

Economics, Minor

The minor introduces students to the fundamentals of economic theory and builds basic economic literacy. Students apply economic theory in two upper-division electives of their choosing. The minor is ideal for anyone seeking careers in business, government, law, or non-profits or who simply has interest in economic issues.

Economics Minor Requirements

Requirements for the minor in Economics are met by taking nine courses (36 units) as specified below:

A. Complete the following core courses (28 units):

ECON 15A- 15B	Probability and Statistics in Economics I and Probability and Statistics in Economics II ¹
ECON 20A- 20B	Basic Economics I and Basic Economics II ²
and select one of the following sequences:	
ECON 100A- 100B- 100C	Intermediate Economics I and Intermediate Economic II and Intermediate Economic III
or	
ECON 105A- 105B- 105C	Intermediate Quantitative Economics I and Intermediate Quantitative Economics II and Intermediate Quantitative Economics III

B. Electives (eight units): two upper-division ECON electives (excluding ECON 199). ³

NOTE: Prerequisites for the Economics core courses include MATH 2A-MATH 2B and MATH 4.

¹ MGMT 7 may not be used to substitute for ECON 15A-ECON 15B. Furthermore, students will not receive credit for MGMT 7 if taken after ECON 15A-ECON 15B.

² Note that ECON 20A-ECON 20B is a requirement of both the undergraduate major in Business Administration and the Economics minor.

³ As noted in the Economics courses list (click on the 'Courses' tab at the top of this page), some courses overlap with upper-division courses offered by The Paul Merage School of Business. Where there is overlap, students may use the course to count toward satisfying the upper-division requirements of the Business Administration major or the Economics minor, but not both.
