mei Zhan, Ph.D. Stanford University, Associate Professor of Anthropology; Culture and Theory (medical anthropology, cultural and social studies of science, globalization, transnationalism, gender, China and United States)
Courses

ANTHRO 2A. Introduction to Sociocultural Anthropology. 4 Units.
Introduction to cultural diversity and the methods used by anthropologists to account for it. Family relations, economic activities, politics, gender, and religion in a wide range of societies. Stresses the application of anthropological methods to research problems. Course may be offered online.

(III, VIII)

ANTHRO 2B. Introduction to Biological Anthropology. 4 Units.
Evolutionary theory and processes, comparative primate fossil record, human variation, and the adequacy of theory, and empirical data.

(III)

ANTHRO 2C. Introduction to Archaeology. 4 Units.
Archaeological theory and cultural processes with emphasis on the American Southwest, Mesoamerica, and Mesopotamia.

(III)

ANTHRO 2D. Introduction to Language and Culture. 4 Units.
Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as LINGUIS 68.

(III)

ANTHRO 10A. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as SOCIOL 10A.
Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A, SOC SCI 9A.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Va)

ANTHRO 10B. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A.
Same as SOCIOL 10B.
Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B, SOC SCI 9B.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Va)

ANTHRO 10C. Probability and Statistics. 4 Units.
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B.
Same as SOCIOL 10C.
Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C, SOC SCI 9C.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Vb)
ANTHRO 20A. People, Cultures, and Environmental Sustainability. 4 Units.

(VIII)

ANTHRO 20B. Anthropology of Food. 4 Units.
Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the "Western diet" and its health consequences.

Same as CHC/LAT 66.

(III, VII)

ANTHRO 30A. Global Issues in Anthropological Perspective. 4 Units.
Explores anthropological perspectives on issues of importance in an increasingly global society. Topics include emphases on ethnic conflict; identity; immigration and citizenship; religion and religious diversity; medical anthropology; legal anthropology; development and economic change; gender.

Restriction: Anthropology majors have first consideration for enrollment.

(VIII)

ANTHRO 30B. Ethnography and Anthropological Methods. 4 Units.
Explores ethnography, anthropology's classic method. Students obtain hands-on training in participant observation, interviewing, and other methods, in local communities, and the preparation of research reports. Also provides theoretical and reflexive readings on ethnography.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 30C. Visual Anthropology. 4 Units.
Focusing on the construction of culture through visuality, this course engages traditional ethnographic films, popular media and anthropological texts to analyze ethics, "reality" and fiction; propaganda and documentary, construction of a frame, the responsibility of the filmmaker, photographer, and anthropologist.

ANTHRO 41A. Global Cultures and Society. 4 Units.
Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as INTL ST 11.

Restriction: Anthropology and International Studies majors have first consideration for enrollment.

(III, VIII)

ANTHRO 50B. Gender and Global Health. 4 Units.
Examines the social forces, life circumstances, and political and economic processes that influence gendered health outcomes. Focuses especially on women located at the economic and political margins of societies throughout the world.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 85A. Cultures in Collision: Indian-White Relations Since Columbus. 4 Units.
An introduction to theories, terms, concepts, and methods used by anthropologists and sociologists to understand Native American cultures. How racial construction of an Indian "other" emerged, how anthropology contributed to Indian invisibility, and the persistence of Indian identity are examined.

Same as SOCIOL 65.

(VII)

ANTHRO 89. Special Topics in Anthropology. 1-4 Units.
Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.
ANTHRO 121AW. Kinship and Social Organization. 4 Units.
Organization of social life primarily in preindustrial societies. Theories of kinship, marriage regulations, sexual behavior, and social roles. Comparisons of biological, psychological, sociological, and economic explanations of social organization.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

ANTHRO 121D. Cross-Cultural Studies in Gender. 4 Units.
Familiarizes students with the diversity of women's experiences around the world. Gender roles and relations are examined within cultural and historical contexts. A central concern is how class, race, and global inequalities interact with women's status.

Prerequisite: ANTHRO 2A or ANTHRO 2B.

Same as INTL ST 153B.

ANTHRO 121G. Political Anthropology. 4 Units.
Utilizes anthropological accounts of Western and non-Western societies to question conventional ways of thinking about power and politics. Classical traditions in political anthropology are critiqued; an alternative view is presented through recent anthropological political analyses of various topics.

ANTHRO 121J. Urban Anthropology. 4 Units.
Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.

Same as INTL ST 153C.

ANTHRO 125A. Economic Anthropology. 4 Units.
Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.

Prerequisite: One course in general science, anthropology, economics, geography, or sociology.

Same as ECON 152A.

Restriction: Economics, Quantitative Economics, Business Economics, and Anthropology majors have first consideration for enrollment.

ANTHRO 125B. Ecological Anthropology. 4 Units.
Studies relationships between human communities and their natural environments. The role of environment in shaping culture; effects of extreme environments on human biology and social organization; anthropologist's role in studying global environmental problems, e.g., African famine, tropical rain forests destruction.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2C.

ANTHRO 125F. Humans and Other Animals. 4 Units.
Explores peoples' relationships with other animals, a topic that continues to shape anthropological understandings of humanness, culture, and the social. Subthemes: symbol and matter, nature/culture, ontologies, relations, moralities, ecologies, futures.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D.

ANTHRO 125S. The Anthropology of Money. 4 Units.
Anthropological approaches to money; impact of money on subsistence economies; cultural history of money; and modern transformations of money. Students conduct ethnographic research on alternative money practices in Southern California, and create an online exhibition and research paper.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 125X. Transnational Migration. 4 Units.
Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, INTL ST 117A.

(VIII)
ANTHRO 125Z. Muslim Identities in North America. 4 Units.
Explores multiple identities of Muslims in North America, including indigenous Muslims and immigrants of many national origins. Explores religious, political, cultural, ethnic, class differences among American Muslims, turning to Islamic institutions or events near UCI to conduct fieldwork projects.

Same as ASIANAM 142.

ANTHRO 126A. Elite Cultures. 4 Units.
The distinctive contribution that ethnographic studies have made to the understanding of elites past and present, in particular societies and globally.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 127A. Law and Modernity. 4 Units.
The rise and spread of Enlightenment legal traditions, social contract theory, individual rights, ideologies of "liberty, equality, fraternity"; contradictions of liberal law, its understandings of "primitive" and "civilized"; pervasive myths of property, difference, race, and rights. Reading- and writing-intensive.

Same as CRM/LAW C191.

ANTHRO 128A. Science, Technology, Controversy. 4 Units.
Explores ways in which the social sciences conceive of science as a sociocultural practice. Emphasis on literature in Science and Technology Studies (STS), especially writings that concern the relationship of science to space and place, power, and politics.

Restriction: Anthropology majors only.

ANTHRO 128B. Race, Gender, and Science. 4 Units.
Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as CHC/LAT 176, GEN&SEX 188A.

(VII)

ANTHRO 128C. Digital Cultures. 4 Units.
Explores cultural and political implications of the infotech revolution and the ways new media are used around the world, new cultural practices and spaces (e.g., cybercafes), debates surrounding the meanings of these new technologies, and their implications for transforming society.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 129. Special Topics: Social and Economic Anthropology. 1-4 Units.
Studies in selected areas of Social and Economic Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 132A. Psychological Anthropology. 4 Units.
Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.

Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)

Same as PSYCH 173A.

Restriction: Psychology majors have first consideration for enrollment.

ANTHRO 134A. Medical Anthropology. 4 Units.
Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.

Same as CHC/LAT 178A.

(VIII)
ANTHRO 134B. Anthropology of Drugs. 4 Units.
Examines the increasing role "drugs" play in shaping the expression, understanding, and representation of the self and social life. The shifting construction of licit/illicit; cultural and ethnographic representations of drug use; pharmaceutical industry; production and management of addiction and disease.

Restriction: Upper-division students only.

(III)

ANTHRO 134C. Medicine, Food, and Health. 4 Units.
With anthropological studies of edible things as its foundation, this course explores topics related to the relationship between medical knowledge, eating, and health from a medical anthropological perspective.

Prerequisite: ANTHRO 2A or ANTHRO 2B or ANTHRO 2D.

ANTHRO 134F. Anthropology of the Body. 4 Units.
Examines human bodies as both biological and sociocultural entities and explores the relationship among mind, body, and society cross-culturally. Topics include embodiment; race, sex, gender and the body; somatization; control of the body; commodified bodies; and hybrid/cyborg bodies.

ANTHRO 134G. HIV/AIDS in a Global Context. 4 Units.
Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

(VIII)

ANTHRO 134GW. HIV/AIDS in a Global Context. 4 Units.
Examines issues concerning cultural conceptions of HIV infection and disease worldwide. Topics include treatment and prevention, identity and behavior, risk, ethnicity, gender, youth, sexuality, activism, drug use, illness, religion, the clinical encounter, national belonging, and the pharmaceutical industry.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VIII)

ANTHRO 135A. Religion and Social Order. 4 Units.
An anthropological exploration of religious belief and practices in diverse social and historical contexts. Emphasis placed on selected non-western traditions of the sacred, and on issues of power, ritual, moral order, and social transformation.

ANTHRO 135I. Modern South Asian Religions. 4 Units.
Nineteenth- and twentieth-century developments in Hinduism, Islam, and Sikhism are covered, with emphasis on changing forms as well as contents of religious movements and the state.

Same as INTL ST 158A.

(VIII)

ANTHRO 136A. Nationalism and Ethnicity in the Contemporary World. 4 Units.
An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does "culture" get worked into contemporary racisms and nationalisms.

Same as INTL ST 153E.

(VIII)

ANTHRO 136B. History of Anthropological Theory. 4 Units.
Provides foundational knowledge in the discipline of anthropology by reviewing competing approaches in anthropological theory, from the nineteenth century to the present. Covers historically fundamental approaches—social evolutionism, functionalism—and recent movements such as feminism, cultural studies, poststructuralism, and postmodernism.

Restriction: Anthropology majors have first consideration for enrollment.
ANTHRO 136D. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as POL SCI 154G, SOC SCI 183E, INTL ST 183E.

(VIII)

ANTHRO 136G. Colonialism and Gender. 4 Units.
An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.

Same as INTL ST 153D.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 136K. The Woman and the Body. 4 Units.
Probes culture and politics of the female body in contemporary American life. Focusing on "feminine beauty," examines diverse notions of beauty, bodily practices, and body politics embraced by American women of different classes, ethnicities, and sexualities.

(VII)

ANTHRO 137A. Reading Images Culturally. 4 Units.
Provides analytical tools necessary to undertake research on visual representations. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them. Of concern are representations of race, identity, gender, and the "Other."

Same as CHC/LAT 116.

(VII)

ANTHRO 138H. Music of Indonesia and the Philippines. 4 Units.
Thousands of islands are encompassed by Philippines, Malaysia, and Indonesia. Common cultural ties are obscured by colonial conditions and influences during last two centuries. Reviews region's major forms of music, from earliest communal societies to complex stratified and recent cultures.

ANTHRO 138J. Music of Japan and Okinawa. 4 Units.
A survey of the musics that developed in the islands of Japan and Okinawa from the perspective of the social, political, and economic forces that played upon the culture and that formed the context of these musical languages.

Restriction: Upper-division students only. Anthropology majors have first consideration for enrollment.

ANTHRO 138M. Music as Expressive Culture. 4 Units.
Fundamental requirements for development of a musical tradition. Guiding structural principles for new forms of expression to be understood and accepted. How members of society develop individual musical cultures which permit them to interact with the personal cultures of others.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 138Q. Latino Music: A View of Its Diversity and Strength. 4 Units.
A survey of the music of the many Latin cultures of the Americas including Mexico, Central and South America, as well as the Caribbean and of those many Latin cultures which thrive and survive in the United States.

Same as CHC/LAT 115A.

(VIII)

ANTHRO 139. Special Topics in Cultural and Psychological Anthropology. 1-4 Units.
Studies in selected areas of Cultural and Psychological Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 141A. Ancient Civilization of Mexico and the Southwest. 4 Units.
The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as INTL ST 177I.
ANTHRO 149. Special Topics in Archaeology. 1-4 Units.
Studies in selected areas of Archaeology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 150A. Language and Social Cognition. 4 Units.
Explores the relationship between language and cognition in social and cultural contexts. The overall goal is to think through how language structure and use impact how individuals perceive, think about, and understand the world around them.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 151A. Improvisation, Language, and Culture. 4 Units.
Addresses improvisation, both in performance and in everyday life. Examines improvisation as the "flexible regulation" of everyday behavior by exploring different scholarly treatments of language and interaction, and working on developing actual theatrical improvisation skills.

Restriction: Upper-division students only.

ANTHRO 152A. Language Origins: Evolution, Genetics, and the Brain. 4 Units.
Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including Is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?.

Same as HISTORY 135G, GLBLCLT 105, LINGUIS 175.

ANTHRO 161T. Field Research: Asian Immigrants and Refugees in Orange County. 4 Units.
Instruction in field work methodology via research projects involving the local communities of immigrants and refugees from Asia. Open only to School of Social Sciences majors.

Restriction: Seniors only. School of Social Sciences majors only.

ANTHRO 161TW. Field Research: Asian Immigrants and Refugees in Orange County. 4 Units.
Instruction in field work methodology via research projects involving the local communities of immigrants and refugees from Asia.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Seniors only. School of Social Sciences majors only.

ANTHRO 162A. Peoples and Cultures of Latin America. 4 Units.
Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as INTL ST 177J.

ANTHRO 162B. Indian North America. 4 Units.
A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.

ANTHRO 162BW. Indian North America. 4 Units.
A survey of indigenous peoples in North America: American Indians, Alaska Natives, First Nations, Native Americans. Tribal populations and geographic distributions, political and social organization, sovereignty, self-determination, intergovernmental relations; cultural continuity and change; management, preservation, development of environments/resources.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VII)
ANTHRO 162C. Race and Empire in Colonial Latin America. 4 Units.
Explores how native people of Latin America with enslaved and free African incorporated and defied Spanish and Portuguese colonization. Focuses on religious adaptions, resistance movements, legal systems, and the emergence of multicultural communities to explain how race shaped European empires.

Same as HISTORY 165.

ANTHRO 163A. Peoples of the Pacific. 4 Units.
The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as INTL ST 158B.

(VIII)

ANTHRO 164A. Twenty-First Century Africa. 4 Units.
Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A.

Same as INTL ST 157A.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 164P. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.
Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, POL SCI 154F.

(VIII)

ANTHRO 165A. Modern Iran: Cinema and Society. 4 Units.
Exploring modern Iran through film, literature, photography, travel writing, philosophy and social science texts introduces students to important concepts in post-colonial studies, social thought, war culture, religion and media as experienced through the paradigm of a non-Western modernity.

ANTHRO 169. Special Topics in Area Studies. 1-4 Units.
Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 179. Special Topics: Methods and Formal Representations. 1-4 Units.
Studies in selected areas of Methods and Formal Representations. Topics addressed vary each quarter.

Restriction: Anthropology majors have first consideration for enrollment.

ANTHRO 180AW. Anthropology Majors Seminar. 4 Units.
A course in anthropological theory designed especially for majors in Anthropology. Different issues are considered in different years.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: May be taken for credit 3 times.

Restriction: Anthropology majors only.

(lb)

ANTHRO 190. Senior Thesis. 4 Units.
Senior thesis with Anthropology faculty.

Repeatability: May be taken for credit 3 times.
ANTHRO H190A. Honors Research Workshop. 4 Units.
Students articulate the goals and significance of their research projects. Written work consists of an eight- to fifteen-page research proposal, due by quarter's end, describing the research question, the relevant literature, and methods of data collection and analysis.

Prerequisite: 3.3 or greater GPA.
Restriction: Anthropology Honors Program students only.

ANTHRO H190B. Honors Field Research. 4 Units.
Students begin or continue ethnographic field research that combines exploratory field research (e.g., participant-observation, interviews, study of archival and documentary materials) with fixed format data collection methods (e.g., standardized interviews, behavioral observations).

Prerequisite: ANTHRO H190A.

ANTHRO H191W. Honors Senior Thesis. 4 Units.
Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, ethnographic background, description of the methods, results, and conclusions.

Prerequisite: ANTHRO H190A and ANTHRO H190B. Satisfactory completion of the Lower-Division Writing requirement.

(lb)

ANTHRO 197. Field Study. 1-4 Units.
Field study with Anthropology faculty.
Repeatability: May be repeated for credit unlimited times.

ANTHRO 198. Directed Group Study. 1-4 Units.
Directed study with Anthropology faculty.
Repeatability: May be repeated for credit unlimited times.

ANTHRO 199. Independent Study. 1-4 Units.
Independent research with Anthropology faculty.
Repeatability: May be repeated for credit unlimited times.

ANTHRO 202A. Proseminar in Anthropology. 4 Units.
Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Restriction: Graduate students only.

ANTHRO 202B. Proseminar in Anthropology. 4 Units.
Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202A.
Restriction: Graduate students only.

ANTHRO 202C. Proseminar in Anthropology. 4 Units.
Year-long intensive introduction to the history of anthropological thought and reading in classical and contemporary ethnography for first-year graduate students.

Prerequisite: ANTHRO 202B.
Restriction: Graduate students only.

ANTHRO 204A. Proseminar in Medicine, Science, and Technology. 4 Units.
Explores the phenomena studied by "medical anthropology" and "science and technology studies" are inextricably linked, and how understanding formations requires moving between disparate fields of inquiry. Required for students pursuing a Graduate Certificate in Anthropologies of Medicine, Science, and Technology.

Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.
ANTHRO 208A. Anthropological Fieldwork Methodology. 4 Units.
A survey of anthropological fieldwork methodology techniques, including attention to contemporary analysis of fieldwork.
Restriction: Graduate students only.

ANTHRO 211A. Statistics and Research Design. 4 Units.
Introduces basic concepts of research design for anthropology in conjunction with relevant concepts from the field of statistics, which will be learned in conjunction with the research designs that require use of those methods.
Restriction: Graduate students only.

ANTHRO 212A. Research Design and Data Analysis. 4 Units.
Introduces advanced concepts of research design for anthropology, presents statistical models for multivariate analysis and for analysis of systems of relationships, and includes practice in sampling and data analysis.
Restriction: Graduate students only.

ANTHRO 213A. Grant and Proposal Writing. 4 Units.
Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.
Same as SOC SCI 255C.
Restriction: Graduate students only.

ANTHRO 221A. Oral History, Life History. 4 Units.
Interdisciplinary and comparative work in oral and life history; methods of interviewing.
Same as SOC SCI 253A.
Restriction: Graduate students only.

ANTHRO 228A. Anthropology Encounters. 4 Units.
Cultural encounters have long provided the ground for ethnographic research. This seminar refocuses on "encounter" not only as the material condition but also as a productive heuristic device in anthropological inquiry. Examines the reorientation of anthropology as a "global discipline."

ANTHRO 230A. Anthropology and History. 4 Units.
An examination of the complex, long-standing relationship between anthropology and history. Themes include: history, culture, and colonialism; history and the power to represent; nostalgia and the uses of the past in struggles over "national history."
Restriction: Graduate students only.

ANTHRO 230D. Ethnographies. 4 Units.
Surveys changes in the character of ethnographic writing in the face of changing fields and topics of research. The emergence of new research terrains and the comparative contexts of ethnography are emphasized.

ANTHRO 231C. Technomethods for Sociocultural Research. 4 Units.
An introduction to using particular technologies for conducting contemporary ethnographic fieldwork. Focuses both on the practical use of these tools and the conceptual work that is necessary for successfully integrating them into specific research projects.

ANTHRO 232B. Medical Anthropology. 4 Units.
Explores historical and contemporary theoretical positions and debates in medical anthropology. Topics may include subjectivity, theories of the body, biopolitics, biomedical technologies, sexuality, pharmaceuticals, political economy and health, infectious disease and epidemics, health disparities, and humanitarianism.
Restriction: Students pursuing a Graduate Certification in Anthropologies of Medicine, Science, and Technology have first consideration for enrollment.

ANTHRO 232C. Ethnographies of Science and Medicine. 4 Units.
Surveys current ethnographic research pertaining to medical anthropology and science and technology studies.

ANTHRO 234C. Anthropology of Food. 4 Units.
Course examines the role of food in culture history and in anthropological thinking about ethnocentrism, disgust, privilege, gender, race, identities, social relationships, kinship, social hierarchies, globalization, production, consumption, food scarcities, body image, health, and power.
Restriction: Graduate students only.
ANTHRO 235A. Transnational Migration. 4 Units.
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troublings of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, CHC/LAT 215.

Restriction: Graduate students only.

ANTHRO 240A. Economic Anthropology. 4 Units.

Restriction: Graduate students only.

ANTHRO 242A. Language and the Social World. 4 Units.
An introduction to the study of language in culture. Topics include theories of the sign; the relation of language structure to linguistic practice; language and group formation; linguistic ideologies; conversation analysis; and language and embodiment.

ANTHRO 245A. Seminar in Political Anthropology. 4 Units.
Explores anthropological approaches to politics. Covers a range of issues and topics, including: theories of culture, power, and hegemony; approaches to colonial and post-colonial relations of global inequality; and ethnographic approaches to the modern state.

Restriction: Graduate students only.

ANTHRO 246B. Law, Colonialism, & Nationalism. 4 Units.
Origins and spread of law in colonial and nationalist contexts: law's role in constituting and policing difference. Recent theoretical approaches; property in things and people; human and indigenous rights; “customary” law; legal foundations of nationalism; resistance to/through law; globalization.

Restriction: Graduate students only.

ANTHRO 246C. Nations, States, and Gender. 4 Units.
Explores the ways in which nations, nationalism, states, and citizenship are gendered relations and processes. Questions include: How do women construct themselves as political subjects and how are constructions of citizenship and discourses of rights gendered.

Restriction: Graduate students only.

ANTHRO 247A. Structuralism and Post-Structuralism. 4 Units.
Traces recent theoretical discussions and arguments over the philosophical and historical "subject" from structuralist decenterings toward the characteristically "post-structuralist" contemporary concern with the historical and political constitution of subjectivities and subject positions.

Restriction: Graduate students only.

ANTHRO 248A. Approaches to Globalization. 4 Units.
Historical and contemporary approaches to the world economy, emphasizing anthropological questions of culture, power, identity, inequality. Examines "neo-imperialism," "late capitalism," accumulation, global markets, urban space, the state, business and policy globalization discourse, "local" responses to and instantiations of the "global."

Same as SOC SCI 254L.

Restriction: Graduate students only.

ANTHRO 249A. Humanism and Posthumanism. 4 Units.
Examines alternative forms of human, humanisms, and posthumanisms to explore the inherent ambiguities and shifting boundaries of knowing and being human, and to venture into modes of analysis that problematize the universality and globality of liberal humanism.

ANTHRO 249B. Multispecies Anthropology. 4 Units.
Examines how the co-constituting categories of animal and human in tandem with investigating how engagements with human/animal relations continue to define and alter anthropology. Subthemes: meaning, nature/culture, non-humanism, ontologies, relations, matter, evolutions, ecologies, and futures.

ANTHRO 250A. The Cultural Politics of Visual Representation. 4 Units.
Develops a theoretical framework for analyzing and reading visual images. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them and a political economy that is class, race, and gender inflected.
ANTHRO 250B. Digital Technologies, Culture, and Media. 4 Units.
Explores questions of sociality in cyberspace, including what social theories and ethnographic methods are effective in studying online cultures. Topics include general issues like indexicality, reference, temporality, spatiality, and embodiment, and topics such as language, gender, ethnicity, property, and inequality.

Restriction: Graduate students only.

ANTHRO 252A. Queer Anthropology. 4 Units.
Explores historical and contemporary scholarship that employs ethnographic approaches to address the discursive construction of sexuality. Also examines how the discipline of anthropology has been shaped by the study of sexuality.

Restriction: Graduate students only.

ANTHRO 253A. Design, Aesthetics, and Social Life. 4 Units.
Anthropology has only recently recognized that design demands consideration as a cultural form linked to, yet nonetheless distinct from, other aesthetic endeavors. Course is largely oriented toward collaboratively working out a conceptual basis for a distinctly anthropological approach to design.

ANTHRO 254A. Postcoloniality and the Subject. 4 Units.
Examines key issues regarding postcoloniality and conceptions of selfhood in the context of varied forms of colonial and state power. In particular, explores how technology and desire intersect with these questions of subjectification.

ANTHRO 256A. Ethnographies of Technology. 4 Units.
Surveys current ethnographic research pertaining to technologies, technical systems, and infrastructures.

ANTHRO 257A. Natures and Environments. 4 Units.
Examines social scientific understandings of natural contexts and human milieu via a survey of key analytic categories. Begins by examining historical and ongoing definitions and problems organized around “nature” and “environment” as separate but imbricated concepts.

ANTHRO 259A. Dissertation Writing Seminar. 4 Units.
Intended for advanced, post-fieldwork Anthropology graduate students. Emphasis on the presentation of research design and results, problems of ethnographic writing, and qualitative and quantitative data and analysis. Prerequisites: post-fieldwork; graduate standing in Anthropology or consent of instructor.

Restriction: Graduate students only.

ANTHRO 289. Special Topics in Anthropology. 1-4 Units.
Studies in selected areas of Anthropology. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ANTHRO 290. Dissertation Research. 4-12 Units.
Dissertation research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ANTHRO 299. Independent Study. 4-12 Units.
Independent research with Anthropology faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Chicano/Latino Studies

383 Social Science Tower; 949-824-7180
http://www.chicanolatinostudies.uci.edu/
Vicki L. Ruiz, Department Chair

Chicano/Latino Studies is an interdisciplinary department organized to provide undergraduate and graduate students with the opportunity to examine the historical and contemporary experiences of Americans of Latino origin or ancestry. This diverse population includes people who trace their heritage to Mexico, Puerto Rico, Cuba, El Salvador, Guatemala, Nicaragua, and other Latin American and Caribbean nations. The curriculum is designed to provide an awareness, knowledge, and appreciation of the language, history, culture, literature, sociology, anthropology, politics, social ecology, health,
medicine, and creative (art, dance, drama, film, music) accomplishments of Chicano/Latino communities. The Department offers a B.A. degree in Chicano/Latino Studies, an undergraduate minor, and a graduate emphasis.

**Change of Major.** Students who wish to change their major to Chicano/Latino Studies should contact the Department office for information about change of major requirements, procedures, and policies. Information is also available at the UCI Change of Major Cri (http://www.changeofmajor.uci.edu) website.

**Scholarship Opportunities**

The **Jeff Garcilazo Fellowship/Scholarship Fund**, established in honor and memory of the late Chicano/Latino Studies and History professor, provides opportunities for students to examine the historical and contemporary experiences of Latino communities. The Jeff Garcilazo Prize is awarded annually to the undergraduate student author(s) of the best research paper(s) in Chicano/Latino Studies.

The **Hispanic Scholarship Fund (HSF)**, formerly the National Hispanic Scholarship Fund, awards scholarships annually to students enrolled in and attending an accredited college full-time from the fall through the spring (or summer) terms. More information is available at the Hispanic Scholarship Fund (http://www.hsf.net) website.

**Career Opportunities**

Chicano/Latino Studies graduates have used their degrees as the foundation for careers in public service, social service, education, the corporate world, and the law. Many also go on to earn M.A. and Ph.D. degrees in Social Science and Humanities disciplines at major universities throughout the nation. What links all of these careers is that the Chicano/Latino Studies major prepares its students for careers that will speak of the needs of Chicano and Latino communities nationwide and globally. The highest number of the Department’s majors have pursued advanced degrees and professional degrees, such as law degrees or advanced teaching credentials. Their training at UCI has served them well in that the list of institutions that they are attending include the nation’s best, such as Harvard University, Stanford University, Columbia University, and several University of California campuses.

Others have moved directly into the workforce. Interestingly, many have selected careers that offer the opportunity to ensure that younger Latinos are able to seize the same opportunities the Department’s students did and attend four-year colleges and universities. Chicano/Latino Studies majors work as primary and secondary school teachers, work for advocacy organizations focusing on Latino health and children’s services, and have taken positions in legislative offices both in California and in Washington, D.C.

**Undergraduate Program**

**Requirements for the B.A. Degree in Chicano/Latino Studies**

All students must meet the University Requirements (p. 71).

All students must meet the School Requirements (p. 1561).

**Departmental Requirements for the Major**

A. Five core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHC/LAT 61</td>
<td>Introduction to Chicano/Latino Studies I</td>
</tr>
<tr>
<td>CHC/LAT 62</td>
<td>Introduction to Chicano/Latino Studies II</td>
</tr>
<tr>
<td>CHC/LAT 63</td>
<td>Introduction to Chicano/Latino Studies III</td>
</tr>
<tr>
<td>CHC/LAT 101</td>
<td>Research in the Latino Community</td>
</tr>
<tr>
<td>CHC/LAT 102W</td>
<td>Chicano/Latino Research Seminar</td>
</tr>
</tbody>
</table>

B. Complete:

<table>

<tbody>
<tr>
<td>EDUC 124</td>
<td>Multicultural Education in K-12 Schools ²</td>
</tr>
</tbody>
</table>

D. Three upper-division electives, one from each of the following categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>Literature, Arts, and Media</td>
<td>(CHC/LAT 110–129)</td>
</tr>
<tr>
<td>History (CHC/LAT 130–139)</td>
<td></td>
</tr>
<tr>
<td>Inequalities and Social Context (CHC/LAT 140–189)</td>
<td></td>
</tr>
</tbody>
</table>

E. Four additional elective courses, three of which must be upper-division, selected from CHC/LAT courses. ³

---

¹ Students are encouraged to continue their Spanish language education through SPANISH 2C.

² Course must focus on the study of African American or Asian American communities in the United States.

³ Electives may include Independent Study courses (CHC/LAT 199). Students may obtain credit for one of these three courses through participation in a study abroad program in Mexico. Students must consult with the Department office for additional information regarding this option.
Residence Requirement for the Major: A minimum of five upper-division courses required for the major must be completed successfully at UCI. Courses taken through the UC Education Abroad Program will be counted toward satisfaction of the residence requirement.

Optional Independent Research Project

Students are encouraged to pursue field research and write a substantial research paper on topics of their choice under the guidance of Chicano/Latino faculty members. Often, this project will grow out of issues examined in CHC/LAT 102W Chicano/Latino Research Seminar. Research projects typically involve a combination of library research and fieldwork in the Chicano/Latino community. Methods and analytical frameworks vary depending on the student and faculty advisors. Interested students should enroll in CHC/LAT 199 Independent Study.

Honors Program in Chicano/Latino Studies

The Honors Program in Chicano/Latino Studies is designed to allow undergraduates to pursue independent research and write an honors thesis on topics of their choice under the guidance of Chicano/Latino Studies faculty members. Research projects typically involve a combination of library research, data analysis, and field research. The program is open to all senior Chicano/Latino Studies majors with a grade point average of 3.3 or better overall, with 3.5 in Chicano/Latino Studies courses (at least five courses). Prior completion of or concurrent enrollment in CHC/LAT 101 Research in the Latino Community is strongly recommended. Successful completion of the Honors Program and the honors thesis satisfies the upper-division writing requirement.

Although course work for the Honors Program does not start until the senior year, it is highly recommended that during the spring quarter of the junior year, students find a professor willing to serve as their research project advisor on the basis of a mutually acceptable abstract that indicates the goal and significance of their project. If extensive research is to be undertaken at this time, students should enroll in CHC/LAT 199.

During the fall quarter of the senior year, students enroll in CHC/LAT H190A and write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Fieldwork for the project may begin during this quarter.

In the winter quarter of the senior year, students begin or continue their research by enrolling in CHC/LAT H190B. In the spring quarter of the senior year, students enroll in CHC/LAT H190C and complete a senior honors thesis.

Additional Opportunities

In addition to satisfying the requirements for the major or minor, students are encouraged to take advantage of the variety of unique educational opportunities available at UCI. Through the University's Education Abroad Program (UCEAP), students receive academic credit while studying at universities in Mexico, Chile, Costa Rica, Brazil, or Spain. Internship opportunities with private and public institutions concerned with the Chicano/Latino communities are available in Orange County, Sacramento, and Washington, D.C. Independent research with faculty on Chicano/Latino issues is also encouraged. Student research is conducted and given academic credit through independent study or group research courses. The Undergraduate Research Opportunities Program (UROP) and the Summer Academic Enrichment Program (SAEP) are examples of programs at UCI which allow students to work as research assistants with professors.

Requirements for the Minor in Chicano/Latino Studies

Completion of seven courses as follows:

A. Core courses:
   - CHC/LAT 61  Introduction to Chicano/Latino Studies I
   - CHC/LAT 62  Introduction to Chicano/Latino Studies II
   - CHC/LAT 63  Introduction to Chicano/Latino Studies III

B. Select three upper-division courses from CHC/LAT 100–189.

C. Complete:
   - SPANISH 2A  Intermediate Spanish (or equivalent) ¹

¹ Students who are exempted from SPANISH 2A based on high school study or its equivalent or through test results must instead complete a fourth upper-division course selected from CHC/LAT 100–189.

Residence Requirements for the Minor: Other than the language requirement, no more than two courses taken at other academic institutions may be used toward satisfaction of the minor.

Graduate Program

Graduate Emphasis in Chicano/Latino Studies

The Department of Chicano/Latino Studies offers a graduate emphasis in Chicano/Latino Studies, which is available in conjunction with the Ph.D. programs in the Departments of Anthropology; Criminology, Law and Society; English; History; Political Science; Planning, Policy, and Design; Sociology; Spanish and Portuguese; Gender and Sexuality Studies; the program in Visual Studies; the School of Education; and the program in Social Science. Satisfactory completion of the emphasis is certified by the Chair of Chicano/Latino Studies and is noted in the student’s dossier.
Admission to the Graduate Emphasis

Applicants must first be admitted to, or currently enrolled in, one of the participating programs listed above. Applicants must submit to the Chicano/Latino Graduate Program Committee (1) an application form listing prior undergraduate and graduate course work related to Chicano/Latino Studies (if any), institutions attended, and major(s); and (2) a one- to two-page statement of purpose, including career objectives, areas of interest and research, and record of research, teaching, community, and/or creative work.

The Committee determines admissions, in consultation with the Chicano/Latino Studies core faculty, based upon the extent to which the applicant’s research interests relate to Chicano/Latino Studies, the applicant’s previous course work, and research or other experience related to Chicano/Latino Studies. Lack of prior course work does not preclude admission, so long as the statement of research interests is congruent with the graduate emphasis and makes a compelling case.

Graduate Emphasis Requirements

Minimum course work for the graduate emphasis in Chicano/Latino Studies consists of four courses: CHC/LAT 200A and three elective courses selected from the list of graduate courses in Chicano/Latino Studies. Two of these elective courses must be cross-listed with department(s) other than the department in which the student is earning his/her Ph.D. One must be cross-listed with a department in a school other than the school in which the student is earning his/her degree and the second must be cross-listed with a department other than the department in which the student is earning his/her degree.

For doctoral students, the qualifying examination and dissertation topic should incorporate U.S. Latinos and/or issues relevant to Chicano/Latino Studies as a central focus of analysis. One member of the candidate’s dissertation committee should be a core or affiliate faculty of the Chicano/Latino Studies Department.

Faculty

Belinda Campos, Ph.D. University of California, Berkeley, Associate Professor of Chicano/Latino Studies; Psychology and Social Behavior (culture, relationships, positive emotion, health)

Anita Casavantes Bradford, Ph.D. University of California, San Diego, Assistant Professor of Chicano/Latino Studies; History

Louis Desipio, Ph.D. University of Texas at Austin, Professor of Chicano/Latino Studies; Political Science

Cynthia Feliciano, Ph.D. University of California, Los Angeles, Associate Professor of Sociology; Chicano/Latino Studies; Education (race/ethnicity/ minority relations, migration and immigration, education)

Raúl A. Fernández, Ph.D. Claremont Graduate University, Director of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences

Glenda M. Flores, Ph.D. University of Southern California, Assistant Professor of Chicano/Latino Studies; Sociology

Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences

Michael J. Montoya, Ph.D. Stanford University, UCI Chancellor’s Fellow and Associate Professor of Anthropology; Chicano/Latino Studies; Culture and Theory; Program in Public Health (social inequality and health, race and ethnicity, social and cultural studies of science, technology, and medicine, participation of ethnic populations in biomedical research, the U.S./Mexican border, critical bioethics)

Alejandro Morales, Ph.D. Rutgers, The State University of New Jersey, Professor of Chicano/Latino Studies; Spanish and Portuguese

Ana Rosas, Ph.D. University of Southern California, Associate Professor of Chicano/Latino Studies; History

Vicki L. Ruiz, Ph.D. Stanford University, UCI Distinguished Professor of History; Chicano/Latino Studies; Culture and Theory (Chicana/Latina history, U.S. labor, immigration, gender)

Courses

CHC/LAT 61. Introduction to Chicano/Latino Studies I. 4 Units.
An introduction to the study of the historical foundations of the Chicano/Latino experience. Addresses such topics as empire, migration, immigrant settlement, economic integration, race, gender, and the formation of group identities.

(III, VII)
CHC/LAT 62. Introduction to Chicano/Latino Studies II. 4 Units.
Provides an introduction to the arts, literature, and culture of Chicano/Latino communities. Analyzes representations of and cultural production in Chicano/Latino communities through such media as folklore, literature, art, film, architecture, dance theatre, performance, music, poetry, mass media, and language.

(III, VII)

CHC/LAT 63. Introduction to Chicano/Latino Studies III. 4 Units.
Examines contemporary public policy issues in Chicano/Latino communities. Each offering addresses at least three of the following themes: migration, immigrant incorporation, identity construction, language policy, health policy, politics, sexuality, gender, labor, class, and education. Course may be offered online.

(III, VII)

CHC/LAT 64. Introduction to Race and Ethnicity in Political Science. 4 Units.
Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics. Course may be offered online.

Same as POL SCI 61A.

(III, VII)

CHC/LAT 65. Ethnic and Immigrant America. 4 Units.
Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as SOCIOL 68A.

(VII)

CHC/LAT 66. Anthropology of Food. 4 Units.
Examines how food communicates ideas about ethnocentrism, disgust, privilege, gender, race, labor, social identities and hierarchies, globalization, power, and the "Western diet" and its health consequences.

Same as ANTHRO 20B.

(III, VII)

CHC/LAT 69. Lower-Division Special Topics in Chicano/Latino Studies. 4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

CHC/LAT 101. Research in the Latino Community. 4 Units.
Students engage in firsthand research in the local Orange County environment. Students identify a research problem, conduct a literature review, develop questions and/or hypotheses, appropriate methods, and write a proposal.

Prerequisite: Two courses from CHC/LAT 61 or CHC/LAT 62 or CHC/LAT 63 and two courses from CHC/LAT 110-189.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 101B. Supervised Research for Chicano/Latino Studies Majors. 4 Units.
Students who have designed a research project & begun collecting data in CHC/LAT 101 will continue to collect/analyze data for their research projects. By end of the course, students will be prepared to write up their findings in CHC/LAT 102W.

Prerequisite: CHC/LAT 101.

Restriction: Chicano/Latino Studies majors only.

CHC/LAT 102W. Chicano/Latino Research Seminar. 4 Units.
Taught as a writing and research seminar in Chicano/Latino Studies. Student develops own project; engages in peer editing; drafts, writes, and presents paper at Spring research conference. Prior course work in Chicano/Latino Studies helpful, i.e., CHC/LAT 61, 62, 63.

Prerequisite: CHC/LAT 101. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Chicano/Latino Studies Majors only.

(Ib)
CHC/LAT 110. Chicano Literature and Culture. 4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter. Taught in English.

Repeatability: May be taken for credit 4 times as topics vary.

Same as SPANISH 140.

CHC/LAT 114. Film Media and the Latino Community. 4 Units.
Uses film as a resource for understanding contemporary issues and problems facing the Chicano/Latino community. (Does not study cinema as a genre.).

Same as SOC SCI 173G.

(VII)

CHC/LAT 115A. Latino Music: A View of Its Diversity and Strength. 4 Units.
A survey of the music of the many Latin cultures of the Americas including Mexico, Central and South America, as well as the Caribbean and of those many Latin cultures which thrive and survive in the United States.

Same as ANTHRO 138Q.

(VIII)

CHC/LAT 116. Reading Images Culturally. 4 Units.
Provides analytical tools necessary to undertake research on visual representations. Images, as cultural productions, are steeped in the values, ideologies, and taken-for-granted beliefs of the culture which produced them. Of concern are representations of race, identity, gender, and the "Other."

Same as ANTHRO 137A.

(VII)

CHC/LAT 121. Latina/Latino Pop: Latina/Latino Popular Culture. 4 Units.
With a focus on the politics of language and space/place, prepares students to critically analyze sites of Latina/Latino popular culture including: music, film, performance, sports, media, and varied subcultures.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 129. Special Topics in Literature, Arts, Media, Culture. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 130. Introduction to Cuba: History, Culture, and Society. 4 Units.
Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as INTL ST 177F, SOC SCI 173Q.

(VIII)

CHC/LAT 132A. Chicana/Chicano History: Pre-Colonial to 1900. 4 Units.
Examines social history of the southwest region from antiquity to 1900. Discusses major questions, theory and research methods pertinent to Chicanas/Chicanos. Themes include: indigenous empires, conquest, colonialism, social stratification, ideology, marriage, sexuality, industrial capitalism, accommodation and resistance.

Same as HISTORY 151A.

CHC/LAT 132B. Chicana/Chicano History: Twentieth Century. 4 Units.
Examines social history of the Southwest with emphasis on Mexican-origin people. Discusses major questions, theory and research methods pertinent to Chicana/Chicano history. Themes explored include: immigration, xenophobia, class struggle, leadership, generational cohorts, unionization, education, barrioization, ethnicity, patriarchy, sexuality.

Same as HISTORY 151B.
CHC/LAT 133B. Twentieth-Century Mexico. 4 Units.
Examines the history of contemporary Mexico beginning with the Mexican Revolution and concluding with the present administration. Social, economic, and political effects of the Revolution; formation of a “one-party democracy”; economic transformation of the nation; the present crisis.
Same as HISTORY 161C.

CHC/LAT 134. U.S. Latino Literature and Cultures. 4 Units.
Focuses on aspects of literature, art, cultural production, and history of the multifaceted Latino cultures that have developed within the United States. Focuses on one group, such as Caribbean Americans, Chicanos, Central Americans, or a comparative perspective of several groups.
Same as SPANISH 110C.

CHC/LAT 135. Latinas in the Twentieth Century U.S.. 4 Units.
Latinas in the U.S. from 1900 to present, offering a diversity of their cultures, regional histories, sexualities, generations, and classes.
Same as HISTORY 151C.

CHC/LAT 138. Chicano/Chicana Labor History. 4 Units.
Examines origins of Latino/ Latina labor from colonial period to present. Emphasis on the issues of race, culture, class, and gender. Focus on processes and institutions including: encomienda, migration, unions, informal economies, Bracero program, domestic work.
Same as SOC SCI 167.

CHC/LAT 139. Special Topics in Chicano/Latino History. 1-4 Units.
Studies in selected areas of Chicano/Latino History. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Chicano/Latino majors only.

CHC/LAT 140A. Latina/Latino Queer Sexualities. 4 Units.
Introduces students to the notion of “queer” in relation to Chicanas/Chicanos and Latinas/Latinos and provides students with theoretical frameworks to explore the shifting categories of sexuality, gender, Chicano, Latino within the scholarship areas of Chicana/Chicano and Latina/Latino Studies.
Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 142. Latinos and the Law. 4 Units.
Examines a range of theoretical, empirical, and policy approaches to legal issues affecting the Latino population, with emphasis on California. Discusses topics concerning the purpose of law, the creation of law, and the enforcement of law.
Same as CRM/LAW C171.

CHC/LAT 147. Comparative Minority Politics. 4 Units.
Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.
Same as AFAM 151, ASIANAM 132, POL SCI 124C.

CHC/LAT 148. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.
Same as SOCIOL 167A.
Restriction: Sociology majors have first consideration for enrollment.
CHC/LAT 148W. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 167AW.

Restriction: Chicano/Latino Studies and Sociology majors have first consideration for enrollment.

CHC/LAT 150. U.S. Intervention in Latin America. 4 Units.
Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as INTL ST 177D, SOC SCI 123A, HISTORY 166.

CHC/LAT 151. Latinos in U.S. Politics. 4 Units.
Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as POL SCI 124B.

CHC/LAT 151A. Latin American Politics. 4 Units.
Introduces the main concepts and theoretical approaches underlying the study of Latin American politics, examines recent political dynamics, and explores the challenges the region faces in the twenty-first century and how countries will attempt to address them.

Same as INTL ST 176K, POL SCI 153A.

Restriction: Political Science majors, Chicano/Latino Studies majors, and International Studies majors have first consideration for enrollment.

CHC/LAT 151B. Revolution in Latin America. 4 Units.
Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as SOC SCI 173N, HISTORY 166D, INTL ST 177C.

CHC/LAT 152A. Race, Ethnicity, and Social Control. 4 Units.
Provides a historical and sociological survey of racial and ethnic group relations in contexts of crime control, emphasizing the roles of racial ideology, structural racism, and social movements in shaping these dynamic relations, and their significance to American liberal democracy.

Prerequisite: CRM/LAW C7.

Same as CRM/LAW C116.

CHC/LAT 153. Cross-Cultural Research on Urban Gangs. 4 Units.
Taking an urban policy approach, examines the background and contemporary traditions of gangs in several ethnic groups including African-, Asian-, and Mexican-Americans. Cross-cultural exploration of the varied facets of gang life. The major social-control institutions affecting them.

Same as CRM/LAW C156.

CHC/LAT 154. Latino Metropolis. 4 Units.
Explores the processes of Latino urbanization in the United States and the spatialization of Latino identities, particularly in the context of Southern California with selected comparisons drawing from other cities.

Same as PP&D 172.
CHC/LAT 155. Culture Change and the Mexican People. 4 Units.
Reviews culture contact and colonization, innovation diffusion, acculturation, assimilation, culture conflict and marginality, modernization, urbanization, legal transformations. Mexico and the Southwestern U.S. are reviewed through several centuries to better appreciate the indigenous base of the Mexican people.

Same as CRM/LAW C172.

CHC/LAT 156W. Chicano/Latinos and Labor. 4 Units.
Explores theories that explain the occupational pathways and workplace experiences of Latinos in various work sectors. Investigates jobs such as migrant labor, child street vendors, Latina/Latino professionals, and Latinos migrating to the U.S. South that work in poultry processing plants.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

CHC/LAT 157. Cuban Society and Revolution. 4 Units.
Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, INTL ST 177E.

CHC/LAT 158. Feminisms of Color. 4 Units.
Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

(VII)

CHC/LAT 158W. Feminisms of Color. 4 Units.
Surveys the development of Chicana feminist thought and practice. Focuses on historical contemporary writings by and about Chicana feminists. Draws from interdisciplinary scholarship in order to survey the diversity of Chicana feminisms.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VII)

CHC/LAT 159. Special Topics in Society, Labor, Politics, Law, Gender, Race, Ethnicity. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Chicano/Latino majors only.

CHC/LAT 160. Perspectives on the U.S. - Mexican Border. 4 Units.
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as SOC SCI 173I, INTL ST 177B.

(VII)

CHC/LAT 161. Transnational Migration. 4 Units.
Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as ANTHRO 125X, INTL ST 117A.

(VIII)

CHC/LAT 163. U.S. Immigration Policy. 4 Units.
Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as POL SCI 126C.

(VII)
CHC/LAT 166. Chicano Movement. 4 Units.
Explores the history of Mexicans in the U.S. with particular attention paid to their integration into the U.S. capitalist economy. Examines this economic history and the Chicano movement, "El Movimiento," within the wide context of socio-economic change.

Same as PP&D 177.

Restriction: Chicano/Latino Studies, Urban Studies, and Social Ecology majors have first consideration for enrollment.

CHC/LAT 168. Chicano/Latino Social Psychology. 4 Units.
Examines theories, research, and major issues of relevance to understanding social psychological processes in Chicano/Latino populations. Topics include social development, cultural orientations, gender and sexuality, close relationships, happiness and well-being, stereotyping, prejudice and discrimination, and mental and physical health.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PSY BEH 192Q.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)

CHC/LAT 169. Special Topics in Globalization, Transnationalism, Immigration, U.S.-Mexico Border. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

CHC/LAT 170. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as SOC SCI 165, PSYCH 174H.

CHC/LAT 171. Chicano/Latino Psychology. 4 Units.
Examines research and literature investigating Chicano/Latino ethnicity as a variable influencing behavior. Explores mental health needs and issues of Chicano/Latinos and discusses competent, sensitive methods of mental health service delivery.

Same as PSYCH 174F.

CHC/LAT 176. Race, Gender, and Science. 4 Units.
Perfect for pre-health, science and social science majors wanting to appreciate how science and society interact. Race and gender as biological and socio-cultural constructs are examined. Questions explored: What is disease? What is science? What are social and biological differences.

Same as ANTHRO 128B, GEN&SEX 188A.

(VII)

CHC/LAT 177. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.

Same as PSY BEH 192R.

Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.

(VII)
CHC/LAT 177W. Culture and Close Relationships. 4 Units.
Examines cultural influences on close relationship processes including attraction, love, friendship, family, social support, and significance of close relationships for health and well-being. National and ethnic sources of cultural variation examined include Latin America, Asia, Africa, and the Middle East.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as PSY BEH 192RW.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.
(Ib, VII)

CHC/LAT 178. Health and the Latino Paradox. 4 Units.
Examines research and theories concerning the physical and mental health of U.S. Latino populations. Contemporary accounts, health care implications, and new directions for understanding sources of risks and resilience for health in Latino populations are evaluated and discussed.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as PSY BEH 192S.
Restriction: Psychology and Social Behavior and Chicano/Latino Studies majors have first consideration for enrollment.
(VII)

CHC/LAT 178A. Medical Anthropology. 4 Units.
Introduces students to cross-cultural perspectives and critical theories in anthropological studies of medicine. Special attention is given to diverse ways of understanding bodies, illnesses, and therapeutic practices in our changing world.
Same as ANTHRO 134A.
(VIII)

CHC/LAT 179. Special Topics in Health, Medicine, and Psychosocial Dynamics. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Chicano/Latino Studies majors have first consideration for enrollment.

CHC/LAT 182. Latina/Latino Access and Persistence in Higher Education. 4 Units.
Introduction to how social, political, and economic forces impact on Latina/Latino racial/ethnic minorities with regard to their access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research.
Same as EDUC 182.

CHC/LAT 183. Multicultural Education in K-12 Schools. 4 Units.
Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S.-born minority student populations in an increasingly diverse and changing society.
Same as EDUC 124.
(VII)

CHC/LAT 184. College Advising for High School Students. 4 Units.
Provides a brief introduction to college-access issues and in-depth understanding in the field of college advising. Students learn how to help high school students develop higher education plans and guide them through the college application process.
Same as EDUC 183.

CHC/LAT 189. Special Topics in Educational Policy and Issues. 1-4 Units.
Studies in selected areas of Chicano/Latino Studies. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: May be repeated for credit unlimited times.
CHC/LAT H190A. Honors Research Preparation. 4 Units.
Students write a proposal describing their research question, the relevant background literature, and the method of data collection and analysis. Field work for the project may begin this quarter.

Restriction: Open only to students in the Honors Program in Chicano/Latino Studies.

CHC/LAT H190B. Honors Field Research. 4 Units.
Students begin or continue their research for their senior honors thesis.

Prerequisite: CHC/LAT H190A.

CHC/LAT H190C. Honors Thesis. 4 Units.
Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B.

CHC/LAT H190CW. Honors Thesis. 4 Units.
Student drafts a senior honor thesis (typically) with the following sections: problem statement, literature review, description of the methods, results, and conclusions.

Prerequisite: CHC/LAT H190A and CHC/LAT H190B. Satisfactory completion of the Lower-Division Writing requirement.

CHC/LAT 191A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as SOC SCI 186A, PSYCH 144A.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

CHC/LAT 191B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children and be culturally sensitive.

Same as SOC SCI 186B, PSYCH 144B.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

CHC/LAT 191C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as SOC SCI 186C, PSYCH 144C.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

CHC/LAT 198. Group Directed Study. 1-4 Units.
Directed study with Chicano/Latino faculty.

Repeatability: Unlimited as topics vary.
CHC/LAT 199. Independent Study. 1-4 Units.
Independent research with Chicano/Latino faculty.

Repeatability: May be repeated for credit unlimited times.

CHC/LAT 200A. Theoretical Issues in Chicano/Latino Research. 4 Units.
Introduction to theoretical issues in the scholarship in Chicano/Latino Studies. Theories from social sciences, humanities, critical theory. Topics: immigration, identity, gender and sexuality, globalization, transnationalism, social, political, and economic integration, race theory, labor market participation, social history, cultural productions.

CHC/LAT 210A. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.
Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Grading Option: In progress only.

Overlaps with CHC/LAT 212.

CHC/LAT 210B. Cultural and Historical Precedents for Latinos and Medical Care. 2 Units.
Introduction to the history of Latinos, focusing on relevant pre-Columbian, colonial, and modern social and cultural developments, including issues of race, gender, sexuality, religious beliefs, and health beliefs and practices.

Prerequisite: CHC/LAT 210A.

Overlaps with CHC/LAT 212.

Restriction: Chicano/Latino Studies 210A-B and 212 may not both be taken for credit.

CHC/LAT 211A. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.
Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

CHC/LAT 211B. Latinos/Latinas and Medical Care: Contemporary Issues. 2 Units.
Introduction to medical anthropological and social science perspectives on Latinos/Latinas in relation to a number of health and medically-related issues, i.e., immigration, gender, reproduction, culture, social structure, political economy, sexuality, utilization of medical services, and health beliefs.

Prerequisite: CHC/LAT 211A.

CHC/LAT 215. Transnational Migration. 4 Units.
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubling of places, spaces, borders, and bodies of all sorts.

Same as SOC SCI 254A, ANTHRO 235A.

Restriction: Graduate students only.

CHC/LAT 217. Street Ethnography. 4 Units.
Focuses on urban street populations, especially gangs, and outlines some of the major conceptual and theoretical issues related to this topic and the processes of street socialization. Methods of inquiry include mapping, ethnohistory, survey questionnaires, and other quantitative techniques.

Same as CRM/LAW C222.

Restriction: Graduate students only.

CHC/LAT 221. Race, Ethnicity, and Social Control. 4 Units.
Origins and organization of racialized social control, with emphasis on criminal justice. Racial politics of criminal/juvenille justice considered in comparative (historical and international) perspective. Exploration of theoretical and methodological issues for research on race, ethnicity, and social control.

Same as CRM/LAW C241.

Restriction: Graduate students only.
CHC/LAT 235. U.S. Ethnic Politics. 4 Units.
Assesses theories of ethnic political attitudes and behaviors in U.S. politics and examines methodological approaches to testing theories of ethnic politics. The primary focus is contemporary ethnic politics with attention to ethnic politics in American political development.

Same as POL SCI 245A.

Restriction: Graduate students only.

CHC/LAT 289. Special Topics in Chicano/Latino Studies. 1-4 Units.
Current research in Chicano/Latino Studies.

Repeatability: May be repeated for credit unlimited times.

CHC/LAT 290. Dissertation Research. 4 Units.
Dissertation research with Chicano/Latino faculty.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

CHC/LAT 299. Independent Study. 4 Units.
Independent study with Chicano/Latino Studies faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Cognitive Sciences
2201 Social & Behavioral Sciences Gateway; 949-824-3771
http://www.cogsci.uci.edu/
Ramesh Srinivasan, Department Chair

The Department of Cognitive Sciences is committed to the investigation of the abstract, complex structures that underlie human cognition: language, thought, memory, learning, sensorimotor integration and perception. The main areas of research strength within the department are visual and auditory perception, experimental psychology, cognitive psychology, mathematical psychology and cognitive neuroscience.

Undergraduate Program
Students should be aware that psychology courses are offered in several different departments and programs. Students interested in general psychology including the areas of development, clinical, perception, learning, memory, cognitive processes and neuroscience are advised to consult the course listings for the B.A. in Psychology section for the Department of Cognitive Sciences. The courses in this major are designed to provide students with a strong foundation in general psychology. Students specifically interested in a program with a quantitative approach to theory and research in any of the areas of Cognitive Neuroscience; Experimental Psychology (emphasizing Sensation, Perception, Attention and Memory); Language Science; or Computational Cognitive Science should consult the course listings for the B.S. in Cognitive Sciences also here in this section. Students interested in other areas of psychology are advised to consult the course listings in the School of Social Ecology (p. 1442) and the Francisco J. Ayala School of Biological Sciences (p. 260) sections.

In anticipation that the number of students who are qualified to elect psychology as a major will exceed the number of positions available, students applying for admission for fall 2014 should be sure to file their application before November 30, 2013.

NOTE: Students may complete either the B.A. in Psychology or B.S. in Cognitive Sciences but not both.

Change of Major
Information about change-of-major requirements, procedures, and policies is available in the School of Social Sciences Undergraduate Student Affairs Office and at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website.

Excellence in Psychological Research
Psychology majors doing independent research under PSYCH 199 may be eligible for participation in the Undergraduate Research Opportunities Program (UROP). Participants can obtain research funding and have the opportunity to have their research papers published in a peer-reviewed student journal or to present them at a special conference of UCI student research. Guidelines for the program are available from the Department of Cognitive Sciences office.
Requirements for the B.S. Degree in Cognitive Sciences

Overview

The B.S. in Cognitive Sciences is structured to provide students with a challenging introduction to the broad field of Cognitive Sciences that is strongly grounded in theory and an empirical approach emphasizing experimental/computational methods. To ensure an intellectually coherent experience and that students receive an in-depth grounding in at least one area, all students in the major are required to choose one of the following areas of concentration: (a) Cognitive Neuroscience; (b) Experimental Psychology–Sensation, Perception, Attention, and Memory; (c) Language Science; (d) Computational Cognitive Science. Associated with each of these concentrations is a required set of core courses, and electives. In addition, students in all the concentrations are required to acquire a background in (a) calculus, (b) statistics, (c) introductory computer programming, and (d) some combination of the natural sciences, logic and philosophy of science, linguistics, or more advanced computer science or mathematics as is appropriate to their concentration. Finally, each student will be required to participate in faculty-sponsored research and are expected to produce a senior thesis. This will be completed with PSYCH H111A-PSYCH 111BW-PSYCH H111C.

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1561).

Departmental Requirements for the Major

School requirements must be met and must include courses as specified below:

A. Complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 2A- 2B</td>
<td>Single-Variable Calculus and Single-Variable Calculus</td>
</tr>
<tr>
<td>PSYCH 110</td>
<td>Quantitative Methods for Cognitive Sciences Research</td>
</tr>
<tr>
<td>or STATS 110</td>
<td>Statistical Methods for Data Analysis I</td>
</tr>
<tr>
<td>PSYCH 114M</td>
<td>MATLAB Programming</td>
</tr>
<tr>
<td>or I&amp;C SCI 31</td>
<td>Introduction to Programming</td>
</tr>
<tr>
<td>PSYCH 9A- 9B- 9C</td>
<td>Psychology Fundamentals and Psychology Fundamentals</td>
</tr>
<tr>
<td>PSYCH 109</td>
<td>Cognitive Sciences Research Seminar</td>
</tr>
<tr>
<td>PSYCH H101A- H101B- H101C</td>
<td>Honors Seminar in Psychology I and Honors Seminar in Psychology II and Honors Seminar in Psychology III</td>
</tr>
<tr>
<td>PSYCH H111A</td>
<td>Honors Experimental Psychology</td>
</tr>
<tr>
<td>PSYCH 111BW- H111B</td>
<td>Honors Advanced Experimental Psychology and Honors Advanced Experimental Psychology Laboratory</td>
</tr>
<tr>
<td>PSYCH H111C</td>
<td>Honors Research in Experimental Psychology</td>
</tr>
<tr>
<td>STATS 7</td>
<td>Basic Statistics</td>
</tr>
</tbody>
</table>

B. Select three courses from the following list (at least two of these courses must come from a single discipline). Note that each of the concentrations recommends particular selections from these alternatives which are prerequisites for more advanced courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 35</td>
<td>The Brain and Behavior</td>
</tr>
<tr>
<td>BIO SCI 36</td>
<td>Drugs and the Brain</td>
</tr>
<tr>
<td>BIO SCI 37</td>
<td>Brain Dysfunction and Repair</td>
</tr>
<tr>
<td>BIO SCI 38</td>
<td>Mind, Memory, Amnesia, and the Brain</td>
</tr>
<tr>
<td>BIO SCI 93</td>
<td>From DNA to Organisms</td>
</tr>
<tr>
<td>BIO SCI 94</td>
<td>From Organisms to Ecosystems</td>
</tr>
<tr>
<td>I&amp;C SCI 31</td>
<td>Introduction to Programming</td>
</tr>
<tr>
<td>I&amp;C SCI 32</td>
<td>Programming with Software Libraries</td>
</tr>
<tr>
<td>I&amp;C SCI 33</td>
<td>Intermediate Programming</td>
</tr>
<tr>
<td>IN4MATX 41</td>
<td>Informatics Core Course I</td>
</tr>
<tr>
<td>IN4MATX 42</td>
<td>Informatics Core Course II</td>
</tr>
<tr>
<td>PHYSICS 3A- 3B- 3C</td>
<td>Basic Physics and Basic Physics</td>
</tr>
</tbody>
</table>

or
PHYSICS 7C- 7D- 7E

with labs PHYSICS 7LC and PHYSICS 7LD

NOTE: Careful selection should be made in order to satisfy general education requirements.

