Program Educational Objectives: Graduates of the program will have the professional and scientific education that allows them to be successful as career engineers and in graduate programs. Specifically, they will be able to (1) function in professional environments in industry, government, and academia applying and building upon engineering science knowledge, problem-solving skills, and communication skills; (2) function as members of teams and in leadership roles applying ethical and inclusive standards including the ASME code of ethics within and beyond traditional Mechanical Engineering disciplines; and (3) remain current with technology and contemporary scientific, environmental and societal issues, and consequently improve skills and knowledge through a lifelong process of learning. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Mechanical Engineering curriculum includes a foundation of mathematics, physics, and chemistry. Engineering courses in fundamental areas constitute much of the remaining curriculum. A few technical electives allow undergraduate students to specialize in Aerospace Engineering, Energy Systems and Environmental Engineering, Flow Physics and Propulsion Systems, and Design of Mechanical Systems or to pursue broader understanding in these areas. A senior capstone design experience culminates the curriculum.

Transfer Students: Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following required courses: two years of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), completion of lower-division writing, one course in general chemistry (with laboratory), and one course in introductory programming.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division coursework may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at 949-824-4334.

All students must meet the University Requirements (http://catalogue.uci.edu/informationforadmittedstudents/requirementsforabachelorsdegree/).

All students must meet the School Requirements (http://catalogue.uci.edu/thehenrysamuelischoolofengineering/#schoolrequirementstext).

Major Requirements

Mathematics and Basic Science Courses:

<td>Introduction to Control Systems</td>
</tr>
</tbody>
</table>

**Technical Elective Courses:**

Students select a minimum of 12 units of technical electives. For students majoring in both Aerospace Engineering and Mechanical Engineering, a core course in one major cannot be counted as a technical elective in the other major. Any upper-division course in the department that is not used for the degree and is not project-based may be used as a technical elective.

At least 8 units of the technical electives must come from ENGRMAE upper-division courses. With approval of the Undergraduate Advisor, students may choose any remaining technical elective units from other departments’ upper-division courses that have primarily technical content.

**Engineering Professional Topics Course:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 20A</td>
<td>Basic Economics I</td>
</tr>
<tr>
<td>or ECON 23</td>
<td>Basic Economics for Engineers</td>
</tr>
<tr>
<td>ENGR 190W</td>
<td>Communications in the Professional World</td>
</tr>
</tbody>
</table>

At most an aggregate total of 4 units of 199 or H199 courses may be used to satisfy degree requirements.

(The nominal Mechanical Engineering program will require 186 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

**Specialization in Aerospace Engineering:**

Completion of a Senior Design Project in this area, and select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGRMAE 112</td>
<td>Propulsion</td>
</tr>
<tr>
<td>ENGRMAE 135</td>

</tr>
<tr>
<td>ENGRMAE 136</td>
<td>Aerodynamics</td>
</tr>
<tr>
<td>ENGRMAE 158</td>
<td>Aircraft Performance</td>
</tr>
<tr>
<td>ENGRMAE 159</td>
<td>Aircraft Design</td>
</tr>
<tr>
<td>ENGRMAE 175</td>
<td>Dynamics and Control of Aerospace Vehicles</td>
</tr>
</tbody>
</table>

**Specialization in Energy Systems and Environmental Engineering:**

Completion of a Senior Design Project in this area, and select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
<tr>
<td>ENGRMAE 117</td>
<td>Solar and Renewable Energy Systems</td>
</tr>
</tbody>
</table>
ENGRMAE 118 Sustainable Energy Systems
ENGRMAE 164 Air Pollution and Control

Specialization in Flow Physics and Propulsion Systems:
Completion of a Senior Design Project in this area, and select two of the following:
ENGRMAE 110 Combustion and Fuel Cell Systems
ENGRMAE 112 Propulsion
ENGRMAE 113 Electric Propulsion
ENGRMAE 132 Computational Fluid Dynamics
ENGRMAE 135 Compressible Flow

Specialization in Design of Mechanical Systems:
Completion of a Senior Design Project in this area, and select two of the following:
ENGR 165 Advanced Manufacturing
ENGRMAE 152 Introduction to Computer-Aided Engineering
ENGRMAE 171 Digital Control Systems
ENGRMAE 172 Design of Computer-Controlled Robots
ENGRMAE 183 Computer-Aided Mechanism Design
ENGRMAE 188 Engineering Design in Industry

Design unit values are indicated at the end of each course description. The faculty advisors and the Student Affairs Office can provide necessary guidance for satisfying the design requirements. Selection of elective courses must be approved by the student’s faculty advisor and the departmental undergraduate advisor.

*ENGR 7A-ENGR 7B is a technical elective, available only to lower-division students in Fall and Winter quarters. Both ENGR 7A & ENGR 7B must be taken to count as a technical elective. If ENGR 7A-ENGR 7B is taken, this will replace one technical elective course in the senior year.

The sample program of study chart shown is typical for the accredited major in Mechanical Engineering. Students should keep in mind that this program is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students should consult with their academic counselor to structure their program of study. Mechanical Engineering majors are encouraged to consult with academic
counselors as needed, and students who are academically at risk are mandated to see a counselor as frequently as deemed necessary by the advising staff.

Students can dual major in Mechanical Engineering and Aerospace Engineering by satisfying the degree requirements for both majors.

- Materials Science and Engineering, B.S.
- Materials Science and Engineering, M.S.
- Materials Science and Engineering, Minor
- Materials Science and Engineering, Ph.D.