C. Three additional courses must be taken in Biology, Physics, Computer Science, Linguistics, Logic and Philosophy of Science, Mathematics, or Statistics. In some cases specific courses are recommended for each concentration. They can be chosen either from the list above or from the following list:

- LINGUIS 1: Languages of the World
- LINGUIS 3: Introduction to Linguistics
- LINGUIS 10: Introduction to Phonology
- LINGUIS 20: Introduction to Syntax
- LINGUIS 51: Acquisition of Language
- LINGUIS 68: Introduction to Language and Culture
- LPS 30: Introduction to Symbolic Logic
- LPS 31: Introduction to Inductive Logic
- MATH 2D: Multivariable Calculus
- MATH 2E: Multivariable Calculus
- MATH 3A: Introduction to Linear Algebra
- MATH 3D: Elementary Differential Equations
- MATH 4: Mathematics for Economists
- PHYSICS 15: Physics of Music
- PSYCH 56L: Acquisition of Language
- STATS 111: Statistical Methods for Data Analysis II
- STATS 112: Statistical Methods for Data Analysis III

D. In addition to the core course taken as part of the concentration, two additional core courses must be taken selected from this list:

- PSYCH 120A: Abnormal Psychology
- PSYCH 120D: Developmental Psychology
- PSYCH 120H: History of Psychology
- PSYCH 120P: Personality Theories
- PSYCH 130A: Perception and Sensory Processes
- PSYCH 140C: Cognitive Science
- PSYCH 140L: Principles of Learning Theory
- PSYCH 140M: Human Memory
- PSYCH 150: Psychology of Language
- PSYCH 160A: Introduction to Cognitive Neuroscience
- PSYCH 160D: Brain Disorders and Behavior

E. All courses for the above major requirements must be taken with a grade of C+ or better. Students must maintain an overall grade point average of 3.0 for courses within the major.

* If not used to satisfy Introductory Programming Requirement.

Concentrations

Every student in the major is required to select a concentration within the major from the four choices listed below by the beginning of the junior year. The choice of concentration has implications for choosing particular prerequisite courses outside the major as well as the core courses and three electives.

Concentration in Cognitive Neuroscience

BIO SCI 35 The Brain and Behavior

Select two courses from the following:

- BIO SCI 36: Drugs and the Brain
- BIO SCI 37: Brain Dysfunction and Repair
- BIO SCI 38: Mind, Memory, Amnesia, and the Brain
- BIO SCI 93: From DNA to Organisms
### Required Core Course

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 94</td>
<td>From Organisms to Ecosystems</td>
</tr>
<tr>
<td>PSYCH 160A</td>
<td>Introduction to Cognitive Neuroscience</td>
</tr>
</tbody>
</table>

Select three electives from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 161</td>
<td>Language and the Brain</td>
</tr>
<tr>
<td>PSYCH 161H</td>
<td>Hearing and the Brain</td>
</tr>
<tr>
<td>PSYCH 161P</td>
<td>Perceptual Neuroscience</td>
</tr>
<tr>
<td>PSYCH 162A</td>
<td>Neurobiology of Learning and Memory</td>
</tr>
<tr>
<td>PSYCH 162B</td>
<td>Human Memory Disorders</td>
</tr>
<tr>
<td>PSYCH 168E</td>
<td>Embodied Cognition</td>
</tr>
</tbody>
</table>

### Concentration in Experimental Psychology-Sensation, Perception, Attention and Memory

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 35</td>
<td>The Brain and Behavior</td>
</tr>
</tbody>
</table>

Select at least one of the Physics course listed above (under Department requirements)

Select one core course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 130A</td>
<td>Perception and Sensory Processes</td>
</tr>
<tr>
<td>PSYCH 140C</td>
<td>Cognitive Science</td>
</tr>
<tr>
<td>PSYCH 140L</td>
<td>Principles of Learning Theory</td>
</tr>
<tr>
<td>PSYCH 140M</td>
<td>Human Memory</td>
</tr>
</tbody>
</table>

Three electives should be chosen from the preceding list of core courses and PSYCH 131A, PSYCH 131B.

### Concentration in Language Science

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO SCI 35</td>
<td>The Brain and Behavior</td>
</tr>
<tr>
<td>LINGUIS 3</td>
<td>Introduction to Linguistics</td>
</tr>
<tr>
<td>PSYCH 56L</td>
<td>Acquisition of Language</td>
</tr>
</tbody>
</table>

and either

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINGUIS 10</td>
<td>Introduction to Phonology</td>
</tr>
<tr>
<td>or LINGUIS 20</td>
<td>Introduction to Syntax</td>
</tr>
</tbody>
</table>

Select three elective courses from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINGUIS 102</td>
<td>Formal Languages and Automata</td>
</tr>
<tr>
<td>LINGUIS 111</td>
<td>Intermediate Phonology</td>
</tr>
<tr>
<td>LINGUIS 121</td>
<td>Intermediate Syntax</td>
</tr>
<tr>
<td>PSYCH 156A</td>
<td>Acquisition of Language II</td>
</tr>
<tr>
<td>PSYCH 161</td>
<td>Language and the Brain</td>
</tr>
<tr>
<td>PSYCH 161H</td>
<td>Hearing and the Brain</td>
</tr>
<tr>
<td>PSYCH 161P</td>
<td>Perceptual Neuroscience</td>
</tr>
</tbody>
</table>

### Concentration in Computational Cognitive Science

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>

Honors

Honors in Cognitive Sciences

To graduate with Honors in Cognitive Sciences, a student must successfully complete the requirements for the B.S. degree in Cognitive Sciences with an overall grade point average of 3.2 in Cognitive Sciences major courses and must produce a thesis deemed acceptable by the faculty.

Research Support

The B.S. in Cognitive Sciences requires students to participate in faculty-guided research that is expected to lead to a senior thesis. In many cases, support for that research will be provided by the faculty member in whose lab the student is working. In addition, students working on research projects are eligible for participation in the Undergraduate Research Opportunities Program (UROP). Participants can obtain research funding and have the opportunity to have their research papers published in a peer-reviewed student journal or to present them at a special conference of UCI student research. Guidelines for the program are available from the Department of Cognitive Sciences office.

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; or visit the Campuswide Honors Program (http://www.honors.uci.edu) website.

### Requirements for the B.A. Degree in Psychology

All students must meet the University Requirements (p. 71).

All students must meet the School Requirements (p. 1561).

### Departmental Requirements for the Major

School requirements must be met and must include 18 courses (70 units) as specified below:

#### A. Complete:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 9A-9B-9C</td>
<td>Psychology Fundamentals and Psychology Fundamentals</td>
</tr>
</tbody>
</table>

#### B. Two introductory courses (eight units) in the social sciences selected from:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2A</td>
<td>Introduction to Sociocultural Anthropology</td>
</tr>
<tr>
<td>ANTHRO 2B</td>
<td>Introduction to Biological Anthropology</td>
</tr>
<tr>
<td>ANTHRO 2D</td>
<td>Introduction to Language and Culture</td>
</tr>
<tr>
<td>ECON 1</td>
<td>Introduction to Economics</td>
</tr>
<tr>
<td>LINGUIS 3</td>
<td>Introduction to Linguistics</td>
</tr>
<tr>
<td>POL SCI 6C</td>
<td>Introduction to Political Science: Micropolitics</td>
</tr>
<tr>
<td>SOC SCI 5A</td>
<td>Introduction to Human Geography</td>
</tr>
<tr>
<td>SOCIOL 1</td>
<td>Introduction to Sociology</td>
</tr>
<tr>
<td>SOCIOL 2</td>
<td>Globalization and Social Change</td>
</tr>
<tr>
<td>SOCIOL 3</td>
<td>Social Problems</td>
</tr>
</tbody>
</table>

or one or two quarters of the following when topic is not psychology:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC SCI H1E-H1F-H1G</td>
<td>Honors: Critical Issues on the Social Sciences and Honors: Critical Issues on the Social Sciences and Honors: Critical Issues on the Social Sciences</td>
</tr>
</tbody>
</table>

#### C. A one-quarter course and laboratory in experimental psychology or research methods selected from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 112A-112LA</td>
<td>Experimental Psychology and Experimental Psychology Laboratory</td>
</tr>
<tr>
<td>PSYCH 112M-112LM</td>
<td>Research Methods in Psychology and Research Methods in Psychology Laboratory</td>
</tr>
<tr>
<td>PSYCH 112R-112LR</td>
<td>Cognitive Robotics and Cognitive Robotics Laboratory</td>
</tr>
</tbody>
</table>

**NOTE:** These courses have as prerequisites PSYCH 9A, PSYCH 9B, PSYCH 9C and one year of mathematics/statistics (see course listings). These prerequisites are strictly enforced. PSYCH 112A, PSYCH 112LA are the first quarter of a multi-quarter sequence that satisfies the upper-division writing requirement and allows students to plan and conduct research projects. Students taking these courses should plan to continue in them through at least the second quarter. Students who intend to fulfill the upper-division writing requirement in some other way should consider taking PSYCH 112M and PSYCH 112LM, PSYCH 112P and PSYCH 112LP, or PSYCH 112R and PSYCH 112LR to fulfill the laboratory requirement.

#### D. Select four upper-division Psychology core courses (16 units). These courses are designated with an ending number “0” and include the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 120A</td>
<td>Abnormal Psychology</td>
</tr>
<tr>
<td>PSYCH 120D</td>
<td>Developmental Psychology</td>
</tr>
<tr>
<td>PSYCH 120H</td>
<td>History of Psychology</td>
</tr>
<tr>
<td>PSYCH 120P</td>
<td>Personality Theories</td>
</tr>
<tr>
<td>PSYCH 130A</td>
<td>Perception and Sensory Processes</td>
</tr>
</tbody>
</table>
### E. Select seven additional courses (four or more units each) with emphasis in psychology, distributed as follows:

1. No more than one of the seven may be lower-division. PSYCH 7A and PSYCH 46A may not be used to fulfill this requirement.

2. Three of the upper-division courses used to satisfy requirements D and E must be taken from one of the following modules: Psychology 110–119 (Research Methodologies), 120–129 (General Psychology), 130–139 (Perception and Sensory Processes), 140–149 and 150–159 (Learning and Cognition and Language Sciences combined), 160–169 (Cognitive Neuroscience), and 170–179 (Interdisciplinary Studies).

3. Certain courses offered in the School of Biological Sciences and the School of Social Ecology may be used in partial satisfaction of this requirement. A total of three of these courses (12 units) may be used in this way with a maximum of two from either of these Schools. The courses that may be used in this way are those in the Department of Cognitive Sciences' course listings numbered PSYCH 127, PSYCH 147, and PSYCH 177, as well as Psychology and Social Behavior 193E (same as Criminology, Law and Society C105) and Biological Sciences D137, E174, N110, and N159.

4. No more than three of the courses (each of four or more units) may be numbered 190–199.

**NOTE:** Psychology majors are strongly encouraged to take BIO SCI 1A and BIO SCI 35 toward satisfaction of the science and technology portion of the general education requirement (category II). Furthermore, it is strongly recommended that students who intend to pursue post-baccalaureate work in psychology take the PSYCH 112A-PSYCH 112B-PSYCH 112C sequence. Most psychology graduate programs require statistics (which, at UCI, may be satisfied by taking PSYCH 10A-PSYCH 10B-PSYCH 10C or SOC SCI 10A-SOC SCI 10B-SOC SCI 10C), but some require calculus (which, at UCI, may be satisfied by taking MATH 2A-MATH 2B).

### Honors Program in Psychology

The two-year Honors Program in Psychology is open to selected juniors who are majoring in psychology. It provides thorough grounding in research methods and culminates with the opportunity for basic research in some area of psychology under faculty supervision. The program has a limited number of openings and seeks to attract outstanding students who plan to undertake postgraduate education in some field of the psychological sciences. Admission to the program is based on a formal application that is normally submitted in the spring quarter of the sophomore year. Applicants should have an overall grade point average of at least 3.2 and a grade point average of at least 3.5 in psychology courses, although this requirement may be waived in unusual cases.

During the junior year, students who participate in the program are expected to enroll in Honors Experimental Psychology (PSYCH H111A-PSYCH H111BW-PSYCH H111C), and in the fall quarter of the Honors Seminar in PSYCH H101A. As seniors, following successful completion of these junior-year requirements, psychology honors students are enrolled in the Honors Seminar in Psychology (PSYCH H101B-PSYCH H101C) in the fall and spring quarters. Participants in the honors program are expected to complete course work beyond the general education requirement in one or more of the following areas: biological sciences, mathematics, computer science, physical science, linguistics, philosophy. The honors seminar may be used to satisfy two of the courses required by Part E of the psychology major requirements. To graduate with honors in psychology, a student must successfully complete the requirements for the B.A. degree in psychology with an overall grade point average of 3.2 and a grade point average of at least 3.5 in psychology courses. In addition, honors students must successfully complete a senior honors thesis as part of the senior-year course work.

Psychology Minor Requirements

Requirements for the minor in psychology are met by taking seven or eight psychology courses (28 or 32 units) as specified below:

A. Complete either:

- **PSYCH 7A**
  - Introduction to Psychology (for the 28-unit minor)
- or

- **PSYCH 9A- 9B- 9C**
  - Psychology Fundamentals and Psychology Fundamentals (for the 32-unit minor)

B. Select three upper-division psychology courses from the following:

- **PSYCH 120A**
  - Abnormal Psychology
- **PSYCH 120D**
  - Developmental Psychology
- **PSYCH 120H**
  - History of Psychology
- **PSYCH 120P**
  - Personality Theories
- **PSYCH 130A**
  - Perception and Sensory Processes
- **PSYCH 140C**
  - Cognitive Science
- **PSYCH 140L**
  - Principles of Learning Theory
- **PSYCH 140M**
  - Human Memory
- **PSYCH 150**
  - Psychology of Language
- **PSYCH 160A**
  - Introduction to Cognitive Neuroscience
- **PSYCH 160D**
  - Brain Disorders and Behavior

C. Complete one of the following:

For students who took PSYCH 7A: Select three additional psychology courses (four or more units each) no more than one of which is a lower-division course.
For students who took PSYCH 9A, PSYCH 9B, PSYCH 9C: select two additional upper-division psychology courses (four or more units each). PSYCH 190–199 cannot be used to fulfill this requirement.

D. In addition, the school mathematics and computer science requirement (school requirement 1) must be satisfied.

Graduate Study in the Cognitive Sciences

The Department of Cognitive Sciences offers a Ph.D. degree program in psychology, with a specialization in cognitive science, to prepare students for research and teaching careers in academia, industry and government. The emphasis is on modern techniques of experimentation and theory construction. Special attention is given to providing hands-on research experience and equipping students with sophisticated mathematical and computing skills. The department has 30 faculty; two are members of the National Academy of Sciences, and many serve as editors or editorial board members of leading professional journals, and as members of NSF and NIH study panels. Many cognitive sciences faculty are also members of UCI's Institute for Mathematical Behavioral Sciences, and the department is generally regarded as one of the world's leading centers for mathematically oriented research in cognitive psychology. The department is also allied closely to the school's Center for Cognitive Neuroscience and Engineering and the Center for Language Science.

Admission

In addition to meeting the general requirements for admission, applicants should have acquired a background in mathematics equivalent to at least one year of calculus. Advanced course work in some of the following fields is highly desirable: psychology, computer science, mathematics, physical sciences, engineering, biology, logic, and linguistics. Standard requirements for admission include Graduate Record Examination (GRE) scores for tests taken within the past five years, official transcripts of all college course work, and at least three letters of recommendation. Applicants whose primary language is not English are required to demonstrate proficiency in English for admission consideration. Information about this requirement is available at http://www.grad.uci.edu/admissions/applying-to-uci/english-proficiency.html.

To receive full consideration for fellowship and assistantship awards, applications must be received by December 15. While applications filed and completed before January 15 will be reviewed for admissions and financial support, applicants are strongly encouraged to submit their application by December 15. Admissions decisions are made in March. Application materials are available online at the Graduate Division Web site, http://www.grad.uci.edu/.

Requirements for the Doctoral Degree in Psychology

Course work. Students must complete 12 courses distributed as follows: the cognitive and brain sciences core courses, PSYCH 210A-PSYCH 210B; three quantitative courses drawn from PSYCH 203A, and two of PSYCH 203B, PSYCH 203C, or PSYCH 203D; two computational methods courses PSYCH 205A and either PSYCH 205B or PSYCH 205C; two cognitive science core courses drawn from the PSYCH 211–219 module; and three electives.

Students must fulfill the Ph.D. program's computer-programming language requirement.

Students are expected to enroll in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B-PSYCH 201C during all quarters in residence prior to passage of the advancement-to-candidacy examination. During the fall of the first year in the program, students should enroll in the Seminar in Professional Development PSYCH 204A and the Proseminar PSYCH 202A.

Second-year examination. During the first year, in consultation with their advisor, the student should establish an advisory committee consisting of three faculty members, including the advisor and at least one other cognitive sciences faculty member. The committee should meet with the student during spring quarter of the first year to determine the student's area(s) of research interest and to identify the published literature with which the student must be familiar. At the beginning of the fall quarter of their second year, students will be required to take a second-year examination. It will involve (1) a critical review of work in the student's area of research interest, and (2) an oral examination by the student's committee members. Should the student fail the second-year exam, the student will be allowed to repeat the exam in the winter quarter. A subsequent failure results in the student exiting the program.

Pre-advancement talk. Prior to advancement, usually in the third year, each student will give a talk to the department faculty and students in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B-PSYCH 201C. Each student is expected to carry out theoretical/empirical research during the first two years. By the start of the third year, each student should have completed a research project of a scope and nature that is potentially publishable in a professional journal. (Another forum for the pre-advancement talk may be substituted with the written approval of the Graduate Director.) This talk is required prior to the student's advancement to candidacy.

Advancement examination. The advancement examination consists of a written research proposal in NIH NRSA Predoctoral Fellowship format, and an oral defense of the proposed research. The requirements for advancement are detailed below.

Dissertation. Students must submit a dissertation describing original publishable research and present a public defense of the dissertation as the final requirement of the Ph.D. program as detailed below.
Concentration in Cognitive Neuroscience

Students can also pursue a Ph.D. in psychology with a concentration in cognitive neuroscience. This is an interdisciplinary field which studies the relation between mind and brain. With the development of non-invasive functional brain imaging techniques during the last two decades, the integration of cognitive and neural models of information processing has become a major focus in the field, and a major growth area within the department's academic plan.

The program concentration is administered by the Department of Cognitive Sciences and coordinated by the cognitive neuroscience graduate director. Commensurate with the multidisciplinary nature of cognitive neuroscience, the department expects to admit students with a variety of undergraduate educational backgrounds. These include, but are not necessarily limited to, undergraduate degrees in psychology/cognitive science, neuroscience, biology, computer science, mathematics and engineering.

Requirements

Course work. Students must complete 12 courses distributed as follows: the cognitive and brain sciences core courses, PSYCH 210A-PSYCH 210B; two quantitative courses drawn from PSYCH 203A and one of PSYCH 203B, PSYCH 203C, or PSYCH 203D; one computational course drawn from the PSYCH 205A-PSYCH 205B-PSYCH 205C sequence; two neuroscience methods courses drawn from PSYCH 236, PSYCH 265, PSYCH 268A; two neuroscience courses drawn from the PSYCH 261–269 module; and three electives.

Students must fulfill the Ph.D. program's computer-programming language requirement.

Students are expected to enroll in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B- PSYCH 201C during all quarters in residence prior to passage of the advancement-to-candidacy examination. During the fall of the first year in the program, students should enroll in the Seminar in Professional Development PSYCH 204A and the Proseminar PSYCH 202A.

Second-year examination. During the first year, the student in consultation with their advisor should establish an advisory committee consisting of three faculty members, including the advisor and at least one other cognitive sciences faculty member. The committee should meet with the student during spring quarter of the first year to determine the student's area(s) of research interest and to identify the published literature with which the student must be familiar. At the beginning of the fall quarter of their second year, students will be required to take a second-year examination. It will involve (1) a critical review of work in the student’s area of research interest, and (2) an oral examination by the student's committee members. Should the student fail the second year exam, the student will be allowed to repeat the exam in the winter quarter. A subsequent failure results in the student leaving the program.

Pre-advancement talk. Prior to advancement, usually in the third year, each student will give a talk to the department faculty and students in the Cognitive Sciences Research Seminar PSYCH 201A-PSYCH 201B- PSYCH 201C. Each student is expected to carry out theoretical/empirical research during the first two years. By the start of the third year, each student should have completed a research project of a scope and nature that is potentially publishable in a professional journal. (Another forum for the pre-advancement talk may be substituted with the written approval of the graduate director.) This talk is required prior to the student’s advancement to candidacy.

Advancement examination. The advancement examination consists of a written research proposal in NIH NRSA Predoctoral Fellowship format, and an oral defense of the proposed research. The requirements for advancement are detailed below.

Dissertation. Students must submit a dissertation describing original publishable research and present a public defense of the dissertation as the final requirement of the Ph.D. program as detailed below.

Requirements for the M.A. Degree

NOTE: Although the department does not have an M.A. program, students may earn an M.A. degree as part of the Ph.D. program.

The student must (1) complete the required course work as outlined above; (2) present a talk and submit an approved paper, both based on empirical/theoretical research, as described above; and (3) fulfill a computer-programming language requirement by completing satisfactorily the computational research methods sequence PSYCH 205A-PSYCH 205B or by demonstrating proficiency in use of a programming language for cognitive sciences research as assessed by two faculty members and approved by the graduate director.

Requirements for Advancement to Candidacy

The requirements for advancement to candidacy are (1) the student must meet the requirements listed above for the M.A. degree; (2) the student must, in addition, form a five-member faculty committee selected according to Graduate Division policy. The committee will examine the student on a topic which is determined in consultation with the committee. A written document describing the student’s work on this topic must be submitted to the committee prior to advancement. The student must demonstrate an understanding of the background and issues for the research topic and show sufficient preparation and creativity to undertake planning for a dissertation project (e.g., by describing a possible experimental design or outlining a possible theoretical development); and (3) students are required to advance to candidacy by the end of the fall quarter of their third year in the program.
Requirements for the Ph.D. Degree

The requirements for the Ph.D. degree are (1) the student must formally present and defend a written dissertation proposal to a committee of at least three members selected according to Graduate Division requirements. The dissertation proposal presentation may take place as part of the examination for Advancement to Candidacy, in which case, that five-member committee will approve the dissertation proposal; (2) the proposal must be approved prior to the final dissertation defense (usually at least three months before to allow time for the candidate to incorporate suggestions and changes required by the committee); (3) prior to the approval of the final version of the dissertation the student is expected to defend the dissertation in a public colloquium announced with at least one week’s notice; and (4) all requirements for the Ph.D. degree must be fulfilled within three years after advancement to candidacy.

The normative time for advancement to candidacy is three years. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is six years.

Faculty

William H. Batchelder, Ph.D. Stanford University, Professor of Cognitive Sciences
Bruce G. Berg, Ph.D. Indiana University, Associate Professor of Cognitive Sciences
Alyssa Brewer, Ph.D. Stanford University, Assistant Professor of Cognitive Sciences
Lawrence F. Cahill, Ph.D. University of California, Irvine, Professor of Neurobiology and Behavior; Cognitive Sciences
Charles F. Chubb, Ph.D. New York University, Professor of Cognitive Sciences
Thomas M. D’Zmura, Ph.D. University of Rochester, Professor of Cognitive Sciences
Barbara A. Dosher, Ph.D. University of Oregon, UCI Distinguished Professor of Cognitive Sciences
Charless C. Fowlkes, Ph.D. University of California, Berkeley, Associate Professor of Computer Science; Cognitive Sciences; Electrical Engineering and Computer Science (computer vision, machine learning, computational biology)
Emily D. Grossman, Ph.D. Vanderbilt University, Associate Professor of Cognitive Sciences
Gregory S. Hickok, Ph.D. Brandeis University, Professor of Cognitive Sciences; Linguistics
Donald D. Hoffman, Ph.D. Massachusetts Institute of Technology, Professor of Cognitive Sciences; Logic and Philosophy of Science
Geoffrey J. Iverson, Ph.D. New York University, Professor of Cognitive Sciences
Jeffrey Krichmar, Ph.D. George Mason University, Professor of Cognitive Sciences; Computer Science
Michael Lee, Ph.D. University of Adelaide, Professor of Cognitive Sciences
Mimi Liljeholm, Ph.D. University of California, Los Angeles, Assistant Professor of Cognitive Sciences
Elizabeth F. Loftus, Ph.D. Stanford University, UCI Distinguished Professor of Psychology and Social Behavior; Cognitive Sciences; Criminology, Law and Society; School of Law (cognitive psychology, human memory, psychology and law)
Gary S. Lynch, Ph.D. Princeton University, Professor of Psychiatry and Human Behavior; Anatomy and Neurobiology; Cognitive Sciences
David Christian Lyon, Ph.D. Vanderbilt University, Assistant Professor of Anatomy and Neurobiology; Cognitive Sciences
Virginia Mann, Ph.D. Massachusetts Institute of Technology, Professor of Cognitive Sciences; Education; Linguistics
John Middlebrooks, Ph.D. University of California, San Francisco, Professor of Otolaryngology; Biomedical Engineering; Cognitive Sciences; Neurobiology and Behavior (hearing research, neurophysiology, auditory prosthesis, computational neuroscience, auditory cortex)
Louis E. Narens, Ph.D. University of California, Los Angeles, Professor of Cognitive Sciences; Logic and Philosophy of Science
Lisa Pearl, Ph.D. University of Maryland, College Park, Associate Professor of Cognitive Sciences; Linguistics; Logic and Philosophy of Science
Virginia Richards, Ph.D. University of California, Berkeley, Professor of Cognitive Sciences
A. K. Romney, Ph.D. Harvard University, Professor Emerita of Anthropology; Cognitive Sciences
Kourosh Saberi, Ph.D. University of California, Berkeley, Professor of Cognitive Sciences
Barbara W. Sarnecka, Ph.D. University of Michigan, Associate Professor of Cognitive Sciences; Logic and Philosophy of Science
Courses

PSYCH 7A. Introduction to Psychology. 4 Units.
Introduction to field of psychology, addressing the application of scientific methods to the study of human development, learning, memory, problem solving, perception, biological mechanisms, emotions and motivation, personality, psychopathology, and effects of diverse social and cultural contexts on human behavior. Course may be offered online.

Same as PSY BEH 9.
Overlaps with PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B.

Restriction: Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9A. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSY BEH 11A.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9B. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSY BEH 11B.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)
PSYCH 9C. Psychology Fundamentals. 4 Units.
Designed to provide freshman with an in-depth survey of general psychology. Topics include biological bases of behavior, sensation, perception, cognition, development, personality, psychopathology, and social psychology.

Same as PSY BEH 11C.

Restriction: Freshman only. Psychology and Social Behavior, Psychology, Criminology, Law and Society, Social Ecology, Urban Studies, Public Health Sciences, and Public Health Policy majors have first consideration for enrollment. PSY BEH 9 and PSYCH 7A may not be taken for credit if taken after PSY BEH 11A, PSY BEH 11B, PSY BEH 11C, PSYCH 9A, PSYCH 9B, or PSYCH 9C.

(III)

PSYCH 9D. Psychology Fundamentals Research. 1.3 Unit.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.

Corequisite: PSYCH 9A.

PSYCH 9E. Psychology Fundamentals Research. 1.3 Unit.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.

Corequisite: PSYCH 9B.

PSYCH 9F. Psychology Fundamentals Research. 1.3 Unit.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.

Corequisite: PSYCH 9C.

PSYCH 10A. Probability and Statistics in Psychology I. 4 Units.
An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Overlaps with ANTHRO 10A, SOCECOL 13, SOC SCI 10A, SOCIOL 10A, POL SCI 10A.

Restriction: Psychology majors have first consideration for enrollment.

(Va)

PSYCH 10B. Probability and Statistics in Psychology II. 4 Units.
An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10A.

Overlaps with ANTHRO 10B, SOCECOL 13, SOC SCI 10B, SOCIOL 10B, POL SCI 10B.

Restriction: Psychology majors have first consideration for enrollment.

(Va)

PSYCH 10C. Probability and Statistics in Psychology III. 4 Units.
An introduction to probability and statistics. Emphasis on thorough understanding of the probabilistic basis of statistical inference. Examples drawn primarily from psychology.

Prerequisite: PSYCH 10B.

Overlaps with ANTHRO 10C, SOCECOL 13, SOC SCI 10C, SOCIOL 10C, POL SCI 10C.

Restriction: Psychology majors have first consideration for enrollment.

(Vb)
PSYCH 21A. Adolescent Psychology. 4 Units.
Focuses on psychosocial dynamics of today's adolescents in America emphasizing the quest for identity, independence, values, and sexual orientation. The influence of society, family, school, and peers is analyzed. Strategies for helping troubled adolescents are discussed.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Overlaps with PSY BEH 112D.

(III)

PSYCH 46A. Introduction to Human Memory. 4 Units.
Covers the core concepts of modern research and theorizing about human memory, including structural subdivisions (e.g., perceptual memory, short-term memory, long-term memory), different measures of memory (e.g., recall, reorganization), and some practical applications of memory research (e.g., mnemonics). Course may be offered online.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Overlaps with PSYCH 140M, PSY BEH 192J.

(III)

PSYCH 56L. Acquisition of Language. 4 Units.
What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year olds. Comparison of kinds of data on which these theories are based.
Same as LINGUIS 51.

(III)

PSYCH 78A. Self-Identity and Society. 4 Units.
Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.
Same as SOCIOL 31.
Overlaps with SOCIOL 61A.

(III)

PSYCH 89. Special Topics in Lower-Division Psychology. 4 Units.
Studies in selected areas of psychology at the lower-division level. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

PSYCH H101A. Honors Seminar in Psychology I. 4 Units.
Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Honors Program in Psychology students only.

PSYCH H101B. Honors Seminar in Psychology II. 4 Units.
Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.
Prerequisite: PSYCH H101A.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Honors Program in Psychology students only.
PSYCH H101C. Honors Seminar in Psychology III. 4 Units.
Focuses on the research activities and honors thesis research projects of each student and the research of various Cognitive Sciences faculty. Students discuss their research interests in the early and later stages of their projects. Research projects and write-ups required.

Prerequisite: PSYCH H101B.

Repeatability: May be taken for credit 2 times.

Restriction: Honors Program in Psychology students only.

PSYCH 109. Cognitive Sciences Research Seminar. 4 Units.
Read and discuss examples of the primary research leading to the concepts covered in Psychology Fundamentals. Focus is on how this research is conducted and how inferences from it are drawn.

Corequisite: PSYCH 9B.
Prerequisite: PSYCH 9A.

Restriction: Cognitive Sciences majors have first consideration for enrollment.

PSYCH 110. Quantitative Methods for Cognitive Sciences Research. 4 Units.
Basics of quantitative methods used in cognitive science research focusing on linear algebra, Fourier analysis, multivariate statistics, and signal detection theory. Examples drawn from models and methods used in cognitive sciences research with practical examples.

Prerequisite: MATH 2A and MATH 2B and STATS 7 AND (PSYCH 114M or I&C SCI 31).

Restriction: Cognitive Sciences majors have first consideration for enrollment.

PSYCH 111BW. Honors Advanced Experimental Psychology. 4 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH H111B.
Prerequisite: PSYCH H111A and (PSYCH H11A or PSYCH 112A). Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Honors Program in Psychology students only.

(1b)

PSYCH H111A. Honors Experimental Psychology. 4 Units.
Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH H111A.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and 10B and 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH 112A.

Restriction: Campuswide Honors Program students only.

PSYCH H111B. Honors Advanced Experimental Psychology Laboratory. 2 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 111BW.

PSYCH H111C. Honors Research in Experimental Psychology. 4 Units.
Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Prerequisite: PSYCH 111BW or PSYCH 112B.

Restriction: Honors Program in Psychology students only.
PSYCH 112A. Experimental Psychology. 4 Units.
Emphasis on design of experiments and analysis of results. Experiments are conducted in laboratory sections.

Corequisite: PSYCH 112LA.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).

Overlaps with PSYCH H111A, PSYCH 112F, PSYCH 112G.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112B. Advanced Experimental Psychology. 4 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 112LB.
Prerequisite: PSYCH 112A and PSYCH 112LA.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112BW. Advanced Experimental Psychology. 4 Units.
Design and analysis of multivalent, factorial, and correlational studies. Students prepare proposals for independent research.

Corequisite: PSYCH 112LB.
Prerequisite: PSYCH 112A and PSYCH 112LA. Satisfactory completion of the Lower-Division Writing requirement.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112C. Research in Experimental Psychology. 4 Units.
Each student conducts a research project in experimental psychology. The projects are discussed in a seminar format. Written reports on each project are submitted at the end of the quarter.

Prerequisite: PSYCH 112B and PSYCH 112LB.

Overlaps with PSYCH 112F, PSYCH 112FW, PSYCH 112G, PSYCH 112GW.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112D. Effective Graphical Presentation of Data. 4 Units.
Learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.

Corequisite: PSYCH 112LD.
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and STATS 7)).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LA. Experimental Psychology Laboratory. 2 Units.
Required laboratory section and co-requisite for Psych 112A.

Corequisite: PSYCH 112A.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LB. Advanced Experimental Psychology Laboratory. 2 Units.
Required laboratory section and co-requisite for PSYCH 112B and PSYCH 112BW.

Corequisite: PSYCH 112B or PSYCH 112BW.
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 112LC. Research in Experimental Psychology.  
Required laboratory section and co-requisite for PSYCH 112C.  
Corequisite: PSYCH 112C.

PSYCH 112LD. Effective Graphical Presentation of Data Lab. 2 Units.  
Lab to learn to use MATLAB to produce graphical displays of data based on psychological principles for effective design. Approach is problem-oriented, with emphasis on case-studies using data from psychological experiments and real-world corpora. Assessment via independent individual projects.  
Corequisite: PSYCH 112D.  
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LM. Research Methods in Psychology Laboratory. 2 Units.  
Required laboratory section and co-requisite for PSYCH 112M.  
Corequisite: PSYCH 112M.  
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112LR. Cognitive Robotics Laboratory. 2 Units.  
Required laboratory section and co-requisite for Psych 112R.  
Corequisite: PSYCH 112R.  
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112M. Research Methods in Psychology. 4 Units.  
Research methods in psychology for majors who wish to fulfill this requirement separately from upper-division writing. Covers both experimental and descriptive research methods, analysis of results, and reading the psychological literature. Research experience is provided in laboratory sections.  
Corequisite: PSYCH 112LM.  
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).  
Overlaps with PSYCH 112F, PSYCH 112FW.  
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 112R. Cognitive Robotics. 4 Units.  
Introduces concepts on experimental design, embodiment, robot construction, and computer programming. Concepts of embodied intelligence and case studies of cognitive robotics are covered in lecture. Simple robots are constructed and programmed to carry out different behavioral experiments in lab.  
Corequisite: PSYCH 112LR.  
Prerequisite: ((PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)) and ((PSYCH 10A and PSYCH 10B and PSYCH 10C) or (MATH 2A and MATH 2B and (MATH 7 or STATS 7))).  
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 113T. Introduction to Psychological Tests and Measurement. 4 Units.  
Principles of psychological measurement, including elementary psychophysics, psychometrics, test theory, and the measurement of abilities, attitudes, traits, and interests. Reliability and validity of psychological measurements.  
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C) and PSYCH 10A.  
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 114M. MATLAB Programming. 4 Units.  
MATLAB is a mathematical software package for solving quantitative problems often encountered in experimental psychology. Topics include rudiments of programming, statistical analysis of data, matrix algebra, signal processing, graphic visualization, and simulated models of cognitive and perceptual processes.  
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 119. Special Topics in Research Methodologies. 1-4 Units.
Studies in selected areas of research methodologies. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 120A. Abnormal Psychology. 4 Units.
Introduction to psychopathology and behavioral deviations, and the concepts of theories regarding these conditions.
Prerequisite: PSYCH 7A or PSYCH 9C or PSY BEH 9 or PSY BEH 11C.
Overlaps with PSY BEH 102C.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 120D. Developmental Psychology. 4 Units.
A general introduction to the study of the physical, intellectual, social, and emotional development of the child from birth to adulthood.
Prerequisite: PSYCH 7A or PSYCH 9A or PSY BEH 9 or PSY BEH 11A
Overlaps with PSY BEH 111D.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 120H. History of Psychology. 4 Units.
A history of the development of various schools and systems of psychological thought.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSY BEH 192A.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 120P. Personality Theories. 4 Units.
A survey of the evolution of personality theory during this century. An overview of major perspectives in the field, with special attention to Freud, Jung, and Adler.
Prerequisite: PSYCH 7A or PSYCH 9C or PSY BEH 9 or PSY BEH 11C.
Overlaps with PSY BEH 170S.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 121M. Theories of Motivation. 4 Units.
Factors affecting the behavioral performance of organisms. A survey of theoretical and empirical approaches to the physiological, psychological, and social factors which generate behavior.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Overlaps with PSY BEH 176S.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 121P. Positive Psychology. 4 Units.
Positive psychology, at the subjective level, is about valued subjective experiences; at the individual level, it is about positive individual traits; and at the group level, it is about the civic virtues and institutions that move individuals toward better citizenship.
Prerequisite: (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 121S. Psychology of Sleep and Consciousness. 4 Units.
Covers the physiology, neurochemistry, and neuroanatomy associated with sleep, contemporary sleep theory, REM and NREM, phenomenology, sleep disorders, examination of differences between conscious and unconscious cognitive function, the history of sleep and dream theories from ancient time to present day.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 122C. Clinical Psychology. 4 Units.
Provides overview of the clinical psychology field including theories and techniques used in counseling and testing.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 122I. Organizational/Industrial Psychology. 4 Units.
Introduction to applied psychology in organizations, including personnel testing, selection, training and evaluation, job and classification analysis, job satisfaction and motivation, organizational development, leadership, market research and consumer psychology. Potential ethical problems are discussed.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSY BEH 11B or PSY BEH 11C or PSYCH 7A or PSYCH 9A or PSYCH 9B or PSYCH 9C.

Same as PSY BEH 180S.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 123P. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 143, PHILOS 143.

Restriction: Psychology and Philosophy majors have first consideration for enrollment.

PSYCH 124S. Sports Psychology. 4 Units.
Discusses the field of sports psychology with an emphasis on clinical practice including motivation, goal setting, performance skills, and mental skills. Discusses and utilizes a wide range of techniques designed to enhance performance and manage problems among athletes.

Prerequisite: (PSYCH 7A or PSYCH 9C) or (PSY BEH 9 or PSY BEH 11C).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 124V. Psychology of Violence. 4 Units.
Discusses the psychology of violence and aggression with an emphasis on understanding the psychological, social, and physiological roots of violent and aggressive behavior. Psychological treatment techniques and strategies for prevention of aggressive and violent behavior are also discussed.

Prerequisite: (PSYCH 7A or PSYCH 9C) or (PSY BEH 9 or PSY BEH 11C).

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 127A. Adult Development. 4 Units.
Examines why and how we change (with attention to gains as well as losses) from ages 18-65 and the nature and sources of continuity over time. Topics include physical and intellectual functioning, personality, coping strategies, and social roles and relationships.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSY BEH 113D.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 127C. Clinical Child Psychology. 4 Units.
Examines research and theory concerning childhood psychopathology behavior disorders. Diagnosis and assessment, early identification of high-risk
children, fears and phobias, antisocial behavior, childhood psychoses, autism, depression, attention deficit/hyperactivity disorders, and ethical and policy
implications of identifying children who are different.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSY BEH 152C.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127D. Development of Gender Differences. 4 Units.
Examination of research on how sexes differ in physiology, cognitive functioning, personality, and social behavior. Sex-differentiated development from
the prenatal period through adulthood. Explanations for male-female differences are sought, focusing on biological (genetic, hormonal), and social
(familial, cultural) mechanisms.
Prerequisite: PSY BEH 9 or PSYCH 9B or PSY BEH 11B or PSYCH 7A.
Same as PSY BEH 117D.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127E. Psychology and Emotion. 4 Units.
General theories of emotion and research regarding cognitive, behavioral, physiological, and subjective experience of emotion. Specific topics include
emotion regulation, emotion and health, emotional intelligence, and emotional development.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C.
Same as PSY BEH 177S.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127G. Gerontology. 4 Units.
Examines stereotypes and myths associated with aging; physiological and psychological changes that accompany old age; distinguishes behavior
changes due to aging per se from those due to historical and socioeconomic factors; political, social aspects of old age in contemporary society.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSY BEH 114D.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 127H. Child Health Psychology. 4 Units.
Exploration of psychological antecedents, concomitants, and consequences of medical illnesses in children. Children’s beliefs about health, illness, and
medication; the role of stress; coronary-prone behavior; therapeutic adherence and physician-patient interaction; coping with chronic illness; effects of
child’s illness on family.
Prerequisite: PSY BEH 9 or PSY BEH 11C or PSYCH 9C or PSYCH 7A. Recommended: SOCECOL 10.
Same as PSY BEH 138H.
Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Public Health Policy majors have first consideration for enrollment.

PSYCH 127I. Infant Development. 4 Units.
Study of human development from conception through the first two years of life, covering processes and events in the domains of physical, social, and
cognitive development.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSY BEH 110D.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 127T. Child Therapies. 4 Units.
Examines research methodologies, empirical data, and implications of diverse intervention strategies. Primary topics include psychotherapy process and outcome, family therapies, behavioral intervention, cognitive behavior modification, pediatric psychopharmacology, and ethical and social policy implications of intervening in other people’s lives.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 122C.
Same as PSY BEH 155C.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 129. Special Topics in General Psychology. 4 Units.
Studies in selected areas of general psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 130A. Perception and Sensory Processes. 4 Units.
A general introduction to the scientific study of sensory processes and perceptual phenomena, with special emphasis on the visual system.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.
Same as PSY BEH 192E.
Overlaps with PSYCH 131A, PSYCH 131B.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 131A. Vision. 4 Units.
Visual perception and the anatomy and physiology of the visual system. Topics include: the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as BIO SCI N182.
Overlaps with PSYCH 130A.
Restriction: Upper-division students only. Psychology majors have first consideration for enrollment.

PSYCH 131B. Hearing. 4 Units.
Auditory perception, the anatomy and physiology of the auditory system, and the physics of sound. Topics include: neural transduction of sound, sensitivity, sound localization, complex sound perception, and hearing loss.

Prerequisite: (PSYCH 9A and PSYCH 9B) or (PSY BEH 11A and PSY BEH 11B).
Overlaps with PSYCH 130A, PSY BEH 192E.
Restriction: Upper-division students only. Psychology majors have first consideration for enrollment.

PSYCH 135A. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 235A.
PSYCH 135B. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 235B.

PSYCH 135C. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 235C.

PSYCH 135M. The Mind/Body Problem. 4 Units.
What is consciousness and what is matter and how are the two related? How can brains have minds? This multidisciplinary course draws on information from the fields of computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 139. Special Topics in Perception and Sensory Processes. 4 Units.
Studies in selected areas of perception and sensory processes. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 140C. Cognitive Science. 4 Units.
Introduction to investigations of the structure and function of the mind, from viewpoints of computation, neuroscience, philosophy, and cognitive psychology. Topics include: perception, attention, knowledge representations, learning and memory, action, reasoning, and language.

Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSYCH 11B) or PSYCH 7A or (PSYCH 9A and PSYCH 9B).

Same as PSY BEH 192G.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 140L. Principles of Learning Theory. 4 Units.
Investigation of the learning and memory processes of humans and animals. Basic experimental approaches to learning and memory, empirical results, and theoretical interpretations of the evidence are discussed.

Prerequisite: PSY BEH 9 or PSY BEH 11A or PSYCH 7A or PSYCH 9A.

Same as PSY BEH 192I.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 140M. Human Memory. 4 Units.
Developments in the area of memory; history of memory research; theories of the nature of memory. Visual memory, recognition memory, high-speed scanning, free recall, short-term memory, mnemonics, retrieval, relationship of memory to thinking. Selected theoretical formulations for memory.

Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.

Same as PSY BEH 192J.

Overlaps with PSYCH 46A.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.
PSYCH 141J. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as EDUC 141A.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

PSYCH 141K. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as EDUC 141B.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

PSYCH 141L. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lecture, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as EDUC 141C.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

PSYCH 141M. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as EDUC 141D.

PSYCH 141N. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as EDUC 141E.

PSYCH 141O. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as EDUC 141F.

PSYCH 141P. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as EDUC 141G.

PSYCH 141Q. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as EDUC 141H.
PSYCH 141R. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.
An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures,
complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.
Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).
Same as EDUC 141I.

PSYCH 143P. Human Problem Solving. 4 Units.
Modern developments in the psychology of human problem solving. Topics include: concept identification, arithmetic, sets, logic puzzles, story problems,
group problem solving, and theorem proving.
Prerequisite: PSY BEH 9 or PSY BEH 11B or PSYCH 7A or PSYCH 9B.
Same as PSY BEH 192K.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 144A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals
of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language
environment.
Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have
experience with preschool children, and be culturally sensitive.
Same as SOC SCI 186A, CHC/LAT 191A.
Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

PSYCH 144B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals
of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language
environment.
Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other
language (Spanish most typically), must have experience with preschool children and be culturally sensitive.
Same as SOC SCI 186B, CHC/LAT 191B.
Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

PSYCH 144C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals
of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language
environment.
Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other
language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.
Same as SOC SCI 186C, CHC/LAT 191C.
Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

PSYCH 145P. Attention and Learning Deficits in Children I. 4 Units.
Learning in normal and attention-deficit disordered children. Covers the normal developmental course of learning and a variety of deficits. Includes field
work with attention-deficit disordered children.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 145Q. Attention and Learning Deficits in Children II. 4 Units.
Learning in normal and attention-deficit disordered children. Covers the normal developmental course of learning and a variety of deficits. Includes field
work with attention-deficit disordered children.
Prerequisite: PSYCH 145P.
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 145R. Attention and Learning Deficits in Children III. 4 Units.
Learning in normal and attention-deficit disordered children. Covers the normal developmental course of learning and a variety of deficits. Includes field work with attention-deficit disordered children.

Prerequisite: PSYCH 145Q.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 146MW. Writing about Memory. 4 Units.
Covers a broad range of texts, literary, philosophical, and scientific, each probing the nature of memory and its meaning in human life. Readings are drawn from across many disciplines and many perspectives.

Prerequisite: PSYCH 7A or PSYCH 9B or PSY BEH 9 or PSY BEH 11B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 147C. Cognitive Behavior Therapy. 4 Units.
Presentation of principles and procedures of therapeutic interventions based on cognitive-behavior methods. Cognitive factors in learning, emotional arousal, psychological disorder, and psychotherapy reviewed. Introduces the application of cognitive behavioral methods to problems of depression, anxiety, anger, pain, and impulsivity.

Prerequisite: PSY BEH 9 or (PSY BEH 11A and PSY BEH 11C) or PSYCH 7A or (PSYCH 9A and PSYCH 9C).

Same as PSYCH 154C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 148A. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 228A.

PSYCH 148B. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 228B.

PSYCH 148C. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 228C.

PSYCH 149. Special Topics in Cognition and Learning. 4 Units.
Studies in selected areas of cognition and learning. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.
PSYCH 150. Psychology of Language. 4 Units.
Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.
Same as LINGUIS 155.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 151. Brainwaves in Language Research. 4 Units.
Provides a hands-on introduction to the use of electroencephalography (EEG) in language processing research. In addition to theoretical discussions, students design, deploy, and analyze a novel EEG experiment of their own during the quarter.
Prerequisite: PSYCH 150.

PSYCH 156A. Acquisition of Language II. 4 Units.
Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the "how" of language acquisition.
Prerequisite: Recommended: PSYCH 56L or LINGUIS 51.
Same as LINGUIS 150.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 157M. Computational Methods for Language Research. 4 Units.
Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.
Prerequisite: PSYCH 155 or LINGUIS 155 or PSYCH 156A or LINGUIS 150.
Same as LINGUIS 107M.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 247M.

PSYCH 158A. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 248A.

PSYCH 158B. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 248B.

PSYCH 158C. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 248C.
PSYCH 159. Special Topics in Semiotics and Language. 4 Units.
Studies in selected areas of language sciences. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 160A. Introduction to Cognitive Neuroscience. 4 Units.
Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.
Same as PSY BEH 192L, BIO SCI N166.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 160D. Brain Disorders and Behavior. 4 Units.
Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory and decision-making.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N165.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 161. Language and the Brain. 4 Units.
Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.
Prerequisite: BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N160, LINGUIS 158.
Restriction: Psychology and Biology majors have first consideration for enrollment.

PSYCH 161H. Hearing and the Brain. 4 Units.
An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.
Prerequisite: PSYCH 160A or BIO SCI N110.
Same as BIO SCI N147.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 161P. Perceptual Neuroscience. 4 Units.
Examines the physiology of cortical networks underlying human perceptual experience.
Prerequisite: PSYCH 160A or PSY BEH 192L.
Same as PSY BEH 192P.
Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 162A. Neurobiology of Learning and Memory. 4 Units.
How the brain and behavior change as a result of experience, with an emphasis on identifying the neurochemical processes through which memory is stored and the parts of the brain that are involved.
Prerequisite: BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N158.
Restriction: Psychology majors have first consideration for enrollment.
PSYCH 162B. Human Memory Disorders. 4 Units.
Focuses on models and methods of assessing human memory and its disorders. Exposure to conventional and new assessment devices provided.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 164A. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 264A.

PSYCH 164B. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 264B.

PSYCH 164C. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.
Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology majors have first consideration for enrollment.
Concurrent with PSYCH 264C.

PSYCH 165A. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 263A.

PSYCH 165B. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 263B.

PSYCH 165C. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 263C.
PSYCH 168E. Embodied Cognition. 4 Units.
Addresses concepts of embodiment in cognitive sciences. Introduces the notion of how the brain is closely coupled to the body and its interaction with the environment. Case studies of both natural and artificial systems are explored.
Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C).
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 169. Special Topics in Cognitive Neuroscience . 4 Units.
Studies in selected areas of cognitive neuroscience. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 171. Psychology of a Diverse Society. 4 Units.
Examines the social and cultural bases of human behavior, including ethnicity, gender, gender orientation, class, and religion. Analysis of historical, political, and economic factors influencing a diverse society.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 172S. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online. Same as REL STD 112B, SOC SCI 130B, LPS 140B.

PSYCH 173A. Psychological Anthropology. 4 Units.
Cultural differences and similarities in personality and behavior. Child-rearing practices and consequent adult personality characteristics, biocultural aspects of child development and attachment, culture and behavior evolutionary models, politically linked personality, cognitive anthropology, psychology of narrative forms, comparative national character studies.
Prerequisite: ANTHRO 2A or PSYCH 7A or (PSYCH 9A and PSYCH 9B and PSYCH 9C) or (PSY BEH 11A and PSY BEH 11B and PSY BEH 11C)
Same as ANTHRO 132A.
Restriction: Psychology majors have first consideration for enrollment.

PSYCH 174A. Asian American Psychology. 4 Units.
Examines the social and psychological concerns of Asian Americans; e.g., coping with racial prejudice, maintaining bicultural identities, dealing with cross-cultural conflicts in interracial relationships, and trying to reconcile generational differences between immigrant parents and their American-born children.
Same as ASIANAM 141.

PSYCH 174E. African American Psychology. 4 Units.
Historical overview of the development of black psychology and the African American frame of reference. Topics include personality development, psychological assessment, issues in education, black mental health, and the role of the African American psychologist in the community.
Same as AFAM 153.

PSYCH 174F. Chicano/Latino Psychology. 4 Units.
Examines research and literature investigating Chicano/Latino ethnicity as a variable influencing behavior. Explores mental health needs and issues of Chicano/Latinos and discusses competent, sensitive methods of mental health service delivery.
Same as CHC/LAT 171.

PSYCH 174H. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.
Same as CHC/LAT 170, SOC SCI 165.
PSYCH 176A. Political Psychology. 4 Units.
Examines how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses the formation of political attitudes, the process of political decision-making, the nature of political leadership.

Same as POL SCI 137C.

Restriction: Psychology and Political Science majors have first consideration for enrollment.

PSYCH 177D. Deviance. 4 Units.
Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.

Same as SOCIOL 156, CRM/LAW C107.

Restriction: Criminology, Law and Society, Social Ecology, Sociology, and Psychology majors have first consideration for enrollment.

PSYCH 177F. Forensic Psychology: Advanced Seminar. 4 Units.
The focus is on the psychology of criminal offending, particularly violent behavior. Examines violence, sexual offending, and mental disorder related to crime with regard to clinical assessment and treatment; mental health services within forensic institutions.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSY BEH 102C and (PSY BEH 178S or CRM/LAW C149).

Same as PSY BEH 156C, CRM/LAW C136.

Restriction: Psychology and Social Behavior, Social Ecology, Psychology, and Criminology, Law and Society majors have first consideration for enrollment.

PSYCH 177P. Developmental Psychopathology. 4 Units.
Research and theory of origins, course, and outcomes of disordered behavior. Continuity and change in patterns of behavior; environmental challenges and buffers; stress/competence in children; vulnerable/invincible children; children of mentally ill parents; families at risk; childhood antecedents of adult disorders.

Prerequisite: (PSY BEH 9 or PSY BEH 11C or PSYCH 7A or PSYCH 9C) and PSYCH 120A. Recommended: SOCECOL 10.

Same as PSY BEH 153C.

Restriction: Psychology and Social Behavior, Social Ecology, and Psychology majors have first consideration for enrollment.

PSYCH 178N. Social Psychology of Networks. 4 Units.
Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as SOCIOL 135.

Restriction: Sociology and Psychology majors have first consideration for enrollment.

PSYCH 179. Special Topics in Interdisciplinary Studies. 1-4 Units.
Studies in selected areas of interdisciplinary studies. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Psychology majors have first consideration for enrollment.

PSYCH 190. Senior Thesis. 4 Units.
Student writes senior thesis on a topic of psychology with guidance from a three-member committee comprised of Cognitive Sciences faculty. Senior thesis includes the following: research statement, literature review, experimental design, data collection and analysis, and a written final thesis.

Grading Option: In progress only.

Repeatability: May be taken for credit 3 times.

PSYCH 198. Directed Group Study. 1-4 Units.
Directed study with Cognitive Sciences faculty.

Repeatability: May be repeated for credit unlimited times.
PSYCH 199. Independent Study. 1-4 Units.
Independent research with Cognitive Sciences faculty.

PSYCH 201A. Cognitive Sciences Research Seminar. 1.3 Unit.
Weekly reports and colloquia by faculty, students, and visitors.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 201B. Cognitive Sciences Research Seminar. 1.3 Unit.
Weekly reports and colloquia by faculty, students, and visitors.
Prerequisite: PSYCH 201A.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 201C. Cognitive Sciences Research Seminar. 1.4 Unit.
Weekly reports and colloquia by faculty, students, and visitors.
Prerequisite: PSYCH 201B.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 202A. Proseminar in the Cognitive Sciences. 1 Unit.
Introduction to the conceptual foundations and basic research results in the cognitive sciences for first-year graduate students.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 203A. Discrete Mathematics and Probability. 4 Units.
Logic and set theory are covered during the first three weeks, using an interactive computer system. The remaining seven weeks are devoted to probability theory and cover elementary concepts from samples spaces to Chebychev’s Inequality and the moment generating function.
Restriction: Graduate students only.

PSYCH 203B. Introduction to Mathematical Statistics. 4 Units.
Restriction: Graduate students only.

PSYCH 203C. Algorithmic Statistics. 4 Units.
Discussion of the fundamentals of statistical inference and computational implementations of common statistical models.
Restriction: Graduate students only.

PSYCH 203D. Applied Mathematics for Cognitive Sciences Research. 4 Units.
Covers the basics of linear systems analysis, focusing on linear algebra, Fourier analysis, differential equations, and elementary signal processing. Applications in Cognitive Science and Cognitive Neuroscience research will be developed.
Prerequisite: PSYCH 205A.
Restriction: Psychology graduate students only.

PSYCH 204A. Seminar in Professional Development. 1 Unit.
Development of professional skills. Focuses on grant writing and submission process, responsible conduct of research, and ethics training.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.
PSYCH 204B. Seminar in Professional Development. 1 Unit.
Development of professional skills. Focus on scientific presentations and preparation.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 204C. Seminar in Professional Development. 1 Unit.
Development of professional skills. Focuses on career opportunities, interests and information, and community outreach.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Psychology graduate students only.

PSYCH 204A. Computational and Research Methods with MATLAB. 4 Units.
Introduces rudiments of programming, statistical analysis and probability theory, graphic visualization, GUI design, spectral analysis, and simulation models using MATLAB, a software package for solving quantitative problems often encountered in experimental psychology.
Restriction: Graduate students only.

PSYCH 205B. Running Experiments Using MATLAB. 4 Units.
Provides an in-depth introduction to writing MATLAB programs to run auditory and visual experiments. Topics covered include program structure, stimulus generation, presentation, and data collection.
Prerequisite: PSYCH 205A.

PSYCH 205C. Computational Statistics. 4 Units.
Introduction to a number of computational statistics approaches including exploratory data analysis and modeling using a probabilistic framework with Bayesian graphical models. Emphasis will be on in-class programming using MATLAB.
Restriction: Graduate students only.

PSYCH 210A. Introduction to Cognitive and Brain Sciences I: Perception. 4 Units.
Discusses models of cognition and evidence linking cognition and the brain. Focus is on visual, auditory, and somatic perception and bottom-up mechanisms of attention.
Restriction: Graduate students only.

PSYCH 210B. Introduction to Cognitive and Brain Sciences II: Cognition. 4 Units.
Discusses models of cognition and evidence linking cognition and the brain. Focus is on emotion, top-down attention, goal-directed behavior, categorization, judgment, and decision-making.
Restriction: Graduate students only.

PSYCH 211. Attention and Perception. 4 Units.
Focuses on selective attention, the process of selecting a subset of available information for analysis and representation, and on how stimulus salience, behavioral goals, and expectations influence attentional deployment and perception. Also explores related cognitive processes and applications.
Restriction: Graduate students only.

PSYCH 212. Learning, Memory, and Knowledge Organization. 4 Units.
Addresses fundamental issues in human memory, inductive learning, and knowledge organization. Knowledge representation, storage, retrieval, acquisition, and relation to the environment are explored. Prominent computational approaches are reviewed.
Restriction: Graduate students only.

PSYCH 213. The Mind/Body Problem. 4 Units.
Course is multidisciplinary, drawing on information from the fields of quantum physics, computer vision, artificial intelligence, cognition, neurophysiology, philosophy, and psychophysics.
Restriction: Graduate students only.

PSYCH 214. Bayesian Cognitive Modeling. 4 Units.
Considers a range of statistical methods of data analysis and simple cognitive models using the Bayesian graphical modeling framework.
Restriction: Graduate students only.
PSYCH 215L. Language Acquisition. 4 Units.
Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the “how” of language acquisition.
Restriction: Graduate students only.

PSYCH 215N. Neuroscience of Language. 4 Units.
Covers fundamental issues in the neuroscience of language processing. Topics include word and sentence-level psycholinguistics, and the neural basis of these language functions as revealed by neuropsychological and functional imaging studies.
Restriction: Graduate students only.

PSYCH 215S. Structure of Language. 4 Units.
Explores the structure of human languages, and the theoretical architectures that have been proposed to capture that structure. Special focus on the nature of linguistic facts, the structure of linguistic argumentation, and the psychological claims of linguistic theories.
Restriction: Graduate students only.

PSYCH 216. Introduction to Cognitive Neuroscience. 4 Units.
Explores the neural basis of higher cognitive functions such as perception, attention, language, memory, and executive function as understood from functional brain imaging, neuropsychological disorders, and other neuroscience techniques.
Restriction: Graduate students only.
Concurrent with PSYCH 160A.

PSYCH 217. Vision. 4 Units.
Examines visual sensation and perception using psychophysical and neuroscientific perspectives. Covers visual stimulus description and generation; the eye and retinal processing; LGN and cortical visual area function; specialized processing for form, depth, motion, and color perception; and neurological disorders.
Restriction: Graduate students only.

PSYCH 218. Hearing. 4 Units.
Examines auditory sensation and perception using psychophysical and neuroscientific perspectives. Covers physical aspects of sound; subcortical auditory processing; aspects of sensation and perception such as sensitivity, sound localization, and complex-sound recognition; neuroscientific studies of cortical function; and abnormal auditory processing.
Restriction: Graduate students only.

PSYCH 219. Cognitive Development I: Core Knowledge. 4 Units.
Explores the study of cognitive development in infancy and childhood. Emphasizes the role of this research in answering questions concerning the origins of human knowledge. Addresses topics of space, objects, agency, navigation, number, and conceptual change.
Restriction: Graduate students only.

PSYCH 220. Cognitive Development II: Conceptual Change. 4 Units.
The cognition of human infants is similar to that of other primates. But adult human knowledge is vastly different from that of any other animal. Examines the childhood conceptual changes that underlie adult human cognitive achievements.
Restriction: Graduate students only.

PSYCH 228A. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 148A.

PSYCH 228B. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 148B.
PSYCH 228C. Cognitive Development Research. 4 Units.
Provides experience in cognitive development research, centered around the child's acquisition of number words and concepts. Students conduct research and review and discuss each other's projects in weekly lab meetings with instructor and graduate students.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 148C.

PSYCH 229. Special Topics in Human Cognition. 1.3-4 Units.
Current research in brain/ behavior relationships, human memory, and learning theory is presented.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

PSYCH 231P. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as LPS 243, PHILOS 243.

PSYCH 233A. Observer Theory I. 4 Units.
Provides framework for mathematical analysis of perception/cognition and its relation to the physical world. Permits a unified treatment of perceptual and physical interactions and lays the foundation for a nondualistic, nonreductionistic science. Mathematical aspects include study of Markovian dynamic systems.

Restriction: Graduate students only.

PSYCH 234A. Mathematical Models of Cognitive Processes I. 4 Units.
Mathematical models of various cognitive processes developed since 1960, including learning, memory, perception, psycholinguistics, and problem solving. Models are formulated in different mathematical languages: calculus, algebra, logic, probability, and computer. Difficulties in testing and validating models discussed.

Restriction: Graduate students only.

PSYCH 235A. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 135A.

PSYCH 235B. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 135B.

PSYCH 235C. Memory and Decision-Making Research. 4 Units.
Covers a range of theoretical, empirical, and model-based memory and decision-making research topics, including reconstructive memory, decision-making in reinforcement learning problems, sequential sampling processes, hierarchical Bayesian methods, and the application of machine learning methods to corpora of human behavior.

Repeatability: May be repeated for credit unlimited times.

Concurrent with PSYCH 135C.
PSYCH 236. Multivariate Time Series Analysis. 4 Units.
Introduces multivariate time series analysis theory and methods emphasizing computational methods in spectral analysis, autoregressive modeling, information theory, principal and independent components analysis, and nonlinear dynamics. Applications to human neuroimaging data are extensively discussed.

Prerequisite: PSYCH 205A.
Restriction: Graduate students only.

PSYCH 237. Advanced Bayesian Cognitive Modeling. 4 Units.
Considers a range of advanced cognitive process models including models of signal detection, memory retention, category learning, stimulus representation, and reasoning using the Bayesian graphical modeling framework.

Prerequisite: PSYCH 214.
Restriction: Graduate students only.

PSYCH 238. Auditory Signal Processing and Experimental Design. 4 Units.
Topics include physics and measurement of sounds, digital signal processing (DSP), recording/processing of speech and music, generating complex sounds (e.g., FM and AM), use of sound level meter and artificial ear (coupler), digital filtering, signal mixing, autocorrelation and cross-correlation.

Prerequisite: PSYCH 205A.

PSYCH 239. Special Topics in Methodology and Models. 1.3-4 Units.
Current research in cognitive sciences methodologies, concepts, and models is presented.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 245A. Computational Models of Language Learning. 4 Units.
Focuses on computational models of native language learning, exploring how probabilistic learning and inference fare on difficult case studies within language acquisition. In all cases, grounds the learning models in available empirical data and considers their psychological plausibility.

Prerequisite: PSYCH 215L.
Restriction: Graduate students only.

PSYCH 247M. Computational Methods for Language Research. 4 Units.
Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYCH 215L or PSYCH 215S or PSYCH 215N or PSYCH 245A.
Restriction: Graduate students only.

Concurrent with PSYCH 157M and LINGUIS 107M.

PSYCH 248A. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 158A.

PSYCH 248B. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.
Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 158B.
PSYCH 248C. Language Sciences Research. 4 Units.
Provides in-depth experience in all facets of research in language. Research topics include language acquisition and adult processing. Methodologies include behavioral research methods, brain imaging techniques, and computational methods. Students engage in research and participate in a weekly seminar.

Repeatability: May be repeated for credit unlimited times.
Concurrent with PSYCH 158C.

PSYCH 249. Special Topics in Language Science. 1.3-4 Units.
Foundations and current research in theoretical, experimental, and computational linguistics.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 254. Human Information Processing. 4 Units.
Detailed introduction to speed-accuracy tradeoff experimental procedures; speed-accuracy tradeoff issues; quantitative modeling of temporal aspects of human information processing.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only or Honors Program in Psychology undergraduate students.

PSYCH 259. Special Topics in Human Performance. 1.3-4 Units.
Current research in the human issues involved with sensation, perception, and cognition.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 261N. Cortical Neuroscience. 4 Units.
Physiology of the cerebral cortex, theoretical neuroscience, and the neural basis of perception.

Prerequisite: PSYCH 216.

PSYCH 262. Functional Neuroanatomy. 4 Units.
It is impossible to truly understand human behavior without some understanding of the physical structure that enables behavior. Examines recent findings in functional neuroanatomy through lectures and papers discussing links between particular behaviors and specific brain structures.

Restriction: Graduate students only.

PSYCH 263A. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
Concurrent with PSYCH 165A.

PSYCH 263B. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Restriction: Graduate students only.
Concurrent with PSYCH 165B.

PSYCH 263C. Visual Neuroscience Research. 4 Units.
Covers a range of cognitive neuroscience research topics with emphasis on cortical organization of visual circuits, object recognition, motion perception, visual attention, and decision making.

Restriction: Graduate students only.
Concurrent with PSYCH 165C.
PSYCH 264A. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Concurrent with PSYCH 164A.

PSYCH 264B. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Concurrent with PSYCH 164B.

PSYCH 264C. Neuroscience of Language Research. 4 Units.
Covers a range of neuroscience of language research topics: psycholinguistic and neuroscience foundations, methods, experimental design, and content areas such as speech perception/recognition, production, sensory-motor integration, lexical access, comprehension, working memory, sign language, and aphasia.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Concurrent with PSYCH 164C.

PSYCH 265. Introduction to Functional MRI. 4 Units.
Describes the fundamentals of imaging the human brain function using functional Magnetic Resonance Imaging (fMRI). Topics include basic fMRI physics, experimental design, and data acquisition and analysis.

Restriction: Graduate students only.

PSYCH 267. Cognitive Neuroscience of Music. 4 Units.
Introduction to cortical mechanisms involved in music perception and production.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

PSYCH 268A. Computational Neuroscience. 4 Units.
Introduction to computational neuroscience. Mathematical models of single neurone, neural circuits, thalamocortical systems, and cortical mass action can stimulate single-unit, local field potential, and EEG dynamics. These models are used to investigate mechanisms of sensation, motor control, attention, and consciousness.

Prerequisite: PSYCH 205A and (PSYCH 216 or PSYCH 261N).

PSYCH 268R. Cognitive Robotics. 4 Units.
Introduces concepts for studying cognitive function by embedding brain models on robotic platforms. Topics include robot construction, computer programming, and the notion of embodiment. Students construct simple robots and program these robots to perform different behaviors.

PSYCH 269. Special Topics in Cognitive Neuroscience. 1.3-4 Units.
Current research in cognitive neuroscience.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
PSYCH 271A. Cognitive Neuroscience Brownbag. 1.3 Unit.
Participants, who include faculty interested in auditory and visual perception/psychophysics, along with interested graduate students, make research presentations and discuss current publications. The seminar also serves as a forum for presentations by visiting researchers.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 271B. Cognitive Neuroscience Brownbag. 1.3 Unit.
Participants, who include faculty interested in auditory and visual perception/psychophysics, along with interested graduate students, make research presentations and discuss current publications. The seminar also serves as a forum for presentations by visiting researchers.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 271C. Cognitive Neuroscience Brownbag. 1.4 Unit.
Participants, who include faculty interested in auditory and visual perception/psychophysics, along with interested graduate students, make research presentations and discuss current publications. The seminar also serves as a forum for presentations by visiting researchers.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

PSYCH 289. Special Topics in Sensation and Perception. 1.3-4 Units.
Current research in the reception and processing of visual and auditory stimuli presented.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

PSYCH 290. Dissertation Research. 1-12 Units.
Dissertation research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.
Restriction: Psychology graduate students only.

PSYCH 299. Individual Study. 4-12 Units.
Individual research with Cognitive Science faculty.

Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Department of Economics

3223 Social Science Plaza B; 949-824-5788
http://www.economics.uci.edu/
Jan K. Brueckner, Department Chair

Economics is concerned with the way individuals or societies allocate scarce resources and distribute goods and services. Any situation requiring choice among competing alternatives can be viewed as an economic problem. Economic courses enable students to study the way individuals make these choices (microeconomics), the way governments make these choices (public choice), and the aggregate consequences of these choices (macroeconomics). In addition, the Economics curriculum addresses international trade, money and banking, and economic development of the less developed nations.

Faculty members in the Department of Economics have research and teaching interests that span a broad range of fields. In addition to strengths in micro theory, macroeconomics, and econometrics (Bayesian and classical), the Department has expertise in many applied fields, including economic history, industrial organization, international economics, labor economics, public choice and public finance, transportation economics, and urban economics. Members of the Department maintain close ties with members of the Department of Political Science, the Department of Statistics, and The Paul Merage School of Business. Members of the Department maintain affiliations with the Center for Economics & Public Policy, Institute for Mathematical Behavioral Sciences, Institute of Transportation Studies, Institute on Global Conflict and Cooperation, Center for the Study of Democracy, and program in International Studies.
Undergraduate Program

The Department offers majors in Economics (p. 1776), Business Economics (p. 1778), and Quantitative Economics (p. 1777), and an optional specialization in International Issues and Economics (p. 1779) is available to students in all three majors. In addition, the Honors Program (p. 1780) in Economics is open to high-achieving students in all three majors. The Department also offers a minor in Economics.

NOTE: Students may complete only one of the three Economics majors.

Admission to the Majors

Freshmen: Preference will be given to those who rank among the highest using the selection criteria as stated in the Undergraduate Admissions section of this Catalogue.

Transfer-Student Applicants: Transfer applicants with the highest grades overall who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one course in microeconomics, one course in macroeconomics, and two semesters/two quarters of approved first-year calculus.

Change of Major: Information about change-of-major requirements, procedures, and policies is available in the School of Social Sciences Undergraduate Student Affairs Office and at the UCI Change of Major Criteria (http://www.changeofmajor.uci.edu) website.

Requirements for the B.A. Degree

All students must meet the University Requirements (p. 71).

All students must meet the School Requirements (p. 1561).

Departmental Requirements for the Major in Economics

This major is designed for students seeking a broad education applicable to occupations in business, law, and government or as preparation for graduate school in the social sciences. School requirements must be met and must include 17 courses as specified below.

A. Lower-division:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 20A-20B</td>
<td>Basic Economics I and Basic Economics II</td>
</tr>
<tr>
<td>MATH 2A-2B</td>
<td>Single-Variable Calculus and Single-Variable Calculus</td>
</tr>
<tr>
<td>MATH 4</td>
<td>Mathematics for Economists</td>
</tr>
</tbody>
</table>

B. Upper-division:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 100A-100B-100C</td>
<td>Intermediate Economics I and Intermediate Economic II and Intermediate Economic III</td>
</tr>
<tr>
<td>ECON 122A</td>
<td>Applied Econometrics I</td>
</tr>
</tbody>
</table>

C. Six additional ECON courses, one of which may be lower-division.

D. A maximum of three four-unit courses selected from ECON 190–199 may be counted toward the major.

Sample Program — Economics Majors

<table>

Departmental Requirements for the Major in Quantitative Economics

The Department strongly urges students to consider the major in Quantitative Economics, which best prepares them for careers in business and finance, for law school, for M.B.A. programs, and for graduate studies in the social sciences. School requirements must be met and must include 19 courses as specified below.

A. Lower-division:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 20A-20B</td>
<td>Basic Economics I and Basic Economics II</td>
</tr>
<tr>
<td>MATH 2A-2B</td>
<td>Single-Variable Calculus and Single-Variable Calculus</td>
</tr>
<tr>
<td>MATH 3A or MATH 6G</td>
<td>Introduction to Linear Algebra or Linear Algebra</td>
</tr>
<tr>
<td>MATH 4</td>
<td>Mathematics for Economists</td>
</tr>
</tbody>
</table>

B. Upper-division:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 105A-105B-105C</td>
<td>Intermediate Quantitative Economics I and Intermediate Quantitative Economics II</td>
</tr>
<tr>
<td>ECON 123A-123B</td>
<td>Econometrics I and Econometrics II</td>
</tr>
<tr>
<td>STATS 120A-120B-120C</td>
<td>Introduction to Probability and Statistics and Introduction to Probability and Statistics</td>
</tr>
</tbody>
</table>

C. Five additional Economics courses, including at least four four-unit upper-division courses and one that satisfies the upper-division writing requirement. The upper-division electives must include two quantitative electives selected from the list below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 107</td>
<td>Economics of Asymmetric Information</td>
</tr>
<tr>
<td>ECON 116A</td>
<td>Game Theory I</td>
</tr>
<tr>
<td>ECON 116B</td>
<td>Game Theory II</td>
</tr>
<tr>
<td>ECON 131A</td>
<td>The Economics of Risk and Uncertainty</td>
</tr>
<tr>
<td>ECON 135</td>
<td>Mathematics of Finance</td>
</tr>
</tbody>
</table>

D. A maximum of three four-unit courses selected from ECON 190–199 may be counted toward the major.

NOTE: Students who are double majoring in Quantitative Economics and Mathematics may (1) substitute MATH 2D-MATH 2E and MATH 3A for MATH 4, (2) substitute an upper-division probability and statistics sequence taught in the Mathematics Department for STATS 120A-STATS 120B-STATS 120C, and (3) substitute three upper-division Mathematics electives for upper-division Economics electives.

Sample Program — Quantitative Economics Majors

<table>
<thead>
<tr>
<th>Semester</th>

</tbody>
</table>
Departmental Requirements for the Major in Business Economics

The Business Economics major is for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. School requirements must be met and must include 20 courses as specified below.

**A. Lower-division:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 20A-20B</td>
<td>Basic Economics I and Basic Economics II</td>
</tr>
<tr>
<td>ECON 25</td>
<td>The Economics of Accounting Decisions</td>
</tr>
<tr>
<td>MATH 2A-2B</td>
<td>Single-Variable Calculus and Single-Variable Calculus</td>
</tr>
<tr>
<td>MATH 4</td>
<td>Mathematics for Economists</td>
</tr>
</tbody>
</table>

**B. Upper-division:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 100A-100B-100C</td>
<td>Intermediate Economics I and Intermediate Economic II and Intermediate Economic III</td>
</tr>
<tr>
<td>ECON 122A-122B</td>
<td>Applied Econometrics I and Applied Econometrics II</td>
</tr>
</tbody>
</table>

**C. Seven additional Economics courses, including at least four four-unit upper-division courses.**

Two of the electives must be selected from following business electives list:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 125</td>
<td>Business Forecasting</td>
</tr>
<tr>
<td>ECON 131A</td>
<td>The Economics of Risk and Uncertainty</td>
</tr>
<tr>
<td>ECON 132A</td>
<td>Introduction to Financial Investments</td>
</tr>
<tr>
<td>ECON 134A</td>
<td>Corporate Finance</td>
</tr>
<tr>
<td>ECON 135</td>
<td>Mathematics of Finance</td>
</tr>
<tr>
<td>ECON 142A</td>
<td>Industrial Organization I</td>
</tr>
<tr>
<td>ECON 142B</td>
<td>Industrial Organization II</td>
</tr>
<tr>
<td>ECON 145L</td>
<td>Economics of Law</td>
</tr>
<tr>
<td>ECON 161A</td>
<td>Money and Banking</td>
</tr>
<tr>
<td>ECON 161B</td>
<td>International Money</td>
</tr>
</tbody>
</table>

And two of electives must be selected from the following management electives list:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 140</td>
<td>Managerial Economics</td>
</tr>
<tr>
<td>ECON 147A</td>
<td>Corporate Governance</td>
</tr>
<tr>
<td>ECON 147B</td>
<td>Economics of Strategy</td>
</tr>
<tr>
<td>ECON 148</td>
<td>Business Decisions</td>
</tr>
<tr>
<td>ECON 115</td>
<td>Behavioral Economics</td>
</tr>
<tr>
<td>ECON 151A</td>
<td>Labor Economics and Human Resources I</td>
</tr>
<tr>
<td>ECON 151B</td>
<td>Labor Economics and Human Resources II</td>
</tr>
</tbody>
</table>
ECON 165  Economics of International Business

D. A maximum of three four-unit courses selected from ECON 190–199 may be counted toward the major.

1 It is strongly recommended that students satisfy the upper-division writing requirement with one of the Economics electives.

Specialization in International Issues and Economics

Students in any of the three Economics majors may complete the specialization in International Issues and Economics. Admission to the specialization requires approval in advance by the Economics Department. The admissions process begins with completing a form at the Department office. This approval should be applied for after the student has completed ECON 20A–ECON 20B, but no later than the end of the junior year.

The specialization requires the completion of the following:

A. Lower-division:

INTL ST 11 Global Cultures and Society
INTL ST 13 Global Economy (or ECON 13)
INTL ST 14 Introduction to International Relations

B. Three upper-division international Economics elective courses selected from the following:

ECON 157 Economic Development
ECON 161B International Money
ECON 162 Poverty, Growth, and Development
ECON 164A The Industrial Revolution in Western Europe
ECON 165 Economics of International Business

C. Three additional international general education elective courses selected from the following:

HISTORY 21A World: Innovations
HISTORY 21B World: Empires and Revolutions
HISTORY 21C World: Wars and Rights
INTL ST 112A International Business
INTL ST 121 Social Ecology of Peace
INTL ST 122 Nuclear Environments
INTL ST 179 Regional Topics in International Studies (if focus is on international economy)
POL SCI 141B International Political Economy
At most, only one lower-division elective may be taken.

Honors Program in Economics
Undergraduates in any of the three Economics majors may complete the Honors Program in Economics. Entry into the program requires a 3.4 GPA or better in upper-division Economics courses and an overall GPA of 3.2 or better. Undergraduates hoping to enter the program must apply no later than the spring quarter of their junior year. Students in the Honors Program must complete an honors thesis and the two-quarter Economics Honors Colloquium (ECON H190A-ECON 190BW; satisfies the upper-division writing requirement).

Economics Minor Requirements
Requirements for the minor in Economics are met by taking nine courses (36 units) as specified below:

A. Core courses (28 units):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 15A-15B</td>
<td>Probability and Statistics in Economics I and Probability and Statistics in Economics II ¹</td>
</tr>
<tr>
<td>ECON 20A-20B</td>
<td>Basic Economics I and Basic Economics II ²</td>
</tr>
</tbody>
</table>

and select one of the following sequences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 100A-100B-100C</td>
<td>Intermediate Economics I and Intermediate Economic II and Intermediate Economic III</td>
</tr>
<tr>
<td>or</td>
<td>ECON 105A-105B-105C</td>
</tr>
</tbody>
</table>

B. Electives (eight units): two upper-division ECON electives (excluding ECON 199). ³

NOTE: Prerequisites for the Economics core courses include MATH 2A-MATH 2B and MATH 4.

¹ MGMT 7 may not be used to substitute for ECON 15A-ECON 15B. Furthermore, students will not received credit for MGMT 7 if taken after ECON 15A-ECON 15B.
² Note that ECON 20A-ECON 20B is a requirement of both the undergraduate major in Business Administration and the Economics minor.
³ As noted in the Economics courses list (click on the "Courses" tab at the top of this page), some courses overlap with upper-division courses offered by The Paul Merage School of Business. Where there is overlap, students may use the course to count toward satisfying the upper-division requirements of the Business Administration major or the Economics minor, but not both.

Graduate Program
The Department of Economics offers a Ph.D. degree program in Economics. Drawing upon the School's strong quantitative tradition, it specializes in public choice (p. 1781), transportation economics (p. 1781), urban economics, econometrics, and applied microeconomics. Admission is highly selective and is limited to students whose interests mesh closely with those of the faculty. By requiring a high degree of overlap between faculty and student research interests, the program offers extensive faculty contact within a tutorial framework. Motivated and well-qualified students find the graduate program highly attractive because of its small size and its great flexibility. Self-discipline and an inquiring mind are prerequisites.

Admission
The deadline for application for admission is January 15 for fall quarter. Students are admitted for winter or spring quarters only under exceptional circumstances. Late applications are considered on a space-available basis. All applicants must take the Graduate Record Exam (GRE) prior to the application deadline. Applicants whose primary language is not English must also submit Test of English as a Foreign Language (TOEFL) scores. To be considered for any financial aid (including a teaching assistantship), students who are not citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council must submit a passing score from the Test of Spoken English (TSE).

Requirements
All students must show competence in the core areas of microeconomics, macroeconomics, and econometrics. This is done by taking the three-quarter required course sequences in microeconomics, macroeconomics, and econometrics, with no grade lower than a B and with a grade point average across these courses of at least 3.25. The Department may also require students to pass a written qualifying exam in one or more of the core course sequences after taking the courses.
Students take the oral candidacy examination based on their research. A well-prepared student should take this oral examination at the end of the second year.

Students also must master two fields of economics by taking a two-course sequence (possibly including independent reading courses) and writing a research paper in each field. Students also must enroll for at least four quarters in the graduate colloquium, in which attendance at regular Economics faculty research colloquia is supplemented by discussion of the papers presented and additional reading. Students are encouraged to become conversant with areas of current economic research early in their graduate careers, in order to facilitate a timely transition from meeting course and field requirements to thinking through a dissertation research plan.

Two or three quarters before the expected completion of the dissertation, the dissertation committee will organize an oral examination of the candidate’s dissertation prospectus. Ordinarily, the prospectus will describe in detail the dissertation, and will typically be accompanied by at least one completed chapter of the dissertation.

Students are expected to complete their dissertation by the end of their fifth year. The maximum time permitted for completion of the Ph.D. is six years.

**Concentration in Transportation Economics**

Students can also pursue a Ph.D. in Economics with a concentration in Transportation Economics. This option draws upon the transportation researchers on the campus within the School of Social Sciences, The Henry Samueli School of Engineering, The Paul Merage School of Business, and the School of Social Ecology. Students benefit from association with the Institute of Transportation Studies, which facilitates student research by providing research assistantships and interdisciplinary seminars on all modes of transportation.

Requirements for the concentration are the same as those described above with the following three exceptions:

1. Instead of the third quarter of microeconomics and macroeconomics, students may substitute specified courses such as Discrete Choice Econometrics (ECON 223A), Travel Demand Analysis I (ENGRCEE 220A), or Management Science (MGMTMBA 201B);
2. One of the student’s two required fields of competence must be transportation economics; the other must be a related field such as urban economics, labor economics, industrial organization, or a transportation-related field from outside economics (such as travel demand and flow theory, urban and transportation policy analysis, environmental impacts of transportation, or urban and transportation planning) subject to the approval of the Director of Graduate Studies for Economics; and
3. Students must take at least one additional course from a list of designated courses in transportation and related subject areas.

**Concentration in Public Choice**

Students can also pursue a Ph.D. degree in Economics with a concentration in Public Choice. This is an interdisciplinary field, at the intersection of Economics and Political Science, which draws on quantitative tools to model the functioning of political institutions. Faculty from the Departments of Economics, Political Science, and Logic and Philosophy of Science and from The Paul Merage School of Business are involved in research that supports the concentration.

Students who elect this concentration are admitted under the normal procedures for the program in Economics and must fulfill all the requirements for the Economics degree with the following modifications:

1. One of the student’s two required fields of competence must be public choice; included is a three-quarter core course in public choice, ECON 270A-ECON 270B-ECON 270C, which is jointly organized by faculty in the Departments of Economics and Political Science. (A background in economic theory is a prerequisite to this sequence.) The requirement for competence in a second field may be met with a one-quarter course, instead of two, if it provides sufficient fluency in the field; and
2. Students must obtain a background knowledge in political science equivalent to that provided by a one-year undergraduate survey course, if they do not already have it.

**Program in Law and Graduate Studies (J.D./Ph.D.)**

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Economics are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Economics. Additional information is available from the PLGS Program Director’s office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs (http://www.law.uci.edu/plgs) website.

**Research Facilities**

UCI is a major research university and has an excellent library that offers in electronic and print formats more than 3.2 million volumes, as well as special interlibrary loan arrangements with the other University of California libraries. The School of Social Sciences provides computer rooms, conference rooms, and offices for graduate students. The Economics Department has a small library with current journals and unpublished working papers from other universities. Students also have access to advanced computing resources as well as PC and UNIX laboratories.

Currently, there are four research units that provide excellent research opportunities for Economics graduate students: the Institute of Transportation Studies, the Center for Research on Information Technology and Organizations, the Institute for Mathematical Behavioral Sciences, and the Center for
Economics & Public Policy (CEPP), established in 2011, which seeks to improve analysis, formulation, and debate on economics-related public policy issues at the international, national, state, and local levels.

Faculty

Neerja Aggarwal, Ph.D. University of California, Irvine, Lecturer of Economics
Frank D. Bean, Ph.D. Duke University, UCI Chancellor's Professor of Sociology; Economics (international migration, demography, racial and ethnic relations, economic sociology, family)
D. Bell, Ph.D. University of California, Berkeley, Professor Emeritus of Economics
Marianne Bitler, Ph.D. Massachusetts Institute of Technology, UCI Chancellor's Fellow and Professor of Economics; Education
Daniel E. Bogart, Ph.D. University of California, Los Angeles, Associate Professor of Economics
William A. Branch, Ph.D. University of Oregon, UCI Chancellor's Fellow and Professor of Economics
David Brownstone, Ph.D. University of California, Berkeley, Professor of Economics
Jan K. Brueckner, Ph.D. Stanford University, Department Chair and Professor of Economics; Planning, Policy, and Design
Michael L. Burton, Ph.D. Stanford University, Professor Emeritus of Anthropology; Economics
Francis A. Cancian, Ph.D. Harvard University, Professor Emeritus of Anthropology; Economics
Jean-Paul Carvalho, Ph.D. Oxford University, Assistant Professor of Economics; Logic and Philosophy of Science
Jiawei Chen, Ph.D. Johns Hopkins University, Associate Professor of Economics
Natalia Chernyshoff, Ph.D. University of California, Davis, Lecturer of Economics
Damon Clark, Ph.D. Oxford University, Assistant Professor of Economics
Arthur S. De Vany, Ph.D. University of California, Los Angeles, Professor Emeritus of Economics
Yingying Dong, Ph.D. Boston College, Assistant Professor of Economics
John Duffy, Ph.D. University of California, Professor of Economics
Greg Duncan, Ph.D. University of Michigan, UCI Distinguished Professor of Education; Economics; Psychology and Social Behavior (economics of education, program evaluation, child development)
Paul Feldstein, Ph.D. University of Chicago, Professor Emeritus of Paul Merage School of Business; Economics
Gordon J. Fielding, Ph.D. University of California, Los Angeles, Professor Emeritus of Economics
Michelle Garfinkel, Ph.D. Brown University, Professor of Economics
Amihai Glazer, Ph.D. Yale University, Professor of Economics
Bernard N. Grofman, Ph.D. University of Chicago, Jack Biltason Chair and Professor of Political Science; Economics
David Hirshleifer, Ph.D. University of Chicago, Paul Merage Chair in Business Growth and Professor of Paul Merage School of Business; Economics
Ivan G. Jeliazkov, Ph.D. Washington University, Associate Professor of Economics; Statistics
Brian C. Jenkins, Ph.D. University of North Carolina at Chapel Hill, Lecturer of Economics
Linda Cohen Jennings, Ph.D. California Institute of Technology, Professor of Economics; School of Law
Philippe Jorion, Ph.D. University of Chicago, Professor of Paul Merage School of Business; Economics
Marek Kaminski, Ph.D. University of Maryland, College Park, Associate Professor of Political Science; Economics
Igor Kopylov, Ph.D. University of Rochester, Associate Professor of Economics; Economics
Raffaele Mari, M.A. San Diego State University, Lecturer of Economics
Michael T. McBride, Ph.D. Yale University, Associate Professor of Economics; Logic and Philosophy of Science
Courses

**ECON 1. Introduction to Economics. 4 Units.**
An analysis of the problems society faces in organizing itself to provide goods and services. How decisions of government, business, and the individual relate to current economic problems such as unemployment, inflation, poverty, and environmental pollution.

Restriction: Non-Economics majors only. ECON 1 may not be taken for credit if taken concurrently or after ECON 20A or ECON 20B.

**ECON 11. The Internet and Public Policy. 4 Units.**
How the Internet works. Current public policy issues concerning the Internet. Introductory economics. Communications law. Interactions between information technology, economics, and law. Case studies about Internet and communications policy.

Same as I&C SCI 11.
ECON 12. Federal Reserve: Past, Present, and Future. 4 Units.
Studies central banking in the United States from colonial times to the present. Focuses on the past, present, and future of the Federal Reserve and precursors to that system, which was established in 1913.

ECON 13. Global Economy. 4 Units.
Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.
Same as INTL ST 13.
Restriction: International Studies, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 15A. Probability and Statistics in Economics I. 4 Units.
An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics. MGMT 7 may not be used to substitute for ECON 15A-ECON 15B.
Prerequisite: MATH 2A and MATH 2B and MATH 4.
Restriction: No credit for MGMT 7 if taken after ECON 15A and ECON 15B. Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 15B. Probability and Statistics in Economics II. 4 Units.
An introduction to probability, statistics, and econometrics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Examples from economics. MGMT 7 may not be used to substitute for ECON 15A-ECON 15B.
Prerequisite: MATH 2A and MATH 2B and MATH 4.
Restriction: No credit for MGMT 7 if taken after ECON 15A OR 15B. Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 17. An Economic Approach to Religion. 4 Units.
Introduction to how basic economic concepts such as demand, supply, consumption, production, competition, free-riding, innovation, regulation, and rent-seeking can be applied to understand observed religious behavior.
Same as REL STD 17.

ECON 20A. Basic Economics I. 4 Units.
The fundamentals of microeconomics. The behavior of firms and consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency. Course may be offered online.
Overlaps with ECON 23.

ECON 20B. Basic Economics II. 4 Units.
The fundamentals of macroeconomics. Government behavior: monetary and fiscal policy, inflation, and unemployment. Effective fall 2006, the content of Economics 20B is macroeconomics. This course cannot be taken to repeat Economics 20B taken prior to fall 2006. Course may be offered online.
Prerequisite: ECON 20A or ECON 13.

ECON 23. Basic Economics for Engineers. 4 Units.
The fundamentals of microeconomics. The behavior of firms and of consumers: markets, supply/demand, utility maximization, resource allocation, and efficiency.
Overlaps with ECON 20A.
ECON 25. The Economics of Accounting Decisions. 4 Units.
Introduction to accounting concepts and principles, including the accounting model and accounting style, transaction analysis, and preparation of financial statements. An analysis of the similarities and differences between accounting and economic concepts (e.g., value, profits).
Prerequisite: ECON 20A.
Overlaps with MGMT 30A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 26A. Managerial Accounting. 4 Units.
An introduction to the fundamentals of management accounting, including the study of terms and concepts, comparisons of different costing systems, analysis of cost-volume profit relationships, preparation of information for planning, control, and evaluation of performance, and decision analysis.
Prerequisite: MATH 2A and MATH 2B and MATH 4.
Overlaps with MGMT 30B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 100A. Intermediate Economics I. 4 Units.
Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.
Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B.
Overlaps with ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 100B. Intermediate Economic II. 4 Units.
Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.
Prerequisite: ECON 100A.
Overlaps with ECON 105B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 100C. Intermediate Economic III. 4 Units.
Determinants of supply and demand; operation of competitive and monopolistic markets; imperfections of the market system, explanations of unemployment, inflation, recessions; public policy for macroeconomic problems.
Prerequisite: ECON 100B.
Overlaps with ECON 105C.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 105A. Intermediate Quantitative Economics I . 4 Units.
An advanced and mathematical version of ECON 100A for students in the Quantitative Economics major.
Prerequisite: ECON 20A and ECON 20B and MATH 2A and MATH 2B and MATH 3A and MATH 4.
Overlaps with ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 105B. Intermediate Quantitative Economics II . 4 Units.
An advanced and mathematical version of ECON 100B for students in the Quantitative Economics major.
Prerequisite: ECON 105A.
Overlaps with ECON 100B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 105C. Intermediate Quantitative Economics III. 4 Units.
An advanced and mathematical version of ECON 100C for students in the Quantitative Economics major.
Prerequisite: ECON 105B.
Overlaps with ECON 100C.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 107. Economics of Asymmetric Information. 4 Units.
Focuses on the effects of asymmetric information in the markets for traditional economic goods and resources, such as labor, insurance, used cars, credit, and in auctions and bargaining problems. Prerequisite:
Prerequisite: ECON 100A or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 109. Special Topics in Economic Theory. 4 Units.
Studies in selected areas of Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 115. Behavioral Economics. 4 Units.
Studies the behavioral and psychological biases in economics settings. Both individual decisions and games are discussed.
Prerequisite: ECON 20A and ECON 20B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 116A. Game Theory I. 4 Units.
Extensive form games with perfect information, and coalitional games. The key solution concepts are Nash Equilibrium, Backward Induction, and the Core. Substantive examples include public good production, oligopoly, electoral competition, auctions, holdup, market entry, and voting.
Prerequisite: ECON 15A and ECON 15B and (ECON 100A or ECON 105A).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 116B. Game Theory II. 4 Units.
Two-quarter sequence on game theory. Bayesian games, extensive form games with imperfect information, zero-sum games.
Prerequisite: ECON 116A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 117. Experimental Economics. 4 Units.
Students will learn what constitutes proper experimental design and what laboratory experiments teach us about human behavior and the economy. Students will participate in a sample experiment, evaluate the results, and discuss experiment design and larger issues.
Prerequisite: ECON 15B and ECON 100B.

ECON 122A. Applied Econometrics I. 4 Units.
Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.
Prerequisite: ECON 15A and (ECON 15B or MATH 130B or MATH 133A or MATH 131C or STATS 120C) and ECON 20B.
Overlap with ECON 123A, ECON 123B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 122B. Applied Econometrics II. 4 Units.
Introduction to econometrics emphasizing practical applications in microeconomics and macroeconomics.
Prerequisite: ECON 122A.
Overlaps with ECON 123B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 122CW. Data Analysis Writing. 4 Units.
Research writing course in econometrics focusing on individual research projects. Students employ econometric analysis to address an economic question in a 20-page paper and present their findings to the class in a short presentation.
Prerequisite: ECON 15A and ECON 15B and ECON 122A and ECON 122B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123A. Econometrics I. 4 Units.
Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.
Prerequisite: (MATH 2A and MATH 2B and MATH 4) or (MATH 3A and STATS 120A and STATS 120B and (STATS 120C or MATH 131C)) and ((ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)).
Overlaps with ECON 122A, ECON 122B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123B. Econometrics II. 4 Units.
Specification, estimation, and testing of econometric models. Applications in various areas of microeconomics and macroeconomics.
Prerequisite: ECON 123A
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123C. Econometrics III. 4 Units.
Seminar course in which students do an original econometric research project.
Prerequisite: ECON 123B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 123CW. Econometrics III. 4 Units.
Seminar course in which students do an original econometric research project.
Prerequisite: ECON 123B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 124. Advances in Econometrics I. 4 Units.
Aims to supplement the training in econometrics for students who have completed either Economics 122A-B or 123A-B-C by covering chapters in the two texts used in these sequences which were not covered.
Prerequisite: (ECON 122A and ECON 122B) or (ECON 123A and ECON 123B).

ECON 125. Business Forecasting. 4 Units.
Students learn how to produce forecasts of the behavior of economic (and other) variables. The techniques examined are linear regression, nonlinear regression, and nonparametric kernel regression, AR, MA, ARMA, ARIMA, and Box-Jenkins.
Prerequisite: ECON 15A and ECON 15B and ECON 20A and ECON 20B.
Overlaps with MGMT 180.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 129. Special Topics in Quantitative Methods. 4 Units.
Studies in selected areas of Quantitative Methods. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 131A. The Economics of Risk and Uncertainty. 4 Units.
The theory of insurance and joint-ownership of risky enterprises; optimal procedures for the allocation of uncertain payoffs.
Prerequisite: ECON 15A and ECON 15B and ((ECON 100A and ECON 100B) or (ECON 105A and ECON 105B) or (MATH 131A and MATH 131B and STATS 120A and STATS 120B and STATS 120C) or (MATH 130B or MATH 133A or MATH 131C)).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 132A. Introduction to Financial Investments. 4 Units.
Modern theories of investment and their application to the study of financial markets. The relation between risk and return, diversification, asset pricing, efficient markets hypothesis, and the market valuation of stocks, bonds, options, and futures.
Prerequisite: (ECON 15A and ECON 15B and ECON 122A and ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C) or (MATH 131A and MATH 131B and STATS 120A and STATS 120B and STATS 120C) or (MATH 130B or MATH 133A or MATH 131C).
Prerequisite or corequisite: ECON 100C or ECON 105C.
Overlaps with MGMT 141.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 134A. Corporate Finance. 4 Units.
Provides an overview of the modern theory and practice of corporate finance and focuses on two fundamental financial decisions; investment as well as financing. Beginning with discounted cash flow analysis, basic theory will be applied to the valuation of stocks.
Prerequisite: ((ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)) and MATH 131A and MATH 131B and STATS 120A and STATS 120B and STATS 120C.
Overlaps with MGMT 109.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 135. Mathematics of Finance. 4 Units.
After reviewing tools from probability, statistics, and elementary differential and partial differential equations, concepts such as hedging, arbitrage, Puts, Calls, the design of portfolios, the derivation and solution of the Blac-Scholes, and other equations are discussed.
Prerequisite: MATH 3A.
Same as MATH 176.
Restriction: Mathematics, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 139. Special Topics in Financial Economics. 4 Units.
Studies in selected areas of Financial Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 140. Managerial Economics. 4 Units.
A collection of concepts and methods for effective decision making. Explores how the tools of microeconomics, including game theory and industrial organization theory, can be used to make better managerial decisions, particularly those involving allocation of resources within firms.
Prerequisite: ECON 100A and ECON 100B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 141B. Public Economics II. 4 Units.
Theory of public goods, externalities, voting models, analysis of bureaucracy, the Tiebout model, income redistribution, intergovernmental grants.
Prerequisite: (ECON 100A and ECON 100B) or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 142A. Industrial Organization I. 4 Units.
The theory of market structure. Imperfect markets, government policies and industry performance.
Prerequisite: (ECON 15A and ECON 15B and ECON 100A and ECON 100B) or (ECON 105A and ECON 105B).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 142B. Industrial Organization II. 4 Units.
Regulation and antitrust theory and performance in industries.
Prerequisite: (ECON 15A and ECON 15B and ECON 100A and ECON 100B) or (ECON 105A and ECON 105B).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 142CW. Industrial Organization III. 4 Units.
Research in industrial organization. Satisfies the honors research requirement.
Prerequisite: ECON 15A and ECON 15B and ECON 122A. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 143. Energy Economics. 4 Units.
The economics of markets for oil, natural gas, electricity, renewable energy and their interactions with each other and the rest of the economy. Effects of government intervention, policy measures, economic policy issues arising between energy use and the environment.
Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 144A. Urban Economics I. 4 Units.
Why cities exist, economics of urban land-use, housing demand and tenure choice, traffic congestion.
Prerequisite: ECON 20A and ECON 20B and ECON 15A and ECON 15B. Recommended: ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 144B. Urban Economics II. 4 Units.
Housing policy analysis, urban public goods and services, crime, pollution, urban amenities.
Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 144CW. Urban Economics III. 4 Units.
Allows students to apply knowledge of urban economics in the conduct of individual research.
Prerequisite: ECON 20A and ECON 20B. Recommended: ECON 100A. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 145. Health Economics. 4 Units.
Considers why some people are healthier than others, why health outcomes differ across countries, the problems of moral hazard and of adverse selection that appear in health insurance, and how hospitals and physicians behave.
Prerequisite: ECON 100A.
ECON 145E. Economics of the Environment. 4 Units.
Surveys economic aspects of natural resources, pollution, population, and the environment. Examines the causes of pollution; analysis of public policies regarding these problems. Emphasis on microeconomic aspects of environmental problems.
Prerequisite: ECON 15A and ECON 15B and ECON 122A and ((ECON 100A and ECON 100B) or ECON 105A).
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 145FW. Economics of the Environment II. 4 Units.
Applications of the tools covered in ECON 145E to such topics as global warming, destruction of the ozone layer, and emissions trading. Emphasis on independent research papers. Syllabus and classes include writing technique.
Prerequisite: ECON 145E and ECON 15A and ECON 15B. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(lb)

ECON 145L. Economics of Law. 4 Units.
Examination of several economic concepts which are useful in understanding legal rules: externalities, the assignment of property rights, and Coase's theorem. Examples are drawn from the fields of pollution control, no-fault insurance, medical malpractice, and product liability.
Prerequisite: (ECON 100A and ECON 100B) or ECON 105A. Prerequisite or corequisite: ECON 100B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 147A. Corporate Governance. 4 Units.
Studies topics in the internal organization of firms, including rent seeking, incentive contracts, principal-agent problems, internal labor markets, contests, and herd behavior.
Prerequisite: ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 147B. Economics of Strategy. 4 Units.
Uses of tools of economics, game theory in particular, to develop an understanding of business decision making. Deals with questions such as how the firm decides what kind of business to be in, how large should it be, and others.
Prerequisite: (ECON 100A and ECON 100B and ECON 100C) or ECON 105A.
Overlaps with MGMT 110, MGMT 168.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 148. Business Decisions. 4 Units.
Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.
Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)).
Same as SOCIOL 138.
Restriction: Sociology majors have first consideration for enrollment.

ECON 149. Special Topics in Economics of Public and Private Organizations. 4 Units.
Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 149W. Special Topics in Economics of Public and Private Organizations. 4 Units.
Studies in selected areas of Economics of Public and Private Organizations. Topics addressed vary each quarter.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 151A. Labor Economics and Human Resources I. 4 Units.
Labor demand, labor supply, human capital, personnel economics, and other topics.
Prerequisite: ECON 15A and ECON 15B and ECON 100A and ECON 100B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 151B. Labor Economics and Human Resources II. 4 Units.
Labor market discrimination, compensating wage differentials, immigration, and other topics.
Prerequisite: ECON 151A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 152A. Economic Anthropology. 4 Units.
Economic systems in comparative perspective: production, distribution, and consumption in market and non-market societies; agricultural development in the third world.
Prerequisite: One course in general science, anthropology, economics, geography, or sociology.
Same as ANTHRO 125A.
Restriction: Economics, Quantitative Economics, Business Economics, and Anthropology majors have first consideration for enrollment.

ECON 153W. Political Institutions, Legal Systems, and Economic Development. 4 Units.
Studies a variety of empirical papers analyzing how institutions affect economic development. The topics include cross-country studies of institutions as well as narrower topics such as corruption, regulation of entry, political connections, and pork barrel politics.
Prerequisite: ECON 15A and ECON 15B and ECON 100A and ECON 100B and ECON 100C and ECON 122A. Satisfactory completion of the lower-division writing requirement.

ECON 154. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.
Same as INTL ST 156A, SOC SCI 121T, POL SCI 151H.
Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

ECON 157. Economic Development. 4 Units.
Considers the process of economic development across the globe and why some countries are rich and others poor. Discusses the major problems facing developing countries, such as population growth, education, capital formation, environmental protection, and international trade.
Prerequisite: ECON 20A and ECON 20B.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 158. Economics of Education. 4 Units.
Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.
Prerequisite: ECON 15A and ECON 100A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 158W. Economics of Education. 4 Units.
Arms students with tools, concepts, and evidence that can be used to analyze complex policy questions in education, enabling students to arrive at their own reasoned judgments about how to improve education.

Prerequisite: ECON 15A and ECON 100A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 159. Special Topics in Economics in Human Resources. 4 Units.
Studies in selected areas of Economics in Human Resources. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 161A. Money and Banking. 4 Units.
Basic elements of money and banking: institutional features and economics of financial markets and, in particular, the U.S. banking system; determinants of interest rates; the Federal Reserve and its role in money supply; effects of money on output and inflation.

Prerequisite: (ECON 100A and ECON 100B) or (ECON 105A and ECON 105B). Prerequisite or corequisite: ECON 100C OR ECON 105C.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 161B. International Money. 4 Units.
Open economy macroeconomics and determination of exchange rates. Asset-market approach to the balance of payments. Internal and external balance in the economy. Macroeconomic policies under fixed and floating exchange rates. The international monetary system and institutions.

Prerequisite: ECON 100A and ECON 100B. Prerequisite or corequisite: ECON 100C.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 161D. Advanced Money and Banking. 4 Units.
Studies business cycles in the United States during the last century. The first portion of the course reviews the theoretical models employed to study economic fluctuations and empirical methods used to measure fluctuations.

Prerequisite: ECON 15A and ECON 15B and ((ECON 100A and ECON 100B and ECON 100C) OR (ECON 105A and ECON 105B and ECON 105C)).

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 162. Poverty, Growth, and Development. 4 Units.
Examines India as a case study for each of the topics studied: growth experience of India along with its poverty eradication record and aspects of poverty and the policies that have been undertaken to tackle poverty.

Prerequisite: ECON 15A and ECON 15B and ECON 100A and ECON 100B and ECON 100C.

ECON 164. American Economic History from Colonization to the Present. 4 Units.
Examines how the American economy evolved from colonization to the post-war era. Topics include relations with foreign countries, the emergence of manufacturing and big business, railroads, slavery, war, the Great Depression, the rise of fiscal and monetary policies.

Prerequisite: ECON 20A and ECON 20B.

ECON 164A. The Industrial Revolution in Western Europe. 4 Units.
How do economists explain the process of economic development during the past three centuries? How has the process of industrialization affected living standards? In focusing on these questions, students will learn how to apply economic theory and quantitative methods.

Prerequisite: ((ECON 100A and ECON 100B and ECON 100C) or (ECON 105A and ECON 105B and ECON 105C)) and ECON 122A and ECON 122B.

Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.
ECON 164AW. The Industrial Revolution in Western Europe. 4 Units.
How do economists explain the process of economic development during the past three centuries? Has the process of industrialization affected living standards? Focusing on these questions, students will learn how to apply economic theory and quantitative methods.

Corequisite: ECON 100C.
Prerequisite: ECON 100C or ECON 105C. Prerequisite or corequisite: ECON 100C. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 165. Economics of International Business. 4 Units.
Students learn to understand and analyze the principal economic issues in the international business arena. Covers topics such as trade theory, foreign direct investment, foreign exchange market, and strategy of international business.

Prerequisite: ECON 100C.

ECON 167. International Trade and Commercial Policy. 4 Units.
Determination of trade flows and the relative prices. Gains from trade, the terms of trade, and income distribution. Imperfect competition and international trade. The effect of tariffs, export subsidies, and import quotas. The effects of free and restricted trade.

Prerequisite: ECON 100A or ECON 105A.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 169. Special Topics in Development Economics. 4 Units.
Studies in selected areas of Development Economics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

ECON 190. Senior Thesis. 4 Units.
Students work with faculty to complete their honors thesis.
Repeatability: May be taken for credit 3 times.

ECON 190BW. Economics Honors Colloquium II. 4 Units.
Colloquium required for honors students in Economics, Quantitative Economics, and Business Economics. Introduces students to independent research. Helps students plan a research program. Students complete their thesis.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement. Must be enrolled in the honors program in Economics.

ECON H190A. Economics Honors Colloquium I. 4 Units.
Colloquium required for honors students in economics, quantitative economics, and business economics. Introduces students to independent research. Helps students plan a research program. Prepares students for thesis writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement. Must be enrolled in the honors program in economics.

ECON 192. Tutoring in Economics. 2 Units.
Enrollment limited to participants in the Economics Peer Tutoring Program. No more than eight units earned in this course may be counted toward the 180 units required for graduation. Satisfies no degree requirement other than contribution to the 180-unit total.
Repeatability: May be taken for credit 4 times.

ECON 197. Field Study. 4 Units.
Not listed in Catalogue.
Repeatability: Unlimited as topics vary.
Restriction: Authorization required or Enrollment by add card only
ECON 198. Directed Group Study. 4 Units.
Not listed in Catalogue.
Repeatability: Unlimited as topics vary.
Restriction: Authorization required or Enrollment by add card only

ECON 199. Independent Study. 1-5 Units.
Independent research with Economics faculty.
Repeatability: May be repeated for credit unlimited times.

ECON 200A. Graduate Colloquium for Economics I. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics graduate students only.

ECON 200B. Graduate Colloquium for Economics II. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.
Prerequisite: ECON 200A.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics graduate students only.

ECON 200C. Graduate Colloquium for Economics III. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors. Supplemented by class discussion of these presentations and other material on current research methodology.
Prerequisite: ECON 200B.
Repeatability: May be repeated for credit unlimited times.
Restriction: Economics graduate students only.

ECON 202. Probability and Statistics. 4 Units.
Provides lectures on probability theory and the beginning of mathematical statistics (continued in ECON 220A-ECON 221A) necessary to prepare students for the required econometrics sequence. Topics include probability, distributions, mathematical expectation, sampling, and point estimation.
Restriction: Graduate students only.

ECON 203A. Mathematics for Economists. 4 Units.
Gives students the mathematical background required for graduate work in economics. Topics covered include multivariate calculus, differential equations, and linear algebra.
Restriction: Graduate students only.

ECON 205A. Research Writing in Economics. 4 Units.
For Economics graduate students who are writing their required research paper in an applied field. How to write an original paper in economics. Guidance for specific papers.
Restriction: Economics graduate students only.

ECON 206. How to Write a Paper. 2 Units.
A course on writing. Also discusses how to make an oral presentation, how to go about doing research, and how academic journals operate. Grade based on two written assignments in which student edits and revises a paper.

ECON 210A. Microeconomic Theory I. 4 Units.
Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.
Restriction: Graduate students only.
ECON 210B. Microeconomic Theory II. 4 Units.
Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210A.
Restriction: Graduate students only.

ECON 210C. Microeconomic Theory III. 4 Units.
Theoretical microeconomics. Emphasis on the meaning and empirical interpretation of theoretical models. Topics include theory of the firm, theory of the market, theory of the consumer, duality theory, application to econometrics, general equilibrium and welfare economics, uncertainty, game theory.

Prerequisite: ECON 210B.
Restriction: Graduate students only.

ECON 210D. Macroeconomic Theory I. 4 Units.
Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Restriction: Graduate students only.

ECON 210E. Macroeconomic Theory II. 4 Units.
Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Corequisite: ECON 211L.
Prerequisite: ECON 210D.
Restriction: Graduate students only.

ECON 210F. Macroeconomic Theory III. 4 Units.
Advanced macroeconomic theory including alternative macroeconomic models, microeconomic foundations of macroeconomics, investment and growth theory, inflation and unemployment, rational expectations and macroeconomic policy, wealth effects, crowding out and fiscal policy, money and interest, open economy models.

Prerequisite: ECON 210E.
Restriction: Graduate students only.

ECON 211L. Macroeconomics Theory II Lab. 2 Units.
Overview of stochastic processes; introduction to dynamic programming; two equilibrium concepts; Ricardian equivalence; real business cycle model; complete versus incomplete markets; asset pricing and the equity premium puzzle.

Corequisite: ECON 210E.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

ECON 219. Special Topics in Economic Theory. 2-4 Units.
Studies in selected areas of Economic Theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 220A. Statistics & Econometrics I. 4 Units.
Covers probability mathematical statistics necessary to prepare students for econometric study and empirical work. Topics include probability theory, distributions, sampling, and classical point estimation. A likelihood perspective is emphasized.

Restriction: Grad students only or Consent of instructor to enroll.
ECON 220B. Statistics & Econometrics II. 4 Units.
Begin with Bayesian point estimation. Then covers interval estimation and hypothesis testing from both classical and Bayesian perspectives, followed by a general discussion of prediction. Finally, all these techniques are applied to the standard linear regression model under ideal conditions, and Generalized Least Squares (GLS) is introduced.

Prerequisite: ECON 220A

Restriction: Prerequisite required and (Grad students only or Consent of instructor to enroll)

ECON 220C. Statistics & Econometrics III. 4 Units.
Begins by relaxing the ideal conditions of the standard regression model. Potential topics include kernel density estimation, instrumental variables (IV), two stage least squares (2SLS), panel data models, and simulation-based Bayesian methods, including Gibbs sampling, the bootstrap, econometric time series, discrete choice and count models, sample selection, and duration models. Covers both Bayesian and classical asymptotic methods.

Prerequisite: ECON 220B and SOC SCI 213A

Restriction: Prerequisite required and Grad students only

ECON 221A. Statistics and Econometrics Laboratory I. 2 Units.
Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220A.

ECON 221B. Statistics and Econometrics Laboratory II. 2 Units.
Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220B.

ECON 221C. Statistics and Econometrics Laboratory III. 2 Units.
Discussion of problems in statistics and econometrics, and their relationships to statistical and econometrics theory. Instruction in the use of computers for applied econometric work.

Corequisite: ECON 220C.

ECON 222. Replication and Applied Economics Writing. 4 Units.
Before the course begins, students choose a published empirical economics article and obtain the necessary data to replicate it. Students will replicate and extend the economic analysis and write a paper describing their work.

Prerequisite: ECON 220A and ECON 220B and ECON 220C.

ECON 223A. Discrete Choice Econometrics. 4 Units.
Specification, estimation, and testing of discrete choice models, with emphasis on cross-sectional and panel data models and applications. Students use computer packages to apply models and techniques to real data.

Prerequisite: ECON 220A and ECON 220B and ECON 220C.

ECON 224A. Time Series Econometrics. 4 Units.
Econometric analysis of time series data. Moving average and autoregressive series, regression analysis, Box-Jenkins techniques, computational methods, and causality conditions.

Prerequisite: ECON 220A and ECON 220B and ECON 220C.

ECON 229. Special Topics in Social Dynamics Seminar. 4 Units.
Studies in selected areas of Social Dynamics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

ECON 231A. Institutions in Historical Perspective I. 4 Units.
Investigates economic and political institutions across the world and throughout history. Focuses on institutions such as property rights, political regimes, regulations, legal systems, corporate organization, and social norms.

Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.
ECON 231B. Institutions in Historical Perspective II. 4 Units.
Investigates economic and political institutions across the world and throughout history. Focuses on institutions such as property rights, political regimes, regulations, legal systems, corporate organization, and social norms.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 232. Business Cycles in Historical Perspective. 4 Units.
Investigates business cycles in the United States and worldwide during the last two centuries. Topics include causes and consequences of business fluctuations, monetary and fiscal policy, models of fluctuations, and empirical macroeconomics.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 233. European Economic History. 4 Units.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 234. American Economic History. 4 Units.
Focuses on American economic history from colonization onwards. Topics include the development of legal systems, transport systems, financial markets, industrialization, migration, technological change, and the consequences of slavery.
Prerequisite: ECON 210A and ECON 210B and ECON 210C and ECON 210D and ECON 210E and ECON 210F.

ECON 239. Special Topics in Financial Economics. 2-4 Units.
Studies in selected areas of Financial Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 241A. Industrial Organization I. 4 Units.
Prerequisite: ECON 100B and ECON 203A.
Restriction: Graduate students only.

ECON 241B. Industrial Organization II. 4 Units.
Prerequisite: ECON 241A and ECON 100B and ECON 203A.
Restriction: Graduate students only.

ECON 241C. Industrial Organization III. 4 Units.
Continuation of the graduate Industrial Organization (IO) sequence. Students are expected to have started a field paper in IO during the earlier quarters, and will finish a completed draft of it during this quarter.
Prerequisite: ECON 241B and ECON 100B and ECON 203A.
Restriction: Graduate students only.

ECON 243A. Game Theory. 4 Units.
A formal introduction to non-cooperative game theory. Topics include properties of Nash Equilibrium and equilibrium refinements, games with imperfect information, and games with incomplete information.
Prerequisite: ECON 210A and ECON 210B and ECON 210C.
Restriction: Graduate students only.
ECON 243B. Advanced Game Theory. 4 Units.
Provides advanced instruction in game theory. The topics covered will be (i) the theory of repeated games and (ii) evolutionary game theory. Applications include bargaining, collusion, reputation, social norms, and the evolution of preferences via natural selection and cultural transmission.
Prerequisite: ECON 243A.
Restriction: Graduate students only.

ECON 245. Empirical Methods in Applied Microeconomics. 4 Units.
Focuses on the empirical methods used in modern applied microeconomics. Teaches methods that can be applied to produce original research in applied fields using cross-sectional and panel data. Applications will be drawn heavily from labor, public, health and development economics.

ECON 249. Special Topics in Microeconomics. 2-4 Units.
Studies in selected areas of Microeconomics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: May be repeated for credit unlimited times.

ECON 251A. Labor Economics I. 4 Units.
Analysis of the relationships between education and the labor market (human capital theory), between resources devoted to education and the return to education (the education production function) and between education and labor market inequality (the theory of skill-biased technical change).
Prerequisite: ECON 203A.
Restriction: Graduate students only.

ECON 251B. Labor Economics II. 4 Units.
Analysis of core topics in labor economics, with an emphasis on empirical methods. Topics may include minimum wages, discrimination, gender, aging and retirement, labor market networks, personnel economics, and employment policy.
Prerequisite: ECON 203A.
Restriction: Graduate students only.

ECON 251C. Labor Economics III. 4 Units.
Discussion of treatment effect/program evaluation in labor economics, emphasizing identification. Classical labor topics, including human capital, technology, wages, labor supply, and migration are discussed in the context of causal inference. A unified framework is used in analyzing identification strategies.
Prerequisite: ECON 203A.
Restriction: Graduate students only.

ECON 255. Microeconomics and Public Policy. 4 Units.
Introduces the fundamental principles of microeconomics that are required for applied policy analysis. Provides students with an intuitive understanding of the microeconomic approach, and familiarizes them with concepts used in applied public policy analysis.
Repeatability: May be taken for credit 2 times.
Same as PUB POL 240.
Restriction: Graduate students only.

ECON 259. Special Topics in Labor Economics. 2-4 Units.
Studies in selected areas of Labor Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 260A. Monetary Economics I. 4 Units.
Focuses on the derivation and estimation of state-of-the-art Dynamic Stochastic General Equilibrium (DSGE) models, with particular emphasis on models useful for monetary policy.

ECON 260B. Monetary Economics II. 4 Units.
Surveys recent issues on monetary policy in uncertain environments. Examines settings where both the policy makers and the private sector are uncertain of future outcomes or the underlying economic structure.
ECON 261A. International Trade I. 4 Units.
Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.

Prerequisite: ECON 210A and ECON 210B.

ECON 261B. International Trade II. 4 Units.
Covers theoretical models, empirical methods, and policy issues in international trade. Following the conventional treatment of the Richardian model, the Heckscher-Ohlin model and the specific factors model, new trade models which incorporate scale economics and imperfect competition will be discussed.

Prerequisite: ECON 261A and ECON 210A and ECON 210B.

ECON 263A. Advanced Macroeconomics I. 4 Units.
Students build Dynamic Stochastic General Equilibrium (DSGE) macroeconomic models from microeconomic foundations. This approach emphasizes intertemporal optimization by firms and households and typically incorporates nominal rigidities such as sluggish price and/or wage adjustment.

ECON 263B. Advanced Macroeconomics II. 4 Units.
Extensively studies policy in dynamic models. Topics: rule versus discretionary-based policy and its implications for macroeconomic stability and multiple equilibria; the design of optimal monetary policy; economic policy with model uncertainty and when the economic model is unknown.

Prerequisite: ECON 263A.

ECON 269. Special Topics in Macroeconomics. 2-4 Units.
Studies in selected areas of Macroeconomics. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

ECON 270A. Political Economy I. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Same as POL SCI 270A.

Restriction: Graduate students only.

ECON 270B. Political Economy II. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: POL SCI 270A.

Same as POL SCI 270B.

Restriction: Graduate students only.

ECON 270C. Political Economy III. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: POL SCI 270B.

Same as POL SCI 270C.

Restriction: Graduate students only.

ECON 272A. Public Economics I. 4 Units.
Covers welfare economics and the theory of optimal taxation. Also presents applications of the theory, including measurement of the distortionary cost of taxation and principles of environmental policy (instrument choice and the debate on the double dividend of environmental taxation).

Prerequisite: ECON 210A and ECON 210B and ECON 210C.
ECON 272B. Public Economics II. 4 Units.
Covers the theory of public goods and models of decentralized provision of such goods, including voluntary provision, voting, bureaucratic provision, and preference revelation mechanisms.
Prerequisite: ECON 210A and ECON 210B and ECON 210C.

ECON 272C. Public Economics III. 4 Units.
Covers two broad categories of government expenditure policies, redistribution programs and social insurance, from a theoretical and empirical perspective as well as the effects on individuals of the income tax system.
Prerequisite: ECON 210A and ECON 210B and ECON 210C.

ECON 279. Special Topics in Political Economy. 2-4 Units.
Studies in selected areas of Political Economy. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

ECON 281A. Urban Economics I. 4 Units.
Economic reasons for the existence of cities, analysis of urban spatial structure, urban sprawl, Third World urbanization, hedonic price analysis, housing tenure choice.
Prerequisite: ECON 210A.

ECON 281B. Urban Economics II. 4 Units.
Housing in the portfolio, land-use controls, rent control, homelessness, neighborhood effects, urban quality-of-life measurement, and subcenters.
Prerequisite: ECON 210A.

ECON 282A. Transportation Economics I. 4 Units.
Applies microeconomic concepts of demand, costs, pricing, investment, and project evaluation to analyze transportation activities. Empirical studies include travel demand using discrete models, and cost functions.
Restriction: Graduate students only.

ECON 282B. Transportation Economics II. 4 Units.
Policy analysis in presence of road transport externalities (such as environmental spill-overs), imperfect instruments, and other economic distortions such as imperfectly priced networks and imperfect competition. Connections of transportation economics with environmental economics, public finance, spatial economics and industrial organization.
Prerequisite: ECON 282A.
Restriction: Graduate students only.

ECON 285A. Colloquium for Transportation Science I. 2 Units.
Selected perspectives on transportation based on the study of human behavior. Organized by Interdisciplinary Program in Transportation Science. Research presentations by faculty, students, and visitors supplemented by class discussion.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECON 285B. Colloquium for Transportation Science II. 2 Units.
Selected perspectives on transportation based on the study of human behavior. Organized by Interdisciplinary Program in Transportation Science. Research presentations by faculty, students, and visitors supplemented by class discussion.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.
ECON 285C. Colloquium for Transportation Science III. 2 Units.
Selected perspectives on transportation based on the study of human behavior. Organized by Interdisciplinary Program in Transportation Science. Research presentations by faculty, students, and visitors supplemented by class discussion.

Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

ECON 289. Special Topics in Urban and Transportation Economics. 2-4 Units.
Studies in selected areas of Urban and Transportation Economics. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: May be repeated for credit unlimited times.

ECON 290. Dissertation Research. 2-12 Units.
Dissertation research with Economics faculty.
Repeatability: May be repeated for credit unlimited times.

ECON 299. Independent Study. 2-4 Units.
Independent research with Economics faculty.
Repeatability: May be repeated for credit unlimited times.

Department of Linguistics

1231 Social & Behavioral Sciences Gateway; 949-824-7161
http://www.linguistics.uci.edu/
Mark P. Petracca, Acting Department Chair

Language is one of the most fundamental human instincts. It is an extraordinarily intricate system which all of us master as young children without special teaching, and which gives us the ability to communicate, tell stories, and express our deepest feelings. Linguistics is the scientific study of human language. It is concerned with understanding the nature of language and our knowledge of it, how we acquire it, and how that knowledge is put to use. It is connected to many other fields of study, including psychology, anthropology, sociology, biology, physics, mathematics, computer science, philosophy, and literature.

The Department offers an undergraduate minor and undergraduate courses.

Linguistics Minor Requirements
Requirements for the minor in Linguistics are met by taking seven linguistics courses (28 units) as specified below:

A.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINGUIS 3</td>
<td>Introduction to Linguistics</td>
</tr>
<tr>
<td>LINGUIS 10</td>
<td>Introduction to Phonology</td>
</tr>
<tr>
<td>LINGUIS 20</td>
<td>Introduction to Syntax</td>
</tr>
</tbody>
</table>

B.

Four additional linguistics courses, three of which must be upper-division.

Residence Requirement: At least three upper-division courses required for the minor must be completed successfully at UCI.

Faculty

Teresa A. Griffith, Ph.D. University of California, Irvine, Lecturer of Linguistics

Gregory S. Hickok, Ph.D. Brandeis University, Professor of Cognitive Sciences; Linguistics

Kent E. Johnson, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Logic and Philosophy of Science; Linguistics

Virginia Mann, Ph.D. Massachusetts Institute of Technology, Professor of Cognitive Sciences; Education; Linguistics

Keith Murphy, Ph.D. University of California, Los Angeles, Assistant Professor of Anthropology; Linguistics
Courses

LINGUIS 1. Languages of the World. 4 Units.
The world has over 6,000 languages, with an exuberant variety of sounds, words, grammars. Introduction to a representative (about eight), drawn from every continent. Students not expected to learn these languages, but rather to explore and study their structure and complexity.

(VIII)

LINGUIS 2. Discovering Language. 4 Units.
Explores language's pervasiveness and diversity; demonstrates ways linguistics illuminates language's crucial--albeit hidden--societal role. Issues: self- and group-identification, language death, language in legal and educational settings. Illustrations: spoken and signed languages, varieties of English, Native American languages.

(VII)

LINGUIS 3. Introduction to Linguistics. 4 Units.
Emphasis on the notion that language is a remarkable achievement of the human mind. Current insights into the nature of language. Survey of various subfields of linguistics. Introduction to linguistic analysis.

(III, Vb)

LINGUIS 10. Introduction to Phonology. 4 Units.
Basic concepts in phonetic description and phonological analysis. Prerequisite: LINGUIS 3.

(III, Vb)

LINGUIS 20. Introduction to Syntax. 4 Units.
Basic concepts in syntactic description and grammatical analysis. Prerequisite: LINGUIS 3.

(III, Vb)

LINGUIS 51. Acquisition of Language. 4 Units.
What children say, what they mean, and what they understand. Theories about the learning of language by one-, two-, and three-year olds. Comparison of kinds of data on which these theories are based.

Same as PSYCH 56L.

(III)

LINGUIS 68. Introduction to Language and Culture. 4 Units.
Explores what the study of language can reveal about ourselves as bearers of culture. After introducing some basic concepts, examines how cultural knowledge is linguistically organized and how language might shape our perception of the world.

Same as ANTHRO 2D.

(III)

LINGUIS 99. Special Topics in Linguistics. 4 Units.
Special Topics at lower-division level.
Repeatability: Unlimited as topics vary.

LINGUIS 100. Grammatical Theory. 4 Units.
Has both a phonology and a syntax component, and forms and bridge between lower-division course offerings and more advanced courses in phonology, syntax, and morphology. Emphasis on development of analytical skills, and evaluation of alternative proposals.

Prerequisite: LINGUIS 10 and LINGUIS 20.
LINGUIS 102. Formal Languages and Automata. 4 Units.
Formal aspects of describing and recognizing languages by grammars and automata. Parsing regular and context-free languages. Ambiguity, nondeterminism. Elements of computability; Turning machines, random access machines, undecidable problems, NP-completeness.

Prerequisite: (I&C SCI 23 or CSE 23 or I&C SCI 46 or CSE 46) and MATH 2A and MATH 2B and I&C SCI 6B and I&C SCI 6D. I&C SCI 23 with a grade of C or better. CSE 23 with a grade of C or better. I&C SCI 46 with a grade of C or better. CSE 46 with a grade of C or better.

Same as COMPSCI 162.

LINGUIS 107M. Computational Methods for Language Research. 4 Units.
Focuses on computational methods useful for language research. Students become familiar with software and programming languages used for extracting information from electronic datasets and for creating basic simulations of linguistic cognition. No prior programming experience assumed.

Prerequisite: PSYCH 155 or LINGUIS 155 or PSYCH 156A or LINGUIS 150.

Same as PSYCH 157M.

Restriction: Psychology majors have first consideration for enrollment.

Concurrent with PSYCH 247M.

LINGUIS 109. Special Topics in Computational Linguistics. 4 Units.
Topics in Computational Linguistics.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

LINGUIS 111. Intermediate Phonology. 4 Units.

Prerequisite: LINGUIS 100.

Concurrent with LINGUIS 211.

LINGUIS 112. Advanced Phonology. 4 Units.
Overview of recent developments in phonological theory.

Prerequisite: LINGUIS 111.

Concurrent with LINGUIS 212.

LINGUIS 119. Special Topics in Phonetics/Phonology. 4 Units.
Topics in Phonetics/Phonology. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

LINGUIS 121. Intermediate Syntax. 4 Units.
Examines various phenomena within a generative theory of syntax, focusing on the nature of syntactic rules, representations, and constraints. Introduces methods of experimental syntax, providing students hands-on opportunity to recognize the connection(s) between theory and experiential results.

Prerequisite: LINGUIS 20.

LINGUIS 124. Current Topics in Syntactic Theory. 4 Units.
Research seminar in syntax. Intensive study of a small number of well-defined topics which have had significant impact on the development of syntactic theory. May be repeated for credit as topic varies.

Repeatability: May be repeated for credit unlimited times.

Concurrent with LINGUIS 224.
LINGUIS 129. Special Topics in Syntax. 4 Units.
Topics in Syntax. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 139. Special Topics in Morphology. 4 Units.
Topics in Morphology. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 141. Topics in Philosophy of Language. 4 Units.
Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.
Repeatability: Unlimited as topics vary.
Same as LPS 145, PHILOS 145.

LINGUIS 149. Special Topics in Semantics. 4 Units.
Topics in Semantics. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 150. Acquisition of Language II. 4 Units.
Focuses on native language learning, exploring the way in which infants and very young children unconsciously uncover the rich systematic knowledge of their native language. Examines both experimental and computational studies that quantitatively investigate the "how" of language acquisition.
Prerequisite: Recommended: PSYCH 56L or LINGUIS 51.
Same as PSYCH 156A.
Restriction: Psychology majors have first consideration for enrollment.

LINGUIS 155. Psychology of Language. 4 Units.
Examines language using the tools of experimental psychology. From sounds to words to spoken and written sentences, explores how language is used in real time, and how its use reveals how it is represented in the mind.
Same as PSYCH 150.
Restriction: Psychology majors have first consideration for enrollment.

LINGUIS 158. Language and the Brain . 4 Units.
Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasias; relation of linguistic capacity to general cognitive capacity, considering research on retardation.
Prerequisite: BIO SCI 35 or BIO SCI N110.
Same as BIO SCI N160, PSYCH 161.
Restriction: Psychology and Biology majors have first consideration for enrollment.

LINGUIS 159. Special Topics in Psycholinguistics. 4 Units.
Topics in Psycholinguistics. May be repeated for credit as topic varies.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
LINGUIS 163B. The Structure of English. 4 Units.

Prerequisite: LINGUIS 3.

LINGUIS 164A. Topics in Romance Languages. 4 Units.
Topics in Romance Languages. May be repeated as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 164B. French Phonetics. 4 Units.
Study of the sound structure of French. Introduction to elements of general phonetics, contrastive (French/English) phonetics, and French phonetics and phonology. Designed to help students improve their pronunciation. Also serves as a preparatory course for language teaching.

Prerequisite: FRENCH 1C.

LINGUIS 169. Special Topics in Language Studies. 4 Units.
Topics in Language Studies. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 172. History of English. 4 Units.
External (historical and social) and internal (linguistic) changes which have affected the English language from its Germanic roots to the present day.

Prerequisite: LINGUIS 3.

LINGUIS 175. Language Origins: Evolution, Genetics, and the Brain. 4 Units.
Examines how human language(s) may have originated. Studies pertinent techniques (reconstruction) and addresses related questions, including Is our language faculty inborn (i.e., genetically encoded)? Can brain imaging and population genetics research help to unlock this mystery of human evolution?

Same as HISTORY 135G, ANTHRO 152A, GLBLCLT 105.

LINGUIS 179. Special Topics in Historical Linguistics. 4 Units.
Topics in Historical Linguistics. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 189. Special Topics in Cognitive Semiotics. 4 Units.
Topics in Cognitive Semiotics. May be repeated for credit as topic varies.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

LINGUIS 198. Directed Group Study. 4 Units.
Directed study with Linguistics faculty. May be repeated for credit as topic varies.

Repeatability: Unlimited as topics vary.

LINGUIS 199. Independent Study. 4 Units.
Independent research with Linguistics faculty. May be repeated for credit as topic varies. Students may enroll for only one 199 each quarter.

Repeatability: May be repeated for credit unlimited times.

Department of Logic and Philosophy of Science

779 Social Science Tower; 949-824-1520
http://www.lps.uci.edu/
Kyle Stanford, Department Chair
The Department of Logic and Philosophy of Science (LPS) brings together faculty and students interested in a wide range of topics loosely grouped in the following areas: general philosophy of science; philosophy of the particular sciences; logic, foundations and philosophy of mathematics; and philosophy of mathematics in application. LPS enjoys strong cooperative relations with UCI's Department of Philosophy; in particular, the two units jointly administer a single graduate program which offers the Ph.D. in Philosophy. LPS also has strong interconnections with several science departments, including Mathematics and Physics, as well as the Francisco J. Ayala School of Biological Sciences, the Donald Bren School of Information and Computer Sciences, the Departments of Cognitive Sciences and Economics, and the graduate concentration in Mathematical Behavioral Sciences.

Graduate Program

The Department of Logic and Philosophy of Science and the Department of Philosophy jointly administer a Ph.D. program in Philosophy with two independent tracks: the Philosophy track and the LPS track. Both tracks begin from a common core of requirements in standard philosophical fields (e.g., history of philosophy, logic, ethics, metaphysics/epistemology) and branch off thereafter; both tracks offer the Ph.D. degree in Philosophy. Applicants are advised to apply to the unit whose faculty, areas of specialization and curriculum correspond best with their interests. Students are expected to reside in the same unit as their primary advisor, but faculty in both units are available for all other academic purposes (course work, independent studies, committee membership, and more). See the Department of Philosophy (p. 938) in the School of Humanities for a description of the Philosophy track.

The M.A. degree in Philosophy may also be awarded to Ph.D. students who complete the necessary requirements.

Admissions

Applicants for the LPS track must have a bachelor's degree, but there is no formal requirement as to the field of that degree. The most natural undergraduate majors for LPS graduate students would be philosophy, mathematics or the sciences, but those with other degrees who are interested in the LPS fields should feel free to apply.

Complete applications must include GRE scores, transcripts, letters of recommendation and a writing sample. The deadline for application is January 15.

Several forms of incoming fellowships are available on a competitive basis; these include a stipend, student fees, tuition and nonresident supplemental tuition (for out-of-state students). In subsequent years, some additional fellowship funding is available, but students in good standing are most often supported with teaching assistantships.

Requirements of the LPS Track

All required courses must be completed with a grade of B or better.

The History of Philosophy Requirement provides a broad perspective. Graduate courses in three out of the following four areas—Modern Rationalism, Modern Empiricism, Kant, and Twentieth Century—must be completed by the end of the seventh quarter in residence.

The Logic Requirement acquaints students with the fundamentals of modern logic: elementary set theory, metalogic, effective procedures and Gödel's incompleteness theorems. LPS 205A, LPS 205B, and LPS 205C must be completed by the end of the seventh quarter in residence.

The Field Requirement provides exposure to a range of philosophical disciplines. One graduate course in moral philosophy and one graduate course in metaphysics/epistemology must be completed by the end of the seventh quarter in residence. (These courses may not also be used to satisfy the History Requirement.)

The Philosophy of Science Requirement provides exposure to a range of philosophy of science, from general philosophy of science to the philosophies of particular sciences (e.g., physics, biology), to the philosophies of mathematics and logic. Three selected courses from LPS 240–247 must be completed by the end of the seventh quarter in residence. (These courses may be repeated as topics vary.) Courses used to satisfy the Philosophy of Science Requirement may also be used to satisfy the History or Field Requirements.

The Tools of Research Requirement provides some flexibility for students with various levels of interest in pursuing the philosophy of a particular science. So, for example, a student most interested in historical issues in the philosophy of mathematics might benefit most from the study of German, while a student most interested in the philosophy of quantum mechanics should take a series of graduate courses in physics. (Students wishing to specialize further in the philosophy of a particular science might wish to pursue more demanding options; see the Mathematics and Physics emphases, below.) To satisfy this requirement, a student must pass an examination on an appropriate foreign language or receive a grade of B or better in three appropriate graduate courses in a discipline or disciplines outside philosophy by the end of the ninth quarter in residence. Though the discipline(s) here must be outside philosophy, they might be taught by Philosophy or LPS faculty. The two-hour language examination will be administered by an LPS faculty member and will require the student to translate (with the aid of a dictionary) a passage or passages from philosophical or scientific authors.

The Portfolio Requirement ensures that students have acquired dissertation-level skills in the writing of philosophy: e.g., the ability to isolate, understand and evaluate arguments in the philosophical literature; the ability to assimilate secondary literature; the ability to formulate and defend an original philosophical thesis. The portfolio is designed to display these skills. To satisfy this requirement, a student must submit an extended writing sample, most often consisting of several individual papers, that demonstrates the skills necessary to write a Ph.D. dissertation. (A successful portfolio typically consists of several papers totaling around 80 pages. These may be revisions of term papers. Each paper should present and defend a definite thesis and should be accessible to faculty members unfamiliar with the literature in question. The papers in the portfolio need not be of publishable quality, but they must, collectively, demonstrate the specified skills.) Portfolios will be evaluated by the entire LPS faculty. (LPS track students may
request that relevant Philosophy Department faculty also be present at the evaluation meeting.) Portfolios must be submitted by the end of the fourth week of the seventh quarter.

The Candidacy Examination demonstrates that the student has a viable dissertation topic and an adequate grasp of related literature. To satisfy this requirement, a student must prepare and be examined on a reading list of canonical literature in the area of the dissertation and a brief (15–20 page) dissertation proposal. The reading list should in effect define the context of the proposed dissertation. The examination must be completed by the end of the tenth quarter in residence. The normative time for advancement to candidacy is 3.3 years.

Dissertation Defense. Students must pass a final oral examination focusing on the content of the dissertation administered by the Dissertation Committee. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years.

LPS Track Emphasis in Mathematics

In addition to the LPS track described above, students may elect to pursue the more demanding option of the Mathematics emphasis. Faculty in the UCI and UCLA Departments of Mathematics participate in the Mathematics emphasis. Students in the emphasis take courses and receive advising from these participating Mathematics professors, as well as from the faculty of LPS and the Philosophy Department. Mathematics emphasis students must satisfy the following requirement in addition to the usual LPS track requirements:

Mathematics Requirement. A student must receive a grade of B or better in six graduate courses in mathematics. (Some of these courses may also be used to satisfy the Tools of Research Requirement.)

LPS Track Emphasis in Physics

In addition to the LPS track described above, students may elect to pursue the more demanding option of the Physics emphasis. Physics emphasis students must satisfy the following requirement in addition to the usual LPS track requirements:

Physics Requirement. A student must receive a grade of B or better in three sections of LPS 241 whose topics are Philosophy of Quantum Mechanics, Geometry and Spacetime, and Probability and Determinism, as well as in three additional graduate courses in Physics or Mathematics. (Students in the Physics Emphasis may also use these courses to satisfy the Tools of Research Requirement, but not the Philosophy of Science Requirement.)

Salzburg Exchange Program

LPS and the Department of Philosophy jointly administer an Exchange Program with the University of Salzburg. The program has two parts. The Scholarly Exchange provides opportunities for faculty and graduate students in LPS and Philosophy to visit Salzburg and for faculty and graduate students from Salzburg to visit one or the other of the UCI units. The Program also sponsors joint conferences, held alternately in Irvine and in Salzburg; these are co-sponsored by Salzburg and the UCI Interdisciplinary Program in the History and Philosophy of Science.

To be eligible for the Salzburg Exchange, a graduate student must have advanced to candidacy. The selected student spends one semester in Salzburg, usually teaching one course in the general area of the thesis topic. An upper-division course may be taught in English, but lower-division courses must be taught in German. (Some previous visitors have learned serviceable German by attending a Goethe institute during the preceding summer.) Typically, a Salzburg visitor will receive a Salzburg Fellowship intended to cover travel expenses, and a stipend; those who teach while in Salzburg will also receive a salary intended to cover living expenses (including health and dental insurance).

Applications from LPS graduate students (including a curriculum vita and syllabi for courses that might be taught) should be sent to the LPS Salzburg Exchange Director by November 1.

Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Logic and Philosophy of Science are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in Logic and Philosophy of Science. Additional information is available from the PLGS Program Director’s office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs (http://www.law.uci.edu/plgs) website.

Faculty

Francisco J. Ayala, Ph.D. Columbia University, Donald Bren Professor and University Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Jeffrey A. Barrett, Ph.D. Columbia University, Professor of Logic and Philosophy of Science; Philosophy

Jean-Paul Carvalho, Ph.D. Oxford University, Assistant Professor of Economics; Logic and Philosophy of Science

Matthew Foreman, Ph.D. University of California, Berkeley, Professor of Mathematics; Logic and Philosophy of Science (ergodic theory and dynamical systems, logic and foundations)
Steven A. Frank, Ph.D. University of Michigan, Professor of Ecology and Evolutionary Biology; Logic and Philosophy of Science

Jeremy Heis, Ph.D. University of Pittsburgh, Associate Professor of Logic and Philosophy of Science; Philosophy

Donald D. Hoffman, Ph.D. Massachusetts Institute of Technology, Professor of Cognitive Sciences; Logic and Philosophy of Science

Simon Huttegger, Ph.D. University of Salzburg, UCI Chancellor's Fellow and Associate Professor of Logic and Philosophy of Science

Kent E. Johnson, Ph.D. Rutgers, The State University of New Jersey, Associate Professor of Logic and Philosophy of Science; Linguistics

Arthur D. Lander, Ph.D. University of California, San Francisco, Donald Bren Professor and Professor of Developmental and Cell Biology; Biomedical Engineering; Logic and Philosophy of Science; Pharmacology (systems biology of development, pattern formation, growth control)

Penelope J. Maddy, Ph.D. Princeton University, UCI Distinguished Professor of Logic and Philosophy of Science; Mathematics; Philosophy (philosophy of mathematics and logic, meta-philosophy)

David B. Malament, Ph.D. The Rockefeller University, Professor Emeritus of Logic and Philosophy of Science

Michael T. McBride, Ph.D. Yale University, Associate Professor of Economics; Logic and Philosophy of Science

James L. McGaugh, Ph.D. University of California, Berkeley, Research Professor and Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science

Richard Mendelsohn, Ph.D. Massachusetts Institute of Technology, Adjunct Professor of Logic and Philosophy of Science

Louis E. Narens, Ph.D. University of California, Los Angeles, Professor of Cognitive Sciences; Logic and Philosophy of Science

Riley D. Newman, Ph.D. University of California, Berkeley, Professor Emeritus of Physics and Astronomy; Logic and Philosophy of Science; Physics and Astronomy

Cailin O'Connor, B.A. Harvard University, Assistant Professor of Logic and Philosophy of Science

Lisa Pearl, Ph.D. University of Maryland, College Park, Associate Professor of Cognitive Sciences; Linguistics; Logic and Philosophy of Science

Donald G. Saari, Ph.D. Purdue University, UCI Distinguished Professor of Economics; Logic and Philosophy of Science; Mathematics (ergodic theory and dynamical systems, mathematics of complex social phenomena)

Barbara W. Sarnecka, Ph.D. University of Michigan, Associate Professor of Cognitive Sciences; Logic and Philosophy of Science

Jonas Schultz, Ph.D. Columbia University, Professor Emeritus of Physics and Astronomy; International Studies; Logic and Philosophy of Science

Brian Skyrms, Ph.D. University of Pittsburgh, UCI Distinguished Professor of Logic and Philosophy of Science; Economics; Philosophy

P. Kyle Stanford, Ph.D. University of California, San Diego, Professor of Logic and Philosophy of Science; Philosophy

Sean P. Walsh, Ph.D. University of Notre Dame, Assistant Professor of Logic and Philosophy of Science; Mathematics (philosophy of mathematics, philosophy of logic and mathematical logic)

James O. Weatherall, Ph.D. Stevens Institute of Technology, Associate Professor of Logic and Philosophy of Science

Kai Wehmeier, Ph.D. University of Münster, Director, Center for the Advancement of Logic, its Philosophy, History, and Applications and Professor of Logic and Philosophy of Science; Philosophy

Norman M. Weinberger, Ph.D. Case Western Reserve University, Professor Emeritus of Neurobiology and Behavior; Logic and Philosophy of Science

Daniel Whiteson, Ph.D. University of California, Berkeley, Associate Professor of Physics and Astronomy; Logic and Philosophy of Science

Martin Zeman, Ph.D. Humboldt University of Berlin, Professor of Mathematics; Logic and Philosophy of Science (logic and foundations)

Courses

LPS 29. Critical Reasoning. 4 Units.

Same as PHILOS 29.

(II, Vb)
LPS 30. Introduction to Symbolic Logic. 4 Units.
An introduction to the symbolism and methods of the logic of statements, including evaluation of arguments by truth tables, the techniques of natural
deduction and semantic tableaux.

Same as PHILOS 30.

(Vb)

LPS 31. Introduction to Inductive Logic. 4 Units.
Philosophical questions concerning the foundations of scientific inference, e.g., the traditional problem of induction, the Goodman paradox, the concept
of cause, Mill’s method of inductive reasoning, probability calculus, different interpretations of probability, and their interaction in inductive reasoning.

Same as PHILOS 31.

(II, Va)

LPS 40. The Nature of Scientific Inquiry. 4 Units.
Investigates the nature, scope, and status of scientific knowledge and the methods used to acquire it. Uses concrete historical examples from a variety
of scientific fields to identify distinctive features of the scientific enterprise and explore their significance.

(II)

LPS 60. The Making of Modern Science. 4 Units.
Surveys the history of science and mathematics since the Scientific Revolution, examining central developments both chronologically and thematically,
as well as investigating their significance for contemporary philosophical debates about the role and status of current scientific theories.

Same as HISTORY 60.

(IV)

LPS H80. Scientific Realism and Instrumentalism. 4 Units.
Explores competing views of the character and status of theoretical knowledge in science, including challenges to and defenses of the view that
contemporary scientific theories offer straightforwardly accurate descriptions of how things stand in otherwise inaccessible domains of nature.

(II)

LPS 100W. Writing Philosophy. 4 Units.
Discussion of those aspects of writing of special importance in philosophy, e.g., philosophical terminology, techniques for evaluating arguments,
philosophical definitions and theories. At least 4,000 words of assigned composition based on philosophical readings.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHILOS 100W.

Restriction: Upper-division students only.

(Ib)

LPS 102. Introduction to the Theory of Knowledge. 4 Units.
A study of one or more of the basic issues in epistemology, e.g., the role of perception in the acquisition of knowledge, the nature of evidence, the
distinction between belief and knowledge, and the nature of truth and certainty.

Same as PHILOS 102.

LPS 104. Introduction to Logic. 4 Units.
Introduction to sentence logic, including truth tables and natural deduction; and to predicate logic, including semantics and natural deduction.

Same as PHILOS 104.

LPS 105A. Elementary Set Theory. 4 Units.
An introduction to the basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations,
functions, ordinal and cardinal numbers.

Same as PHILOS 105A.
LPS 105B. Metalogic. 4 Units.
Introduction to formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Löwenheim-Skolem theorems.

Prerequisite: PHILOS 105A.
Same as PHILOS 105B.
Overlaps with MATH 150.

LPS 105C. Undecidability and Incompleteness. 4 Units.
Introduction to the formal theory of effective processes, including recursive functions, Turing machines, Church's thesis, and proofs of Gödel's incompleteness theorem for arithmetic, and Church's undecidability theorem for first-order logic.

Prerequisite: PHILOS 105B.
Same as PHILOS 105C.
Overlaps with MATH 152.

LPS 106. Topics in Logic . 4 Units.
Selected topics in mathematical or philosophical logic.

Prerequisite: LPS 105B or PHILOS 105B.
Repeatability: Unlimited as topics vary.
Same as PHILOS 106.

LPS 108. Topics in Induction, Probability, and Decision Theory. 4 Units.
Selected topics in induction, probability, and decision theory.

Repeatability: Unlimited as topics vary.
Same as PHILOS 108.

LPS 113. Topics in Modern Philosophy. 4 Units.
Focuses on the works of central philosophical figures of modern Philosophy (e.g., Descartes, Leibniz, Hobbes, Locke, Hume, Kant) or on the treatment of one or more central philosophical problems by a number of these figures.

Repeatability: Unlimited as topics vary.
Same as PHILOS 113.

LPS 115. Topics in History of Analytic Philosophy. 4 Units.
Review of central theories or figures in the history of analytic philosophy. Emphasis on writings of Frege, Russell, Schlick, Carnap, and Quine. Topics include the nature of meaning and truth, the synthetic/analytic distinction, and scientific knowledge.

Repeatability: Unlimited as topics vary.
Same as PHILOS 115.

LPS 120. Topics in Metaphysics. 4 Units.
Examines central philosophical questions concerning our own fundamental nature and that of the world around us (e.g., causation and necessity, determination, free will, personal identity, the mind-body problem).

Repeatability: Unlimited as topics vary.
Same as PHILOS 120.

LPS 121. Topics in the Theory of Knowledge . 4 Units.
One or more topics in the theory of knowledge, e.g., the nature of rational justification, of perceptual knowledge, of a priori knowledge.

Repeatability: Unlimited as topics vary.
Same as PHILOS 121.
LPS H125. What Is Time? . 4 Units.
Engages the question “what is time?” by drawing on physics, philosophy, fiction, film, and psychology. The course is organized around understanding and addressing the tension between time as represented in physics and our immediate temporal experience.

Restriction: Campuswide Honors Program students only.

LPS 140. Topics in Philosophy of Science. 4 Units.
Selected topics in contemporary philosophy of science, e.g., the status of theoretical entities, the confirmation of theories, the nature of scientific explanation.

Repeatability: Unlimited as topics vary.
Same as PHILOS 140.

LPS 140B. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online.

Same as REL STD 112B, PSYCH 172S, SOC SCI 130B.

LPS 141A. Topics in Philosophy of Physics. 4 Units.
Selected topics in the philosophy of physics, e.g., the interpretation of quantum mechanics, the nature of spacetime, the problem of quantum field theories.

Repeatability: Unlimited as topics vary.
Same as PHILOS 141A.

LPS 141B. Geometry and Spacetime. 4 Units.
An examination of the foundations of the special theory of relativity, with emphasis on the geometry of Minkowski spacetime, and its relation to both Euclidean and non-Euclidean (hyperbolic) plane geometries.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G).
Same as PHILOS 141B.

LPS 141C. Philosophy of Quantum Mechanics. 4 Units.
An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Same as PHILOS 141C.

LPS 141D. Probability and Determinism. 4 Units.
An examination of a cluster of interrelated issues concerning probability, determinism, logic, and the foundations of quantum mechanics.

Prerequisite: MATH 2D and (MATH 3A or MATH 6G).
Same as PHILOS 141D.

LPS H141. Honors Philosophy of Quantum Mechanics. 4 Units.
An examination of the standard von Neumann-Dirac formulation of quantum mechanics. The quantum measurement problem is discussed along with several proposed solutions, including GRW, many-worlds, man-minds, and Bohm's theory.

Overlaps with LPS 141C.
Restriction: Campuswide Honors Program students only.

LPS 142. Writing/Philosophy of Biology. 4 Units.
Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.
LPS 142W. Writing/Philosophy of Biology. 4 Units.
Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as PHILOS 142W, BIO SCI E142W.

Restriction: Juniors only.

LPS 143. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.

Repeatability: Unlimited as topics vary.

Same as PHILOS 143, PSYCH 123P.

Restriction: Psychology and Philosophy majors have first consideration for enrollment.

LPS 144. Topics in Philosophy of Social Science. 4 Units.
Selected topics in the philosophy of the social sciences, e.g., is their goal to understand behavior or to predict and control it?; are they normative and the natural sciences not?; do they incorporate philosophical doctrines about language and mind?.

Repeatability: Unlimited as topics vary.

Same as PHILOS 144.

LPS 145. Topics in Philosophy of Language. 4 Units.
Selected topics in the philosophy of language, e.g., the nature of meaning, mechanisms of reference, speech acts.

Repeatability: Unlimited as topics vary.

Same as PHILOS 145, LINGUIS 141.

LPS 146. Topics in Philosophy of Logic. 4 Units.
Selected topics in the philosophy of logic, e.g., the nature of logical truth and our knowledge of it, the status of propositions, definite descriptions, and existential presuppositions.

Repeatability: Unlimited as topics vary.

Same as PHILOS 146.

LPS 147. Topics in Philosophy of Mathematics. 4 Units.
Selected historical and contemporary topics in the philosophy of mathematics, e.g., mathematical truth and ontology, mathematical knowledge, the nature and role of proof, the workings of mathematics in application.

Repeatability: Unlimited as topics vary.

Same as PHILOS 147.

LPS 199. Independent Study. 1-4 Units.
Independent research with Logic and Philosophy of Science faculty.

Repeatability: May be taken for credit for 12 units.

LPS 200. Topics in Logic and Philosophy of Science. 4 Units.
Studies in selected areas of Logic and Philosophy of Science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

LPS 205A. Set Theory. 4 Units.
The basic working vocabulary of mathematical reasoning. Topics include: sets, Boolean operations, ordered n-tuples, relations, functions, ordinal and cardinal numbers.

Same as PHILOS 205A.
LPS 205B. Metalogic. 4 Units.
Formal syntax (proof theory) and semantics (model theory) for first-order logic, including the deduction, completeness, compactness, and Loewenheim-Skolem theorems.
Prerequisite: PHILOS 205A or LPS 205A.
Same as PHILOS 205B.

LPS 205C. Undecidability and Incompleteness. 4 Units.
Formal theory of effective processes, including recursive function, Turing machines, Church's thesis, and proofs of Goedel's incompleteness theorem for arithmetics, and Church's undecidability for first-order logic.
Prerequisite: PHILOS 205B or LPS 205B.
Same as PHILOS 205C.

LPS 206. Topics in Logic. 4 Units.
Studies in selected areas of logic. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 206.

LPS 213. Topics in Modern Philosophy. 4 Units.
Studies in selected areas of modern philosophy. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 213.

LPS 215. Topics in Analytic Philosophy. 4 Units.
Studies in selected areas of analytic philosophy. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 215.

LPS 220. Topics in Metaphysics. 4 Units.
Studies in selected areas of metaphysics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 220.

LPS 221. Topics in Epistemology. 4 Units.
Studies in selected areas of epistemology. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 221.

LPS 232. Topics in Political and Social Philosophy. 4 Units.
Studies in selected areas of political and social philosophy. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 232.

LPS 240. Topics in Philosophy of Science. 4 Units.
Studies in selected areas of philosophy of science. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 240.
LPS 241. Topics in Philosophy of Physics. 4 Units.
Studies in selected areas of philosophy of physics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 241.

LPS 242. Topics in Philosophy of Biology. 4 Units.
Studies in selected areas of philosophy of biology. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 242.

LPS 243. Topics in Philosophy of Psychology. 4 Units.
Selected topics in the philosophy of psychology, e.g., the nature of psychological explanation, reductionism, issues in cognitive, behavioral, and neuroscience.
Repeatability: Unlimited as topics vary.
Same as PHILOS 243, PSYCH 231P.

LPS 244. Topics in Philosophy of Social Science. 4 Units.
Studies in selected areas of philosophy and social science. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 244.

LPS 245. Topics in Philosophy of Language. 4 Units.
Studies in selected areas of philosophy of language. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 245.

LPS 246. Topics in Philosophy of Logic. 4 Units.
Studies in selected areas of philosophy of logic. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 246.

LPS 247. Topics in Philosophy of Mathematics. 4 Units.
Studies in selected areas of philosophy of mathematics. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Same as PHILOS 247.

LPS 289. Logic and Philosophy of Science Workshop. 1-4 Units.
A two- or three-quarter-long workshop on selected topics in logic and philosophy of science.
Grading Option: Satisfactory/unsatisfactory only.
Repeatability: May be repeated for credit unlimited times.

LPS 298. Independent Study. 4-12 Units.
Independent research with Logic and Philosophy of Science Faculty.
Repeatability: May be taken for credit for 12 units.

LPS 299. Directed Research. 1-12 Units.
Directed study with Logic and Philosophy of Science Faculty.
Repeatability: May be repeated for credit unlimited times.
LPS 399. University Teaching. 4-12 Units.
Required of and limited to Teaching Assistants.
Repeatability: May be taken for credit for 12 units.

Department of Political Science

5229 Social Science Plaza B; 949-824-5361
http://www.polisci.uci.edu/
Keith L. Topper, Department Chair

The Department of Political Science offers a wide variety of courses at the introductory, lower-division and more specialized upper-division levels. Courses in both micropolitics (individual and group politics) and macropolitics (politics at the state and international levels) are offered. The curriculum is organized into five areas: American politics and society, political theory, international relations, comparative politics and public law. The department also offers an Honors Program in Political Science for juniors and seniors, culminating in a senior honors thesis.

The department is composed of a strong and diverse faculty especially interested in analyzing central questions of political science related to such topics as policy-making, political structures, participation, conflict, change and development, power and authority, and interstate relations. The faculty has particular strength in interdisciplinary approaches, in comparative analysis, and in the application of quantitative data to political science issues.

Undergraduate Program

Requirements for the B.A. Degree in Political Science

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1561).

Departmental Requirements for the Major

School requirements must be met and must include 12 courses (48 units) as specified below:

I. Select four lower-division (one or two digit) POL SCI courses below. One must be the introductory course for the module selected under II below.

| POL SCI 6A | Introduction to Political Science: Political Analysis |
| POL SCI 6B | Introduction to Political Science: Macropolitics |
| POL SCI 6C | Introduction to Political Science: Micropolitics |
| POL SCI 21A | Introduction to American Government |
| POL SCI 31A | Introduction to Political Theory |
| POL SCI 41A | Introduction to International Relations |
| POL SCI 51A | Introduction to Politics Around the World |
| POL SCI 61A | Introduction to Race and Ethnicity in Political Science |
| POL SCI 71A | Introduction to Law |

Complete any one additional lower-division POL SCI course (not used above) (4 units)

II. Seven upper-division POL SCI courses (28 units) chosen from among the POL SCI modules numbered 120–179. Three of these courses must be from one module.

American Politics and Government (POL SCI 120-129)
Political Theory and Methods (POL SCI 130-139)
International Relations (POL SCI 140-149)
Comparative Politics (POL SCI 150-159)
Public Law (POL SCI 170-179)

Honors Program in Political Science

The Honors Program in Political Science is open to all senior political science majors who meet the minimum academic qualifications (3.5 GPA in political science courses and 3.2 GPA overall). Students submit an application to the department office before the end of their junior year. In addition to satisfying the requirements for the major in political science, honors program participants must complete additional course work as specified below.

During the year prior to the year in which the thesis will be written, a prospective honors program student should identify a Department of Political Science faculty member who is willing to supervise the student’s thesis. Students are ordinarily expected to take an upper-division political science course or a POL SCI 199 Independent Study course with the advisor prior to their senior year.

During their senior year, students must enroll in the Honors Thesis Workshop (POL SCI H182A), offered during the fall quarter. This course is in addition to the 7 upper division courses required for the regular major. Honors students also enroll in three quarters of the senior thesis course (POL SCI 190) with their advisor, which are independent study courses for writing the thesis. The POL SCI 190 courses do not count toward the upper division political
sciences courses required for the major although they are counted as "other" upper division social science courses towards graduation requirements. Students write their senior thesis, which is designed and completed under their faculty advisor's supervision. Upon successful completion of the program, including approval of their senior honors thesis by the faculty advisor and a GPA of at least 3.5 in their political science courses, the students will graduate with honors in Political Science and their transcripts note that they were in the Honors Program in Political Science.

**Political Science Minor Requirements**

Requirements for the minor in Political Science are met by taking seven political science courses (28 units) as specified below:

A. Select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL SCI 6A</td>
<td>Introduction to Political Science: Political Analysis</td>
</tr>
<tr>
<td>POL SCI 6B</td>
<td>Introduction to Political Science: Macropolitics</td>
</tr>
<tr>
<td>POL SCI 6C</td>
<td>Introduction to Political Science: Micropolitics</td>
</tr>
</tbody>
</table>

B. Three upper-division POL SCI courses, chosen from one POL SCI module.

C. Select three courses from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL SCI 6A</td>
<td>Introduction to Political Science: Political Analysis</td>
</tr>
<tr>
<td>POL SCI 6B</td>
<td>Introduction to Political Science: Macropolitics</td>
</tr>
<tr>
<td>POL SCI 6C</td>
<td>Introduction to Political Science: Micropolitics</td>
</tr>
<tr>
<td>POL SCI 20–79</td>
<td></td>
</tr>
<tr>
<td>POL SCI 120–179</td>
<td></td>
</tr>
</tbody>
</table>

**Graduate Program**

The Department of Political Science offers a Ph.D. degree program in Political Science. The department has attained a reputation for producing the very best innovative and interdisciplinary scholarship. Faculty are engaged in the study of such key questions as the politics of advanced and democratizing societies, international cooperation and peace, the politics of racial and ethnic minority groups, and the origins of altruism and morality and their impact on world politics.

Graduate students can pursue concentrations in public choice (p. 1817) and political psychology (p. 1817) and specializations in democracy studies, international relations, and race and minority politics. The Ph.D. program offers big payoffs to graduate students, in fact, because of the extended range of inquiry an interdisciplinary program affords.

Political science faculty members are regular participants in and help direct several research units on campus. The Center for the Study of Democracy, an Organized Research Unit at UCI, sponsors research and education aimed at improving the democratic process in the United States and expanding democracy around the world. The UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality explores questions concerning the origins and causes of morality. The Center for Global Peace and Conflict Studies (CGPACS), housed in the School of Social Sciences, is a multidisciplinary program dedicated to promoting scholarly, student and public understanding of international conflict and cooperation. The Institute for Mathematical Behavioral Sciences, also located in the School of Social Sciences, offers opportunities for participation in ongoing faculty research, notably with faculty members engaged in fields of public choice and political economy.

**Admissions**

The deadline for application for fall quarter admission is January 15. Students are admitted for winter or spring quarters only under exceptional circumstances. Additional information is available in the general section on admission to social science graduate programs. Please note especially the required examinations.

**Requirements**

During the first two years in the doctoral program, students must complete three of the following five seminars: Field Seminar in American Politics, Field Seminar in Comparative Politics, Field Seminar in International Relations, Field Seminar in Political Theory, and Foundations of Political Science. Prior to advancement to Ph.D. candidacy, doctoral students must complete two fields of study, one of which must come from the following list: American Politics, Comparative Politics, International Relations, or Political Theory. Each student must complete a second field, which may come (1) from one of the four listed above; (2) from an area of faculty strength, such as democracy studies, political psychology, public choice, race and ethnicity, or public law; or (3) from a specialized area of interdisciplinary study. If the student chooses the specialized area of interdisciplinary study (3), this area must be approved by the student’s advisor and the graduate committee. Students must complete three–five courses in their first field and three–five courses in their second field. The precise number is to be determined in each field by the field faculty. The field seminar in each field counts as one of the required courses.

Students are expected to have successfully completed course work resulting in knowledge of basic introductory statistics. Students who do not have this preparation must acquire the equivalent background during their first or second year in graduate school. Undergraduate statistics courses are considered to be remedial, and thus will not count toward graduate course credit needed for the Ph.D. Competence in a foreign language is required. Students may substitute mastery of an advanced research skill or an advanced qualitative skill in place of a foreign language. To acquire such a quantitative skill (which could involve course work in such disciplines as economics, mathematics and computer science, or statistics), students must
complete at least one year of upper-level, undergraduate course work in mathematics, economics, or computer science or one year in graduate-level statistics beyond the required minimum of two quarters of introductory statistics. To acquire a qualitative skill, students must complete at least one year of graduate-level course work in qualitative or interpretative research methods. A student electing to meet the foreign language requirement should select a foreign language which is useful for research in his or her dissertation or in which there is a substantial body of scholarly literature.

**Reviews and Examinations**

Students ordinarily are expected to maintain a grade point average of 3.5 or better. At the completion of the first year, a review of performance in the graduate program will be conducted for each student by the political science faculty.

Students must complete two qualifying papers. The first qualifying paper must be completed and approved by the end of the winter quarter of a student’s second year in the program; the second qualifying paper must be completed and approved by the winter quarter of a student’s third year in the program. There must be two faculty readers on each qualifying paper, and only one faculty reader may serve as a reader on both papers. Upon successful completion of these papers and demonstration of competence in a foreign language, mastery of an advanced quantitative skill, or an advanced qualitative skill, a candidacy committee is appointed to oversee the qualifying examination and the formal advancement to candidacy. Students are expected to advance to candidacy by the end of their eighth quarter in the Ph.D. program. All students must pass the advancement to candidacy examination by the end of the tenth quarter in the Ph.D. program.

After the student advances to candidacy, the doctoral committee, usually composed of three members of the candidacy committee, reviews a dissertation prospectus and supervises work toward completion of the dissertation. Within six months of the oral qualifying examination (the formal advancement to candidacy), students are expected to meet with their doctoral committee, in order to discuss with the members a dissertation prospectus.

The normative time for completion of the Ph.D. is six years, and the maximum time permitted is seven years.

**Concentration in Public Choice**

Public choice is an interdisciplinary field, at the intersection of political science and economics, which draws on sophisticated quantitative tools to model the functioning of political institutions. Public choice examines such areas as theories of voter and party choice; the theory of constitutions; the theory of committees and elections; models of regulation; problems of public goods and externalities; rent-seeking models; and issues in social choice, social welfare, and demand revelation.

This concentration is administered by an interdisciplinary committee of faculty from the Departments of Political Science and Economics. Students who elect this concentration are admitted under the normal procedures for the program in political science and must fulfill all the requirements for the political science degree, with the following modifications:

1. Students must complete the three-quarter core sequence in public choice, which is taught jointly by political science and economics faculty. This sequence is usually taken in the student’s second or third year.

2. Students must complete three additional graduate-level, four-unit courses in related fields with the consent of their graduate advisor, chosen from a set of courses designated by the interdisciplinary committee. The courses chosen are to be tailored to the individual interests and academic background of the student and usually will include at least two economics courses (such as Econometrics, Game Theory, and Law and Economics) and one political science course (such as those on electoral systems, party systems, constitutions, courts).

3. Students are expected to write their dissertation on a topic related to public choice. Usually the dissertation advisor will be a political science member of the interdisciplinary committee.

**Concentration in Political Psychology**

The last two decades have seen an explosion of interest in the field of political psychology. UCI’s graduate concentration is part of this development, but enjoys a rather distinctive place. The concentration offers students a broader education than is typically available at other institutions. In this vein, the program aims to provide (1) a strong background in both political science and psychology; (2) an emphasis on theoretical and conceptual issues as well as empirical and methodological ones; and (3) a familiarity with research being done outside of the United States as well as within it.

In this context, a number of research concerns central to the participating faculty are considered, including social change and democratization, ideology, altruism, social and political identity, public policy, community building, mass media effects, voting behavior, and international integration. Believing in academic community, the concentration’s sponsoring faculty offer a host of activities including colloquia, reading groups and joint research opportunities to facilitate contact between students and faculty and among the students themselves.

**Requirements.** The purpose of the concentration is to provide a course of study which supplements the Ph.D. degree in political science. Therefore, students are required to complete all degree requirements for the Ph.D. stipulated by the Department of Political Science. As part of or in addition to these requirements, students must take five courses: Introduction to Political Psychology I and II (POL SCI 285A and POL SCI 285B), and three graduate psychology courses which provide a strong background in psychology (selected from an approved group which includes courses such as Personality in Development, Society and Pathology, Personality Assessment, Proseminar in Cognitive Science, and Human Information Processing). These courses are taught in the Department of Cognitive Sciences in the School of Social Sciences and the Department of Psychology and Social Behavior in the School of Social Ecology.
Program in Law and Graduate Studies (J.D./Ph.D.)

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in political science are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Ph.D. degree in political science. Additional information is available from the PLGS program director’s office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs (http://www.law.uci.edu/plgs) website.

Faculty

Edwin Amenta, Ph.D. University of Chicago, Professor of Sociology; Political Science (political sociology, historical and comparative sociology, social movements, social policy)

Mohammad Amjad, Ph.D. University of California, Riverside, Lecturer of Political Science

Matthew N. Beckmann, Ph.D. University of Michigan, Associate Professor of Political Science

Graeme T. Boushey, Ph.D. University of Washington, Assistant Professor of Political Science

Daniel R. Brunstetter, Ph.D. University of California, Davis, Associate Professor of Political Science; European Languages and Studies (political theory, international relations, French political thought)

Alejandro E. Camacho, LL.M. Georgetown University, Professor of School of Law; Political Science

David O. Carter, J.D. University of California, Los Angeles, Lecturer of Political Science

Erwin Chemerinsky, J.D. Harvard University, Dean of the School of Law, Raymond Pryke Endowed Chair in First Amendment Law and Professor of School of Law; Political Science

Russell Dalton, Ph.D. University of Michigan, Professor of Political Science; European Languages and Studies; Political Science

James N. Danziger, Ph.D. Stanford University, Professor Emeritus of Political Science

Louis Desipio, Ph.D. University of Texas at Austin, Professor of Chicano/Latino Studies; Political Science

David Easton, Ph.D. Harvard University, UCI Distinguished Professor of Political Science

David Feldman, Ph.D. University of Missouri-Columbia, Professor of Planning, Policy, and Design; Political Science

Martha S. Feldman, Ph.D. Stanford University, Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Planning, Policy, and Design; Paul Merage School of Business; Political Science; Sociology

Mark J. Fisher, M.D. University of Cincinnati, Professor of Neurology; Anatomy and Neurobiology; Political Science

David J. Frank, Ph.D. Stanford University, Professor of Sociology; Education; Political Science (globalization, sexuality, the natural environment, higher education)

Lewis A. Froman, Ph.D. Northwestern University, Professor Emeritus of Political Science

Howard A. Gillman, Ph.D. University of California, Los Angeles, Provost and Interim Chancellor and Professor of Political Science; Criminology, Law and Society; History; School of Law

Sara Goodman, Ph.D. Georgetown University, Assistant Professor of Political Science

Bernard N. Grofman, Ph.D. University of Chicago, Jack Peltason Chair and Professor of Political Science; Economics

Richard L. Hasen, J.D. University of California, Los Angeles, UCI Chancellor's Professor of School of Law; Political Science

Marek Kaminski, Ph.D. University of Maryland, College Park, Associate Professor of Political Science; Economics

Pamela A. Kelley, J.D. Yale University, Lecturer of Political Science

Claire J. Kim, Ph.D. Yale University, Associate Professor of Asian American Studies; Culture and Theory; Political Science

Cecelia M. Lynch, Ph.D. Columbia University, Professor of Political Science

Anthony J. McGann, Ph.D. Duke University, Associate Professor of Political Science

Carrie Menkel-Meadow, J.D. University of Pennsylvania, UCI Chancellor’s Professor of Political Science; School of Law
David S. Meyer, Ph.D. Boston University, Professor of Sociology; Planning, Policy, and Design; Political Science (social movements, public policy, peace and war, social justice)

Kristen R. Monroe, Ph.D. University of Chicago, UCI Chancellor's Professor of Political Science

Patrick M. Morgan, Ph.D. Yale University, Professor Emeritus of Political Science

Kevin E. Olson, Ph.D. Northwestern University, Associate Professor of Political Science; Culture and Theory (contemporary European political theory, cultural politics, politics of diversity, popular sovereignty, citizenship, nineteenth- and twentieth-century political theory)

Jack W. Peltason, Ph.D. Princeton University, Professor Emeritus of Political Science

Mark P. Petracca, Ph.D. University of Chicago, Associate Professor of Political Science; Planning, Policy, and Design

Bojan M. Petrovic, Ph.D. University of California, Irvine, Lecturer of Social Sciences; Political Science

M. Ross Quillian, Ph.D. Carnegie Mellon University, Professor Emeritus of Political Science

Shawn W. Rosenberg, M.S. Oxford University, Professor of Political Science; Psychology and Social Behavior (political psychology, deliberative democracy, ideology, social theory, social and development psychology)

Kamal Sadiq, Ph.D. University of Chicago, Associate Professor of Political Science

William R. Schonfeld, Ph.D. Princeton University, Professor Emeritus of Political Science

Carl E. Schwarz, Ph.D. University of California, Santa Barbara, Lecturer of Political Science; International Studies

Sherilyn K. Sellgren, MB.A. University of California, Irvine, Lecturer of Political Science

Caesar D. Sereseres, Ph.D. University of California, Riverside, Associate Professor of Political Science

Charles Smith, Ph.D. University of California, San Diego, Associate Professor of Political Science

Etel Solingen, Ph.D. University of California, Los Angeles, Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies and Professor of Political Science

Dorothy J. Solinger, Ph.D. Stanford University, Professor of Political Science

Rein Taagepera, Ph.D. University of Delaware, Professor Emeritus of Political Science

Gary B. Thom, Ph.D. Yale University, Professor Emeritus of Political Science

Keith Topper, Ph.D. University of California, Los Angeles, Associate Professor of Political Science; Culture and Theory (political theory, critical theory, poststructuralism, theories of power, language and politics, theory and politics of interpretation, politics of culture, philosophy of the social sciences)

Carole J. Uhlaner, Ph.D. Harvard University, Associate Professor of Political Science; Economics

Robert M. Uriu, Ph.D. Columbia University, Associate Professor of Political Science

Martin P. Wattenberg, Ph.D. University of Michigan, Professor of Political Science

Christopher A. Whytock, J.D. Georgetown University, Professor of School of Law; Political Science

Courses

POL SCI 6A. Introduction to Political Science: Political Analysis. 4 Units.

Presents various modes of understanding politics. Emphasis on basic approaches to political analysis, their uses in constructing theories, and their application to particular national political systems.

(III, VIII)

POL SCI 6B. Introduction to Political Science: Macropolitics. 4 Units.

An overview of macro-political inquiry, emphasizing the various determinants of political life in a political community. We also explore the origins and challenges of democratic governance focusing on the tension between liberty and equality in a democratizing nation.

(III)
POL SCI 6C. Introduction to Political Science: Micropolitics. 4 Units.
Introduction to political behavior of individuals and groups within national systems. Three questions addressed: How do individuals come to understand the political world? How do individuals behave within this world? How do groups and individuals engage in the political process.

(III)

POL SCI 10A. Probability and Statistics in Political Science I. 4 Units.
Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Prerequisite: SOC SCI 3A.

Overlaps with ANTHRO 10A, ECON 15A, PSYCH 10A, SOCECOL 13, SOC SCI 9A, SOCIOL 10A.

Restriction: Lower-division students only.

(Va)

POL SCI 10B. Probability and Statistics in Political Science II. 4 Units.
Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests.

Prerequisite: POL SCI 10A.

Overlaps with ANTHRO 10B, ECON 15B, PSYCH 10B, SOCECOL 13, SOC SCI 9B, SOC SCI 10B.

(Va)

POL SCI 10C. Probability and Statistics in Political Science III. 4 Units.

Prerequisite: POL SCI 10B.

Overlaps with ANTHRO 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOC SCI 10C, SOCIOL 10C.

(Vb)

POL SCI 21A. Introduction to American Government. 4 Units.
Introduction to American political processes and institutions. Topics include elections, political participation, parties, interest groups, the Presidency, Congress, the bureaucracy, and the judiciary. Course may be offered online.

(III)

POL SCI 29. Special Topics in American Politics. 4 Units.
Studies in selected areas of American politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

POL SCI 31A. Introduction to Political Theory. 4 Units.
Types of questions: What is politics? What are the theoretical and philosophical bases for different types of political arrangements? How do these perspectives get translated into reality? Among others, the works of Rousseau, Locke, Mill, and Marx are read.

(III)

POL SCI 39. Lower-Division Special Topics in Political Theory. 4 Units.
Studies in selected areas of political theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.
POL SCI 41A. Introduction to International Relations. 4 Units.
Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined. Course may be offered online.

Same as INTL ST 14.

Restriction: International Studies and Political Science majors have first consideration for enrollment.

(III, VIII)

POL SCI 43D. Global Security and Cooperation. 4 Units.
Examination of global conflict and cooperation since World War II, and future prospects. The Cold War, nuclear arms race, regional conflicts, arms proliferation and control, deterrence theory, psychology of conflict, governmental and nongovernmental efforts to promote global peace and cooperation.

(VIII)

POL SCI 44A. Global Issues and Institutions. 4 Units.
Surveys recent developments in the nature of global interdependence. Examines the major political, economic, and military conflicts of this century and recent problems of population growth, environmental decay, ethnic/national antagonism and violence, and post-Cold War politics.

(III, VIII)

POL SCI 49. Lower-Division Special Topics in International Relations. 4 Units.
Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

POL SCI 51A. Introduction to Politics Around the World. 4 Units.
Introduces comparative politics. Compares political systems in a variety of countries. Includes elections, parties, parliaments, presidents, protest movements, and other aspects of national politics. Addresses how to make meaningful comparisons across countries.

(III, VIII)

POL SCI 61A. Introduction to Race and Ethnicity in Political Science. 4 Units.
Examines major theories that attempt to explain the roles of race and ethnicity in U.S. politics. Course may be offered online.

Same as CHC/LAT 64.

(III, VII)

POL SCI 69. Lower Division Special Topics in Minority Politics. 4 Units.
Studies in selected areas of minority politics. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

POL SCI 71A. Introduction to Law. 4 Units.
An introduction to the study of judicial politics. Questions include: what is law?; what is a court?; who are the judges? Analysis of a wide range of judicial decisions illustrates the political importance of courts in the U.S. and elsewhere.

(III)

POL SCI 79. Lower-Division Special Topics in Law. 4 Units.
Studies in selected areas of law. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

POL SCI 120. Public Opinion. 4 Units.
Theories concerning sources of public opinion, processes by which it is altered, organization of citizens’ belief systems, and role of public opinion in government policy. Students analyze survey data as a research project.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 120W. Public Opinion. 4 Units.
Theories concerning sources of public opinion, processes by which it is altered, organization of citizens' belief systems, and role of public opinion in
government policy. Students analyze survey data as a research project.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 121A. The American Presidency. 4 Units.
Presents a comprehensive survey of the American presidency and considers the question of political power.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 121C. U.S. Elections and Voting Behavior. 4 Units.
Examines how voters evaluate political parties, candidates, and issues in electoral campaigns to reach their decisions. Numerous controversies
concerning the degree of issue voting, sophistication of candidate evaluations, and the decline of political parties are discussed.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 121E. Public Policy Analysis. 4 Units.
Examines different approaches to the analysis of public policy, what constitutes good policy, the role of government, and citizen participation in policy-
making. Suggests a policy-design perspective which builds upon other frameworks but concentrates on goals, implementation structures, tools, and
rationales.

Prerequisite: SOCECOL E8 and (PP&D 4 or PP&D 166).

Same as PP&D 169.

Restriction: Urban Studies, Social Ecology, and Public Health Policy majors have first consideration for enrollment.

POL SCI 121F. Presidents Since World War II. 4 Units.
Reviews the actions and character of presidents from Harry Truman through Bill Clinton. Each week a different president is examined from a variety of
perspectives. Students are expected to write a substantial original research paper.

Prerequisite: POL SCI 21A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 122A. American Metropolitan Politics. 4 Units.
Explores the politics of urban and suburban America, including the policy making process; the exercise of political power; local politics, federalism and
the problems of metropolitanism; and major policy problems facing urban areas.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 122B. California Politics. 4 Units.
Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-
brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy
making.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 122BW. California Politics. 4 Units.
Examines the structure and function of California government, traces historical development of political power, with constantly changing casts of power-
brokers and seekers. Explores California exceptionalism and the roles played by the electorate, legislature, executive, and organized interests in policy
making.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 122C. The American Electorate. 4 Units.
Provides an overview of how polls are conducted, and how they can be manipulated by question wording, sampling techniques, interviewing procedures, and context. Public attitudes toward Congress are examined. Students analyze survey data on their own as a research project.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 123A. Parties and Political Organizations. 4 Units.
A consideration of the role that parties and other political organizations play in the American political process. Also looks at the development and significance of PACs, interest groups, and social movements as vehicles for democratic participation.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 124A. The Politics of Protest. 4 Units.
Examines the Civil Rights, Black Power, and women’s movements in relationship to the Asian American movement. Uses social movement theories to illuminate the cases, and the cases to critique and revise the theories.

Same as ASIANAM 144.

(VII)

POL SCI 124B. Latinos in U.S. Politics. 4 Units.
Comparing the political issues facing Latino groups by examining their migration histories, voting behavior, nonelectoral participation, and policy issues. Latino issues are examined on the national, state, and local levels, including formal representation, immigration, affirmative action, and language policy.

Same as CHC/LAT 151.

(VII)

POL SCI 124C. Comparative Minority Politics. 4 Units.
Examines the political experiences of Blacks, Latinos, and Asian Americans in the United States from roughly 1950 to the present. Focuses on how each group has pursued political empowerment via both conventional political channels and social movements.

Same as AFAM 151, CHC/LAT 147, ASIANAM 132.

POL SCI 124E. African American Politics. 4 Units.
Examines politics of African Americans in order to gain a broader perspective of the American political process. Major developments in African American politics (including the civil rights movement, Black presidential bids), continuing problem of racism, responsiveness of key governing institutions.

Same as AFAM 152.

POL SCI 125A. The United States Congress. 4 Units.
Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 125AW. The United States Congress. 4 Units.
Does the Congress do a good job of representing the American citizenry? Is it the most appropriate mechanism for the creation, resolution, and implementation of public policy.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

(Ib)

POL SCI 125B. Congress: The New Institutionalist Approach. 4 Units.
Study of the U.S. Congress emphasizing how rules and institutions (fillbuster, veto, the committee system, party caucuses) structure how the Congressional game is played. Combines theoretical study of procedures with the practical study of actual bills.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 126C. U.S. Immigration Policy. 4 Units.
Examines selected immigration policy debates since the nineteenth century, rationale and consequences of immigration law since 1965, problems of administration, implementation and enforcement, impact of immigration policy on foreign relations, and contemporary debate regarding the future of U.S. policy.

Same as CHC/LAT 163.

(VII)

POL SCI 126D. Urban Politics and Policy. 4 Units.
Examines economic limits of cities and welfare policy. Addresses such issues as why are the poor concentrated in the central cities? Which anti-poverty programs will work best in cities? Which level of government can best combat poverty in the U.S.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 126F. Politics of Animal Rights. 4 Units.
Examines animal rights/welfare movement’s efforts to transform moral, practical, and legal standing of nonhuman animals in contemporary U.S. Explores intersection of racism, sexism, and speciesism informed by theories of race and ethnicity, including Asian American Studies.

Same as ASIANAM 168.

Restriction: Political Science majors and Asian American Studies majors have first consideration for enrollment.

POL SCI 129. Special Topics in American Politics and Society. 4 Units.
Studies in selected areas of American politics and society. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 130A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as INTL ST 105A, SOC SCI 103A, SOCIOL 134.

Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

POL SCI 130B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A.

Same as INTL ST 105B, SOC SCI 103B.

Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

POL SCI 131C. Modern Political Theory. 4 Units.
Examines major thinkers and intellectual movements in the political thought of the 17th and 18th centuries.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 131F. Twentieth Century Political Theory. 4 Units.
Examines major thinkers and intellectual movements in the political thought of the 20th Century.

Prerequisite: POL SCI 31A.

POL SCI 134F. Social and Political Theory. 4 Units.
Focus is on recent major work in social and political theory. An in-depth analysis of a relatively small body of writing. Authors discussed include Jurgen Habermas, Anthony Giddens, and Richard Rorty.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 134J. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.

Same as SOCIOL 168.

Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

POL SCI 134JW. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCIOL 168W.

Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

POL SCI 135A. Origins of Liberalism. 4 Units.
Examines the ideals, social forces, and historical events that gave rise to liberal political theory. Topics include patriarchal authority, the divine right of kings, religious toleration, slavery, colonialism, political economy, the evolution of law, and tensions between liberty and equality.

Prerequisite: POL SCI 31A

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 135B. Just War Revisited. 4 Units.
Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today's relevancy.

Same as INTL ST 131A.

POL SCI 136A. Logical Models in Social Sciences. 4 Units.
Science asks two questions. "How things are?" leads to measurement and statistical analysis. But we see only what we look for. "How things should be, on logical grounds?" leads to quantitative logical models which tell us what to look for.

Same as SOCIOL 112.

POL SCI 136B. Cannibals and Conquistadores: The Philosophy of the Other. 4 Units.
Examines critically the notion of the "other" by looking at the philosophical challenges difference poses in the context of the European discovery of the New World. Seeks to understand the naissance of the concept of human rights and tolerance.

POL SCI 136D. Middle East Narratives. 4 Units.
Explores various narratives of peoples living in the Middle East: Bedouins, Jews, Muslims, Christians, Druze, Baha'i; looks at how their identities were formed and altered over time through empire, religion, exodus, war, democracy, diasporas; focus is philosophical and historical.

Same as INTL ST 174.

POL SCI 137B. Types of Political Representation. 4 Units.
Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.

POL SCI 137BW. Types of Political Representation. 4 Units.
Political representation plays an important role in democratic systems, but is elusive once examined closely. Students delve into the concept and relate different views to political life. Half of the course is spent on writing instruction.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Recommended: Upper-Division students. Political Science majors have first consideration for enrollment.

(lb)
POL SCI 137C. Political Psychology. 4 Units.
Examines how psychological theory and research may be used to better understand political thought and behavior. Drawing on theories of learning, cognition, and personality, discusses the formation of political attitudes, the process of political decision-making, the nature of political leadership.

Same as PSYCH 176A.

Restriction: Psychology and Political Science majors have first consideration for enrollment.

POL SCI 138A. The Moral of the Story: Introductory Seminar in Ethics. 4 Units.
Introduces major theories and classic texts in ethics, from Plato and Aristotelian virtue ethics to utilitarianism and Kant and contemporary moral psychology.

POL SCI 138C. Ethics of Difference. 4 Units.
Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 138CW. Ethics of Difference. 4 Units.
Examines differences traditionally judged politically salient—race, ethnicity, religion, gender. Personal interviews with an elderly person encourage students to understand the social construction of difference and to reexamine their own attitudes by putting themselves in the place of another.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 139. Special Topics in Political Theory and Methods. 4 Units.
Studies in selected areas of political theory and methods. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 141B. International Political Economy. 4 Units.
Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as INTL ST 114A.

POL SCI 141C. International Political Economy of East Asia. 4 Units.
Integration of theoretical perspectives in international political economy with the study of economic development in East Asia, with special emphasis on regional integration.

POL SCI 141D. Immigration Politics in Western Europe. 4 Units.
Examines the politics of immigration in Western Europe. Considers historical, economic, political, and social dimensions of immigration as well as the nature of ensuing conflict. Students investigate a variety of immigrant-related policies, including asylum, citizenship, and integration.

Same as INTL ST 178A.

POL SCI 141E. U.S. Foreign Policy Toward Asia. 4 Units.
U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as INTL ST 142G.

POL SCI 142B. The International Relations of East Asia. 4 Units.
Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as INTL ST 142D.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.
POL SCI 142D. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.
Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the “Cold War” era, the concept of “national interest” is examined.

Same as INTL ST 142A.

Restriction: International Studies and Political Science majors have first consideration for enrollment.

POL SCI 142E. U.S. Foreign Policy II: Cold War Decline & After. 4 Units.
Deals with U.S. foreign policy from the post-Vietnam War era through the collapse of the Cold War and into the emergence of the post-Cold War era, roughly from 1972 to the present.

Same as INTL ST 142B.

Restriction: Political Science majors have first consideration for enrollment.

Concept of “national security” from 1947-1990s is reviewed. Organizational and psychological factors that influence decision-making, the dangers of “groupthink,” and the issue of accountability are analyzed. National security agenda (military, economic, environmental, and social) for the 1990s is discussed.

Same as INTL ST 142C.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 142G. U.S. Coercive Diplomacy. 4 Units.
Examines the theory of compellence and the U.S. practice of coercive diplomacy—the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as INTL ST 142E.

Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 142H. Human Rights and Foreign Policy. 4 Units.
Analyzes theories, patterns, and cases of human rights foreign policy. How do countries pursue the values and standards of human rights in their foreign relations. How does the U.S. fit into worldwide trends? Examines historical and contemporary cases.

Same as INTL ST 142F.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 143F. Intelligence in International Politics. 4 Units.
Intelligence agencies, activities, and functions—their impact on international politics; how governments and societies seek to control intelligence agencies and activities; and how intelligence agencies work—their techniques, resources, technology, problems, successes, and failures.

Same as INTL ST 141A.

Restriction: Political Science and International Studies majors have first consideration for enrollment.

POL SCI 143G. Homeland Security. 4 Units.
Examines the 9/11 origins of the concept of homeland security; assess the evolution, structure, and operations of the Department of Homeland Security; critically examines the evolution of threat assessment to the U.S. and the utilization of risk management methodologies.

Same as INTL ST 141B.

POL SCI 144A. Approaches to International Relations. 4 Units.
Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.

Same as INTL ST 140A.

Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 145A. Ethics in an Age of Terror and Genocide. 4 Units.
Original sources document personal impact of wars on genocides, from World War II to the Bosnian and Rwandan genocides and current wars in Iraq and Afghanistan. Students train for and conduct personal interviews with someone who lived through a war.
POL SCI 146A. Ethics and International Relations. 4 Units.
Introduces students to the dynamic field of ethics and international relations. A variety of traditional and emerging perspectives are examined, skeptical views are discussed in detail, and arguments are illustrated with current cases.

Same as PP&D 140, INTL ST 154D.

POL SCI 146B. Religion and World Politics. 4 Units.
Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C.

Same as REL STD 115, INTL ST 151B.

POL SCI 149. Special Topics in International Relations. 4 Units.
Studies in selected areas of international relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 150A. Seminar on Regime Change in East Asia. 4 Units.
Examines nine factors relevant to regime change, studying one factor each week in class. Students write four short (two-page) analytic papers, and one eight-ten-page research paper on one country.

Prerequisite: POL SCI 6A and POL SCI 6B and POL SCI 6C.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 150AW. Seminar on Regime Change in East Asia. 4 Units.
Examines nine factors relevant to regime change, studying one factor each week in class. Students write four short (two-page) analytic papers, and one eight-ten-page research paper on one country.

Prerequisite: POL SCI 6A and POL SCI 6B and POL SCI 6C. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151A. East Asian Politics. 4 Units.
Explores the recent history and political systems of China, Japan, and Korea, comparing the three countries with each other and with occasional reference to the United States, British, and French systems.

Same as INTL ST 176B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 151B. Introduction to Chinese Politics. 4 Units.
Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as INTL ST 176C.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 151C. Chinese Politics: Policy, Leadership, and Change. 4 Units.
Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as INTL ST 176D.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 151E. Are Chinese Politics Changing?. 4 Units.
There’s been speculation about whether the Chinese political system is fundamentally changing. This upper-division writing seminar reviews new books on this topic and considers the question from a range of angles. Four two-page papers and one 8–10-page paper required.

Restriction: Political Science majors have first consideration for enrollment.
POL SCI 151EW. Are Chinese Politics Changing?. 4 Units.
There's been speculation about whether the Chinese political system is fundamentally changing. This upper-division writing seminar reviews new books on this topic and considers the question from a range of angles. Four two-page papers and one 8–10-page paper required.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151F. Korean Politics and Society. 4 Units.
Examination of contemporary political/social structures and process of Korea (South and North). Historical and cultural influences on current political systems and policies. Also included are economic development, national security, unification issues, and foreign relations.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151G. Electoral Systems. 4 Units.
Worldwide overview of electoral laws by which votes are converted into assembly seats. Systematic analysis of these laws and their effect on political process/stability. Single-, two-, and multi-party systems. Proportional representation versus plurality rule. Majoritarian and consensus patterns of government.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 151H. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, SOC SCI 121T, ECON 154.

Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

POL SCI 152C. German Politics and Society. 4 Units.
Concentrates on twentieth-century German politics and society, focusing on the contemporary political system of democratic West Germany. Study of the historical legacies of Weimar and the Nazi period, the postwar division between the two states and their reunification.

Same as INTL ST 176G.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 152F. West European Politics. 4 Units.
Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as INTL ST 176l.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 152G. European Politics. 4 Units.
An introduction to the politics of Europe including the smaller countries and the former Warsaw Pact. Includes case study of three or four countries, as well as contemporary issues such as globalization, immigration, population decline, and European integration.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 153A. Latin American Politics. 4 Units.
Introduces the main concepts and theoretical approaches underlying the study of Latin American politics, examines recent political dynamics, and explores the challenges the region faces in the twenty-first century and how countries will attempt to address them.

Same as INTL ST 176K, CHC/LAT 151A.

Restriction: Political Science majors, Chicano/Latino Studies majors, and International Studies majors have first consideration for enrollment.

POL SCI 153B. Canadian Politics. 4 Units.
Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as INTL ST 176L.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.
POL SCI 153E. Human Rights. 4 Units.
Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.

Same as INTL ST 154B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 153G. Cuban Society and Revolution. 4 Units.
Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as INTL ST 177E, HISTORY 166C, CHC/LAT 157.

POL SCI 154C. Comparative Politics: Four Nations, Three Continents. 4 Units.
Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as INTL ST 144A.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 154F. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.
Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as INTL ST 162B, ANTHRO 164P.

(VIII)

POL SCI 154G. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, INTL ST 183E.

(VIII)

POL SCI 155A. New Democracies. 4 Units.
Examines what democracy is; considers competing theories about its causes; explores multiple democratic institutions; discusses several types of democracy; and analyzes various aspects of democratic quality and stability, focusing on Eastern Europe, Latin America, and sub-Saharan Africa.

Same as INTL ST 124B.

POL SCI 155C. Organizations. 4 Units.
How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as SOCIOL 141.

Restriction: Sociology and Political Science majors have first consideration for enrollment.

POL SCI 155F. Political Economy of Japan. 4 Units.
Surveys postwar developments in the politics and political economy of Japan. Topics include the political and institutional context of policy making; pressures for change which Japan’s political economy has faced in the last decade; Japan’s past and present foreign policies.

Same as INTL ST 114D.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

POL SCI 156A. Political Participation. 4 Units.
The ways in which people in various political systems take part in politics, especially in activities directed toward affecting outcomes. Who is active, what they do, why they do it, and what difference it makes.
POL SCI 156B. Participation and Representation. 4 Units.
Examines the concepts "political participation" and "political representation" and the interconnection between these concepts. Addresses both the theoretical issues and debates raised by these concepts and considers how they are studied empirically.

Restriction: Upper-division students only. Political Science majors have first consideration for enrollment.

POL SCI 156C. Citizen Politics. 4 Units.
Study of the role of public opinion in the political process. Reviews some key research approaches and findings on which our current understanding of public opinion is based. Provides an opportunity to conduct research and to analyze public opinion surveys.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 156CW. Citizen Politics. 4 Units.
Study of the role of public opinion in the political process. Reviews some key research approaches and findings on which our current understanding of public opinion is based. Provides an opportunity to conduct research and to analyze public opinion surveys.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

(lb)

POL SCI 156D. Protests, Movements, and Revolutions. 4 Units.
A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 6A or ECON 1.

Same as SOCIOL 174.

Restriction: Political Science and Sociology majors have first consideration for enrollment.

POL SCI 157A. Nationalism. 4 Units.
Nationalism, one of the most potent social and political forces of the twentieth century, is explored. Seeks to understand the sources and nature of various forms of nationalism.

POL SCI 157AW. Nationalism. 4 Units.
Nationalism, one of the most potent social and political forces of the twentieth century, is explored. Seeks to understand the sources and nature of various forms of nationalism.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

(lb)

POL SCI 158C. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as SOC SCI 188I, INTL ST 162.

POL SCI 158D. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, INTL ST 165.

POL SCI 159. Special Topics in Comparative Politics. 4 Units.
Studies in selected areas of comparative politics. Topics addressed vary each quarter.

Repeatability: May be repeated for credit unlimited times.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 169. Conflict Management. 4 Units.
Special Instance.
POL SCI 171A. Law and Society. 4 Units.
Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171AW. Law and Society. 4 Units.
Law and its various roles in society. The nature and meaning of law; legality and power in the American system; law as a mechanism for social change; the role of law in dispute processing, social control, compliance with judicial decisions.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171B. Jurisprudence. 4 Units.
A survey of legal philosophies. Explores jurisprudence from the ancient Greeks to the present, including natural law philosophy; legal positivism and realism; sociological jurisprudence; and liberal, radical, and conservative thought.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171C. Comparative Constitutional Politics. 4 Units.
Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171CW. Comparative Constitutional Politics. 4 Units.
Examines the impact of constitutional courts on politics and policy-making in Canada, France, Germany, and the United States. Cases may focus on the constitutional politics of free speech, abortion, rights to property, and the conduct of foreign relations.

Prerequisite: POL SCI 71A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171D. American Constitutional Law. 4 Units.
American constitutional interpretation of cases involving separation of powers, federal-state relations, rights of property, free expression, privacy, criminal due process, political participation, and equality. Includes legal research methods, development of judicial review, legal reasoning, and impact of Supreme Court decisions.

Prerequisite: POL SCI 71A.

Overlaps with CRM/LAW C122.

Restriction: Political Science majors have first consideration for enrollment.

POL SCI 171F. Law in the Twenty-First Century. 4 Units.
Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as SOC SCI 172D.

Restriction: Political Science and Social Science majors have first consideration for enrollment.

POL SCI 171G. Legal Implications of the Drug Trade. 4 Units.
Examines United States policy to combat domestic and international narcotics trafficking. Analyzes the national drug policy and program implementation by federal and state agencies. Considers the effects of these policies on our individual constitutional rights and the criminal justice system.
POL SCI 172A. International Law. 4 Units.
Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.
Prerequisite: POL SCI 71A.
Same as INTL ST 145A.

(VIII)

POL SCI 172B. International Law and the U.S. Legal System. 4 Units.
Explores how international law and U.S. law interact, focusing on recent cases and controversies. Topics include: treaty and customary law as U.S. law; international human rights litigation in U.S. courts; war powers; detentions in the war on terror; and torture.
Prerequisite: POL SCI 71A or POL SCI 172A.

POL SCI 172C. Constitution and Rights. 4 Units.
How are constitutions crafted, maintained, and changed? Does constitutionalism support or undermine democracy? What difference do rights and constitutional courts make? Explores these questions through a comparative examination of the theory and practice of constitutionalism in developing democracies.
Prerequisite: POL SCI 71A.
Same as INTL ST 145C.

POL SCI 172D. Courts in New Democracies . 4 Units.
Examines the conceptual, theoretical, and empirical foundations of the study of courts and politics in new democracies, introducing students to a variety of contemporary debates about how political dynamics shape courts, and how courts shape politics.
Prerequisite: POL SCI 71A.
Same as INTL ST 145D.

POL SCI 174A. Civil Liberties. 4 Units.
Political analysis of selected Supreme Court cases involving claims under the Bill of Rights and the Fourteenth Amendment. Topics include: race, sex, and other forms of discrimination; criminal justice; privacy; freedom of speech and related claims.
Prerequisite: POL SCI 71A.
Overlaps with CRM/LAW C122.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 174B. Contemporary Constitutional Rights. 4 Units.
Addresses the interpretation and application of the United States' fundamental rules. These rules tell us something about the goals of society, and the means chosen to achieve them by allocating rights, duties, costs, and benefits among its members.
Prerequisite: POL SCI 71A.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 174C. U.S. Supreme Court. 4 Units.
Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, land decision-making, impact of Supreme Court decisions.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI 174CW. U.S. Supreme Court. 4 Units.
Overview and analysis of the role played by the U.S. Supreme Court in the American political system. Judicial review, appointment of justices, judicial activism and judicial restraint, process of case selection, court deliberation, land decision-making, impact of Supreme Court decisions.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Political Science majors have first consideration for enrollment.
POL SCI 179. Special Topics in Public Law. 4 Units.
Studies in selected areas of public law. Topics addressed vary each quarter.
Prerequisite: POL SCI 71A.
Repeatability: Unlimited as topics vary.
Restriction: Political Science majors have first consideration for enrollment.

POL SCI H182A. Honors Thesis Workshop. 4 Units.
A weekly seminar/workshop to facilitate the exchange of ideas and research strategies among students and to review their progress in writing the thesis.
Restriction: Open only to students in the Political Science Senior Thesis program.

POL SCI 183. Public Affairs Internship. 4 Units.
Supervised internship and study in political, governmental, nonprofit, or related organizations for students participating in the Department’s Public Affairs Internship Program. Enrollment dependent upon availability of intern positions.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.

POL SCI 190. Senior Thesis. 4 Units.
Thesis research with Political Science faculty.
Repeatability: May be taken for credit 3 times.

POL SCI 190W. Senior Thesis. 4 Units.
Thesis research with Political Science faculty.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Repeatability: May be taken for credit 3 times.

POL SCI 197. Field Study. 1-4 Units.
Field study with Political Science faculty.
Repeatability: Unlimited as topics vary.

POL SCI 198. Directed Group Study. 1-4 Units.
Directed group study with Political Science faculty.
Repeatability: Unlimited as topics vary.

POL SCI 199. Independent Study. 1-4 Units.
Independent study or research with a Political Science faculty member.
Repeatability: May be repeated for credit unlimited times.

POL SCI 209A. Study of Democracy Colloquium. 1.33 Unit.
Skills critical to professional success. Students learn and practice professional presentation skills, develop substantive knowledge in the field by attending talks and panels, and interact with scholars and professionals in the field.
Restriction: Graduate students only. POL SCI 209A may not be taken for credit if taken after SOCIOL 229.

POL SCI 209B. Study of Democracy Colloquium. 1.33 Unit.
This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.
Restriction: Graduate students only. POL SCI 209B may not be taken for credit if taken after SOCIOL 229 Democracy.

POL SCI 209C. Study of Democracy Colloquium . 1.34 Unit.
This colloquium teaches students skills critical to professional success. Students learn and practice professional presentation skills and develop substantive knowledge in the field by attending talks and panels and interacting with scholars and professionals in the field.
Restriction: Graduate students only. POL SCI 209C may not be taken for credit if taken after SOCIOL 229 Democracy.
POL SCI 210A. Colloquium. 1.3 Unit.
Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

POL SCI 210B. Colloquium. 1.3 Unit.
Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210A.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

POL SCI 210C. Colloquium. 1.4 Unit.
Doctoral training requires more than learning substantive debates and research methods; it also requires students learn professional practices, routines, and expectations. This year-long workshop offers students a mix of professional development, outside speakers, and casual conversations with departmental faculty.

Prerequisite: POL SCI 210B.
Grading Option: Satisfactory/unsatisfactory only.
Restriction: Graduate students only.

POL SCI 211A. Foundations of Modern Political Science. 4 Units.
Provides an introduction to foundational debates and controversies in contemporary political science, exploring these issues through the prism of nineteenth, twentieth and twenty-first century scholars who have profoundly shaped the contours of contemporary political science.

Restriction: Graduate students only.

POL SCI 211B. Micropolitics. 4 Units.
Provides students with comprehensive introduction to the substance and methods of the study of political behavior. Focuses on the level of individual behavior, but the relation to macrosocial analysis is considered.

Restriction: Graduate students only.

POL SCI 211C. Macropolitics. 4 Units.
Examines some of the major research issues in political science involving macro-level questions: systemic processes, political institutions, or system outputs.

Restriction: Graduate students only.

POL SCI 212A. Public Opinion. 4 Units.
Introduction to the study of U.S. public opinion. Provides an overview of the theories regarding opinion formation, the methodologies employed, and the role of public opinion in democratic governments.

Restriction: Graduate students only.

POL SCI 212B. Ethics Workshop. 4 Units.
Students find an important question in ethics, search literature to assess topic's importance, post question to be researched, propose method of analysis and type of data, analyze data, and note how their works contribute to knowledge in the field.

POL SCI 219. Special Topics in Politics and Society. 4 Units.
Current research in politics and society.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
POL SCI 221A. Public Policy. 4 Units.
Explores different approaches to public policy analysis, the diverse conceptions of the goals and objectives that should be served by policy, and the appropriate role of the policy analyst. Policy consequences are traced to indirect and subtle incentives and disincentives.

Repeatability: May be taken for credit 2 times.

Same as PUB POL 221.
Restriction: Master of Public Policy graduate students have first consideration for enrollment.

POL SCI 222A. Collaborative Governance and Public Management. 4 Units.
Introduction to inclusive management. To make effective use of public resources, public managers are inventing ways of managing that alter relationships within organizations, between organizations, between sectors, and with the public. Requires rethinking fundamentals such as leadership and motivation.

Same as PP&D 283.
Restriction: Graduate students only.

POL SCI 223A. Theories of Power and Empowerment. 4 Units.
Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as PP&D 279, SOCIOL 271, MGMTPHD 297R.
Restriction: Graduate students only.

POL SCI 229. Advanced Research Methods: Varied Topics. 4 Units.
Topics in advanced research methods. Topics will vary.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

POL SCI 231A. Political Epistemology. 4 Units.
Focuses on fundamental issues of knowledge in the study of politics, especially interconnections and tensions between politics and knowledge. Counts as the Field Seminar in Political Theory.

Restriction: Graduate students only.

POL SCI 232A. Introduction to Voting Theory. 4 Units.
Introduction to voting modules. Substantive topics include majority rule, voting methods and their properties, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Restriction: Graduate students only.

POL SCI 234A. Research Methods in Political Science. 4 Units.
An introduction to standard research techniques in political science. Issues of epistemology, research design, and approaches to empirical analysis.

Prerequisite: Upper-division or graduate-level statistics.

Restriction: Graduate students only.

POL SCI 239. Special Topics in Political Theory. 4 Units.
Current research in political theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

POL SCI 241B. Seminar in International Relations Theory. 4 Units.
Overview of the major theories guiding research and scholarship in international relations. Focus on major conceptual approaches (realism, neoliberalism, marxism) and levels of analysis (systemic, state, and subnational), as well as on methodological/epistemological debates engulfing the field.

Restriction: Graduate students only.
POL SCI 241D. Norms in International Relations. 4 Units.
Evaluates various theoretical and empirical approaches to understanding the emergence, diffusion, and effects of international norms.

Restriction: Graduate students only.

POL SCI 245A. U.S. Ethnic Politics. 4 Units.
Assesses theories of ethnic political attitudes and behaviors in U.S. politics and examines methodological approaches to testing theories of ethnic politics. The primary focus is contemporary ethnic politics with attention to ethnic politics in American political development.

Same as CHC/LAT 235.

Restriction: Graduate students only.

POL SCI 252A. The State in Comparative Perspective. 4 Units.
Seminar examining the state from theoretical, empirical, comparative perspectives. How the state came into being, the state’s role in the economy, toward society and internationally, and in policy-making in Western Europe, East Asian newly industrialized countries, the Third World.

Restriction: Graduate students only.

POL SCI 252F. Political Culture and Democracy. 4 Units.
Examines the political culture literature and its relationship to democratic development. What are the cultural prerequisites of democracy, what aspects of political culture facilitate democratic politics and governmental performance, and what forms and reforms a political culture.

Restriction: Graduate students only.

POL SCI 253B. Regime Change in East Asia. 4 Units.
Regime change from authoritarianism to democracies (Japan, South Korea, Taiwan); gradual political change (China). Uses theories from comparative literature on regime transition; combines theory with historical institutions, political culture, prior regimes, elements in the transition process in the four countries.

Restriction: Graduate students only.

POL SCI 254A. Introduction to Game Theory. 4 Units.
Introduction to non-cooperative games. The prisoner's dilemma, Nash equilibrium, sequential games, subgame perfection. Applications include collective action, agenda-setter models, spatial competition of political parties, models of revolution and arms race.

Restriction: Graduate students only.

POL SCI 260B. Political Participation. 4 Units.
Examines theoretical approaches to the explanation of the pattern of participation and consideration of the results of empirical studies of such activity by mass publics (mainly in Europe and North America). Addresses issues in both comparative politics and political behavior.

Restriction: Graduate students only.

POL SCI 270A. Political Economy I. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Same as ECON 270A.

Restriction: Graduate students only.

POL SCI 270B. Political Economy II. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: POL SCI 270A.

Same as ECON 270B.

Restriction: Graduate students only.
POL SCI 270C. Political Economy III. 4 Units.
Political Economy lies at the intersection of economics and political science. Course studies effects of politics on the economy and uses tools derived from economics to understand the behavior of governments and of citizens when they deal with politics.

Prerequisite: POL SCI 270B.

Same as ECON 270C.

Restriction: Graduate students only.

POL SCI 273A. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.

Same as PP&D 213, SOCIOL 223, MGMTPHD 297K.

Restriction: Graduate students only.

POL SCI 285A. Introduction to Political Psychology I. 4 Units.
Reviews theoretical questions regarding the relationship between the analytical and normative and the polity. Considers relationships between the analytical and normative concerns of psychology and political science, addressing empirical literatures on political socialization, ideology and public opinion, identity and nationality.

POL SCI 285B. Introduction to Political Psychology II. 4 Units.
Discusses the complex set of relationships among the three disciplines of politics, psychology, and economics, focusing on human decision-making processes and political choice.

Restriction: Graduate students only.

POL SCI 290. Dissertation Research. 1-12 Units.
Dissertation research with Political Science faculty.

Repeatability: Unlimited as topics vary.

POL SCI 299. Independent Study. 1-12 Units.
Independent research with Political Science faculty.

Repeatability: Unlimited as topics vary.

Department of Sociology

4215 Social Science Plaza B; 949-824-7637
http://www.sociology.uci.edu/
Matt Huffman, Department Chair

Sociology involves the study of societies and human groups. It examines social conflict and cooperation, inequality and the social organization of families, communities, workplaces and nations. The program at UCI covers the breadth of the discipline while giving students opportunities to conduct independent research, participate in an Honors Program, and to take advantage of departmental opportunities in such areas as business, economy and organizations; diversity and inequality; global and international sociology; and social problems and public policy. All students take basic courses on social institutions, theory and methods. Students then take more specialized courses such as race and ethnicity, social psychology, sociology of gender, or political sociology. Courses are enriched by ongoing faculty research on such topics as the work and family of immigrants to the U.S., economic change in Asia, the relation between women and men in different social classes and ethnic groups, and attitudes on sexual behavior.

In addition to developing students’ ability to critically analyze and understand social patterns, the major is relevant to professional careers in education, social work, urban planning, law, business, public health, non-governmental organization and government service. It also provides training for advanced graduate work in sociology and related fields.
Undergraduate Program

Requirements for the B.A. Degree in Sociology

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1561).

Departmental Requirements for the Major

School requirements must be met and must include 12 courses (48 units) as specified below:

A. Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 1</td>
<td>Introduction to Sociology</td>
</tr>
<tr>
<td>and</td>
<td></td>
</tr>
<tr>
<td>SOCIOL 2</td>
<td>Globalization and Social Change</td>
</tr>
<tr>
<td>or SOCIOL 3</td>
<td>Social Problems</td>
</tr>
</tbody>
</table>

B. Complete one course in methods and one in theory:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 110</td>
<td>Research Methods</td>
</tr>
<tr>
<td>SOCIOL 120</td>
<td>Sociological Theory</td>
</tr>
</tbody>
</table>

C. Complete one course in research design and implementation:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 180A</td>
<td>Sociology Majors Seminar</td>
</tr>
</tbody>
</table>

D. Select five of the following core courses, no more than two of which may be lower-division:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 31</td>
<td>Self-Identity and Society</td>
</tr>
<tr>
<td>SOCIOL 41</td>
<td>Small Group Dynamics</td>
</tr>
<tr>
<td>SOCIOL 43</td>
<td>City and Community</td>
</tr>
<tr>
<td>SOCIOL 44</td>
<td>Births, Deaths, and Migration</td>
</tr>
<tr>
<td>SOCIOL 56</td>
<td>Religion and Society</td>
</tr>
<tr>
<td>SOCIOL 62</td>
<td>Families and Intimate Relations</td>
</tr>
<tr>
<td>SOCIOL 63</td>
<td>Race and Ethnicity</td>
</tr>
<tr>
<td>SOCIOL 68A</td>
<td>Ethnic and Immigrant America</td>
</tr>
<tr>
<td>SOCIOL 133</td>
<td>Sociology of Generosity</td>
</tr>
<tr>
<td>SOCIOL 135</td>
<td>Social Psychology of Networks</td>
</tr>
<tr>
<td>SOCIOL 138</td>
<td>Business Decisions</td>
</tr>
<tr>
<td>SOCIOL 141</td>
<td>Organizations</td>
</tr>
<tr>
<td>SOCIOL 144</td>
<td>Politics, Power, and Society</td>
</tr>
<tr>
<td>SOCIOL 145</td>
<td>Occupations and Professions</td>
</tr>
<tr>
<td>SOCIOL 150</td>
<td>Sociological Lens on Religion</td>
</tr>
<tr>
<td>SOCIOL 158C</td>
<td>Money, Work, and Social Life</td>
</tr>
<tr>
<td>SOCIOL 161</td>
<td>Sociology of Sex and Gender</td>
</tr>
<tr>
<td>SOCIOL 164W</td>
<td>Aging and Society</td>
</tr>
<tr>
<td>SOCIOL 166</td>
<td>Immigration and Inequality</td>
</tr>
<tr>
<td>SOCIOL 167A</td>
<td>Racial and Ethnic Relations in the United States</td>
</tr>
<tr>
<td>SOCIOL 171</td>
<td>Environment and Society</td>
</tr>
<tr>
<td>SOCIOL 173</td>
<td>Social Inequality</td>
</tr>
<tr>
<td>SOCIOL 174</td>
<td>Protests, Movements, and Revolutions</td>
</tr>
<tr>
<td>SOCIOL 175B</td>
<td>China in the Global Age</td>
</tr>
</tbody>
</table>

E. Two additional Sociology courses, one of which must be upper-division.

Honors Program in Sociology

The Honors Program in Sociology is open to outstanding Sociology majors during their junior or senior year. To gain admission to the program, potential honors students normally take Sociology courses in theory (SOCIOL 120), methods (SOCIOL 110), statistics (SOCIOL 10A-SOCIOL 10B-SOCIOL 10C or equivalent) and at least two Sociology core courses. Students who receive an average grade of 3.5 or better in these courses are eligible for the honors program. In addition, honors students should have a grade point average of 3.2 or better in all courses taken at UCI. Majors who are transfers may petition for entry into the program based on their grades from their former schools.

During their junior or senior year, honors program students write a thesis, designed and carried out under faculty supervision. Projects normally entail some empirical analysis of sociological data. Students meet regularly in a two-quarter honors seminar to design and carry out these projects, to
exchange ideas, and to help analyze each other’s work (SOCIOL H188A-SOCIOL 188BW satisfies Sociology major requirement C: Honors students do not have to take SOCIOL 180A). In addition, honors students are required to attend at least six Sociology colloquia and subsequent meetings to discuss relevant sociological issues. Upon successful completion of the program, including approval of an honors thesis by the faculty mentor and honors instructor and receiving a grade of B+ or higher in SOCIOL 188BW, students graduate with honors in Sociology.

**Sociology Minor Requirements**

Requirements for the minor are met by taking seven Sociology courses (28 units) as specified below:

A. Complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 1</td>
<td>Introduction to Sociology</td>
</tr>
<tr>
<td>SOCIOL 2</td>
<td>Globalization and Social Change</td>
</tr>
<tr>
<td>or SOCIOL 3</td>
<td>Social Problems</td>
</tr>
</tbody>
</table>

B. Complete one course in methods and one in theory:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 110</td>
<td>Research Methods</td>
</tr>
<tr>
<td>SOCIOL 120</td>
<td>Sociological Theory</td>
</tr>
</tbody>
</table>

C. In addition, students must either satisfy the School mathematics and computer science requirement (School requirement 1), or take three courses (12 units) or equivalent in a single acceptable foreign language.

D. Select three of the following core courses, no more than two of which may be lower-division:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCIOL 31</td>
<td>Self-Identity and Society</td>
</tr>
<tr>
<td>SOCIOL 41</td>
<td>Small Group Dynamics</td>
</tr>
<tr>
<td>SOCIOL 43</td>
<td>City and Community</td>
</tr>
<tr>
<td>SOCIOL 44</td>
<td>Births, Deaths, and Migration</td>
</tr>
<tr>
<td>SOCIOL 56</td>
<td>Religion and Society</td>
</tr>
<tr>
<td>SOCIOL 62</td>
<td>Families and Intimate Relations</td>
</tr>
<tr>
<td>SOCIOL 63</td>
<td>Race and Ethnicity</td>
</tr>
<tr>
<td>SOCIOL 68A</td>
<td>Ethnic and Immigrant America</td>
</tr>
<tr>
<td>SOCIOL 133</td>
<td>Sociology of Generosity</td>
</tr>
<tr>
<td>SOCIOL 135</td>
<td>Social Psychology of Networks</td>
</tr>
<tr>
<td>SOCIOL 138</td>
<td>Business Decisions</td>
</tr>
<tr>
<td>SOCIOL 141</td>
<td>Organizations</td>
</tr>
<tr>
<td>SOCIOL 144</td>
<td>Politics, Power, and Society</td>
</tr>
<tr>
<td>SOCIOL 145</td>
<td>Occupations and Professions</td>
</tr>
<tr>
<td>SOCIOL 150</td>
<td>Sociological Lens on Religion</td>
</tr>
<tr>
<td>SOCIOL 158C</td>
<td>Money, Work, and Social Life</td>
</tr>
<tr>
<td>SOCIOL 161</td>
<td>Sociology of Sex and Gender</td>
</tr>
<tr>
<td>SOCIOL 164W</td>
<td>Aging and Society</td>
</tr>
<tr>
<td>SOCIOL 166</td>
<td>Immigration and Inequality</td>
</tr>
<tr>
<td>SOCIOL 167A</td>
<td>Racial and Ethnic Relations in the United States</td>
</tr>
<tr>
<td>SOCIOL 171</td>
<td>Environment and Society</td>
</tr>
<tr>
<td>SOCIOL 173</td>
<td>Social Inequality</td>
</tr>
<tr>
<td>SOCIOL 174</td>
<td>Protests, Movements, and Revolutions</td>
</tr>
<tr>
<td>SOCIOL 175B</td>
<td>China in the Global Age</td>
</tr>
</tbody>
</table>

**Graduate Program**

The Department of Sociology offers a Ph.D. degree program in Sociology. Particular emphases include social networks, gender, race/ethnicity, labor, social movements, family, migration, population, political economy, and states and global transformation. The program provides structured training in sociological theory, statistics, and qualitative and quantitative research methods. While the core of the program is sociological, it may also include an interdisciplinary component, incorporating links to anthropology, education, law, political science, history, criminology and urban planning. Small entering cohorts ensure personalized attention for each student and guarantee access to professors, allowing for close mentorship relationships. Program faculty take diverse theoretical and methodological approaches to a variety of substantive issues, are committed to empirical research addressing central sociological issues, and are open to intellectual cross-pollination from cognate disciplines.

Graduate students have the opportunity to participate in a variety of interdisciplinary research units, including the Center for the Study of Democracy; the Center for Global Peace and Conflict Studies; the Center for Research on Immigration, Population and Public Policy; and the Center for Demographic...
and Social Analysis. The Sociology Department maintains ties with Gender and Sexuality Studies and various ethnic studies programs, such as Asian American studies, Chicano/Latino studies, and African American studies. Research and funding opportunities are also available through UC-wide programs like Pacific Rim Studies and the Humanities Research Institute located on the UCI campus.

**Admission**

Students in the program come from diverse educational, ethnic, geographical, and social backgrounds. The deadline for applications to receive full funding consideration for fall admission is January 15. Students are admitted for winter and spring quarter only under exceptional circumstances. Admission is based on application materials and evidence of scholarly potential, including grade point average, GRE scores, statement of purpose, and letters of recommendation.

**Requirements**

Students must complete a two-quarter proseminar, a course in research design, a three-quarter statistics sequence, one seminar each in classical and contemporary theory, an advanced sociological methodology course, and nine Sociology seminars selected in consultation with the student’s advisor, in order to build competency in two areas of specialization in the discipline. Course work prepares students to complete an independent research project, which is presented in oral and written form during the winter quarter of their second year. Students must pass a formal evaluation at the end of their second year involving assessment of course work and the second-year research project and evaluation of teaching or research experience. Knowledge of one foreign language is required.

All required course work must be completed prior to advancement to candidacy. The normative time to advance to candidacy is four years. The advancement-to-candidacy examination is based on field examinations in two broad areas of sociology and an oral defense of a dissertation research prospectus, contextualized in the appropriate literature and including a discussion of data collection and methods of analysis. In preparation, students usually take at least the required one quarter of the Dissertation Seminar course during the third year. After advancing to candidacy, students are expected to work in close consultation with their advisor and dissertation committee. Committee approval of a satisfactory dissertation follows a final oral defense of the document. The normative time for completion of the Ph.D. is six years, and the maximum time permitted is eight years.

**Program in Law and Graduate Studies (J.D./Ph.D.)**

Highly qualified students interested in combining the study of law with graduate research and/or professional qualifications in Sociology are invited to undertake concurrent degree study under the auspices of UC Irvine’s Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. from the School of Law in conjunction with a Ph.D. in Sociology. Additional information is available from the PLGS director’s office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at the School of Law Concurrent Degree Programs (http://www.law.uci.edu/plgs) website.

**Faculty**

Edwin Amenta, Ph.D. University of Chicago, *Professor of Sociology; Political Science* (political sociology, historical and comparative sociology, social movements, social policy)

Jacob P. Avery, Ph.D. University of Pennsylvania, *Assistant Professor of Sociology* (poverty and inequality, culture and interaction, city and community, human service organizations, sociology of knowledge, ethnography)

Stanley Bailey, Ph.D. University of California, Los Angeles, *Associate Professor of Sociology* (race and ethnicity, religion, immigration, Latin America)

Nina Bandelj, Ph.D. Princeton University, *Associate Professor of Sociology; European Languages and Studies* (economic sociology, culture, organizations, social networks, political economy, globalization, social change, central and eastern Europe)

Frank D. Bean, Ph.D. Duke University, *UCI Chancellor's Professor of Sociology; Economics* (international migration, demography, racial and ethnic relations, economic sociology, family)

Christine Beckman, Ph.D. Stanford University, *Associate Professor of Paul Merage School of Business; Sociology*

Catherine I. Bolzendahl, Ph.D. Indiana University, *Associate Professor of Sociology* (gender, the welfare state, political sociology, comparative sociology, family, quantitative methodology)

Susan K. Brown, Ph.D. University of Washington, *Associate Professor of Sociology* (immigration, inequality, urban sociology)

Carter Butts, Ph.D. Carnegie Mellon University, *Professor of Sociology; Electrical Engineering and Computer Science; Statistics* (mathematical sociology, social networks, quantitative methodology, human judgment and decision making, economic sociology)

Kitty C. Calavita, Ph.D. University of Delaware, *Professor Emerita of Criminology, Law and Society; Sociology* (sociology of law, criminology, social deviance, immigration, inequality)

Gilvento Q. Conchas, Ph.D. University of Michigan, *Associate Professor of Education; Sociology*
John D. Dombrink, Ph.D. University of California, Berkeley, Professor of Criminology, Law and Society; Sociology (crime and criminal justice, deviance and social control)

George Farkas, Ph.D. Cornell University, Professor of Education; Education; Sociology

Katherine Faust, Ph.D. University of California, Irvine, Professor of Sociology (social networks, animal social organization, population processes and social networks, research methods)

Martha S. Feldman, Ph.D. Stanford University, Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management and Professor of Planning, Policy, and Design; Paul Merage School of Business; Political Science; Sociology

Cynthia Feliciano, Ph.D. University of California, Los Angeles, Associate Professor of Sociology; Chicano/Latino Studies; Education (race/ethnicity/ minority relations, migration and immigration, education)

Glenda M. Flores, Ph.D. University of Southern California, Assistant Professor of Chicano/Latino Studies; Sociology

David J. Frank, Ph.D. Stanford University, Professor of Sociology; Education; Political Science (globalization, sexuality, the natural environment, higher education)

Samuel L. Gilmore, Ph.D. Northwestern University, Lecturer of Sociology

John Hipp, Ph.D. University of North Carolina at Chapel Hill, UCI Chancellor's Fellow and Professor of Criminology, Law and Society; Sociology (community context of crime, household decisions and neighborhood change, research methods)

Ann Hironaka, Ph.D. Stanford University, Associate Professor of Sociology (political sociology, war and peace, environmental sociology, ethnic and racial conflict)

Matthew L. Huffman, Ph.D. University of California, Santa Barbara, Professor of Sociology; Paul Merage School of Business (race/gender inequality, organizations, labor markets)

James R. Hull, Ph.D. University of North Carolina at Chapel Hill, Lecturer with Potential Security of Employment of Social Sciences; Sociology

Valerie Jenness, Ph.D. University of California, Santa Barbara, Dean of the School of Social Ecology and Professor of Criminology, Law and Society; Sociology (links between deviance and social control (especially law), the politics of crime control and criminalization, social movements and social change, corrections and public policy)

Charis E. Kubrin, Ph.D. George Washington University, Professor of Criminology, Law and Society; Sociology (crime, neighborhood effects and social processes, race/ethnicity and violence, immigration and crime)

Jee-Young J. Lee, Ph.D. Columbia University, Professor of Sociology; Asian American Studies (immigration, race/ethnicity, social inequality, Asian American studies)

Shampa Mazumdar, Ph.D. Northeastern University, Lecturer of Sociology

James W. Meeker, Ph.D. State University of New York at Buffalo, Professor of Criminology, Law and Society; Sociology (sociology of law, criminal justice, research methodology, statistics, access to civil justice)

David S. Meyer, Ph.D. Boston University, Professor of Sociology; Planning, Policy, and Design; Political Science (social movements, public policy, peace and war, social justice)

Charles T. O'Connell, Ph.D. University of California, Los Angeles, Lecturer of International Studies; Sociology

Andrew Penner, Ph.D. University of California, Berkeley, Assistant Professor of Sociology (gender, inequality, education, family, race)

Francesca Polletta, Ph.D. Yale University, Professor of Sociology (social movements, democracy, culture, sociology of law, race and ethnicity, social theory)

Henry N. Pontell, Ph.D. State University of New York at Stony Brook, Professor of Criminology, Law and Society; Sociology (white-collar and corporate crime, criminology, criminal justice, deviance and social control, sociology of law)

Charles C. Ragin, Ph.D. University of North Carolina at Chapel Hill, UCI Chancellor's Professor of Sociology (comparative and historical sociology, social inequality, political sociology, quantitative methodology, qualitative methodology)

Maria G. Rendon, Ph.D. Harvard University, Assistant Professor of Planning, Policy, and Design; Sociology

Belinda B. Robnett-Olsen, Ph.D. University of Michigan, Professor of Sociology; African American Studies; Culture and Theory (social movements, race and ethnicity, gender, social change, African Americans)
Courses

SOCIOL 1. Introduction to Sociology. 4 Units.
Considers major sociological concepts, theories, and research findings illuminating processes of interpersonal interaction, social differentiation and stratification, integration and conflict, and change, with attention to variation in class, race/ethnic, gender, multicultural, and cross-national perspectives and experiences.
(III, VII)

SOCIOL 2. Globalization and Social Change. 4 Units.
Examines globalization and international issues from the perspective of sociology and related fields. Issues include economic globalization and global inequality, international environmental problems, international politics, trends in global culture, and global conflict.
(III, VIII)
**SOCIOL 3. Social Problems. 4 Units.**
Focuses on how institutional and organizational features of societies generate problems for people. Particular attention directed at a set of problems related to political and economic inequality: poverty, racism, sexism, urban and population problems, the environment, the criminal justice system.

(Ill, VII)

**SOCIOL 10A. Probability and Statistics. 4 Units.**
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Same as ANTHRO 10A.
Overlaps with PSYCH 10A, SOCECOL 13, SOC SCI 10A, POL SCI 10A, SOC SCI 9A.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Va)

**SOCIOL 10B. Probability and Statistics. 4 Units.**
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10A.
Same as ANTHRO 10B.
Overlaps with PSYCH 10B, SOCECOL 13, SOC SCI 10B, POL SCI 10B, SOC SCI 9B.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Va)

**SOCIOL 10C. Probability and Statistics. 4 Units.**
An introduction to probability and statistics. Emphasis on a thorough understanding of the probabilistic basis of statistical inference. Emphasizes examples from sociology, anthropology, and related social science disciplines.

Prerequisite: SOCIOL 10B.
Same as ANTHRO 10C.
Overlaps with PSYCH 10C, SOCECOL 13, SOC SCI 10C, POL SCI 10C, SOC SCI 9C.

Restriction: Anthropology and Sociology majors have first consideration for enrollment.

(Vb)

**SOCIOL 19. Special Topics: Methods. 4 Units.**
Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

**SOCIOL 29. Special Topics: Theory. 4 Units.**
Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: May be repeated for credit unlimited times.

**SOCIOL 31. Self-Identity and Society. 4 Units.**
Studies sociological contributions to theory and research in social psychology, with focus on the social influences on personality, attitudes, beliefs, and behavior; socialization, human groups, and social interaction.

Same as PSYCH 78A.
Overlaps with SOCIOL 61A.

(III)
SOCIOL 39. Special Topics: Social Psychology. 4 Units.
Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 41. Small Group Dynamics. 4 Units.
Deals with models for understanding behavior in small groups, including coalition formation, socialization, group norms and decision rules, leadership, conformity, group structure, and communication processes.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 43. City and Community. 4 Units.
Examines nature, causes, and consequences of urbanization along with changing scale and complexity, demographic/ecological city growth patterns, quality of life in urban areas, processes of decision-making, and bearing of sociological investigation on public policy concerns in contemporary urban society.

Overlaps with PP&D 40.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 44. Births, Deaths, and Migration. 4 Units.
Introduction to the analysis of human population including fertility, mortality dispersion, sex distribution. Attention is focused on the effects of these variables on, e.g., over-population, social disorganization, and the stability of social institutions.

(VIII)

SOCIOL 49. Special Topics: Structures. 4 Units.
Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 51. Asian American Family & Community. 4 Units.
Briefly examines the history of different Asian American groups and provides an in-depth analysis of issues related to family composition, mate selection, changing gender roles, and intergenerational conflict.

(VII)

SOCIOL 55. Media and Society. 4 Units.
Examines social implications of changes in American mass media since World War II, including demise of big-city newspapers, rise of broadcast television, fragmentation of radio and magazine markets. Explores potential implications on culture and institutions of emerging technologies.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 56. Religion and Society. 4 Units.
A critical and personal examination of the varieties of religious and spiritual experiences human beings are undergoing in contemporary society. The role of conscious understanding and unconscious conditioning regarding religion and spirituality.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 59. Special Topics: Social Institutions and Culture. 4 Units.
Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 62. Families and Intimate Relations. 4 Units.
Sociological theories/research on marriage, kinship, intimacy, and divorce. Emphasis on comparing family patterns in different social classes, ethnic groups, and societies, and on relating family life to the economy and other social institutions. Topics include gender roles, child-rearing, historical change.

(III)
SOCIOL 63. Race and Ethnicity. 4 Units.
Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SOC SCI 70A.

(VII)

SOCIOL 64. Sociology of Sexuality. 4 Units.
Explores how and why sexuality matters in society, affecting our expectations, experiences, and opportunities. Provides the conceptual and theoretical tools to analyze the personal and institutional consequences of different social constructions of sexuality.

SOCIOL 65. Cultures in Collision: Indian-White Relations Since Columbus. 4 Units.
An introduction to theories, terms, concepts, and methods used by anthropologists and sociologists to understand Native American cultures. How racial construction of an Indian "other" emerged, how anthropology contributed to Indian invisibility, and the persistence of Indian identity are examined.

Same as ANTHRO 85A.

(VII)

SOCIOL 68. Gender and Race Inequality in the Workplace. 4 Units.
Analysis of current state and trends in major inequality measures including the wage gap, occupational segregation, and access to managerial positions. Theories that purport to explain such differences, and the related empirical evidence, are also covered.

SOCIOL 68A. Ethnic and Immigrant America. 4 Units.
Focusing on Asian, Latino, and Black immigrant groups, examines the second generation's experience of straddling two cultures and growing up American. Covers topics such as assimilation, bilingualism, race relations, education, bicultural conflicts, interracial marriage, and multiracial identities.

Same as CHC/LAT 65.

(VII)

SOCIOL 69. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.
Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

SOCIOL 79. Special Topics: Societies and Social Inequality. 4 Units.
Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

SOCIOL 110. Research Methods. 4 Units.
Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches. Course may be offered online.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 110W. Research Methods. 4 Units.
Methods of data collection and analysis used by sociologists. Experimental methods, surveys, and interviews, field research and participant observation, demographic methods, historical and comparative approaches. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment.

(Ib)

SOCIOL 112. Logical Models in Social Sciences. 4 Units.
Science asks two questions. "How things are?" leads to measurement and statistical analysis. But we see only what we look for. "How things should be, on logical grounds?" leads to quantitative logical models which tell us what to look for.

Same as POL SCI 136A.
SOCIOL 119. Special Topics: Methods. 4 Units.
Studies in selected areas of methods. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 120. Sociological Theory. 4 Units.
What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 120W. Sociological Theory. 4 Units.
What a theory of society is and is not. Historical and contemporary models, perspectives, and schools.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 129. Special Topics: Theory. 4 Units.
Studies in selected areas of theory. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 133. Sociology of Generosity. 4 Units.
Introduces recent scientific research on the emergence of prosocial behavior that includes, but is not limited to, cooperation, fairness, reciprocity, and altruism. Emphasis is on learning why individuals would pursue collective benefits at the expense of self-interests.

SOCIOL 134. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as INTL ST 105A, SOC SCI 103A, POL SCI 130A.

Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

SOCIOL 135. Social Psychology of Networks. 4 Units.
Review of network methods used in small group and organizational research. Discussion of social psychological literature relevant to the network of study of cognitive social structure, exchange/communication, identity negotiation, and social control. Case study of network datasets exemplifies research issues.

Same as PSYCH 178N.

Restriction: Sociology and Psychology majors have first consideration for enrollment.

SOCIOL 136. Religious Traditions of Asian Americans. 4 Units.
Studies the religious traditions of Asian Americans, focusing on the transplantation of religious institutions, establishment of sacred spaces, celebration of religious holidays, socialization of children, as well as birth, marriage, gender relations, death, family.

Same as ASIANAM 143.
SOCIOL 138. Business Decisions. 4 Units.
Surveys normative and descriptive models of decision-making behavior, with an emphasis on organizational and policy contexts. Topics include rational choice theory, biases and heuristics, framing effects, and overconfidence. Management fads, panics, and herd behavior are also discussed.

Prerequisite: (ANTHRO 10A and ANTHRO 10B and ANTHRO 10C) or (SOCIOL 10A and SOCIOL 10B and SOCIOL 10C) or (SOC SCI 10A and SOC SCI 10B and SOC SCI 10C) or (MATH 2A and MATH 2B and (STATS 7 or MGMT 7)).

Same as ECON 148.
Restriction: Sociology majors have first consideration for enrollment.

SOCLIO 139. Special Topics: Social Psychology. 4 Units.
Studies in selected areas of social psychology. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.

SOCLIO 141. Organizations. 4 Units.
How bureaucracies, formal organizations, and voluntary associations work, how/why they grow, and where they are going. History and structure of organizational rationality; dynamics of organized groups; behavior in organizations; limits of bureaucratization and attempts to overcome these limits through decentralization.

Same as POL SCI 155C.
Restriction: Sociology and Political Science majors have first consideration for enrollment.

SOCLIO 142. White-Collar Crime. 4 Units.
Examines criminal activity in business and corporate enterprise, organizations, and the professions. Theories regarding the causes and control of white-collar and corporate crime are covered as well as the numerous definitions of these terms.

Same as CRM/LAW C142.
Restriction: Sociology, Criminology, Law and Society, and Social Ecology majors have first consideration for enrollment.

SOCLIO 143. Social Networks and Social Support. 4 Units.
Examines the manner in which behaviors/attitudes of individuals are affected by their network ties to others. How are peoples' opportunities and well-being increased/decreased by their social networks? May include studies in mental/physical health, job seeking, separation and loss, and aging.

Restriction: Sociology majors have first consideration for enrollment.

SOCLIO 144. Politics, Power, and Society. 4 Units.
Includes an examination of the major theoretical approaches to political sociology, and the application of these ideas to the politics of advanced capitalist societies. Also considers stability and change in power structures.

Restriction: Sociology majors have first consideration for enrollment.

SOCLIO 145. Occupations and Professions. 4 Units.
What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCLIO 145W. Occupations and Professions. 4 Units.
What makes some jobs satisfying and others boring? How does technology influence the workplace? What changes are coming in the U.S. job market? Sociology and psychology of occupations. Students interview workers and study aspects of their occupations.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

(Ib)
SOCIOL 147A. Cities and Social Change. 4 Units.
Focuses on comparative urban political economy and the way cities and urban process are linked to changes in the global system. Attempts to draw on a diverse interdisciplinary literature that includes sociology, geography, and urban planning.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCIOL 147AW. Cities and Social Change. 4 Units.
Focuses on comparative urban political economy and the way cities and urban process are linked to changes in the global system. Attempts to draw on a diverse interdisciplinary literature that includes sociology, geography, and urban planning.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

(Ib)

SOCIOL 149. Special Topics: Structures. 4 Units.
Studies in selected areas of structures. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 150. Sociological Lens on Religion. 4 Units.
Examines the effects of religious beliefs, belonging, and institutions on social dynamics, including class, gender, and racial stratification, politics, and social movements. Additional topics: the sociological significance of conversion, commitment, and secularization/sacralization.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 152. Sociology and Psychology of the Arts. 4 Units.
Explores the relationship between artists and the "art world" through which artistic activity is defined, supported, and consumed. Empirical studies in the plastic arts, performing arts, and literature are used to examine varieties of aesthetic expressions.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

SOCIOL 152W. Sociology of Art and Popular Culture. 4 Units.
Explores the relationship between artists and the "art world" through which artistic activity is defined, supported, and consumed. Empirical studies in the plastic arts, performing arts, and literature are used to examine varieties of aesthetic expressions.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.

(Ib)

SOCIOL 154. Medical Sociology. 4 Units.
Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Restriction: Upper-division students only. Sociology majors have first consideration for enrollment.

SOCIOL 154W. Medical Sociology. 4 Units.
Current problems in U.S. health-care system and proposals for reform. Examines financial barriers to access; problem of patient dumping; underinsurance; prenatal and perinatal care; child services; preventative care and needs of the elderly; minorities; low-income people; undocumented.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Upper-division students only. Sociology majors have first consideration for enrollment.

(Ib)

SOCIOL 155B. Baseball and Society. 4 Units.
An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.

Restriction: Sociology majors have first consideration for enrollment.
SOCIOL 155BW. Baseball and Society. 4 Units.
An examination of baseball's role in American social life over the last 150 years. Issues of fraternal organizations, national development, capitalism, rationalization, race and ethnicity, gender, economic organization, labor relations, and politics are discussed.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 156. Deviance. 4 Units.
Perspectives on deviance and criminality in behavior, institution, community, and myth. The suitability of contemporary theories of deviant behavior.
Same as CRM/LAW C107, PSYCH 177D.
Restriction: Criminology, Law and Society, Social Ecology, Sociology, and Psychology majors have first consideration for enrollment.

SOCIOL 158C. Money, Work, and Social Life. 4 Units.
Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 158CW. Money, Work, and Social Life. 4 Units.
Sociological perspective on issues related to money and work. Consumption practices and lifestyles, jobs and organizations, issues of money in intimate relations, marriage, and households, illegal work, discrimination, economic globalization are discussed.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 159. Special Topics: Social Institutions and Culture. 4 Units.
Studies in selected areas of social institutions and culture. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 161. Sociology of Sex and Gender. 4 Units.
Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.

SOCIOL 161W. Sociology of Sex and Gender. 4 Units.
Explores complex processes contributing to social construction of gender and sexuality in the U.S. with focus on intersection of gender, race, ethnicity, sexuality, and class; evaluates how men and women are differentially constituted in family, education, work, politics, media, language.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

SOCIOL 164W. Aging and Society. 4 Units.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Sociology majors have first consideration for enrollment. Upper-division students only.
SOCIOL 165A. Social Inequality: Sociological Perspectives. 4 Units.
Concrete sociological studies from across the world, including the United States, are compared to give perspectives on social status, power, economic differences, race, ethnicity, and gender.
Prerequisite: One course in Anthropology, Economics, Political Science, or Sociology.

SOCIOL 165AW. Social Inequality: Sociological Perspectives. 4 Units.
Concrete sociological studies from across the world, including the United States, are compared to give perspectives on social status, power, economic differences, race, ethnicity, and gender.
Prerequisite: One course in Anthropology, Economics, Political Science, or Sociology. Satisfactory completion of the Lower-Division Writing requirement.

SOCIOL 166. Immigration and Inequality. 4 Units.
Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.
Same as SOC SCI 168B.

SOCIOL 167A. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.
Same as CHC/LAT 148.
Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 167AW. Racial and Ethnic Relations in the United States. 4 Units.
Examines central questions and issues in the field of race and ethnicity; the emergence, maintenance, and consequences of the ethnic and racial stratification system in the United States; the future of racial and ethnic relations; and relevant public policy issues.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as CHC/LAT 148W.
Restriction: Chicano/Latino Studies and Sociology majors have first consideration for enrollment.

SOCIOL 168. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.
Same as POL SCI 134J.
Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

SOCIOL 168W. Sexism and Power. 4 Units.
Sexism seen as a socially constructed power which creates and maintains gender differences as relations and practices of structured inequalities. Males and females are objects constructed in a powered language dominated and controlled by males to their positional/distributional advantage.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as POL SCI 134JW.
Restriction: Upper-division students only. Sociology and Political Science majors have first consideration for enrollment.

SOCIOL 169. Special Topics: Age, Gender, Race, and Ethnicity. 4 Units.
Studies in selected areas of age, gender, race, and ethnicity. Topics addressed vary each quarter.
Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.
Restriction: Sociology majors have first consideration for enrollment.
SOCIOL 170A. Vietnam War. 4 Units.
Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as INTL ST 143A.

SOCIOL 170B. U.S. War on Terrorism. 4 Units.
Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as INTL ST 175A.

SOCIOL 171. Environment and Society. 4 Units.
Examines society's changing relationship to the natural world. Delineates different models of "nature" and then explores their institutional roots, the social responses they have generated, and their implications for social inequality.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 173. Social Inequality. 4 Units.
Sources, functions, and dynamics of the unequal distribution of wealth, prestige, knowledge, and power in American and other societies.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 174. Protests, Movements, and Revolutions. 4 Units.
A survey of models of collective action drawn from sociology, economics, psychology, and political science. Focus on areas such as social movements, strikes, crowd psychology, cults, fads, fashions, public opinion, and symbolic and mythical elements in collective culture.

Prerequisite: SOCIOL 1 or POL SCI 6A or ECON 1.

Same as POL SCI 156D.

Restriction: Political Science and Sociology majors have first consideration for enrollment.

SOCIOL 175B. China in the Global Age. 4 Units.
Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as INTL ST 158D.

SOCIOL 175D. Migration Destinations. 4 Units.
Examines the migration patterns to the three largest nations that receive immigrants (i.e., permanent settlers): Australia, Canada, and the United States.

Same as ASIANAM 171A, INTL ST 117B.

SOCIOL 177. Immigration and Social Policy. 4 Units.
Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 177W. Immigration and Social Policy. 4 Units.
Explains how people decide to migrate and how they are incorporated into a host society (both historically and currently), examines the effects of immigration on the U.S., analyzes how the framing of immigration shapes the discourse about the issue.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 179. Special Topics: Societies and Social Inequality. 4 Units.
Studies in selected areas of societies and social inequality. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.
SOCIOL 180A. Sociology Majors Seminar. 4 Units.
Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110.

Restriction: Sociology majors only.

SOCIOL 180AW. Sociology Majors Seminar. 4 Units.
Students learn sociology by doing it. A modest-sized research project is planned and implemented by each student.

Prerequisite: SOCIOL 110. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Sociology majors only.

(Ib)

SOCIOL 188BW. Honors Research and Thesis. 4 Units.
Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Prerequisite: SOCIOL H188A. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Campuswide Honors Program students only.

(Ib)

SOCIOL H188A. Honors Research and Thesis. 4 Units.
Focuses on the design and implementation of individual research projects undertaken by senior Sociology majors. Writing projects consist of a proposal and paper on some empirical research.

Restriction: Campuswide Honors Program students only.

SOCIOL 189. Special Topics: Honors Sequence. 4 Units.
Independent honors research with Social Sciences faculty.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Sociology majors have first consideration for enrollment.

SOCIOL 197. Field Study. 4 Units.
Field study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

SOCIOL 198. Directed Group Study . 4 Units.
Directed study with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

SOCIOL 199. Independent Study. 1-4 Units.
Independent research with Sociology faculty.

Repeatability: May be repeated for credit unlimited times.

SOCIOL 202A. Proseminar I in Sociology. 1 Unit.
Introduces first-year graduate students in Sociology to the current research interests of Sociology faculty, as well as to other aspects of graduate life at UCI and to the profession of sociology more generally.

Restriction: Graduate students only.

SOCIOL 202B. Proseminar II in Sociology. 4 Units.
Focus is on second-year research projects, design, development, data gathering, analysis, and preparing oral and written presentations of the results. Students learn analytic and writing skills, gain experience with research processes, and become socialized about professional standards, customs, and institutions.

Restriction: Graduate students only.
SOCIOL 210A. Classical Social Theory. 4 Units.
Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Same as SOC SCI 253N.
Restriction: Graduate students only.

SOCIOL 210B. Contemporary Social Theory. 4 Units.
Familiarizes students with twentieth-century developments in social thought that have influenced sociological research, suggesting "what is living and what is dead" in the "classics" and offering an overview of the main outlines of recent sociological theorizing.

Same as SOC SCI 253R.
Restriction: Graduate students only.

SOCIOL 211A. Sociology of Gender. 4 Units.
An introduction to the sociology of gender in the U.S. and globally. The social construction of gender and sexuality; theoretical perspectives and feminist frameworks. Theories of economy, patriarch, and race, and the social positions of women and men.

Restriction: Graduate students only.

SOCIOL 212. Network Theory. 4 Units.
An introduction to theoretical work in the field of social networks. Topics include baseline models, homophily, and propinquity, exchange and power, balance theory, diffusion and social influence, equivalence, and cohesion. Deductive use of theory to make novel predictions is emphasized.

Restriction: Graduate students only.

SOCIOL 219. Special Topics: Theory. 2-4 Units.
Studies in selected areas of theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 220A. Research Design. 4 Units.
Data collection, organization, and analysis in ethnographic or quasi-experimental settings, including interviewing, participant observations, behavior observations, and questionnaires. Research design issues include sampling, longitudinal research, and comparative research. Emphasis on the integration of qualitative and quantitative data.

Overlaps with SOCIOL 265.
Restriction: Graduate students only.

SOCIOL 221A. Graduate Statistics I. 4 Units.
Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Restriction: Graduate students only.

SOCIOL 221B. Graduate Statistics II. 4 Units.
Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A.
Restriction: Graduate students only.

SOCIOL 221C. Graduate Statistics III. 4 Units.
Statistics with emphasis on applications in sociology and anthropology. Examines exploratory uses of statistical tools in these fields as well as univariate, bivariate, and multivariate applications in the context of the general linear model.

Prerequisite: SOCIOL 221A and SOCIOL 221B.
Restriction: Graduate students only.
SOCIOL 222A. Comparative and Historical Sociological Methods. 4 Units.
Topics include the logic of comparative and historical analysis techniques and the examination of exemplar works in representative problem areas.
Restriction: Graduate students only.

SOCIOL 223. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.
Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.
Same as POL SCI 273A, PP&D 213, MGMTPHD 297K.
Restriction: Graduate students only.

SOCIOL 226A. Methods of Demographic Analysis. 4 Units.
Introduces basic demographic methods used in social science and public health research. Topics include sources and limitations of demographic data; components of population growth; measures of nuptiality, fertility, mortality, and population mobility projection methods; and demographic models.
Same as PUBHLTH 209.
Restriction: Graduate students only.

SOCIOL 227A. Seminar Ethnographic & Qualitative Field Methods. 4 Units.
Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.
Grading Option: In progress only.
Restriction: Graduate students only.

SOCIOL 227B. Seminar Ethnographic & Qualitative Field Methods. 4 Units.
Comprehensive and critical discussion of the traditions of qualitative fieldwork; detailed examination of the collection, coding, analysis, and presentation of ethnographic/qualitative field data; and close mentoring of student projects culminating in an original research paper.
Prerequisite: SOCIOL 227A.
Restriction: Graduate students only.

SOCIOL 229. Special Topics: Methods. 1-4 Units.
Studies in selected areas of methods. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 230A. Race and Ethnicity. 4 Units.
An examination of central questions and issues in the field of race and ethnicity through a critical analysis and discussion of the principal theoretical perspectives and paradigms that have framed much of the scholarship in the area.
Restriction: Graduate students only.

SOCIOL 232. Inequality. 4 Units.
Theoretical and empirical approaches to the study of social and economic inequality, with special attention to race/ethnicity, class, and gender.
Restriction: Graduate students only.

SOCIOL 233. Immigration and the New Second Generation. 4 Units.
Investigates how the children of today's immigrants incorporate into the United States social structure. Covers topics such as assimilation, immigrant families and communities, education, language, racial and ethnic identities, gender, education, and the changing U.S. racial structure.

SOCIOL 234. Theory of Ethnicity. 4 Units.
Examines critically the meaning and measurement of ethnicity, race, and nation in sociological theory and research. Theories of ethnicity are explored, along with empirical studies of the construction of ethnic and pan-ethnic identities in historical and contemporary contexts.
Restriction: Graduate students only.
SOCIOL 235. Poverty and Development . 4 Units.
Critical examines competing conceptualizations, methods of measurement, and poverty alleviation strategies widely used in developing countries. Focuses on poverty conceptualized as economic deprivation, well-being, vulnerability, and social exclusion.

Same as PP&D 251.
Restriction: Graduate students only.

SOCIOL 236. Immigrant Incorporation. 4 Units.
Focuses on the conceptual and theoretical ideas on immigrant adaptation and identity to a new country; frameworks that emphasize incorporation as a melting pot; synthesizing the theoretical and empirical literature on incorporation in order to develop better models.
Restriction: Graduate students only.

SOCIOL 237. Educational Inequality. 4 Units.
Focuses on macro-level explanations of inequality of schooling, particularly in the U.S. context. Explores traditional models, such as conflict, functionalism, status-attainment, cultural reproduction, and newer synthetic accounts. Emphasis on higher education access and the intersection of education and work.
Restriction: Graduate students only.

SOCIOL 239. Special Topics: Social Inequality. 2-4 Units.
Studies in selected areas of social inequality. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 240A. Social Movements. 4 Units.
A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.
Same as SOC SCI 253J.
Restriction: Graduate students only.

SOCIOL 241A. Political Sociology. 4 Units.
Begins with an examination of the three major orientations to the State (Pluralist, Elitist, and Class). Next considers current topics in political sociology including the Welfare State, the New Deal, political behavior, social movements, participation, and democracy.
Restriction: Graduate students only.

SOCIOL 242. Sociology of Culture. 4 Units.
Major perspectives in the sociology of culture. Topics include the role of cultural dynamics in the reproduction of inequality, collective action, political and organizational decision making, emotional experience, and the social impacts of new technologies.

SOCIOL 249. Special Topics: Political Sociology and Social Movements. 2-4 Units.
Studies in selected areas of political sociology and social movements. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 252A. Global Urbanization. 4 Units.
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.
Same as SOC SCI 254J, PP&D 273.
Restriction: Graduate students only.

SOCIOL 259. Special Topics: Global Studies and Comparative Development. 2-4 Units.
Studies in selected areas of global studies and comparative development. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.
SOCIOL 260A. Family and Households . 4 Units.

Restriction: Graduate students only.

SOCIOL 261A. Life Course Sociology. 4 Units.
Age is a central organizing principle of individual lives, social institutions, and human populations. Considers how age is socially defined and how developmental transitions between ages (i.e., growing up and growing older) are accomplished.

Restriction: Graduate students only.

SOCIOL 262A. Population. 4 Units.
Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Same as SOC SCI 253F.

Restriction: Graduate students only.

SOCIOL 263. The Sociology and Demography of Health and Illness. 4 Units.
Health from a population perspective. Topics include pandemics; the "McKeown debate" (standard of living vs. public health vs. medicine); long-term health changes in developed countries; health and socio-economic status; immigrant health. Not a course in medical sociology as such.

SOCIOL 264. Immigrant America. 4 Units.
The study of the causes and consequences of international migration has become one of the most vital fields of sociological theory and research. Examines principal theoretical perspectives and empirical research on contemporary immigration flows and the processes of incorporation.

Restriction: Graduate students only.

SOCIOL 265. DASA Research Design. 4 Units.
Data collection, organization, and analysis in population studies and demography. Research design issues include sampling, longitudinal research, and comparative research.

Prerequisite: Enrollment in DASA program.

Overlaps with SOCIOL 220A.

Restriction: Graduate standing only.

SOCIOL 269. Special Topics: Social Demography. 4 Units.
Studies in selected areas of social demography. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOCIOL 271. Theories of Power and Empowerment. 4 Units.
Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as POL SCI 223A, PP&D 279, MGMTPHD 297R.

Restriction: Graduate students only.

SOCIOL 272A. Work and Industrial Relations. 4 Units.
Explores the nature, causes, and results of workplace conflict in American Society. Considers topics such as "American Exceptionalism," sex segregation in the workplace, strikes and the role of unions in American society.

Restriction: Graduate students only.

SOCIOL 279. Special Topics: Social Organizations and Institutions. 2-4 Units.
Studies in selected areas of social organizations and institutions. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.
SOCIOL 280. Analysis of Social Network Data. 4 Units.
Overview and application of methods for analyzing social network data. Topics include: data structures, visualization, graph theory, centrality, subgroups, positions, blockmodels, local properties, and statistical models. Social network analysis software is used to analyze a range of examples.
Restriction: Graduate students only.

SOCIOL 281. Introduction to Social Network Analysis. 4 Units.
Designed to provide a broad overview of social network analysis. At the same time, students will have an opportunity to delve deeply into applications of the network approach in their individual areas of interest.
Restriction: Graduate students only.

SOCIOL 289. Special Topics. 2-4 Units.
Studies in selected areas of Social Sciences. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.
Restriction: Graduate students only.

SOCIOL 290. Dissertation Research. 1-12 Units.
Dissertation research with Sociology faculty.
Repeatability: May be taken for credit 10 times.
Restriction: Graduate students only.

SOCIOL 299. Independent Study. 1-12 Units.
Independent research with Sociology faculty.
Repeatability: May be repeated for credit unlimited times.
Restriction: Graduate students only.

Graduate Program in Social Science

In addition to the departmental graduate programs, the School offers the M.A. degree in Social Science with a concentration in Demographic and Social Analysis (p. 1858), and the Ph.D. degree in Social Science with a concentration in Mathematical Behavioral Sciences (p. 1859). Each program is administered by a different group of faculty.

Graduate Concentration in Demographic and Social Analysis

http://www.demography.uci.edu

The M.A. in Social Science with a concentration in Demographic and Social Analysis offers specialized training in the research skills to address practical problems confronting society, business, government, and the nonprofit sector. The concentration emphasizes the Pacific Rim and issues defining Southern California’s population, such as immigration, changing household and family structure, racial and economic inequalities, and the impact of local and regional population growth. Informed by the interdisciplinary field of demography, the program draws on faculty and courses in the Schools of Social Sciences and Social Ecology.

Admission

Students are admitted to the program in the fall quarter. Students must hold a B.A. or B.S., normally in a social science or related field, and should have had at least four units of undergraduate statistics or equivalent mathematics courses. Students must meet the general admission requirements for graduate studies, which include official transcripts of all college course work, Graduate Record Examination scores for tests taken within the past five years, and three letters of recommendation. Applicants whose first language is not English must also take the Internet-based Test of English as a Foreign Language (TOEFL) and achieve a score of at least 80 out of 120. The International English Language Testing System (IELTS) examination may be used instead, in which case a minimum overall score of 7 out of 9 is required, with a score of not less than 6 out of 9 on any individual module.

Requirements

The M.A. requires 36 units of study and an oral exit examination. All students must complete 20 units of required courses which include one course in research design, one in demographic methods, one in populations, and two in statistics. In addition, students must complete 16 units of elective courses in population issues or research methods. No more than four units may be internship, independent study, directed readings, or thesis courses (to prepare for the oral examination). One or two electives may be upper-division undergraduate courses, with the remainder being graduate courses. All courses must be completed with a grade of B or better.
The M.A. in Social Science with a concentration in Demographic and Social Analysis may also be awarded to Ph.D. students who complete the necessary requirements.

Courses
For graduate courses in social science click on the "Courses" tab above and scroll down to SOC SCI 209.

Graduate Concentration in Mathematical Behavioral Sciences

http://www.imbs.uci.edu/NEWphdprogram.html

The concentration in Mathematical Behavioral Sciences offers a program of interdisciplinary and mathematical approaches to the study of human behavior, providing high levels of training in current mathematical modeling and in mathematics and software use and programming. The program is administered by an interdisciplinary group of faculty. Within the concentration, two optional emphases are available: Social Networks; and Games, Decisions, and Dynamical Systems. Specific requirements are detailed below.

Admission

Admission to the concentration in Mathematical Behavioral Sciences requires evidence of appreciable mathematical skill and knowledge. As an absolute minimum, a candidate should have taken one full year of calculus, including calculus of several variables, and one course in linear algebra, and should also provide evidence of additional mathematical depth. This depth can be manifested in a number of different ways including, but not restricted to, an undergraduate degree in mathematics or physical science, a high score on the quantitative section of the GRE general test, or a strong undergraduate minor in mathematics. In addition, students should have some exposure to a behavioral science field. Especially useful is some experience with behavioral science modeling.

Those students interested in either the emphasis in Social Networks or the emphasis in Games, Decisions, and Dynamical Systems should make this clear in their application. A student is free at any time after admission to move into or out of either emphasis, but will be subject to the requirements in effect at the time of original admission to the concentration in Mathematical Behavioral Sciences.

General Requirements

Four major classes of requirements must be fulfilled. Since a number of options are available, the student will, in consultation with an advisor, develop a plan of study.

Quantitative/Mathematical. To be completed by the end of the third year:

1. one course each in analysis beyond calculus, abstract algebra beyond linear algebra, and logic; and
2. two quarters of mathematical statistics, with calculus as a prerequisite and covering the fundamentals of probability and random variables.

A list of courses eligible for satisfying the Quantitative/Mathematical requirement is available at the Institute for Mathematical Behavioral Sciences (http://www.imbs.uci.edu/NEWphdprogram.html) website.

Language/Computer. All students must be sufficiently familiar with various computer programs and languages to be able to conduct serious research in their field of interest and must submit either proposed courses or some demonstration of competency as part of their plan of study. In addition, students must either

1. attain proficiency in reading social science technical publications in one foreign language with a substantial relevant technical literature or
2. demonstrate proficiency in computer programming considerably beyond that of the standard computer requirement.

Because of the continually changing nature of computer languages and software, the conditions for fulfilling this additional computer expertise requirement is left to the judgment of the faculty subcommittee on computers of the Ph.D. program.

Substantive Minor. Students are expected to develop considerable expertise in some substantive field and in the application of models to it. This requires the completion of three courses at the upper-division or graduate level that do not necessarily entail extensive modeling, and three courses or seminars in which the primary thrust is mathematical modeling.

Research Papers and Colloquia. At the end of the second year, a 10–20-page paper reporting original research or a penetrating analysis of some subtopic of mathematical behavioral science (or either social networks, or games, decisions, and dynamical systems with a formal or mathematical component) is expected. An oral presentation will be given to faculty and graduate students. Two faculty members are assigned to read and evaluate the paper and talk.

Students are required to take for credit four quarters of the Mathematical Behavioral Sciences Colloquium, SOC SCI 211A--SOC SCI 211C, during their first three years. Although not a formal requirement, students are expected to attend the colloquium on a regular basis whenever in residence.

Time to Degree. Students must advance to candidacy in their fourth year. The normative time for completion of the Ph.D. is six years. The maximum time permitted is seven years.
Emphasis in Social Networks
The requirements for the emphasis in Social Networks are the same as the general requirements noted above, with the following exceptions:

Students may choose to complete the first part of the Quantitative/Mathematical requirement with one course each in discrete mathematics, graph theory, and logic.

Social Networks students are required to attend about 75 percent of the Mathematical Behavioral Sciences Colloquia, including all that are designated as Social Networks Colloquia, and also must attend occasional colloquia, usually of local faculty and graduate students, which are separate from the general Mathematical Behavioral Sciences Colloquia.

Emphasis in Games, Decisions, and Dynamical Systems
The requirements for the emphasis in Games, Decisions, and Dynamical Systems are the same as the general requirements noted above, with the following exceptions:

Students must complete eight graduate courses emphasizing game theory, decision theory, or dynamical systems. Examples of such courses are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 289</td>
<td>Special Topics in Anthropology (when topics are Networks and Social Evolution; Cognition, Technology, and Genes; Dynamical Processes.)</td>
</tr>
<tr>
<td>ECON 243A</td>
<td>Game Theory</td>
</tr>
<tr>
<td>ECON 270A-270B-270C</td>
<td>Political Economy I and Political Economy II and Political Economy III</td>
</tr>
</tbody>
</table>

These courses will count toward the substantive minor requirement.

Students are required to attend about 75 percent of the Mathematical Behavioral Sciences Colloquia, including all that are designated as Games, Decisions, and Dynamical Systems colloquia, and must also must attend occasional colloquia, usually of local faculty and graduate students, which are separate from the general Mathematical Behavioral Sciences Colloquia.

Master of Arts Degree
The M.A. degree is awarded to UCI Ph.D. students who complete necessary requirements or to students currently enrolled in a Ph.D. program (or equivalent) at another institution who are directly admitted for graduate study leading only to the master’s degree at UCI. Such applicants must provide evidence that their Ph.D. program agrees to this one-year arrangement. Requirements include the submission of a petition to the Graduate Committee along with a proposed plan of study consisting of 36 units of relevant Mathematical Behavioral Science courses, normally including the core requirement in mathematical statistics, and the satisfactory completion of a comprehensive examination.

Faculty
Nurudeen O. Alao, Ph.D. Northwestern University, Lecturer of Social Sciences; International Studies
Jeanett Castellanos, Ph.D. Washington State University, Lecturer with Security of Employment of Social Sciences
Ricardo Chavira, M.A. California State University, Northridge, Lecturer of Social Sciences; International Studies
Joanne Christopherson, Ph.D. University of California, Irvine, Lecturer of Social Sciences
Raúl A. Fernández, Ph.D. Claremont Graduate University, Director of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences
James J. Flink, Ph.D. University of Pennsylvania, Professor Emeritus of Social Sciences
Paula Garb, Ph.D. Russian Academy of Sciences, Lecturer of Social Sciences; International Studies; Undergraduate Education
Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences
James R. Hull, Ph.D. University of North Carolina at Chapel Hill, Lecturer with Potential Security of Employment of Social Sciences; Sociology
Nick R. Noviello, Ph.D. University of California, Irvine, Lecturer of Social Sciences
Bojan M. Petrovic, Ph.D. University of California, Irvine, Lecturer of Social Sciences; Political Science
Paul R. Shirey, Ph.D. University of California, Irvine, Lecturer of Social Sciences; Economics
Alfonso Valdez, Ph.D. University of Southern California, Lecturer of Social Sciences
Joseph L. White, Ph.D. Michigan State University, Professor Emeritus of Social Sciences

Courses

SOC SCI 1A. Principles in the Social Sciences. 4 Units.
Introduction to various disciplines within the social sciences. Provides an interdisciplinary perspective on understanding human behavior and social institutions, including interpersonal, economic, and cultural activities. Course may be offered online.

(SOC SCI H1E. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOCECOL H20A.
Restriction: Campuswide Honors Program students only.

SOC SCI H1F. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A.

Same as SOCECOL H20B.

Restriction: Campuswide Honors Program students only.

SOC SCI H1G. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B.

Same as SOCECOL H20C.

Restriction: Campuswide Honors Program students only.

SOC SCI 2A. Introduction to Social Science Analysis. 4 Units.
Introduction to social science research and analytical models. Theory construction and use of research methods in an interdisciplinary context. Discussion of the application of social science research to public policy. Computer laboratories develop creative thinking, graphing, and data presentation skills.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 3A. Computer-Based Research in the Social Sciences. 4 Units.
Focuses on the data manipulation, data visualization, and information searching techniques. Hands-on experience in hypothesis testing, mapping, graphics, and data arrays. Course may be offered online.

Restriction: School of Social Sciences majors have first consideration for enrollment.

SOC SCI 5A. Introduction to Human Geography. 4 Units.
Human behavior in a geographical context. Spatial patterns and organization of the cultural, social, and economic activities of man as imposed on and influenced by the earth's physical setting.

SOC SCI 5B. Introduction to Physical Geography. 4 Units.
An introduction to the physical world we live in. Distribution and dynamics of the earth's air, water, and solid crust. Concepts and principles from climatology and geology. Selected examples from North America and beyond.
SOC SCI 5D. US & World Geography. 4 Units.
Survey of general geographical principles and facts on a world scale, as well as introduction to the broad regional and resource geography of the U.S., emphasizing in particular the interactions of physical and cultural factors.

(III, VIII)

SOC SCI 9A. General Statistics and Probability I. 4 Units.
Introduction to the variety of statistical applications in many fields, including the humanities, physical and social sciences, business, forensic and health sciences. Descriptive statistics, including percentile ranks, standardization, and normal approximation. Estimation and the measurement of error.

Overlaps with ECON 10A, PSYCH 10A, SOCECOL 13, SOC SCI 10A, SOCIOL 10A, POL SCI 10A.

Restriction: Non-Social Sciences majors only.

(Va)

SOC SCI 9B. General Statistics and Probability II. 4 Units.
Introduction to statistical inference, sampling distributions, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chisquare. Selected applications in fields such as ecology, forensic science, and quantitative stylistics are based on student interests.

Prerequisite: SOC SCI 9A.

Overlaps with ANTHRO 10B, POL SCI 10B, PSYCH 10B, SOCECOL 13, SOC SCI 10B, SOCIOL 10B.

Restriction: Non-Social Sciences majors only.

(Va)

SOC SCI 9C. General Statistics and Probability III. 4 Units.
Focus on correlation and regression. One-way and two-way factorial analysis of variance. Introduction to repeated measures designs and non-parametric statistics. Critiquing the use of statistics in newspapers and popular magazines. Locating, accessing, and evaluating statistical data.

Prerequisite: SOC SCI 9B.

Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOC SCI 10C, SOCIOL 10C.

Restriction: Non-Social Sciences majors only.

(Vb)

SOC SCI 10A. Probability and Statistics in Social Sciences I. 4 Units.
Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Corequisite: SOC SCI 3A.

Prerequisite: SOC SCI 3A.

Overlaps with ECON 10A, PSYCH 10A, SOCECOL 13, POL SCI 10A, SOC SCI 9A, SOCIOL 10A.

Restriction: Lower-division students only. Social Science majors have first consideration for enrollment.

(Va)

SOC SCI 10B. Probability & Statistics in Social Sciences II. 4 Units.
Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests. Course may be offered online.

Prerequisite: SOC SCI 10A.

Overlaps with ANTHRO 10B, POL SCI 10B, SOCECOL 13, SOC SCI 9B, SOCIOL 10B, PSYCH 10B.

Restriction: Social Science majors have first consideration for enrollment.

(Va)
SOC SCI 10C. Probability & Statistics in Social Sciences III. 4 Units.
Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discuss use of statistics in newspapers and popular magazines.

Prerequisite: SOC SCI 10B.

Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOCIOL 10C.

Restriction: Social Science majors have first consideration for enrollment.

(Vb)

SOC SCI 11A. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.
Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon? Course may be offered online.

Same as IN4MATX 12.

(II, III)

SOC SCI 20. Model United Nations. 2 Units.
Focuses on simulations of the foreign policy pursuits of selected countries in the international community. Emphasis placed on understanding the rules of debate, as well as the policy positions of the student's selected country in the United Nations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 6 times.

SOC SCI 40. Social Policy and Public Service. 4 Units.
An introduction to the basic theories and principles of public policy. Students examine various influences on the development of public policy and the principle actors in the process, and learn to identify tools and techniques employed in policy making.

(III)

SOC SCI 66. Introduction to Gangs . 4 Units.
Introduces students to street gang subculture and explores risk factors associated with gang membership. Students develop a working definition for street gang and understand the difference between social and legal definitions. Also explores the connection between prison and street gangs.

SOC SCI 70A. Race and Ethnicity. 4 Units.
Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SOCIOL 63.

(VII)

SOC SCI 70C. Comparing Cultures. 4 Units.
Introduces students to the scope of cross-cultural comparisons by analyzing the theories, methodologies, and facts utilized by anthropologists, sociologists, social psychologists, political scientists, and historians in comparing cultures.

(III, VII)

SOC SCI 78A. Asian American Histories. 4 Units.
Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.

Same as ASIANAM 50, HISTORY 15C.

((III or IV) and VII).

SOC SCI 78B. Asian American Communities. 4 Units.
Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.

Same as ASIANAM 52.

(III, VII)
SOC SCI 78C. Asian Americans and Comparative Race Relations. 4 Units.
Analyzes the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across
gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.

Same as ASIANAM 53.

(III, VII)

SOC SCI 89. Special Topics in Social Sciences. 2-4 Units.
Studies in selected areas of Social Sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

SOC SCI 102A. Introduction to Geographic Information Systems. 4 Units.
Hands-on laboratory course introduces students to the fundamentals of Geographic Information Systems (GIS) technology using social science
applications. Students will learn to organize, manipulate, and display spatial data leading to the design of their own GIS research project.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 102B. Intermediate Geographic Information Systems. 4 Units.
Expands Geographic Information Systems (GIS) skills to more advanced theories and concepts in the spatial analysis of social science issues and
particularly to analyzing and interpreting spatial data. Students develop and complete a GIS research project of their own choosing.

Prerequisite: SOC SCI 102A.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 103A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and
mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as INTL ST 105A, POL SCI 130A, SOCIOL 134.

Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

SOC SCI 103B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include
revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A.

Same as INTL ST 105B, POL SCI 130B.

Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

SOC SCI 115D. International Business. 4 Units.
Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics
covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as INTL ST 112A.

SOC SCI 115E. California and Global Economy. 4 Units.
Presents the nature of the State's economy and the current and projected role of California in the world economy.

Same as INTL ST 135.

SOC SCI 118G. Regional Geography of California. 4 Units.
Geographical analysis of selected regions of California, in particular geomorphological, hydrological, and climatic conditions, as well as economic and
social strengths and weaknesses. May include some fieldwork in Orange County on environmental, social and residential problems, with legislative
background information.

SOC SCI 119. Special Topics in Geography. 4 Units.
Studies in selected areas of geography. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.
SOC SCI 120. Transnational Gangs. 4 Units.
Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology. Course may be offered online.
Prerequisite: SOC SCI 66.
Same as INTL ST 130.
Overlaps with SOC SCI XI120, INTL ST XI130.

SOC SCI 121T. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.
Same as INTL ST 156A, POL SCI 151H, ECON 154.
Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

SOC SCI 123A. U.S. Intervention in Latin America. 4 Units.
Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.
Same as INTL ST 177D, HISTORY 166, CHC/LAT 150.

SOC SCI 130B. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online.
Same as REL STD 112B, PSYCH 172S, LPS 140B.

SOC SCI 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.
Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.
Same as INTL ST 152A.

SOC SCI 164B. Domestic Gangs. 4 Units.
Examines the history and development of California street gangs and the role of historical events in that development. Students will be able to contrast and compare gang cohort behaviors between some of the major gangs in California.
Prerequisite: SOC SCI 66.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 164C. Prison Gangs. 4 Units.
Examines the growth and spread of prison gangs throughout the country. Relationships between prison and street gangs, and possible relationships with foreign drug trafficking organizations studied. Violence examined as the standard to establish dominance in and out of prison. Course may be offered online.
Prerequisite: SOC SCI 66.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 164D. Juvenile Gangs. 4 Units.
Examines risk factors that can be used to predict gang membership. Compares generational with non-generational gangs and develops a working sociological definition that can be used to identify street gangs. Myths about juveniles, street gangs. Course may be offered online.
Prerequisite: SOC SCI 66.
Restriction: Social Science majors have first consideration for enrollment.
SOC SCI 165. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.

Same as CHC/LAT 170, PSYCH 174H.

SOC SCI 167. Chicano/Chicana Labor History. 4 Units.
Examines origins of Latino/ Latina labor from colonial period to present. Emphasis on the issues of race, culture, class, and gender. Focus on processes and institutions including: encomienda, migration, unions, informal economies, Bracero program, domestic work.

Same as CHC/LAT 138.

SOC SCI 168B. Immigration and Inequality. 4 Units.
Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.

Same as SOCIOL 166.

SOC SCI 169AZ. Special Topics: Sociology. 4 Units.
No description.

Repeatability: Unlimited as topics vary.

SOC SCI 170A. Research Methods in the Social Sciences. 4 Units.
Examines how interdisciplinary social science research questions are formulated and studies several research methods including: experimental method, quasi-experimental methods, survey research, field research, evaluation research, and meta-analysis. Parametric and non-parametric statistical methods are illustrated using the SPSS program.

Prerequisite: SOC SCI 1A and SOC SCI 3A and SOC SCI 10C and SOC SCI 2A.

Restriction: Upper-division students only. Social Science majors have first consideration for enrollment.

SOC SCI 172A. American Culture. 4 Units.
A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing examining its use of language and rhetoric.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 172AW. American Culture. 4 Units.
A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing examining its use of language and rhetoric.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 172D. Law in the Twenty-First Century. 4 Units.
Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as POL SCI 171F.

Restriction: Political Science and Social Science majors have first consideration for enrollment.

SOC SCI 173G. Film Media and the Latino Community. 4 Units.
Uses film as a resource for understanding contemporary issues and problems facing the Chicano/Latino community. (Does not study cinema as a genre.).

Same as CHC/LAT 114.
SOC SCI 173I. Perspectives on the U.S. - Mexican Border. 4 Units.
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as CHC/LAT 160, INTL ST 177B.

(VII)

SOC SCI 173N. Revolution in Latin America. 4 Units.
Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, INTL ST 177C.

SOC SCI 173Q. Introduction to Cuba: History, Culture, and Society. 4 Units.
Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as INTL ST 177F, CHC/LAT 130.

(VIII)

SOC SCI 175B. Ethnic and Racial Communities. 4 Units.
Examines various theoretical analyses of race and ethnicity, particularly as they apply to Asian Americans. Also explores the relationship of Asian Americans to other racialized minorities in the U.S.

Same as ASIANAM 161.

SOC SCI 177B. Asian American Women. 4 Units.
Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as ASIANAM 162.

SOC SCI 178C. The Korean American Experience. 4 Units.
Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as ASIANAM 151C.

SOC SCI 178D. The Vietnamese American Experience. 4 Units.
Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics discussed include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as ASIANAM 151D.

SOC SCI 178E. The Japanese American Experience. 4 Units.
Studies the settlement of Japanese in Hawaii and the continental United States since the late nineteenth century. Topics covered include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as ASIANAM 151E.

SOC SCI 178F. South Asian American Experience. 4 Units.
Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as ASIANAM 151F.

Restriction: Asian American Studies and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 178H. Southeast Asian American Experience. 4 Units.
Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as ASIANAM 151H.
SOC SCI 178J. Chinese American Experience. 4 Units.
Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.
Same as ASIANAM 151J.

SOC SCI 178K. Filipina/Filipino American Experience. 4 Units.
Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the twentieth century. Topics include colonialism, nation, migration, gender, and culture.
Same as ASIANAM 151K.

SOC SCI 179. Special Topics in Asian American Studies. 4 Units.
Studies in selected areas of Asian American Studies. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

SOC SCI 180X. Research Methods . 4 Units.
Develops an understanding of major research methods emphasizing quantitative research techniques; identifies techniques for research questions; applies understanding in relation to contemporary issues by way of a written a proposal for a quantitative research project.
Grading Option: Pass/no pass only.
Restriction: SAEP students only.

SOC SCI 180Y. Statistical Methods . 4 Units.
Covers the following topics: measurement, data screening procedures, descriptive statistics, the chi-square statistic, logistic regression, bivariate correlation and regression, and multiple correlation and regression. Students will develop a conceptual understanding of applied statistics.
Grading Option: Pass/no pass only.
Restriction: SAEP participants only.

SOC SCI 180Z. Communications . 4 Units.
Improves written and verbal communication skills through gathering, synthesizing, and organizing information into salient and clear points. Students learn to articulate information so that it can be clearly understood by others. Application to SAEP program and acceptance required.
Grading Option: Pass/no pass only.
Restriction: SAEP students only.

SOC SCI 181A. Ethical Leadership. 4 Units.
Explores historical and contemporary theories of ethical and unethical leadership. Examines models of "good leadership" such as cardinal and monastic virtues; and models of "bad leadership," such as Machiavelli's Prince. Explores the philosophies, styles, and accomplishments of leaders.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 183A. International Studies Forum. 2 Units.
A faculty-student forum featuring lecturers from a variety of institutions with discussion issues related to international studies.
Repeatability: May be taken for credit 4 times.
Same as HUMAN 183A, SOCECOL 183A, INTL ST 183A.
Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

SOC SCI 183B. Seminar in Mediation. 4 Units.
Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.
Same as HUMAN 183B, INTL ST 183B, SOCECOL 183B.
Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.
SOC SCI 183C. Seminar in Conflict Resolution . 4 Units.
Designed for students pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write research paper.

Same as SOCECOL 183C, HUMAN 183C.

SOC SCI 183CW. Seminar Conflict Resolution. 4 Units.
Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOCECOL 183CW, HUMAN 183CW.

SOC SCI 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, POL SCI 154G, INTL ST 183E.

SOC SCI 184A. Sage Leader Research I. 2 Units.
Participants in the SAGE Scholars Program learn to define leadership concepts, discover various leadership styles, and develop strong leadership and communication skills resulting in strengthened ability to contribute to and interact with UCI and the Orange County community.

Grading Option: Pass/no pass only.

Restriction: SAGE Scholars Program students only.

SOC SCI 184B. Sage Leader Research II. 4 Units.
Provides a survey of contemporary topics and challenges in the fields of management and leadership. Case studies and text by leading authors are used to analyze key leadership issues in twenty-first century, with particular emphasis on current events.

Restriction: SAGE Scholars Program students only.

SOC SCI 184F. International Journalism. 4 Units.
Studies and critically analyzes how the media covers international issues that have reshaped American foreign coverage and the implications for Americans and U.S. foreign policy. Focuses on international reporting as a way of developing fundamental skills of journalism.

Same as INTL ST 155A.

SOC SCI 184GW. Media Writing. 4 Units.
Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as INTL ST 155BW.

Restriction: International Studies majors have first consideration for enrollment.

SOC SCI 185W. People in Society. 4 Units.
Through readings about people in distinctly different societies throughout history, students learn concepts that cross the boundaries of the social science disciplines. Such themes as democracy, elitism, power, social class, and gender as the basis for discussion and writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences majors only.
SOC SCI 186A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as PSYCH 144A, CHC/LAT 191A.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 186B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children and be culturally sensitive.

Same as PSYCH 144B, CHC/LAT 191B.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 186C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as PSYCH 144C, CHC/LAT 191C.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 187. Twenty-First-Century Graduate Education. 2 Units.
Graduate and professional education in twenty-first century United States. Examines strategies for admission to postbaccalaureate programs and success in graduate study culture. Introduction to processes including planning and preparation, school selection, entrance examination preparation, submission of applications, writing personal statements.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only.

SOC SCI 188A. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as INTL ST 165, POL SCI 158D.

SOC SCI 188D. Iran: Past and Present. 4 Units.
Pre-revolutionary Iran; and Iran since the revolution. History, oil and politics: domestic and international.

Same as INTL ST 168.

SOC SCI 188E. Israel and the World: An Introduction. 4 Units.
Examines the founding of Israel, its relationship with the Arab world, the role of the international community, and the challenges it faces today.

Same as INTL ST 170.

SOC SCI 188I. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as INTL ST 162, POL SCI 158C.
SOC SCI 188K. Political Islam. 4 Units.
Political Islam is a diverse phenomenon. While noticeable barriers exist to “Islamist democracy,” it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as INTL ST 161A.

SOC SCI 188M. Psychology of the Middle East Conflict. 4 Units.
Explores how emotions guide actions; political movements and social identity factors in ethnic, religious, or other group conflicts; psycho-biographies of political leaders and effects on foreign policy making; decisions to go to war; psychological dimensions of conflict and conflict resolution.

Same as INTL ST 166.

SOC SCI 189. Special Topics in Social Sciences. 2-4 Units.
Studies in selected areas of social sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI H190A. Honors Research Workshop. 4 Units.
Student develops a 10–15-page prospectus of research for the honors thesis which includes: the research question, literature review, methods of investigation, and bibliography. Student selects a faculty mentor who will supervise thesis research and writing in winter and spring.

Restriction: Honors Program for Social Science majors students only.

SOC SCI H190B. Honors Thesis Research. 4 Units.
The student initiates and completes data collection for the honors thesis. A faculty mentor provides supervision and feedback on thesis chapters.

Prerequisite: SOC SCI H190A.

SOC SCI H190C. Honors Thesis. 4 Units.
The student completes, with the approval of the faculty mentor, an honors thesis containing: statement of the problem, literature review, research hypotheses, methods of investigation, results, discussion, and bibliography.

Prerequisite: SOC SCI H190B. Satisfactory completion of the Lower-Division Writing requirement.

SOC SCI 191. Graduate-Mentored Study in the Social Sciences. 4 Units.
Offers a hands-on research experience while increasing awareness of the various disciplines in the social sciences and of the requirements of graduate school. Features graduate-mentored study under the supervision of the Associate Dean.

Prerequisite: Identification of a graduate student (who is in good standing) as a mentor.

Grading Option: Pass/no pass only.

SOC SCI 193A. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 70C or SOCIOL 63. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Social Policy and Public Service majors only.

SOC SCI 193B. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193A.
SOC SCI 193C. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.
Prerequisite: SOC SCI 193B.

SOC SCI 194A. Public Service Internship. 2-4 Units.
Introduces the role of etiquette and leadership in the professional environment. With a two-unit (50 hours) or four-unit (100 hours) credit option, students intern at a nonprofit agency exploring their roles as community leaders and improving their professional skills. Course may be offered online.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Social Policy and Public Service majors only.

SOC SCI 194B. Community Internship. 2-4 Units.
Required to complete 50 (two units) or 100 (four units) hours at a nonprofit organization, students engage in lectures related to the formation and maintenance of nonprofit organizations. Grant writing, funding issues, and effective service delivery are addressed.
Prerequisite: SOC SCI 194A.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.
Restriction: Social Science majors only.

SOC SCI 194C. Management and Leadership Practicum-Social Science. 2-4 Units.
Social Sciences Academic Resource Center (SSARC) Resource Managers (RMs) report directly to the Director and Associate Director, serving as frontline resource consultants, assisting visitors with resume development, graduate and professional school planning, internship placement, and professional development.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 12 units.

SOC SCI 195A. Educational Policy Field Studies. 4 Units.
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.
Repeatability: May be taken for credit 3 times.

SOC SCI 195B. Educational Policy Field Studies. 4 Units.
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.
Prerequisite: SOC SCI 195A.
Repeatability: May be taken for credit 3 times.

SOC SCI 195C. Educational Policy Field Studies. 4 Units.
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.
Prerequisite: SOC SCI 195B.
Repeatability: May be taken for credit 3 times.

SOC SCI 196. Global Connect. 2-4 Units.
Identifies factors of change that influence the twenty-first century. Students serve as mentors at high schools to introduce globalization issues through workshops and lectures. Students must submit an application and have a 3.0 or higher overall GPA.
Repeatability: May be taken for credit 3 times.
SOC SCI 197. Professional Internship. 2-4 Units.
Students apply classroom knowledge through research projects in nonprofit agencies (local, state, and government) and the private sector. They pose solutions to agency-posed questions. Students gain field experience through 50 hours (for 2 units) or 100 (for 4 units). Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

Restriction: School of Social Sciences majors only.

SOC SCI 198. Directed Group Study. 2-4 Units.
Directed study with Social Science faculty.

Repeatability: May be taken for credit for 12 units.

SOC SCI 199. Individual Study. 2-4 Units.
Opportunities to do research and learn new skills outside the normal classroom environment. Students participate in planned research and study activities under a written contract with a supervising UCI instructor. Students may enroll for only one 199 each quarter.

Repeatability: May be taken for credit for 16 units.

Restriction: Upper-division students only.

SOC SCI 209. Special Topics in Mathematical Social Science. 4 Units.
Studies in selected areas of mathematical social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

SOC SCI 211A. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 211B. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 211C. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 249A. Special Topics in Social Networks. 4 Units.
Studies in selected areas of social networks. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOC SCI 253A. Oral History, Life History. 4 Units.
Interdisciplinary and comparative work in oral and life history; methods of interviewing.

Same as ANTHRO 221A.

Restriction: Graduate students only.
SOC SCI 253F. Population. 4 Units.
Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Same as SOCIOL 262A.
Restriction: Graduate students only.

SOC SCI 253J. Social Movements. 4 Units.
A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Same as SOCIOL 240A.
Restriction: Graduate students only.

SOC SCI 253N. Classical Social Theory. 4 Units.
Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Same as SOCIOL 210A.
Restriction: Graduate students only.

SOC SCI 253R. Contemporary Social Theory. 4 Units.
Familiarizes students with twentieth-century developments in social thought that have influenced sociological research, suggesting "what is living and what is dead" in the "classics" and offering an overview of the main outlines of recent sociological theorizing.

Same as SOCIOL 210B.
Restriction: Graduate students only.

SOC SCI 254A. Transnational Migration. 4 Units.
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troublings of places, spaces, borders, and bodies of all sorts.

Same as ANTHRO 235A, CHC/LAT 215.
Restriction: Graduate students only.

SOC SCI 254J. Global Urbanization. 4 Units.
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as PP&D 273, SOCIOL 252A.
Restriction: Graduate students only.

SOC SCI 254L. Approaches to Globalization. 4 Units.
Historical and contemporary approaches to the world economy, emphasizing anthropological questions of culture, power, identity, inequality. Examines "neo-imperialism," "late capitalism," accumulation, global markets, urban space, the state, business and policy globalization discourse, "local" responses to and instantiations of the "global."

Same as ANTHRO 248A.
Restriction: Graduate students only.

SOC SCI 255C. Grant and Proposal Writing. 4 Units.
Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Same as ANTHRO 213A.
Restriction: Graduate students only.
SOC SCI 259A. Special Topics in Social Relations. 1-4 Units.
Studies in selected areas of social relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOC SCI 272A. Origin and Evolution of Marxist Social Thought. 4 Units.
Focuses on the genesis and evolution of Marxist social thought. The "systemic" method of Marx and Engels to questions of economic production and reproduction is compared and contrasted with modern world-system grand visions, feminist-theoretic approaches, and postmodern critiques.

Prerequisite: Undergraduate course in political theory or equivalent.

Restriction: Graduate students only.

SOC SCI 289. Special Topics in Social Science. 4 Units.
Current research in Social Science.

Repeatability: Unlimited as topics vary.

SOC SCI 290. Dissertation Research. 4-12 Units.
Dissertation research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 299. Independent Study. 1-12 Units.
Independent research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

SOC SCI 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

The Curriculum in Geography

The curriculum in geography covers such topics as the evolution of the landscape, arrangement of urban centers, the internal structure of cities, the arrangement of industrial and agricultural activities, the pattern of movement of people, goods and ideas, and relationships between humans and the environment.

Courses in Geography

SOC SCI 5A  Introduction to Human Geography
SOC SCI 5B  Introduction to Physical Geography
SOC SCI 5D  US & World Geography
SOC SCI 118G  Regional Geography of California
SOC SCI 119  Special Topics in Geography

The Undergraduate Major in International Studies

571 Social Science Tower; 949-824-8687
http://internationalstudies.ss.uci.edu/
Cecelia Lynch, Director

The major in International Studies provides an interdisciplinary perspective on global politics, culture and economics. International Studies majors acquire twenty-first-century analytical skills and knowledge that will enable them to understand and contribute to shaping the rapidly evolving world community. The degree in International Studies prepares students for graduate study and professional careers in a variety of fields in the national and international job markets such as international affairs and public policy, international business and finance, international law, international organizations, academic research and teaching, and non-governmental work (in human rights, humanitarianism, development and environmental issues).

Requirements for the major include a core set of courses: an introductory sequence (Global Cultures and Society, International Politics, World History, and Global Economics), basic economics, an additional lower-division social science course, and the International Studies Public Forum. Students also
choose both a regional focus and a functional focus to enable them to broaden and deepen areas of knowledge and topics of particular interest. The final requirements are competence in a language other than English and an international experience or approved internship.

**Requirements for the B.A. Degree in International Studies**

**All students must meet the University Requirements** (p. 71).

**All students must meet the School Requirements** (p. 1561).

**Requirements for the Major**

All International Studies majors must complete a minimum of 16 or 17 courses for a letter grade with a minimum GPA of 2.0.

A. Four introductory courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTL ST 11</td>
<td>Global Cultures and Society</td>
</tr>
<tr>
<td>INTL ST 13</td>
<td>Global Economy</td>
</tr>
<tr>
<td>INTL ST 14</td>
<td>Introduction to International Relations</td>
</tr>
<tr>
<td>HISTORY 21A</td>
<td>World: Innovations</td>
</tr>
<tr>
<td>or HISTORY 21B</td>
<td>World: Empires and Revolutions</td>
</tr>
<tr>
<td>or HISTORY 21C</td>
<td>World: Wars and Rights</td>
</tr>
</tbody>
</table>

B. Complete the following ECON course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 20B</td>
<td>Basic Economics II</td>
</tr>
</tbody>
</table>

C. Select one of the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 2A</td>
<td>Introduction to Sociocultural Anthropology</td>
</tr>
<tr>
<td>POL SCI 51A</td>
<td>Introduction to Politics Around the World</td>
</tr>
<tr>
<td>REL STD 5A</td>
<td>World Religions I</td>
</tr>
<tr>
<td>or REL STD 5B</td>
<td>World Religions II</td>
</tr>
<tr>
<td>SOC SCI 5D</td>
<td>US &amp; World Geography</td>
</tr>
<tr>
<td>SOCIOL 2</td>
<td>Globalization and Social Change</td>
</tr>
</tbody>
</table>

D. Competency in a language other than English. Competency is established by college-level course work equivalent to UCI’s fifth quarter of study (usually 2B).

E. Regional Focus: Four upper-division courses, at least two that focus on one geographic area. Courses must be from at least two different disciplines and include material on at least two different countries.  

<table>
<thead>
<tr>
<th>Region</th>
</tr>
</thead>
<tbody>
<tr>
<td>Europe and Eurasia</td>
</tr>
<tr>
<td>Africa and the Middle East</td>
</tr>
<tr>
<td>The Americas (including the U.S.)</td>
</tr>
<tr>
<td>Asia</td>
</tr>
<tr>
<td>Diasporic, Religious and/or Linguistic areas (e.g., Francophone World, Islamic World, Jewish Diaspora, African Diaspora)</td>
</tr>
</tbody>
</table>

F. Functional Focus: Four upper-division courses from the following list with at least three in one area:  

<table>
<thead>
<tr>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>Global Issues and Institutions (International/Transnational Organizations and Movements; International/Comparative Law; Global Trade, Investment and Finance; Global Development, Public Health, and Environment)</td>
</tr>
<tr>
<td>Global Conflict and Negotiation (Global Conflict and Conflict Resolution; Global Security)</td>
</tr>
<tr>
<td>Global Role of U.S. and California</td>
</tr>
<tr>
<td>Global Society and Culture (Global Population, Migration, and Diaspora; Global Identities: Religion, Nationalism, Gender; Global Ethics and Human Rights)</td>
</tr>
</tbody>
</table>

G. Two quarters of SOC SCI 183A (International Studies Forum), one quarter of which must be taken during the junior or senior year as a capstone experience. (SOC SCI 183A is a two-unit course so these together count as a four-unit course.)

H. At least one quarter of international experience.  

---

1 Visit the Institute for International, Global and Regional Studies (http://internationalstudies.ss.uci.edu/is_undergrad_major_req/#approved_courses) website for a list of approved courses. Although some courses are listed in more than one focus, students may not double count a course for both their regional and functional areas. Study abroad counts as one course in the regional focus.

2 Majors are encouraged to study abroad through the University’s Education Abroad Program (UCEAP) or the International Opportunities Program (IOP), which are available for periods of a quarter, year, or summer. When this is not possible, work overseas (through IOP) or a domestic internship with the UCDC Internship Program, the UCI Washington D.C. Academic Internship Program, or International Internship (INTL ST 197) or Social Science Internship Program (SOC SCI 197) with an international focus may be substituted. Study abroad counts as one course in the regional focus.
Honors Program in International Studies

The Honors Program allows International Studies majors to engage in research leading to the completion of an honors thesis. The topic for the honors thesis is selected by the student, in consultation with a faculty advisor, and should reflect a theme consistent with the student’s module in the International Studies major. The honors program is open to all junior and senior International Studies majors with an overall GPA of 3.0 and a 3.5 GPA in the major who have taken all three core courses (INTL ST 11, INTL ST 13, and INTL ST 14) and at least two upper-division courses that count toward the International Studies major. Successful completion of a written senior thesis in the INTL ST 190 course satisfies the upper-division writing general education requirement.

During the spring quarter of the junior year or during the summer before the senior year, students formally apply to the honors program. Students will be notified of their selection to the honors program by September 1. In the fall quarter of the senior year, students enroll in International Studies INTL ST H180, Honors Research Seminar. In this course, each student formulates a written research plan (i.e., prospectus) for the honors thesis. Students also select a faculty member who agrees to supervise the research, evaluate the written work, and approve the honors thesis. In the winter quarter of the senior year, students enroll in International Studies INTL ST 190, Senior Thesis, with their faculty advisor. The faculty advisor supervises and evaluates data collection and analysis and reads and edits chapter drafts. In the spring quarter of the senior year, students enroll in a second quarter of Senior Thesis, with their faculty advisor. The thesis is to be completed by the student and approved by the advisor prior to the end of the quarter.

Honors students must also demonstrate a high level of language proficiency by completing two courses beyond the 2A level in language, literature, or culture taught in their chosen international language.

International Studies majors are also required to pursue some form of international experience, as explained in major requirement H.

Sigma Iota Rho: National Honors Society

The National Honor Society in International Studies was established in 1985, and welcomed the University of California, Irvine, designated Gamma Gamma, as a new chapter on November 30, 2006. The Gamma Gamma Chapter was established primarily as a means by which to honor those students who have excelled academically and to foster integrity and creative performance in the understanding of world affairs.

For more information call the International Studies program office at (949) 824-8687.

- International Studies Minor (p. 1877)
- Conflict Resolution Minor (p. 1878)

International Studies Minor Requirements

A. Choice of one from the core sequence:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTL ST 11</td>
<td>Global Cultures and Society</td>
</tr>
<tr>
<td>INTL ST 13</td>
<td>Global Economy</td>
</tr>
<tr>
<td>INTL ST 14</td>
<td>Introduction to International Relations</td>
</tr>
</tbody>
</table>

B. Regional Focus: Three upper-division courses, at least two that focus on one geographic area. Courses must be from at least two different disciplines and include material on at least two different countries: 1

- Europe and Eurasia
- Africa and the Middle East
- The Americas (including the U.S.)
- Asia
- Diasporic, Religious, and/or Linguistic areas (e.g., Francophone World, Islamic World, Jewish Diaspora, African Diaspora)

C. Functional Focus: Three upper-division courses in one of the following areas: 1

- Global Issues and Institutions (International/Transnational Organizations and Movements; International/Comparative Law; Global Trade, Investment and Finance; Global Development, Public Health, and Environment)
- Global Conflict and Negotiation (Global Conflict and Conflict Resolution; Global Security)
- Global Role of U.S. and California
- Global Society and Culture (Global Population, Migration, and Diaspora; Global Identities; Religion, Nationalism, Gender; Global Ethics and Human Rights)

D. One quarter of SOC SCI 183A (International Studies Forum), one quarter of which must be taken during the senior year as a capstone experience. (SOC SCI 183A is a two-unit course so these together count as a four-unit course.)

1 Visit the Institute for International, Global & Regional Studies (http://internationalstudies.ss.uci.edu/is_minor_intl) website for a list of approved courses. Although some courses are listed in more than one focus, students may not double count a course for both their regional and functional areas. Study abroad counts as one course in the regional focus.
Minor in Conflict Resolution

The minor in Conflict Resolution is sponsored by the International Studies program. It offers an interdisciplinary curriculum that helps students both discover and prepare themselves for any career. The course of study provides skills in conflict analysis and resolution and a useful understanding of integrative institutions at the local, regional and international levels. As enrolled minors, students are invited to special engagements where they can interact with leading community and government officials from the U.S. and other countries, prominent scholars and other experts in local and international conflict resolution.

The curriculum includes training that students may apply toward State of California certification as a mediator.

Conflict Resolution Minor Requirements

A. Complete one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>INTL ST 14</td>
<td>Introduction to International Relations</td>
</tr>
<tr>
<td>or SOCIOL 63</td>
<td>Race and Ethnicity</td>
</tr>
</tbody>
</table>

B. Conflict Resolution Core: four courses as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL SCI 149</td>
<td>Special Topics in International Relations</td>
</tr>
<tr>
<td>POL SCI 154G</td>
<td>Conflict Resolution in Cross-Cultural Perspective</td>
</tr>
<tr>
<td>SOC SCI/HUMAN/SOCECOL/INTL ST 183B</td>
<td>Seminar in Mediation</td>
</tr>
<tr>
<td>SOC SCI/HUMAN/SOCECOL 183CW</td>
<td>Seminar Conflict Resolution</td>
</tr>
</tbody>
</table>

C. Conflict Resolution Electives: Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTHRO 136A</td>
<td>Nationalism and Ethnicity in the Contemporary World</td>
</tr>
<tr>
<td>ANTHRO 164P/POL SCI 154F</td>
<td>Peoples and Cultures of Post-Soviet Eurasia</td>
</tr>
<tr>
<td>CHC/LAT 153</td>
<td>Cross-Cultural Research on Urban Gangs (same as CRM/LAW C156)</td>
</tr>
<tr>
<td>CRM/LAW C127</td>
<td>Hate Crimes</td>
</tr>
<tr>
<td>HISTORY 103</td>
<td>Topics in International Conflicts</td>
</tr>
<tr>
<td>HISTORY 126A</td>
<td>The Era of World War I: 1900-1939</td>
</tr>
<tr>
<td>HISTORY 126B</td>
<td>The Era of World War II: 1933-45</td>
</tr>
<tr>
<td>HISTORY 132A</td>
<td>Israel and Palestine</td>
</tr>
<tr>
<td>INTL ST 121</td>
<td>Social Ecology of Peace</td>
</tr>
<tr>
<td>INTL ST 166</td>
<td>Psychology of the Middle East Conflict</td>
</tr>
<tr>
<td>POL SCI 124A</td>
<td>The Politics of Protest</td>
</tr>
<tr>
<td>POL SCI 124C/AFAM 151/ASIANAM 132/CHC/LAT 147</td>
<td>Comparative Minority Politics</td>
</tr>
<tr>
<td>POL SCI 142G</td>
<td>U.S. Coercive Diplomacy</td>
</tr>
<tr>
<td>PSY BEH 178S/CRM/LAW C149</td>
<td>Violence in Society</td>
</tr>
<tr>
<td>SOC SCI 120</td>
<td>Transnational Gangs</td>
</tr>
<tr>
<td>SOCIOL 167A/CHC/LAT 148</td>
<td>Racial and Ethnic Relations in the United States</td>
</tr>
<tr>
<td>SOCIOL 170A</td>
<td>Vietnam War</td>
</tr>
<tr>
<td>SOCIOL 170B</td>
<td>U.S. War on Terrorism</td>
</tr>
<tr>
<td>SOCIOL 174/POL SCI 156D</td>
<td>Protests, Movements, and Revolutions</td>
</tr>
</tbody>
</table>

D. Two quarters of SOC SCI 183A (International Studies Forum), one quarter of which must be taken during the senior year as a capstone experience. (SOC SCI 183A is a two-unit course so these together count as a four-unit course.)

NOTE: With faculty approval, a student may substitute a maximum of one course. With faculty approval, a student participating in the UC Education Abroad Program may substitute a maximum of two courses.

Faculty

Nurudeen O. Alao, Ph.D. Northwestern University, Lecturer of Social Sciences; International Studies

Stephen D. Bach, Ph.D. University of California, Irvine, Lecturer of International Studies; Engineering

Ricardo Chavira, M.A. California State University, Northridge, Lecturer of Social Sciences; International Studies

Robert Henry Duncan, Ph.D. University of California, Irvine, Lecturer of International Studies

Paula Garb, Ph.D. Russian Academy of Sciences, Lecturer of Social Sciences; International Studies; Undergraduate Education

Peter Gluck, J.D. Franklin Pierce College, Lecturer of International Studies
Courses

INTL ST 11. Global Cultures and Society. 4 Units.
Offers a general overview of the rise of global interdependence in political, economic, demographic, and cultural terms. Considers what drove people from relative isolation into intensified intercourse with one another, and investigates the consequences of this shift.

Same as ANTHRO 41A.

Restriction: Anthropology and International Studies majors have first consideration for enrollment.

(III, VIII)

INTL ST 13. Global Economy. 4 Units.
Acquaints students with the fundamental patterns of the global economy. Emphasizes the historical roots and political implications of economic choices.

Same as ECON 13.

Restriction: International Studies, Economics, Quantitative Economics, and Business Economics majors have first consideration for enrollment.

(III, VIII)

INTL ST 14. Introduction to International Relations. 4 Units.
Analysis of political relations between and among nations with emphasis on explanations of conflict and cooperation. The role of ideologies and their relation to international problems are also examined. Course may be offered online.

Same as POL SCI 41A.

Restriction: International Studies and Political Science majors have first consideration for enrollment.

(III, VIII)

INTL ST 105A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.

Same as POL SCI 130A, SOC SCI 103A, SOCIOL 134.

Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

INTL ST 105B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.

Prerequisite: POL SCI 130A or ECON 116A.

Same as POL SCI 130B, SOC SCI 103B.

Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

INTL ST 111B. Coffee and Capitalism. 4 Units.
History of consumption and production of coffee over the centuries, and coffee's cultural, economic, social, political consequences. Coffee's social life as a drug, symbol of hospitality, religious rite, sociability and bourgeois lifestyle, commodity, source of livelihoods, imperial revenues, corporate profits.

Same as HISTORY 163.
INTL ST 111C. Global Economics and Security. 4 Units.
Analyzes U.S. economic strategy, the impact of U.S. foreign policy on economic strategy, the rise and the challenge of future Great Powers, and focuses on theories of growth, hegemonic stability, and the rise of interdependence in the economic field.

INTL ST 112A. International Business. 4 Units.
Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.

Same as SOC SCI 115D.

INTL ST 114A. International Political Economy. 4 Units.
Examination of problems in global political-economic relations through competing conceptual lenses or grand theories: mercantilism, liberalism, and Marxism. Surveys North-North and North-South issues relating power and wealth.

Same as POL SCI 141B.

(VIII)

INTL ST 114D. Political Economy of Japan. 4 Units.
Surveys postwar developments in the politics and political economy of Japan. Topics include the political and institutional context of policy making; pressures for change which Japan’s political economy has faced in the last decade; Japan’s past and present foreign policies.

Same as POL SCI 155F.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 117A. Transnational Migration. 4 Units.
Examines the movement of people across national borders, governmentality and the role of state practices to control populations, and issues of citizenship, belonging, and identity. Examples are drawn from the United States, Europe, Latin America, Asia, and Africa.

Same as CHC/LAT 161, ANTHRO 125X.

(VIII)

INTL ST 117B. Migration Destinations. 4 Units.
Examines the migration patterns to the three largest nations that receive immigrants (i.e., permanent settlers): Australia, Canada, and the United States.

Same as ASIANAM 171A, SOCIOL 175D.

INTL ST 121. Social Ecology of Peace. 4 Units.
Examination of differing definitions of the problem of achieving peace and the special problems of seeking peace in the nuclear age.

Same as SOCECOL E113.

INTL ST 122. Nuclear Environments. 4 Units.
Understanding the impact of the nuclear age on the environment and human health through interrelated developments of nuclear power and nuclear weapons. The early years of weapon development, catastrophic environmental pollution, perils of nuclear power in the U.S. and Russia.

Same as SOCECOL E127, PUBHLTH 168.

INTL ST 124A. Introduction to the Comparative Study of Legal Cultures. 4 Units.
Traces the anthropological and comparative cultural study of law from the nineteenth century to the present; briefly surveys the diversity of recorded legal cultures and critically examines key concepts which have been used to describe and classify them.

Same as CRM/LAW C102.

Restriction: Criminology, Law and Society, Social Ecology, and International Studies majors have first consideration for enrollment.

INTL ST 124B. New Democracies. 4 Units.
Examines what democracy is; considers competing theories about its causes; explores multiple democratic institutions; discusses several types of democracy; and analyzes various aspects of democratic quality and stability, focusing on Eastern Europe, Latin America, and sub-Saharan Africa.

Same as POL SCI 155A.
INTL ST 130. Transnational Gangs. 4 Units.
Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology. Course may be offered online.
Prerequisite: SOC SCI 66.
Same as SOC SCI 120.
Overlaps with SOC SCI XI120, INTL ST XI130.

INTL ST 131A. Just War Revisited. 4 Units.
Examines the evolution of the doctrine of the just war across the history of Western political thought, the importance of changes in the doctrine and whether it applies today; examines international relations case studies to determine today’s relevancy.
Same as POL SCI 135B.

INTL ST 135. California and Global Economy. 4 Units.
Presents the nature of the State’s economy and the current and projected role of California in the world economy.
Same as SOC SCI 115E.

INTL ST 140A. Approaches to International Relations. 4 Units.
Reviews theoretical and methodological approaches to the study of international relations using contending perspectives to analyze power and influence, capabilities, interdependence, reciprocity, international regimes, anarchy, cooperation, imperialism, and hegemony.
Same as POL SCI 144A.
Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 141A. Intelligence in International Politics. 4 Units.
Intelligence agencies, activities, and functions—their impact on international politics; how governments and societies seek to control intelligence agencies and activities; and how intelligence agencies work—their techniques, resources, technology, problems, successes, and failures.
Same as POL SCI 143F.
Restriction: International Studies and Political Science majors have first consideration for enrollment.

INTL ST 142A. U.S. Foreign Policy I: Globalism and Cold War. 4 Units.
Looks at changing international perspectives, policy responses, and military strategies of presidential administrations from Truman to Reagan. In assessing the motives and objectives of U.S. foreign policy leaders during the “Cold War” era, the concept of “national interest” is examined.
Same as POL SCI 142D.
Restriction: International Studies and Political Science majors have first consideration for enrollment.

INTL ST 142B. U.S. Foreign Policy II: Cold War Decline & After. 4 Units.
Deals with U.S. foreign policy from the post-Vietnam War era through the collapse of the Cold War and into the emergence of the post-Cold War era, roughly from 1972 to the present.
Same as POL SCI 142E.
Restriction: Political Science majors have first consideration for enrollment.

INTL ST 142C. U.S. Foreign Policy III: National Security Decision-Making. 4 Units.
Concept of “national security” from 1947-1990s is reviewed. Organizational and psychological factors that influence decision-making, the dangers of “groupthink,” and the issue of accountability are analyzed. National security agenda (military, economic, environmental, and social) for the 1990s is discussed.
Same as POL SCI 142F.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.
INTL ST 142D. The International Relations of East Asia. 4 Units.
Surveys various aspects of relations between the nations of East Asia. Topics include the historical development of the region; current political and security relations, including the impact of the American military presence.

Same as POL SCI 142B.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142E. U.S. Coercive Diplomacy. 4 Units.
Examines the theory of compellence and the U.S. practice of coercive diplomacy—the power to change behavior of other governments. Specific case examples: the Cuban missile crisis, bombing of North Vietnam, the Nicaraguan Contras, Desert Shield/Desert Storm, and Libya.

Same as POL SCI 142G.
Restriction: Upper-division students only. Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142F. Human Rights and Foreign Policy. 4 Units.
Analyzes theories, patterns, and cases of human rights foreign policy. How do countries pursue the values and standards of human rights in their foreign relations. How does the U.S. fit into worldwide trends? Examines historical and contemporary cases.

Same as POL SCI 142H.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 142G. U.S. Foreign Policy Toward Asia. 4 Units.
U.S. policy toward the countries of East Asia: bilateral and regional security relationships, U.S. economic relations with the major Asian countries, the development of regional institutions, and human rights.

Same as POL SCI 141E.

INTL ST 143A. Vietnam War. 4 Units.
Examines social structures and social changes in Vietnamese and U.S. societies through the study of the Vietnam War.

Same as SOCIOL 170A.

INTL ST 144A. Comparative Politics: Four Nations, Three Continents. 4 Units.
Studies four countries in a comparative fashion: their respective political histories and cultural traditions; actual differences among their superficially similar party, parliamentary, and executive institutions; contemporary economic policy. The countries represent three continents and varying levels of economic development.

Same as POL SCI 154C.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

INTL ST 145A. International Law. 4 Units.
Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.
Prerequisite: POL SCI 71A.
Same as POL SCI 172A.

(VIII)

INTL ST 145C. Constitution and Rights. 4 Units.
How are constitutions crafted, maintained, and changed? Does constitutionalism support or undermine democracy? What difference do rights and constitutional courts make? Explores these questions through a comparative examination of the theory and practice of constitutionalism in developing democracies.
Prerequisite: POL SCI 71A.
Same as POL SCI 172C.
INTL ST 145D. Courts in New Democracies . 4 Units.
Examines the conceptual, theoretical, and empirical foundations of the study of courts and politics in new democracies, introducing students to a variety of contemporary debates about how political dynamics shape courts, and how courts shape politics.

Prerequisite: POL SCI 71A.
Same as POL SCI 172D.

INTL ST 151B. Religion and World Politics. 4 Units.
Examines the relationship between religion and world politics historically and today, focusing on connections with peace/war, democracy, human rights, secularism(s), and globalization. Covers major debates, scholarship, concepts, and theories through class exercises, exams, and essays.

Prerequisite: POL SCI 41A or INTL ST 11 or INTL ST 12 or REL STD 5A or REL STD 5B or REL STD 5C.
Same as POL SCI 146B, REL STD 115.

INTL ST 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.
Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.
Same as SOC SCI 152A.

INTL ST 153B. Cross-Cultural Studies in Gender. 4 Units.
Familiarizes students with the diversity of women's experiences around the world. Gender roles and relations are examined within cultural and historical contexts. A central concern is how class, race, and global inequalities interact with women's status.

Prerequisite: ANTHRO 2A or ANTHRO 2B.
Same as ANTHRO 121D.

INTL ST 153C. Urban Anthropology. 4 Units.
Cultural roles of urban centers and processes of urbanization in comparative perspective, focusing on both nonwestern, nonindustrial societies of past and present; the relationship between modern urban centers and Third World peoples. Migration, urban poverty, in Africa, Asia, Latin America.
Same as ANTHRO 121J.

INTL ST 153D. Colonialism and Gender. 4 Units.
An anthropological enquiry into the ways colonial relations of power have been structured and gendered throughout the world, and to what effect. Examines the social locations of men and women in the everyday exercise of colonial and imperial power.
Same as ANTHRO 136G.
Restriction: Anthropology majors have first consideration for enrollment.

INTL ST 153E. Nationalism and Ethnicity in the Contemporary World. 4 Units.
An exploration of the concepts of identity, culture, ethnicity, race, and nation through ethnographic cases, with a view to asking larger questions: how do people create nativeness and foreignness? How does “culture” get worked into contemporary racisms and nationalisms.
Same as ANTHRO 136A.

(VIII)

INTL ST 154. Ethics and Justice in International Affairs. 4 Units.
Analyzes choices regarding the use of force, resolving conflict, and promoting human rights and social justice. Special attention is given to the American experience as a principal case study of ethics and statecraft.
Restriction: Upper-division students only. International Studies majors have first consideration for enrollment.

INTL ST 154B. Human Rights. 4 Units.
Examines the causes and consequences of human rights violations with a focus on Latin America. What are human rights? When and where are they violated? What political mechanisms are available to deal with human rights problems? How effective are they.
Same as POL SCI 153E.
Restriction: Political Science majors and International Studies majors have first consideration for enrollment.
INTL ST 154D. Ethics and International Relations. 4 Units.
Introduces students to the dynamic field of ethics and international relations. A variety of traditional and emerging perspectives are examined, skeptical views are discussed in detail, and arguments are illustrated with current cases.

Same as PP&D 140, POL SCI 146A.

INTL ST 154W. Ethics and Justice in International Affairs. 4 Units.
Analyzes choices regarding the use of force, resolving conflict, and promoting human rights and social justice. Special attention is given to the American experience as a principal case study of ethics and statecraft.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Upper-division students only. International Studies majors have first consideration for enrollment.

(INTL ST 155A. International Journalism. 4 Units.
Studies and critically analyzes how the media covers international issues that have reshaped American foreign coverage and the implications for Americans and U.S. foreign policy. Focuses on international reporting as a way of developing fundamental skills of journalism.

Same as SOC SCI 184F.

INTL ST 155BW. Media Writing. 4 Units.
Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as SOC SCI 184GW.
Overlaps with INTL ST XI155B, SOC SCI XI184G.

Restriction: International Studies majors have first consideration for enrollment.

(INTL ST 156A. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as POL SCI 151H, SOC SCI 121T, ECON 154.

Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

INTL ST 157A. Twenty-First Century Africa. 4 Units.
Comparative studies of the cultures and societies of Sub-Saharan Africa, with emphasis on critical study of colonialism and postcoloniality, social transformation, and the politics of identity.

Prerequisite: ANTHRO 2A.

Same as ANTHRO 164A.

Restriction: Anthropology majors have first consideration for enrollment.

INTL ST 158A. Modern South Asian Religions. 4 Units.
Nineteenth- and twentieth-century developments in Hinduism, Islam, and Sikhism are covered, with emphasis on changing forms as well as contents of religious movements and the state.

Same as ANTHRO 135I.

(VIII)

INTL ST 158B. Peoples of the Pacific. 4 Units.
The cultural history and recent developments among the Pacific peoples of Polynesia, Micronesia, Melanesia, New Guinea, and Australia.

Same as ANTHRO 163A.

(VIII)
INTL ST 158D. China in the Global Age. 4 Units.
Chinese society from 1949 to present. Social change in the context of political control and ideological considerations. Focus on the power structure, political decision processes, and ideological legitimation, and interplay with the Chinese community and its culture.

Same as SOCIOL 175B.

INTL ST 161A. Political Islam. 4 Units.
Political Islam is a diverse phenomenon. While noticeable barriers exist to "Islamist democracy," it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as SOC SCI 188K.

INTL ST 162. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as SOC SCI 188I, POL SCI 158C.

INTL ST 162B. Peoples and Cultures of Post-Soviet Eurasia. 4 Units.
Examines the cultures and political conflicts of the more than 130 indigenous ethnic groups in the European and Asian territories of the former U.S.S.R. Emphasis is on the theoretical issues of ethnicity, nationalism, and conflict management.

Same as POL SCI 154F, ANTHRO 164P.

(VIII)

INTL ST 165. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as SOC SCI 188A, POL SCI 158D.

INTL ST 166. Psychology of the Middle East Conflict. 4 Units.
Explores how emotions guide actions; political movements and social identity factors in ethnic, religious, or other group conflicts; psycho-biographies of political leaders and effects on foreign policy making; decisions to go to war; psychological dimensions of conflict and conflict resolution.

Same as SOC SCI 188M.

INTL ST 168. Iran: Past and Present. 4 Units.
Pre-revolutionary Iran; and Iran since the revolution. History, oil and politics: domestic and international.

Same as SOC SCI 188D.

INTL ST 170. Israel and the World: An Introduction. 4 Units.
Examines the founding of Israel, its relationship with the Arab world, the role of the international community, and the challenges it faces today.

Same as SOC SCI 188E.

INTL ST 174. Middle East Narratives. 4 Units.
Explores various narratives of peoples living in the Middle East: Bedouins, Jews, Muslims, Christians, Druze, Baha‘i; looks at how their identities were formed and altered over time through empire, religion, exodus, war, democracy, diasporas; focus is philosophical and historical.

Same as POL SCI 136D.

INTL ST 175A. U.S. War on Terrorism. 4 Units.
Analyzes the United States war on terrorism by focusing on terrorism, the U.S. wars in Afghanistan and Iraq, and changes in police powers through the Patriot Act, as well as the political leadership which directs the war.

Same as SOCIOL 170B.

INTL ST 176A. African Politics. 4 Units.
An overview of African politics in comparative perspective. Central themes include the analysis of state-nation building in Africa, Africa’s economy, and its civil society as this relates to implications for development prospects on the continent.
**INTL ST 176B. East Asian Politics. 4 Units.**  
Explores the recent history and political systems of China, Japan, and Korea, comparing the three countries with each other and with occasional reference to the United States, British, and French systems.

Same as POL SCI 151A.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

**INTL ST 176C. Introduction to Chinese Politics. 4 Units.**  
Background to the Chinese revolution, rise of the communist party; and institutions, ideology, and structure of Communist party rule from 1949-present.

Same as POL SCI 151B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

**INTL ST 176D. Chinese Politics: Policy, Leadership, and Change. 4 Units.**  
Examines major policies from 1949 to the present, and considers the changing role of the Communist Party and its shifting treatment of various social groups; the era of Mao Zedong, reforms under Deng, and post-Deng politics.

Same as POL SCI 151C.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

**INTL ST 176G. German Politics and Society. 4 Units.**  
Concentrates on twentieth-century German politics and society, focusing on the contemporary political system of democratic West Germany. Study of the historical legacies of Weimar and the Nazi period, the postwar division between the two states and their reunification.

Same as POL SCI 152C.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

**INTL ST 176I. West European Politics. 4 Units.**  
Explores four main themes: (1) thinking scientifically about politics; (2) understanding the linkages between different political structures and spheres of activity; (3) evaluating some theories about politics; (4) learning about three countries: Britain, France, and Germany.

Same as POL SCI 152F.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

**INTL ST 176K. Latin American Politics. 4 Units.**  
Introduces the main concepts and theoretical approaches underlying the study of Latin American politics, examines recent political dynamics, and explores the challenges the region faces in the twenty-first century and how countries will attempt to address them.

Same as POL SCI 153A, CHC/LAT 151A.

Restriction: Political Science majors, Chicano/Latino Studies majors, and International Studies majors have first consideration for enrollment.

**INTL ST 176L. Canadian Politics. 4 Units.**  
Addresses the basic structures and processes of contemporary Canadian government and politics. Additional topics may include regionalism, federalism, western alienation and oil, Canadian solutions to social welfare policy questions, developments in Quebec, and other issues associated with French-English relations.

Same as POL SCI 153B.

Restriction: Political Science majors and International Studies majors have first consideration for enrollment.

**INTL ST 177B. Perspectives on the U.S.-Mexican Border. 4 Units.**  
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as SOC SCI 173I, CHC/LAT 160.

(VII)
INTL ST 177C. Revolution in Latin America. 4 Units.

Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, SOC SCI 173N.

INTL ST 177D. U.S. Intervention in Latin America. 4 Units.

Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as HISTORY 166, SOC SCI 123A, CHC/LAT 150.

INTL ST 177E. Cuban Society and Revolution. 4 Units.

Explores the causes, development, and legacy of the 1959 Revolution. Themes include economic dependency, democracy, race, gender, culture, and the always volatile relations between Cuba and the United States.

Same as POL SCI 153G, HISTORY 166C, CHC/LAT 157.

INTL ST 177F. Introduction to Cuba: History, Culture, and Society. 4 Units.

Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as CHC/LAT 130, SOC SCI 173Q.

(VIII)

INTL ST 177G. Revolution and Reaction in Cold War Latin America. 4 Units.

Explores Latin American experiences of revolutionary change and military dictatorship during the Cold War (1945-1990). Pays particular attention to the lives of women, peasants, workers, and the urban middle classes. Case studies include Guatemala, Cuba, Chile, Argentina, Nicaragua, and Mexico.

Same as HISTORY 166B.

INTL ST 177H. Gender, Race, and Nation in Latin America. 4 Units.

Addresses the importance of gender and race to nation-making in Latin America during the 19th and 20th centuries (1810-1945). Considers how hierarchies between men and women shaped ideas about family, the state, and modernity.

Same as HISTORY 166A, WOMN ST 172.

INTL ST 177I. Ancient Civilization of Mexico and the Southwest. 4 Units.

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as ANTHRO 141A.

INTL ST 177J. Peoples and Cultures of Latin America. 4 Units.

Surveys the prehistory of Latin America and its indigenous cultures, emphasizing the impact of colonial rule, capitalism, and twentieth-century transformations. Emphasis on communities from several countries. In some years, emphasis on comparisons between the Latin American and Caribbean experiences.

Same as ANTHRO 162A.

(VIII)

INTL ST 178A. Immigration Politics in Western Europe. 4 Units.

Examines the politics of immigration in Western Europe. Considers historical, economic, political, and social dimensions of immigration as well as the nature of ensuing conflict. Students investigate a variety of immigrant-related policies, including asylum, citizenship, and integration.

Same as POL SCI 141D.

INTL ST 179. Regional Topics in International Studies. 4 Units.

Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.
INTL ST H180. International Studies Honors Research Seminar. 4 Units.
Assists students to prepare a thesis prospectus for the Honors Program in International Studies. Students choose a topic, learn writing and research methods, write a prospectus and orally present and defend it, and conduct a literature review.

Restriction: International Studies Honors Program students only. International Studies majors have first consideration for enrollment.

INTL ST 183A. International Studies Forum. 2 Units.
A faculty-student forum featuring lecturers from a variety of institutions with discussion issues related to international studies.

Repeatability: May be taken for credit 4 times.

Same as SOC SCI 183A, SOCECOL 183A, HUMAN 183A.

Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

INTL ST 183B. Seminar in Mediation. 4 Units.
Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.

Same as HUMAN 183B, SOC SCI 183B, SOCECOL 183B.

Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

INTL ST 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.

Same as ANTHRO 136D, SOC SCI 183E, POL SCI 154G.

(VIII)

INTL ST 189. Special Topics in International Studies. 2-4 Units.
Studies in selected areas of international studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

INTL ST 190. Senior Thesis. 4 Units.
Students work with faculty to complete their honors thesis.

Repeatability: May be taken for credit 2 times.

INTL ST 197. Internship. 2-4 Units.
Provides an opportunity to apply knowledge and skills to an internship experience in the non-profit sector. Students gain new skills outside the classroom environment by participating in an off-campus, supervised internship for a total of 50 or 100 hours.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

INTL ST 199. Individual Study. 2-4 Units.
Students participate in planned research and study under written contract with a supervising UCI instructor. Students may enroll for only one individual study course each quarter.

Repeatability: Unlimited as topics vary.

The Undergraduate Major in Social Policy and Public Service

The major in Social Policy and Public Service (SPPS) provides an interdisciplinary perspective on the study of society, both at the individual and group level. Using the knowledge and methods of all social science disciplines, a student majoring in Social Policy and Public Service develops the skills to think clearly about social concepts and issues. Majors have an opportunity to use their classroom knowledge in applied and individual learning experiences, such as internships, field studies, or research with a faculty advisor.

The curriculum for the major exposes students to various social science methods and topics, teaching applied computer-based research and statistical analyses; internship experiences in community, public and educational organizations; and a more in-depth understanding of social science research and methodology. To ensure competency in a specific area of interest, students can narrow their studies by choosing one of three focus areas while completing their upper-division work; the focus areas are (1) Education, (2) Governance, or (3) Health.
Requirements for the B.A. Degree in Social Policy and Public Service

All students must meet the University Requirements (p. 71).
All students must meet the School Requirements (p. 1561).

Requirements for the Major

School requirements must be met and must include 15 courses (60 units) as specified below. Students are reminded that the Pass/Not Pass option is not applicable to course requirements A through H or any additional requirements listed for specific majors. Courses used to meet requirements A through H are included in the computation of the grade point average in courses required in the major program.

A. An understanding of the fundamental concepts, analytical tools, and methods of social science:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC SCI 1A</td>

NOTE: Certain special topics courses may be applicable to this major; students should see their undergraduate advisor prior to enrolling in a special topics course to ensure that it meets the requirements. SOC SCI 184A Sage Leader Research I-SOC SCI 184B Sage Leader Research II may not be used to satisfy school requirements.

**Honors Program**

The honors program allows majors to engage in research leading to the completion of an honors thesis. The topic for the honors thesis, reflecting a social science theme, is determined by the student in consultation with a faculty advisor. In addition to satisfying the requirements for the major, honors program participants must complete additional course work as specified below.

The honors program is composed of three four-unit courses: SOC SCI H190A Honors Research Workshop, SOC SCI H190B Honors Thesis Research, and SOC SCI H190C Honors Thesis. Satisfactory completion of the honors thesis course also satisfies the upper-division writing requirement. The honors program is open to all junior and senior Social Policy and Public Service majors with an overall GPA of 3.00 and a 3.30 GPA in at least five Social Science courses.

The schedule of courses for the honors program is as follows:

1. During the spring quarter of the junior year or the summer prior to the senior year, students formally apply to the honors program through the School of Social Sciences Undergraduate Student Affairs Office.
2. In the fall quarter of the senior year, students enroll in SOC SCI H190A. This course ends with each student having formulated a written research plan for the honors thesis. Students also select a faculty mentor who has agreed to supervise the research and evaluate the final version of their honors thesis.
3. In the winter quarter of the senior year, students enroll in SOC SCI H190B and work with their faculty mentor, who supervises and evaluates data collection and analysis.
4. In the spring quarter of the senior year, students enroll in SOC SCI H190C and work with their faculty mentor to complete the final version of their honors thesis.

**Pi Gamma Mu: International Honor Society**

The International Honor Society in Social Sciences is the oldest and preeminent honor society in the social sciences with over 150 active chapters in the United States and overseas. Its mission is to encourage and recognize superior scholarship in social science disciplines and to foster cooperation and social service among its members. For more information call (949) 824-9229.

**Faculty**

Nurudeen O. Alao, Ph.D. Northwestern University, **Lecturer of Social Sciences; International Studies**

Jeanett Castellanos, Ph.D. Washington State University, **Lecturer with Security of Employment of Social Sciences**

Ricardo Chavira, M.A. California State University, Northridge, **Lecturer of Social Sciences; International Studies**

Joanne Christopherson, Ph.D. University of California, Irvine, **Lecturer of Social Sciences**

Raúl A. Fernández, Ph.D. Claremont Graduate University, **Director of the UC-Cuba Academic Initiative and Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences**

James J. Flink, Ph.D. University of Pennsylvania, **Professor Emeritus of Social Sciences**

Paula Garb, Ph.D. Russian Academy of Sciences, **Lecturer of Social Sciences; International Studies; Undergraduate Education**

Gilbert G. Gonzalez, Ph.D. University of California, Los Angeles, **Professor Emeritus of Chicano/Latino Studies; Culture and Theory; Social Sciences**

James R. Hull, Ph.D. University of North Carolina at Chapel Hill, **Lecturer with Potential Security of Employment of Social Sciences; Sociology**
Courses

SOC SCI 1A. Principles in the Social Sciences. 4 Units.
Introduction to various disciplines within the social sciences. Provides an interdisciplinary perspective on understanding human behavior and social institutions, including interpersonal, economic, and cultural activities. Course may be offered online.

(SOC SCI H1E. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Same as SOCECOL H20A.
Restriction: Campuswide Honors Program students only.

(SOC SCI H1F. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1E or SOCECOL H20A.
Same as SOCECOL H20B.
Restriction: Campuswide Honors Program students only.

(SOC SCI H1G. Honors: Critical Issues on the Social Sciences. 6 Units.
Major themes, methods, and works in the social sciences from an interdisciplinary perspective. Each quarter focuses on a different topic. Weekly seminars emphasizing development of critical thinking skills and quantitative analysis through written work are integral to the course.

Prerequisite: SOC SCI H1F or SOCECOL H20B.
Same as SOCECOL H20C.
Restriction: Campuswide Honors Program students only.

SOC SCI 2A. Introduction to Social Science Analysis. 4 Units.
Introduction to social science research and analytical models. Theory construction and use of research methods in an interdisciplinary context. Discussion of the application of social science research to public policy. Computer laboratories develop creative thinking, graphing, and data presentation skills.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 3A. Computer-Based Research in the Social Sciences. 4 Units.
Focuses on the data manipulation, data visualization, and information searching techniques. Hands-on experience in hypothesis testing, mapping, graphics, and data arrays. Course may be offered online.

Restriction: School of Social Sciences majors have first consideration for enrollment.
SOC SCI 5A. Introduction to Human Geography. 4 Units.
Human behavior in a geographical context. Spatial patterns and organization of the cultural, social, and economic activities of man as imposed on and influenced by the earth's physical setting.

(III)

SOC SCI 5B. Introduction to Physical Geography. 4 Units.
An introduction to the physical world we live in. Distribution and dynamics of the earth's air, water, and solid crust. Concepts and principles from climatology and geology. Selected examples from North America and beyond.

SOC SCI 5D. US & World Geography. 4 Units.
Survey of general geographical principles and facts on a world scale, as well as introduction to the broad regional and resource geography of the U.S., emphasizing in particular the interactions of physical and cultural factors.

(III, VIII)

SOC SCI 9A. General Statistics and Probability I. 4 Units.
Introduction to the variety of statistical applications in many fields, including the humanities, physical and social sciences, business, forensic and health sciences. Descriptive statistics, including percentile ranks, standardization, and normal approximation. Estimation and the measurement of error.

Overlaps with ECON 10A, PSYCH 10A, SOCECOL 13, SOC SCI 10A, SOCIOL 10A, POL SCI 10A.

Restriction: Non-Social Sciences majors only.

(Va)

SOC SCI 9B. General Statistics and Probability II. 4 Units.
Introduction to statistical inference, sampling distributions, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square. Selected applications in fields such as ecology, forensic science, and quantitative stylistics are based on student interests.

Prerequisite: SOC SCI 9A.

Overlaps with ANTHRO 10B, POL SCI 10B, PSYCH 10B, SOCECOL 13, SOC SCI 10B, SOCIOL 10B.

Restriction: Non-Social Sciences majors only.

(Va)

SOC SCI 9C. General Statistics and Probability III. 4 Units.
Focus on correlation and regression. One-way and two-way factorial analysis of variance. Introduction to repeated measures designs and non-parametric statistics. Critiquing the use of statistics in newspapers and popular magazines. Locating, accessing, and evaluating statistical data.

Prerequisite: SOC SCI 9B.

Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOC SCI 10C, SOCIOL 10C.

Restriction: Non-Social Sciences majors only.

(Vb)

SOC SCI 10A. Probability and Statistics in Social Sciences I. 4 Units.
Introduction to the variety of statistical applications in the social sciences. Descriptive statistics. Measures of central tendency and dispersion. Percentile ranks. Standardization and normal approximation. Basic probability theory focuses on application to statistical inference and binomial distribution. Laboratory required.

Corequisite: SOC SCI 3A.
Prerequisite: SOC SCI 3A.

Overlaps with ECON 10A, PSYCH 10A, SOCECOL 13, POL SCI 10A, SOC SCI 9A, SOCIOL 10A.

Restriction: Lower-division students only. Social Science majors have first consideration for enrollment.

(Va)
SOC SCI 10B. Probability & Statistics in Social Sciences II. 4 Units.
Introduction to statistical inference, sampling distribution, standard error. Hypothesis tests for proportions and means. Inferential techniques for nominal variables including chi-square, study measures of strengths, significance of relationships between variables, assumptions, data requirements, and types of error in significance tests. Course may be offered online.

Prerequisite: SOC SCI 10A.
Overlaps with ANTHRO 10B, POL SCI 10B, SOCECOL 13, SOC SCI 9B, SOCIOL 10B, PSYCH 10B.
Restriction: Social Science majors have first consideration for enrollment.

(Va)

SOC SCI 10C. Probability & Statistics in Social Sciences III. 4 Units.
Focus on correlation, regression, and control for effects of variables. One-way and two-way factorial analysis of variance. A priori and a posteriori comparisons. Introduction to repeated measures design and non-parametric statistics. Discuss use of statistics in newspapers and popular magazines.

Prerequisite: SOC SCI 10B.
Overlaps with ANTHRO 10C, POL SCI 10C, PSYCH 10C, SOCECOL 13, SOC SCI 9C, SOCIOL 10C.
Restriction: Social Science majors have first consideration for enrollment.

(Vb)

SOC SCI 11A. Barter to Bitcoin: Society, Technology and the Future of Money. 4 Units.
Digital money has captured the broad imagination of speculators, coders, regulators, criminals and the mass media. Course puts this change in context: how do we understand money as a social, political and technological phenomenon? Course may be offered online.

Same as IN4MATX 12.

(II, III)

SOC SCI 20. Model United Nations. 2 Units.
Focuses on simulations of the foreign policy pursuits of selected countries in the international community. Emphasis placed on understanding the rules of debate, as well as the policy positions of the student's selected country in the United Nations.

Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 6 times.

SOC SCI 40. Social Policy and Public Service. 4 Units.
An introduction to the basic theories and principles of public policy. Students examine various influences on the development of public policy and the principle actors in the process, and learn to identify tools and techniques employed in policy making.

(III)

SOC SCI 66. Introduction to Gangs . 4 Units.
Introduces students to street gang subculture and explores risk factors associated with gang membership. Students develop a working definition for street gang and understand the difference between social and legal definitions. Also explores the connection between prison and street gangs.

SOC SCI 70A. Race and Ethnicity. 4 Units.
Focuses on racial and ethnic relations in the United States and compares them with those found in other societies. Analyzes the conditions that favor either cooperation and integration or rivalry, tension, and conflict. Appraises strategies for reducing and resolving conflicts.

Same as SOCIOL 63.

(VII)

SOC SCI 70C. Comparing Cultures. 4 Units.
Introduces students to the scope of cross-cultural comparisons by analyzing the theories, methodologies, and facts utilized by anthropologists, sociologists, social psychologists, political scientists, and historians in comparing cultures.

(III, VII)
SOC SCI 78A. Asian American Histories. 4 Units.
Examines and compares diverse experiences of major Asian American groups since the mid-nineteenth century. Topics include origins of emigration; the formation and transformation of community; gender and family life; changing roles of Asian Americans in American society. Formerly ASIANAM 60A.
Same as ASIANAM 50, HISTORY 15C.
((III or IV) and VII ).

SOC SCI 78B. Asian American Communities. 4 Units.
Examines the renewal of Asian immigration following World War II. Explores contemporary Asian American populations and communities in the U.S., and the impact of contemporary Asian immigration on the U.S. political economy and social order.
Same as ASIANAM 52.
(III, VII)

SOC SCI 78C. Asian Americans and Comparative Race Relations. 4 Units.
Analyses the Asian American experience in comparative perspective, which includes comparisons of different ethnic and racial groups, and across gender and class. Possible topics include labor, economy, politics, migration, nation, popular culture, gender, family, sexuality, and multiraciality.
Same as ASIANAM 53.
(III, VII)

SOC SCI 89. Special Topics in Social Sciences. 2-4 Units.
Studies in selected areas of Social Sciences. Topics addressed vary each quarter.
Repeatability: Unlimited as topics vary.

SOC SCI 102A. Introduction to Geographic Information Systems. 4 Units.
Hands-on laboratory course introduces students to the fundamentals of Geographic Information Systems (GIS) technology using social science applications. Students will learn to organize, manipulate, and display spatial data leading to the design of their own GIS research project.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 102B. Intermediate Geographic Information Systems. 4 Units.
Expands Geographic Information Systems (GIS) skills to more advanced theories and concepts in the spatial analysis of social science issues and particularly to analyzing and interpreting spatial data. Students develop and complete a GIS research project of their own choosing.
Prerequisite: SOC SCI 102A.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 103A. Game Theory and Politics I. 4 Units.
Introduction to game theory and a survey of its political applications. Examples of topics covered include voting in small committees, legislatures, and mass elections; interest group activities and environmental issues; institutional design, and the evolution of cooperative behavior.
Same as INTL ST 105A, POL SCI 130A, SOCIOL 134.
Restriction: Social Policy and Public Service, Sociology, Political Science, and International Studies majors have first consideration for enrollment.

SOC SCI 103B. Game Theory and Politics II. 4 Units.
More advanced game theory and its political applications, beginning where Game Theory and Politics I ends. Examples of topics covered include revolutions; arms race; spatial models of party competition; political manipulation; political coalitions and their power.
Prerequisite: POL SCI 130A or ECON 116A.
Same as INTL ST 105B, POL SCI 130B.
Restriction: Social Policy and Public Service, International Studies, and Political Science majors have first consideration for enrollment.

SOC SCI 115D. International Business. 4 Units.
Introduction to conducting business in the international arena, decision making in the organization, and globalization of markets and production. Topics covered range from tax and finance to ethics, marketing, and more. Continuing corporate regulatory scandals discussed.
Same as INTL ST 112A.
SOC SCI 115E. California and Global Economy. 4 Units.
Prepares the nature of the State’s economy and the current and projected role of California in the world economy.

Same as INTL ST 135.

SOC SCI 118G. Regional Geography of California. 4 Units.
Geographical analysis of selected regions of California, in particular geomorphological, hydrological, and climatic conditions, as well as economic and social strengths and weaknesses. May include some fieldwork in Orange County on environmental, social and residential problems, with legislative background information.

SOC SCI 119. Special Topics in Geography. 4 Units.
Studies in selected areas of geography. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.
Repeatability: Unlimited as topics vary.

SOC SCI 120. Transnational Gangs. 4 Units.
Examines the internationalization of U.S. domestic street gangs. The relationship between California gangs Mara Salvatrucha and 18th Street and Mexico/Central American gangs is assessed. Specified topics include: mobilization, migration, territorialism, culture, organization, and use of technology. Course may be offered online.

Prerequisite: SOC SCI 66.
Same as INTL ST 130.
Overlaps with SOC SCI XI120, INTL ST XI130.

SOC SCI 121T. Voting and Political Manipulation. 4 Units.
Introduction to social choice and cooperative games. Topics include majority rule, types of voting methods, apportionment and proportional representation, agenda manipulation, coalition formation, voting power, political consequences of electoral laws.

Same as INTL ST 156A, POL SCI 151H, ECON 154.
Restriction: International Studies, Political Science, Social Science and Economics majors have first consideration for enrollment.

SOC SCI 123A. U.S. Intervention in Latin America. 4 Units.
Explores political, economic, social, and cultural ties that bind Latin America to the United States. Focuses on U.S. intervention and Latin American response from early nineteenth century to present day. Case studies include Mexico, Guatemala, Cuba, Chile, and Central America.

Same as INTL ST 177D, HISTORY 166, CHC/LAT 150.

SOC SCI 130B. Science and Religion II. 4 Units.
The development of genomics, stem-cell research, robotics, nanotechnology, neuropharmacology raises difficult religious and philosophical questions. Examines interdisciplinary approaches that cut across institutional boundaries, cultural borders, religious traditions. Focuses on relationship between religion and cognitive/affective/social neuroscience. Course may be offered online.

Same as REL STD 112B, PSYCH 172S, LPS 140B.

SOC SCI 152A. Non-Government Organization (NGO) Fundamentals. 4 Units.
Introduction to non-governmental organizations, including their role in U.S. society and the international community. Explores varying definitions of NGOs and the characteristics held in common by all NGOs.

Same as INTL ST 152A.

SOC SCI 164B. Domestic Gangs. 4 Units.
Examines the history and development of California street gangs and the role of historical events in that development. Students will be able to contrast and compare gang cohort behaviors between some of the major gangs in California.

Prerequisite: SOC SCI 66.
Restriction: Social Science majors have first consideration for enrollment.
SOC SCI 164C. Prison Gangs. 4 Units.
Examines the growth and spread of prison gangs throughout the country. Relationships between prison and street gangs, and possible relationships with foreign drug trafficking organizations studied. Violence examined as the standard to establish dominance in and out of prison. Course may be offered online.
Prerequisite: SOC SCI 66.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 164D. Juvenile Gangs. 4 Units.
Examines risk factors that can be used to predict gang membership. Compares generational with non-generational gangs and develops a working sociological definition that can be used to identify street gangs. Myths about juveniles, street gangs. Course may be offered online.
Prerequisite: SOC SCI 66.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 165. Chicano/Latino Families. 4 Units.
Introduction to the research, literature, and issues surrounding the topic of Chicano/Latino families including cultural history, contemporary issues, organization of family, traditions, lifestyles, values, beliefs, generational differences, gender issues, ethnic identity, evolution of demographic patterns, current economic and political standings.
Same as CHC/LAT 170, PSYCH 174H.

SOC SCI 167. Chicano/Chicana Labor History. 4 Units.
Examines origins of Latino/ Latina labor from colonial period to present. Emphasis on the issues of race, culture, class, and gender. Focus on processes and institutions including: encomienda, migration, unions, informal economies, Bracero program, domestic work.
Same as CHC/LAT 138.

SOC SCI 168B. Immigration and Inequality. 4 Units.
Explores immigration, ethnicity, and inequality as interconnected social forces. International migration, propelled by global inequalities, plays a central role in the formation of multinational societies, shapes inter-group relations and patterns of ethnic inequality, and transforms the immigrants themselves.
Same as SOCIOL 166.

SOC SCI 169AZ. Special Topics: Sociology. 4 Units.
No description.
Repeatability: Unlimited as topics vary.

SOC SCI 170A. Research Methods in the Social Sciences. 4 Units.
Examines how interdisciplinary social science research questions are formulated and studies several research methods including: experimental method, quasi-experimental methods, survey research, field research, evaluation research, and meta-analysis. Parametric and non-parametric statistical methods are illustrated using the SPSS program.
Prerequisite: SOC SCI 1A and SOC SCI 3A and SOC SCI 10C and SOC SCI 2A.
Restriction: Upper-division students only. Social Science majors have first consideration for enrollment.

SOC SCI 172A. American Culture. 4 Units.
A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing examining its use of language and rhetoric.
Restriction: Social Science majors have first consideration for enrollment.

SOC SCI 172AW. American Culture. 4 Units.
A survey of the historical development of dominant American culture and society; emphasis on a close reading of key cultural texts, with weekly text as a model of writing examining its use of language and rhetoric.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Social Science majors have first consideration for enrollment.

(Ib)
SOC SCI 172D. Law in the Twenty-First Century. 4 Units.
Examines the complex relationship between law, the social sciences, and modern society. Lectures explore such issues as the interplay between technology and constitutional rights, the impact of science on law, and the evolving roles of attorneys and judges.

Same as POL SCI 171F.

Restriction: Political Science and Social Science majors have first consideration for enrollment.

SOC SCI 173G. Film Media and the Latino Community. 4 Units.
Uses film as a resource for understanding contemporary issues and problems facing the Chicano/Latino community. (Does not study cinema as a genre.).

Same as CHC/LAT 114.

(VII)

SOC SCI 173I. Perspectives on the U.S. - Mexican Border. 4 Units.
Economic aspects of the historical development of the United States-Mexican border. The current economic situation in the Southwest and border areas as it affects both Mexico and the Latino/Chicano population is also examined.

Same as CHC/LAT 160, INTL ST 177B.

(VII)

SOC SCI 173N. Revolution in Latin America. 4 Units.
Presents a comparative analysis of the causes, development, and consequences of selected revolutionary movements, focusing on outbreaks in Mexico, Bolivia, Cuba, Chile, Nicaragua, and Grenada. Explores topics of state formation, economic nationalism, social justice, ethnicity, and role of international affairs.

Same as CHC/LAT 151B, HISTORY 166D, INTL ST 177C.

SOC SCI 173Q. Introduction to Cuba: History, Culture, and Society. 4 Units.
Introduction to Cuban history, culture, and society using social science texts, visual and musical materials. Examines major historical moments including the historical relationship between the United States and explores evolution of Cuban music from the earliest times to present.

Same as INTL ST 177F, CHC/LAT 130.

(VIII)

SOC SCI 175B. Ethnic and Racial Communities. 4 Units.
Examines various theoretical analyses of race and ethnicity, particularly as they apply to Asian Americans. Also explores the relationship of Asian Americans to other racialized minorities in the U.S.

Same as ASIANAM 161.

SOC SCI 177B. Asian American Women. 4 Units.
Examines the representations and experiences of Asian American women from diverse perspectives. Explores the commonalities and differences among various groups of Asian American women, with particular focus on history, culture, values, and family roles.

Same as ASIANAM 162.

SOC SCI 178C. The Korean American Experience. 4 Units.
Explores the factors that have distinctly shaped the Korean American experience, including patterns of racial domination, the profile of immigrant flow, immigrant roles in the urban political economy, politics in Korea, and the role of the church.

Same as ASIANAM 151C.

SOC SCI 178D. The Vietnamese American Experience. 4 Units.
Studies the resettlement of Vietnamese in the United States following their exodus from Southeast Asia. Topics discussed include the Vietnam War, the 1975 evacuation, boat and land refugees, the shaping of Vietnamese communities, and Vietnamese American literature.

Same as ASIANAM 151D.
SOC SCI 178E. The Japanese American Experience. 4 Units.
Studies the settlement of Japanese in Hawaii and the continental United States since the late nineteenth century. Topics covered include sugar plantations, development of rural Japanese America, World War II internment, post-War community development, and persistence of Japanese American identity.

Same as ASIANAM 151E.

SOC SCI 178F. South Asian American Experience. 4 Units.
Examines and compares the experiences of South Asian immigrants in the U.S. over time. Looks at the economic, political, and social positions of the immigrants, with special emphasis on religious changes and the changes in the second and later generations.

Same as ASIANAM 151F.

Restriction: Asian American Studies and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 178H. Southeast Asian American Experience. 4 Units.
Analyzes experiences of refugees and immigrants from Southeast Asia, which may include those from Cambodia, Laos, Vietnam, and the Philippines. Examines political and economic factors for their exodus and how they reconstruct their identities, histories, and communities.

Same as ASIANAM 151H.

SOC SCI 178J. Chinese American Experience. 4 Units.
Analyzes the experiences of Chinese in the United States. Immigration, Chinese exclusion, racial and gender identity. Historical overview and contemporary issues covered.

Same as ASIANAM 151J.

SOC SCI 178K. Filipina/Filipino American Experience. 4 Units.
Explores the experience of Filipina/Filipino Americans from the era of Spanish colonization of the Philippines to present-day community formations in the United States, with special emphasis on the twentieth century. Topics include colonialism, nation, migration, gender, and culture.

Same as ASIANAM 151K.

SOC SCI 179. Special Topics in Asian American Studies. 4 Units.
Studies in selected areas of Asian American Studies. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

SOC SCI 180X. Research Methods . 4 Units.
Develops an understanding of major research methods emphasizing quantitative research techniques; identifies techniques for research questions; applies understanding in relation to contemporary issues by way of a written a proposal for a quantitative research project.

Grading Option: Pass/no pass only.

Restriction: SAEP students only.

SOC SCI 180Y. Statistical Methods . 4 Units.
Covers the following topics: measurement, data screening procedures, descriptive statistics, the chi-square statistic, logistic regression, bivariate correlation and regression, and multiple correlation and regression. Students will develop a conceptual understanding of applied statistics.

Grading Option: Pass/no pass only.

Restriction: SAEP participants only.

SOC SCI 180Z. Communications . 4 Units.
Improves written and verbal communication skills through gathering, synthesizing, and organizing information into salient and clear points. Students learn to articulate information so that it can be clearly understood by others. Application to SAEP program and acceptance required.

Grading Option: Pass/no pass only.

Restriction: SAEP students only.

SOC SCI 181A. Ethical Leadership. 4 Units.
Explores historical and contemporary theories of ethical and unethical leadership. Examines models of "good leadership" such as cardinal and monastic virtues; and models of "bad leadership," such as Machiavelli's Prince. Explores the philosophies, styles, and accomplishments of leaders.

Restriction: Social Science majors have first consideration for enrollment.
SOC SCI 183A. International Studies Forum. 2 Units.
A faculty-student forum featuring lecturers from a variety of institutions with discussion issues related to international studies.
Repeatability: May be taken for credit 4 times.
Same as HUMAN 183A, SOCECOL 183A, INTL ST 183A.
Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

SOC SCI 183B. Seminar in Mediation. 4 Units.
Student develop mediation skills and refine knowledge in the practice and theory of conflict resolution. Students who complete this course may serve as mediators in the Campus Mediation Program. Course is a prerequisite to completing Indep Study as an intern.
Same as HUMAN 183B, INTL ST 183B, SOCECOL 183B.
Restriction: School of Humanities, School of Social Ecology, International Studies, and Social Science majors have first consideration for enrollment.

SOC SCI 183C. Seminar in Conflict Resolution. 4 Units.
Designed for students pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write research paper.
Same as SOCECOL 183C, HUMAN 183C.

SOC SCI 183CW. Seminar in Conflict Resolution. 4 Units.
Designed for seniors who are pursuing the minor in Conflict Resolution and/or International Studies major. Provides a forum in which students will refine skills and theory in the study of cooperation and conflict, from local to global arenas. Students write.
Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Same as SOCECOL 183CW, HUMAN 183CW.

SOC SCI 183E. Conflict Resolution in Cross-Cultural Perspective. 4 Units.
Examines theories of conflict management. Analyzes how conflict is mitigated in diverse cultures: at the interpersonal level, between groups, and on the international scale. Students discuss readings, hear from conflict management practitioners, and simulate negotiations.
Same as ANTHRO 136D, POL SCI 154G, INTL ST 183E.

SOC SCI 184A. Sage Leader Research I. 2 Units.
Participants in the SAGE Scholars Program learn to define leadership concepts, discover various leadership styles, and develop strong leadership and communication skills resulting in strengthened ability to contribute to and interact with UCI and the Orange County community.
Grading Option: Pass/no pass only.
Restriction: SAGE Scholars Program students only.

SOC SCI 184B. Sage Leader Research II. 4 Units.
Provides a survey of contemporary topics and challenges in the fields of management and leadership. Case studies and text by leading authors are used to analyze key leadership issues in twenty-first century, with particular emphasis on current events.
Restriction: SAGE Scholars Program students only.

SOC SCI 184F. International Journalism. 4 Units.
Studies and critically analyzes how the media covers international issues that have reshaped. American foreign coverage and the implications for Americans and U.S. foreign policy. Focuses on international reporting as a way of developing fundamental skills of journalism.
Same as INTL ST 155A.
SOC SCI 184GW. Media Writing. 4 Units.
Designed to teach reporting and news writing basics. Students learn how to gather and organize information, ask effective questions, develop story ideas, research facts, and write stories on deadline. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as INTL ST 155BW.
Overlaps with INTL ST XI155B, SOC SCI XI184G.

Restriction: International Studies majors have first consideration for enrollment.

SOC SCI 185W. People in Society. 4 Units.
Through readings about people in distinctly different societies throughout history, students learn concepts that cross the boundaries of the social science disciplines. Such themes as democracy, elitism, power, social class, and gender as the basis for discussion and writing.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of Social Sciences majors only.

SOC SCI 186A. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as PSYCH 144A, CHC/LAT 191A.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 186B. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144A or SOC SCI 186A or CHC/LAT 191A. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children and be culturally sensitive.

Same as PSYCH 144B, CHC/LAT 191B.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 186C. HABLA: Language Intervention for Disadvantaged Children. 4 Units.
Train students for home visits promoting school readiness among two-four year-olds from low SES and educational backgrounds. Covers fundamentals of child language, literacy, cognitive development; procedures, ethics of home visitation. Work with families to create better literacy and language environment.

Prerequisite: PSYCH 144B or SOC SCI 186B or CHC/LAT 191B. Must pass an interview conducted by instructor, be fluent in English and one other language (Spanish most typically), must have experience with preschool children, and be culturally sensitive.

Same as PSYCH 144C, CHC/LAT 191C.

Restriction: Psychology, Chicano/Latino Studies, and Social Policy and Public Service majors have first consideration for enrollment.

SOC SCI 187. Twenty-First-Century Graduate Education. 2 Units.
Graduate and professional education in twenty-first century United States. Examines strategies for admission to postbaccalaureate programs and success in graduate study culture. Introduction to processes including planning and preparation, school selection, entrance examination preparation, submission of applications, writing personal statements.

Grading Option: Pass/no pass only.

Restriction: Upper-division students only.
SOC SCI 188A. Introduction to Contemporary Middle East Politics. 4 Units.
An overview of basic issues that shape the politics of the Middle East and North Africa. Themes include implication of the colonization era, nation-state formation, inter-Arab relations, nationalism, Arab-Israel conflict, Islamic resurgence, and more.

Same as INTL ST 165, POL SCI 158D.

SOC SCI 188D. Iran: Past and Present. 4 Units.
Pre-revolutionary Iran; and Iran since the revolution. History, oil and politics: domestic and international.

Same as INTL ST 168.

SOC SCI 188E. Israel and the World: An Introduction. 4 Units.
Examines the founding of Israel, its relationship with the Arab world, the role of the international community, and the challenges it faces today.

Same as INTL ST 170.

SOC SCI 188I. Afghanistan. 4 Units.
Provides an examination of Afghanistan's traditional social organization, economy, political organization, and relationship among ethnic groups as a basis for discussing the consequences of domestic political turmoil and foreign interventions over the last 20 years. Current situation and future addressed.

Same as INTL ST 162, POL SCI 158C.

SOC SCI 188K. Political Islam. 4 Units.
Political Islam is a diverse phenomenon. While noticeable barriers exist to "Islamist democracy," it is the Islamists who will define the political future of much of the Muslim world. Reviews the experience of Saudi Arabia, Egypt, Pakistan, Turkey, and Indonesia.

Same as INTL ST 161A.

SOC SCI 188M. Psychology of the Middle East Conflict. 4 Units.
Explores how emotions guide actions; political movements and social identity factors in ethnic, religious, or other group conflicts; psycho-biographies of political leaders and effects on foreign policy making; decisions to go to war; psychological dimensions of conflict and conflict resolution.

Same as INTL ST 166.

SOC SCI 189. Special Topics in Social Sciences. 2-4 Units.
Studies in selected areas of social sciences. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Social Science majors have first consideration for enrollment.

SOC SCI H190A. Honors Research Workshop. 4 Units.
Student develops a 10–15-page prospectus of research for the honors thesis which includes: the research question, literature review, methods of investigation, and bibliography. Student selects a faculty mentor who will supervise thesis research and writing in winter and spring.

Restriction: Honors Program for Social Science majors students only.

SOC SCI H190B. Honors Thesis Research. 4 Units.
The student initiates and completes data collection for the honors thesis. A faculty mentor provides supervision and feedback on thesis chapters.

Prerequisite: SOC SCI H190A.

SOC SCI H190C. Honors Thesis. 4 Units.
The student completes, with the approval of the faculty mentor, an honors thesis containing: statement of the problem, literature review, research hypotheses, methods of investigation, results, discussion, and bibliography.

Prerequisite: SOC SCI H190B. Satisfactory completion of the Lower-Division Writing requirement.

(lb)

SOC SCI 191. Graduate-Mentored Study in the Social Sciences. 4 Units.
Offers a hands-on research experience while increasing awareness of the various disciplines in the social sciences and of the requirements of graduate school. Features graduate-mentored study under the supervision of the Associate Dean.

Prerequisite: Identification of a graduate student (who is in good standing) as a mentor.

Grading Option: Pass/no pass only.
SOC SCI 193A. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 70C or SOCIOL 63. Satisfactory completion of the Lower-Division Writing requirement.
Restriction: Social Policy and Public Service majors only.

SOC SCI 193B. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193A.

SOC SCI 193C. Field Studies in Public and Community Service. 4 Units.
Advanced training in qualitative and ethnographic research centered on community service. Students pursue field studies at nonprofit agencies (200 hours) to understand current social problems in underrepresented and underserved communities. Through field placement, students apply theory to practice.

Prerequisite: SOC SCI 193B.

SOC SCI 194A. Public Service Internship. 2-4 Units.
Introduces the role of etiquette and leadership in the professional environment. With a two-unit (50 hours) or four-unit (100 hours) credit option, students intern at a nonprofit agency exploring their roles as community leaders and improving their professional skills. Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 2 times.
Restriction: Social Policy and Public Service majors only.

SOC SCI 194B. Community Internship. 2-4 Units.
Required to complete 50 (two units) or 100 (four units) hours at a nonprofit organization, students engage in lectures related to the formation and maintenance of nonprofit organizations. Grant writing, funding issues, and effective service delivery are addressed.

Prerequisite: SOC SCI 194A.
Grading Option: Pass/no pass only.
Repeatability: May be taken for credit 3 times.
Restriction: Social Science majors only.

SOC SCI 194C. Management and Leadership Practicum-Social Science . 2-4 Units.
Social Sciences Academic Resource Center (SSARC) Resource Managers (RMs) report directly to the Director and Associate Director, serving as frontline resource consultants, assisting visitors with resume development, graduate and professional school planning, internship placement, and professional development.

Grading Option: Pass/no pass only.
Repeatability: May be taken for credit for 12 units.

SOC SCI 195A. Educational Policy Field Studies. 4 Units.
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Repeatability: May be taken for credit 3 times.
SOC SCI 195B. Educational Policy Field Studies. 4 Units.
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Prerequisite: SOC SCI 195A.

Repeatability: May be taken for credit 3 times.

SOC SCI 195C. Educational Policy Field Studies. 4 Units.
Integrates academic course work with experiential learning; examines the effects of educational policy on urban and suburban schools; explores the relationship between community service and personal academic interests; and develops awareness about the challenges of public education.

Prerequisite: SOC SCI 195B.

Repeatability: May be taken for credit 3 times.

SOC SCI 196. Global Connect. 2-4 Units.
Identifies factors of change that influence the twenty-first century. Students serve as mentors at high schools to introduce globalization issues through workshops and lectures. Students must submit an application and have a 3.0 or higher overall GPA.

Repeatability: May be taken for credit 3 times.

SOC SCI 197. Professional Internship. 2-4 Units.
Students apply classroom knowledge through research projects in nonprofit agencies (local, state, and government) and the private sector. They pose solutions to agency-posed questions. Students gain field experience through 50 hours (for 2 units) or 100 (for 4 units). Course may be offered online.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 8 units.

Restriction: School of Social Sciences majors only.

SOC SCI 198. Directed Group Study. 2-4 Units.
Directed study with Social Science faculty.

Repeatability: May be taken for credit for 12 units.

SOC SCI 199. Individual Study. 2-4 Units.
Opportunities to do research and learn new skills outside the normal classroom environment. Students participate in planned research and study activities under a written contract with a supervising UCI instructor. Students may enroll for only one 199 each quarter.

Repeatability: May be taken for credit for 16 units.

Restriction: Upper-division students only.

SOC SCI 209. Special Topics in Mathematical Social Science. 4 Units.
Studies in selected areas of mathematical social science. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

SOC SCI 211A. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 211B. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.
SOC SCI 211C. Mathematical Behavioral Sciences Colloquium. 2 Units.
Weekly reports and colloquia by faculty, students, and visitors.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 249A. Special Topics in Social Networks. 4 Units.
Studies in selected areas of social networks. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOC SCI 253A. Oral History, Life History. 4 Units.
Interdisciplinary and comparative work in oral and life history; methods of interviewing.

Same as ANTHRO 221A.

Restriction: Graduate students only.

SOC SCI 253F. Population. 4 Units.
Introduces the interrelationships between population and social organization. Considers measurement and explanation of historical and contemporary trends in birth rates, death rates, migration, and marriage and divorce. Case material is drawn primarily from the U.S. and other industrialized nations.

Same as SOCIOL 262A.

Restriction: Graduate students only.

SOC SCI 253J. Social Movements. 4 Units.
A survey of the field of Social Movements, oriented around critical themes in the major theoretical traditions and contemporary exemplars.

Same as SOCIOL 240A.

Restriction: Graduate students only.

SOC SCI 253N. Classical Social Theory. 4 Units.
Examines the development of classical sociological theory through the writings of Karl Marx, Emile Durkheim, Max Weber, Georg Simmel, and George Herbert Mead.

Same as SOCIOL 210A.

Restriction: Graduate students only.

SOC SCI 254A. Transnational Migration. 4 Units.
Examines borders and boundaries as material and semiotic constructs. Drawing upon an array of literatures, but loosely situated in U.S. geo/biopolitics, explores transformative troubleings of places, spaces, borders, and bodies of all sorts.

Same as ANTHRO 235A, CHC/LAT 215.

Restriction: Graduate students only.

SOC SCI 254J. Global Urbanization. 4 Units.
Examines the spread of cities worldwide in the twentieth century. What are the political and economic causes of this process? What are the social-cultural, political, and economic effects? How is contemporary urbanization linked to global restructuring of other kinds.

Same as PP&D 273, SOCIOL 252A.

Restriction: Graduate students only.
SOC SCI 254L. Approaches to Globalization. 4 Units.
Historical and contemporary approaches to the world economy, emphasizing anthropological questions of culture, power, identity, inequality. Examines “neo-imperialism,” “late capitalism,” accumulation, global markets, urban space, the state, business and policy globalization discourse, “local” responses to and instantiations of the “global.”.

Same as ANTHRO 248A.

Restriction: Graduate students only.

SOC SCI 255C. Grant and Proposal Writing. 4 Units.
Focuses on production, critique, and revision of student research proposals. A practical seminar designed to improve student proposals, help students through the application processes, and increase students' chances of obtaining support for their research.

Same as ANTHRO 213A.

Restriction: Graduate students only.

SOC SCI 259A. Special Topics in Social Relations. 1-4 Units.
Studies in selected areas of social relations. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

SOC SCI 272A. Origin and Evolution of Marxist Social Thought. 4 Units.
Focuses on the genesis and evolution of Marxist social thought. The "systemic" method of Marx and Engels to questions of economic production and reproduction is compared and contrasted with modern world-system grand visions, feminist-theoretic approaches, and postmodern critiques.

Prerequisite: Undergraduate course in political theory or equivalent.

Restriction: Graduate students only.

SOC SCI 289. Special Topics in Social Science. 4 Units.
Current research in Social Science.

Repeatability: Unlimited as topics vary.

SOC SCI 290. Dissertation Research. 4-12 Units.
Dissertation research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

SOC SCI 299. Independent Study. 1-12 Units.
Independent research with Social Science faculty.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

SOC SCI 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.
Appendix

University Administration

Under the State constitution, governance of the University is entrusted to The Board of Regents. The Regents appoint the President of the University, and with the President’s advice, the officers of the University. Authority in academic matters is delegated by The Regents to the Academic Senate, which consists of faculty and certain administrative officers. The Academic Senate determines academic policy for the University as a whole, sets conditions for admission and the granting of degrees, authorizes and supervises courses and curricula, and advises the University administration on faculty appointments, promotions, and budgets. Additionally, each campus has a divisional Academic Senate.

The President is executive head of the total institution. Each campus has a Chancellor as its chief administrative officer. Students participate in policy-making at both the campus and Universitywide levels.

The Regents of the University of California

Regents Ex Officio
Governor of California and President of The Regents: Jerry Brown
Lieutenant Governor of California: Gavin Newsom
Speaker of the Assembly: John A. Pérez
State Superintendent of Public Instruction: Tom Torlakson
President of the Alumni Associations of the University of California: Ken Feingold
Vice President of the Alumni Associations of the University of California: Van Schultz
President of the University: Janet Napolitano

Appointed Regents

Richard C. Blum (2026)
William C. De La Peña (2018)
Russell S. Gould (2017)
Eddie Island (2017)
George Kieffer (2021)
Sherry L. Lansing (2022)
Monica Lozano (2022)
Hadi Makarechian (2020)
Norman J. Pattiz (2026)
Bonnie Reiss (2020)
Frederick Ruiz (2016)
Richard Sherman (2025)
Bruce D. Varner (2018)
Paul Wachter (2016)
Charlene Zettel (2021)
Cinthia Flores (July 1, 2013–June 30, 2014)

Regents-Designate

to be announced
to be announced

1 Regents except ex-officio Regents and the student Regent, are appointed by the Governor to 12-year terms commencing on March 1. Ex-officio Regents serve by virtue of their elected or appointed positions; the student Regent is appointed by the Regents to a one-year term commencing on July 1.

2 One-year terms expiring June 30.

Faculty Representatives to The Regents
Mary Gilly
William Jacob (through 8-31-14)

Staff Advisors to The Regents
Kathy Barton
Donna Coyne

Principal Officers of The Regents
General Counsel and Vice President–Legal Affairs: Charles F. Robinson
Appendix

Treasurer of The Regents and Chief Investment Officer and Vice President–Investments: Jagdeep Sinh Bachher
Interim Secretary and Chief of Staff of The Regents: Anne Shaw
Senior Vice President–Chief Compliance and Audit Officer: Sheryl Vacca

Office of the President

President of the University: Janet Napolitano
Vice President–Laboratory Management: Glenn L. Mara
Executive Vice President–Business Operations: Nathan Brostrom
Provost and Executive Vice President–Academic Affairs: Aimee Dorr
Executive Vice President–Chief Financial Officer: Peter J. Taylor
Senior Vice President–Health Sciences and Services: John D. Stobo
Senior Vice President–External Relations: Daniel M. Dooley

Chancellors

Chancellor at Berkeley: Nicholas B. Dirks
Chancellor at Davis: Linda Katehi
Interim Chancellor at Irvine: Howard Gilman
Chancellor at Los Angeles: Gene D. Block
Chancellor at Merced: Dorothy Leland
Chancellor at Riverside: Kim A. Wilcox
Chancellor at San Diego: Pradeep K. Khosla
Acting Chancellor at San Francisco: Sam Hawgood
Chancellor at Santa Barbara: Henry T. Y. Yang
Chancellor at Santa Cruz: George R. Blumenthal

UCI Officers

Interim Chancellor: Howard Gillman
Provost and Executive Vice Chancellor: Howard Gillman
Vice Chancellor, Administrative and Business Services: Wendell C. Brase
Vice Chancellor, Planning and Budget: Meredith Michaels
Vice Chancellor, Research: John C. Hemminger
Vice Chancellor, Student Affairs: Thomas A. Parham
Vice Chancellor, University Advancement: Gregory R. Leet
Chief Executive Officer, Medical Center and Associate Vice Chancellor, Medical Center Affairs: Terry A. Belmont

UCI Deans and Chairs of Independent Academic Units

Dean, Claire Trevor School of the Arts: Joseph S. Lewis III
Dean, Francisco J. Ayala School of Biological Sciences: Frank M. LaFerla
Dean, The Paul Merage School of Business: Eric Spangenberg
Dean, School of Education: Deborah Lowe Vandell
Dean, The Henry Samueli School of Engineering: Gregory Washington
Dean, School of Humanities: Georges Van Den Abbeele
Dean, Donald Bren School of Information and Computer Sciences: Hal S. Stern
Dean, School of Law: Erwin Chemerinsky
Interim Dean, School of Medicine: Roger F. Steinert
Dean, School of Physical Sciences: Kenneth C. Janda
Dean, School of Social Ecology: Valerie Jennness
Dean, School of Social Sciences: William M. Maurer
Dean, Continuing Education, Distance Learning, and Summer Session: Gary W. Matkin
Dean, Graduate Division: Frances M. Leslie
Dean, Division of Undergraduate Education: TBA
Director, Program in Nursing Science: TBA
Chair, Department of Pharmaceutical Sciences: A. Richard Chamberlin
Chair, Department of Population Health and Disease Prevention: Oladele Ogunsentein

UCI Administrators

Associate Chancellor/Chief of Staff: Ramona Agrela
Associate Vice Chancellor, Strategic Communications: Ria M. Carlson
Senior Assistant Vice Chancellor, Constituent and Alumni Relations: Goran S. Matijasevic
Assistant Vice Chancellor, Alumni Relations, and Executive Director, UCI Alumni Association: TBA
Director, Intercollegiate Athletics: Michael Izzi
Vice Provost, Academic Personnel: Herbert P. Killackey
Assistant Vice Chancellor, Academic Personnel: Joan K. Tenma
Senior Vice Provost, Academic Planning: Michael P. Clark
Vice Provost, Academic Initiatives: Albert F. Bennett
Associate Vice Provost, Equity and Diversity: Douglas M. Haynes
Associate Executive Vice Chancellor: Michael R. Arias
Associate Executive Vice Chancellor, Director of the Office of Equal Opportunity and Diversity, and Title IX/ Sexual Harassment Officer: Kirsten Quanbeck
Associate Vice Chancellor and Chief Information Officer: Dana F. Roode
University Librarian: Lorelei Tanji
University Ombudsman: J. Michael Chennault
Assistant Vice Chancellor, Healthcare Measurement and Evaluation: Sherrie Kaplan
Associate Vice Chancellor, Administrative and Business Services: Paige L. Macias
Associate Vice Chancellor and Campus Architect: Rebekah Gladson
Assistant Vice Chancellor/Controller: Bent Nielsen
Assistant Vice Chancellor, Facilities Management and Environmental Health and Safety: Marc A. Gomez
Assistant Vice Chancellor, Human Resources: John Daly
Associate Vice Chancellor, Planning and Budget: Richard Lynch
Assistant Vice Chancellor, Institutional Research and Decision Support: Ryan M. Cherland
Associate Dean, Graduate Division: Susan Bibler Coutin
Associate Vice Chancellor, Administration: Mark W. Warner
Associate Vice Chancellor, Research: James W. Hicks
Assistant Vice Chancellor, Research Development: Jacob E. Levin
Assistant Vice Chancellor, Administrative Operations and Planning: D. Sinqui Musto
Assistant Vice Chancellor, Research Administration: Bruce A. Morgan
Assistant Vice Chancellor, Technology Alliances: Ronnie C. Hanecak
Associate Vice Chancellor, Student Affairs: Daniel J. Dooros
Assistant Vice Chancellor, Wellness, Health, and Counseling Services: Marcelle C. Holmes
Assistant Vice Chancellor, Enrollment Services: Brent Yunek
Assistant Vice Chancellor and Dean of Students, Student Life and Leadership: Rameen Talesh
Assistant Vice Chancellor, Constituent Development: Sylvia Acosta
Assistant Vice Chancellor, Community and Government Relations: Kate Klimow
Assistant Vice Chancellor, Development: Daniel Montplaisir
Senior Assistant Vice Chancellor, Strategic Planning and Administration: Lynn Rahn
Assistant Vice Chancellor, UC Irvine Health Advancement: TBA

Refer to http://www.oit.uci.edu/telephone/principal-officers/ for a complete list of UCI administrators.

UCI Faculty Distinctions

The 2007 Nobel Peace Prize was awarded to the Intergovernmental Panel on Climate Change (IPCC) and former Vice President Al Gore. Several UC Irvine climate scientists have played a part in writing, reviewing, and editing IPCC climate change reports over the last decade, including Michael Prather, Professor of Earth System Science and Fred Kavli Chair in Earth System Science; Donald R. Blake, Professor of Chemistry and Earth System Science; Michael L. Goulden, Associate Professor of Earth System Science and of Ecology and Evolutionary Biology; Gudrun Magnusdottir, Professor of Earth System Science; James T. Randerson, Associate Professor of Earth System Science; Soroosh Sorooshian, Director of the Center for Hydrometeorology and Remote Sensing (CHRS), and UCI Distinguished Professor of Civil and Environmental Engineering and of Earth System Science; Susan E. Trumbore, Professor of Earth System Science; Stanley C. Tyler, Researcher, Department of Earth System Science; Jin-Yi Yu, Associate Professor of Earth System Science; and Charles S. Zender, Associate Professor of Earth System Science.

UCI Nobel Laureates

Nobel Prize in Chemistry, 2004
Irwin Rose, UCI Distinguished Professor Emeritus, Department of Physiology and Biophysics

Nobel Prize in Chemistry, 1995
F. Sherwood Rowland, Research Professor Emeritus of Chemistry and Earth System Science, and Bren Chair (d. 2012)

Nobel Prize in Physics, 1995
Frederick Reines, UCI Distinguished Professor Emeritus of Physics (d. 1998)

Templeton Prize, 2010
Francisco J. Ayala, University Professor and Donald Bren Professor of Biological Sciences
UCI Endowed Chairs

Daniel G. Aldrich, Jr. Endowed Chair
Frank L. Meyskens, Jr., Vice Dean of the School of Medicine and Professor, Departments of Medicine (Hematology/Oncology), Biological Chemistry, and Program in Public Health

Louise Turner Arnold Chair in the Neurosciences
Daniele Piomelli, Professor, Departments of Anatomy and Neurobiology, Pharmacology, and Biological Chemistry

Hana and Francisco J. Ayala Dean’s Chair
Frank LaFerla, Dean and Professor of Neurobiology and Behavior and Neurology

Howard Baskerville Professor of Humanities
Touraj Daryae, Associate Director of the Dr. Samuel M. Jordan Center for Persian Studies and Culture and Professor of History

Arnold and Mabel Beckman Chair in Laser Biomedicine
Michael W. Berns, Professor of Surgery, Developmental and Cell Biology, and Biomedical Engineering

Grace Beekhuis Bell Chair in Biological Chemistry
Suzanne B. Sandmeyer, Professor of Biological Chemistry, Microbiology and Molecular Genetics, and Chemical Engineering and Materials Science

Donald Bren Professors, The Donald L. Bren Endowment
Francisco J. Ayala, University Professor of Biological Sciences
Michael Carey, Professor of Computer Science
Paolo Casali, School of Medicine Senior Associate Dean for Research and Graduate Studies, Director of the Center for Immunology, and Professor, Department of Medicine (Immunology)
Michael T. Clegg, Professor of Biological Sciences and of Ecology and Evolutionary Biology
Sheldon Greenfield, Interim Director of the Chao Family Comprehensive Cancer Center, Executive Co-Director of the Center for Health Policy Research, and Professor of Medicine (General Internal Medicine)
Wilson Ho, Professor of Physics and Chemistry
Ramesh C. Jain, Professor of Information and Computer Sciences
Arthur D. Lander, Director, Center for Complex Biological Systems and Professor of Developmental and Cell Biology, Biomedical Engineering, and Pharmacology
Wen-Hwa Lee, Professor Emeritus of Biological Chemistry and Pharmacology
Gary Olson, Professor of Informatics
Judy Olson, Professor of Informatics, Management, and Planning, Policy, and Design
Paolo Sassone-Corsi, Director of the Center for Epigenetics and Metabolism and UCI Distinguished Professor, Departments of Biological Chemistry and Pharmaceutical Sciences

Conexant-Broadcom Chair in the Center for Pervasive Communications
Hamid Jafarkhani, UCI Chancellor’s Professor of Electrical Engineering and Computer Science

Thomas and Mary Cesario Endowed Chair in Medicine
Alpesh Amin, Professor of Medicine, Management, Public Health, and Nursing Science; Executive Director, Hospitalist Program

John E. Connolly Chair
Michael J. Stamos, Department Chair of Surgery and Professor of Clinical Surgery

Dean’s Leadership Circle Endowed Chair
Andrew J. Policano, Professor of Management and Economics

Edward A. Dickson Emerti Professor
Keith Nelson, Professor Emeritus of History
J. Hillis Miller, Professor Emeritus of Comparative Literature

Endowed Chair and Director of the Center for Diversity in Engineering Education
Martha L. Mecartney, Professor of Chemical Engineering and Materials Science

Philip J. DiSaia Chair in Gynecologic Oncology
Robert E. Bristow, Director of the Division of Gynecologic Oncology and Professor, Department of Obstetrics and Gynecology (Gynecologic Oncology)

Lawrence K. Dodge Endowed Chair in Integrative Biology
John Longhurst, Associate Dean, School of Medicine; Director of the Susan Samueli Center for Integrative Medicine; Professor of Medicine (Cardiology), Physiology and Biophysics, Pharmacology, and Biomedical Engineering; and Susan Samueli Chair in Integrative Medicine

Suzanne Dykema Endowed Chair in Pancreatic Cancer
David Imagawa, Professor of Clinical Surgery

Edwards Lifesciences Chair
Steven C. George, Director of the Edwards Lifesciences Center for Advanced Cardiovascular Technology and Professor of Biomedical Engineering and of Chemical Engineering and Materials Science

Endowed Chair in Gastrointestinal Endoscopic Oncology
Kenneth Chang, Professor in Clinical Medicine

Walter B. Gerken Chair in Enterprise and Society
Rajeev K. Tyagi, Professor of Management

Hasso Brothers Endowed Chair in Radiological Sciences
Scott C. Goodwin, Professor of Clinical Radiological Sciences

Clifford S. Heinz Chair
Stergios Skaperdas, Professor of Economics

Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management
Martha Feldman, Professor of Planning, Policy, and Design, Management, Political Science, and Sociology

Fred Kavli Chair in Earth System Science
Ellen Druffel, Professor of Earth System Science

Kirkup Chair in Psychiatry and Human Behavior for the Medical Treatment of Stuttering
Gerald Maguire, Senior Associate Dean, School of Medicine, and Professor of Clinical Psychiatry, Department of Psychiatry and Human Behavior

Irving H. Leopold Chair in Ophthalmology
Roger F. Steinert, Interim Dean for School of Medicine, Department Chair of Ophthalmology and Professor of Clinical Ophthalmology and Biomedical Engineering

William J. Link Chair in Biomedical Engineering
Abraham Lee, Department Chair and Professor of Biomedical Engineering and Professor of Mechanical and Aerospace Engineering

John S. and Marilyn Long Chair in U.S.-China Business Law
Benjamin van Rooij, Professor of Law and Criminology, Law and Society

John D. and Catherine T. MacArthur Foundation Chair in Digital Media and Learning
Mizuko “Mimi” Ito, Professor in Residence of Anthropology, Education, and Informatics

Dorothy J. Marsh Chair in Reproductive Biology
Philip J. Di Saia, Chief of Gynecology and Gynecologic Oncology and Professor of Obstetrics and Gynecology and of Radiation Oncology

Della Martin Chair in Psychiatry
William E. Bunney, Jr., UCI Distinguished Professor Emeritus of Psychiatry and Human Behavior

Maseeh Chair in Persian Studies and Culture
Nasrin Rahimieh, Director of the Dr. Samuel M. Jordan Center for Persian Studies and Culture and Professor of Comparative Literature

Maseeh Professor in Persian Performing Arts
Hossein Omoumi, Professor of Music and of Persian Performing Arts

Gary McCue Administrative Term Chair in Cosmology
James Bullock, UCI Chancellor’s Fellow and Professor of Physics and Astronomy

James L. McGaugh Chair in the Neurobiology of Learning and Memory
John F. Guzowski, Associate Professor of Neurobiology and Behavior
Abraham I. Melden Chair in Moral Philosophy  
Margaret Gilbert, Professor of Philosophy

Paul Merage Chair in Business Growth  
David A. Hirshleifer, Professor of Management and Economics  
Terrence J. Shevlin, Professor of Management

Eric L. and Lila D. Nelson Chair in Neuropharmacology  
Olivier Civelli, Department Chair of Pharmacology and Professor, Departments of Pharmacology, Developmental and Cell Biology, and Pharmaceutical Sciences

Nichols Clinical Neuroscience Chair  
Claudia Kawas, Professor of Neurology and of Neurobiology and Behavior

Jack W. Peltason Endowed Chair  
Bernard N. Grofman, Professor of Political Science and Economics

Raymond Pryke Endowed Chair in First Amendment Law  
Erwin Chemerinsky, Dean of the School of Law and UCI Distinguished Professor of Law and Political Science

The Edward J. Quilligan Chair in Maternal-Fetal Medicine  
Manuel Porto, Department Chair of Obstetrics and Gynecology and Professor of Clinical Obstetrics and Gynecology (Maternal-Fetal Medicine)

The Robert and Marjorie Rawlins Chair of Music  
David Brodbeck, Department Chair and Professor of Music

Ronald W. Reagan Endowed Chair in Geriatrics  
Laura Mosqueda, Department Chair of Family Medicine, Director of the Program in Geriatrics, and Professor of Clinical Family Medicine (Family Medicine and Geriatrics)

Reeve-Irvine Chair in Spinal Cord Injury Research  
Oswald Steward, Director, Reeve-Irvine Research Center; Senior Associate Dean for Research, School of Medicine; and Professor, Departments of Anatomy and Neurobiology, Neurobiology and Behavior, and Neurosurgery

Chair in Rhetoric and Communication  
Virginia Jackson, Associate Professor of English

Norman Rostoker Chair in Applied Physics  
Toshiki Tajima, Professor of Physics and Astronomy

Henry Samueli Endowed Chairs  
G. Scott Samuelsen, Director of the National Fuel Cell Research Center, Director of the Advanced Power and Energy Program, and Professor Emeritus of Mechanical and Aerospace Engineering and of Civil and Environmental Engineering  
William A. Sirignano, Professor of Mechanical and Aerospace Engineering  
H. Kumar Wickramasinghe, Professor of Electrical Engineering and Computer Science, Biomedical Engineering, and Chemical Engineering and Materials Science

The Henry Samueli Endowed Chair in Engineering in the Center for Engineering Science in Design  
J. Michael McCarthy, Director of the Center for Engineering Science in Design (CESD) and Professor of Mechanical and Aerospace Engineering

Susan Samueli Chair in Integrative Medicine  
John Longhurst, Associate Dean, School of Medicine; Director of the Susan Samueli Center for Integrative Medicine; Professor of Medicine (Cardiology), Physiology and Biophysics, Pharmacology, and Biomedical Engineering; and Lawrence K. Dodge Endowed Chair in Integrative Medicine

Walter R. Schmid Chair in Pediatric Urology  
Antoine Khoury, Chief of Pediatric Urology and Professor, Department of Urology

Danette (Dee Dee) Shepard Chair in Neurological Studies  
Tallie Z. Baram, Professor, Departments of Pediatrics, Neurology, Physiology and Biophysics, and Anatomy and Neurobiology

Jack H. Skirball Endowed Chair  
James V. Jester, Professor in Residence, Departments of Ophthalmology and Biomedical Engineering
Ted and Janice Smith Family Foundation Endowed Chair in Information and Computer Science
Hal S. Stern, Dean of the Donald Bren School of Information and Computer Sciences and Professor of Statistics

Robert R. Sprague Chair in Brain Imaging
Steven G. Potkin, Professor of Psychiatry and Human Behavior

Taco Bell Chair in Information Technology Management
Vijay Gurbaxani, Director of the Center for Digital Transformation and Professor of Management and Informatics

Teller Family Chair in Jewish History
Matthias Lehmann, Director of the Interdisciplinary Minor in Jewish Studies and Associate Professor of History

Edward and Vivian Thorp Chair in Mathematics
Karl C. Rubin, Department Chair and Professor of Mathematics

Thomas T. and Elizabeth C. Tierney Chair in Global Peace and Conflict Studies
Etel Solingen, Professor of Political Science

Claire Trevor Dean’s Endowed Chair, Claire Trevor School of the Arts
Joseph S. Lewis III, Dean of the Claire Trevor School of the Arts and Professor of Art

Claire Trevor Professors in the Arts
Robert Cohen, Professor of Drama
Donald McKayle, Professor of Dance
Yvonne Rainer, UCI Distinguished Professor Emerita of Art

Fong and Jean Tsai Chair in Women’s Imaging
Stephen Feig, Division Director of Mammography and Professor of Clinical Radiological Sciences, Department of Radiological Sciences

UC Presidential Chair
Peter M. Rentzepis, Professor of Chemistry and of Chemical Engineering and Materials Science

UCI ADVANCE Term Chair
Chuu-Lian Terng, Professor of Mathematics

UCI Excellence in Teaching Chair in Mathematics
Richard Schoen, Professor of Mathematics

Dr. Stanley van den Noort Endowed Chair
Steven L. Small, Department Chair of Neurology and Professor, Departments of Neurology, Neurobiology and Behavior, and Cognitive Sciences

Drew, Chace, and Erin Warmington Chair in the Social Ecology of Peace and International Cooperation
Scott A. Bollens, Professor of Planning, Policy, and Design

UCI Chancellor’s Fellows
Marianne Bittler, Professor of Economics
William Branch, Professor of Economics
James Bullock, Professor of Physics and Gary McCue Administrative Term Chair in Cosmology
Elizabeth Cauffman, Professor of Psychology and Social Behavior and of Education
John R. Hipp, Associate Professor of Criminology, Law and Society and Sociology
Simon Huttegger, Professor of Logic and Philosophy of Science
Svetlana Jitomirskaya, Professor of Mathematics
Michael J. Montoya, Associate Professor of Anthropology, Chicano/Latino Studies, and Public Health
Gary Richardson, Professor of Economics
Timonthy Tait, Professor of Physics and Astronomy
Appendix

Kathleen K. Treseder, Department Vice Chair and Professor of Ecology and Evolutionary Biology, and Professor of Earth System Science

Shiou-Chuan (Sheryl) Tsai, Professor of Molecular Biology and Biochemistry, Chemistry, and Pharmaceutical Sciences

Marcelo Wood, Professor of Neurobiology and Behavior

**UCI Chancellor’s Professors**

Kei Akagi, UCI Chancellor’s Professor of Music

Pierre Baldi, Director of the Institute for Genomics and Bioinformatics and UCI Chancellor’s Professor of Computer Science, Biomedical Engineering, and Biological Chemistry

Frank D. Bean, Director of the Center for Research on Immigration, Population, and Public Policy and UCI Chancellor’s Professor of Sociology and Economics

Dan L. Burk, UCI Chancellor’s Professor of Law

Kitty Calavita, UCI Chancellor's Professor of Criminology Law, and Society

Imran S. Currim, UCI Chancellor’s Professor of Management

Nikil Dutt, UCI Chancellor’s Professor of Computer Science and of Electrical Engineering and Computer Science

Catherine Fisk, UCI Chancellor’s Professor of Law

Bryant Garth, UCI Chancellor’s Professor School of Law

Michael T. Goodrich, Department Chair and UCI Chancellor’s Professor of Computer Science

Richard L. Hasen, UCI Chancellor’s Professor of Law and Political Science

Hamid Jafarkhani, UCI Chancellor’s Professor of Electrical Engineering and Computer Science and Conexant-Broadcom Chair in the Center for Pervasive Communications

Frank LaFerla, Director of the Institute for Memory Impairments and Neurological Disorders and Dean of Francisco J. Ayala School of Biological Sciences and UCI Chancellor’s Professor of Neurobiology and Behavior

Eva Y.-H. P. Lee, Department Chair and UCI Chancellor’s Professor of Biological Chemistry

Peter Li, UCI Chancellor’s Professor Emeritus of Mathematics

John S. Lowengrub, UCI Chancellor’s Professor of Mathematics, Chemical Engineering and Materials Science, and Biomedical Engineering

Marc J. Madou, UCI Chancellor’s Professor of Mechanical and Aerospace Engineering, Biomedical Engineering, and Chemical Engineering and Materials Science

Steven J. Mailloux, UCI Chancellor’s Professor of English

George E. Marcus, Director of the Center for Ethnography and UCI Chancellor’s Professor of Anthropology

Carrie Menkel-Meadow, UCI Chancellor’s Professor of Law

Kristen Monroe, UCI Chancellor’s Professor of Political Science

David Neumark, Director of the Center for Economics & Public Policy and UCI Chancellor’s Professor of Economics and Management

Margot Norris, UCI Chancellor’s Professor Emerita of English and Comparative Literature

Reginald M. Penner, Director of the Center for Solar Energy and UCI Chancellor’s Professor of Chemistry

Thomas L. Poulos, UCI Chancellor’s Professor of Molecular Biology and Biochemistry, Pharmaceutical Sciences, Physiology and Biophysics, and Chemistry

Rajagopalan Radhakrishnan, UCI Chancellor’s Professor of English

Charles Ragin, UCI Chancellor’s Professor of Sociology

James T. Randerson, UCI Chancellor's Professor of Earth System Science and of Ecology and Evolutionary Biology
R. Anthony Reese, UCI Chancellor's Professor of Law

Bryan Reynolds, UCI Chancellor's Professor of Drama

Markus Ribbe, UCI Chancellor's Professor of Molecular Biology and Biochemistry

Gabriele Schwab, UCI Chancellor's Professor of Comparative Literature and Anthropology

David A. Snow, UCI Chancellor's Professor of Sociology

Etel Solingen, UCI Chancellor's Professor of Political Science

Ivan Soltesz, Department Chair of Anatomy and Neurobiology and UCI Chancellor's Professor of Anatomy and Neurobiology, Physiology and Biophysics, and Neurobiology and Behavior

Daniel Stokols, UCI Chancellor's Professor Emeritus of Planning, Policy, and Design and of Psychology and Social Behavior

Richard Taylor, Director of the Institute for Software Research and UCI Chancellor's Professor of Informatics

Brook Thomas, UCI Chancellor's Professor of English

Christopher Tomlins, UCI Chancellor's Professor of Law

Chen S. Tsai, UCI Chancellor's Professor of Electrical Engineering and Computer Science

Gene Tsudik, UCI Chancellor's Professor of Computer Science

Jeffrey Wasserstrom, UCI Chancellor's Professor of History

Cecile Whiting, UCI Chancellor's Professor of Art History

**UCI Distinguished Professors**

Satya N. Atluri, UCI Distinguished Professor of Mechanical and Aerospace Engineering

John C. Avise, UCI Distinguished Professor of Ecology and Evolutionary Biology

Donald R. Blake, UCI Distinguished Professor of Chemistry and Earth System Science

William E. Bunney, Jr., UCI Distinguished Professor Emeritus of Psychiatry and Human Behavior and Della Martin Chair in Psychiatry

Michael D. Cahalan, Department Chair and UCI Distinguished Professor of Physiology and Biophysics

Charles R. Cantor, UCI Distinguished Adjunct Professor of Physiology and Biophysics

Erwin Chemerinsky, Dean of the School of Law, UCI Distinguished Professor of Law and Political Science, and Raymond Pryke Endowed Chair in First Amendment Law

Barbara A. Dosher, UCI Distinguished Professor of Cognitive Sciences

Michael V. Drake, Chancellor and UCI Distinguished Professor of Ophthalmology

Greg Duncan, UCI Distinguished Professor of Education, Economics, and Psychology and Social Behavior

David Easton, UCI Distinguished Research Professor of Political Science

Jacquelynne S. Eccles, UCI Distinguished Professor of Education

Barbara J. Finlayson-Pitts, UCI Distinguished Professor of Chemistry

Zachary Fisk, UCI Distinguished Professor of Physics

Anthony A. James, UCI Distinguished Professor of Microbiology and Molecular Genetics and of Molecular Biology and Biochemistry

Elizabeth F. Loftus, UCI Distinguished Professor of Psychology and Social Behavior; Criminology, Law and Society; Cognitive Sciences; and Law

Penelope Maddy, UCI Distinguished Professor of Logic and Philosophy of Science and of Mathematics

David B. Malament, UCI Distinguished Professor Emeritus of Logic and Philosophy of Science

Academic Honesty

The UCI Academic Senate Policies on Academic Honesty were approved by the Irvine Division on June 2, 1988, and most recently revised on June 5, 2008.

A. Preamble

The University is an institution of learning, research, and scholarship predicated on the existence of an environment of honesty and integrity. As members of the academic community, faculty, students, and administrative officials share responsibility for maintaining this environment. It is essential that all members of the academic community subscribe to the ideal of academic honesty and integrity and accept individual responsibility for their work. Academic dishonesty is unacceptable and will not be tolerated at the University of California, Irvine. Cheating, forgery, dishonest conduct, plagiarism, and collusion in dishonest activities erode the University’s educational, research, and social roles. They devalue the learning experience and its legitimacy not only for the perpetrators but for the entire community.
B. Responsibilities

All members of the academic community have a responsibility to ensure that scholastic honesty is maintained.

Faculty have primary responsibility for:

1. Upholding and enforcing universitywide principles of academic honesty and integrity and explaining clearly these principles including any qualifications which may be operative in the classes they are teaching.
2. Minimizing opportunities for academic misconduct in their courses.
3. Confronting students suspected of academic dishonesty in a way that respects student privacy.
4. Affording students accused of academic misconduct the right to appeal any resulting disputes to disinterested parties for hearing and resolution.
5. Assigning an appropriate grade to a student who engages in academic dishonesty.
6. Reporting all instances of academic dishonesty to appropriate Associate Deans.
7. Protecting the anonymity of any student reporting an incident of academic dishonesty to the extent permitted by due process required for the accused and other legal requirements.

Students have responsibility for:

1. Refraining from cheating and plagiarism.
2. Refusing to aid or abet any form of academic dishonesty.
3. Notifying professors and/or appropriate administrative officials about observed incidents of academic misconduct. The anonymity of a student reporting an incident of academic dishonesty will be protected.

C. What is Academic Dishonesty?

Academic dishonesty applies equally to electronic media and print, and involves text, images, and ideas. It includes but is not limited to the following examples:

Cheating

1. Copying from others during an examination.
2. Communicating exam answers with other students during an examination.
3. Offering another person's work as one's own.
4. Taking an examination for another student or having someone take an examination for oneself.
5. Sharing answers for a take-home examination or assignment unless specifically authorized by the instructor.
6. Tampering with an examination after it has been corrected, then returning it for more credit.
7. Using unauthorized materials, prepared answers, written notes or information concealed in a blue book or elsewhere during an examination.
8. Allowing others to do the research and writing of an assigned paper (including use of the services of a commercial term-paper company).

Dishonest Conduct

1. Stealing or attempting to steal an examination or answer key from the instructor.
2. Changing or attempting to change academic records without proper sanction.
3. Submitting substantial portions of the same work for credit in more than one course without consulting all instructors involved.
4. Forging add/drop/change cards and other enrollment documents, or altering such documents after signatures have been obtained.
5. Intentionally disrupting the educational process in any manner.
6. Allowing another student to copy off of one's own work during a test.

Plagiarism

Plagiarism is intellectual theft. It means use of the intellectual creations of another without proper attribution. Plagiarism may take two main forms, which are clearly related:

1. To steal or pass off as one's own the ideas or words, images, or other creative works of another.
2. To use a creative production without crediting the source, even if only minimal information is available to identify it for citation.

Credit must be given for every direct quotation, for paraphrasing or summarizing a work (in whole, or in part, in one's own words), and for information which is not common knowledge.

Collusion

Any student who knowingly or intentionally helps another student perform any of the above acts of cheating or plagiarism is subject to discipline for academic dishonesty.
D. Procedures for Dealing with Incidents of Academic Dishonesty

Many, perhaps most, incidents of academic dishonesty involve accusations which are based on clear evidence and which are not contested by the accused student. In such cases, if the infraction is relatively minor and there is no indication that the accused student has previously been involved in such incidents, it is most appropriate that the matter be resolved between the student and the faculty member. When this occurs, it is nevertheless important that a written report of the incident be filed to ensure that penalties assessed are commensurate with the offense and that repeated infractions be detected and dealt with appropriately.

More serious incidents and repeat offenses which call for stronger disciplinary action, may result in campuswide sanctions, in addition to the actions imposed by a faculty member. In such cases, these sanctions, as described in Section 105.00 of the Policies Applying to Campus Activities, Organizations, and Students, will be administered by the Academic Associate Deans or the Office of the Dean of the Division of Undergraduate Education or the Graduate Division.

Finally, whenever an accusation of academic dishonesty or a grade given by a faculty member is contested by an accused student, the student has recourse for mediation of the dispute. Processes for mediation, assistance with conflict resolution, and/or an informal inquiry may be requested by the student or the Associate (Undergraduate or Graduate) Dean of the faculty member’s school through the Office of the Ombudsman. In incidents where a campuswide sanction has been imposed, the student can request a hearing with an appropriate hearing panel on Academic Honesty which will be convened by the Office of either the Dean of the Division of Undergraduate Education or the Dean of the Graduate Division, depending on the status of the accused student.

The procedures outlined here are designed to institute a system that recognizes that many cases of academic misconduct are best resolved between the student and faculty member involved, while it provides for a fair hearing and handling of serious and repeated offenses and guarantees a fair hearing to a student who has received a campuswide sanction.

Authority of Faculty Members

When a faculty member has evidence of student academic dishonesty, the faculty member must present the evidence to the student in a private meeting or communicate with the student by some other means. The faculty member must initiate this communication with the student within 15 calendar days of discovering evidence of academic dishonesty and evaluating the relevant work. The faculty member then may follow up with one or more of the following actions:

1. To issue a reprimand to the student with letter of explanation to the student’s file.
2. To require repetition of the questionable work or examination with letter of explanation to the student’s file.
3. To reduce the grade to an ‘F’ or zero, if appropriate, on the questionable work or examination with written notification to the student and a letter of explanation to the student’s file.
4. To assign the student a failing grade in the course or otherwise lower the grade in the course with a letter of explanation to the student’s file.

It is essential that any such action be reported in writing to the student in a letter from the faculty member. Copies of this letter must also be sent to (a) the Associate Dean of the faculty member’s school, (b) the Associate Dean of the student’s school, who will maintain a file of cases of academic misconduct involving students enrolled in that school, and (c) the Office of the Dean of the Division of Undergraduate Education or Dean of the Graduate Division, as appropriate. The faculty member is strongly encouraged to consult with the Associate (Undergraduate or Graduate) Dean of his or her school before the letter is drafted. Reference to (or a copy of) the UCI Academic Senate Policies on Academic Honesty should be included in the letter. If action (4) is taken, the faculty member is responsible for making certain that the failure is recorded by the Registrar on the student’s permanent academic record. Careful documentation of the incident must be maintained by the faculty member in the event that his or her actions in the case should later be subject to review.

Responsibilities of the Academic Associate Deans

1. The Associate (Graduate or Undergraduate) Dean of either the accused student’s school or of the faculty member’s school may impose campuswide sanctions. Sanctions imposed by Associate Deans are final unless the student requests a hearing within 15 calendar days of notification. The 15-day period starts from the time the Associate Dean has notified the student of the discipline or has notified the student of the hearing and appeal process by providing a copy of this policy, whichever comes later. It is recommended that each case be brought to a final resolution within 90 days of instruction.
2. The Associate Dean (or equivalent official) of each school is responsible for maintaining confidential records concerning academic dishonesty of students enrolled in that school. All letters reporting faculty-imposed academic penalties for academic misconduct will be included in these files.
3. The Associate Dean of the accused student’s school will be responsible for identifying all incidents which represent repeated offenses by a student and may impose a campuswide sanction because of repeat offenses.
4. Associate Deans are required to notify the student of the hearing and appeal process and provide the student a copy of this policy or explicitly refer the student to it. If an Associate Dean suspects grounds for a grievance involving discrimination, the student should be referred to Appendix II of The Manual of the Irvine Division of the Academic Senate, “Student Academic Grievance Procedures Relating to Non-Discrimination” (which is limited to allegations of discrimination).
5. In those classes where academic dishonesty continues to be a problem and the faculty member or another university official has already been approached by the student(s) from the class, the Associate Dean will consult with the appropriate faculty member to address the problem.
6. Students who have on file recorded acts of academic dishonesty, as defined by the Policies Applying to Campus Activities, Organizations, and Students, may be excluded by the Associate Deans from consideration for academic honors at graduation. Another consequence could be that in admission to a major, for students who wish to change majors, individual majors may take into account the commission of an act of dishonesty. Exclusion from consideration for honors and exclusion from major change is not for the purposes of this policy to be considered a campuswide sanction. Students excluded from such consideration under this policy therefore are not eligible to request a formal hearing.

7. In those situations where a campuswide sanction is imposed and the student requests a hearing, the Associate Dean will forward to the Hearing Panel on Academic Honesty the materials which led him or her to impose the sanction. In addition, the Associate Dean will appear before the Hearing Panel to discuss the case upon request of the Hearing Panel.

Student Hearings

It should be understood that all grades are ultimately the responsibility of faculty. However, if a student accused of academic dishonesty wishes to contest an action by a faculty member, the student may, within a 15-day period, request assistance by writing to the Associate Dean of the faculty member. The period is 15 calendar days and starts from the time the Associate Dean has notified the student of the discipline or has notified the student of the hearing and appeal process by providing a copy of this policy, whichever comes later.

When a campuswide sanction is imposed, the affected student may, within 15 days of notification, request a hearing before a Hearing Panel on Academic Honesty. Students considering a hearing in response to campuswide sanctions for alleged academic misconduct are urged to contact the Associate Dean of their academic school and/or the University Ombudsman concerning possible sources of advice and assistance. Students should be advised regarding the grounds for appeal as specified in section 103.11 of the Policies Applying to Campus Activities, Organizations, and Students.

Role of the Ombudsman

The services of the Ombudsman may be requested at any time by the student, the faculty member, or the Associate Dean. The role of the Ombudsman is to assist in conflict resolution, mediate the dispute, perform an informal inquiry of the case, and clarify policies and procedures for anyone involved.

In those incidents where imposition of a campuswide sanction is a consideration and the student has requested a hearing before the Panel on Academic Honesty, the case may be referred to the Office of the Ombudsman by the Dean of the Division of Undergraduate Education or the Dean of the Graduate Division. An informal inquiry may be conducted by the Ombudsman who will then confer with the Associate Dean and the accused student. However, the findings of the Ombudsman will not be forwarded to the Hearing Panel on Academic Honesty. The case may be referred by the student to either the Dean of the Division of Undergraduate Education or the Dean of the Graduate Division, as appropriate, who will be responsible for convening the Hearing Panel on Academic Honesty.

Students should always be informed by the Associate Dean of their school of their right to secure the assistance of the Ombudsman in understanding and addressing the problem or issue.

Role of the Deans of Undergraduate Education and the Graduate Division

Whenever an incident of academic misconduct is referred to the Office of the Dean of the Division of Undergraduate Education or the Dean of the Graduate Division by the student, a representative of the appropriate offices will meet with the student and, if requested, explain the process and arrange the time and place of a hearing before the appropriate (Undergraduate or Graduate) Hearing Panel on Academic Honesty. The appropriate Dean will maintain a record of all cases of academic dishonesty reported by the respective Associate Deans.

Formal resolution by the appropriate Hearing Panel on Academic Honesty may result in the imposition by the Dean of the Division of Undergraduate Education or the Dean of the Graduate Division of one or more of the sanctions described in section 105.00 of the Policies Applying to Campus Activities, Organizations, and Students, including suspension or dismissal from the University.

E. Hearing Panels on Academic Honesty

1. Jurisdiction of the Hearing Panels on Academic Honesty

There will be two types of Hearing Panels on Academic Honesty. One type of Hearing Panel will hear cases of campuswide sanctions under undergraduate students while the other will hear graduate student cases. The Hearing Panels can reduce, affirm, or increase sanctions.

2. Composition of the Hearing Panels on Academic Honesty

An undergraduate Hearing Panel on Academic Honesty will be convened for each case submitted throughout the year. The pool from which each Undergraduate Hearing Panel on Academic Honesty shall be drawn consists of all appointed faculty and ex officio faculty on the Council of Student Experience, selected student Peer Academic Advisors nominated by the academic units (one per unit), and a representative from the Office of the Dean of the Division of Undergraduate Education, appointed by the Dean of the Division of Undergraduate Education. These groups will be trained in the Academic Honesty policy and procedures by a representative of the Dean of the Division of Undergraduate Education so that there will be a ready pool of qualified participants available on short notice when a hearing is called. For each hearing involving an Undergraduate Hearing Panel on Academic Honesty, two faculty appointed by the Council on Student Experience Chair, two student Peer Academic Advisors and one representative from the Office of the Dean of the Division of Undergraduate Education appointed by the Dean of the Division of Undergraduate Education shall form an Undergraduate Hearing Panel on Academic Honesty to hear the student appeal. The hearing will be scheduled by the Office of the Dean of the Division of Undergraduate Education.

The Graduate Hearing Panel on Academic Honesty will be a standing administrative committee composed of two faculty, two students, and a representative of the Dean of the Graduate Division. Terms of faculty members will be two years. One faculty member will be appointed annually by the Dean of the Graduate Division. To ensure continuity, terms will be staggered; during the first year of operation only, one faculty member will
be appointed for a one-year term. One additional faculty member will be appointed by the Dean of the Graduate Division to serve as an alternate to the Graduate Hearing Panel. The two students shall serve for one year and will be appointed by AGS. One additional student member will be appointed by AGS to serve as an alternate.

3. Role of the Associate Dean
The Associate Dean will forward to each Hearing Panel the evidence which led to his or her decision to impose the campuswide sanction. In addition, the Associate Dean will appear before the Hearing Panel to comment on the case if the Hearing Panel wishes.

4. Hearings
a. If the student requests a hearing, the Office of the Dean of the Division of Undergraduate Education or the Dean of the Graduate Division shall schedule a hearing of the case before the appropriate Hearing Panel. Written notice must be given to the parties involved regarding the date, time, and place of the hearing.

b. The chair will be elected by the membership of the Hearing Panel. The chair will rule on all questions of procedure, the admission or exclusion of evidence, and the need to call witnesses for additional testimony. Hearings shall be held in accordance with generally accepted standards of procedural due process.

c. Hearings will be closed unless the parties involved agree to an open hearing. Every effort must be made by all parties to maintain confidentiality during the process.

d. Hearings shall be held following the provisions in sections 103.11. (5, 6, and 8) of the Policy on Student Conduct and Discipline in the Policies Applying to Campus Activities, Organizations, and Students, except that the role of the Dean of Students shall be filled by the Dean of the Division of Undergraduate Education or the Graduate Division, depending on the status of the student.

5. Report of the Hearing Panel on Academic Honesty
After a hearing, a Hearing Panel shall arrive at a decision. When a decision is reached, the student and the appropriate Academic Associate Dean will be informed of the judgment.

6. Final Appeal
If the campuswide sanction is upheld by a Hearing Panel, the report of the Hearing Panel and all supporting evidence may be sent for a final level of review at the request of the student. If the accused student is an undergraduate, the case will be reviewed by the Dean of the Graduate Division. If the accused student is a graduate student, the case will be reviewed by the Dean of the Division of Undergraduate Education. This final review process can only result in decreasing the sanctions imposed on the student or leaving them unchanged. There are no further appeals or processes.

7. Implementation
Once the judgment has been rendered the Dean of the Division of Undergraduate Education or the Graduate Division will implement the judgment in the form of a letter to the student as well as initiate any other necessary administrative actions.

F. Maintenance of Disciplinary Records
Records relating to academic dishonesty will be maintained by the Associate Deans and the Offices of the Deans of the Division of Undergraduate Education and the Graduate Division to promote consistency of penalties for a given offense and to ensure appropriate action against repeat offenders. Records will normally be destroyed after five years, unless the Associate Dean determines in any particular case that there is good reason to extend the period of retention. In order to ensure that minor and nonrecurring infractions do not negatively impact a student’s career beyond UCI, any student may petition to the Associate Dean of his or her academic school to have relevant academic disciplinary records expunged after the record is two years old or upon graduation, whichever comes first. The Associate Dean has sole authority to consider and to grant or deny such petitions. The University will release a student’s disciplinary records to potential employers, governmental agencies, other educational institutions, or other organizations or individuals only if authorized to do so by the student in question or if compelled by law. Any record expunged by the Associate Dean will also be erased in the Dean of the Division of Undergraduate Education or the Graduate Division Offices.

Additional Information
This policy is intended to focus solely on issues related to academic dishonesty. Certain details of the implementation of procedures specified here can be found in the University of California Policies Applying to Campus Activities, Organizations, and Students, available free of charge from the Office of the Ombudsman, located at 205 Multipurpose Science & Technology Building and the Office of the Dean of Students, located in the UCI Student Center.

Principles of Community

UC Irvine is a multicultural community of people from diverse backgrounds. Our activities, programs, classes, workshops, lectures and everyday interactions are enriched by our acceptance of one another, and we strive to learn from each other in an atmosphere of positive engagement and mutual respect.

Our legacy for an increasingly multicultural academic community and for a learning climate free from expressions of bigotry is drawn from the United States and California Constitutions, and from the charter of the University of California which protects diversity and reaffirms our commitment to the protection of lawful free speech. Affirmation of that freedom is an effective way of ensuring that acts of bigotry and abusive behavior will not go unchallenged within the university. Tolerance, civility and mutual respect for diversity of background, gender, ethnicity, race and religion are as crucial within our campus community as are tolerance, civility and mutual respect for diversity of political beliefs, sexual orientation and physical abilities.

Education and clear, rational and vigorous challenges are positive responses to prejudice and acts of bigotry.

The university’s nondiscrimination policy, in compliance with applicable federal and state law, covers treatment in university programs and activities as well as admission and employment. UCI expects all those affiliated with it to adhere to the letter and the spirit of university nondiscrimination policies and related federal and state laws. Information concerning these policies is available at the University of California’s Office of the President (http://www.ucop.edu).

Allegations of physical abuse, threats of violence, or conduct that threatens the health or safety of any person on university property or in connection with official university functions will be investigated promptly and, where found to exist, appropriate actions will be taken in accordance with university policy.

All who work, live, study and teach at UCI are here by choice and, as part of that choice, should be committed to these Principles of Community (http://www.dos.uci.edu/conduct/principlesofcommunity.php) which are an integral part of the guidelines by which the university community can successfully conduct its affairs.

Student Conduct and Discipline

Students enrolling in the university are expected to assume an obligation to conduct themselves in a manner compatible with the university’s function as an educational institution. The University of California Policies Applying to Campus Activities, Organizations, and Students sets forth standards of conduct expected of UCI students. The Policies lists rules concerning conduct and related matters, as established by the policies of the Regents and the President of the University, and also incorporates campus regulations.

Anti-Hazing Compliance

The State of California and the University of California have expressly and repeatedly asserted their opposition to hazing and preinitiation activities which do not contribute to the positive development and welfare of the individuals involved.

In February 2006, the Education Code of the State of California was repealed and amended to codify within the Penal Code a new definition of hazing. In accordance with the revised Education Code and Penal Code, students are advised of the following:

Education Code 32052

Any person who participates in the hazing of another, or any corporation or association which knowingly permits hazing to be conducted by its members or by others subject to its direction or control, shall forfeit any entitlement to State funds, scholarships, or awards which are enjoyed by him, by her, or by it, and shall be deprived of any sanction or approval granted by any public educational institution or agency.

Penal Code 245.6

Section 245.6 of the Penal Code reads:

1. It shall be unlawful to engage in hazing, as defined in this section.
2. “Hazing” means any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university, or other educational institution in this state. The term “hazing” does not include customary athletic events or school-sanctioned events.
3. A violation of this section that does not result in serious bodily injury is a misdemeanor, punishable by a fine of not less than one hundred dollars ($100), nor more than five thousand dollars ($5,000), or imprisonment in the county jail for not more than one year, or both.
4. Any person who personally engages in hazing that results in death or serious bodily injury as defined in paragraph (4) of subdivision (f) of Section 243 of the Penal Code, is guilty of either a misdemeanor or a felony, and shall be punished by imprisonment in county jail not exceeding one year, or by imprisonment in the state prison.
5. The person against whom the hazing is directed may commence a civil action for injury or damages. The action may be brought against any participants in the hazing, or any organization to which the student is seeking membership whose agents, directors, trustees, managers, or officers authorized, requested, commanded, participated in, or ratified the hazing.
6. Prosecution under this section shall not prohibit prosecution under any other provision of law.
Campus Safety and Security
The UC Irvine Police Department (UCIPD) is responsible for the safety and security of the UCI campus and the University of California, Irvine Medical Center. UCIPD and UCI administration make continual efforts to reduce crime on campus and at the UC Irvine Medical Center.

Crime Prevention
The UCI Police Department offers educational programs and presentations to the campus community. The Department teaches a variety of prevention and awareness topics. These topics include: drugs and alcohol, domestic violence, sexual assault, identity theft, property and auto theft, workplace violence, and personal safety. The personal safety component is further developed through the RAD (Rape Aggression Defense) Program for women. For more information, or to schedule a presentation, call 949-824-5223 or visit the UCIPD (http://www.police.uci.edu) website. Crime prevention tips are also available on the website.

Safety Tips
All members of the UCI community should be aware of their surroundings by using common sense and practicing safety precautions. Theft is the most common security problem. Property theft is preventable if you keep your personal belongings (backpack, laptop computer, cellular phone) in sight, within arm’s length, or secured in a locked place. Students living on campus should keep their doors locked at all times. Faculty and staff should keep valuables locked up while they are in their workplace. The last person to leave a laboratory or building should lock the doors. Report the presence of unknown visitors or suspicious persons to the UCI Police Department or UC Irvine Medical Center Security as soon as possible.

While on campus at night, it is suggested that you do not walk alone. The UCI Safety Escort Service (949-824-SAFE) is available for safety escorts between campus locations.

Emergency Call Boxes (Blue Light Phones)
Emergency call boxes (Blue Light Phones) are located throughout the UCI campus and the UC Irvine Medical Center. These call boxes are to be used to report emergencies, crimes, suspicious persons or activities, accidents, and safety hazards.

The campus has 150 Blue Light Phones installed around the ring mall, housing communities, and in parking structures and lots. Blue Light Phones are represented by a diamond on the campus map. Call boxes are easily identified by the blue light on top of the terminal, and the boxes have the ability to detect all sounds within a 15-foot radius. To activate the emergency call box, push the red button located on the front of the terminal. You are then automatically connected to the UCI Police Department Communications Center. The UC Irvine Medical Center has 21 emergency call boxes located throughout the complex and in the southeast corner of the Manchester parking lot. These phones are also connected to the UCIPD Communications Center.

Substance Abuse Policies
UCI is designated a drug-free environment, and only under certain conditions is the consumption of alcohol permitted. The sale, manufacture, distribution, or possession of any controlled substance is illegal under both state and federal laws. Such laws are strictly enforced by UCIPD. All members of the UCI community who violate these laws are subject to disciplinary action, criminal prosecution, fines, and imprisonment.

Sales, consumption, and the furnishing of alcohol on the UCI campus is restricted by UCI’s Alcohol Policy and California State law, and are controlled by the California Department of Alcohol and Beverage Control (ABC). ABC and UCIPD share enforcement of alcohol laws on campus. It is unlawful to sell, furnish, or give alcohol to a person under the age of 21 years (this includes the Anthill Pub & Grille). The possession of alcohol by anyone under 21 in a public place, or in a place open to the public, is illegal. It is also a violation of UCI’s Alcohol Policy for anyone under the age of 21 to consume or possess alcohol in any public or private housing area on campus. Students and employees found violating alcohol/substance policies or laws could be subject to sanctions by the University.

Weapons Policy
The California Penal Code contains several sections regarding possessing weapons on college campuses. The UCI Police Department encourages all members of the campus community to be familiar with the following statutes that regulate the possession of weapons.

Section 626.9 – Felony Violation – Bringing or possessing a firearm on the grounds of a University of California campus, or any property owned or operated by the University of California, without written permission from the UCPD Chief of Police.

Section 626.10(b) – Misdemeanor or Felony Violation – Bringing or possessing any dirk, dagger, ice pick, or knife having a fixed blade longer than 2 ½ inches on university grounds.

Section 16590 – Misdemeanor or Felony Violation – Possessing a undetectable firearm, cane gun, wallet gun, zip gun, belt buckle knife, blackjack, billy club, nunchaku, shuriken and metal knuckles.

Section 21510 – Misdemeanor Violation – Carry upon the person, or in the passenger or driver’s area of a vehicle, a switch blade knife having a blade two or more inches in length.

UCIPD asks that you immediately report any situation in which a subject states they have a firearm on campus, or that they intend to a use a firearm on campus. You can choose to remain anonymous when making a report.
To Report an Incident
UCIPD needs your help to build and maintain a safe community. If you witness suspicious or unusual behavior on campus, please contact UCIPD. UCI police officers will assess the situation and take the appropriate action. Please report crimes; you can ask to be anonymous.

On campus, dial 9-1-1 for a police, medical, or fire emergency. For non-emergency police services dial (949) 824-5223. The UCI Police Department’s campus office is open 24 hours a day and is located on the ground floor of the Public Services Building, at the corner of East Peltason and Pereira Drives.

At the UC Irvine Medical Center, dial 9-1-1 for a police, medical, or fire emergency. For non-emergency police service dial (714) 456-5493. The UC Irvine Medical Center Security office is located in Building 33.

Crimes occurring off campus should be reported immediately to the city/state law enforcement agency where the crime occurred.

UCI Crime Statistics
Pursuant to the Federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act of 1999, the University of California, Irvine annually publishes statistics of reported occurrences of criminal activity on and off campus and at the UC Irvine Medical Center. This information is available to all students, faculty, staff, and the general public.

The University of California, Irvine’s annual security report includes statistics for the previous three years concerning reported crime that occurred on campus, in certain off-campus buildings controlled by UCI, at the UC Irvine Medical Center, and on public property within or immediately adjacent to and accessible from the campus and UC Irvine Medical Center. The annual security report also includes institutional policies concerning alcohol and drug use, crime prevention, the reporting of crimes, sexual assault, and other matters. The fire safety report includes statistics concerning fires that occurred in on campus student housing facilities. Copies of these reports are available on the UCI Police Department (http://www.police.uci.edu) website. Copies may also be obtained by visiting the UCI Police Department front counter Monday through Friday, 8:00a.m. to 5:00p.m.

Computer- and Network-Use Policy
The University of California, Irvine provides computing resources and worldwide network access to members of the UCI electronic community for legitimate academic and administrative pursuits to communicate, access knowledge, and retrieve and disseminate information. All members of the UCI community (faculty, staff, students, and authorized guests) sharing these resources also share the rights and responsibilities for their use.

Rights and Responsibilities
Worldwide, open-access electronic communication is a privilege and continued access requires that users act responsibly. Users should be able to trust that the products of their intellectual efforts will be safe from violation, destruction, theft, or other abuse. Users sharing computing resources must respect and value the rights and privacy of others, respect the integrity of the systems and related physical resources, and observe all relevant laws, regulations, and contractual obligations. Users are responsible for refraining from acts that waste resources, prevent others from using them, harm resources or information, or abuse other people. To help protect files, users are responsible for setting passwords appropriately and for keeping passwords confidential by not giving them to another person.

Most UCI-owned computers are under the control of a system administrator or lab manager. These administrators are expected to respect the privacy of computer system users. However, UCI computer system administrators may access user files or suspend services on the systems they manage without notice as required to protect the integrity of computer systems or to examine accounts that are suspected of unauthorized use, misuse, or have been corrupted or damaged. This includes temporarily locking vulnerable accounts, removing hung jobs, re prioritizing resource intensive jobs, and such.

Many UCI departments have their own computing and networking resources and policies. When accessing computing resources, users are responsible for obeying both the policies described here and the policies of other departments. Student responsibilities are also described in the University of California Policies Applying to Campus Activities, Organizations, and Students (http://www.dos.uci.edu/conduct/uci_policy.php). In addition, all users are responsible for obeying policies of off-campus network services accessed using UCI resources.

Examples of Misuse
Examples of misuse include, but are not limited to:

• Knowingly running or installing on any computer system or network, or giving to another user, a program intended solely for the purpose of damaging or placing excessive load on a computer system or network. This includes, but is not limited to, computer viruses, Trojan horses, worms, bots, flash programs, or password cracking programs.
• Attempting to circumvent data protection schemes or uncover security loopholes without prior written consent of the system administrator. This includes creating and/or running programs that are designed to identify security loopholes and/or intentionally decrypt secure data.
• Using computers or electronic mail to act abusively toward others or to provoke a violent reaction, such as stalking, acts of bigotry, threats of violence, or other hostile or intimidating “fighting words.” Such words include those terms widely recognized to victimize or stigmatize individuals on the basis of race, ethnicity, religion, sex, sexual orientation, disability, and other protected characteristics.

• Posting on electronic bulletin boards or Web pages materials that violate the University’s codes of conduct (faculty, student). This includes posting information that is slanderous or defamatory in nature or displaying graphically disturbing or sexually harassing images or text in a public computer facility or location that are in view of other individuals.

• Attempting to monitor or tamper with another user’s electronic communications or reading, copying, changing, or deleting another user’s files or software without the explicit agreement of the owner.

• Violating terms of applicable software licensing agreements or copyright laws.

• Using campus networks to gain, or attempt to gain, unauthorized access to any computer system.

• Using a computer account or obtaining a password without appropriate authorization.

• Facilitating or allowing use of a computer account and/or password by an unauthorized person.

• Employing, either directly or by implication, a false identity when using an account or other electronic resources. This includes sending unauthorized mail that appears to come from someone else.

• Performing an act without authorization that will interfere with the normal operation of computers, terminals, peripherals, networks, or will interfere with others’ ability to make use of the resources.

• Using an account for any activity that is commercial in nature not related to work at UCI, such as consulting services, typing services, developing software for sale, advertising products, and/or other commercial enterprises for personal financial gain.

• Deliberately wasting computing resources, such as playing games (for example, MUDS or IRC) while someone else is waiting to use the computer for UCI-related work, sending chain letters, spamming, treating printers like copy machines, storing or moving large files that could compromise system integrity or preclude other users’ right of access to disk storage, and the like.

Consequences of Misuse
Misuse of computing, networking, or information is unacceptable, and users will be held accountable for their conduct. Serious infractions can result in temporary or permanent loss of computing and/or network privileges and/or Federal or State legal prosecution. Appropriate corrective action or discipline may be taken in conformance with applicable personnel policies, student policies, collective bargaining agreements, and procedures established by the Academic Senate. California Penal Code, Section 502 makes certain computer abuses a crime, (such as illegal reproduction of software protected by U.S. copyright law) and penalties can include a fine and/or imprisonment. Files may be subject to search under proper authorization.

Minor infractions of this policy, such as poorly chosen passwords, overloading systems, excessive disk space consumption, are typically handled internally to the department in an informal manner. More serious infractions such as abusive behavior, account invasion or destruction, attempting to circumvent system security, and the like are handled formally through the Office of the Dean of Students or by other appropriate officials.

Contact Information
For additional information, contact the Office of Information Technology by calling 949-824-2222, or by sending e-mail to oit@uci.edu. OIT Help Desk offices are located in Administrative Module B, Building 423 - parking lot 16.

Privacy and Student Records
The University of California campuses maintain various types of records pertaining to students; some are maintained for academic purposes; others, such as hospital and employment records, are maintained for other specific purposes. Student records—that is, those pertaining to students in their capacity as students—include but are not limited to academic evaluations, transcripts, test scores and other academic records, general counseling and advising records, disciplinary records, and financial aid records. At UCI, an “applicant” becomes a “student” at the time of submission of their Statement of Intent to Register form.

The disclosure of information from student records is governed in large measure by the Federal Family Educational Rights and Privacy Act of 1974 (FERPA), by the State of California Education Code, and by University policy and procedures implementing these laws which protect the student’s right of privacy, provide safeguards for the confidentiality of student records, and permit students access to their own records.

Pursuant to the Federal Family Educational Rights and Privacy Act of 1974 and the University of California Policies Applying to the Disclosure of Information from Student Records, students at the University have the following five rights:

1. To inspect and review records pertaining to themselves in their capacity as students
2. To inspect records maintained by the campus of disclosure of personally identifiable information from their student records
3. To seek correction of their student records through a request to amend the records or a request for a hearing
5. To have withheld from disclosure, in the absence of their prior consent for release, personally identifiable information from their student records, with exceptions as noted in the University student records policies.
There are instances in which information can be disclosed without prior written consent of the student. University officials may require access to student records in the course of the performance of their assigned duties. Further, confidential information can be disclosed without prior written consent of the student (a) in connection with conditions of certain financial aid awards; (b) when the campus is complying with a judicial order or subpoena; and (c) when authorized federal or State officials are conducting an audit or evaluation of federally supported educational programs. There are also other situations in which the University is required to disclose information. The *University of California Policies Applying to Campus Activities, Organizations, and Students*, Part B, Section 130.721 contains a list of exceptions.

Normally, the campus will release the following as personally identifiable information which can be made public:

- student’s name
- date and place of birth
- address (local and/or permanent)
- campus e-mail address
- telephone numbers
- dates of attendance
- major field of study
- grade level
- degrees and honors received
- number of course units in which enrolled
- enrollment status, (e.g., undergraduate or graduate, full-time or part-time)
- most recent previous educational institution attended
- participation in officially recognized activities, including intercollegiate athletics
- name, weight, and height of participants on intercollegiate University athletic teams
- photo

However, students have the right to refuse to permit any or all of these categories to be designated public information with respect to themselves. Students should view the UCI Student Information Release Matrix on the University Registrar’s (http://www.reg.uci.edu) website at to see what information is available for release, and what groups may have access to that information.

Students wishing to restrict release of public information should contact the Registrar’s Office for instructions on how to do so.

If a student requests that information from his or her records not be regarded as public information, then the information will not be released to anyone without the written consent of the student. The student should be aware of the important implications of exercising this right. For example, if a request is made to withhold from disclosure a student’s name and degrees and honors received, the campus cannot release for publication information on any honors received by the student, such as election to Phi Beta Kappa, and cannot include the student’s name and degree earned in the campus commencement program without the written consent of the student. Similarly, if a request is made to withhold from disclosure a student’s name and dates of attendance, a student’s status as a student cannot be verified for potential employers without the written consent of the student. Further, if a student’s last instruction to the campus was to withhold from disclosure the degree granted to that student and the date on which the degree was conferred, that information cannot be confirmed for a third party in connection with the appointment of that graduate to a new position or in connection with an honor that individual received without the written consent of the student.

It is extremely important for each student to keep the Registrar’s Office currently informed as personal data changes occur to assure that accurate and complete records are maintained.

Students are informed annually of their rights under the University’s student records policies and FERPA. Copies of the FERPA and University and campus policies are available for review in the Reference Room, Langson Library. In addition, University policies are published in the *University of California Policies Applying to Campus Activities, Organizations, and Students* (http://www.dos.uci.edu/conduct/uci_policy.php).

Complaints regarding alleged violation of the rights accorded students by FERPA may be filed with the University Registrar. A complaint must be made within 180 days of when the alleged violation was discovered (not necessarily when the alleged violation may have occurred). Additionally, a student may file a complaint with the U.S. Department of Education’s Family Policy Compliance Office (http://www2.ed.gov/policy/gen/guid/fpco).

Types and locations of major student records maintained by the campus are listed in the following table; consult the UCI (http://www.uci.edu) website or the Campus Directory or building directories for room numbers.

</table>
NOTE: Pursuant to the Federal Family Educational Rights and Privacy Act of 1974 (FERPA), individual institutions may implement disclosure policies that exceed those outlined in the Act. It should be noted that University of California policies are more restrictive than those outlined in FERPA. The disclosure policies for the UC campuses are outlined in the University of California Policies Applying to Campus Activities, Organizations, and Students, sections 130.00-134.00.

### Nondiscrimination and Sexual Harassment Policy Statements

UC Irvine is committed to creating and maintaining an environment in which all persons who participate in university programs and activities can work and learn together in an atmosphere free of all forms of discrimination and harassment. Such behavior is prohibited by law and university policy. The
university will respond promptly and effectively to reports of discrimination and harassment, and will take appropriate action to prevent, to correct, and when necessary, to discipline behavior that violates university policy.

**Student-Related Matters.** The University of California, in accordance with the applicable Federal and State law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy, physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services. The university also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in university programs and activities.

**Employment Practices.** The University of California prohibits discrimination against or harassment of any person employed by or seeking employment with the university on the basis of race, color, national origin, religion, sex, gender, gender expression, gender identity, pregnancy, physical or mental disability, medical condition (cancer-related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services. The university also prohibits sexual harassment, which is a form of sex discrimination.

Consensual sexual or romantic relationships between members of the university community are subject to other university policies, including the Faculty Code of Conduct and the UCI Policy on Conflicts of Interest Created by Consensual Relationships.

University policy also prohibits retaliation against any employee or person seeking employment for bringing a complaint of discrimination or harassment pursuant to these policies or against a person who assists someone with a complaint of discrimination or harassment, or who participates in any manner in an investigation or resolution of a complaint of discrimination or harassment.

In addition, it is the policy of the university to undertake affirmative action, consistent with its obligations as a Federal contractor, to assure equal employment opportunity for minorities and women, for persons with disabilities, and for protected veterans.

University policy is intended to be consistent with the provisions of applicable State and Federal laws. Inquiries regarding the University’s nondiscrimination and sexual harassment policies may be directed to: Kirsten K. Quanbeck, Associate Vice Chancellor of Equity, Diversity and Inclusion and Sexual Harassment/Title IX Officer/Director of the UCI Office of Equal Opportunity and Diversity, 103 Multipurpose Science and Technology Building, Irvine, CA 92697-1130; oeod@uci.edu; telephone (949) 824-5594 (voice), 824-7593 (TDD).

---

1 Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.
2 "Service in the uniformed services" as defined by the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), as well as state military and naval service.
3 Protected veterans includes veterans with disabilities, recently separated veterans, Vietnam-era veterans, active duty wartime or campaign badge veteran, or Armed Forces service medal veterans.

**Sex Offenses Policy**

UC Irvine is committed to creating and maintaining a community in which all individuals who participate in university programs and activities can work and learn together in an atmosphere free of all forms of harassment, exploitation, or intimidation, including sexual assault, sexual misconduct, domestic violence, dating violence, stalking, and retaliation. Such behavior violates both law and university policy. The university will respond promptly and effectively to reports of sex offenses, and will take appropriate action to prevent, to correct, and when necessary, to discipline behavior that violates university policy.

Questions or reports regarding the University’s policy on sex offenses may be directed to Kirsten K. Quanbeck, Associate Vice Chancellor of Equity, Diversity and Inclusion and Sexual Harassment/Title IX Officer/Director of the UCI Office of Equal Opportunity and Diversity, 103 Multipurpose Science and Technology Building, Irvine, CA 92697-1130; telephone (949) 824-5594 5594 (voice), 824-7593 (TDD); oeod@uci.edu.

Links to the full text of the university policies on Nondiscrimination, Sexual Harassment, the Faculty Code of Conduct, Conflicts of Interest Created by Consensual Relationships, and Sex Offenses are available at the Office of Equal Opportunity and Diversity Policies and Guidelines (http://www.oeod.uci.edu/policy.html) website.
